## Broadband Availability/Utilization

### Household \*DEi

-  5.64
-  5.65 - 6.03
-  6.04 - 6.22
-  6.23 - 6.54
-  6.55 - 6.80

Adequate broadband availability (served > 1.5 Mbps) with Household utilization levels (based on \*DEi score)

\*The Digital Economy index (DEi) is a tool to assist in comparing Internet use between regions by various characteristics, such as industry, business size, and household demographics. The DEi composite score summarizes how comprehensively Internet-enabled e-solutions (applications and processes) are utilized to drive efficiencies, innovation, and profitability in a region.

**Disclaimer:** This map and associated information is only as accurate as the source data provided by the broadband service providers participating in this program, and may not be all inclusive of the services provided in a particular area. Furthermore, this map information is updated semi-annually and therefore may not reflect the most current information. Map information is provided on an "As-Is" and "As Available" basis. Neither the OBOD, nor Baker, makes any warranty, representation or guarantee of any kind, express or implied, without limitation, regarding either the accuracy, reliability, timeliness, quality or completeness of mapping or other information provided herein or the sources thereof. Neither the OBOD nor Baker assumes any liability for any errors, omissions, or inaccuracies in the mapping or other information provided herein regardless of the cause of such or any decision made, action taken, or action not taken in reliance upon any maps information provided herein.

**Granularity:** The broadband service area coverage depicted herein has been aggregated to the granularity of either the census block area, or street centerline segment and buffered, depending upon population densities as determined by the U.S. Census Bureau. Service areas are depicted to the entire census block or buffered street segment even if they service only a portion of the census block or street segment, therefore the coverage may be overstated in some areas. Broadband service area coverage for buffered street centerlines may also extend beyond the buffer area, therefore the coverage may be understated in some areas.
