

ER High Utilizer

ER High Utilizer

As of PE 201901 (i.e thru October 2018)
DOS from 201711 thru 201810

Each visit is one member with the same date of service, same provider, and same diagnosis code on an ER claim(s).

The Grouper and Center information for the member shown is the current grouper and center for that member, respectively.

** If two or more diagnoses tie for the highest number, the diagnosis shown is selected between them at random. The amount of diagnoses which tie for the "most common" is shown under the MAX DIAGNOSIS COUNT column.

****For Internal Use ONLY****

For Example: The Highest Recurring Diagnosis occurred as many times as the Diagnosis Count indicates. The Max Diagnosis Count shows whether there was more than one Diagnosis occurring an equal number of times. Such that, a person with 10 ER visits and a Diagnosis Count of 3, and with a Max Diagnosis Count of 2 went for the same code three times, as well as, a second code three times.
