

Integrated Automation - Equipment Pre-Purchase (Mechanical/Electrical)

Division 250000-4

Typically, integrated automation equipment will not be purchased directly by the Division of Engineering and Contract Administration.

The Project Manager shall approve exceptions. (e.g. where the project has a tight construction schedule and pre-purchase could aid in meeting the schedule).

In some cases, equipment may be purchased directly using an existing master agreement through the Finance Cabinet, Office of Procurement Services.

Equipment purchased directly from a non-installing vendor is exempt from Kentucky sales tax. Equipment furnished and installed by a contractor is subject to sales tax.
