(k) Landlord may sell or transfer any of the Leased Premises at any time without Tenant's consent to any third party (each a "Third Party Purchaser"); provided, however, that as part of, and prior to the closing of, such sale or transfer the Third Party Purchaser expressly agrees in writing to assume all of the right, duties and obligations of Landlord under this Lease. Landlord and Third Party Purchaser shall reasonably cooperate with Tenant in connection with any such sale or transfer, including, without limitation, coordinating with Tenant for the return of any then outstanding Letters of Credit so that same may be reissued in favor of the Third Party Purchaser. In the event of any such sale or transfer, Tenant shall attorn to such Third Party Purchaser as Landlord so long as both Third Party Purchaser and Landlord provide Tenant with (i) prior written notice of such transfer, (ii) the address or wiring instructions for where Rent is to be delivered by Tenant and (iii) a revised notice address for Third Party Purchaser (as the successor Landlord) in accordance with Paragraph 24. At the request and cost of Landlord, Tenant will execute such documents confirming the agreement referred to above and such other agreements as Landlord may reasonably request; provided, however, that all such agreements do not increase the liabilities and obligations of Tenant hereunder. In no event shall any of the foregoing limit any rights of Tenant under Paragraph 31.

(a) Notwithstanding anything to the contrary contained in this Paragraph 21, Tenant shall not have the right to assign this Lease (voluntarily or involuntarily, whether by operation of law or otherwise, including through merger or consolidation) or sublet all or any part of any of the Leased Premises to any Person at any time that an Event of Default exists or would exist after giving effect to such assignment or sublet.

(b) Any Letter of Credit delivered to Landlord by a Qualified Transferee shall be held by Landlord as a Security Deposit in accordance with Paragraph 33. If, during any period in which

such a Letter of Credit is held by Landlord, the Basic Rent increases hereunder, Tenant shall, within thirty (30) days after such increase (but subject to Paragraph 2(b) of Exhibit D), increase the amount of such Letter of Credit in proportion to such increase in Basic Rent.

(c) Nothing in this Paragraph 21 or otherwise in this Lease shall prohibit or restrict (i) sub-subleases to Tenant or its Affiliates, or assignments by subtenants under Existing Subleases, if and to the extent permitted under the express terms thereof, or (ii) Tenant from entering into commercially reasonable license agreements and access agreements (and modifications thereof) directly related to operations or occupant services at any Leased Premises, including without limitation car wash and detailing, parking operations, telecommunications equipment, and antenna facilities.

22. Events of Default.

(a) The occurrence of any one or more of the following (after expiration of any applicable cure period) shall, at the sole option of Landlord, constitute an "Event of Default" under this Lease:

(i) a failure by Tenant to pay (x) when due any Basic Rent, regardless of the reason, if any, for such failure (provided that (A) the foregoing shall be subject to Paragraph 2(b) of Exhibit D attached hereto, and (B) Tenant shall be entitled to one (1) five (5) day grace period in any twelve (12) month period for failure to pay Basic Rent (in addition to any additional time provided by Paragraph 2(b) of Exhibit D attached hereto)), and (y) within ten (10) Business Days after the date when due any Additional Rent;

(ii) a failure by Tenant duly to perform and observe, or a violation or breach of, any other provision of this Lease not otherwise specifically mentioned in this Paragraph 22(a), which default continues beyond the date that is thirty (30) days from the date on which Tenant receives notice of such default or, if such default cannot be cured within such thirty (30) day period and delay in the exercise of a remedy would not (in Landlord's reasonable judgment) cause a material adverse harm to Landlord or any of the Leased Premises, the cure period shall be extended for the period required to cure the default (but such cure period, including any extension, shall not in the aggregate exceed two hundred seventy (270) days); provided that Tenant shall commence to cure the default within said thirty (30) day period and shall actively and diligently and in good faith proceed with and continue the curing of the default until it shall be fully cured;

(iii) any representation or warranty made by Tenant herein or in any certificate, demand or request made pursuant hereto, including the Purchase and Sale Agreement, proves to have been fraudulent, when made in any material respect.

(iv) Tenant shall fail to maintain insurance coverage specified in Paragraphs 16(b), 16(c), and 16(d), or timely pay insurance premiums in accordance with Paragraph 16(e);

(v) Tenant shall enter into a transaction or series of transactions in violation of Paragraph 21, where such transaction or series of transactions are not rescinded within ten (10) days following such violation;

(vi) Subject to Tenant's right to enter into Subleases pursuant to Paragraph 21 (provided that Tenant is in compliance with the provisions thereof), (A) Tenant shall fail to occupy and use substantially all of any of the Leased Premises for a use permitted in accordance with Paragraph 4, or (B) Tenant shall have ceased operations at and/or abandoned any of the Leased Premises, except in each of (A) and (B) for temporary failures, cessations and/or abandonments due to business realignment (not to exceed one hundred twenty (120) days), or Casualty, Condemnation, or Alterations (without limiting the requirements set forth in this Lease regarding Casualty, Condemnation and Alterations).

(vii) Tenant shall fail to deliver the estoppel certificate described in Paragraph 25 within the time period specified therein;

(viii) if all of the following occur: (a) Tenant or any Guarantor defaults, after any applicable notice or cure periods, under any provision of its Senior Credit Facility (if any), and (b) the lender under such Senior Credit Facility accelerates the maturity of all indebtedness evidenced thereby as a result of such default pursuant to the terms of such Senior Credit Facility;

(ix) a final, non-appealable judgment for the payment of money in excess of Two Hundred Fifty Thousand Dollars ($250,000) shall be rendered against Tenant or any Guarantor and the same shall remain undischarged for a period of sixty (60) consecutive days following receipt of written notice regarding such final, non-appealable judgment by either (a) a licensed attorney at law who is employed in the in-house legal department of such Tenant or Guarantor, or (b) the chief executive officer, chief financial officer, or chief operations officer of such Tenant or Guarantor;

(x) Tenant or any Guarantor shall (A) voluntarily be adjudicated as bankrupt or insolvent, (B) seek or consent to the appointment of a receiver or trustee for itself or for any of the Leased Premises, (C) file a petition seeking relief under the bankruptcy or other similar laws of the United States, any state or any jurisdiction, (D) make a general assignment for the benefit of creditors, or (E) be unable to pay its debts as they mature; provided, however, that none of the foregoing events with respect to any Guarantor shall be an Event of Default if Tenant delivers to Landlord within thirty (30) days thereafter a Replacement Guaranty;

(xi) a court shall enter an order, judgment or decree appointing, without the consent of Tenant or any Guarantor, a receiver or trustee for it or for any of the Leased Premises or approving a petition filed against Tenant or any Guarantor which seeks relief under the bankruptcy or other similar laws of the United States, any state or any jurisdiction, and such order, judgment or decree shall remain undischarged or unstayed ninety (90) days after it is entered; provided, however, that none of the foregoing events with respect to any Guarantor shall be an Event of Default if Tenant delivers to Landlord within thirty (30) days thereafter a Replacement Guaranty;

(xii) Tenant or any Guarantor shall be liquidated or dissolved or shall intentionally begin proceedings towards its liquidation or dissolution; provided, however, that none of the foregoing events with respect to any Guarantor shall be an Event of Default if Tenant delivers to Landlord within thirty (30) days thereafter a Replacement Guaranty

(xiii) the estate or interest of Tenant in any of the Leased Premises shall be levied upon or attached in any proceeding and such estate or interest is about to be sold or transferred and such process shall not be vacated or discharged within ninety (90) days after it is made;

(xiv) any Guarantor shall (A) fail to perform its obligations under the Guaranty, subject to any applicable notice, cure and grace periods set forth herein or in any Guaranty or (B) take any action that causes the Guaranty to terminate or be unenforceable for any reason (other than (1) as expressly permitted pursuant to Paragraph 21, and (2) as described in clauses (x), (xi) or (xii) of this Paragraph 22); or

(xv) the failure of any Qualified Transferee to maintain and replenish, if required under the terms of this Lease, any Letter of Credit delivered by such Qualified Transferee; provided, however, that the foregoing shall be subject to Paragraph 2(b) of Exhibit D and shall not be an Event of Default if Qualified Transferee posts cash collateral in favor of Landlord so that the amount of such cash collateral plus the amount of any Letter of Credit equals the amount otherwise required under the Letter of Credit.

23. Remedies and Damages Upon Default.

(a) If an Event of Default shall have occurred and is continuing, Landlord shall have the right, at its sole option, then or at any time thereafter, to exercise its remedies and to collect damages from Tenant in accordance with this Paragraph 23, without demand upon or notice to Tenant except as otherwise provided in this Paragraph 23 or under any applicable Legal Requirements.

(b) If an Event of Default shall have occurred and is continuing, Landlord may give Tenant notice of Landlord's intention to terminate this Lease on a date specified in such notice. Upon such date, this Lease, the estate hereby granted and all rights of Tenant hereunder shall expire and terminate. Upon such termination, Tenant shall immediately surrender and deliver possession of all of the Leased Premises to Landlord. If Tenant does not so surrender and deliver possession of all of the Leased Premises, Landlord may re-enter and repossess all or any of the Leased Premises not surrendered. Notwithstanding such termination of this Lease, Tenant's liability under this Lease shall continue unaffected.

(c) If an Event of Default shall have occurred and is continuing, Landlord may terminate Tenant's right of possession (but not this Lease) and may repossess all or any of the Leased Premises without terminating this Lease. After repossession of such Leased Premises pursuant hereto, Landlord shall have the right to re-let such Leased Premises to such tenant or tenants, for such term or terms, for such rent, on such conditions and for such uses as Landlord in its sole discretion may determine, and collect and receive any rents payable by reason of such re-letting. Landlord may make such repairs or alterations in connection with such re-letting as it may deem advisable in its sole discretion. If Tenant shall, during the continuance of an Event of Default, voluntarily give up possession of such Leased Premises to Landlord, deliver to Landlord or its agents the keys to such Leased Premises, or both, such actions shall not in any respect diminish Landlord's rights hereunder and the acceptance thereof by Landlord or its agents shall not be deemed to constitute a termination of this Lease. Landlord reserves the right following any reentry and/or re-letting to exercise its

right to terminate this Lease by giving Tenant written notice thereof, in which event this Lease will terminate as specified in said notice; provided, however, that no notice from Landlord hereunder or under a forcible entry and detainer statute or similar law shall constitute an election by Landlord to terminate this Lease unless such notice specifically so states.

(d) If Landlord terminates this Lease pursuant to Paragraph 23(b), Landlord may accelerate Rent due hereunder by electing to require Tenant to pay to Landlord, upon written demand by Landlord, as liquidated and agreed final damages for Tenant's default and in lieu of all current damages beyond the date of such demand (it being agreed that it would be impracticable or extremely difficult to fix the actual damages), an amount equal to the Present Value of the excess, if any, of (A) the sum of all Basic Rent, Additional Rent and other sums which would be payable under this Lease by Tenant from the date of such demand to the date on which the Term is scheduled to expire hereunder in the absence of any earlier termination, re-entry or repossession over (B) the then aggregate fair market rent for the Leased Premises for the same period. Tenant shall also pay to Landlord all accrued Rent then due and unpaid, all other amounts payable by Tenant under this Lease which are then due and unpaid, all amounts which arise or become due by reason of Tenant's default hereunder, including any costs of Landlord in connection with the repossession of such Leased Premises, the removal of all personal property therefrom, and any attempted re-letting or sale thereof, including all brokerage commissions, legal expenses, reasonable attorneys' fees, employees' expenses, reasonable costs of repairs and alterations and reasonable expenses and reasonable preparation for re-letting or sale together with interest thereon at the Default Rate.

(e) If Landlord terminates this Lease pursuant to Paragraph 23(b) and elects not to pursue the remedy available to Landlord under in Paragraph 23(d), or terminates Tenant's right to possession of all or any of the Leased Premises pursuant to Paragraph 23(c), Tenant shall, until the end of what would have been the Term in the absence of any termination of this Lease, and whether or not any of such Leased Premises shall have been re-let, be liable to Landlord for, and shall pay to Landlord, as liquidated and agreed current damages all Basic Rent, Additional Rent and other sums which would be payable under this Lease by Tenant in the absence of such termination as the same would have been due, less the net proceeds, if any, of any re-letting

pursuant to Paragraph 23(c), after deducting from such proceeds all accrued Rent then due and unpaid, all other amounts payable by Tenant which are then due and unpaid, all obligations of Tenant which arise or become due by reason of such Event of Default, including any costs of Landlord incurred in connection with such repossessing and re-letting, including the cost of removal of all personal property from such Leased Premises, all brokerage commissions, reasonable attorneys' fees, expenses and preparation for re-letting together with interest thereon at the Default Rate if not paid within five (5) Business Days after demand therefor.

Tenant's Initials: _____ Landlord's Initials: _____

(f) Landlord may recover from Tenant all costs and expenses, including attorneys' fees, court costs, expert witness fees, costs of tests and analyses, travel and accommodation expenses, deposition and trial transcripts, copies and other similar costs and fees, paid or incurred by Landlord as a result of an Event of Default, regardless of whether or not legal proceedings are actually commenced.

(g) During the continuance of any Event of Default, Landlord may, and with or without notice, except as required herein, set off any money of Tenant or Guarantor, if any, held by Landlord under this Lease or the Guaranty, if any, against any sum owing by Tenant or Guarantor, if any, hereunder.

(h) During the continuance of an Event of Default, Landlord shall have the remedy described in California Civil Code Section 1951.4 (Landlord may continue the Lease in effect after Tenant breach and abandonment and recover rent as it becomes due, if Tenant has the right to sublet or assign, subject only to reasonable limitations). Accordingly, if Landlord does not elect to terminate this Lease on account of any Event of Default, Landlord may, from time to time, without terminating this Lease, enforce all of its rights and remedies under this Lease, including the right to recover all rent as it becomes due.

(i) Notwithstanding anything to the contrary herein contained, in lieu of or in addition to any of the foregoing remedies and damages, Landlord may exercise any remedies and collect any damages available to it at law or in equity during the continuance of an Event of Default. During the continuance of an Event of Default, if Landlord is unable to obtain full satisfaction pursuant to the exercise of any remedy, it may pursue any other remedy which it has hereunder or at law or in equity, including, without limitation, specific performance.

(j) Landlord shall not be required to mitigate any of its damages hereunder unless required to by any applicable Legal Requirement. If any applicable Legal Requirement shall validly limit the amount of any damages provided for herein to an amount which is less than the amount agreed to herein, Landlord shall be entitled to the maximum amount available under such Legal Requirement.

(k) No termination of this Lease, repossession or re-letting of any of the Leased Premises, exercise of any remedy or collection of any damages pursuant to this Paragraph 23 shall relieve Tenant of any obligations of Tenant which survive such expiration or termination by their own terms.

(l) WITH RESPECT TO ANY REMEDY OR PROCEEDING OF LANDLORD OR TENANT HEREUNDER, LANDLORD AND TENANT EACH HEREBY WAIVES THE SERVICE OF NOTICE WHICH MAY BE REQUIRED BY AN APPLICABLE LAW AND WAIVES ANY RIGHT TO A TRIAL BY JURY TO THE FULLEST EXTENT NOW OR HEREAFTER PERMITTED BY APPLICABLE LAW.

(m) During the continuance of any Event of Default, Landlord shall have the right (but no obligation) to perform any act required of Tenant hereunder and charge to Tenant all costs and expenses incurred in connection therewith, together with interest at the Default Rate, which amount shall be deemed Additional Rent and shall be immediately due and payable to Landlord. If performance of such act requires that Landlord enter any of the Leased Premises, Landlord may enter such Leased Premises for such purpose.

(n) During the continuance of any Event of Default, Tenant hereby waives and surrenders, for itself and all those claiming under it, including creditors of all kinds: (i) any right and privilege which it or any of them may have under any present or future Legal Requirement to redeem any of the Leased Premises or to have a continuance of this Lease after termination of this Lease or of Tenant's right of occupancy or possession pursuant to any court order or any provision hereof; and (ii) the benefits of any present or future Legal Requirement which exempts property from liability for debt or for distress for rent.

(o) During the continuance of any Event of Default, Tenant shall be and remain liable for all sums aforesaid, and Landlord may recover such damages from Tenant and institute and maintain successive actions or legal proceedings against Tenant for the recovery of such damages. Nothing herein contained shall be deemed to require Landlord to wait to begin such action or other legal proceedings until the date when the Term would have expired by its own terms had there been no such Event of Default.

(p) Except as otherwise provided herein, all remedies are cumulative and concurrent and no remedy is exclusive of any other remedy. Each remedy may be exercised at any time an Event of Default has occurred and is continuing and may be exercised from time to time. No remedy shall be exhausted by any exercise thereof.

(q) Except as otherwise expressly set forth in this Lease, in the event Tenant remains in possession of any of the Leased Premises after the expiration of this Lease, and without the written consent of Landlord, Tenant, at the option of Landlord, shall be deemed to be occupying such Leased Premises as a tenant from month to month, subject to all the conditions, provisions and obligations of this Lease, at one hundred fifty percent (150%) of the Basic Rent. Except as otherwise expressly set forth in this Lease, Tenant shall also pay and perform, during the period of any such holdover, all other costs and obligations imposed upon Tenant by this Lease, including, without limitation, payment of all real estate taxes, maintenance of all required insurance coverages and all other maintenance and repair obligations hereunder. In the event that Landlord does not consent to Tenant's holding over after the expiration of this Lease, Tenant shall defend, indemnify, protect and hold harmless Landlord and its directors, officers, employees, agents and lenders from and against any and all losses, costs and expenses resulting from Tenant's failure to surrender possession of such Leased Premises upon the expiration of the Term, including, without limitation, any claims

made by any succeeding tenant due to its inability to take possession of such Leased Premises in a timely manner.

(r) No failure by either Landlord or Tenant to insist upon the strict performance by the other of any covenant, agreement, term or condition of this Lease, or to exercise any right or remedy consequent upon a breach thereof, and no acceptance of full or partial payment of Rent or other monetary obligation during the continuance of any such breach shall constitute a waiver of any such breach or of such covenant, agreement, term or condition. No consent or waiver, express or implied, by either Landlord or Tenant to or of any breach by the other of any covenant, condition or duty under this Lease shall be construed as a consent or waiver to or of any other breach of the same or any other covenant, condition or duty, unless in writing signed by the Party waiving same.

(s) Notwithstanding anything to the contrary contained in this Lease, in no event shall Landlord or Tenant have the right to seek or receive special, punitive or other similar measures of damages against the other nor shall Landlord or Tenant be entitled to receive any consequential, indirect or speculative damages, and each Party hereby irrevocably waives, for itself and its successors and assigns, its right to seek or receive any such measure of damages or remedy.

24. Notices.

All notices, demands, requests, consents, approvals, offers, statements and other instruments or communications required or permitted to be given pursuant to the provisions of this Lease shall be in writing and shall be deemed to have been given and received for all purposes when delivered in person or by Federal Express or other reliable 24-hour delivery service or five (5) Business Days after being deposited in the United States mail, by registered or certified mail, return receipt requested, postage prepaid, addressed to the other Party at the address set forth below or when delivery is refused, and such notices shall be addressed as follows:

Attn: Edward Prokop, Esq.

For the purposes of this Paragraph, any Party may substitute another address stated above (or substituted by a previous notice) for its address by giving ten (10) days' notice of the new address to the other Party, in the manner provided above. Any notices to be provided by Landlord under this Paragraph 24 shall be in lieu of, and not in addition to, any notice required under Section 1161 *et seq.* of the California Code of Civil Procedure.

25. Estoppel Certificate.

At any time upon not less than ten (10) Business Days' prior written request by either Landlord or Tenant (the " Requesting Party") to the other Party (the "Responding Party"), the Responding Party shall deliver to the Requesting Party a statement in writing, executed by an authorized officer of the Responding Party, certifying (a) that, except as otherwise specified, this Lease is unmodified and in full force and effect, (b) the dates to which Rent has been paid, (c) that, to the knowledge of the signer of such certificate and except as otherwise specified, no default by either Landlord or Tenant exists hereunder, (d) such other matters as the Requesting Party may reasonably request, and (e) if Tenant is the Responding Party that, except as otherwise specified, there are no proceedings pending or, to the knowledge of the signer, threatened, against Tenant before or by a court or administrative agency which, if adversely decided, would materially and adversely affect the financial condition and operations of Tenant. Any such statements by the Responding Party may be relied upon by the Requesting Party, any Person whom the Requesting Party notifies the Responding Party in its request for the certificate is an intended recipient or beneficiary of the certificate, any Lender or their assignees and by any prospective purchaser or mortgagee of any of the Leased Premises. Any certificate required under this Paragraph 25 and delivered by Tenant shall state that, in the opinion of each person signing the same, he or she has

made such examination or investigation as is necessary to enable him or her to express an informed opinion as to the subject matter of such certificate.

26. Surrender.

On the date of the expiration or earlier termination of this Lease, Tenant shall peaceably leave and surrender the Leased Premises to Landlord in the same condition in which the Leased Premises were at the commencement of this Lease, except as repaired, rebuilt, restored, altered, replaced or added to as permitted or required by any provision of this Lease, and ordinary wear and tear excepted. Upon such surrender, Tenant shall (a) remove from the Leased Premises all property which is owned by Tenant or third parties (not including any property owned by Landlord or any Alterations) and (b) repair any damage caused by such removal. Property not so removed shall become the property of Landlord, and Landlord may thereafter cause such property to be removed from any of the Leased Premises. The costs of removing and disposing of such property and repairing any damage to any of the Leased Premises caused by such removal shall be paid by Tenant to Landlord upon demand. Landlord shall not in any manner or to any extent be obligated to reimburse Tenant for any such property which becomes the property of Landlord pursuant to this Paragraph 26. The obligations, duties and rights of the parties set forth in this Paragraph 26 shall survive the expiration or termination of this Lease.

27. No Merger of Title.

There shall be no merger of the leasehold estate created by this Lease with the fee estate in any of the Leased Premises by reason of the fact that the same Person may acquire or hold or own, directly or indirectly, (a) the leasehold estate created hereby or any part thereof or interest therein and (b) the fee estate in any of the Leased Premises or any part thereof or interest therein, unless and until all Persons having any interest in the interests described in (a) and (b) above which are sought to be merged shall join in a written instrument effecting such merger and shall duly record the same.

28. Books and Records.

(a) Tenant shall keep adequate records and books of account with respect to the finances and business of Tenant generally and with respect to each of the Leased Premises, in accordance with generally accepted accounting principles consistently applied (" GAAP") (with the exception that quarterly statements do not need to include footnotes), and shall permit Landlord and Lender by their respective agents, accountants and attorneys, upon reasonable notice to Tenant, to visit and inspect any of the Leased Premises and examine (and make copies of) the records and books of account and to discuss the finances and business with the officers of Tenant and Sponsor, if any, at such reasonable times as may be requested by Landlord. Upon the request of Lender or Landlord (either telephonically or in writing), Tenant shall provide the requesting party with copies of any information to which such party would be entitled in the course of a personal visit.

(b) Subject to subparagraph (c) below, Tenant shall deliver to Landlord within ninety (90) days of the close of each fiscal year, annual audited consolidated financial statements of Tenant or, if Tenant is a wholly-owned Subsidiary of a Guarantor, if any, annual audited consolidated

financial statements of such Guarantor, prepared by nationally recognized independent certified public accountants. Tenant shall also furnish to Landlord within forty-five (45) days after the end of each of the three remaining quarters unaudited financial statements and all other quarterly reports of Tenant or Guarantor, as applicable, certified by such reporting party's chief financial officer. All financial statements delivered to Landlord pursuant to this Paragraph 28(b) shall be prepared in accordance with GAAP. All annual financial statements shall be accompanied (i) by an opinion of said accounting firm stating that (A) there are no qualifications as to the scope of the audit and (B) the audit was performed in accordance with GAAP and (ii) by the affidavit of the president, chief financial officer or vice president of finance of the reporting party dated within five (5) days of the delivery of such statement, stating that (A) the affiant knows of no Event of Default, or event which, upon notice or the passage of time or both, would become an Event of Default which has occurred and is continuing hereunder or, if any such event has occurred and is continuing, specifying the nature and period of existence thereof and what action Tenant or any Guarantor, as the case may be, has taken or proposes to take with respect thereto, (B) except as otherwise specified in such affidavit, that Tenant has fulfilled all of its obligations under this Lease which are required to be fulfilled on or prior to the date of such affidavit and (C) unless Tenant is a public recording company, Tenant shall promptly deliver to Landlord copies of (i) any additional reporting information provided to Tenant's lenders and (ii) such credit agreements and other loan documents entered into by Tenant as Landlord may reasonably request.

(c) If Tenant or any Guarantor is a public reporting company, the annual and quarterly financial reporting delivery requirements set forth in Paragraph 28(b) shall be waived by Landlord so long as Tenant, or Guarantor, as the case may be, timely files with the Securities and Exchange Commission, for the applicable reporting periods, its Form 10-K, Form 10-Q and other required filings pursuant to the provisions of the Securities Exchange Act of 1934, as amended and any other applicable Law.

29. Non-Recourse as to Landlord.

Anything contained herein to the contrary notwithstanding, any claim based on or in respect of any liability of Landlord under this Lease shall be limited to actual damages and shall be enforced only against the Leased Premises and not against any other assets, properties or funds of (a) Landlord, (b) any director, member, officer, general partner, limited partner, employee or agent of Landlord (or any legal representative, heir, estate, successor or assign of any thereof), (c) any predecessor or successor partnership, corporation, limited liability company (or other entity) of Landlord, or any of its general partners, members or shareholders, or (d) any other affiliate of Landlord.

30. Financing.

(a) Tenant agrees to pay, within three (3) Business Days after written demand therefor, any Cost imposed upon Landlord by Lender pursuant to the Note, the Mortgage or the Assignment which is caused by an Event of Default by Tenant under this Lease and which is not otherwise reimbursed by Tenant to Landlord pursuant to any other provision of this Lease.

(b) If Landlord desires to obtain or refinance any Loan, Tenant shall agree, upon request of Landlord, to supply any such Lender with such notices and information as Tenant is required to

give to Landlord hereunder, and to execute a commercially reasonable modification to this Lease so long as such modification does not materially and adversely affect any right, benefit or privilege of Tenant under this Lease or materially increase Tenant's obligations under this Lease. Tenant shall also provide, upon the written request of such Lender, an SNDA, so long as such SNDA does not materially and adversely affect any right, benefit or privilege of Tenant under this Lease or materially increase Tenant's obligations under this Lease.

31. Subordination, Non-Disturbance and Attornment.

(a) This Lease shall be subject and subordinate to the lien of any Mortgage now or hereafter in force against either of the Leased Premises, and Tenant covenants and agrees in the event any proceedings are brought for the foreclosure of any Mortgage to which this Lease is subordinate, to attorn, to the purchaser upon any such foreclosure sale, if so requested to do so by such purchaser, and to recognize such purchaser as the case may be, as the lessor under this Lease; provided, however, that the foregoing subordination to the lien of any future Mortgage in force against the Leased Premises, and attornment to the purchaser upon any such foreclosure sale, shall each be conditioned upon Landlord providing Tenant with a subordination, non disturbance and attornment agreement in favor of Tenant in the form attached hereto as Exhibit J, or other commercially reasonable form (either, an "SNDA") requested by Landlord that provides, without limitation, that this Lease and the rights of Tenant hereunder shall survive any foreclosure proceeding brought under such Mortgage. Without limiting the foregoing, as of the Effective Date, each of Landlord, Lender, and Tenant shall execute and deliver to each other an SNDA in the form attached hereto as Exhibit J.

(b) In addition to Tenant's rights under Paragraph 34, if requested by a lender ("Secured Lender") holding or obtaining a security interest in any personal property of Tenant ("Secured Property") that is located at the Leased Premises, Landlord shall enter into such reasonable and customary documentation as the Secured Lender shall reasonably request, including a subordination of any statutory lien that Landlord may have in such Secured Property and permitting such Secured Lender reasonable access to the Leased Premises for the purpose of enforcing such Secured Lender's lien with respect to such Secured Property.

32. Tax Treatment; Reporting.

Landlord and Tenant each acknowledges that each shall treat this transaction as a true lease for state law purposes and shall report this transaction as a lease for federal income tax purposes. For federal income tax purposes each Party shall report this Lease as a true lease with Landlord as the owner of all of the Leased Premises and Tenant as the lessee of such Leased Premises including: (i) treating Landlord as the owner of any of the Improvements and Equipment eligible to claim depreciation deductions under Section 167 or 168 of the Internal Revenue Code of 1986 (the "Code") with respect to such Improvements and Equipment, (ii) Tenant reporting its Rent payments as rent expense under Sections 162 and Section 467 of the Code, as applicable, and (iii) Landlord reporting the Rent payments as rental income. Notwithstanding the foregoing, nothing contained herein shall (a) require Landlord or Tenant to take any action that would be inconsistent with the requirements of GAAP or violate any state or federal law, or (b) be deemed to constitute a guaranty, warranty or representation by either Landlord or Tenant as to the actual treatment of this transaction for state

or federal tax purposes of for purposes of accounting or financial reporting, including but not limited to the determination as to whether this Lease shall qualify for sale-leaseback accounting treatment or whether this Lease shall be properly classified as an operating lease or finance lease in accordance with GAAP.

33. Security Deposit.

(a) On the Commencement Date, Tenant shall not be required to deliver to Landlord any Letter of Credit or security deposit. If in the future, a Letter of Credit is delivered to Landlord pursuant to the provisions of Paragraph 14 or Paragraph 21, such Letter of Credit shall be held by Landlord as a security deposit (the "Security Deposit") and the terms of this Paragraph 33 shall apply. Thereafter, the Security Deposit shall remain in full force and effect during the Term as security for the payment by Tenant of the Rent and all other charges or payments to be paid hereunder and the performance of the covenants and obligations contained herein. In the event Landlord holds any cash Security Deposit hereunder, Landlord shall hold it in trust in a separate, interest-bearing account, and any interest earned thereon shall be added to the Security Deposit.

(b) Upon any adjustment of Basic Rent pursuant to Exhibit D, Tenant shall not later than thirty (30) days after Landlord delivers written notice of such adjustment, adjust the amount of the Letter of Credit, if any, to maintain the Security Deposit in an amount equal to the amount of eighteen (18) months of Basic Rent (or twelve (12) months of Basic Rent, if the original amount of the Letter of Credit required hereunder was twelve (12) months of Basic Rent). The Letter of Credit shall be renewed at least sixty (60) days prior to any expiration thereof. If Tenant fails to renew the Letter of Credit by such date, Landlord shall have the right at any time after the thirtieth (30^{th}) day before such expiration date, and after providing Tenant with five (5) days' prior written notice, to draw on the Letter of Credit and to deposit the proceeds of the Letter of Credit as a cash Security Deposit.

(c) If at any time (except any time during which Landlord is already holding a Cash Security Deposit) the Security Deposit does not meet the requirements of the definition of Letter of Credit, as set forth herein, or if the financial condition of the issuer of such Letter of Credit changes in any other materially adverse way, as determined by Landlord in its reasonable discretion, then Tenant within thirty (30) days after written notice from Landlord shall deliver to Landlord a Replacement Letter of Credit. Tenant's failure to deliver any such Replacement Letter of Credit shall entitle Landlord to immediately draw under the Letter of Credit and hold the proceeds thereof as a cash Security Deposit.

(d) In the event that the issuer of any Letter of Credit is insolvent or is placed into receivership or conservatorship by the Federal Deposit Insurance Corporation, or any successor or similar entity, of if a trustee, receiver or liquidator is appointed for the issuer, then, effective as of the date of such occurrence, such Letter of Credit shall be deemed not to meet the requirements of the definition of Letter of Credit, as set forth herein, and Tenant shall within thirty (30) days after written notice from Landlord deliver to Landlord a Replacement Letter of Credit. Tenant's failure to deliver any such Replacement Security Deposit shall entitle Landlord to immediately draw under the Letter of Credit and hold the proceeds thereof as a cash Security Deposit.

(e) If at any time an Event of Default shall have occurred and be continuing, Landlord shall be entitled, at its sole and absolute discretion, to draw on the Letter of Credit or to withdraw the cash Security Deposit, as the case may be, and apply the proceeds in payment of any Rent that is then due and payable (but in no event shall Landlord apply any Security Deposit funds to prepay any Rent). Tenant further acknowledges and agrees that (1) Landlord's application of the proceeds of the Letter of Credit or cash Security Deposit towards the payment of Rent that is then due and payable constitutes a fair and reasonable use of such proceeds and (2) the application of such proceeds by Landlord towards the payment of Rent that is then due and payable shall not constitute a cure by Tenant of the applicable default (except any default in the payment of such Rent); provided, however, that an Event of Default shall not exist if Tenant restores the Security Deposit to its full amount within five (5) Business Days and in accordance with the requirements of this Paragraph 33, so that the original amount of the Security Deposit shall be again on deposit with Landlord.

(f) So long as no Event of Default then exists, the Letter of Credit or the cash Security Deposit, as the case may be, shall be returned to Tenant within thirty (30) days after the expiration of the Term.

(g) Tenant waives all provisions of Laws, now or hereinafter in force, that restrict the amount or types of claim that a landlord may make upon a security deposit or imposes upon a landlord (or its successors) any obligation with respect to the handling or return of security deposits, including, without limitation, California Civil Code Section 1950.7 (including waiving the return of the security deposit until such time as the amount of such landlord's damages, including those under California Civil Code Section 1951.2, has been determined).

34. Permitted Leasehold Mortgages.

Notwithstanding Paragraph 21 above, but subject to the terms of this Paragraph 34, Landlord agrees that Tenant shall have the right to encumber, pledge or hypothecate Tenant's interest in the leasehold estate created by this Lease (a "Leasehold Mortgage", and the holder of any such Leasehold Mortgage, a "Leasehold Mortgagee"). All proceeds from any Leasehold Mortgage shall remain the property of Tenant. Landlord shall not be obligated to subordinate any or all of Landlord's right, title or interest in and to the Leased Premises and this Lease to the lien of any Leasehold Mortgage. A Leasehold Mortgage shall encumber only Tenant's leasehold interest in the Leased Premises, and shall not encumber Landlord's right, title or interest in the Leased Premises. Landlord shall have no liability whatsoever for the payment of any obligation secured by any Leasehold Mortgage or related obligations. No Leasehold Mortgage shall be for a term longer than the Term of this Lease. Either prior to or concurrently with the recordation of any Leasehold Mortgage, Tenant shall cause a fully conformed copy thereof and of the financing agreement secured thereby to be delivered to Landlord and its Lender, together with a written notice containing the name and post office address of Leasehold Mortgagee. Upon written request from Tenant, Landlord agrees to deliver an estoppel certificate in favor of Leasehold Mortgagee regarding this Lease, in form and substance reasonably acceptable to Leasehold Mortgagee. If Landlord delivers to Tenant a notice of a default or an Event of Default under this Lease, Landlord shall concurrently notify any Leasehold Mortgagee that has delivered to Landlord a prior written request for such notice, and Landlord shall recognize and accept the performance of any obligation of Tenant hereunder by Leasehold Mortgagee; provided, however that nothing contained herein shall obligate Leasehold Mortgagee to take any such actions.

Landlord also hereby agrees, upon request by Tenant or any Leasehold Mortgagee, to enter into a commercially reasonable agreement with such Leasehold Mortgagee that may provide, without limitation (a) Landlord's waiver of any Landlord's lien or other claim against any property of Tenant, (b) that Landlord shall not terminate or amend the Lease without the prior written consent of the Leasehold Mortgagee, (c) that Leasehold Mortgagee shall have the right, but not the obligation, to pay and perform all obligations of Tenant under this Lease, and all obligations of any Guarantor under any Guaranty, (d) that upon any termination of the Lease, Leasehold Mortgagee shall have the right to a new lease with Landlord, for the remainder of the Term of the Lease, and otherwise with the same covenants, conditions and agreements as are contained in the Lease, and (e) that Leasehold Mortgagee shall have rights to enter upon the Leased Premises to remove Tenant's personal property following any default under the Leasehold Mortgage, provided, however that Leasehold Mortgager shall maintain adequate insurance and satisfy Tenant's obligation to pay Basic Rent during such period of possession, not to exceed ninety (90) days, which ninety (90)-day period will be tolled in the event of an applicable bankruptcy proceeding. This Paragraph shall survive termination of this Lease.

35. Tenant Bankruptcy.

(a) As a material inducement to Landlord executing this Lease, Tenant acknowledges and agrees that Landlord is relying upon (i) the financial condition and specific operating experience of Tenant and Tenant's obligation to use each of the Leased Premises specifically for the Permitted Use, (ii) Tenant's timely performance of all of its obligations under this Lease notwithstanding the entry of an order for relief under the Bankruptcy Code for Tenant and (iii) all defaults under this Lease being cured promptly and this Lease being assumed within sixty (60) days of any order for relief entered under the Bankruptcy Code for Tenant, or this Lease being rejected within such sixty (60) day period and the entire Leased Premises surrendered to Landlord.

(b) Accordingly, in consideration of the mutual covenants contained in this Lease and for other good and valuable consideration, Tenant hereby agrees that:

(i) All obligations that accrue or become due under this Lease (including the obligation to pay Rent), from and after the date that a petition is filed under the Bankruptcy Code, a proceeding under any similar law or statute relating to bankruptcy, insolvency, reorganization, winding up or adjustment of debts is initiated (collectively, an "Action") shall be timely performed exactly as provided in this Lease and any failure to so perform shall be harmful and prejudicial to Landlord;

(ii) Any and all obligations under this Lease that accrue or become due from and after the date that an Action is commenced and that are not paid as required by this Lease shall, in the amount of such rents, constitute administrative expense claims allowable under the Bankruptcy Code with priority of payment at least equal to that of any other actual and necessary expenses incurred after the commencement of the Action;

(iii) Any extension of the time period beyond one-hundred twenty (120) day period, subject to an additional ninety (90) day period for good cause shown, within which Tenant may assume or reject this Lease without an obligation to cause all obligations accruing or coming

due under this Lease from and after the date that an Action is commenced to be performed as and when required under this Lease shall be harmful and prejudicial to Landlord;

(iv) Any time period designated as the period within which Tenant must cure all defaults and compensate Landlord for all pecuniary losses which extends beyond the date of assumption of this Lease shall be harmful and prejudicial to Landlord;

(v) Any assignment of this Lease must result in all terms and conditions of this Lease being assumed by the assignee without alteration or amendment, and any assignment which results in an amendment or alteration of the terms and conditions of this Lease without the express written consent of Landlord shall be harmful and prejudicial to Landlord;

(vi) Any proposed assignment of this Lease to an assignee: (a) that will not use any of the Leased Premises specifically for the Permitted Use, (b) that does not possess financial condition, operating performance and experience characteristics equal to or better than the financial condition, operating performance and experience of the Tenant as of the Commencement Date, or (c) that does not provide guarantors of the Tenant's obligations hereunder with financial condition equal to or better than the financial condition of the original guarantors of this Lease as of the Commencement Date, shall be harmful and prejudicial to Landlord;

(vii) The rejection (or deemed rejection) of this Lease for any reason whatsoever shall constitute cause for immediate relief from the automatic stay provisions of the Code, and Tenant stipulates that such automatic stay shall be lifted immediately and possession of the entire Leased Premises will be delivered to Landlord within a commercially reasonable time (as the court shall determine) without the necessity of any further action by Landlord;

(viii) No provision of this Lease shall be deemed a waiver of Landlord's rights or remedies under the Bankruptcy Code or applicable Law to oppose any assumption and/or assignment of this Lease, to require timely performance of Tenant's obligations under this Lease, or to regain possession of any or all of the Leased Premises as a result of the failure of Tenant to comply with the terms and conditions of this Lease or the Bankruptcy Code;

(ix) Notwithstanding anything in this Lease to the contrary, all amounts payable by Tenant to or on behalf of Landlord under this Lease, whether or not expressly denominated as such, shall constitute "rent" for the purposes of the Bankruptcy Code; and

(x) For purposes of this Paragraph 35 addressing the rights and obligations of Landlord and Tenant in the event that an Action is commenced, the term "Tenant" shall include Tenant's successor in bankruptcy, whether a trustee, Tenant as debtor in possession or other responsible person.

36. Miscellaneous.

(a) The Paragraph headings in this Lease are used only for convenience in finding the subject matters and are not part of this Lease or to be used in determining the intent of the Parties or otherwise interpreting this Lease.

(b) As used in this Lease, the singular shall include the plural and any gender shall include all genders as the context requires and the following words and phrases shall have the following meanings: (i) "including" means "including without limitation" (except where "including" is already followed by "without limitation" or words of similar effect); (ii) "provisions" means "provisions, terms, agreements, covenants and/or conditions"; (iii) "lien" means "lien, charge, encumbrance, title retention agreement, pledge, security interest, mortgage and/or deed of trust"; (iv) "obligation" means "obligation, duty, agreement, liability, covenant and/or condition"; (v) "the Leased Premises" means "the Leased Premises or any part thereof or interest therein"; (vi) " the Real Property" means "the Columbus Real Property and the Long Beach Real Property or any part thereof or interest therein"; (vii) " the Improvements" means "the Improvements or any part thereof or interest therein"; (viii) " the Equipment" means "the Equipment or any part thereof or interest therein"; and (ix) "the adjoining property" means "the adjoining property or any part thereof or interest therein".

(c) Any act which Landlord is permitted to perform under this Lease may be performed at any time and from time to time by Landlord or any person or entity designated by Landlord. Each appointment of Landlord as attorney-in-fact for Tenant hereunder is irrevocable and coupled with an interest, but shall only apply during the continuance of an Event of Default.

(d) Except as otherwise expressly provided in this Lease, Landlord shall not unreasonably withhold, condition, or delay its consent or approval whenever such consent or approval is required under this Lease.

(e) Time is of the essence with respect to the performance by Tenant of its obligations under this Lease.

(f) Landlord shall in no event be construed for any purpose to be a partner, joint venturer or associate of Tenant or of any subtenant, operator, concessionaire or licensee of Tenant with respect to any of the Leased Premises or otherwise in the conduct of their respective businesses.

(g) This Lease and any documents which may be executed by Tenant on or about the Effective Date hereof at Landlord's request, including, without limitation, the Purchase and Sale Agreement, constitute the entire agreement between the parties and supersede all prior understandings and agreements, whether written or oral, between the parties hereto relating to any of the Leased Premises and the transactions provided for herein. Landlord and Tenant are business entities having substantial experience with the subject matter of this Lease and have each fully participated in the negotiation and drafting of this Lease. Accordingly, this Lease shall be construed without regard to the rule that ambiguities in a document are to be construed against the drafter.

(h) This Lease may be modified, amended, discharged or waived only by an agreement in writing signed by the Party against whom enforcement of any such modification, amendment, discharge or waiver is sought.

(i) The covenants of this Lease shall run with the land and bind Tenant, its successors and assigns and all present and subsequent encumbrances and subtenants of any of the Leased

Premises, and shall inure to the benefit of Landlord, its successors and assigns. If there is more than one Tenant, the obligations of each shall be joint and several.

(j) If any one or more of the provisions contained in this Lease shall for any reason be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability shall not affect any other provision of this Lease, but this Lease shall be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

(k) All exhibits and schedules attached hereto are incorporated herein as if fully set forth.

(l) Each of Landlord and Tenant hereby agree that the State of New York has a substantial relationship to the parties and to the underlying transaction embodied hereby, and in all respects (including, without limiting the generality of the foregoing, matters of construction, validity and performance) this Lease and the obligations arising hereunder shall be governed by, and construed in accordance with, the laws of the State of New York applicable to contracts made and performed therein and all applicable Law of the United States of America; except that, at all times, the provisions for the creation of the leasehold estate, enforcement of Landlord's rights and remedies with respect to right of re-entry and repossession, surrender, delivery, ejectment, dispossession, eviction or other in-rem proceeding or action regarding any of the Leased Premises pursuant to Paragraph 23 hereof shall be governed by and construed according to the Laws of the State where such Leased Premises is located, it being understood that, to the fullest extent permitted by law of such State, the law of the State of New York shall govern the validity and the enforceability of this Lease, and the obligations arising hereunder. To the fullest extent permitted by law, Tenant hereby unconditionally and irrevocably waives any claim to assert that the law of any other jurisdiction governs this Lease. Except for any legal suit, action or proceeding that pursuant to applicable Law must be brought in the County and State where a Leased Premises is located, any legal suit, action or proceeding against Tenant arising out of or relating to this Lease may be instituted in any federal or state court sitting in the County of New York, State of New York, and Tenant waives any objection which it may now or hereafter have to the laying of venue of any such suit, action or proceeding in such County and State, and Tenant hereby expressly and irrevocably submits to the jurisdiction of any such court in any suit, action or proceeding. Notwithstanding the foregoing, nothing herein shall prevent or prohibit Landlord or Tenant from instituting any suit, action or proceeding in any other proper venue or jurisdiction in which any of the Leased Premises is located or where service of process can be effectuated.

(m) To Tenant's knowledge, neither Tenant nor any of its officers or directors is a Specially Designated National or Blocked Person. As used herein, the term "Specially Designated National or Blocked Person" shall mean a Person (i) designated by the Office of Foreign Assets Control at the U.S. Department of the Treasury, or other U.S. governmental entity, and appearing on the List of Specially Designated Nationals and Blocked Persons (http://www.ustreas.gov/offices/enforcement/ofac/sdn/ index.shtml), which List may be updated from time to time; or (ii) with whom Landlord or its affiliates are prohibited from engaging in transactions by any trade embargo, economic sanction or other prohibition of United States law, regulation, or Executive Order of the President of the United States. Tenant agrees to confirm the statement in the preceding sentence in writing on an annual basis if requested by Landlord to do so.

(n) Subject to the terms of this Paragraph 36(n), Tenant and Landlord shall each maintain as confidential (a) any and all information, data and documents obtained about Landlord or Tenant ("Information") prior to and following the execution of this Lease (including without limitation, any financial or operating information of, or related to, the Landlord or the Tenant), and (b) the terms and conditions of this Lease (as originally circulated or as negotiated) and all other documents related to the execution of this Lease. Each Party agrees that it will not retain any item of Information after the use thereof is no longer required, and that it will either destroy or return to the other Party all written materials constituting Information, except to the extent that such destruction is prohibited by law, rule or regulation. Notwithstanding the foregoing, neither Party will be required to destroy or return any Information that may be stored electronically in such Party's information technology system, whether in the form of an e-mail, saved file or otherwise. Notwithstanding anything to the contrary contained herein, each Party shall be permitted to disclose any or all of the Information: (i) to those principals, employees, representatives, lenders, consultants, counsel, accountants and other professional advisors of such Party who have a legitimate need to review or know such Information and who have, prior to disclosure, agreed to be bound by the terms of confidentiality set forth herein, (ii) any government or self-regulatory agency whose supervision or oversight such Party or any of its affiliates may be subject to the extent required by applicable Law, any governmental authority or a court of competent jurisdiction, in each case to the extent reasonably necessary to comply with any legal or regulatory requirements to which such Party or its affiliates may be subject, and (iii) without limiting the generality of the immediately foregoing subsection, in any filings made by Tenant or its affiliates with the Securities and Exchange Commission pursuant to the Securities Act of 1933, as amended (the " Securities Act"), the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and/or as may be made available to any investors or prospective investors in Tenant or any of its affiliates in conformance with the Securities Act, Exchange Act, and/or the rules, regulations, and orders issued with respect thereto. Except for publicly available filings referenced in clause (iii) of the immediately preceding sentence, upon disclosing Information to any Person to the extent permitted hereunder, Landlord or Tenant, as applicable, shall advise such Person of the confidential nature thereof, and shall take all reasonable precautions to prevent the unauthorized disclosure of such information by such Person. In addition, Landlord and Tenant shall each be permitted to make such disclosures regarding the Lease and the Leased Premises (which may include the use of Tenant's or Landlord's name and corporate logo) as are similar or consistent with Landlord's and Tenant's respective general public disclosure policy, including disclosures made by Landlord and its affiliates to their investors, lenders and analysts. Landlord agrees that any Lender shall abide by the restrictions applicable to Landlord in this Paragraph 36(n). This provision shall survive the termination of this Lease. Landlord and Tenant shall be required to execute, deliver, record and furnish such documents as may be necessary to correct any errors of a typographical nature that may be contained in this Lease, or in any memorandum thereof, whether such memorandum be recorded or unrecorded.

(o) This Lease may be executed in any number of counterparts, each of which shall be an original, but all of which shall together constitute one and the same document.

(p) If either Party shall be prevented or delayed from punctually performing any obligation or satisfying any condition under this Lease by any condition beyond the control of such Party, exclusive of financial inability of a Party (but including without limitation any of the following

beyond the control of (and not caused) by such Party (collectively, "Force Majeure"): strike, lockout, labor dispute, civil unrest, inability to obtain labor, materials or reasonable substitutes thereof, acts of God, present or future governmental restrictions, regulations or control, insurrection, and sabotage), then the time to perform such obligation or satisfy such condition shall be extended by the delay caused by such event, but only for a reasonable period of time not to exceed, in any event, three hundred sixty-five (365) days.

(q) Notwithstanding Paragraph 7 or any other provision of this Lease, in the event an arbitration, suit or action is brought by any Party under this Lease to enforce any of its terms, or in any appeal therefrom, it is agreed that the prevailing Party shall be entitled to reimbursement of reasonable attorneys' fees, as determined by the arbitrator, trial court and/or appellate court.

(r) In the event of any reduction of Rent pursuant to the terms hereof (including without limitation pursuant to Paragraph 17 or Paragraph 18), the related terms hereof (including without limitation in Exhibit D and Exhibit F) shall be deemed modified as appropriate reflect such reduction. Without limiting the foregoing, upon any such reduction of Rent, the Parties agree that upon the request of either Party, both Parties will enter into a written amendment to this Lease further evidencing such reduction of Rent and related appropriate modifications.

(s) *[Signature Pages To Follow]*

IN WITNESS WHEREOF, Landlord and Tenant have caused this Lease to be duly executed under seal as of the day and year first above written.

EXHIBIT A-1

COLUMBUS REAL PROPERTY

PARCEL 1:

Situated in the City of Columbus, County of Franklin and State of Ohio, lying in Quarter Township 2, Township 2, Range 17, United States Military Lands:

And known as being a part of the 13.727 acre tract, and all of the 0.875 acre tract conveyed to 17 Land Realty Corp. by deeds of record in O.R. 14066 B11 and O.R. 25716 J11, respectively, records of the Recorder's Office, Franklin County, Ohio, and being more particularly described as follows:

Beginning at a railroad spike set at the intersection of the Southerly right-of-way line of Interstate 270 (FRA-270-18.32N) and centerline of Cooper Road (60 feet in width). Said railroad spike being the Northeasterly corner of said 0.875 acre tract;

Thence South 26 deg. 55' 00" East, a distance of 241.79 feet, along said centerline of Cooper Road and Easterly line of said 0.875 acre tract, to a railroad spike set at the Southeasterly corner of said 0.875 acre tract;

Thence North 78 deg. 47' 04" West, a distance of 38.14 feet, along the Southerly line of said 0.875 acre tract, to an iron pin set in the Westerly right-of-way line of said Cooper Road;

Thence South 26 deg. 55' 00" East, a distance of 295.14 feet, along said Westerly right-of-way line of Cooper Road and along the Easterly line of said 13.727 acre tract, to an iron pin set at the point of curvature in the Northerly right-of-way line of Corporate Exchange Drive (60 feet in width) of record in Plat Book 60, Page 22 and 23;

Thence the following four (4) courses and distances along said Northerly right-of-way line of Corporate Exchange Drive and Southerly line of said 13.727 acre tract;

1. Thence along arc of said curve to the right having a radius of 35.00 feet, a central angle of 90 deg. 00' 00", and a chord bearing South 18 deg. 05' 00" West, a chord distance of 49.50 feet to the point of tangency;

2. Thence South 63 deg. 05' 00" West, a distance of 35.00 feet, to an iron pin found at the point of curvature;

3. Thence along arc of said curve to the right having a radius of 270.00 feet, a central angle of 28 deg. 56' 27", and a chord bearing South 77 deg. 33' 14" West, a chord distance of 134.94 feet, to an iron pin set at the point of tangency;

4. Thence North 87 deg. 58' 33" West, a distance of 788.06 feet, to an railroad spike set;

Thence North 02 deg. 01' 27" East, a distance of 318.00 feet across said 13.727 acre tract to a railroad spike set in a Southerly line of the 5.103 acre tract conveyed to Corporate Exchange Buildings IV and V Limited Partnership by deed of record in O.R. 24554 B04;

Thence South 87 deg. 58’ 33” East, a distance of 15.00 feet along said Southerly line of the 5.103 acre tract to a railroad spike set at a Southeasterly corner of said 5.103 acre tract;

Thence the following three (3) courses and distances along the Easterly lines to said 5.103 acre tract;

1. Thence North 02 deg. 01’ 27” East, a distance of 185.00 feet, to a P.K. nail found;

2. Thence South 87 deg. 58’ 33” East, a distance of 57.50 feet, to a railroad spike set;

3. Thence North 02 deg. 01’ 27” East, a distance of 167.21 feet, to an iron pin set in aforesaid Southerly right-of-way line of Interstate 270 at a Northeasterly corner of said 5.103 acre tract;

Thence South 78 deg. 46’ 49” East, a distance of 677.06 feet, along said Southerly right-of-way line of Interstate 270 and partly along the Northerly line of said 13.727 acre tract and partly along the Northerly line aforesaid 0.875 acre tract, to the point of beginning.

Containing 11.814 acres, more or less, of which 0.167 acres lies within the Cooper Road right -of-way.

The bearings in the above description are based on the bearing of South 87 deg. 58’ 33” East, for the centerline of Corporate Exchange Drive, as shown on the dedication Plat for Corporate Exchange Drive, of record in Deed Book 60, Page 22 and 23, records of the Recorder’s Office, Franklin County, Ohio.

PARCEL 2:

Situated in the City of Columbus, County of Franklin and State of Ohio, lying in Quarter Township 2, Township 2, Range 17, United States Military Lands:

And known as being a part of the 4.500 and 13.727 acre tracts conveyed to 17 Land Realty Corp. by deed of record in O.R. 14066 B11, Records of the Recorder’s Office, Franklin County, Ohio, and being more particularly described as follows:

Beginning for reference at a PK nail found at the centerline intersection of Presidential Gateway (60 feet in width) as established by the Plat of record in Plat Book 83, Page 80 and Corporate Exchange Drive (60 feet in width) as established by the Plat of record in Plat Book 60, Page 22;

Thence North 87 deg. 58’ 33” West, a distance of 329.18 feet along the centerline of Corporate Exchange Drive to a point;

Thence North 02 deg. 01’ 27” East, a distance of 30.00 feet, to a railroad spike set on the Northerly right-of-way line of Corporate Exchange Drive and the Southerly line of said 13.727 acre tract and being the point of true beginning;

Thence the following three (3) courses and distances along the said Northerly right-of-way line of Corporate Exchange Drive and the Southerly line of said 13.727 and 4.500 acre tracts;

1. Thence North 87 deg. 58’ 33” West, a distance of 94.38 feet to an iron pin set at a point of curvature;

2. Thence along the arc of said curve to the right, having a radius of 420.00 feet, a central angle of 27 deg. 22’ 54”, a chord bearing North 74 deg. 17’ 06” West, and a chord distance of 198.81 feet to an iron pin found at the point of tangency;

3. Thence North 60 deg. 35’ 39” West, a distance of 28.10 feet to an iron pin set at a Southeasterly corner of a 5.103 acre tract conveyed to Corporate Exchange Buildings IV and V Limited Partnership by deed of record in O.R. 24554 B04;

Thence the following two (2) courses and distance along the Easterly and Southerly lines of said 5.103 acre tracts;

1. Thence North 02 deg. 01’ 27” East, a distance of 258.02 feet to a railroad spike set;

2. Thence South 87 deg. 58’ 33” East, a distance of 312.50 feet to a railroad spike set;

Thence South 02 deg. 01’ 27” West, a distance of 318.00 feet across said 13.727 acre tract to the point of true beginning, containing 2.183 acres, more or less, subject to all easements, restrictions and rights-of-way of record.

EXHIBIT A-2

LONG BEACH REAL PROPERTY

PARCELS 2 AND 3, AS SHOWN ON PARCEL MAP NO. 5196, IN THE CITY OF LONG BEACH, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, FILED IN BOOK 71 PAGE 14 OF PARCEL MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

EXCEPT THEREFROM, ALL OIL, GAS, HYDROCARBON SUBSTANCES AND MINERALS OF EVERY KIND AND CHARACTER LYING MORE THAN 500 FEET BELOW THE SURFACE OF SAID LAND, TOGETHER WITH THE RIGHT TO DRILL INTO, THROUGH AND TO USE AND OCCUPY ALL PARTS OF SAID LAND LYING MORE THAN 500 FEET BELOW THE SURFACE THEREOF FOR ANY ALL PURPOSES INCIDENTAL TO THE EXPLORATION FOR AND PRODUCTION OF OIL, GAS, HYDROCARBON SUBSTANCES OR MINERALS FROM SAID OR OTHER LANDS, BUT WITHOUT, HOWEVER, ANY RIGHT TO USE EITHER THE SURFACE OF SAID LAND OR ANY PORTION OF SAID LAND WITHIN 500 FEET OF THE SURFACE FOR ANY PURPOSE OR PURPOSES WHATSOEVER AS RESERVED BY VARIOUS DEEDS OF RECORD, AMONG THEM, BEING THE DEED RECORDED JULY 19, 1965 AS INSTRUMENT NO. 885 IN BOOK D2981 PAGE 153 OFFICIAL RECORDS.

APN: 7278-003-035 AND 7278-003-036

EXHIBIT B-1

Columbus Other Assets

The term "Columbus Property Other Assets" means (a) all "fixtures", as defined by Section 9-102(a)(41) of the Uniform Commercial Code as adopted by the State of New York, owned by Landlord and that are now or hereafter affixed or attached to or installed in the Columbus Real Property or the Columbus Improvements (the "Columbus Fixtures"), (b) all of the following, if and to the extent affixed to the Columbus Real Property or the Columbus Improvements and owned by Landlord (even if not constituting Fixtures) (collectively, the "Columbus Property Equipment"): built-in fittings and built-in major appliances, including all electrical, anti-pollution, heating, lighting (including hanging fluorescent lighting), incinerating, power, air cooling, air conditioning, humidification, sprinkling, plumbing, lifting, fire prevention, fire extinguishing and ventilating systems, devices and machinery and all engines, pipes, pumps, tanks (including exchange tanks and fuel storage tanks), motors, conduits, ducts, steam circulation coils, blowers, steam lines, compressors, oil burners, boilers, doors, windows, loading platforms, lavatory facilities, stairwells, fencing (including cyclone fencing), passenger and freight elevators, overhead cranes and garage units, and (c) all Columbus Intangible Property; provided, however, notwithstanding the foregoing, Columbus Property Other Assets expressly excludes each and all of the following items (collectively, the "Columbus Property Excluded Items"):

1. all personal property located at the Columbus Real Property or the Columbus Improvements including, without limitation, all computers and other information technology devices, but excluding all items described in clause (b) of the definition of Columbus Property Other Assets; and

2. those other items (regardless of whether such items constitute Fixtures) described on Exhibit B-1-A hereof.

EXHIBIT C

PERMITTED ENCUMBRANCES

The items listed on Schedule B in that certain Proforma Owner's Policy of Title Insurance issued by Fidelity National Title Insurance Company ("Title Company") under Order No. 4257983 (Reference No. 508130029), with respect to the Columbus Leased Premises, and the items listed on Schedule B in that certain Proforma Owner's Policy of Title Insurance issued by Title Company under Order No. 23021588-977-MAT, with respect to the Long Beach Leased Premises.

EXHIBIT D

BASIC RENT PAYMENTS

1. Basic Rent.

Subject to the adjustments provided for in Paragraph 2 below, Basic Rent payable in respect of the Term shall be $9,221,851 per annum for the Long Beach Property and $1,680,000 per annum for the Columbus Property, payable monthly in advance on the first (1st) Business Day of each calendar month during the Term (each a "Basic Rent Payment Date"), in equal installments of $768,487.58 each month with respect to the Long Beach Property and $140,000 each month with respect to the Columbus Property. Pro rata Basic Rent for the period from the date hereof through the last day of June, 2013 shall be paid on the Effective Date, and pro rata Basic Rent for the period from the final Basic Rent Payment Date of the Term through the last day of the Term shall be paid as the final installment of Basic Rent for the Term.

2. Adjustments to Basic Rent. (a) Basic Rent shall not be adjusted until the first (1st) anniversary of the Basic Rent Payment Date on which the first full monthly installment of Basic Rent shall be due and payable (the " First Full Basic Rent Payment Date"). As of the first (1st) anniversary of the First Full Basic Rent Payment Date and thereafter on each anniversary of the First Full Basic Rent Payment Date (the "Basic Rent Adjustment Date"), Basic Rent shall be increased by three percent (3%) per annum; provided that Basic Rent for the first (1st) year of each Renewal Term shall be the greater of (i) one hundred three percent (103%) of the Basic Rent for the immediately preceding Lease Year, and (ii) Fair Market Basic Rent (as determined pursuant to Exhibit D-1).

(b) Notice of the new annual Basic Rent shall be delivered to Tenant on or before the tenth (10th) day preceding each Basic Rent Adjustment Date, but any failure to do so by Landlord shall not be or be deemed to be a waiver by Landlord of Landlord's rights to collect such sums. Tenant shall pay to Landlord, within ten (10) days after a notice of the new annual Basic Rent is delivered to Tenant, all amounts due from Tenant, but unpaid, because the stated amount as set forth above was not delivered to Tenant at least ten (10) days preceding the Basic Rent Adjustment Date in question (and, for the avoidance of doubt, any failure by Tenant to pay the amount of any increase in Basic Rent, or increase the amount of any Letter of Credit in connection with any increase in Basic Rent, shall not be a default or Event of Default under the Lease, or result in any Late Charge or interest, unless and until (i) with respect to the payment of Basic Rent, Tenant has failed to pay such amount within ten (10) days after notice of the new annual Basic Rent is delivered to Tenant by Landlord, and (ii) with respect to any increase of the amount of any Letter of Credit, Tenant has failed to increase the Letter of Credit within thirty (30) days after notice of the new annual Basic Rent is delivered to Tenant by Landlord).

EXHIBIT D-1

DETERMINATION OF FAIR MARKET BASIC RENT

For purposes of this Lease, Fair Market Basic Rent shall be determined in accordance with the following procedure:

Within ten (10) days after Landlord receives Tenant's notice that it has elected to extend this Lease pursuant to Paragraph 5(a), Landlord shall deliver to Tenant Landlord's calculation of the Fair Market Basic Rent for the first year of the applicable Renewal Term. As used herein, "Fair Market Basic Rent" means the sum of (A) amount of Basic Rent that Landlord could reasonably be expected to obtain upon a re-letting of the Long Beach Leased Premises on then current market terms (the " Long Beach FMBR"), plus (B) the amount of Basic Rent that Landlord could reasonably be expected to obtain upon a re-letting of the Columbus Leased Premises on then current market terms (the "Columbus FMBR"), as any of (A) and (B) are appropriately adjusted to reflect the fact that the Leased Premises constitute a portfolio that will be leased as a whole to a single tenant (any such adjustment, a " Portfolio Rent Adjustment Factor").

If Tenant disagrees with Landlord's calculation of Fair Market Basic Rent, Tenant shall notify Landlord of such disagreement within five (5) Business Days after Tenant's receipt of Landlord's calculation, and Landlord and Tenant shall within five (5) Business Days after the date of Tenant's notice each appoint one appraiser for each Leased Premises and notify the other in writing of the name, address and qualifications of such appraisers. The appraiser appointed by Landlord with respect to the Long Beach Leased Premises and the appraiser appointed by Tenant with respect to the Long Beach Leased Premises are referred to herein collectively as the " Long Beach Appraisers". The appraiser appointed by Landlord with respect to the Columbus Leased Premises and the appraiser appointed by Tenant with respect to the Columbus Leased Premises are referred to herein collectively as the " Columbus Appraisers".

The Long Beach Appraisers shall endeavor to agree upon the Long Beach FMBR based on a written appraisal made by each of them within thirty (30) days after the later of the two appraisers' appointments. The Columbus Appraisers shall endeavor to agree upon Columbus FMBR based on a written appraisal made by each of them within thirty (30) days after the later of the two appraisers' appointments. In determining the Long Beach FMBR or Columbus FMBR, as applicable, the appointed appraisers shall determine the amount that a willing tenant would pay, and a willing landlord of a comparable building located in a radius of ten (10) miles of the applicable Leased Premises would accept, at arm's length, to rent a building of comparable size and quality as the applicable Improvements, taking into account: (i) the age, quality, condition (as required by this Lease) of the Improvements; (ii) that the applicable Leased Premises will be leased as a whole or substantially as a whole to a single user; (iii) a lease term equal to the applicable Renewal Term; (iv) a lease with terms substantially similar to this Lease; and (v) such other items that professional real estate appraisers customarily consider; provided, however, that such appraisers shall not take into account any Portfolio Rent Adjustment Factor. If the Long Beach Appraisers agree upon the Long Beach FMBR, then such determination shall be binding and conclusive upon Landlord and Tenant. If the Columbus Appraisers agree upon the Columbus FMBR, then such determination shall be binding and conclusive upon Landlord and Tenant.

If the Long Beach Appraisers are unable to agree upon the Long Beach FMBR within forty‑five (45) days after the later of the applicable two appraisers' appointments, then such appraisers shall advise Landlord and Tenant of their respective determinations and shall select a third appraiser within fifteen (15) days thereafter to make the determination of the Long Beach FMBR. If the Columbus Appraisers are unable to agree upon the Columbus FMBR within forty‑five (45) days after the later of the applicable two appraisers' appointments, then such appraisers shall advise Landlord and Tenant of their respective determinations and shall select a third appraiser within fifteen (15) days thereafter to make the determination of the Columbus FMBR. The selection of any third appraiser pursuant to this paragraph shall be binding and conclusive upon Landlord and Tenant. If a third appraiser is not selected within either such fifteen (15) day period, then either Landlord or Tenant may petition the American Arbitration Association or any successor thereto ("AAA") (with a copy to the other Party) to so determine such third appraiser and the Parties shall cooperate reasonably with each other and the AAA (including by responding promptly to any requests for information made by the AAA) in connection with such determination. The decision of the AAA shall be final and conclusive as to the identity of any third appraiser. The determination of the Long Beach FMBR or Columbus FMBR, as applicable, made by the applicable third appraiser appointed or determined pursuant hereto shall be made within thirty (30) days after such appointment. The Long Beach FMBR or Columbus FMBR, as applicable, shall be the average of the determination made by the applicable third appraiser and the determination made by the appraiser appointed by Landlord or Tenant whose determination is nearer to that of such third appraiser. Such average shall be binding and conclusive upon Landlord and Tenant.

Once the Long Beach FMBR and Columbus FMBR have been determined pursuant to the foregoing, the Parties will submit all relevant calculations to an appraiser at Jones Lang LaSalle, CB Richard Ellis, Cushman & Wakefield, Eastdil Secured, or another national real estate brokerage firm or accounting firm reasonably acceptable to both Landlord and Tenant for determination of any Portfolio Rent Adjustment Factor within thirty (30) days following such submission.

Each appraiser appointed or selected pursuant to the provisions of this Exhibit D-1 (1) shall be an independent qualified MAI appraiser with at least ten (10) years of experience in the county where the applicable the Leased Premises is located, (2) shall have no right, power or authority to alter or modify the provisions of this Lease, (3) shall utilize the definition of Fair Market Basic Rent hereinabove set forth, and (4) shall be registered in the State where the applicable Leased Premises is located. The fees and costs of the foregoing appraisal process shall be shared equally by Landlord and Tenant (including without limitation any fees associated with the engagement of the AAA).

Exhibit D shall be deemed amended to reflect the Basic Rent for each Leased Premises as determined pursuant to this Exhibit D-1. Notwithstanding the foregoing, at either Party's request, both Parties shall enter into an amendment of this Lease reflecting the Basic Rent for each Leased Premises as determined pursuant to this Exhibit D-1.

CERTIFICATION RELATED TO THE USA PATRIOT ACT

On behalf of [Insert name of subtenant/assignee] **("[Subtenant/Assignee]")**, I hereby certify to the following:

1. [**Subtenant/Assignee**] maintains a place of business that is located at a fixed address (other than an electronic address or post office box) known as [_____].

2. [**Subtenant/Assignee**] is subject to the laws of the United States and has no knowledge that it is not in full compliance with laws relating to bribery, corruption, fraud, money laundering and the Foreign Corrupt Practices Act.

3. The names and addresses of [**Subtenant/Assignee**]'s Owners, officers and directors are accurately reflected on Annex A to this certification. "Owner" means any individual who owns, controls, or has the power to vote more than 50% of any class of [**Subtenant/Assignee**]'s stock, or otherwise controls or has the power to control [**Subtenant/Assignee**].

4. None of said Owners, officers or directors is a Specially Designated National or Blocked Person. As used herein, the term "Specially Designated National or Blocked Person" shall mean a Person (i) designated by the Office of Foreign Assets Control at the U.S. Department of the Treasury, or other U.S. governmental entity, and appearing on the List of Specially Designated Nationals and Blocked Persons (http://www.ustreas.gov/offices/enforcement/ofac/sdn/ index.shtml), which List may be updated from time to time; or (ii) with whom Landlord or its affiliates are prohibited from engaging in transactions by any trade embargo, economic sanction or other prohibition of United States law, regulation, or Executive Order of the President of the United States. [**Subtenant/Assignee**] agrees to confirm this representation and warranty in writing on an annual basis if requested by Landlord to do so.

5. [**Subtenant/Assignee**] does not transact business on behalf of, or for the direct or indirect benefit of, any individual or entity that is a Specially Designated National or Blocked Person. [**Subtenant/Assignee**] agrees to confirm this representation and warranty in writing on an annual basis if requested by Landlord to do so.

I, [_____], certify that I have read and understand this Certification and that the statements made in this certification and the attached Annexes are true and correct.

SUBORDINATION AGREEMENT

THIS SUBORDINATION AGREEMENT ("Subordination Agreement") dated as of _____, 20___, is made by _____, a _____ (" Tenant") and _____, a _____ ("Manager") in favor of AGNL _____, L.L.C., a Delaware limited liability company, (" Landlord").

WITNESSETH:

WHEREAS, pursuant to a Lease Agreement dated as of the date hereof (the " Lease") between Landlord and Tenant, Landlord has agreed to lease to Tenant, and Tenant has agreed to lease from Landlord, certain real property and improvements more particularly described therein (the "Property");

WHEREAS, pursuant to a Management Agreement dated _____, 20___ (the " Management Agreement") between Manager and Tenant, Manager is responsible for the management of the business affairs of Tenant, in return for which Tenant is obligated to pay to Manager [_____] fees (the " Management Fees"); and

WHEREAS, it is a condition precedent to Landlord's obligation to lease the Property to Tenant under the Lease, that Manager shall have executed and delivered this Subordination Agreement to Landlord;

NOW, THEREFORE, in consideration of the premises and for the purpose of inducing Landlord to enter into the Lease and perform its obligations thereunder, Tenant and Manager hereby covenant and agree as follows:

AGREEMENTS

1. **Incorporation of Recitals**. The recitals are incorporated herein by reference.

2. **Capitalized Terms**. Capitalized terms not defined herein shall have the meaning ascribed to them in the Lease.

3. **Subordination of Management Fees**. The Management Fees are subordinated in right of payment, to the extent and in the manner provided in this Subordination Agreement, to the prior payment in full of all Rent and other Monetary Obligations under the Lease.

4. **Payments to Landlord**.

(a) In the event of any insolvency or bankruptcy proceedings, or any receivership, reorganization or other similar proceedings in connection therewith, relative to Tenant or its property, and in the event of any proceedings for liquidation, dissolution or other winding up of Tenant, whether or not involving insolvency or bankruptcy (any such proceedings hereinafter referred to as "Bankruptcy or Insolvency Proceedings"), Landlord shall be entitled to receive

payment in full of all Rent and other Monetary Obligations under the Lease before Manager shall be entitled to receive any payment or distribution on account of the Management Fees. Pursuant to the foregoing, Landlord shall be entitled to receive any payment or distribution on account of the Management Fees which may be payable or deliverable in any such Bankruptcy or Insolvency Proceedings.

(b) Upon the occurrence of an Event of Default under Paragraph **[22(a)(i) of the Lease]** (a "Payment Default"), no payment or distribution on account of the Management Fees shall be made until such Payment Default shall have been cured or waived or shall otherwise have ceased to exist.

5. **Default, Termination and Modification of Management Agreement**. Manager will notify Landlord promptly of any default by Tenant under the Management Agreement or termination by Tenant of the Management Agreement. Upon any termination of the Management Agreement, Manager may, if allowed in the Management Agreement, seek recourse against Tenant, subject to the subordination provisions contained herein. Manager and Tenant shall not modify or assign the Management Agreement or enter into a new management agreement without the prior written consent of Landlord which shall not be unreasonably withheld, conditioned or delayed, provided that such modification, assignment or new agreement is subject to all provisions hereof relating to the Management Agreement.

6. **Estoppel**. Manager shall, within twenty (20) days after the written request of Landlord, execute an estoppel letter confirming, to the extent such matters are true at such time, that (a) the Management Agreement is in full force and effect and has not been modified, amended or assigned, (b) neither Manager nor, to Manager's knowledge, Tenant is in default under any of the terms, covenants or provisions of the Management Agreement, (c) neither Manager nor Tenant has commenced any action or given or received any written notice for the purpose of terminating the Management Agreement, and (d) all Management Fees have been paid in full.

7. **Further Assurances**. Manager and Tenant agree to execute such further agreements of subordination as may be determined by Landlord to be reasonably necessary to establish the priority of Tenant's obligations under the Lease over its obligations under the Management Agreement, which agreements shall be in substantially the same form as this Agreement and contain such matters of estoppel with respect to Manager's obligation to perform under the Management Agreement as may be true as of the date of such execution and as may be reasonably required by Landlord.

8. **Indemnification**. Manager and Tenant hereby jointly and severally agree to indemnify, defend and hold harmless Landlord; any director, member, officer, general partner, limited partner, employee or agent of Landlord (or any legal representative, heir, estate, successor or assign of any thereof); any predecessor or successor partnership, corporation, limited liability company (or other entity) of Landlord, or any of its general partners, members or shareholders; or any affiliate of Landlord from and against all liabilities, losses, damages, costs, expenses (including, without limitation, reasonable attorneys' fees and expenses), causes of action, suits, claims, demands or judgments of any nature imposed upon or incurred by or asserted against Landlord by reason of, or in any way related to, this Subordination Agreement.

9. **Term**. This Subordination Agreement shall be effective continuously from the date hereof until payment in full of all Rent and other Monetary Obligations under the Lease.

10. **Legal Fees**. Each of Manager and Tenant agrees that it shall be jointly and severally liable for all fees and expenses incurred by Landlord in connection with the enforcement of this Agreement, including, without limitation reasonable attorneys' fees and expenses.

11. **Assignment of Rights and Responsibilities**. This Subordination Agreement shall inure to the benefit of and may be enforced by Landlord and its successors and assigns under the Lease, and shall be binding upon and enforceable against Tenant and Manager and each of their respective successors and assigns.

12. **Choice of Law**. This Subordination Agreement will be governed by and construed pursuant to the laws of the State of New York (the "State"). Each of Tenant and Manager specifically consents that any action brought under this Subordination Agreement may be brought in the State in any court of competent jurisdiction and venue therein and consents to the service of process issued from said court. Each of Tenant and Manager hereby waives trial by jury in and in respect of any and every action, proceeding, claim (whether or not denominated, a claim, counterclaim, cross-claim, off-set or the like) brought or asserted by Landlord with respect to any matter arising out of, under or connected with this Subordination Agreement.

13. **Amendments**. This Subordination Agreement may be modified, amended, discharged or waived only by an agreement in writing signed by each of the parties hereto.

14. **Severability**. If any one or more of the provisions contained in this Subordination Agreement shall for any reason be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability shall not affect any other provision of this Subordination Agreement, but this Subordination Agreement shall be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

(*Signature page follows.*)

IN WITNESS WHEREOF, the parties hereto have caused this Subordination Agreement to be executed under seal as of the day and year first written above.

FORM OF SNDA

SUBORDINATION, NON-DISTURBANCE AND ATTORNMENT AGREEMENT

THIS SUBORDINATION, NON-DISTURBANCE AND ATTORNMENT AGREEMENT ("***Agreement***") is entered into as of _____ ___, 201_ (the "***Effective Date***") by and between _____ (together with any other holder of the Loan (defined below) and their respective successors and assigns, the "***Mortgagee***"), **MOLINA HEALTHCARE, INC.**, a Delaware corporation (hereinafter, the "***Tenant***") and **AGNL CLINIC, L.P.**, a Delaware limited partnership (the "***Landlord***"), with reference to the following facts:

A. Landlord owns fee simple title in the real property described in Exhibit "A" attached hereto (the " ***Property***").

B. Mortgagee has made or intends to make a loan to Landlord (the " ***Loan***").

C. To secure the Loan, Landlord has or will encumber the Property by entering into a mortgage or deed of trust in favor of Mortgagee (as amended, increased, renewed, extended, spread, consolidated, severed, restated, or otherwise changed from time to time, the "***Mortgage***") to be recorded in land records.

D. Pursuant to the Lease dated [April _____], 2013, (the " ***Lease***") between Landlord and Tenant, Landlord leased to Tenant a portion of the Property, as said portion is more particularly described in the Lease (the " ***Leased Premises***").

E. Tenant and Mortgagee desire to agree upon the relative priorities of their interests in the Property and their rights and obligations if certain events occur.

NOW, THEREFORE, for good and sufficient consideration, Tenant and Mortgagee agree:

1. *Definitions*. The following terms shall have the following meanings for purposes of this Agreement.

2. *Foreclosure Event*. A "***Foreclosure Event***" means: (i) foreclosure under the Mortgage; (ii) any other exercise by Mortgagee of rights and remedies (whether under the Mortgage or under applicable law, including bankruptcy law) as holder of the Loan and/or the Mortgage, as a result of which Mortgagee becomes owner of the Property; or (iii) delivery by Landlord to Mortgagee (or its designee or nominee) of a deed or other conveyance of Landlord's interest in the Property in lieu of any of the foregoing.

3. *Former Landlord*. A "***Former Landlord***" means Landlord and any other party that was landlord under the Lease at any time before the occurrence of any attornment under this Agreement.

4. *Offset Right*. An "***Offset Right***" means any right or alleged right of Tenant to any offset, defense (other than one arising from actual payment and performance, which payment and performance would bind a Successor Landlord pursuant to this Agreement), claim, counterclaim, reduction, deduction, or abatement against Tenant's payment of Rent or performance of Tenant's other obligations under the Lease, arising (whether under the Lease or under applicable law) from Landlord's breach or default under the Lease.

5. *Rent*. The "***Rent***" means any fixed rent, base rent or additional rent under the Lease.

6. *Successor Landlord*. A "***Successor Landlord***" means any party that becomes owner of the Property as the result of a Foreclosure Event.

7. *Termination Right*. A "***Termination Right***" means any right of Tenant to cancel or terminate the Lease or to claim a partial or total eviction arising (whether under the Lease or under applicable law) from Landlord's breach or default under the Lease.

8. *Other Capitalized Terms*. If any capitalized term is used in this Agreement and no separate definition is contained in this Agreement, then such term shall have the same respective definition as set forth in the Lease.

9. *Subordination*. The Lease, as the same may hereafter be modified, amended or extended, shall be, and shall at all times remain, subject and subordinate to the Mortgage (but not to the terms thereof), the lien imposed by the Mortgage, and all advances made under the Mortgage. Notwithstanding the foregoing, Mortgagee may elect, in its sole and absolute discretion, to subordinate the lien of the Mortgage to the Lease.

10. *Nondisturbance, Recognition and Attornment*.

11. *No Exercise of Mortgage Remedies Against Tenant*. So long as the Tenant is not in default under the Lease beyond any applicable grace or cure periods (an "***Event of Default***"), Mortgagee (i) shall not terminate or disturb Tenant's possession of the Leased Premises under the Lease, except in accordance with the terms of the Lease and (ii) shall not name or join Tenant as a defendant in any exercise of Mortgagee's rights and remedies arising upon a default under the Mortgage unless applicable law requires Tenant to be made a party thereto as a condition to proceeding against Landlord or prosecuting such rights and remedies. In the latter case, Mortgagee may join Tenant as a defendant in such action only for such purpose and not to terminate the Lease or otherwise adversely affect Tenant's rights under the Lease or this Agreement in such action.

12. *Recognition and Attornment*. Upon Successor Landlord taking title to the Property (i) Successor Landlord shall be bound to Tenant under all the terms and conditions of the Lease (except as provided in this Agreement); (ii) Tenant shall recognize and attorn to Successor Landlord as Tenant's direct landlord under the Lease as affected by this Agreement; and (iii) the Lease shall continue in full force and effect as a direct lease, in accordance with its terms (except as provided in this Agreement), between Successor

Landlord and Tenant. Tenant hereby acknowledges that pursuant to the Mortgage and assignment of rents, leases and profits, Landlord has granted to the Mortgagee an absolute, present assignment of the Lease and Rents which provides that Tenant continue making payments of Rents and other amounts owed by Tenant under the Lease to the Landlord and to recognize the rights of Landlord under the Lease until notified otherwise in writing by the Mortgagee. After receipt of such notice from Mortgagee, the Tenant shall thereafter make all such payments directly to the Mortgagee or as the Mortgagee may otherwise direct, without any further inquiry on the part of the Tenant. Landlord specifically agrees that Tenant may conclusively rely upon any written notice Tenant receives from Mortgagee notwithstanding any claim by Landlord contesting the validity of any term or condition of such notice, including, but not limited to, any default claimed by Mortgagee, and that Landlord shall not make any claim of any kind whatsoever against Tenant or Tenant's leasehold interest with respect to any amounts paid to Mortgagee by Tenant or any acts performed by Tenant pursuant to such written notice.

13. *Further Documentation*. The provisions of this Article 3 shall be effective and self-operative without any need for Successor Landlord or Tenant to execute any further documents. Tenant and Successor Landlord shall, however, confirm the provisions of this Article 3 in writing upon request by either of them within ten (10) days of such request.

14. *Protection of Successor Landlord*. Notwithstanding anything to the contrary in the Lease or the Mortgage, Successor Landlord shall not be liable for or bound by any of the following matters:

15. *Claims Against Former Landlord*. Any Offset Right that Tenant may have against any Former Landlord, unless (i) such Offset Right arises after the date Mortgagee encumbers the Property with the Mortgage and (ii) Tenant shall have given written notice to Mortgagee of such Offset Right prior to commencement of a Foreclosure Event. The foregoing shall not limit either (x) Tenant's right to exercise against Successor Landlord any Offset Right otherwise available to Tenant because of events occurring after the date of attornment or (y) Successor Landlord's obligation to correct any conditions that existed as of the date of attornment and violate Successor Landlord's obligations as landlord under the Lease.

16. *Prepayments*. Any payment of Rent that Tenant may have made to Former Landlord more than thirty (30) days before the date such Rent was first due and payable under the Lease with respect to any period after the date of attornment other than, and only to the extent that, the Lease expressly required such a prepayment or such payment was delivered to Mortgagee or Successor Landlord.

17. *Security Deposit*. Any obligation with respect to any security deposited with Former Landlord, unless such security was actually delivered to Mortgagee or Successor Landlord.

18. *Modification, Amendment or Waiver*. Any modification or amendment of the Lease, or any waiver of the terms of the Lease, made without Mortgagee's written consent,

excepting, however, commercially reasonable amendments or modifications of the Lease which are the result of good faith, arm's length negotiations between Landlord and Tenant.

19. *Surrender, Etc*. Any consensual or negotiated surrender, cancellation, or termination of the Lease, in whole or in part, agreed upon between Landlord and Tenant, unless effected unilaterally by Tenant pursuant to the express terms of the Lease.

20. *Casualty and Condemnation*. Mortgagee agrees that, notwithstanding any provision of the Mortgage or any instrument secured by the Mortgage, any insurance proceeds and any condemnation awards which may be received by any party hereto and which relate to the Property shall be used or disbursed in accordance with the terms of the Lease.

21. *Mortgagee's Right to Cure*. Notwithstanding anything to the contrary in the Lease or this Agreement, before exercising any Offset Right or Termination Right:

22. *Notice to Mortgagee*. Tenant shall provide Mortgagee with notice of the breach or default by Landlord giving rise to same (the "***Default Notice***") and, thereafter, the opportunity to cure such breach or default as provided for below.

23. *Mortgagee's Cure Period*. After Mortgagee receives a Default Notice, Mortgagee shall have a period of thirty (30) days under the Lease in which to cure the breach or default by Landlord. Mortgagee shall have no obligation to cure (and, without limiting anything contained in Section 4.a. above, shall have no liability or obligation for not curing) any breach or default by Landlord, except to the extent that Mortgagee agrees or undertakes otherwise in writing. In addition, as to any breach or default by Landlord the cure of which requires possession and control of the Property, if Mortgagee undertakes such cure or causes such cure to be commenced by a receiver within the period permitted by this paragraph, and so long as Mortgagee continues to or causes a receiver to diligently and in good faith cure such breach or default, Mortgagee's cure period shall continue for such additional time as Mortgagee may reasonably require.

24. *Miscellaneous*.

25. *Notices*. Any notice or request given or demand made under this Agreement by one party to the other shall be in writing, and may be given or be served by hand delivered personal service, or by depositing the same with a reliable overnight courier service or by deposit in the United States mail, postpaid, registered or certified mail, and addressed to the party to be notified, with return receipt requested or by telefax transmission, with the original machine - generated transmit confirmation report as evidence of transmission. Notice deposited in the mail in the manner hereinabove described shall be effective from and after the expiration of three (3) days after it is so deposited; however, delivery by overnight courier service shall be deemed effective on the next succeeding business day after it is so deposited and notice by personal service or telefax transmission shall be deemed effective when delivered to its addressee or within two (2) hours after its transmission unless given after 3:00 p.m. on a business day, in which case it shall be deemed effective at 9:00 a.m. on the

next business day. For purposes of notice, the addresses and telefax number of the parties shall, until changed as herein provided, be as follows:

26. If to the Mortgagee, at:

and

27. If to the Tenant, at:

Molina Healthcare, Inc.
200 Oceangate, Suite 100
Long Beach, CA 90802
Attn: _____

Telecopy No.: (___) _____

28. *Successors and Assigns*. This Agreement shall bind and benefit the parties, their successors and assigns, any Successor Landlord, and its successors and assigns. If Mortgagee assigns the Mortgage, then upon delivery to Tenant of written notice thereof accompanied by the assignee's written assumption of all obligations under this Agreement, all liability of the assignor shall terminate.

29. *Entire Agreement*. This Agreement constitutes the entire agreement between Mortgagee and Tenant regarding the subordination of the Lease to the Mortgage and the rights and obligations of Tenant and Mortgagee as to the subject matter of this Agreement.

30. *Interaction with Lease and with Mortgage*. If this Agreement conflicts with the Lease, then this Agreement shall govern as between the parties and any Successor Landlord, including upon any attornment pursuant to this Agreement. This Agreement supersedes, and constitutes full compliance with, any provisions in the Lease that provide for subordination of the Lease to, or for delivery of nondisturbance agreements by the holder of, the Mortgage.

31. *Mortgagee's Rights and Obligations*. Except as expressly provided for in this Agreement, Mortgagee shall have no obligations to Tenant with respect to the Lease. If an attornment occurs pursuant to this Agreement, then all rights and obligations of Mortgagee under this Agreement shall terminate, without thereby affecting in any way the rights and obligations of Successor Landlord provided for in this Agreement or under the Lease.

32. *Interpretation; Governing Law*. The interpretation, validity and enforcement of this Agreement shall be governed by and construed under the internal laws of the State in which the Leased Premises are located, excluding such State's principles of conflict of laws.

33. *Amendments*. This Agreement may be amended, discharged or terminated, or any of its provisions waived, only by a written instrument executed by the party to be charged.

34. *Due Authorization*. Tenant represents to Mortgagee that it has full authority to enter into this Agreement, which has been duly authorized by all necessary actions. Mortgagee represents to Tenant that it has full authority to enter into this Agreement, which has been duly authorized by all necessary actions.

35. *Execution*. This Agreement may be executed in any number of counterparts, each of which shall be deemed an original and all of which together shall constitute one and the same instrument.

[THIS SPACE INTENTIONALLY LEFT BLANK]

IN WITNESS WHEREOF, the Mortgagee, Tenant and Landlord have caused this Agreement to be executed as of the date first above written.

THIS SPACE ABOVE FOR RECORDER'S USE

SUBORDINATION AGREEMENT; ATTORNMENT AND NON-DISTURBANCE AGREEMENT, AND CONSENT TO SUBLEASE DATED AS OF _____ __, 2013, EXECUTED BY AGNL CLINIC, L.P., A DELAWARE LIMITED PARTNERSHIP, AS "AGNL", MOLINA HEALTHCARE, INC., A DELAWARE CORPORATION, AS "MOLINA", _____, COLLECTIVELY, AS "LENDER" AND _____, A _____, AS "SUB-TENANT".

NOTICE: SUBJECT TO THE NON-DISTURBANCE PROVISIONS CONTAINED HEREIN, THIS SUBORDINATION AGREEMENT RESULTS IN YOUR LEASE BECOMING SUBORDINATE TO, SUBJECT TO AND OF LOWER PRIORITY THAN THE GROUND LEASE (DEFINED BELOW)

THIS SUBORDINATION AGREEMENT, ATTORNMENT AND NON-DISTURBANCE AGREEMENT AND CONSENT TO SUBLEASE (this "Agreement") is made _____ __, 2013 (the "Effective Date"), by and among AGNL Clinic, L.P., a Delaware limited partnership ("AGNL"), Molina Healthcare, Inc., a Delaware corporation ("Molina"), _____ (collectively, "Lender") and _____, a _____ ("Sub-Tenant").

RECITALS:

1. Molina Center LLC, a Delaware limited liability company ("Center"), as landlord, and Sub-Tenant, as tenant (or their respective predecessors in interest), entered into a Lease made and entered into as of _____ (the "Lease"). Pursuant to the Lease, Sub-Tenant leases from Center that certain portion of the Property (defined below) as more particularly described on Exhibit B attached hereto and incorporated herein by this reference (the " Premises"). A copy of the Lease is attached hereto as Exhibit C and incorporated herein by this reference.

2. On the Effective Date, Center, sold and conveyed to AGNL the fee simple interest in that certain real property with an address of 200 and 300 Oceangate Blvd., Long Beach, California 90802, and described on Exhibit A attached hereto and incorporated herein by this reference (which

property, together with all improvements now or hereafter located on the property, is defined as the " Property") and Center assigned the Lease to Molina.

3. On the Effective Date, AGNL, as landlord, and Molina, as tenant, entered into a Lease Agreement dated as of the Effective Date (together with any amendments, modifications, replacements or extensions, the " Ground Lease") pursuant to which AGNL leased to Molina all of the Property and improvements located thereon as more fully described in the Ground Lease and Lender made a loan (the "Loan") to AGNL secured by, among other things, that certain _____ (the "Security Instrument") encumbering AGNL's interest in the Property.

4. As a condition to completing the sale and purchase of the Property and entering into the Ground Lease, AGNL and Lender have required that Molina and Sub-Tenant acknowledge and agree that (notwithstanding the fact that the Lease was entered into prior to the Ground Lease) unconditionally and at all times the Ground Lease shall be prior and superior in title to the Lease and that Molina and Sub-Tenant specifically and unconditionally subordinate their respective interests in the Lease to the priority in title of the Ground Lease, subject to certain "non-disturbance" protections for Sub-Tenant described herein.

5. Subject to certain "non-disturbance" protections for Sub-Tenant described herein, the effect of the foregoing subordination shall be that the Ground Lease shall be deemed a master lease or superior lease and that the Lease shall be deemed a sublease under the Ground Lease.

6. The parties have agreed to the foregoing and to all of the other agreements and understandings set forth in this Agreement.

NOW, THEREFORE, for valuable consideration and to induce AGNL to enter into the transaction described in the recitals, AGNL, Molina, Lender and Sub-Tenant hereby agree as follows:

1. Subordination; Consent to Sublease. AGNL, Molina, Lender and Sub-Tenant hereby agree that:

1.1 Recitals. The foregoing recitals are incorporated herein by reference as if fully set forth in this Agreement.

1.2 Prior Title. Subject to Section 4 of this Agreement, the Ground Lease, and any modifications, renewals or extensions thereof, is and shall unconditionally be and at all times remain prior and superior in title to the Lease. Molina shall be the direct landlord under the Lease and shall continue to be liable and obligated to Sub-Tenant for all of landlord's liabilities and obligations thereunder.

2. Additional Agreements. It is covenanted and agreed that so long as the Ground Lease is in effect:

2.1 No Advance Rents. Sub-Tenant will make no payments or prepayments of rent more than one (1) month in advance of the time when the same become due under the Lease except as may be expressly required of Sub-Tenant under the Lease.

2.2 Assignment of Rents. Upon receipt by Sub-Tenant of written notice from AGNL that AGNL has elected to terminate the Ground Lease or that an Event of Default (as defined in the Ground Lease) has occurred, Sub-Tenant will pay directly to AGNL all rents due and payable under the Lease. Sub-Tenant shall comply with such direction to pay and shall not be required to determine whether the Ground Lease has been terminated or whether Molina is in default under the Ground Lease; Molina and AGNL hereby agreeing with Sub-Tenant that Sub-Tenant shall be given credit under the Lease for any such payments as though such payments had been made to Molina.

2.3 Assignment and Subletting. Sub-Tenant shall not exercise any of its rights to assign, sublet, license, lease, sublease or otherwise transfer any right of use or occupancy for the Premises which requires the prior consent of Molina under the Lease without obtaining the prior written consent of AGNL in accordance with Section 2.6 hereof (the foregoing requirement for AGNL's consent shall exist independent of and regardless of whether Molina has granted its consent to such assignment, subletting, license, lease, sublease or other transfer).

2.4 Alterations and Repairs. Tenant shall not make any alteration (as defined in the Lease) at the Premises which requires the prior consent of Molina under the Lease without obtaining the prior written consent of AGNL in accordance with Section 2.6 hereof.

2.5 AGNL Agreement. So long as Molina (or any successor landlord) does not have the right to terminate the Lease by reason of default (after any applicable notice and cure periods) on the part of Sub-Tenant, then, in such event, (a) unless any applicable law requires same, Sub-Tenant shall not be joined as a party defendant in any action or proceeding which may be instituted or taken by AGNL for the purpose of terminating the Ground Lease by reason of any default thereunder, (b) Sub-Tenant shall not be evicted from the Premises nor shall any of Sub-Tenant's rights under the Lease be affected in any way by reason of any default under the Ground

Lease, and (c) Sub-Tenant's estate under the Lease shall not be terminated or disturbed by reason of any default on the part of Molina under the Ground Lease.

2.6 Consents. AGNL covenants and agrees that any consents by AGNL provided for hereunder generally shall be given, deemed given or withheld under the same standard as would be the case for Molina under the Lease provided that Tenant also delivers to AGNL any notices related to such matters at the same time as delivered to Molina in accordance with the terms of the Lease. Tenant agrees that, if Tenant contends that AGNL improperly withheld its consent to any action or occurrence which requires AGNL's consent hereunder, then Tenant may seek an action for declaratory judgment against AGNL seeking to reverse such decision, or otherwise avail itself of any other remedies against AGNL to the extent available against the landlord under the Lease. The foregoing shall not limit any and all remedies or claims that Tenant may have against Molina under or pursuant to the Lease.

3. Attornment. Sub-Tenant agrees for the benefit of AGNL and any transferee, successor or assign of AGNL or lender of AGNL, including, without limitation, Lender, which succeeds to the rights of AGNL, as landlord, pursuant to a foreclosure, deed-in-lieu of foreclosure or other exercise of remedies (hereafter referred to, collectively, as "Prime Landlord") following a termination of the Ground Lease, but subject in each case to Section 4 of this Agreement, as follows:

3.1 *Payment of Rent. Sub-Tenant shall pay to Prime Landlord all rental payments required to be made by Sub-Tenant pursuant to the terms of the Lease for the duration of the term of the Lease.*

3.2 *Continuation of Performance. Sub-Tenant shall be bound to Prime Landlord in accordance with all of the provisions of the Lease for the balance of the term thereof, and Sub-Tenant hereby attorns to Prime Landlord as its landlord following a termination of the Ground Lease, such attornment to be effective and self-operative without the execution of any further instrument immediately upon Prime Landlord's termination of the Ground Lease and delivery of written notice thereof to Sub-Tenant.*

3.3 *No Offset. Prime Landlord shall not be liable for, nor subject to, any offsets, credits or defenses which Sub-Tenant may have by reason of any act or omission of Molina under the Lease (except to the extent specifically provided in the Lease as of the Effective Date and solely for such offsets, credits or defenses accruing or continuing after Prime Landlord becomes the landlord under the Lease), nor for the return of any sums which Sub -Tenant may have paid to Molina under the Lease as and for security deposits, advance rentals or otherwise, except to the extent that such sums are actually delivered by Molina to Prime Landlord (and provided that the foregoing provisions shall not exempt Prime Landlord, if Prime Landlord succeeds to the interest of Molina under the Lease, from the performance of the obligations of the "Landlord" under the Lease accruing during and applicable to Prime Landlord's period of ownership).*

3.4 *Subsequent Transfer. If Prime Landlord, by succeeding to the interest of Molina under the Lease, should become obligated to perform the covenants of Molina thereunder, then, upon any further transfer of Prime Landlord's interest by Prime Landlord and assumption*

thereof by the transferee, all of such obligations (except those assumed by Prime Landlord during and applicable to Prime Landlord's period of ownership) shall terminate as to Prime Landlord.

4. Non-Disturbance. In the event of a termination of the Ground Lease, or other action to enforce AGNL's remedies under the Ground Lease or any other termination or surrender thereof, including, without limitation, pursuant to Section 365(h) of the U.S. Bankruptcy Code or Lender's exercise of remedies under the Security Instrument, so long as there shall then exist no right of the landlord to exercise remedies pursuant to the Lease by reason of default (beyond any applicable notice and cure period) by Sub-Tenant such that there is a right to terminate the Lease, AGNL and Lender each agree for itself and each of its successors and assigns that the leasehold interest of Sub-Tenant under the Lease shall not be extinguished or terminated by reason of such termination or exercise of remedies by AGNL or Lender, but rather the Lease shall continue in full force and effect and AGNL or Lender (and any party that shall become a transferee of the Property by reason thereof), as applicable, shall recognize and accept Sub-Tenant as tenant under the Lease subject to and upon the terms and provisions of the Lease except as modified by this Agreement; If a default (beyond any applicable notice and cure period) exists under the Lease such that there is a right to terminate the Lease at the time of the termination of the Ground Lease or the exercise of any of AGNL's remedies thereunder, then both AGNL and Lender may elect to continue the Lease as provided for in this Agreement or terminate the Lease upon written notice from AGNL and/or Lender to Sub-Tenant.

5. Miscellaneous.

5.1 Heirs, Successors, Assigns and Transferees. The covenants herein shall be binding upon, and inure to the benefit of, the heirs, successors and assigns of the parties hereto including, without limitation, Lender or any other lender of AGNL that becomes landlord under the Ground Lease or the Lease.

5.2 Notices. All notices or other communications required or permitted to be given pursuant to the provisions hereof shall be deemed served upon delivery or, if mailed, upon the first to occur of receipt or the expiration of three (3) days after deposit in United States Postal Service, certified mail, postage prepaid and addressed to the address of AGNL, Molina or Sub‑Tenant appearing below:

"Lender" [insert lender's contact information]

"Sub-Tenant" [insert tenant's contact information]

provided, however, that any party shall have the right to change its address for notice hereunder by the giving of written notice thereof to the other parties in the manner set forth in this Agreement.

5.3 Counterparts. This Agreement may be executed in two or more counterparts, each of which shall be deemed an original and all of which together shall constitute and be construed as one and the same instrument.

5.4 Remedies Cumulative. All rights of AGNL herein to collect rents on behalf of Molina under the Lease are cumulative and shall be in addition to any and all other rights and remedies provided by law and by other agreements between AGNL and Molina or others.

5.5 Paragraph Headings. Paragraph headings in this Agreement are for convenience only and are not to be construed as part of this Agreement or in any way limiting or applying the provisions hereof.

5.6 Representations. Each of AGNL, Molina, Lender and Sub-Tenant represents to the other respective parties that it has the power and authority to enter into this Agreement.

5.7 Intentionally Omitted.

5.8 Governing Law. It is the intention of the parties hereto that this Agreement (and the terms and provisions hereof) shall be construed and enforced in accordance with the laws of the State of California, without regard to any conflict of law principles.

5.9 Recordation. At AGNL's option, this Agreement may be recorded in the land records where the Property is located. Any recordation of this Agreement or any memorandum thereof, whether at the request of AGNL, Lender or otherwise, shall not be at SubTenant's expense.

5.10 Fee Lender Subordination. AGNL, Molina, Lender and Sub-Tenant agree that the Lease shall be subordinate to the Loan and the Security Instrument and any mortgage or other security instrument hereafter placed upon the Property (which includes the Premises) by AGNL, and to any and all advances made or to be made thereunder, to the interest thereon, and all renewals, replacements and extensions thereof; provided, however, that the foregoing shall not limit Lender's agreements contained herein, including, without limitation, as described in Section 5.4 hereof.

INCORPORATION. Exhibit A, Exhibit B and Exhibit C are attached hereto and incorporated herein by this reference.

(SIGNATURES FOLLOW)

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the day and year first above-written.

NOTICE: IT IS RECOMMENDED THAT, PRIOR TO THE EXECUTION OF THIS AGREEMENT, THE PARTIES CONSULT WITH THEIR ATTORNEYS WITH RESPECT HERETO.

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended June 30, 2013 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
March 31, 2013

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of March 31, 2013, these health plans served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of primary care community clinics in California, Florida, New Mexico, and Washington.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts are renewable at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in retaining their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's prior contract with the state expired without renewal on June 30, 2012 subject to certain transition obligations.

Our state Medicaid contracts may be periodically adjusted to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas. For example, our Texas health plan added significant membership effective March 1, 2012, in service areas we had not previously served (the Hidalgo and El Paso service areas); and among populations we had not previously served within existing service areas, such as the Temporary Assistance for Needy Families, or TANF, population in the Dallas service area. Additionally, the health benefits provided to our TANF and ABD members in Texas under our contracts with the state were expanded to include inpatient facility and pharmacy services effective March 1, 2012.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intended to award the contract for a replacement Medicaid Management Information System (MMIS) to a different vendor, CNSI. However, in March 2013, the state of Louisiana cancelled its contract award to CNSI. CNSI is currently challenging the contract cancellation. The state has informed us that we will continue to perform under our current contract until a successor is named. Subject to the pending challenge, it is currently uncertain whether a new RFP will be issued, and if so, when it will be issued. At such time as a new RFP may be issued, we intend to respond to the state's RFP. For the three months ended March 31, 2013, our revenue under the Louisiana MMIS contract was approximately $10.1 million, or 20.3% of total service revenue. So long as our Louisiana MMIS contract continues, we expect to recognize approximately $40 million of service revenue annually under this contract.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions

have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2013.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2012. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2012 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2012 audited consolidated financial statements.

Reclassifications

We have reclassified certain amounts in the 2012 consolidated balance sheet, and statements of income and cash flows to conform to the 2013 presentation.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

(1) Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract: These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates), our revenue earned for those periods will also change. In all of these instances, our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn would lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of approximately $0.3 million at both March 31, 2013, and December 31, 2012.

Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health: A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At both March 31, 2013, and December 31, 2012, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): Our contract with the state of New Mexico directs that a portion of premiums received may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. At both March 31, 2013, and December 31, 2012, we had not recorded any liability under the terms of these contract provisions.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $3.1 million and $3.2 million pursuant to our profit-sharing agreement with the state of Texas at March 31, 2013, and December 31, 2012, respectively.

Washington Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our Washington health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of approximately $1.0 million at March 31, 2013. At December 31, 2012, we had not recorded any liability under the terms of this contract provision since medical expenses were not less than the contractual floor.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net payable of approximately $0.2 million as of March 31, 2013 and a net receivable of approximately $0.3 million as of December 31, 2012 for anticipated Medicare risk adjustment premiums.

(2) Quality incentives that allow us to recognize incremental revenue if certain quality standards are met: These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, incremental revenue of up to 3.25% of total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of March 31, 2013 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of March 31, 2013.

	Three Months Ended March 31, 2013				
	Maximum Available Quality Incentive Premium - Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized
	(In thousands)				
New Mexico	$ 585	$ 332	$ 108	$ 440	$ 85,798

	$ 9,399	$ 8,764	$ 994	$ 9,758	$ 590,129

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid Management Information System (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. While providing BPO services (which include claims payment and eligibility processing), we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements.

Additionally, we evaluate each required deliverable under our multiple-element service arrangements to determine whether it qualifies as a separate unit of accounting. Such evaluation is generally based on whether the deliverable has standalone value to the customer. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable

evidence of fair value for the undelivered elements in the contracts. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs;
- Employee costs incurred in performing transaction services;
- Vendor costs incurred in performing transaction services;
- Costs incurred in performing required monitoring of and reporting on contract performance;
- Costs incurred in maintaining and processing member and provider eligibility; and
- Costs incurred in communicating with members and providers.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of non-deductible compensation and state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct

business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $10.6 million as of March 31, 2013 and December 31, 2012. Approximately $8.4 million of the unrecognized tax benefits recorded at March 31, 2013 and December 31, 2012, relate to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $7.2 million as of March 31, 2013 and December 31, 2012. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $8.6 million due to the expiration of statute of limitations and the resolution to the state refund claim described above.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of March 31, 2013, and December 31, 2012, we had accrued $60,000 and $56,000, respectively, for the payment of interest and penalties.

Recent Accounting Pronouncements

Reclassifications Out of Accumulated Other Comprehensive Income. In February 2013, the Financial Accounting Standards Board (FASB) issued guidance for the reporting of amounts reclassified out of accumulated other comprehensive income. The new guidance requires entities to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. generally accepted accounting principles (GAAP) to be reclassified in its entirety to net income. The new guidance does not change the current requirements for reporting net income or other comprehensive income in financial statements and is effective prospectively for reporting periods beginning after December 15, 2012. The adoption of this new guidance in 2013 did not impact our financial position, results of operations or cash flows.

Balance Sheet Offsetting. In December 2011, the FASB issued guidance for new disclosure requirements related to the nature of an entity's rights of set-off and related arrangements associated with its financial instruments and derivative instruments. The new guidance is effective for annual reporting periods, and interim periods within those years, beginning on or after January 1, 2013. The adoption of this new guidance in 2013 did not impact our financial position, results of operations or cash flows.

Federal Premium-Based Assessment. In July 2011, the FASB issued guidance related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (ACA). The ACA imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. The fee will be imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year.

The new guidance specifies that the liability for the fee should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. The new guidance is effective for annual reporting periods beginning after December 31, 2013, when the fee initially becomes effective. As enacted, this federal premium-based assessment is non-deductible for income tax purposes, and is anticipated to be significant. It is yet undetermined how this premium-based assessment will be factored into the calculation of our premium rates, if at all. Accordingly, adoption of this guidance and the enactment of this assessment as currently written will have a material impact on our financial position, results of operations, or cash flows in future periods. We are currently evaluating the impact of the fee to our financial position, results of operations and cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants (AICPA), and the Securities and Exchange Commission (SEC) did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	Three Months Ended March 31,	
	2013	2012
	(In thousands)	
Shares outstanding at the beginning of the period	46,762	45,815
Weighted-average number of shares repurchased	(867)	—
Weighted-average number of shares issued	86	183
Denominator for basic income per share	45,981	45,998
Dilutive effect of employee stock options and stock grants (1)	462	857
Dilutive effect of convertible senior notes	—	32
Denominator for diluted income per share (2)	46,443	46,887

(1) Unvested restricted shares are included in the calculation of diluted income per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. Options to purchase common shares are included in the calculation of diluted income per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three months ended March 31, 2013 and 2012, there were approximately 202,500 and 199,700 anti-dilutive weighted restricted shares, respectively. For the three months ended March 31, 2013 and 2012 there were approximately 25,500 and 7,900 anti-dilutive weighted options, respectively.

(2) Potentially dilutive shares issuable pursuant to our 3.75% Notes and 1.125% Warrants (both defined in Note 10, "Long-Term Debt") were not included in the computation of diluted income per share for the three month period ended March 31, 2013, because to do so would have been anti-dilutive.

4. Stock-Based Compensation

At March 31, 2013, we had employee equity incentives outstanding under two plans: (1) the 2011 Equity Incentive Plan; and (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded).

In March 2013, our named executive officers were granted restricted stock awards with performance conditions as follows: our chief executive officer was awarded 186,858 shares, our chief financial officer was awarded 93,429 shares, our chief operating officer was awarded 62,286 shares, our chief accounting officer was awarded 28,029 shares, and our general counsel was awarded 21,800 shares. These awards were apportioned into four equal increments, and will vest in accordance with the following four measures: (i) 1/4th will vest in equal 1/3rd increments over three years on March 1, 2014, March 1, 2015, and March 1, 2016; (ii) 1/4th will vest upon our achievement of three-year Total Stockholder Return as determined by Institutional Shareholder Services Inc. (ISS) calculations for the three-year period ending December 31, 2013 equal to or greater than the 50th percentile within our ISS peer group; (iii) 1/4th shall vest upon our achievement of total revenue in any of the 2013, 2014, or 2015 fiscal years equal to or greater than $12 billion; and (iv) 1/4th shall vest upon our achievement of the three-year earnings before interest, taxes, depreciation and amortization (EBITDA) margin percentage for the three-year period ending December 31, 2013 equal to or greater than 2.5%. In the event the vesting conditions are not achieved, the awards shall lapse. As of March 31, 2013, such performance goals have not yet been met, but we do expect the awards to vest in full.

Charged to general and administrative expenses, total stock-based compensation expense was as follows for the three months ended March 31, 2013 and 2012:

	Three Months Ended March 31,	
	2013	2012
	(In thousands)	
Restricted stock and performance awards	$ 3,848	$ 4,398
Stock options (primarily relating to our employee stock purchase plan)	573	268
	$ 4,421	$ 4,666

As of March 31, 2013, there was $29.2 million of total unrecognized compensation expense related to unvested restricted share awards, which we expect to recognize over a remaining weighted-average period of 1.9 years. Also as of March 31, 2013, there was $0.8 million of total unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 2.8 years.

Restricted stock activity for the three months ended March 31, 2013 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2012	986,577	$ 23.74
Granted	601,175	31.40
Vested	(409,484)	22.16
Forfeited	(7,750)	22.93
Unvested balance as of March 31, 2013	1,170,518	28.23

The total fair value of restricted stock and stock unit awards, including those with performance conditions, granted during the three months ended March 31, 2013 and 2012 was $19.3 million and $19.8 million, respectively. The total fair value of restricted stock and stock unit awards vested during the three months ended March 31, 2013 and 2012 was $13.1 million and $22.8 million, respectively.

Stock option activity for the three months ended March 31, 2013 is summarized below:

	Options	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Outstanding as of December 31, 2012	414,061	$ 22.39		
Granted	45,000	33.02		
Exercised	(13,001)	17.97		
Forfeited	(300)	17.63		
Outstanding as of March 31, 2013	445,760	23.60	$ 3,398	3.8
Stock options exercisable and expected to vest as of March 31, 2013	445,760	23.60	$ 3,398	3.8
Exercisable as of March 31, 2013	390,760	22.23	$ 3,398	3.0

The weighted-average grant date fair value per share of stock options awarded to the new members of our board of directors during the three months ended March 31, 2013 was $14.67. The weighted-average grant date fair value per share of the stock option awarded to the director appointed during 2012 was $13.97. To determine the fair values of these stock options we applied risk-free interest rates of 1.1% to 1.4%, expected volatilities of 41.3% to 43.0%, dividend yields of 0%, and expected lives of 6 years to 7 years.

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, a derivative asset, trade accounts payable, medical claims and benefits payable, long-term debt, derivative liabilities, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

- *Level 1 — Observable inputs such as quoted prices in active markets:* Our Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.
- *Level 2 — Inputs other than quoted prices in active markets that are either directly or indirectly observable:* Our Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit that are classified as current investments in the accompanying consolidated balance sheets. Our investments classified as Level 2 are traded frequently though not necessarily

daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Additionally, Level 2 financial instruments include an interest rate swap derivative liability. Fair value for the interest rate swap derivative is based on forward LIBOR rates that are and will be observable at commonly quoted intervals for the full term of the interest rate swap agreement.

- *Level 3 — Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions:* Our Level 3 financial instruments recorded at fair value include non-current auction rate securities that are designated as available-for-sale, and are reported at fair value of $13.6 million (par value of $14.5 million) as of March 31, 2013. To estimate the fair value of these securities we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants including global financial institutions, hedge funds, private equity funds, mutual funds, corporations and other institutional investors. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from two other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of March 31, 2013.

  Additionally, Level 3 financial instruments include derivative financial instruments comprising the 1.125% Call Option asset, the embedded conversion option liability, and the 1.125% Warrants liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of March 31, 2013 included our common stock price, time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. See Note 10, “Long-Term Debt,” and Note 11, “Derivative Financial Instruments,” for further information, including defined terms, regarding our derivative financial instruments.

Our financial instruments measured at fair value on a recurring basis at March 31, 2013, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 198,567	$ —	$ 198,567	$ —
GSEs	27,399	27,399	—	—
Municipal securities	75,411	—	75,411	—
U.S. treasury notes	31,938	31,938	—	—
Auction rate securities	13,600	—	—	13,600
Certificates of deposit	8,631	—	8,631	—
1.125% Call Option derivative	147,385	—	—	147,385
Total assets measured at fair value on a recurring basis	$ 502,931	$ 59,337	$ 282,609	$ 160,985
Embedded conversion option derivative	$ 147,309	$ —	$ —	$ 147,309
1.125% Warrants derivative	75,074	—	—	75,074
Interest rate swap derivative	1,264	—	1,264	—
Total liabilities measured at fair value on a recurring basis	$ 223,647	$ —	$ 1,264	$ 222,383

Our financial instruments measured at fair value on a recurring basis at December 31, 2012, were as follows:

	Total	Level 1	Level 2	Level 3
	(In thousands)			
Corporate debt securities	$ 191,008	$ —	$ 191,008	$ —
GSEs	29,525	29,525	—	—
Municipal securities	75,848	—	75,848	—
U.S. treasury notes	35,740	35,740	—	—
Auction rate securities	13,419	—	—	13,419
Certificates of deposit	10,724	—	10,724	—
Total assets measured at fair value on a recurring basis	$ 356,264	$ 65,265	$ 277,580	$ 13,419
Interest rate swap derivative	$ 1,307	$ —	$ 1,307	$ —

The following tables present activity relating to our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	Changes in Level 3 Instruments for the Three Months Ended March 31, 2013		
	Total	Auction Rate Securities	Derivatives, Net
	(In thousands)		
Balance at December 31, 2012	$ 13,419	$ 13,419	$ —

The amount of total unrealized gains for the period included in other comprehensive income attributable to the change in accumulated other comprehensive losses relating to assets still held at December 31, 2012	$ 1,059	$ 1,059	$ —

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our long-term debt, as well as the applicable fair value hierarchy tiers, are contained in the tables below. Our convertible senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. Our term loan is classified as a Level 3 financial instrument, because certain inputs used to determine the fair value of this financial instrument are unobservable. The carrying value of the term loan at March 31, 2013, approximates its fair value because there has been no significant change to our credit risk relating to this instrument from the term loan's origination date in December 2011, through March 31, 2013. As described in Note 14, "Commitments and Contingencies," we recorded a financing obligation in connection with a lease entered into in February

2013. The financing obligation at March 31, 2013, approximates its fair value because of the short period of time between the origination of the obligation in February 2013 and March 31, 2013. The Credit Facility was repaid and terminated effective February 15, 2013.

	March 31, 2013				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
			(In thousands)

6. Investments

The following tables summarize our investments as of the dates indicated:

	March 31, 2013			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 198,265	$ 441	$ 139	$ 198,567
Government-sponsored enterprise securities (GSEs)	27,372	27	—	27,399
Municipal securities	75,216	348	153	75,411
U.S. treasury notes	31,894	44	—	31,938
Certificates of deposit	8,617	14	—	8,631
Subtotal - current investments	341,364	874	292	341,946
Auction rate securities	14,500	—	900	13,600
	$ 355,864	$ 874	$ 1,192	$ 355,546

	December 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 190,545	$ 528	$ 65	$ 191,008
GSEs	29,481	45	1	29,525
Municipal securities	75,909	185	246	75,848
U.S. treasury notes	35,700	42	2	35,740
Certificates of deposit	10,715	9	—	10,724
Subtotal - current investments	342,350	809	314	342,845
Auction rate securities	14,650	—	1,231	13,419
	$ 357,000	$ 809	$ 1,545	$ 356,264

The contractual maturities of our investments as of March 31, 2013 are summarized below:

	Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 173,871	$ 174,145
Due one year through five years	167,493	167,801
Due after ten years	14,500	13,600
	$ 355,864	$ 355,546

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Net realized investment gains for the three months ended March 31, 2013, and 2012 were $94,000 and $64,000 respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at March 31, 2013, and December 31, 2012, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of March 31, 2013.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(Dollars in thousands)					
Corporate debt securities	$ 52,264	$ 139	28	$ —	$ —	—
Municipal securities	21,440	153	37	—	—	—
Auction rate securities	—	—	—	13,600	900	19
	$ 73,704	$ 292	65	$ 13,600	$ 900	19

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2012.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(Dollars in thousands)					
Corporate debt securities	$ 44,457	$ 65	23	$ —	$ —	—
Municipal securities	35,223	246	43	—	—	—
GSEs	5,004	1	1	—	—	—
U.S. treasury notes	4,511	2	5	—	—	—
Auction rate securities	—	—	—	13,419	1,231	21
	$ 89,195	$ 314	72	$ 13,419	$ 1,231	21

Auction Rate Securities

Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 18 years to 34 years. Considering the relative insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at March 31, 2013. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $67.6 million of these instruments at par value.

For the three months ended March 31, 2013, and 2012, we recorded pretax unrealized gains of $0.3 million and $0.1 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

7. Receivables

Receivables consist primarily of amounts due from the various states in which we operate. Accounts receivable were as follows:

	March 31, 2013	December 31, 2012
	(In thousands)	
Health Plans segment:		
California	$ 45,962	$ 28,553
Florida	1,468	953
Michigan	9,519	12,873
New Mexico	12,153	9,059
Ohio	33,041	40,980
Texas	8,100	7,459
Utah	4,790	3,359
Washington	13,160	17,587
Wisconsin	4,404	4,098
Others	1,145	2,177
Total Health Plans segment	133,742	127,098
Molina Medicaid Solutions segment	16,509	22,584
	$ 150,251	$ 149,682

8. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by state authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. Additionally, in connection with the Molina Medicaid Solutions segment contracts with the states of Maine and Idaho, we maintain restricted investments as collateral for letters of credit. The following table presents the balances of restricted investments:

	March 31, 2013	December 31, 2012
	(In thousands)	
California	$ 373	$ 373
Florida	6,840	5,738
Michigan	1,014	1,014
New Mexico	15,917	15,915
Ohio	9,081	9,082
Texas	3,500	3,503
Utah	3,321	3,126
Washington	151	151
Other	4,619	5,199
Total Health Plans segment	44,816	44,101
Molina Medicaid Solutions segment	10,301	—
	$ 55,117	$ 44,101

The contractual maturities of our held-to-maturity restricted investments as of March 31, 2013 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 51,617	$ 51,622
Due one year through five years	3,500	3,501
	$ 55,117	$ 55,123

9. Medical Claims and Benefits Payable

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Three Months Ended March 31,	
	2013	2012
	(Dollars in thousands)	
Balances at beginning of period	$ 494,530	$ 402,476
Components of medical care costs related to:		
Current period	1,347,181	1,167,580
Prior periods	(58,427)	(36,592)
Total medical care costs	1,288,754	1,130,988
Payments for medical care costs related to:		
Current period	916,426	750,994
Prior periods	375,713	326,637
Total paid	1,292,139	1,077,631
Balances at end of period	$ 491,145	$ 455,833
Benefit from prior period as a percentage of:		
Balance at beginning of period	11.8%	9.1%
Premium revenue	3.8%	2.8%
Total medical care costs	4.5%	3.2%

Assuming that our initial estimate of claims incurred but not paid (IBNP) is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range. For example, for the three months ended March 31, 2012, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2011 by 9.1%. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate - we only know when the circumstances for any one or more factors are out of the ordinary.

As indicated above, the amounts ultimately paid out on our liabilities in fiscal years 2013 and 2012 were less than what we had expected when we had established our reserves. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We recognized favorable prior period claims development in the amount of $58.4 million for the three months ended March 31, 2013. This amount represents our estimate, as of March 31, 2013, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2012 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2012 was due primarily to the following factors:

- At our Texas health plan, we saw a reduction in STAR+PLUS (the state's program for aged and disabled members) membership during mid to late 2012. This caused a reduction in costs per member that we did not fully recognize in our December 31, 2012 reserve estimates.
- At our Washington health plan, prior to July 2012, certain high-cost newborns that were approved for SSI coverage by the state were retroactively dis-enrolled from our Healthy Options (TANF) coverage, and the health plan was reimbursed for the claims paid on behalf of these members. Starting July 1, 2012, these newborns, as well as other high-cost disabled members, are now covered by the health plan under the Health Options Blind and Disabled (HOBD) program. At the end of 2012, we did not have enough claims history to accurately estimate the claims liability of the HOBD members, and as a result the liability for these high-cost members was overstated.
- For our New Mexico health plan, we overestimated the impact of certain high-dollar outstanding claim payments as of December 31, 2012.

We recognized favorable prior period claims development in the amount of $36.6 million for the three months ended March 31, 2012. This amount represents our estimate as of March 31, 2012, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2011 was due primarily to the following factors:

- At our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- At our Texas health plan, we overestimated the cost of new members in STAR+PLUS (the name of our ABD program in Texas), in the Dallas region.
- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in the lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all of the claims overestimation.
- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Missouri health plan, as a result of the costs associated with an unusually large number of premature infants during the fourth quarter of 2011.

In estimating our claims liability at March 31, 2013, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- In our Texas health plan, although the reduction in STAR+PLUS membership has leveled off in 2013, we have seen a reduction in per member per month (PMPM) cost for outpatient services and an increase in PMPM costs for inpatient services over the past six to nine months. We have estimated the impact of these shifts in cost in our March 31, 2013 liability.
- Our Wisconsin health plan is experiencing significant membership increases, and is expected to approximately double in size during the first four months of 2013. This new membership is transitioning to our health plan from a terminated health plan. We enrolled approximately 40,000 new members in February and March 2013. We have computed a separate reserve analysis for these members and have noted that paid claims are less than what we would expect for newly transitioned members. Therefore, we have increased the reserves for this membership, in anticipation of higher claims costs later than usual for these members.
- Our Washington health plan began covering disabled members, including newborns, that were previously covered by the state under a separate state program. Coverage for this segment began in July of 2012, with gradual growth in membership. As of March 2013 the health plan covered approximately 28,000 members under this program. Because of the high costs for these members and the relative newness of the product category, there is still some uncertainty about the cost and reserve liability for these members as of March 31, 2013.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2012 and for the three months ended March 31, 2013, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the replenishment of reserves in the respective periods generally offset the benefit from the prior period.

10. Long-Term Debt

As of March 31, 2013, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2013	2014	2015	2016	2017	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
3.75% Notes	187,000	—	187,000	—	—	—	—
Term loan	47,179	863	1,206	1,259	1,309	1,372	41,170
	$ 784,179	$ 863	$ 188,206	$ 1,259	$ 1,309	$ 1,372	$ 591,170

1.125% Cash Convertible Senior Notes due 2020

On February 15, 2013, we settled the issuance of $550.0 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020 (the 1.125% Notes). This transaction included the initial issuance of $450.0 million on February 11, 2013, plus the exercise of the full amount of the $100.0 million over-allotment option on February 13, 2013. The aggregate net proceeds of the 1.125% Notes were $458.9 million, after payment of the net cost of the Call Spread Overlay described below and in Note 11, “Derivative Financial Instruments,” and transaction costs. Additionally, we used $50.0 million of the net proceeds to purchase shares of our common stock (see Note 12, “Stockholders' Equity”), and $40.0 million to repay the principal owed under our Credit Facility.

Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 of each year, at a rate of 1.125% per annum commencing on July 15, 2013. The 1.125% Notes will mature on January 15, 2020 unless repurchased or converted in accordance with their terms prior to such date.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. Holders may convert their 1.125% Notes solely into cash at their option at any time prior to the close of business on the business day immediately preceding July 15, 2019 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period immediately after any five consecutive trading day period in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.125% Notes solely into cash at any time, regardless of the foregoing circumstances. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the Indenture.

The initial conversion rate will be 24.5277 shares of our common stock per $1,000 principal amount of 1.125% Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate will be subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest. In addition, following certain corporate events that occur prior to the maturity date, we will pay a cash make-whole premium by increasing the conversion

rate for a holder who elects to convert its 1.125% Notes in connection with such a corporate event in certain circumstances. We may not redeem the 1.125% Notes prior to the maturity date, and no sinking fund is provided for the 1.125% Notes.

If we undergo a fundamental change (as defined in the indenture to the 1.125% Notes), holders may require us to repurchase for cash all or part of their 1.125% Notes at a repurchase price equal to 100% of the principal amount of the 1.125% Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the fundamental change repurchase date. The indenture provides for customary events of default, including cross acceleration to certain other indebtedness of ours, and our significant subsidiaries.

The 1.125% Notes are senior unsecured obligations, and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries.

The 1.125% Notes contain an embedded cash conversion option. We have determined that the embedded cash conversion option is a derivative financial instrument, required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option transaction settles or expires. The initial fair value liability of the embedded cash conversion option was $149.3 million, which simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). For further discussion of the derivative financial instruments relating to the 1.125% Notes, refer to Note 11, “Derivative Financial Instruments.”

As noted above, the reduced carrying value on the 1.125% Notes resulted in a debt discount that is amortized to the 1.125% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms had been issued. The effective interest rate of the 1.125% Notes is 5.9%, which is imputed based on the amortization of the fair value of the embedded cash conversion option over the remaining term of the 1.125% Notes. As of March 31, 2013, we expect the 1.125% Notes to be outstanding until their January 15, 2020 maturity date, for a remaining amortization period of 6.8 years. The 1.125% Notes' if-converted value did not exceed their principal amount as of March 31, 2013.

Also in connection with the settlement of the 1.125% Notes, we paid approximately $16.9 million in transaction costs. Such costs have been allocated to the 1.125% Notes, the 1.125% Call Option (defined below) and the 1.125% Warrants (defined below) according to their relative fair values. The amount allocated to the 1.125% Notes, or $12.0 million, was capitalized and will be amortized over the term of the 1.125% Notes. The aggregate amount allocated to the 1.125% Call Option and 1.125% Warrants, or $4.9 million, was recorded to interest expense in the quarter ended March 31, 2013.

1.125% Notes Call Spread Overlay

Concurrent with the issuance of the 1.125% Notes, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes. These transactions represent a Call Spread Overlay, whereby the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes. We used $149.3 million of the proceeds from the settlement of the 1.125% Notes to pay for the 1.125% Call Option, and simultaneously received $75.1 million for the sale of the 1.125% Warrants, for a net cash outlay of $74.2 million for the Call Spread Overlay. The 1.125% Call Option and the 1.125% Warrants are derivative financial instruments; refer to Note 11, “Derivative Financial Instruments” for further discussion.

Aside from the initial payment of a premium to the counterparties of $149.3 million for the 1.125% Call Option, we will not be required to make any cash payments to the counterparties under the 1.125% Call Option, and will be entitled to receive from the counterparties an amount of cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the 1.125% Call Options during the relevant valuation period. The strike price under the 1.125% Call Option is initially equal to the conversion price of the 1.125% Notes. Additionally, if the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common

stock underlying the 1.125% Warrants transactions and the additional 1.125% Warrants transactions, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants transactions, we issued 13,490,236 warrants with strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances.

3.75% Convertible Senior Notes due 2014

We had $187.0 million of 3.75% Convertible Senior Notes due 2014 (the 3.75% Notes) outstanding as of March 31, 2013 and December 31, 2012, respectively. The 3.75% Notes rank equally in right of payment with our existing and future senior indebtedness. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Because the 3.75% Notes have cash settlement features, accounting guidance required us to allocate the proceeds from their issuance between a liability component and an equity component. The reduced carrying value on the 3.75% Notes resulted in a debt discount that is amortized back to the 3.75% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 3.75% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms had been issued. The effective interest rate of the 3.75% Notes is 7.5%, principally based on the seven-year U.S. Treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. As of March 31, 2013, we expect the 3.75% Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 18 months. The 3.75% Notes' if-converted value did not exceed their principal amount as of March 31, 2013. At March 31, 2013, the equity component of the 3.75% Notes, net of the impact of deferred taxes, was $24.0 million.

The principal amounts, unamortized discount and net carrying amounts of the 1.125% Notes and 3.75% Notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
March 31, 2013:			
1.125% Notes	$ 550,000	$ 147,164	$ 402,836
3.75% Notes	187,000	9,976	177,024
	$ 737,000	$ 157,140	$ 579,860
December 31, 2012:			
3.75% Notes	$ 187,000	$ 11,532	$ 175,468

	Three Months Ended March 31,	
	2013	2012
	(in thousands)	
Interest cost recognized for the period relating to the:		
Contractual interest coupon rate	$ 2,527	$ 1,753
Amortization of the discount on the liability component	3,723	1,443
Total interest cost recognized	$ 6,250	$ 3,196

Term Loan

In December 2011, our wholly owned subsidiary, Molina Center LLC, entered into a Term Loan Agreement with various lenders and East West Bank, as Administrative Agent (the Administrative Agent) to borrow $48.6 million to finance a portion of the purchase price for the Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period (as defined below). The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month,

two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. Interest Period means the period commencing on the first day of each calendar month and ending on the last day of each calendar month. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commenced on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Credit Facility

On February 15, 2013, we used approximately $40.0 million of the net proceeds from the offering of the 1.125% Notes to repay all of the outstanding indebtedness under our $170 million revolving Credit Facility, with various lenders and U.S. Bank National Association, as Line of Credit Issuer, Swing Line Lender, and Administrative Agent. As of December 31, 2012, there was $40.0 million outstanding under the Credit Facility.

We terminated the Credit Facility in connection with the closing of the offering and sale of the 1.125% Notes. Two letters of credit in the aggregate principal amount of $10.3 million that reduced the amount available for borrowing under the Credit Facility as of December 31, 2012, were transferred to direct issue letters of credit with another financial institution.

11. Derivative Financial Instruments

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

	Balance Sheet Location	March 31, 2013
		(In thousands)
Derivative asset:		
1.125% Call Option	Non-current assets: Derivative asset	$ 147,385
Derivative liabilities:		
Embedded cash conversion option	Non-current liabilities: Derivative liabilities	$ 147,309
1.125% Warrants	Non-current liabilities: Derivative liabilities	75,074
Interest rate swap	Non-current liabilities: Derivative liabilities	1,264
		$ 223,647

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of income, in “Other income (expense).” The following table summarizes the gain (loss) recorded in the period presented (as of March 31, 2012, we did not hold any derivative financial instruments):

	Three Months Ended March 31, 2013
	(In thousands)
Derivative gains (losses):	
1.125% Call Option	$ (1,946)
Embedded cash conversion option	2,022
Interest rate swap	43
	$ 119

1.125% Notes Call Spread Overlay

We entered into the 1.125% Call Option and the 1.125% Warrants transactions with certain of the initial purchasers of the 1.125% Notes (the Option Counterparties). These transactions represent a Call Spread Overlay, whereby the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the debentures was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the counterparties (and 1.125% Warrants strike prices in excess of the

conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes. We used $149.3 million of the proceeds from the settlement of the 1.125% Notes to pay for the 1.125% Call Option, and simultaneously received $75.1 million for the sale of the 1.125% Warrants, for a net cash outlay of $74.2 million for the Call Spread Overlay.

Aside from the initial payment of a premium to the counterparties of $149.3 million for the 1.125% Call Option, we will not be required to make any cash payments to the counterparties under the 1.125% Call Option, and will be entitled to receive from the counterparties an amount of cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the 1.125% Call Options during the relevant valuation period. The strike price under the 1.125% Call Option is initially equal to the conversion price of the 1.125% Notes. Additionally, if the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants transactions and the additional 1.125% Warrants transactions, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants transactions, we issued 13,490,236 warrants with strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances.

The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to the cash settlement features until such transactions settle or expire. The 1.125% Call Option is measured and reported at fair value on a recurring basis, within Level 3 of the fair value hierarchy. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 5, “Fair Value Measurements.”

The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants. The 1.125% Warrants are recorded as a derivative liability requiring mark-to-market accounting treatment due to certain terms in the warrant agreements that prevent such instruments being considered to be indexed in our common stock. The 1.125% Warrants are measured and reported at fair value on a recurring basis, within Level 3 of the fair value hierarchy. For further discussion of the inputs used to determine the fair value of the 1.125% Warrants, refer to Note 5, “Fair Value Measurements.”

1.125% Notes Embedded Cash Conversion Option

The embedded cash conversion option within the 1.125% Notes is required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option settles or expires. The initial fair value liability of the embedded cash conversion option was $149.3 million, which simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). The embedded cash conversion option is measured and reported at fair value on a recurring basis, within Level 3 of the fair value hierarchy. For further discussion of the inputs used to determine the fair value of the embedded cash conversion option, refer to Note 5, “Fair Value Measurements.”

Interest Rate Swap

In May 2012, we entered into a $42.5 million notional amount interest rate swap agreement (Swap), with an effective date of March 1, 2013. The Swap is intended to reduce our exposure to fluctuations in the contractual variable interest rates under our Term Loan Agreement, and expires on the maturity date of the Term Loan Agreement, which is November 30, 2018. Since its inception, the Swap has not been designated as a hedge. Under the Swap, we will receive a variable rate of the one-month LIBOR plus 3.25%, and pay a fixed rate of 5.34%. The Swap is measured and reported at fair value on a recurring basis, within Level 2 of the fair value hierarchy. We believe that we are not exposed to more than a nominal amount of credit risk relating to the Swap because the counterparty is an established and well-capitalized financial institution.

12. Stockholders’ Equity

Securities Repurchases and Repurchase Program. In connection with the issuance and settlement of the 1.125% Notes, we used a portion of the net proceeds from the offering to repurchase $50 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. On February 12, 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date. As of March 31, 2013, additional paid-in capital decreased primarily due to this repurchase.

Effective as of February 13, 2013, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or the 3.75% Notes, in addition to the $50.0 million repurchase discussed above. The repurchase program extends through December 31, 2014.

Shelf Registration Statement. In May 2012, we filed an automatic shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Plans. In connection with the plans described in Note 4, "Stock-Based Compensation," we issued approximately 279,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the three months ended March 31, 2013.

13. Segment Reporting

We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans and also includes our direct delivery business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides design, development, implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

14. Commitments and Contingencies

Leases

We lease administrative and clinic facilities, and certain equipment, under non-cancelable operating leases expiring on various dates through 2024. Facility lease terms generally range from five to ten years with one-to-two renewal options for extended terms. In most cases, we are required to make additional payments under facility operating leases for taxes, insurance and other operating expenses incurred during the lease period. Certain of our leases contain rent escalation clauses or lease incentives, including rent abatements and tenant improvement allowances. Rent escalation clauses and lease incentives are taken into account in determining total rent expense to be recognized during the lease term.

As described and defined in further detail in Note 15, "Related Party Transactions," we entered into a Lease for office space in February 2013 consisting of two office buildings under construction. Because of our involvement in the properties, we are treated as the in-substance owner of the properties. As such, we have recorded $16.1 million to construction in progress, included in property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of March 31, 2013. This amount represents costs, including construction costs, incurred to date by the Landlord on the properties. We have recorded a corresponding financing obligation of $16.1 million to long-term debt, and will capitalize construction costs as incurred, including imputed interest, until the properties are available for occupancy. In addition to the capitalization of the costs incurred by the Landlord, we have imputed and recorded rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was immaterial for the three months ended March 31, 2013.

As of March 31, 2013, our expectation is that Building A will be available for occupancy in June 2013, and Building B will be available for occupancy in November 2014. At the time of occupancy for each property, we will evaluate the accounting guidance applicable to sale-leasebacks of real estate to determine our continuing involvement in the properties, and whether we can remove the assets from our balance sheet.

Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Such state laws and regulations also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $572.9 million at March 31, 2013, and $549.7 million at December 31, 2012. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $450.5 million and $46.9 million as of March 31, 2013, and December 31, 2012, respectively.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of March 31, 2013, our health plans had aggregate statutory capital and surplus of approximately $585.5 million compared with the required minimum aggregate statutory capital and surplus of approximately $341.7 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2013. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

As described in Note 2, "Significant Accounting Policies," the ACA imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. The fee will be imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year. If the fee assessment is enacted as written, our minimum capitalization requirements will increase significantly on January 1, 2014; we are currently evaluating the impact of the fee assessment to our financial position, results of operations and cash flows.

15. Related Party Transactions

Lease

On February 27, 2013, we entered into a lease (the Lease) with 6th & Pine Development, LLC (the Landlord) for office space located in Long Beach, California. The Lease consists of two office buildings under construction, including a building which comprises approximately 70,000 square feet of office space (Building A); and a building which is expected to comprise approximately 120,000 square feet of office space (Building B).

The term of the Lease with respect to Building A is expected to commence on June 1, 2013, and the term of the Lease with respect to Building B is expected to commence on November 1, 2014. The initial term of the Lease with respect to both buildings expires on December 31, 2024, subject to two options to extend the term for a period of five years each. Initial annual rent for Building A is expected to be approximately $2.5 million, and initial annual rent for Building B is expected to be approximately $4.0 million. Rent will increase 3.75% per year through the initial term. Rent during the extension terms will be the greater of then-current rent or fair market rent.

The principal members of the Landlord are John C. Molina, our chief financial officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, the Landlord has pledged shares of

common stock in the Company he holds as trustee. Dr. J. Mario Molina, our chief executive officer and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary.

Medical Services

We have an equity investment in a medical service provider that provides certain vision services to our members; we account for this investment under the equity method of accounting. For the three months ended March 31, 2013 and 2012, we paid $7.7 million, and $6.6 million, respectively, for medical service fees to this provider.

16. Variable Interest Entities

Joseph M. Molina M.D., Professional Corporations

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's sole shareholder is Dr. J. Mario Molina, our Chairman of the Board, President and Chief Executive Officer. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides outpatient professional medical services to the general public for routine non-life threatening, outpatient health care needs. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, American Family Care, Inc. (AFC), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will not operate at a loss, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by AFC are reviewed annually to assure the achievement of this goal.

Our California, Florida, New Mexico and Washington health plans have entered into primary care capitation agreements with JMMPC. These agreements also direct our health plans to fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, based on a monthly reconciliation. Because the AFC services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are insignificant. There were no amounts recorded under this reconciliation arrangement for the three months ended March 31, 2013 and March 31, 2012.

We have determined that JMMPC is a variable interest entity, or VIE, and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of March 31, 2013, JMMPC had total assets of $1.3 million, comprising primarily cash and equivalents, and total liabilities of $1.1 million, comprising primarily accrued payroll and employee benefits.

Our maximum exposure to loss as a result of our involvement with JMMPC is equal to the amounts needed to fund JMMPC's ongoing payroll and employee benefits. We believe that such loss exposure will be immaterial to our consolidated operating results and cash flows for the foreseeable future. We provided an initial cash infusion of $0.3 million to JMMPC in the first quarter of 2012 to fund its start-up operations.

New Markets Tax Credit

During the fourth quarter of 2011 our New Mexico data center subsidiary entered into a financing transaction with Wells Fargo Community Investment Holdings, LLC, or Wells Fargo, its wholly owned subsidiary New Mexico Healthcare Data Center Investment Fund, LLC, or Investment Fund, and certain of Wells Fargo's affiliated Community Development Entities, or CDEs, in connection with our participation in the federal government's New Markets Tax Credit Program, or NMTC. The NMTC was established by Congress in 2000 to facilitate new or increased investments in businesses and real estate projects in low-income communities. The NMTC attracts investment capital to low-income communities by permitting investors to receive a tax credit against their federal income tax return in exchange for equity investments in specialized financial institutions, called CDEs, which provide financing to qualified active businesses operating in low-income communities. The credit amounts to 39% of the original investment amount and is claimed over a period of seven years (five percent for each of the first three years, and six percent for each of the remaining four years). The investment in the CDE cannot be redeemed before the end of the seven-year period.

In the fourth quarter of 2011, as a result of a series of simultaneous financing transactions, Wells Fargo contributed capital of $5.9 million to the Investment Fund, and Molina Healthcare, Inc. loaned the principal amount of $15.5 million to the Investment Fund. The Investment Fund then contributed the proceeds to certain CDEs, which, in turn, loaned the proceeds of $20.9 million to our New Mexico data center subsidiary. Wells Fargo will be entitled to claim the NMTC while we effectively received net loan proceeds equal to Wells Fargo's contribution to the Investment Fund, or approximately $5.9 million. Additionally, financing costs incurred in structuring the arrangement amounting to $1.2 million were deferred and will be recognized as expense over the term of the loans. This transaction also includes a put/call feature that becomes enforceable at the end of the seven-year compliance period. Wells Fargo may exercise its put option or we can exercise the call, both of which will serve to transfer the debt obligation to us. Incremental costs to maintain the structure during the compliance period will be recognized as incurred.

We have determined that the financing arrangement with Investment Fund and CDEs is a VIE, and that we are the primary beneficiary of the VIE. We reached this conclusion based on the following:

- The ongoing activities of the VIE-collecting and remitting interest and fees and NMTC compliance-were all considered in the initial design and are not expected to significantly affect economic performance throughout the life of the VIE;
- Contractual arrangements obligate us to comply with NMTC rules and regulations and provide various other guarantees to Investment Fund and CDEs;
- Wells Fargo lacks a material interest in the underling economics of the project; and
- We are obligated to absorb losses of the VIE.

Because we are the primary beneficiary of the VIE, we have included it in our consolidated financial statements. Wells Fargo's contribution of $5.9 million is included in cash at December 31, 2012 and the offsetting Wells Fargo's interest in the financing arrangement is included in other liabilities in the accompanying consolidated balance sheets.

As described above, this transaction also includes a put/call provision whereby we may be obligated or entitled to repurchase Wells Fargo's interest in the Investment Fund. The value attributed to the put/call is nominal. The NMTC is subject to 100% recapture for a period of seven years as provided in the Internal Revenue Code and applicable U.S. Treasury regulations. We are required to be in compliance with various regulations and contractual provisions that apply to the NMTC arrangement. Non-compliance with applicable requirements could result in Wells Fargo's projected tax benefits not being realized and, therefore, require us to indemnify Wells Fargo for any loss or recapture of NMTCs related to the financing until such time as the recapture provisions have expired under the applicable statute of limitations. We do not anticipate any credit recaptures will be required in connection with this arrangement.

Item 2. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- uncertainties associated with the implementation of the Affordable Care Act, including the impact of the health insurance industry excise tax, the expansion of Medicaid eligibility in participating states to previously uninsured populations unfamiliar with managed care, the implementation of state insurance exchanges currently expected to become operational by October 1, 2013, the effect of various implementing regulations, and uncertainties regarding the impact of other federal or state health care and insurance reform measures, including the duals demonstration programs in California, Illinois, Ohio, Michigan, Texas, and Washington;
- the success of our medical cost containment initiatives in Texas, and other risks associated with the expansion of our Texas health plan's service areas in 2012;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations and our accruals for incurred but not reported medical costs;
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, and our ability to increase our revenues consistent with our expectations;
- accurate estimation of incurred but not reported medical costs across our health plans;
- risks associated with the continued growth in new Medicaid and Medicare enrollees, and the development of actuarially sound rates with respect to such new enrollees, including duals;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates;
- continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- government audits and reviews, and any enrollment freeze or monitoring program that may result therefrom;
- changes with respect to our provider contracts and the loss of providers;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive, and the interpretation and implementation of medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation, arbitration, or administrative proceedings, including our pending litigation against the state of California related to rates paid to our California plan in earlier years that were not actuarially sound;
- restrictions and covenants in any future credit facility;
- the relatively small number of states in which we operate health plans;
- the availability of adequate financing to fund and capitalize our expansion and growth activities and to meet our liquidity needs, including the interest expense and other costs associated with such financing;

- a state's failure to renew its federal Medicaid waiver;
- inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- changes in general economic conditions, including unemployment rates; and
- increasing consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2012, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management’s Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2012.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of March 31, 2013, these health plans served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of primary care community clinics in California, Florida, New Mexico, and Washington.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts are renewable at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in retaining their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's prior contract with the state expired without renewal on June 30, 2012 subject to certain transition obligations.

Our state Medicaid contracts may be periodically adjusted to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas. For example, our Texas health plan added significant membership effective March 1, 2012, in service areas we had not previously served (the Hidalgo and El Paso service areas); and among populations we had not previously served within existing service areas, such as the Temporary Assistance for Needy Families, or TANF, population in the Dallas service area. Additionally, the health benefits provided to our TANF and ABD members in Texas under our contracts with the state were expanded to include inpatient facility and pharmacy services effective March 1, 2012.

On February 14, 2013, we announced that the Florida Agency for Health Care Administration awarded our Florida health plan contracts in three regions under the Statewide Medicaid Managed Care Long-Term Care program. As a result of the awards, we will now enter into a comprehensive pre-contracting assessment, with the program currently scheduled to commence on December 1, 2013. Under the program, we will provide long-term care benefits, including institutional and home and community-based services.

On February 11, 2013, we announced that our New Mexico health plan was selected by the New Mexico Human Services Department, or HSD, to participate in the new Centennial Care program. In addition to continuing to provide physical and acute health care services, under the new program our New Mexico health plan will expand its services to provide behavioral health and long-term care services. The selection of our New Mexico health plan was made by HSD pursuant to its request for proposals issued in August 2012. The operational start date for the program is currently scheduled for January 2014.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intended to award the contract for a replacement Medicaid Management Information System (MMIS) to a different vendor, CNSI. However, in March 2013, the state of Louisiana cancelled its contract award to CNSI. CNSI is currently challenging the contract cancellation. The state has informed us that we will continue to perform under our current contract until a successor is named. Subject to the pending challenge, it is currently uncertain whether a new RFP will be issued, and if so, when it will be issued. At such time as a new RFP may be issued, we intend to respond to the state's RFP. For the three months ended March 31, 2013, our revenue under the Louisiana MMIS contract was approximately $10.1 million, or 20.3% of total service revenue. So long as our Louisiana MMIS contract continues, we expect to recognize approximately $40 million of service revenue annually under this contract.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the three months ended March 31, 2013, we received approximately 96% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the three months ended March 31, 2013, we recognized approximately 4% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children's Health Insurance Program, or CHIP, members are generally among our lowest, with rates as low as approximately $70 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the TANF Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $100 in California to $260 in Ohio. Among our ABD membership, PMPM premiums range from approximately $400 in Utah to $1,400 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, inpatient, behavioral health and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums in the aggregate, at approximately $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	March 31, 2013	December 31, 2012	March 31, 2012
Total Ending Membership by Health Plan:			
California	332,000	336,000	351,000
Florida	75,000	73,000	69,000
Michigan	217,000	220,000	222,000
Missouri (1)	—	—	81,000
New Mexico	91,000	91,000	89,000
Ohio	242,000	244,000	249,000
Texas	274,000	282,000	280,000
Utah	87,000	87,000	86,000
Washington	416,000	418,000	356,000
Wisconsin	86,000	46,000	42,000
Total	1,820,000	1,797,000	1,825,000
Total Ending Membership for our Medicare Advantage Plans:			
California	7,700	7,700	6,900
Florida	600	900	800
Michigan	9,200	9,700	8,500
New Mexico	900	900	900
Ohio	300	300	200
Texas	1,900	1,500	800
Utah	7,600	8,200	8,100
Washington	6,100	6,500	5,200
Total	34,300	35,700	31,400
Total Ending Membership for our Aged, Blind or Disabled Population:			
California	44,600	44,700	37,300
Florida	10,400	10,300	10,500
Michigan	44,000	41,900	38,800
New Mexico	5,800	5,700	5,600
Ohio	28,200	28,200	29,700
Texas	94,200	95,900	109,000
Utah	9,200	9,000	8,700
Washington	31,300	30,000	4,700
Wisconsin	1,600	1,700	1,700
Total	269,300	267,400	246,000

(1) Our contract with the state of Missouri expired without renewal on June 30, 2012.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service* — Expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.
- *Capitation* — Expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- *Pharmacy* — Expenses for all drug, injectible, and immunization costs paid through our pharmacy benefit manager.
- *Other* — Expenses for medically related administrative costs of approximately $33.9 million, and $32.1 million, for the three months ended March 31, 2013 and 2012, respectively, as well as certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See “Critical Accounting Policies” below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

First Quarter Financial Performance Summary

The following table and narrative briefly summarize our financial and operating performance for the three months ended March 31, 2013 and 2012. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are computed as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended March 31,	
	2013	2012
	(Dollar amounts in thousands, except per share data)	
Net income per diluted share	$ 0.64	$ 0.39
Premium revenue	$ 1,534,608	$ 1,325,406
Service revenue	$ 49,756	$ 42,205
Operating income	$ 67,091	$ 33,420
Net income	$ 29,915	$ 18,089
Total ending membership	1,820,000	1,825,000
Premium revenue	96.5%	96.5%
Service revenue	3.1%	3.1%
Investment income	0.1%	0.1%
Rental and other income	0.3%	0.3%

Operating income	4.2%	2.4%
Net income	1.9%	1.3%
Effective tax rate	44.8%	37.9%

Earnings before Interest, Taxes, Depreciation and Amortization (EBITDA)

We calculate a non-GAAP measure, EBITDA, which management uses as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry. The reconciliation of this non-GAAP to GAAP financial measure is as follows (GAAP stands for U.S. generally accepted accounting principles):

	Three Months Ended March 31,	
	2013	2012
	(In thousands)	
Net income	$ 29,915	$ 18,089
Add back:		
Depreciation and amortization reported in the consolidated statements of cash flows	21,799	18,339
Interest expense	13,037	4,298
Income tax expense	24,270	11,033
EBITDA (1)	$ 89,021	$ 51,759

(1) EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities; nor should EBITDA be considered in isolation from these GAAP measures of operating performance.

First Quarter 2013 Overview

For the first quarter of 2013, net income was $29.9 million, or $0.64 per diluted share, compared with net income of $18.1 million, or $0.39 per diluted share, for the first quarter of 2012.

Our financial performance in the first quarter of 2013 improved substantially over the first quarter of 2012. Among the key developments affecting first quarter 2013 performance were the following:

- The recognition of approximately $21 million of premium rate changes at the California health plan. Approximately $19 million of the premium revenue related to 2012 and 2011. Net of related expenses, the rate increases resulted in an increase of approximately $19 million to pretax income; $18 million (approximately $0.24 per diluted share) of which related to 2012 and 2011. The adjustment to premium rates resulted from the receipt of new rate sheets from the state of California that restored the rates that had existed prior to the cuts that had been taken effective July 1, 2011, and a modest increase to rates for our ABD membership retroactive to July 1, 2011. The new premium rates are expected to increase premium revenue at the California health plan going forward by approximately $400,000 per month;
- The recognition of approximately $6 million (approximately $0.08 per diluted share) of performance revenue at the Texas health plan related to 2012. The Texas health plan recently received notice from the Texas Department of Health and Human Services that a specific measure is being removed from the calculation of performance revenue for all contracted health plans for 2012. As of December 31, 2012, the Texas health plan had not recognized approximately $6 million of revenue related to this performance measure;
- Flat inpatient utilization compared to the first quarter of 2012;
- Improved performance at the Florida, Texas, Ohio and Wisconsin health plans; and
- The immediate recognition in interest expense of approximately $6 million (approximately $0.08 per diluted share) of debt issuance fees related to our issuance of $550 million of 1.125% cash convertible senior notes (the 1.125% Notes) in February 2013. The remainder of the fees associated with that issuance will be expensed over the seven-year life of the 1.125% Notes.

Results of Operations

Three Months Ended March 31, 2013 Compared with the Three Months Ended March 31, 2012

Health Plans Segment

Premium Revenue

Premium revenue for the first quarter of 2013 increased 16% (or 17%, net of premium taxes) over the first quarter of 2012, primarily due to a shift in member mix to populations generating higher premium revenue per member per month (PMPM). Medicare premium revenue was $118.4 million for the first quarter of 2013 compared with $109.8 million for the first quarter of 2012.

Growth in our ABD membership in Washington and California led to higher premium revenue PMPM in 2013. ABD membership, as a percent of total membership, has increased approximately 10% year over year. Premium revenue PMPM also increased in the first quarter of 2013 as a result of the inclusion of revenue for pharmacy benefits for the Utah health plan effective January 1, 2013, and as a result of the inclusion of revenue for inpatient facility and pharmacy benefits across all of the Texas health plan's membership effective March 1, 2012.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended March 31,					
	2013			2012		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 867,648	$ 160.18	67.3%	$ 777,267	$ 148.81	68.7%
Pharmacy	231,838	42.80	18.0%	173,237	33.17	15.3%
Capitation	140,324	25.91	10.9%	136,038	26.04	12.0%
Other	48,944	9.04	3.8%	44,446	8.51	4.0%
Total	$ 1,288,754	$ 237.93	100.0%	$ 1,130,988	$ 216.53	100.0%

Medical care costs increased in the first quarter of 2013 primarily due to the same shifts in member mix and the benefit expansions that led to increased premium revenue, particularly in California, Texas and Washington. Our consolidated medical care ratio, however, decreased to 86.1% in the first quarter of 2013, from 88.1% in the first quarter of 2012. Retroactive rate increases for the California health plan and increased margins at the Texas health plan were the primary drivers of the lower medical care ratio in the first quarter of 2013. Stable inpatient utilization and lower pharmacy unit costs also contributed to the lower medical care ratio in the first quarter of 2013.

Individual Health Plan Analysis

The medical care ratio at the California health plan decreased to 85.1% in the first quarter of 2013 from 88.7% in the first quarter of 2012. The lower medical care ratio was primarily the result of the recognition of retroactive premium rate changes that contributed approximately $19 million to pretax income for the first quarter of 2013, of which approximately $18 million (after related expenses) related to 2012 and 2011.

The medical care ratio of the Florida health plan decreased to 84.9% in the first quarter of 2013, from 88.2% in the first quarter of 2012 due to improved hospital provider contracts, inpatient utilization reductions and lower pharmacy costs.

The medical care ratio of the Michigan health plan increased to 88.1% in the first quarter of 2013, from 84.0% in the first quarter of 2012, primarily as a result of higher pharmacy and fee-for-service costs.

The medical care ratio of the New Mexico health plan increased to 85.9% in the first quarter of 2013, from 84.7% in the first quarter of 2012, primarily as a result of higher pharmacy and fee-for-service costs.

The medical care ratio of the Ohio health plan decreased to 84.6% for the first quarter of 2013, from 87.4% for the first quarter of 2012, primarily as a result of a 4% premium rate increase effective January 1, 2013.

The medical care ratio of the Texas health plan was 80.9% in the first quarter of 2013 compared with 92.3% in the first quarter of 2012. We previously reported on the financial challenges faced by the Texas health plan. Although first quarter results show considerable improvement over the results reported for the first quarter of 2012, management cautions investors regarding the following points:

- The first quarters of 2013 and 2012 are not meaningfully comparable. The state of Texas expanded Medicaid managed care into new regions effective March 1, 2012. Additionally, the state extended inpatient facility and pharmacy benefits into Medicaid managed care on that date. The result of these actions was to dramatically increase the Texas health plan's revenue and medical costs between the first quarter of 2012 and 2013.

- The Texas health plan received a 4% rate increase (adding about $4 million to monthly revenue) effective September 1, 2012.

- Certain out-of-period adjustments artificially lowered the medical care ratio for the Texas health plan in the first quarter of 2013. Absent the previously described $6 million out-of-period benefit related to 2012 performance revenue, and a $13.5 million benefit from favorable development of the claims liability established for the health plan at December 31, 2012, the Texas health plan's medical care ratio for the first quarter of 2013 would have been approximately 86.6% rather than the reported medical care ratio of 80.9%.

- While management continues to work to improve the financial performance of the Texas health plan, management also believes that increased payments to certain providers are necessary. Specifically, the health plan intends to increase provider reimbursement for personal attendant services and day activity and health services effective July 1, 2013. We anticipate that this increase in provider payments alone will add approximately $10 million to medical expense in the second half of 2013.

The medical care ratio of the Utah health plan increased to 86.8% in the first quarter of 2013, from 77.0% in the first quarter of 2012 primarily due to a Medicaid premium rate reduction of approximately 16% (exclusive of the pharmacy benefit added) effective January 1, 2013.

The medical care ratio of the Washington health plan increased to 87.6% in the first quarter of 2013, compared with 85.7% in the first quarter of 2012 primarily due to the addition of ABD members effective July 1, 2012. The higher premium revenue PMPM associated with the ABD membership, however, offset the increased medical care ratio, so that the excess of premium revenue over medical care costs increased to $42.3 million for the first quarter of 2013, compared with $34.2 million for the first quarter of 2012.

The medical care ratio of the Wisconsin health plan decreased to 87.2% in the first quarter of 2013, compared with 98.5% in the first quarter of 2012. The Wisconsin health plan has implemented provider contracting initiatives and new utilization management techniques as a part of its efforts to improve profitability, including in-sourcing the management of behavioral health services. The health plan received a 3% premium rate increase effective January 1, 2013. Additionally, the health plan gained 40,000 members in February and March due to another health plan's recent exit from the market. We are closely monitoring the utilization patterns and loss reserves for these new members.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended March 31, 2013						
		Premium Revenue		Medical Care Costs			
	Member Months (1)	Total	PMPM	Total	PMPM	Premium Tax Expense	MCR (2)
California	1,001	$ 187,880	$ 187.64	$ 159,763	$ 159.56	$ 92	85.1%
Florida	223	58,167	260.15	49,404	220.95	3	84.9
Michigan	652	167,676	257.24	146,748	225.13	1,119	88.1
New Mexico	274	85,798	313.54	72,149	263.66	1,798	85.9
Ohio	726	291,518	401.73	227,454	313.45	22,710	84.6
Texas	832	335,296	402.99	266,449	320.24	5,845	80.9
Utah	259	74,956	289.59	65,029	251.24	—	86.8
Washington	1,250	303,719	243.05	261,397	209.18	5,433	87.6

Other (3) (4)	—	2,474	—	16,697	—	—	—
	5,417	$ 1,534,608	$ 283.32	$ 1,288,754	$ 237.93	$ 37,000	86.1%

	Three Months Ended March 31, 2012						
		Premium Revenue		Medical Care Costs			
	Member Months (1)	Total	PMPM	Total	PMPM	Premium Tax Expense	MCR (2)
California	1,059	$ 161,685	$ 152.65	$ 141,349	$ 133.45	$ 2,309	88.7%
Florida	208	56,190	269.87	49,569	238.07	7	88.2
Michigan	665	167,906	252.49	134,211	201.82	8,040	84.0
Missouri (4)	243	56,613	233.32	53,120	218.93	—	93.8
New Mexico	266	81,226	305.63	67,111	252.52	1,953	84.7
Ohio	746	293,525	393.73	236,701	317.51	22,853	87.4
Texas	592	198,236	334.61	180,089	303.97	3,197	92.3
Utah	252	75,138	297.59	57,881	229.24	—	77.0
Washington	1,067	215,610	202.08	181,425	170.04	3,816	85.7
Wisconsin	125	17,142	136.97	16,886	134.92	—	98.5
Other (3)	—	2,135	—	12,646	—	11	—
	5,223	$ 1,325,406	$ 253.75	$ 1,130,988	$ 216.53	$ 42,186	88.1%

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) The MCR represents medical costs as a percentage of premium revenues, where premium revenue is reduced by premium tax expense.
(3) "Other" medical care costs also include medically related administrative costs at the parent company.
(4) Our contract with the state of Missouri expired without renewal on June 30, 2012. The Missouri health plan's claims run-out activity subsequent to June 30, 2012, is reported in "Other."

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended March 31,	
	2013	2012
	(In thousands)	
Service revenue before amortization	$ 50,485	$ 42,358
Amortization recorded as reduction of service revenue	(729)	(153)
Service revenue	49,756	42,205
Cost of service revenue	39,770	30,494
General and administrative costs	2,351	2,020
Amortization of customer relationship intangibles recorded as amortization	1,282	1,282
Operating income	$ 6,353	$ 8,409

Operating income for our Molina Medicaid Solutions segment decreased $2.1 million for the three months ended March 31, 2013, compared with the same prior year period. The decrease in operating income was primarily the result of a change in the mix of transactions processed from fee-for-service claims to managed care encounters (processing fees are lower for encounters than for fee-for-service claims) and changes to state contracts implemented during 2012.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses increased to 8.9% of total revenue for the three months ended March 31, 2013, compared with 8.8% of total revenue for the three months ended March 31, 2012. The increased ratio of general and administrative expenses to total revenue for the three months ended March 31, 2013, was primarily due to continuing investments in administrative infrastructure in anticipation of opportunities among the dual-eligible population.

Premium Tax Expense

Premium tax expense decreased to 2.4% of premium revenue for the three months ended March 31, 2013, from 3.2% in the three months ended March 31, 2012. The decrease in 2013 was primarily due to the reduction of premium taxes at the Michigan and California health plans effective in 2012.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in “Depreciation and Amortization” in the consolidated statements of income. Amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading “Depreciation and Amortization;”
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of “Service Revenue;” and
- Amortization of capitalized software is recorded within the heading “Cost of Service Revenue.”

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Three Months Ended March 31,			
	2013		2012	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software	$ 12,447	0.8%	$ 9,472	0.7%
Amortization of intangible assets	4,118	0.3	5,553	0.4
Depreciation and amortization reported as such in the consolidated statements of income	16,565	1.1	15,025	1.1
Amortization recorded as reduction of service revenue	729	—	153	—
Amortization of capitalized software recorded as cost of service revenue	4,505	0.3	3,161	0.2
Total	$ 21,799	1.4%	$ 18,339	1.3%

Other Expenses (Income)

Interest expense increased to $13.0 million for the three months ended March 31, 2013, from $4.3 million for the three months ended March 31, 2012, primarily due to the issuance of the 1.125% Notes in February 2013. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $3.7 million and $1.4 million for the three months ended March 31, 2013, and 2012, respectively. Interest expense in 2013 also included the immediate recognition of approximately $6 million of interest expense relating to debt issuance costs. The remainder of the fees associated with that issuance, amounting to approximately $12 million, will be expensed over the seven-year life of the 1.125% Notes.

Income Taxes

The provision for income taxes is recorded at an effective rate of 44.8% for the three months ended March 31, 2013 compared with 37.9% for the three months ended March 31, 2012. The higher rate in 2013 is primarily due to the impact of non-deductible compensation under a provision of the Affordable Care Act that limits deductions claimed by health insurers on compensation earned after December 31, 2009 that is paid after December 31, 2012.

Other Transactions

As described above, our Missouri health plan, Alliance for Community Health, L.L.C. (ACH), was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's prior contract with the state (the MC+ Contract) expired without renewal on June 30, 2012, subject to certain transition obligations which terminate on June 30, 2013. On April 5, 2013, ACH entered into an assignment and assumption agreement with an affiliated company, Molina Healthcare of Illinois, Inc., another one of our wholly owned subsidiaries (Molina Illinois), pursuant to which ACH assigned to Molina Illinois substantially all of its assets and liabilities, including its surviving rights, duties and obligations, including all of the post-expiration duties and services under the MC+ Contract. Such assignment was approved by the Missouri Department of Insurance, Financial Institutions and Professional Registration, and the Illinois Department of Insurance. The state of Missouri's Medicaid agency also consented to the assignment. Subsequent to the effectiveness of the assignment and assumption agreement, ACH surrendered its Missouri certificate of authority as a health maintenance organization. We intend to abandon our equity interests in ACH to an unrelated entity. Pursuant to such transaction, ACH will retain certain assets and investments to which we will no longer have access after the abandonment transaction is effected, and which amounts we intend to write off.

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of March 31, 2013, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income was $1.5 million for the three months ended March 31, 2013, compared with $1.7 million for the three months ended March 31, 2012. Our annualized portfolio yield for the three months ended March 31, 2013 was 0.4% compared with 0.6% for the three months ended March 31, 2012.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Liquidity

Cash provided by operating activities for the three months ended March 31, 2013 was $20.1 million compared with $50.6 million for the three months ended March 31, 2012, a decrease of $30.5 million. The decrease in cash provided by operating activities was primarily due to the changes in deferred revenue and medical claims and benefits payable, partially offset by the change in accounts receivable. Deferred revenue and medical claims and benefits payable were a use of operating cash amounting to $9.4 million in the aggregate in the three months ended March 31, 2013, compared with a source of operating cash of $97.9 million in the aggregate in the same period in 2012. Accounts receivable was a use of operating cash amounting to $0.6 million in the three months ended March 31, 2013, compared with $54.4 million in the same period in 2012.

Cash used in investing activities for the three months ended March 31, 2013 was $21.2 million compared with $42.7 million for the three months ended March 31, 2012, a decrease of $21.5 million. This decrease was primarily due to reduced purchases of investments in 2013.

Cash provided by financing activities for the three months ended March 31, 2013 was $374.8 million compared with $16.0 million for the three months ended March 31, 2012, an increase of $358.8 million. The significant increase was primarily due to $538.0 million in proceeds we received from our offering of 1.125% Notes and $75.1 million from the sale of warrants, partially offset by $149.3 million paid for the purchased call option relating to the 1.125% Notes, $50.0 million paid for repurchases of our common stock, and $40.0 million used to repay our Credit Facility.

Financial Condition

On a consolidated basis, at March 31, 2013, we had working capital of $924.0 million compared with $521.1 million at December 31, 2012. At March 31, 2013, and December 31, 2012, we had cash and investments, including restricted investments, of $1,580.2 million, and $1,196.1 million, respectively. We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Regulatory Capital and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each

state. Such state laws and regulations also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $572.9 million at March 31, 2013, and $549.7 million at December 31, 2012. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $450.5 million and $46.9 million as of March 31, 2013, and December 31, 2012, respectively.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of March 31, 2013, our health plans had aggregate statutory capital and surplus of approximately $585.5 million compared with the required minimum aggregate statutory capital and surplus of approximately $341.7 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2013. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

As described in Note 2 to the accompanying Notes to the Consolidated Financial Statements, the ACA imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. The fee will be imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year. If the fee assessment is enacted as written, our minimum capitalization requirements will increase significantly on January 1, 2014; we are currently evaluating the impact of the fee assessment to our financial position, results of operations and cash flows.

Future Sources and Uses of Liquidity

As of March 31, 2013, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2013	2014	2015	2016	2017	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
3.75% Notes	187,000	—	187,000	—	—	—	—
Term loan	47,179	863	1,206	1,259	1,309	1,372	41,170
	$ 784,179	$ 863	$ 188,206	$ 1,259	$ 1,309	$ 1,372	$ 591,170

1.125% Cash Convertible Senior Notes due 2020

On February 15, 2013, we settled the issuance of $550.0 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020 (the 1.125% Notes). This transaction included the initial issuance of $450.0 million on February 11, 2013, plus the exercise of the full amount of the $100.0 million over-allotment option on February 13, 2013. The aggregate net proceeds of the 1.125% Notes were $458.9 million, after payment of the net cost of the Call Spread Overlay described below. Additionally, we used $50.0 million of the net proceeds to purchase shares of our common stock, and $40.0 million to repay principal and accrued interest owed under our Credit Facility.

Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 of each year, at a rate of 1.125% per annum commencing on July 15, 2013. The 1.125% Notes will mature on January 15, 2020 unless repurchased or converted in accordance with their terms prior to such date.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. Holders may convert their 1.125% Notes solely into cash at their option at any time prior to the close of business on the business day immediately preceding July 15, 2019 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period immediately after any five consecutive

trading day period in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.125% Notes solely into cash at any time, regardless of the foregoing circumstances. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the Indenture.

The initial conversion rate will be 24.5277 shares of our common stock per $1,000 principal amount of 1.125% Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate will be subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest. In addition, following certain corporate events that occur prior to the maturity date, we will pay a cash make-whole premium by increasing the conversion rate for a holder who elects to convert its 1.125% Notes in connection with such a corporate event in certain circumstances. We may not redeem the 1.125% Notes prior to the maturity date, and no sinking fund is provided for the 1.125% Notes.

If we undergo a fundamental change (as defined in the indenture to the 1.125% Notes), holders may require us to repurchase for cash all or part of their 1.125% Notes at a repurchase price equal to 100% of the principal amount of the 1.125% Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the fundamental change repurchase date. The indenture provides for customary events of default, including cross acceleration to certain other indebtedness of ours, and our significant subsidiaries.

The 1.125% Notes are senior unsecured obligations, and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries.

The 1.125% Notes contain an embedded cash conversion option. We have determined that the embedded cash conversion option is a derivative financial instrument, required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option transaction settles or expires. The initial fair value liability of the embedded cash conversion option was $149.3 million, which simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). As of March 31, 2013, the fair value of embedded cash conversion option derivative liability was $147.3 million.

As noted above, the reduced carrying value on the 1.125% Notes resulted in a debt discount that is amortized to the 1.125% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms had been issued. The effective interest rate of the 1.125% Notes is 5.9% which is imputed based on the amortization of the fair value of the embedded cash conversion option over the remaining term of the 1.125% Notes. As of March 31, 2013, we expect the 1.125% Notes to be outstanding until their January 15, 2020 maturity date, for a remaining amortization period of 6.8 years.

Also in connection with the settlement of the 1.125% Notes, we paid approximately $16.9 million in transaction costs. Such costs have been allocated to the 1.125% Notes, the 1.125% Call Option (defined below), and the 1.125% Warrants (defined below) according to their relative fair values. The amount allocated to the 1.125% Notes, or $12.0 million, was capitalized and will be amortized over the term of the 1.125% Notes. The aggregate amount allocated to the 1.125% Call Option and 1.125% Warrants, or $4.9 million, was recorded to interest expense in the quarter ended March 31, 2013.

1.125% Notes Call Spread Overlay

Concurrent with the issuance of the 1.125% Notes, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes. These transactions represent a Call Spread Overlay, whereby the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes. We used $149.3 million of the proceeds from the settlement of the 1.125% Notes to pay for the 1.125% Call Option, and simultaneously received $75.1 million for the sale of the 1.125% Warrants, for a net cash outlay of $74.2 million for the Call

Spread Overlay. The 1.125% Call Option and 1.125% Warrants are derivative financial instruments; refer to Note 11 of the accompanying Notes to Consolidated Financial Statements for further discussion.

Aside from the initial payment of a premium to the counterparties of $149.3 million for the 1.125% Call Option, we will not be required to make any cash payments to the counterparties under the 1.125% Call Option, and will be entitled to receive from the counterparties an amount of cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the 1.125% Call Options during the relevant valuation period. The strike price under the 1.125% Call Option is initially equal to the conversion price of the 1.125% Notes. Additionally, if the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants transactions and the additional 1.125% Warrants transactions, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants transactions, we issued 13,490,236 warrants with strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. On April 22, 2013, in order to clarify certain accounting matters with respect to the 1.125% Warrants, we entered into amended and restated warrant confirmations with JPMorgan Chase Bank and Bank of America, copies of which are filed as Exhibits 10.1 through 10.4 to this Quarterly Report.

3.75% Convertible Senior Notes due 2014

We had $187.0 million of 3.75% Convertible Senior Notes due 2014 (the 3.75% Notes) outstanding as of March 31, 2013 and December 31, 2012, respectively. The 3.75% Notes rank equally in right of payment with our existing and future senior indebtedness. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Because the 3.75% Notes have cash settlement features, accounting guidance required us to allocate the proceeds from their issuance between a liability component and an equity component. The reduced carrying value on the 3.75% Notes resulted in a debt discount that is amortized back to the 3.75% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 3.75% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms had been issued. The effective interest rate of the 3.75% Notes is 7.5%, principally based on the seven-year U.S. Treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. As of March 31, 2013, we expect the 3.75% Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 18 months. The 3.75% Notes' if-converted value did not exceed their principal amount as of March 31, 2013. At March 31, 2013, the equity component of the 3.75% Notes, net of the impact of deferred taxes, was $24.0 million.

Term Loan

In December 2011, our wholly owned subsidiary, Molina Center LLC, entered into a Term Loan Agreement with various lenders and East West Bank, as Administrative Agent (the Administrative Agent) to borrow $48.6 million to finance a portion of the purchase price for the Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period (as defined below). The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. Interest Period means the period commencing on the first day of each calendar month and ending on the last day of each calendar month. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commenced on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Credit Facility

On February 15, 2013, we used approximately $40.0 million of the net proceeds from the offering of the 1.125% Notes to repay all of the outstanding indebtedness under our $170 million revolving Credit Facility, with various lenders and U.S. Bank National Association, as Line of Credit Issuer, Swing Line Lender, and Administrative Agent. As of December 31, 2012, there was $40.0 million outstanding under the Credit Facility.

We terminated the Credit Facility in connection with the closing of the offering and sale of the 1.125% Notes. Two letters of credit in the aggregate principal amount of $10.3 million that reduced the amount available for borrowing under the Credit Facility as of December 31, 2012, were transferred to direct issue letters of credit with another financial institution.

Shelf Registration Statement

In the second quarter of 2012, we filed a shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the registration, issuance, and sale of an indeterminate amount of our securities, including common stock, preferred stock, senior or subordinated debt securities, or warrants. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Securities Repurchase Program

Effective as of February 13, 2013, our board of directors authorized the repurchase of $75 million in the aggregate of either our common stock or our 3.75% Notes, in addition to the $50.0 million of our common stock that we repurchased on February 12, 2013. The repurchase program extends through December 31, 2014.

Contractual Obligations

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2012, was disclosed in our 2012 Form 10-K. Other than the transactions relating to our February 2013 offering of the 1.125% Notes, there were no material changes to this previously filed information outside the ordinary course of business during the three months ended March 31, 2013. For further discussion and maturities of our long-term debt, see Note 10 of Notes to the Consolidated Financial Statements.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The recognition of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and
- The determination of medical claims and benefits payable.

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

(1) ***Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract:*** These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates), our revenue earned for those periods will

also change. In all of these instances, our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn would lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of $0.3 million at both March 31, 2013, and December 31, 2012.

Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health: A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At both March 31, 2013, and December 31, 2012, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): Our contract with the state of New Mexico directs that a portion of premiums received may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. At both March 31, 2013, and December 31, 2012, we had not recorded any liability under the terms of these contract provisions.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $3.1 million and $3.2 million pursuant to our profit-sharing agreement with the state of Texas at March 31, 2013, and December 31, 2012, respectively.

Washington Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our Washington health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of approximately $1.0 million at March 31, 2013. At December 31, 2012, we had not recorded any liability under the terms of this contract provision since medical expenses were not less than the contractual floor.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net payable of approximately $0.2 million as of March 31, 2013 and a net receivable of approximately $0.3 million as of December 31, 2012 for anticipated Medicare risk adjustment premiums.

(2) Quality incentives that allow us to recognize incremental revenue if certain quality standards are met: These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, incremental revenue of up to 3.25% of total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of March 31, 2013 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of March 31, 2013.

	Three Months Ended March 31, 2013				
	Maximum Available Quality Incentive Premium - Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized
	(In thousands)				
New Mexico	$ 585	$ 332	$ 108	$ 440	$ 85,798
Ohio	3,005	1,052	—	1,052	291,518

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid Management Information System (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. While providing BPO services (which include claims payment and eligibility processing), we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements.

Additionally, we evaluate each required deliverable under our multiple-element service arrangements to determine whether it qualifies as a separate unit of accounting. Such evaluation is generally based on whether the deliverable has standalone value to the customer. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs
- Employee costs incurred in performing transaction services
- Vendor costs incurred in performing transaction services
- Costs incurred in performing required monitoring of and reporting on contract performance
- Costs incurred in maintaining and processing member and provider eligibility
- Costs incurred in communicating with members and providers

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs

to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	March 31, 2013	December 31, 2012	March 31, 2012
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 378,926	$ 377,614	$ 347,307
Capitation payable	45,048	49,066	37,289
Pharmacy	39,495	38,992	38,443
Other	27,676	28,858	32,794
	$ 491,145	$ 494,530	$ 455,833

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $378.9 million of our total medical claims and benefits payable of $491.1 million as of March 31, 2013. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider's monthly capitation payment), our IBNP liability at March 31, 2013, was $372.0 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of March 31, 2013 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding March 31, 2013, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 156,550
(4)%	104,366
(2)%	52,183
2%	(52,183)
4%	(104,366)
6%	(156,550)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of March 31, 2013 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ (76,431)
(4)%	(50,954)
(2)%	(25,477)
2%	25,477
4%	50,954
6%	76,431

The following per-share amounts are based on a combined federal and state statutory tax rate of 37.5%, and 46.4 million diluted shares outstanding for the three months ended March 31, 2013. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at March 31, 2013, net income for the three months ended March 31, 2013 would increase or decrease by approximately $16.3 million, or $0.35 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at March 31, 2013, net income for the three months ended March 31, 2013 would increase or decrease by approximately $8.0 million, or $0.17 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $81.5 million, or $1.76 per diluted share, and $39.8 million, or $0.86 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $16.3 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee

schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that our initial estimate of claims incurred but not paid (IBNP) is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range. For example, for the three months ended March 31, 2012, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2011 by 9.1%. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate - we only know when the circumstances for any one or more factors are out of the ordinary.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2013 and 2012 were less than what we had expected when we had established our reserves. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We recognized favorable prior period claims development in the amount of $58.4 million for the three months ended March 31, 2013. This amount represents our estimate as of March 31, 2013 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2012 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2012 was due primarily to the following factors:

- At our Texas health plan, we saw a reduction in STAR+PLUS (the state's program for aged and disabled members) membership during mid to late 2012. This caused a reduction in costs per member that we did not fully recognize in our December 31, 2012 reserve estimates.
- At our Washington health plan, prior to July 2012, certain high-cost newborns that were approved for SSI coverage by the state were retroactively dis-enrolled from our Healthy Options (TANF) coverage, and the health plan was reimbursed for the claims paid on behalf of these members. Starting July 1, 2012, these newborns, as well as other high-cost disabled members, are now covered by the health plan under the Health Options Blind and Disabled (HOBD) program. At the end of 2012, we did not have enough claims history to accurately estimate the claims liability of the HOBD members, and as a result the liability for these high-cost members was overstated.

- For our New Mexico health plan, we overestimated the impact of certain high-dollar outstanding claim payments as of December 31, 2012.

We recognized favorable prior period claims development in the amount of $36.6 million for the three months ended March 31, 2012. This amount represents our estimate as of December 31, 2012 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2011 was due primarily to the following factors:

- At our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- At our Texas health plan, we overestimated the cost of new members in STAR+PLUS (the name of our ABD program in Texas), in the Dallas region.
- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in the lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all of the claims overestimation.
- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Missouri health plan, as a result of the costs associated with an unusually large number of premature infants during the fourth quarter of 2011.

In estimating our claims liability at March 31, 2013, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- In our Texas health plan, although the reduction in STAR+PLUS membership has leveled off in 2013, we have seen a reduction in per member per month (PMPM) cost for outpatient services and an increase in PMPM costs for inpatient services over the past six to nine months. We have estimated the impact of these shifts in cost in our March 31, 2013 liability.
- Our Wisconsin health plan is experiencing significant membership increases, and is expected to approximately double in size during the first four months of 2013. This new membership is transitioning to our health plan from a terminated health plan. We enrolled approximately 40,000 new members in February and March 2013. We have computed a separate reserve analysis for these members and have noted that paid claims are less than what we would expect for newly transitioned members. Therefore, we have increased the reserves for this membership, in anticipation of higher claims costs later than usual for these members.
- Our Washington health plan began covering disabled members, including newborns, that were previously covered by the state under a separate state program. Coverage for this segment began in July of 2012, with gradual growth in membership. As of March 2013 the health plan covered approximately 28,000 members under this program. Because of the high costs for these members and the relative newness of the product category, there is still some uncertainty about the cost and reserve liability for these members as of March 31, 2013.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2012 and for the three months ended March 31, 2013, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the replenishment of reserves in the respective periods generally offset the benefit from the prior period.

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Three Months Ended March 31,		Year Ended December 31, 2012
	2013	2012	
	(Dollars in thousands, except per-member amounts)		
Balances at beginning of period	$ 494,530	$ 402,476	$ 402,476
Components of medical care costs related to:			
Current period	1,347,181	1,167,580	5,136,055
Prior periods	(58,427)	(36,592)	(39,295)
Total medical care costs	1,288,754	1,130,988	5,096,760
Payments for medical care costs related to:			
Current period	916,426	750,994	4,649,363
Prior periods	375,713	326,637	355,343
Total paid	1,292,139	1,077,631	5,004,706
Balances at end of period	$ 491,145	$ 455,833	$ 494,530
Benefit from prior period as a percentage of:			
Balance at beginning of period	11.8%	9.1%	9.8%
Premium revenue	3.8%	2.8%	0.7%
Total medical care costs	4.5%	3.2%	0.8%
Claims Data:			
Days in claims payable, fee for service	38	44	40
Number of members at end of period	1,820,000	1,825,000	1,797,000
Number of claims in inventory at end of period	135,400	260,800	122,700
Billed charges of claims in inventory at end of period	$ 236,700	$ 403,800	$ 255,200
Claims in inventory per member at end of period	0.07	0.14	0.07
Billed charges of claims in inventory per member at end of period	$ 130.05	$ 221.26	$ 142.01
Number of claims received during the period	5,271,000	4,855,600	20,842,400
Billed charges of claims received during the period	$ 5,170,700	$ 4,337,000	$ 19,429,300

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Item 3. ***Quantitative and Qualitative Disclosures About Market Risk***

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

We are also exposed to interest rate risk relating to contractual variable interest rates under our Term Loan Agreement which matures on November 30, 2018. We manage this floating rate debt using an interest rate swap agreement that we expect will reduce our exposure to the impact of changing interest rates to our consolidated results of operations and future outflows for interest. The interest rate swap is not designated as a hedging instrument.

Item 4. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended March 31, 2013 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. ***Legal Proceedings***

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 1A. ***Risk Factors***

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in Part I, Item 1A — Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2012. The risk factors described herein and in our 2012 Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition, cash flows, or results of operations.

There have been no material changes to the risk factors disclosed in our 2012 Form 10-K.

Item 2. ***Unregistered Sales of Equity Securities and Use of Proceeds***

Issuer Purchases of Equity Securities

Common Stock Repurchase in Connection with Offering of 1.125% Cash Convertible Senior Notes Due 2020. We used a portion of the net proceeds in this offering to repurchase $50.0 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. On February 12, 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Securities Repurchase Program. Effective as of February 13, 2013, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or the 3.75% Notes, in addition to the $50.0 million common stock repurchase discussed above. The repurchase program extends through December 31, 2014.

Purchases of common stock made by or on our behalf during the quarter ended March 31, 2013, including shares withheld by us to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
January 1—January 31	3,445	$ 27.06	—	$ 75,000,000
February 1—February 28	1,626,960	$ 30.77	—	$ 75,000,000
March 1—March 31	140,641	$ 31.95	—	$ 75,000,000
Total	1,771,046	$ 30.85	—	

(a) During the three months ended March 31, 2013, we withheld 146,087 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

Item 6. Exhibits

Exhibit No.	Title
10.1	Amended and Restated Base Warrants Confirmation, dated as of April 22, 2013, between Molina Healthcare, Inc. and JPMorgan Chase Bank, National Association, London Branch.

Re: Base Warrants

The purpose of this letter agreement (this "**Confirmation**") is to amend and restate, in its entirety, the Base Warrants Confirmation dated February 11, 2013 between the parties hereto and to confirm the terms and conditions of the Warrants issued by **Molina Healthcare, Inc.** ("**Company**") to **JPMorgan Chase Bank, National Association, London Branch** ("**Dealer**") as of the Trade Date specified below (the "**Transaction**"). The parties hereto agree and acknowledge that the amendments reflected in this amended and restated Confirmation are non-substantive, clarifying changes made for the avoidance of doubt. This letter agreement constitutes a "Confirmation" as referred to in the ISDA Master Agreement specified below. This Confirmation shall replace any previous agreements and serve as the final documentation for the Transaction.

The definitions and provisions contained in the 2002 ISDA Equity Derivatives Definitions (the "**Equity Definitions**"), as published by the International Swaps and Derivatives Association, Inc. ("**ISDA**"), are incorporated into this Confirmation. In the event of any inconsistency between the Equity Definitions and this Confirmation, this Confirmation shall govern.

Each party is hereby advised, and each such party acknowledges, that the other party has engaged in, or refrained from engaging in, substantial financial transactions and has taken other material actions in reliance upon the parties' entry into the Transaction to which this Confirmation relates on the terms and conditions set forth below.

1. This Confirmation evidences a complete and binding agreement between Dealer and Company as to the terms of the Transaction to which this Confirmation relates. This Confirmation shall supplement, form a part of, and be subject to an agreement in the form of the 2002 ISDA Master Agreement (the "**Agreement**") as if Dealer and Company had executed an agreement in such form (but without any Schedule except for the election of the laws of the State of New York as the governing law (without reference to choice of law doctrine)) on the Trade Date. In the event of any inconsistency between provisions of the Agreement and this Confirmation, this Confirmation will prevail for the purpose of the Transaction to which this Confirmation relates. The parties hereby agree that no transaction other than the Transaction to which this Confirmation relates shall be governed by the Agreement.

2. The Transaction is a Warrant Transaction, which shall be considered a Share Option Transaction for purposes of the Equity Definitions. The terms of the particular Transaction to which this Confirmation relates are as follows:

General Terms.

Trade Date: February 11, 2013

Effective Date:	The third Exchange Business Day immediately prior to the Premium Payment Date
Warrants:	Equity call warrants, each giving the holder the right to purchase a number of Shares equal to the Warrant Entitlement at a price per Share equal to the Strike Price, subject to the terms set forth under the caption "Settlement Terms" below. For the purposes of the Equity Definitions, each reference to a Warrant herein shall be deemed to be a reference to a Call Option.
Warrant Style:	European
Seller:	Company
Buyer:	Dealer
Shares:	The common stock of Company, par value USD 0.001 per Share (Exchange symbol "MOH")
Number of Warrants:	5,849,857. For the avoidance of doubt, the Number of Warrants shall be reduced by any Warrants exercised or deemed exercised hereunder. In no event will the Number of Warrants be less than zero.
Warrant Entitlement:	One Share per Warrant
Maximum Number of Shares:	For any day, 4,955,958 Shares, *minus* the aggregate number of Shares delivered prior to such day pursuant to (i) this Confirmation and (ii) any other substantially similar confirmation for Warrants sold by Company to Dealer with a trade date within 16 days of the Trade Date and with expiration dates the same as the Expiration Dates. Notwithstanding anything to the contrary in the Agreement, this Confirmation or the Equity Definitions, in no event shall the Maximum Number of Shares be subject to adjustment, except for any adjustment pursuant to the terms of this Confirmation and the Equity Definitions in connection with a Potential Adjustment Event (as defined in Section 11.2(e) of the Equity Definitions and without any amendment thereto pursuant to the terms of this Confirmation). Notwithstanding anything to the contrary in the Agreement, this Confirmation or the Equity Definitions, the Maximum Number of Shares shall not be adjusted on account of any event that (x) constitutes a Potential Adjustment Event solely on account of Section 11.2(e)(vii) of the Equity Definitions and (y) is not an event within Company's control.
Strike Price:	USD 53.8475
Premium:	USD 32,555,012
Premium Payment Date:	February 15, 2013

Exchange:	The New York Stock Exchange
Related Exchange(s):	All Exchanges

Procedures for Exercise.

Expiration Time:	The Valuation Time
Expiration Dates:	Each Scheduled Trading Day during the period from, and including, the First Expiration Date to, but excluding, the 160th Scheduled Trading Day following the First Expiration Date shall be an "Expiration Date" for a number of Warrants equal to the Daily Number of Warrants on such date; *provided* that, notwithstanding anything to the contrary in the Equity Definitions, if any such date is a Disrupted Day, the Calculation Agent shall make adjustments, if applicable, to the Daily Number of Warrants or shall reduce such Daily Number of Warrants to zero for which such day shall be an Expiration Date and shall designate a Scheduled Trading Day or a number of Scheduled Trading Days as the Expiration Date(s) for the remaining Daily Number of Warrants or a portion thereof for the originally scheduled Expiration Date; and *provided further* that if such Expiration Date has not occurred pursuant to this clause as of the eighth Scheduled Trading Day following the last scheduled Expiration Date under the Transaction, the Calculation Agent shall have the right to declare such Scheduled Trading Day to be the final Expiration Date and the Calculation Agent shall determine its good faith estimate of the fair market value for the Shares as of the Valuation Time on that eighth Scheduled Trading Day or on any subsequent Scheduled Trading Day, as the Calculation Agent shall determine using commercially reasonable means.
First Expiration Date:	April 15, 2020 (or if such day is not a Scheduled Trading Day, the next following Scheduled Trading Day), subject to Market Disruption Event below.
Daily Number of Warrants:	For any Expiration Date, the Number of Warrants that have not expired or been exercised as of such day, *divided* by the remaining number of Expiration Dates (including such day), rounded down to the nearest whole number, subject to adjustment pursuant to the provisos to "Expiration Dates".
Automatic Exercise:	Applicable; and means that for each Expiration Date, a number of Warrants equal to the Daily Number of Warrants for such Expiration Date will be deemed to be automatically exercised at the Expiration Time on such Expiration Date.
Market Disruption Event:	Section 6.3(a) of the Equity Definitions is hereby amended by replacing clause (ii) in its entirety with "(ii) an Exchange Disruption, or" and inserting immediately following clause (iii) the phrase "; in each case that the Calculation Agent determines is material."

Section 6.3(d) of the Equity Definitions is hereby amended by deleting the remainder of the provision following the words "Scheduled Closing Time" in the fourth line thereof.

Valuation Terms.

Valuation Time:	Scheduled Closing Time; *provided* that if the principal trading session is extended, the Calculation Agent shall determine the Valuation Time in good faith using its commercially reasonable discretion.
Valuation Date:	Each Exercise Date.

Settlement Terms.

Settlement Method:	Net Share Settlement.
Net Share Settlement:	On the relevant Settlement Date, Company shall deliver to Dealer a number of Shares equal to the Share Delivery Quantity for such Settlement Date to the account specified herein free of payment through the Clearance System, and Dealer shall be treated as the holder of record of such Shares at the time of delivery of such Shares or, if earlier, at 5:00 p.m. (New York City time) on such Settlement Date, and Company shall pay to Dealer cash in lieu of any fractional Share based on the Settlement Price on the relevant Valuation Date.
Share Delivery Quantity:	For any Settlement Date, a number of Shares, as calculated by the Calculation Agent, equal to the Net Share Settlement Amount for such Settlement Date *divided by* the Settlement Price on the Valuation Date for such Settlement Date; *provided* that in no event shall the Share Delivery Quantity for any Settlement Date exceed the Maximum Number of Shares for such Settlement Date.
Net Share Settlement Amount:	For any Settlement Date, an amount equal to the product of (i) the number of Warrants exercised or deemed exercised on the relevant Exercise Date, (ii) the Strike Price Differential for the relevant Valuation Date and (iii) the Warrant Entitlement.
Settlement Price:	For any Valuation Date, the per Share volume-weighted average price as displayed under the heading "Bloomberg VWAP" on Bloomberg page MOH <equity> AQR (or any successor thereto) in respect of the period from the scheduled opening time of the Exchange to the Scheduled Closing Time on such Valuation Date (or if such volume-weighted average price is unavailable, the market value of one Share on such Valuation Date, as determined by the Calculation Agent). Notwithstanding the foregoing, if (i) any Expiration Date is a Disrupted Day and (ii) the Calculation Agent determines that such Expiration Date shall be an Expiration Date for fewer than the Daily Number of Warrants, as described above, then the Settlement Price

	for the relevant Valuation Date shall be the volume-weighted average price per Share on such Valuation Date on the Exchange, as determined by the Calculation Agent based on such sources as it deems appropriate using a volume-weighted methodology, for the portion of such Valuation Date for which the Calculation Agent determines there is no Market Disruption Event.
Settlement Dates:	As determined pursuant to Section 9.4 of the Equity Definitions, subject to Section 9(k)(i) hereof.
Other Applicable Provisions:	The provisions of Sections 9.1(c), 9.8, 9.9, 9.11 and 9.12 of the Equity Definitions will be applicable, except that all references in such provisions to "Physically-settled" shall be read as references to "Net Share Settled." "Net Share Settled" in relation to any Warrant means that Net Share Settlement is applicable to that Warrant.
Representation and Agreement:	Notwithstanding Section 9.11 of the Equity Definitions, the parties acknowledge that any Shares delivered to Dealer may be, upon delivery, subject to restrictions and limitations arising from Company's status as issuer of the Shares under applicable securities laws.

3. <u>Additional Terms applicable to the Transaction</u>.

Adjustments applicable to the Transaction:

Method of Adjustment:	Calculation Agent Adjustment. For the avoidance of doubt, in making any adjustments under the Equity Definitions, the Calculation Agent may make adjustments, if any, to any one or more of the Strike Price, the Number of Warrants, the Daily Number of Warrants and the Warrant Entitlement. Notwithstanding the foregoing, any cash dividends or distributions on the Shares, whether or not extraordinary, shall be governed by Section 9(f) of this Confirmation in lieu of Article 10 or Section 11.2(c) of the Equity Definitions.

Extraordinary Events applicable to the Transaction:

New Shares:	Section 12.1(i) of the Equity Definitions is hereby amended (a) by deleting the text in clause (i) thereof in its entirety (including the word "and" following clause (i)) and replacing it with the phrase "publicly quoted, traded or listed (or whose related depositary receipts are publicly quoted, traded or listed) on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors)" and (b) by inserting immediately prior to the period the phrase "and (iii) of an entity or person that is a corporation organized under the laws of the United States, any State thereof or the District of Columbia that also becomes Company under the Transaction following such Merger Event or Tender Offer".

Consequence of Merger Events:	
Merger Event:	Applicable; *provided* that if an event occurs that constitutes both a Merger Event under Section 12.1(b) of the Equity Definitions and an Additional Termination Event under Section 9(h)(ii)(B) of this Confirmation, Dealer may elect, in its commercially reasonable judgment, whether the provisions of Section 12.2 of the Equity Definitions or Section 9(h)(ii)(B) will apply.
Share-for-Share:	Modified Calculation Agent Adjustment
Share-for-Other:	Cancellation and Payment (Calculation Agent Determination)
Share-for-Combined:	Cancellation and Payment (Calculation Agent Determination); *provided* that Dealer may elect, in its commercially reasonable judgment, Component Adjustment (Calculation Agent Determination) for all or any portion of the Transaction.
Consequence of Tender Offers:	
Tender Offer:	Applicable; *provided* that if an event occurs that constitutes both a Tender Offer under Section 12.1(d) of the Equity Definitions and Additional Termination Event under Section 9(h)(ii)(A) of this Confirmation, Dealer may elect, in its commercially reasonable judgment, whether the provisions of Section 12.3 of the Equity Definitions or Section 9(h)(ii)(A) will apply.
Share-for-Share:	Modified Calculation Agent Adjustment
Share-for-Other:	Modified Calculation Agent Adjustment
Share-for-Combined:	Modified Calculation Agent Adjustment
Announcement Event:	If an Announcement Date occurs in respect of a Merger Event (for the avoidance of doubt, determined without regard to the language in the definition of "Merger Event" following the definition of "Reverse Merger" therein) or Tender Offer (such occurrence, an "**Announcement Event**"), then on the earliest of the Expiration Date, Early Termination Date or other date of cancellation (the "**Announcement Event Adjustment Date**") in respect of each Warrant, the Calculation Agent will determine the economic effect on such Warrant of the Announcement Event (regardless of whether the Announcement Event actually results in a Merger Event or Tender Offer, and taking into account such factors as the Calculation Agent may determine, including, without limitation, changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Shares or the Transaction whether prior to or after the Announcement Event or for any period of time, including, without limitation, the period from the

	Announcement Event to the relevant Announcement Event Adjustment Date). If the Calculation Agent determines that such economic effect on any Warrant is material, then on the Announcement Event Adjustment Date for such Warrant, the Calculation Agent may make such adjustment to the exercise, settlement, payment or any other terms of such Warrant as the Calculation Agent determines appropriate to account for such economic effect, which adjustment shall be effective immediately prior to the exercise, termination or cancellation of such Warrant, as the case may be.
Announcement Date:	The definition of "Announcement Date" in Section 12.1 of the Equity Definitions is hereby amended by (i) replacing the words "a firm" with the word "any" in the second and fourth lines thereof, (ii) replacing the word "leads to the" with the words ", if completed, would lead to a" in the third and the fifth lines thereof, (iii) replacing the words "voting shares" with the word "Shares" in the fifth line thereof, and (iv) inserting the words "by any entity" after the word "announcement" in the second and the fourth lines thereof.
Nationalization, Insolvency or Delisting:	Cancellation and Payment (Calculation Agent Determination); *provided* that, in addition to the provisions of Section 12.6(a)(iii) of the Equity Definitions, it will also constitute a Delisting if the Exchange is located in the United States and the Shares are not immediately re-listed, re-traded or re-quoted on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors); if the Shares are immediately re-listed, re-traded or re-quoted on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors), such exchange or quotation system shall thereafter be deemed to be the Exchange.
Additional Disruption Events:	
Change in Law:	Applicable; *provided* that Section 12.9(a)(ii) of the Equity Definitions is hereby amended by (i) replacing the word "Shares" with the phrase "Hedge Positions" in clause (X) thereof and (ii) inserting the parenthetical "(including, for the avoidance of doubt and without limitation, adoption, effectiveness or promulgation of new regulations authorized or mandated by existing statute)" at the end of clause (A) thereof.
Failure to Deliver:	Not Applicable
Insolvency Filing:	Applicable
Hedging Disruption:	Applicable; *provided* that:
	(i) Section 12.9(a)(v) of the Equity Definitions is hereby amended by (a) inserting the following words

at the end of clause (A) thereof: "in the manner contemplated by the Hedging Party on the Trade Date" and (b) inserting the following two phrases at the end of such Section:

"For the avoidance of doubt, the term "equity price risk" shall be deemed to include, but shall not be limited to, stock price and volatility risk. And, for the further avoidance of doubt, any such transactions or assets referred to in phrases (A) or (B) above must be available on commercially reasonable pricing terms."; and

(ii) Section 12.9(b)(iii) of the Equity Definitions is hereby amended by inserting in the third line thereof, after the words "to terminate the Transaction", the words "or a portion of the Transaction affected by such Hedging Disruption".

Increased Cost of Hedging:	Applicable
Loss of Stock Borrow:	Applicable
Maximum Stock Loan Rate:	100 basis points
Increased Cost of Stock Borrow:	Applicable
Initial Stock Loan Rate:	25 basis points
Hedging Party:	For all applicable Additional Disruption Events, Dealer.
Determining Party:	For all applicable Extraordinary Events, Dealer.
Non-Reliance:	Applicable
Agreements and Acknowledgments Regarding Hedging Activities:	Applicable
Additional Acknowledgments:	Applicable

8. Representations and Warranties of Company.

Each of the representations and warranties of Company set forth in Section 3 of the Purchase Agreement (the "**Purchase Agreement**"), dated as of February 11, 2013, among Company and J.P. Morgan Securities LLC and Merrill Lynch, Pierce, Fenner & Smith Incorporated, as representatives of the Initial Purchasers party thereto (the "**Initial Purchasers**"), other than the representations set forth in Section 3(o), Section 3(r) and Section 3(s) of the Purchase Agreement, in each case, as such representations relate to the Transaction, are true and correct and are hereby deemed to be repeated to Dealer as if set forth herein. Company hereby further represents and warrants to Dealer on the Trade Date, the date hereof, on and as of the Premium Payment Date and, in the case of the representations in Section 8(d), at all times until termination of the Transaction, that:

(a)Company has all necessary corporate power and authority to execute, deliver and perform its obligations in respect of the Transaction; such execution, delivery and performance have been duly authorized by all necessary corporate action on Company's part; and this Confirmation has been duly and validly executed and delivered by Company and constitutes its valid and binding obligation, enforceable against Company in accordance with its terms, subject to applicable bankruptcy,

insolvency, fraudulent conveyance, reorganization, moratorium and similar laws affecting creditors' rights and remedies generally, and subject, as to enforceability, to general principles of equity, including principles of commercial reasonableness, good faith and fair dealing (regardless of whether enforcement is sought in a proceeding at law or in equity) and except that rights to indemnification and contribution hereunder may be limited by federal or state securities laws or public policy relating thereto.

(b) Neither the execution and delivery of this Confirmation nor the incurrence or performance of obligations of Company hereunder will conflict with or result in a breach of the certificate of incorporation or by-laws (or any equivalent documents) of Company, or any applicable law or regulation, or any order, writ, injunction or decree of any court or governmental authority or agency, or any agreement or instrument to which Company or any of its subsidiaries is a party or by which Company or any of its subsidiaries is bound or to which Company or any of its subsidiaries is subject, or constitute a default under, or result in the creation of any lien under, any such agreement or instrument.

(c) No consent, approval, authorization, or order of, or filing with, any governmental agency or body or any court is required in connection with the execution, delivery or performance by Company of this Confirmation, except such as have been obtained or made and such as may be required under the Securities Act of 1933, as amended (the "**Securities Act**") or state securities laws.

(d) A number of Shares equal to the Maximum Number of Shares (the "**Warrant Shares**") have been reserved for issuance by all required corporate action of Company. The Warrant Shares have been duly authorized and, when delivered against payment therefor (which may include Net Share Settlement in lieu of cash) and otherwise as contemplated by the terms of the Warrants following the exercise of the Warrants in accordance with the terms and conditions of the Warrants, will be validly issued, fully-paid and non-assessable, and the issuance of the Warrant Shares will not be subject to any preemptive or similar rights.

(e) Company is not and, after consummation of the transactions contemplated hereby, will not be required to register as an "investment company" as such term is defined in the Investment Company Act of 1940, as amended.

(f) Company is an "eligible contract participant" (as such term is defined in Section 1a(18) of the Commodity Exchange Act, as amended, other than a person that is an eligible contract participant under Section 1a(18)(C) of the Commodity Exchange Act).

(g) Company and each of its affiliates is not, on the date hereof, in possession of any material non-public information with respect to Company.

(h) No state or local (including any non-U.S. jurisdiction's) law, rule, regulation or regulatory order applicable to the Shares would give rise to any reporting, consent, registration or other requirement (including without limitation a requirement to obtain prior approval from any person or entity) as a result of Dealer or its affiliates owning or holding (however defined) Shares.

(i) Company (A) is capable of evaluating investment risks independently, both in general and with regard to all transactions and investment strategies involving a security or securities; (B) will exercise independent judgment in evaluating the recommendations of any broker-dealer or its associated persons, unless it has otherwise notified the broker-dealer in writing; and (C) has total assets of at least $50 million.

9. Other Provisions.

(a) *Opinions*. Company shall deliver to Dealer an opinion of counsel, dated as of the Trade Date, with respect to the matters set forth in Sections 8(a) through (d) of this Confirmation. Delivery of such

opinion to Dealer shall be a condition precedent for the purpose of Section 2(a)(iii) of the Agreement with respect to each obligation of Dealer under Section 2(a)(i) of the Agreement.

(b) *Repurchase Notices*. Company shall, on any day on which Company effects any repurchase of Shares, promptly give Dealer a written notice of such repurchase (a "**Repurchase Notice**") on such day if following such repurchase, the number of outstanding Shares on such day, subject to any adjustments provided herein, is (i) less than 45,295,973 (in the case of the first such notice) or (ii) thereafter more than 1,390,754 less than the number of Shares included in the immediately preceding Repurchase Notice. Company agrees to indemnify and hold harmless Dealer and its affiliates and their respective officers, directors, employees, affiliates, advisors, agents and controlling persons (each, an "**Indemnified Person**") from and against any and all losses (including losses relating to Dealer's hedging activities as a consequence of becoming, or of the risk of becoming, a Section 16 "insider", including without limitation, any forbearance from hedging activities or cessation of hedging activities and any losses in connection therewith with respect to the Transaction), claims, damages, judgments, liabilities and expenses (including reasonable attorney's fees), joint or several, which an Indemnified Person actually may become subject to, as a result of Company's failure to provide Dealer with a Repurchase Notice on the day and in the manner specified in this paragraph, and to reimburse, within 30 days, upon written request, each of such Indemnified Persons for any reasonable legal or other expenses incurred in connection with investigating, preparing for, providing testimony or other evidence in connection with or defending any of the foregoing. If any suit, action, proceeding (including any governmental or regulatory investigation), claim or demand shall be brought or asserted against the Indemnified Person, such Indemnified Person shall promptly notify Company in writing, and Company, upon request of the Indemnified Person, shall retain counsel reasonably satisfactory to the Indemnified Person to represent the Indemnified Person and any others Company may designate in such proceeding and shall pay the fees and expenses of such counsel related to such proceeding. Company shall not be liable for any settlement of any proceeding effected without its written consent, but if settled with such consent or if there be a final judgment for the plaintiff, Company agrees to indemnify any Indemnified Person from and against any loss or liability by reason of such settlement or judgment. Company shall not, without the prior written consent of the Indemnified Person, effect any settlement of any pending or threatened proceeding in respect of which any Indemnified Person is or could have been a party and indemnity could have been sought hereunder by such Indemnified Person, unless such settlement includes an unconditional release of such Indemnified Person from all liability on claims that are the subject matter of such proceeding on terms reasonably satisfactory to such Indemnified Person. If the indemnification provided for in this paragraph is unavailable to an Indemnified Person or insufficient in respect of any losses, claims, damages or liabilities referred to therein, then Company under such paragraph, in lieu of indemnifying such Indemnified Person thereunder, shall contribute to the amount paid or payable by such Indemnified Person as a result of such losses, claims, damages or liabilities. The remedies provided for in this paragraph are not exclusive and shall not limit any rights or remedies which may otherwise be available to any Indemnified Person at law or in equity. The indemnity and contribution agreements contained in this paragraph shall remain operative and in full force and effect regardless of the termination of the Transaction.

(c) *Regulation M*. Company is not on the Trade Date engaged in a distribution, as such term is used in Regulation M under the Securities Exchange Act of 1934, as amended (the "**Exchange Act**"), of any securities of Company, other than a distribution meeting the requirements of the exception set forth in Rules 101(b)(10) and 102(b)(7) of Regulation M. Company shall not, until the second Scheduled Trading Day immediately following the Effective Date, engage in any such distribution.

(d) *No Manipulation*. Company is not entering into the Transaction to create actual or apparent trading activity in the Shares (or any security convertible into or exchangeable for the Shares) or to raise or depress or otherwise manipulate the price of the Shares (or any security convertible into or exchangeable for the Shares) or otherwise in violation of the Exchange Act.

(e)*Transfer or Assignment*. Company may not transfer any of its rights or obligations under the Transaction without the prior written consent of Dealer. Dealer may, without Company's consent, transfer or assign all or any part of its rights or obligations under the Transaction to any third party. If at any time at which (A) the Section 16 Percentage exceeds 7.5%, (B) the Warrant Equity Percentage exceeds 16.3%, or (C) the Share Amount exceeds the Applicable Share Limit (if any applies) (any such condition described in clauses (A), (B) or (C), an "**Excess Ownership Position**"), Dealer is unable after using its commercially reasonable efforts to effect a transfer or assignment of Warrants to a third party on pricing terms reasonably acceptable to Dealer and within a time period reasonably acceptable to Dealer such that no Excess Ownership Position exists, then Dealer may designate any Exchange Business Day as an Early Termination Date with respect to a portion of the Transaction (the "**Terminated Portion**"), such that following such partial termination no Excess Ownership Position exists. In the event that Dealer so designates an Early Termination Date with respect to a Terminated Portion, a payment shall be made pursuant to Section 6 of the Agreement as if (1) an Early Termination Date had been designated in respect of a Transaction having terms identical to the Transaction and a Number of Warrants equal to the number of Warrants underlying the Terminated Portion, (2) Company were the sole Affected Party with respect to such partial termination and (3) the Terminated Portion were the sole Affected Transaction (and, for the avoidance of doubt, the provisions of Section 9(j) shall apply to any amount that is payable by Company to Dealer pursuant to this sentence as if Company was not the Affected Party). The "**Section 16 Percentage**" as of any day is the fraction, expressed as a percentage, (A) the numerator of which is the number of Shares that Dealer and each person subject to aggregation of Shares with Dealer under Section 13 or Section 16 of the Exchange Act and rules promulgated thereunder directly or indirectly beneficially own (as defined under Section 13 or Section 16 of the Exchange Act and rules promulgated thereunder) and (B) the denominator of which is the number of Shares outstanding. The "**Warrant Equity Percentage**" as of any day is the fraction, expressed as a percentage, (A) the numerator of which is the sum of (1) the product of the Number of Warrants and the Warrant Entitlement and (2) the aggregate number of Shares underlying any other warrants purchased by Dealer from Company, and (B) the denominator of which is the number of Shares outstanding. The "**Share Amount**" as of any day is the number of Shares that Dealer and any person whose ownership position would be aggregated with that of Dealer (Dealer or any such person, a "**Dealer Person**") under any law, rule, regulation, regulatory order or organizational documents or contracts of Company that are, in each case, applicable to ownership of Shares ("**Applicable Restrictions**"), owns, beneficially owns, constructively owns, controls, holds the power to vote or otherwise meets a relevant definition of ownership under any Applicable Restriction, as determined by Dealer in its reasonable discretion. The "**Applicable Share Limit**" means a number of Shares equal to (A) the minimum number of Shares that could give rise to reporting or registration obligations or other requirements (including obtaining prior approval from any person or entity) of a Dealer Person, or could result in an adverse effect on a Dealer Person, under any Applicable Restriction, as determined by Dealer in its reasonable discretion, *minus* (B) 1% of the number of Shares outstanding. Notwithstanding any other provision in this Confirmation to the contrary requiring or allowing Dealer to purchase, sell, receive or deliver any Shares or other securities, or to make or receive any payment in cash, to or from Company, Dealer may designate any of its affiliates to purchase, sell, receive or deliver such Shares or other securities, or make or receive such payment in cash, and otherwise to perform Dealer's obligations in respect of the Transaction and any such designee may assume such obligations. Dealer shall be discharged of its obligations to Company to the extent of any such performance.

(f)*Dividends*. If at any time during the period from and including the Effective Date, to and including the last Expiration Date, an ex-dividend date for a cash dividend occurs with respect to the Shares (an "**Ex-Dividend Date**"), then the Calculation Agent will adjust any of the Strike Price, Number of Warrants, Daily Number of Warrants and/or any other variable relevant to the exercise, settlement or payment of the Transaction to preserve the fair value of the Warrants after taking into account such dividend.

(g)*Role of Agent*. Each party agrees and acknowledges that (i) J.P. Morgan Securities LLC, an affiliate of Dealer ("**JPMS**"), has acted solely as agent and not as principal with respect to the Transaction and (ii) JPMS has no obligation or liability, by way of guaranty, endorsement or otherwise, in any manner in respect of the Transaction (including, if applicable, in respect of the settlement thereof). Each party agrees it will look solely to the other party (or any guarantor in respect thereof) for performance of such other party's obligations under the Transaction.

(h)*Additional Provisions*.

(i) Amendments to the Equity Definitions:

(A) Section 11.2(a) of the Equity Definitions is hereby amended by deleting the words "a diluting or concentrative" and replacing them with the words "an"; and adding the phrase "or Warrants" at the end of the sentence.

(B) Section 11.2(c) of the Equity Definitions is hereby amended by (w) replacing the words "a diluting or concentrative" with "an" in the fifth line thereof, (x) adding the phrase "or Warrants" after the words "the relevant Shares" in the same sentence, (y) deleting the words "diluting or concentrative" in the sixth to last line thereof and (z) deleting the phrase "(provided that no adjustments will be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to the relevant Shares)" and replacing it with the phrase "(and, for the avoidance of doubt, adjustments may be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to the relevant Shares)."

(C) Section 11.2(e)(vii) of the Equity Definitions is hereby amended by deleting the words "a diluting or concentrative" and replacing them with the word "a material"; and adding the phrase "or Warrants" at the end of the sentence.

(D) Section 12.6(a)(ii) of the Equity Definitions is hereby amended by (1) deleting from the fourth line thereof the word "or" after the word "official" and inserting a comma therefor, and (2) deleting the semi-colon at the end of subsection (B) thereof and inserting the following words therefor "or (C) at Dealer's option, the occurrence of any of the events specified in Section 5(a)(vii) (1) through (9) of the ISDA Master Agreement with respect to that Issuer."

(E) Section 12.9(b)(iv) of the Equity Definitions is hereby amended by:

(x) deleting (1) subsection (A) in its entirety, (2) the phrase "or (B)" following subsection (A) and (3) the phrase "in each case" in subsection (B); and

(y) replacing the phrase "neither the Non-Hedging Party nor the Lending Party lends Shares" with the phrase "such Lending Party does not lend Shares" in the penultimate sentence.

(F) Section 12.9(b)(v) of the Equity Definitions is hereby amended by:

(x) adding the word "or" immediately before subsection "(B)" and deleting the comma at the end of subsection (A); and

(y) (1) deleting subsection (C) in its entirety, (2) deleting the word "or" immediately preceding subsection (C), (3) deleting the penultimate sentence in its entirety and replacing it with the sentence "The Hedging

Party will determine the Cancellation Amount payable by one party to the other." and (4) deleting clause (X) in the final sentence.

(ii) Notwithstanding anything to the contrary in this Confirmation, upon the occurrence of one of the following events, with respect to the Transaction, (1) Dealer shall have the right to designate such event an Additional Termination Event and designate an Early Termination Date pursuant to Section 6(b) of the Agreement, (2) Company shall be deemed the sole Affected Party with respect to such Additional Termination Event and (3) the Transaction, or, at the election of Dealer in its sole discretion, any portion of the Transaction, shall be deemed the sole Affected Transaction; *provided* that if Dealer so designates an Early Termination Date with respect to a portion of the Transaction, (a) a payment shall be made pursuant to Section 6 of the Agreement as if an Early Termination Date had been designated in respect of a Transaction having terms identical to the Transaction and a Number of Warrants equal to the number of Warrants included in the terminated portion of the Transaction, and (b) for the avoidance of doubt, the Transaction shall remain in full force and effect except that the Number of Warrants shall be reduced by the number of Warrants included in such terminated portion:

(A) A "person" or "group" within the meaning of Section 13(d) of the Exchange Act, other than Company, its subsidiaries or its and their employee benefit plans, files a Schedule TO or any schedule, form or report under the Exchange Act disclosing that such person or group has become the direct or indirect "beneficial owner," as defined in Rule 13d-3 under the Exchange Act, of the common equity of Company representing more than 50% of the voting power of such common equity.

(B) Consummation of (I) any recapitalization, reclassification or change of the Shares (other than changes resulting from a subdivision or combination) as a result of which the Shares would be converted into, or exchanged for, stock, other securities, other property or assets or (II) any share exchange, consolidation or merger of Company pursuant to which the Shares will be converted into cash, securities or other property or (III) any sale, lease or other transfer in one transaction or a series of transactions of all or substantially all of the consolidated assets of Company and its subsidiaries, taken as a whole, to any person other than one of Company's subsidiaries. Notwithstanding the foregoing, any transaction or transactions set forth in this clause (B) shall not constitute an Additional Termination Event if (x) at least 90% of the consideration received or to be received by holders of the Shares, excluding cash payments for fractional Shares, in connection with such transaction or transactions consists of shares of common stock that are listed or quoted on any of The New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or any of their respective successors) or will be so listed or quoted when issued or exchanged in connection with such transaction or transactions, and (y) as a result of such transaction or transactions, the Shares will consist of such consideration, excluding cash payments for fractional Shares.

(C) Company's shareholders approve any plan or proposal for the liquidation or dissolution of Company.

(D) Default by Company or any of its subsidiaries with respect to any mortgage, agreement or other instrument under which there may be outstanding, or by which there may be secured or evidenced, any indebtedness for money borrowed in excess of $15 million in the aggregate of Company and/or any such subsidiary, whether such indebtedness now exists or shall hereafter be created (i) resulting in such indebtedness becoming or being declared due and payable or (ii) constituting a failure to pay the principal or interest of any such debt when due and payable at

its stated maturity, upon required repurchase, upon declaration of acceleration or otherwise.

(E) A final judgment for the payment of $15 million or more (excluding any amounts covered by insurance) rendered against Company or any of its subsidiaries, which judgment is not discharged or stayed within 60 days after (I) the date on which the right to appeal thereof has expired if no such appeal has commenced, or (II) the date on which all rights to appeal have been extinguished.

(F) Dealer, despite using commercially reasonable efforts, is unable or reasonably determines that it is impractical or illegal, to hedge its exposure with respect to the Transaction in the public market without registration under the Securities Act or as a result of any legal, regulatory or self-regulatory requirements or related policies and procedures (whether or not such requirements, policies or procedures are imposed by law or have been voluntarily adopted by Dealer).

(G) On any day during the period from and including the Trade Date, to and including the final Expiration Date, (I) the Notional Unwind Shares (as defined below) as of such day exceeds a number of Shares equal to 60% of the Maximum Number of Shares, or (II) Company makes a public announcement of any transaction or event that, in the reasonable opinion of Dealer would, upon consummation of such transaction or upon the occurrence of such event, as applicable, and after giving effect to any applicable adjustments hereunder, cause the Notional Unwind Shares immediately following the consummation of such transaction or the occurrence of such event to exceed a number of Shares equal to 60% of the Maximum Number of Shares. The "**Notional Unwind Shares**" as of any day is a number of Shares equal to (1) the amount that would be payable pursuant to Section 6 of the Agreement (determined as of such day as if an Early Termination Date had been designated in respect of the Transaction and as if Company were the sole Affected Party and the Transaction were the sole Affected Transaction), *divided by* (2) the Settlement Price (determined as if such day were a Valuation Date).

(H) If Company has not obtained Shareholder Approval prior to February 11, 2014 (the "**Approval Deadline**"). For the avoidance of doubt, if Company has not obtained Shareholder Approval prior to the Approval Deadline, Dealer shall have right to designate an Early Termination Date in connection with the Additional Termination Event set forth in this clause (H) on any day from, and including, the Approval Deadline to, and including, the earlier of (x) the date on which Company obtains Shareholder Approval and (y) the final Expiration Date.

(i) *No Collateral or Setoff*. Notwithstanding any provision of the Agreement or any other agreement between the parties to the contrary, the obligations of Company hereunder are not secured by any collateral. Obligations under the Transaction shall not be set off by Company against any other obligations of the parties, whether arising under the Agreement, this Confirmation, under any other agreement between the parties hereto, by operation of law or otherwise. Any provision in the Agreement with respect to the satisfaction of Company's payment obligations to the extent of Dealer's payment obligations to Company in the same currency and in the same Transaction (including, without limitation Section 2(c) thereof) shall not apply to Company and, for the avoidance of doubt, Company shall fully satisfy such payment obligations notwithstanding any payment obligation to Company by Dealer in the same currency and in the same Transaction. In calculating any amounts under Section 6(e) of the Agreement, notwithstanding anything to the contrary in the Agreement, (1) separate amounts shall be calculated as set forth in such Section 6(e) with respect to (a) the Transaction and (b) all other Transactions, and (2) such separate amounts shall be payable pursuant to Section 6(d)(ii) of the Agreement. For the avoidance of doubt and notwithstanding anything to the contrary

provided in this Section 9(i), in the event of bankruptcy or liquidation of either Company or Dealer, neither party shall have the right to set off any obligation that it may have to the other party under the Transaction against any obligation such other party may have to it, whether arising under the Agreement, this Confirmation or any other agreement between the parties hereto, by operation of law or otherwise.

(j) *Alternative Calculations and Payment on Early Termination and on Certain Extraordinary Events*.

(i) If, in respect of the Transaction, an amount is payable by Company to Dealer, (A) pursuant to Section 12.7 or Section 12.9 of the Equity Definitions or (B) pursuant to Section 6(d)(ii) of the Agreement (any such amount, a "**Payment Obligation**"), Company shall satisfy the Payment Obligation by the Share Termination Alternative (as defined below), unless (a) Company gives irrevocable telephonic notice to Dealer, confirmed in writing within one Scheduled Trading Day, no later than 12:00 p.m. (New York City time) on the Merger Date, Tender Offer Date, Announcement Date (in the case of a Nationalization, Insolvency or Delisting), Early Termination Date or date of cancellation, as applicable, of its election that the Share Termination Alternative shall not apply, (b) Company remakes the representation set forth in Section 8(g) as of the date of such election and (c) Dealer agrees, in its sole discretion, to such election, in which case the provisions of Section 12.7 or Section 12.9 of the Equity Definitions, or the provisions of Section 6(d)(ii) of the Agreement, as the case may be, shall apply.

Share Termination Alternative:	If applicable, Company shall deliver to Dealer the Share Termination Delivery Property on the date (the "**Share Termination Payment Date**") on which the Payment Obligation would otherwise be due pursuant to Section 12.7 or Section 12.9 of the Equity Definitions or Section 6(d)(ii) of the Agreement, as applicable, subject to Section 9(k)(i) below, in satisfaction, subject to Section 9(k)(ii) below, of the relevant Payment Obligation, in the manner reasonably requested by Dealer free of payment.
Share Termination Delivery Property:	A number of Share Termination Delivery Units, as calculated by the Calculation Agent, equal to the relevant Payment Obligation *divided by* the Share Termination Unit Price. The Calculation Agent shall adjust the amount of Share Termination Delivery Property by replacing any fractional portion of a security therein with an amount of cash equal to the value of such fractional security based on the values used to calculate the Share Termination Unit Price (without giving effect to any discount pursuant to Section 9(k)(i)).
Share Termination Unit Price:	The value of property contained in one Share Termination Delivery Unit on the date such Share Termination Delivery Units are to be delivered as Share Termination Delivery Property, as determined by the Calculation Agent in its good faith discretion by commercially reasonable means. In the case of a Private Placement of Share Termination Delivery Units that are Restricted Shares (as defined below), as set forth in

Section 9(k)(i) below, the Share Termination Unit Price shall be determined by the discounted price applicable to such Share Termination Delivery Units. In the case of a Registration Settlement of Share Termination Delivery Units that are Restricted Shares (as defined below) as set forth in Section 9(k)(ii) below, notwithstanding the foregoing, the Share Termination Unit Price shall be the Settlement Price on the Merger Date, Tender Offer Date, Announcement Date (in the case of a Nationalization, Insolvency or Delisting), Early Termination Date or date of cancellation, as applicable. The Calculation Agent shall notify Company of the Share Termination Unit Price at the time of notification of such Payment Obligation to Company or, if applicable, at the time the discounted price applicable to the relevant Share Termination Units is determined pursuant to Section 9(k)(i).

Share Termination Delivery Unit: One Share or, if the Shares have changed into cash or any other property or the right to receive cash or any other property as the result of a Nationalization, Insolvency or Merger Event (any such cash or other property, the "**Exchange Property**"), a unit consisting of the type and amount of Exchange Property received by a holder of one Share (without consideration of any requirement to pay cash or other consideration in lieu of fractional amounts of any securities) in such Nationalization, Insolvency or Merger Event. If such Nationalization, Insolvency or Merger Event involves a choice of Exchange Property to be received by holders, such holder shall be deemed to have elected to receive the maximum possible amount of cash.

Failure to Deliver: Inapplicable

Other applicable provisions: If Share Termination Alternative is applicable, the provisions of Sections 9.8, 9.9, 9.11 and 9.12 (as modified above) of the Equity Definitions will be applicable, except that all references in such provisions to "Physically-settled" shall be read as references to "Share Termination Settled" and all references to "Shares" shall be read as references to "Share Termination Delivery Units". "Share Termination Settled" in relation to the Transaction means that the Share Termination Alternative is applicable to the Transaction.

(ii) Notwithstanding anything to the contrary in this Confirmation, any Payment Obligation under this Confirmation shall, for all purposes, be calculated as if the Maximum Number of Shares were equal to two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2) but any deliveries under Section 9(j)(i) shall be limited to the Maximum Number of Shares as defined in Section 2 hereof. In the event Company shall not have delivered to Dealer the full number of Shares

or Restricted Shares otherwise deliverable by Company to Dealer pursuant to the terms of the Transaction because Company has not obtained shareholder approval pursuant to Section 9(q) for the Maximum Number of Shares to equal two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2) (such deficit, the "**Approval Deficit Shares**"), Company shall be continually obligated to deliver, from time to time, Shares or Restricted Shares, as the case may be, to Dealer until the full number of Approval Deficit Shares have been delivered pursuant to this Section 9(j)(ii), when, and to the extent that the Company obtains shareholder approval; *provided* that in no event shall Company deliver any Shares or Restricted Shares to Dealer pursuant to this Section 9(j)(ii) to the extent that such delivery would cause the aggregate number of Shares and Restricted Shares delivered to Dealer to exceed the Maximum Number of Shares as so increased pursuant to Section 9(q).

(k) *Registration/Private Placement Procedures*. If, in the reasonable opinion of Dealer, following any delivery of Shares or Share Termination Delivery Property to Dealer hereunder, such Shares or Share Termination Delivery Property would be in the hands of Dealer subject to any applicable restrictions with respect to any registration or qualification requirement or prospectus delivery requirement for such Shares or Share Termination Delivery Property pursuant to any applicable federal or state securities law (including, without limitation, any such requirement arising under Section 5 of the Securities Act as a result of such Shares or Share Termination Delivery Property being "restricted securities", as such term is defined in Rule 144 under the Securities Act, or as a result of the sale of such Shares or Share Termination Delivery Property being subject to paragraph (c) of Rule 145 under the Securities Act) (such Shares or Share Termination Delivery Property, "**Restricted Shares**"), then delivery of such Restricted Shares shall be effected pursuant to either clause (i) or (ii) below at the election of Company, unless Dealer waives the need for registration/private placement procedures set forth in (i) and (ii) below. Notwithstanding the foregoing, solely in respect of any Daily Number of Warrants exercised or deemed exercised on any Expiration Date, Company shall elect, prior to the first Settlement Date for the first applicable Expiration Date, a Private Placement Settlement or Registration Settlement for all deliveries of Restricted Shares for all such Expiration Dates which election shall be applicable to all remaining Settlement Dates for such Warrants and the procedures in clause (i) or clause (ii) below shall apply for all such delivered Restricted Shares on an aggregate basis commencing after the final Settlement Date for such Warrants. The Calculation Agent shall make reasonable adjustments to settlement terms and provisions under this Confirmation to reflect a single Private Placement or Registration Settlement for such aggregate Restricted Shares delivered hereunder.

(i) If Company elects to settle the Transaction pursuant to this clause (i) (a "**Private Placement Settlement**"), then delivery of Restricted Shares by Company shall be effected in customary private placement procedures with respect to such Restricted Shares reasonably acceptable to Dealer; *provided* that Company may not elect a Private Placement Settlement if, on the date of its election, it has taken, or caused to be taken, any action that would make unavailable either the exemption pursuant to Section 4(2) of the Securities Act for the sale by Company to Dealer (or any affiliate designated by Dealer) of the Restricted Shares or the exemption pursuant to Section 4(1) or Section 4(3) of the Securities Act for resales of the Restricted Shares by Dealer (or any such affiliate of Dealer). The Private Placement Settlement of such Restricted Shares shall include customary representations, covenants, blue sky and other governmental filings and/or registrations, indemnities to Dealer, due diligence rights (for Dealer or any designated buyer of the Restricted Shares by Dealer), opinions and certificates, and such other documentation as is customary for private placement agreements of similar size, all reasonably acceptable to Dealer. In the case of a Private Placement Settlement, Dealer shall determine the appropriate discount to the Share Termination Unit Price (in the case of settlement of Share Termination Delivery Units pursuant to Section 9(j) above) or any Settlement Price (in the case of settlement of Shares pursuant to Section

2 above) applicable to such Restricted Shares in a commercially reasonable manner and appropriately adjust the number of such Restricted Shares to be delivered to Dealer hereunder, which discount shall only take into account the illiquidity resulting from the fact that the Restricted Shares will not be registered for resale and any commercially reasonable fees and expenses of Dealer (and any affiliate thereof) in connection with such resale. Notwithstanding anything to the contrary in the Agreement or this Confirmation, the date of delivery of such Restricted Shares shall be the Exchange Business Day following notice by Dealer to Company, of such applicable discount and the number of Restricted Shares to be delivered pursuant to this clause (i). For the avoidance of doubt, delivery of Restricted Shares shall be due as set forth in the previous sentence and not be due on the Share Termination Payment Date (in the case of settlement of Share Termination Delivery Units pursuant to Section 9(j) above) or on the Settlement Date for such Restricted Shares (in the case of settlement in Shares pursuant to Section 2 above).

(ii) If Company elects to settle the Transaction pursuant to this clause (ii) (a "**Registration Settlement**"), then Company shall promptly (but in any event no later than the beginning of the Resale Period) file and use its reasonable best efforts to make effective under the Securities Act a registration statement or supplement or amend an outstanding registration statement in form and substance reasonably satisfactory to Dealer, to cover the resale of such Restricted Shares in accordance with customary resale registration procedures, including covenants, conditions, representations, underwriting discounts (if applicable), commissions (if applicable), indemnities due diligence rights, opinions and certificates, and such other documentation as is customary for equity resale underwriting agreements of similar size, all reasonably acceptable to Dealer. If Dealer, in its sole reasonable discretion, is not satisfied with such procedures and documentation Private Placement Settlement shall apply. If Dealer is satisfied with such procedures and documentation, it shall sell the Restricted Shares pursuant to such registration statement during a period (the "**Resale Period**") commencing on the Exchange Business Day following delivery of such Restricted Shares (which, for the avoidance of doubt, shall be (x) the Share Termination Payment Date in case of settlement in Share Termination Delivery Units pursuant to Section 9(j) above or (y) the Settlement Date in respect of the final Expiration Date for all Daily Number of Warrants) and ending on the earliest of (i) the Exchange Business Day on which Dealer completes the sale of all Restricted Shares in a commercially reasonable manner or, in the case of settlement of Share Termination Delivery Units, a sufficient number of Restricted Shares so that the realized net proceeds of such sales equals or exceeds the Payment Obligation (as defined above), (ii) the date upon which all Restricted Shares have been sold or transferred pursuant to Rule 144 (or similar provisions then in force) or Rule 145(d)(2) (or any similar provision then in force) under the Securities Act and (iii) the date upon which all Restricted Shares may be sold or transferred by a non-affiliate pursuant to Rule 144 (or any similar provision then in force) or Rule 145(d)(2) (or any similar provision then in force) under the Securities Act. If the Payment Obligation exceeds the realized net proceeds from such resale, Company shall transfer to Dealer by the open of the regular trading session on the Exchange on the Exchange Trading Day immediately following such resale the amount of such excess (the "**Additional Amount**") in cash or in a number of Shares ("**Make-whole Shares**") in an amount that, based on the Settlement Price on such day (as if such day was the "Valuation Date" for purposes of computing such Settlement Price), has a dollar value equal to the Additional Amount. The Resale Period shall continue to enable the sale of the Make-whole Shares. If Company elects to pay the Additional Amount in Shares, the requirements and provisions for Registration Settlement shall apply. This provision shall be applied successively until the Additional Amount is equal to zero. In no event shall Company deliver a number of Restricted Shares greater than the Maximum Number of Shares.

(iii) Without limiting the generality of the foregoing, Company agrees that (A) any Restricted Shares delivered to Dealer may be transferred by and among Dealer and its affiliates and Company shall effect such transfer without any further action by Dealer and (B) after the period of 6 months from the Trade Date (or 1 year from the Trade Date if, at such time, informational requirements of Rule 144(c) under the Securities Act are not satisfied with respect to Company) has elapsed in respect of any Restricted Shares delivered to Dealer, Company shall promptly remove, or cause the transfer agent for such Restricted Shares to remove, any legends referring to any such restrictions or requirements from such Restricted Shares upon request by Dealer (or such affiliate of Dealer) to Company or such transfer agent, without any requirement for the delivery of any certificate, consent, agreement, opinion of counsel, notice or any other document, any transfer tax stamps or payment of any other amount or any other action by Dealer (or such affiliate of Dealer). Notwithstanding anything to the contrary herein, to the extent the provisions of Rule 144 of the Securities Act or any successor rule are amended, or the applicable interpretation thereof by the Securities and Exchange Commission or any court change after the Trade Date, the agreements of Company herein shall be deemed modified to the extent necessary, in the opinion of outside counsel of Company, to comply with Rule 144 of the Securities Act, as in effect at the time of delivery of the relevant Shares or Share Termination Delivery Property.

(iv) If the Private Placement Settlement or the Registration Settlement shall not be effected as set forth in clauses (i) or (ii), as applicable, then failure to effect such Private Placement Settlement or such Registration Settlement shall constitute an Event of Default with respect to which Company shall be the Defaulting Party.

(l) *Limit on Beneficial Ownership*. Notwithstanding any other provisions hereof, Dealer may not exercise any Warrant hereunder or be entitled to take delivery of any Shares deliverable hereunder, and Automatic Exercise shall not apply with respect to any Warrant hereunder, to the extent (but only to the extent) that, after such receipt of any Shares upon the exercise of such Warrant or otherwise hereunder, (i) the Section 16 Percentage would exceed 7.5%, or (ii) the Share Amount would exceed the Applicable Share Limit. Any purported delivery hereunder shall be void and have no effect to the extent (but only to the extent) that, after such delivery, (i) the Section 16 Percentage would exceed 7.5%, or (ii) the Share Amount would exceed the Applicable Share Limit. If any delivery owed to Dealer hereunder is not made, in whole or in part, as a result of this provision, Company's obligation to make such delivery shall not be extinguished and Company shall make such delivery as promptly as practicable after, but in no event later than one Business Day after, Dealer gives notice to Company that, after such delivery, (i) the Section 16 Percentage would not exceed 7.5%, and (ii) the Share Amount would not exceed the Applicable Share Limit.

(m) *Share Deliveries*. Notwithstanding anything to the contrary herein, Company agrees that any delivery of Shares or Share Termination Delivery Property shall be effected by book-entry transfer through the facilities of DTC, or any successor depositary, if at the time of delivery, such class of Shares or class of Share Termination Delivery Property is in book-entry form at DTC or such successor depositary.

(n) *Waiver of Jury Trial.* Each party waives, to the fullest extent permitted by applicable law, any right it may have to a trial by jury in respect of any suit, action or proceeding relating to the Transaction. Each party (i) certifies that no representative, agent or attorney of the other party has represented, expressly or otherwise, that such other party would not, in the event of such a suit, action or proceeding, seek to enforce the foregoing waiver and (ii) acknowledges that it and the other party have been induced to enter into the Transaction, as applicable, by, among other things, the mutual waivers and certifications provided herein.

(o) *Tax Disclosure.* Effective from the date of commencement of discussions concerning the Transaction, Company and each of its employees, representatives, or other agents may disclose to any and all

persons, without limitation of any kind, the tax treatment and tax structure of the Transaction and all materials of any kind (including opinions or other tax analyses) that are provided to Company relating to such tax treatment and tax structure.

(p) *Maximum Share Delivery*.

(i) Notwithstanding any other provision of this Confirmation, the Agreement or the Equity Definitions, in no event will Company at any time be required to deliver a number of Shares greater than the Maximum Number of Shares to Dealer in connection with the Transaction.

(ii) In the event Company shall not have delivered to Dealer the full number of Shares or Restricted Shares otherwise deliverable by Company to Dealer pursuant to the terms of the Transaction because Company has insufficient authorized but unissued Shares (such deficit, the "**Deficit Shares**"), Company shall be continually obligated to deliver, from time to time, Shares or Restricted Shares, as the case may be, to Dealer until the full number of Deficit Shares have been delivered pursuant to this Section 9(p)(ii), when, and to the extent that, (A) Shares are repurchased, acquired or otherwise received by Company or any of its subsidiaries after the Trade Date (whether or not in exchange for cash, fair value or any other consideration), (B) authorized and unissued Shares previously reserved for issuance in respect of other transactions become no longer so reserved or (C) Company additionally authorizes any unissued Shares that are not reserved for other transactions; *provided* that in no event shall Company deliver any Shares or Restricted Shares to Dealer pursuant to this Section 9(p)(ii) to the extent that such delivery would cause the aggregate number of Shares and Restricted Shares delivered to Dealer to exceed the Maximum Number of Shares. Company shall immediately notify Dealer of the occurrence of any of the foregoing events (including the number of Shares subject to clause (A), (B) or (C) and the corresponding number of Shares or Restricted Shares, as the case may be, to be delivered) and promptly deliver such Shares or Restricted Shares, as the case may be, thereafter.

(q) *Shareholder Approval*. Company shall use its reasonable best efforts to seek approval from its shareholders ("**Shareholder Approval**"), in accordance with the requirements of Rule 312.03(c) of The New York Stock Exchange Listed Company Manual or any successor rule, for the issuance pursuant to the Transaction of a number of Shares equal to two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2). If Company succeeds in obtaining such approval, then upon such approval and without any further action by either party, (i) the provisions set forth opposite the caption "Maximum Number of Shares" in Section 2 shall be deemed to be replaced in their entirety with the phrase "A number of Shares equal to two times the product of the Number of Warrants and the Warrant Entitlement," (ii) the Additional Termination Event set forth in Section 9(h)(ii)(G) shall no longer be applicable, (iii) the provisions set forth in Section 9(j)(ii) shall be deleted in their entirety and (iv) the provisions opposite the caption "Share Delivery Quantity" in Section 2 shall be replaced in their entirety with the sentence "For any Settlement Date, a number of Shares, as calculated by the Calculation Agent, equal to the Net Share Settlement Amount for such Settlement Date *divided by* the Settlement Price on the Valuation Date for such Settlement Date."

(r) *Right to Extend.* Dealer may postpone or add, in whole or in part, any Expiration Date or any other date of valuation or delivery with respect to some or all of the relevant Warrants (in which event the Calculation Agent shall make appropriate adjustments to the Daily Number of Warrants with respect to one or more Expiration Dates) if Dealer determines, in its commercially reasonable judgment, that such extension is reasonably necessary or appropriate to preserve Dealer's hedging or hedge unwind activity hereunder in light of existing liquidity conditions or to enable Dealer to effect purchases of Shares in connection with its hedging, hedge unwind or settlement activity hereunder in a manner that would, if Dealer were Issuer or an affiliated purchaser of Issuer, be in compliance with applicable

legal, regulatory or self-regulatory requirements, or with related policies and procedures applicable to Dealer.

(s) *Status of Claims in Bankruptcy.* Dealer acknowledges and agrees that this Confirmation is not intended to convey to Dealer rights against Company with respect to the Transaction that are senior to the claims of common stockholders of Company in any United States bankruptcy proceedings of Company; *provided* that nothing herein shall limit or shall be deemed to limit Dealer's right to pursue remedies in the event of a breach by Company of its obligations and agreements with respect to the Transaction; *provided*, *further*, that nothing herein shall limit or shall be deemed to limit Dealer's rights in respect of any transactions other than the Transaction.

(t) *Securities Contract; Swap Agreement.* The parties hereto intend for (i) the Transaction to be a "securities contract" and a "swap agreement" as defined in the Bankruptcy Code (Title 11 of the United States Code) (the "**Bankruptcy Code**"), and the parties hereto to be entitled to the protections afforded by, among other Sections, Sections 362(b)(6), 362(b)(17), 546(e), 546(g), 555 and 560 of the Bankruptcy Code, (ii) a party's right to liquidate the Transaction and to exercise any other remedies upon the occurrence of any Event of Default under the Agreement with respect to the other party to constitute a "contractual right" as described in the Bankruptcy Code, and (iii) each payment and delivery of cash, securities or other property hereunder to constitute a "margin payment" or "settlement payment" and a "transfer" as defined in the Bankruptcy Code.

(u) *Wall Street Transparency and Accountability Act* . In connection with Section 739 of the Wall Street Transparency and Accountability Act of 2010 ("**WSTAA**"), the parties hereby agree that neither the enactment of WSTAA or any regulation under the WSTAA, nor any requirement under WSTAA or an amendment made by WSTAA, shall limit or otherwise impair either party's otherwise applicable rights to terminate, renegotiate, modify, amend or supplement this Confirmation or the Agreement, as applicable, arising from a termination event, force majeure, illegality, increased costs, regulatory change or similar event under this Confirmation, the Equity Definitions incorporated herein, or the Agreement (including, but not limited to, rights arising from Change in Law, Hedging Disruption, Increased Cost of Hedging, an Excess Ownership Position, or Illegality (as defined in the Agreement)).

(v) *Agreements and Acknowledgements Regarding Hedging*. Company understands, acknowledges and agrees that: (A) at any time on and prior to the last Expiration Date, Dealer and its affiliates may buy or sell Shares or other securities or buy or sell options or futures contracts or enter into swaps or other derivative securities in order to adjust its hedge position with respect to the Transaction; (B) Dealer and its affiliates also may be active in the market for Shares other than in connection with hedging activities in relation to the Transaction; (C) Dealer shall make its own determination as to whether, when or in what manner any hedging or market activities in securities of Issuer shall be conducted and shall do so in a manner that it deems appropriate to hedge its price and market risk with respect to the Settlement Prices; and (D) any market activities of Dealer and its affiliates with respect to Shares may affect the market price and volatility of Shares, as well as the Settlement Prices, each in a manner that may be adverse to Company.

(w) *Early Unwind.* In the event the sale of the "Underwritten Securities" (as defined in the Purchase Agreement) is not consummated with the Initial Purchasers for any reason, or Company fails to deliver to Dealer opinions of counsel as required pursuant to Section 9(a), in each case by 5:00 p.m. (New York City time) on the Premium Payment Date, or such later date as agreed upon by the parties (the Premium Payment Date or such later date the "**Early Unwind Date**"), the Transaction shall automatically terminate (the "**Early Unwind**"), on the Early Unwind Date and (i) the Transaction and all of the respective rights and obligations of Dealer and Company under the Transaction shall be cancelled and terminated and (ii) each party shall be released and discharged by the other party from and agrees not to make any claim against the other party with respect to any obligations or liabilities of the other party arising out of and to be performed in connection with the Transaction either prior to or after the Early Unwind Date; *provided* that Company shall purchase from Dealer

on the Early Unwind Date all Shares purchased by Dealer or one or more of its affiliates in connection with the Transaction at the then prevailing market price. Each of Dealer and Company represents and acknowledges to the other that, subject to the proviso included in this Section 9(w), upon an Early Unwind, all obligations with respect to the Transaction shall be deemed fully and finally discharged.

(x) *Payment by Dealer*. In the event that (i) an Early Termination Date occurs or is designated with respect to the Transaction as a result of a Termination Event or an Event of Default (other than an Event of Default arising under Section 5(a)(ii) or 5(a)(iv) of the Agreement) and, as a result, Dealer owes to Company an amount calculated under Section 6(e) of the Agreement, or (ii) Dealer owes to Company, pursuant to Section 12.7 or Section 12.9 of the Equity Definitions, an amount calculated under Section 12.8 of the Equity Definitions, such amount shall be deemed to be zero.

(y) If Company has not obtained Shareholder Approval prior to the Approval Deadline, on the Approval Deadline (x) the First Expiration Date shall be extended by one calendar year, (y) the Warrants shall, as of April 15, 2020 (the " **Original First Expiration Date**"), cease to be to be "European Options" (as such term is defined in the Equity Definitions) and shall become, as of the Original First Expiration Date, "American Options" (as such term is defined in the Equity Definitions) exercisable as of the Original First Expiration Date and (z) the Calculation Agent shall make commercially reasonable conforming amendments to the exercise and settlement terms of the Transaction to reflect the change of the Warrants from European Options to American Options, for the avoidance of doubt, retaining (i) contingencies to exercise that are not an observable market, other than the market for the Company's stock or an observable index, other than an index calculated or measured solely by reference to the Company's own operations, (ii) the commercially reasonable nature of adjustments permitted to the Transaction (such as to consider changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Shares and the ability to maintain a commercially reasonable hedge position in the underlying shares) and (iii) the Company's unilateral right to settle in shares pursuant to 9(k), including pursuant to a Share Termination Alternative as provided under Section 9(j). On each anniversary of the Approval Deadline occurring prior to the final Expiration Date, if Company has not, as of such date, obtained Shareholder Approval, the First Expiration Date shall be further extended by one additional calendar year.

(z) *Adjustments*. For the avoidance of doubt, whenever the Calculation Agent or Determining Party is called upon to make an adjustment pursuant to the terms of this Confirmation or the Equity Definitions to take into account the effect of an event, the Calculation Agent or Determining Party shall make such adjustment by reference to the effect of such event on the Hedging Party, assuming that the Hedging Party maintains a commercially reasonable hedge position.

(aa) *Delivery or Receipt of Cash*. For the avoidance of doubt, other than receipt of the Premium by Company, nothing in this Confirmation shall be interpreted as requiring Company to cash settle the Transaction, except in circumstances where cash settlement is within Company's control (including, without limitation, where Company elects to deliver or receive cash, or where Company has made Private Placement settlement unavailable due to the occurrence of events within its control) or in those circumstances in which holders of Shares would also receive cash.

(bb) *No Reliance*. The Company hereby confirms that it has relied on the advice of its own counsel and other advisors (to the extent it deems appropriate) with respect to any legal, tax, accounting, or regulatory consequences of this Confirmation, that it has not relied on Dealer or its affiliates in any respect in connection therewith, and that it will not hold Dealer or its affiliates accountable for any such consequences.

Please confirm that the foregoing correctly sets forth the terms of our agreement by executing this Confirmation and returning it to EDG Confirmation Group, J.P. Morgan Securities LLC, 277 Park Avenue, 11th Floor, New York, NY 10172-3401, or by fax to **(212) 622 8519**.

Very truly yours,

J.P. Morgan Securities LLC, as agent for JPMorgan Chase Bank, National Association

Re: Base Warrants

The purpose of this letter agreement (this "**Confirmation**") is to amend and restate, in its entirety, the Base Warrants Confirmation dated February 11, 2013 between the parties hereto and to confirm the terms and conditions of the Warrants issued by **Molina Healthcare, Inc.** ("**Company**") to **Bank of America, N.A.** ("**Dealer**") as of the Trade Date specified below (the "**Transaction**"). The parties hereto agree and acknowledge that the amendments reflected in this amended and restated Confirmation are non-substantive, clarifying changes made for the avoidance of doubt. This letter agreement constitutes a "Confirmation" as referred to in the ISDA Master Agreement specified below. This Confirmation shall replace any previous agreements and serve as the final documentation for the Transaction.

The definitions and provisions contained in the 2002 ISDA Equity Derivatives Definitions (the "**Equity Definitions**"), as published by the International Swaps and Derivatives Association, Inc. ("**ISDA**"), are incorporated into this Confirmation. In the event of any inconsistency between the Equity Definitions and this Confirmation, this Confirmation shall govern.

Each party is hereby advised, and each such party acknowledges, that the other party has engaged in, or refrained from engaging in, substantial financial transactions and has taken other material actions in reliance upon the parties' entry into the Transaction to which this Confirmation relates on the terms and conditions set forth below.

1. This Confirmation evidences a complete and binding agreement between Dealer and Company as to the terms of the Transaction to which this Confirmation relates. This Confirmation shall supplement, form a part of, and be subject to an agreement in the form of the 2002 ISDA Master Agreement (the "**Agreement**") as if Dealer and Company had executed an agreement in such form (but without any Schedule except for the election of the laws of the State of New York as the governing law (without reference to choice of law doctrine)) on the Trade Date. In the event of any inconsistency between provisions of the Agreement and this Confirmation, this Confirmation will prevail for the purpose of the Transaction to which this Confirmation relates. The parties hereby agree that no transaction other than the Transaction to which this Confirmation relates shall be governed by the Agreement.

2. The Transaction is a Warrant Transaction, which shall be considered a Share Option Transaction for purposes of the Equity Definitions. The terms of the particular Transaction to which this Confirmation relates are as follows:

General Terms.

Trade Date:	February 11, 2013
Effective Date:	The third Exchange Business Day immediately prior to the Premium Payment Date

Warrants:	Equity call warrants, each giving the holder the right to purchase a number of Shares equal to the Warrant Entitlement at a price per Share equal to the Strike Price, subject to the terms set forth under the caption "Settlement Terms" below. For the purposes of the Equity Definitions, each reference to a Warrant herein shall be deemed to be a reference to a Call Option.
Warrant Style:	European
Seller:	Company
Buyer:	Dealer
Shares:	The common stock of Company, par value USD 0.001 per Share (Exchange symbol "MOH")
Number of Warrants:	5,187,609. For the avoidance of doubt, the Number of Warrants shall be reduced by any Warrants exercised or deemed exercised hereunder. In no event will the Number of Warrants be less than zero.
Warrant Entitlement:	One Share per Warrant
Maximum Number of Shares:	For any day, 4,394,906 Shares, *minus* the aggregate number of Shares delivered prior to such day pursuant to (i) this Confirmation and (ii) any other substantially similar confirmation for Warrants sold by Company to Dealer with a trade date within 16 days of the Trade Date and with expiration dates the same as the Expiration Dates. Notwithstanding anything to the contrary in the Agreement, this Confirmation or the Equity Definitions, in no event shall the Maximum Number of Shares be subject to adjustment, except for any adjustment pursuant to the terms of this Confirmation and the Equity Definitions in connection with a Potential Adjustment Event (as defined in Section 11.2(e) of the Equity Definitions and without any amendment thereto pursuant to the terms of this Confirmation). Notwithstanding anything to the contrary in the Agreement, this Confirmation or the Equity Definitions, the Maximum Number of Shares shall not be adjusted on account of any event that (x) constitutes a Potential Adjustment Event solely on account of Section 11.2(e)(vii) of the Equity Definitions and (y) is not an event within Company's control.
Strike Price:	USD 53.8475
Premium:	USD 28,869,539
Premium Payment Date:	February 15, 2013
Exchange:	The New York Stock Exchange
Related Exchange(s):	All Exchanges

Procedures for Exercise.

Expiration Time:	The Valuation Time
Expiration Dates:	Each Scheduled Trading Day during the period from, and including, the First Expiration Date to, but excluding, the 160th Scheduled Trading Day following the First Expiration Date shall be an "Expiration Date" for a number of Warrants equal to the Daily Number of Warrants on such date; *provided* that, notwithstanding anything to the contrary in the Equity Definitions, if any such date is a Disrupted Day, the Calculation Agent shall make adjustments, if applicable, to the Daily Number of Warrants or shall reduce such Daily Number of Warrants to zero for which such day shall be an Expiration Date and shall designate a Scheduled Trading Day or a number of Scheduled Trading Days as the Expiration Date(s) for the remaining Daily Number of Warrants or a portion thereof for the originally scheduled Expiration Date; and *provided further* that if such Expiration Date has not occurred pursuant to this clause as of the eighth Scheduled Trading Day following the last scheduled Expiration Date under the Transaction, the Calculation Agent shall have the right to declare such Scheduled Trading Day to be the final Expiration Date and the Calculation Agent shall determine its good faith estimate of the fair market value for the Shares as of the Valuation Time on that eighth Scheduled Trading Day or on any subsequent Scheduled Trading Day, as the Calculation Agent shall determine using commercially reasonable means.
First Expiration Date:	April 15, 2020 (or if such day is not a Scheduled Trading Day, the next following Scheduled Trading Day), subject to Market Disruption Event below.
Daily Number of Warrants:	For any Expiration Date, the Number of Warrants that have not expired or been exercised as of such day, *divided* by the remaining number of Expiration Dates (including such day), rounded down to the nearest whole number, subject to adjustment pursuant to the provisos to "Expiration Dates".
Automatic Exercise:	Applicable; and means that for each Expiration Date, a number of Warrants equal to the Daily Number of Warrants for such Expiration Date will be deemed to be automatically exercised at the Expiration Time on such Expiration Date.
Market Disruption Event:	Section 6.3(a) of the Equity Definitions is hereby amended by replacing clause (ii) in its entirety with "(ii) an Exchange Disruption, or" and inserting immediately following clause (iii) the phrase "; in each case that the Calculation Agent determines is material." Section 6.3(d) of the Equity Definitions is hereby amended by deleting the remainder of the provision following the words "Scheduled Closing Time" in the fourth line thereof.

Valuation Terms.

Valuation Time:	Scheduled Closing Time; *provided* that if the principal trading session is extended, the Calculation Agent shall

	determine the Valuation Time in good faith using its commercially reasonable discretion.
Valuation Date:	Each Exercise Date.

Settlement Terms.

Settlement Method:	Net Share Settlement.
Net Share Settlement:	On the relevant Settlement Date, Company shall deliver to Dealer a number of Shares equal to the Share Delivery Quantity for such Settlement Date to the account specified herein free of payment through the Clearance System, and Dealer shall be treated as the holder of record of such Shares at the time of delivery of such Shares or, if earlier, at 5:00 p.m. (New York City time) on such Settlement Date, and Company shall pay to Dealer cash in lieu of any fractional Share based on the Settlement Price on the relevant Valuation Date.
Share Delivery Quantity:	For any Settlement Date, a number of Shares, as calculated by the Calculation Agent, equal to the Net Share Settlement Amount for such Settlement Date *divided by* the Settlement Price on the Valuation Date for such Settlement Date; *provided* that in no event shall the Share Delivery Quantity for any Settlement Date exceed the Maximum Number of Shares for such Settlement Date.
Net Share Settlement Amount:	For any Settlement Date, an amount equal to the product of (i) the number of Warrants exercised or deemed exercised on the relevant Exercise Date, (ii) the Strike Price Differential for the relevant Valuation Date and (iii) the Warrant Entitlement.
Settlement Price:	For any Valuation Date, the per Share volume-weighted average price as displayed under the heading "Bloomberg VWAP" on Bloomberg page MOH <equity> AQR (or any successor thereto) in respect of the period from the scheduled opening time of the Exchange to the Scheduled Closing Time on such Valuation Date (or if such volume-weighted average price is unavailable, the market value of one Share on such Valuation Date, as determined by the Calculation Agent). Notwithstanding the foregoing, if (i) any Expiration Date is a Disrupted Day and (ii) the Calculation Agent determines that such Expiration Date shall be an Expiration Date for fewer than the Daily Number of Warrants, as described above, then the Settlement Price for the relevant Valuation Date shall be the volume-weighted average price per Share on such Valuation Date on the Exchange, as determined by the Calculation Agent based on such sources as it deems appropriate using a volume-weighted methodology, for the portion of such Valuation Date for which the Calculation Agent determines there is no Market Disruption Event.
Settlement Dates:	As determined pursuant to Section 9.4 of the Equity Definitions, subject to Section 9(k)(i) hereof.

Other Applicable Provisions:	The provisions of Sections 9.1(c), 9.8, 9.9, 9.11 and 9.12 of the Equity Definitions will be applicable, except that all references in such provisions to "Physically-settled" shall be read as references to "Net Share Settled." "Net Share Settled" in relation to any Warrant means that Net Share Settlement is applicable to that Warrant.
Representation and Agreement:	Notwithstanding Section 9.11 of the Equity Definitions, the parties acknowledge that any Shares delivered to Dealer may be, upon delivery, subject to restrictions and limitations arising from Company's status as issuer of the Shares under applicable securities laws.

3. Additional Terms applicable to the Transaction.

Adjustments applicable to the Transaction:

Method of Adjustment:	Calculation Agent Adjustment. For the avoidance of doubt, in making any adjustments under the Equity Definitions, the Calculation Agent may make adjustments, if any, to any one or more of the Strike Price, the Number of Warrants, the Daily Number of Warrants and the Warrant Entitlement. Notwithstanding the foregoing, any cash dividends or distributions on the Shares, whether or not extraordinary, shall be governed by Section 9(f) of this Confirmation in lieu of Article 10 or Section 11.2(c) of the Equity Definitions.

Extraordinary Events applicable to the Transaction:

New Shares:	Section 12.1(i) of the Equity Definitions is hereby amended (a) by deleting the text in clause (i) thereof in its entirety (including the word "and" following clause (i)) and replacing it with the phrase "publicly quoted, traded or listed (or whose related depositary receipts are publicly quoted, traded or listed) on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors)" and (b) by inserting immediately prior to the period the phrase "and (iii) of an entity or person that is a corporation organized under the laws of the United States, any State thereof or the District of Columbia that also becomes Company under the Transaction following such Merger Event or Tender Offer".

Consequence of Merger Events:

Merger Event:	Applicable; *provided* that if an event occurs that constitutes both a Merger Event under Section 12.1(b) of the Equity Definitions and an Additional Termination Event under Section 9(h)(ii)(B) of this Confirmation, Dealer may elect, in its commercially reasonable judgment, whether the provisions of Section 12.2 of the Equity Definitions or Section 9(h)(ii)(B) will apply.
Share-for-Share:	Modified Calculation Agent Adjustment
Share-for-Other:	Cancellation and Payment (Calculation Agent Determination)

Share-for-Combined:	Cancellation and Payment (Calculation Agent Determination); *provided* that Dealer may elect, in its commercially reasonable judgment, Component Adjustment (Calculation Agent Determination) for all or any portion of the Transaction.
Consequence of Tender Offers:	
Tender Offer:	Applicable; *provided* that if an event occurs that constitutes both a Tender Offer under Section 12.1(d) of the Equity Definitions and Additional Termination Event under Section 9(h)(ii)(A) of this Confirmation, Dealer may elect, in its commercially reasonable judgment, whether the provisions of Section 12.3 of the Equity Definitions or Section 9(h)(ii)(A) will apply.
Share-for-Share:	Modified Calculation Agent Adjustment
Share-for-Other:	Modified Calculation Agent Adjustment
Share-for-Combined:	Modified Calculation Agent Adjustment
Announcement Event:	If an Announcement Date occurs in respect of a Merger Event (for the avoidance of doubt, determined without regard to the language in the definition of "Merger Event" following the definition of "Reverse Merger" therein) or Tender Offer (such occurrence, an "**Announcement Event**"), then on the earliest of the Expiration Date, Early Termination Date or other date of cancellation (the "**Announcement Event Adjustment Date**") in respect of each Warrant, the Calculation Agent will determine the economic effect on such Warrant of the Announcement Event (regardless of whether the Announcement Event actually results in a Merger Event or Tender Offer, and taking into account such factors as the Calculation Agent may determine, including, without limitation, changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Shares or the Transaction whether prior to or after the Announcement Event or for any period of time, including, without limitation, the period from the Announcement Event to the relevant Announcement Event Adjustment Date). If the Calculation Agent determines that such economic effect on any Warrant is material, then on the Announcement Event Adjustment Date for such Warrant, the Calculation Agent may make such adjustment to the exercise, settlement, payment or any other terms of such Warrant as the Calculation Agent determines appropriate to account for such economic effect, which adjustment shall be effective immediately prior to the exercise, termination or cancellation of such Warrant, as the case may be.
Announcement Date:	The definition of "Announcement Date" in Section 12.1 of the Equity Definitions is hereby amended by (i) replacing the words "a firm" with the word "any" in the second and fourth lines thereof, (ii) replacing the word "leads to the" with the words ", if completed, would lead to a" in the third

and the fifth lines thereof, (iii) replacing the words "voting shares" with the word "Shares" in the fifth line thereof, and (iv) inserting the words "by any entity" after the word "announcement" in the second and the fourth lines thereof.

Nationalization, Insolvency or Delisting: Cancellation and Payment (Calculation Agent Determination); *provided* that, in addition to the provisions of Section 12.6(a)(iii) of the Equity Definitions, it will also constitute a Delisting if the Exchange is located in the United States and the Shares are not immediately re-listed, re-traded or re-quoted on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors); if the Shares are immediately re-listed, re-traded or re-quoted on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors), such exchange or quotation system shall thereafter be deemed to be the Exchange.

Additional Disruption Events:

Change in Law: Applicable; *provided* that Section 12.9(a)(ii) of the Equity Definitions is hereby amended by (i) replacing the word "Shares" with the phrase "Hedge Positions" in clause (X) thereof and (ii) inserting the parenthetical "(including, for the avoidance of doubt and without limitation, adoption, effectiveness or promulgation of new regulations authorized or mandated by existing statute)" at the end of clause (A) thereof.

Failure to Deliver: Not Applicable

Insolvency Filing: Applicable

Hedging Disruption: Applicable; *provided* that:

(i) Section 12.9(a)(v) of the Equity Definitions is hereby amended by (a) inserting the following words at the end of clause (A) thereof: "in the manner contemplated by the Hedging Party on the Trade Date" and (b) inserting the following two phrases at the end of such Section:

"For the avoidance of doubt, the term "equity price risk" shall be deemed to include, but shall not be limited to, stock price and volatility risk. And, for the further avoidance of doubt, any such transactions or assets referred to in phrases (A) or (B) above must be available on commercially reasonable pricing terms."; and

(ii) Section 12.9(b)(iii) of the Equity Definitions is hereby amended by inserting in the third line thereof, after the words "to terminate the Transaction", the words "or a portion of the Transaction affected by such Hedging Disruption".

Increased Cost of Hedging: Applicable

Loss of Stock Borrow:	Applicable
Maximum Stock Loan Rate:	100 basis points
Increased Cost of Stock Borrow:	Applicable
Initial Stock Loan Rate:	25 basis points
Hedging Party:	For all applicable Additional Disruption Events, Dealer.
Determining Party:	For all applicable Extraordinary Events, Dealer.
Non-Reliance:	Applicable
Agreements and Acknowledgments Regarding Hedging Activities:	Applicable
Additional Acknowledgments:	Applicable

Telephone: 646-855-7127
Facsimile: 704-208-2869

8. Representations and Warranties of Company.

Each of the representations and warranties of Company set forth in Section 3 of the Purchase Agreement (the "**Purchase Agreement**"), dated as of February 11, 2013, among Company and J.P. Morgan Securities LLC and Merrill Lynch, Pierce, Fenner & Smith Incorporated, as representatives of the Initial Purchasers party thereto (the "**Initial Purchasers**"), other than the representations set forth in Section 3(o), Section 3(r) and Section 3(s) of the Purchase Agreement, in each case, as such representations relate to the Transaction, are true and correct and are hereby deemed to be repeated to Dealer as if set forth herein. Company hereby further represents and warrants to Dealer on the Trade Date, the date hereof, on and as of the Premium Payment Date and, in the case of the representations in Section 8(d), at all times until termination of the Transaction, that:

(a)Company has all necessary corporate power and authority to execute, deliver and perform its obligations in respect of the Transaction; such execution, delivery and performance have been duly authorized by all necessary corporate action on Company's part; and this Confirmation has been duly and validly executed and delivered by Company and constitutes its valid and binding obligation, enforceable against Company in accordance with its terms, subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and similar laws affecting creditors' rights and remedies generally, and subject, as to enforceability, to general principles of equity, including principles of commercial reasonableness, good faith and fair dealing (regardless of whether enforcement is sought in a proceeding at law or in equity) and except that rights to indemnification and contribution hereunder may be limited by federal or state securities laws or public policy relating thereto.

(b)Neither the execution and delivery of this Confirmation nor the incurrence or performance of obligations of Company hereunder will conflict with or result in a breach of the certificate of incorporation or by-laws (or any equivalent documents) of Company, or any applicable law or regulation, or any order, writ, injunction or decree of any court or governmental authority or agency, or any agreement or instrument to which Company or any of its subsidiaries is a party or by which Company or any of its subsidiaries is bound or to which Company or any of its subsidiaries is subject, or constitute a default under, or result in the creation of any lien under, any such agreement or instrument.

(c)No consent, approval, authorization, or order of, or filing with, any governmental agency or body or any court is required in connection with the execution, delivery or performance by Company of this Confirmation, except such as have been obtained or made and such as may be required under the Securities Act of 1933, as amended (the "**Securities Act**") or state securities laws.

(d)A number of Shares equal to the Maximum Number of Shares (the "**Warrant Shares**") have been reserved for issuance by all required corporate action of Company. The Warrant Shares have been duly authorized and, when delivered against payment therefor (which may include Net Share Settlement in lieu of cash) and otherwise as contemplated by the terms of the Warrants following the exercise of the Warrants in accordance with the terms and conditions of the Warrants, will be validly issued, fully-paid and non-assessable, and the issuance of the Warrant Shares will not be subject to any preemptive or similar rights.

(e)Company is not and, after consummation of the transactions contemplated hereby, will not be required to register as an "investment company" as such term is defined in the Investment Company Act of 1940, as amended.

(f)Company is an "eligible contract participant" (as such term is defined in Section 1a(18) of the Commodity Exchange Act, as amended, other than a person that is an eligible contract participant under Section 1a(18)(C) of the Commodity Exchange Act).

(g)Company and each of its affiliates is not, on the date hereof, in possession of any material non-public information with respect to Company.

(h)No state or local (including any non-U.S. jurisdiction's) law, rule, regulation or regulatory order applicable to the Shares would give rise to any reporting, consent, registration or other requirement (including without limitation a requirement to obtain prior approval from any person or entity) as a result of Dealer or its affiliates owning or holding (however defined) Shares.

(i)Company (A) is capable of evaluating investment risks independently, both in general and with regard to all transactions and investment strategies involving a security or securities; (B) will exercise independent judgment in evaluating the recommendations of any broker-dealer or its associated persons, unless it has otherwise notified the broker-dealer in writing; and (C) has total assets of at least $50 million.

9. Other Provisions.

(a)*Opinions*. Company shall deliver to Dealer an opinion of counsel, dated as of the Trade Date, with respect to the matters set forth in Sections 8(a) through (d) of this Confirmation. Delivery of such opinion to Dealer shall be a condition precedent for the purpose of Section 2(a)(iii) of the Agreement with respect to each obligation of Dealer under Section 2(a)(i) of the Agreement.

(b)*Repurchase Notices*. Company shall, on any day on which Company effects any repurchase of Shares, promptly give Dealer a written notice of such repurchase (a "**Repurchase Notice**") on such day if following such repurchase, the number of outstanding Shares on such day, subject to any adjustments provided herein, is (i) less than 45,295,973 (in the case of the first such notice) or (ii) thereafter more than 1,390,754 less than the number of Shares included in the immediately preceding Repurchase Notice. Company agrees to indemnify and hold harmless Dealer and its affiliates and their respective officers, directors, employees, affiliates, advisors, agents and controlling persons (each, an "**Indemnified Person**") from and against any and all losses (including losses relating to Dealer's hedging activities as a consequence of becoming, or of the risk of becoming, a Section 16 "insider", including without limitation, any forbearance from hedging activities or cessation of hedging activities and any losses in connection therewith with respect to the Transaction), claims, damages, judgments, liabilities and expenses (including reasonable attorney's fees), joint or several, which an Indemnified Person actually may become subject to, as a result of Company's failure to provide Dealer with a Repurchase Notice on the day and in the manner specified in this paragraph, and to reimburse, within 30 days, upon written request, each of such Indemnified Persons for any reasonable legal or other expenses incurred in connection with investigating, preparing for, providing testimony or other evidence in connection with or defending any of the foregoing. If any suit, action, proceeding (including any governmental or regulatory investigation), claim or demand shall be brought or asserted against the Indemnified Person, such Indemnified Person shall promptly notify Company in writing, and Company, upon request of the Indemnified Person, shall retain counsel reasonably satisfactory to the Indemnified Person to represent the Indemnified Person and any others Company may designate in such proceeding and shall pay the fees and expenses of such counsel related to such proceeding. Company shall not be liable for any settlement of any proceeding effected without its written consent, but if settled with such consent or if there be a final judgment for the plaintiff, Company agrees to indemnify any Indemnified Person from and against any loss or liability by reason of such settlement or judgment. Company shall not, without the prior written consent of the Indemnified Person, effect any settlement of any pending or threatened proceeding in respect of which any Indemnified Person is or could have been a party and indemnity could have been sought hereunder by such Indemnified Person, unless such settlement includes an unconditional release of such Indemnified Person from all liability on claims that are the subject matter of such proceeding on terms reasonably satisfactory to such Indemnified Person. If the indemnification provided for in this paragraph is unavailable to an Indemnified Person or insufficient in respect of any losses, claims, damages or liabilities referred

to therein, then Company under such paragraph, in lieu of indemnifying such Indemnified Person thereunder, shall contribute to the amount paid or payable by such Indemnified Person as a result of such losses, claims, damages or liabilities. The remedies provided for in this paragraph are not exclusive and shall not limit any rights or remedies which may otherwise be available to any Indemnified Person at law or in equity. The indemnity and contribution agreements contained in this paragraph shall remain operative and in full force and effect regardless of the termination of the Transaction.

(c) *Regulation M*. Company is not on the Trade Date engaged in a distribution, as such term is used in Regulation M under the Securities Exchange Act of 1934, as amended (the "**Exchange Act**"), of any securities of Company, other than a distribution meeting the requirements of the exception set forth in Rules 101(b)(10) and 102(b)(7) of Regulation M. Company shall not, until the second Scheduled Trading Day immediately following the Effective Date, engage in any such distribution.

(d) *No Manipulation*. Company is not entering into the Transaction to create actual or apparent trading activity in the Shares (or any security convertible into or exchangeable for the Shares) or to raise or depress or otherwise manipulate the price of the Shares (or any security convertible into or exchangeable for the Shares) or otherwise in violation of the Exchange Act.

(e) *Transfer or Assignment*. Company may not transfer any of its rights or obligations under the Transaction without the prior written consent of Dealer. Dealer may, without Company's consent, transfer or assign all or any part of its rights or obligations under the Transaction to any third party. If at any time at which (A) the Section 16 Percentage exceeds 7.5%, (B) the Warrant Equity Percentage exceeds 16.3%, or (C) the Share Amount exceeds the Applicable Share Limit (if any applies) (any such condition described in clauses (A), (B) or (C), an "**Excess Ownership Position**"), Dealer is unable after using its commercially reasonable efforts to effect a transfer or assignment of Warrants to a third party on pricing terms reasonably acceptable to Dealer and within a time period reasonably acceptable to Dealer such that no Excess Ownership Position exists, then Dealer may designate any Exchange Business Day as an Early Termination Date with respect to a portion of the Transaction (the "**Terminated Portion**"), such that following such partial termination no Excess Ownership Position exists. In the event that Dealer so designates an Early Termination Date with respect to a Terminated Portion, a payment shall be made pursuant to Section 6 of the Agreement as if (1) an Early Termination Date had been designated in respect of a Transaction having terms identical to the Transaction and a Number of Warrants equal to the number of Warrants underlying the Terminated Portion, (2) Company were the sole Affected Party with respect to such partial termination and (3) the Terminated Portion were the sole Affected Transaction (and, for the avoidance of doubt, the provisions of Section 9(j) shall apply to any amount that is payable by Company to Dealer pursuant to this sentence as if Company was not the Affected Party). The "**Section 16 Percentage**" as of any day is the fraction, expressed as a percentage, (A) the numerator of which is the number of Shares that Dealer and each person subject to aggregation of Shares with Dealer under Section 13 or Section 16 of the Exchange Act and rules promulgated thereunder directly or indirectly beneficially own (as defined under Section 13 or Section 16 of the Exchange Act and rules promulgated thereunder) and (B) the denominator of which is the number of Shares outstanding. The "**Warrant Equity Percentage**" as of any day is the fraction, expressed as a percentage, (A) the numerator of which is the sum of (1) the product of the Number of Warrants and the Warrant Entitlement and (2) the aggregate number of Shares underlying any other warrants purchased by Dealer from Company, and (B) the denominator of which is the number of Shares outstanding. The "**Share Amount**" as of any day is the number of Shares that Dealer and any person whose ownership position would be aggregated with that of Dealer (Dealer or any such person, a "**Dealer Person**") under any law, rule, regulation, regulatory order or organizational documents or contracts of Company that are, in each case, applicable to ownership of Shares ("**Applicable Restrictions**"), owns, beneficially owns, constructively owns, controls, holds the power to vote or otherwise meets a relevant definition of ownership under any Applicable Restriction, as determined by Dealer in its reasonable discretion. The "**Applicable Share Limit**" means a number of Shares equal to (A) the minimum number of Shares that could give rise to reporting or registration obligations or other requirements (including obtaining prior approval from any person or entity) of a Dealer Person, or could result in an adverse effect on a Dealer Person, under any Applicable Restriction, as determined by Dealer in its reasonable

discretion, *minus* (B) 1% of the number of Shares outstanding. Notwithstanding any other provision in this Confirmation to the contrary requiring or allowing Dealer to purchase, sell, receive or deliver any Shares or other securities, or to make or receive any payment in cash, to or from Company, Dealer may designate any of its affiliates to purchase, sell, receive or deliver such Shares or other securities, or make or receive such payment in cash, and otherwise to perform Dealer's obligations in respect of the Transaction and any such designee may assume such obligations. Dealer shall be discharged of its obligations to Company to the extent of any such performance.

(f) *Dividends*. If at any time during the period from and including the Effective Date, to and including the last Expiration Date, an ex-dividend date for a cash dividend occurs with respect to the Shares (an "**Ex-Dividend Date**"), then the Calculation Agent will adjust any of the Strike Price, Number of Warrants, Daily Number of Warrants and/or any other variable relevant to the exercise, settlement or payment of the Transaction to preserve the fair value of the Warrants after taking into account such dividend.

(g) *Designation by Dealer*. Notwithstanding any other provision in this Confirmation to the contrary requiring or allowing Dealer to purchase, sell, receive or deliver any Shares or other securities to or from Company, Dealer may designate any of its affiliates to purchase, sell, receive or deliver such shares or other securities and otherwise to perform Dealer obligations in respect of the Transaction and any such designee may assume such obligations. Dealer shall be discharged of its obligations to Company to the extent of any such performance.

(h) *Additional Provisions*.

(i) Amendments to the Equity Definitions:

(A) Section 11.2(a) of the Equity Definitions is hereby amended by deleting the words "a diluting or concentrative" and replacing them with the words "an"; and adding the phrase "or Warrants" at the end of the sentence.

(B) Section 11.2(c) of the Equity Definitions is hereby amended by (w) replacing the words "a diluting or concentrative" with "an" in the fifth line thereof, (x) adding the phrase "or Warrants" after the words "the relevant Shares" in the same sentence, (y) deleting the words "diluting or concentrative" in the sixth to last line thereof and (z) deleting the phrase "(provided that no adjustments will be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to the relevant Shares)" and replacing it with the phrase "(and, for the avoidance of doubt, adjustments may be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to the relevant Shares)."

(C) Section 11.2(e)(vii) of the Equity Definitions is hereby amended by deleting the words "a diluting or concentrative" and replacing them with the word "a material"; and adding the phrase "or Warrants" at the end of the sentence.

(D) Section 12.6(a)(ii) of the Equity Definitions is hereby amended by (1) deleting from the fourth line thereof the word "or" after the word "official" and inserting a comma therefor, and (2) deleting the semi-colon at the end of subsection (B) thereof and inserting the following words therefor "or (C) at Dealer's option, the occurrence of any of the events specified in Section 5(a)(vii) (1) through (9) of the ISDA Master Agreement with respect to that Issuer."

(E) Section 12.9(b)(iv) of the Equity Definitions is hereby amended by:

(x) deleting (1) subsection (A) in its entirety, (2) the phrase "or (B)" following subsection (A) and (3) the phrase "in each case" in subsection (B); and

(y) replacing the phrase "neither the Non-Hedging Party nor the Lending Party lends Shares" with the phrase "such Lending Party does not lend Shares" in the penultimate sentence.

(F) Section 12.9(b)(v) of the Equity Definitions is hereby amended by:

(x) adding the word "or" immediately before subsection "(B)" and deleting the comma at the end of subsection (A); and

(y) (1) deleting subsection (C) in its entirety, (2) deleting the word "or" immediately preceding subsection (C), (3) deleting the penultimate sentence in its entirety and replacing it with the sentence "The Hedging Party will determine the Cancellation Amount payable by one party to the other." and (4) deleting clause (X) in the final sentence.

(ii) Notwithstanding anything to the contrary in this Confirmation, upon the occurrence of one of the following events, with respect to the Transaction, (1) Dealer shall have the right to designate such event an Additional Termination Event and designate an Early Termination Date pursuant to Section 6(b) of the Agreement, (2) Company shall be deemed the sole Affected Party with respect to such Additional Termination Event and (3) the Transaction, or, at the election of Dealer in its sole discretion, any portion of the Transaction, shall be deemed the sole Affected Transaction; *provided* that if Dealer so designates an Early Termination Date with respect to a portion of the Transaction, (a) a payment shall be made pursuant to Section 6 of the Agreement as if an Early Termination Date had been designated in respect of a Transaction having terms identical to the Transaction and a Number of Warrants equal to the number of Warrants included in the terminated portion of the Transaction, and (b) for the avoidance of doubt, the Transaction shall remain in full force and effect except that the Number of Warrants shall be reduced by the number of Warrants included in such terminated portion:

(A) A "person" or "group" within the meaning of Section 13(d) of the Exchange Act, other than Company, its subsidiaries or its and their employee benefit plans, files a Schedule TO or any schedule, form or report under the Exchange Act disclosing that such person or group has become the direct or indirect "beneficial owner," as defined in Rule 13d-3 under the Exchange Act, of the common equity of Company representing more than 50% of the voting power of such common equity.

(B) Consummation of (I) any recapitalization, reclassification or change of the Shares (other than changes resulting from a subdivision or combination) as a result of which the Shares would be converted into, or exchanged for, stock, other securities, other property or assets or (II) any share exchange, consolidation or merger of Company pursuant to which the Shares will be converted into cash, securities or other property or (III) any sale, lease or other transfer in one transaction or a series of transactions of all or substantially all of the consolidated assets of Company and its subsidiaries, taken as a whole, to any person other than one of Company's subsidiaries. Notwithstanding the foregoing, any transaction or transactions set forth in this clause (B) shall not constitute an Additional Termination Event if (x) at least 90% of the consideration received or to be received by holders of the Shares, excluding cash payments for fractional Shares, in connection with such transaction or transactions consists of shares of common stock that are listed or quoted on any of The New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or any of their respective successors) or will be so listed or quoted when issued or exchanged in connection with such transaction or transactions, and (y) as a result of such transaction or transactions, the Shares will consist of such consideration, excluding cash payments for fractional Shares.

(C) Company's shareholders approve any plan or proposal for the liquidation or dissolution of Company.

(D) Default by Company or any of its subsidiaries with respect to any mortgage, agreement or other instrument under which there may be outstanding, or by which there may be secured or evidenced, any indebtedness for money borrowed in excess of $15 million in the aggregate of Company and/or any such subsidiary, whether such indebtedness now exists or shall hereafter be created (i) resulting in such indebtedness becoming or being declared due and payable or (ii) constituting a failure to pay the principal or interest of any such debt when due and payable at its stated maturity, upon required repurchase, upon declaration of acceleration or otherwise.

(E) A final judgment for the payment of $15 million or more (excluding any amounts covered by insurance) rendered against Company or any of its subsidiaries, which judgment is not discharged or stayed within 60 days after (I) the date on which the right to appeal thereof has expired if no such appeal has commenced, or (II) the date on which all rights to appeal have been extinguished.

(F) Dealer, despite using commercially reasonable efforts, is unable or reasonably determines that it is impractical or illegal, to hedge its exposure with respect to the Transaction in the public market without registration under the Securities Act or as a result of any legal, regulatory or self-regulatory requirements or related policies and procedures (whether or not such requirements, policies or procedures are imposed by law or have been voluntarily adopted by Dealer).

(G) On any day during the period from and including the Trade Date, to and including the final Expiration Date, (I) the Notional Unwind Shares (as defined below) as of such day exceeds a number of Shares equal to 60% of the Maximum Number of Shares, or (II) Company makes a public announcement of any transaction or event that, in the reasonable opinion of Dealer would, upon consummation of such transaction or upon the occurrence of such event, as applicable, and after giving effect to any applicable adjustments hereunder, cause the Notional Unwind Shares immediately following the consummation of such transaction or the occurrence of such event to exceed a number of Shares equal to 60% of the Maximum Number of Shares. The "**Notional Unwind Shares**" as of any day is a number of Shares equal to (1) the amount that would be payable pursuant to Section 6 of the Agreement (determined as of such day as if an Early Termination Date had been designated in respect of the Transaction and as if Company were the sole Affected Party and the Transaction were the sole Affected Transaction), *divided by* (2) the Settlement Price (determined as if such day were a Valuation Date).

(H) If Company has not obtained Shareholder Approval prior to February 11, 2014 (the "**Approval Deadline**"). For the avoidance of doubt, if Company has not obtained Shareholder Approval prior to the Approval Deadline, Dealer shall have right to designate an Early Termination Date in connection with the Additional Termination Event set forth in this clause (H) on any day from, and including, the Approval Deadline to, and including, the earlier of (x) the date on which Company obtains Shareholder Approval and (y) the final Expiration Date.

(i) *No Collateral or Setoff*. Notwithstanding any provision of the Agreement or any other agreement between the parties to the contrary, the obligations of Company hereunder are not secured by any collateral. Obligations under the Transaction shall not be set off by Company against any other obligations of the parties, whether arising under the Agreement, this Confirmation, under any other agreement between the parties hereto, by operation of law or otherwise. Any provision in the Agreement with respect to the satisfaction of Company's payment obligations to the extent of Dealer's payment obligations to Company in the same currency and in the same Transaction (including, without

limitation Section 2(c) thereof) shall not apply to Company and, for the avoidance of doubt, Company shall fully satisfy such payment obligations notwithstanding any payment obligation to Company by Dealer in the same currency and in the same Transaction. In calculating any amounts under Section 6(e) of the Agreement, notwithstanding anything to the contrary in the Agreement, (1) separate amounts shall be calculated as set forth in such Section 6(e) with respect to (a) the Transaction and (b) all other Transactions, and (2) such separate amounts shall be payable pursuant to Section 6(d)(ii) of the Agreement. For the avoidance of doubt and notwithstanding anything to the contrary provided in this Section 9(i), in the event of bankruptcy or liquidation of either Company or Dealer, neither party shall have the right to set off any obligation that it may have to the other party under the Transaction against any obligation such other party may have to it, whether arising under the Agreement, this Confirmation or any other agreement between the parties hereto, by operation of law or otherwise.

(j) *Alternative Calculations and Payment on Early Termination and on Certain Extraordinary Events*.

(i) If, in respect of the Transaction, an amount is payable by Company to Dealer, (A) pursuant to Section 12.7 or Section 12.9 of the Equity Definitions or (B) pursuant to Section 6(d)(ii) of the Agreement (any such amount, a "**Payment Obligation**"), Company shall satisfy the Payment Obligation by the Share Termination Alternative (as defined below), unless (a) Company gives irrevocable telephonic notice to Dealer, confirmed in writing within one Scheduled Trading Day, no later than 12:00 p.m. (New York City time) on the Merger Date, Tender Offer Date, Announcement Date (in the case of a Nationalization, Insolvency or Delisting), Early Termination Date or date of cancellation, as applicable, of its election that the Share Termination Alternative shall not apply, (b) Company remakes the representation set forth in Section 8(g) as of the date of such election and (c) Dealer agrees, in its sole discretion, to such election, in which case the provisions of Section 12.7 or Section 12.9 of the Equity Definitions, or the provisions of Section 6(d)(ii) of the Agreement, as the case may be, shall apply.

Share Termination Alternative:	If applicable, Company shall deliver to Dealer the Share Termination Delivery Property on the date (the "**Share Termination Payment Date**") on which the Payment Obligation would otherwise be due pursuant to Section 12.7 or Section 12.9 of the Equity Definitions or Section 6(d)(ii) of the Agreement, as applicable, subject to Section 9(k)(i) below, in satisfaction, subject to Section 9(k)(ii) below, of the relevant Payment Obligation, in the manner reasonably requested by Dealer free of payment.
Share Termination Delivery Property:	A number of Share Termination Delivery Units, as calculated by the Calculation Agent, equal to the relevant Payment Obligation *divided by* the Share Termination Unit Price. The Calculation Agent shall adjust the amount of Share Termination Delivery Property by replacing any fractional portion of a security therein with an amount of cash equal to the value of such fractional security based on the values used to calculate the Share Termination Unit Price (without giving effect to any discount pursuant to Section 9(k)(i)).
Share Termination Unit Price:	The value of property contained in one Share Termination Delivery Unit on the date such Share Termination Delivery Units are to be delivered as Share Termination Delivery Property, as determined by the

Calculation Agent in its good faith discretion by commercially reasonable means. In the case of a Private Placement of Share Termination Delivery Units that are Restricted Shares (as defined below), as set forth in Section 9(k)(i) below, the Share Termination Unit Price shall be determined by the discounted price applicable to such Share Termination Delivery Units. In the case of a Registration Settlement of Share Termination Delivery Units that are Restricted Shares (as defined below) as set forth in Section 9(k)(ii) below, notwithstanding the foregoing, the Share Termination Unit Price shall be the Settlement Price on the Merger Date, Tender Offer Date, Announcement Date (in the case of a Nationalization, Insolvency or Delisting), Early Termination Date or date of cancellation, as applicable. The Calculation Agent shall notify Company of the Share Termination Unit Price at the time of notification of such Payment Obligation to Company or, if applicable, at the time the discounted price applicable to the relevant Share Termination Units is determined pursuant to Section 9(k)(i).

Share Termination Delivery Unit: One Share or, if the Shares have changed into cash or any other property or the right to receive cash or any other property as the result of a Nationalization, Insolvency or Merger Event (any such cash or other property, the "**Exchange Property**"), a unit consisting of the type and amount of Exchange Property received by a holder of one Share (without consideration of any requirement to pay cash or other consideration in lieu of fractional amounts of any securities) in such Nationalization, Insolvency or Merger Event. If such Nationalization, Insolvency or Merger Event involves a choice of Exchange Property to be received by holders, such holder shall be deemed to have elected to receive the maximum possible amount of cash.

Failure to Deliver: Inapplicable

Other applicable provisions: If Share Termination Alternative is applicable, the provisions of Sections 9.8, 9.9, 9.11 and 9.12 (as modified above) of the Equity Definitions will be applicable, except that all references in such provisions to "Physically-settled" shall be read as references to "Share Termination Settled" and all references to "Shares" shall be read as references to "Share Termination Delivery Units". "Share Termination Settled" in relation to the Transaction means that the Share Termination Alternative is applicable to the Transaction.

(ii) Notwithstanding anything to the contrary in this Confirmation, any Payment Obligation under this Confirmation shall, for all purposes, be calculated as if the Maximum Number of Shares were equal to two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2) but any deliveries under Section 9(j)(i) shall be limited to the Maximum Number of Shares as defined in Section 2

hereof. In the event Company shall not have delivered to Dealer the full number of Shares or Restricted Shares otherwise deliverable by Company to Dealer pursuant to the terms of the Transaction because Company has not obtained shareholder approval pursuant to Section 9(q) for the Maximum Number of Shares to equal two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2) (such deficit, the "**Approval Deficit Shares**"), Company shall be continually obligated to deliver, from time to time, Shares or Restricted Shares, as the case may be, to Dealer until the full number of Approval Deficit Shares have been delivered pursuant to this Section 9(j)(ii), when, and to the extent that the Company obtains shareholder approval; *provided* that in no event shall Company deliver any Shares or Restricted Shares to Dealer pursuant to this Section 9(j)(ii) to the extent that such delivery would cause the aggregate number of Shares and Restricted Shares delivered to Dealer to exceed the Maximum Number of Shares as so increased pursuant to Section 9(q).

(k) *Registration/Private Placement Procedures*. If, in the reasonable opinion of Dealer, following any delivery of Shares or Share Termination Delivery Property to Dealer hereunder, such Shares or Share Termination Delivery Property would be in the hands of Dealer subject to any applicable restrictions with respect to any registration or qualification requirement or prospectus delivery requirement for such Shares or Share Termination Delivery Property pursuant to any applicable federal or state securities law (including, without limitation, any such requirement arising under Section 5 of the Securities Act as a result of such Shares or Share Termination Delivery Property being "restricted securities", as such term is defined in Rule 144 under the Securities Act, or as a result of the sale of such Shares or Share Termination Delivery Property being subject to paragraph (c) of Rule 145 under the Securities Act) (such Shares or Share Termination Delivery Property, "**Restricted Shares**"), then delivery of such Restricted Shares shall be effected pursuant to either clause (i) or (ii) below at the election of Company, unless Dealer waives the need for registration/private placement procedures set forth in (i) and (ii) below. Notwithstanding the foregoing, solely in respect of any Daily Number of Warrants exercised or deemed exercised on any Expiration Date, Company shall elect, prior to the first Settlement Date for the first applicable Expiration Date, a Private Placement Settlement or Registration Settlement for all deliveries of Restricted Shares for all such Expiration Dates which election shall be applicable to all remaining Settlement Dates for such Warrants and the procedures in clause (i) or clause (ii) below shall apply for all such delivered Restricted Shares on an aggregate basis commencing after the final Settlement Date for such Warrants. The Calculation Agent shall make reasonable adjustments to settlement terms and provisions under this Confirmation to reflect a single Private Placement or Registration Settlement for such aggregate Restricted Shares delivered hereunder.

(i) If Company elects to settle the Transaction pursuant to this clause (i) (a "**Private Placement Settlement**"), then delivery of Restricted Shares by Company shall be effected in customary private placement procedures with respect to such Restricted Shares reasonably acceptable to Dealer; *provided* that Company may not elect a Private Placement Settlement if, on the date of its election, it has taken, or caused to be taken, any action that would make unavailable either the exemption pursuant to Section 4(2) of the Securities Act for the sale by Company to Dealer (or any affiliate designated by Dealer) of the Restricted Shares or the exemption pursuant to Section 4(1) or Section 4(3) of the Securities Act for resales of the Restricted Shares by Dealer (or any such affiliate of Dealer). The Private Placement Settlement of such Restricted Shares shall include customary representations, covenants, blue sky and other governmental filings and/or registrations, indemnities to Dealer, due diligence rights (for Dealer or any designated buyer of the Restricted Shares by Dealer), opinions and certificates, and such other documentation as is customary for private placement agreements of similar size, all reasonably acceptable to Dealer. In the case of a Private Placement Settlement, Dealer shall determine the appropriate discount to the Share Termination Unit Price (in the case of settlement of Share Termination Delivery Units pursuant to Section 9(j) above) or any Settlement Price (in the case of settlement of Shares pursuant to Section 2 above) applicable to such Restricted Shares in a commercially reasonable manner and appropriately adjust the number of such Restricted Shares to be delivered to Dealer

hereunder, which discount shall only take into account the illiquidity resulting from the fact that the Restricted Shares will not be registered for resale and any commercially reasonable fees and expenses of Dealer (and any affiliate thereof) in connection with such resale. Notwithstanding anything to the contrary in the Agreement or this Confirmation, the date of delivery of such Restricted Shares shall be the Exchange Business Day following notice by Dealer to Company, of such applicable discount and the number of Restricted Shares to be delivered pursuant to this clause (i). For the avoidance of doubt, delivery of Restricted Shares shall be due as set forth in the previous sentence and not be due on the Share Termination Payment Date (in the case of settlement of Share Termination Delivery Units pursuant to Section 9(j) above) or on the Settlement Date for such Restricted Shares (in the case of settlement in Shares pursuant to Section 2 above).

(ii) If Company elects to settle the Transaction pursuant to this clause (ii) (a "**Registration Settlement**"), then Company shall promptly (but in any event no later than the beginning of the Resale Period) file and use its reasonable best efforts to make effective under the Securities Act a registration statement or supplement or amend an outstanding registration statement in form and substance reasonably satisfactory to Dealer, to cover the resale of such Restricted Shares in accordance with customary resale registration procedures, including covenants, conditions, representations, underwriting discounts (if applicable), commissions (if applicable), indemnities due diligence rights, opinions and certificates, and such other documentation as is customary for equity resale underwriting agreements of similar size, all reasonably acceptable to Dealer. If Dealer, in its sole reasonable discretion, is not satisfied with such procedures and documentation Private Placement Settlement shall apply. If Dealer is satisfied with such procedures and documentation, it shall sell the Restricted Shares pursuant to such registration statement during a period (the "**Resale Period**") commencing on the Exchange Business Day following delivery of such Restricted Shares (which, for the avoidance of doubt, shall be (x) the Share Termination Payment Date in case of settlement in Share Termination Delivery Units pursuant to Section 9(j) above or (y) the Settlement Date in respect of the final Expiration Date for all Daily Number of Warrants) and ending on the earliest of (i) the Exchange Business Day on which Dealer completes the sale of all Restricted Shares in a commercially reasonable manner or, in the case of settlement of Share Termination Delivery Units, a sufficient number of Restricted Shares so that the realized net proceeds of such sales equals or exceeds the Payment Obligation (as defined above), (ii) the date upon which all Restricted Shares have been sold or transferred pursuant to Rule 144 (or similar provisions then in force) or Rule 145(d)(2) (or any similar provision then in force) under the Securities Act and (iii) the date upon which all Restricted Shares may be sold or transferred by a non-affiliate pursuant to Rule 144 (or any similar provision then in force) or Rule 145(d)(2) (or any similar provision then in force) under the Securities Act. If the Payment Obligation exceeds the realized net proceeds from such resale, Company shall transfer to Dealer by the open of the regular trading session on the Exchange on the Exchange Trading Day immediately following such resale the amount of such excess (the "**Additional Amount**") in cash or in a number of Shares ("**Make-whole Shares**") in an amount that, based on the Settlement Price on such day (as if such day was the "Valuation Date" for purposes of computing such Settlement Price), has a dollar value equal to the Additional Amount. The Resale Period shall continue to enable the sale of the Make-whole Shares. If Company elects to pay the Additional Amount in Shares, the requirements and provisions for Registration Settlement shall apply. This provision shall be applied successively until the Additional Amount is equal to zero. In no event shall Company deliver a number of Restricted Shares greater than the Maximum Number of Shares.

(iii) Without limiting the generality of the foregoing, Company agrees that (A) any Restricted Shares delivered to Dealer may be transferred by and among Dealer and its affiliates and Company shall effect such transfer without any further action by Dealer and (B) after the period of 6 months from the Trade Date (or 1 year from the Trade Date if, at such time, informational requirements of Rule 144(c) under the Securities Act are not satisfied with respect to Company) has elapsed in respect of any Restricted Shares delivered to Dealer,

Company shall promptly remove, or cause the transfer agent for such Restricted Shares to remove, any legends referring to any such restrictions or requirements from such Restricted Shares upon request by Dealer (or such affiliate of Dealer) to Company or such transfer agent, without any requirement for the delivery of any certificate, consent, agreement, opinion of counsel, notice or any other document, any transfer tax stamps or payment of any other amount or any other action by Dealer (or such affiliate of Dealer). Notwithstanding anything to the contrary herein, to the extent the provisions of Rule 144 of the Securities Act or any successor rule are amended, or the applicable interpretation thereof by the Securities and Exchange Commission or any court change after the Trade Date, the agreements of Company herein shall be deemed modified to the extent necessary, in the opinion of outside counsel of Company, to comply with Rule 144 of the Securities Act, as in effect at the time of delivery of the relevant Shares or Share Termination Delivery Property.

(iv) If the Private Placement Settlement or the Registration Settlement shall not be effected as set forth in clauses (i) or (ii), as applicable, then failure to effect such Private Placement Settlement or such Registration Settlement shall constitute an Event of Default with respect to which Company shall be the Defaulting Party.

(l) *Limit on Beneficial Ownership*. Notwithstanding any other provisions hereof, Dealer may not exercise any Warrant hereunder or be entitled to take delivery of any Shares deliverable hereunder, and Automatic Exercise shall not apply with respect to any Warrant hereunder, to the extent (but only to the extent) that, after such receipt of any Shares upon the exercise of such Warrant or otherwise hereunder, (i) the Section 16 Percentage would exceed 7.5%, or (ii) the Share Amount would exceed the Applicable Share Limit. Any purported delivery hereunder shall be void and have no effect to the extent (but only to the extent) that, after such delivery, (i) the Section 16 Percentage would exceed 7.5%, or (ii) the Share Amount would exceed the Applicable Share Limit. If any delivery owed to Dealer hereunder is not made, in whole or in part, as a result of this provision, Company's obligation to make such delivery shall not be extinguished and Company shall make such delivery as promptly as practicable after, but in no event later than one Business Day after, Dealer gives notice to Company that, after such delivery, (i) the Section 16 Percentage would not exceed 7.5%, and (ii) the Share Amount would not exceed the Applicable Share Limit.

(m) *Share Deliveries*. Notwithstanding anything to the contrary herein, Company agrees that any delivery of Shares or Share Termination Delivery Property shall be effected by book-entry transfer through the facilities of DTC, or any successor depositary, if at the time of delivery, such class of Shares or class of Share Termination Delivery Property is in book-entry form at DTC or such successor depositary.

(n) *Waiver of Jury Trial.* Each party waives, to the fullest extent permitted by applicable law, any right it may have to a trial by jury in respect of any suit, action or proceeding relating to the Transaction. Each party (i) certifies that no representative, agent or attorney of the other party has represented, expressly or otherwise, that such other party would not, in the event of such a suit, action or proceeding, seek to enforce the foregoing waiver and (ii) acknowledges that it and the other party have been induced to enter into the Transaction, as applicable, by, among other things, the mutual waivers and certifications provided herein.

(o) *Tax Disclosure.* Effective from the date of commencement of discussions concerning the Transaction, Company and each of its employees, representatives, or other agents may disclose to any and all persons, without limitation of any kind, the tax treatment and tax structure of the Transaction and all materials of any kind (including opinions or other tax analyses) that are provided to Company relating to such tax treatment and tax structure.

(p) *Maximum Share Delivery*.

(i) Notwithstanding any other provision of this Confirmation, the Agreement or the Equity Definitions, in no event will Company at any time be required to deliver a number of Shares greater than the Maximum Number of Shares to Dealer in connection with the Transaction.

(ii) In the event Company shall not have delivered to Dealer the full number of Shares or Restricted Shares otherwise deliverable by Company to Dealer pursuant to the terms of the Transaction because Company has insufficient authorized but unissued Shares (such deficit, the "**Deficit Shares**"), Company shall be continually obligated to deliver, from time to time, Shares or Restricted Shares, as the case may be, to Dealer until the full number of Deficit Shares have been delivered pursuant to this Section 9(p)(ii), when, and to the extent that, (A) Shares are repurchased, acquired or otherwise received by Company or any of its subsidiaries after the Trade Date (whether or not in exchange for cash, fair value or any other consideration), (B) authorized and unissued Shares previously reserved for issuance in respect of other transactions become no longer so reserved or (C) Company additionally authorizes any unissued Shares that are not reserved for other transactions; *provided* that in no event shall Company deliver any Shares or Restricted Shares to Dealer pursuant to this Section 9(p)(ii) to the extent that such delivery would cause the aggregate number of Shares and Restricted Shares delivered to Dealer to exceed the Maximum Number of Shares. Company shall immediately notify Dealer of the occurrence of any of the foregoing events (including the number of Shares subject to clause (A), (B) or (C) and the corresponding number of Shares or Restricted Shares, as the case may be, to be delivered) and promptly deliver such Shares or Restricted Shares, as the case may be, thereafter.

(q) *Shareholder Approval*. Company shall use its reasonable best efforts to seek approval from its shareholders ("**Shareholder Approval**"), in accordance with the requirements of Rule 312.03(c) of The New York Stock Exchange Listed Company Manual or any successor rule, for the issuance pursuant to the Transaction of a number of Shares equal to two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2). If Company succeeds in obtaining such approval, then upon such approval and without any further action by either party, (i) the provisions set forth opposite the caption "Maximum Number of Shares" in Section 2 shall be deemed to be replaced in their entirety with the phrase "A number of Shares equal to two times the product of the Number of Warrants and the Warrant Entitlement," (ii) the Additional Termination Event set forth in Section 9(h)(ii)(G) shall no longer be applicable, (iii) the provisions set forth in Section 9(j)(ii) shall be deleted in their entirety and (iv) the provisions opposite the caption "Share Delivery Quantity" in Section 2 shall be replaced in their entirety with the sentence "For any Settlement Date, a number of Shares, as calculated by the Calculation Agent, equal to the Net Share Settlement Amount for such Settlement Date *divided by* the Settlement Price on the Valuation Date for such Settlement Date."

(r) *Right to Extend.* Dealer may postpone or add, in whole or in part, any Expiration Date or any other date of valuation or delivery with respect to some or all of the relevant Warrants (in which event the Calculation Agent shall make appropriate adjustments to the Daily Number of Warrants with respect to one or more Expiration Dates) if Dealer determines, in its commercially reasonable judgment, that such extension is reasonably necessary or appropriate to preserve Dealer's hedging or hedge unwind activity hereunder in light of existing liquidity conditions or to enable Dealer to effect purchases of Shares in connection with its hedging, hedge unwind or settlement activity hereunder in a manner that would, if Dealer were Issuer or an affiliated purchaser of Issuer, be in compliance with applicable legal, regulatory or self-regulatory requirements, or with related policies and procedures applicable to Dealer.

(s) *Status of Claims in Bankruptcy.* Dealer acknowledges and agrees that this Confirmation is not intended to convey to Dealer rights against Company with respect to the Transaction that are senior to the claims of common stockholders of Company in any United States bankruptcy proceedings of Company; *provided* that nothing herein shall limit or shall be deemed to limit Dealer's right to pursue remedies in the event of a breach by Company of its obligations and agreements with respect to the Transaction; *provided*, *further*, that nothing herein shall limit or shall be deemed to limit Dealer's rights in respect of any transactions other than the Transaction.

(t) *Securities Contract; Swap Agreement.* The parties hereto intend for (i) the Transaction to be a "securities contract" and a "swap agreement" as defined in the Bankruptcy Code (Title 11 of the

United States Code) (the "**Bankruptcy Code**"), and the parties hereto to be entitled to the protections afforded by, among other Sections, Sections 362(b)(6), 362(b)(17), 546(e), 546(g), 555 and 560 of the Bankruptcy Code, (ii) a party's right to liquidate the Transaction and to exercise any other remedies upon the occurrence of any Event of Default under the Agreement with respect to the other party to constitute a "contractual right" as described in the Bankruptcy Code, and (iii) each payment and delivery of cash, securities or other property hereunder to constitute a "margin payment" or "settlement payment" and a "transfer" as defined in the Bankruptcy Code.

(u)*Wall Street Transparency and Accountability Act*. In connection with Section 739 of the Wall Street Transparency and Accountability Act of 2010 ("**WSTAA**"), the parties hereby agree that neither the enactment of WSTAA or any regulation under the WSTAA, nor any requirement under WSTAA or an amendment made by WSTAA, shall limit or otherwise impair either party's otherwise applicable rights to terminate, renegotiate, modify, amend or supplement this Confirmation or the Agreement, as applicable, arising from a termination event, force majeure, illegality, increased costs, regulatory change or similar event under this Confirmation, the Equity Definitions incorporated herein, or the Agreement (including, but not limited to, rights arising from Change in Law, Hedging Disruption, Increased Cost of Hedging, an Excess Ownership Position, or Illegality (as defined in the Agreement)).

(v)*Agreements and Acknowledgements Regarding Hedging*. Company understands, acknowledges and agrees that: (A) at any time on and prior to the last Expiration Date, Dealer and its affiliates may buy or sell Shares or other securities or buy or sell options or futures contracts or enter into swaps or other derivative securities in order to adjust its hedge position with respect to the Transaction; (B) Dealer and its affiliates also may be active in the market for Shares other than in connection with hedging activities in relation to the Transaction; (C) Dealer shall make its own determination as to whether, when or in what manner any hedging or market activities in securities of Issuer shall be conducted and shall do so in a manner that it deems appropriate to hedge its price and market risk with respect to the Settlement Prices; and (D) any market activities of Dealer and its affiliates with respect to Shares may affect the market price and volatility of Shares, as well as the Settlement Prices, each in a manner that may be adverse to Company.

(w)*Early Unwind*. In the event the sale of the "Underwritten Securities" (as defined in the Purchase Agreement) is not consummated with the Initial Purchasers for any reason, or Company fails to deliver to Dealer opinions of counsel as required pursuant to Section 9(a), in each case by 5:00 p.m. (New York City time) on the Premium Payment Date, or such later date as agreed upon by the parties (the Premium Payment Date or such later date the "**Early Unwind Date**"), the Transaction shall automatically terminate (the "**Early Unwind**"), on the Early Unwind Date and (i) the Transaction and all of the respective rights and obligations of Dealer and Company under the Transaction shall be cancelled and terminated and (ii) each party shall be released and discharged by the other party from and agrees not to make any claim against the other party with respect to any obligations or liabilities of the other party arising out of and to be performed in connection with the Transaction either prior to or after the Early Unwind Date; *provided* that Company shall purchase from Dealer on the Early Unwind Date all Shares purchased by Dealer or one or more of its affiliates in connection with the Transaction at the then prevailing market price. Each of Dealer and Company represents and acknowledges to the other that, subject to the proviso included in this Section 9(w), upon an Early Unwind, all obligations with respect to the Transaction shall be deemed fully and finally discharged.

(x)*Payment by Dealer*. In the event that (i) an Early Termination Date occurs or is designated with respect to the Transaction as a result of a Termination Event or an Event of Default (other than an Event of Default arising under Section 5(a)(ii) or 5(a)(iv) of the Agreement) and, as a result, Dealer owes to Company an amount calculated under Section 6(e) of the Agreement, or (ii) Dealer owes to Company, pursuant to Section 12.7 or Section 12.9 of the Equity Definitions, an amount calculated under Section 12.8 of the Equity Definitions, such amount shall be deemed to be zero.

(y)If Company has not obtained Shareholder Approval prior to the Approval Deadline, on the Approval Deadline (x) the First Expiration Date shall be extended by one calendar year, (y) the Warrants shall, as of April 15, 2020 (the " **Original First Expiration Date**"), cease to be to be "European Options" (as

such term is defined in the Equity Definitions) and shall become, as of the Original First Expiration Date, "American Options" (as such term is defined in the Equity Definitions) exercisable as of the Original First Expiration Date and (z) the Calculation Agent shall make commercially reasonable conforming amendments to the exercise and settlement terms of the Transaction to reflect the change of the Warrants from European Options to American Options, for the avoidance of doubt, retaining (i) contingencies to exercise that are not an observable market, other than the market for the Company's stock or an observable index, other than an index calculated or measured solely by reference to the Company's own operations, (ii) the commercially reasonable nature of adjustments permitted to the Transaction (such as to consider changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Shares and the ability to maintain a commercially reasonable hedge position in the underlying shares) and (iii) the Company's unilateral right to settle in shares pursuant to 9(k), including pursuant to a Share Termination Alternative as provided under Section 9(j). On each anniversary of the Approval Deadline occurring prior to the final Expiration Date, if Company has not, as of such date, obtained Shareholder Approval, the First Expiration Date shall be further extended by one additional calendar year.

(z) *Adjustments*. For the avoidance of doubt, whenever the Calculation Agent or Determining Party is called upon to make an adjustment pursuant to the terms of this Confirmation or the Equity Definitions to take into account the effect of an event, the Calculation Agent or Determining Party shall make such adjustment by reference to the effect of such event on the Hedging Party, assuming that the Hedging Party maintains a commercially reasonable hedge position.

(aa) *Delivery or Receipt of Cash*. For the avoidance of doubt, other than receipt of the Premium by Company, nothing in this Confirmation shall be interpreted as requiring Company to cash settle the Transaction, except in circumstances where cash settlement is within Company's control (including, without limitation, where Company elects to deliver or receive cash, or where Company has made Private Placement settlement unavailable due to the occurrence of events within its control) or in those circumstances in which holders of Shares would also receive cash.

(bb) *No Reliance*. The Company hereby confirms that it has relied on the advice of its own counsel and other advisors (to the extent it deems appropriate) with respect to any legal, tax, accounting, or regulatory consequences of this Confirmation, that it has not relied on Dealer or its affiliates in any respect in connection therewith, and that it will not hold Dealer or its affiliates accountable for any such consequences.

Company hereby agrees (a) to check this Confirmation carefully and immediately upon receipt so that errors or discrepancies can be promptly identified and rectified and (b) to confirm that the foregoing (in the exact form provided by Dealer) correctly sets forth the terms of the agreement between Dealer and Company with respect to the Transaction, by manually signing this Confirmation or this page hereof as evidence of agreement to such terms and providing the other information requested herein and immediately returning an executed copy to John Servidio, Facsimile No. 704-208-2869.

Very truly yours,

Bank of America, N.A.

Re: Additional Warrants

The purpose of this letter agreement (this "**Confirmation**") is to amend and restate, in its entirety, the Additional Warrants Confirmation dated February 13, 2013 between the parties hereto and to confirm the terms and conditions of the Warrants issued by **Molina Healthcare, Inc.** ("**Company**") to **JPMorgan Chase Bank, National Association, London Branch** ("**Dealer**") as of the Trade Date specified below (the "**Transaction**"). The parties hereto agree and acknowledge that the amendments reflected in this amended and restated Confirmation are non-substantive, clarifying changes made for the avoidance of doubt. This letter agreement constitutes a "Confirmation" as referred to in the ISDA Master Agreement specified below. This Confirmation shall replace any previous agreements and serve as the final documentation for the Transaction.

The definitions and provisions contained in the 2002 ISDA Equity Derivatives Definitions (the "**Equity Definitions**"), as published by the International Swaps and Derivatives Association, Inc. ("**ISDA**"), are incorporated into this Confirmation. In the event of any inconsistency between the Equity Definitions and this Confirmation, this Confirmation shall govern.

Each party is hereby advised, and each such party acknowledges, that the other party has engaged in, or refrained from engaging in, substantial financial transactions and has taken other material actions in reliance upon the parties' entry into the Transaction to which this Confirmation relates on the terms and conditions set forth below.

1. This Confirmation evidences a complete and binding agreement between Dealer and Company as to the terms of the Transaction to which this Confirmation relates. This Confirmation shall supplement, form a part of, and be subject to an agreement in the form of the 2002 ISDA Master Agreement (the "**Agreement**") as if Dealer and Company had executed an agreement in such form (but without any Schedule except for the election of the laws of the State of New York as the governing law (without reference to choice of law doctrine)) on the Trade Date. In the event of any inconsistency between provisions of the Agreement and this Confirmation, this Confirmation will prevail for the purpose of the Transaction to which this Confirmation relates. The parties hereby agree that no transaction other than the Transaction to which this Confirmation relates shall be governed by the Agreement.

2. The Transaction is a Warrant Transaction, which shall be considered a Share Option Transaction for purposes of the Equity Definitions. The terms of the particular Transaction to which this Confirmation relates are as follows:

General Terms.

Trade Date: February 13, 2013

Effective Date:	The third Exchange Business Day immediately prior to the Premium Payment Date
Warrants:	Equity call warrants, each giving the holder the right to purchase a number of Shares equal to the Warrant Entitlement at a price per Share equal to the Strike Price, subject to the terms set forth under the caption "Settlement Terms" below. For the purposes of the Equity Definitions, each reference to a Warrant herein shall be deemed to be a reference to a Call Option.
Warrant Style:	European
Seller:	Company
Buyer:	Dealer
Shares:	The common stock of Company, par value USD 0.001 per Share (Exchange symbol "MOH")
Number of Warrants:	1,299,968. For the avoidance of doubt, the Number of Warrants shall be reduced by any Warrants exercised or deemed exercised hereunder. In no event will the Number of Warrants be less than zero.
Warrant Entitlement:	One Share per Warrant
Maximum Number of Shares:	For any day, 4,955,958 Shares, *minus* the aggregate number of Shares delivered prior to such day pursuant to (i) this Confirmation and (ii) any other substantially similar confirmation for Warrants sold by Company to Dealer with a trade date within 16 days of the Trade Date and with expiration dates the same as the Expiration Dates. Notwithstanding anything to the contrary in the Agreement, this Confirmation or the Equity Definitions, in no event shall the Maximum Number of Shares be subject to adjustment, except for any adjustment pursuant to the terms of this Confirmation and the Equity Definitions in connection with a Potential Adjustment Event (as defined in Section 11.2(e) of the Equity Definitions and without any amendment thereto pursuant to the terms of this Confirmation). Notwithstanding anything to the contrary in the Agreement, this Confirmation or the Equity Definitions, the Maximum Number of Shares shall not be adjusted on account of any event that (x) constitutes a Potential Adjustment Event solely on account of Section 11.2(e)(vii) of the Equity Definitions and (y) is not an event within Company's control.
Strike Price:	USD 53.8475
Premium:	USD 7,234,447
Premium Payment Date:	February 15, 2013

Exchange:	The New York Stock Exchange
Related Exchange(s):	All Exchanges

Procedures for Exercise.

Expiration Time:	The Valuation Time
Expiration Dates:	Each Scheduled Trading Day during the period from, and including, the First Expiration Date to, but excluding, the 160th Scheduled Trading Day following the First Expiration Date shall be an "Expiration Date" for a number of Warrants equal to the Daily Number of Warrants on such date; *provided* that, notwithstanding anything to the contrary in the Equity Definitions, if any such date is a Disrupted Day, the Calculation Agent shall make adjustments, if applicable, to the Daily Number of Warrants or shall reduce such Daily Number of Warrants to zero for which such day shall be an Expiration Date and shall designate a Scheduled Trading Day or a number of Scheduled Trading Days as the Expiration Date(s) for the remaining Daily Number of Warrants or a portion thereof for the originally scheduled Expiration Date; and *provided further* that if such Expiration Date has not occurred pursuant to this clause as of the eighth Scheduled Trading Day following the last scheduled Expiration Date under the Transaction, the Calculation Agent shall have the right to declare such Scheduled Trading Day to be the final Expiration Date and the Calculation Agent shall determine its good faith estimate of the fair market value for the Shares as of the Valuation Time on that eighth Scheduled Trading Day or on any subsequent Scheduled Trading Day, as the Calculation Agent shall determine using commercially reasonable means.
First Expiration Date:	April 15, 2020 (or if such day is not a Scheduled Trading Day, the next following Scheduled Trading Day), subject to Market Disruption Event below.
Daily Number of Warrants:	For any Expiration Date, the Number of Warrants that have not expired or been exercised as of such day, *divided* by the remaining number of Expiration Dates (including such day), rounded down to the nearest whole number, subject to adjustment pursuant to the provisos to "Expiration Dates".
Automatic Exercise:	Applicable; and means that for each Expiration Date, a number of Warrants equal to the Daily Number of Warrants for such Expiration Date will be deemed to be automatically exercised at the Expiration Time on such Expiration Date.
Market Disruption Event:	Section 6.3(a) of the Equity Definitions is hereby amended by replacing clause (ii) in its entirety with "(ii) an Exchange Disruption, or" and inserting immediately following clause (iii) the phrase "; in each case that the Calculation Agent determines is material."

Section 6.3(d) of the Equity Definitions is hereby amended by deleting the remainder of the provision following the words "Scheduled Closing Time" in the fourth line thereof.

Valuation Terms.

Valuation Time:	Scheduled Closing Time; *provided* that if the principal trading session is extended, the Calculation Agent shall determine the Valuation Time in good faith using its commercially reasonable discretion.
Valuation Date:	Each Exercise Date.

Settlement Terms.

Settlement Method:	Net Share Settlement.
Net Share Settlement:	On the relevant Settlement Date, Company shall deliver to Dealer a number of Shares equal to the Share Delivery Quantity for such Settlement Date to the account specified herein free of payment through the Clearance System, and Dealer shall be treated as the holder of record of such Shares at the time of delivery of such Shares or, if earlier, at 5:00 p.m. (New York City time) on such Settlement Date, and Company shall pay to Dealer cash in lieu of any fractional Share based on the Settlement Price on the relevant Valuation Date.
Share Delivery Quantity:	For any Settlement Date, a number of Shares, as calculated by the Calculation Agent, equal to the Net Share Settlement Amount for such Settlement Date *divided by* the Settlement Price on the Valuation Date for such Settlement Date; *provided* that in no event shall the Share Delivery Quantity for any Settlement Date exceed the Maximum Number of Shares for such Settlement Date, *minus* the Share Delivery Quantity (as defined in the letter agreement dated February 11, 2013 between Dealer and Company regarding Base Warrants (the "**Base Warrant Confirmation**")), if any, for such Settlement Date.
Net Share Settlement Amount:	For any Settlement Date, an amount equal to the product of (i) the number of Warrants exercised or deemed exercised on the relevant Exercise Date, (ii) the Strike Price Differential for the relevant Valuation Date and (iii) the Warrant Entitlement.
Settlement Price:	For any Valuation Date, the per Share volume-weighted average price as displayed under the heading "Bloomberg VWAP" on Bloomberg page MOH <equity> AQR (or any successor thereto) in respect of the period from the scheduled opening time of the Exchange to the Scheduled Closing Time on such Valuation Date (or if such volume-weighted average price is unavailable, the market value of one Share on such Valuation Date, as determined by the Calculation Agent). Notwithstanding the foregoing, if (i)

	any Expiration Date is a Disrupted Day and (ii) the Calculation Agent determines that such Expiration Date shall be an Expiration Date for fewer than the Daily Number of Warrants, as described above, then the Settlement Price for the relevant Valuation Date shall be the volume-weighted average price per Share on such Valuation Date on the Exchange, as determined by the Calculation Agent based on such sources as it deems appropriate using a volume-weighted methodology, for the portion of such Valuation Date for which the Calculation Agent determines there is no Market Disruption Event.
Settlement Dates:	As determined pursuant to Section 9.4 of the Equity Definitions, subject to Section 9(k)(i) hereof.
Other Applicable Provisions:	The provisions of Sections 9.1(c), 9.8, 9.9, 9.11 and 9.12 of the Equity Definitions will be applicable, except that all references in such provisions to "Physically-settled" shall be read as references to "Net Share Settled." "Net Share Settled" in relation to any Warrant means that Net Share Settlement is applicable to that Warrant.
Representation and Agreement:	Notwithstanding Section 9.11 of the Equity Definitions, the parties acknowledge that any Shares delivered to Dealer may be, upon delivery, subject to restrictions and limitations arising from Company's status as issuer of the Shares under applicable securities laws.

3. <u>Additional Terms applicable to the Transaction</u>.

Adjustments applicable to the Transaction:

Method of Adjustment:	Calculation Agent Adjustment. For the avoidance of doubt, in making any adjustments under the Equity Definitions, the Calculation Agent may make adjustments, if any, to any one or more of the Strike Price, the Number of Warrants, the Daily Number of Warrants and the Warrant Entitlement. Notwithstanding the foregoing, any cash dividends or distributions on the Shares, whether or not extraordinary, shall be governed by Section 9(f) of this Confirmation in lieu of Article 10 or Section 11.2(c) of the Equity Definitions.

Extraordinary Events applicable to the Transaction:

New Shares:	Section 12.1(i) of the Equity Definitions is hereby amended (a) by deleting the text in clause (i) thereof in its entirety (including the word "and" following clause (i)) and replacing it with the phrase "publicly quoted, traded or listed (or whose related depositary receipts are publicly quoted, traded or listed) on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors)" and (b) by inserting immediately prior to the period the phrase "and (iii) of an entity or person that is a corporation organized

under the laws of the United States, any State thereof or the District of Columbia that also becomes Company under the Transaction following such Merger Event or Tender Offer".

Consequence of Merger Events:

Merger Event: Applicable; *provided* that if an event occurs that constitutes both a Merger Event under Section 12.1(b) of the Equity Definitions and an Additional Termination Event under Section 9(h)(ii)(B) of this Confirmation, Dealer may elect, in its commercially reasonable judgment, whether the provisions of Section 12.2 of the Equity Definitions or Section 9(h)(ii)(B) will apply.

Share-for-Share: Modified Calculation Agent Adjustment

Share-for-Other: Cancellation and Payment (Calculation Agent Determination)

Share-for-Combined: Cancellation and Payment (Calculation Agent Determination); *provided* that Dealer may elect, in its commercially reasonable judgment, Component Adjustment (Calculation Agent Determination) for all or any portion of the Transaction.

Consequence of Tender Offers:

Tender Offer: Applicable; *provided* that if an event occurs that constitutes both a Tender Offer under Section 12.1(d) of the Equity Definitions and Additional Termination Event under Section 9(h)(ii)(A) of this Confirmation, Dealer may elect, in its commercially reasonable judgment, whether the provisions of Section 12.3 of the Equity Definitions or Section 9(h)(ii)(A) will apply.

Share-for-Share: Modified Calculation Agent Adjustment

Share-for-Other: Modified Calculation Agent Adjustment

Share-for-Combined: Modified Calculation Agent Adjustment

Announcement Event: If an Announcement Date occurs in respect of a Merger Event (for the avoidance of doubt, determined without regard to the language in the definition of "Merger Event" following the definition of "Reverse Merger" therein) or Tender Offer (such occurrence, an "**Announcement Event**"), then on the earliest of the Expiration Date, Early Termination Date or other date of cancellation (the "**Announcement Event Adjustment Date**") in respect of each Warrant, the Calculation Agent will determine the economic effect on such Warrant of the Announcement Event (regardless of whether the Announcement Event actually results in a Merger Event or Tender Offer, and taking into account such factors as the Calculation Agent may determine, including, without limitation, changes in

	volatility, expected dividends, stock loan rate or liquidity relevant to the Shares or the Transaction whether prior to or after the Announcement Event or for any period of time, including, without limitation, the period from the Announcement Event to the relevant Announcement Event Adjustment Date). If the Calculation Agent determines that such economic effect on any Warrant is material, then on the Announcement Event Adjustment Date for such Warrant, the Calculation Agent may make such adjustment to the exercise, settlement, payment or any other terms of such Warrant as the Calculation Agent determines appropriate to account for such economic effect, which adjustment shall be effective immediately prior to the exercise, termination or cancellation of such Warrant, as the case may be.
Announcement Date:	The definition of "Announcement Date" in Section 12.1 of the Equity Definitions is hereby amended by (i) replacing the words "a firm" with the word "any" in the second and fourth lines thereof, (ii) replacing the word "leads to the" with the words ", if completed, would lead to a" in the third and the fifth lines thereof, (iii) replacing the words "voting shares" with the word "Shares" in the fifth line thereof, and (iv) inserting the words "by any entity" after the word "announcement" in the second and the fourth lines thereof.
Nationalization, Insolvency or Delisting:	Cancellation and Payment (Calculation Agent Determination); *provided* that, in addition to the provisions of Section 12.6(a)(iii) of the Equity Definitions, it will also constitute a Delisting if the Exchange is located in the United States and the Shares are not immediately re-listed, re-traded or re-quoted on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors); if the Shares are immediately re-listed, re-traded or re-quoted on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors), such exchange or quotation system shall thereafter be deemed to be the Exchange.
Additional Disruption Events:	
Change in Law:	Applicable; *provided* that Section 12.9(a)(ii) of the Equity Definitions is hereby amended by (i) replacing the word "Shares" with the phrase "Hedge Positions" in clause (X) thereof and (ii) inserting the parenthetical "(including, for the avoidance of doubt and without limitation, adoption, effectiveness or promulgation of new regulations authorized or mandated by existing statute)" at the end of clause (A) thereof.
Failure to Deliver:	Not Applicable
Insolvency Filing:	Applicable

Hedging Disruption:	Applicable; *provided* that:

(i) Section 12.9(a)(v) of the Equity Definitions is hereby amended by (a) inserting the following words at the end of clause (A) thereof: "in the manner contemplated by the Hedging Party on the Trade Date" and (b) inserting the following two phrases at the end of such Section:

"For the avoidance of doubt, the term "equity price risk" shall be deemed to include, but shall not be limited to, stock price and volatility risk. And, for the further avoidance of doubt, any such transactions or assets referred to in phrases (A) or (B) above must be available on commercially reasonable pricing terms."; and

(ii) Section 12.9(b)(iii) of the Equity Definitions is hereby amended by inserting in the third line thereof, after the words "to terminate the Transaction", the words "or a portion of the Transaction affected by such Hedging Disruption".

Increased Cost of Hedging:	Applicable
Loss of Stock Borrow:	Applicable
Maximum Stock Loan Rate:	100 basis points
Increased Cost of Stock Borrow:	Applicable
Initial Stock Loan Rate:	25 basis points
Hedging Party:	For all applicable Additional Disruption Events, Dealer.
Determining Party:	For all applicable Extraordinary Events, Dealer.
Non-Reliance:	Applicable
Agreements and Acknowledgments Regarding Hedging Activities:	Applicable
Additional Acknowledgments:	Applicable

8. Representations and Warranties of Company.

Each of the representations and warranties of Company set forth in Section 3 of the Purchase Agreement (the "**Purchase Agreement**"), dated as of February 11, 2013, among Company and J.P. Morgan Securities LLC and Merrill Lynch, Pierce, Fenner & Smith Incorporated, as representatives of the Initial Purchasers party thereto (the "**Initial Purchasers**"), other than the representations set forth in Section 3(o), Section 3(r) and Section 3(s) of the Purchase Agreement, in each case, as such representations relate to the Transaction, are true and correct and are hereby deemed to be repeated to Dealer as if set forth herein. Company hereby further represents and warrants to Dealer on the Trade Date, the date hereof, on and as of the Premium Payment Date and, in the case of the representations in Section 8(d), at all times until termination of the Transaction, that:

(a) Company has all necessary corporate power and authority to execute, deliver and perform its obligations in respect of the Transaction; such execution, delivery and performance have been duly authorized by all necessary corporate action on Company's part; and this Confirmation has been duly and validly executed and delivered by Company and constitutes its valid and binding obligation, enforceable against Company in accordance with its terms, subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and similar laws affecting creditors' rights and remedies generally, and subject, as to enforceability, to general principles of equity, including principles of commercial reasonableness, good faith and fair dealing (regardless of whether enforcement is sought in a proceeding at law or in equity) and except that rights to indemnification and contribution hereunder may be limited by federal or state securities laws or public policy relating thereto.

(b) Neither the execution and delivery of this Confirmation nor the incurrence or performance of obligations of Company hereunder will conflict with or result in a breach of the certificate of incorporation or by-laws (or any equivalent documents) of Company, or any applicable law or regulation, or any order, writ, injunction or decree of any court or governmental authority or agency, or any agreement or instrument to which Company or any of its subsidiaries is a party or by which Company or any of its subsidiaries is bound or to which Company or any of its subsidiaries is subject, or constitute a default under, or result in the creation of any lien under, any such agreement or instrument.

(c) No consent, approval, authorization, or order of, or filing with, any governmental agency or body or any court is required in connection with the execution, delivery or performance by Company of this Confirmation, except such as have been obtained or made and such as may be required under the Securities Act of 1933, as amended (the "**Securities Act**") or state securities laws.

(d) A number of Shares equal to the Maximum Number of Shares (the "**Warrant Shares**") have been reserved for issuance by all required corporate action of Company. The Warrant Shares have been duly authorized and, when delivered against payment therefor (which may include Net Share Settlement in lieu of cash) and otherwise as contemplated by the terms of the Warrants following the exercise of the Warrants in accordance with the terms and conditions of the Warrants, will be validly issued, fully-paid and non-assessable, and the issuance of the Warrant Shares will not be subject to any preemptive or similar rights.

(e) Company is not and, after consummation of the transactions contemplated hereby, will not be required to register as an "investment company" as such term is defined in the Investment Company Act of 1940, as amended.

(f) Company is an "eligible contract participant" (as such term is defined in Section 1a(18) of the Commodity Exchange Act, as amended, other than a person that is an eligible contract participant under Section 1a(18)(C) of the Commodity Exchange Act).

(g) Company and each of its affiliates is not, on the date hereof, in possession of any material non-public information with respect to Company.

(h) No state or local (including any non-U.S. jurisdiction's) law, rule, regulation or regulatory order applicable to the Shares would give rise to any reporting, consent, registration or other requirement (including without limitation a requirement to obtain prior approval from any person or entity) as a result of Dealer or its affiliates owning or holding (however defined) Shares.

(i) Company (A) is capable of evaluating investment risks independently, both in general and with regard to all transactions and investment strategies involving a security or securities; (B) will exercise independent judgment in evaluating the recommendations of any broker-dealer or its associated persons, unless it has otherwise notified the broker-dealer in writing; and (C) has total assets of at least $50 million.

9. Other Provisions.

(a) *Opinions*. Company shall deliver to Dealer an opinion of counsel, dated as of the Trade Date, with respect to the matters set forth in Sections 8(a) through (d) of this Confirmation. Delivery of such opinion to Dealer shall be a condition precedent for the purpose of Section 2(a)(iii) of the Agreement with respect to each obligation of Dealer under Section 2(a)(i) of the Agreement.

(b) *Repurchase Notices*. Company shall, on any day on which Company effects any repurchase of Shares, promptly give Dealer a written notice of such repurchase (a "**Repurchase Notice**") on such day if following such repurchase, the number of outstanding Shares on such day, subject to any adjustments provided herein, is (i) less than 45,295,973 (in the case of the first such notice) or (ii) thereafter more than 1,390,754 less than the number of Shares included in the immediately preceding Repurchase Notice. Company agrees to indemnify and hold harmless Dealer and its affiliates and their respective officers, directors, employees, affiliates, advisors, agents and controlling persons (each, an "**Indemnified Person**") from and against any and all losses (including losses relating to Dealer's hedging activities as a consequence of becoming, or of the risk of becoming, a Section 16 "insider", including without limitation, any forbearance from hedging activities or cessation of hedging activities and any losses in connection therewith with respect to the Transaction), claims, damages, judgments, liabilities and expenses (including reasonable attorney's fees), joint or several, which an Indemnified Person actually may become subject to, as a result of Company's failure to provide Dealer with a Repurchase Notice on the day and in the manner specified in this paragraph, and to reimburse, within 30 days, upon written request, each of such Indemnified Persons for any reasonable legal or other expenses incurred in connection with investigating, preparing for, providing testimony or other evidence in connection with or defending any of the foregoing. If any suit, action, proceeding (including any governmental or regulatory investigation), claim or demand shall be brought or asserted against the Indemnified Person, such Indemnified Person shall promptly notify Company in writing, and Company, upon request of the Indemnified Person, shall retain counsel reasonably satisfactory to the Indemnified Person to represent the Indemnified Person and any others Company may designate in such proceeding and shall pay the fees and expenses of such counsel related to such proceeding. Company shall not be liable for any settlement of any proceeding effected without its written consent, but if settled with such consent or if there be a final judgment for the plaintiff, Company agrees to indemnify any Indemnified Person from and against any loss or liability by reason of such settlement or judgment. Company shall not, without the prior written consent of the Indemnified Person, effect any settlement of any pending or threatened proceeding in respect of which any Indemnified Person is or could have been a party and indemnity could have been sought hereunder by such Indemnified Person, unless such settlement includes an unconditional release of such Indemnified Person from all liability on claims that are the subject matter of such proceeding on terms reasonably satisfactory to such Indemnified Person. If the indemnification provided for in this paragraph is unavailable to an Indemnified Person or insufficient in respect of any losses, claims, damages or liabilities referred to therein, then Company under such paragraph, in lieu of indemnifying such Indemnified Person thereunder, shall contribute to the amount paid or payable by such Indemnified Person as a result of such losses, claims, damages or liabilities. The remedies provided for in this paragraph are not exclusive and shall not limit any rights or remedies which may otherwise be available to any Indemnified Person at law or in equity. The indemnity and contribution agreements contained in this paragraph shall remain operative and in full force and effect regardless of the termination of the Transaction.

(c) *Regulation M*. Company is not on the Trade Date engaged in a distribution, as such term is used in Regulation M under the Securities Exchange Act of 1934, as amended (the "**Exchange Act**"), of any securities of Company, other than a distribution meeting the requirements of the exception set forth in Rules 101(b)(10) and 102(b)(7) of Regulation M. Company shall not, until the second Scheduled Trading Day immediately following the Effective Date, engage in any such distribution.

(d)*No Manipulation*. Company is not entering into the Transaction to create actual or apparent trading activity in the Shares (or any security convertible into or exchangeable for the Shares) or to raise or depress or otherwise manipulate the price of the Shares (or any security convertible into or exchangeable for the Shares) or otherwise in violation of the Exchange Act.

(e)*Transfer or Assignment*. Company may not transfer any of its rights or obligations under the Transaction without the prior written consent of Dealer. Dealer may, without Company's consent, transfer or assign all or any part of its rights or obligations under the Transaction to any third party. If at any time at which (A) the Section 16 Percentage exceeds 7.5%, (B) the Warrant Equity Percentage exceeds 16.3%, or (C) the Share Amount exceeds the Applicable Share Limit (if any applies) (any such condition described in clauses (A), (B) or (C), an "**Excess Ownership Position**"), Dealer is unable after using its commercially reasonable efforts to effect a transfer or assignment of Warrants to a third party on pricing terms reasonably acceptable to Dealer and within a time period reasonably acceptable to Dealer such that no Excess Ownership Position exists, then Dealer may designate any Exchange Business Day as an Early Termination Date with respect to a portion of the Transaction (the "**Terminated Portion**"), such that following such partial termination no Excess Ownership Position exists. In the event that Dealer so designates an Early Termination Date with respect to a Terminated Portion, a payment shall be made pursuant to Section 6 of the Agreement as if (1) an Early Termination Date had been designated in respect of a Transaction having terms identical to the Transaction and a Number of Warrants equal to the number of Warrants underlying the Terminated Portion, (2) Company were the sole Affected Party with respect to such partial termination and (3) the Terminated Portion were the sole Affected Transaction (and, for the avoidance of doubt, the provisions of Section 9(j) shall apply to any amount that is payable by Company to Dealer pursuant to this sentence as if Company was not the Affected Party). The "**Section 16 Percentage**" as of any day is the fraction, expressed as a percentage, (A) the numerator of which is the number of Shares that Dealer and each person subject to aggregation of Shares with Dealer under Section 13 or Section 16 of the Exchange Act and rules promulgated thereunder directly or indirectly beneficially own (as defined under Section 13 or Section 16 of the Exchange Act and rules promulgated thereunder) and (B) the denominator of which is the number of Shares outstanding. The "**Warrant Equity Percentage**" as of any day is the fraction, expressed as a percentage, (A) the numerator of which is the sum of (1) the product of the Number of Warrants and the Warrant Entitlement and (2) the aggregate number of Shares underlying any other warrants purchased by Dealer from Company, and (B) the denominator of which is the number of Shares outstanding. The "**Share Amount**" as of any day is the number of Shares that Dealer and any person whose ownership position would be aggregated with that of Dealer (Dealer or any such person, a "**Dealer Person**") under any law, rule, regulation, regulatory order or organizational documents or contracts of Company that are, in each case, applicable to ownership of Shares ("**Applicable Restrictions**"), owns, beneficially owns, constructively owns, controls, holds the power to vote or otherwise meets a relevant definition of ownership under any Applicable Restriction, as determined by Dealer in its reasonable discretion. The "**Applicable Share Limit**" means a number of Shares equal to (A) the minimum number of Shares that could give rise to reporting or registration obligations or other requirements (including obtaining prior approval from any person or entity) of a Dealer Person, or could result in an adverse effect on a Dealer Person, under any Applicable Restriction, as determined by Dealer in its reasonable discretion, *minus* (B) 1% of the number of Shares outstanding. Notwithstanding any other provision in this Confirmation to the contrary requiring or allowing Dealer to purchase, sell, receive or deliver any Shares or other securities, or to make or receive any payment in cash, to or from Company, Dealer may designate any of its affiliates to purchase, sell, receive or deliver such Shares or other securities, or make or receive such payment in cash, and otherwise to perform Dealer's obligations in respect of the Transaction and any such designee may assume such obligations. Dealer shall be discharged of its obligations to Company to the extent of any such performance.

(f)*Dividends*. If at any time during the period from and including the Effective Date, to and including the last Expiration Date, an ex-dividend date for a cash dividend occurs with respect to the Shares (an "**Ex-Dividend Date**"), then the Calculation Agent will adjust any of the Strike Price, Number of

Warrants, Daily Number of Warrants and/or any other variable relevant to the exercise, settlement or payment of the Transaction to preserve the fair value of the Warrants after taking into account such dividend.

(g) *Role of Agent*. Each party agrees and acknowledges that (i) J.P. Morgan Securities LLC, an affiliate of Dealer ("**JPMS**"), has acted solely as agent and not as principal with respect to the Transaction and (ii) JPMS has no obligation or liability, by way of guaranty, endorsement or otherwise, in any manner in respect of the Transaction (including, if applicable, in respect of the settlement thereof). Each party agrees it will look solely to the other party (or any guarantor in respect thereof) for performance of such other party's obligations under the Transaction.

(h) *Additional Provisions*.

(i) Amendments to the Equity Definitions:

(A) Section 11.2(a) of the Equity Definitions is hereby amended by deleting the words "a diluting or concentrative" and replacing them with the words "an"; and adding the phrase "or Warrants" at the end of the sentence.

(B) Section 11.2(c) of the Equity Definitions is hereby amended by (w) replacing the words "a diluting or concentrative" with "an" in the fifth line thereof, (x) adding the phrase "or Warrants" after the words "the relevant Shares" in the same sentence, (y) deleting the words "diluting or concentrative" in the sixth to last line thereof and (z) deleting the phrase "(provided that no adjustments will be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to the relevant Shares)" and replacing it with the phrase "(and, for the avoidance of doubt, adjustments may be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to the relevant Shares)."

(C) Section 11.2(e)(vii) of the Equity Definitions is hereby amended by deleting the words "a diluting or concentrative" and replacing them with the word "a material"; and adding the phrase "or Warrants" at the end of the sentence.

(D) Section 12.6(a)(ii) of the Equity Definitions is hereby amended by (1) deleting from the fourth line thereof the word "or" after the word "official" and inserting a comma therefor, and (2) deleting the semi-colon at the end of subsection (B) thereof and inserting the following words therefor "or (C) at Dealer's option, the occurrence of any of the events specified in Section 5(a)(vii) (1) through (9) of the ISDA Master Agreement with respect to that Issuer."

(E) Section 12.9(b)(iv) of the Equity Definitions is hereby amended by:

(x) deleting (1) subsection (A) in its entirety, (2) the phrase "or (B)" following subsection (A) and (3) the phrase "in each case" in subsection (B); and

(y) replacing the phrase "neither the Non-Hedging Party nor the Lending Party lends Shares" with the phrase "such Lending Party does not lend Shares" in the penultimate sentence.

(F) Section 12.9(b)(v) of the Equity Definitions is hereby amended by:

(x) adding the word "or" immediately before subsection "(B)" and deleting the comma at the end of subsection (A); and

(y) (1) deleting subsection (C) in its entirety, (2) deleting the word "or" immediately preceding subsection (C), (3) deleting the penultimate sentence in its entirety and replacing it with the sentence "The Hedging Party will determine the Cancellation Amount payable by one party to the other." and (4) deleting clause (X) in the final sentence.

(ii) Notwithstanding anything to the contrary in this Confirmation, upon the occurrence of one of the following events, with respect to the Transaction, (1) Dealer shall have the right to designate such event an Additional Termination Event and designate an Early Termination Date pursuant to Section 6(b) of the Agreement, (2) Company shall be deemed the sole Affected Party with respect to such Additional Termination Event and (3) the Transaction, or, at the election of Dealer in its sole discretion, any portion of the Transaction, shall be deemed the sole Affected Transaction; *provided* that if Dealer so designates an Early Termination Date with respect to a portion of the Transaction, (a) a payment shall be made pursuant to Section 6 of the Agreement as if an Early Termination Date had been designated in respect of a Transaction having terms identical to the Transaction and a Number of Warrants equal to the number of Warrants included in the terminated portion of the Transaction, and (b) for the avoidance of doubt, the Transaction shall remain in full force and effect except that the Number of Warrants shall be reduced by the number of Warrants included in such terminated portion:

(A) A "person" or "group" within the meaning of Section 13(d) of the Exchange Act, other than Company, its subsidiaries or its and their employee benefit plans, files a Schedule TO or any schedule, form or report under the Exchange Act disclosing that such person or group has become the direct or indirect "beneficial owner," as defined in Rule 13d-3 under the Exchange Act, of the common equity of Company representing more than 50% of the voting power of such common equity.

(B) Consummation of (I) any recapitalization, reclassification or change of the Shares (other than changes resulting from a subdivision or combination) as a result of which the Shares would be converted into, or exchanged for, stock, other securities, other property or assets or (II) any share exchange, consolidation or merger of Company pursuant to which the Shares will be converted into cash, securities or other property or (III) any sale, lease or other transfer in one transaction or a series of transactions of all or substantially all of the consolidated assets of Company and its subsidiaries, taken as a whole, to any person other than one of Company's subsidiaries. Notwithstanding the foregoing, any transaction or transactions set forth in this clause (B) shall not constitute an Additional Termination Event if (x) at least 90% of the consideration received or to be received by holders of the Shares, excluding cash payments for fractional Shares, in connection with such transaction or transactions consists of shares of common stock that are listed or quoted on any of The New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or any of their respective successors) or will be so listed or quoted when issued or exchanged in connection with such transaction or transactions, and (y) as a result of such transaction or transactions, the Shares will consist of such consideration, excluding cash payments for fractional Shares.

(C) Company's shareholders approve any plan or proposal for the liquidation or dissolution of Company.

(D) Default by Company or any of its subsidiaries with respect to any mortgage, agreement or other instrument under which there may be outstanding, or by which there may be secured or evidenced, any indebtedness for money borrowed in excess of $15 million in the aggregate of Company and/or any such subsidiary, whether

such indebtedness now exists or shall hereafter be created (i) resulting in such indebtedness becoming or being declared due and payable or (ii) constituting a failure to pay the principal or interest of any such debt when due and payable at its stated maturity, upon required repurchase, upon declaration of acceleration or otherwise.

(E) A final judgment for the payment of $15 million or more (excluding any amounts covered by insurance) rendered against Company or any of its subsidiaries, which judgment is not discharged or stayed within 60 days after (I) the date on which the right to appeal thereof has expired if no such appeal has commenced, or (II) the date on which all rights to appeal have been extinguished.

(F) Dealer, despite using commercially reasonable efforts, is unable or reasonably determines that it is impractical or illegal, to hedge its exposure with respect to the Transaction in the public market without registration under the Securities Act or as a result of any legal, regulatory or self-regulatory requirements or related policies and procedures (whether or not such requirements, policies or procedures are imposed by law or have been voluntarily adopted by Dealer).

(G) On any day during the period from and including the Trade Date, to and including the final Expiration Date, (I) the Notional Unwind Shares (as defined below) as of such day exceeds a number of Shares equal to 60% of the Maximum Number of Shares, or (II) Company makes a public announcement of any transaction or event that, in the reasonable opinion of Dealer would, upon consummation of such transaction or upon the occurrence of such event, as applicable, and after giving effect to any applicable adjustments hereunder, cause the Notional Unwind Shares immediately following the consummation of such transaction or the occurrence of such event to exceed a number of Shares equal to 60% of the Maximum Number of Shares. The "**Notional Unwind Shares**" as of any day is a number of Shares equal to (1) the amount that would be payable pursuant to Section 6 of the Agreement (determined as of such day as if an Early Termination Date had been designated in respect of the Transaction and as if Company were the sole Affected Party and the Transaction were the sole Affected Transaction), *divided by* (2) the Settlement Price (determined as if such day were a Valuation Date). For the purposes of this clause (G), the Share Delivery Quantity shall be deemed to include the "Share Delivery Quantity" (as defined in the Base Warrant Confirmation) and the terms set forth above for determining the Share Delivery Quantity shall apply *mutatis mutandis* for the purposes of determining the "Share Delivery Quantity" under the Base Warrant Confirmation.

(H) If Company has not obtained Shareholder Approval prior to February 11, 2014 (the "**Approval Deadline**"). For the avoidance of doubt, if Company has not obtained Shareholder Approval prior to the Approval Deadline, Dealer shall have right to designate an Early Termination Date in connection with the Additional Termination Event set forth in this clause (H) on any day from, and including, the Approval Deadline to, and including, the earlier of (x) the date on which Company obtains Shareholder Approval and (y) the final Expiration Date.

(i) *No Collateral or Setoff*. Notwithstanding any provision of the Agreement or any other agreement between the parties to the contrary, the obligations of Company hereunder are not secured by any collateral. Obligations under the Transaction shall not be set off by Company against any other obligations of the parties, whether arising under the Agreement, this Confirmation, under any other agreement between the parties hereto, by operation of law or otherwise. Any provision in the Agreement with respect to the satisfaction of Company's payment obligations to the extent of Dealer's

payment obligations to Company in the same currency and in the same Transaction (including, without limitation Section 2(c) thereof) shall not apply to Company and, for the avoidance of doubt, Company shall fully satisfy such payment obligations notwithstanding any payment obligation to Company by Dealer in the same currency and in the same Transaction. In calculating any amounts under Section 6(e) of the Agreement, notwithstanding anything to the contrary in the Agreement, (1) separate amounts shall be calculated as set forth in such Section 6(e) with respect to (a) the Transaction and (b) all other Transactions, and (2) such separate amounts shall be payable pursuant to Section 6(d)(ii) of the Agreement. For the avoidance of doubt and notwithstanding anything to the contrary provided in this Section 9(i), in the event of bankruptcy or liquidation of either Company or Dealer, neither party shall have the right to set off any obligation that it may have to the other party under the Transaction against any obligation such other party may have to it, whether arising under the Agreement, this Confirmation or any other agreement between the parties hereto, by operation of law or otherwise.

(j) *Alternative Calculations and Payment on Early Termination and on Certain Extraordinary Events*.

(i) If, in respect of the Transaction, an amount is payable by Company to Dealer, (A) pursuant to Section 12.7 or Section 12.9 of the Equity Definitions or (B) pursuant to Section 6(d)(ii) of the Agreement (any such amount, a "**Payment Obligation**"), Company shall satisfy the Payment Obligation by the Share Termination Alternative (as defined below), unless (a) Company gives irrevocable telephonic notice to Dealer, confirmed in writing within one Scheduled Trading Day, no later than 12:00 p.m. (New York City time) on the Merger Date, Tender Offer Date, Announcement Date (in the case of a Nationalization, Insolvency or Delisting), Early Termination Date or date of cancellation, as applicable, of its election that the Share Termination Alternative shall not apply, (b) Company remakes the representation set forth in Section 8(g) as of the date of such election and (c) Dealer agrees, in its sole discretion, to such election, in which case the provisions of Section 12.7 or Section 12.9 of the Equity Definitions, or the provisions of Section 6(d)(ii) of the Agreement, as the case may be, shall apply.

Share Termination Alternative:	If applicable, Company shall deliver to Dealer the Share Termination Delivery Property on the date (the "**Share Termination Payment Date**") on which the Payment Obligation would otherwise be due pursuant to Section 12.7 or Section 12.9 of the Equity Definitions or Section 6(d)(ii) of the Agreement, as applicable, subject to Section 9(k)(i) below, in satisfaction, subject to Section 9(k)(ii) below, of the relevant Payment Obligation, in the manner reasonably requested by Dealer free of payment.
Share Termination Delivery Property:	A number of Share Termination Delivery Units, as calculated by the Calculation Agent, equal to the relevant Payment Obligation *divided by* the Share Termination Unit Price. The Calculation Agent shall adjust the amount of Share Termination Delivery Property by replacing any fractional portion of a security therein with an amount of cash equal to the value of such fractional security based on the values used to calculate the Share Termination Unit Price (without giving effect to any discount pursuant to Section 9(k)(i)).

Share Termination Unit Price:	The value of property contained in one Share Termination Delivery Unit on the date such Share Termination Delivery Units are to be delivered as Share Termination Delivery Property, as determined by the Calculation Agent in its good faith discretion by commercially reasonable means. In the case of a Private Placement of Share Termination Delivery Units that are Restricted Shares (as defined below), as set forth in Section 9(k)(i) below, the Share Termination Unit Price shall be determined by the discounted price applicable to such Share Termination Delivery Units. In the case of a Registration Settlement of Share Termination Delivery Units that are Restricted Shares (as defined below) as set forth in Section 9(k)(ii) below, notwithstanding the foregoing, the Share Termination Unit Price shall be the Settlement Price on the Merger Date, Tender Offer Date, Announcement Date (in the case of a Nationalization, Insolvency or Delisting), Early Termination Date or date of cancellation, as applicable. The Calculation Agent shall notify Company of the Share Termination Unit Price at the time of notification of such Payment Obligation to Company or, if applicable, at the time the discounted price applicable to the relevant Share Termination Units is determined pursuant to Section 9(k)(i).
Share Termination Delivery Unit:	One Share or, if the Shares have changed into cash or any other property or the right to receive cash or any other property as the result of a Nationalization, Insolvency or Merger Event (any such cash or other property, the "**Exchange Property**"), a unit consisting of the type and amount of Exchange Property received by a holder of one Share (without consideration of any requirement to pay cash or other consideration in lieu of fractional amounts of any securities) in such Nationalization, Insolvency or Merger Event. If such Nationalization, Insolvency or Merger Event involves a choice of Exchange Property to be received by holders, such holder shall be deemed to have elected to receive the maximum possible amount of cash.
Failure to Deliver:	Inapplicable
Other applicable provisions:	If Share Termination Alternative is applicable, the provisions of Sections 9.8, 9.9, 9.11 and 9.12 (as modified above) of the Equity Definitions will be applicable, except that all references in such provisions to "Physically-settled" shall be read as references to "Share Termination Settled" and all references to "Shares" shall be read as references to "Share Termination Delivery Units". "Share Termination Settled" in relation to the Transaction means that the Share Termination Alternative is applicable to the Transaction.

(ii) Notwithstanding anything to the contrary in this Confirmation, any Payment Obligation under this Confirmation shall, for all purposes, be calculated as if the Maximum Number of Shares were equal to two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2) but any deliveries under Section 9(j)(i) shall be limited to the Maximum Number of Shares as defined in Section 2 hereof. In the event Company shall not have delivered to Dealer the full number of Shares or Restricted Shares otherwise deliverable by Company to Dealer pursuant to the terms of the Transaction because Company has not obtained shareholder approval pursuant to Section 9(q) for the Maximum Number of Shares to equal two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2) (such deficit, the "**Approval Deficit Shares**"), Company shall be continually obligated to deliver, from time to time, Shares or Restricted Shares, as the case may be, to Dealer until the full number of Approval Deficit Shares have been delivered pursuant to this Section 9(j)(ii), when, and to the extent that the Company obtains shareholder approval; *provided* that in no event shall Company deliver any Shares or Restricted Shares to Dealer pursuant to this Section 9(j)(ii) to the extent that such delivery would cause the aggregate number of Shares and Restricted Shares delivered to Dealer to exceed the Maximum Number of Shares as so increased pursuant to Section 9(q).

(k) *Registration/Private Placement Procedures*. If, in the reasonable opinion of Dealer, following any delivery of Shares or Share Termination Delivery Property to Dealer hereunder, such Shares or Share Termination Delivery Property would be in the hands of Dealer subject to any applicable restrictions with respect to any registration or qualification requirement or prospectus delivery requirement for such Shares or Share Termination Delivery Property pursuant to any applicable federal or state securities law (including, without limitation, any such requirement arising under Section 5 of the Securities Act as a result of such Shares or Share Termination Delivery Property being "restricted securities", as such term is defined in Rule 144 under the Securities Act, or as a result of the sale of such Shares or Share Termination Delivery Property being subject to paragraph (c) of Rule 145 under the Securities Act) (such Shares or Share Termination Delivery Property, "**Restricted Shares**"), then delivery of such Restricted Shares shall be effected pursuant to either clause (i) or (ii) below at the election of Company, unless Dealer waives the need for registration/private placement procedures set forth in (i) and (ii) below. Notwithstanding the foregoing, solely in respect of any Daily Number of Warrants exercised or deemed exercised on any Expiration Date, Company shall elect, prior to the first Settlement Date for the first applicable Expiration Date, a Private Placement Settlement or Registration Settlement for all deliveries of Restricted Shares for all such Expiration Dates which election shall be applicable to all remaining Settlement Dates for such Warrants and the procedures in clause (i) or clause (ii) below shall apply for all such delivered Restricted Shares on an aggregate basis commencing after the final Settlement Date for such Warrants. The Calculation Agent shall make reasonable adjustments to settlement terms and provisions under this Confirmation to reflect a single Private Placement or Registration Settlement for such aggregate Restricted Shares delivered hereunder.

(i) If Company elects to settle the Transaction pursuant to this clause (i) (a "**Private Placement Settlement**"), then delivery of Restricted Shares by Company shall be effected in customary private placement procedures with respect to such Restricted Shares reasonably acceptable to Dealer; *provided* that Company may not elect a Private Placement Settlement if, on the date of its election, it has taken, or caused to be taken, any action that would make unavailable either the exemption pursuant to Section 4(2) of the Securities Act for the sale by Company to Dealer (or any affiliate designated by Dealer) of the Restricted Shares or the exemption pursuant to Section 4(1) or Section 4(3) of the Securities Act for resales of the Restricted Shares by Dealer (or any such affiliate of Dealer). The Private Placement Settlement of such Restricted Shares shall include customary representations, covenants, blue sky and

other governmental filings and/or registrations, indemnities to Dealer, due diligence rights (for Dealer or any designated buyer of the Restricted Shares by Dealer), opinions and certificates, and such other documentation as is customary for private placement agreements of similar size, all reasonably acceptable to Dealer. In the case of a Private Placement Settlement, Dealer shall determine the appropriate discount to the Share Termination Unit Price (in the case of settlement of Share Termination Delivery Units pursuant to Section 9(j) above) or any Settlement Price (in the case of settlement of Shares pursuant to Section 2 above) applicable to such Restricted Shares in a commercially reasonable manner and appropriately adjust the number of such Restricted Shares to be delivered to Dealer hereunder, which discount shall only take into account the illiquidity resulting from the fact that the Restricted Shares will not be registered for resale and any commercially reasonable fees and expenses of Dealer (and any affiliate thereof) in connection with such resale. Notwithstanding anything to the contrary in the Agreement or this Confirmation, the date of delivery of such Restricted Shares shall be the Exchange Business Day following notice by Dealer to Company, of such applicable discount and the number of Restricted Shares to be delivered pursuant to this clause (i). For the avoidance of doubt, delivery of Restricted Shares shall be due as set forth in the previous sentence and not be due on the Share Termination Payment Date (in the case of settlement of Share Termination Delivery Units pursuant to Section 9(j) above) or on the Settlement Date for such Restricted Shares (in the case of settlement in Shares pursuant to Section 2 above).

(ii) If Company elects to settle the Transaction pursuant to this clause (ii) (a "**Registration Settlement**"), then Company shall promptly (but in any event no later than the beginning of the Resale Period) file and use its reasonable best efforts to make effective under the Securities Act a registration statement or supplement or amend an outstanding registration statement in form and substance reasonably satisfactory to Dealer, to cover the resale of such Restricted Shares in accordance with customary resale registration procedures, including covenants, conditions, representations, underwriting discounts (if applicable), commissions (if applicable), indemnities due diligence rights, opinions and certificates, and such other documentation as is customary for equity resale underwriting agreements of similar size, all reasonably acceptable to Dealer. If Dealer, in its sole reasonable discretion, is not satisfied with such procedures and documentation Private Placement Settlement shall apply. If Dealer is satisfied with such procedures and documentation, it shall sell the Restricted Shares pursuant to such registration statement during a period (the "**Resale Period**") commencing on the Exchange Business Day following delivery of such Restricted Shares (which, for the avoidance of doubt, shall be (x) the Share Termination Payment Date in case of settlement in Share Termination Delivery Units pursuant to Section 9(j) above or (y) the Settlement Date in respect of the final Expiration Date for all Daily Number of Warrants) and ending on the earliest of (i) the Exchange Business Day on which Dealer completes the sale of all Restricted Shares in a commercially reasonable manner or, in the case of settlement of Share Termination Delivery Units, a sufficient number of Restricted Shares so that the realized net proceeds of such sales equals or exceeds the Payment Obligation (as defined above), (ii) the date upon which all Restricted Shares have been sold or transferred pursuant to Rule 144 (or similar provisions then in force) or Rule 145(d)(2) (or any similar provision then in force) under the Securities Act and (iii) the date upon which all Restricted Shares may be sold or transferred by a non-affiliate pursuant to Rule 144 (or any similar provision then in force) or Rule 145(d)(2) (or any similar provision then in force) under the Securities Act. If the Payment Obligation exceeds the realized net proceeds from such resale, Company shall transfer to Dealer by the open of the regular trading session on the Exchange on the Exchange Trading Day immediately following such resale the amount of such excess (the "**Additional Amount**") in cash or in a number of Shares ("**Make-whole Shares**") in an amount that, based on the Settlement Price on such day (as if such day was the "Valuation Date" for purposes of computing such Settlement Price), has a dollar value equal to the Additional Amount. The Resale Period shall continue to enable the sale of the

Make-whole Shares. If Company elects to pay the Additional Amount in Shares, the requirements and provisions for Registration Settlement shall apply. This provision shall be applied successively until the Additional Amount is equal to zero. In no event shall Company deliver a number of Restricted Shares greater than the Maximum Number of Shares.

(iii) Without limiting the generality of the foregoing, Company agrees that (A) any Restricted Shares delivered to Dealer may be transferred by and among Dealer and its affiliates and Company shall effect such transfer without any further action by Dealer and (B) after the period of 6 months from the Trade Date (or 1 year from the Trade Date if, at such time, informational requirements of Rule 144(c) under the Securities Act are not satisfied with respect to Company) has elapsed in respect of any Restricted Shares delivered to Dealer, Company shall promptly remove, or cause the transfer agent for such Restricted Shares to remove, any legends referring to any such restrictions or requirements from such Restricted Shares upon request by Dealer (or such affiliate of Dealer) to Company or such transfer agent, without any requirement for the delivery of any certificate, consent, agreement, opinion of counsel, notice or any other document, any transfer tax stamps or payment of any other amount or any other action by Dealer (or such affiliate of Dealer). Notwithstanding anything to the contrary herein, to the extent the provisions of Rule 144 of the Securities Act or any successor rule are amended, or the applicable interpretation thereof by the Securities and Exchange Commission or any court change after the Trade Date, the agreements of Company herein shall be deemed modified to the extent necessary, in the opinion of outside counsel of Company, to comply with Rule 144 of the Securities Act, as in effect at the time of delivery of the relevant Shares or Share Termination Delivery Property.

(iv) If the Private Placement Settlement or the Registration Settlement shall not be effected as set forth in clauses (i) or (ii), as applicable, then failure to effect such Private Placement Settlement or such Registration Settlement shall constitute an Event of Default with respect to which Company shall be the Defaulting Party.

(l) *Limit on Beneficial Ownership*. Notwithstanding any other provisions hereof, Dealer may not exercise any Warrant hereunder or be entitled to take delivery of any Shares deliverable hereunder, and Automatic Exercise shall not apply with respect to any Warrant hereunder, to the extent (but only to the extent) that, after such receipt of any Shares upon the exercise of such Warrant or otherwise hereunder and after taking into account any Shares deliverable to Dealer under the Base Warrant Confirmation, (i) the Section 16 Percentage would exceed 7.5%, or (ii) the Share Amount would exceed the Applicable Share Limit. Any purported delivery hereunder shall be void and have no effect to the extent (but only to the extent) that, after such delivery and after taking into account any Shares deliverable to Dealer under the Base Warrant Confirmation, (i) the Section 16 Percentage would exceed 7.5%, or (ii) the Share Amount would exceed the Applicable Share Limit. If any delivery owed to Dealer hereunder is not made, in whole or in part, as a result of this provision, Company's obligation to make such delivery shall not be extinguished and Company shall make such delivery as promptly as practicable after, but in no event later than one Business Day after, Dealer gives notice to Company that, after such delivery, (i) the Section 16 Percentage would not exceed 7.5%, and (ii) the Share Amount would not exceed the Applicable Share Limit.

(m) *Share Deliveries*. Notwithstanding anything to the contrary herein, Company agrees that any delivery of Shares or Share Termination Delivery Property shall be effected by book-entry transfer through the facilities of DTC, or any successor depositary, if at the time of delivery, such class of Shares or class of Share Termination Delivery Property is in book-entry form at DTC or such successor depositary.

(n) *Waiver of Jury Trial.* Each party waives, to the fullest extent permitted by applicable law, any right it may have to a trial by jury in respect of any suit, action or proceeding relating to the Transaction.

Each party (i) certifies that no representative, agent or attorney of the other party has represented, expressly or otherwise, that such other party would not, in the event of such a suit, action or proceeding, seek to enforce the foregoing waiver and (ii) acknowledges that it and the other party have been induced to enter into the Transaction, as applicable, by, among other things, the mutual waivers and certifications provided herein.

(o) *Tax Disclosure.* Effective from the date of commencement of discussions concerning the Transaction, Company and each of its employees, representatives, or other agents may disclose to any and all persons, without limitation of any kind, the tax treatment and tax structure of the Transaction and all materials of any kind (including opinions or other tax analyses) that are provided to Company relating to such tax treatment and tax structure.

(p) *Maximum Share Delivery*.

(i) Notwithstanding any other provision of this Confirmation, the Agreement or the Equity Definitions, in no event will Company at any time be required to deliver a number of Shares greater than the Maximum Number of Shares to Dealer in connection with the Transaction after taking into account any Shares deliverable to Dealer under the Base Warrant Confirmation.

(ii) In the event Company shall not have delivered to Dealer the full number of Shares or Restricted Shares otherwise deliverable by Company to Dealer pursuant to the terms of the Transaction because Company has insufficient authorized but unissued Shares (such deficit, the "**Deficit Shares**"), Company shall be continually obligated to deliver, from time to time, Shares or Restricted Shares, as the case may be, to Dealer until the full number of Deficit Shares have been delivered pursuant to this Section 9(p)(ii), when, and to the extent that, (A) Shares are repurchased, acquired or otherwise received by Company or any of its subsidiaries after the Trade Date (whether or not in exchange for cash, fair value or any other consideration), (B) authorized and unissued Shares previously reserved for issuance in respect of other transactions become no longer so reserved or (C) Company additionally authorizes any unissued Shares that are not reserved for other transactions; *provided* that in no event shall Company deliver any Shares or Restricted Shares to Dealer pursuant to this Section 9(p)(ii) to the extent that such delivery would cause the aggregate number of Shares and Restricted Shares delivered to Dealer to exceed the Maximum Number of Shares. Company shall immediately notify Dealer of the occurrence of any of the foregoing events (including the number of Shares subject to clause (A), (B) or (C) and the corresponding number of Shares or Restricted Shares, as the case may be, to be delivered) and promptly deliver such Shares or Restricted Shares, as the case may be, thereafter.

(q) *Shareholder Approval*. Company shall use its reasonable best efforts to seek approval from its shareholders ("**Shareholder Approval**"), in accordance with the requirements of Rule 312.03(c) of The New York Stock Exchange Listed Company Manual or any successor rule, for the issuance pursuant to the Transaction of a number of Shares equal to two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2). If Company succeeds in obtaining such approval, then upon such approval and without any further action by either party, (i) the provisions set forth opposite the caption "Maximum Number of Shares" in Section 2 shall be deemed to be replaced in their entirety with the phrase "A number of Shares equal to two times the product of the Number of Warrants and the Warrant Entitlement," (ii) the Additional Termination Event set forth in Section 9(h)(ii)(G) shall no longer be applicable, (iii) the provisions set forth in Section 9(j)(ii) shall be deleted in their entirety, (iv) the provisions opposite the caption "Share Delivery Quantity" in Section 2 shall be replaced in their entirety with the sentence "For any Settlement Date, a number of Shares, as calculated by the Calculation Agent, equal to the Net Share Settlement Amount for such Settlement Date *divided by* the Settlement Price on the Valuation Date

for such Settlement Date" and (v) the phrase "after taking into account any Shares deliverable to Dealer under the Base Warrant Confirmation" in Section 9(p)(i) shall be deleted in its entirety.

(r) *Right to Extend.* Dealer may postpone or add, in whole or in part, any Expiration Date or any other date of valuation or delivery with respect to some or all of the relevant Warrants (in which event the Calculation Agent shall make appropriate adjustments to the Daily Number of Warrants with respect to one or more Expiration Dates) if Dealer determines, in its commercially reasonable judgment, that such extension is reasonably necessary or appropriate to preserve Dealer's hedging or hedge unwind activity hereunder in light of existing liquidity conditions or to enable Dealer to effect purchases of Shares in connection with its hedging, hedge unwind or settlement activity hereunder in a manner that would, if Dealer were Issuer or an affiliated purchaser of Issuer, be in compliance with applicable legal, regulatory or self-regulatory requirements, or with related policies and procedures applicable to Dealer.

(s) *Status of Claims in Bankruptcy.* Dealer acknowledges and agrees that this Confirmation is not intended to convey to Dealer rights against Company with respect to the Transaction that are senior to the claims of common stockholders of Company in any United States bankruptcy proceedings of Company; *provided* that nothing herein shall limit or shall be deemed to limit Dealer's right to pursue remedies in the event of a breach by Company of its obligations and agreements with respect to the Transaction; *provided*, *further*, that nothing herein shall limit or shall be deemed to limit Dealer's rights in respect of any transactions other than the Transaction.

(t) *Securities Contract; Swap Agreement.* The parties hereto intend for (i) the Transaction to be a "securities contract" and a "swap agreement" as defined in the Bankruptcy Code (Title 11 of the United States Code) (the "**Bankruptcy Code**"), and the parties hereto to be entitled to the protections afforded by, among other Sections, Sections 362(b)(6), 362(b)(17), 546(e), 546(g), 555 and 560 of the Bankruptcy Code, (ii) a party's right to liquidate the Transaction and to exercise any other remedies upon the occurrence of any Event of Default under the Agreement with respect to the other party to constitute a "contractual right" as described in the Bankruptcy Code, and (iii) each payment and delivery of cash, securities or other property hereunder to constitute a "margin payment" or "settlement payment" and a "transfer" as defined in the Bankruptcy Code.

(u) *Wall Street Transparency and Accountability Act* . In connection with Section 739 of the Wall Street Transparency and Accountability Act of 2010 ("**WSTAA**"), the parties hereby agree that neither the enactment of WSTAA or any regulation under the WSTAA, nor any requirement under WSTAA or an amendment made by WSTAA, shall limit or otherwise impair either party's otherwise applicable rights to terminate, renegotiate, modify, amend or supplement this Confirmation or the Agreement, as applicable, arising from a termination event, force majeure, illegality, increased costs, regulatory change or similar event under this Confirmation, the Equity Definitions incorporated herein, or the Agreement (including, but not limited to, rights arising from Change in Law, Hedging Disruption, Increased Cost of Hedging, an Excess Ownership Position, or Illegality (as defined in the Agreement)).

(v) *Agreements and Acknowledgements Regarding Hedging*. Company understands, acknowledges and agrees that: (A) at any time on and prior to the last Expiration Date, Dealer and its affiliates may buy or sell Shares or other securities or buy or sell options or futures contracts or enter into swaps or other derivative securities in order to adjust its hedge position with respect to the Transaction; (B) Dealer and its affiliates also may be active in the market for Shares other than in connection with hedging activities in relation to the Transaction; (C) Dealer shall make its own determination as to whether, when or in what manner any hedging or market activities in securities of Issuer shall be conducted and shall do so in a manner that it deems appropriate to hedge its price and market risk with respect to the Settlement Prices; and (D) any market activities of Dealer and its affiliates with respect to Shares may affect the market price and volatility of Shares, as well as the Settlement Prices, each in a manner that may be adverse to Company.

(w)*Early Unwind*. In the event the sale of the "Option Securities" (as defined in the Purchase Agreement) is not consummated with the Initial Purchasers for any reason, or Company fails to deliver to Dealer opinions of counsel as required pursuant to Section 9(a), in each case by 5:00 p.m. (New York City time) on the Premium Payment Date, or such later date as agreed upon by the parties (the Premium Payment Date or such later date the "**Early Unwind Date**"), the Transaction shall automatically terminate (the "**Early Unwind**"), on the Early Unwind Date and (i) the Transaction and all of the respective rights and obligations of Dealer and Company under the Transaction shall be cancelled and terminated and (ii) each party shall be released and discharged by the other party from and agrees not to make any claim against the other party with respect to any obligations or liabilities of the other party arising out of and to be performed in connection with the Transaction either prior to or after the Early Unwind Date; *provided* that Company shall purchase from Dealer on the Early Unwind Date all Shares purchased by Dealer or one or more of its affiliates in connection with the Transaction at the then prevailing market price. Each of Dealer and Company represents and acknowledges to the other that, subject to the proviso included in this Section 9(w), upon an Early Unwind, all obligations with respect to the Transaction shall be deemed fully and finally discharged.

(x)*Payment by Dealer*. In the event that (i) an Early Termination Date occurs or is designated with respect to the Transaction as a result of a Termination Event or an Event of Default (other than an Event of Default arising under Section 5(a)(ii) or 5(a)(iv) of the Agreement) and, as a result, Dealer owes to Company an amount calculated under Section 6(e) of the Agreement, or (ii) Dealer owes to Company, pursuant to Section 12.7 or Section 12.9 of the Equity Definitions, an amount calculated under Section 12.8 of the Equity Definitions, such amount shall be deemed to be zero.

(y)If Company has not obtained Shareholder Approval prior to the Approval Deadline, on the Approval Deadline (x) the First Expiration Date shall be extended by one calendar year, (y) the Warrants shall, as of April 15, 2020 (the " **Original First Expiration Date**"), cease to be to be "European Options" (as such term is defined in the Equity Definitions) and shall become, as of the Original First Expiration Date, "American Options" (as such term is defined in the Equity Definitions) exercisable as of the Original First Expiration Date and (z) the Calculation Agent shall make commercially reasonable conforming amendments to the exercise and settlement terms of the Transaction to reflect the change of the Warrants from European Options to American Options, for the avoidance of doubt, retaining (i) contingencies to exercise that are not an observable market, other than the market for the Company's stock or an observable index, other than an index calculated or measured solely by reference to the Company's own operations, (ii) the commercially reasonable nature of adjustments permitted to the Transaction (such as to consider changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Shares and the ability to maintain a commercially reasonable hedge position in the underlying shares) and (iii) the Company's unilateral right to settle in shares pursuant to 9(k), including pursuant to a Share Termination Alternative as provided under Section 9(j). On each anniversary of the Approval Deadline occurring prior to the final Expiration Date, if Company has not, as of such date, obtained Shareholder Approval, the First Expiration Date shall be further extended by one additional calendar year.

(z)*Adjustments*. For the avoidance of doubt, whenever the Calculation Agent or Determining Party is called upon to make an adjustment pursuant to the terms of this Confirmation or the Equity Definitions to take into account the effect of an event, the Calculation Agent or Determining Party shall make such adjustment by reference to the effect of such event on the Hedging Party, assuming that the Hedging Party maintains a commercially reasonable hedge position.

(aa)*Delivery or Receipt of Cash*. For the avoidance of doubt, other than receipt of the Premium by Company, nothing in this Confirmation shall be interpreted as requiring Company to cash settle the Transaction, except in circumstances where cash settlement is within Company's control (including, without limitation, where Company elects to deliver or receive cash, or where Company has made Private Placement settlement unavailable due to the occurrence of events within its control) or in those circumstances in which holders of Shares would also receive cash.

(bb) *No Reliance*. The Company hereby confirms that it has relied on the advice of its own counsel and other advisors (to the extent it deems appropriate) with respect to any legal, tax, accounting, or regulatory consequences of this Confirmation, that it has not relied on Dealer or its affiliates in any respect in connection therewith, and that it will not hold Dealer or its affiliates accountable for any such consequences.

J.P.Morgan

Please confirm that the foregoing correctly sets forth the terms of our agreement by executing this Confirmation and returning it to EDG Confirmation Group, J.P. Morgan Securities LLC, 277 Park Avenue, 11th Floor, New York, NY 10172-3401, or by fax to **(212) 622 8519**.

Very truly yours,

J.P. Morgan Securities LLC, as agent for JPMorgan Chase Bank, National Association

Re: Additional Warrants

The purpose of this letter agreement (this "**Confirmation**") is to amend and restate, in its entirety, the Additional Warrants Confirmation dated February 13, 2013 between the parties hereto and to confirm the terms and conditions of the Warrants issued by **Molina Healthcare, Inc.** ("**Company**") to **Bank of America, N.A.** ("**Dealer**") as of the Trade Date specified below (the "**Transaction**"). The parties hereto agree and acknowledge that the amendments reflected in this amended and restated Confirmation are non-substantive, clarifying changes made for the avoidance of doubt. This letter agreement constitutes a "Confirmation" as referred to in the ISDA Master Agreement specified below. This Confirmation shall replace any previous agreements and serve as the final documentation for the Transaction.

The definitions and provisions contained in the 2002 ISDA Equity Derivatives Definitions (the "**Equity Definitions**"), as published by the International Swaps and Derivatives Association, Inc. ("**ISDA**"), are incorporated into this Confirmation. In the event of any inconsistency between the Equity Definitions and this Confirmation, this Confirmation shall govern.

Each party is hereby advised, and each such party acknowledges, that the other party has engaged in, or refrained from engaging in, substantial financial transactions and has taken other material actions in reliance upon the parties' entry into the Transaction to which this Confirmation relates on the terms and conditions set forth below.

1. This Confirmation evidences a complete and binding agreement between Dealer and Company as to the terms of the Transaction to which this Confirmation relates. This Confirmation shall supplement, form a part of, and be subject to an agreement in the form of the 2002 ISDA Master Agreement (the "**Agreement**") as if Dealer and Company had executed an agreement in such form (but without any Schedule except for the election of the laws of the State of New York as the governing law (without reference to choice of law doctrine)) on the Trade Date. In the event of any inconsistency between provisions of the Agreement and this Confirmation, this Confirmation will prevail for the purpose of the Transaction to which this Confirmation relates. The parties hereby agree that no transaction other than the Transaction to which this Confirmation relates shall be governed by the Agreement.

2. The Transaction is a Warrant Transaction, which shall be considered a Share Option Transaction for purposes of the Equity Definitions. The terms of the particular Transaction to which this Confirmation relates are as follows:

General Terms.

Trade Date: February 13, 2013

Effective Date:	The third Exchange Business Day immediately prior to the Premium Payment Date
Warrants:	Equity call warrants, each giving the holder the right to purchase a number of Shares equal to the Warrant Entitlement at a price per Share equal to the Strike Price, subject to the terms set forth under the caption "Settlement Terms" below. For the purposes of the Equity Definitions, each reference to a Warrant herein shall be deemed to be a reference to a Call Option.
Warrant Style:	European
Seller:	Company
Buyer:	Dealer
Shares:	The common stock of Company, par value USD 0.001 per Share (Exchange symbol "MOH")
Number of Warrants:	1,152,802. For the avoidance of doubt, the Number of Warrants shall be reduced by any Warrants exercised or deemed exercised hereunder. In no event will the Number of Warrants be less than zero.
Warrant Entitlement:	One Share per Warrant
Maximum Number of Shares:	For any day, 4,394,906 Shares, *minus* the aggregate number of Shares delivered prior to such day pursuant to (i) this Confirmation and (ii) any other substantially similar confirmation for Warrants sold by Company to Dealer with a trade date within 16 days of the Trade Date and with expiration dates the same as the Expiration Dates. Notwithstanding anything to the contrary in the Agreement, this Confirmation or the Equity Definitions, in no event shall the Maximum Number of Shares be subject to adjustment, except for any adjustment pursuant to the terms of this Confirmation and the Equity Definitions in connection with a Potential Adjustment Event (as defined in Section 11.2(e) of the Equity Definitions and without any amendment thereto pursuant to the terms of this Confirmation). Notwithstanding anything to the contrary in the Agreement, this Confirmation or the Equity Definitions, the Maximum Number of Shares shall not be adjusted on account of any event that (x) constitutes a Potential Adjustment Event solely on account of Section 11.2(e)(vii) of the Equity Definitions and (y) is not an event within Company's control.
Strike Price:	USD 53.8475
Premium:	USD 6,415,454
Premium Payment Date:	February 15, 2013
Exchange:	The New York Stock Exchange

Related Exchange(s):	All Exchanges

Procedures for Exercise.

Expiration Time:	The Valuation Time
Expiration Dates:	Each Scheduled Trading Day during the period from, and including, the First Expiration Date to, but excluding, the 160th Scheduled Trading Day following the First Expiration Date shall be an "Expiration Date" for a number of Warrants equal to the Daily Number of Warrants on such date; *provided* that, notwithstanding anything to the contrary in the Equity Definitions, if any such date is a Disrupted Day, the Calculation Agent shall make adjustments, if applicable, to the Daily Number of Warrants or shall reduce such Daily Number of Warrants to zero for which such day shall be an Expiration Date and shall designate a Scheduled Trading Day or a number of Scheduled Trading Days as the Expiration Date(s) for the remaining Daily Number of Warrants or a portion thereof for the originally scheduled Expiration Date; and *provided further* that if such Expiration Date has not occurred pursuant to this clause as of the eighth Scheduled Trading Day following the last scheduled Expiration Date under the Transaction, the Calculation Agent shall have the right to declare such Scheduled Trading Day to be the final Expiration Date and the Calculation Agent shall determine its good faith estimate of the fair market value for the Shares as of the Valuation Time on that eighth Scheduled Trading Day or on any subsequent Scheduled Trading Day, as the Calculation Agent shall determine using commercially reasonable means.
First Expiration Date:	April 15, 2020 (or if such day is not a Scheduled Trading Day, the next following Scheduled Trading Day), subject to Market Disruption Event below.
Daily Number of Warrants:	For any Expiration Date, the Number of Warrants that have not expired or been exercised as of such day, *divided* by the remaining number of Expiration Dates (including such day), rounded down to the nearest whole number, subject to adjustment pursuant to the provisos to "Expiration Dates".
Automatic Exercise:	Applicable; and means that for each Expiration Date, a number of Warrants equal to the Daily Number of Warrants for such Expiration Date will be deemed to be automatically exercised at the Expiration Time on such Expiration Date.
Market Disruption Event:	Section 6.3(a) of the Equity Definitions is hereby amended by replacing clause (ii) in its entirety with "(ii) an Exchange Disruption, or" and inserting immediately following clause (iii) the phrase "; in each case that the Calculation Agent determines is material." Section 6.3(d) of the Equity Definitions is hereby amended by deleting the remainder of the provision following the words "Scheduled Closing Time" in the fourth line thereof.

Valuation Terms.

Valuation Time:	Scheduled Closing Time; *provided* that if the principal trading session is extended, the Calculation Agent shall determine the Valuation Time in good faith using its commercially reasonable discretion.
Valuation Date:	Each Exercise Date.

Settlement Terms.

Settlement Method:	Net Share Settlement.
Net Share Settlement:	On the relevant Settlement Date, Company shall deliver to Dealer a number of Shares equal to the Share Delivery Quantity for such Settlement Date to the account specified herein free of payment through the Clearance System, and Dealer shall be treated as the holder of record of such Shares at the time of delivery of such Shares or, if earlier, at 5:00 p.m. (New York City time) on such Settlement Date, and Company shall pay to Dealer cash in lieu of any fractional Share based on the Settlement Price on the relevant Valuation Date.
Share Delivery Quantity:	For any Settlement Date, a number of Shares, as calculated by the Calculation Agent, equal to the Net Share Settlement Amount for such Settlement Date *divided by* the Settlement Price on the Valuation Date for such Settlement Date; *provided* that in no event shall the Share Delivery Quantity for any Settlement Date exceed the Maximum Number of Shares for such Settlement Date, *minus* the Share Delivery Quantity (as defined in the letter agreement dated February 11, 2013 between Dealer and Company regarding Base Warrants (the "**Base Warrant Confirmation**")), if any, for such Settlement Date.
Net Share Settlement Amount:	For any Settlement Date, an amount equal to the product of (i) the number of Warrants exercised or deemed exercised on the relevant Exercise Date, (ii) the Strike Price Differential for the relevant Valuation Date and (iii) the Warrant Entitlement.
Settlement Price:	For any Valuation Date, the per Share volume-weighted average price as displayed under the heading "Bloomberg VWAP" on Bloomberg page MOH <equity> AQR (or any successor thereto) in respect of the period from the scheduled opening time of the Exchange to the Scheduled Closing Time on such Valuation Date (or if such volume-weighted average price is unavailable, the market value of one Share on such Valuation Date, as determined by the Calculation Agent). Notwithstanding the foregoing, if (i) any Expiration Date is a Disrupted Day and (ii) the Calculation Agent determines that such Expiration Date shall be an Expiration Date for fewer than the Daily Number of Warrants, as described above, then the Settlement Price for the relevant Valuation Date shall be the volume-weighted average price per Share on such Valuation Date on the Exchange, as determined by the Calculation Agent based on such sources as it deems appropriate using a volume-

	weighted methodology, for the portion of such Valuation Date for which the Calculation Agent determines there is no Market Disruption Event.
Settlement Dates:	As determined pursuant to Section 9.4 of the Equity Definitions, subject to Section 9(k)(i) hereof.
Other Applicable Provisions:	The provisions of Sections 9.1(c), 9.8, 9.9, 9.11 and 9.12 of the Equity Definitions will be applicable, except that all references in such provisions to "Physically-settled" shall be read as references to "Net Share Settled." "Net Share Settled" in relation to any Warrant means that Net Share Settlement is applicable to that Warrant.
Representation and Agreement:	Notwithstanding Section 9.11 of the Equity Definitions, the parties acknowledge that any Shares delivered to Dealer may be, upon delivery, subject to restrictions and limitations arising from Company's status as issuer of the Shares under applicable securities laws.

3. <u>Additional Terms applicable to the Transaction</u>.

Adjustments applicable to the Transaction:

Method of Adjustment:	Calculation Agent Adjustment. For the avoidance of doubt, in making any adjustments under the Equity Definitions, the Calculation Agent may make adjustments, if any, to any one or more of the Strike Price, the Number of Warrants, the Daily Number of Warrants and the Warrant Entitlement. Notwithstanding the foregoing, any cash dividends or distributions on the Shares, whether or not extraordinary, shall be governed by Section 9(f) of this Confirmation in lieu of Article 10 or Section 11.2(c) of the Equity Definitions.

Extraordinary Events applicable to the Transaction:

New Shares:	Section 12.1(i) of the Equity Definitions is hereby amended (a) by deleting the text in clause (i) thereof in its entirety (including the word "and" following clause (i)) and replacing it with the phrase "publicly quoted, traded or listed (or whose related depositary receipts are publicly quoted, traded or listed) on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors)" and (b) by inserting immediately prior to the period the phrase "and (iii) of an entity or person that is a corporation organized under the laws of the United States, any State thereof or the District of Columbia that also becomes Company under the Transaction following such Merger Event or Tender Offer".

Consequence of Merger Events:

Merger Event:	Applicable; *provided* that if an event occurs that constitutes both a Merger Event under Section 12.1(b) of the Equity Definitions and an Additional Termination Event under Section 9(h)(ii)(B) of this Confirmation, Dealer may elect, in its commercially reasonable judgment, whether the

	provisions of Section 12.2 of the Equity Definitions or Section 9(h)(ii)(B) will apply.
Share-for-Share:	Modified Calculation Agent Adjustment
Share-for-Other:	Cancellation and Payment (Calculation Agent Determination)
Share-for-Combined:	Cancellation and Payment (Calculation Agent Determination); *provided* that Dealer may elect, in its commercially reasonable judgment, Component Adjustment (Calculation Agent Determination) for all or any portion of the Transaction.
Consequence of Tender Offers:	
Tender Offer:	Applicable; *provided* that if an event occurs that constitutes both a Tender Offer under Section 12.1(d) of the Equity Definitions and Additional Termination Event under Section 9(h)(ii)(A) of this Confirmation, Dealer may elect, in its commercially reasonable judgment, whether the provisions of Section 12.3 of the Equity Definitions or Section 9(h)(ii)(A) will apply.
Share-for-Share:	Modified Calculation Agent Adjustment
Share-for-Other:	Modified Calculation Agent Adjustment
Share-for-Combined:	Modified Calculation Agent Adjustment
Announcement Event:	If an Announcement Date occurs in respect of a Merger Event (for the avoidance of doubt, determined without regard to the language in the definition of "Merger Event" following the definition of "Reverse Merger" therein) or Tender Offer (such occurrence, an "**Announcement Event**"), then on the earliest of the Expiration Date, Early Termination Date or other date of cancellation (the "**Announcement Event Adjustment Date**") in respect of each Warrant, the Calculation Agent will determine the economic effect on such Warrant of the Announcement Event (regardless of whether the Announcement Event actually results in a Merger Event or Tender Offer, and taking into account such factors as the Calculation Agent may determine, including, without limitation, changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Shares or the Transaction whether prior to or after the Announcement Event or for any period of time, including, without limitation, the period from the Announcement Event to the relevant Announcement Event Adjustment Date). If the Calculation Agent determines that such economic effect on any Warrant is material, then on the Announcement Event Adjustment Date for such Warrant, the Calculation Agent may make such adjustment to the exercise, settlement, payment or any other terms of such Warrant as the Calculation Agent determines appropriate to account for such economic effect, which adjustment shall be effective immediately prior to the

exercise, termination or cancellation of such Warrant, as the case may be.

Announcement Date:	The definition of "Announcement Date" in Section 12.1 of the Equity Definitions is hereby amended by (i) replacing the words "a firm" with the word "any" in the second and fourth lines thereof, (ii) replacing the word "leads to the" with the words ", if completed, would lead to a" in the third and the fifth lines thereof, (iii) replacing the words "voting shares" with the word "Shares" in the fifth line thereof, and (iv) inserting the words "by any entity" after the word "announcement" in the second and the fourth lines thereof.
Nationalization, Insolvency or Delisting:	Cancellation and Payment (Calculation Agent Determination); *provided* that, in addition to the provisions of Section 12.6(a)(iii) of the Equity Definitions, it will also constitute a Delisting if the Exchange is located in the United States and the Shares are not immediately re-listed, re-traded or re-quoted on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors); if the Shares are immediately re-listed, re-traded or re-quoted on any of the New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or their respective successors), such exchange or quotation system shall thereafter be deemed to be the Exchange.
Additional Disruption Events:	
Change in Law:	Applicable; *provided* that Section 12.9(a)(ii) of the Equity Definitions is hereby amended by (i) replacing the word "Shares" with the phrase "Hedge Positions" in clause (X) thereof and (ii) inserting the parenthetical "(including, for the avoidance of doubt and without limitation, adoption, effectiveness or promulgation of new regulations authorized or mandated by existing statute)" at the end of clause (A) thereof.
Failure to Deliver:	Not Applicable
Insolvency Filing:	Applicable
Hedging Disruption:	Applicable; *provided* that:

(i) Section 12.9(a)(v) of the Equity Definitions is hereby amended by (a) inserting the following words at the end of clause (A) thereof: "in the manner contemplated by the Hedging Party on the Trade Date" and (b) inserting the following two phrases at the end of such Section:

"For the avoidance of doubt, the term "equity price risk" shall be deemed to include, but shall not be limited to, stock price and volatility risk. And, for the further avoidance of doubt, any such transactions or assets referred to in phrases (A) or (B) above must be available on commercially reasonable pricing terms."; and

(ii) Section 12.9(b)(iii) of the Equity Definitions is hereby amended by inserting in the third line thereof, after the words "to terminate the Transaction", the words "or a portion of the Transaction affected by such Hedging Disruption".

Increased Cost of Hedging:	Applicable
Loss of Stock Borrow:	Applicable
Maximum Stock Loan Rate:	100 basis points
Increased Cost of Stock Borrow:	Applicable
Initial Stock Loan Rate:	25 basis points
Hedging Party:	For all applicable Additional Disruption Events, Dealer.
Determining Party:	For all applicable Extraordinary Events, Dealer.
Non-Reliance:	Applicable
Agreements and Acknowledgments Regarding Hedging Activities:	Applicable
Additional Acknowledgments:	Applicable

200 Oceangate, Suite 100
Long Beach, California 90802
Attention: General Counsel
Telephone No.: (562) 435-3666
Facsimile No.: (916) 646-4572

(b)Address for notices or communications to Dealer:

To: Bank of America, N.A.
c/o Merrill Lynch, Pierce, Fenner & Smith Incorporated
One Bryant Park
New York, NY 10036
Attention: John Servidio
Telephone: 646-855-7127
Facsimile: 704-208-2869

8. Representations and Warranties of Company.

Each of the representations and warranties of Company set forth in Section 3 of the Purchase Agreement (the "**Purchase Agreement**"), dated as of February 11, 2013, among Company and J.P. Morgan Securities LLC and Merrill Lynch, Pierce, Fenner & Smith Incorporated, as representatives of the Initial Purchasers party thereto (the "**Initial Purchasers**"), other than the representations set forth in Section 3(o), Section 3(r) and Section 3(s) of the Purchase Agreement, in each case, as such representations relate to the Transaction, are true and correct and are hereby deemed to be repeated to Dealer as if set forth herein. Company hereby further represents and warrants to Dealer on the Trade Date, the date hereof, on and as of the Premium Payment Date and, in the case of the representations in Section 8(d), at all times until termination of the Transaction, that:

(a)Company has all necessary corporate power and authority to execute, deliver and perform its obligations in respect of the Transaction; such execution, delivery and performance have been duly authorized by all necessary corporate action on Company's part; and this Confirmation has been duly and validly executed and delivered by Company and constitutes its valid and binding obligation, enforceable against Company in accordance with its terms, subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and similar laws affecting creditors' rights and remedies generally, and subject, as to enforceability, to general principles of equity, including principles of commercial reasonableness, good faith and fair dealing (regardless of whether enforcement is sought in a proceeding at law or in equity) and except that rights to indemnification and contribution hereunder may be limited by federal or state securities laws or public policy relating thereto.

(b)Neither the execution and delivery of this Confirmation nor the incurrence or performance of obligations of Company hereunder will conflict with or result in a breach of the certificate of incorporation or by-laws (or any equivalent documents) of Company, or any applicable law or regulation, or any order, writ, injunction or decree of any court or governmental authority or agency, or any agreement or instrument to which Company or any of its subsidiaries is a party or by which Company or any of its subsidiaries is bound or to which Company or any of its subsidiaries is subject, or constitute a default under, or result in the creation of any lien under, any such agreement or instrument.

(c)No consent, approval, authorization, or order of, or filing with, any governmental agency or body or any court is required in connection with the execution, delivery or performance by Company of this Confirmation, except such as have been obtained or made and such as may be required under the Securities Act of 1933, as amended (the "**Securities Act**") or state securities laws.

(d)A number of Shares equal to the Maximum Number of Shares (the "**Warrant Shares**") have been reserved for issuance by all required corporate action of Company. The Warrant Shares have been

duly authorized and, when delivered against payment therefor (which may include Net Share Settlement in lieu of cash) and otherwise as contemplated by the terms of the Warrants following the exercise of the Warrants in accordance with the terms and conditions of the Warrants, will be validly issued, fully-paid and non-assessable, and the issuance of the Warrant Shares will not be subject to any preemptive or similar rights.

(e) Company is not and, after consummation of the transactions contemplated hereby, will not be required to register as an "investment company" as such term is defined in the Investment Company Act of 1940, as amended.

(f) Company is an "eligible contract participant" (as such term is defined in Section 1a(18) of the Commodity Exchange Act, as amended, other than a person that is an eligible contract participant under Section 1a(18)(C) of the Commodity Exchange Act).

(g) Company and each of its affiliates is not, on the date hereof, in possession of any material non-public information with respect to Company.

(h) No state or local (including any non-U.S. jurisdiction's) law, rule, regulation or regulatory order applicable to the Shares would give rise to any reporting, consent, registration or other requirement (including without limitation a requirement to obtain prior approval from any person or entity) as a result of Dealer or its affiliates owning or holding (however defined) Shares.

(i) Company (A) is capable of evaluating investment risks independently, both in general and with regard to all transactions and investment strategies involving a security or securities; (B) will exercise independent judgment in evaluating the recommendations of any broker-dealer or its associated persons, unless it has otherwise notified the broker-dealer in writing; and (C) has total assets of at least $50 million.

9. Other Provisions.

(a) *Opinions*. Company shall deliver to Dealer an opinion of counsel, dated as of the Trade Date, with respect to the matters set forth in Sections 8(a) through (d) of this Confirmation. Delivery of such opinion to Dealer shall be a condition precedent for the purpose of Section 2(a)(iii) of the Agreement with respect to each obligation of Dealer under Section 2(a)(i) of the Agreement.

(b) *Repurchase Notices*. Company shall, on any day on which Company effects any repurchase of Shares, promptly give Dealer a written notice of such repurchase (a "**Repurchase Notice**") on such day if following such repurchase, the number of outstanding Shares on such day, subject to any adjustments provided herein, is (i) less than 45,295,973 (in the case of the first such notice) or (ii) thereafter more than 1,390,754 less than the number of Shares included in the immediately preceding Repurchase Notice. Company agrees to indemnify and hold harmless Dealer and its affiliates and their respective officers, directors, employees, affiliates, advisors, agents and controlling persons (each, an "**Indemnified Person**") from and against any and all losses (including losses relating to Dealer's hedging activities as a consequence of becoming, or of the risk of becoming, a Section 16 "insider", including without limitation, any forbearance from hedging activities or cessation of hedging activities and any losses in connection therewith with respect to the Transaction), claims, damages, judgments, liabilities and expenses (including reasonable attorney's fees), joint or several, which an Indemnified Person actually may become subject to, as a result of Company's failure to provide Dealer with a Repurchase Notice on the day and in the manner specified in this paragraph, and to reimburse, within 30 days, upon written request, each of such Indemnified Persons for any reasonable legal or other expenses incurred in connection with investigating, preparing for, providing testimony or other evidence in connection with or defending any of the foregoing. If any suit, action, proceeding (including any governmental or regulatory investigation), claim or demand shall be brought or asserted against the Indemnified Person, such Indemnified Person shall promptly notify Company in writing, and Company, upon request of the Indemnified Person, shall retain counsel reasonably satisfactory to the Indemnified Person to represent the Indemnified Person and any others Company may designate in such proceeding and shall pay the fees and expenses of such counsel related to such proceeding. Company shall not be liable for any settlement of any proceeding effected without its written consent,

but if settled with such consent or if there be a final judgment for the plaintiff, Company agrees to indemnify any Indemnified Person from and against any loss or liability by reason of such settlement or judgment. Company shall not, without the prior written consent of the Indemnified Person, effect any settlement of any pending or threatened proceeding in respect of which any Indemnified Person is or could have been a party and indemnity could have been sought hereunder by such Indemnified Person, unless such settlement includes an unconditional release of such Indemnified Person from all liability on claims that are the subject matter of such proceeding on terms reasonably satisfactory to such Indemnified Person. If the indemnification provided for in this paragraph is unavailable to an Indemnified Person or insufficient in respect of any losses, claims, damages or liabilities referred to therein, then Company under such paragraph, in lieu of indemnifying such Indemnified Person thereunder, shall contribute to the amount paid or payable by such Indemnified Person as a result of such losses, claims, damages or liabilities. The remedies provided for in this paragraph are not exclusive and shall not limit any rights or remedies which may otherwise be available to any Indemnified Person at law or in equity. The indemnity and contribution agreements contained in this paragraph shall remain operative and in full force and effect regardless of the termination of the Transaction.

(c) *Regulation M*. Company is not on the Trade Date engaged in a distribution, as such term is used in Regulation M under the Securities Exchange Act of 1934, as amended (the "**Exchange Act**"), of any securities of Company, other than a distribution meeting the requirements of the exception set forth in Rules 101(b)(10) and 102(b)(7) of Regulation M. Company shall not, until the second Scheduled Trading Day immediately following the Effective Date, engage in any such distribution.

(d) *No Manipulation*. Company is not entering into the Transaction to create actual or apparent trading activity in the Shares (or any security convertible into or exchangeable for the Shares) or to raise or depress or otherwise manipulate the price of the Shares (or any security convertible into or exchangeable for the Shares) or otherwise in violation of the Exchange Act.

(e) *Transfer or Assignment*. Company may not transfer any of its rights or obligations under the Transaction without the prior written consent of Dealer. Dealer may, without Company's consent, transfer or assign all or any part of its rights or obligations under the Transaction to any third party. If at any time at which (A) the Section 16 Percentage exceeds 7.5%, (B) the Warrant Equity Percentage exceeds 16.3%, or (C) the Share Amount exceeds the Applicable Share Limit (if any applies) (any such condition described in clauses (A), (B) or (C), an "**Excess Ownership Position**"), Dealer is unable after using its commercially reasonable efforts to effect a transfer or assignment of Warrants to a third party on pricing terms reasonably acceptable to Dealer and within a time period reasonably acceptable to Dealer such that no Excess Ownership Position exists, then Dealer may designate any Exchange Business Day as an Early Termination Date with respect to a portion of the Transaction (the "**Terminated Portion**"), such that following such partial termination no Excess Ownership Position exists. In the event that Dealer so designates an Early Termination Date with respect to a Terminated Portion, a payment shall be made pursuant to Section 6 of the Agreement as if (1) an Early Termination Date had been designated in respect of a Transaction having terms identical to the Transaction and a Number of Warrants equal to the number of Warrants underlying the Terminated Portion, (2) Company were the sole Affected Party with respect to such partial termination and (3) the Terminated Portion were the sole Affected Transaction (and, for the avoidance of doubt, the provisions of Section 9(j) shall apply to any amount that is payable by Company to Dealer pursuant to this sentence as if Company was not the Affected Party). The "**Section 16 Percentage**" as of any day is the fraction, expressed as a percentage, (A) the numerator of which is the number of Shares that Dealer and each person subject to aggregation of Shares with Dealer under Section 13 or Section 16 of the Exchange Act and rules promulgated thereunder directly or indirectly beneficially own (as defined under Section 13 or Section 16 of the Exchange Act and rules promulgated thereunder) and (B) the denominator of which is the number of Shares outstanding. The "**Warrant Equity Percentage**" as of any day is the fraction, expressed as a percentage, (A) the numerator of which is the sum of (1) the product of the Number of Warrants and the Warrant Entitlement and (2) the aggregate number of Shares underlying any other warrants purchased by Dealer from Company, and (B) the denominator of which is the number of Shares outstanding. The "**Share Amount**" as of any day is the number of Shares that Dealer and any person whose ownership position would be aggregated

with that of Dealer (Dealer or any such person, a "**Dealer Person**") under any law, rule, regulation, regulatory order or organizational documents or contracts of Company that are, in each case, applicable to ownership of Shares ("**Applicable Restrictions**"), owns, beneficially owns, constructively owns, controls, holds the power to vote or otherwise meets a relevant definition of ownership under any Applicable Restriction, as determined by Dealer in its reasonable discretion. The "**Applicable Share Limit**" means a number of Shares equal to (A) the minimum number of Shares that could give rise to reporting or registration obligations or other requirements (including obtaining prior approval from any person or entity) of a Dealer Person, or could result in an adverse effect on a Dealer Person, under any Applicable Restriction, as determined by Dealer in its reasonable discretion, *minus* (B) 1% of the number of Shares outstanding. Notwithstanding any other provision in this Confirmation to the contrary requiring or allowing Dealer to purchase, sell, receive or deliver any Shares or other securities, or to make or receive any payment in cash, to or from Company, Dealer may designate any of its affiliates to purchase, sell, receive or deliver such Shares or other securities, or make or receive such payment in cash, and otherwise to perform Dealer's obligations in respect of the Transaction and any such designee may assume such obligations. Dealer shall be discharged of its obligations to Company to the extent of any such performance.

(f) *Dividends*. If at any time during the period from and including the Effective Date, to and including the last Expiration Date, an ex-dividend date for a cash dividend occurs with respect to the Shares (an "**Ex-Dividend Date**"), then the Calculation Agent will adjust any of the Strike Price, Number of Warrants, Daily Number of Warrants and/or any other variable relevant to the exercise, settlement or payment of the Transaction to preserve the fair value of the Warrants after taking into account such dividend.

(g) *Designation by Dealer*. Notwithstanding any other provision in this Confirmation to the contrary requiring or allowing Dealer to purchase, sell, receive or deliver any Shares or other securities to or from Company, Dealer may designate any of its affiliates to purchase, sell, receive or deliver such shares or other securities and otherwise to perform Dealer obligations in respect of the Transaction and any such designee may assume such obligations. Dealer shall be discharged of its obligations to Company to the extent of any such performance.

(h) *Additional Provisions*.

(i) Amendments to the Equity Definitions:

(A) Section 11.2(a) of the Equity Definitions is hereby amended by deleting the words "a diluting or concentrative" and replacing them with the words "an"; and adding the phrase "or Warrants" at the end of the sentence.

(B) Section 11.2(c) of the Equity Definitions is hereby amended by (w) replacing the words "a diluting or concentrative" with "an" in the fifth line thereof, (x) adding the phrase "or Warrants" after the words "the relevant Shares" in the same sentence, (y) deleting the words "diluting or concentrative" in the sixth to last line thereof and (z) deleting the phrase "(provided that no adjustments will be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to the relevant Shares)" and replacing it with the phrase "(and, for the avoidance of doubt, adjustments may be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to the relevant Shares)."

(C) Section 11.2(e)(vii) of the Equity Definitions is hereby amended by deleting the words "a diluting or concentrative" and replacing them with the word "a material"; and adding the phrase "or Warrants" at the end of the sentence.

(D) Section 12.6(a)(ii) of the Equity Definitions is hereby amended by (1) deleting from the fourth line thereof the word "or" after the word "official" and inserting a comma therefor, and (2) deleting the semi-colon at the end of subsection (B) thereof and inserting the following words therefor "or (C) at Dealer's option, the occurrence

of any of the events specified in Section 5(a)(vii) (1) through (9) of the ISDA Master Agreement with respect to that Issuer."

(E) Section 12.9(b)(iv) of the Equity Definitions is hereby amended by:

(x) deleting (1) subsection (A) in its entirety, (2) the phrase "or (B)" following subsection (A) and (3) the phrase "in each case" in subsection (B); and

(y) replacing the phrase "neither the Non-Hedging Party nor the Lending Party lends Shares" with the phrase "such Lending Party does not lend Shares" in the penultimate sentence.

(F) Section 12.9(b)(v) of the Equity Definitions is hereby amended by:

(x) adding the word "or" immediately before subsection "(B)" and deleting the comma at the end of subsection (A); and

(y) (1) deleting subsection (C) in its entirety, (2) deleting the word "or" immediately preceding subsection (C), (3) deleting the penultimate sentence in its entirety and replacing it with the sentence "The Hedging Party will determine the Cancellation Amount payable by one party to the other." and (4) deleting clause (X) in the final sentence.

(ii) Notwithstanding anything to the contrary in this Confirmation, upon the occurrence of one of the following events, with respect to the Transaction, (1) Dealer shall have the right to designate such event an Additional Termination Event and designate an Early Termination Date pursuant to Section 6(b) of the Agreement, (2) Company shall be deemed the sole Affected Party with respect to such Additional Termination Event and (3) the Transaction, or, at the election of Dealer in its sole discretion, any portion of the Transaction, shall be deemed the sole Affected Transaction; *provided* that if Dealer so designates an Early Termination Date with respect to a portion of the Transaction, (a) a payment shall be made pursuant to Section 6 of the Agreement as if an Early Termination Date had been designated in respect of a Transaction having terms identical to the Transaction and a Number of Warrants equal to the number of Warrants included in the terminated portion of the Transaction, and (b) for the avoidance of doubt, the Transaction shall remain in full force and effect except that the Number of Warrants shall be reduced by the number of Warrants included in such terminated portion:

(A) A "person" or "group" within the meaning of Section 13(d) of the Exchange Act, other than Company, its subsidiaries or its and their employee benefit plans, files a Schedule TO or any schedule, form or report under the Exchange Act disclosing that such person or group has become the direct or indirect "beneficial owner," as defined in Rule 13d-3 under the Exchange Act, of the common equity of Company representing more than 50% of the voting power of such common equity.

(B) Consummation of (I) any recapitalization, reclassification or change of the Shares (other than changes resulting from a subdivision or combination) as a result of which the Shares would be converted into, or exchanged for, stock, other securities, other property or assets or (II) any share exchange, consolidation or merger of Company pursuant to which the Shares will be converted into cash, securities or other property or (III) any sale, lease or other transfer in one transaction or a series of transactions of all or substantially all of the consolidated assets of Company and its subsidiaries, taken as a whole, to any person other than one of Company's subsidiaries. Notwithstanding the foregoing, any transaction or transactions set forth in this clause (B) shall not constitute an Additional Termination Event if (x) at least 90% of the consideration received or to be received by holders of the Shares, excluding cash payments for fractional Shares, in connection with such transaction or transactions consists of shares of common stock that are listed or quoted on any

of The New York Stock Exchange, The NASDAQ Global Select Market or The NASDAQ Global Market (or any of their respective successors) or will be so listed or quoted when issued or exchanged in connection with such transaction or transactions, and (y) as a result of such transaction or transactions, the Shares will consist of such consideration, excluding cash payments for fractional Shares.

(C) Company's shareholders approve any plan or proposal for the liquidation or dissolution of Company.

(D) Default by Company or any of its subsidiaries with respect to any mortgage, agreement or other instrument under which there may be outstanding, or by which there may be secured or evidenced, any indebtedness for money borrowed in excess of $15 million in the aggregate of Company and/or any such subsidiary, whether such indebtedness now exists or shall hereafter be created (i) resulting in such indebtedness becoming or being declared due and payable or (ii) constituting a failure to pay the principal or interest of any such debt when due and payable at its stated maturity, upon required repurchase, upon declaration of acceleration or otherwise.

(E) A final judgment for the payment of $15 million or more (excluding any amounts covered by insurance) rendered against Company or any of its subsidiaries, which judgment is not discharged or stayed within 60 days after (I) the date on which the right to appeal thereof has expired if no such appeal has commenced, or (II) the date on which all rights to appeal have been extinguished.

(F) Dealer, despite using commercially reasonable efforts, is unable or reasonably determines that it is impractical or illegal, to hedge its exposure with respect to the Transaction in the public market without registration under the Securities Act or as a result of any legal, regulatory or self-regulatory requirements or related policies and procedures (whether or not such requirements, policies or procedures are imposed by law or have been voluntarily adopted by Dealer).

(G) On any day during the period from and including the Trade Date, to and including the final Expiration Date, (I) the Notional Unwind Shares (as defined below) as of such day exceeds a number of Shares equal to 60% of the Maximum Number of Shares, or (II) Company makes a public announcement of any transaction or event that, in the reasonable opinion of Dealer would, upon consummation of such transaction or upon the occurrence of such event, as applicable, and after giving effect to any applicable adjustments hereunder, cause the Notional Unwind Shares immediately following the consummation of such transaction or the occurrence of such event to exceed a number of Shares equal to 60% of the Maximum Number of Shares. The "**Notional Unwind Shares**" as of any day is a number of Shares equal to (1) the amount that would be payable pursuant to Section 6 of the Agreement (determined as of such day as if an Early Termination Date had been designated in respect of the Transaction and as if Company were the sole Affected Party and the Transaction were the sole Affected Transaction), *divided by* (2) the Settlement Price (determined as if such day were a Valuation Date). For the purposes of this clause (G), the Share Delivery Quantity shall be deemed to include the "Share Delivery Quantity" (as defined in the Base Warrant Confirmation) and the terms set forth above for determining the Share Delivery Quantity shall apply mutatis mutandis for the purposes of determining the "Share Delivery Quantity" under the Base Warrant Confirmation.

(H) If Company has not obtained Shareholder Approval prior to February 11, 2014 (the "**Approval Deadline**"). For the avoidance of doubt, if Company has not obtained Shareholder Approval prior to the Approval Deadline, Dealer shall have right to designate an Early Termination Date in connection with the Additional Termination

Event set forth in this clause (H) on any day from, and including, the Approval Deadline to, and including, the earlier of (x) the date on which Company obtains Shareholder Approval and (y) the final Expiration Date.

(i) *No Collateral or Setoff*. Notwithstanding any provision of the Agreement or any other agreement between the parties to the contrary, the obligations of Company hereunder are not secured by any collateral. Obligations under the Transaction shall not be set off by Company against any other obligations of the parties, whether arising under the Agreement, this Confirmation, under any other agreement between the parties hereto, by operation of law or otherwise. Any provision in the Agreement with respect to the satisfaction of Company's payment obligations to the extent of Dealer's payment obligations to Company in the same currency and in the same Transaction (including, without limitation Section 2(c) thereof) shall not apply to Company and, for the avoidance of doubt, Company shall fully satisfy such payment obligations notwithstanding any payment obligation to Company by Dealer in the same currency and in the same Transaction. In calculating any amounts under Section 6(e) of the Agreement, notwithstanding anything to the contrary in the Agreement, (1) separate amounts shall be calculated as set forth in such Section 6(e) with respect to (a) the Transaction and (b) all other Transactions, and (2) such separate amounts shall be payable pursuant to Section 6(d)(ii) of the Agreement. For the avoidance of doubt and notwithstanding anything to the contrary provided in this Section 9(i), in the event of bankruptcy or liquidation of either Company or Dealer, neither party shall have the right to set off any obligation that it may have to the other party under the Transaction against any obligation such other party may have to it, whether arising under the Agreement, this Confirmation or any other agreement between the parties hereto, by operation of law or otherwise.

(j) *Alternative Calculations and Payment on Early Termination and on Certain Extraordinary Events*.

(i) If, in respect of the Transaction, an amount is payable by Company to Dealer, (A) pursuant to Section 12.7 or Section 12.9 of the Equity Definitions or (B) pursuant to Section 6(d)(ii) of the Agreement (any such amount, a "**Payment Obligation**"), Company shall satisfy the Payment Obligation by the Share Termination Alternative (as defined below), unless (a) Company gives irrevocable telephonic notice to Dealer, confirmed in writing within one Scheduled Trading Day, no later than 12:00 p.m. (New York City time) on the Merger Date, Tender Offer Date, Announcement Date (in the case of a Nationalization, Insolvency or Delisting), Early Termination Date or date of cancellation, as applicable, of its election that the Share Termination Alternative shall not apply, (b) Company remakes the representation set forth in Section 8(g) as of the date of such election and (c) Dealer agrees, in its sole discretion, to such election, in which case the provisions of Section 12.7 or Section 12.9 of the Equity Definitions, or the provisions of Section 6(d)(ii) of the Agreement, as the case may be, shall apply.

Share Termination Alternative:	If applicable, Company shall deliver to Dealer the Share Termination Delivery Property on the date (the "**Share Termination Payment Date**") on which the Payment Obligation would otherwise be due pursuant to Section 12.7 or Section 12.9 of the Equity Definitions or Section 6(d)(ii) of the Agreement, as applicable, subject to Section 9(k)(i) below, in satisfaction, subject to Section 9(k)(ii) below, of the relevant Payment Obligation, in the manner reasonably requested by Dealer free of payment.
Share Termination Delivery Property:	A number of Share Termination Delivery Units, as calculated by the Calculation Agent, equal to the relevant Payment Obligation *divided by* the Share Termination Unit Price. The Calculation Agent shall adjust the amount of Share Termination Delivery

	Property by replacing any fractional portion of a security therein with an amount of cash equal to the value of such fractional security based on the values used to calculate the Share Termination Unit Price (without giving effect to any discount pursuant to Section 9(k)(i)).
Share Termination Unit Price:	The value of property contained in one Share Termination Delivery Unit on the date such Share Termination Delivery Units are to be delivered as Share Termination Delivery Property, as determined by the Calculation Agent in its good faith discretion by commercially reasonable means. In the case of a Private Placement of Share Termination Delivery Units that are Restricted Shares (as defined below), as set forth in Section 9(k)(i) below, the Share Termination Unit Price shall be determined by the discounted price applicable to such Share Termination Delivery Units. In the case of a Registration Settlement of Share Termination Delivery Units that are Restricted Shares (as defined below) as set forth in Section 9(k)(ii) below, notwithstanding the foregoing, the Share Termination Unit Price shall be the Settlement Price on the Merger Date, Tender Offer Date, Announcement Date (in the case of a Nationalization, Insolvency or Delisting), Early Termination Date or date of cancellation, as applicable. The Calculation Agent shall notify Company of the Share Termination Unit Price at the time of notification of such Payment Obligation to Company or, if applicable, at the time the discounted price applicable to the relevant Share Termination Units is determined pursuant to Section 9(k)(i).
Share Termination Delivery Unit:	One Share or, if the Shares have changed into cash or any other property or the right to receive cash or any other property as the result of a Nationalization, Insolvency or Merger Event (any such cash or other property, the "**Exchange Property**"), a unit consisting of the type and amount of Exchange Property received by a holder of one Share (without consideration of any requirement to pay cash or other consideration in lieu of fractional amounts of any securities) in such Nationalization, Insolvency or Merger Event. If such Nationalization, Insolvency or Merger Event involves a choice of Exchange Property to be received by holders, such holder shall be deemed to have elected to receive the maximum possible amount of cash.
Failure to Deliver:	Inapplicable
Other applicable provisions:	If Share Termination Alternative is applicable, the provisions of Sections 9.8, 9.9, 9.11 and 9.12 (as modified above) of the Equity Definitions will be applicable, except that all references in such provisions to "Physically-settled" shall be read as references to "Share Termination Settled" and all references to "Shares" shall be read as references to "Share

Termination Delivery Units". "Share Termination Settled" in relation to the Transaction means that the Share Termination Alternative is applicable to the Transaction.

(ii) Notwithstanding anything to the contrary in this Confirmation, any Payment Obligation under this Confirmation shall, for all purposes, be calculated as if the Maximum Number of Shares were equal to two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2) but any deliveries under Section 9(j)(i) shall be limited to the Maximum Number of Shares as defined in Section 2 hereof. In the event Company shall not have delivered to Dealer the full number of Shares or Restricted Shares otherwise deliverable by Company to Dealer pursuant to the terms of the Transaction because Company has not obtained shareholder approval pursuant to Section 9(q) for the Maximum Number of Shares to equal two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2) (such deficit, the "**Approval Deficit Shares**"), Company shall be continually obligated to deliver, from time to time, Shares or Restricted Shares, as the case may be, to Dealer until the full number of Approval Deficit Shares have been delivered pursuant to this Section 9(j)(ii), when, and to the extent that the Company obtains shareholder approval; *provided* that in no event shall Company deliver any Shares or Restricted Shares to Dealer pursuant to this Section 9(j)(ii) to the extent that such delivery would cause the aggregate number of Shares and Restricted Shares delivered to Dealer to exceed the Maximum Number of Shares as so increased pursuant to Section 9(q).

(k) *Registration/Private Placement Procedures*. If, in the reasonable opinion of Dealer, following any delivery of Shares or Share Termination Delivery Property to Dealer hereunder, such Shares or Share Termination Delivery Property would be in the hands of Dealer subject to any applicable restrictions with respect to any registration or qualification requirement or prospectus delivery requirement for such Shares or Share Termination Delivery Property pursuant to any applicable federal or state securities law (including, without limitation, any such requirement arising under Section 5 of the Securities Act as a result of such Shares or Share Termination Delivery Property being "restricted securities", as such term is defined in Rule 144 under the Securities Act, or as a result of the sale of such Shares or Share Termination Delivery Property being subject to paragraph (c) of Rule 145 under the Securities Act) (such Shares or Share Termination Delivery Property, "**Restricted Shares**"), then delivery of such Restricted Shares shall be effected pursuant to either clause (i) or (ii) below at the election of Company, unless Dealer waives the need for registration/private placement procedures set forth in (i) and (ii) below. Notwithstanding the foregoing, solely in respect of any Daily Number of Warrants exercised or deemed exercised on any Expiration Date, Company shall elect, prior to the first Settlement Date for the first applicable Expiration Date, a Private Placement Settlement or Registration Settlement for all deliveries of Restricted Shares for all such Expiration Dates which election shall be applicable to all remaining Settlement Dates for such Warrants and the procedures in clause (i) or clause (ii) below shall apply for all such delivered Restricted Shares on an aggregate basis commencing after the final Settlement Date for such Warrants. The Calculation Agent shall make reasonable adjustments to settlement terms and provisions under this Confirmation to reflect a single Private Placement or Registration Settlement for such aggregate Restricted Shares delivered hereunder.

(i) If Company elects to settle the Transaction pursuant to this clause (i) (a "**Private Placement Settlement**"), then delivery of Restricted Shares by Company shall be effected in customary private placement procedures with respect to such Restricted Shares reasonably acceptable to Dealer; *provided* that Company may not elect a Private Placement Settlement if, on the date of its election, it has taken, or caused to be taken, any action that would make unavailable either the exemption pursuant to Section 4(2) of the Securities Act for the sale by Company to Dealer (or any affiliate designated by Dealer) of the Restricted Shares or the exemption pursuant to Section 4(1) or Section 4(3) of the Securities Act for resales of the Restricted

Shares by Dealer (or any such affiliate of Dealer). The Private Placement Settlement of such Restricted Shares shall include customary representations, covenants, blue sky and other governmental filings and/or registrations, indemnities to Dealer, due diligence rights (for Dealer or any designated buyer of the Restricted Shares by Dealer), opinions and certificates, and such other documentation as is customary for private placement agreements of similar size, all reasonably acceptable to Dealer. In the case of a Private Placement Settlement, Dealer shall determine the appropriate discount to the Share Termination Unit Price (in the case of settlement of Share Termination Delivery Units pursuant to Section 9(j) above) or any Settlement Price (in the case of settlement of Shares pursuant to Section 2 above) applicable to such Restricted Shares in a commercially reasonable manner and appropriately adjust the number of such Restricted Shares to be delivered to Dealer hereunder, which discount shall only take into account the illiquidity resulting from the fact that the Restricted Shares will not be registered for resale and any commercially reasonable fees and expenses of Dealer (and any affiliate thereof) in connection with such resale. Notwithstanding anything to the contrary in the Agreement or this Confirmation, the date of delivery of such Restricted Shares shall be the Exchange Business Day following notice by Dealer to Company, of such applicable discount and the number of Restricted Shares to be delivered pursuant to this clause (i). For the avoidance of doubt, delivery of Restricted Shares shall be due as set forth in the previous sentence and not be due on the Share Termination Payment Date (in the case of settlement of Share Termination Delivery Units pursuant to Section 9(j) above) or on the Settlement Date for such Restricted Shares (in the case of settlement in Shares pursuant to Section 2 above).

(ii) If Company elects to settle the Transaction pursuant to this clause (ii) (a "**Registration Settlement**"), then Company shall promptly (but in any event no later than the beginning of the Resale Period) file and use its reasonable best efforts to make effective under the Securities Act a registration statement or supplement or amend an outstanding registration statement in form and substance reasonably satisfactory to Dealer, to cover the resale of such Restricted Shares in accordance with customary resale registration procedures, including covenants, conditions, representations, underwriting discounts (if applicable), commissions (if applicable), indemnities due diligence rights, opinions and certificates, and such other documentation as is customary for equity resale underwriting agreements of similar size, all reasonably acceptable to Dealer. If Dealer, in its sole reasonable discretion, is not satisfied with such procedures and documentation Private Placement Settlement shall apply. If Dealer is satisfied with such procedures and documentation, it shall sell the Restricted Shares pursuant to such registration statement during a period (the "**Resale Period**") commencing on the Exchange Business Day following delivery of such Restricted Shares (which, for the avoidance of doubt, shall be (x) the Share Termination Payment Date in case of settlement in Share Termination Delivery Units pursuant to Section 9(j) above or (y) the Settlement Date in respect of the final Expiration Date for all Daily Number of Warrants) and ending on the earliest of (i) the Exchange Business Day on which Dealer completes the sale of all Restricted Shares in a commercially reasonable manner or, in the case of settlement of Share Termination Delivery Units, a sufficient number of Restricted Shares so that the realized net proceeds of such sales equals or exceeds the Payment Obligation (as defined above), (ii) the date upon which all Restricted Shares have been sold or transferred pursuant to Rule 144 (or similar provisions then in force) or Rule 145(d)(2) (or any similar provision then in force) under the Securities Act and (iii) the date upon which all Restricted Shares may be sold or transferred by a non-affiliate pursuant to Rule 144 (or any similar provision then in force) or Rule 145(d)(2) (or any similar provision then in force) under the Securities Act. If the Payment Obligation exceeds the realized net proceeds from such resale, Company shall transfer to Dealer by the open of the regular trading session on the Exchange on the Exchange Trading Day immediately following such resale the amount of such excess (the "**Additional Amount**") in cash or in a number of Shares ("**Make-whole Shares**") in an amount that, based on the Settlement Price on such day (as if such day was the "Valuation Date" for purposes of computing such Settlement Price), has a dollar value equal to the Additional Amount. The Resale Period shall continue to enable the sale of the

Make-whole Shares. If Company elects to pay the Additional Amount in Shares, the requirements and provisions for Registration Settlement shall apply. This provision shall be applied successively until the Additional Amount is equal to zero. In no event shall Company deliver a number of Restricted Shares greater than the Maximum Number of Shares.

(iii) Without limiting the generality of the foregoing, Company agrees that (A) any Restricted Shares delivered to Dealer may be transferred by and among Dealer and its affiliates and Company shall effect such transfer without any further action by Dealer and (B) after the period of 6 months from the Trade Date (or 1 year from the Trade Date if, at such time, informational requirements of Rule 144(c) under the Securities Act are not satisfied with respect to Company) has elapsed in respect of any Restricted Shares delivered to Dealer, Company shall promptly remove, or cause the transfer agent for such Restricted Shares to remove, any legends referring to any such restrictions or requirements from such Restricted Shares upon request by Dealer (or such affiliate of Dealer) to Company or such transfer agent, without any requirement for the delivery of any certificate, consent, agreement, opinion of counsel, notice or any other document, any transfer tax stamps or payment of any other amount or any other action by Dealer (or such affiliate of Dealer). Notwithstanding anything to the contrary herein, to the extent the provisions of Rule 144 of the Securities Act or any successor rule are amended, or the applicable interpretation thereof by the Securities and Exchange Commission or any court change after the Trade Date, the agreements of Company herein shall be deemed modified to the extent necessary, in the opinion of outside counsel of Company, to comply with Rule 144 of the Securities Act, as in effect at the time of delivery of the relevant Shares or Share Termination Delivery Property.

(iv) If the Private Placement Settlement or the Registration Settlement shall not be effected as set forth in clauses (i) or (ii), as applicable, then failure to effect such Private Placement Settlement or such Registration Settlement shall constitute an Event of Default with respect to which Company shall be the Defaulting Party.

(l) *Limit on Beneficial Ownership*. Notwithstanding any other provisions hereof, Dealer may not exercise any Warrant hereunder or be entitled to take delivery of any Shares deliverable hereunder, and Automatic Exercise shall not apply with respect to any Warrant hereunder, to the extent (but only to the extent) that, after such receipt of any Shares upon the exercise of such Warrant or otherwise hereunder and after taking into account any Shares deliverable to Dealer under the Base Warrant Confirmation, (i) the Section 16 Percentage would exceed 7.5%, or (ii) the Share Amount would exceed the Applicable Share Limit. Any purported delivery hereunder shall be void and have no effect to the extent (but only to the extent) that, after such delivery and after taking into account any Shares deliverable to Dealer under the Base Warrant Confirmation, (i) the Section 16 Percentage would exceed 7.5%, or (ii) the Share Amount would exceed the Applicable Share Limit. If any delivery owed to Dealer hereunder is not made, in whole or in part, as a result of this provision, Company's obligation to make such delivery shall not be extinguished and Company shall make such delivery as promptly as practicable after, but in no event later than one Business Day after, Dealer gives notice to Company that, after such delivery, (i) the Section 16 Percentage would not exceed 7.5%, and (ii) the Share Amount would not exceed the Applicable Share Limit.

(m) *Share Deliveries*. Notwithstanding anything to the contrary herein, Company agrees that any delivery of Shares or Share Termination Delivery Property shall be effected by book-entry transfer through the facilities of DTC, or any successor depositary, if at the time of delivery, such class of Shares or class of Share Termination Delivery Property is in book-entry form at DTC or such successor depositary.

(n) *Waiver of Jury Trial.* Each party waives, to the fullest extent permitted by applicable law, any right it may have to a trial by jury in respect of any suit, action or proceeding relating to the Transaction. Each party (i) certifies that no representative, agent or attorney of the other party has represented, expressly or otherwise, that such other party would not, in the event of such a suit, action or proceeding, seek to enforce the foregoing waiver and (ii) acknowledges that it and the other party have been

induced to enter into the Transaction, as applicable, by, among other things, the mutual waivers and certifications provided herein.

(o)*Tax Disclosure.* Effective from the date of commencement of discussions concerning the Transaction, Company and each of its employees, representatives, or other agents may disclose to any and all persons, without limitation of any kind, the tax treatment and tax structure of the Transaction and all materials of any kind (including opinions or other tax analyses) that are provided to Company relating to such tax treatment and tax structure.

(p)*Maximum Share Delivery*.

(i) Notwithstanding any other provision of this Confirmation, the Agreement or the Equity Definitions, in no event will Company at any time be required to deliver a number of Shares greater than the Maximum Number of Shares to Dealer in connection with the Transaction after taking into account any Shares deliverable to Dealer under the Base Warrant Confirmation.

(ii) In the event Company shall not have delivered to Dealer the full number of Shares or Restricted Shares otherwise deliverable by Company to Dealer pursuant to the terms of the Transaction because Company has insufficient authorized but unissued Shares (such deficit, the "**Deficit Shares**"), Company shall be continually obligated to deliver, from time to time, Shares or Restricted Shares, as the case may be, to Dealer until the full number of Deficit Shares have been delivered pursuant to this Section 9(p)(ii), when, and to the extent that, (A) Shares are repurchased, acquired or otherwise received by Company or any of its subsidiaries after the Trade Date (whether or not in exchange for cash, fair value or any other consideration), (B) authorized and unissued Shares previously reserved for issuance in respect of other transactions become no longer so reserved or (C) Company additionally authorizes any unissued Shares that are not reserved for other transactions; *provided* that in no event shall Company deliver any Shares or Restricted Shares to Dealer pursuant to this Section 9(p)(ii) to the extent that such delivery would cause the aggregate number of Shares and Restricted Shares delivered to Dealer to exceed the Maximum Number of Shares. Company shall immediately notify Dealer of the occurrence of any of the foregoing events (including the number of Shares subject to clause (A), (B) or (C) and the corresponding number of Shares or Restricted Shares, as the case may be, to be delivered) and promptly deliver such Shares or Restricted Shares, as the case may be, thereafter.

(q)*Shareholder Approval*. Company shall use its reasonable best efforts to seek approval from its shareholders ("**Shareholder Approval**"), in accordance with the requirements of Rule 312.03(c) of The New York Stock Exchange Listed Company Manual or any successor rule, for the issuance pursuant to the Transaction of a number of Shares equal to two times the product of the Number of Warrants and the Warrant Entitlement (without regard to the limitations on adjustment set forth in the second paragraph opposite the caption "Maximum Number of Shares" in Section 2). If Company succeeds in obtaining such approval, then upon such approval and without any further action by either party, (i) the provisions set forth opposite the caption "Maximum Number of Shares" in Section 2 shall be deemed to be replaced in their entirety with the phrase "A number of Shares equal to two times the product of the Number of Warrants and the Warrant Entitlement," (ii) the Additional Termination Event set forth in Section 9(h)(ii)(G) shall no longer be applicable, (iii) the provisions set forth in Section 9(j)(ii) shall be deleted in their entirety, (iv) the provisions opposite the caption "Share Delivery Quantity" in Section 2 shall be replaced in their entirety with the sentence "For any Settlement Date, a number of Shares, as calculated by the Calculation Agent, equal to the Net Share Settlement Amount for such Settlement Date *divided by* the Settlement Price on the Valuation Date for such Settlement Date" and (v) the phrase "after taking into account any Shares deliverable to Dealer under the Base Warrant Confirmation" in Section 9(p)(i) shall be deleted in its entirety.

(r)*Right to Extend.* Dealer may postpone or add, in whole or in part, any Expiration Date or any other date of valuation or delivery with respect to some or all of the relevant Warrants (in which event the Calculation Agent shall make appropriate adjustments to the Daily Number of Warrants with respect

to one or more Expiration Dates) if Dealer determines, in its commercially reasonable judgment, that such extension is reasonably necessary or appropriate to preserve Dealer's hedging or hedge unwind activity hereunder in light of existing liquidity conditions or to enable Dealer to effect purchases of Shares in connection with its hedging, hedge unwind or settlement activity hereunder in a manner that would, if Dealer were Issuer or an affiliated purchaser of Issuer, be in compliance with applicable legal, regulatory or self-regulatory requirements, or with related policies and procedures applicable to Dealer.

(s) *Status of Claims in Bankruptcy.* Dealer acknowledges and agrees that this Confirmation is not intended to convey to Dealer rights against Company with respect to the Transaction that are senior to the claims of common stockholders of Company in any United States bankruptcy proceedings of Company; *provided* that nothing herein shall limit or shall be deemed to limit Dealer's right to pursue remedies in the event of a breach by Company of its obligations and agreements with respect to the Transaction; *provided*, *further*, that nothing herein shall limit or shall be deemed to limit Dealer's rights in respect of any transactions other than the Transaction.

(t) *Securities Contract; Swap Agreement.* The parties hereto intend for (i) the Transaction to be a "securities contract" and a "swap agreement" as defined in the Bankruptcy Code (Title 11 of the United States Code) (the "**Bankruptcy Code**"), and the parties hereto to be entitled to the protections afforded by, among other Sections, Sections 362(b)(6), 362(b)(17), 546(e), 546(g), 555 and 560 of the Bankruptcy Code, (ii) a party's right to liquidate the Transaction and to exercise any other remedies upon the occurrence of any Event of Default under the Agreement with respect to the other party to constitute a "contractual right" as described in the Bankruptcy Code, and (iii) each payment and delivery of cash, securities or other property hereunder to constitute a "margin payment" or "settlement payment" and a "transfer" as defined in the Bankruptcy Code.

(u) *Wall Street Transparency and Accountability Act*. In connection with Section 739 of the Wall Street Transparency and Accountability Act of 2010 ("**WSTAA**"), the parties hereby agree that neither the enactment of WSTAA or any regulation under the WSTAA, nor any requirement under WSTAA or an amendment made by WSTAA, shall limit or otherwise impair either party's otherwise applicable rights to terminate, renegotiate, modify, amend or supplement this Confirmation or the Agreement, as applicable, arising from a termination event, force majeure, illegality, increased costs, regulatory change or similar event under this Confirmation, the Equity Definitions incorporated herein, or the Agreement (including, but not limited to, rights arising from Change in Law, Hedging Disruption, Increased Cost of Hedging, an Excess Ownership Position, or Illegality (as defined in the Agreement)).

(v) *Agreements and Acknowledgements Regarding Hedging*. Company understands, acknowledges and agrees that: (A) at any time on and prior to the last Expiration Date, Dealer and its affiliates may buy or sell Shares or other securities or buy or sell options or futures contracts or enter into swaps or other derivative securities in order to adjust its hedge position with respect to the Transaction; (B) Dealer and its affiliates also may be active in the market for Shares other than in connection with hedging activities in relation to the Transaction; (C) Dealer shall make its own determination as to whether, when or in what manner any hedging or market activities in securities of Issuer shall be conducted and shall do so in a manner that it deems appropriate to hedge its price and market risk with respect to the Settlement Prices; and (D) any market activities of Dealer and its affiliates with respect to Shares may affect the market price and volatility of Shares, as well as the Settlement Prices, each in a manner that may be adverse to Company.

(w) *Early Unwind*. In the event the sale of the "Option Securities" (as defined in the Purchase Agreement) is not consummated with the Initial Purchasers for any reason, or Company fails to deliver to Dealer opinions of counsel as required pursuant to Section 9(a), in each case by 5:00 p.m. (New York City time) on the Premium Payment Date, or such later date as agreed upon by the parties (the Premium Payment Date or such later date the "**Early Unwind Date**"), the Transaction shall automatically terminate (the "**Early Unwind**"), on the Early Unwind Date and (i) the Transaction and all of the respective rights and obligations of Dealer and Company under the Transaction shall be cancelled and terminated and (ii) each party shall be released and discharged by the other party from and agrees not to make any claim against the other party with respect to any obligations or liabilities of the other

party arising out of and to be performed in connection with the Transaction either prior to or after the Early Unwind Date; *provided* that Company shall purchase from Dealer on the Early Unwind Date all Shares purchased by Dealer or one or more of its affiliates in connection with the Transaction at the then prevailing market price. Each of Dealer and Company represents and acknowledges to the other that, subject to the proviso included in this Section 9(w), upon an Early Unwind, all obligations with respect to the Transaction shall be deemed fully and finally discharged.

(x) *Payment by Dealer*. In the event that (i) an Early Termination Date occurs or is designated with respect to the Transaction as a result of a Termination Event or an Event of Default (other than an Event of Default arising under Section 5(a)(ii) or 5(a)(iv) of the Agreement) and, as a result, Dealer owes to Company an amount calculated under Section 6(e) of the Agreement, or (ii) Dealer owes to Company, pursuant to Section 12.7 or Section 12.9 of the Equity Definitions, an amount calculated under Section 12.8 of the Equity Definitions, such amount shall be deemed to be zero.

(y) If Company has not obtained Shareholder Approval prior to the Approval Deadline, on the Approval Deadline (x) the First Expiration Date shall be extended by one calendar year, (y) the Warrants shall, as of April 15, 2020 (the " **Original First Expiration Date**"), cease to be to be "European Options" (as such term is defined in the Equity Definitions) and shall become, as of the Original First Expiration Date, "American Options" (as such term is defined in the Equity Definitions) exercisable as of the Original First Expiration Date and (z) the Calculation Agent shall make commercially reasonable conforming amendments to the exercise and settlement terms of the Transaction to reflect the change of the Warrants from European Options to American Options, for the avoidance of doubt, retaining (i) contingencies to exercise that are not an observable market, other than the market for the Company's stock or an observable index, other than an index calculated or measured solely by reference to the Company's own operations, (ii) the commercially reasonable nature of adjustments permitted to the Transaction (such as to consider changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Shares and the ability to maintain a commercially reasonable hedge position in the underlying shares) and (iii) the Company's unilateral right to settle in shares pursuant to 9(k), including pursuant to a Share Termination Alternative as provided under Section 9(j). On each anniversary of the Approval Deadline occurring prior to the final Expiration Date, if Company has not, as of such date, obtained Shareholder Approval, the First Expiration Date shall be further extended by one additional calendar year.

(z) *Adjustments*. For the avoidance of doubt, whenever the Calculation Agent or Determining Party is called upon to make an adjustment pursuant to the terms of this Confirmation or the Equity Definitions to take into account the effect of an event, the Calculation Agent or Determining Party shall make such adjustment by reference to the effect of such event on the Hedging Party, assuming that the Hedging Party maintains a commercially reasonable hedge position.

(aa) *Delivery or Receipt of Cash*. For the avoidance of doubt, other than receipt of the Premium by Company, nothing in this Confirmation shall be interpreted as requiring Company to cash settle the Transaction, except in circumstances where cash settlement is within Company's control (including, without limitation, where Company elects to deliver or receive cash, or where Company has made Private Placement settlement unavailable due to the occurrence of events within its control) or in those circumstances in which holders of Shares would also receive cash.

(bb) *No Reliance*. The Company hereby confirms that it has relied on the advice of its own counsel and other advisors (to the extent it deems appropriate) with respect to any legal, tax, accounting, or regulatory consequences of this Confirmation, that it has not relied on Dealer or its affiliates in any respect in connection therewith, and that it will not hold Dealer or its affiliates accountable for any such consequences.

Company hereby agrees (a) to check this Confirmation carefully and immediately upon receipt so that errors or discrepancies can be promptly identified and rectified and (b) to confirm that the foregoing (in the exact form provided by Dealer) correctly sets forth the terms of the agreement between Dealer and Company with respect to the Transaction, by manually signing this Confirmation or this page hereof as evidence of agreement to such terms and providing the other information requested herein and immediately returning an executed copy to John Servidio, Facsimile No. 704-208-2869.

Very truly yours,

Bank of America, N.A.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended March 31, 2013 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

PART I

Item 1: *Business*

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. Dr. C. David Molina founded our company in 1980 as a provider organization serving the Medicaid population in Southern California. Today, we remain a provider-focused company led by his son, Joseph M. Molina, M.D. (Dr. J. Mario Molina). We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

Our Health Plans segment consists of health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of December 31, 2012, these health plans served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of 24 primary care clinics in California, Florida, New Mexico, and Washington, and we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

Our Health Plans segment derives its revenue principally in the form of premiums received under Medicaid contracts with the states in which our health plans operate. While the health plans receive fixed per-member per-month, or PMPM, premium payments from the states, the health plans are at risk for the medical costs associated with their members' health care. Our Health Plans segment operates in a highly regulated environment, with stringent minimum capitalization requirements which limit the ability of our health plan subsidiaries to pay dividends to us.

Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program. We added the Molina Medicaid Solutions segment to our business in May 2010 to expand our product offerings to include support of state Medicaid agency administrative needs, reduce the variability in our earnings resulting from fluctuations in medical care costs, improve our operating profit margin percentages, and improve our cash flow by adding a business for which there are no restrictions on dividend payments.

From a strategic perspective, we believe our two business segments allow us to participate in an expanding sector of the economy and continue our mission of serving low-income families and individuals eligible for government-sponsored health care programs. Operationally, our two business segments share a common systems platform, which allows for economies of scale and common experience in meeting the needs of state Medicaid programs. We also believe that we may have opportunities to market to state Medicaid agencies various cost containment and quality practices used by our health plans, such as care management and care coordination, for incorporation into their own fee-for-service Medicaid programs.

Our principal executive offices are located at 200 Oceangate, Suite 100, Long Beach, California 90802, and our telephone number is (562) 435-3666. Our website is *www.molinahealthcare.com.*

Information contained on our website or linked to our website is not incorporated by reference into, or as part of, this annual report. Unless the context otherwise requires, references to “Molina Healthcare,” the “Company,” “we,” “our,” and “us” herein refer to Molina Healthcare, Inc. and its subsidiaries. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to these reports, are available free of charge under the “investors” tab of our website, *www.molinahealthcare.com*, as soon as reasonably practicable after such reports are electronically filed with or furnished to the Securities and Exchange Commission, or SEC. Information regarding our officers and directors, and copies of our Code of Business Conduct and Ethics, Corporate Governance Guidelines, and the charters of our Audit Committee, Compensation Committee, Corporate Governance and Nominating Committee, and Compliance Committee are also available on our website. Such information is also available in print upon the request of any stockholder to our Investor Relations department at the address of our executive offices set forth above. In accordance with New York Stock Exchange, or NYSE, rules, on May 21, 2012, we filed the annual certification by our Chief Executive Officer certifying that he was unaware of any violation by us of the NYSE's corporate governance listing standards at the time of the certification.

Our Industry

The Medicaid and CHIP Programs. The Medicaid program is a federal entitlement program administered by the states. Medicaid provides health care and long-term care services and support to low-income Americans. Subject to federal laws and regulations, states have significant flexibility to structure their own programs in terms of eligibility, benefits, delivery of services, and provider payments. Medicaid is funded jointly by the states and the federal government. The federal government guarantees matching funds to states for qualifying Medicaid expenditures based on each state's federal medical assistance percentage, or

FMAP. A state's FMAP is calculated annually and varies inversely with average personal income in the state. The average FMAP across all states is currently about 57 percent, and ranges from a federally established FMAP floor of 50% to as high as 74%.

The most common state-administered Medicaid program is the Temporary Assistance for Needy Families program, or TANF. Another common state-administered Medicaid program is for aged, blind or disabled, or ABD, Medicaid members. In addition, the Children's Health Insurance Program, or CHIP, is a joint federal and state matching program that provides health care coverage to children whose families earn too much to qualify for Medicaid coverage. States have the option of administering CHIP through their Medicaid programs.

Each state establishes its own eligibility standards, benefit packages, payment rates, and program administration within broad federal statutory and regulatory guidelines. Every state Medicaid program must balance many potentially competing demands, including the need for quality care, adequate provider access, and cost-effectiveness. In an effort to improve quality and provide more uniform and cost-effective care, many states have implemented Medicaid managed care programs. These programs seek to improve access to coordinated health care services, including preventive care, and to control health care costs. Under Medicaid managed care programs, a health plan receives capitation payments from the state. The health plan, in turn, arranges for the provision of health care services by contracting with a network of medical providers. The health plan implements care management and care coordination programs that seek to improve both care access and care quality, while controlling costs more effectively.

While many states have embraced Medicaid managed care programs, others continue to operate traditional fee-for-service programs to serve all or part of their Medicaid populations. Under fee-for-service Medicaid programs, health care services are made available to beneficiaries as they seek that care, without the benefit of a coordinated effort to maintain and improve their health. As a consequence, treatment is often postponed until medical conditions become more severe, leading to higher costs and more unfavorable outcomes. Additionally, providers paid on a fee-for-service basis are compensated based upon services they perform, rather than health outcomes, and therefore lack incentives to coordinate preventive care, monitor utilization, and control costs.

Because Medicaid is a state-administered program, every state must have mechanisms, policies, and procedures in place to perform a large number of crucial functions, including the determination of eligibility and the reimbursement of medical providers for services provided. This requirement exists regardless of whether a state has adopted a fee-for-service or a managed care delivery model. MMIS are used by states to support these administrative activities. The federal government typically reimburses the states for 90% of the costs incurred in the design, development, and implementation of an MMIS and for 75% of the costs incurred in operating an MMIS. Although a small number of states build and operate their own MMIS, a far more typical practice is for states to sub-contract the design, development, implementation, and operation of their MMIS to private parties. Through our Molina Medicaid Solutions segment, we now actively participate in this market.

In certain instances, states have elected to provide medical benefits to individuals and families who are not served by Medicaid. In New Mexico and Washington, our health plan segment participates in programs that are administered in a manner similar to Medicaid and CHIP, but without federal matching funds.

Medicare Advantage Plans. During 2012, all of our health plans, except our Wisconsin health plan, operated Medicare Advantage plans, each of which included a mandatory Part D prescription drug benefit. Our Medicare Advantage special needs plans, or SNPs, operate under the trade name Molina Medicare Options Plus, and serve those beneficiaries who are dually eligible for both Medicare and Medicaid, such as low-income seniors and people with disabilities. Our Medicare Advantage Prescription Drug plans, or MA-PDs, operate under the trade name Molina Medicare Options. Although our MA-PD benefit plans do not exclusively enroll dual eligible beneficiaries, the plans' benefit structure is designed to appeal to lower income beneficiaries. We believe offering these Medicare plans is consistent with our historical mission of serving low-income and medically underserved families and individuals. None of our health plans operates a Medicare Advantage private fee-for-service plan. Total enrollment in our Medicare Advantage plans as of December 31, 2012 was approximately 36,000 members. For the year ended December 31, 2012, premium revenues from Medicare across all health plans represented approximately 8% of our total premium revenues.

As of December 31, 2012, approximately 75% of our members were TANF, 15% were ABD, 8% were CHIP, and 2% were Medicare.

Our Strengths

We focus on serving low-income families and individuals who receive health care benefits through government-sponsored programs within a managed care model. Additionally, we support state Medicaid agencies by providing them with comprehensive solutions to their MMIS development and operating needs. Our approach to our business is based on the following strengths:

Comprehensive Medicaid Services. We offer a complete suite of Medicaid services, ranging from quality care, disease management, cost management, and direct delivery of health care services at our clinics through our Health Plans segment, to state-level MMIS administration through our Molina Medicaid Solutions segment. We have the ability to draw upon our experience and expertise in each of these areas to enhance the quality of the services we offer in the others.

Flexible Service Delivery Systems. Our health plan care delivery systems are diverse and readily adaptable to different markets and changing conditions. We arrange health care services with a variety of providers, including independent physicians and medical groups, hospitals, ancillary providers, and our own clinics. Our systems support multiple types of contract models. Our provider networks are well-suited, based on medical specialty, member proximity, and cultural sensitivity, to provide services to our members. Our Molina Medicaid Solutions platform is based upon commercial off-the-shelf technology. As a result, we believe that our Molina Medicaid Solutions platform has the flexibility to meet a wide variety of state Medicaid administrative needs in a timely and cost-effective manner.

Proven Expansion and Acquisition Capability. We have successfully replicated the business model of our health plan segment through the acquisition of health plans, the start-up development of new operations, and the transition of members from other health plans. The acquisition of our New Mexico and Wisconsin health plans demonstrated our ability to expand into new states. The establishment of our health plans in Utah, Ohio, Texas, and Florida reflects our ability to replicate our business model on a start-up basis in new states, while contract acquisitions in California, Michigan, and Washington have demonstrated our ability to expand our operations within states in which we were already operating.

Administrative Efficiency. We have centralized and standardized various functions and practices to increase administrative efficiency. The steps we have taken include centralizing claims processing and information services onto a single platform. We have standardized medical management programs, pharmacy benefits management contracts, and health education programs. In addition, we have designed our administrative and operational infrastructure to be scalable for cost-effective expansion into new and existing markets.

Recognition for Quality of Care. The National Committee for Quality Assurance, or NCQA, has accredited eight of our nine Medicaid managed care plans. Our Wisconsin plan acquired in September 2010 currently plans to seek NCQA accreditation in early 2014. We believe that these objective measures of the quality of the services that we provide will become increasingly important to state Medicaid agencies.

Experience and Expertise. Since the founding of our Company in 1980 to serve the Medicaid population in Southern California through a small network of primary care clinics, we have increased our membership to 1.8 million members as of December 31, 2012, expanded our Health Plans segment to nine states, and added our Molina Medicaid Solutions segment. Our experience over the last 30 years has allowed us to develop strong relationships with the constituents we serve, establish significant expertise as a government contractor, and develop sophisticated disease management, care coordination and health education programs that address the particular health care needs of our members. We also benefit from a thorough understanding of the cultural and linguistic needs of Medicaid populations.

Our Strategy

Our objective is to provide a comprehensive suite of Medicaid-related services to meet the health care needs of low-income families and individuals and the state Medicaid agencies that serve them. To achieve our objective, we intend to:

Continue to expand within existing markets, including as a result of the Affordable Care Act Medicaid expansion, the duals pilot projects, and the insurance marketplaces. We plan to continue our growth in existing markets. The Patient Protection and Affordable Care Act and the Health Care and Education Affordability Reconciliation Act, commonly referred to together as the Affordable Care Act, or the ACA, provides us with several opportunities for growth, including the expansion of Medicaid eligibility in the states that elect to participate, the implementation of pilot projects for those who are dually eligible for Medicaid and Medicare, and the implementation of insurance marketplaces.

- *Medicaid expansion*. As of February 27, 2013, among the states where we operate our health plans, the states of California, Florida, Michigan, New Mexico, Ohio, and Washington have indicated that they intend to participate in the Medicaid expansion; the states of Texas and Wisconsin have indicated that they do not intend to participate in the expansion; and the state of Utah is undecided. We believe there are significant opportunities to increase our revenues through the Medicaid expansion.
- *Duals*. Nine million low-income elderly and disabled people in the United States are covered under both the Medicare and Medicaid programs. These beneficiaries, often called “dual eligibles” or simply “duals,” are more likely than other Medicare beneficiaries to be frail, live with multiple chronic conditions, and have functional and cognitive impairments. Policymakers at the federal and state level are developing initiatives for dual eligibles both to improve the coordination of their care, and to reduce spending for both Medicare and Medicaid. The Centers for Medicare and Medicaid Services, or CMS, has implemented several demonstrations designed to improve the coordination of care for dual eligibles and reduce spending under Medicare and Medicaid. These demonstrations include issuing contracts to 15 states to design a program to integrate Medicare and Medicaid services for dual eligibles in the state. Our health plans in California, Illinois, Michigan, Ohio, Texas, and Washington intend to take part in the duals demonstrations in those states. Beginning in September 2013, our California plan intends to serve duals in Riverside, San Bernardino and San Diego counties, and may participate with Health Net, Inc. for the duals contract in Los Angeles County. Our new Illinois plan will serve duals

in Central Illinois beginning in 2014. Our Michigan plan will respond to a request for proposals to serve duals also beginning in late 2013. Our Ohio plan will serve duals in three regions in southwestern Ohio (Dayton, Columbus and Cincinnati) beginning in late 2013. The state of Texas announced that it intends to cover duals through its existing Medicaid contracts beginning in 2014. Our Washington plan will respond to a request for proposals to serve duals also beginning in 2014.

- *Insurance marketplaces*. Under the ACA, insurance marketplaces will be online marketplaces organized on a state-by-state basis (although in many instances the insurance marketplace in a state will be operated by the federal government, and there could also be regional marketplaces where states combine their marketplace products). In the insurance marketplace, individuals and groups can purchase health insurance that in many instances will be federally subsidized (up to 400% of the federal poverty level by individual or family). We currently intend to participate in the insurance marketplaces in the states in which we operate our health plans. Our principal focus in participating in the marketplace is to capture the transition in membership that may result from a Medicaid member's income rising above the 138% level of the federal poverty line. By retaining that member in the marketplace, if the member's income subsequently declines, we will continuously serve that same member in all instances and not "lose" the member to another health plan. We endorse the so-called "bridge plan" as the best way to serve low-income persons who may qualify for coverage through the insurance marketplaces, and will be working with legislators and regulators during 2013 to advocate for the merits of the bridge plan.

Continue to enter new strategic markets. We plan to continue to enter new markets through both acquisitions and by building our own start-up operations. We intend to focus our expansion in markets with competitive provider communities, supportive regulatory environments, significant size, and, where practicable, mandated Medicaid managed care enrollment.

Continue to provide quality cost-effective care. We plan to use our strong provider networks and the knowledge gained through the operation of our clinics to further develop and utilize effective medical management and other coordinated programs that address the distinct needs of our members and improve the quality and cost-effectiveness of their care.

Leverage operational efficiencies. We intend to leverage the operational efficiencies created by our centralized administrative infrastructure and flexible information systems to earn higher margins on future revenues. We believe our administrative infrastructure has significant expansion capacity, allowing us to integrate new members from expansion within existing markets and enter new markets at lower incremental cost.

Deliver administrative value to state Medicaid agencies. As Medicaid expenditures increase, we believe that an increasing number of states will demand comprehensive solutions that improve both quality and cost-effectiveness. We intend to use our MMIS solution to provide state Medicaid agencies with a flexible and robust solution to their administrative needs. We believe that our MMIS platform, together with our extensive experience in health care management and health plan operations, enables us to offer state Medicaid agencies a comprehensive suite of Medicaid-related solutions that meets their needs for quality and for the cost-effective operation of their Medicaid programs.

Open additional primary care clinics. The clinic model offers an integrated approach that helps us improve both the quality and cost-effectiveness of the care our members receive. Our Health Plans segment direct delivery business currently consists of primary care clinics in California, Florida, New Mexico, and Washington, and three county-owned clinics in Fairfax County, Virginia that we manage on behalf of the county. The growth and aging of the population of the United States foreshadows an increasing shortage of physicians over the next 15 years. Health care reform is expected to worsen this shortage. We believe the shortage will be felt most acutely among already under-served populations, such as the low income families and individuals we serve. While we have no plans to become an organization that fully integrates primary care delivery with our health plans, by leveraging our direct delivery capability on a selective basis we can improve access for our plan members in areas that are most under-served by primary care providers.

Medicaid Contracts

With the exception of our Wisconsin health plan, which does not serve Medicare members, all of our health plans serve TANF, CHIP, ABD, and Medicare members. For its Medicare members, each health plan enters into a one-year annually renewable contract with CMS. For its other members, each health plan enters into a contract with the state's Medicaid agency. The contractual relationship with the state is generally for a period of three to four years and renewable on an annual or biannual basis at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause upon 30 days to nine months prior written notice. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, our Missouri

health plan was notified that it was not awarded a new contract under that state's RFP, and therefore its contract expired on June 30, 2012.

Our contracts with the state determine the type and scope of health care services that we arrange for our members. Generally, our contracts require us to arrange for preventive care, office visits, inpatient and outpatient hospital and medical services, and pharmacy benefits. The contracts also detail the requirements for operating in the Medicaid sector, including provisions relating to: eligibility; enrollment and disenrollment processes; covered benefits; eligible providers; subcontractors; record-keeping and record retention; periodic financial and informational reporting; quality assurance; marketing; financial standards; timeliness of claims payments; health education, wellness and prevention programs; safeguarding of member information; fraud and abuse detection and reporting; grievance procedures; and organization and administrative systems. A health plan's compliance with these requirements is subject to monitoring by state regulators. A health plan is subject to periodic comprehensive quality assurance evaluation by a third-party reviewing organization and generally by the insurance department of the jurisdiction that licenses the health plan. Most health plans must also submit quarterly and annual statutory financial statements and utilization reports, as well as many other reports in accordance with individual state requirements.

We are usually paid a negotiated PMPM amount, with the PMPM amount varying from contract to contract. Generally, that amount is higher in states where we are required to offer more extensive health benefits. We are also paid an additional amount for each newborn delivery from the Medicaid programs in all of our state health plans, except with respect to our New Mexico health plan.

Provider Networks

We arrange health care services for our members through contracts with providers that include independent physicians and groups, hospitals, ancillary providers, and our own clinics. Our network of providers includes primary care physicians, specialists and hospitals. Our strategy is to contract with providers in those geographic areas and medical specialties necessary to meet the needs of our members. We also strive to ensure that our providers have the appropriate cultural and linguistic experience and skills.

Physicians. We contract with both primary care physicians and specialists, many of whom are organized into medical groups or independent practice associations, or IPAs. Primary care physicians provide office-based primary care services. Primary care physicians may be paid under capitation or fee-for-service contracts and may receive additional compensation by providing certain preventive services. Our specialists care for patients for a specific episode or condition, usually upon referral from a primary care physician, and are usually compensated on a fee-for-service basis. When we contract with groups of physicians on a capitated basis, we monitor their solvency.

Hospitals. We generally contract with hospitals that have significant experience dealing with the medical needs of the Medicaid population. We reimburse hospitals under a variety of payment methods, including fee-for-service, per diems, diagnostic-related groups, or DRGs, capitation, and case rates.

Primary Care Clinics. Our Health Plans segment operates 24 company-owned primary care clinics located in California, Florida, New Mexico and Washington. These clinics are located in neighborhoods where our members live, and provide us a first-hand opportunity to understand the special needs of our members. The clinics assist us in developing and implementing community education, disease management, and other programs. The clinics also give us direct clinic management experience that enables us to better understand the needs of our contracted providers. In addition, we have a subsidiary in Virginia that manages three health care clinics for Fairfax County.

Medical Management

Our experience in medical management extends back to our roots as a provider organization. Primary care physicians are the focal point of the delivery of health care to our members, providing routine and preventive care, coordinating referrals to specialists, and assessing the need for hospital care. This model has proven to be an effective method for coordinating medical care for our members. The underlying challenge we face is to coordinate health care so that our members receive timely and appropriate care from the right provider at the appropriate cost. In support of this goal, and to ensure medical management consistency among our various state health plans, we continuously refine and upgrade our medical management efforts at both the corporate and subsidiary levels.

We seek to ensure quality care for our members on a cost-effective basis through the use of certain key medical management and cost control tools. These tools include utilization management, case and health management, and provider network and contract management.

Utilization Management. We continuously review utilization patterns with the intent to optimize quality of care and ensure that only appropriate services are rendered in the most cost-effective manner. Utilization management, along with our other tools of medical management and cost control, is supported by a centralized corporate medical informatics function which utilizes third-

party software and data warehousing tools to convert data into actionable information. We use predictive modeling that supports a proactive case and health management approach both for us and our affiliated physicians.

Case and Health Management. We seek to encourage quality, cost-effective care through a variety of case and health management programs, including disease management programs, educational programs, and pharmacy management programs.

Disease Management Programs. We develop specialized disease management programs that address the particular health care needs of our members. "*motherhood matters!*℠" is a comprehensive program designed to improve pregnancy outcomes and enhance member satisfaction. *"breathe with ease!*" is a multi-disciplinary disease management program that provides health education resources and case management services to assist physicians caring for asthmatic members between the ages of three and 15. *"Healthy Living with Diabetes"* is a diabetes disease management program. *"Heart Health Living"* is a cardiovascular disease management program for members who have suffered from congestive heart failure, angina, heart attack, or high blood pressure.

Educational Programs. Educational programs are an important aspect of our approach to health care delivery. These programs are designed to increase awareness of various diseases, conditions, and methods of prevention in a manner that supports our providers while meeting the unique needs of our members. For example, we provide our members with information to guide them through various episodes of care. This information, which is available in several languages, is designed to educate parents on the use of primary care physicians, emergency rooms, and nurse call centers.

Pharmacy Management Programs. Our pharmacy management programs focus on physician education regarding appropriate medication utilization and encouraging the use of generic medications. Our pharmacists and medical directors work with our pharmacy benefits manager to maintain a formulary that promotes both improved patient care and generic drug use. We employ full-time pharmacists and pharmacy technicians who work with physicians to educate them on the uses of specific drugs, the implementation of best practices, and the importance of cost-effective care.

Provider Network and Contract Management. The quality, depth, and scope of our provider network are essential if we are to ensure quality, cost-effective care for our members. In partnering with quality, cost-effective providers, we utilize clinical and financial information derived by our medical informatics function, as well as the experience we have gained in serving Medicaid members to gain insight into the needs of both our members and our providers. As we grow in size, we seek to strengthen our ties with high-quality, cost-effective providers by offering them greater patient volume.

Plan Administration and Operations

Management Information Systems. All of our health plan information technology and systems operate on a single platform. This approach avoids the costs associated with maintaining multiple systems, improves productivity, and enables medical directors to compare costs, identify trends, and exchange best practices among our plans. Our single platform also facilitates our compliance with current and future regulatory requirements.

The software we use is based on client-server technology and is scalable. We believe the software is flexible, easy to use, and allows us to accommodate anticipated enrollment growth and new contracts. The open architecture of the system gives us the ability to transfer data from other systems without the need to write a significant amount of computer code, thereby facilitating the integration of new plans and acquisitions.

We have designed our corporate website with a focus on ease of use and visual appeal. Our website has a secure ePortal which allows providers, members, and trading partners to access individualized data. The ePortal allows the following self-services:

- *Provider Self Services.* Providers have the ability to access information regarding their members and claims. Key functionalities include "Check Member Eligibility," "View Claim," and "View/Submit Authorizations."
- *Member Self Services.* Members can access information regarding their personal data, and can perform the following key functionalities: "View Benefits," "Request New ID Card," "Print Temporary ID Card," and "Request Change of Address/PCP."
- *File Exchange Services.* Various trading partners — such as service partners, providers, vendors, management companies, and individual IPAs — are able to exchange data files (such as those that may be required by the Health Insurance Portability and Accountability Act of 1996, or HIPAA, or any other proprietary format) with us using the file exchange functionality.

Best Practices. We continuously seek to promote best practices. Our approach to quality is broad, encompassing traditional medical management and the improvement of our internal operations. We have staff assigned full-time to the development and implementation of a uniform, efficient, and quality-based medical care delivery model for our health plans. These employees coordinate and implement company-wide programs and strategic initiatives such as preparation of the Healthcare Effectiveness

Data and Information Set, or HEDIS, and accreditation by the NCQA. We use measures established by the NCQA in credentialing the physicians in our network. We routinely use peer review to assess the quality of care rendered by providers. Eight of our health plans are accredited by the NCQA. Our Wisconsin plan acquired in September 2010 currently plans to seek NCQA accreditation in early 2014.

Claims Processing. All of our health plans operate on a single managed care platform for claims processing (the QNXT 4.8 system).

Centralized Management Services. We provide certain centralized medical and administrative services to our health plans pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems, and human resources services. Fees for such services are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the health plan's ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate.

Compliance. Our health plans have established high standards of ethical conduct. Our compliance programs are modeled after the compliance guidance statements published by the Office of the Inspector General of the U.S. Department of Health and Human Services. Our uniform approach to compliance makes it easier for our health plans to share information and practices and reduces the potential for compliance errors and any associated liability.

Disaster Recovery. We have established a disaster recovery and business resumption plan, with back-up operating sites, to be deployed in the case of a major disruptive event.

Competition

We operate in a highly competitive environment. The Medicaid managed care industry is fragmented, and the competitive landscape is subject to ongoing changes as a result of business consolidations and new strategic alliances. We compete with a large number of national, regional, and local Medicaid service providers, principally on the basis of size, location, and quality of provider network, quality of service, and reputation. Competition can vary considerably from state to state. Below is a general description of our principal competitors for state contracts, members, and providers:

- *Multi-Product Managed Care Organizations* — National and regional managed care organizations that have Medicaid members in addition to numerous commercial health plan and Medicare members.
- *Medicaid HMOs* — National and regional managed care organizations that focus principally on providing health care services to Medicaid beneficiaries, many of which operate in only one city or state.
- *Prepaid Health Plans* — Health plans that provide less comprehensive services on an at-risk basis or that provide benefit packages on a non-risk basis.
- *Primary Care Case Management Programs* — Programs established by the states through contracts with primary care providers to provide primary care services to Medicaid beneficiaries, as well as to provide limited oversight of other services.

We will continue to face varying levels of competition. Health care reform proposals may cause organizations to enter or exit the market for government sponsored health programs. However, the licensing requirements and bidding and contracting procedures in some states may present partial barriers to entry into our industry.

We compete for government contracts, renewals of those government contracts, members, and providers. State agencies consider many factors in awarding contracts to health plans. Among such factors are the health plan's provider network, medical management, degree of member satisfaction, timeliness of claims payment, and financial resources. Potential members typically choose a health plan based on a specific provider being a part of the network, the quality of care and services available, accessibility of services, and reputation or name recognition of the health plan. We believe factors that providers consider in deciding whether to contract with a health plan include potential member volume, payment methods, timeliness and accuracy of claims payment, and administrative service capabilities.

Molina Medicaid Solutions competes with large MMIS vendors, such as HP Enterprise Services (formerly known as EDS), ACS (owned by Xerox Corporation), Computer Services Corporation, or CSC, and CNSI.

Regulation

Our health plans are highly regulated by both state and federal government agencies. Regulation of managed care products and health care services varies from jurisdiction to jurisdiction, and changes in applicable laws and rules can occur frequently. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Such agencies have

become increasingly active in recent years in their review and scrutiny of health insurers and managed care organization, including those operating in the Medicaid and Medicare programs.

To operate a health plan in a given state, we must apply for and obtain a certificate of authority or license from that state. Our operating health plans are licensed to operate as health maintenance organizations, or HMOs, in each of California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. In those states we are regulated by the agency with responsibility for the oversight of HMOs which, in most cases, is the state department of insurance. In California, however, the agency with responsibility for the oversight of HMOs is the Department of Managed Health Care. Licensing requirements are the same for us as they are for health plans serving commercial or Medicare members. We must demonstrate that our provider network is adequate, that our quality and utilization management processes comply with state requirements, and that we have adequate procedures in place for responding to member and provider complaints and grievances. We must also demonstrate that we can meet requirements for the timely processing of provider claims, and that we can collect and analyze the information needed to manage our quality improvement activities. In addition, we must prove that we have the financial resources necessary to pay our anticipated medical care expenses and the infrastructure needed to account for our costs.

Our health plans are required to file quarterly and annual reports of their operating results with the appropriate state regulatory agencies. These reports are accessible for public viewing. Each health plan undergoes periodic examinations and reviews by the state in which it operates. The health plans generally must obtain approval from the state before declaring dividends in excess of certain thresholds. Each health plan must maintain its net worth at an amount determined by statute or regulation. The minimum statutory net worth requirements differ by state, and are generally based on statutory minimum risk-based capital, or RBC, requirements. The RBC requirements are based on guidelines established by the National Association of Insurance Commissioners, or NAIC, and are administered by the states. Our Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin health plans are subject to RBC requirements. Any acquisition of another plan's members or its state contracts must also be approved by the state, and our ability to invest in certain financial securities may be prescribed by statute.

In addition, we are also regulated by each state's department of health services or the equivalent agency charged with oversight of Medicaid and CHIP. These agencies typically require demonstration of the same capabilities mentioned above and perform periodic audits of performance, usually annually.

Medicaid. Medicaid was established in 1965 under the U.S. Social Security Act to provide medical assistance to the poor. Although jointly funded by federal and state governments, Medicaid is a state-operated and state-implemented program. Our contracts with the state Medicaid programs impose various requirements on us in addition to those imposed by applicable federal and state laws and regulations. Within broad guidelines established by the federal government, each state:

- establishes its own member eligibility standards;
- determines the type, amount, duration, and scope of services;
- sets the rate of payment for health care services; and
- administers its own program.

We obtain our Medicaid contracts in different ways. Some states award contracts to any applicant demonstrating that it meets the state's requirements. Other states engage in a competitive bidding process. In all cases, we must demonstrate to the satisfaction of the state Medicaid program that we are able to meet the state's operational and financial requirements. These requirements are in addition to those required for a license and are targeted to the specific needs of the Medicaid population. For example:

- We must measure provider access and availability in terms of the time needed to reach the doctor's office using public transportation;
- Our quality improvement programs must emphasize member education and outreach and include measures designed to promote utilization of preventive services;
- We must have linkages with schools, city or county health departments, and other community-based providers of health care, to demonstrate our ability to coordinate all of the sources from which our members may receive care;
- We must be able to meet the needs of the disabled and others with special needs;
- Our providers and member service representatives must be able to communicate with members who do not speak English or who are deaf; and
- Our member handbook, newsletters, and other communications must be written at the prescribed reading level, and must be available in languages other than English.

In addition, we must demonstrate that we have the systems required to process enrollment information, to report on care and services provided, and to process claims for payment in a timely fashion. We must also have the financial resources needed to protect the state, our providers, and our members against the insolvency of one of our health plans.

Medicare. Medicare is a federal program that provides eligible persons age 65 and over and some disabled persons a variety of hospital, medical insurance, and prescription drug benefits. Medicare is funded by Congress, and administered by CMS. Medicare beneficiaries have the option to enroll in a Medicare Advantage plan. Under Medicare Advantage, managed care plans contract with CMS to provide benefits that are comparable to original Medicare in exchange for a fixed PMPM premium payment that varies based on the county in which a member resides, the demographics of the member, and the member's health condition.

The Medicare Prescription Drug, Improvement and Modernization Act of 2003, or MMA, made numerous changes to the Medicare program, including expanding the Medicare program to include a prescription drug benefit. Since 2006, Medicare beneficiaries have had the option of selecting a new prescription drug benefit from an existing Medicare Advantage plan. The drug benefit, available to beneficiaries for a monthly premium, is subject to certain cost sharing depending upon the specific benefit design of the selected plan. Plans are not required to offer the same benefits, but are required to provide coverage that is at least actuarially equivalent to the standard drug coverage delineated in the MMA.

On July 15, 2008, the Medicare Improvements for Patients and Providers Act, or MIPPA, became law and, in September 2008, CMS promulgated implementing regulations. MIPPA impacts a broad range of Medicare activities and impacts all types of Medicare managed care plans. MIPPA and subsequent CMS guidance place prohibitions and limitations on certain sales and marketing activities of Medicare Advantage plans. Among other things, Medicare Advantage plans are not permitted to make unsolicited outbound calls to potential members or engage in other forms of unsolicited contact, establish appointments without documented consent from potential members, or conduct sales events in certain provider-based settings. MIPPA also establishes certain restrictions on agent and broker compensation.

HIPAA. In 1996, Congress enacted the Health Insurance Portability and Accountability Act, or HIPAA. All health plans are subject to HIPAA, including ours. HIPAA generally requires health plans to:

- Establish the capability to receive and transmit electronically certain administrative health care transactions, like claims payments, in a standardized format;
- Afford privacy to patient health information; and
- Protect the privacy of patient health information through physical and electronic security measures.

The ACA created additional tools for fraud prevention, including increased oversight of providers and suppliers participating or enrolling in Medicaid, CHIP, and Medicare. Those enhancements included mandatory licensure for all providers, and site visits, fingerprinting, and criminal background checks for higher risk providers. On September 23, 2010, CMS issued proposed regulations designed to implement these requirements. It is not clear at this time the degree to which managed care providers would have to comply with these new requirements, many of which resemble procedures that we already have in place.

The Health Information Technology for Economic and Clinical Health Act ("HITECH Act"), a part of the American Recovery and Reinvestment Act of 2009, or ARRA, modified certain provisions of HIPAA by, among other things, extending the privacy and security provisions to business associates, mandating new regulations around electronic medical records, expanding enforcement mechanisms, allowing the state Attorneys General to bring enforcement actions, and increasing penalties for violations. The U.S. Department of Health and Human Services, as required by the HITECH Act, has issued interim final rules that set forth the breach notification obligations applicable to covered entities and their business associates, or the HHS Breach Notification Rule. The various requirements of the HITECH Act and the HHS Breach Notification Rule have different compliance dates, some of which have passed and some of which will occur in the future. With respect to those requirements whose compliance dates have passed, we believe that we are in compliance with these provisions. With respect to those requirements whose compliance dates are in the future, we are reviewing our current practices and identifying those which may be impacted by upcoming regulations. It is our intention to implement these new requirements on or before the applicable compliance dates.

Fraud and Abuse Laws. Our operations are subject to various state and federal health care laws commonly referred to as "fraud and abuse" laws. Fraud and abuse prohibitions encompass a wide range of activities, including kickbacks for referral of members, billing for unnecessary medical services, improper marketing, and violations of patient privacy rights. These fraud and abuse laws include the federal False Claims Act which prohibits the knowing filing of a false claim or the knowing use of false statements to obtain payment from the federal government. Many states have false claim act statutes that closely resemble the federal False Claims Act. If an entity is determined to have violated the federal False Claims Act, it must pay three times the actual damages sustained by the government, plus mandatory civil penalties up to fifty thousand dollars for each separate false claim. Suits filed under the Federal False Claims Act, known as *"qui tam"* actions, can be brought by any individual on behalf of the government and such individuals (known as "relators" or, more commonly, as "whistleblowers") may share in any amounts paid

by the entity to the government in fines or settlement. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines or be excluded from the Medicaid, Medicare or other state or Federal health care programs as a result of an investigation arising out of such action. In addition, the Deficit Reduction Action of 2005, or DRA, encourages states to enact state-versions of the federal False Claims Act that establish liability to the state for false and fraudulent Medicaid claims and that provide for, among other things, claims to be filed by *qui tam* relators.

Companies involved in public health care programs such as Medicaid are often the subject of fraud and abuse investigations. The regulations and contractual requirements applicable to participants in these public sector programs are complex and subject to change. Violations of certain fraud and abuse laws applicable to us could result in civil monetary penalties, criminal fines and imprisonment, and/or exclusion from participation in Medicaid, Medicare, other federal health care programs and federally funded state health programs.

Federal and state governments have made investigating and prosecuting health care fraud and abuse a priority. Although we believe that our compliance efforts are adequate, we will continue to devote significant resources to support our compliance efforts.

Employees

As of December 31, 2012, we had approximately 5,800 employees. Our employee base is multicultural and reflects the diverse Medicaid and Medicare membership we serve. We believe we have good relations with our employees. None of our employees is represented by a union.

Executive Officers of the Registrant

J. Mario Molina, M.D., 54, has served as President and Chief Executive Officer since succeeding his father and company founder, Dr. C. David Molina, in 1996. He has also served as Chairman of the Board since 1996. Prior to that, he served as Medical Director from 1991 through 1994 and was Vice President responsible for provider contracting and relations, member services, marketing and quality assurance from 1994 to 1996. He earned an M.D. from the University of Southern California and performed his medical internship and residency at the Johns Hopkins Hospital. Dr. Molina is the brother of John C. Molina.

John C. Molina, J.D., 48, has served in the role of Chief Financial Officer since 1995, and has been employed by the Company for over 30 years in a variety of positions. He also has served as a director since 1994. Mr. Molina is a member of the Los Angeles branch of the Federal Reserve Bank of San Francisco's board of directors. Mr. Molina holds a Juris Doctorate from the University of Southern California School of Law. Mr. Molina is the brother of Dr. J. Mario Molina.

Terry P. Bayer, 62, has served as our Chief Operating Officer since 2005. She had formerly served as our Executive Vice President, Health Plan Operations. Ms. Bayer has over 30 years of health care management experience, including staff model clinic administration, provider contracting, managed care operations, disease management, and home care. Prior to joining us, her professional experience included regional responsibility at FHP, Inc. and multi-state responsibility as Regional Vice President at Maxicare; Partners National Health Plan, a joint venture of Aetna Life Insurance Company and Voluntary Hospital Association (VHA); and Lincoln National. She has also served as Executive Vice President of Managed Care at Matria Healthcare, President and Chief Operating Officer of Praxis Clinical Services, and as Western Division President of AccentCare. She holds a Juris Doctorate from Stanford University, a Master's degree in Public Health from the University of California, Berkeley, and a Bachelor's degree in Communications from Northwestern University.

Joseph W. White, 54, has served as our Chief Accounting Officer since 2007. In his role as Chief Accounting Officer, Mr. White is responsible for oversight of the Company's accounting, reporting, forecasting, budgeting, actuarial, procurement, treasury and facilities functions. Mr. White has over 30 years of financial management experience in the health care industry. Prior to joining the Company in 2003, Mr. White worked for Maxicare Health Plans, Inc. from 1987 through 2002. Mr. White holds a Master's degree in Business Administration and a Bachelor's degree in Commerce from the University of Virginia. Mr. White is a Certified Public Accountant.

Jeff D. Barlow, 50, has served as our Senior Vice President, General Counsel, and Secretary since 2010. As General Counsel, Mr. Barlow is responsible for setting the overall legal strategy of the Company, and for providing legal counsel to senior management, to the board of directors, and to the consolidated organization. Before joining the Company, Mr. Barlow worked for the national law firm of DLA Piper in its corporate securities group. Mr. Barlow holds a Juris Doctorate from the University of Pittsburgh School of Law, a Master's degree in Public Health from the University of California, Berkeley, and a Bachelor's degree in Philosophy from the University of Utah.

Intellectual Property

We have registered and maintain various service marks, trademarks and trade names that we use in our businesses, including marks and names incorporating the "Molina" or "Molina Healthcare" phrase, and from time to time we apply for additional

registrations of such marks. We utilize these and other marks and names in connection with the marketing and identification of products and services. We believe such marks and names are valuable and material to our marketing efforts.

Item 1A: ***Risk Factors***

RISK FACTORS

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

This Annual Report on Form 10-K and the documents we incorporate by reference in this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Other than statements of historical fact, all statements that we include in this report and in the documents we incorporate by reference may be deemed to be forward-looking statements for purposes of the Securities Act and the Exchange Act. Such forward-looking statements may be identified by words such as "anticipates," "believes," "could," "estimates," "expects," "guidance," "intends," "may," "outlook," "plans," "projects," "seeks," "will," or similar words or expressions.

Investing in our securities involves a high degree of risk. Before making an investment decision, you should carefully read and consider the following risk factors, as well as the other information we include or incorporate by reference in this report and the information in the other reports we file with the U.S. Securities Exchange Commission, or SEC. Such risk factors should be considered not only with regard to the information contained in this annual report, but also with regard to the information and statements in the other periodic or current reports we file with the SEC, as well as our press releases, presentations to securities analysts or investors, or other communications made by or with the approval of one of our executive officers. No assurance can be given that we will actually achieve the results contemplated or disclosed in our forward-looking statements. Such statements may turn out to be wrong due to the inherent uncertainties associated with future events. Accordingly, you should not place undue reliance on our forward-looking statements, which reflect management's analyses, judgments, beliefs, or expectations only as of the date they are made.

If any of the events described in the following risk factors actually occur, our business, results of operations, financial condition, cash flows, or prospects could be materially adversely affected. The risks and uncertainties described below are those that we currently believe may materially affect us. Additional risks and uncertainties not currently known to us or that we currently deem immaterial may also affect our business and operations. As such, you should not consider this list to be a complete statement of all potential risks or uncertainties. Except to the extent otherwise required by federal securities laws, we do not undertake to address or update forward-looking statements in future filings or communications regarding our business or operating results, and do not undertake to address how any of these factors may have caused results to differ from discussions or information contained in previous filings or communications.

Risks Related to Our Health Plans Business

Numerous risks associated with the Affordable Care Act and its implementation could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

In March 2010, President Obama signed both the Patient Protection and Affordable Care Act and the Health Care and Education Affordability Reconciliation Act, commonly referred to together as the Affordable Care Act, or the ACA. The ACA enacts comprehensive changes to the United States health care system, elements of which will be phased in at various stages over the next several years. However, the most significant changes effected by the ACA are currently scheduled to be implemented as of January 1, 2014. There are a multitude of risks associated with the scope of change in the health care system represented by the ACA, including, but not limited to, the following:

- ***Risks associated with the health care excise tax.*** One notable provision of the ACA is an excise tax that applies to most health plans, including both commercial health plans and Medicaid and/or Medicare managed care plans like Molina Healthcare. While characterized as a "fee" in the text of the ACA, the intent of Congress was to impose a broad-based health insurance industry excise tax, with the understanding that the tax could be passed on to consumers, most likely through slightly higher commercial insurance premiums. However, Medicaid is jointly paid for by the federal government and by state governments, so the cost of this excise tax, as it may be applied to Medicaid plans, will be passed on in the form of higher Medicaid costs and rates. In Medicaid and Medicare, capitated rates paid to managed care plans are required to be developed using generally accepted principles of actuarial soundness. Actuarial soundness requires that the full costs of doing business, including the costs of both federal and state taxes, be considered and factored into the applicable rate. Thus, for Medicaid and/or Medicare managed care plans like Molina Healthcare, Inc., the excise tax will be included in their capitated rates. Because of the novelty of this new tax, actuaries have never factored the tax into the development of capitated rates, an exercise which must be undertaken during 2013 and well in advance of the 2014 calendar year when the tax is scheduled to go into effect. Moreover, because the tax will be based on a health plan's market share as applied to a total excise tax base of $8 billion in 2014 (and rising thereafter), there is substantial uncertainty regarding the actual size of the tax assessment on Molina. Currently, we project that the excise tax assessment on Molina will be approximately $100 million. Since this amount is not deductible for income tax purposes under current law, and since our total net income for fiscal year 2011 was $20.8 million, and our net income for fiscal year 2012 was $9.8 million,

our estimated tax rate for 2014 could be driven to 100%, and the excise tax could effectively equal the entire amount of our projected earnings. We and others in the health care industry are working with Congress to carve out the application of the excise tax on Medicaid plans. As an alternative to the repeal of the tax as it applies to Medicaid managed care plans, we and others in the health care industry will also be working with state actuaries to take account of the tax in the calculation of our 2014 rates. However, state budget constraints, inaccurate actuarial calculations, inadequate federal oversight of actuarial soundness, and market competition could result in a failure to reflect in our rates the full amount of the excise tax. If the excise tax is imposed as enacted on Medicaid managed care plans, or we are unable to obtain premium increases to fully offset the impact of the tax or otherwise adjust our business model, our business, financial condition, cash flows, and results of operations could be materially adversely affected .

- ***Risks associated with the duals expansion.*** Nine million low-income elderly and disabled people are covered under both the Medicare and Medicaid programs. These beneficiaries, often called “dual eligibles,” are more likely than other Medicare beneficiaries to be frail, live with multiple chronic conditions, and have functional and cognitive impairments. Medicare is their primary source of health insurance coverage, as it is for the nearly 50 million elderly and under-65 disabled beneficiaries in 2012. Medicaid supplements Medicare by paying for services not covered by Medicare, such as dental care and long-term care services and supports, and by helping to cover Medicare's premiums and cost-sharing requirements. Together, these two programs help to shield very low-income Medicare beneficiaries from potentially unaffordable out-of-pocket medical and long-term care costs. Policymakers at the federal and state level are increasingly developing initiatives for dual eligibles, both to improve the coordination of their care, and to reduce spending. The Centers for Medicare and Medicaid Services, or CMS, has implemented several demonstration projects designed to improve the coordination of care for dual eligibles and to reduce Medicare and Medicaid spending. These demonstrations include issuing contracts to 15 states to design a program to integrate Medicare and Medicaid services for dual eligibles in the relevant state. Our health plans in California, Illinois, Michigan, Ohio, Texas, and Washington intend to take part in the duals demonstrations in those states. Beginning in September 2013, our California plan intends to serve duals in Riverside, San Bernardino, and San Diego counties, and may participate with Health Net, Inc. for the duals contract in Los Angeles County. Our new Illinois plan will serve duals in Central Illinois beginning in 2014. Our Michigan plan will respond to a request for proposals to serve duals beginning in late 2013. Our Ohio plan will serve duals in three regions in southwestern Ohio (Dayton, Columbus and Cincinnati) beginning in late 2013. The state of Texas announced that it intends to cover duals through its existing Medicaid contracts beginning in 2014. Our Washington plan will respond to a request for proposals to serve duals also beginning in 2014.

  There are numerous risks associated with the initial implementation of a new program, with a health plan's expansion into a new service area, or with the provision of medical services to a new population which has not previously been in managed care. One such risk is the development of actuarially sound rates. Because there is limited historical information on which to develop rates, certain assumptions are required to be made which may subsequently prove to have been inaccurate. Rates of utilization could be significantly higher than had been projected, or the assumptions of policymakers about the amount of savings that could be achieved through the use of utilization management in managed care could be seriously flawed. Moreover, because of our lack of actuarial experience for that program, region, or population, our reserve levels may be set at an inadequate level. For instance, these problems arose at our Texas health plan in the second quarter of 2012, leading to extremely elevated medical care costs and substantial losses at the health plan. All of these risks are presented in the implementation of the duals demonstration programs. In the event these risks materialize at one or more of our health plans, the negative results of that health plan or plans could adversely affect our business, financial condition, cash flows, and results of operations.

- ***Risks associated with the Medicaid expansion.*** Among other things, by January 1, 2014, in the states that elect to participate, the ACA provides that the Medicaid program will be greatly expanded to provide eligibility to nearly all low-income people under age 65 with incomes at or below 138% of the federal poverty line. As a result, millions of low-income adults without children who currently cannot qualify for coverage, as well as many low-income parents and, in some instances, children now covered through CHIP, will be made eligible for Medicaid. As of February 27, 2013, among the states where we operate our health plans, the states of California, Florida, Michigan, New Mexico, Ohio, and Washington have indicated that they intend to participate in the Medicaid expansion; the states of Texas and Wisconsin have indicated that they do not intend to participate in the expansion; and the state of Utah is undecided. In those states that participate in the expansion, our Medicaid membership is likely to grow appreciably. The new enrollees in our health plans will represent a population that is different from the population of Medicaid enrollees we have historically managed. In addition, such enrollees may be unfamiliar with managed care, and may have substantial pent-up demand for medical services that could result in greater than anticipated rates of utilization. All of the risk factors described above with regard to the duals demonstration programs apply equally to the Medicaid expansion.

- ***Risks associated with the insurance marketplaces .*** Under the ACA, insurance marketplaces will be online marketplaces organized on a state-by-state basis (although in many instances the insurance marketplace in a state will be operated by the federal government, and there could also be regional marketplaces where states combine their marketplace products).

In the insurance marketplace, individuals and groups can purchase health insurance that in many instances will be federally subsidized (up to 400% of the federal poverty level by individual or family). We currently intend to participate in the insurance marketplaces in the states in which we operate our health plans. Our principal focus in participating in the marketplace is to capture the transition in membership that may result from a Medicaid member's income rising above the 138% level of the federal poverty line. By retaining that member in the marketplace, if the member's income subsequently declines, we will continuously serve that same member in all instances and not "lose" the member to another health plan. We endorse the so-called "bridge plan" as the best way to serve low-income persons who may qualify for coverage through the insurance marketplaces, and will be working with legislators and regulators during 2013 to advocate for the merits of the bridge plan. All of the risk factors described above with regard to the duals demonstration programs apply equally to our participation in the insurance marketplaces.

- ***Risk associated with implementing regulations.*** There are many parts of the ACA that will require further guidance in the form of regulations. Due to the breadth and complexity of the ACA, the lack of implementing regulations and interpretive guidance, and the phased-in nature of the ACA's implementation, the overall impact of the ACA on our business and on the health industry in general over the coming years is difficult to predict and not yet fully known.

Our profitability depends on our ability to accurately predict and effectively manage our medical care costs.

Our profitability depends to a significant degree on our ability to accurately predict and effectively manage our medical care costs. Historically, our medical care ratio, meaning our medical care costs as a percentage of our premium revenue net of premium tax, has fluctuated substantially, and has also varied across our state health plans. Because the premium payments we receive are generally fixed in advance and we operate with a narrow profit margin, relatively small changes in our medical care ratio can create significant changes in our overall financial results. For example, if our overall medical care ratio for the year ended December 31, 2012 of 89.9% had been one percentage point higher, or 90.9%, our results for the year ended December 31, 2012 would have been a net loss of approximately $(0.55) per diluted share rather than our actual net income of $0.21 per diluted share, a decrease of over 300%.

Factors that may affect our medical care costs include the level of utilization of health care services, unexpected patterns in the annual influenza, or flu, season, increases in hospital costs, an increased incidence or acuity of high dollar claims related to catastrophic illnesses or medical conditions such as hemophilia for which we do not have adequate reinsurance coverage, increased maternity costs, payment rates that are not actuarially sound, changes in state eligibility certification methodologies, relatively low levels of hospital and specialty provider competition in certain geographic areas, increases in the cost of pharmaceutical products and services, changes in health care regulations and practices, epidemics, new medical technologies, and other various external factors. Many of these factors are beyond our control and could reduce our ability to accurately predict and effectively manage the costs of providing health care services. The inability to forecast and manage our medical care costs or to establish and maintain a satisfactory medical care ratio, either with respect to a particular state health plan or across the consolidated entity, could have a material adverse effect on our business, financial condition, cash flows, and results of operations.

State and federal budget deficits may result in Medicaid, CHIP, or Medicare funding cuts which could reduce our revenues and profit margins.

Nearly all of our premium revenues come from the joint federal and state funding of the Medicaid and CHIP programs. Due to high unemployment levels, Medicaid enrollment levels and Medicaid costs remain elevated at the same time that state budgets are suffering from significant fiscal strain. Because Medicaid is one of the largest expenditures in every state budget, and one of the fastest-growing, it is a prime target for cost-containment efforts. All of the states in which we currently operate our health plans are currently facing significant budgetary pressures. These budgetary pressures may result in unexpected Medicaid, CHIP, or Medicare rate cuts which could reduce our revenues and profit margins. Moreover, some federal deficit reduction proposals would fundamentally change the structure and financing of the Medicaid program. Recently, various proposals have been advanced to reduce annual federal deficits and to slow the increase in the national debt. A number of these proposals include both tax increases and spending reductions in discretionary programs and mandatory programs, such as Social Security, Medicare, and Medicaid.

In addition, potential reductions in Medicare and Medicaid spending have been included in the discussions in Congress regarding deficit reduction measures. The Budget Control Act of 2011 provides that Medicare payments may be reduced by no more than 2% and certain other programs, including Medicaid, would be exempt from the automatic spending cuts associated with sequestration. At this time, we are unable to determine how any Congressional spending cuts will affect Medicare and Medicaid reimbursement in the future. We also cannot predict the initiatives that may be adopted in the future or their full impact. There likely will continue to be legislative and regulatory proposals at the federal and state levels directed at containing or lowering the cost of health care that, if adopted, could potentially have a material adverse effect on our business, financial condition, cash flows, and results of operations.

A failure to accurately estimate incurred but not reported medical care costs may negatively impact our results of operations.

Because of the time lag between when medical services are actually rendered by our providers and when we receive, process, and pay a claim for those medical services, we must continually estimate our medical claims liability at particular points in time, and establish claims reserves related to such estimates. Our estimated reserves for such "incurred but not paid," or IBNP, medical care costs, are based on numerous assumptions. We estimate our medical claims liabilities using actuarial methods based on historical data adjusted for claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our ability to accurately estimate claims for our newer lines of business or populations, such as with respect to duals, Medicaid expansion members, or aged, blind or disabled Medicaid members, is impacted by the more limited experience we have had with those populations. With regard to the new previously uninsured Medicaid members we expect to enroll in 2014 due to the Medicaid expansion, certain new members may be disproportionately costly due to high utilization in their first several months of Medicaid membership as a result of their previously having been uninsured and therefore not seeking or deferring medical treatment.

The IBNP estimation methods we use and the resulting reserves that we establish are reviewed and updated, and adjustments, if deemed necessary, are reflected in the current period. Given the numerous uncertainties inherent in such estimates, our actual claims liabilities for a particular quarter or other period could differ significantly from the amounts estimated and reserved for that quarter or period. Our actual claims liabilities have varied and will continue to vary from our estimates, particularly in times of significant changes in utilization, medical cost trends, and populations and markets served.

If our actual liability for claims payments is higher than estimated, our earnings per share in any particular quarter or annual period could be negatively affected. Our estimates of IBNP may be inadequate in the future, which would negatively affect our results of operations for the relevant time period. Furthermore, if we are unable to accurately estimate IBNP, our ability to take timely corrective actions may be limited, further exacerbating the extent of the negative impact on our results.

An increased incidence of flu in 2013 in one or more of the states in which we operate a health plan could significantly increase utilization rates and medical costs.

Our results during 2009 were significantly impacted by the widespread incidence of the H1N1 flu in the states in which we operate our health plans. During December 2012 and January 2013, the CDC reported that the incidence of the flu nationwide had been very high and is expected to continue through the 2013 flu season. We have taken steps to appropriately set our IBNP reserves to account for the high incidence of the flu. However, if the utilization rates of our members are higher than we anticipated our results in the first quarter of 2013 could be materially and adversely affected.

If the responsive bids of our health plans for new or renewed Medicaid contracts are not successful, or if our government contracts are terminated or are not renewed, our premium revenues could be materially reduced and our operating results could be negatively impacted.

Our government contracts may be subject to periodic competitive bidding. In such process, our health plans may face competition as other plans, many with greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. For instance, the state contract of our Florida health plan will be subject to competitive bidding in 2013 for a new contract commencing January 1, 2014. In the event the responsive bid of our Florida health plan or those of our other health plans are not successful, we will lose our Medicaid contract in the applicable state, and our premium revenues could be materially reduced as a result. Alternatively, even if our responsive bids are successful, the bids may be based upon assumptions regarding enrollment, utilization, medical costs, or other factors which could result in the Medicaid contract being less profitable than we had expected.

In addition, all of our contracts may be terminated for cause if we breach a material provision of the contract or violate relevant laws or regulations. Our contracts with the states are also subject to cancellation by the state in the event of the unavailability of state or federal funding. In some jurisdictions, such cancellation may be immediate and in other jurisdictions a notice period is required. Further, most of our contracts are terminable without cause.

Our government contracts generally run for periods of one year to three years, and may be successively extended by amendment for additional periods if the relevant state agency so elects. Our current contracts expire on various dates over the next several years. Although our health plans have generally been successful in obtaining the renewal and/or extension of their state contracts, there can be no guarantee that any of our state government contracts will be renewed or extended, as shown by the loss of our Missouri contract in 2012. If we are unable to renew, successfully re-bid, or compete for any of our government contracts, or if any of our contracts are terminated or renewed on less favorable terms, our business, financial condition, cash flows, and results of operations could be adversely affected.

In the event the expected reduction in the rates paid to our California health plan is not finally implemented, is not made effective retroactively to July 1, 2011, or is otherwise modified, our results of operations may be affected.

California Assembly Bill 97, or AB 97, is legislation that was signed by Governor Jerry Brown on March 24, 2011. Among other things, AB 97 proposes to effect a 10% reduction in Medi-Cal provider rates. It is currently uncertain whether the rate cut will be implemented, and if it is implemented, whether it will be effective retroactively to July 1, 2011. If the proposed rate cut is not finally implemented, if it is not made effective retroactively to July 1, 2011, or if it is otherwise modified from its current form, the results of our California health plan could be negatively affected depending on the action taken. In addition, recoveries from providers related to any final implemented rate cut could also affect the results of our California health plan.

States may not adequately compensate us for the value of drug rebates that were previously earned by the Company but that are now collectible by the states.

The ACA includes certain provisions that change the way drug rebates are handled for drug claims filled by Medicaid managed care plans. Retroactive to March 23, 2010, state Medicaid programs are now required to collect federal rebates on all Medicaid-covered outpatient drugs dispensed or administered to Medicaid managed care enrollees (excluding certain drugs that are already discounted), and pharmaceutical manufacturers are required to pay specified rebates directly to the state Medicaid programs for those claims. This has impacted the level of rebates received by managed care plans from the manufacturers for Medicaid managed care enrollees. Many manufacturers have renegotiated or discontinued their rebate contracts with Medicaid managed care plans and pharmacy benefits managers to offset these new rebates paid directly to state Medicaid programs. As a result, the drug rebate amounts paid to managed care plans like ours continue to remain at levels that are much lower than prior to the ACA implementation. There are provisions in the ACA that require rates paid to Medicaid managed care to be actuarially sound in regard to drug rebates. Although we will be pursuing rate increases with state agencies to make us whole for the rebate amounts lost, there can be no assurances that the premium increases we may receive, if any, will be adequate to offset the amount of the lost rebates. If such premium increases prove to be inadequate, our business, financial condition, cash flows, and results of operations could be adversely affected.

We derive our premium revenues from a relatively small number of state health plans.

We currently derive our premium revenues from nine state health plans. If we are unable to continue to operate in any of those nine states, or if our current operations in any portion of the states we are in are significantly curtailed, our revenues could decrease materially. Our reliance on operations in a limited number of states could cause our revenue and profitability to change suddenly and unexpectedly, depending on an abrupt loss of membership, significant rate reductions, a loss of a material contract, legislative actions, changes in Medicaid eligibility methodologies, catastrophic claims, an epidemic, an unexpected increase in utilization, general economic conditions, and similar factors in those states. Our inability to continue to operate in any of the states in which we currently operate, or a significant change in the nature of our existing operations, could adversely affect our business, financial condition, cash flows, and results of operations.

There are performance risks and other risks associated with certain provisions in the state Medicaid contracts of several of our health plans.

The state contracts of our New Mexico, Ohio, Texas, and Wisconsin health plans contain provisions pertaining to at-risk premiums that require us to meet certain quality performance measures to earn all of our contract revenues in those states. In the event we are unsuccessful in achieving the stated performance measure, the health plan will be unable to recognize the revenue associated with that measure. Any failure of our health plans to satisfy one of these performance measure provisions could adversely affect our business, financial condition, cash flows, and results of operations. In addition, the state contracts of our California, Florida, New Mexico, Texas, and Washington health plans, and our contract with CMS, contain provisions pertaining to medical cost floors, administrative cost and profit ceilings, and profit-sharing arrangements. These provisions are subject to interpretation and application by our health plans. In the event the applicable state government agency disagrees with our health plan's interpretation or application of the sometimes complicated contract provisions at issue, the health plan could be required to adjust the amount of its obligations under these provisions and/or make a payment or payments to the state. Any interpretation or application of these provisions at variance with our health plan's interpretation or inconsistent with our revenue recognition accounting treatment could adversely affect our business, financial condition, cash flows, and results of operations.

Failure to attain profitability in any new start-up operations could negatively affect our results of operations.

Start-up costs associated with a new business can be substantial. For example, to obtain a certificate of authority to operate as a health maintenance organization in most jurisdictions, we must first establish a provider network, have infrastructure and required systems in place, and demonstrate our ability to obtain a state contract and process claims. Often, we are also required to contribute significant capital to fund mandated net worth requirements, performance bonds or escrows, or contingency guaranties. If we are unsuccessful in obtaining the certificate of authority, winning the bid to provide services, or attracting members in sufficient numbers to cover our costs, any new business of ours would fail. We also could be required by the state to continue to provide services for some period of time without sufficient revenue to cover our ongoing costs or to recover our significant start-up costs.

Even if we are successful in establishing a profitable health plan in a new state, increasing membership, revenues, and medical costs will trigger increased mandated net worth requirements which could substantially exceed the net income generated by the health plan. Rapid growth in an existing state will also result in increased net worth requirements. In such circumstances, we may not be able to fund on a timely basis or at all the increased net worth requirements with our available cash resources. The expenses associated with starting up a health plan in a new state or expanding a health plan in an existing state could have an adverse impact on our business, financial condition, cash flows, and results of operations.

Receipt of inadequate or significantly delayed premiums could negatively affect our business, financial condition, cash flows, and results of operations.

Our premium revenues consist of fixed monthly payments per member, and supplemental payments for other services such as maternity deliveries. These premiums are fixed by contract, and we are obligated during the contract periods to provide health care services as established by the state governments. We use a large portion of our revenues to pay the costs of health care services delivered to our members. If premiums do not increase when expenses related to medical services rise, our medical margins will be compressed, and our earnings will be negatively affected. A state could increase hospital or other provider rates without making a commensurate increase in the rates paid to us, or could lower our rates without making a commensurate reduction in the rates paid to hospitals or other providers. In addition, if the actuarial assumptions made by a state in implementing a rate or benefit change are incorrect or are at variance with the particular utilization patterns of the members of one of our health plans, our medical margins could be reduced. Any of these rate adjustments in one or more of the states in which we operate could adversely affect our business, financial condition, cash flows, and results of operations.

Furthermore, a state undergoing a budget crisis may significantly delay the premiums paid to one of our health plans. For instance, due to a prolonged budget impasse during 2010, some of the monthly premium payments made by the state of California to our California health plan were several months late. Any significant delay in the monthly payment of premiums to any of our health plans could have a material adverse affect on our business, financial condition, cash flows, and results of operations.

Difficulties in executing our acquisition strategy could adversely affect our business.

The acquisitions of other health plans and the assignment and assumption of Medicaid contract rights of other health plans have accounted for a significant amount of our growth over the last several years. Although we cannot predict with certainty our rate of growth as the result of acquisitions, we believe that additional acquisitions of all sizes will be important to our future growth strategy. Many of the other potential purchasers of these assets-particularly operators of large commercial health plans-have significantly greater financial resources than we do. Also, many of the sellers may insist on selling assets that we do not want, such as commercial lines of business, or may insist on transferring their liabilities to us as part of the sale of their companies or assets. Even if we identify suitable targets, we may be unable to complete acquisitions on terms favorable to us or obtain the necessary financing for these acquisitions. For these reasons, among others, we cannot provide assurance that we will be able to complete favorable acquisitions, especially in light of the volatility in the capital markets over the past several years. Further, to the extent we complete an acquisition, we may be unable to realize the anticipated benefits from such acquisition because of operational factors or difficulty in integrating the acquisition with our existing business. This may include problems involving the integration of:

- additional employees who are not familiar with our operations or our corporate culture,
- new provider networks which may operate on terms different from our existing networks,
- additional members who may decide to transfer to other health care providers or health plans,
- disparate information, claims processing, and record-keeping systems,
- internal controls and accounting policies, including those which require the exercise of judgment and complex estimation processes, such as estimates of claims incurred but not paid, accounting for goodwill, intangible assets, stock-based compensation, and income tax matters, and
- new regulatory schemes, relationships, practices, and compliance requirements.

Also, we are generally required to obtain regulatory approval from one or more state agencies when making acquisitions of health plans. In the case of an acquisition of a business located in a state in which we do not already operate, we would be required to obtain the necessary licenses to operate in that state. In addition, although we may already operate in a state in which we acquire a new business, we would be required to obtain regulatory approval if, as a result of the acquisition, we will operate in an area of that state in which we did not operate previously. Furthermore, we may be required to renegotiate contracts with the network providers of the acquired business. We may be unable to obtain the necessary governmental approvals, comply with these regulatory requirements or renegotiate the necessary provider contracts in a timely manner, if at all.

In addition, we may be unable to successfully identify, consummate and integrate future acquisitions, including integrating the acquired businesses on our information technology platform, or to implement our operations strategy in order to operate

acquired businesses profitably. Furthermore, we may incur significant transaction expenses in connection with a potential acquisition which may or may not be consummated. These expenses could impact our selling, general and administrative expense ratio.

For all of the above reasons, we may not be able to consummate our proposed acquisitions as announced from time to time to sustain our pattern of growth or to realize benefits from completed acquisitions.

We face periodic routine and non-routine reviews, audits, and investigations by government agencies, and these reviews and audits could have adverse findings, which could negatively impact our business.

We are subject to various routine and non-routine governmental reviews, audits, and investigations. Violation of the laws, regulations, or contract provisions governing our operations, or changes in interpretations of those laws and regulations, could result in the imposition of civil or criminal penalties, the cancellation of our contracts to provide managed care services, the suspension or revocation of our licenses, the exclusion from participation in government sponsored health programs, or the revision and recoupment of past payments made based on audit findings. If we are unable to correct any noted deficiencies, or become subject to material fines or other sanctions, we might suffer a substantial reduction in profitability, and might also lose one or more of our government contracts and as a result lose significant numbers of members and amounts of revenue. In addition, government receivables are subject to government audit and negotiation, and government contracts are vulnerable to disagreements with the government. The final amounts we ultimately receive under government contracts may be different from the amounts we initially recognize in our financial statements.

We rely on the accuracy of eligibility lists provided by state governments. Inaccuracies in those lists would negatively affect our results of operations.

Premium payments to our health plan segment are based upon eligibility lists produced by state governments. From time to time, states require us to reimburse them for premiums paid to us based on an eligibility list that a state later discovers contains individuals who are not in fact eligible for a government sponsored program or are eligible for a different premium category or a different program. Alternatively, a state could fail to pay us for members for whom we are entitled to payment. Our results of operations would be adversely affected as a result of such reimbursement to the state if we make or have made related payments to providers and are unable to recoup such payments from the providers.

We are subject to extensive fraud and abuse laws which may give rise to lawsuits and claims against us, the outcome of which may have a material adverse effect on our financial position, results of operations, and cash flows.

Because we receive payments from federal and state governmental agencies, we are subject to various laws commonly referred to as "fraud and abuse" laws, including the federal False Claims Act, which permit agencies and enforcement authorities to institute suit against us for violations and, in some cases, to seek treble damages, penalties, and assessments. Liability under such federal and state statutes and regulations may arise if we know, or it is found that we should have known, that information we provide to form the basis for a claim for government payment is false or fraudulent, and some courts have permitted False Claims Act suits to proceed if the claimant was out of compliance with program requirements. *Qui tam* actions under federal and state law can be brought by any individual on behalf of the government. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines, or be excluded from the Medicare, Medicaid, or other state or federal health care programs as a result of an investigation arising out of such action. Many states, including states where we currently operate, have enacted parallel legislation. In the event we are subject to liability under a *qui tam* action, our business and operating results could be adversely affected.

Our business could be adversely impacted by adoption of the new ICD-10 standardized coding set for diagnoses.

The U.S. Department of Health and Human Services, or HHS, has released rules pursuant to HIPAA which mandate the use of standard formats in electronic health care transactions. HHS also has published rules requiring the use of standardized code sets and unique identifiers for providers. Originally, the federal government required that health care organizations, including health insurers, upgrade to updated and expanded standardized code sets used for documenting health conditions by October 2013. These new standardized code sets, known as ICD-10, will require substantial investments from health care organizations, including us. However, CMS has now postponed implementation of ICD-10 to October 2014. While use of the ICD-10 code sets will require significant administrative changes, we believe that the cost of compliance with these regulations has not had and is not expected to have a material adverse effect on our cash flows, financial position, or results of operations. However, these changes may result in errors and otherwise negatively impact our service levels, and we may experience complications related to supporting customers that are not fully compliant with the revised requirements as of the applicable compliance date. Furthermore, if physicians fail to provide appropriate codes for services provided as a result of the new coding set, we may not be reimbursed, or adequately reimbursed, for such services.

If we are unable to deliver quality care, maintain good relations with the physicians, hospitals, and other providers with whom we contract, or if we are unable to enter into cost-effective contracts with such providers, our profitability could be adversely affected.

We contract with physicians, hospitals, and other providers as a means to ensure access to health care services for our members, to manage health care costs and utilization, and to better monitor the quality of care being delivered. We compete with other health plans to contract with these providers. We believe providers select plans in which they participate based on criteria including reimbursement rates, timeliness and accuracy of claims payment, potential to deliver new patient volume and/or retain existing patients, effectiveness of resolution of calls and complaints, and other factors. We cannot be sure that we will be able to successfully attract and retain providers to maintain a competitive network in the geographic areas we serve. In addition, in any particular market, providers could refuse to contract with us, demand higher payments, or take other actions which could result in higher health care costs, disruption to provider access for current members, a decline in our growth rate, or difficulty in meeting regulatory or accreditation requirements.

The Medicaid program generally pays doctors and hospitals at levels well below those of Medicare and private insurance. Large numbers of doctors, therefore, do not accept Medicaid patients. In the face of fiscal pressures, some states may reduce rates paid to providers, which may further discourage participation in the Medicaid program.

In some markets, certain providers, particularly hospitals, physician/hospital organizations, and some specialists, may have significant market positions or even monopolies. If these providers refuse to contract with us or utilize their market position to negotiate favorable contracts which are disadvantageous to us, our profitability in those areas could be adversely affected.

Some providers that render services to our members are not contracted with our plans. In those cases, there is no pre-established understanding between the provider and our plan about the amount of compensation that is due to the provider. In some states, the amount of compensation is defined by law or regulation, but in most instances it is either not defined or it is established by a standard that is not clearly translatable into dollar terms. In such instances, providers may believe they are underpaid for their services and may either litigate or arbitrate their dispute with our plan. The uncertainty of the amount to pay and the possibility of subsequent adjustment of the payment could adversely affect our business, financial position, cash flows, and results of operations.

The insolvency of a delegated provider could obligate us to pay its referral claims, which could have an adverse effect on our business, cash flows, and results of operations.

Circumstances may arise where providers to whom we have delegated risk, due to insolvency or other circumstances, are unable to pay claims they have incurred with third parties in connection with referral services provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so or we have already paid claims to a delegated provider and payments cannot be recouped when the delegated provider becomes insolvent. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability. In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These funds are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. However, there can be no assurances that these precautionary steps will fully protect us against the insolvency of a delegated provider. Liabilities incurred or losses suffered as a result of provider insolvency could have an adverse effect on our business, financial condition, cash flows, and results of operations.

Regulatory actions and negative publicity regarding Medicaid managed care and Medicare Advantage may lead to programmatic changes and intensified regulatory scrutiny and regulatory burdens.

Several of our health care competitors have recently been involved in governmental investigations and regulatory actions which have resulted in significant volatility in the price of their stock. In addition, there has been negative publicity and proposed programmatic changes regarding Medicare Advantage private fee-for-service plans, a part of the Medicare Advantage program in which we do not participate. These actions and the resulting negative publicity could become associated with or imputed to us, regardless of our actual regulatory compliance or programmatic participation. Such an association, as well as any perception of a recurring pattern of abuse among the health plan participants in government programs and the diminished reputation of the managed care sector as a whole, could result in public distrust, political pressure for changes in the programs in which we do participate, intensified scrutiny by regulators, additional regulatory requirements and burdens, increased stock volatility due to speculative trading, and heightened barriers to new managed care markets and contracts, all of which could have a material adverse effect on our business, financial condition, cash flows, and results of operations.

If a state fails to renew its federal waiver application for mandated Medicaid enrollment into managed care or such application is denied, our membership in that state will likely decrease.

States may only mandate Medicaid enrollment into managed care under federal waivers or demonstrations. Waivers and programs under demonstrations are approved for two- to five-year periods and can be renewed on an ongoing basis if the state applies and the waiver request is approved or renewed by CMS. We have no control over this renewal process. If a state does not renew its mandated program or the federal government denies the state's application for renewal, our business would suffer as a result of a likely decrease in membership.

If state regulators do not approve payments of dividends and distributions by our subsidiaries, it may negatively affect our business strategy.

We are a corporate parent holding company and hold most of our assets at, and conduct most of our operations through, direct subsidiaries. As a holding company, our results of operations depend on the results of operations of our subsidiaries. Moreover, we are dependent on dividends or other inter-company transfers of funds from our subsidiaries to meet our debt service and other obligations. The ability of our subsidiaries to pay dividends or make other payments or advances to us will depend on their operating results and will be subject to applicable laws and restrictions contained in agreements governing the debt of such subsidiaries. In addition, our health plan subsidiaries are subject to laws and regulations that limit the amount of dividends and distributions that they can pay to us without prior approval of, or notification to, state regulators. In California, our health plan may dividend, without notice to or approval of the California Department of Managed Health Care, amounts by which its tangible net equity exceeds 130% of the tangible net equity requirement. Our other health plans must give thirty days' advance notice and the opportunity to disapprove “extraordinary” dividends to the respective state departments of insurance for amounts over the lesser of (a) ten percent of surplus or net worth at the prior year end or (b) the net income for the prior year. The discretion of the state regulators, if any, in approving or disapproving a dividend is not clearly defined. Health plans that declare ordinary dividends must usually provide notice to the regulators ten or fifteen days in advance of the intended distribution date of the ordinary dividend. For the years ended December 31, 2012, 2011 and 2010, we received dividends from our health plan subsidiaries amounting to $80.0 million, $76.6 million and $81.3 million, respectively. The aggregate additional amounts our health plan subsidiaries could have paid us at December 31, 2012, 2011 and 2010, without approval of the regulatory authorities, were approximately $8.1 million, $17.5 million, and $18.8 million, respectively. If the regulators were to deny or significantly restrict our subsidiaries' requests to pay dividends to us, the funds available to our company as a whole would be limited, which could harm our ability to implement our business strategy or service our outstanding indebtedness.

Unforeseen changes in pharmaceutical regulations or market conditions may impact our revenues and adversely affect our results of operations.

A significant category of our health care costs relate to pharmaceutical products and services. Evolving regulations and state and federal mandates regarding coverage may impact the ability of our health plans to continue to receive existing price discounts on pharmaceutical products for our members. Other factors affecting our pharmaceutical costs include, but are not limited to, the price of pharmaceuticals, geographic variation in utilization of new and existing pharmaceuticals, and changes in discounts. The unpredictable nature of these factors may have an adverse effect on our business, financial condition, cash flows, and results of operations.

A security breach or unauthorized disclosure of sensitive or confidential member information could have an adverse effect on our business.

As part of our normal operations, we collect, process, and retain confidential member information. We are subject to various federal and state laws and rules regarding the use and disclosure of confidential member information, including HIPAA and the Gramm-Leach-Bliley Act. The Health Information Technology for Economic and Clinical Health Act, or HITECH, provisions of the HITECH American Reinvestment and Recovery Act of 2009 further expand the coverage of HIPAA by, among other things, extending the privacy and security provisions, mandating new regulations around electronic medical records, expanding enforcement mechanisms, allowing the state Attorneys General to bring enforcement actions, increasing penalties for violations, and requiring public disclosure of improper disclosures of the health information of more than 500 individuals.

Under HITECH, civil penalties for HIPAA violations by covered entities and business associates are increased up to an amount of $1.5 million per calendar year for HIPAA violations. In addition, imposition of these penalties is now more likely because HITECH strengthens enforcement. For example, commencing February 2010, HHS was required to conduct periodic audits to confirm compliance. Investigations of violations that indicate willful neglect, for which penalties are now mandatory, are statutorily required. In addition, state attorneys general are authorized to bring civil actions seeking either injunctions or damages in response to violations of HIPAA privacy and security regulations that threaten the privacy of state residents. Initially monies collected will be transferred to a division of HHS for further enforcement, and within three years, a methodology will be adopted for distributing a percentage of those monies to affected individuals to fund enforcement and provide incentive for individuals to report violations. In addition, HITECH requires us to notify affected individuals, HHS, and in some cases the media when unsecured protected health information is subject to a security breach.

HITECH also contains a number of provisions that provide incentives for providers and states to initiate certain programs related to health care and health care technology, such as electronic health records. While some HITECH provisions may not apply

to us directly, states wishing to apply for grants under HITECH, or otherwise participating in such programs, may impose new health care technology requirements on us through our contracts with state Medicaid agencies. We are unable to predict what such requirements may entail or what their effect on our business may be.

We will continue to assess our compliance obligations as regulations under HITECH are promulgated and more guidance becomes available from HHS and other federal agencies. The new privacy and security requirements, however, may require substantial operational and systems changes, employee education and resources and there is no guarantee that we be able to implement them adequately or prior to their effective date. Given HIPAA's complexity and the anticipated new regulations, which may be subject to changing and perhaps conflicting interpretation, our ongoing ability to comply with all of the HIPAA requirements is uncertain, which may expose us to the criminal and increased civil penalties provided under HITECH and may require us to incur significant costs in order to seek to comply with its requirements.

While we currently expend significant resources and have implemented solutions, processes and procedures to protect against cyber-attacks and security breaches and have no evidence to suggest that such attacks have resulted in a breach of our systems, we may need to expend additional significant resources in the future to continue to protect against potential security breaches or to address problems caused by such attacks or any breach of our systems. Because the techniques used to circumvent security systems can be highly sophisticated and change frequently, often are not recognized until launched against a target, and may originate from less regulated and remote areas around the world, we may be unable to proactively address these techniques or to implement adequate preventive measures.

Despite the security measures we have in place to ensure compliance with applicable laws and rules, our facilities and systems, and those of our third-party service providers, may be vulnerable to security breaches, acts of vandalism, acts of malicious insiders, computer viruses, misplaced or lost data, programming and/or human errors, or other similar events. Any security breach involving the misappropriation, loss or other unauthorized disclosure or use of confidential member information, whether by us or a third party, could subject us to civil and criminal penalties, divert management's time and energy and have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Risks Related to the Operation of Our Molina Medicaid Solutions Business

We may be unable to retain or renew the state government contracts of the Molina Medicaid Solutions segment on terms consistent with our expectations or at all.

Molina Medicaid Solutions currently has management contracts in only six states. If we are unable to continue to operate in any of those six states, or if our current operations in any of those six states are significantly curtailed, the revenues and cash flows of Molina Medicaid Solutions could decrease materially, and as a result our profitability would be negatively impacted.

If the responsive bids to RFPs of Molina Medicaid Solutions are not successful, our revenues could be materially reduced and our operating results could be negatively impacted.

The government contracts of Molina Medicaid Solutions may be subject to periodic competitive bidding. In such process, Molina Medicaid Solutions may face competition as other service providers, some with much greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. For instance, in 2012, the government contract of Molina Medicaid Solutions in Louisiana was subject to competitive bidding, and we were unsuccessful in being awarded a new contract. Molina Medicaid Solutions also anticipates bidding in other states which have issued RFPs for procurement of a new MMIS. In the event our responsive bids in other states are not successful, we will be unable to grow in a manner consistent with our projections. Even if our responsive bids are successful, the bids may be based upon assumptions or other factors which could result in the contract being less profitable than we had expected or had been the case prior to competitive re-bidding.

Because of the complexity and duration of the services and systems required to be delivered under the government contracts of Molina Medicaid Solutions, there are substantial risks associated with full performance under the contracts.

The state contracts of Molina Medicaid Solutions typically require significant investment in the early stages that is expected to be recovered through billings over the life of the contracts. These contracts involve the construction of new computer systems and communications networks and the development and deployment of complex technologies. Substantial performance risk exists under each contract. Some or all elements of service delivery under these contracts are dependent upon successful completion of the design, development, construction, and implementation phases. Any increased or unexpected costs or unanticipated delays in connection with the performance of these contracts, including delays caused by factors outside our control, could make these contracts less profitable or unprofitable, which could have an adverse effect on our overall business, financial condition, cash flows, and results of operations.

If we fail to comply with our state government contracts or government contracting regulations, our business may be adversely affected.

Molina Medicaid Solutions' contracts with state government customers may include unique and specialized performance requirements. In particular, contracts with state government customers are subject to various procurement regulations, contract provisions, and other requirements relating to their formation, administration, and performance. Any failure to comply with the specific provisions in our customer contracts or any violation of government contracting regulations could result in the imposition of various civil and criminal penalties, which may include termination of the contracts, forfeiture of profits, suspension of payments, imposition of fines, and suspension from future government contracting. Further, any negative publicity related to our state government contracts or any proceedings surrounding them may damage our business by affecting our ability to compete for new contracts. The termination of a state government contract, our suspension from government work, or any negative impact on our ability to compete for new contracts, could have an adverse effect on our business, financial condition, cash flows, and results of operations.

System security risks and systems integration issues that disrupt our internal operations or information technology services provided to customers could adversely affect our financial results and damage our reputation.

Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate our confidential information or that of third parties, create system disruptions, or cause shutdowns. Computer programmers and hackers also may be able to develop and deploy viruses, worms, and other malicious software programs that attack our products or otherwise exploit any security vulnerabilities of our products. In addition, sophisticated hardware and operating system software and applications that we produce or procure from third parties may contain defects in design or manufacture, including “bugs” and other problems that could unexpectedly interfere with the operation of the system. The costs to us to eliminate or alleviate security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and the efforts to address these problems could result in interruptions, delays, cessation of service, and loss of existing or potential government customers.

Molina Medicaid Solutions routinely processes, stores, and transmits large amounts of data for our clients, including sensitive and personally identifiable information. Breaches of our security measures could expose us, our customers, or the individuals affected to a risk of loss or misuse of this information, resulting in litigation and potential liability for us and damage to our brand and reputation. Accordingly, we could lose existing or potential government customers for outsourcing services or other information technology solutions or incur significant expenses in connection with our customers' system failures or any actual or perceived security vulnerabilities in our products. In addition, the cost and operational consequences of implementing further data protection measures could be significant.

Portions of our information technology infrastructure also may experience interruptions, delays, or cessations of service or produce errors in connection with systems integration or migration work that takes place from time to time. We may not be successful in implementing new systems and transitioning data, which could cause business disruptions and be more expensive, time consuming, disruptive, and resource-intensive. Such disruptions could adversely impact our ability to fulfill orders and interrupt other processes. Delayed sales, lower margins, or lost government customers resulting from these disruptions could adversely affect our financial results, reputation, and stock price.

In the course of providing services to customers, Molina Medicaid Solutions may inadvertently infringe on the intellectual property rights of others and be exposed to claims for damages.

The solutions we provide to our state government customers may inadvertently infringe on the intellectual property rights of third parties resulting in claims for damages against us. The expense and time of defending against these claims may have a material and adverse impact on our profitability. Additionally, the publicity we may receive as a result of infringing intellectual property rights may damage our reputation and adversely impact our ability to develop new MMIS business.

Inherent in the government contracting process are various risks which may materially and adversely affect our business and profitability.

We are subject to the risks inherent in the government contracting process. These risks include government audits of billable contract costs and reimbursable expenses and compliance with government reporting requirements. In the event we are found to be out of compliance with government contracting requirements, our reputation may be adversely impacted and our relationship with the government agencies we work with may be damaged, resulting in a material and adverse effect on our profitability.

Our performance on contracts, including those on which we have partnered with third parties, may be adversely affected if we or the third parties fail to deliver on commitments.

In some instances, our contracts require that we partner with other parties including software and hardware vendors to provide the complex solutions required by our state government customers. Our ability to deliver the solutions and provide the services required by our customers is dependent on our and our partners' ability to meet our customers' delivery schedules. If we or our partners fail to deliver services or products on time, our ability to complete the contract may be adversely affected, which may have a material and adverse impact on our revenue and profitability.

Risks Related to our General Business Operations

Ineffective management of our growth may negatively affect our business, financial condition, and results of operations.

Depending on acquisitions and other opportunities, we expect to continue to grow our membership and to expand into other markets. Continued rapid growth could place a significant strain on our management and on other Company resources. Our ability to manage our growth may depend on our ability to strengthen our management team and attract, train, and retain skilled employees, and our ability to implement and improve operational, financial, and management information systems on a timely basis. If we are unable to manage our growth effectively, our business, financial condition, cash flows, and results of operations could be materially and adversely affected. In addition, due to the initial substantial costs related to acquisitions, rapid growth could adversely affect our short-term profitability and liquidity.

Any changes to the laws and regulations governing our business, or the interpretation and enforcement of those laws or regulations, could cause us to modify our operations and could negatively impact our operating results.

Our business is extensively regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect health plan members and providers rather than managed care organizations. The government agencies administering these laws and regulations have broad latitude in interpreting and applying them. These laws and regulations, along with the terms of our government contracts, regulate how we do business, what services we offer, and how we interact with members and the public. For instance, some states mandate minimum medical expense levels as a percentage of premium revenues. These laws and regulations, and their interpretations, are subject to frequent change. The interpretation of certain contract provisions by our governmental regulators may also change. Changes in existing laws or regulations, or their interpretations, or the enactment of new laws or regulations, could reduce our profitability by imposing additional capital requirements, increasing our liability, increasing our administrative and other costs, increasing mandated benefits, forcing us to restructure our relationships with providers, or requiring us to implement additional or different programs and systems. Changes in the interpretation of our contracts could also reduce our profitability if we have detrimentally relied on a prior interpretation.

Our business depends on our information and medical management systems, and our inability to effectively integrate, manage, and keep secure our information and medical management systems, could disrupt our operations.

Our business is dependent on effective and secure information systems that assist us in, among other things, processing provider claims, monitoring utilization and other cost factors, supporting our medical management techniques, and providing data to our regulators. Our providers also depend upon our information systems for membership verifications, claims status, and other information. If we experience a reduction in the performance, reliability, or availability of our information and medical management systems, our operations, ability to pay claims, and ability to produce timely and accurate reports could be adversely affected. In addition, if the licensor or vendor of any software which is integral to our operations were to become insolvent or otherwise fail to support the software sufficiently, our operations could be negatively affected.

Our information systems and applications require continual maintenance, upgrading, and enhancement to meet our operational needs. Moreover, our acquisition activity requires transitions to or from, and the integration of, various information systems. If we experience difficulties with the transition to or from information systems or are unable to properly implement, maintain, upgrade or expand our system, we could suffer from, among other things, operational disruptions, loss of members, difficulty in attracting new members, regulatory problems, and increases in administrative expenses.

Our business requires the secure transmission of confidential information over public networks. Advances in computer capabilities, new discoveries in the field of cryptography, or other events or developments could result in compromises or breaches of our security systems and member data stored in our information systems. Anyone who circumvents our security measures could misappropriate our confidential information or cause interruptions in services or operations. The internet is a public network, and data is sent over this network from many sources. In the past, computer viruses or software programs that disable or impair computers have been distributed and have rapidly spread over the internet. Computer viruses could be introduced into our systems, or those of our providers or regulators, which could disrupt our operations, or make our systems inaccessible to our members, providers, or regulators. We may be required to expend significant capital and other resources to protect against the threat of security breaches or to alleviate problems caused by breaches. Because of the confidential health information we store and transmit, security breaches could expose us to a risk of regulatory action, litigation, possible liability, and loss. Our security measures may be inadequate to prevent security breaches, and our business operations would be negatively impacted by cancellation of contracts and loss of members if security breaches are not prevented.

Because our corporate headquarters are located in Southern California, our business operations may be significantly disrupted as a result of a major earthquake.

Our corporate headquarters is located in Long Beach, California. In addition, the claims of our health plans are also processed in Long Beach. Southern California is exposed to a statistically greater risk of a major earthquake than most other parts of the United States. If a major earthquake were to strike the Los Angeles area, our corporate functions and claims processing could be

significantly impaired for a substantial period of time. Although we have established a disaster recovery and business resumption plan with back-up operating sites to be deployed in the case of such a major disruptive event, there can be no assurances that the disaster recovery plan will be successful or that the business operations of all our health plans, including those that are remote from any such event, would not be substantially impacted by a major Southern California earthquake.

We face claims related to litigation which could result in substantial monetary damages.

We are subject to a variety of legal actions, including medical malpractice actions, provider disputes, employment related disputes, and breach of contract actions. In the event we incur liability materially in excess of the amount for which we have insurance coverage, our profitability would suffer. In addition, our providers involved in medical care decisions are exposed to the risk of medical malpractice claims. As an employer of physicians and ancillary medical personnel and as an operator of primary care clinics, our plans are subject to liability for negligent acts, omissions, or injuries occurring at one of their clinics or caused by one of their employees. We maintain medical malpractice insurance for our clinics in an amount which we believe to be reasonable in light of our experience to date. However, given the significant amount of some medical malpractice awards and settlements, this insurance may not be sufficient or available at a reasonable cost to protect us from damage awards or other liabilities. Even if any claims brought against us are unsuccessful or without merit, we may have to defend ourselves against such claims. The defense of any such actions may be time-consuming and costly, and may distract our management's attention. As a result, we may incur significant expenses and may be unable to effectively operate our business.

Furthermore, claimants often sue managed care organizations for improper denials of or delays in care, and in some instances improper authorizations of care. Claims of this nature could result in substantial damage awards against us and our providers that could exceed the limits of any applicable medical malpractice insurance coverage. Successful malpractice or tort claims asserted against us, our providers, or our employees could adversely affect our financial condition and profitability.

We cannot predict the outcome of any lawsuit with certainty. While we currently have insurance coverage for some of the potential liabilities relating to litigation, other such liabilities may not be covered by insurance, the insurers could dispute coverage, or the amount of insurance could be insufficient to cover the damages awarded. In addition, insurance coverage for all or certain types of liability may become unavailable or prohibitively expensive in the future or the deductible on any such insurance coverage could be set at a level which would result in us effectively self-insuring cases against us.

Although we establish reserves for litigation as we believe appropriate, we cannot provide assurance that our recorded reserves will be adequate to cover such costs. Therefore, the litigation to which we are subject could have a material adverse effect on our business, financial condition, cash flows, and results of operations, and could prompt us to change our operating procedures.

We are subject to competition which negatively impacts our ability to increase penetration in the markets we serve and could result in the loss of members to other health plans.

We operate in a highly competitive environment and in an industry that is subject to ongoing changes from business consolidations, new strategic alliances, and aggressive marketing practices by other managed care organizations. We compete for members principally on the basis of size, location, and quality of provider network, benefits supplied, quality of service, and reputation. A number of these competitive elements are partially dependent upon and can be positively affected by the financial resources available to a health plan. Many other organizations with which we compete, including large commercial plans, have substantially greater financial and other resources than we do. For these reasons, we may be unable to grow our membership, or may lose members to other health plans.

Failure to maintain effective internal controls over financial reporting could have a material adverse effect on our business, operating results, and stock price.

The Sarbanes-Oxley Act of 2002 requires, among other things, that we maintain effective internal controls over financial reporting. In particular, we must perform system and process evaluation and testing of our internal controls over financial reporting to allow management to report on, and our independent registered public accounting firm to attest to, our internal controls over financial reporting as required by Section 404 of the Sarbanes-Oxley Act of 2002. Our future testing, or the subsequent testing by our independent registered public accounting firm, may reveal deficiencies in our internal controls over financial reporting that are deemed to be material weaknesses. Our compliance with Section 404 will continue to require that we incur substantial accounting expense and expend significant management time and effort. Moreover, if we are not able to continue to comply with the requirements of Section 404 in a timely manner, or if we or our independent registered public accounting firm identifies deficiencies in our internal control over financial reporting that are deemed to be material weaknesses, the market price of our stock could decline and we could be subject to sanctions or investigations by the New York Stock Exchange, SEC, or other regulatory authorities, which would require additional financial and management resources.

Changes in accounting may affect our results of operations.

U.S. generally accepted accounting principles and related implementation guidelines and interpretations can be highly complex and involve subjective judgments. Changes in these rules or their interpretation, or the adoption of new pronouncements could significantly affect our stated results of operations.

The value of our investments is influenced by varying economic and market conditions, and a decrease in value could have an adverse effect on our results of operations, liquidity, and financial condition.

Our investments consist solely of investment-grade debt securities. The unrestricted portion of this portfolio is designated as available-for-sale. Our non-current restricted investments are designated as held-to-maturity. Available-for-sale investments are carried at fair value, and the unrealized gains or losses are included in accumulated other comprehensive income or loss as a separate component of stockholders' equity, unless the decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such securities until their full cost can be recovered. For our available-for-sale investments and held-to-maturity investments, if a decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such security until its full cost can be recovered, the security is deemed to be other-than-temporarily impaired and it is written down to fair value and the loss is recorded as an expense.

In accordance with applicable accounting standards, we review our investment securities to determine if declines in fair value below cost are other-than-temporary. This review is subjective and requires a high degree of judgment. We conduct this review on a quarterly basis, using both quantitative and qualitative factors, to determine whether a decline in value is other-than-temporary. Such factors considered include the length of time and the extent to which market value has been less than cost, the financial condition and near term prospects of the issuer, recommendations of investment advisors, and forecasts of economic, market or industry trends. This review process also entails an evaluation of our ability and intent to hold individual securities until they mature or full cost can be recovered.

The current economic environment and recent volatility of the securities markets increase the difficulty of assessing investment impairment and the same influences tend to increase the risk of potential impairment of these assets. Over time, the economic and market environment may provide additional insight regarding the fair value of certain securities, which could change our judgment regarding impairment. This could result in realized losses relating to other-than-temporary declines to be recorded as an expense. Given the current market conditions and the significant judgments involved, there is continuing risk that declines in fair value may occur and material other-than-temporary impairments may result in realized losses in future periods which could have an adverse effect on our business, financial condition, cash flows, and results of operations.

Unanticipated changes in our tax rates or exposure to additional income tax liabilities could affect our profitability.

We are subject to income taxes in the United States. Our effective tax rate could be adversely affected by changes in the mix of earnings in states with different statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in U.S. tax laws and regulations, and changes in our interpretations of tax laws, including pending tax law changes, such as the ACA excise tax discussed above. In addition, we are subject to the routine examination of our income tax returns by the Internal Revenue Service and other local and state tax authorities. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our estimated income tax liabilities. Adverse outcomes from tax examinations could have an adverse effect on our provision for income taxes, estimated income tax liabilities, and results of operations.

We are dependent on our executive officers and other key employees.

Our operations are highly dependent on the efforts of our executive officers. The loss of their leadership, knowledge, and experience could negatively impact our operations. Replacing many of our executive officers might be difficult or take an extended period of time because a limited number of individuals in the managed care industry have the breadth and depth of skills and experience necessary to operate and expand successfully a business such as ours. Our success is also dependent on our ability to hire and retain qualified management, technical, and medical personnel. It is critical that we recruit, manage, enable, and retain talent to successfully execute our strategic objections which requires aligned policies, a positive work environment, and a robust succession and talent development process. Further, particularly in light of the changing health care environment, we must focus on building employee capabilities to help ensure that we can meet upcoming challenges and opportunities. If we are unsuccessful in recruiting, retaining, managing, and enabling such personnel and are unable to meet upcoming challenges and opportunities, our operations could be negatively impacted.

We are subject to risks associated with outsourcing services and functions to third parties.

We contract with independent third party vendors and service providers who provide services to us and our subsidiaries or to whom we delegate selected functions. Our arrangements with third party vendors and service providers may make our operations vulnerable if those third parties fail to satisfy their obligations to us, including their obligations to maintain and protect the security and confidentiality of our information and data. In addition, we may have disagreements with third party vendors and service providers regarding relative responsibilities for any such failures under applicable business associate agreements or other applicable outsourcing agreements. Further, we may not be adequately indemnified against all possible losses through the terms and conditions of our contracts with third party vendors and service providers. Our outsourcing arrangements could be adversely impacted by

changes in vendors' or service providers' operations or financial condition or other matters outside of our control. If we fail to adequately monitor and regulate the performance of our third party vendors and service providers, we could be subject to additional risk. Violations of, or noncompliance with, laws and/or regulations governing our business or noncompliance with contract terms by third party vendors and service providers could increase our exposure to liability to our members, providers, or other third parties, or sanctions and/or fines from the regulators that oversee our business. In turn, this could increase the costs associated with the operation of our business or have an adverse impact on our business and reputation. Moreover, if these vendor and service provider relationships were terminated for any reason, we may not be able to find alternative partners in a timely manner or on acceptable financial terms, and may incur significant costs in connection with any such vendor or service provider transition. As a result, we may not be able to meet the full demands of our customers and, in turn, our business, financial condition, and results of operations may be harmed. In addition, we may not fully realize the anticipated economic and other benefits from our outsourcing projects or other relationships we enter into with third party vendors and service providers, as a result of regulatory restrictions on outsourcing, unanticipated delays in transitioning our operations to the third party, vendor or service provider noncompliance with contract terms or violations of laws and/or regulations, or otherwise. This could result in substantial costs or other operational or financial problems that could adversely impact our business, financial condition, and results of operations.

An impairment charge with respect to our recorded goodwill and indefinite-lived intangible assets, or our finite-lived intangible assets, could have a material impact on our financial results.

As of December 31, 2012, the balance of goodwill and indefinite-lived intangible assets was $151.1 million. Goodwill and indefinite-lived intangible assets are not amortized, but are subject to annual impairment testing. Testing is performed more frequently if events occur or circumstances change that would more likely than not reduce the fair value of the underlying reporting units below their carrying amounts. The underlying reporting units generally comprise our health plan subsidiaries and our Molina Medicaid Solutions segment. As of December 31, 2012, the balance of intangible assets, net, was $77.7 million. Intangible assets are amortized generally on a straight-line basis over their estimated useful lives. Our intangible assets are subject to impairment tests when events or circumstances indicate that such an asset's (or asset group's) carrying value may not be recoverable. Consideration is given to a number of potential impairment indicators, including legal factors, market conditions, and operational performance. Such evaluation is significantly impacted by estimates and assumptions of future revenues, costs and expenses, and other factors.

For example, our health plan subsidiaries have generally been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that these contracts will continue to be renewed. The non-renewal of such a contract would be an indicator of impairment.

If an event or events occur that would cause us to revise our estimates and assumptions used in analyzing the value of our goodwill and indefinite-lived intangible assets, and intangible assets, net, such revision could result in a non-cash impairment charge that could have a material adverse impact on our financial results.

We are subject to the risks of owning real property.

We own an approximately 460,000 square foot office building housing our principal executive offices, which we purchased in a transaction that closed on December 7, 2011. We also own a nearby 32,000 square-foot office building in Long Beach, California, a 160,000 square-foot office building in Columbus, Ohio, a 26,000 square-foot data center in Albuquerque, New Mexico, and a 24,000 square-foot mixed use (office and clinic) facility in Pomona, California. Accordingly, we are subject to all of the risks generally associated with owning real estate, which include, but are not limited to: the possibility of environmental contamination, the costs associated with fixing any environmental problems and the risk of damages resulting from such contamination; risks related to natural disasters, such as earthquakes, flooding or severe weather; adverse changes in the value of the property due to interest rate changes, changes in the neighborhood in which the property is located, or other factors; ongoing maintenance expenses and costs of improvements; the possible need for structural improvements in order to comply with changes in zoning, seismic, disability act, or other requirements; inability to renew or enter into leases for space not utilized by the Company on commercially acceptable terms or at all; and possible disputes with neighboring owners or other individuals and entities.

Because we have guaranteed one of our subsidiary's obligations under a loan agreement, if this subsidiary fails to meet its obligations under the loan agreement, we may be required to satisfy such obligations, and such an undertaking could have an adverse affect on our financial condition.

On December 7, 2011, Molina Center LLC, or Molina Center, a wholly owned subsidiary of the Company, entered into a Term Loan Agreement with various lenders and East West Bank, as Administrative Agent, to borrow the aggregate principal amount of $48.6 million to finance a portion of the $81 million purchase price for the acquisition of the office building housing our corporate headquarters. While all amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the office building in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement, the Company has additionally guaranteed Molina Center's obligations of payment and performance under the Term Loan Agreement, certain promissory notes executed in connection therewith, and other loan documents. The maximum amount of the promissory notes for which the Company is liable under the Guaranty will in no event exceed $20 million, but there

is no cap on the Company's total liability under the Guaranty. Furthermore, Molina Center and the Company also entered into an Environmental Indemnity in favor of the Administrative Agent and the other lenders pursuant to which the Company, jointly and severally with Molina Center, has agreed to indemnify and hold harmless the Administrative Agent and each of the other lenders under the Term Loan Agreement from and against any loss, damage, cost, expense, claim, or liability directly or indirectly arising out of or attributable to the use, generation, storage, release, discharge or disposal, or presence of certain hazardous materials on or about the office building. Neither the Company's nor Molina Center's liability under the Environmental Indemnity is limited by a maximum dollar amount. If Molina Center is unable to comply with the various customary financial covenants of the Term Loan Agreement, if it defaults under the Term Loan Agreement or if there are major environmental liabilities attributed to hazardous materials, such events could have an adverse effect on our business, financial condition, cash flows, and results of operations.

Risks Related to Our Common Stock

Delaware law and our charter documents may impede or discourage a takeover, which could cause the market price of our common stock to decline.

We are subject to the Delaware anti-takeover laws regulating corporate takeovers. These provisions may prohibit stockholders owning 15% or more of our outstanding voting stock from merging or combining with us. In addition, any change in control of our state health plans would require the approval of the applicable insurance regulator in each state in which we operate.

Our certificate of incorporation and bylaws also contain provisions that could have the effect of delaying, deferring, or preventing a change in control of our company that stockholders may consider favorable or beneficial. These provisions could discourage proxy contests and make it more difficult for our stockholders to elect directors and take other corporate actions. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions include:

- a staggered board of directors, so that it would take three successive annual meetings to replace all directors,
- prohibition of stockholder action by written consent,
- advance notice requirements for the submission by stockholders of nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting, and
- the ability of our board of directors, without stockholder approval, to designate the terms of one or more series of preferred stock and issue shares of preferred stock.

In addition, changes of control are often subject to state regulatory notification, and in some cases, prior approval.

Volatility of our stock price could adversely affect stockholders.

Since our initial public offering in July 2003, the sales price of our common stock has ranged from a low of $10.75 to a high of $36.83. A number of factors could continue to influence the market price of our common stock, including:

- the implementation of the ACA and duals demonstration programs,
- state and federal budget pressures,
- changes in expectations as to our future financial performance or changes in financial estimates, if any, by us or by security analysts or investors,
- revisions in securities analysts' estimates,
- announcements by us or our competitors of significant acquisitions or dispositions, strategic partnerships, joint ventures, or capital commitments,
- announcements relating to our business or the business of our competitors,
- changes in government payment levels,
- adverse publicity regarding health maintenance organizations and other managed care organizations,
- government action regarding member eligibility,
- changes in state mandatory programs,
- conditions generally affecting the managed care industry or our provider networks,
- the success of our operating or acquisition strategy,
- the operating and stock price performance of other comparable companies in the health care industry,

- the termination of our Medicaid or CHIP contracts with state or county agencies, or subcontracts with other Medicaid managed care organizations that contract with such state or county agencies,
- regulatory or legislative change,
- general economic conditions, including unemployment rates, inflation, and interest rates, and
- the other factors set forth under "Risk factors" in this Annual Report on Form 10-K.

Our common stock may not trade at the same levels as the stock of other health care companies or the market in general. Also, if the trading market for our common stock does not continue to develop, securities analysts may not maintain or initiate research coverage of us and our common stock, and this could depress the market for our common stock.

Members of the Molina family own a significant amount of our capital stock, decreasing the influence of other stockholders on stockholder decisions.

Members of the Molina family, either directly or as trustees or beneficiaries of Molina family trusts, in the aggregate own or are entitled to receive upon certain events approximately 37% of our capital stock as of December 31, 2012. Our president and chief executive officer, as well as our chief financial officer, are members of the Molina family, and they are also on our board of directors. Because of the amount of their shareholdings, Molina family members, if they were to act as a group with the trustees of their family trusts, have the ability to significantly influence all matters submitted to stockholders for approval, including the election of directors, amendments to our charter, and any merger, consolidation, or sale of the Company. A significant concentration of share ownership can also adversely affect the trading price for our common stock because investors often discount the value of stock in companies that have controlling stockholders. Furthermore, the concentration of share ownership in the Molina family could delay or prevent a merger or consolidation, takeover, or other business combination that could be favorable to our stockholders.

Future sales of our common stock or equity-linked securities in the public market could adversely affect the trading price of our common stock and our ability to raise funds in new stock offerings.

We may issue equity securities in the future, or securities that are convertible into or exchangeable for, or that represent the right to receive, shares of our common stock. Sales of a substantial number of shares of our common stock or other equity securities, including sales of shares in connection with any future acquisitions, could be substantially dilutive to our stockholders. These sales may have a harmful effect on prevailing market prices for our common stock and our ability to raise additional capital in the financial markets at a time and price favorable to us. Moreover, to the extent that we issue restricted stock units, stock appreciation rights, options, or warrants to purchase our common stock in the future and those stock appreciation rights, options, or warrants are exercised or as the restricted stock units vest, our stockholders may experience further dilution. Holders of our shares of common stock have no preemptive rights that entitle holders to purchase a pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our stockholders. Our certificate of incorporation provides that we have authority to issue 80,000,000 shares of common stock and 20,000,000 shares of preferred stock. As of December 31, 2012, approximately 46,762,000 shares of common stock and no shares of preferred or other capital stock were issued and outstanding.

Item 1B: ***Unresolved Staff Comments***

None.

Item 2: ***Properties***

We lease a total of 75 facilities. We own a 460,000 square foot office building housing our corporate headquarters in Long Beach, California, and we also own a nearby 32,000 square-foot office building in Long Beach, California, a 160,000 square-foot office building in Columbus, Ohio, a 26,000 square-foot data center in Albuquerque, New Mexico, and a 24,000 square-foot mixed use (office and clinic) facility in Pomona, California. We anticipate leasing additional space in the Long Beach, California area during 2013. While we believe our current and anticipated facilities will be adequate to meet our operational needs for the foreseeable future, we are continuing to periodically evaluate our employee and operations growth prospects to determine if additional space is required, and where it would be best located.

Item 3: ***Legal Proceedings***

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly-funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. Based upon the evaluation of information currently available, we believe that these actions, when finally concluded and determined, are not likely to have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Item 4: ***Mine Safety Disclosures***

None.

PART II

Item 5: ***Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***

Our common stock is listed on the New York Stock Exchange under the trading symbol "MOH." As of December 31, 2012, there were 130 holders of record of our common stock. The high and low intra-day sales prices of our common stock for specified periods are set forth below:

Date Range	High	Low
2012		
First Quarter	$ 36.83	$ 22.25
Second Quarter	$ 35.37	$ 17.63
Third Quarter	$ 27.73	$ 21.62
Fourth Quarter	$ 29.82	$ 21.74
2011		
First Quarter	$ 26.86	$ 17.77
Second Quarter	$ 29.03	$ 24.72
Third Quarter	$ 28.21	$ 14.82
Fourth Quarter	$ 26.31	$ 13.93

Dividends

To date we have not paid cash dividends on our common stock. We currently intend to retain any future earnings to fund our projected business growth. However, we intend to periodically evaluate our cash position to determine whether to pay a cash dividend in the future.

Our ability to pay dividends is partially dependent on, among other things, our receipt of cash dividends from our regulated subsidiaries. The ability of our regulated subsidiaries to pay dividends to us is limited by the state departments of insurance in the states in which we operate or may operate, as well as requirements of the government-sponsored health programs in which we participate. Any future determination to pay dividends will be at the discretion of our Board and will depend upon, among other factors, our results of operations, financial condition, capital requirements and contractual and regulatory restrictions. For more information regarding restrictions on the ability of our regulated subsidiaries to pay dividends to us, please see Item 7 — Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources —Regulatory Capital and Dividends Restrictions.

Unregistered Issuances of Equity Securities

None.

Stock Repurchase Programs

Common Stock Repurchase in Connection with Offering of 1.125% Cash Convertible Senior Notes Due 2020. We used a portion of the net proceeds in this offering to repurchase $50 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. On February 12, 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Securities Repurchases and Repurchase Programs. Effective as of February 13, 2013, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior note due 2014. The repurchase program extends through December 31, 2014.

Effective as of October 26, 2011, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014. The repurchase program expired October 25, 2012. No securities were purchased under this program in 2012.

Purchases of common stock made by or on behalf of the Company during the quarter ended December 31, 2012, including shares withheld by the Company to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (a)(b)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Plans or Programs
October 1 — October 31	2,150	$ 25.03	—	$ —
November 1 — November 30	1,892	$ 25.31	—	$ —
December 1 — December 31	194,974	$ 27.97	—	$ —
Total	199,016	$ 27.91	—	

(a) During the three months ended December 31, 2012, we repurchased shares of our common stock from certain Molina family trusts. Janet M. Watt is the sister, and her husband Lawrence B. Watt is the brother-in-law, of Dr. J. Mario Molina, the Company's Chief Executive Officer, and John Molina, the Company's Chief Financial Officer. Ms. Watt is the sole trustee of the Janet M. Watt Separate Property Trust dated 10/22/2007 (the "Separate Property Trust") and a co-trustee with Lawrence B. Watt, of the Watt Family Trust dated 10/11/1996 (the "Family Trust" and together with the Separate Property Trust, the "Trusts"). On December 26, 2012, pursuant to a Stock Purchase Agreement between the Company and the Trusts, the Company purchased an aggregate of 110,988 shares of its common stock from the Trusts for an aggregate purchase price of $3,000,005.64, as follows: (i) 43,767 shares from the Family Trust for an aggregate purchase price of $ 1,183,022.01 and (ii) 67,221 shares from the Separate Property Trust for an aggregate purchase price of $1,816,983.63. The shares were purchased at a price per share of $27.03, representing the closing price per share of the Company's common stock on December 26, 2012, as reported by the New York Stock Exchange. The transaction was approved by the Company's board of directors. Other than these repurchases from the Trusts, we did not repurchase any shares of our common stock outside of our publicly announced repurchase program except shares of common stock withheld to settle our employees' income tax obligations described below.

(b) During the quarter we withheld 88,028 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

Securities Authorized for Issuance Under Equity Compensation Plans (as of December 31, 2012)

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) (c)
Equity compensation plans approved by security holders	414,061 (1)	$ 22.39	6,537,592 (2)

(1) Options to purchase shares of our common stock issued under the 2002 Equity Incentive Plan. Further grants under the 2002 Equity Incentive Plan have been suspended.

(2) Includes only shares remaining available to issue under the 2011 Equity Incentive Plan, and the 2011 Employee Stock Purchase Plan. Further grants under the 2002 Equity Incentive Plan and the 2002 Employee Stock Purchase Plan have been suspended.

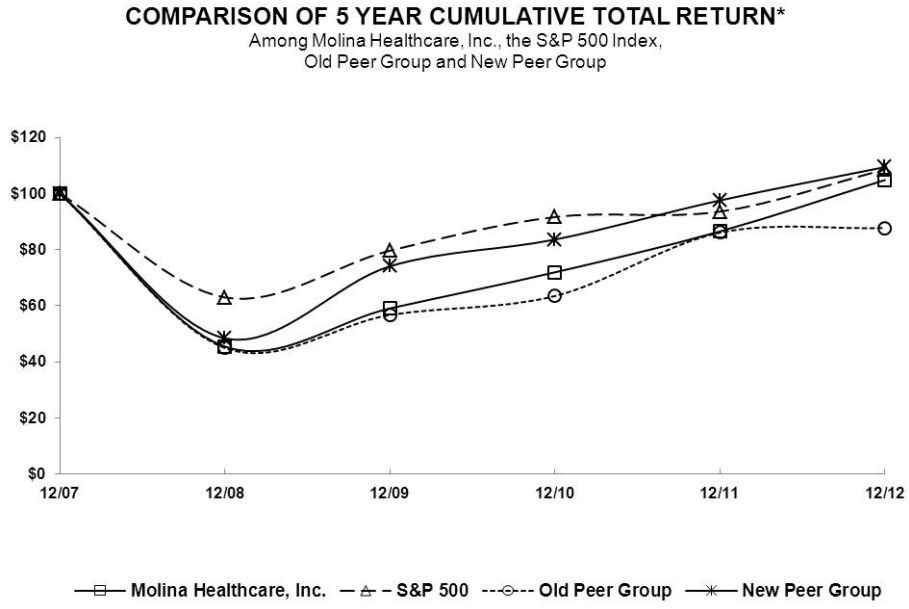
STOCK PERFORMANCE GRAPH

The following graph and related discussion are being furnished solely to accompany this Annual Report on Form 10-K pursuant to Item 201(e) of Regulation S-K and shall not be deemed to be "soliciting materials" or to be "filed" with the SEC (other than as provided in Item 201) nor shall this information be incorporated by reference into any future filing under the Securities Act or the Exchange Act, whether made before or after the date hereof and irrespective of any general incorporation language contained therein, except to the extent that the Company specifically incorporates it by reference into a filing.

The following line graph compares the percentage change in the cumulative total return on our common stock against the cumulative total return of the Standard & Poor's Corporation Composite 500 Index (the "S&P 500"), our old peer group index (as described below), and a new peer group index (as described below) for the five-year period from December 31, 2007 to December 31, 2012. We have revised our peer group to match the peer group that is used by our Compensation Committee in benchmarking our executive officers' compensation. The comparison assumes $100 was invested on December 31, 2007, in the Company's common stock and in each of the foregoing indices and assumes reinvestment of dividends. The stock performance shown on the graph below represents historical stock performance and is not necessarily indicative of future stock price performance.

The old peer group index, used in last year's Annual Report on Form 10-K and also set forth below, consists of Amerigroup Corporation (AGP), Centene Corporation (CNC), Coventry Health Care, Inc. (CVH), Health Net, Inc. (HNT), Humana, Inc. (HUM), UnitedHealth Group Incorporated (UNH), and WellPoint, Inc. (WLP).

The new peer group index consists of Centene Corporation (CNC), Community Health Systems, Inc. (CYH), Coventry Health Care, Inc. (CVH), Health Management Associates, Inc. (HMA), Health Net, Inc. (HNT), Laboratory Corporation of America Holdings (LH), Lifepoint Hospitals, Inc. (LPNT), Magellan Health Services, Inc. (MGLN), Select Medical Holdings Corporation (SEM), Team Health Holdings, Inc. (TMH), Triple-S Management Corporation (GTS), Universal American Corporation (UAM), and WellCare Health Plans, Inc. (WCG).



Name	12/07	12/08	12/09	12/10	12/11	12/12

Item 6. ***Selected Financial Data***

SELECTED FINANCIAL DATA

We derived the following selected consolidated financial data (other than the data under the caption "Operating Statistics") for the five years ended December 31, 2012 from our audited consolidated financial statements. You should read the data in conjunction with our consolidated financial statements, related notes and other financial information included herein. All dollars are in thousands, except per share data. The data under the caption "Operating Statistics" has not been audited.

	Year Ended December 31,				
	2012	2011	2010	2009	2008
Statements of Income Data:					
Revenue:

	Year Ended December 31,				
	2012	2011	2010	2009	2008
Balance Sheet Data:					
Cash and cash equivalents	$ 795,770	$ 493,827	$ 455,886	$ 469,501	$ 387,162
Total assets	1,934,822	1,652,146	1,509,214	1,244,035	1,148,068
Long-term debt (including current maturities)	262,939	218,126	164,014	158,900	164,873
Total liabilities	1,152,508	897,073	790,157	701,297	616,306
Stockholders' equity	782,314	755,073	719,057	542,738	531,762

(1) Service revenue and cost of service revenue represent revenue and costs generated by our Molina Medicaid Solutions segment. Because we acquired this business on May 1, 2010, results for the year ended December 31, 2010 include eight months of results for this segment.

(2) On February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's existing contract with the state expired without renewal on June 30, 2012. In connection with this notification, we recorded a non-cash impairment charge of $64.6 million in the fourth quarter of 2011.

(3) Medical care ratio represents medical care costs as a percentage of premium revenue, net of premium tax. We now compute the medical care ratio by dividing total medical care costs by premium revenue, net of premium taxes. Previously, we did not adjust premium revenue to remove the impact of premium taxes. We have made this change for all periods presented. The medical care ratio is a key operating indicator used to measure our performance in delivering efficient and cost effective health care services. Changes in the medical care ratio from period to period result from changes in Medicaid funding by the states, utilization of medical services, our ability to effectively manage costs, contract changes, and changes in accounting estimates related to incurred but not paid claims. See Item 7 — Management's Discussion and Analysis of Financial Condition and Results of Operations for further discussion.

(4) General and administrative expense ratio represents such expenses as a percentage of total revenue.

(5) Premium tax ratio represents such expenses as a percentage of premium revenue, net of premium tax.

(6) Number of members at end of period.

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations***

The following discussion of our financial condition and results of operations should be read in conjunction with the "Selected Financial Data" and the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report. This discussion contains forward-looking statements that involve known and unknown risks and uncertainties, including those set forth under Item 1A — Risk Factors, above.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of December 31, 2012, these health plans served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of primary care clinics in California, Florida, New Mexico and Washington; additionally, we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts are renewable at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's prior contract with the state expired without renewal on June 30, 2012 subject to certain transition obligations. As of December 31, 2012, we continued to process claims that were incurred by the Missouri health plan's members through the June 30, 2012 termination date. For the six months ended June 30, 2012, our Missouri health plan contributed premium revenue of $113.8 million, or 4.1% of total premium revenue, and comprised 79,000 members, or 4.3% of total Health Plans segment membership as of June 30, 2012.

With regard to our Ohio health plan, as a result of a lawsuit challenging the selection of several plans including our health plan for the new Medicaid managed care program in Ohio, the Ohio Office of Medical Assistance announced on October 5, 2012, that the operation of the program is being delayed from the previously scheduled January 1, 2013 start date and will now commence on July 1, 2013. Following the trial court's dismissal of the lawsuit, the court of appeals has permitted the state of Ohio to move forward with implementation of the new program and finalizing the provider agreements with our Ohio plan and the other selected managed care plans.

Our state Medicaid contracts may be periodically adjusted to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas. For example, our Texas health plan added significant membership effective March 1, 2012, in service areas we had not previously served (the Hidalgo and El Paso service areas); and among populations we had not previously served within existing service areas, such as the Temporary Assistance for Needy Families, or TANF, population in the Dallas service area. Additionally, the health benefits provided to our TANF and ABD members in Texas under our contracts with the state were expanded to include inpatient facility and pharmacy services.

During fiscal year 2012, we responded to several RFPs and invitations to negotiate with respect to new business, including proposals to serve dual eligible populations and applications to participate in the Centers for Medicare and Medicaid Services, or CMS', Capitated Financial Alignment Demonstration project. On August 27, 2012, our Ohio health plan was chosen to participate in the Southwest, West Central, and Central markets under the Ohio Integrated Care Delivery System, or ICDS. The Ohio ICDS is intended to improve care coordination for individuals enrolled in both Medicaid and Medicare. The selection of our Ohio health plan was made by the Ohio Department of Jobs and Family Services, or ODJFS, pursuant to the request for applications for qualified health plans to serve in the ICDS issued in April 2012. The commencement of the ICDS is subject to the readiness review of the selected health plans, and the execution of three-way provider agreements between the health plans, ODJFS, and CMS. Enrollment of dual eligible members in the ICDS is expected to begin during the second half of 2013.

On November 15, 2012, we announced that our new Illinois health plan had been chosen to serve members in Central Illinois under the state's Medicare-Medicaid Alignment Initiative (MMAI). The operational start date for the program is currently scheduled for October 2013 with an effective date of January 2014. In addition to the MMAI, we will also serve other seniors and persons with disabilities in the Medicaid Program as the state expands the Integrated Care Program that was implemented in suburban Cook County and the five collar counties in May of 2011.

On February 14, 2013, we announced that the Florida Agency for Health Care Administration awarded our Florida health plan contracts in three regions under the Statewide Medicaid Managed Care Long-Term Care program. As a result of the awards, we will now enter into a comprehensive pre-contracting assessment, with the program currently scheduled to commence on December 1, 2013. Under the program, we will provide long-term care benefits, including institutional and home and community-based services.

On February 11, 2013, we announced that our New Mexico health plan was selected by the New Mexico Human Services Department, or HSD, to participate in the new Centennial Care program. In addition to continuing to provide physical and acute health care services, under the new program our New Mexico health plan will expand its services to provide behavioral health and long-term care services. The selection of our New Mexico health plan was made by HSD pursuant to its request for proposals issued in August 2012. The operational start date for the program is currently scheduled for January 2014.

Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program.

On October 12, 2012, the Governor of the U.S. Virgin Islands announced a partnership in which we will provide MMIS to the U.S. Virgin Islands through our West Virginia fiscal agent operation. The contract outlining the sharing of our platform went through several rounds of review at the federal level and has been approved by CMS. The partnership will benefit both the Virgin Islands and taxpayers by circumventing the costs associated with establishing an independent system while gaining leverage from operating under a common platform. This partnership can serve as a model for the country by demonstrating that state and territorial governments can reduce local and federal costs by sharing such technologies for their Medicaid populations.

On July 13, 2012, our Molina Medicaid Solutions segment received full federal certification of its Medicaid Management Information System, or MMIS, in the state of Idaho from CMS. As a result of the CMS certification, the state of Idaho is entitled to receive federal reimbursement of 75% of its MMIS operations costs retroactive to June 1, 2010, the date that the system first began processing claims. Our MMIS in Maine received full federal certification from CMS on December 19, 2011.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement MMIS to another company. For the year ended December 31, 2012, our revenue under the Louisiana MMIS contract was $54.9 million, or 29.2% of total service revenue. We expect that we will continue to perform under this contract through implementation and acceptance of the successor MMIS. Based upon our past experience and our knowledge of the Louisiana MMIS bid process, we believe that implementation and acceptance of the successor MMIS will not occur until 2014 at the earliest. Through implementation and acceptance of the successor MMIS we expect to recognize approximately $40 million in revenue annually under our Louisiana MMIS contract.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in “Critical Accounting Policies” below, is not generally subject to significant accounting estimates. For the year ended December 31, 2012, we received approximately 96% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the year ended December 31, 2012, we recognized approximately 4% of our premium revenue in the form of “birth income” — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children’s Health Insurance Program, or CHIP, members are generally among our lowest, with rates as

low as approximately $75 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the TANF, Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $110 in California to $260 in Ohio. Among our ABD membership, PMPM premiums range from approximately $330 in Utah to $1,400 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, inpatient, behavioral health and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums in the aggregate, at approximately $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	As of December 31,		
	2012	2011	2010
Total Ending Membership by Health Plan:			
California	336,000	355,000	344,000
Florida	73,000	69,000	61,000
Michigan	220,000	222,000	227,000
Missouri [1]	—	79,000	81,000
New Mexico	91,000	88,000	91,000
Ohio	244,000	248,000	245,000
Texas	282,000	155,000	94,000
Utah	87,000	84,000	79,000
Washington	418,000	355,000	355,000
Wisconsin	46,000	42,000	36,000
Total	1,797,000	1,697,000	1,613,000
Total Ending Membership by State for our Medicare Advantage Plans:			
California	7,700	6,900	4,900
Florida	900	800	500
Michigan	9,700	8,200	6,300
New Mexico	900	800	600
Ohio	300	200	—
Texas	1,500	700	700
Utah	8,200	8,400	8,900
Washington	6,500	5,000	2,600
Total	35,700	31,000	24,500
Total Ending Membership by State for our Aged, Blind or Disabled Population:			
California	44,700	31,500	13,900
Florida	10,300	10,400	10,000
Michigan	41,900	37,500	31,700
New Mexico	5,700	5,600	5,700
Ohio	28,200	29,100	28,200
Texas	95,900	63,700	19,000
Utah	9,000	8,500	8,000
Washington	30,000	4,800	4,000
Wisconsin	1,700	1,700	1,700
Total	267,400	192,800	122,200

(1) Our contract with the state of Missouri expired without renewal on June 30, 2012

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of an MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, general and administrative expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service:* Physician providers paid on a fee-for-service basis are paid according to a fee schedule set by the state or by our contracts with these providers. Most hospitals are paid on a fee-for-service basis in a variety of ways, including per diem amounts, diagnostic-related groups or DRGs, percent of billed charges, and case rates. As discussed below, we also pay a small portion of hospitals on a capitated basis. We also have stop-loss agreements with the hospitals with which we contract. Under all fee-for-service arrangements, we retain the financial responsibility for medical care provided. Expenses related to fee-for-service contracts are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit manager are included in fee-for-service costs.
- *Capitation:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation contracts, we typically pay a fixed PMPM payment to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated contracts, we remain liable for the provision of certain health care services. Certain of our capitated contracts also contain incentive programs based on service delivery, quality of care, utilization management, and other criteria. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.
- *Pharmacy:* Pharmacy costs include all drug, injectibles, and immunization costs paid through our pharmacy benefit manager. As noted above, drugs and injectibles not paid through our pharmacy benefit manager are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.
- *Other:* Other medical care costs include medically related administrative costs, certain provider incentive costs, reinsurance cost, and other health care expense. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, disease management, and 24-hour on-call nurses. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2012, 2011, and 2010, medically related administrative costs were approximately $127.5 million, $102.3 million, and $85.5 million, respectively.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See “Critical Accounting Policies” below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

2012 Financial Performance Summary

The following table and narrative briefly summarizes our financial and operating performance for the years ended December 31, 2012, 2011, and 2010. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are computed as a percentage of premium revenue, net of premium tax, because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

We have changed our method of calculating the medical care ratio effective December 31, 2012. We now calculate the medical care ratio by dividing total medical care costs by premium revenue, net of premium taxes. Previously, we did not adjust premium revenue to remove the impact of premium taxes when calculating the medical care ratio. We made this change for all periods presented to allow better comparability of the medical care ratio between periods for health plans operating in states where premium taxes are either increased or decreased. Two states where we operate health plans (Michigan and California) either reduced or eliminated their premium tax during 2012.

	Year Ended December 31,		
	2012	2011	2010
	(Dollar amounts in thousands, except per-share data)		
Earnings per diluted share	$ 0.21	$ 0.45	$ 1.32
Premium revenue	$ 5,826,491	$ 4,603,407	$ 3,989,909
Service revenue	$ 187,710	$ 160,447	$ 89,809
Operating income	$ 35,473	$ 80,173	$ 105,001
Net income	$ 9,790	$ 20,818	$ 54,970
Total ending membership	1,797,000	1,697,000	1,613,000
Premium revenue	96.6%	96.5%	97.6%
Service revenue	3.1%	3.4%	2.2%
Investment income	0.1%	0.1%	0.2%
Rental income	0.2%	—%	—%
Total revenue	100.0%	100.0%	100.0%
Medical care ratio (1)	89.9%	86.8%	87.6%
General and administrative expense ratio	8.8%	8.7%	8.5%
Premium tax ratio (1)	2.8%	3.5%	3.6%
Operating income	0.6%	1.7%	2.6%
Net income	0.2%	0.4%	1.3%
Effective tax rate	48.6%	67.8%	38.6%

(1) Medical care ratio represents medical care costs as a percentage of premium revenue, net of premium taxes; premium tax ratio represents premium taxes as a percentage of premium revenue, net of premium taxes.

Earnings before Interest, Taxes, Depreciation and Amortization, or EBITDA

We calculate a non-GAAP measure, EBITDA, which management uses as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry. The reconciliation of this non-GAAP to GAAP financial measure is as follows (GAAP stands for U.S. generally accepted accounting principles):

	Year Ended December 31,		
	2012	2011	2010
	(In thousands)		
Net income	$ 9,790	$ 20,818	$ 54,970
Add back:			
Depreciation and amortization reported in the consolidated statements of cash flows	78,764	74,383	60,765
Interest expense	16,769	15,519	15,509
Provision for income taxes	9,275	43,836	34,522
EBITDA[1]	$ 114,598	$ 154,556	$ 165,766

(1) EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities; nor should EBITDA be considered in isolation from these GAAP measures of operating performance.

Year Ended December 31, 2012 Compared with the Year Ended December 31, 2011

Fiscal Year 2012 Overview and Highlights

Earnings decreased in 2012 compared with 2011 because lower margins in the Health Plans segment more than offset higher premium revenue. Net income for the year ended December 31, 2012, was $9.8 million, or $0.21 per diluted share, compared with net income of $20.8 million, or $0.45 per diluted share, for the year ended December 31, 2011. Results for the quarter and year ended December 31, 2011, were affected by an impairment charge of $64.6 million related to our Missouri health plan.

Lower net income in 2012 was in large part tied to growth in our ABD membership in California and Texas, where margins were considerably lower than our margins in the aggregate. During 2012, both California and Texas transitioned large numbers of ABD members from fee-for-service reimbursement to managed care contracts. It has been our experience that members transitioning from fee-for-service reimbursement to managed care often bring with them pent up demand for medical services; and that the realization of both improved medical outcomes and costs savings from the application of managed care practices takes time as both members and providers acquaint themselves to new ways of accessing and providing care.

The initial reduction to margins associated with the transition of members from fee-for-service reimbursement to managed care was exacerbated by premium rates that assumed unrealistic costs savings from managed care practices. Premium rate increases received later in 2012 at least partially addressed this issue.

Those rate increases, together with the improved health outcomes and the gradual reduction in medical costs resulting from the application of managed care practices, produced improved financial results in the fourth quarter of 2012. Nevertheless, the aggregate impact of the ABD membership transitioned in 2012 was to substantially reduce margins. We believe, however, that in time the higher premium revenue associated with ABD members will allow us to earn acceptable returns on a total dollar basis even if percentage margins remain lower than those earned by serving TANF members, for whom PMPM revenue is much lower.

Health Plans Segment

Premium Revenue

Premium revenue grew 27% in the year ended December 31, 2012, compared with the year ended December 31, 2011, primarily due to a shift in member mix to populations generating higher premium revenue PMPM, benefit expansions, and an increase in membership. Medicare premium revenue was $468 million in the year ended December 31, 2012, compared with $388 million in the year ended December 31, 2011.

Growth in our ABD membership led to higher premium revenue PMPM in 2012. ABD membership, as a percent of total membership, has increased approximately 31% year over year. Premium revenue PMPM also increased in the year ended December 31, 2012, as a result of the inclusion of revenue from the pharmacy benefit for our Ohio health plan effective October 1, 2011, and as a result of the inclusion of revenue for the inpatient facility and pharmacy benefits across all of our Texas health plan membership effective March 1, 2012.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Year Ended December 31,					
	2012			2011		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 3,521,960	$ 162.60	69.1%	$ 2,764,309	$ 139.02	71.6%
Capitation	557,087	25.72	10.9	518,835	26.09	13.4
Pharmacy	835,830	38.59	16.4	418,007	21.02	10.8
Other	181,883	8.39	3.6	158,843	8.00	4.2
Total	$ 5,096,760	$ 235.30	100.0%	$ 3,859,994	$ 194.13	100.0%

Medical care costs increased in 2012 primarily due to the same shifts in member mix and the benefit expansions that led to increased premium revenue, particularly in California and Texas. Medical care costs as a percentage of premium revenue, net of premium taxes (the medical care ratio) also increased in 2012 when compared with 2011 because increases in premium rates have not kept pace with increases in medical costs.

Individual Health Plan Analysis

Membership and premium revenue increased significantly at the Texas health plan in 2012 as a result of the transition of large numbers of ABD, TANF and CHIP members from fee-for-service reimbursement into managed care effective March 1, 2012. Also on that date inpatient facility and pharmacy benefits that had previously been reimbursed through fee for service for managed care members were transitioned into managed care contracts; further increasing premium revenue and related medical costs. As noted above, margins on newly transitioned ABD members were considerably less than those experienced by the Company overall. The medical care ratio for the Texas health plan's ABD membership in total was approximately 97.8% for all of 2012. Nevertheless, the medical care ratio for the Texas health plan overall decreased to 93.7% for all of 2012 compared with 95.1% for 2011.

The medical care ratio at the California health plan increased significantly in 2012, to 91.1% in 2012 from 86.9% in 2011. As noted above, margins on newly transitioned ABD members were considerably less than those experienced by the Company overall.

The medical care ratio of the Florida health plan decreased to 85.3% in 2012, from 91.9% in 2011 due to a premium rate increase effective September 1, 2011, the re-contracting of portions of the health plan's specialty care network, lower inpatient utilization and lower pharmacy costs.

The medical care ratio of the Michigan health plan increased to 88.3% in 2012, from 86.3% in 2011. The primary reason for the increase in the medical care ratio in 2012 was a reduction to premium rates linked to a decrease in premium taxes effective April 1, 2012. The result was a higher medical care ratio in 2012 because premium revenue decreased. There was no impact on profitability because premium tax expense was reduced by the same amount as premium revenue. The remainder of the deterioration in the Michigan plan's medical care ratio was the result of higher pharmacy and fee for service costs. We received a blended rate increase in Michigan of approximately 2%, effective October 1, 2012.

The medical care ratio of the New Mexico health plan increased to 84.7% in 2012, from 82.4% in 2011, primarily as a result of lower premiums and higher inpatient facility costs. The New Mexico health plan received a premium rate reduction of approximately 2.5% effective July 1, 2011.

The medical care ratio of the Ohio health plan increased to 88.6% in 2012, from 84.1% in 2011. The increase in the Ohio health plan's medical care ratio was partially the result of a 2% rate reduction effective January 1, 2012, together with the assumption of the lower margin pharmacy benefit effective October 1, 2011.

The medical care ratio of the Utah health plan increased to 82.3% in 2012 from 78.1% in 2011. The Utah health plan received a premium rate reduction of approximately 2% effective July 1, 2012.

The addition of ABD members to the Washington health plan effective July 1, 2012 increased its medical care ratio to 86.8% in the 2012, compared with 85.4% in 2011. The higher premium revenue PMPM associated with the ABD membership, however, offset the increased medical care ratio so that income from operations was consistent between 2012 and 2011.

The medical care ratio of the Wisconsin health plan increased to 96.2% in 2012, compared with 92.5% in 2011 primarily due to increases in inpatient costs. The plan has implemented provider contracting initiatives and new utilization management techniques as a part of its efforts to improve profitability.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Year Ended December 31, 2012						
	Member Months[1]	Premium Revenue		Medical Care Costs		Premium Tax Expense	MCR Excluding Premium Tax Expense[4]
		Total	PMPM	Total	PMPM		
California	4,177	$ 671,489	$ 160.77	$ 606,494	$ 145.20	$ 5,697	91.1%
Florida	850	228,828	269.36	195,226	229.80	(4)	85.3
Michigan	2,639	658,741	249.59	570,636	216.20	12,190	88.3
Missouri[2]	483	113,818	236.87	113,101	234.15	—	99.4
New Mexico	1,069	338,770	316.90	280,108	262.03	8,208	84.7
Ohio	3,065	1,187,422	387.48	970,504	316.69	92,285	88.6

	Year Ended December 31, 2011						
	Member Months[1]	Premium Revenue		Medical Care Costs		Premium Tax Expense	MCR Excluding Premium Tax Expense[4]
		Total	PMPM	Total	PMPM		
California	4,190	$ 575,176	$ 137.27	$ 493,419	$ 117.75	$ 7,499	86.9%
Florida	788	203,945	258.70	187,358	237.66	41	91.9
Michigan	2,660	662,127	248.91	537,779	202.16	38,733	86.3
Missouri[2]	959	229,584	239.38	195,832	204.19	—	85.3
New Mexico	1,074	345,732	321.94	277,338	258.25	9,285	82.4
Ohio	2,966	988,896	333.40	766,949	258.57	76,677	84.1
Texas	1,616	409,295	253.40	382,390	236.74	7,117	95.1
Utah	972	287,290	295.51	224,513	230.94	—	78.1
Washington	4,171	823,323	197.42	690,513	165.57	14,865	85.4
Wisconsin	488	69,596	142.56	64,346	131.81	44	92.5
Other[3]	—	8,443	—	39,557	—	328	—
	19,884	$ 4,603,407	$ 231.51	$ 3,859,994	$ 194.13	$ 154,589	86.8%

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) Our contract with the state of Missouri expired without renewal on June 30, 2012. The Missouri health plan's claims run-out activity subsequent to June 30, 2012, is reported in "Other."

(3) "Other" medical care costs also include medically related administrative costs of the parent company.

(4) The "MCR Excluding Premium Tax Expense" represents medical costs as a percentage of premium revenues, where premium revenue is reduced by premium tax expense.

Days in Medical Claims and Benefits Payable

The days in medical claims and benefits payable were as follows:

	December 31,		
	2012	2011	2010
Days in claims payable: fee-for-service only	40 days	40 days	42 days
Number of claims in inventory at end of period	122,700	111,100	143,600
Billed charges of claims in inventory at end of period (in thousands)	$ 255,200	$ 207,600	$ 218,900

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Year Ended December 31,	
	2012	2011
	(In thousands)	
Service revenue before amortization	$ 189,281	$ 167,269
Amortization recorded as reduction of service revenue	(1,571)	(6,822)
Service revenue	187,710	160,447
Cost of service revenue	141,208	143,987
General and administrative costs	17,648	9,270
Amortization of customer relationship intangibles recorded as amortization	5,127	5,127
Operating income	$ 23,727	$ 2,063

Operating income for our Molina Medicaid Solutions segment improved $21.7 million for the year ended December 31, 2012, compared with 2011. This improvement was primarily the result of stabilization of our newest contracts in Idaho and Maine.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses increased to 8.8% of total revenue for the year ended December 31, 2012, compared with 8.7% of total revenue for the year ended December 31, 2011.

Premium Tax Expense

Premium tax expense decreased to 2.8% of premium revenue net of premium tax for the year ended December 31, 2012, compared with 3.5% of total premium revenue for the year ended December 31, 2011. The decrease in 2012 was primarily due to the reduction of premium taxes at the Michigan and California health plans effective in 2012, and the growth in revenue at our Texas health plan, which is subject to a lower premium tax rate (measured as a percentage of premium revenue) than our consolidated average.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service revenue;" and
- Depreciation is recorded within the heading "Cost of service revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Year Ended December 31,			
	2012		2011	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software	$ 43,201	0.7%	$ 30,864	0.7%
Amortization of intangible assets	20,503	0.3	19,826	0.4
Depreciation and amortization reported as such in the consolidated statements of income	63,704	1.0	50,690	1.1
Amortization recorded as reduction of service revenue	1,571	—	6,822	0.1
Amortization of capitalized software recorded as cost of service revenue	13,489	0.2	16,871	0.4
Total	$ 78,764	1.2%	$ 74,383	1.6%

Impairment of Goodwill and Intangible Assets

We did not record an impairment charge in 2012. On February 17, 2012, our Missouri health plan was notified that it was not awarded a new contract under the state's RFP, and therefore its contract expired on June 30, 2012. As a result, we recorded a non-cash impairment charge of approximately $64.6 million, or $1.34 per diluted share, in the fourth quarter of 2011. Of the total charge, $58.5 million was not tax deductible, resulting in a disproportionate impact to net income and to the effective tax rate.

Interest Expense

Interest expense was $16.8 million for the year ended December 31, 2012, compared with $15.5 million for the year ended December 31, 2011. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $5.9 million and $5.5 million for the years ended December 31, 2012 and 2011, respectively.

Income Taxes

Income tax expense is recorded at an effective rate of 48.6% for the year ended December 31, 2012, compared with 67.8% for the year ended December 31, 2011. The effective rate for the year ended December 31, 2012 is higher than our statutory rate primarily due to nondeductible expenses primarily relating to compensation and changes in the fair value of contingent consideration. The effective rate for the year ended December 31, 2011 reflects the nondeductible nature of the majority of the Missouri impairment charge and certain discrete tax benefits.

Year Ended December 31, 2011 Compared with the Year Ended December 31, 2010

Fiscal Year 2011 Overview and Highlights

For the year, our net income was $20.8 million, or $0.45 per diluted share, a decrease of 66% over 2010. We recorded a non-cash impairment charge of approximately $64.6 million, or $1.34 per diluted share, in connection with the expiration of our Missouri health plan's contract with the state of Missouri effective June 30, 2012. Absent this impairment charge, improved performance of the Health Plans segment drove our improved performance overall for the year ended December 31, 2011.

We earned premium revenues of $4.6 billion, up 15.4% over the previous year. Meanwhile, we achieved a medical care ratio of 86.8%, compared with a medical care ratio of 87.6% for fiscal year 2010.

Health Plans Segment

Premium Revenue

Premium revenue increased 15.4% in the year ended December 31, 2011, compared with the year ended December 31, 2010, due to a membership increase of approximately 8.4% (on a member-month basis), and PMPM revenue increase of approximately 6.4%. Premium revenues were impacted by the following in 2011:

- In the fourth quarter of 2011, our New Mexico health plan entered into a contract amendment that more closely aligns the calculation of revenue with the methodology adopted under the Affordable Care Act. The contract amendment changed the calculation of the amount of revenue that may be recognized relative to medical costs, and resulted in the recognition of approximately $5.6 million of premium revenue which all related to periods prior to 2011.

- Also in the fourth quarter of 2011, the addition of pharmacy benefits at our Ohio health plan effective October 1, 2011, increased premium revenue.

Absent the adjustment to New Mexico premium revenue and the addition of the pharmacy benefit in Ohio, premium revenue PMPM increased approximately 4.4%, from $218 in 2010 to $227 in 2011. Increased enrollment among the ABD and Medicare populations contributed to the higher premium revenue PMPM. Medicare premium revenue was $388 million for the year ended December 31, 2011, compared with $265 million for the year ended December 31, 2010.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Year Ended December 31,					
	2011			2010		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 2,764,309	$ 139.02	71.6%	$ 2,360,858	$ 128.73	70.0%
Capitation	518,835	26.09	13.4	555,487	30.29	16.5
Pharmacy	418,007	21.02	10.8	325,935	17.77	9.7
Other	158,843	8.00	4.2	128,577	7.01	3.8
Total	$ 3,859,994	$ 194.13	100.0%	$ 3,370,857	$ 183.80	100.0%

The medical care ratio decreased to 86.8% for the year ended December 31, 2011, compared with 87.6% for the year ended December 31, 2010.

The medical care ratio of the California health plan increased to 86.9% for the year ended December 31, 2011, from 84.6% for the year ended December 31, 2010. The California health plan received premium reductions of approximately 3% and 1% effective July 1, 2011, and October 1, 2011, respectively. In the second half of 2011, the California health plan added approximately 14,500 new ABD members with average premium revenue of approximately $385 PMPM.

The medical care ratio of the Florida health plan decreased to 91.9% for the year ended December 31, 2011, from 95.4% for the year ended December 31, 2010, primarily due to initiatives that have reduced pharmacy and behavioral health costs, and a premium rate increase of approximately 7.5% effective September 1, 2011.

The medical care ratio of the Michigan health plan decreased to 86.3% for the year ended December 31, 2011, from 89.3% for the year ended December 31, 2010, primarily due to improved Medicare performance and lower inpatient facility costs. The Michigan health plan received a premium rate increase of approximately 1% effective October 1, 2011.

The medical care ratio of the Missouri health plan decreased to 85.3% for the year ended December 31, 2011, from 85.5% for the year ended December 31, 2010. The health plan received a premium rate increase of approximately 5% effective July 1, 2011.

The medical care ratio of the New Mexico health plan decreased to 82.4% for the year ended December 31, 2011, from 82.7% for the year ended December 31, 2010. The New Mexico health plan received a premium rate reduction of approximately 2.5% effective July 1, 2011. As discussed above, the New Mexico health plan entered into a contract amendment that changed the calculation of the amount of revenue that may be recognized relative to medical costs in the fourth quarter of 2011. Consequently, premium revenue recognized in the year ended December 31, 2011, includes $5.6 million related to periods prior to 2011.

The medical care ratio of the Ohio health plan decreased to 84.1% for the year ended December 31, 2011, from 85.9% for the year ended December 31, 2010, due to an increase in Medicaid premium PMPM of approximately 4.5% effective January 1, 2011, and relatively flat fee-for-service costs. The pharmacy benefit was restored to all managed care plans in Ohio effective October 1, 2011.

The medical care ratio of the Texas health plan increased to 95.1% for the year ended December 31, 2011, from 87.7% for the year ended December 31, 2010. Effective February 1, 2011, we added approximately 30,000 ABD members in the Dallas-Fort Worth area and effective September 1, 2011, we added approximately 8,000 ABD members and 3,000 TANF members in the Jefferson Service area. Medical costs in the Dallas-Fort Worth area were well in excess of premium revenue. Excluding the ABD population in the Dallas-Fort Worth region, the medical care ratio of the Texas health plan was 87.2% for the year ended December 31, 2011.

The medical care ratio of the Utah health plan decreased to 78.1% for the year ended December 31, 2011, from 91.3% for the year ended December 31, 2010, primarily due to reduced fee-for-service inpatient and physician costs and an increase in

Medicaid premiums PMPM. Effective July 1, 2010, the Utah health plan received a premium rate increase of approximately 7%. Lower fee-for-service costs were the result of both lower unit costs and lower utilization. During the second quarter of 2011 we settled certain claims with the state regarding the savings share provision of our contract in effect from 2003 through June of 2009. We settled for the contract years 2006 through 2009 and recognized $6.9 million in premium revenue without any corresponding charge to expense. The Utah health plan received a premium rate reduction of approximately 2% effective July 1, 2011.

The medical care ratio of the Washington health plan remained flat at 85.4% for the year ended December 31, 2011 compared with the year ended December 31, 2010. Higher fee-for-service and pharmacy costs were offset by lower capitation costs.

The medical care ratio of the Wisconsin health plan (acquired September 1, 2010) was 92.5% for the year ended December 31, 2011. The state of Wisconsin reduced capitation rates by 11% on January 1, 2011.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Year Ended December 31, 2011						
	Member Months[1]	Premium Revenue		Medical Care Costs		Premium Tax Expense	MCR Excluding Premium Tax Expense[4]
		Total	PMPM	Total	PMPM

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) Our contract with the state of Missouri expired without renewal on June 30, 2012.

(3) "Other" medical care costs also include medically related administrative costs at the parent company.

(4) The "MCR Excluding Premium Tax Expense" represents medical costs as a percentage of premium revenues, where premium revenue is reduced by premium tax expense.

Molina Medicaid Solutions Segment

We acquired Molina Medicaid Solutions on May 1, 2010; therefore, the year ended December 31, 2010, includes only eight months of operating results for this segment. Performance of the Molina Medicaid Solutions segment was as follows:

	Year Ended December 31, 2011	Eight Months Ended December 31, 2010
	(In thousands)	
Service revenue before amortization	$ 167,269	$ 98,125
Amortization recorded as reduction of service revenue	(6,822)	(8,316)
Service revenue	160,447	89,809
Cost of service revenue	143,987	78,647
General and administrative costs	9,270	5,135
Amortization of customer relationship intangibles recorded as amortization	5,127	3,418
Operating income	$ 2,063	$ 2,609

For the year ended December 31, 2011, cost of service revenue included $11.5 million of direct costs associated with the Idaho contract that would otherwise have been recorded as deferred contract costs. In assessing the recoverability of the deferred contract costs associated with the Idaho contract during 2011, we determined that these costs should be expensed as a period cost. In December 2011, our MMIS in Maine received full certification from CMS.

Consolidated Expenses and Other

General and Administrative Expenses

General and administrative expenses were $415.9 million, or 8.7% of total revenue, for the year ended December 31, 2011, compared with $346.0 million, or 8.5% of total revenue, for the year ended December 31, 2010.

Premium Tax Expense

Premium tax expense decreased to 3.5% of premium revenue net of premium tax for the year ended December 31, 2011, compared with 3.6% for December 31, 2010.

Depreciation and Amortization

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Year Ended December 31,			
	2011		2010	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software	$ 30,864	0.7%	$ 27,230	0.7%
Amortization of intangible assets	19,826	0.4	18,474	0.4
Depreciation and amortization reported as such in the consolidated statements of income	50,690	1.1	45,704	1.1
Amortization recorded as reduction of service revenue	6,822	0.1	8,316	0.2
Amortization of capitalized software recorded as cost of service revenue	16,871	0.4	6,745	0.2
Total	$ 74,383	1.6%	$ 60,765	1.5%

Impairment of Goodwill and Intangible Assets

On February 17, 2012, our Missouri health plan was notified that it was not awarded a new contract under the state's RFP, and therefore its contract expired on June 30, 2012. As a result, we recorded a non-cash impairment charge of approximately $64.6 million, or $1.34 per diluted share, in the fourth quarter of 2011. Of the total charge, $58.5 million is not tax deductible, resulting in a disproportionate impact to net income and the effective tax rate. We did not record an impairment charge in 2010.

Interest Expense

Interest expense was $15.5 million for each of the years ended December 31, 2011 and 2010. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $5.5 million and $5.1 million for the years ended December 31, 2011 and 2010, respectively.

Income Taxes

Income tax expense was recorded at an effective rate of 67.8% for the year ended December 31, 2011, compared with 38.6% for the year ended December 31, 2010. The effective rate for the year ended December 31, 2011 reflects the non-deductible nature of the majority of the Missouri impairment charge, discrete tax benefits of $1.7 million recognized for statute closures, prior year tax return to provision reconciliations, and certain non-recurring income that is not subject to income tax. Excluding the impact from the Missouri impairment charge and discrete tax benefits, the effective tax rate for the year ended December 31, 2011 was 37.9%.

Acquisitions

Molina Center. On December 7, 2011, our wholly owned subsidiary Molina Center LLC closed on its acquisition of the 460,000 square foot office building located in Long Beach, California. The building, or Molina Center, consists of two conjoined fourteen-story office towers on approximately five acres of land. For the last several years we have leased approximately 155,000 square feet of the Molina Center for use as our corporate headquarters and also for use by our California health plan subsidiary. The final purchase price was $81 million, which amount was paid with a combination of cash on hand and bank financing under a term loan agreement. We acquired this business primarily to facilitate space needs for the projected future growth of the Company.

Molina Medicaid Solutions. On May 1, 2010, we acquired a health information management business which we operate under the name, *Molina Medicaid Solutions*SM.

Other Transactions

As described above, our Missouri health plan, Alliance for Community Health, LLC, or ACH, was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's prior contract with the state (the "MC+ Contract") expired without renewal on June 30, 2012, subject to certain transition obligations which terminate 365 days after June 30, 2012. ACH intends to enter into an assignment and assumption agreement with another one of our wholly owned subsidiaries, Molina Healthcare of Illinois, Inc., or Molina Illinois, pursuant to which ACH intends to assign to Molina Illinois substantially all of its assets and liabilities, including its surviving rights, duties and obligations, including all of the post-expiration duties and services under the MC+ Contract. Such assignment is subject to prior approval by the Missouri Department of Insurance, Financial Institutions and Professional Registration, the Illinois Department of Insurance, and the written consent of Mo HealthNet. Subsequent to the effectiveness of the assignment and assumption agreement between ACH and Molina Illinois and ACH's surrender of its Missouri certificate of authority, we intend to abandon our equity interests in ACH to an unrelated

entity. Subject to appropriate regulatory approvals discussed above, ACH will retain certain assets and investments, to which we will no longer have access after the abandonment transaction is effected and which amounts we intend to write off.

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of December 31, 2012, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income decreased to $5.2 million for the year ended December 31, 2012, compared with $5.5 million for the year ended December 31, 2011. Our annualized portfolio yields for the years ended December 31, 2012, 2011, and 2010 were 0.5%, 0.6%, and 0.7%, respectively.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use. See further discussion below, under *Regulatory Capital and Dividend Restrictions.*

Liquidity

Cash provided by operating activities was $347.8 million in 2012 compared with $225.4 million in 2011, an increase of $122.4 million. In 2012, deferred revenue was a source of cash from operations amounting to $90.9 million, compared with a use of cash amounting to $8.2 million in 2011. This increase was primarily due to an increase in deferred revenue relating to an advance premium payment received by our Washington health plan in December 2012. In 2011, cash provided by operating activities was $225.4 million compared with $161.4 million for 2010, an increase of $64.0 million. This increase was primarily due to higher operating income before giving effect to the $64.6 million non-cash impairment of goodwill and intangible assets relating to our Missouri health plan's state contract termination recorded in the fourth quarter of 2011.

Cash used in investing activities was $93.6 million in 2012 compared with $236.9 million in 2011, a decrease of $143.3 million. This decrease was primarily due to the change in cash paid in business combinations resulting from our fourth quarter 2011 acquisition of the Molina Center amounting to $81.0 million, with no comparable activity in 2012. In 2011, cash provided by financing activities was $236.9 million compared with $288.8 million in 2010, a decrease of $51.9 million. This decrease was primarily due to $46.5 million less cash paid for business combinations in 2011. We acquired Molina Medicaid Solutions in the second quarter of 2010 for $131.1 million, compared with $81.0 million spent to acquire the Molina Center in 2011.

Cash provided by financing activities was $47.7 million in 2012 compared with $49.5 million in 2011, a decrease of $1.8 million. Cash provided from borrowings under our credit facility in 2012 amounting to $40.0 million was consistent with cash provided from the $48.6 million term loan in 2011 used to finance the acquisition of the Molina Center. In 2011, cash provided

by financing activities was $49.5 million compared with $113.8 million in 2010, a decrease of $64.3 million. This decrease was due to $111.1 million of net proceeds from our common stock offering in the third quarter of 2010, compared with the $48.6 million term loan to acquire the Molina Center in 2011.

Financial Condition

On a consolidated basis, at December 31, 2012, we had working capital of $521.1 million compared with $446.2 million at December 31, 2011. At December 31, 2012 we had cash and investments of $1,196.1 million, compared with $893.0 million of cash and investments at December 31, 2011. We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Regulatory Capital and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Such state laws and regulations also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after inter-company eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $549.7 million at December 31, 2012, and $492.4 million at December 31, 2011. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders are generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $46.9 million and $23.6 million as of December 31, 2012, and 2011, respectively. This increase was primarily due to increased dividends received from our subsidiaries during 2012.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital, or RBC, rules. Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of December 31, 2012, our health plans had aggregate statutory capital and surplus of approximately $557.9 million compared with the required minimum aggregate statutory capital and surplus of approximately $345.7 million. All of our health plans were in compliance with the minimum capital requirements at December 31, 2012. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Future Sources and Uses of Liquidity

1.125% Cash Convertible Senior Notes due 2020

On February 15, 2013, we issued $550 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020, or the Notes. The Notes bear interest at a rate of 1.125% per year, payable semiannually in arrears on January 15 and July 15 of each year, beginning on July 15, 2013. The Notes will mature on January 15, 2020.

The Notes are not convertible into our common stock or any other securities under any circumstances. Holders may convert their Notes solely into cash at their option at any time prior to the close of business on the business day immediately preceding July 15, 2019 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period immediately after any five consecutive trading day period in which the trading price per $1,000 principal amount of Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their Notes solely into cash at any time, regardless of the foregoing circumstances. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of Notes, equal to the settlement amount, determined in the manner set forth in the Indenture.

The initial conversion rate will be 24.5277 shares of our common stock per $1,000 principal amount of Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate will be subject to adjustment

in some events but will not be adjusted for any accrued and unpaid interest. In addition, following certain corporate events that occur prior to the maturity date, we will pay a cash make-whole premium by increasing the conversion rate for a holder who elects to convert its Notes in connection with such a corporate event in certain circumstances. We may not redeem the Notes prior to the maturity date, and no sinking fund is provided for the Notes.

If we undergo a fundamental change (as defined in the indenture to the Notes), holders may require us to repurchase for cash all or part of their Notes at a repurchase price equal to 100% of the principal amount of the Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the fundamental change repurchase date. The indenture provides for customary events of default, including cross acceleration to certain other indebtedness of ours, and our significant subsidiaries.

The Notes will be senior unsecured obligations of the Company and will rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the Notes; equal in right of payment to any of our unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries.

Cash Convertible Note Hedge and Warrant Transactions

In connection with the pricing of the Notes, on February 11, 2013, we entered into cash convertible note hedge transactions and warrant transactions relating to a notional number of shares of our common stock underlying the Notes to be issued by us (without regard to the initial purchasers' $100 million over-allotment option) with two counterparties, JPMorgan Chase Bank, National Association, London Branch and Bank of America, N.A. (the "Option Counterparties"). The cash convertible note hedge transactions are intended to offset cash payments due upon any conversion of the Notes. However, the warrant transactions could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the warrants. The strike price of the warrants will initially be $53.8475 per share, which is 75% above the last reported sale price of our common stock on February 11, 2013.

In connection with the exercise in full by the initial purchasers of their over-allotment option in respect of the Notes, on February 13, 2013, we and the Option Counterparties amended the cash convertible note hedge transactions entered into on February 11, 2013 to upsize such transactions by a notional number of shares of our common stock corresponding to the number of shares underlying the Notes purchased pursuant to the exercise of such over-allotment option. On February 13, 2013, we also entered into additional warrant transactions with the Option Counterparties relating to a number of shares of our common stock corresponding to the number of shares underlying the Notes purchased pursuant to the exercise of such over-allotment option. Each of the amendments to the cash convertible note hedge transactions and the additional warrant transactions were on substantially similar terms to the corresponding transactions entered into on February 11, 2013. Pursuant to these warrant transactions, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances.

We used approximately $74.3 million of the net proceeds from the offering to pay the cost of the cash convertible note hedge transactions (after such cost was partially offset by the proceeds to us from the sale of warrants in the warrant transactions and the additional warrant transactions).

Aside from the initial payment of a premium to the Option Counterparties of approximately $149.3 million, we will not be required to make any cash payments to the Option Counterparties under the cash convertible note hedge transactions and will be entitled to receive from the Option Counterparties an amount of cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the cash convertible note hedge transactions during the relevant valuation period. The strike price under the cash convertible note hedge transactions is initially equal to the conversion price of the Notes. Additionally, if the market value per share of our common stock exceeds the strike price of the warrants on any trading day during the 160 trading day measurement period under the warrant transactions and the additional warrant transactions, we will be obligated to issue to the Option Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the warrant transactions and the additional warrant transactions, subject to a share delivery cap. The Company will not receive any additional proceeds if warrants are exercised.

Repurchase in Connection with Offering of 1.125% Cash Convertible Senior Notes Due 2020

We used a portion of the net proceeds in this offering to repurchase $50 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. On February 12, 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Credit Facility

On February 15, 2013, we used approximately $40.0 million of the net proceeds from the offering of the Notes to repay all of the outstanding indebtedness under our $170 million revolving credit facility, or the Credit Facility, with various lenders and U.S. Bank National Association, as Line of Credit Issuer, Swing Line Lender, and Administrative Agent. As of December 31, 2012, there was $40.0 million outstanding under the Credit Facility.

We terminated the Credit Facility in connection with the closing of the offering and sale of the Notes. Two letters of credit in the aggregate principal amount of $10.3 million that reduced the amount available for borrowing under the Credit Facility as of December 31, 2012, were transferred to direct issue letters of credit with another financial institution. The Credit Facility had a term of five years under which all amounts outstanding would have been due and payable on September 9, 2016.

Borrowings under the Credit Facility accrued interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we were required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility. The applicable margins ranged between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio.

Our obligations under the Credit Facility were secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan). The Credit Facility included usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also required us to maintain as of the end of any fiscal quarter (calculated for each four consecutive fiscal quarter period) a ratio of total consolidated debt to total consolidated EBITDA, as defined in the Credit Facility, of not more than 2.75 to 1.00, and a fixed charge coverage ratio of not less than 1.75 to 1.00. At December 31, 2012, we were in compliance with all financial covenants under the Credit Facility.

3.75% Convertible Senior Notes due 2014

As of December 31, 2012, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014, or the 3.75% Notes, remain outstanding. The 3.75% Notes rank equally in right of payment with our existing and future senior indebtedness. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Term Loan

On December 7, 2011, our wholly owned subsidiary Molina Center LLC entered into a Term Loan Agreement, dated as of December 1, 2011, with various lenders and East West Bank, as Administrative Agent (the "Administrative Agent"). Pursuant to the terms of the Term Loan Agreement, Molina Center LLC borrowed the aggregate principal amount of $48.6 million to finance a portion of the $81 million purchase price for the acquisition of the Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period (as defined below) commencing January 1, 2012. The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. "Interest Period" means the period commencing on the first day of each calendar month and ending on the last day of each calendar month. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commenced on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Interest Rate Swap

In May 2012, we entered into a $42.5 million notional amount interest rate swap agreement, or Swap Agreement, with an effective date of March 1, 2013. While not designated as a hedge during the year ended December 31, 2012, the Swap Agreement is intended to reduce our exposure to fluctuations in the contractual variable interest rates under our Term Loan Agreement, and expires on the maturity date of the Term Loan Agreement, which is November 30, 2018. Under the Swap Agreement, we will receive a variable rate of the one-month LIBOR plus 3.25%, and pay a fixed rate of 5.34%. The Swap Agreement is measured and reported at fair value on a recurring basis, within Level 2 of the fair value hierarchy. Gains and losses relating to changes in fair value are reported in earnings in the current period. For the year ended December 31, 2012, we have recorded losses of $1.3 million to general and administrative expense. As of December 31, 2012 the fair value of the Swap Agreement is a liability of $1.3 million, recorded to other noncurrent liabilities. We do not use derivatives for trading or speculative purposes. We believe that we are not exposed to more than a nominal amount of credit risk relating to the Swap Agreement because the counterparty is an established and well-capitalized financial institution.

Shelf Registration Statement

In May 2012, we filed an automatic shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Securities Repurchase Program

Effective as of February 13, 2013, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior note due 2014. The repurchase program extends through December 31, 2014.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The recognition of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and;
- The determination of medical claims and benefits payable.

Revenue Recognition — Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn will lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

- *California Health Plan Medical Cost Floors (Minimums):* A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We

recorded a liability under the terms of these contract provisions of $0.3 million and $1.0 million at December 31, 2012, and December 31, 2011, respectively.

- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health:* A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At both December 31, 2012 and December 31, 2011, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.
- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* Our contract with the state of New Mexico directs that a portion of premiums received may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. At both December 31, 2012, and December 31, 2011, we had not recorded any liability under the terms of these contract provisions.
- *Texas Health Plan Profit Sharing:* Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we accrued an aggregate liability of approximately $3.2 million and $0.7 million pursuant to our profit-sharing agreement with the state of Texas at December 31, 2012 and December 31, 2011, respectively.
- *Washington Health Plan Medical Cost Floors (Minimums):* A portion of certain premiums received by our Washington health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At both December 31, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision because medical expenses are not less than the contractual floor.
- *Medicare Revenue Risk Adjustment:* Based on member encounter data that we submit to CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $0.3 million and $5.0 million for anticipated Medicare risk adjustment premiums at December 31, 2012, and December 31, 2011, respectively.

Quality incentives that allow us to recognize incremental revenue if certain quality standards are met. These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

- *New Mexico Health Plan Quality Incentive Premiums:* Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.
- *Ohio Health Plan Quality Incentive Premiums:* Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.
- *Texas Health Plan Quality Incentive Premiums:* Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.
- *Wisconsin Health Plan Quality Incentive Premiums:* Under our contract with the state of Wisconsin, effective beginning in 2011, up to 3.25% of premium revenue is withheld by the state. The withheld premiums can be earned by the health plan by meeting certain performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of December 31, 2012 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of December 31, 2012.

	Year Ended December 31, 2012				
	Maximum Available Quality Incentive Premium – Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized
	(In thousands)				
New Mexico	$ 2,244	$ 1,889	$ 643	$ 2,532	$ 338,770

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid

Solutions contracts - which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) - are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements under the scope of FASB Accounting Standards Codification Subtopic 605-25, Revenue Recognition — Multiple –Element Arrangements, and SEC Staff Accounting Bulletin Topic 13, Revenue Recognition.

Effective January 1, 2011, we adopted a new accounting standard that amends the guidance on the accounting for multiple-element arrangements. Pursuant to the new standard, each required deliverable is evaluated to determine whether it qualifies as a separate unit of accounting which is generally based on whether the deliverable has standalone value to the customer. In addition to standalone value, previous guidance also required objective and reliable evidence of fair value of a deliverable in order to treat the deliverable as a separate unit of accounting. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent. We have adopted this guidance on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Our adoption of this guidance has not impacted the timing or pattern of our revenue recognition in 2011 or 2012. Also, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. For contracts entered into prior to January 1, 2011, objective and reliable evidence of fair value would be required, in addition to DDI standalone value which we do not have, in order to treat DDI as a separate unit of accounting. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and

- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions)

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs.
- Employee costs incurred in performing transaction services.
- Vendor costs incurred in performing transaction services.
- Costs incurred in performing required monitoring of and reporting on contract performance.
- Costs incurred in maintaining and processing member and provider eligibility.
- Costs incurred in communicating with members and providers.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	December 31,		
	2012	2011	2010
	(In thousands)		
Fee-for-service claims incurred but not paid (IBNP)	$ 377,614	$ 301,020	$ 275,259
Capitation payable	49,066	53,532	49,598
Pharmacy	38,992	26,178	14,649
Other	28,858	21,746	14,850
	$ 494,530	$ 402,476	$ 354,356

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $377.6 million of our total medical claims and benefits payable of $494.5 million as of December 31, 2012. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider's monthly capitation payment), our IBNP liability at December 31, 2012, was $371.4 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the

administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of December 31, 2012 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding December 31, 2012, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 152,598
(4)%	101,732
(2)%	50,866
2%	(50,866)
4%	(101,732)
6%	(152,598)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of December 31, 2012 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ (75,312)
(4)%	(50,208)
(2)%	(25,104)
2%	25,104
4%	50,208
6%	75,312

The following per-share amounts are based on a combined federal and state statutory tax rate of 37.5%, and $47.0 million diluted shares outstanding for the year ended December 31, 2012. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at December 31, 2012, net income for the year ended December 31, 2012 would increase or decrease by approximately $15.9 million, or $0.34 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at December 31, 2012, net income for the year ended December 31, 2012 would increase or decrease by approximately $7.8 million, or $0.17 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $79.5 million, or $1.69 per diluted share, and $39.2 million, or $0.83 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of

net income by approximately $15.9 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore never perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range. For example, for the years ended December 31, 2011 and 2010, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2010 and 2009, by 14.6% and 15.7%, respectively. Furthermore, because the initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate - we only know when the circumstances for any one or more of those factors are out of the ordinary.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2012, 2011, and 2010 were less than what we had expected when we established our reserves. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimate.

We recognized a benefit from prior period claims development in the amount of $39.3 million for the year ended December 31, 2012. This amount represents our estimate as of December 31, 2012, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe that the overestimation of our claims liability at December 31, 2011 was due primarily to the following factors:

- At our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.

- At our Texas health plan, we overestimated the cost of new members in STAR+PLUS (the name of our ABD program in Texas), in the Dallas region.
- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in the lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all of the claims overestimation.
- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Missouri health plan, as a result of the costs associated with an unusually large number of premature infants during the fourth quarter of 2011.

We recognized a benefit from prior period claims development in the amount of $51.8 million for the year ended December 31, 2011. This amount represents our estimate as of December 31, 2011, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2010 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe that the overestimation of our claims liability at December 31, 2010 was due primarily to the following factors:

- At our Ohio health plan, we overestimated the impact of a buildup in claims inventory.
- At our California health plan, we overestimated the impact of the settlement of disputed provider claims.
- At our New Mexico health plan, we underestimated the impact of a reduction in the outpatient facility fee schedule.

We recognized a benefit from prior period claims development in the amount of $49.4 million for the year ended December 31, 2010. This amount represents our estimate as of December 31, 2010, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2009 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe that the overestimation of our claims liability at December 31, 2009 was due primarily to the following factors:

- At our New Mexico health plan, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- At our California health plan, we underestimated the extent to which various network restructuring, provider contracting, and medical management initiatives had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

In estimating our claims liability at December 31, 2012, we adjusted our base calculation to take account of the numerous factors that we believe will likely change our final claims liability amount. We believe that the most significant among those factors are:

- Our Texas health plan membership nearly doubled effective March 1, 2012. In addition, effective March 1, 2012, we assumed inpatient medical liability for ABD members for which we were not previously responsible. Reserves for new coverage and new regions are now based on the newly developing claims lag patterns. While the lag patterns are now beginning to stabilize for the new membership and coverage, the true reserve liability continues to be more uncertain than usual.
- Data published by the Centers for Disease Control, or CDC, indicated a significant increase in the percentage of office visits for influenza-like illnesses, or ILI, during December 2012. This indicated that the annual flu season was starting earlier than it had in most recent years. This was most noticeable in the southeast region of the country, but impacted other areas as well. Our leading indicators, including inpatient authorizations and overall pharmacy utilization, did not show as great an increase as we had expected based on the severity of the CDC's flu-related indices. However, we did see a significant increase in the use of prescription flu medication, especially in our Texas health plan. Therefore, we increased our reserves to account for expected additional utilization due to the early onset of the flu season.
- Our California health plan has enrolled approximately 20,000 new ABD members since September 30, 2011, as a result of the mandatory assignment of ABD members to managed care plans effective July 1, 2011. These new members converted from a fee-for-service environment. Due to the relatively recent transition of these members to managed care, their utilization of medical services is less predictable than it is for many of our other members.
- Prior to July 2012, it was the state of Washington's practice to disenroll certain sick newborns from the Healthy Options Medicaid managed care program and cover them under the Supplemental Security Income program, or SSI, instead. When this occurred, the health plan would reimburse the premiums received for that member back to the state and the state in turn reimbursed the health plan for the cost of care, usually retroactively to the date of birth. Effective July 1, 2012, the health plans now retain these members and cover them under a new ABD program entitled Healthy Options Blind and Disabled, or HOBD. The premium we receive from the state for the HOBD members is very high to cover

the substantial cost of care. By December, we had enrolled approximately 26,000 members under HOBD. Because the program is relatively new, there is still some uncertainty as to the level of claims to be expected from these high-cost members.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2012, 2011 and 2010, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In these years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The negative amounts displayed for "Components of medical care costs related to: Prior year" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period was more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

Commitments and Contingencies

We are not an obligor to or guarantor of any indebtedness of any other party, except for our obligation to pay benefits under policies in-force relating to an insurance subsidiary we sold in the first quarter of 2012, in the event such benefits are not paid by the reinsurer or current owner. This transaction is more fully described in Note 19 to the accompanying audited consolidated financial statements for the year ended December 31, 2012.

We are not a party to off-balance sheet financing arrangements except for operating leases which are disclosed in Note 19 to the accompanying audited consolidated financial statements for the year ended December 31, 2012.

Contractual Obligations

In the table below, we present our contractual obligations as of December 31, 2012. Some of the amounts we have included in this table are based on management's estimates and assumptions about these obligations, including their duration, the possibility of renewal, anticipated actions by third parties, and other factors. Because these estimates and assumptions are necessarily subjective, the contractual obligations we will actually pay in future periods may vary from those reflected in the table. Amounts are in thousands.

	Total	2013	2014-2015	2016-2017	2018 and Beyond
Medical claims and benefits payable	$ 494,530	$ 494,530	$ —	$ —	$ —
Principal amount of long-term debt(1)	274,471	1,155	189,465	42,681	41,170
Operating leases	86,276	26,866	36,228	15,411	7,771
Interest on long-term debt	23,465	9,035	9,150	3,675	1,605
Purchase commitments	37,537	19,367	17,645	525	—
Total contractual obligations	$ 916,279	$ 550,953	$ 252,488	$ 62,292	$ 50,546

(1) Represents the principal amount due on our 3.75% Convertible Senior Notes due 2014, our term loan due 2018, and the Credit Facility due 2016.

As of December 31, 2012, we have recorded approximately $10.6 million of unrecognized tax benefits. The above table does not contain this amount because we cannot reasonably estimate when or if such amount may be settled. See Note 13 to the accompanying audited consolidated financial statements for the year ended December 31, 2012 for further information.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk***

Quantitative and Qualitative Disclosures About Market Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

We are also exposed to interest rate risk relating to contractual variable interest rates under our Term Loan Agreement which matures on November 30, 2018. The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period commencing January 1, 2012. We manage this floating rate debt using an Interest Rate Swap Agreement that is intended to reduce our exposure to the impact of changing interest rates to our consolidated results of operations and future outflows for interest expense. Under the Swap Agreement, we will receive a variable rate of one-month LIBOR plus 3.25%, and pay a fixed rate of 5.34%. At December 31, 2012, a hypothetical 1% increase in the Eurodollar rate would result in a $1.6 million favorable change in the fair value of our Interest Rate Swap Agreement. This favorable change would reduce our exposure to a hypothetical 1% increase in the Eurodollar rate on the outstanding borrowings of our Term Loan, that would result in additional interest expense of only $0.5 million. See Note 12 of the accompanying audited consolidated financial statements for the year ended December 31, 2012 for more information on the Term Loan Agreement and Interest Rate Swap Agreement.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 8. ***Financial Statements and Supplementary Data***

INDEX TO FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited the accompanying consolidated balance sheets of Molina Healthcare, Inc. (the Company) as of December 31, 2012 and 2011, and the related consolidated statements of income and comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2012. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Molina Healthcare, Inc. at December 31, 2012 and 2011, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Molina Healthcare, Inc.'s internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2013 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of December 31, 2012, these health plans served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of primary care clinics in California, Florida, New Mexico and Washington; additionally, we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts are renewable at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan’s prior contract with the state expired without renewal on June 30, 2012 subject to certain transition obligations. As of December 31, 2012, we continued to process claims that were incurred by the Missouri health plan's members through the June 30, 2012 termination date. For the six months ended June 30, 2012, our Missouri health plan contributed premium revenue of $113.8 million, or 4.1% of total premium revenue, and comprised 79,000 members, or 4.3% of total Health Plans segment membership as of June 30, 2012.

Our state Medicaid contracts may be periodically adjusted to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas. For example, our Texas health plan added significant membership effective March 1, 2012, in service areas we had not previously served (the Hidalgo and El Paso service areas); and among populations we had not previously served within existing service areas, such as the Temporary Assistance for Needy Families, or TANF, population in the Dallas service area. Additionally, the health benefits provided to our TANF and ABD members in Texas under our contracts with the state were expanded to include inpatient facility and pharmacy services.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On July 13, 2012, our Molina Medicaid Solutions segment received full federal certification of its Medicaid Management Information System, or MMIS, in the state of Idaho from CMS. As a result of the CMS certification, the state of Idaho is entitled to receive federal reimbursement of 75% of its MMIS operations costs retroactive to June 1, 2010, the date that the system first began processing claims. Our MMIS in Maine received full federal certification from CMS on December 19, 2011.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement MMIS to another company. For the year ended December 31, 2012, our revenue under the Louisiana MMIS contract was $54.9 million, or 29.2% of total service revenue. We expect that we will continue to perform under this contract through implementation and acceptance of the successor MMIS. Based upon our past experience and our knowledge of the Louisiana MMIS bid process, we believe that implementation and acceptance of the successor MMIS will not occur until 2014 at the earliest. Through implementation and acceptance of the successor MMIS we expect to recognize approximately $40 million in revenue annually under our Louisiana MMIS contract.

Consolidation and Presentation

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its wholly owned subsidiaries, and two variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. See Note 18,

"Variable Interest Entities," for more information regarding these variable interest entities. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant inter-company balances and transactions have been eliminated in consolidation. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Principal areas requiring the use of estimates include:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The determination of medical claims and benefits payable of our Health Plans segment;
- The valuation of certain investments;
- Settlements under risk or savings sharing programs;
- The assessment of deferred contract costs, deferred revenue, long-lived and intangible assets, and goodwill for impairment;
- The determination of professional and general liability claims, and reserves for potential absorption of claims unpaid by insolvent providers;
- The determination of reserves for the outcome of litigation;
- The determination of valuation allowances for deferred tax assets; and
- The determination of unrecognized tax benefits.

2. Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that are both readily convertible into known amounts of cash and have a maturity of three months or less on the date of purchase.

Investments

Our investments are principally held in debt securities, which are grouped into two separate categories for accounting and reporting purposes: available-for-sale securities, and held-to-maturity securities. Available-for-sale securities are recorded at fair value and unrealized gains and losses, if any, are recorded in stockholders' equity as other comprehensive income, net of applicable income taxes. Held-to-maturity securities are recorded at amortized cost, which approximates fair value, and unrealized holding gains or losses are not generally recognized. Realized gains and losses and unrealized losses judged to be other than temporary with respect to available-for-sale and held-to-maturity securities are included in the determination of net income. The cost of securities sold is determined using the specific-identification method, on an amortized cost basis.

Our investment policy requires that all of our investments have final maturities of five years or less (excluding auction rate and variable rate securities where interest rates may be periodically reset), and that the average maturity be two years or less. Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. Declines in interest rates over time will reduce our investment income.

In general, our available-for-sale securities are classified as current assets without regard to the securities' contractual maturity dates because they may be readily liquidated. Our auction rate securities are classified as non-current assets. For comprehensive discussions of the fair value and classification of our current and non-current investments, including auction rate securities, see Note 5, "Fair Value Measurements," Note 6, "Investments" and Note 10, "Restricted Investments."

Receivables

Receivables are readily determinable, our creditors are primarily state governments, and our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. See Note 7, "Receivables."

Property, Equipment, and Capitalized Software

Property and equipment are stated at historical cost. Replacements and major improvements are capitalized, and repairs and maintenance are charged to expense as incurred. Furniture and equipment are generally depreciated using the straight-line method over estimated useful lives ranging from three to seven years. Software developed for internal use is capitalized. Software is generally amortized over its estimated useful life of three years. Leasehold improvements are amortized over the term of the lease, or over their useful lives from five to 10 years, whichever is shorter. Buildings are depreciated over their estimated useful lives of 31.5 to 40 years. See Note 8, “Property, Equipment, and Capitalized Software.”

As discussed below, the costs associated with certain of our Molina Medicaid Solutions segment equipment and software are capitalized and recorded as deferred contract costs. Such costs are amortized on a straight-line basis over the shorter of the useful life or the contract period.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in “Depreciation and Amortization” in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading “Depreciation and amortization;”
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of “Service revenue;” and
- Depreciation is recorded within the heading “Cost of service revenue.”

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Year Ended December 31,		
	2012	2011	2010
	(Dollar amounts in thousands)		
Depreciation, and amortization of capitalized software	$ 43,201	$ 30,864	$ 27,230
Amortization of intangible assets	20,503	19,826	18,474
Depreciation and amortization reported as such in the consolidated statements of income	63,704	50,690	45,704
Amortization recorded as reduction of service revenue	1,571	6,822	8,316
Amortization of capitalized software recorded as cost of service revenue	13,489	16,871	6,745
Total	$ 78,764	$ 74,383	$ 60,765

Long-Lived Assets, including Intangible Assets

Long-lived assets comprise primarily property, equipment, capitalized software and intangible assets. Finite-lived, separately-identifiable intangible assets are acquired in business combinations and are assets that represent future expected benefits but lack physical substance (such as purchased contract rights and provider contracts). Intangible assets are initially recorded at their fair values and are then amortized on a straight-line basis over their expected useful lives, generally between one and 15 years.

Identifiable intangible assets associated with Molina Medicaid Solutions are classified as either contract backlog or customer relationships as follows:

- The contract backlog intangible asset comprises all contractual cash flows anticipated to be received during the remaining contracted period for each specific contract relating to work that was performed prior to the acquisition. Because each

acquired contract constitutes a single revenue stream, amortization of the contract backlog intangible is recorded to contra-service revenue so that amortization is matched to any revenues associated with contract performance that occurred prior to the acquisition date. The contract backlog intangible asset is amortized on a straight-line basis for each specific contract over periods generally ranging from one to six years. The contract backlog intangible assets will be fully amortized in 2015.

- The customer relationship intangible asset comprises all contractual cash flows that are anticipated to be received during the option periods of each specific contract as well as anticipated renewals of those contracts. The customer relationship intangible is amortized on a straight-line basis for each specific contract over periods generally ranging from four to nine years.

Our intangible assets are subject to impairment tests when events or circumstances indicate that a finite-lived intangible asset's (or asset group's) carrying value may not be recoverable. Consideration is given to a number of potential impairment indicators. For example, our health plan subsidiaries have generally been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that these contracts will continue to be renewed as in the case of our Missouri health plan, described below.

Following the identification of any potential impairment indicators, to determine whether an impairment exists, we would compare the carrying amount of a finite-lived intangible asset with the undiscounted cash flows that are expected to result from the use of the asset or related group of assets. If it is determined that the carrying amount of the asset is not recoverable, the amount by which the carrying value exceeds the estimated fair value is recorded as an impairment.

On February 17, 2012, we received notification that our Missouri Health plan's contract with the state of Missouri would expire without renewal on June 30, 2012. As a result, we recorded a total non-cash impairment charge of $64.6 million in 2011, of which $6.1 million related to finite-lived intangible assets, and $58.5 million related to goodwill, discussed below. The impairment charge comprised substantially all intangible assets relating to contract rights and licenses, and provider networks recorded at the time of our acquisition of the Missouri health plan in 2007. No impairment charges relating to long-lived assets, including intangible assets, were recorded in the years ended December 31, 2012, and 2010.

Goodwill

Goodwill represents the amount of the purchase price in excess of the fair values assigned to the underlying identifiable net assets of acquired businesses. Goodwill is not amortized, but is subject to an annual impairment test. Tests are performed more frequently if events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying amount.

To determine whether goodwill is impaired, we measure the fair values of our reporting units and compare them to their aggregate carrying values, including goodwill. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared to the carrying amount of goodwill to determine whether goodwill is impaired.

We estimate the fair values of our reporting units using discounted cash flows. To determine fair values, we must make assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value, and discount rates.

In connection with our Missouri health plan as described above, we recorded a non-cash impairment charge of $58.5 million in the fourth quarter of 2011. The impairment charge comprised all of the goodwill recorded at the time of our acquisition of the Missouri health plan in 2007, and was not tax deductible. No impairment charges relating to goodwill were recorded in the years ended December 31, 2012, and 2010.

Restricted Investments

Restricted investments, which consist of certificates of deposit and treasury securities, are designated as held-to-maturity and are carried at amortized cost, which approximates market value. The use of these funds is limited to specific purposes as required by each state, or as protection against the insolvency of capitated providers. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. See Note 10, "Restricted Investments."

Other Assets

Significant items included in other assets include deferred financing costs associated with our convertible senior notes and with our credit facility, certain investments held in connection with our employee deferred compensation program, and an

investment in a vision services provider (see Note 17, “Related Party Transactions”). The deferred financing costs are being amortized on a straight-line basis over the seven-year term of the convertible senior notes and the five-year term of the credit facility. See Note 12, "Long-Term Debt," regarding the termination of the Credit Facility.

Delegated Provider Insolvency

Circumstances may arise where providers to whom we have delegated risk, due to insolvency or other circumstances, are unable to pay claims they have incurred with third parties in connection with referral services (including hospital inpatient services) provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states’ laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability.

In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These reserves are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. Additionally, we have recorded liabilities for estimated losses arising from provider instability or insolvency in excess of provider funds on deposit with us. Such liabilities were not material at December 31, 2012, or December 31, 2011.

Premium Revenue

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. For the year ended December 31, 2012 we received approximately 96% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our contracts with state Medicaid agencies, Medicare and other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

The following table summarizes premium revenue by health plan for the periods indicated:

	Year Ended December 31,		
	2012	2011	2010
	(In thousands)		
California	$ 671,489	$ 575,176	$ 506,871
Florida	228,828	203,945	170,683
Michigan	658,741	662,127	630,134
Missouri(1)	113,818	229,584	210,852
New Mexico	338,770	345,732	366,784
Ohio	1,187,422	988,896	860,324
Texas	1,255,722	409,295	188,716
Utah	298,392	287,290	258,076
Washington	992,748	823,323	758,849
Wisconsin	70,673	69,596	30,033
Other	9,888	8,443	8,587
	$ 5,826,491	$ 4,603,407	$ 3,989,909

(1) Our contract with the state of Missouri expired without renewal on June 30, 2012.

For the year ended December 31, 2012, we received approximately 4% of our premium revenue in the form of “birth income” — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn will lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

- *California Health Plan Medical Cost Floors (Minimums):* A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of $0.3 million and $1.0 million at December 31, 2012, and December 31, 2011, respectively.

- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health:* A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At both December 31, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.

- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* Our contract with the state of New Mexico directs that a portion of premiums received may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. At both December 31, 2012, and December 31, 2011 we had not recorded any liability under the terms of these contract provisions.

- *Texas Health Plan Profit Sharing:* Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we accrued an aggregate liability of approximately $3.2 million and $0.7 million pursuant to our profit-sharing agreement with the state of Texas at December 31, 2012 and December 31, 2011, respectively.

- *Washington Health Plan Medical Cost Floors (Minimums):* A portion of certain premiums received by our Washington health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At both December 31, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision because medical expenses are not less than the contractual floor.

- *Medicare Revenue Risk Adjustment:* Based on member encounter data that we submit to CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to 2 years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $0.3 million and $5.0 million for anticipated Medicare risk adjustment premiums at December 31, 2012 and December 31, 2011, respectively.

Quality incentives that allow us to recognize incremental revenue if certain quality standards are met. These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress

in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

- *New Mexico Health Plan Quality Incentive Premiums:* Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.
- *Ohio Health Plan Quality Incentive Premiums:* Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.
- *Texas Health Plan Quality Incentive Premiums:* Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.
- *Wisconsin Health Plan Quality Incentive Premiums:* Under our contract with the state of Wisconsin, effective beginning in 2011, up to 3.25% of premium revenue is withheld by the state. The withheld premiums can be earned by the health plan by meeting certain performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of December 31, 2012 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of December 31, 2012.

	Year Ended December 31, 2012				
	Maximum Available Quality Incentive Premium – Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized
	(In thousands)				
New Mexico	$ 2,244	$ 1,889	$ 643	$ 2,532	$ 338,770
Ohio	12,033	8,079	966	9,045	1,187,422
Texas	58,516	52,521	—	52,521	1,255,722

	$ 14,233	$ 6,196	$ (669)	$ 5,527	$ 1,415,824

Medical Care Costs

Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service:* Physician providers paid on a fee-for-service basis are paid according to a fee schedule set by the state or by our contracts with these providers. Most hospitals are paid on a fee-for-service basis in a variety of ways, including per diem amounts, diagnostic-related groups, or DRGs, percent of billed charges, and case rates. As discussed below, we also pay a small portion of hospitals on a capitated basis. We also have stop-loss agreements with the hospitals with which we contract. Under all fee-for-service arrangements, we retain the financial responsibility for medical care provided. Expenses related to fee-for-service contracts are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit manager are included in fee-for-service costs.
- *Capitation:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation contracts, we typically pay a fixed per-member per-month, or PMPM, payment to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated contracts, we remain liable for the provision of certain health care services. Certain of our capitated contracts also contain incentive programs based on service delivery, quality of care, utilization management, and other criteria. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.
- *Pharmacy:* Pharmacy costs include all drug, injectibles, and immunization costs paid through our pharmacy benefit manager. As noted above, drugs and injectibles not paid through our pharmacy benefit manager are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.
- *Other:* Other medical care costs include medically related administrative costs, certain provider incentive costs, reinsurance cost, and other health care expense. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, disease management, and 24-hour on-call nurses. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2012, 2011, and 2010, medically related administrative costs were approximately $127.5 million, $102.3 million, and $85.5 million, respectively.

The following table provides the details of our consolidated medical care costs for the periods indicated (dollars in thousands, except PMPM amounts):

	Year Ended December 31,								
	2012			2011			2010		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$ 3,521,960	$ 162.60	69.1%	$ 2,764,309	$ 139.02	71.6%	$ 2,360,858	$ 128.73	70.0%
Capitation	557,087	25.72	10.9	518,835	26.09	13.4	555,487	30.29	16.5
Pharmacy	835,830	38.59	16.4	418,007	21.02	10.8	325,935	17.77	9.7
Other	181,883	8.39	3.6	158,843	8.00	4.2	128,577	7.01	3.8
Total	$ 5,096,760	$ 235.30	100.0%	$ 3,859,994	$ 194.13	100.0%	$ 3,370,857	$ 183.80	100.0%

Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related

administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP claims reserve, as reported in our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates. See Note 11, "Medical Claims and Benefits Payable."

We report reinsurance premiums as medical care costs, while related reinsurance recoveries are reported as deductions from medical care costs. We limit our risk of catastrophic losses by maintaining high deductible reinsurance coverage. We do not consider this coverage to be material because the cost is not significant and the likelihood that coverage will apply is low.

Taxes Based on Premiums

Our California (through June 30, 2012), Florida, Michigan, New Mexico, Ohio, Texas and Washington health plans are assessed a tax based on premium revenue collected. We report these taxes on a gross basis, included in premium tax expense.

Premium Deficiency Reserves on Loss Contracts

We assess the profitability of our contracts for providing medical care services to our members and identify those contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared to anticipated medical care costs, including the cost of processing claims. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. No such accrual was recorded as of December 31, 2012, or 2011.

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts - which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) - are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements under the scope of FASB Accounting Standards Codification Subtopic 605-25, Revenue Recognition — Multiple –Element Arrangements, and SEC Staff Accounting Bulletin Topic 13, Revenue Recognition.

Effective January 1, 2011, we adopted a new accounting standard that amends the guidance on the accounting for multiple-element arrangements. Pursuant to the new standard, each required deliverable is evaluated to determine whether it qualifies as a separate unit of accounting which is generally based on whether the deliverable has standalone value to the customer. In addition to standalone value, previous guidance also required objective and reliable evidence of fair value of a deliverable in order to treat the deliverable as a separate unit of accounting. The arrangement's consideration that is fixed or determinable is then allocated to

each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent. We have adopted this guidance on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Our adoption of this guidance has not impacted the timing or pattern of our revenue recognition in 2011 or 2012. Also, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. For contracts entered into prior to January 1, 2011, objective and reliable evidence of fair value would be required, in addition to DDI standalone value which we do not have, in order to treat DDI as a separate unit of accounting. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs.
- Employee costs incurred in performing transaction services.
- Vendor costs incurred in performing transaction services.
- Costs incurred in performing required monitoring of and reporting on contract performance.
- Costs incurred in maintaining and processing member and provider eligibility.
- Costs incurred in communicating with members and providers.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any

remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes and nondeductible compensation and other general and administrative expenses. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers. For further discussion and disclosure, see Note 13, “Income Taxes.”

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Funds Prime Series — Institutional Class, and the PFM Funds Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. As of December 31, 2012, and 2011, our investments with PFM totaled $428 million and $209 million, respectively. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our health plan subsidiaries operate.

Risks and Uncertainties

Our profitability depends in large part on our ability to accurately predict and effectively manage medical care costs. We continually review our medical costs in light of our underlying claims experience and revised actuarial data. However, several factors could adversely affect medical care costs. These factors, which include changes in health care practices, inflation, new technologies, major epidemics, natural disasters, and malpractice litigation, are beyond our control and may have an adverse effect on our ability to accurately predict and effectively control medical care costs. Costs in excess of those anticipated could have a material adverse effect on our financial condition, results of operations, or cash flows.

At December 31, 2012, we operated health plans in nine states, primarily as a direct contractor with the states, and in Los Angeles County, California, as a subcontractor to another health plan holding a direct contract with the state. We are therefore dependent upon a small number of contracts to support our revenue. The loss of any one of those contracts could have a material adverse effect on our financial position, results of operations, or cash flows. Our ability to arrange for the provision of medical services to our members is dependent upon our ability to develop and maintain adequate provider networks. Our inability to develop or maintain such networks might, in certain circumstances, have a material adverse effect on our financial position, results of operations, or cash flows.

Recent Accounting Pronouncements

Technical Corrections and Improvements. In October 2012, the Financial Accounting Standards Board, or FASB, issued guidance related to amendments that cover a wide range of Topics in the Accounting Standards Codification. These amendments include technical corrections and improvements to the Accounting Standards Codification and conforming amendments related to fair value measurements. The amendments that do not have transition guidance became effective upon issuance. The amendments that are subject to transition guidance become effective for fiscal periods beginning after December 15, 2012. The adoption of this new guidance in 2012 did not impact our financial position, results of operations or cash flows.

Balance Sheet Offsetting. In January 2013, the FASB issued guidance for new disclosure requirements related to the nature of an entity's rights of setoff and related arrangements associated with certain financial instruments and derivative instruments. The new guidance is effective for annual reporting periods, and interim periods within those years, beginning on or after January 1, 2013. While we do not expect the adoption of this guidance in 2013 to impact our financial position, results of operations or cash flows, it may change our disclosure policies relative to certain arrangements with rights of setoff.

Goodwill. In September 2011, the FASB issued guidance related to evaluating goodwill for impairment. The new guidance provides entities with the option to perform a qualitative assessment of whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before applying the quantitative two-step goodwill impairment test. If an entity

concludes that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it would not be required to perform the quantitative two-step goodwill impairment test. Entities also have the option to bypass the assessment of qualitative factors for any reporting unit in any period and proceed directly to performing the first step of the quantitative two-step goodwill impairment test, as was required prior to the issuance of this new guidance. An entity may begin or resume performing the qualitative assessment in any subsequent period. The new guidance became effective for annual reporting periods, and interim periods within those years, beginning after December 15, 2011, with early adoption permitted. The adoption of this new guidance in 2012 did not impact our financial position, results of operations or cash flows.

Federal Premium-Based Assessment. In July 2011, the FASB issued guidance related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (the "Affordable Care Act"). The Affordable Care Act imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014 that is allocated to health insurers based on the ratio of the amount of an entity's net premium revenues written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. The new guidance specifies that the liability for the fee should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. The new guidance is effective for annual reporting periods beginning after December 31, 2013, when the fee initially becomes effective. As enacted, this federal premium-based assessment is non-deductible for income tax purposes, and is anticipated to be significant. It is yet undetermined how this premium-based assessment will be factored into the calculation of our premium rates, if at all. Accordingly, adoption of this guidance and the enactment of this assessment as currently written will have a material impact on our financial position, results of operations, or cash flows in future periods.

Comprehensive Income. In June 2011, the FASB issued guidance, as amended in December 2011, related to the presentation of other comprehensive income. The new guidance provides entities with an option to either replace the statement of income with a statement of comprehensive income which would display both the components of net income and comprehensive income in a combined statement, or to present a separate statement of comprehensive income immediately following the statement of income. The new guidance does not affect the components of other comprehensive income or the calculation of earnings per share. To be applied retrospectively with early adoption permitted, the new guidance became effective for annual reporting periods, and interim periods within those years, beginning after December 15, 2011. We have elected to present a separate statement of comprehensive income immediately following the statement of income. The adoption of this new guidance in 2012 did not impact our financial position, results of operations or cash flows.

Fair Value. In May 2011, the FASB issued guidance related to fair value measurement and disclosure. The new guidance is a result of joint efforts by the FASB and the International Accounting Standards Board to develop a single converged fair value framework. The new guidance expands existing disclosure requirements for fair value measurements and makes other amendments; mostly to eliminate wording differences between U.S. generally accepted accounting principles, or GAAP, and international financial reporting standards. To be applied prospectively, the new guidance became effective for annual reporting periods, and interim periods within those years, beginning after December 15, 2011. Although the adoption of this new guidance in 2012 did not impact our financial position, results of operations or cash flows, it did change our disclosure policies relative to fair value measurements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, or AICPA, and the Securities and Exchange Commission, or SEC, did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	December 31,		
	2012	2011	2010
	(In thousands)		
Shares outstanding at the beginning of the period	45,815	45,463	38,410
Weighted-average number of shares issued under equity offering	—	—	2,506
Weighted-average number of shares purchased	(2)	(160)	—
Weighted-average number of shares issued under employee stock plans	567	453	258
Denominator for basic earnings per share	46,380	45,756	41,174
Dilutive effect of employee stock options and stock grants(1)	619	669	457
Denominator for diluted earnings per share(2)	46,999	46,425	41,631

(1) Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the years ended December 31, 2012, 2011, and 2010 there were approximately 87,000, 137,000 and 478,000 anti-dilutive weighted options, respectively. Restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. For the year ended December 31, 2012, there were approximately 304,000 anti-dilutive restricted shares. For the years ended December 31, 2011 and 2010, anti-dilutive restricted shares were insignificant.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the years ended December 31, 2012, 2011, and 2010.

4. Business Combinations

Molina Center

On December 7, 2011, our wholly owned subsidiary Molina Center LLC acquired a 460,000 square foot office building located in Long Beach, California. The building, or Molina Center, consists of two conjoined fourteen-story office towers on approximately five acres of land. For the last several years we have leased approximately 155,000 square feet of the Molina Center for use as our corporate headquarters and also for use by our California health plan subsidiary. The final purchase price was $81 million, which amount was paid with a combination of cash on hand and bank financing under a term loan agreement. We acquired this business primarily to facilitate space needs for the projected future growth of the Company.

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

- *Level 1 — Observable inputs such as quoted prices in active markets:* Our Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.
- *Level 2 — Inputs other than quoted prices in active markets that are either directly or indirectly observable:* Our Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit that are classified as current investments in the accompanying consolidated balance sheets, and an interest rate swap derivative recorded as a noncurrent liability. Our investments classified as Level 2 are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. Fair value for the interest rate swap derivative is based on forward LIBOR rates that are and will be observable at commonly

quoted intervals for the full term of the interest rate swap agreement. See Note 12, "Long-Term Debt," for further information regarding the interest rate swap agreement.

- *Level 3 — Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions:* Our Level 3 financial instruments recorded at fair value consist of non-current auction rate securities that are designated as available-for-sale, and are reported at fair value of $13.4 million (par value of $14.7 million) as of December 31, 2012. To estimate the fair value of these securities we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants including global financial institutions, hedge funds, private equity funds, mutual funds, corporations and other institutional investors. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from two other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of December 31, 2012.

Our financial instruments measured at fair value on a recurring basis at December 31, 2012, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 191,008	$ —	$ 191,008	$ —
GSEs	29,525	29,525	—	—
Municipal securities	75,848	—	75,848	—
U.S. treasury notes	35,740	35,740	—	—
Auction rate securities	13,419	—	—	13,419
Certificates of deposit	10,724	—	10,724	—
Total assets at fair value	$ 356,264	$ 65,265	$ 277,580	$ 13,419
Interest rate swap liability	$ 1,307	$ —	$ 1,307	$ —

Our financial instruments measured at fair value on a recurring basis at December 31, 2011, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 231,634	$ —	$ 231,634	$ —
GSEs	33,949	33,949	—	—
Municipal securities	47,313	—	47,313	—
U.S. treasury notes	21,748	21,748	—	—
Auction rate securities	16,134	—	—	16,134
Certificates of deposit	2,272	—	2,272	—
Total assets at fair value	$ 353,050	$ 55,697	$ 281,219	$ 16,134
Interest rate swap liability	$ —	$ —	$ —	$ —

The following table presents activity for the year ended December 31, 2012, relating to our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3)
	(In thousands)
Balance at December 31, 2011	$ 16,134
Total gains (unrealized only):	
Included in other comprehensive income	1,635
Settlements	(4,350)
Balance at December 31, 2012	$ 13,419
The amount of total unrealized gains for the period included in other comprehensive income attributable to the change in accumulated other comprehensive losses relating to assets still held at December 31, 2012	$ 1,059

Fair Value Measurements - Disclosure Only

The carrying amounts and estimated fair values of our long-term debt as well as the applicable fair value hierarchy tier, at December 31, 2012, are contained in the table below. Our convertible senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. Borrowings under our credit facility and our term loan are classified as Level 3 financial instruments, because certain inputs used to determine the fair value of these agreements are unobservable. The carrying value of the credit facility at December 31, 2012 is equal to fair value because we repaid the $40 million outstanding under the Credit Facility in February 2013. The carrying value of the term loan at December 31, 2012, approximates its fair value because there has been no significant change to our credit risk relating to this instrument from the term loan's origination date in December 2011, to December 31, 2012.

	December 31, 2012				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
Convertible senior notes	$ 175,468	$ 208,460	$ —	$ 208,460	$ —
Credit facility	40,000	40,000	—	—	40,000
Term loan	47,471	47,471	—	—	47,471
	$ 262,939	$ 295,931	$ —	$ 208,460	$ 87,471

	December 31, 2011				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
Convertible senior notes	$ 169,526	$ 192,049	$ —	$ 192,049	$ —
Credit facility	—	—	—	—	—
Term loan	48,600	48,600	—	—	48,600
	$ 218,126	$ 240,649	$ —	$ 192,049	$ 48,600

6. Investments

The following tables summarize our investments as of the dates indicated:

	December 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 190,545	$ 528	$ 65	$ 191,008
GSEs	29,481	45	1	29,525
Municipal securities	75,909	185	246	75,848
U.S. treasury notes	35,700	42	2	35,740
Auction rate securities	14,650	—	1,231	13,419
Certificates of deposit	10,715	9	—	10,724
	$ 357,000	$ 809	$ 1,545	$ 356,264

	December 31, 2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 231,407	$ 442	$ 215	$ 231,634
GSEs	33,912	46	9	33,949
Municipal securities	47,099	232	18	47,313
U.S. treasury notes	21,627	121	—	21,748
Auction rate securities	19,000	—	2,866	16,134
Certificates of deposit	2,272	—	—	2,272
	$ 355,317	$ 841	$ 3,108	$ 353,050

The contractual maturities of our investments as of December 31, 2012 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 195,986	$ 196,201
Due one year through five years	146,364	146,644
Due after ten years	14,650	13,419
	$ 357,000	$ 356,264

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales and maturities of available-for-sale securities were $298.0 million, $302.7 million, and $182.3 million for the year ended December 31, 2012, 2011, and 2010, respectively. Net realized investment gains for the year ended December 31, 2012, 2011, and 2010 were $293,000, $367,000, and $110,000, respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities as described below, we have determined that unrealized gains and losses at December 31, 2012, and 2011, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

Auction Rate Securities

Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S.

government, and the range of maturities for such securities is from 18 years to 34 years. Considering the relative insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at December 31, 2012. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $67.4 million of these instruments at par value. For the years ended December 31, 2012, and 2011, we recorded pretax unrealized gains of $1.6 million and $1.2 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuations in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2012.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(In thousands, except number of securities)					
Corporate debt securities	$ 44,457	$ 65	23	$ —	$ —	—

7. Receivables

Health Plans segment receivables consist primarily of amounts due from the various states in which we operate. Accounts receivable were as follows:

	December 31,	
	2012	2011
	(In thousands)	
Health Plans segment:		
California	$ 28,553	$ 22,175
Michigan	12,873	8,864
Missouri	1,053	27,092
New Mexico	9,059	9,350
Ohio	40,980	27,458
Texas	7,459	1,608
Utah	3,359	2,825
Washington	17,587	15,006
Wisconsin	4,098	4,909
Others	2,077	2,489
Total Health Plans segment	127,098	121,776
Molina Medicaid Solutions segment	22,584	46,122
	$ 149,682	$ 167,898

8. Property, Equipment, and Capitalized Software

A summary of property, equipment, and capitalized software is as follows:

	December 31,	
	2012	2011
	(In thousands)	
Land	$ 15,764	$ 14,094
Building and improvements	124,163	109,789
Furniture and equipment	97,865	79,112
Capitalized software	154,708	116,389
	392,500	319,384
Less: accumulated depreciation and amortization on building and improvements, furniture and equipment	(84,156)	(65,518)
Less: accumulated amortization for capitalized software	(86,901)	(62,932)
	(171,057)	(128,450)
Property, equipment, and capitalized software, net	$ 221,443	$ 190,934

Depreciation recognized for building and improvements, and furniture and equipment was $20.5 million, $17.5 million, and $13.9 million for the years ended December 31, 2012, 2011 and 2010, respectively. Amortization of capitalized software was $36.2 million, $30.2 million, and $20.1 million for the years ended December 31, 2012, 2011 and 2010, respectively.

Molina Center

As described in Note 4, "Business Combinations," we acquired the Molina Center in December 2011. At December 31, 2012, the carrying amount of the Molina Center building and leasehold improvements was $44.4 million and the accumulated depreciation was $1.8 million. Future minimum rentals on noncancelable leases are as follows:

	(In thousands)
2013	$ 9,784
2014	9,954
2015	9,878
2016	8,054
2017	7,419
Thereafter	10,295
Total minimum future rentals	$ 55,384

9. Goodwill and Intangible Assets

Other intangible assets are amortized over their useful lives ranging from one to 15 years. The weighted average amortization period for contract rights and licenses is approximately 11 years, for customer relationships is approximately five years, for backlog is approximately two years, and for provider networks is approximately 10 years. Based on the balances of our identifiable intangible assets as of December 31, 2012, we estimate that our intangible asset amortization will be $17.9 million in 2013, $17.0 million in 2014, $12.1 million in 2015, $9.4 million in 2016, and $9.3 million in 2017. The following table provides the details of identified intangible assets, by major class, for the periods indicated. As described in Note 2, "Significant Accounting Policies," no impairment charges relating to long-lived assets, including intangible assets, were recorded in the year ended December 31, 2012. For a description of our goodwill and intangible assets by reportable segment, refer to Note 20, "Segment Reporting."

	Cost	Accumulated Amortization	Net Balance
		(In thousands)	
Intangible assets:			
Contract rights and licenses	$ 135,932	$ 81,376	$ 54,556
Customer relationships	24,550	12,513	12,037
Contract backlog	23,600	17,870	5,730
Provider networks	11,990	6,602	5,388
Balance at December 31, 2012	$ 196,072	$ 118,361	$ 77,711
Intangible assets:			
Contract rights and licenses	$ 140,242	$ 69,515	$ 70,727
Customer relationships	24,550	8,546	16,004
Contract backlog	23,600	15,139	8,461
Provider networks	11,990	5,386	6,604
Balance at December 31, 2011	$ 200,382	$ 98,586	$ 101,796

The following table presents the balances of goodwill and indefinite-lived intangible assets as of December 31, 2012 and 2011:

	December 31, 2011	Reductions	December 31, 2012
		(In thousands)	
Goodwill and indefinite-lived intangible assets, gross	$ 212,484	$ (2,866)	$ 209,618
Accumulated impairment losses	(58,530)	—	(58,530)
Goodwill and indefinite-lived intangible assets, net	$ 153,954	$ (2,866)	$ 151,088

The change in the carrying amount in 2012 was due to the sale of the Molina Healthcare Insurance Company.

10. Restricted Investments

Pursuant to the regulations governing our Health Plan subsidiaries, we maintain statutory deposits and deposits required by state Medicaid authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of certain capitated providers. The following table presents the balances of restricted investments:

	December 31,	
	2012	2011
	(In thousands)	
California	$ 373	$ 372
Florida	5,738	5,198
Insurance Company	—	4,711
Michigan	1,014	1,000
Missouri	500	504
New Mexico	15,915	15,905
Ohio	9,082	9,078
Texas	3,503	3,518
Utah	3,126	2,895
Washington	151	151
Other	4,699	2,832
	$ 44,101	$ 46,164

The contractual maturities of our held-to-maturity restricted investments as of December 31, 2012 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 39,733	$ 39,738
Due one year through five years	4,368	4,368
	$ 44,101	$ 44,106

11. Medical Claims and Benefits Payable

The following table presents the components of the change in our medical claims and benefits payable for the years ended December 31, 2012, 2011, and 2010. The amounts displayed for "Components of medical care costs related to: Prior period" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year Ended December 31,		
	2012	2011	2010
	(Dollars in thousands, except per-member amounts)		
Balances at beginning of period	$ 402,476	$ 354,356	$ 315,316
Balance of acquired subsidiary	—	—	3,228
Components of medical care costs related to:			
Current period	5,136,055	3,911,803	3,420,235
Prior period	(39,295)	(51,809)	(49,378)
Total medical care costs	5,096,760	3,859,994	3,370,857
Payments for medical care costs related to:			
Current period	4,649,363	3,516,994	3,085,388
Prior period	355,343	294,880	249,657
Total paid	5,004,706	3,811,874	3,335,045
Balances at end of period	$ 494,530	$ 402,476	$ 354,356
Benefit from prior period as a percentage of:			
Balance at beginning of period	9.8%	14.6%	15.7%
Premium revenue	0.7%	1.1%	1.2%
Total medical care costs	0.8%	1.3%	1.5%

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore never perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range. For example, for the years ended December 31, 2011 and 2010, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2010 and 2009, by 14.6% and 15.7%, respectively. Furthermore, because the initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate - we only know when the circumstances for any one or more of those factors are out of the ordinary.

As indicated above, the amounts ultimately paid out on our liabilities in fiscal years 2012, 2011, and 2010 were less than what we had expected when we established our reserves. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimate.

We recognized a benefit from prior period claims development in the amount of $39.3 million for the year ended December 31, 2012. This amount represents our estimate as of December 31, 2012, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe that the overestimation of our claims liability at December 31, 2011 was due primarily to the following factors:

- At our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- At our Texas health plan, we overestimated the cost of new members in STAR+PLUS (the name of our ABD program in Texas), in the Dallas region.
- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in the lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all of the claims overestimation.

- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Missouri health plan, as a result of the costs associated with an unusually large number of premature infants during the fourth quarter of 2011.

We recognized a benefit from prior period claims development in the amount of $51.8 million for the year ended December 31, 2011. This amount represents our estimate as of December 31, 2011, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2010 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe that the overestimation of our claims liability at December 31, 2010 was due primarily to the following factors:

- At our Ohio health plan, we overestimated the impact of a buildup in claims inventory.
- At our California health plan, we overestimated the impact of the settlement of disputed provider claims.
- At our New Mexico health plan, we underestimated the impact of a reduction in the outpatient facility fee schedule.

We recognized a benefit from prior period claims development in the amount of $49.4 million for the year ended December 31, 2010. This amount represents our estimate as of December 31, 2010, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2009 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe that the overestimation of our claims liability at December 31, 2009 was due primarily to the following factors:

- At our New Mexico health plan, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- At our California health plan, we underestimated the extent to which various network restructuring, provider contracting, and medical management initiatives had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

In estimating our claims liability at December 31, 2012, we adjusted our base calculation to take account of the numerous factors that we believe will likely change our final claims liability amount. We believe that the most significant among those factors are:

- Our Texas health plan membership nearly doubled effective March 1, 2012. In addition, effective March 1, 2012, we assumed inpatient medical liability for ABD members for which we were not previously responsible. Reserves for new coverage and new regions are now based on the newly developing claims lag patterns. While the lag patterns are now beginning to stabilize for the new membership and coverage, the true reserve liability continues to be more uncertain than usual.
- Data published by the Centers for Disease Control, or CDC, indicated a significant increase in the percentage of office visits for influenza-like illnesses, or ILI, during December 2012. This indicated that the annual flu season was starting earlier than it had in most recent years. This was most noticeable in the southeast region of the country, but impacted other areas as well. Our leading indicators, including inpatient authorizations and overall pharmacy utilization, did not show as great an increase as we had expected based on the severity of the CDC's flu-related indices. However, we did see a significant increase in the use of prescription flu medication, especially in our Texas health plan. Therefore, we increased our reserves to account for expected additional utilization due to the early onset of the flu season.
- Our California health plan has enrolled approximately 20,000 new ABD members since September 30, 2011, as a result of the mandatory assignment of ABD members to managed care plans effective July 1, 2011. These new members converted from a fee-for-service environment. Due to the relatively recent transition of these members to managed care, their utilization of medical services is less predictable than it is for many of our other members.
- Prior to July 2012, it was the state of Washington's practice to disenroll certain sick newborns from the Healthy Options Medicaid managed care program and cover them under the Supplemental Security Income program, or SSI, instead. When this occurred, the health plan would reimburse the premiums received for that member back to the state and the state in turn reimbursed the health plan for the cost of care, usually retroactively to the date of birth. Effective July 1, 2012, the health plans now retain these members and cover them under a new ABD program entitled Healthy Options Blind and Disabled, or HOBD. The premium we receive from the state for the HOBD members is very high to cover the substantial cost of care. By December, we had enrolled approximately 26,000 members under HOBD. Because the program is relatively new, there is still some uncertainty as to the level of claims to be expected from these high-cost members.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a

material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2012, 2011 and 2010, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In these years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

12. Long-Term Debt

1.125% Cash Convertible Senior Notes due 2020

On February 15, 2013, we issued $550 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020, or the Notes. The Notes bear interest at a rate of 1.125% per year, payable semiannually in arrears on January 15 and July 15 of each year, beginning on July 15, 2013. The Notes will mature on January 15, 2020.

The Notes are not convertible into our common stock or any other securities under any circumstances. Holders may convert their Notes solely into cash at their option at any time prior to the close of business on the business day immediately preceding July 15, 2019 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period immediately after any five consecutive trading day period in which the trading price per $1,000 principal amount of Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their Notes solely into cash at any time, regardless of the foregoing circumstances. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of Notes, equal to the settlement amount, determined in the manner set forth in the Indenture.

The initial conversion rate will be 24.5277 shares of our common stock per $1,000 principal amount of Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate will be subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest. In addition, following certain corporate events that occur prior to the maturity date, we will pay a cash make-whole premium by increasing the conversion rate for a holder who elects to convert its Notes in connection with such a corporate event in certain circumstances. We may not redeem the Notes prior to the maturity date, and no sinking fund is provided for the Notes.

If we undergo a fundamental change (as defined in the indenture to the Notes), holders may require us to repurchase for cash all or part of their Notes at a repurchase price equal to 100% of the principal amount of the Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the fundamental change repurchase date. The indenture provides for customary events of default, including cross acceleration to certain other indebtedness of ours, and our significant subsidiaries.

The Notes will be senior unsecured obligations of the Company and will rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the Notes; equal in right of payment to any of our unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries.

Cash Convertible Note Hedge and Warrant Transactions

In connection with the pricing of the Notes, on February 11, 2013, we entered into cash convertible note hedge transactions and warrant transactions relating to a notional number of shares of our common stock underlying the Notes to be issued by us (without regard to the initial purchasers' $100 million over-allotment option) with two counterparties, JPMorgan Chase Bank, National Association, London Branch and Bank of America, N.A. (the "Option Counterparties"). The cash convertible note hedge transactions are intended to offset cash payments due upon any conversion of the Notes. However, the warrant transactions could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the warrants. The strike price of the warrants will initially be $53.8475 per share, which is 75% above the last reported sale price of our common stock on February 11, 2013.

In connection with the exercise in full by the initial purchasers of their over-allotment option in respect of the Notes, on February 13, 2013, we and the Option Counterparties amended the cash convertible note hedge transactions entered into on February 11, 2013 to upsize such transactions by a notional number of shares of our common stock corresponding to the number of shares underlying the Notes purchased pursuant to the exercise of such over-allotment option. On February 13, 2013, we also entered into additional warrant transactions with the Option Counterparties relating to a number of shares of our common stock corresponding to the number of shares underlying the Notes purchased pursuant to the exercise of such over-allotment option. Each of the amendments to the cash convertible note hedge transactions and the additional warrant transactions were on substantially similar terms to the corresponding transactions entered into on February 11, 2013. Pursuant to these warrant transactions, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances.

We used approximately $74.3 million of the net proceeds from the offering to pay the cost of the cash convertible note hedge transactions (after such cost was partially offset by the proceeds to us from the sale of warrants in the warrant transactions and the additional warrant transactions).

Aside from the initial payment of a premium to the Option Counterparties of approximately $149.3 million, we will not be required to make any cash payments to the Option Counterparties under the cash convertible note hedge transactions and will be entitled to receive from the Option Counterparties an amount of cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the cash convertible note hedge transactions during the relevant valuation period. The strike price under the cash convertible note hedge transactions is initially equal to the conversion price of the Notes. Additionally, if the market value per share of our common stock exceeds the strike price of the warrants on any trading day during the 160 trading day measurement period under the warrant transactions and the additional warrant transactions, we will be obligated to issue to the Option Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the warrant transactions and the additional warrant transactions, subject to a share delivery cap. The Company will not receive any additional proceeds if warrants are exercised.

As of December 31, 2012, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2013	2014	2015	2016	2017	Thereafter
Credit Facility	$ 40,000	$ —	$ —	$ —	$ 40,000	$ —	$ —
Convertible senior notes	187,000	—	187,000	—	—	—	—
Term loan	47,471	1,155	1,206	1,259	1,309	1,372	41,170
	$ 274,471	$ 1,155	$ 188,206	$ 1,259	$ 41,309	$ 1,372	$ 41,170

Credit Facility

On February 15, 2013, we used approximately $40.0 million of the net proceeds from the offering of the Notes to repay all of the outstanding indebtedness under our $170 million revolving credit facility, or the Credit Facility, with various lenders and U.S. Bank National Association, as Line of Credit Issuer, Swing Line Lender, and Administrative Agent. As of December 31, 2012, there was $40.0 million outstanding under the Credit Facility.

We terminated the Credit Facility in connection with the closing of the offering and sale of the Notes. two letters of credit in the aggregate principal amount of $10.3 million that reduced the amount available for borrowing under the Credit Facility as of December 31, 2012, were transferred to direct issue letters of credit with another financial institution. The Credit Facility had a term of five years under which all amounts outstanding would have been due and payable on September 9, 2016.

Borrowings under the Credit Facility accrued interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we were required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility. The applicable margins ranged between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio.

Our obligations under the Credit Facility were secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan). The Credit Facility included usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also required us to maintain as of the end of any fiscal quarter (calculated for each four consecutive fiscal quarter period) a ratio of total consolidated debt to total consolidated EBITDA, as defined in the Credit Facility, of not more than 2.75 to 1.00, and a fixed charge coverage ratio of not less than 1.75 to 1.00.. At December 31, 2012, we were in compliance with all financial covenants under the Credit Facility.

3.75% Convertible Senior Notes due 2014

As of December 31, 2012, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014, or the 3.75% Notes, remain outstanding. The 3.75% Notes rank equally in right of payment with our existing and future senior indebtedness. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances. Prior to July 2014, holders may convert their 3.75% Notes only under the following circumstances:

- During any fiscal quarter after our fiscal quarter ending December 31, 2007, if the closing sale price per share of our common stock, for each of at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, is greater than or equal to 120% of the conversion price per share of our common stock;
- During the five business day period immediately following any five consecutive trading day period in which the trading price per one thousand dollar principal amount of the 3.75% Notes for each trading day of such period was less than 98% of the product of the closing price per share of our common stock on such day and the conversion rate in effect on such day; or
- Upon the occurrence of specified corporate transactions or other specified events.

On or after July 1, 2014, holders may convert their 3.75% Notes at any time prior to the close of business on the scheduled trading day immediately preceding the stated maturity date regardless of whether any of the foregoing conditions is satisfied.

We will deliver cash and shares of our common stock, if any, upon conversion of each $1,000 principal amount of 3.75% Notes, as follows:

- An amount in cash (the “principal return”) equal to the sum of, for each of the 20 Volume-Weighted Average Price ("VWAP") trading days during the conversion period, the lesser of the daily conversion value for such VWAP trading day and fifty dollars (representing 1/20th of one thousand dollars); and
- A number of shares based upon, for each of the 20 VWAP trading days during the conversion period, any excess of the daily conversion value above fifty dollars.

The proceeds from the issuance of the 3.75% Notes have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the 3.75% Notes is 7.5%, principally based on the seven-year U.S. Treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the 3.75% Notes are expected to be outstanding, as additional non-cash interest expense. As of December 31, 2012, we expect the 3.75% Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 21 months. The 3.75% Notes’ if-converted value did not exceed their principal amount as of December 31, 2012. At December 31, 2012, the equity component of the 3.75% Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	December 31,	
	2012	2011
	(In thousands)	
Details of the liability component:		
Principal amount	$ 187,000	$ 187,000
Unamortized discount	(11,532)	(17,474)
Net carrying amount	$ 175,468	$ 169,526

	Years Ended December 31,		
	2012	2011	2010
	(In thousands)		
Interest cost recognized for the period relating to the:			
Contractual interest coupon rate of 3.75%	$ 7,012	$ 7,012	$ 7,012
Amortization of the discount on the liability component	5,942	5,512	5,114
Total interest cost recognized	$ 12,954	$ 12,524	$ 12,126

Term Loan

On December 7, 2011, our wholly owned subsidiary Molina Center LLC entered into a Term Loan Agreement, dated as of December 1, 2011, with various lenders and East West Bank, as Administrative Agent (the "Administrative Agent"). Pursuant to the terms of the Term Loan Agreement, Molina Center LLC borrowed the aggregate principal amount of $48.6 million to finance a portion of the $81 million purchase price for the acquisition of the Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period (as defined below) commencing January 1, 2012. The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. "Interest Period" means the period commencing on the first day of each calendar month and ending on the last day of each calendar month. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commenced on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Interest Rate Swap

In May 2012, we entered into a $42.5 million notional amount interest rate swap agreement, or Swap Agreement, with an effective date of March 1, 2013. While not designated as a hedge during the year ended December 31, 2012, the Swap Agreement is intended to reduce our exposure to fluctuations in the contractual variable interest rates under our Term Loan Agreement, and expires on the maturity date of the Term Loan Agreement, which is November 30, 2018. Under the Swap Agreement, we will receive a variable rate of the one-month LIBOR plus 3.25%, and pay a fixed rate of 5.34%. The Swap Agreement is measured and reported at fair value on a recurring basis, within Level 2 of the fair value hierarchy. Gains and losses relating to changes in fair value are reported in earnings in the current period. For the year ended December 31, 2012, we have recorded losses of $1.3 million to general and administrative expense. As of December 31, 2012 the fair value of the Swap Agreement is a liability of $1.3 million, recorded to other noncurrent liabilities. We do not use derivatives for trading or speculative purposes. We believe that we are not exposed to more than a nominal amount of credit risk relating to the Swap Agreement because the counterparty is an established and well-capitalized financial institution.

13. Income Taxes

The provision for income taxes consisted of the following:

	Years Ended December 31,		
	2012	2011	2010
	(In thousands)		
Current:			
Federal	$ 17,853	$ 28,336	$ 36,395
State	1,308	1,639	2,144
Total current	19,161	29,975	38,539
Deferred:			
Federal	(6,300)	14,028	(4,717)
State	(3,586)	(167)	700
Total deferred	(9,886)	13,861	(4,017)
Total provision for income taxes	$ 9,275	$ 43,836	$ 34,522

A reconciliation of the U.S. federal statutory income tax rate to the combined effective income tax rate is as follows:

	Years Ended December 31,		
	2012	2011	2010
Statutory federal tax rate	35.0 %	35.0 %	35.0 %
State income taxes, net of federal benefit	(7.8)	1.5	2.1
Benefit for unrecognized tax benefits	(1.2)	(0.6)	(0.1)
Nondeductible compensation	7.6	—	1.0
Nondeductible goodwill	—	31.7	—
Nondeductible lobbying	5.2	1.1	0.7
Purchase accounting adjustment	—	(1.5)	—
Change in fair value of contingent consideration	5.9	—	—
Other	3.9	0.6	(0.1)
Effective tax rate	48.6 %	67.8 %	38.6 %

Our effective tax rate is based on expected income, statutory tax rates, and tax planning opportunities available to us in the various jurisdictions in which we operate. Significant management estimates and judgments are required in determining our effective tax rate. We are routinely under audit by federal, state, or local authorities regarding the timing and amount of deductions, nexus of income among various tax jurisdictions, and compliance with federal, state, and local tax laws. We have pursued various strategies to reduce our federal, state and local taxes. As a result, we have reduced our state income tax expense due to California enterprise zone credits.

During 2012 and 2011, excess tax benefits from shared-based compensation were $3.1 million and $937,000, respectively. These amounts were recorded as a decrease to income taxes payable and an increase to additional paid-in capital. During 2010, tax-related deficiencies on share-based compensation were $673,000. This amount was recorded as an adjustment to income taxes payable with a corresponding decrease to additional paid-in capital.

Deferred tax assets and liabilities are classified as current or non-current according to the classification of the related asset or liability. Significant components of our deferred tax assets and liabilities as of December 31, 2012 and 2011 were as follows:

	December 31,	
	2012	2011
	(In thousands)	
Accrued expenses	$ 15,381	$ 14,541
Reserve liabilities	2,936	1,292
State taxes	(606)	(396)
Other accrued medical costs	2,518	2,051
Net operating losses	27	27
Unrealized gains	(283)	(316)
Unearned premiums	15,675	4,139
Prepaid expenses	(4,390)	(3,032)
Deferred compensation	1,611	—
Other, net	(426)	21
Deferred tax asset, net of valuation allowance — current	32,443	18,327
Accrued expenses	—	223
Reserve liabilities	2,013	3,015
State tax credit carryover	4,149	2,609
Net operating losses	3,341	2,694
Unrealized losses	563	1,176
Depreciation and amortization	(44,198)	(39,939)
Deferred compensation	3,323	7,904
Debt basis	(5,410)	(7,604)
Other, net	702	(278)
Valuation allowance	(2,383)	(2,927)
Deferred tax liability, net of valuation allowance — long term	(37,900)	(33,127)
Net deferred income tax liability	$ (5,457)	$ (14,800)

At December 31, 2012, we had federal and state net operating loss carryforwards of $319,000 and $73.0 million, respectively. The federal net operating loss begins expiring in 2018, and state net operating losses begin expiring in 2013. The utilization of the net operating losses is subject to certain limitations under federal law.

At December 31, 2012, we had California enterprise zone tax credit carryovers of $6.3 million which do not expire.

We evaluate the need for a valuation allowance taking into consideration the ability to carry back and carry forward tax credits and losses, available tax planning strategies and future income, including reversal of temporary differences. We have determined that as of December 31, 2012, $3.0 million of deferred tax assets did not satisfy the recognition criteria due to uncertainty regarding the realization of some of our state tax operating loss carryforwards. We increased our valuation allowance $100,000 from $2.9 million at December 31, 2011 to $3.0 million as of December 31, 2012.

We recognize tax benefits only if the tax position is more likely than not to be sustained. We are subject to income taxes in the U.S. and numerous state jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. These reserves are established when we believe that certain positions might be challenged despite our belief that our tax return positions are fully supportable. We adjust these reserves in light of changing facts and circumstances, such as the outcome of tax audits. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate.

The roll-forward of our unrecognized tax benefits is as follows:

	Years Ended December 31,		
	2012	2011	2010
	(In thousands)		
Gross unrecognized tax benefits at beginning of period	$ (10,712)	$ (10,962)	$ (4,128)
Increases in tax positions for prior years	(441)	(137)	(6,891)
Decreases in tax positions for prior years	320	—	—
Settlements	—	—	—
Lapse in statute of limitations	211	387	57
Gross unrecognized tax benefits at end of period	$ (10,622)	$ (10,712)	$ (10,962)

As of December 31, 2012, we had $10.6 million of unrecognized tax benefits of which $7.4 million, if fully recognized, would affect our effective tax rate. Approximately $8.4 million of the unrecognized tax benefits recorded at December 31, 2012 relates to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $8.6 million due the resolution to the state refund claim as well as the normal expiration of statute of limitations.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of December 31, 2012, December 31, 2011, and December 31, 2010, we had accrued $56,000, $65,000, and $82,000, respectively, for the payment of interest and penalties.

We may be subject to examination by the Internal Revenue Service, or IRS, for calendar years 2009 through 2012. We are under examination, or may be subject to examination, in certain state and local jurisdictions, with the major jurisdictions being California, Missouri, and Michigan, for the years 2004 through 2012.

14. Stockholders' Equity

Repurchase in Connection with Offering of 1.125% Cash Convertible Senior Notes Due 2020. Subsequent to December 31, 2012, we used a portion of the net proceeds from the offering to repurchase $50 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. On February 12, 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Securities Repurchases and Repurchase Programs. Effective as of February 13, 2013, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior note due 2014. The repurchase program extends through December 31, 2014.

On December 26, 2012, we purchased 110,988 shares of our common stock from certain Molina family trusts for an aggregate purchase price of $3.0 million. This purchase transaction was approved by our board of directors. The shares were purchased at a price of $27.03, representing the closing price per share of our common stock on December 26, 2012. See Note 17, "Related Party Transactions."

Effective as of October 26, 2011, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see Note 12, "Long-Term Debt"). The repurchase program expired October 25, 2012. No securities were purchased under this program in 2012.

In July 2011, our board of directors approved a stock repurchase program of up to $7.0 million, to be used to purchase shares of our common stock under a Rule 10b5-1 trading plan. Under this program, we purchased approximately 400,000 shares of our common stock for $7.0 million (average cost of approximately $17.47 per share) during August 2011. These purchases did not materially impact diluted earnings per share for the year ended December 31, 2011. Subsequently, we retired the $7.0 million of treasury shares purchased, which reduced additional paid-in capital as of December 31, 2011.

Shelf Registration Statement. In May 2012, we filed an automatic shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Split. On April 27, 2011, we announced that our board of directors authorized a 3-for-2 stock split of our common stock to be effected in the form of a stock dividend of one share of our stock for every two shares outstanding. The dividend was distributed on May 20, 2011.

Stock Plans. In connection with the plans described in Note 16, "Share-Based Compensation," we issued approximately 1,057,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the year ended December 31, 2012. Stock plan activity resulted in a $19.5 million increase to additional paid-in capital for the same period.

15. Employee Benefits

We sponsor a defined contribution 401(k) plan that covers substantially all full-time salaried and hourly employees of our company and its subsidiaries. Eligible employees are permitted to contribute up to the maximum amount allowed by law. We match up to the first 4% of compensation contributed by employees. Expense recognized in connection with our contributions to the 401(k) plan totaled $10.7 million, $8.5 million and $5.9 million in the years ended December 31, 2012, 2011, and 2010, respectively.

We also have a nonqualified deferred compensation plan for certain key employees. Under this plan, eligible participants may defer up to 100% of their base salary and 100% of their bonus to provide tax-deferred growth for retirement. The funds deferred are invested in corporate-owned life insurance, under a rabbi trust.

16. Share-Based Compensation

In 2011, we adopted the 2011 Equity Incentive Plan (the "2011 Plan") , which provides for the award of stock options, restricted shares and units, performance shares and units, and stock bonuses to the company's officers, employees, directors, consultants, advisors, and other service providers. The 2011 Plan allows for the issuance of 4.5 million shares of common stock.

At December 31, 2012, we had equity incentives outstanding under two plans: (1) the 2011 Plan; and (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded). In March 2012, our chief executive officer, chief financial officer, and chief operating officer were awarded 94,050 performance units, 53,236 performance units, and 30,167 performance units, respectively, that would vest and be settled in shares of the Company's common stock equal in number to the units awarded upon the achievement of certain performance and service conditions as follows: (i) the Company's total operating revenue for 2012 is equal to or greater than $5.5 billion, and (ii) the respective officer continues to be employed by the Company if and when the operating revenue target is met. Such awards vested when the performance and service conditions were met in December 2012. Also in March 2012, our chief executive officer, chief financial officer, chief operating officer, and chief accounting officer were awarded 8,000 performance units, 8,000 performance units, 8,000 performance units, and 3,000 performance units respectively, that would vest and be settled in shares of the Company's common stock equal in number to the units granted upon the certification of our Idaho MMIS by CMS. Such awards vested when the Idaho MMIS was certified in July 2012.

Restricted share awards are granted with a fair value equal to the market price of our common stock on the date of grant, and generally vest in equal annual installments over periods up to four years from the date of grant. Stock option awards have an exercise price equal to the fair market value of our common stock on the date of grant, generally vest in equal annual installments over periods up to four years from the date of grant, and have a maximum term of ten years from the date of grant.

Under our employee stock purchase plan (the "ESPP"), eligible employees may purchase common shares at 85% of the lower of the fair market value of our common stock on either the first or last trading day of each six-month offering period. Each participant is limited to a maximum purchase of $25,000 (as measured by the fair value of the stock acquired) per year through payroll deductions. We issued 277,400 and 201,700 shares of our common stock under the ESPP during the years ended December 31, 2012 and 2011, respectively. In 2011, stockholders approved our 2011 ESPP, which superseded the 2002 Employee Stock Purchase Plan. The 2011 ESPP allows for the issuance of three million shares of common stock.

The following table illustrates the components of our share-based compensation expense that are reported in general and administrative expenses in the consolidated statements of income:

	Year Ended December 31,					
	2012		2011		2010	
	(In thousands)					
	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount
Restricted share and performance unit awards	$ 18,106	$ 12,943	$ 15,914	$ 9,946	$ 8,007	$ 5,044
Stock options (including expense relating to our ESPP)	1,912	1,613	1,138	712	1,524	960
	$ 20,018	$ 14,556	$ 17,052	$ 10,658	$ 9,531	$ 6,004

As of December 31, 2012, there was $15.1 million of total unrecognized compensation expense related to unvested restricted share awards, which we expect to recognize over a remaining weighted-average period of 2.1 years. This unrecognized compensation cost assumes an estimated forfeiture rate of 7.5% as of December 31, 2012. Also as of December 31, 2012, there was $0.1 million of unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 2.1 years.

Restricted share activity for the year ended December 31, 2012 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2011	1,435,882	$ 18.97
Granted	511,557	31.71
Vested	(786,135)	20.49
Forfeited	(174,727)	22.53
Unvested balance as of December 31, 2012	986,577	23.74

The total fair value of restricted shares and performance shares granted during the year ended December 31, 2012, 2011, and 2010 was $16.2 million, $18.4 million, and $12.7 million, respectively. The total fair value of restricted shares vested during the year ended December 31, 2012, 2011, and 2010 was $25.4 million, $12.2 million, and $6.4 million, respectively.

Performance and restricted unit activity for the year ended December 31, 2012 is summarized below:

	Shares	Weighted Average Grant Date Fair Value	Aggregate Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Outstanding as of December 31, 2011	—	$ —		
Granted	213,022	33.59		
Vested	(210,880)	33.58	$ 6,066	
Outstanding as of December 31, 2012	2,142	35.01	$ 58	0.2
Performance and restricted units expected to vest as of December 31, 2012	2,142	35.01	$ 58	0.2

The total fair value of performance and restricted units granted during the year ended December 31, 2012 was $7.2 million No performance or restricted units were granted or vested in 2011 and 2010.

Stock option activity for the year ended December 31, 2012 is summarized below:

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Stock options outstanding as of December 31, 2011	553,049	$ 20.91		
Granted	15,000	34.82		
Exercised	(153,238)	18.27		
Forfeited	(750)	22.37		
Stock options outstanding as of December 31, 2012	414,061	22.39	$ 2,204	3.3
Stock options exercisable and expected to vest as of December 31, 2012	414,061	22.39	$ 2,204	3.3
Exercisable as of December 31, 2012	399,061	21.93	$ 2,204	3.1

The weighted-average grant date fair value per share of the sole stock option awarded during 2012 was $13.97. To determine this fair value we applied a risk-free interest rate of 1.1%, expected volatility of 43.0%, an expected option life of 6 years, and expected dividend yield of 0%. No stock options were granted in 2011 or 2010. The following is a summary of information about stock options outstanding and exercisable at December 31, 2012:

	Options Outstanding			Options Exercisable	
Range of Exercise Prices	Number Outstanding	Weighted-Average Remaining Contractual Life (Years)	Weighted-Average Exercise Price	Number Exercisable	Weighted-Average Exercise Price
$16.89 – $19.11	137,161	2.5	$ 18.46	137,161	$ 18.46
$20.88	148,500	4.1	20.88	148,500	20.88
$22.86 – $34.82	128,400	3.3	28.35	113,400	27.49
	414,061			399,061	

17. Related Party Transactions

On February 27, 2013, we entered into a lease (the "Lease") with 6 th & Pine Development, LLC (the "Landlord") for office space located in Long Beach, California. The lease consists of two office buildings as follows:

- an existing building, which comprises approximately 70,000 square feet of office space, and
- a new building, which is expected to comprise approximately 120,000 square feet of office space.

The term of the Lease with respect to the existing building is expected to commence on June 1, 2013, and the term of the Lease with respect to the new building is expected to commence on November 1, 2014. The initial term of the Lease with respect to both buildings expires on December 31, 2024, subject to two options to extend the term for a period of five years each. Initial annual rent for the existing building is expected to be approximately $2.5 million and initial annual rent for the new building is expected to be approximately $4.0 million. Rent will increase 3.75% per year through the initial term. Rent during the extension terms will be the greater of then-current rent or fair market rent.

The principal members of the Landlord are John C. Molina, the Chief Financial Officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, the Landlord has pledged shares of common stock in the Company he holds as trustee. Dr. J. Mario Molina, the Company's Chief Executive Officer and Chairman of the Board of Directors, holds a partial interest in such shares as trust beneficiary.

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. For both years ended December 31, 2012, and 2011 our carrying amount for this investment amounted to $3.9 million. For the years ended December 31, 2012, 2011, and 2010, we paid $28.4 million, $24.3 million, and $22.0 million, respectively, for medical service fees to this provider.

We are a party to a fee-for-service agreement with Pacific Hospital of Long Beach, or Pacific Hospital. Pacific Hospital is owned by Abrazos Healthcare, Inc. Until October 12, 2010, the majority of the shares of Abrazos Healthcare, Inc. were held as community property by Dr. Martha Bernadett and her husband. Dr. Martha Bernadett is the sister of Joseph M. Molina, M.D. (Dr. J. Mario Molina), our Chief Executive Officer, and John Molina, our Chief Financial Officer. On October 12, 2010, Dr. Bernadett and her husband sold their shares in Abrazos Healthcare, Inc., terminating our related party relationship with Pacific Hospital. Under the terms of this fee-for-service agreement we paid Pacific Hospital $0.8 million for the period from January 1, 2010 to October 12, 2010.

On December 26, 2012, we purchased 110,988 shares of our common stock from certain Molina family trusts for an aggregate purchase price of $3.0 million. This purchase transaction was approved by our board of directors. The shares were purchased at a price of $27.03, representing the closing price per share of our common stock on December 26, 2012. The shares were purchased from the Janet M. Watt Separate Property Trust dated 10/22/2007, or the Separate Property Trust, and the Watt Family Trust dated 10/11/1996, or the Family Trust. Janet M. Watt is the sister, and her husband Lawrence B. Watt is the brother-in-law, of Dr. J. Mario Molina and John Molina. Ms. Watt is the sole trustee of the Separate Property Trust, and a co-trustee with Lawrence B. Watt of the Family Trust.

18. Variable Interest Entities

Joseph M. Molina M.D., Professional Corporations

Our wholly owned subsidiary, American Family Care, Inc., or AFC, operates our primary care clinics. In 2012, AFC entered into services agreements with the Joseph M. Molina, M.D. Professional Corporations, or JMMPC. JMMPC was created to further advance our direct delivery line of business. Its sole shareholder is Dr. J. Mario Molina, our Chairman of the Board, President and Chief Executive Officer. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. Under the services agreements, AFC provides the clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC, and JMMPC provides outpatient professional medical services to the general public for routine non-life threatening, outpatient health care needs. While JMMPC may provide services to the general public, substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities. In addition to the services agreements with AFC, JMMPC has entered into affiliation agreements with us. Under these agreements, we have agreed to fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, based on a monthly reconciliation such that JMMPC will operate at break even and derive no profit.

We have determined that JMMPC is a variable interest entity, or VIE, and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to U.S. generally accepted accounting principles. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the services and affiliation agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of December 31, 2012, JMMPC had total assets of $1.4 million, comprising primarily cash and equivalents, and total liabilities of $1.1 million, comprising primarily accrued payroll and employee benefits.

Our maximum exposure to loss as a result of our involvement with this entity is equal to the amounts needed to fund JMMPC's ongoing payroll and employee benefits. We believe that such loss exposure will be immaterial to our consolidated operating results and cash flows for the foreseeable future. For the year ended December 31, 2012, we provided an initial cash infusion of $0.3 million to JMMPC in the first quarter of 2012 to fund its start-up operations. During 2012 our health plans received $0.2 million from JMMPC under the terms of the affiliation agreement.

New Markets Tax Credit

During the fourth quarter of 2011 our New Mexico data center subsidiary entered into a financing transaction with Wells Fargo Community Investment Holdings, LLC, or Wells Fargo, its wholly owned subsidiary New Mexico Healthcare Data Center Investment Fund, LLC, or Investment Fund, and certain of Wells Fargo's affiliated Community Development Entities, or CDEs, in connection with our participation in the federal government's New Markets Tax Credit Program, or NMTC. The NMTC was established by Congress in 2000 to facilitate new or increased investments in businesses and real estate projects in low-income communities. The NMTC attracts investment capital to low-income communities by permitting investors to receive a tax credit against their federal income tax return in exchange for equity investments in specialized financial institutions, called CDEs, which provide financing to qualified active businesses operating in low-income communities. The credit amounts to 39% of the original investment amount and is claimed over a period of seven years (five percent for each of the first three years, and six percent for each of the remaining four years). The investment in the CDE cannot be redeemed before the end of the seven-year period.

In the fourth quarter of 2011, as a result of a series of simultaneous financing transactions, Wells Fargo contributed capital of $5.9 million to the Investment Fund, and Molina Healthcare, Inc. loaned the principal amount of $ 15.5 million to the Investment Fund. The Investment Fund then contributed the proceeds to certain CDEs, which, in turn, loaned the proceeds of $20.9 million to our New Mexico data center subsidiary. Wells Fargo will be entitled to claim the NMTC while we effectively received net loan proceeds equal to Wells Fargo's contribution to the Investment Fund, or approximately $5.9 million. Additionally, financing costs incurred in structuring the arrangement amounting to $1.2 million were deferred and will be recognized as expense over the term of the loans. This transaction also includes a put/call feature that becomes enforceable at the end of the seven-year compliance period. Wells Fargo may exercise its put option or we can exercise the call, both of which will serve to transfer the debt obligation to us. Incremental costs to maintain the structure during the compliance period will be recognized as incurred.

We have determined that the financing arrangement with Investment Fund and CDEs is a VIE, and that we are the primary beneficiary of the VIE. We reached this conclusion based on the following:

- The ongoing activities of the VIE-collecting and remitting interest and fees and NMTC compliance-were all considered in the initial design and are not expected to significantly affect economic performance throughout the life of the VIE;

- Contractual arrangements obligate us to comply with NMTC rules and regulations and provide various other guarantees to Investment Fund and CDEs;
- Wells Fargo lacks a material interest in the underling economics of the project; and
- We are obligated to absorb losses of the VIE.

Because we are the primary beneficiary of the VIE, we have included it in our consolidated financial statements. Wells Fargo's contribution of $5.9 million is included in cash at December 31, 2012 and the offsetting Wells Fargo's interest in the financing arrangement is included in other liabilities in the accompanying consolidated balance sheets.

As described above, this transaction also includes a put/call provision whereby we may be obligated or entitled to repurchase Wells Fargo's interest in the Investment Fund. The value attributed to the put/call is nominal. The NMTC is subject to 100% recapture for a period of seven years as provided in the Internal Revenue Code and applicable U.S. Treasury regulations. We are required to be in compliance with various regulations and contractual provisions that apply to the NMTC arrangement. Non-compliance with applicable requirements could result in Wells Fargo's projected tax benefits not being realized and, therefore, require us to indemnify Wells Fargo for any loss or recapture of NMTCs related to the financing until such time as the recapture provisions have expired under the applicable statute of limitations. We do not anticipate any credit recaptures will be required in connection with this arrangement.

19. Commitments and Contingencies

Leases

We lease administrative and clinic facilities and certain equipment under non-cancelable operating leases expiring at various dates through 2021. Facility lease terms generally range from five to ten years with one to two renewal options for extended terms. In most cases, we are required to make additional payments under facility operating leases for taxes, insurance and other operating expenses incurred during the lease period. Certain of our leases contain rent escalation clauses or lease incentives, including rent abatements and tenant improvement allowances. Rent escalation clauses and lease incentives are taken into account in determining total rent expense to be recognized during the lease term. Future minimum lease payments by year and in the aggregate under all operating leases consist of the following approximate amounts:

	(In thousands)
2013	$ 26,866
2014	21,420
2015	14,808
2016	8,472
2017	6,939
Thereafter	7,771
Total minimum lease payments	$ 86,276

Rental expense related to these leases amounted to $20.5 million, $23.1 million, and $25.1 million for the years ended December 31, 2012, 2011, and 2010, respectively.

Employment Agreements

In 2002 we entered into employment agreements with our Chief Executive Officer and Chief Financial Officer, which have been amended and restated as of December 31, 2009. These employment agreements had initial terms of one to three years and are subject to automatic one-year extensions thereafter. Should the executives be terminated without cause or resign for good reason before a change of control, as defined, we will pay one year’s base salary and termination bonus, as defined, in addition to full vesting of 401(k) employer contributions and stock-based awards, and a cash sum equal in value to health and welfare benefits provided for 18 months. If the executives are terminated for cause, no further payments are due under the contracts.

If termination occurs within two years following a change of control, the executives will receive two times their base salary and termination bonus, in addition to full vesting of 401(k) employer contributions and stock-based awards, and a cash sum equal in value to health and welfare benefits provided for three years.

Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Professional Liability Insurance

We carry medical professional liability insurance for health care services rendered through our clinics in California, Florida, New Mexico, Virginia, and Washington. We also carry claims-made managed care errors and omissions professional liability insurance for our health plan operations.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Such state laws and regulations also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after inter-company eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $549.7 million at December 31, 2012, and $492.4 million December 31, 2011. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders are generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $46.9 million and $23.6 million as of December 31, 2012, and 2011, respectively.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital, or RBC, rules. Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of December 31, 2012, our health plans had aggregate statutory capital and surplus of approximately $557.9 million compared with the required minimum aggregate statutory capital and surplus of approximately $345.7 million. All of our health plans were in compliance with the minimum capital requirements at December 31, 2012. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Receivable/Liability for Ceded Life and Annuity Contracts

Prior to February 17, 2012, we reported a 100% ceded reinsurance arrangement for life insurance policies written and held by our then wholly owned insurance subsidiary, Molina Healthcare Insurance Company, by recording a non-current receivable

from the reinsurer with a corresponding non-current liability for ceded life and annuity contracts. Effective February 17, 2012, we sold Molina Healthcare Insurance Company. The transaction resulted in the elimination of both the noncurrent receivable and liability for ceded life and annuity contracts, each amounting to $23.4 million as of December 31, 2011. Additionally, we recorded a gain of approximately $1.7 million to general and administrative expenses in the first quarter of 2012 upon closing of the transaction.

Molina Healthcare Insurance Company is now named Catamaran Insurance of Ohio, or Catamaran. In the event that both the reinsurer and Catamaran are unable to pay benefit on policies that were in-force as of the sale date, we remain ultimately liable for payment of such benefits. Because we no longer own Catamaran, we no longer have access to its financial records; therefore, the maximum amount of potential future payments is not determinable. We believe the possibility of our having to pay such benefits is remote, and no provision for the payment of such benefits is included in our consolidated financial statements.

20. Segment Reporting

We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans which serve Medicaid populations in nine states, subsequent to the termination of our Medicaid contract in Missouri effective June 30, 2012, and also includes our smaller direct delivery line of business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides design, development, implementation; business process outsourcing solutions; hosting services; and information technology support services to Medicaid agencies in an additional five states. The Molina Medicaid Solutions segment was added to our internal financial reporting structure when we acquired this business in the second quarter of 2010.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, “Significant Accounting Policies.” The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

Molina Medicaid Solutions was acquired on May 1, 2010; therefore, the year ended December 31, 2010 includes only eight months of operating results for this segment. Operating segment information is as follows:

	Year Ended December 31,		
	2012	2011	2010
	(In thousands)		
Segment Information:			
Revenue:			
Health Plans:			
Premium revenue	$ 5,826,491	$ 4,603,407	$ 3,989,909

Health Plans	$ 1,702,212	$ 1,429,283
Molina Medicaid Solutions	232,610	222,863
	$ 1,934,822	$ 1,652,146

21. Quarterly Results of Operations (Unaudited)

The following is a summary of the quarterly results of operations for the years ended December 31, 2012 and 2011.

	For The Quarter Ended,			
	March 31, 2012	June 30, 2012	September 30, 2012	December 31, 2012
	(In thousands, except per-share data)			
Premium revenue	$ 1,327,449	$ 1,492,272	$ 1,488,718	$ 1,518,052
Service revenue	42,205	41,724	48,422	55,359
Operating income (loss)	33,420	(59,267)	7,187	54,133
Income (loss) before income taxes	29,122	(63,075)	2,872	50,146
Net income (loss)	18,089	(37,306)	3,364	25,643
Net income (loss) per share (2):				
Basic	$ 0.39	$ (0.80)	$ 0.07	$ 0.55
Diluted	$ 0.39	$ (0.80)	$ 0.07	$ 0.54

	For The Quarter Ended,			
	March 31, 2011	June 30, 2011	September 30, 2011	December 31, 2011(1)
	(In thousands, except per-share data)			
Premium revenue	$ 1,081,438	$ 1,128,770	$ 1,138,230	$ 1,254,969
Service revenue	36,674	36,888	37,728	49,157
Operating income (loss)	31,300	31,410	33,566	(16,103)
Income (loss) before income taxes	27,697	27,727	29,186	(19,956)
Net income (loss)	17,388	17,440	18,950	(32,960)
Net income (loss) per share (2):				
Basic	$ 0.38	$ 0.38	$ 0.41	$ (0.72)
Diluted	$ 0.38	$ 0.38	$ 0.41	$ (0.72)

(1) On February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's existing contract with the state expired without renewal on June 30, 2012. In connection with this notification, we recorded a total non-cash impairment charge of $64.6 million in the fourth quarter of 2011, of which $6.1 million related to finite-lived intangible assets, and $58.5 million related to goodwill. The impairment charge comprised substantially all intangible assets relating to contract rights and licenses, and provider networks recorded at the time of our acquisition of the Missouri health plan in 2007. For the quarter ended December 31, 2011, the impairment charge reduced diluted earnings per share by $1.34.

(2) Potentially dilutive shares issuable pursuant to our 2007 offering of convertible senior notes were not included in the computation of diluted net income per share because to do so would have been anti-dilutive for the years ended December 31, 2012, and 2011.

22. Condensed Financial Information of Registrant

Following are our parent company only condensed balance sheets as of December 31, 2012 and 2011, and our condensed statements of income and condensed statements of cash flows for each of the three years in the period ended December 31, 2012.

Condensed Balance Sheets

	December 31,	
	2012	2011
	(Amounts in thousands, except per-share data)	
ASSETS		
Current assets:		
Cash and cash equivalents	$ 39,068	$ 14,650

Cash and cash equivalents at beginning of year	14,650	57,020	26,040
Cash and cash equivalents at end of year	$ 39,068	$ 14,650	$ 57,020

Notes to Condensed Financial Information of Registrant

Note A - Basis of Presentation

Molina Healthcare, Inc., or the Registrant, was incorporated on July 24, 2002. Prior to that date, Molina Healthcare of California (formerly known as Molina Medical Centers) operated as a California health plan and as the parent company for Molina Healthcare of Utah, Inc. Molina Healthcare of Michigan, Inc. and Molina Healthcare of Washington, Inc. In June 2003, the employees and operations of the corporate entity were transferred from Molina Healthcare of California to the Registrant.

The Registrant's investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries since the date of acquisition. The accompanying condensed financial information of the Registrant should be read in conjunction with the consolidated financial statements and accompanying notes.

Note B - Transactions with Subsidiaries

The Registrant provides certain centralized medical and administrative services to its subsidiaries pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems and human resources services. Fees are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the subsidiaries' ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate. Charges in 2012, 2011, and 2010 for these services totaled $406.4 million, $307.9 million, and $238.5 million, respectively, which are included in operating revenue.

The Registrant and its subsidiaries are included in the consolidated federal and state income tax returns filed by the Registrant. Income taxes are allocated to each subsidiary in accordance with an intercompany tax allocation agreement. The agreement allocates income taxes in an amount generally equivalent to the amount which would be expensed by the subsidiary if it filed a separate

tax return. Net operating loss benefits are paid to the subsidiary by the Registrant to the extent such losses are utilized in the consolidated tax returns.

Note C - Capital Contribution, Dividends and Surplus Note

During 2012, 2011, and 2010, the Registrant received dividends from its subsidiaries amounting to $101.8 million, $76.6 million, and $81.3 million, respectively. Such amounts have been recorded as a reduction to the investments in the respective subsidiaries. In addition, in 2011 a subsidiary of the Registrant repaid a surplus note in favor of the Registrant amounting to $9.7 million, including accrued interest. Such amount was a reduction of due from affiliates and prepaid and other current assets.

During 2012, 2011, and 2010, the Registrant made capital contributions to certain subsidiaries amounting to $100.2 million, $58.4 million, and $10.5 million, respectively, primarily to comply with minimum net worth requirements and to fund contract acquisitions. Such amounts have been recorded as an increase in investment in the respective subsidiaries.

Note D - Related Party Transactions

On February 27, 2013, the Registrant entered into a lease (the "Lease") with 6 th & Pine Development, LLC (the "Landlord") for office space located in Long Beach, California. The lease consists of two office buildings as follows:

- an existing building, which comprises approximately 70,000 square feet of office space, and
- a new building, which is expected to comprise approximately 120,000 square feet of office space.

The term of the Lease with respect to the existing building is expected to commence on June 1, 2013, and the term of the Lease with respect to the new building is expected to commence on November 1, 2014. The initial term of the Lease with respect to both buildings expires on December 31, 2024, subject to two options to extend the term for a period of five years each. Initial annual rent for the existing building is expected to be approximately $2.5 million and initial annual rent for the new building is expected to be approximately $4.0 million. Rent will increase 3.75% per year through the initial term. Rent during the extension terms will be the greater of then-current rent or fair market rent.

The principal members of the Landlord are John C. Molina, the Chief Financial Officer and a director of the Registrant, and his wife. In addition, in connection with the development of the buildings being leased, the Landlord has pledged shares of common stock in the Registrant he holds as trustee. Dr. J. Mario Molina, the Registrant's Chief Executive Officer and Chairman of the Board of Directors, holds a partial interest in such shares as trust beneficiary.

The Registrant has an equity investment in a medical service provider that provides certain vision services to its members. The Registrant accounts for this investment under the equity method of accounting because the Registrant has an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. For both years ended December 31, 2012 and 2011, the Registrant's carrying amount for this investment amounted to $3.9 million. For the years ended December 31, 2012, 2011, and 2010, the Registrant paid $28.4 million, $24.3 million, and $22.0 million, respectively, for medical service fees to this provider.

The Registrant is party to a fee-for-service agreement with Pacific Hospital of Long Beach, or Pacific Hospital. Pacific Hospital is owned by Abrazos Healthcare, Inc. Until October 12, 2010, the majority of the shares of Abrazos Healthcare, Inc. were held as community property by Dr. Martha Bernadett and her husband. Dr. Martha Bernadett is the sister of Joseph M. Molina, M.D. (Dr. J. Mario Molina), our Chief Executive Officer, and John Molina, our Chief Financial Officer. On October 12, 2010, Dr. Bernadett and her husband sold their shares in Abrazos Healthcare, Inc., terminating our related party relationship with Pacific Hospital. Under the terms of this fee-for-service agreement we paid Pacific Hospital $0.8 million for the period from January 1, 2010 to October 12, 2010.

On December 26, 2012, the Registrant purchased 110,988 shares of its common stock from certain Molina family trusts for an aggregate purchase price of $3.0 million. This purchase transaction was approved by the Registrant's board of directors. The shares were purchased at a price of $27.03, representing the closing price per share of the Registrant's common stock on December 26, 2012. The shares were purchased from the Janet M. Watt Separate Property Trust dated 10/22/2007, or the Separate Property Trust, and the Watt Family Trust dated 10/11/1996, or the Family Trust. Janet M. Watt is the sister, and her husband Lawrence B. Watt is the brother-in-law, of Dr. J. Mario Molina and John Molina. Ms. Watt is the sole trustee of the Separate Property Trust, and a co-trustee with Lawrence B. Watt of the Family Trust.

23. Subsequent Event

New Mexico Health Plan

On February 11, 2013, we announced that our New Mexico health plan was selected by the New Mexico Human Services Department (HSD) to participate in the new Centennial Care program. In addition to continuing to provide physical and acute health care services, under the new program Molina Healthcare of New Mexico will expand its services to provide behavioral

health and long-term care services. The selection of Molina Healthcare of New Mexico was made by HSD pursuant to its request for proposals issued in August 2012. The operational start date for the program is currently scheduled for January 2014.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosures***

None.

Item 9A. ***Controls and Procedures***

Disclosure Controls and Procedures: Our management is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934 (the "Exchange Act"). Our internal control over financial reporting is designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements. We maintain controls and procedures designed to ensure that we are able to collect the information we are required to disclose in the reports we file with the Securities and Exchange Commission, and to process, summarize and disclose this information within the time periods specified in the rules of the Securities and Exchange Commission.

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has conducted an evaluation of the design and operation of our "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e)) under the Exchange Act. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective as of the end of the period covered by this report to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Changes in Internal Controls: There were no changes in our internal control over financial reporting that occurred during the quarter ended December 31, 2012, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting: Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States. However, all internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and reporting.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2012. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework.*

Based on our assessment, management believes that the Company maintained effective internal control over financial reporting as of December 31, 2012, based on those criteria.

The effectiveness of the Company's internal control over financial reporting has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report appearing on page 117 of this Annual Report on Form 10-K, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2012.

Item 9B. ***Other Information***

6th and Pine Lease

On February 27, 2013, Molina Healthcare, Inc. (the "Company") entered into a build-to-suit office building lease (the "Lease") with 6 th & Pine Development, LLC (the "Landlord") for approximately 190,000 rentable square feet of office space and 15,000 square feet of storage space located at 604 Pine Avenue, Long Beach, California (the "Project"). The Landlord is expected to construct the Project on a "turnkey" basis, which will consist of two office buildings, on-site parking, common areas and certain amenities, and the right to use up to 500 off-site parking spaces to be secured by the Landlord. The two office buildings will be comprised of:

- an existing building located on the site and commonly known as the Independent Press Telegram building (the "Existing Building"), which the Landlord is required to substantially refurbish as part of Phase I of the Project. Upon completion of the refurbishment, the Existing Building is expected to contain approximately 70,000 square feet of office space and 15,000 square feet of storage space, and

- a new building (the "New Building"), which the Landlord is required to construct as part of Phase II of the Project following the demolition of a building currently located on the site commonly known as the Meeker-Baker building. Upon completion of the construction, the New Building is expected to contain approximately 120,000 square feet of office space.

The term of the Lease with respect to the Existing Building is expected to commence on June 1, 2013, and the term of the Lease with respect to the New Building is expected to commence on November 1, 2014. The initial term of the Lease with respect to both buildings expires on December 31, 2024, subject to two options to extend the term for a period of five years each.

Commencing on the commencement date of the lease for the Existing Building, the monthly base rent due under the Lease is (i) for the office space, initially $2.70 per rentable square foot, increasing by 3.75% per year through the initial term, and (ii) for the storage space, $1.40 per rentable square foot, increasing by 3.75% per year through the initial term. Base rent during the extension terms will be the greater of then-current base rent or fair market rent. The Lease is a full service, base year, gross lease. Accordingly, the rent payable by the Company includes the cost of all utilities, taxes, insurance and maintenance with respect to the Project for the base year, 2015. The Company will be responsible for any increases in the cost of utilities, taxes, insurance and/or maintenance in excess of the cost therefor during the base year, 2015 (subject to certain customary limitations). The Company will also pay $600 per year for each on-site parking space (213) and for each off-site parking space that the Company elects to use (up to 500). The per year, per space parking rate will increase by 3% each year for each on-site parking space and by CPI, with a cap of 3%, for each off-site space.

During the first five years of the term of the Lease, the Company has a right of first offer to purchase the Project (including any transferable off-site parking rights held by the Landlord), and from and after year five of the Lease, the Company has an option to purchase the Project (including any transferable off-site parking rights held by the Landlord) for a purchase price equal to the fair market value for the Project.

The principal members of the Landlord are John C. Molina, the Chief Financial Officer and a director of the Company, and his wife. In addition, in connection with the Project the Landlord has pledged shares of common stock in the Company he holds as trustee. Dr. J. Mario Molina, the Company's Chief Executive Officer and Chairman of the Board of Directors, holds a partial interest in such shares as trust beneficiary.

In November 2011, the Company's Board of Directors organized a special committee of five independent directors (the "Special Committee") consisting of Steve Orlando, Ronna Romney, John Szabo, Charles Fedak, and Dr. Frank Murray, and delegated to the Special Committee full power and authority to consider and enter into any real property transaction to meet the Company's space needs. Following its formation, the Special Committee undertook a review of, among other things, the Company's projected space needs and available space options. In connection with its work, the Special Committee retained Latham & Watkins LLP, as its independent legal counsel, and Duff & Phelps LLC, as its independent real estate advisor. Following the completion of its work, the Committee determined that it was appropriate to enter into the Lease with the Landlord under its terms and conditions, and accordingly approved the Company's entry into the Lease.

The foregoing description of the Lease is not complete and is qualified in its entirety by reference to the full text of such agreement, a copy of which is filed as Exhibit 10.32 herewith and which is incorporated herein by reference.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited Molina Healthcare, Inc.'s (the "Company's") internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Molina Healthcare, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Molina Healthcare, Inc. as of December 31, 2012 and 2011, and the related consolidated statements of income and comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2012 and our report dated February 28, 2013 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

Los Angeles, California
February 28, 2013

PART III

Item 10. ***Directors, Executive Officers, and Corporate Governance***

Pursuant to General Instruction G(3) to Form 10-K and Instruction 3 to Item 401(b) of Regulation S-K, information regarding our executive officers is provided in Item 1 of Part I of this Annual Report on Form 10-K under the caption "Executive Officers of the Registrant," and will also appear in our definitive proxy statement for our 2013 Annual Meeting of Stockholders. The remaining information required by Items 401, 405, 406 and 407(c)(3), (d)(4) and (d)(5) of Regulation S-K will be included under the headings "Election of Directors," "Corporate Governance," and "Section 16(a) Beneficial Ownership Reporting Compliance" in our definitive proxy statement for our 2013 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

Item 11. ***Executive Compensation***

The information required by Items 402, 407(e)(4), and (e)(5) of Regulation S-K will be included under the headings "Executive Compensation" and "Compensation Committee Interlocks and Insider Participation" in our definitive proxy statement for our 2013 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

Item 12. ***Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters***

The information required by this item regarding our equity compensation plans is set forth in Part II, Item 5 of this report and incorporated herein by reference. The remaining information required by Item 403 of Regulation S-K will be included under the heading "Security Ownership of Certain Beneficial Owners and Management" in our definitive proxy statement for our 2013 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence***

The information required by Items 404 and 407(a) of Regulation S-K will be included under the headings "Certain Relationships and Transactions" and "Corporate Governance" in our definitive proxy statement for our 2013 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

Joseph M. Molina, M.D., Professional Corporations

Our wholly owned subsidiary, American Family Care, Inc., or AFC, operates our primary care clinics. In 2012, AFC entered into services agreements with the Joseph M. Molina, M.D. Professional Corporations, or JMMPC. JMMPC was created to further advance our direct delivery line of business. Its sole shareholder is Joseph M. Molina, M.D. (Dr. J. Mario Molina), our Chairman of the Board, President and Chief Executive Officer. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. Under the services agreements, AFC provides the clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC, and JMMPC provides outpatient professional medical services to the general public for routine non-life threatening, outpatient health care needs. While JMMPC may provide services to the general public, substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities. In addition to the services agreements with AFC, JMMPC has entered into affiliation agreements with us. Under these agreements, we have agreed to fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, based on a monthly reconciliation such that JMMPC will operate at break even and derive no profit.

We have determined that JMMPC is a variable interest entity, or VIE, and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to U.S. generally accepted accounting principles. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the services and affiliation agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of December 31, 2012, JMMPC had total assets of $1.4 million, comprising primarily cash and equivalents, and total liabilities of $1.1 million, comprising primarily accrued payroll and employee benefits.

Our maximum exposure to loss as a result of our involvement with this entity is equal to the amounts needed to fund JMMPC's ongoing payroll and employee benefits. We believe that such loss exposure will be immaterial to our consolidated

operating results and cash flows for the foreseeable future. For the year ended December 31, 2012, we provided an initial cash infusion of $0.3 million to JMMPC in the first quarter of 2012 to fund its start-up operations. During 2012 our health plans received $0.2 million from JMMPC under the terms of the affiliation agreement.

Stock Repurchase

Janet M. Watt is the sister, and her husband Lawrence B. Watt is the brother-in-law, of Dr. J. Mario Molina, the Company's Chief Executive Officer, and John Molina, the Company's Chief Financial Officer. Ms. Watt is the sole trustee of the Janet M. Watt Separate Property Trust dated 10/22/2007 (the "Separate Property Trust") and a co-trustee with Lawrence B. Watt, of the Watt Family Trust dated 10/11/1996 (the "Family Trust" and together with the Separate Property Trust, the "Trusts"). On December 26, 2012, pursuant to a Stock Purchase Agreement between the Company and the Trusts, the Company purchased an aggregate of 110,988 shares of its common stock from the Trusts for an aggregate purchase price of $3,000,005.64, as follows: (i) 43,767 shares from the Family Trust for an aggregate purchase price of $ 1,183,022.01 and (ii) 67,221 shares from the Separate Property Trust for an aggregate purchase price of $1,816,983.63. The shares were purchased at a price per share of $27.03, representing the closing price per share of the Company's common stock on December 26, 2012, as reported by the New York Stock Exchange. The transaction was approved by the Company's Board of Directors.

6th and Pine Lease

Please see the information disclosed under Part II, Item 9B. Other Information, in this Annual Report, which disclosure is incorporated herein by reference.

Item 14. ***Principal Accountant Fees and Services***

The information required by Item 9(e) of Schedule 14A will be included under the heading "Independent Registered Public Accounting Firm" in our definitive proxy statement for our 2013 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

PART IV

Item 15. ***Exhibits and Financial Statement Schedules***

(a) The consolidated financial statements and exhibits listed below are filed as part of this report.

(1) The Company's consolidated financial statements, the notes thereto and the report of the Independent Registered Public Accounting Firm are on pages 64 through 108 of this Annual Report on Form 10-K and are incorporated by reference.

Report of Independent Registered Public Accounting Firm

Consolidated Balance Sheets - At December 31, 2012 and 2011

Consolidated Statements of Income - Years ended December 31, 2012, 2011, and 2010

Consolidated Statements of Stockholders' Equity - Years ended December 31, 2012, 2011, and 2010

Consolidated Statements of Cash Flows - Years ended December 31, 2012, 2011, and 2010

Notes to Consolidated Financial Statements

(2) Financial Statement Schedules

None of the schedules apply, or the information required is included in the Notes to the Consolidated Financial Statements.

(3) Exhibits

Reference is made to the accompanying Index to Exhibits.

The following exhibits, which are furnished with this annual report or incorporated herein by reference, are filed as part of this annual report.

The agreements included or incorporated by reference as exhibits to this Annual Report on Form 10-K contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties were made solely for the benefit of the other parties to the applicable agreement and (i) were not intended to be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate; (ii) may have been qualified in such agreement by disclosures that were made to the other party in connection with the negotiation of the applicable agreement; (iii) may apply contract standards of "materiality" that are different from "materiality" under the applicable securities laws; and (iv) were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement. The Company acknowledges that, notwithstanding the inclusion of the foregoing cautionary statements, it is responsible for considering whether additional specific disclosures of material information regarding material contractual provisions are required to make the statements in this Annual Report on Form 10-K not misleading.

EXHIBIT 10.16

CHANGE IN CONTROL AGREEMENT

THIS CHANGE IN CONTROL AGREEMENT (the "Agreement") is entered into as of September 18, 2012, (the "Effective Date"), by and between Jeff Barlow (the "Executive") and Molina Healthcare, Inc., a Delaware corporation (the "Company").

RECITALS

1. Definitions. The following definitions shall apply for all purposes under this Agreement:

(a) Annual Base Salary. "Annual Base Salary" shall mean the Executive's annualized fiscal year base salary (as paid in accordance with the Company's regular payroll practices) as in effect on the date of Executive's Separation from Service (or if Executive's salary was greater, on the date of the Announcement (as such term is defined below)).

(b) Change in Control. "Change in Control" means the occurrence of any of the following events after the Effective Date:

(i) The acquisition (other than by an Excluded Person), directly or indirectly, in one or more transactions, by any person or by any group of persons, within the meaning of Section 13(d) or 14(d) of the Exchange Act, of beneficial ownership (within the meaning of Rule 13d-3 of the Exchange Act) of more than fifty percent (50%) of either the outstanding shares of common stock or the combined voting power of the Company's outstanding voting securities entitled to vote generally, whether or not the acquisition was previously approved by the existing directors, other than an acquisition that complies with clause (x) and (y) of paragraph (ii);

(ii) Consummation of a reorganization, merger, or consolidation of the Company or the sale or other disposition of all or substantially all of the Company's assets unless, immediately following such event, (x) all or substantially all of the stockholders of the Company immediately prior to such event own, directly or indirectly, more than fifty percent (50%) of the then outstanding voting securities of the resulting corporation (including without limitation, a corporation which as a result of such event owns the Company or all or substantially all of the Company's assets either directly or indirectly through one or more subsidiaries) and (y) the securities of the surviving or resulting corporation received or retained by the stockholders of the Company are publicly traded;

(iii) Approval by the stockholders of the complete liquidation or dissolution of the Company; or

(iv) A change in the composition of a majority of the directors on the Company's Board of Directors within 12 months if not approved by a majority of the pre-existing directors.

A transaction shall not constitute a Change in Control if its sole purpose is to change the state of the Company's incorporation or to create a holding company that will be owned in substantially the same proportions by the persons who held the Company's securities immediately before such transaction.

(c) Excluded Person. "Excluded Person" means:

(i) Any person described in and satisfying the conditions of Rule 13d-1(b)(1) under the Exchange Act;

(ii) The Company;

(iii) An employee benefit plan (or related trust) sponsored or maintained by the Company or its successor;

(iv) Any person who is the beneficial owner (as defined in Rule 13d-3 under the Exchange Act) of more than 15% of the Common Stock on the Effective Date (or any affiliate, successor, heir, descendant, or related party of or to such person).

(d) Good Reason. "Good Reason" shall mean that, on or after the effective date of a Change in Control, the Executive (without Executive's written consent):

(i) Has incurred a material reduction in his authority or responsibility with the Company in comparison to the Executive's authority or responsibility prior to the public announcement of the Change in Control (the "Announcement");

(ii) Has incurred one or more reductions in his "total compensation" with the Company which is defined as follows:

(A) A material reduction in Annual Base Salary, or

(B) A material reduction in the target annual bonus percentage of Annual Base Salary; or

(iii) A material change in the geographic location of the Executive's principal office with the Company.

(iv) The Executive gives to the Company written notice of the event in clause (i), (ii), or (iii) giving rise to Good Reason within ninety (90) days of the initial existence of such event and the Company has not cured the event giving rise to Good Reason within thirty (30) days of receipt of written notification by Executive and the Executive resigns from employment with the Company within sixty (60) days following the end of the cure period.

(e) Cause. "Cause" includes any of the following committed by Executive (or omitted to be done by Executive) that occur on or after the Effective Date:

(i) Theft, unlawful acts involving moral turpitude, or fraud with respect to any aspect of the Company's business;

(ii) Neglect of or failure to perform employment duties;

(iii) Insubordination;

(iv) Abuse of alcohol or other drugs or substances;

(v) A conviction of or plea of "guilty" or "no contest" to a felony under the laws of the United States or any state thereof (or admission or confession with respect thereto);

(vi) Any violation or breach of any Company policy that has been established to comply with either the Sarbanes-Oxley Act of 2002 (or any regulations or rules or decisions that implement/interpret such Act) or any laws, rules, or requirements of the Securities and Exchange Commission or the New York Stock Exchange;

(vii) Conduct on the part of Executive that constitutes a breach of any fiduciary duty or duty of loyalty owed to the Company or its affiliates by Executive; or

(viii) Breach of this Agreement; provided, however, that any such breach or violation of Sections 1(e)(ii), (iii), (iv), or (viii) hereof shall not constitute Cause unless it is (A) not reasonably curable or (B) if reasonably curable, is not cured by the Executive within thirty (30) days notice from the Company.

(f) Total Disability. "Total Disability" shall be deemed to occur on the ninetieth (90th) consecutive or non-consecutive calendar day within any twelve (12) month period that Executive is unable to perform his duties because of any physical or mental illness or disability.

(g) Target Bonus. "Target Bonus" shall mean the Executive's fiscal year target bonus opportunity.

2. Severance Payment and Equity Compensation .

(a) The Executive shall be entitled to receive a severance payment from the Company as provided herein (the "Severance Payment") if the Executive has a Separation of Service within the first twelve (12) month period after the occurrence of a Change in Control, by reason of either:

(i) The Executive's voluntary resignation of his employment with the Company for Good Reason pursuant to Section 1(d); or

(ii) The Company's discharge of the Executive from employment with the Company for any reason other than Cause, death, or Total Disability.

For all purposes under this Agreement, the amount of the Severance Payment shall be equal to two times (2X) the Annual Base Salary, plus a pro rata portion of the Executive's Target Bonus for the year in which Executive's employment is terminated based on the number of entire months of such year that have elapsed through the date of Executive's termination of employment as a fraction of twelve (12), plus a cash payment of $50,000 for all Company group health benefits. The Severance Payment shall be distributable upon Executive's Separation from Service as follows:

(iii) the portion thereof that does not exceed the Exemption Limit shall satisfy the involuntary separation pay exemption under Treasury Regulation Section 1.409A-1(b)(9)(iii), shall be exempt from Section 409A of the Internal Revenue Code of 1986, as amended (the "Code") and shall be paid in a lump sum payment within the ten (10) day period commencing on the 60th day after the date of Executive's Separation from Service, and

(iv) the remaining portion (if any) shall be subject to and shall comply with Section 409A of the Code and shall be paid in a lump sum payment within the ten (10) day period commencing on the 60th day after the date of the Executive's Separation from Service; provided, however, that, if Executive is a Specified Employee on the date of the Executive's Separation from S

ervice, such payment shall be paid within the ten (10) day period following the earlier of (x) the expiration of the six (6) month period commencing on the date of the Executive's Separation from Service and (y) the date of Executive's death.

Except as may be provided under Sections 2(b) and 2(c), the Severance Payment shall be in lieu of any other post-termination employment payments.

(b) Incentive, Deferred Compensation, and Retirement Programs. If the Executive is entitled to a Severance Payment under Section 2(a) and notwithstanding anything to the contrary in any equity incentive, stock option, stock appreciation right (SAR), or deferred compensation plan or retirement plan or agreements, then (i) the Executive shall become immediately fully vested in all of his outstanding restricted stock, stock options, SARs, warrants, phantom stock, deferred compensation, retirement, or similar plans or agreements of the Company, and (ii) the Executive (or his personal representative if applicable) shall be permitted to exercise any of his vested stock options/SARs until the earlier of: (i) one (1) year after Executive's termination of employment, and (ii) the term of such unexercised stock options, warrants, or SARs.

(c) Mitigation. Except as may be expressly provided elsewhere in this Agreement, the Executive shall not be required to mitigate the amount of any payment or benefit contemplated by this Section 2 (whether by seeking new employment or in any other manner). No such payment shall be reduced by earnings that the Executive may receive from any other source.

(d) Conditions. All payments and benefits provided under this Section 2 are conditioned on Executive's continuing compliance with this Agreement and the Company's policies. All payments and benefits are also conditioned on, and in consideration for, Executive's execution (and effectiveness) of a release of claims and covenant not to sue substantially in the form provided in Exhibit A to be delivered by Executive no later than sixty (60) days following the Executive's Separation of Service, any revocation period required by law has run, and Executive has not revoked the release of claims and covenant not to sue.

3. Limitation on Payments.

(a) Anything in this Agreement to the contrary notwithstanding, in the event it shall be determined that any payment or distribution made, or benefit provided, by the Company to or for the benefit of the Executive under this Agreement or any other agreement between the Company and the Executive or plan of the Company would constitute a "parachute payment" as defined in Section 280G of the Code, then the benefits payable pursuant to this Agreement shall be reduced so that the aggregate present value of all payments in the nature of compensation to (or for the benefit of) the Executive which are contingent on a change of control (as defined in Section 280G(b)(2)(A) of the Code) is One Dollar ($1.00) less than the amount which the Executive could receive without being considered to have received any parachute payment (the amount of this reduction in the benefits payable is referred to herein as the "Excess Amount"). The determination of the amount of any reduction required by this Section 3(a) shall be made by a nationally recognized tax counsel selected by the Company, and such determination shall be conclusive and binding on the parties hereto.

(b) Notwithstanding the provisions of Section 3(a), if it is established, pursuant to a final determination of a court or an Internal Revenue Service proceeding which has been finally

and conclusively resolved, that an Excess Amount was received by the Executive from the Company, then such Excess Amount shall be deemed for all purposes to be a loan to the Executive made on the date the Executive received the Excess Amount and the Executive shall repay the Excess Amount to the Company on demand (but no less than ten (10) days after written demand is received by the Executive) together with interest on the Excess Amount at the "applicable Federal rate" (as defined in Section 1274(d) of the Code) from the date of the Executive's receipt of such Excess Amount until the date of such repayment.

4. Successors.

(a) Company's Successors. Any successor (whether direct or indirect and whether by purchase, lease, merger, consolidation, liquidation, or otherwise) to all or substantially all of the Company's business and/or assets, shall be obligated to perform this Agreement in the same manner and to the same extent as the Company would be required to perform it in the absence of a succession.

(b) Executive's Successors. This Agreement and all rights of the Executive hereunder shall inure to the benefit of, and be enforceable by, the Executive's personal or legal representatives, executors, administrators, successors, heirs, distributees, devisees, and legatees.

5. Miscellaneous Provisions.

(a) Notice. Notices and all other communications contemplated by this Agreement shall be in writing and shall be deemed to have been duly given when personally delivered or when mailed by U.S. registered or certified mail, return receipt requested and postage prepaid. In the case of the Executive, mailed notices shall be addressed to him or her at the home address which he most recently communicated to the Company in writing. In the case of the Company, mailed notices shall be addressed to its corporate headquarters, and all notices shall be directed to the attention of its Secretary.

(b) Waiver. No provision of this Agreement shall be modified, waived or discharged unless the modification, waiver or discharge is agreed to in writing and signed by the Executive and by an authorized officer of the Company (other than the Executive). No waiver by either party of any breach of, or of compliance with, any condition or provision of this Agreement by the other party shall be considered a waiver of any other condition or provision or of the same condition or provision at another time.

(c) Whole Agreement. This Agreement contains all the legally binding understandings and agreements between Executive and the Company pertaining to the subject matter of this Agreement and supersedes all such agreements, whether oral or in writing, previously entered into between the parties.

(d) Withholding Taxes. All payments made under this Agreement shall be subject to reduction to reflect taxes required to be withheld by law.

(e) Choice of Law. The validity, interpretation, construction, and performance of this Agreement shall be governed by the laws of the State of California without regard to the conflicts of laws principles thereof.

(f) Severability. The invalidity or unenforceability of any provision or provisions of this Agreement shall not affect the validity or enforceability of any other provision hereof, which shall remain in full force and effect.

(g) No Assignment. The rights of Executive to payments or benefits under this Agreement shall not be made subject to option or assignment, either by voluntary or involuntary assignment or by operation of law, including (without limitation) bankruptcy, garnishment, attachment or other creditor's process, and any action in violation of this Subsection (h) shall be void.

(h) Nondisparagement; Confidentiality. On the Effective Date and thereafter, Executive agrees that he will not disparage the Company or its directors, officers, employees, affiliates, subsidiaries, predecessors, successors or assigns in any written or oral communications to any third party. Executive further agrees that he will not direct anyone to make any disparaging oral or written remarks to any third parties. During Executive's employment and following Executive's termination of employment for any reason, Executive agrees to not use or disclose the confidential information or trade secrets of the Company.

(i) Nonsolicitation. During the Executive's employment with Company and for twelve months after Executive's termination of employment and payment of the Severance Payment hereunder, the Executive shall not, directly or indirectly, either as an individual or as an employee, agent, consultant, advisor, independent contractor, general partner, officer, director, stockholder, investor, lender, or in any other capacity whatsoever, of any person, firm, corporation, or partnership, (i) induce or attempt to induce, or hire, any person who at the time of such inducement or hire is an employee of the Company (or who was, within six months prior to such inducement or hire, an employee) to perform work or service for any other person or entity other than the Company or (ii) through the use of confidential information or trade secrets, solicit customers, suppliers, or clients of the Company to reduce or discontinue their business with the Company or to engage in business with any competing entity.

(j) Unfunded and Unsecured. The obligations of the Company under this Agreement shall be unfunded and unsecured. With respect to any payments to which the Executive has a fixed and vested interest but that have not yet been made by the Company, nothing contained herein shall give the Executive any rights that are greater than those of a general unsecured creditor of the Company.

(k) Exhibit B. Exhibit B hereto regarding Code Section 409A is incorporated herein by this reference.

IN WITNESS WHEREOF, each of the parties has executed this Agreement, in the case of the Company by its duly authorized officer, as of the day and year first above written.

EXHIBIT A

Form of Release of Claims and Covenant Not To Sue

In consideration of the payments and other benefits that Molina Healthcare, Inc., a Delaware corporation (the "Company"), is providing to Jeff Barlow ("Executive") under the Change in Control Agreement entered into by and between Executive and the Company, dated September 18, 2012, the Executive, on his own behalf and on behalf of Employee's representatives, agents, heirs and assigns, waives, releases, discharges and promises never to assert any and all claims, demands, actions, costs, rights, liabilities, damages or obligations of every kind and nature, whether known or unknown, suspected or unsuspected that Executive ever had, now have or might have as of the date of Executive's termination of employment with the Company against the Company or its predecessors, parent, affiliates, subsidiaries, stockholders, owners, directors, officers, employees, agents, attorneys, insurers, successors, or assigns (including all such persons or entities that have a current and/or former relationship with the Company) for any claims arising from or related to Executive's employment with the Company, its parent or any of its affiliates and subsidiaries and the termination of that employment.

These released claims also specifically include, but are not limited to, any claims arising under any federal, state and local statutory or common law, such as (as amended and as applicable) Title VII of the Civil Rights Act, the Age Discrimination in Employment Act, the Americans With Disabilities Act, the Employee Retirement Income Security Act, the Family Medical Leave Act, the Equal Pay Act, the Fair Labor Standards Act, the Industrial Welfare Commission's Orders, the California Fair Employment and Housing Act, the California Constitution, the California Government Code, the California Labor Code and any other federal, state or local constitution, law, regulation or ordinance governing the terms and conditions of employment or the termination of employment, and the law of contract and tort and any claim for attorneys' fees.

Furthermore, the Executive acknowledges that this waiver and release is knowing and voluntary and that the consideration given for this waiver and release is in addition to anything of value to which Executive was already entitled. Executive acknowledges that there may exist facts or claims in addition to or different from those which are now known or believed by Executive to exist. Nonetheless, this Agreement extends to all claims of every nature and kind whatsoever, whether known or unknown, suspected or unsuspected, past or present. Executive also expressly waives the provisions of California Civil Code section 1542, which provides: "A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him/her must have materially affected his settlement with the debtor." With respect to the claims released in the preceding sentences, the Executive will not initiate or maintain any legal action or proceeding of any kind against the Company or its predecessors, parent, affiliates, subsidiaries, stockholders, owners, directors, officers, employees, agents, successors, or assigns (including all such persons or entities that have a current or former relationship with the Company), for the purpose of obtaining any personal relief, nor assist or participate in any such proceedings, including any proceedings brought by any third parties (except as otherwise required or permitted by law). The Executive further acknowledges that he has been advised by this writing that:

- he should consult with an attorney prior to executing this release;
- he has at least twenty-one (21) days within which to consider this release;
- he has up to seven (7) days following the execution of this release by the parties to revoke the release; and
- this release shall not be effective until such seven (7) day revocation period has expired.

Executive agrees that the release set forth above shall be and remain in effect in all respects as a complete general release as to the matters released.

EXECUTIVE

_____

Jeff Barlow

Date:

Exhibit B

SECTION 409A PROVISIONS

1. EXEMPTION FROM AND COMPLIANCE WITH SECTION 409A OF THE CODE

a. ADMINISTRATION OF AGREEMENT. Certain payments and benefits payable under the Agreement are intended to be exempt from, or comply with, the requirements of Section 409A of the Code. The Agreement shall be interpreted in accordance with the applicable exemptions from Section 409A of the Code and the Treasury Regulations thereunder. To the extent the payments and benefits under the Agreement are subject to Section 409A of the Code, the Agreement shall be interpreted, construed and administered in a manner that satisfies the requirements of Sections 409A(a)(2), (3) and (4) of the Code and the Treasury Regulations and interpretive guidance issued thereunder. If the Company and Executive determine that any compensation, benefits or other payments that are payable under the Agreement and intended to comply with Sections 409A(a)(2), (3) and (4) of the Code do not comply with Section 409A of the Code, the Treasury Regulations and interpretive guidance issued thereunder, the Company and Executive agree to amend the Agreement, or take such other actions as the Company and Executive deem reasonably necessary or appropriate, to comply with the requirements of Section 409A of the Code, the Treasury Regulations and interpretive guidance issued thereunder. In the case of any compensation, benefits or other payments that are payable under the Agreement and intended to comply with Sections 409A (a)(2), (3) and (4) of the Code, if any provision of the Agreement would cause such compensation, benefits or other payments to fail to so comply, such provision shall not be effective and shall be null and void with respect to such compensation, benefits or other payments, and such provision shall otherwise remain in full force and effect.

b. DELAYED DISTRIBUTION UNDER SECTION 409A OF THE CODE. If Executive is a Specified Employee on the date of Executive's Separation from Service, any payments or benefits under the Agreement that are subject to Section 409A of the Code shall be delayed in order to comply with Section 409A(a)(2)(B)(i) of the Code, and such payments or benefits shall be paid or distributed to Executive within the ten (10) day period following the earlier of (x) the expiration of the six (6) month period commencing on the date of Executive's Separation from Service, or (y) the date of Executive's death.

2. DEFINITIONS

For purposes of this Agreement, the following capitalized terms have the meanings set forth below:

a. The "Exemption Limit" shall mean the exemption limit set forth in Treasury Regulation Section 1.409A-1(b)(9)(iii)(A) and shall equal two times the lesser of:

(i) the amount of Executive's annualized compensation based upon the Executive's annual rate of pay for the calendar year immediately preceding the calendar year in which Executive's Separation from Service occurs (adjusted for any increase during the calendar year in which such Separation from Service occurs that would be expected to continue indefinitely had Executive remained employed with the Company), or

(ii) the maximum amount that may be taken into account under a qualified plan pursuant to Section 401(a)(17) of the Code for the calendar year in which Executive's Separation from Service occurs (the Section 401(a)(17) annual compensation limit for 2012 is $250,000).

b. "Separation from Service", with respect to Executive (or another Service Provider), means Executive's (or such Service Provider's) "separation from service," as defined in Treasury Regulation Section 1.409A-1(h), with respect to the Service Recipient.

c. "Service Provider" means Executive or any other "service provider," as defined in Treasury Regulation Section 1.409A-1(f).

d. "Service Recipient," with respect to Executive, means Molina Healthcare, Inc. or the subsidiary of Molina Healthcare, Inc. employing the Executive, whichever is applicable, and all persons considered part of the "service recipient," as defined in Treasury Regulation Section 1.409A-1(g), as determined from time to time. As provided in Treasury Regulation Section 1.409A-1(g), the "Service Recipient" shall mean the person for whom the services are performed and with respect to whom the legally binding right to compensation arises, and all persons with whom such person would be considered a single employer under Section 414(b) or 414(c) of the Code.

e. "Specified Employee" means a Service Provider who, as of the date of the Service Provider's Separation from Service is a "Key Employee" of the Service Recipient any stock of which is publicly traded on an established securities market or otherwise. For purposes of this definition, a Service Provider is a "Key Employee" if the Service Provider meets the requirements of Section 416(i)(1)(A)(i), (ii) or (iii) of the Code (applied in accordance with the Treasury Regulations thereunder and disregarding Section 416(i)(5) of the Code) at any time during the testing year. If a Service Provider is a "Key Employee" (as defined above) as of a Specified Employee Identification Date, the Service Provider shall be treated as "Key Employee" for the entire twelve (12) month period beginning on the Specified Employee Effective Date. The "Specified Employees" shall be determined in accordance with Section 409A(a)(2)(B)(i) of the Code and Treasury Regulation Section 1.409A-1(i).

f. "Specified Employee Effective Date" means the first day of the fourth month following the Specified Employee Identification Date. The Specified Employee Effective Date may be changed by Molina Healthcare, Inc., in its discretion, in accordance with Treasury Regulation Section 1.409A-1(i)(4).

g. "Specified Employee Identification Date", for purposes of Treasury Regulation Section 1.409A-1(i)(3), shall mean December 31. The "Specified Employee Identification Date" shall apply to all "nonqualified deferred compensation plans" (as defined in Treasury Regulation Section 1.409A-1(a)) of the Service Recipient and all affected Service Providers. The "Specified Employee Identification Date" may be changed by Molina Healthcare, Inc., in its discretion, in accordance with Treasury Regulation Section 1.409A-1(i)(3).

OFFICE BUILDING LEASE

Full Service Gross –Single Tenant Building(s)

LANDLORD: 6th& PINE DEVELOPMENT, LLC,
a California limited liability company

TENANT: MOLINA HEALTHCARE, INC.,
a Delaware corporation

DATE: February 28, 2013

FUNDAMENTAL LEASE PROVISIONS

The following fundamental lease provisions are incorporated into the Lease attached hereto and said provisions shall have the following meanings throughout the Lease.

(a) Landlord: 6th & Pine Development, LLC,
a California limited liability company.

(b) Tenant: Molina Healthcare, Inc.,
a Delaware corporation.

(c) Site and Project: That certain real property having the primary address of 604 Pine Avenue, Long Beach, California, as more particularly described on Exhibit "A-1" attached hereto (the "**Site**"). A site plan of the Buildings, the On-Site Parking and related common areas and amenities (collectively, the "**Project**") is attached hereto as Exhibit "A-2."

(d) Existing Building: The office building located on the Site as of the date hereof and commonly known as the Press-Telegram Building, to be refurbished by Landlord pursuant to the terms of the Work Letter Agreement attached hereto as Exhibit "B" (the "**Work Letter**").

(e) New Building: The office building to be constructed by Landlord on the Site and in the general location of the office building commonly known as the Meeker-Baker Building, pursuant to the terms of the Work Letter; the Existing Building (as refurbished) and the New Building shall sometimes be collectively referred to as the "Buildings" and each, as a "Building."

(f) Premises: The entire Rentable Area of each Building. In addition to the Premises in each Building, Tenant has the exclusive right to use the On-Site Parking Spaces as provided in clause (u) below and Article 30.

(g) Rentable Area of Existing Building: Subject to Section 1.2, approximately 89,702 rentable square feet (" **RSF**"), consisting of (i) approximately 70,110 RSF of office space , and (ii) approximately 19,592 RSF of subterranean storage space (the "**Storage Space**").

(h) Rentable Area of New Building: Subject to Section 1.2 of the Lease, approximately 120,000 RSF of office space.

(i) Rentable Area of Premises: The total Rentable Area of the Existing Building and the New Building.

(j) Scheduled Commencement Date(s): (i) Existing Building: June 1, 2013.

(ii) New Building: November 1, 2014.

(k) Term: (i) Existing Building: Approximately eleven (11) years, six (6) months from the Commencement Date of the Existing Building and ending on the Expiration Date, unless extended pursuant to Exhibit "J" attached hereto or earlier terminated as provided in the Lease.

(ii) New Building: Approximately ten (10) years, one (1) month from the Commencement Date of the New Building and ending on the Expiration Date, unless extended pursuant to Exhibit "J" attached hereto or earlier terminated as provided in the Lease.

(l) Commencement Date(s): See Section 2.3.

(m) Expiration Date: December 31, 2024, unless extended pursuant to Exhibit "J" attached hereto or earlier terminated as provided in the Lease.

(n) Monthly Base Rent: (i) Existing Building. (A) For the period from the Commencement Date of the Existing Building through the date immediately preceding the first (1st) anniversary of the Commencement Date of the Existing Building, $2.70 per RSF for the Existing Building (excluding the Storage Space), and as increased by three point seven five percent (3.75%) per year on the first (1st) and each subsequent anniversary of the Commencement Date of the Existing Building (each such anniversary of the Commencement Date of the Existing Building being referred to herein as an "**Adjustment Date**") thereafter through the end of the stated Term (subject to Exhibit "J" for the Extension Periods), and (B) for the period from the Commencement Date through the date immediately preceding the first Adjustment Date, $1.40 per RSF of the Storage Space, and as increased by three point seven five percent (3.75%) per year on the first (1st) and each subsequent Adjustment Date

thereafter through the end of the stated Term (subject to Exhibit "J" for the Extension Periods).

(ii) New Building. From and after the Commencement Date of the New Building through the end of the stated Term (subject to Exhibit "J" for the Extension Periods), the same per RSF rate as is in effect from time to time with respect to the Existing Building (other than the Storage Space), including any cumulative annual escalations therein.

(o) Security Deposit: None.

(p) Construction of Improvements: Landlord shall construct the Project, including the Tenant Improvements in the Existing Building and the New Building in accordance with the Work Letter.

(q) Use: General business, executive, professional, corporate, and administrative office use only, and any other use only. Notwithstanding the foregoing, Landlord agrees that Tenant may use the Premises, in connection with its general business activities, for meeting, training and conference purposes, for the preparation, service and providing of food and beverages for the Tenant Parties (as defined below), for health club and childcare facilities for the Tenant Parties and others (as long as such use is primarily to provide a service or amenity to Tenant's employees, staff and invitees), on-site sale of logo and amenity type merchandise to employees, display, testing and demonstration events, in each case subject to the restrictions set forth in Article 5 and Applicable Laws.

(r) Tenant's Address for Notices: Molina Healthcare, Inc.
200 Oceangate, Suite 100
Long Beach, CA 90802
Attention: General Counsel

With a copies to:

Molina Healthcare, Inc.
200 Oceangate, Suite 100
Long Beach, CA 90802
Attention: Mr. Salvador Gutierrez, AVP, Facilities

and

Molina Healthcare, Inc..
200 Oceangate, Suite 100
Long Beach, CA 90802
Attention: Chairperson of Corporate Governance and Nominating Committee of Board of Directors

(s) Landlord's Address for Notices: 6th& Pine Development, LLC
741 Atlantic Avenue
Long Beach, CA 90813
Attention: 604 Pine Landlord

With a copy to:
6th& Pine Development, LLC
741 Atlantic Avenue
Long Beach, CA 90813
Attention: Property Manager

(t) Landlord's Broker: Cushman & Wakefield of California, Inc.

(u) Parking: As further described in Article 30, a total of up to seven hundred and thirteen (713) parking spaces, to be comprised of (a) (i) for the period commencing on the Commencement Date for the Existing Building and ending on the date immediately preceding the Commencement Date for the New Building, sixty (60) On-Site Parking Spaces (as defined in Section 30.2 below), and (ii) for the period commencing on the Commencement Date for the New Building and continuing through the Expiration Date, two hundred thirteen (213) On-Site Parking Spaces, and (b) for the period commencing on the Commencement Date for the Existing Building and continuing through the Expiration Date, up to five hundred (500) Off-Site Parking Spaces (as defined in Section 30.3 below), in each case as more particularly described in, and to be made available to Tenant in accordance with the terms

of, Article 30 hereof. In the event of a discrepancy between this Section “u” and Article 30, the terms of Article 30 shall prevail.

(v) Renewal Rights: See Exhibit “J” attached hereto.

(w) Right of First Offer to Purchase: See Exhibit “I-1” attached hereto.

(x) Option to Purchase: See Exhibit “I-2” attached hereto.

(y) Base Year: Calendar Year 2015

(z) Tenant’s Share: 100%

LEASE AGREEMENT

This LEASE AGREEMENT (this "**Lease**"), dated as of February 27, 2013 (the "**Effective Date**"), is made and entered into by and between 6th& PINE DEVELOPMENT, LLC, a California limited liability company ("**Landlord**"), and MOLINA HEALTHCARE, INC., a Delaware corporation ("**Tenant**"), who agree generally as follows:

GENERAL CONDITIONS

Landlord and Tenant agree that the following are general conditions which govern all of the rights and obligations of Landlord and Tenant and supersede, to the extent appropriate, any contrary provision in this Lease.

A. Consent/Duty to Act Reasonably. Unless the applicable provision of this Lease expressly references "sole" or "absolute" with respect to a consent right or other exercise of discretion (in which case such standard shall apply), (i) any time the consent of Landlord or Tenant is required, such consent shall not be unreasonably withheld, conditioned or delayed, and (ii) whenever this Lease grants Landlord or Tenant the right to take action, exercise discretion, or make allocations or other determinations, Landlord and Tenant shall act reasonably and in good faith and take no action which might result in the frustration of the reasonable expectations of a sophisticated tenant or landlord concerning the benefits to be enjoyed under this Lease.

B. Quality of Construction; Phasing of Construction; and Landlord Warranties.

(a) Quality of Construction. Landlord hereby represents and warrants to Tenant and covenants that the Project, including the Tenant Improvements to be constructed in the Existing Building and New Building, will be constructed in accordance with the terms and conditions of the Work Letter and industry custom and practice for a "first-class" office project (taking into account that the Project involves (i) with respect to Phase I (as defined in the Work Letter) a material restoration and renovation of a historic building and (ii) with respect to Phase II (as defined in the Work Letter), material reconstruction of an existing building, whereby the historic façade will be retained and incorporated into the New Building), in each case free of all asbestos containing materials (" **ACM**") or other Hazardous Materials (as defined in Section 38.12 below) and in full compliance with all Applicable Laws (as defined below), including, but not limited to, the Americans with Disabilities Act of 1990, 42 U.S.C. 12101 et seq. (" **ADA**") and all Environmental Laws (as defined in Section 38.12 below) existing at the later of the time of construction or the execution of this Lease, which are applicable to such work in order to make the Project suitable for business offices. Landlord will be fully responsible for making all alterations and repairs to the Premises and the Project at its cost, and not as an Operating Expense, resulting from or necessitated by the failure by Landlord and/or Landlord's contractor to comply with such Applicable Laws existing at the later of the time of construction or the execution of this Lease, or from Landlord's and/or Landlord's contractor's utilization of any Hazardous Materials in violation of any Environmental Laws existing at the later of the time of construction or the execution of this Lease or which could pose a health risk to occupants of the Project. Landlord's obligation to perform such work in accordance with Applicable Laws existing at the later of the time of construction or the execution of this Lease shall be deemed to continue with respect to such Applicable Laws and any obligation

created by such Applicable Laws if the obligation was generally known as of the later of the time of construction or the execution of this Lease (and Landlord's obligation shall exist and continue even though the time for performance under such Applicable Laws was contingent on (A) the passage of time, (B) the expenditure of money, (C) the performance of other work which would trigger such compliance, or (D) the expiration or termination of a variance or a grandfathered/grandmothered right). Accordingly, with respect to any costs that the Tenant incurs in connection with Alterations or in the performance of its maintenance and repair obligations under this Lease, which Tenant would not have incurred if the work performed by Landlord with respect to the Project was constructed in full compliance with the Applicable Laws in existence the later of the time of construction or the execution of this Lease, then Landlord shall be solely responsible for, and not as an Operating Expense, or shall otherwise reimburse Tenant for such costs or increases costs, as applicable, and Tenant shall not be responsible for all or any portion thereof. As used in this Lease, the term "**Applicable Laws**" shall mean all governmental regulations, ordinances, statutes or other laws of all governmental authorities with jurisdiction.

(b) Phasing of Construction. Pursuant to the Work Letter, the Project is divided into two Phases. Phase I consists of Landlord's Construction Work (as defined in the Work Letter) relating to the Existing Building and such other portions of the Project, including sixty (60) On-Site Parking Spaces and related common areas as necessary for Tenant's use and occupancy of the Existing Building, and Phase II consists of the balance of the Project, including the New Building and the remaining one hundred fifty-three (153) On-Site Parking Spaces and related common areas, all as more particularly described and provided for in the Work Letter

(c) Landlord Warranties.

(i) In addition to Landlord's other obligations set forth in this Lease, including, without limitation, the terms and conditions of subjection (a) above, General Condition N and Article 9 of this Lease, notwithstanding anything to the contrary set forth in this Lease or the Work Letter, for a period of one (1) year after the Substantial Completion of each of Phase of the Project (including the Tenant Improvements therein), Landlord shall, at Landlord's sole cost and expense, and not as an Operating Expense, promptly repair or replace, or cause to be repaired or replaced, any portion of such Phase (including the Tenant Improvements therein) which shall be materially defective or shall fail to comply with the Approved Base Building Plans (as defined in the Work Letter) and the Approved TI Plans (as defined in the Work Letter) for such Phase. Such repair or replacement shall be commenced as soon as reasonably possible after Landlord's receipt of written notice from Tenant of the need for such work, but only if such notice is given within such one (1) year period, and shall be diligently pursued to completion. For the purposes of this subsection:

(A) Landlord may satisfy its obligation pursuant to this subsection by causing Landlord's general contractor or any subcontractor, equipment manufacturer or material supplier who has provided a warranty, guaranty or quality instruction (collectively, the "**Construction Warranties**") to perform such repair or replacement.

(B) The provisions of this subsection shall not apply to any damage to any Phase of the Project (including the Tenant Improvements therein) caused by

Tenant or any of Tenant's employees, agents, contractors, licensees, directors, officers, partners, trustees, visitors or invitees (excluding, however, for purposes of the foregoing, any principal of the Landlord) (each, a " **Tenant Party**," and collectively, the "**Tenant Parties**") or any vandal or any casualty (fire, wind, rain, lightning, etc.). Landlord's obligations under this subsection shall be limited to defects in the original construction of and failures of such Phase of the Project to comply with Approved Base Building Plans (as defined in the Work Letter) and the Approved TI Plans (as defined in the Work Letter) for such Phase.

(C) During any period of repair or replacement by Landlord pursuant to this subsection, Base Rent and Additional Rent shall be abated to the extent, if at all, that Tenant's operations in the applicable portion of Premises are substantially interfered with, including totally if applicable, in accordance with General Condition F below. Subject to the next sentence, such abatement shall be Tenant's sole remedy in the event of a repair or replacement by Landlord. Notwithstanding the provisions of the immediately preceding sentence, to the extent that Landlord is able to recover the same from any contractor, insurer or other warranting party, Tenant shall be entitled to any damages incurred by Tenant during any such period of repair or replacement.

(ii) Upon the expiration of the one (1) year period specified in this subsection with respect to each Phase of the Project, Landlord shall assign and deliver to Tenant and cause its general contractor to assign and deliver to Tenant all Construction Warranties with respect to such Phase relating to any portion of the Premises that Tenant is responsible during the Term of this Lease to maintain and repair pursuant to Article 7. Such assignment(s) shall be on a form reasonably acceptable to Tenant. Landlord shall ensure that Tenant is listed as third party beneficiary in all construction contract(s) and subcontract(s) with respect to all such Construction Warranties and that that all such Construction Warranties are fully assignable to Tenant without the consent or approval of such general contractor, subcontractor, equipment manufacturer or material supplier.

C. Covenants and Agreements. The failure of Landlord or Tenant to insist in any instance on the strict keeping, observance or performance of any covenant or agreement contained in this Lease, or the exercise of any election contained in this Lease, shall not be construed as a waiver or relinquishment for the future of such covenant or agreement, but the same shall continue and remain in full force and effect.

D. Non-Disturbance, Attornment and Subordination Agreement. Landlord agrees that, on or before the date that is thirty (30) days following the Effective Date, it will provide, without cost to or charge of, Tenant with a non-disturbance, subordination and attornment agreement ("non-disturbance agreement") in favor of Tenant from East West Bank ("**Existing Mortgagee**") in substantially the form attached hereto as Exhibit "H" (the " **Approved SNDA**"), in consideration of Tenant's execution and delivery of, and as a condition precedent to the effectiveness of, this Lease. Said non-disturbance agreement may be recorded at Tenant's election and expense. In the event that Landlord is unable to deliver an Approved SNDA from Existing Mortgagee on or before such date, Tenant may elect to terminate this Lease by delivering written notice thereof to Landlord,

and this Lease will terminate and become null and void. Upon any such termination, neither Landlord nor Tenant shall have any further rights or obligations under this Lease, except for those indemnity provisions and other provisions, which pursuant to General Condition Q below, survive such termination.

Landlord further agrees to provide Tenant with a non-disturbance agreement in favor of Tenant from any other ground lessors, mortgage holders, lien holders or mezzanine debt lien holders (each, a "**Superior Mortgagee**") of Landlord who later come(s) into existence at any time prior to the expiration of the Term, as it may be extended, in a form acceptable to Tenant, in consideration of, and as a condition precedent to, Tenant's agreement to be bound by Section 18.1 below. Said non-disturbance agreement shall be deemed acceptable to Tenant if it is in recordable form and is substantially consistent with the terms of the Approved SNDA, or otherwise shall be acceptable to Tenant in its sole discretion, and may be recorded at Tenant's election and expense.

E. Notice. All references in this Lease to "notice" shall mean written notice given in compliance with Article 32 of this Lease.

F. Abatement of Rent When Tenant Is Prevented From Using Premises. In the event that Tenant is prevented from using, and does not use, the Premises or any portion thereof, for five (5) consecutive business days or ten (10) business days in any twelve (12) month period (the "**Eligibility Period**") as a result of (i) any damage or destruction to the Premises, the On-Site Parking Spaces, the Off-Site Parking Spaces and/or the Project, (ii) any repair, maintenance or alteration performed by Landlord after the applicable Commencement Date, which substantially interferes with Tenant's use of the Premises, the On-Site Parking Spaces, the Off-Site Parking Spaces and/or the Project, (iii) any failure by Landlord to provide Tenant with access to the Premises, the On-Site Parking Spaces, the Off-Site Parking Spaces and/or the Project, (iv) because of breach of any of Landlord's warranties set forth in General Condition B, or (v) the exercise by Tenant of its rights to complete construction of the Project as set forth in General Condition I, then Tenant's Rent shall be abated or reduced, as the case may be, after expiration of the Eligibility Period for such time that Tenant continues to be so prevented from using, and does not use, the Premises or a portion thereof, in the proportion that the RSF of the portion of the Premises that Tenant is prevented from using, and does not use, bears to the total RSF of the Premises. However, in the event that Tenant is prevented from conducting, and does not conduct, its business in any portion of the Premises for a period of time in excess of the Eligibility Period, and the remaining portion of the Premises is not sufficient to allow Tenant to effectively conduct its business therein, and if Tenant does not conduct its business from such remaining portion, then for such time after expiration of the Eligibility Period during which Tenant is so prevented from effectively conducting its business therein, the Rent for the entire Premises shall be abated; provided, however, if Tenant reoccupies and conducts its business from any portion of the Premises during such period, the Rent allocable to such reoccupied portion, based on the proportion that the RSF of such reoccupied portion of the Premises bears to the total RSF of the Premises, shall be payable by Tenant from the date such business operations commence. If Tenant's right to abatement occurs during a free rent period (for these purposes, free rent shall be deemed to include half rent, etc.) which arises after the Commencement Date, Tenant's free rent period shall be extended for the number of days that the abatement period overlapped the free rent period ("**Overlap Period**"). Landlord shall have the right to extend the Expiration Date for a period

of time equal to the Overlap Period if Landlord sends a notice to Tenant of such election within ten (10) days following the end of the extended free rent period. If Tenant's right to abatement occurs because of an eminent domain taking and/or because of damage or destruction to the Premises and/or Tenant's property, Tenant's abatement period shall continue until Tenant has been given sufficient time, and sufficient access to the Premises to rebuild such portion it is required to rebuild, to install its property, furniture, fixtures, and equipment to the extent the same shall have been removed and/or damaged as a result of such damage or destruction and/or eminent domain taking and to move in over a weekend. To the extent Tenant has prepaid rent (as it does each month since Rent is due on the first day of each month) and Tenant is subsequently entitled to an abatement, such prepaid, and subsequently abated, Rent should be refunded to, and paid by Landlord to, Tenant within thirty (30) days after the end of the appropriate month.

G. Arbitration. With the exception of the arbitration provisions which shall specifically apply to the determination of (i) the Fair Market Rental Rate, as set forth in Exhibit "J" attached hereto [Options to Extend], and (ii) the Fair Market Value, as set forth in Exhibit "I-2" [Option to Purchase], the provisions of this General Condition G contain the sole and exclusive method, means and procedure to resolve any and all disputes or disagreements, including whether any particular matter constitutes, or with the passage of time would constitute, an event of default ("**Event of Default**"). The parties hereby irrevocably waive any and all rights to the contrary and shall at all times conduct themselves in strict, full, complete and timely accordance with the provisions of this General Condition G. Any and all attempts to circumvent the provisions of this General Condition G shall be absolutely null and void and of no force or effect whatsoever. As to any matter submitted to arbitration to determine whether it would, with the passage of time, constitute an Event of Default, such passage of time shall not commence to run until any such affirmative determination, so long as it is simultaneously determined that the challenge of such matter as a potential Event of Default was made in good faith, except with respect to the payment of money. With respect to the payment of money, such passage of time shall not commence to run only if the party which is obligated to make the payment does in fact make the payment to the other party. Such payment can be made "under protest," which shall occur when such payment is accompanied by a good-faith notice stating why the party has elected to make a payment under protest. Such protest will be deemed waived unless the subject matter identified in the protest is submitted to arbitration as set forth in the following:

(a) Except as otherwise provided above, all disputes and disagreements shall be determined by final and binding arbitration without appeal or review, pursuant to the laws of the State of California including the limitations period applicable, before a single arbitrator (the "**Arbitrator**") at a location determined by the Arbitrator in Los Angeles County, California and administered by JAMS (or its successor) ("**JAMS**"). If JAMS shall not then exist, or refuses to accept submission of such dispute, such arbitration shall be conducted before such other organization as to which the parties to the dispute may agree. If the parties to the dispute are unable to so agree within fifteen (15) days after the dispute arises, the organization shall be selected by the presiding judge of the Los Angeles County Superior Court or his or her designee upon application by any party to the dispute. Judgment upon any award rendered by the Arbitrator may be entered by any state or federal court having jurisdiction thereof. Any Arbitrator appointed or selected pursuant to

this General Condition G shall be a retired judge of the Superior Court or Court of Appeal of the State of California or a retired Federal District Court judge.

(b) Any arbitration pursuant to this General Condition G shall be initiated by the parties, or either of them, within ten (10) days after either party sends written notice (the " **Arbitration Notice**") of a demand to arbitrate to the other party and to JAMS. The Arbitration Notice shall contain a description of the subject matter of the arbitration, the dispute with respect thereto, the amount involved, if any, and the remedy or determination sought. Any arbitration pursuant to this General Condition G shall be conducted in accordance with the Comprehensive Arbitration Rules and Procedures of JAMS then in effect (the " **Rules**"), regardless of the amount in dispute, except that, whether or not such Rules so provide:

(i) The Arbitrator shall schedule a pre-hearing conference to resolve procedural matters, arrange for the exchange of information, obtain stipulations and attempt to narrow the issues to be arbitrated. The Arbitrator shall have the discretion to order a pre-hearing exchange of information by the parties, including, without limitation, production of requested documents, exchanges of summaries of testimony of proposed witnesses and examination by deposition of parties and third-party witnesses.

(ii) There shall be no mediation or settlement conferences unless all parties agree thereto in writing.

(iii) Discovery shall be limited to that permitted by the Rules, and the Arbitrator shall have discretion to determine the scope thereof.

(iv) All motions shall be in letter form and hearings thereon shall be by conference telephone calls unless the Arbitrator orders otherwise.

(v) Hearings of motions shall require only twenty (20) days prior written notice.

(vi) All notices in connection with any arbitration may be served in any manner permitted by Article 32 of this Lease.

(vii) Fees and costs paid or payable to JAMS shall be included in "reasonable expenses" for purposes of Section 12.4(b). The arbitrator shall specifically have the power to award to the "prevailing party" such party's reasonable expenses incurred in such proceeding, except as otherwise provided in subsection (c) below. Reasonable expenses shall include any reasonable attorneys' fees. The prevailing party shall be the party whose proposal for the resolution of the dispute is the closer to that adopted by the Arbitrator.

(viii) The selection of the Arbitrator (who must be a retired judge) shall be in accordance with the then existing Rules. In the event that the parties are unable to agree upon an arbitrator within the period of time allowed for them to select an arbitrator, JAMS will provide a list of three available retired judges and each party may strike one. The remaining judge (or if

there are two, the one selected by the administrator of the Los Angeles County office of JAMS) will serve as the arbitrator.

(ix) In rendering a decision, the Arbitrator shall determine the rights and obligations of the parties according to the terms of this Lease and the substantive and procedural laws of the State of California. The Arbitrator's decision shall be based on the evidence introduced at the hearing, including any logical and reasonable inferences therefrom. The decision must be based upon, and accompanied by, a written statement of decision explaining the factual and legal basis for the decision as to each of the principal controverted issues.

(x) The Arbitrator may make any determination, and/or grant any relief that is just and equitable, other than an award of exemplary or punitive damages. The Arbitrator's decision shall be conclusive and binding, and it may thereafter be confirmed as a judgment by the Superior Court of the State of California, subject only to challenge on the grounds set forth in California Code of Civil Procedure Section 1286.2, subsections (a), (b), (c), (e) and (f). The validity and enforceability of the Arbitrator's decision is to be determined exclusively by the Courts of the State of California pursuant to the provisions of this Lease.

(c) As soon as practicable after selection of the Arbitrator, JAMS, working with the Arbitrator, shall determine a reasonable estimate of anticipated fees and costs of the arbitration and shall deliver a statement to each party setting forth that party's pro rata share of such fees and costs. Each party shall deposit its pro rata share of such fees and costs with JAMS within ten (10) days after receipt of such statement. If any party fails to make a required deposit hereunder, the other party may make such deposit on behalf of the defaulting party and the amount of such deposit, plus interest thereon at the Interest Rate from date of deposit to date of repayment, shall be awarded against the defaulting party by the Arbitrator in making any final arbitration award without regard to whether the defaulting party is the prevailing party in the arbitration pursuant to this General Condition G.

H. Access to Building and Parking. Tenant shall be granted access to the Buildings, the Premises, the On-Site Parking Spaces and the Project twenty-four (24) hours per day, seven (7) days per week, every day of the year. Tenant shall be granted access to the Off-Site Parking Spaces pursuant to the terms of Article 30 hereof.

I. Right to Repair and Complete Construction. Notwithstanding any provision set forth in this Lease to the contrary, (i) if Tenant provides written notice (or oral notice in the event of an emergency such as damage or destruction to or of any portion of the Buildings and/or anything that could cause material disruption to Tenant's business) to Landlord of an event or circumstance which requires the action of Landlord with respect to repair and/or maintenance, and Landlord fails to commence such action within a reasonable period of time, given the circumstances, or (ii) if Tenant has the right to provide a Termination Notice (as defined in Section 2.6 of this Lease) to Landlord as a result of Landlord's failure to complete construction of the Project as required by General Condition B and the Work Letter, in each case after the receipt of such notice, but in any event not later than seven (7) days after receipt of such notice, then Tenant may, but shall not be required to, proceed to take the required action or to complete construction of the Project upon delivery of an additional three (3) business days' notice to Landlord in the case of a repair and upon delivery of

an additional sixty (60) days' notice to Landlord in the case of an intention to complete construction of the Project, specifying that Tenant is taking such required action or intends to complete construction of the Project (provided, however, that in the case of any failure by Landlord to repair and/or maintain the Premises or the Buildings, neither of the notices shall be required in the event of an emergency which threatens life or where there is imminent danger to property or a possibility that a failure to take immediate action could cause a material disruption in Tenant's normal and customary business activities), and if such action was required under the terms of this Lease to be taken by Landlord or was taken by Tenant as a result of occurrence of a Termination Condition (as defined in Section 2.6 of the Lease), and was not taken by Landlord within such ten (10) day period (unless such notice was not required as provided above), then Tenant shall be entitled to prompt reimbursement by Landlord of Tenant's reasonable costs and expenses in taking such action plus interest thereon at the Interest Rate as defined in General Condition O below plus rent abatement to the extent Tenant would have otherwise been entitled to rent abatement under General Condition F. Landlord agrees that Tenant will have access to the Project (including the Building Systems (as defined in General Condition N below) and the Building Structure (as defined in General Condition N below)) to the extent necessary to perform the work contemplated by this provision. Further, Landlord agrees that it shall cooperate with Tenant in connection with Tenant's effort to complete construction of the Project, including providing Tenant's instructions or directions to any applicable contractors and/or assignment to Tenant of Landlord's rights in and to any applicable construction, engineering or design contracts in furtherance thereof. In the event Tenant takes such action, and such work will affect the Building Structure and/or the Building Systems, Tenant shall use only those contractors used or reasonably approved by Landlord for work on such Building Structure or Building Systems, unless such contractors are unwilling or unable to perform (and are able to immediately perform), or timely and competitively perform, such work, in which event Tenant may utilize the services of any other qualified contractor which normally and regularly performs similar work in Comparable Buildings (as defined in Exhibit "J").

J. Right to Terminate Upon Discovery of Hazardous Material/Conditions.

(a) Notwithstanding anything in this Lease, and except as expressly set forth below, in the event that Tenant is notified or becomes aware of the fact that as a result of:

(i) any discovery of Hazardous Materials in, on or around the Project not placed in, on or around the Project by Tenant or any Tenant Party, that may, considering the nature and amount of the substances involved, interfere with Tenant's use of all or a portion of the Premises or which may present a health risk to any occupants of the Premises); or

(ii) the discovery of any other Hazardous Material with respect to the Premises or the Project not caused by Tenant or any Tenant Party, which would make it dangerous or unsafe for Tenant or any Tenant Party to conduct their normal and customary business operations from the Premises or Project (each of the items set forth in provision (a)(i) or (ii) being referred to herein as a "**Trigger Event**"),

Tenant cannot, within six (6) months ("**Non-Use Period**") of the discovery by Tenant of the Trigger Event, be given reasonable use of, and access to, a safe and healthful Premises, then Tenant may

thereafter elect at any time to exercise an on-going right to terminate this Lease upon ten (10) days' written notice sent to Landlord at any time following the expiration of the Non-Use Period.

(b) In the event of any Trigger Event occurring during the last year of the Term or, if an applicable renewal option has been exercised, during the last year of any renewal Term, should the Non-Use Period continue for thirty (30) days, Tenant may elect to exercise an on-going right to terminate this Lease upon ten (10) days' written notice sent to Landlord at any time following the expiration of the Non-Use Period.

K. Interest on Past Due Obligations. Except with respect to the late payment of Rent (which shall be governed by the provisions of Section 3.2), whenever one party is obligated pursuant to this Lease to make a payment to the other party, if such payment is not paid when due, then the party who does not make such payment when due shall pay interest at the Interest Rate (as such term is defined in General Condition O) to the party on the unpaid amount from the date such amount was due until the date such amount is paid.

L. When Payment Is Due. Whenever in this Lease a payment is required to be made by one party to the other, but a specific date for payment is not set forth or a specific number of days within which payment is to be made is not set forth, or the words "immediately", "promptly" and/or "on demand", or the equivalent, are used to specify when such payment is due, then such payment shall be due thirty (30) days after the party which is entitled to such payment sends written notice to the other party demanding payment.

M. Landlord Bankruptcy Proceeding. In the event that the obligations of Landlord under this Lease are not performed during the pendency of a bankruptcy or insolvency proceeding involving the Landlord as the debtor, or following the rejection of this Lease in accordance with Section 365 of the United States Bankruptcy Code, then notwithstanding any provision of this Lease to the contrary, and in addition to any and all other remedies permitted by this Lease and/or by Applicable Laws Tenant shall have the right to set off against Rents next due and owing under this Lease (a) any and all damages caused by such non-performance of Landlord's obligations under this Lease by Landlord, debtor-in-possession, or the bankruptcy trustee, and (b) any and all damages caused by the non-performance of Landlord's obligations under this Lease following any rejection of this Lease in accordance with Section 365 of the United States Bankruptcy Code.

N. Building Structure and Building Systems. As used in this Lease, the term "**Building Structure**" shall mean the structural portions of the Building, including the foundation, floor/ceiling slabs, roof, curtain wall, exterior glass and mullions, columns, beams, shafts (including elevator shafts), stairs, parking areas (including the On-Site Parking Spaces), stairwells, escalators, elevator cabs, plazas, pavement, sidewalks, curbs, entrances, landscaping, art work, sculptures, washrooms, mechanical, electrical and telephone closets, and all public areas and other exterior portions of the Building and Project, and the term "**Building Systems**" shall mean the mechanical, electrical, life safety, fire detection, fire alarm, plumbing, sprinkler systems (connected to the core) and HVAC systems (including primary and secondary loops connected to the core) (" **Building Systems**). As further provided in Article 9, and subject to the right of Landlord to receive Additional Rent as provided for in Article 4, Landlord shall at all times during the Term maintain the Building Structure and Building Systems in first class condition and repair and shall operate the Project as a first class

office building. Notwithstanding anything in this Lease to the contrary, Tenant shall not be required to make any repair to, modification of, or addition to the Building Structure and/or the Building Systems and/or the Site except and to the extent required because of Tenant's use of all or a portion of the Premises for other than normal and customary business office operations.

O. Interest Rate. The "**Interest Rate**" is defined as the lesser of (i) the rate publicly announced from time to time, by the largest (as measured by deposits) state chartered bank operating in California, as its Prime Rate or its Reference Rate or other similar benchmark, plus two percent (2%), or (ii) the maximum rate permitted by law.

P. Other Temporary Uses. Notwithstanding anything to the contrary in this Lease, Landlord agrees that from time to time, Tenant may use the Premises and Project, at no cost, for filming and taping of entertainment productions, staff and customer parties and other temporary uses provided that Tenant agrees to indemnify Landlord for any damages pursuant to Section 12.2(a).

Q. Survival of Provisions Upon Termination of Lease. This Lease shall survive the expiration of the Term to the extent necessary that any term, covenant or condition of this Lease which requires the performance of obligations or forbearance of an act by either party hereto after the termination of this Lease. Such survival shall be to the extent reasonably necessary to fulfill the intent thereof, or if specified, to the extent of such specification, as same is reasonably necessary to perform the obligations and/or forbearance of an act set forth in such term, covenant or condition. Notwithstanding the foregoing, in the event a specific term, covenant or condition is expressly provided for in such a clear fashion as to indicate that such performance of an obligation or forbearance of an act is no longer required, then the specific shall govern over the General Provisions of this Lease.

R. Financing Contingency. Notwithstanding anything set forth in this Lease to the contrary, the effectiveness of this Lease is contingent upon Tenant's receipt of evidence reasonably acceptable to Tenant that Landlord has obtained a binding commitment, subject to customary qualifications for a transaction of this nature, either from Existing Mortgagee or another commercial lender reasonably acceptable to Tenant in an amount sufficient to complete the construction of the entire Project on or before the date that is no later than sixty (60) days after the Effective Date (the "**Financing Period**"). Landlord shall in good faith apply for and diligently pursue the closing of such financing, including, without limitation, the submittal of all information reasonably requested by Existing Mortgagee or another potential lender(s) reasonably acceptable to Tenant. In the event that Landlord is unable (despite such good faith efforts) to obtain such financing commitment on or before the end of the Financing Period, Tenant may elect to terminate this Lease by delivering thirty (30) days written notice thereof to Landlord during which notice period Landlord shall have the right to obtain the financing commitment in satisfaction of its obligations under this General Condition R, and this Lease will terminate and become null and void. Upon any such termination, neither Landlord nor Tenant shall have any further rights or obligations under this Lease, except for those indemnity provisions and other provisions, which pursuant to General Condition Q above, survive such termination.

S. Impound for Insurance Premiums and Tax Expenses. Landlord and Tenant acknowledge that Landlord is and may be required in the future to impound funds, on a monthly basis, sufficient to pay the annual Insurance Premiums and Tax Expenses (the "**Required Impound Payments**") due with respect to the Project (the "**Impound Obligations**") with Existing Mortgagee, or with another Superior Mortgagee. Landlord agrees that in the event that it must satisfy any Impound Obligations, it shall promptly pay the Required Impound Payments to either Existing Mortgagee or any other Superior Mortgagee, as the case may be, which shall be held by such lender and which shall be disbursed to pay the Insurance Premiums and Tax Expenses prior to delinquency. In the event that Landlord is not required by Existing Mortgagee or any other Superior Mortgagee during the Term of this Lease to satisfy the Impound Obligations with respect to the Required Impound Payments, Landlord agrees that it shall promptly notify Tenant in writing of such fact and open a segregated bank account with a national bank reasonably acceptable to Tenant (and in no event later than five (5) business days after the expiration or termination of the prior existing Impound Obligations) to receive from Landlord the Required Impound Payments. Such Required Impound Payments deposited in to such account shall only be used by Landlord to pay the Insurance Premiums and Tax Expenses prior to delinquency.

SPECIFIC TERMS AND CONDITIONS

Landlord and Tenant specifically agree as follows:

ARTICLE 1 - PREMISES

1.1 Lease of Premises. Landlord leases to Tenant, and Tenant leases from Landlord, the Premises described in provision (f) of the Fundamental Lease Provisions. Notwithstanding the foregoing, Landlord reserves the right to use up to 1,000 RSF located on the 5 th floor of the Existing Building, as shown on the Final Phase I Base Building and Site Plans (as defined in the Work Letter) as the management office for Project (the "**Management Office**"). Landlord's use of the Management Office shall not reduce the RSF of the Existing Building for purposes of determining the Rent due from Tenant hereunder, but otherwise shall be excluded from the "Premises" for all other purposes of this Lease.

1.2 Final Measurement of the Premises. Landlord and Tenant hereby acknowledge and agree that, with respect to each Building, the stated amount of RSF described in clauses (g) and (h) of the Fundamental Lease Provisions is not a representation or warranty of the exact number of RSF therein, but rather is only a reasonable approximation and that, in connection with the Substantial Completion of each Building, Landlord shall cause a third-party architect reasonably acceptable to Tenant to measure the applicable Building in accordance with the standards set forth in ANSI Z65.1 2010 for measuring floor area in office buildings, utilizing the Gross Building Area method for single occupant buildings on pages 10-11, as promulgated by the Building Owners and Managers Association (the "**BOMA Standard**"). In the event that the applicable Commencement Date occurs prior to the Substantial Completion of the applicable Building pursuant to Section 2.3(b) below, Base Rent shall be determined based on the RSF set forth in clause (g) or (h) of the Fundamental Lease Provisions, as applicable, and if the final measurement later produces a RSF number in excess of or lower than the RSF number set forth in clause (g) or (h) of the Fundamental Lease Provisions, as applicable, any payments due to Landlord from Tenant based upon the amount

of RSF contained in the applicable Building shall be proportionally, retroactively and prospectively reduced or increased, as appropriate, to reflect the actual RSF number, as properly measured under the BOMA Standard. If a dispute occurs regarding the final accuracy of such measurements, such dispute will be resolved pursuant to binding arbitration pursuant to General Condition G.

1.3 Right of First Offer to Purchase. Tenant's rights and obligations with respect to the Right of First Offer to Purchase are set forth in Exhibit "I-1" attached and incorporated into this Lease by this reference.

1.4 Option to Purchase. Tenant's rights and obligations with respect to its Option to Purchase are set forth in Exhibit "I-2" attached and incorporated into this Lease by this reference.

ARTICLE 2 - TERM

1.5 Effective Date. This Lease will become binding and effective on the Effective Date.

1.6 Term of Lease. The term of this Lease ("**Term**") shall be for the term set forth in provision (k) of the Fundamental Lease Provisions beginning on the Commencement Date, as such term is defined below, and, unless sooner terminated as hereinafter provided, ending on the Expiration Date specified in provision (m) of the Fundamental Lease Provisions or, when appropriate, at the end of the applicable Extension Period to the extent the rights to extend are exercised pursuant to Exhibit "J".

1.7 Delivery of Premises; Commencement Date(s).

(a) The Premises will be delivered and occupied by Tenant in two Phases. Phase I will include delivery of the Existing Building which will be delivered to Tenant when Landlord's Construction Work with respect to Phase I (including the Tenant Improvements therein) is Substantially Complete and the Existing Building is ready for occupancy. Phase II will include delivery of the New Building which be delivered to Tenant when Landlord's Construction Work with respect to Phase II (including the Tenant Improvements therein) is Substantially Complete and the New Building is ready for occupancy.

(b) The "**Commencement Date**" and Tenant's obligation to pay the Rent, as such term is defined below, shall commence with respect to each Building on the earlier of (i) the date Tenant commences business operations from such Building, and (ii) five (5) business days following the date which is after the earlier of the following (the " **Move-In Period**"):

(i) With respect to the Existing Building, the earlier of (A) the date Landlord delivers to Tenant a factually correct written notice stating that Landlord's Construction Work with respect to Phase I is Substantially Complete and confirming the amount of RSF in the Existing Building, as determined in accordance with the BOMA Standard pursuant to Section 1.2 above, and (B) the date Landlord delivers to Tenant a factually correct written notice stating the date that Landlord's Construction Work with respect to Phase I would have been Substantially Complete were it not for any Tenant Delays (as defined in the Work Letter); and

(ii) With respect to the New Building, the earlier of (A) the date Landlord delivers to Tenant a factually correct written notice stating that Landlord's Construction Work with respect to Phase II is Substantially Complete, and confirming the amount of RSF in the New Building, as determined in accordance with the BOMA Standard pursuant to Section 1.2 above, and (B) the date Landlord delivers to Tenant a factually correct written notice stating the date that Landlord's Construction Work with respect to Phase II would have been Substantially Complete were it not for any Tenant Delays.

Tenant understands that it is in Landlord's best economic interests to have Landlord's Construction Work with respect to each Phase Substantially Completed as soon as reasonably possible in order to have the Commencement Date for the applicable Building occur as early as possible, and Tenant understands that to the extent that Landlord's Construction Work with respect to such Phase is not Substantially Completed because of Tenant Delays, the Commencement Date for the applicable Building will nevertheless occur on the date Landlord's Construction Work for such Phase would have completed had Tenant Delays not occurred.

1.8 Early Entry Into Premises. Landlord shall permit Tenant to enter the Premises of each Building no later than thirty (30) days prior to the anticipated Commencement Date for the purpose of installing furniture, special flooring or carpeting, trade fixtures, telephones, computers, photocopy equipment and other business equipment (" **Early Entry Work**"). Tenant's Early Entry Work shall not cause the Landlord to incur any additional costs (i.e. accelerated schedule(s), out of sequence work, expedited material deliveries etc.) to accommodate Tenant's Early Entry Work. Such early entry shall not advance the Commencement Date, nor trigger the commencement of any Move-In Period, provided Tenant does not commence regular business operations from the Premises. In connection with such early entry, Landlord shall not be responsible for any loss caused by Tenant or those entering the Premises on behalf of Tenant to perform such Early Entry Work, including theft, damage or destruction to any work or material installed or stored by Tenant or any contractor or individual involved in the construction of the Tenant Improvements, or for any injury to Tenant or any Tenant Party or to any other person and provided further that Landlord shall have the right to post the appropriate notices of non-responsibility and to require Tenant to provide Landlord with evidence that Tenant has fulfilled its obligation to provide insurance pursuant to Article 12 hereof.

1.9 Notice of Commencement Date. Landlord or Tenant may send the other party notice of the occurrence of the Commencement Date with respect to each Building in the form of the attached Exhibit "C", which notice the receiving party shall acknowledge by executing a copy of the notice and returning it to the sending party. If the receiving party disputes the accuracy of the information contained in the notice, and the parties are unable to mutually agree as to the Commencement Date, either party may submit the dispute to arbitration pursuant to General Condition G.

1.10 Option to Terminate Because of Non-Commencement or Completion. Notwithstanding anything to the contrary set forth in this Lease, Tenant shall have the right, at Tenant's sole option, to elect to terminate this Lease by delivery to Landlord of a notice (the "**Termination Notice**") if (each, a "**Termination Condition**"):

(a) [Intentionally Deleted];

(b) Once Landlord commences physical construction of Landlord's Construction Work with respect to Phase I, Landlord fails to diligently prosecute the same to completion, subject to any Tenant Delays and/or Force Majeure Delays;

(c) Landlord has not delivered the Existing Building to Tenant with all of Landlord's Construction Work for Phase I Substantially Completed by July 1, 2013 (the "**Existing Building Outside Delivery Date**"), which Existing Building Outside Delivery Date will be extended one (1) day for each day Landlord is delayed in constructing Landlord's Construction Work for Phase I because of any Tenant Delays and/or Force Majeure Delays (as defined in the Work Letter), provided that in no event shall the Existing Building Outside Delivery Date be extended as a result of any Force Majeure Delays beyond December 31, 2013;

(d) Landlord fails to commence physical construction (not merely drawings or design work) of Landlord's Construction Work with respect to Phase II on or before October 1, 2013;

(e) Once Landlord commences physical construction of Landlord's Construction Work with respect to Phase II, Landlord fails to diligently prosecute the same to completion, subject to any Tenant Delays and/or Force Majeure Delays; or

(f) Landlord has not delivered the New Building to Tenant with all of Landlord's Construction Work for Phase II Substantially Completed by December 1, 2014 (the "**New Building Outside Delivery Date**"), which New Building Outside Delivery Date will be extended one (1) day for each day Landlord is delayed in constructing Landlord's Construction Work for Phase II because of any Tenant Delays and/or Force Majeure Delays, provided that in no event shall the New Building Outside Delivery Date be extended as a result of any Force Majeure Delays beyond June 30, 2015.

If Tenant is entitled to and delivers to Landlord a Termination Notice, this Lease shall be deemed terminated effective sixty (60) days after Tenant's delivery of such Termination Notice, unless within such sixty (60) day period (i) in the case of clauses (c), (d) or (f) above, Landlord shall have satisfied the applicable Termination Condition which was not satisfied by the applicable date provided for in such clause, or (ii) in the case of clauses (b) or (e), Landlord shall have recommenced to and thereafter continue to diligently prosecute Landlord's Construction Work to completion. Tenant's right to terminate pursuant to this Section 2.6 shall be Tenant's sole remedy in the event a Termination Condition is not satisfied.

1.11 Options to Extend Term. Tenant's rights and obligations with respect to extending the Term are set forth in Exhibit "J" attached hereto.

ARTICLE 3 - RENT

1.12 Payment of Rent. Without prior notice or demand, without set off or deduction whatsoever (except for Tenant's Rent abatement rights as provided in General Condition B, F and/

or I or as otherwise expressly provided in this Lease), Tenant agrees to pay Landlord, as rent (" **Base Rent**") for the Premises, Monthly Base Rent in the amount specified in or determined pursuant to provision (n) of the Fundamental Lease Provisions. Such Monthly Base Rent shall be paid monthly in advance beginning on the applicable Commencement Date on or before the first day of each calendar month thereafter during the entire Term. On the applicable Commencement Date, Tenant shall pay to Landlord the prorated Monthly Base Rent attributable to the month in which the applicable Commencement Date occurs if the applicable Commencement Date occurs on a date other than the first day of a calendar month.

1.13 Late Charge. Landlord and Tenant acknowledge that the late payment by Tenant of Rent or the late payment by Landlord of amounts owed to Tenant under this Lease will cause the party who was entitled to receive such payment (" **Payee**") to incur damages, including administrative costs, loss of use of the overdue funds and other costs, the exact amount of which would be impractical and extremely difficult to fix. Landlord and Tenant agree that if the Payee does not receive a payment within five (5) days following the delivery by Payee of notice to the other party (" **Payor**") that such payment is overdue, Payor shall pay to Payee a late charge equal to five percent (5%) of the delinquent amount, or the sum of One Hundred Dollars ($100.00), whichever is greater, as liquidated damages for the damages which Payee is likely to incur for the thirty (30) day period following the due date of such payment. Further, all portions of a payment not paid within thirty (30) days following its due date and all late charges associated therewith shall bear interest at the Interest Rate (as such term is defined in General Condition O) beginning on the thirty-first (31st) day following the due date of such payment and continuing until such payment, late charges and interest are paid in full to Payee. Acceptance of the late charge by Payee shall not cure or waive a default, nor prevent Payee from exercising, before or after such acceptance, any of the rights and remedies for a default provided by this Lease or at law. Payment of the late charge is not an alternative means of performance of Payor's obligation at the times specified in this Lease. Payor will be liable for the late charge regardless of whether Payor's failure to pay when due constitutes a default under this Lease.

ARTICLE 4 - ADDITIONAL RENT

1.14 General Terms. Commencing with the first (1st) day after the Base Year, in addition to paying the Base Rent specified in Article 3 of this Lease, Tenant shall pay Tenant's Share (as defined below) of the annual Direct Expenses (as defined below) which are in excess of the amount of Direct Expenses over the Allowance (as defined below). "**Allowance**" shall be the total dollar amount of Direct Expenses actually incurred by Landlord during the Base Year for the Buildings. Landlord and Tenant agree that, notwithstanding anything contained in this Lease to the contrary, commencing with the first Expense Year (as defined below) following the Base Year, and for each Expense Year thereafter, the aggregate Controllable Operating Costs, as that term is defined below, shall not increase more than five percent (5%) in any Expense Year over the maximum amount of the aggregate Controllable Operating Costs chargeable for the immediately preceding Expense Year, with no limit on the aggregate Controllable Operating Costs during the Base Year (except as provided in the definition of Operating Costs below) (the " **Annual Cap**"). "**Controllable Operating Costs**" shall mean all Operating Costs except utility costs, costs of services provided under a union contract and costs associated with repairs due to casualty, vandalism or other source outside of Landlord's

reasonable control and in no event shall Controllable Operating Costs include Tax Expenses or Insurance Premiums. Such payments by Tenant, together with any and all other amounts payable by Tenant to Landlord pursuant to the terms of this Lease including the parking charges (as set forth in Article 30), are hereinafter collectively referred to as the " **Additional Rent**," and the Base Rent and the Additional Rent are herein collectively referred to as " **Rent**". Without limitation on other obligations of Tenant which survive the expiration of the Lease Term, the obligations of Tenant to pay the Additional Rent, related to the period of time during which the Lease is in effect, provided for in this Article 4 shall survive the expiration of the Lease Term.

1.15 Procedure for Payment of Tenant's Share of Direct Expenses. Commencing with the first (1st) day after the Base Year, Tenant shall pay Tenant's Share of any excess Direct Expenses over the Allowance, and subject at all times to the Annual Cap, as follows:

(a) Landlord may, from time to time by providing at least thirty (30) days advance written notice to Tenant, reasonably estimate in advance the amounts Tenant shall owe on a monthly basis for Direct Expenses over the Allowance for any full or partial Expense Year of the Term. Such estimate shall be subject at all times to the Annual Cap. In such event, Tenant shall pay such estimated amounts, on a monthly basis, on or before the first (1st) day of each calendar month, together with Tenant's payment of Monthly Base Rent.

(b) Within one hundred twenty (120) days after the end of each Expense Year after the Base Year, or as soon thereafter as practicable, Landlord shall provide a statement itemized on a line item by line item basis (the " **Statement**") to Tenant showing: (i) the amount of actual Direct Expenses for such Expense Year and for the preceding Expense Year (including the amount of Controllable Operating Costs for each such Expense Year), (ii) any amount paid on an estimated basis by Tenant toward excess Direct Expenses over the Allowance during such Expense Year and (iii) any revised estimate of Tenant's obligations for excess Direct Expenses over the Allowance, and subject to the Annual Cap, for the current Expense Year.

(c) If the Statement shows that Tenant's estimated payments were less than Tenant's actual obligations for excess Direct Expenses over the Allowance and subject to the Annual Cap for such Expense Year, Tenant shall pay the difference. If the Statement shows an increase in Tenant's estimated payments for the current Expense Year, Tenant shall pay the difference between the new and former estimates, for the period from January 1 of the current Expense Year through the month in which the Statement is sent. Tenant shall make such payments within thirty (30) days after Tenant receives the Statement.

(d) If the Statement shows that Tenant's estimated payments exceeded Tenant's actual obligations for excess Direct Expenses over the Allowance, and subject to the Annual Cap, Tenant shall receive a credit of such difference against payments of Rent next due. If the Term shall have expired and no further Rent shall be due, Tenant shall receive a refund of such difference within thirty (30) days after Landlord sends the Statement. In no event shall any decrease in Direct Expenses for any Expense Year below Direct Expenses for the Base Year entitle Tenant any decrease in Base Rent or any credit against any other sums payable by Tenant under this Lease.

(e) So long as Tenant's obligations hereunder are not materially adversely affected, Landlord reserves the right to change, from time to time, but not more frequently than once in any twelve (12) month period, the manner or timing of the foregoing payments. No delay by Landlord in providing the Statement (or separate statements) shall be deemed a default by Landlord but any delay by Landlord (or any successor to Landlord in the event the Building is conveyed to a new owner during the Term) in billing Tenant for Tenant's Share of any excess Direct Expenses over the Allowance, and subject to the Annual Cap, of more than three (3) years, or two (2) years if this Lease has terminated, from the date Landlord incurred such Direct Expenses shall be deemed a waiver of Landlord's right to require payment of Tenant's obligations on account of any such Direct Expenses.

(f) If Tenant's obligation to pay Tenant's Share of excess Direct Expenses over the Allowance commences other than on January 1, or ends other than on December 31, Tenant's obligation to pay estimated and actual amounts toward excess Direct Expenses over the Allowance, and subject to the Annual Cap, for such first or final calendar years shall be prorated to reflect the portion of such years included within the period for which Tenant is obligated to pay Tenant's Share of such Direct Expenses. Such proration shall be made by multiplying the total estimated or actual (as the case may be) excess Direct Expenses over the Allowance, subject to the Annual Cap, for such calendar years by a fraction, the numerator which shall be the number of days within the period for which Tenant is obligated to pay such amounts during such calendar year, and the denominator of which shall be the total number of days in such year.

1.16 Definitions of Key Terms Relating to Additional Rent. As used in this Article 4, the following terms shall have the meanings hereinafter set forth:

1.16.1 Base Year. "**Base Year**" shall mean the period set forth in Section (y) of the Fundamental Lease Provisions of the Summary.

1.16.2 Direct Expenses. "**Direct Expenses**" shall mean Operating Expenses and Tax Expenses (as defined below).

1.16.3 Expense Year. "**Expense Year**" shall mean each calendar year following the Base Year in which any portion of the Lease Term falls, through and including the calendar year in which the Lease Term expires.

1.16.4 Operating Expenses.

1.16.4.1 Inclusions to Operating Expenses. "**Operating Expenses**" shall mean all reasonable expenses, costs and amounts of every kind and nature which Landlord pays during any Expense Year because of or in connection with the ownership, management, maintenance, repair, replacement, restoration or operation of the Project, or any portion thereof, subject to the terms and provisions of Section 4.3.4.2. Without limiting the generality of the foregoing, Operating Expenses shall specifically include any and all of the following:

(i) the actual cost of supplying all utilities, the cost of operating, repairing, maintaining, and renovating the utility, telephone, mechanical, sanitary, storm

drainage, and elevator systems, and the actual and reasonable cost of maintenance and service contracts in connection therewith;

(ii) the actual cost of licenses, certificates, permits and inspections and the actual and reasonable cost of contesting any governmental enactments which may affect Operating Expenses, and the actual costs incurred in connection with a governmentally mandated transportation system management program or similar program;

(iii) all insurance premiums and other charges (including the amount of any deductible payable by Landlord with respect to damage or destruction to all or any portion of the Buildings, but in no event more than the amount of deductibles typically carried by landlords of Comparable Buildings) incurred by Landlord with respect to insuring the Project, including, without limitation, the following to the extent carried by Landlord: (a) fire and extended coverage insurance, windstorm, hail, and explosion; (b) riot attending a strike, civil commotion, aircraft, vehicle and smoke insurance; (c) public liability, bodily injury and property damage insurance; (d) elevator insurance; (e) workers' compensation insurance for employees of the property manager working on-site; (f) boiler and machinery insurance, sprinkler leakage, water damage, property, burglary, fidelity and pilferage insurance on equipment and materials; (g) loss of rent, rent abatement, rent continuation, business interruption insurance, and similar types of insurance (but only to the extent of increases in the cost of such coverage over the cost that would have been incurred for the same coverage in the Base Year); (h) earthquake, flood, tornado, and hurricane insurance to the extent available on a commercially reasonable basis; and (i) such other insurance as is customarily carried by operators of Comparable Buildings or as may be otherwise required by Existing Mortgagee or a future Superior Mortgagee (the "**Insurance Premiums**");

(iv) the reasonable cost of non-capital (as determined pursuant to generally accepted accounting principles) landscaping repair, restoration, and maintenance, and all supplies, tools, equipment and materials used in the operation, repair and maintenance of the Project, or any portion thereof;

(v) the reasonable and actual cost of non-capital (as determined pursuant to generally accepted accounting principles) parking area repair, restoration, and maintenance;

(vi) the reasonable fees and other actual costs, including reasonable management fees of a third party, unrelated property manager (subject to Section 4.3.4.2(a)(xiii), to the extent the same are normally and customarily charged by landlords of Comparable Buildings, consulting fees, legal fees and accounting fees, of all contractors and consultants in connection with the management, operation, maintenance and repair of the Project;

(vii) to the extent Landlord manages the Project, an amount equal to three percent (3%) of the Base Rent payable under this Lease to cover all of Landlord's overhead costs and expenses (including wages, salaries and other compensation and benefits,

including taxes levied thereon, payable to any on-site property manager and other staff), other than an on-site engineer as provided in Section 4.3.4.1(ix) below;

(viii) the reasonable and actual payments under any equipment rental agreements incurred connection with the management, operation, maintenance and repair of the Project;

(ix) subject to Section 4.3.4.2(a)(vi) below, wages, salaries and other compensation and benefits, including taxes levied thereon, of an on-site engineer engaged in the operation and maintenance of the Project in amounts not to exceed then-current market wages, salaries and benefits, provided that any such on-site engineer shall only be employed on a full-time basis if determined to be reasonably necessary by Landlord to operate and maintain the Project in accordance with the terms of this Lease;

(x) the reasonable and actual costs of operation, repair and maintenance of all Building Systems and equipment and components thereof of the Project;

(xi) the reasonable and actual cost of janitorial and other services provided by Landlord pursuant to Section 10.1, and maintenance and replacement of curbs and walkways, and repair to roofs and reroofing;

(xii) amortization (including interest at a market interest rate on the unamortized cost) over the useful life, determined in accordance with generally accepted accounting principles, of the cost of acquiring or the reasonable rental expense of personal property used in the maintenance, operation and repair of the Project, or any portion thereof;

(xiii) the reasonable and actual cost of capital improvements or other costs incurred in connection with the Project (A) which are undertaken to affect economies in the operation or maintenance of the Project, or any portion thereof (but only to the extent of the annual cost savings reasonably anticipated by Landlord), (B) that are required to comply with present or anticipated reasonable conservation programs required by any applicable governmental authority, (C) which are replacements of nonstructural items located in the common areas required to keep the common areas in good order or condition, or (D) subject to General Condition B, that are required under any Applicable Laws enacted after the date of this Lease; provided, however, that any capital expenditure shall be amortized (including interest at a market interest rate on the amortized cost) over its useful life reasonably determined in accordance with generally accepted accounting principles; and

(xiv) the actual costs, fees, charges or assessments imposed by, or resulting from any mandate imposed on Landlord by, any federal, state or local government for fire and police protection, trash removal, community services, or other services which do not constitute Tax Expenses.

Notwithstanding the foregoing, only as provided hereinafter in items [i], [ii], and [iii], in the event Landlord incurs costs or expenses associated with or relating to separate items or categories or subcategories of Operating Expenses which were not part of Operating Expenses during the

entire Base Year, Operating Expenses for the Base Year shall be deemed increased by the amounts Landlord would have incurred during the Base Year with respect to such costs and expenses had such separate items or categories or subcategories of Operating Expenses been included in Operating Expenses during the entire Base Year. The foregoing shall only apply as follows: [i] in the event and to the extent any portion of the Project is covered by a warranty or service agreement which provides warranty-type protection at any time during the Base Year and is not covered by such warranty or such warranty-type protection under such service agreement in a subsequent Expense Year to the same extent, Operating Expenses for the Base Year shall be deemed increased by the amount Landlord would have incurred during the Base Year with respect to the items or matters covered by the subject warranty or warranty-type protection, had such warranty or such service agreement not been in effect during the Base Year; [ii] any Insurance Premium resulting from any new forms of insurance, shall be deemed to be included in Operating Expenses for the Base Year, except to the extent otherwise governmentally mandated; and [iii] any new category of Operating Expenses for new services provided to the Project and/or the Building after the Base Year, unless such new services are required to comply with Applicable Law enacted after the Lease Commencement Date.

1.16.4.2 Exclusions to Operating Expenses.

(a) Notwithstanding the provisions of Section 4.3.4.1 above, for purposes of this Lease, Operating Expenses shall not, however, include:

(i) costs, including advertising costs, marketing costs, legal fees, professional fees (including architects, engineers and space planners), advertising and promotional expenses, and brokerage fees incurred in connection with the original construction or development, or original or any future leasing of the Project, and costs, including permit, license and inspection costs, incurred with respect to the installation of tenant improvements;

(ii) except as expressly set forth in Sections 4.3.4.1(xii), (xiii), and (xiv) above, depreciation, interest and principal payments on mortgages and other debt costs, if any, penalties and interest, costs of capital (as determined pursuant to generally accepted accounting principles) repairs and alterations, and costs of capital improvements and equipment;

(iii) costs for which Landlord is separately reimbursed by insurance by its carrier or any Tenant's carrier or by anyone else, and electric power costs to the extent Tenant directly contracts with the local public service company for such services;

(iv) any bad debt loss, rent loss, or reserves for bad debts, rent loss; reserves for future improvements, repairs or additions;

(v) costs associated with the operation of the business of the partnership or entity which constitutes Landlord, as the same are distinguished from the costs of operation of the Project (which shall specifically include, but not be limited to, accounting costs associated with the operation of the Project). Costs associated with the

operation of the business of the partnership or entity which constitutes Landlord include costs of partnership accounting and legal matters, costs of defending any lawsuits with any mortgagee (except as the actions of the Tenant may be in issue), costs of selling, syndicating, financing, mortgaging or hypothecating any of Landlord's interest in the Project, and costs incurred in connection with any disputes between Landlord and its employees, between Landlord and Project management, or between Landlord and other tenants or occupants, and Landlord's general corporate overhead and general and administrative expenses;

(vi) except as expressly provided in Section 4.3.4.1(ix), the wages and benefits of any employee of Landlord or the wages and benefits of any employee of the third party, unrelated property manager who does not devote substantially all of his or her employed time to the Project unless such wages and benefits are prorated to reflect time spent on operating and managing the Project vis-a-vis time spent on matters unrelated to operating and managing the Project; provided, that in no event shall Operating Expenses for purposes of this Lease include wages and/or benefits attributable to personnel of any third party, unrelated property manager above the level of Project manager;

(vii) amounts paid as ground rental for the Project by Landlord;

(viii) overhead and profit increments paid to the Landlord or to subsidiaries or affiliates of Landlord for services in the Project to the extent the same exceeds the costs of such services rendered by qualified, first-class unaffiliated third parties negotiated on an arm's length basis;

(ix) any compensation paid to clerks, attendants or other persons in commercial concessions operated by Landlord;

(x) rentals and other related expenses incurred in leasing air conditioning systems, elevators or other equipment which if purchased the cost of which would be excluded from Operating Expenses as a capital cost, except equipment not affixed to the Project which is used in providing janitorial or similar services and, further excepting from this exclusion such equipment rented or leased to remedy or ameliorate an emergency condition in the Project;

(xi) all items and services for which Tenant reimburses Landlord;

(xii) costs, other than those incurred in the ordinary maintenance and repair, for sculpture, paintings, fountains or other objects of art displayed in the Building;

(xiii) fees payable by Landlord for management of the Project to a third party, unrelated property manager in excess of three percent (3%) of the Base Rent payable under this Lease;

(xiv) any costs expressly excluded from Operating Expenses elsewhere in this Lease, including, without limitation, costs related to security paid by Tenant;

(xv) rent for any office space occupied by Project management (including the on-site Management Office);

(xvi) costs incurred in connection with upgrading the Building Structure, Building Systems or other components of the Project to comply with any Applicable Laws relating to life, fire and safety which were in existence as of applicable Commencement Date, including penalties or damages incurred due to such non-compliance;

(xvii) tax penalties or interest due on any unpaid taxes or assessments incurred as a result of Landlord's failure to make payments and/or to file any tax or informational returns when due;

(xviii) costs arising from the negligence or willful misconduct of Landlord or the Landlord Parties, or providers of materials or services selected, hired or engaged by Landlord or its agents, including, without limitation, the selection of Building materials;

(xix) costs (A) incurred to comply with laws relating to the removal of Hazardous Material (as defined below) except for immaterial amounts expended in connection with routine maintenance and repairs of the Premises; which was in existence in the Building or on the Project prior to the applicable Commencement Date, and was of such a nature that a federal, State or municipal governmental authority, if it then had knowledge of the presence of such Hazardous Material, in the state, and under the conditions that it then existed in the Building or on the Project, would have then required the removal of such Hazardous Material or other remedial or containment action with respect thereto; and (B) costs incurred to remove, remedy, contain, or treat Hazardous Material, which Hazardous Material is brought into the Building or onto the Project after the date hereof by Landlord or any other tenant of the Project and is of such a nature, at that time, that a federal, State or municipal governmental authority, if it had then had knowledge of the presence of such Hazardous Material, in the state, and under the conditions, that it then exists in the Building or on the Project, would have then required the removal of such Hazardous Material or other remedial or containment action with respect thereto except for immaterial amounts completed in connection with routine maintenance and repairs;

(xx) costs arising from Landlord's charitable or political contributions;

(xxi) costs arising from defects in the Building Structure or Building Systems or improvements installed by Landlord or repair of such defects;

(xxii) costs (including in connection therewith all attorneys' fees and costs of settlement judgments and payments in lieu thereof) arising from claims, disputes or potential disputes in connection with potential or actual claims litigation or arbitrations pertaining to Landlord and/or the Building and/or the Site;

(xxiii) any gifts provided to any entity whatsoever, including, but not limited to, Tenant, other tenants, employees, vendors, contractors, prospective tenants and agents;

(xxiv) the cost of any magazine, newspaper, trade or other subscriptions;

(xxv) any amount paid to Landlord or to subsidiaries or affiliates of Landlord for services in the Project to the extent the same exceeds the cost of such services rendered by qualified, first-class unaffiliated third parties on a competitive basis;

(xxvi) costs arising from Landlord's failure to comply with any Applicable Laws;

(xxvii) the cost of any training or incentive programs, other than for tenant life safety information services;

(xxviii) the cost of any "tenant relations" parties, events or promotion not consented to by an authorized representative of Tenant in writing;

(xxix) costs relating to categories of expenses for the Project parking areas which were not included in Operating Expenses during the Base Year, except to the extent the Base Year is retroactively adjusted to include such categories;

(xxx) any other expenses which, in accordance with generally accepted accounting principles or other comprehensive basis of accounting, consistently applied, would not normally be treated as Operating Expenses by landlords of Comparable Buildings; or

(xxxi) any entertainment expenses and travel expenses of Landlord, its employees, agents, partners and affiliates.

(b) It is understood that Operating Expenses shall be reduced by all cash discounts, trade discounts, quantity discounts, rebates or other amounts received by Landlord or Landlord's managing agent in the purchase of any goods, utilities, or services in connection with the operation of the Building. If capital items and equipment which are customarily purchased by landlords of Comparable Buildings are leased by Landlord, rather than purchased, the decision by Landlord to lease the item in question shall not serve to increase Tenant's Share of Operating Expenses beyond that which would have applied had the item in question been purchased.

1.16.5 Taxes.

1.16.5.1 Payment of Tax Expenses. Landlord shall pay, prior to delinquency, all Tax Expenses (as defined below) for each tax period wholly included prior to or during the period between the Commencement Date and the expiration or earlier termination of the Term. All such payments shall be made directly to the authority charged with the collection thereof prior to the last date on which the same may be paid without interest or penalty, and Landlord shall use commercially reasonable efforts to cause the Premises to be separately assessed and shall deliver

copies of the bills for Tax Expenses to Tenant upon receipt. Landlord shall provide to Tenant a copy of a receipted tax bill or other documentary evidence reasonably satisfactory to Tenant, showing the amount of the Tax Expenses due and the payment of same prior to the delinquency date. The obligation of Landlord pursuant to this Section 4.3.5.1 shall extend to any increase in Tax Expenses resulting from a sale, transfer or other transaction with respect to the Premises which causes a reassessment resulting in an increase in Tax Expenses.

1.16.5.2 Right to Contest. Landlord shall have the right, at Landlord's sole risk and cost, except as expressly provided in Section 4.3.5.4, to contest the amount and/or validity of the applicable Tax Expenses by appropriate legal proceedings. The foregoing shall not, however, be deemed or construed to relieve, modify, or extend Landlord's covenant to pay any such Tax Expenses at the time and in the manner provided in this Section, unless such proceedings shall operate to prevent the sale of the Project or any part thereof or any other property of Landlord or the placing of any lien thereon or on any other property of Landlord to satisfy such taxes prior to the final determination of such proceedings. Upon the termination of such proceedings, Landlord shall promptly pay all Tax Expenses, if any, then payable as the result of such proceedings and the interest and penalties in connection therewith, and the charges accruing in such proceedings. Subject to Section 4.3.5.4, to the extent Tenant receives any refund for any Tax Expenses paid by Landlord hereunder, Tenant shall promptly pay and deliver such refund to Landlord

1.16.5.3 Tax Expenses. "**Tax Expenses**" shall mean all federal, state, county, or local governmental or municipal taxes, fees, charges or other impositions of every kind and nature, whether general, special, ordinary or extraordinary (including, without limitation, real estate taxes, general and special assessments, transit taxes, leasehold taxes or taxes based upon the receipt of rent, including gross receipts or sales taxes applicable to the receipt of rent, unless required to be paid by Tenant, personal property taxes imposed upon the fixtures, machinery, equipment, apparatus, systems and equipment, appurtenances, furniture and other personal property used in connection with the Project, or any portion thereof), which shall be paid or accrued during any Expense Year (without regard to any different fiscal year used by such governmental or municipal authority) because of or in connection with the ownership, leasing and operation of the Project, or any portion thereof including the parking areas. Tax Expenses shall include, without limitation:

(i) any tax on the rent, right to rent or other income from the Project, or any portion thereof, or as against the business of leasing the Project, or any portion thereof;

(ii) any assessment, tax, fee, levy or charge in addition to, or in substitution, partially or totally, of any assessment, tax, fee, levy or charge previously included within the definition of real property tax, it being acknowledged by Tenant and Landlord that Proposition 13 was adopted by the voters of the State of California in the June 1978 election ("**Proposition 13**") and that assessments, taxes, fees, levies and charges may be imposed by governmental agencies for such services as fire protection, street, sidewalk and road maintenance, refuse removal and for other governmental services formerly provided without charge to property owners or occupants, and, in further recognition of the decrease in the level and quality of governmental services and amenities as a result of Proposition 13, Tax Expenses shall also include any governmental or private assessments

or the Project's contribution towards a governmental or private cost-sharing agreement for the purpose of augmenting or improving the quality of services and amenities normally provided by governmental agencies;

(iii) any assessment, tax, fee, levy, or charge allocable to or measured by the area of the Premises or the Rent payable hereunder, including, without limitation, any business or gross income tax or excise tax with respect to the receipt of such rent, or upon or with respect to the possession, leasing, operating, management, maintenance, alteration, repair, use or occupancy by Tenant of the Premises, or any portion thereof;

(iv) any assessment, tax, fee, levy or charge, upon this transaction or any document to which Tenant is a party, creating or transferring an interest or an estate in the Premises; and

(v) all of the real estate taxes and assessments imposed upon or with respect to the Building and Project. To the extent such taxes are not currently known, Landlord shall reasonably estimate the taxes and the Base Year Tax Expenses shall be adjusted accordingly upon receipt of the actual tax adjustment based upon such reassessment.

1.16.5.4 Other Costs and Refunds. Any actual and reasonable costs and expenses (including, without limitation, reasonable attorneys' and consultants' fees) incurred in attempting to protest, reduce or minimize Tax Expenses shall be included in Tax Expenses in the Expense Year such expenses are incurred, but only to the extent of the savings resulting therefrom. Tax refunds shall be credited against Tax Expenses and refunded to Tenant regardless of when received, based on the Expense Year to which the refund is applicable; provided, however, in no event shall the amount to be refunded Tenant for any such Expense Year exceed the total amount paid by Tenant as Additional Rent under this Article 4 for such Expense Year. If Tax Expenses for any period during the Lease Term or any extension thereof are increased after payment thereof for any reason, including, without limitation, error or reassessment by applicable governmental or municipal authorities, Tenant shall pay Landlord upon demand Tenant's Share of any such increased Tax Expenses to the extent the same results in excess Direct Expenses for such Expense Year over the Allowance. Notwithstanding anything to the contrary contained in this Section 4.3.5, there shall be excluded from Tax Expenses (i) all excess profits taxes, franchise taxes, gift taxes, capital stock taxes, inheritance and succession taxes, estate taxes, federal and state income taxes, and other taxes to the extent applicable to Landlord's general or net income (as opposed to rents, receipts or income attributable to operations at the Project), (ii) any items included as Operating Expenses, and (iii) any items paid by Tenant under Section 4.4 of this Lease.

1.16.6 Tenant's Share. "**Tenant's Share**" shall mean the percentage set forth in item (z) of the Fundamental Lease Provisions.

1.17 Taxes and Other Charges for Which Tenant Is Directly Responsible.

1.17.1 Personal Property Taxes. Tenant shall be liable for and shall pay ten (10) days before delinquency, taxes levied against Tenant's equipment, furniture, fixtures and any other personal property located in or about the Premises. Tenant shall cause such taxes to be billed

separately from the property of Landlord. If any such taxes on Tenant's equipment, furniture, fixtures and any other personal property are levied against Landlord or Landlord's property or if the assessed value of Landlord's property is increased by the inclusion therein of a value placed upon such equipment, furniture, fixtures or any other personal property and if Landlord pays the taxes based upon such increased assessment, which Landlord shall have the right to do regardless of the validity thereof but only under proper protest if requested by Tenant, Tenant shall upon demand repay to Landlord the taxes so levied against Landlord or the proportion of such taxes resulting from such increase in the assessment, as the case may be.

1.17.2 Taxes on Improvements in Premises. If the tenant improvements in the Premises, whether installed and/or paid for by Landlord or Tenant and whether or not affixed to the real property so as to become a part thereof, are assessed for real property tax purposes at a valuation higher than the cost of the Original Improvements installed by Landlord, then the Tax Expenses levied against Landlord or the property by reason of such excess assessed valuation shall be deemed to be taxes levied against personal property of Tenant and shall be governed by the provisions of Section 4.4.1, above.

1.17.3 Other Taxes. Notwithstanding any contrary provision herein, Tenant shall pay prior to delinquency any (i) rent tax or sales tax, service tax, transfer tax or value added tax, or any other applicable tax on the rent or services herein or otherwise respecting this Lease, (ii) taxes assessed upon or with respect to the possession, leasing, operation, management, maintenance, alteration, repair, use or occupancy by Tenant of the Premises or any portion of the Project, including the Project parking, or (iii) taxes assessed upon this transaction or any document to which Tenant is a party creating or transferring an interest or an estate in the Premises.

1.18 Landlord's Books and Records. Within six (6) months after receipt of a Statement by Tenant, if Tenant disputes the amount of Additional Rent set forth in the Statement, an independent certified public accountant (which accountant is a member of a nationally recognized accounting firm and has previous experience in reviewing financial operating records of landlords of office buildings and is retained by Tenant on a non-contingency fee basis) (the "**Tenant Auditor**"), designated and paid for by Tenant, may, after reasonable notice to Landlord and at reasonable times, inspect Landlord's records with respect to the Statement at Landlord's offices, provided that Tenant is not then in default under this Lease and Tenant has paid all amounts required to be paid under the applicable Estimated Statement and Statement, as the case may be. In connection with such inspection, Tenant and Tenant's agents must agree in advance to follow Landlord's reasonable rules and procedures regarding inspections of Landlord's records, and shall execute a commercially reasonable confidentiality agreement regarding such inspection. Tenant's failure to dispute the amount of Additional Rent set forth in any Statement within six (6) months following Tenant's receipt of such Statement shall be deemed to be Tenant's approval of such Statement and Tenant, thereafter, waives the right or ability to dispute the amounts set forth in such Statement. If after such inspection, Tenant still disputes such Additional Rent, a determination as to the proper amount shall be made, at Tenant's expense, by an independent certified public accountant (the "**Accountant**") selected by Landlord and subject to Tenant's reasonable approval; provided that if such certification by the Accountant proves that Direct Expenses were overstated by more than three percent (3%), then the cost of the Accountant and the Tenant Auditor, and the cost of such

determination certification, shall be paid by Landlord. Any reimbursement amounts determined to be owing by Landlord to Tenant or by Tenant to Landlord shall be (i) in the case of amounts owing from Tenant to Landlord, paid within thirty (30) days following such determination, and (ii) in the case of amounts owing from Landlord to Tenant, credited against the next payment of Rent due Landlord under the terms of this Lease, or if the Lease Term has expired, paid to Tenant within thirty (30) days following such determination. In no event shall this Section 4.5 be deemed to allow any review of any of Landlord's records by any subtenant of Tenant. Tenant agrees that this Section 4.5 shall be the sole method to be used by Tenant to dispute the amount of any Direct Expenses payable or not payable by Tenant pursuant to the terms of this Lease, and Tenant hereby waives any other rights at law or in equity relating thereto.

ARTICLE 5 - USE

1.19 Permitted Use. The Premises shall be used only for the use specified in provision (q) of the Fundamental Lease Provisions and for no other purpose.

1.20 Restriction on Use. Tenant shall not do or permit to be done in or about the Buildings nor bring, keep or permit to be brought or kept therein, anything which is prohibited by any standard form fire insurance policy or which will in any way increase the existing rate of such insurance (unless Tenant is willing to otherwise pay any such increased cost in connection therewith). Subject to Landlord's obligations set forth in General Condition B above, Tenant shall comply with all Applicable Laws affecting the Premises, and with the requirements of any Board of Fire Underwriters or other similar body now or hereafter instituted, and shall also comply with any order, directive or certificate of occupancy issued pursuant to any Applicable Laws, which affect the condition, use or occupancy of the Premises, including, but not limited to, any requirements of changes to the Building Structure and/or Building Systems related to or affected by Tenant's acts, occupancy or use of the Premises.

ARTICLE 6 - ALTERATIONS AND ADDITIONS

1.21 Tenant's Rights to Make Alterations. Following the date on which Tenant first occupies any portion of the Premises, Tenant, at its sole cost and expense, upon ten (10) days' notice to Landlord, shall have the right to make alterations, additions or improvements (individually and collectively, "**Alterations**") to any occupied portion of the Premises upon receipt of Landlord's consent, which consent will not be unreasonably withheld, conditioned or delayed unless the making or installation of the Alterations (a) adversely affects the Building Structure, (b) adversely affects the Building Systems, (c) affect the exterior appearance of the Building, or (d) do not comply with Applicable Laws (individually and collectively a "**Design Problem**"). Landlord may, in reasonable discretion, as a condition to the installation thereof and if such request is made concurrently with the approval of the plans and specifications therefore, require Tenant to remove and restore any such Alterations at Tenant's sole cost and expense, it being agreed and understood, however, that in no event will Tenant have any obligation to remove any such Alterations unless, in Landlord's reasonable judgment, such Alterations are not customary and typical for general business offices. Notwithstanding anything to the contrary set forth herein, Tenant shall not be required to obtain Landlord's prior consent with respect to any cosmetic work performed within the Premises by Tenant, such as the installation of wall coverings, floor coverings, painting and similar work. All

such Alterations shall be made in conformity with the requirements of Section 6.2 below. Once the Alterations have been completed, such Alterations shall thereafter be included in the designation of Tenant Improvements and shall be treated as Tenant Improvements.

1.22 Installation of Alterations. Any Alterations installed by Tenant during the Term shall be done in strict compliance with all of the following:

(a) If Landlord's approval is required, then no such work shall proceed without Landlord's prior approval of (i) Tenant's contractor(s), which consent shall not be unreasonably withheld, conditioned or delayed; and (ii) detailed plans and specifications for such work to the extent required, which approval shall not be unreasonably withheld, conditioned or delayed unless a Design Problem exists (but which approval may be conditioned upon Landlord's right to require Tenant to remove and restore the Alterations upon the termination of this Lease, subject to the provisions of Section 6.1 above).

(b) All such work shall be done in accordance with industry custom and practice for a "first-class" office project and in conformity with a valid building permit and/or all other permits or licenses when and where required, copies of which shall be furnished to Landlord before the work is commenced, and any work not acceptable to any governmental authority or agency having or exercising jurisdiction over such work, or not done in accordance with industry custom and practice for a "first-class" office project, shall be promptly replaced and corrected at Tenant's expense. Landlord's approval or consent to any such work shall not impose any liability upon Landlord. No work shall proceed until and unless Landlord has received at least ten (10) days' notice that such work is to commence including a commercially reasonable description of the work to be performed including drawings and specifications when necessary;

(c) Tenant shall, within thirty (30) days following Landlord's demand therefor, reimburse Landlord for any actual, reasonable and documented out-of-pocket costs incurred by Landlord by reason of Landlord's review of Tenant's plans and specifications, any faulty work done by Tenant or Tenant's contractors, or by reason of inadequate cleanup. In addition, Tenant shall, if requested by Landlord, pay to Landlord a supervision fee equal to three percent (3%) of the hard construction costs of any Alterations for which Landlord's approval is required; provided, however, that no such supervision fee shall be payable to Landlord pursuant to this subsection (c) so long as 6th and Pine Development, LLC or a Related Landlord is the Landlord under this Lease. As used herein, a "**Related Landlord**" shall mean any person that is a member or equity owner (whether directly or indirectly) of 6 th and Pine Development, LLC as of the date hereof, or any family member of such person, or any entity in which such person or such person's family member is or hereinafter becomes an equity owner (whether directly or indirectly).

1.23 Tenant Improvements - Treatment at End of Lease. All Alterations and any Tenant Improvements made by or for Tenant, which is permanent in character and permanently attached to the Building Structure, made either by Landlord or Tenant, shall unless Tenant is required pursuant to the terms of this Lease and has removed the same and repaired any damage resulting from such removal, shall become Landlord's property on the last day of the Term, and shall be surrendered to Landlord in good condition, reasonable wear and tear and damage by casualty excepted, upon expiration of the Term or termination of this Lease without compensation to Tenant; provided

however, that at the election of Landlord, exercisable by written notice to Tenant (which election must be made at the time Tenant requests Landlord's consent to any Alterations for which Landlord's prior consent is required), Tenant shall, at Tenant's sole expense, prior to the expiration of the Term, remove from the Premises such Alterations to the extent such Alterations are not customary and typical for general business offices, repair all damage to the Premises caused by such removal and restore such improvements to substantially their prior condition; provided, however, that Tenant shall have no obligation to remove any initial Tenant Improvements installed in the Premises. All of Tenant's personal property, including moveable furniture, trade fixtures, and equipment not attached to the Buildings or the Premises, may be removed by Tenant prior to the expiration of the Term. Provided, however, that Tenant shall repair all damage caused by such removal prior to the expiration of the Term, and provided further, that any of Tenant's personal property not so removed shall, at the option of Landlord, upon five (5) business days' notice to Tenant (unless Tenant effectuates the removal within such five (5) business day period) automatically become the property of Landlord upon the expiration or termination of this Lease. Thereafter, Landlord may retain or dispose of in any manner the personal property not so removed, without any liability whatsoever to Tenant.

ARTICLE 7 - TENANT'S REPAIRS

Subject to Landlord's obligations set forth in General Condition B above, from and after the Commencement Date for the Existing Building and the New Building, as the case may be, Tenant shall, at Tenant's own expense, keep the Premises, other than the Building Structure and the Building Systems, in good order, repair and condition at all times during the Lease Term. In addition, Tenant shall, at Tenant's own expense, provided, however, that Tenant shall be entitled to receive reimbursement for such expense to the extent that the cost of any such repair is or is required to be covered by insurance obtained by Landlord as part of Operating Expenses and Article 12, but under the supervision and subject to the prior approval of Landlord, and within any reasonable period of time specified by Landlord, promptly and adequately repair all damage to the Premises and replace or repair all damaged, broken, or worn fixtures and appurtenances, but excluding those items that are the responsibility of Landlord as outlined in Article 9 of this Lease, and excepting damage caused by ordinary wear and tear; provided, however, that, at Landlord's option, if Tenant fails to make such repairs, Landlord may, but need not, make such repairs and replacements, and Tenant shall pay Landlord the cost thereof, including a reasonable and customary percentage of the cost thereof (to be uniformly established for the Buildings and/or the Project) sufficient to reimburse Landlord for all reasonable and actual overhead, general conditions, fees and other costs or expenses arising from Landlord's involvement with such repairs and replacements forthwith upon being billed for same. Landlord may, but shall not be required to, enter the Premises at all reasonable times to make such repairs, alterations, improvements or additions to the Premises or to the Project or to any equipment located in the Project as Landlord shall desire or deem necessary or as Landlord may be required to do by governmental or quasi-governmental authority or court order or decree. Tenant hereby waives any and all rights under and benefits of Sections 1941 and 1942 of the California Civil Code or under any similar law, statute, or ordinance now or hereafter in effect.

ARTICLE 8 - NO LIENS BY TENANT

Tenant shall at all times keep the Premises and the Buildings free from any liens arising out of any work performed or allegedly performed, materials furnished or allegedly furnished or obligations incurred by or for Tenant except any work performed by Landlord pursuant to this Lease or the Work Letter other than any work performed by Landlord that was Tenant's obligation to perform pursuant to the terms of this Lease. Tenant agrees to indemnify and hold Landlord harmless from and against any and all claims for mechanics', materialmen's or other liens in connection with any Alterations, repairs, or any work performed, materials furnished or obligations incurred by Tenant. Landlord reserves the right to enter the Premises for the purpose of posting such notices of non-responsibility as may be permitted by law, or desired by Landlord.

ARTICLE 9 - LANDLORD'S REPAIRS

Landlord shall be responsible for any and all necessary maintenance, repairs and replacements required to be made to the Building Structure and /or the Building Systems, subject to Landlord's right to receive Additional Rent pursuant to Article 4 of this Lease. As also provided General Condition N, Landlord shall, subject to Tenant's repair obligations set forth in Article 7 of this Lease, maintain and operate the Project in a first class manner, keep the Building Structure and the Building Systems in first class condition and repair, in compliance with Applicable Laws, maintain a safe and healthful environment in the Buildings, and operate, maintain, and provide services to the Building in a first class manner comparable to the manner in which sophisticated experienced landlords of other Comparable Buildings, the cost of which shall be included in Operating Expenses, to the extent permitted pursuant to Article 4.

ARTICLE 10 - BUILDING SERVICES

1.24 Standard Tenant Services. Landlord shall provide the following services on all days (unless otherwise stated below) during the Lease Term.

1.24.1 Subject to limitations imposed by all Applicable Laws, Landlord shall provide heating, ventilation and air conditioning ("**HVAC**") when necessary for normal comfort for normal office use in the Premises from 7:00 A.M. to 6:00 P.M. Monday through Friday, and on Saturdays from 9:00 A.M. to 1:00 P.M. (collectively, the "**Building Hours**"), except for the date of observation of New Year's Day, Independence Day, Labor Day, Memorial Day, Thanksgiving Day, Christmas Day and, at Landlord's discretion, other locally or nationally recognized holidays (collectively, the "**Holidays**").

1.24.2 Landlord shall provide adequate electrical wiring and facilities for connection to Tenant's lighting fixtures and incidental use equipment, provided that (i) the connected electrical load of the incidental use equipment does not exceed an average of six (6) watts per usable square foot of the Premises and (ii) the connected electrical load of Tenant's lighting fixtures does not exceed an average of two (2) watts per usable square foot of the Premises, which electrical usage shall be subject to Applicable Laws, including California Code of Regulations, Title 24. Tenant shall bear the cost of replacement of lamps, starters and ballasts for lighting fixtures within the Premises that are not consistent with the Original Improvements, as the same may be updated with lighting fixtures of similar performance in the event that the Original Improvements become obsolete..

1.24.3 Landlord shall provide city water from the regular Building outlets for drinking, lavatory and toilet purposes in the Premises.

1.24.4 Landlord shall provide janitorial services to the Premises and window washing services in a manner consistent with Comparable Buildings.

1.24.5 Landlord shall provide nonexclusive, non-attended automatic passenger elevator service during the Building Hours and shall have one elevator available in each Building at all other times, including on the Holidays.

Tenant shall cooperate fully with Landlord at all times and abide by all regulations and requirements that Landlord may reasonably prescribe for the proper functioning and protection of the HVAC, electrical, mechanical and plumbing systems.

1.25 Overstandard Tenant Use.

1.25.1 Non-Electrical Usage (including After-Hours HVAC). Tenant shall not, without Landlord's prior written consent, use heat-generating machines, machines other than normal fractional horsepower office machines, or equipment or lighting other than Building standard lights in the Premises, which may affect the temperature otherwise maintained by the air conditioning system or increase the water normally furnished for the Premises by Landlord pursuant to the terms of Section 10.1 of this Lease. If Tenant uses water, heat or air conditioning in excess of that required to be supplied by Landlord pursuant to Section 10.1 of this Lease, Tenant shall pay to Landlord, upon billing, the actual cost of such excess consumption, the cost of the installation, operation, and maintenance of equipment which is installed in order to supply such excess consumption, and the cost of the increased wear and tear on existing equipment caused by such excess consumption; and Landlord may install devices to separately meter any increased use and in such event Tenant shall pay the cost of such increased use directly to Landlord, on demand as additional Rent, at the rates charged by the public utility company furnishing the same, including the cost of such additional metering devices. If Tenant desires to use HVAC during non-Building Hours, Tenant shall give Landlord such prior notice, if any, as Landlord shall from time to time reasonably establish as appropriate, of Tenant's desired use in order to supply HVAC, and Landlord shall supply HVAC to the Premises. The cost of after-hours HVAC for the Premises shall be based upon Landlord's actual cost of providing such HVAC services. The cost of HVAC supplied by Landlord during non-Building Hours shall be paid by Tenant as Additional Rent.

1.25.2 Electrical Usage. If in any month Tenant uses electricity (not including any electricity consumed in connection with the operation of the Building's main HVAC system) in excess of the Electricity Usage Standard (as defined below), Landlord may require the Tenant, at its cost, to install, operate and maintain a submeter and/or equipment which is required to be installed to supply such excess capacity and/or consumption to Tenant. Tenant shall pay to Landlord, upon billing, Landlord's cost of electricity consumption in excess of the Electricity Usage Standard, on demand as additional Rent. For purposes hereof, the "**Electricity Usage Standard**" shall be an average of six (6) watts per rentable square foot of the Premises of actual consumption, on a monthly Building Hours basis (such Electricity Usage Standard does not include electrical usage for HVAC serving the Premises). Tenant's use of electricity shall not exceed the capacity of the feeders to the

Project or the risers or wiring installation (which capacity is eight (8) watts per rentable square foot) and Tenant shall promptly discontinue any such excess use promptly following receipt of notice of the same from Landlord.

1.26 Interruption of Use. Notwithstanding anything to the contrary contained herein, except as provided in General Condition B, F and/or I or as otherwise expressly provided in this Lease, Tenant agrees that Landlord shall not be liable for damages, by abatement of Rent or otherwise, for failure to furnish or delay in furnishing any service (including telephone and telecommunication services), or for any diminution in the quality or quantity thereof, when such failure or delay or diminution is occasioned, in whole or in part, by breakage, repairs, replacements, or improvements, by any strike, lockout or other labor trouble, by inability to secure electricity, gas, water, or other fuel at the Building or Project after reasonable effort to do so, by any riot or other dangerous condition, emergency, accident or casualty whatsoever, by act or default of Tenant or any Tenant Party, or by any other cause beyond Landlord's reasonable control; and such failures or delays or diminution shall never be deemed to constitute an eviction or disturbance of Tenant's use and possession of the Premises or relieve Tenant from paying Rent or performing any of its obligations under this Lease.

ARTICLE 11 - ASSIGNMENT AND SUBLETTING

1.27 Right to Assign, Sublease and Encumber. Except at otherwise expressly provided in this Article 11, Tenant may not voluntarily assign or encumber its interest in this Lease or in the Premises, or sublease all or any part of the Premises, or allow any other person or entity (other than the Tenant Parties)) to occupy or use all or any part of the Premises, without first obtaining Landlord's consent (which consent shall not be unreasonably withheld, conditioned or delayed). Landlord shall have no right to recapture all or any portion of the Premises in the event of an assignment, encumbrance or sublease. No consent to an assignment, encumbrance, or sublease shall constitute a further waiver of the provisions of this Article 11. Notwithstanding anything to the contrary contained in this Lease, Tenant shall not be deemed to have waived any of its rights under California Civil Code Section 1995.310.

1.28 Procedure for Assignment and Sublease. Tenant shall advise Landlord by notice of (a) Tenant's intent to assign, encumber, or sublease this Lease, (b) the name of, and information with respect to the business operations of, the proposed assignee or sublessee, (c) the proposed effective date of such assignment, sublease or other transfer, (d) a description of the portion of the Premises to be assigned, sublet or otherwise transferred, (e) the material terms of the proposed assignment, sublease or other transfer, including the relevant documentation with respect thereto and, in the case of a sublease, the consideration therefor, and (f) financial statements for the proposed assignee or sublessee, including, if available, audited financial statements (the " **Transfer Notice**"). Landlord shall approve or disapprove of the proposed assignment, sublease or other transfer within thirty (30) days (the " **Review Period**") after Landlord's receipt of the Transfer Notice. Landlord shall be deemed to have consented to such proposed assignment or sublease if Landlord fails to approve or disapprove of the proposed assignment, sublease or other transfer prior to the expiration of the Review Period. Landlord may reasonably withhold its consent to an assignment or sublease in the event (i) the proposed assignee or sublessee is a governmental entity, (ii) the proposed assignee

or sublessee will have an occupancy density with respect to the space to be assigned or sublet that is greater than Tenant's highest occupancy density during its period of occupany, (iii) the proposed use is other than the Permitted Use, (iv) such assignment, sublease or other transfer would increase the cost of Landlord's obligations under this Lease, or (v) in the case of an assignment or other transfer (but not a sublease), the financial strength of the proposed assignee or transferee is not reasonably acceptable to Landlord; provided, however, that such financial strength of such proposed assignee or transferee shall be deemed acceptable to Landlord if such assignee's or transferee's net worth or shareholder's equity is equal for or greater than $250 million as determined in accordance with generally acceptable accounting principles and demonstrated by financial statements of such assignee or transferee reasonably acceptable to Landlord (herein, a "**Significant Assignee**").

1.29 Conditions Regarding Consent to Subleases. In the event that Landlord shall consent or be deemed to have consented to an assignment or sublease under the provisions of this Article 11, Tenant shall remain directly, primarily and fully responsible and liable for all payments owed by Tenant under this Lease and for compliance with all obligations under the terms, provisions and covenants of this Lease; provided, however, that if such assignment is to a Significant Assignee, then Tenant shall be released from all of its obligations first arising our accruing under this Lease from and after the effective date of such assignment, and upon request, Landlord shall execute and deliver to Tenant a release instrument in form and substance reasonably acceptable to Tenant confirming the same. With respect to any sublease other than pursuant to Section 11.4 below (and excluding specifically an assignment), Tenant shall pay Landlord, as additional Base Rent, fifty percent (50%) of any Profits (as defined below) actually received by Tenant pursuant to such approved sublease. Whenever Landlord is entitled to share in any excess income resulting from an assignment or sublease of the Premises, the following shall constitute the definition of "**Profits**": the gross revenue received from the sublessee during the sublease term, with respect to the space covered by the sublease or the assignment ("**Subleased Space**") less: (a) the gross revenue paid to Landlord by Tenant during the period of the sublease term with respect to the Transferred Space; (b) any improvement allowance or other economic concession (planning allowance, moving expenses, etc.), paid by Tenant to the sublessee; (c) brokers' commissions; (d) attorneys' fees; (e) lease takeover payments; (f) costs of advertising the space for sublease; and (g) any other costs actually paid in subletting the Transferred Space or in negotiating or effectuating the assignment or sublease; provided, however, under no circumstance shall Landlord be paid any Profits until Tenant has recovered all the items set forth in subparts (a) through (g) for such Transferred Space, it being understood that if in any year the gross revenues, less the deductions set forth in subparts (a) through (g) above (the "**Net Revenues**"), are less than any and all costs actually paid in subletting the affected space (collectively "**Transaction Costs**"), the amount of the excess Transaction Costs shall be carried over to the next year and then deducted from Net Revenues with the procedure repeated until a Profit is achieved. It is acknowledged and agreed that, in connection with any sublease, Tenant shall be solely responsible for any bifurcation and/or demising costs associated with creating a multi tenant lobby, multi tenant corridor, or separate suite on any particular floor within the Buildings, but such costs shall costs shall be deemed Transaction Costs for purposes of the foregoing.

1.30 Affiliated Companies/Restructuring of Business Organization. Occupancy of all or part of the Premises by any parent, subsidiary, or affiliated companies of Tenant or of Tenant's

parent or of Tenant's subsidiary shall not be deemed an assignment or subletting provided that such parent, subsidiary or affiliated companies were not formed as a subterfuge to avoid the obligation of this Article 11. Furthermore, without limiting the generality of the foregoing, Tenant may assign this Lease at any time, or sublease all or part of the Premises, without receipt of Landlord's consent (and without triggering Landlord's right to share in Profits pursuant to Section 11.3 above), to any entity which acquires all or part of Tenant, or which is acquired in whole or in part by Tenant, or which is controlled directly or indirectly by Tenant, or which entity controls, directly or indirectly, Tenant (herein, an "**Affiliate**"), or which owns or is owned by the Affiliate, so long as such transaction was not entered into as a subterfuge to avoid the obligations and restrictions of this Lease.

1.31 Landlord's Right to Assign. Subject to the provisions of Exhibit "I-1" [Right of First Offer to Purchase], Landlord shall have the right to sell, encumber, convey, transfer, and/or assign any of its rights and obligations under this Lease.

1.32 Occupancy By Others. Tenant may allow any person or entity which is a client or customer of Tenant or which is providing service to Tenant or one of Tenant's clients to occupy certain portions of the Premises without such occupancy being deemed an assignment or subleasing as long as no new demising walls are constructed to accomplish such occupancy as long as such relationship was not created as a subterfuge to avoid the obligations set forth in this Article 11 and so long as such occupancy is for not more than five percent (5%) of the Premises.

ARTICLE 12 - LIMITATION ON LANDLORD'S LIABILITY; INDEMNIFICATION; INSURANCE

1.33 Limitation on Landlord's Liability and Release. Except as otherwise expressly provided in this Lease to the contrary, Landlord shall not be liable to Tenant for, and Tenant hereby releases and waives all claims and rights of recovery against Landlord and the other Landlord Parties (as defined below) from, any and all Claims (as defined below) sustained by Tenant, the Tenant Parties, any damage to Tenant's property, or any loss to Tenant's business, loss of Tenant's profits or other financial loss of Tenant resulting from or attributable to the condition of, the management of, the repair or maintenance of, the protection of, the supply of services or utilities to, the damage in or destruction of the Premises, the Buildings or the Project; provided, however, that the foregoing release and wavier shall not extend to, and Tenant is not hereby waiving or releasing Landlord from or against, any Claims arising out of or in connection with injuries to persons or property resulting from any Claims as to which Landlord is expressly obligated to defend, indemnify and hold Tenant and the Tenant Parties harmless as provided below in Section 12.2(b) below or elsewhere in this Lease.

1.34 Indemnification.

(a) Tenant shall at its expense defend, indemnify, and hold Landlord and Landlord's agents, contractors, licensees, employees, directors, officers, partners, trustees and invitees (each, a "Landlord Party," and collectively " **Landlord Parties**") harmless from and against any and all loss, cost, liability, damage or expense, including, but not limited to, penalties, fines, attorneys' fees or costs (collectively "**Claims**"), arising out of or in connection with (i) injuries to persons or property in, on or about the Project (but excluding the Management Office) or injuries

to persons or property caused by the use of the Off-Site Parking Spaces by Tenant or any Tenant Party or from activities conducted by Tenant or any Tenant Party and with Tenant's knowledge and consent, express or implied, in the parking lots and/or structures where such Off-Site Parking Spaces are located or (ii) the presence in, on or about the Project of Hazardous Materials to the extent such Hazardous Materials were placed in, on or about Project by Tenant or any Tenant Party. Notwithstanding any provisions of Articles 12 and 13 to the contrary, Tenant shall not be required to indemnify and hold Landlord harmless from any Claims resulting from injuries to any person or property resulting from (i) the negligent acts or omissions or willful misconduct of any Landlord Party in connection with Landlord's activities in, on or about the Project or the Off-Site Parking Spaces, and Landlord hereby so indemnifies and holds Tenant and the Tenant Parties harmless from any such Claims or (ii) any other Claims as to which Landlord is expressly obligated to defend, indemnify and hold Tenant and the Tenant Parties harmless as provided below in Section 12.2(b) below or elsewhere in this Lease. This indemnity shall survive the expiration or termination of this Lease.

(b) Landlord shall at its expense defend, indemnify, and hold Tenant and the Tenant Parties harmless from Claims arising from (i) any noncompliance of Project, or any portion thereof, with any Applicable Laws as of the applicable Commencement Date, (ii) the presence in, on or about the Project of Hazardous Materials, except to the extent such Hazardous Materials were placed in, on or about Project by Tenant or any Tenant Party, (iii) the negligent acts or omissions or willful misconduct of Landlord or any Landlord Party in connection with Landlord's activities in, on or about the Project or the Off-Site Parking Spaces, or (iv) Landlord's breach of this Lease. This indemnity shall survive the expiration or termination of this Lease.

(c) Tenant's agreement to indemnify and hold Landlord harmless pursuant to Section 12.2(a) and the exclusion from Tenant's indemnity and Landlord's agreement to indemnify and hold Tenant harmless pursuant to Section 12.2(b) are not intended to and shall not relieve any insurance carrier of its obligations under policies required to be carried by Landlord or Tenant, respectively, pursuant to this Lease to the extent that such policies cover the results of such acts, omissions or willful misconduct. If Landlord or Tenant has been or at any time hereafter is granted the right to self insure or if either party breaches this Lease by its failure to carry required insurance, such failure shall automatically be deemed to be a covenant and agreement by Landlord or Tenant, respectively, to self-insure to the full extent of such required coverage, with full waiver of subrogation. All of the provisions set forth herein are subject to the provisions of Section 12.5.

1.35 Insurance.

1.35.1 Tenant's Compliance With Landlord's Fire and Casualty Insurance. Tenant shall, at Tenant's expense, comply with all insurance company requirements pertaining to the use of the Premises, provided that Tenant has received not less than ten (10) business days' notice thereof. If Tenant's conduct or use of the Premises causes any increase in the premium for such insurance policies which are paid by Landlord as an Operating Expense, then Tenant shall reimburse Landlord for any such increase.

1.35.2 Tenant's Insurance. Tenant shall maintain the following coverages in the following amounts.

(a) Commercial General Liability Insurance covering the insured against claims of bodily injury, personal injury and property damage (including loss of use thereof) arising out of Tenant's operations, and contractual liabilities (covering the performance by Tenant of its indemnity agreements) including a Broad Form endorsement covering the insuring provisions of this Lease, for limits of liability not less than:

Bodily Injury and Property Damage Liability	$3,000,000 each occurrence $3,000,000 annual aggregate
Personal Injury Liability	$3,000,000 each occurrence $3,000,000 annual aggregate 0% Insured's participation

(b) Physical Damage Insurance covering (i) all office furniture, business and trade fixtures, office equipment, free-standing cabinet work, movable partitions, merchandise and all other items of Tenant's property on the Premises installed by, for, or at the expense of Tenant, (ii) the tenant improvements which exist in the Premises as of the applicable Commencement Date (excluding the Building Structure and Building Systems) (the "**Original Tenant Improvements**"), and (iii) all other Alterations to the Premises made by Tenant. Such insurance shall be written on an "all risks" of physical loss or damage basis, for the full replacement cost value (subject to reasonable deductible amounts) new without deduction for depreciation of the covered items and in amounts that meet any co-insurance clauses of the policies of insurance and shall include coverage for damage or other loss caused by fire or other peril including, but not limited to, vandalism and malicious mischief, theft, water damage of any type, including sprinkler leakage, bursting or stoppage of pipes, and explosion, and providing business interruption coverage for a period of one year.

(c) Worker's Compensation and Employer's Liability or other similar insurance required by all applicable state and local statutes and regulations.

1.35.3 Additional Insurance Obligations of Tenant. Tenant shall carry and maintain during the entire Lease Term, at Tenant's sole cost and expense, increased amounts of the insurance required to be carried by Tenant pursuant to Section 12.3 above and such other reasonable types of insurance coverage and in such reasonable amounts covering the Premises and Tenant's operations therein, in each case as may be reasonably requested by Landlord, but in no event in excess of the amounts and types of insurance then being required of tenants in Comparable Buildings occupying comparable space and engaged in a similar use as Tenant.

1.35.4 Blanket Insurance/Self Insurance of Tenant. Notwithstanding the foregoing, all of the insurance requirements set forth in this Section 12.3 on the part of Tenant to be observed shall be deemed satisfied if the Premises are covered by a blanket insurance policy providing the coverage set forth herein insuring all or most of Tenant's facilities in California or if Tenant sends a letter to Landlord, signed by an authorized officer of Tenant, stating that Tenant has elected to act as a self insurer whereupon Tenant shall have the same obligations and rights, and Landlord shall have the same rights and obligations, as if Tenant was an insurance company furnishing the policies and coverages required under this Lease.

1.35.5 Evidence of Coverage by Tenant. A duplicate original policy, or a certificate of the policy shall be deposited with Landlord at the Commencement Date, and on renewal of the policy a certificate of insurance listing the insurance coverages required hereunder and naming Landlord and any other parties designated by Landlord with an insurable interest as insured, additional insured and/or loss payee, as applicable, shall be deposited with Landlord not less than ten (10) days before expiration of the term of the policy.

1.35.6 Landlord's Insurance.

(a) During all times that Landlord is performing any construction or other work under this Lease or Work Letter, Landlord shall, at its sole cost and expense, and not as an Operating Expense, (i) obtain and, maintain builder's risk insurance covering both the hard and soft costs associated with the construction/performance of construction or other work, in a face amount of not less than the full insurable value of all improvement work (including the Buildings) and materials supplied in connection therewith, with appropriate provisions made to include coverage of materials stored off the Site in an amount not less than the full insurable value of such materials stored off the Site from time to time, naming Landlord as the insured and Tenant as an additional insured to the extent of Tenant's interest therein, (ii) cause the architects, contractors and subcontractors to carry errors and omissions insurance in an amount at least equal to One Million Dollars ($1,000,000) which can be applied to the construction/performance of the applicable work, covering the entire period of design and construction/performance of the applicable work, including the completion of punch list items (which coverage shall be maintained for at least three (3) years after the completion of the applicable work) and (iii) cause its contractors and subcontractors to carry commercially reasonable amounts of auto insurance.

(b) Commencing on the Commencement Date for the Existing Building with respect to the Existing Building, and commencing on the Commencement Date for the New Building with respect to the New Building, and in each case continuing through the expiration or earlier termination of this Lease, Landlord shall obtain and maintain fire and hazard "all risk" insurance covering one hundred percent (100%) of the full replacement cost valuation of the applicable Building and Project (including the Building Structure and Building Systems), subject to commercially reasonable deductibles, in the event of fire, lightning, windstorm, vandalism, malicious mischief and all other risks normally covered by "all risk" policies carried by landlords of Comparable Buildings naming Landlord as the insured and Landlord or any lessors and mortgagees as loss payee. The proceeds from any such policy shall be used by Landlord for the repair and/or replacement of the Project unless this Lease is terminated, in which case Landlord may retain such proceeds, except as otherwise provided in Section 13.6 below. Landlord shall promptly deliver to Tenant evidence of such insurance upon request by Tenant from time to time.

1.35.7 Insurance Criteria. All the insurance required to be maintained by Tenant and Landlord under this Lease shall:

(a) Be issued by insurance companies authorized to do business in the state of California, with a rating of at least A-VII as rated in the most recent edition of Best's Insurance Reports;

(b) Be issued as a primary policy;

(c) Contain an endorsement requiring ten (10) days' written notice from the insurance company to both parties and to Landlord's lender (whose names shall have been furnished to Tenant) before cancellation or any material change in the coverage, scope, or amount of any policy; and

(d) With respect to property loss or damage, a waiver of subrogation must be obtained, as required by Section 12.5.

1.36 Abatement of Rent/Limitations on Liability and Damages.

(d) Abatement of Rent. Except as provided in General Condition B, F and/or I or as otherwise expressly provided in this Lease, Tenant shall not otherwise be entitled to Rent abatement and shall not otherwise have, and hereby releases Landlord from, any Claims resulting from Tenant's inability to utilize all or any part of the Premises.

(e) Limitation of Liability and Damages/Attorney Fees. Landlord agrees that in the event of a default by Tenant under this Lease, Landlord will not have a right to collect from Tenant a greater amount of damages on account of Rent than Landlord would have been able to collect in the event that Tenant did not default under this Lease. Landlord further agrees that it will use commercially reasonable efforts to mitigate its damages in connection with any default by Tenant. Nothing herein shall be construed to prevent Tenant or Landlord, if it is the prevailing party in connection with any litigation, dispute, or controversy between Landlord and Tenant, from collecting, and each agrees that under such circumstances the other shall have a right to collect and shall be awarded, (a) its reasonable attorneys' fees, costs, and expenses incurred in connection with any such litigation, dispute, or controversy and (b) interest, at the Interest Rate, on any amounts not paid when due. Landlord's liability to Tenant is limited to its equity interest in the Buildings as more specifically provided in Section 15.2 of this Lease.

1.37 Allocation of Insured Risks/Subrogation. Landlord and Tenant release each other from any claims and demands of whatever nature for damage, loss or injury to the Premises and/or the Buildings, or to the other's property in, on or about the Premises and the Buildings, that are caused by or result from risks or perils insured against under any property insurance policies required by this Lease to be carried by Landlord and/or Tenant. Landlord and Tenant shall cause each insurance policy obtained by them or either of them to provide that the insurance company waives all right of recovery by way of subrogation against either Landlord or Tenant in connection with any damage covered by any such policy or policies. Neither Landlord nor Tenant shall be liable to the other for any damage caused by fire or any of the risks insured against under any insurance policy required by this Lease. If an insurance policy cannot be obtained with a waiver of subrogation, or is obtainable only by the payment of an additional premium charge above that charged by insurance companies issuing policies without waiver of subrogation, the party undertaking to obtain the insurance shall notify the other party of this fact. The other party shall have a period of ten (10) days after receiving the notice either to place the insurance with a company that is reasonably satisfactory to the other party and that will carry the insurance with a waiver of subrogation at no additional cost, or to agree to pay the additional premium if such a policy is obtainable at additional

cost. If the insurance cannot be obtained or the party in whose favor a waiver of subrogation is desired refuses to pay the additional premium charged, the other party is relieved of the obligation to obtain a waiver of subrogation with respect to the particular insurance involved.

ARTICLE 13 - DAMAGE OR DESTRUCTION

1.38 Loss Covered By Insurance. In the event of any damage to the Building, Premises, or Project, Tenant shall assign to Landlord (or to any party designated by Landlord) all insurance proceeds payable to Tenant under Tenant's insurance required under this Lease with respect to the Original Tenant Improvements and any Alternations made by Tenant (it being understood and agreed that any insurance proceeds payable to Tenant in such event for any loss or damage suffered by Tenant with respect to Tenant's equipment, furniture, fixtures and any other personal property located in or about the Premises shall not be assigned to Landlord). If, at any time prior to the expiration or termination of this Lease, the Premises or either Building is wholly or partially damaged or destroyed by a casualty, the loss to Landlord from which is or should be (except for any applicable deductible for which Tenant shall be solely responsible) fully covered by insurance maintained by Tenant for Landlord's benefit (or required to be maintained by Tenant pursuant to Article 12)), which casualty renders the Premises totally or partially inaccessible or unusable by Tenant in the ordinary conduct of Tenant's business, then:

(a) Repairs Which Can Be Completed Within Nine (9) Months. Within twenty (20) days of notice to Landlord of such damage or destruction, Landlord shall provide Tenant with notice of its determination of whether the damage or destruction can be repaired within nine (9) months of such damage or destruction without the payment of overtime or other premiums. If all repairs to such Premises or Building can, in Landlord's reasonable judgment, be completed within nine (9) months following the date of such damage or destruction without the payment of overtime or other premiums, Landlord shall, at Landlord's expense, repair the same and this Lease shall remain in full force and effect and a reduction of the Rent shall be allowed Tenant as provided in General Condition F; provided, however, that if any such repair is not commenced by Landlord within ninety (90) days after the occurrence of such damage or destruction or is not or cannot practicably be substantially completed by Landlord within nine (9) months after the occurrence of such damage or destruction, then in either such event Tenant may, at its option, upon written notice to Landlord delivered within thirty (30) days of determining that Landlord has not commenced repair within the ninety (90) day period or that the damage or destruction is not or cannot practicably be substantially completed by Landlord within the nine (9) month period, elect to terminate this Lease as of the date of the occurrence of such damage or destruction.

(b) Repairs Which Cannot Be Completed Within Nine (9) Months. If all such repairs to the Building and Premises cannot, in Landlord's reasonable judgment, be completed within nine (9) months following the date of notice to Landlord of such damage or destruction without the payment of overtime or other premiums, Landlord shall notify Tenant of such determination within twenty (20) days of notice to Landlord of such damage or destruction and either Landlord or Tenant may, at its option, upon written notice to the other party given within sixty (60) days after the occurrence of such damage or destruction, elect to terminate this Lease as of the date of the occurrence of such damage or destruction. In the event that neither Landlord nor

Tenant elect to terminate this Lease in accordance with the foregoing provisions, then Landlord shall, at Landlord's expense, repair such damage or destruction, and in such event, this Lease shall continue in full force and effect but the Rent shall be reduced as provided in General Condition F; provided, however, that if any such repair is not commenced by Landlord within ninety (90) days after the occurrence of such damage or destruction or is not or cannot practicably be substantially completed by Landlord within nine (9) months after the occurrence of such damage or destruction, then in either such event Tenant may, at its option, upon written notice to Landlord delivered within thirty (30) days of determining that Landlord has not commenced repair within the ninety (90) day period or that the damage or destruction is not or cannot practicably be substantially completed by Landlord within the nine (9) month period, elect to terminate this Lease as of the date of the occurrence of such damage or destruction.

1.39 Loss Not Covered By Insurance. If, at any time prior to the expiration or termination of this Lease, the Premises or either Building is totally or partially damaged or destroyed from a casualty, the loss to Landlord from which is not fully covered by insurance maintained by Landlord or maintained by Tenant for Landlord's benefit (or required to be maintained by Tenant pursuant to Article 12), which damage renders the Premises inaccessible or unusable to Tenant in the ordinary course of its business, Landlord may, at its option, upon written notice to Tenant within sixty (60) days after notice to Landlord of the occurrence of such damage or destruction, elect to repair or restore such damage or destruction, or Landlord may elect to terminate this Lease so long as (a) the uninsured portion of the damage or destruction is equal to or greater than the replacement cost of the Building, and (b) Landlord makes a decisions not to commence such repairs within two (2) years of the occurrence of such damage and destruction. If Landlord elects to repair or restore such damage or destruction, this Lease shall continue in full force and effect but a reduction of the Rent shall be allowed Tenant as provided in General Condition F. If Landlord does not elect by notice to Tenant to repair such damage this Lease shall terminate. Notwithstanding the foregoing, if all repairs to the Premises or the Building cannot, in Landlord's reasonable judgment, be completed within six (6) months following the date of such damage or destruction without the payment of overtime or other expenses, then either Landlord or Tenant may at its option, upon written notice to the other party given within sixty (60) days after the occurrence of such damage or destruction, elect to terminate this lease as of the date of the occurrence of such damage or destruction.

1.40 Destruction During Final Year. Notwithstanding anything to the contrary contained in Sections 13.1 and 13.2, if the Premises or either Building is wholly or partially damaged or destroyed within the final twelve (12) months of the Term, or, if an applicable renewal option has been exercised, during the last year of any renewal Term, so that Tenant shall be prevented from using the Premises for thirty (30) consecutive days due to such damage or destruction, then either Landlord or Tenant may, at its option, by notice to the other party within sixty (60) days after the occurrence of such damage or destruction, elect to terminate this Lease.

1.41 Destruction of Tenant's Personal Property or Property of Tenant Parties. In the event of any damage to or destruction of the Premises or either Building, under no circumstances shall Landlord be required to repair any injury, or damage to, or make any repairs to or replacements of, Tenant's personal property. Landlord shall have no responsibility for any contents placed or kept in or on the Premises or the Building by Tenant or any Tenant Party.

1.42 Exclusive Remedy. This Article 13 and General Condition F shall be Tenant's sole and exclusive remedy in the event of damage or destruction to the Premises or either Building, and Tenant, as a material inducement to Landlord entering into this Lease, irrevocably waives and releases Tenant's rights under California Civil Code Sections 1932(2) and 1933(4). No damages, compensation or claim shall be payable by Landlord for any inconvenience, any interruption or cessation of Tenant's business, or any annoyance, arising from any damage to or destruction of all or any portion of the Premises or either Building.

1.43 Option to Purchase. In the event that Landlord elects to terminate this Lease pursuant to the provisions of this Article 13, Tenant shall have the right to exercise the Purchase Option set forth on Exhibit "I-2" within thirty (30) days following such termination by Landlord, and upon Tenant's purchase of all or any portion of the Project, Tenant shall be entitled to all insurance proceeds related thereto. This provision (and the terms of the Purchase Option) shall survive the termination of this Lease pursuant to this Article 13.

ARTICLE 14 - EMINENT DOMAIN

1.44 Permanent Taking - When Lease Can Be Terminated. If the whole of the Premises, or so much of the Premises as to render the balance unusable by Tenant, shall be taken under the power of eminent domain, this Lease shall automatically terminate as of the date of final judgment in such condemnation, or as of the date possession is taken by the condemning authority, whichever is earlier. A sale by Landlord under threat of condemnation shall constitute a "taking" for the purpose of this Article 14. Except as provided below, no award for any partial or entire taking shall be apportioned and Tenant assigns to Landlord any award which may be made in such taking or condemnation, together with all rights of Tenant to such award, excluding any award or compensation for the value of all or any part of the leasehold estate ("**Bonus Value**"); provided that nothing contained in this Article 14 shall be deemed to give Landlord any interest in or to require Tenant to assign to Landlord any award, and Tenant shall be able to retain any award, made to Tenant for (a) the taking of Tenant's personal property, (b) interruption of or damage to Tenant's business, (c) the Bonus Value, or (d) Tenant's unamortized cost of the Tenant Improvements (or applicable portion thereof) to the extent paid for by Tenant. "Bonus Value" of the leasehold estate shall be equal to the difference between the rental rate payable under this Lease and the rate established by the condemning authority as an award for compensation purposes, together with any amount Tenant is able to obtain from the condemning authority attributable to Tenant's relocation expenses.

1.45 Permanent Taking - When Lease Cannot Be Terminated. In the event of a partial taking which does not result in a termination of this Lease under Section 14.1, Rent shall be reduced as set forth in General Condition F, and Landlord shall restore the Premises or the applicable Building(s) to the extent of available condemnation proceeds.

1.46 Temporary Taking. No temporary taking of the Premises or any part of the Premises and/or of Tenant's rights to the Premises or under this Lease shall terminate this Lease or give Tenant any right to any abatement of any payments owed to Landlord pursuant to this Lease; any award made to Tenant by reason of such temporary taking shall belong entirely to Tenant. If a taking of the Premises is for less than one (1) year, such taking shall be deemed a Temporary Taking.

1.47 Exclusive Remedy. This Article 14 and General Condition F shall be Tenant's sole and exclusive remedy in the event of a taking or condemnation. Tenant hereby waives the benefit of California Code of Civil Procedure Section 1265.130.

1.48 Release Upon Termination. Upon termination of this Lease pursuant to this Article 14, Tenant and Landlord hereby agree to release each other from any and all obligations and liabilities with respect to this Lease except such obligations and liabilities which arise or accrue prior to such termination.

ARTICLE 15 - DEFAULTS

1.49 Default by Tenant. Each of the following shall be an "**Event of Default**" by Tenant and a material breach of this Lease:

(a) Tenant shall fail to make any payment owed by Tenant under this Lease, as and when due, and where such failure is not cured within five (5) business days following receipt of written notice by Tenant from Landlord. Any such notice shall be in lieu of, and not in addition to, any notice required under Section 1161 of the California Code of Civil Procedure;

(b) Tenant shall fail to observe, keep or perform any of the material terms, covenants, agreements or conditions under this Lease that Tenant is obligated to observe or perform, other than that described in subparagraph (a) above, for a period of thirty (30) days after notice to Tenant of said failure; provided however, that if the nature of Tenant's default is such that more than thirty (30) days are reasonably required for its cure, then Tenant shall not be deemed to be in default under this Lease if Tenant shall commence the cure of such default so specified within said thirty (30) day period and diligently prosecutes the same to completion. Such thirty (30) day notice shall be in lieu of, and not in addition to, any notice required under Section 1161 of the California Code of Civil Procedure. Tenant shall have, and under no circumstances shall Tenant be deemed to have waived, the rights set forth in Sections 1174 and 1179 of the California Civil Code of Procedure.

1.50 Default by Landlord. Each of the following shall be a default by Landlord and a material breach of this Lease:

(a) Landlord shall fail to make any payment owed by Landlord under this Lease, as and when due, and where such failure is not cured within five (5) business days following receipt of written notice by Landlord from Tenant; and

(b) Landlord shall be in default in the performance of any obligation required to be performed by Landlord under this Lease, other than that described in subparagraph (a) above, if Landlord has failed to perform such obligation within thirty (30) days after the receipt of notice from Tenant specifying in detail Landlord's failure to perform; provided, however, that if the nature of Landlord's obligation is such that more than thirty (30) days are required for its performance, Landlord shall not be deemed in default if it shall commence such performance within thirty (30) days and thereafter diligently pursues the same to completion. Tenant shall have no rights as a result of any default by Landlord until Tenant gives thirty (30) days' notice to any person who has

a recorded interest pertaining to the Buildings, specifying the nature of the default. Such person shall then have the right to cure such default, and Landlord shall not be deemed in default if such person cures such default within thirty (30) days after receipt of notice of the default, or within such longer period of time as may reasonably be necessary to cure the default. Notwithstanding anything to the contrary in this Lease, Landlord's liability to Tenant for damages resulting from Landlord's breach of any provision or provisions of this Lease shall not exceed the value of Landlord's equity interest in the Buildings and its right to insurance proceeds.

ARTICLE 16 - LANDLORD'S REMEDIES AND RIGHTS

1.51 Termination of Lease. In the event of any default by Tenant, Landlord shall have the right, in addition to all other rights available to Landlord under this Lease now or later permitted by law or equity, to terminate this Lease by providing Tenant with a notice of termination. Upon termination, Landlord may recover as damages the Rent that Landlord would have received had Tenant not defaulted, plus attorneys' fees, court costs, additional brokerage costs, additional design and construction costs, and any other costs reasonably incurred by Landlord to mitigate damages. Landlord agrees to use reasonable efforts to mitigate damages. Landlord's damages include (to the extent not duplicative of the foregoing) the worth, at the time of any award, of the amount by which the unpaid Rent for the balance of the Term after the time of the award exceeds the amount of the rental loss that the Tenant proves could be reasonably avoided. The worth at the time of award shall be determined by discounting to present value such amount at one percent (1%) more than the discount rate of the Federal Reserve Bank in San Francisco in effect at the time of the award. Other damages to which Landlord is entitled shall earn interest at the Interest Rate; provided, however, in no event shall Tenant be responsible to Landlord for consequential damages.

1.52 Continuation of Lease. In accordance with California Civil Code Section 1951.4 (or any successor statute), Tenant acknowledges that in the event Tenant has breached this Lease and abandoned the Premises, this Lease shall continue in effect for so long as Landlord does not terminate Tenant's right to possession (subject to Tenant's right to sublease and/or assign), and Landlord may enforce all its rights and remedies under this Lease, including the right to recover Rent as it becomes due under this Lease. Acts of maintenance or preservation or efforts to relet the Premises or the appointment of a receiver upon initiative of Landlord to protect Landlord's interest under this Lease shall not constitute a termination of Tenant's right to possession. In addition to its other rights under this Lease, Landlord has the remedy described in California Civil Code Section 1951.4 (Landlord may continue this Lease in effect after Tenant's breach and abandonment and recover Rent (as defined in Section 4.1) as it becomes due, if Tenant has the right to sublet or assign, subject only to reasonable limitations).

1.53 Right of Entry. In the event of any default by Tenant, Landlord shall also have the right, with or without terminating this Lease, to enter the Premises and remove all persons and personal property from the Premises, such property being removed and stored in a public warehouse or elsewhere at Tenant's sole cost and expense. No removal by Landlord of any persons or property in the Premises shall constitute an election to terminate this Lease. Such an election to terminate may only be made by Landlord in writing, or decreed by a court of competent jurisdiction. Landlord's right of entry shall include the right to remodel the Premises and re-let the Premises. All costs

incurred in such entry and re-letting shall be paid by Tenant. Rents collected by Landlord from any other tenant which occupies the Premises shall be offset against the amounts owed to Landlord by Tenant. Tenant shall be responsible for any amounts not recovered by Landlord from any other tenant. Any payments made by Tenant shall be credited to the amounts owed by Tenant in the sole order and discretion of Landlord, irrespective of any designation or request by Tenant. No entry by Landlord shall prevent Landlord from later terminating this Lease by written notice.

1.54 Right to Perform. If an Event of Default occurs, Landlord may perform such covenant or condition at its option, after notice to Tenant. All costs incurred by Landlord in so performing shall immediately be reimbursed to Landlord by Tenant, together with interest at the Interest Rate computed from the date incurred by Landlord. Any performance by Landlord of Tenant's obligations shall not waive or cure such default.

1.55 Remedies Not Exclusive. The rights and remedies of Landlord and Tenant set forth herein are not exclusive, and Landlord and Tenant may exercise any other right or remedy available to it under this Lease, at law or in equity except as otherwise expressly set forth herein. Except as expressly provided in this Lease, including Articles 13 and 14 and General Conditions B, F and I, Tenant hereby waives and relinquishes any right which Tenant may have to terminate this Lease or withhold any payment owed by Tenant under this Lease, on account of any damage, condemnation, destruction or state of disrepair of the Premises (including, without limiting the generality of the foregoing, those rights under California Civil Code Sections 1941, 1941.1 and 1942).

1.56 Waiver of Redemption by Tenant. Tenant hereby waives, for itself and all persons claiming by and under Tenant, all rights and privileges which it might have under any present or future law to redeem the Premises or to continue this Lease after being dispossessed or ejected from the Premises. The rights and remedies of Landlord set forth in this Lease are not exclusive, and Landlord may exercise any other right or remedy available to it under this Lease, at law or in equity.

ARTICLE 17 - ATTORNEYS' FEES

If either Landlord or Tenant commences or engages in, or threatens to commence or engage in, any action or litigation or arbitration against the other party arising out of or in connection with this Lease, the Project, including but not limited to, any action for recovery of any payment owed by either party under this Lease, or to recover possession of the Premises, or for damages for breach of this Lease, the prevailing party shall be entitled to have and recover from the losing party reasonable attorneys' fees and other costs incurred in connection with the action and in preparation for said action. This provision shall survive the termination of this Lease.

ARTICLE 18 - SUBORDINATION, ATTORNMENT AND NON-DISTURBANCE

1.57 Obligations of Tenant. Subject to General Condition D, this Lease and the rights granted to Tenant by this Lease shall be subject and subordinate to (a) all present and future ground or underlying leases affecting all or any part of the Buildings and all amendments, renewals, modifications, supplements and extensions of the leases, and (b) all present and future deeds of trust or mortgages affecting or encumbering all or any part of the Buildings and/or any ground or underlying leasehold estate; provided however, that if Landlord elects at any time to have Tenant's

interest in this Lease be or become superior, senior or prior to any such instrument, then upon receipt by Tenant of written notice of such election, Tenant shall immediately execute all necessary and reasonable subordination instruments or other documents confirming the subordination of such mortgage, deed of trust, ground or underlying lease to this Lease.

1.58 Landlord's Right to Assign. Landlord's interest in this Lease may be assigned to any mortgagee or trust deed beneficiary as additional security. Nothing in this Lease shall empower Tenant to do any act without Landlord's prior consent, which consent may be withheld in Landlord's sole discretion, which can, shall or may encumber the title of the owner of all or any part of the Buildings.

1.59 Attornment by Tenant. Subject to General Condition D, in the event of the cancellation or termination of any or all ground or underlying leases affecting all or any part of the Buildings in accordance with its terms or by the surrender thereof, whether voluntary, involuntary or by operation of law, or by summary proceedings, or in the event of any foreclosure of any or all mortgages or deeds of trust encumbering the Buildings by trustee's sale, voluntary agreement, deed in lieu of foreclosure, or by the commencement of any judicial action seeking foreclosure, Tenant, at the request of the then landlord under this Lease, shall attorn to and recognize (a) the ground or underlying lessor, under the ground or underlying lease being terminated or canceled, and (b) the beneficiary or purchaser at the foreclosure sale, as Tenant's landlord under this Lease, and Tenant agrees to execute and deliver at any time upon request of such ground or underlying lessor, beneficiary, purchaser, or their successors, any instrument to further evidence such attornment. Tenant hereby waives its right, if any, to elect to terminate this Lease or to surrender possession of the Premises in the event of any such ground or underlying lease cancellation or termination or mortgage or deed of trust foreclosure.

1.60 Non-Disturbance. Notwithstanding any of the provisions of this Article 18 to the contrary, Tenant shall be allowed to occupy the Premises, subject to the conditions of this Lease, and this Lease shall remain in effect, until an Event of Default occurs, the end of the Term or until Tenant's rights are modified because of an Eminent Domain proceeding pursuant to Article 14, or because of the occurrence of damage and destruction pursuant to Article 13.

ARTICLE 19 - [INTENTIONALLY DELETED]

ARTICLE 20 - HOLDING OVER

1.61 Surrender of Possession. Tenant shall surrender possession of the Premises immediately upon the expiration of the Term or earlier termination of this Lease. If Tenant shall continue to occupy or possess the Premises after such expiration or termination without the consent of Landlord, then unless Landlord and Tenant have otherwise agreed in writing, Tenant shall be a tenant from month-to-month. All the terms, provisions and conditions of this Lease shall apply to this month-to-month tenancy except those terms, provisions and conditions pertaining to the Term, and except that the monthly Base Rent shall be immediately adjusted upward upon the expiration or termination of this Lease to equal (a) for the first two (2) months of holdover, one hundred twenty-five percent (125%) of the monthly Base Rent for the Premises in effect under this Lease during the month which includes the day immediately prior to the date of the expiration or termination of

this Lease, and (b) thereafter, one hundred fifty percent (150%) of such monthly Base Rent. This month-to-month tenancy may be terminated by Landlord or Tenant upon thirty (30) days' prior notice to the non-terminating party. In the event that Tenant fails to surrender the Premises upon such termination or expiration, then Tenant shall indemnify and hold Landlord harmless against all loss or liability resulting from or arising out of Tenant's failure to surrender the Premises, including, but not limited to, any amounts required to be paid to any tenant or prospective tenant who was to have occupied the Premises after said termination or expiration and any related attorneys' fees and brokerage commissions.

ARTICLE 21 - INSPECTIONS AND ACCESS

1.62 Entry by Landlord. Landlord and the Landlord Parties shall have access to the Project and the right to enter the Premises, at all reasonable times for the purpose of (i) inspecting the Premises, (ii) making any alterations, additions, improvements or repairs to the Project which Landlord is required or permitted to perform under this Lease, or (iii) to submit the Premises to prospective purchasers, prospective tenants, encumbrance holders. Landlord shall give not less than twenty-four (24) hours' notice to Tenant of Landlord's intent to enter the Premises, except, however, in an emergency situation, in which case no prior notice shall be required. If Tenant shall not be personally present to open and permit an entry into the Premises at any time when such entry by Landlord is necessary or permitted under this Lease, Landlord may enter by means of a master key without liability to Tenant except for any failure to exercise due care for Tenant's personal property, and without affecting this Lease. Absent an emergency, Landlord shall conduct and schedule all entries and its activities within the Premises to the extent practicable in a manner which will minimize any interruption or interference with Tenant's business operations within the Premises; provided, however, the foregoing shall not obligate Landlord to incur overtime or after normal business hours labor costs in the making of repairs.

1.63 Secured Areas. Notwithstanding anything to the contrary set forth above, Tenant may designate certain areas of the Premises as "**Secured Areas**" should Tenant require such areas for the purpose of securing certain valuable property or confidential information. Landlord may not enter such Secured Areas except in the case of emergency or in the event of a Landlord inspection, in which case Landlord shall provide Tenant with two (2) days' prior written notice of the specific date and time of such Landlord inspection.

ARTICLE 22 - NAME OF BUILDING

The Buildings shall be called any reasonable name from time to time designated by Tenant or its assignee.

ARTICLE 23 - SURRENDER OF LEASE

The voluntary or other surrender of this Lease by Tenant, or a mutual cancellation of this Lease, shall not work a merger, and shall, at the option of Landlord terminate all or any existing subleases or subtenancies, or may, at the option of Landlord, operate as an assignment to it of Tenant's interest in any or all such subleases or subtenancies.

ARTICLE 24 - WAIVER

The waiver by Landlord or Tenant of any term, covenant, agreement or condition contained in this Lease shall not be deemed to be a waiver of any subsequent breach of the same or of any other term, covenant, agreement, condition or provision of this Lease, nor shall any custom or practice which may develop between the parties in the administration of this Lease be construed to waive or lessen the right of Landlord or Tenant to insist upon the performance by the other in strict accordance with all of the terms, covenants, agreements, conditions, and provisions of this Lease. The subsequent acceptance by Landlord of any payment owed by Tenant to Landlord under this Lease, or the payment of Rent by Tenant, shall not be deemed to be a waiver of any preceding breach by Tenant of any term, covenant, agreement, condition or provision of this Lease, other than the failure of Tenant to make the specific payment so accepted by Landlord, regardless of Landlord's or Tenant's knowledge of such preceding breach at the time of the making or acceptance of such payment.

ARTICLE 25 - SALE BY LANDLORD

Subject to the provisions of Exhibit "I-1" [Right of First Offer to Purchase] attached hereto, in the event Landlord shall sell, assign, convey or transfer all or a part of its interest in the Buildings or any part of the Buildings, Tenant agrees to attorn to such transferee, assignee or new owner, and upon consummation of such sale, conveyance or transfer, Landlord shall automatically be freed and relieved from all liability and obligations accruing or to be performed from and after the date of such sale, transfer, or conveyance. In the event of such sale, assignment, transfer or conveyance, Landlord shall transfer to such transferee, assignee or new owner of the Buildings the balance of the Deposit, if any, remaining after lawful deductions and in accordance with California Civil Code Section 1950.7, after notice to Tenant, and Landlord shall thereupon be relieved of all liability with respect to the Deposit.

ARTICLE 26 - NO LIGHT AND AIR EASEMENT

Any diminution or shutting off of light or air by any structure which may be erected on lands adjacent to or in the vicinity of the Buildings shall not affect this Lease, abate any payment owed by Tenant under this Lease or otherwise impose any liability on Landlord.

ARTICLE 27 - FORCE MAJEURE

Except as otherwise expressly provided in this Lease, any prevention, delay or stoppage caused by fire, earthquake, explosion, flood, hurricane, the elements, or any other similar cause beyond the reasonable control of the party from whom performance is required, or any of their contractors; acts of God or the public enemy; actions, restrictions, limitations or interference of governmental authorities or agents; war, invasion, insurrection, rebellion; riots; strikes or lockouts, or inability to obtain necessary materials, goods, equipment, services, utilities or labor shall excuse the performance of such party for a period equal to the duration of such prevention, delay or stoppage; provided, however, in no event shall financial incapability excuse the performance of either party.

ARTICLE 28 - ESTOPPEL CERTIFICATES

Each party shall, at any time and from time to time upon request of the other party, within ten (10) business days following notice of such request from the requesting party, execute, acknowledge and deliver to the requesting party a certificate (the " **Estoppel Certificate**") in writing in the form of the attached Exhibit "F" or in such other commercially reasonable form as Landlord or Tenant or any of their respective lenders, prospective purchasers, lienholders, assignees or subtenants may deem appropriate; provided, however, if the Estoppel Certificate requests information different than that being requested in the form of the attached Exhibit "F". For purposes of this Article 28, an Estoppel Certificate shall not be deemed to be commercially reasonable if it amends or modifies any of the provisions of this Lease and any provision added by an Estoppel Certificate and not clearly "labeled" an Amendment shall be null and void. If the certifying party fails to deliver the Estoppel Certificate within such ten (10) business day period, as the case may be, the requesting party shall so notify the certifying party and, if the certifying party does not deliver the Estoppel Certificate within three (3) business days thereafter, the certifying party's failure to do so shall automatically be deemed to establish conclusively that this Lease is in full force and effect and has not been modified except as may be represented by the requesting party, but shall not be deemed to have cured any default under this Lease by the party failing to provide the Estoppel Certificate.

ARTICLE 29 - RIGHT TO PERFORMANCE

All covenants and agreements to be performed by Landlord or Tenant under this Lease shall be performed by such party at such party's sole cost and expense, except where a specific provision of this Lease provides to the contrary.

ARTICLE 30 - PARKING

1.64 Tenant Parking. Landlord agrees to provide or otherwise make available to Tenant, at all times during the Term, the parking spaces described in this Article 30 for use by Tenant and the Tenant Parties, on the terms and conditions set forth in this Article 30.

1.65 On-Site Parking Spaces. Pursuant to the Work Letter, Landlord shall construct and deliver to Tenant parking spaces located on the Site (the "**On-Site Parking Spaces**") as follows: (i) as part of Landlord's Construction Work with respect to Phase I, sixty (60) On-Site Parking spaces, comprised of (i) twenty-two (22) single parking spaces and (ii) thirty-eight (38) tandem parking spaces (collectively, the "**Phase I On-Site Parking Spaces**"), and (b) as part of Landlord's Construction Work with respect to Phase II, an additional one hundred fifty-three (153) On-Site Parking Spaces, comprised of (i) sixty-seven (67) single parking spaces, and (ii) eighty-six (86) tandem parking spaces (collectively, the "**Phase II On-Site Parking Spaces**"), for total of two hundred thirteen (213) On-Site Parking Spaces, comprised of eighty-nine (89) single parking spaces and one hundred twenty-four (124) tandem parking spaces. Tenant and the Tenant Parties shall have the exclusive use of the applicable On-Site Parking Spaces at all times during the Term, at a charge of $600.00 per On-Site Parking Space per year, which charge shall increase by 3% on a cumulative and compounding basis on each anniversary of the Commencement Date for the Existing Building. Notwithstanding anything contained in this Lease to the contrary, Landlord shall be responsible, at its sole cost and expense, and not as an Operating Expense, for providing any parking attendant(s) that may be required in connection with Tenant's use of the On-Site Parking Spaces.

The costs of maintenance and repair of the On-Site Parking Spaces shall be included as an Operating Expense to the extent provided in Article 4 above, and the On-Site Parking Spaces shall be deemed part of the Project.

1.66 Off-Site Parking Spaces.

(a) Commencing on the Commencement Date for the Existing Building and continuing through the Expiration Date, Landlord shall make available to Tenant, in accordance with the provisions of this Section 30.3, up to five hundred (500) off-site parking spaces (the "**Off-Site Parking Spaces**") for use by Tenant and the Tenant Parties on weekdays from the hours of 7:00 a.m. through 6:00 p.m. (the "**Off-Site Parking Hours**"). Prior to the Commencement Date for the Existing Building, Tenant shall notify Landlord in writing of the number of Off-Site Parking Spaces that Tenant will require on such Commencement Date, and concurrently with Landlord's delivery of the Existing Building, Landlord shall deliver or make available to Tenant such number of parking passes (up to the total amount of Off-Site Parking Spaces) as Tenant shall request. Thereafter, Tenant shall deliver written notice to Landlord from time to time of its need to increase or decrease the number of Off-Site Parking Spaces used by Tenant, as applicable, upon not less than thirty (30) days' notice to Landlord (provided that in no event shall Tenant be entitled to use more than the amount of the Off-Site Parking Spaces that Landlord has agreed to make available to Tenant and the Tenant Parties as provided in this Section 30.3(a)).

(b) Landlord shall be solely responsible to obtain from one or more third parties the right to use and make available for use by Tenant all Off-Site Parking Spaces which Landlord is obligated to provide to Tenant under this Lease. Landlord further covenants and agrees that all such Off-Site Parking Spaces required to be made available by Landlord for use by Tenant pursuant to this Section 30.3 shall, at all times during the Term, be located in parking lots and/or structures that are located no more than two (2) miles from the Project (the "**Permitted Distance**").

(c) Commencing on the applicable Commencement Date, and on January 1 of each year thereafter, Tenant shall pay to Landlord an annual fee for each Off-Site Parking Space provided to Tenant pursuant to this Section 30.3 equal to (i) if any such Off-Site Parking Space is provided by Landlord to Tenant under the terms of the Off-Site Parking Agreement (as defined below), the amount payable by Landlord for such Off-Site Parking Space under the terms of the Off-Site Parking Agreement, but subject to a cap of three percent (3%) on annual increases each January 1 during the Term, regardless of any actual increase in the cost thereof payable by Landlord under the Off-Site Parking Agreement for any such Off-Site Parking Space (with respect to each Off-Site Parking Space, the "**City-Provided Tenant Parking Fee**"), and (ii) if any such Off-Site Parking Space is provided by Landlord to Tenant under any other arrangement, whether on property owned by Landlord, any Affiliate of Landlord or any other third party, the lesser of (A) the actual amount payable by or incurred by Landlord to provide such Off-Site Parking Space or (B) the City-Provided Tenant Parking Fee for each such Off-Site Parking Space. The amount payable by Tenant to Landlord for each Off-Site Parking Space provided to Tenant pursuant to this Section 30.3 and determined in accordance with the foregoing provisions of this Section 30.3(c) shall be referred to herein as the "Off-Site Parking Fee." The Off-Site Parking Fee shall be prorated for any Off-Site

Parking Space that is used by Tenant for any period less than a full calendar year, and to the extent applicable Tenant shall be entitled to a rebate of any annual Off-Site Parking Fees paid in advance.

(d) From and after the Commencement Date for the Existing Building, Landlord shall be responsible for providing and operating (or causing the operation of), at Landlord's sole cost and expense, and not as an Operating Expense, such number of parking shuttles in connection with Tenant's use of the Off-Site Parking Spaces as reasonably determined by Tenant to be necessary for the efficient operation of Tenant's business at the Premises (the "**Parking Shuttles**"). Landlord and Tenant shall cooperate in good faith throughout the Term to determine the schedule for such parking shuttles from time to time during the Term; provided, that at all times during the Term, the Parking Shuttles shall run at least one hour before and one hour after the Off-Site Parking Hours.

(e) Tenant acknowledges that: (i) Landlord has entered into that certain Parking License Agreement dated as of May 25, 2012 (the "**Off-Site Parking Agreement**") with the City of Long Beach (the "**City**"), a copy of which is attached hereto as Exhibit "K", and (ii) to the extent possible, Landlord intends to fulfill obligations under this Section 30.3 with parking spaces available to Landlord under the Off-Site Parking Agreement. Notwithstanding the foregoing, Landlord acknowledges and agrees that (i) the rights granted to Landlord under the Off-Site Parking Agreement may not be sufficient to enable Landlord to fulfill its obligations to Tenant with respect to the Off-Site Parking Spaces pursuant to this Section 30.3, (ii) such rights of Tenant under this Section 30.3 are independent of Landlord's rights under the Off-Site Parking Agreement, and Landlord's inability to fulfill its obligations under this Section 30.3 with parking spaces available to Landlord under the Off-Site Parking Agreement shall in no way limit such obligations set forth herein, and (iii) without limiting any obligations of Landlord under this Section 30.3 or any of Tenant's other rights and remedies under this Lease, if Landlord fails to make the Off-Site Parking Spaces available to Tenant in accordance with the terms of this Section 30.3 above (notwithstanding the terms of the Off-Site Parking Agreement), Tenant shall have the right to independently obtain off-site parking and shall be entitled to prompt reimbursement by Landlord of Tenant's reasonable costs and expenses in connection with obtaining such parking spaces (up to the total number of Off-Site Parking Spaces required to be provided by Landlord hereunder) in excess of the City-Provided Tenant Parking Fee for each such off-site parking space. Additionally, in the event that Landlord fails to perform any of its duties or obligations under the Off-Site Parking Agreement (including, without limitation, the payment of the license fee thereunder), and Tenant has cured such default (which Tenant shall have the right, but not the obligation to do), then Tenant shall be entitled to prompt reimbursement by Landlord of Tenant's reasonable costs and expenses in connection with curing such default.

(f) During the Term, Landlord shall use its best efforts to obtain the City's agreement to modify the Off-Site Parking Agreement so that Landlord at all times is able to fulfill its obligations to Tenant with respect to the Off-Site Parking Spaces pursuant to the terms thereof, including the City's agreement that (1) all parking under the Off-Site Parking Agreement shall be located within the Permitted Distance (including with respect to any relocation rights of the City), (2) Landlord's rights under the Off-Site Parking Agreement shall be transferrable to future owners of the Project, and (3) an ability to extend the term of the Off-Site Parking Agreement for the Extension Periods (as defined in Exhibit "J" attached hereto) no later than six (6) months prior to

the commencement of the applicable Extension Period, at commercially reasonable parking rates; provided, that Landlord's failure to obtain such agreements from the City shall not constitute a default or breach of this Lease so long as Landlord used its best efforts to do so.

(g) Landlord will use commercially reasonable efforts to obtain from the City, within thirty (30) days following the Effective Date, an Estoppel and Agreement Regarding Off-Site Parking Agreement substantially in the form attached hereto as Exhibit "L" (or such other form as may be reasonably acceptable to the City, Landlord, Tenant and the Existing Mortgagee or any other Superior Mortgagee); provided, that Landlord's failure to obtain such agreement from the City shall not constitute a default or breach of this Lease so long as Landlord used commercially reasonable efforts to do so.

ARTICLE 31 - SECURITY SERVICES

Tenant shall be permitted to install its own security system in the Premises and Buildings, including in the stairwells in the core of the Buildings. Tenant shall also have the right install and maintain such additional security equipment, personnel, procedures and systems during the Term, provided that such will not adversely affect the Building Structure and/or Building Systems.

Tenant acknowledges that: (a) Landlord has no obligation to provide any security personnel or measures for the Project, Premises or any portion of the Premises, with the exception of smoke detection, fire alarm and fire safety systems, which Landlord shall initially provide and thereafter maintain as part of the Building Systems; (b) Landlord has made no representation regarding the safety or security of the Premises or any portion thereof; (c) Tenant will be solely responsible for providing any security it deems necessary to protect itself, the Premises, any personal property located on the Premises, and the Tenant Parties in, on, or about the Premises; (d) Landlord is not a guarantor of the security or safety of Tenant, any Tenant Party or their property; and (e) that such security and safety matters are the responsibility of Tenant and the local law enforcement authorities. If Landlord elects, at Landlord's sole and exclusive discretion and at its sole cost and expense, to provide any security personnel or measures (other than what Landlord is obligated to provide and maintain as provided in clause (a) above) to the Premises at any time: (i) Landlord will not be obligated to continue providing such security personnel or measures for any time period and may discontinue the same without notice and liability to Tenant; (ii) Landlord will not be obligated to provide such security personnel or measures with any particular standard of care; and (iii) Tenant acknowledges that any security or safety measures employed by Landlord are for the protection of Landlord's own interests. Tenant assumes all responsibility for the security and safety of Tenant, the Tenant Parties and any personal property owned by the foregoing.

ARTICLE 32 - NOTICES

All notices, requests, consents, approvals, payments in connection with this Lease, or communications that either party desires or is required or permitted to give or make to the other party under this Lease shall only be deemed to have been given, made and delivered, when made or given in writing and personally served, or deposited in the United States mail, certified or registered mail, postage prepaid, or sent by reputable overnight courier (e.g. Federal Express) and addressed to the parties as follows: If to Tenant, at the address(es) as specified for Tenant in

provision (r) of the Fundamental Lease Provisions, or to such other place as Tenant may from time to time designate in a notice to Landlord given in the manner set forth in this Article 32; if to Landlord, at the address(es) specified for Landlord in provision (s) of the Fundamental Lease Provisions or to such other places as Landlord may from time to time designate in a notice to Tenant given in the manner set forth in this Article 32.

ARTICLE 33 - SIGNAGE AND BUILDING IDENTITY

Tenant at Tenant's sole cost and expense, shall have the exclusive right to install signage, including Tenant's corporate name and logo, on and in the Buildings, including (a) exterior signage, (b) on or adjacent to the entrance doors to Tenant's Premises, and (c) any directory board located in the main entrance to each of the Buildings.

Landlord shall, using commercially reasonable efforts at no cost to Landlord, cooperate with Tenant in obtaining the proper governmental approvals and permits for the requested signage. Tenant shall be responsible maintaining Tenant's signage during the Term and for the removal of its signs, and the cost of repairing any resulting damage to the Buildings and/or Premises, upon the termination or assignment of this Lease.

ARTICLE 34 - INTENTIONALLY DELETED

ARTICLE 35 - ROOF RIGHTS

During the Term (as it may be extended), Tenant shall have the right to install and maintain, on the roof of the Buildings, satellite dishes, television antennas, related receiving equipment, related cable connections and any and all other related equipment (collectively, "**Satellite Dish**") required in connection with Tenant's communications and data transmission network. Tenant shall have the right to use "risers" in the Buildings (and to install additional risers if necessary) as long as there is no adverse effect on the Building Structure or Building Systems. In addition to the foregoing, Tenant shall, at its option exercisable by a thirty (30) days' notice to Landlord, have the right to use space on the roof of the Buildings for installation of any additional HVAC equipment required by Tenant and any and all related equipment to accommodate any such additional HVAC requirements (collectively, "**Supplemental HVAC Unit(s)**"), provided that such will not adversely affect the Building Structure and/or Building Systems. The exact location of any such Satellite Dish or Supplemental HVAC Unit(s) shall be mutually acceptable to Landlord and Tenant and Tenant shall have secured the approval of all governmental authorities and all permits required by governmental authorities having jurisdiction over such approvals and permits for the Satellite Dish and the Supplemental HVAC Unit(s), and shall provide copies of such approvals and permits to Landlord, prior to commencing any work with respect to such Satellite Dish and the Supplemental HVAC Unit(s). Tenant shall pay for any and all costs and expenses in connection with the installation, maintenance, use and removal of the Satellite Dish and the Supplemental HVAC Unit(s), but in no event shall Tenant be obligated to pay Landlord any rental for that portion of the roof of the Buildings on which the Satellite Dish and the HVAC Unit shall be located. Furthermore, Tenant shall, at its sole and absolute discretion when it deems it as necessary or appropriate to do so, repair and maintain the Satellite Dish and Supplemental HVAC Unit(s). Upon the expiration of the Term, Tenant shall,

if requested by Landlord, remove the Satellite Dish and Supplemental HVAC Unit(s)and repair any damage to the roof resulting therefrom.

ARTICLE 36 - SECURITY DEPOSIT

Tenant in recognition of its financial standing and reputation, shall not be obligated to provide a security deposit.

ARTICLE 37 - TENANT'S FINANCIAL STATEMENTS

In the event that Landlord intends to finance the Building(s), Landlord shall deliver written notice of such intention to Tenant, which notice shall include a list of potential lenders (the " **Potential Lenders**") with respect to such financing, and Tenant shall, within ten (10) business days following Tenant's receipt of such notice, deliver to Landlord consolidated annual financial statements (audited) for the most recent two (2) years. Unless publically disclosed by Tenant, all such financial statements delivered by Tenant to Landlord and/or its Potential Lenders shall be kept strictly confidential.

ARTICLE 38 - MISCELLANEOUS

1.67 Authorization to Sign Lease. If Tenant or Landlord is a corporation, each individual executing this Lease on behalf of such party represents and warrants that he/she is duly authorized to execute and deliver this Lease on behalf of such party. If such party is a partnership or trust, each individual executing this Lease on behalf of such party represents and warrants that he/she is duly authorized to execute and deliver this Lease on behalf of such party in accordance with the terms of such entity's partnership agreement or trust agreement, respectively.

1.68 Entire Agreement. It is understood and acknowledged that there are no oral agreements between the parties hereto affecting this Lease and this Lease supersedes and cancels any and all previous negotiations, arrangements, brochures, agreements and understandings, if any, between the parties hereto or displayed by Landlord to Tenant with respect to the subject matter thereof, and none thereof shall be used to interpret or construe this Lease. This Lease, and the exhibits and schedules attached hereto, contain all of the terms, covenants, conditions, warranties and agreements of the parties relating in any manner to the rental, use and occupancy of the Premises and shall be considered to be the only agreements between the parties hereto and their representatives and agents. None of the terms, covenants, conditions or provisions of this Lease can be modified, deleted or added to except in writing signed by the parties hereto. All negotiations and oral agreements acceptable to both parties have been merged into and are included herein. There are no other representations or warranties between the parties, and all reliance with respect to representations is based totally upon the representations and agreements contained in this Lease.

1.69 Separability and Survivability. The illegality, invalidity or unenforceability of any term, condition, or provision of this Lease shall in no way impair or invalidate any other term, provision or condition of this Lease, and all such other terms, provisions and conditions shall remain in full force and effect. In the event that Landlord or Tenant lawfully terminate this Lease, the provisions of this Lease shall otherwise remain in effect to the extent necessary to allow Landlord

and Tenant to enforce rights and obligations accruing prior to the termination of this Lease and attributable to the period of time prior to the termination of this Lease.

1.70 Gender and Headings; Governing Law. The words "**Landlord**" and "**Tenant**" as used herein shall include the plural as well as the singular and, when appropriate, shall refer to action taken by or on behalf of Landlord or Tenant by their respective employees, agents, or authorized representatives. Words in masculine gender include the feminine and neuter. If there be more than one Tenant, the obligations hereunder imposed upon Tenant shall be joint and several. The section and article headings of this Lease are not a part of this Lease and shall have no effect upon the construction or interpretation of any part hereof. Subject to the provisions of Articles 11 and 25, and except as otherwise provided to the contrary in this Lease, the terms, conditions and agreements of this Lease shall apply to and bind the heirs, successors, legal representatives and permitted assigns of the parties hereto. This Lease shall be governed by and construed pursuant to the laws of the State of California.

1.71 Exhibits. Exhibits "A-1," "A-2," "B," "C," "D," "E," "F," "G," "H," "I-1," "I-2," "J," "K" and "L" attached to this Lease, are hereby incorporated by this reference and made a part of this Lease.

1.72 Transportation System Management Program. Tenant hereby covenants and agrees, at its sole cost and expense, to participate in and cooperate with the requirements of any and all transportation system management programs adopted for the Buildings and/or the area in which the Buildings are located by any governmental entity having jurisdiction.

1.73 Quiet Enjoyment. Landlord covenants and agrees that Tenant shall peaceably and quietly hold, occupy and enjoy the Premises during the Term without hindrance or molestation from Landlord subject to the terms and provisions of this Lease.

1.74 Recordation. Landlord and Tenant agree that in no event and under no circumstances shall this Lease be recorded by Tenant; provided, however, that concurrently with the Effective Date, Landlord and Tenant shall execute and acknowledge and promptly thereafter cause to be recorded in Office of the County Recorder, Los Angeles County, California, the Memorandum of Lease (With Certain Purchase Rights) in the form attached hereto as Exhibit "E" (the " **Memo of Lease**"). Tenant shall pay all costs and expenses of recording the Memo of Lease (including any documentary transfer taxes payable in connection therewith). Unless Tenant shall purchase the Project pursuant to Right of First Offer to Purchase set forth on Exhibit "I-1" or the Purchase Option set forth on Exhibit "I-2", upon the expiration or earlier termination of the Term, Tenant shall fully cooperate with Landlord in removing and shall execute such documents and instruments as are necessary to fully remove from title to the Project any encumbrance thereto created by the Memo of Lease, and shall indemnify, defend and hold harmless Landlord from and against any Claims suffered by Landlord as a result of Tenant's failure or refusal to cooperate in the removal thereof. The Memo of Lease is intended to make as a matter of record with respect to the Project the existence of this Lease and Tenant's purchase rights contained herein.

1.75 Cumulative Remedies. No remedy or election provided, allowed or given by any provision of this Lease shall be deemed exclusive unless so indicated, but shall, whenever possible, be cumulative with all other remedies in law or equity.

1.76 Brokers. Other than the broker(s) set forth in provision (t) of the Fundamental Lease Provisions (" **Broker**") each party represents and warrants that it has not dealt with any other real estate broker or agent in connection with this Lease. Each party shall indemnify the other and hold it harmless from any cost, expense, or liability (including costs of suit and reasonable attorneys' fees) for any compensation, commission or fees claimed by any other real estate broker or agent, other than Broker, in connection with this Lease or its negotiation by reason of any act or statement of the indemnifying party. Landlord agrees that it will pay the Broker a brokerage commission pursuant to the terms of a separate agreement between Landlord and the Broker and to the extent such commission is not paid when due, Tenant shall have the right, but not the obligation, to pay such commission to the Broker, and deduct the amount of same from the Rents next due and owing under this Lease, together with interest at the Interest Rate (computed from the date such commission was due until the date of the offset).

1.77 Hazardous Materials.

1.77.1 Generally. Tenant and Landlord shall each comply with all Environmental Laws (as defined below) relating to industrial hygiene and environmental conditions on, under or about the Buildings and Project including, but not limited to, soil and ground water conditions in accordance with the terms of this Lease. Without limiting the generality of the foregoing, Tenant and Landlord shall not transport, use, store, maintain, generate, manufacture, handle, dispose, release or discharge any Hazardous Material (as defined in Section 38.12 below) upon or about the Buildings, nor permit their respective Tenant Parties or Landlord Parties to engage in such activities upon or about the Buildings. However, the foregoing provisions shall not prohibit the transportation to and from, and the use, storage, maintenance and handling within, the Premises of substances customarily used in connection with normal office use provided: (a) such substances shall be used and maintained only in such quantities as are reasonably necessary for the permitted use of the Premises set forth in provision (q) of the Fundamental Lease Provisions, strictly in accordance with Applicable Laws and the manufacturers' instructions therefor, (b) such substances shall not be disposed of, released or discharged on the Buildings, and shall be transported to and from the Premises in compliance with all Environmental Laws, (c) if any Environmental Laws requires that any such substances be disposed of separately from ordinary trash, Tenant shall make arrangements at Tenant's expense for such disposal directly with a qualified and licensed disposal company at a lawful disposal site, and shall ensure that disposal occurs frequently enough to prevent unnecessary storage of such substances in the Premises, and (d) any remaining such substances shall be completely, properly and lawfully removed from the Buildings upon expiration or earlier termination of this Lease.

1.77.2 Notice of Release and Investigation. If, during the Lease Term (including any extensions), either Landlord or Tenant becomes aware of (i) any actual or threatened release of any Hazardous Material on, under, or about the Premises, Building or Project, or (ii) any inquiry, investigation, proceeding, or claim by any government agency or other person regarding the presence

of Hazardous Material on, under, or about the Premises, Building or Project, such party shall give written notice to the other of the release or investigation within five (5) days after learning of it and shall simultaneously furnish to the other party copies of any claims, notices of violation, reports, or other writings received by the party providing notice that concern such release or investigation.

1.77.3 Remediation Obligations; Tenant's Rights to Abatement on Cleanup by Landlord .

(a) If the presence of any Hazardous Material brought onto the Premises, Building or Project by either Landlord or Tenant or by their respective Landlord Parties or Tenant Parties results in contamination of the Premises, Building or Project, that party shall promptly take all necessary actions, at the party's sole expense (and with respect to Landlord, not as an Operating Expense), to return the Premises, Building or Project to the condition that existed before the introduction of such Hazardous Material. If Tenant is the responsible party, Tenant shall first obtain Landlord's approval of the proposed remedial action which it is obligated to undertake pursuant to the immediately preceding sentence, which shall not be unreasonably withheld, conditioned or delayed. This provision does not limit any indemnification obligations of the parties set forth in Article 12 or Tenant's rights under General Condition J.

(b) Without limiting Tenant's rights and remedies under General Condition J, if Landlord undertakes any cleanup, detoxification, or similar action, whether or not required by any government or quasi-government agency, as a result of the presence, release, or disposal in or about the Building or Project of any Hazardous Material, and that action requires that Tenant be denied access to the Premises or Tenant is otherwise unable to conduct its business on the Premises for a period of greater than twenty-four (24) hours, Base Rent and Additional Rent shall be abated for the period that Tenant is unable to conduct its business at the Premises. Subject to Section 12.2(a), the costs of any Hazardous Material testing, cleanup or remediation undertaken by Landlord during the Lease Term shall be borne by Landlord, shall not be included as an Operating Expense and shall not be the obligation of Tenant.

1.78 Definitions of "Hazardous Material" and "Environmental Laws". As used herein, the term "**Hazardous Material**" shall mean any hazardous or toxic substance, material, or waste that is or becomes regulated by the United States, the State of California, or any local government authority having jurisdiction over the Building or Project. Hazardous Material includes:

(a) Any "hazardous substance," as that term is defined in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) (42 United States Code Sections 9601-9675);

(b) "Hazardous waste," as that term is defined in the Resource Conservation and Recovery Act of 1976 (RCRA) (42 United States Code Sections 6901-6992k);

(c) Any pollutant, contaminant, or hazardous, dangerous, or toxic chemical, material, or substance, within the meaning of any other applicable federal, state, or local law,

regulation, ordinance, or requirement (including consent decrees and administrative orders imposing liability or standards of conduct concerning any hazardous, dangerous, or toxic waste, substance, or material, now or hereafter in effect);

(d) Petroleum products;

(e) Radioactive material, including any source, special nuclear, or byproduct material as defined in 42 United States Code Sections 2011-2297g-4;

(f) Asbestos in any form or condition; and

(g) Polychlorinated biphenyls (PCBS) and substances or compounds containing PCBS.

As used in this Lease, "**Environmental Laws**" means all Applicable Laws in effect during the Lease Term that relate to public health and safety and protection of the environment, including those Applicable Laws identified above in this Section 38.12.

[signatures on following page]

IN WITNESS WHEREOF, the parties have executed this Lease as of the date first set forth above, acknowledged that each party has carefully read each and every provision of this Lease, that each party has freely entered into this Lease of its own free will and volition, and that the terms, conditions and provisions of this Lease are commercially reasonable as of the day and year first above written.

MEMORANDUM OF LEASE AND, RIGHT OF FIRST OFFER TO PURCHASE

THIS MEMORANDUM OF LEASE AND RIGHT OF FIRST OFFER TO PURCHASE (this "Memorandum") is effective as of [_____], 2013, by and between 6th & PINE DEVELOPMENT, LLC, a California limited liability company ("Landlord"), and MOLINA HEALTHCARE, INC., a Delaware corporation ("Tenant").

1. Lease. Landlord and Tenant have entered into that certain unrecorded Office Building Lease – Full Service Gross – Single Tenant Building(s) dated [_____], 2013 (as amended to date and as the same may hereafter be amended, modified or supplemented from time to time in accordance with the terms thereof, collectively, the "Lease"), pursuant to which Landlord has leased and does hereby lease to Tenant, and Tenant has leased and does hereby lease from Landlord, the premises more particularly described in the Lease and consisting of certain real property more particularly described on Exhibit "A" attached hereto (the "Premises"). Capitalized terms used but not defined herein shall have the meanings ascribed to such terms in the Lease.

2. Term of Lease. The fixed term of the Lease is scheduled to commence on [June 1, 2013] **[To be confirmed]**, and expires on December 31, 2024, unless earlier terminated pursuant to the provisions of the Lease. Tenant has the option, subject to the terms of the Lease, to extend the term of the Lease by two (2) sequential renewal terms of five (5) years each.

3. Rights to Purchase the Premises. Tenant has a right of first offer to purchase the Premises (together with all appurtenant rights with respect thereto) for the first five (5) years of the term, and an option to purchase the Premises (together with all appurtenant rights with respect thereto) thereafter, in each case upon and subject to the terms and conditions set forth in the Lease (collectively, the "Purchase Rights").

4. Miscellaneous. The purpose of this Memorandum is solely to give notice of the existence of the Lease, all the terms of which are incorporated herein by this reference, and the Purchase Rights contained therein. This Memorandum shall not modify or amend any of the provisions of the Lease, including the terms and conditions of any Purchase Rights contained therein.

To the extent that any provision of this Memorandum conflicts with any provision of the Lease, the provisions of the Lease shall control. This Memorandum may be executed in counterparts, each of which shall be an original, but all of which, together, shall constitute one and the same instrument. This Memorandum shall automatically terminate upon the expiration or earlier termination of the Lease.

[Signature Page Follows on Next Page]

IN WITNESS WHEREOF, the parties hereto have executed this Memorandum as of the date and year first above written.

EXHIBIT "I-1"

RIGHT OF FIRST OFFER TO PURCHASE

1. ROFO. Provided no Event of Default by Tenant has occurred and is continuing hereunder, if at any time during the period from the Effective Date through the day prior to the fifth (5th) anniversary of the Effective Date (the "**5th Anniversary of the Effective Date**"), Landlord desires to sell the Project (which for all purposes under this Exhibit "I-1" shall include all of Landlord's right, title and interest in and to the Off-Site Parking Spaces under the Off-Site Parking Agreement to the extent that such rights are transferable, it being acknowledged that if consent is required to transfer the same, each party shall cooperate in good faith to seek such consent), or any portion thereof, Landlord shall in writing notify Tenant (a "**Sale Notice**") of Landlord's intent to sell the Project or portion thereof identified in the Sale Notice. The Sale Notice shall be given prior to any offer or counteroffer (or acceptance of an offer or counteroffer) by Landlord to sell the Project (or any portion thereof) to a third party.

2. Tenant's Notice of Intent to Purchase. Upon receipt of a Sale Notice by Tenant, Tenant shall have fifteen (15) days to notify Landlord in writing of Tenant's intent to purchase the Project or the portion thereof specified in Landlord's Sale Notice. If Tenant timely notifies Landlord of its intent to purchase the Project or portion thereof specified in Landlord's Sale Notice, the parties shall proceed pursuant to Paragraph 3 below. If Tenant does not so timely notify Landlord, or notifies Landlord that it does not intend to purchase the Project or portion thereof specified in Landlord's Sale Notice (the "**Sale Portion**"), Landlord may proceed pursuant to Paragraph 4 below.

3. Exclusive Negotiations. If Tenant timely and properly notifies Tenant of its intent to purchase the Project or Sale Portion, Tenant and Landlord shall, fifteen (15) days after Tenant's notice, enter into exclusive negotiations to attempt to reach a mutually satisfactory agreement as to price and terms of the sale. Such negotiation process shall include at least one good faith written offer by Tenant (the "**Tenant Offer**") of the price at which Tenant proposes to purchase the Project or Sale Portion. If agreement as to price is reached during such fifteen (15) day exclusive negotiation period, the parties shall have an additional fifteen (15) day period to negotiate in good faith for and to enter into and deliver a mutually acceptable and commercially reasonable purchase and sale agreement and open a purchase and sale escrow.

4. Third Party Sale by Landlord. If (a) Tenant fails to timely give the notice provided for in Paragraph 2 above (or notifies Landlord that Tenant does not intend to purchase the Project or Sale Portion), or (b) Tenant and Landlord fail to reach an agreement as to price within the forty-five (45) day exclusive negotiation period pursuant to Paragraph 3 above or (c) Tenant and Landlord reach an agreement as to price during the exclusive negotiation period but fail to execute and deliver a purchase agreement within the thirty (30) day period pursuant to Paragraph 3 (after negotiating in good faith therefor), then, in any such event, Landlord shall be free to sell the Project or Sale Portion to any third party buyer, but only at a price greater than the purchase price contained in the last Tenant Offer by Tenant pursuant to Paragraph 3 above (the "**Tenant Price**").

5. Second Sale Notice. Notwithstanding the provisions of Paragraph 4 above, if Tenant shall have provided to Landlord at least one Tenant Offer during the exclusive negotiation period and either (a) Landlord has not executed a definitive purchase agreement with a third party buyer to sell the Project or Sale Portion within 180 days after the expiration of the forty-five (45) day period in Paragraph 3 above (with no agreement as to price) or 180 days after the expiration of the thirty (30) day period in Paragraph 3 above (with no execution of a purchase and sale agreement, after negotiating in good faith therefor), as applicable, or (ii) Landlord proposes to sell the Project or Sale Portion at a price equal to or less than the Tenant Price, then, in either such event, Landlord shall provide to Tenant a Sale Notice pursuant to Paragraph 2 above and Tenant shall have the same right specified in Paragraph 2 to notify Landlord of its intent to purchase, except that, in the event clause (ii) of this Paragraph 5 is applicable, (1) Tenant shall have ten (10) days from receipt of Landlord's second Sale Notice to give the notice therein described, and (2) for purposes of Paragraph 3 above, the agreed upon price shall be the Tenant Price and the parties shall have thirty (30) days after Tenant notifies Landlord of its intent to purchase to negotiate in good faith for and enter into and deliver a mutually acceptable and commercially reasonable purchase and sale agreement and open a purchase and sale escrow. If Tenant shall not have provided to Landlord at least one Tenant Offer during the exclusive negotiation period, then the provisions of this Paragraph 5 shall not apply, there shall be no second Sale Notice and Landlord shall be free to sell the Project or Sale Portion to any third party at any price and upon any terms agreed upon by Landlord and such third party.

6. Closing under ROFO. If (a) Tenant timely and properly notifies Landlord of its intent to purchase pursuant to Paragraph 2 above, Tenant and Landlord reach agreement upon a sale price and execute and deliver a purchase and sale agreement pursuant to Paragraph 3 above or (b) clause (ii) of Paragraph 5 above applies and Tenant timely notifies Landlord of Tenant's intent to purchase in response to Landlord's second Sale Notice, which purchase shall be at the Tenant Price, and Landlord and Tenant execute a purchase and sale agreement pursuant to subclause (2) of clause (ii) of Paragraph 5 above, then Tenant and Landlord shall proceed to close the sale of the Project or Sale Portion. Such sale shall be for cash at close of a purchase and sale escrow at the price agreed upon pursuant to Section 3 above or the Tenant Price, as applicable. In addition, in connection with such sale:

(a) A purchase and sale escrow (the "**Escrow**") shall be opened with a mutually acceptable title/escrow company in Los Angeles or Orange County, California (the "**Escrow Agent**") within five (5) business days after the execution and delivery of a purchase and sale agreement;

(b) Tenant shall have an agreed thirty (30) day period to conduct a due diligence review of the Project, which shall be limited solely to a review of title, environmental, entitlement and structural matters. Provided Tenant does not terminate the Escrow within the due diligence period, Escrow shall close within ten (10) days following the expiration of the due diligence period;

(c) The purchase price to be paid shall be paid by delivery of immediately available funds at close of the Escrow;

(d) The Project shall be sold to Tenant "AS IS" and with no representations and warranties by Landlord, except as set forth in the purchase and sale agreement. Landlord shall, however, assign to Tenant all design and construction warranties and rights obtained by Landlord and all other ongoing rights of Landlord under the design, development and construction documents with respect to the Project;

(e) Landlord will pay the premium for a standard owner's CLTA or ALTA title policy with respect to the Project in the amount of the purchase price therefor and the cost of any endorsements required to cure title defects. Tenant shall be responsible for all additional premiums and costs for an ALTA extended coverage policy of title insurance (i.e., the premium difference between a CLTA or ALTA standard policy and an ALTA extended coverage policy), plus the cost of any endorsements required by Tenant (other than those required to cure title defects). Landlord shall convey title to the Project to Tenant free and clear of any and all mortgages, deeds of trust or other monetary liens created or suffered by, through or under Landlord, other than any such deeds of trust or other monetary liens that Tenant has agreed in its sole discretion to assume or take title subject to and for which an appropriate reduction in the purchase price has been made at the closing of the Escrow; and

(f) Rent shall be prorated at close of Escrow. Landlord shall pay the documentary transfer tax with respect to the grant deed, the recording fee for the deed and one-half of escrow agent's fees and costs. Tenant shall pay the recording fees for the mutual cancellation of any recorded memorandum of this Lease, all recording fees for any mortgage or deed of trust placed on the Project by Tenant and one-half of escrow agent's fees and costs. All other costs and fees in connection with the Escrow shall be paid in accordance with customary escrow practice in Los Angeles County, California.

7. ROFO Not Personal. The rights granted to Tenant in this Exhibit "I-1" are not personal to Tenant and shall be for the benefit of, and the rights granted herein may be exercised by, any assignee of Tenant's interest in this Lease permitted under the terms hereof; provided, however, that the rights granted to Tenant in this Exhibit "I-1" are not assignable separate and apart from Tenant's interest in this Lease.

8. Terms. All terms used in this Exhibit "I-1" unless otherwise defined in this Exhibit shall have the same meaning as the terms defined elsewhere in this Lease.

EXHIBIT "I-2"

PURCHASE OPTION

1. Option. Provided no Event of Default by Tenant has occurred and is continuing hereunder at the time of the exercise of the option set forth herein, Tenant may elect to purchase the entire Project (which for all purposes under this Exhibit "I-2" shall include all of Landlord's right, title and interest in and to the Off-Site Parking Spaces under the Off-Site Parking Agreement to the extent that such rights are transferable, it being acknowledged that if consent is required to transfer the same, each party shall cooperate in good faith to seek such consent) at any time from and after 5 th Anniversary of the Effective Date (as defined in Exhibit "I-1") and continuing for the balance of the Term (the "**Purchase Option**"), by delivering to Landlord before the end of the Term a written notice (the "**Purchase Option Notice**") of such election. The Purchase Option shall be exercisable only as to the entire Project, and shall not be exercisable as to less than the entire Project.

2. Option Not Personal. The Purchase Option set forth in this Exhibit "I-2" is not personal to Tenant and may be exercised by any assignee of Tenant's interest in this Lease permitted under the terms hereof; provided, however, that, the Purchase Option is not assignable separate and apart from Tenant's interest this Lease.

3. Purchase Price. The purchase price shall be one hundred percent (100%) of the Fair Market Value (as hereinafter defined) (the "**Option Price**").

4. Fair Market Value. For the purposes of this Exhibit "I-2" the term "**Fair Market Value**" shall mean the gross sales price that the Project would bring in a competitive and open market as of the date the Purchase Option Notice was delivered to Landlord under all conditions requisite to a fair sale with a buyer and seller each acting prudently and knowledgeably. The determination of "Fair Market Value" shall assume that: (a) the Project is sold for its highest and best use as of the date the Purchase Option Notice was delivered to Landlord; (b) the sales price is not affected by undue stimulus; (c) buyer and seller are equally motivated; (d) both buyer and seller are well informed or well advised and are acting in what it considers to be in its own best interest; (e) a reasonable time is allowed for the exposure on the open market; (f) payment of the purchase price of Project is made in cash by Buyer on the closing date; and (g) taking into account specifically the parking rights for the benefit of the Project.

Landlord shall determine the Fair Market Value by using its good faith judgment. Landlord shall provide written notice of such amount within thirty (30) days after Tenant delivers the Purchase Option Notice. Tenant shall have thirty (30) days ("**Tenant's FMV Review Period**") after receipt of Landlord's notice of Fair Market Value within which to accept such Fair Market Value in writing. In the event Tenant fails to accept the Fair Market Value proposed by Landlord, Landlord and Tenant shall attempt to agree upon such Fair Market Value, using good faith efforts. If Landlord and Tenant fail to reach agreement within fifteen (15) days following Tenant's FMV Review Period ("**Outside FMV Agreement Date**"), then each party shall place in a separate sealed envelope their final proposal as to Fair Market Value and such determination shall be submitted to arbitration in accordance with subsections (a) through (e) below. Failure of Tenant to so elect in writing within

Tenant's FMV Review Period shall conclusively be deemed its disapproval of the Fair Market Value determined by Landlord.

In the event that Landlord fails to timely generate the initial written notice of Landlord's opinion of the Fair Market Value which triggers the negotiation period of this Paragraph 4, then Tenant may commence such negotiations by providing the initial notice, in which event Landlord shall have fifteen (15) days ("**Landlord's FMV Review Period**") after receipt of Tenant's notice of the Fair Market Value within which to accept such Fair Market Value. In the event Landlord fails to accept in writing such Fair Market Value proposed by Tenant, then such proposal shall be deemed rejected, and Landlord and Tenant shall attempt in good faith to agree upon such Fair Market Value, using good faith efforts. If Landlord and Tenant fail to reach agreement within fifteen (15) days following Landlord's FMV Review Period (which shall be, in such event, the "Outside FMV Agreement Date" in lieu of the above definition of such date), then each party shall place in a separate sealed envelope their final proposal as to Fair Market Value and such determination shall be submitted to arbitration in accordance with subsections (a) through (e) below.

(a) Landlord and Tenant shall meet with each other within five (5) business days of the Outside FMV Agreement Date and exchange the sealed envelopes and then open such envelopes in each other's presence. If Landlord and Tenant do not mutually agree upon the Fair Market Value within three (3) business days of the exchange and opening of envelopes, then, within ten (10) business days of the exchange and opening of envelopes Landlord and Tenant shall agree upon and jointly appoint a single arbitrator who shall (i) by profession be a commercial real estate appraiser, (ii) be a Member of the Appraisal Institute (or any successor organization thereto) and (iii) have been active over the five (5) year period ending on the date of such appointment in the appraisal of Comparable Buildings (as defined in Exhibit "J"). Neither Landlord nor Tenant shall consult with such arbitrator directly or indirectly as to his or her opinion as to Fair Market Value prior to the appointment. The determination of the arbitrator shall be limited solely to the issue of whether Landlord's or Tenant's submitted Fair Market Value for the Project is the closer to the actual Fair Market Value as determined by the arbitrator, taking into account the definition of Fair Market Value as set forth in and the other requirements of this Paragraph. Such arbitrator may hold such hearings and require such briefs as the arbitrator, in his or her sole discretion, determines is necessary. In addition, Landlord or Tenant may submit to the arbitrator with a copy to the other party within five (5) business days after the appointment of the arbitrator any market data and additional information that such party deems relevant to the determination of Fair Market Value (" **FMV Data**") and the other party may submit a reply in writing within five (5) business days after receipt of such FMV Data.

(b) The arbitrator shall, within thirty (30) days of his or her appointment, reach a decision as to whether the parties shall use Landlord's or Tenant's submitted Fair Market Value, and shall notify Landlord and Tenant of such determination.

(c) The decision of the arbitrator shall be binding upon Landlord and Tenant, except as provided in Paragraph 5 below.

(d) If Landlord and Tenant fail to agree upon and appoint an arbitrator, then the appointment of the arbitrator shall be made by the Presiding Judge of the Superior Court of Los Angeles, California, or, if he or she refuses to act, by any judge having jurisdiction over the parties.

(e) The cost of arbitration shall be paid by Landlord and Tenant equally.

5. Rescission by Tenant following Fair Market Value Determination. In the event that Tenant objects to the Fair Market Value as determined by the arbitration provision specified in Paragraph 4 above, Tenant may elect to rescind its Purchase Option Notice at any time within ten (10) business days following the establishment of the Fair Market Value as determined by such arbitration. In the event Tenant elects to rescind such notice, (i) Tenant shall reimburse Landlord for its reasonable attorneys' fees and reasonable costs associated with such arbitration and shall have no obligation to purchase the Project and (ii) the Purchase Option provided for in this Exhibit "I-2" shall lapse and terminate and thereafter not be exercisable by Tenant or any assignee of Tenant's interest under this Lease.

6. Closing under Purchase Option. Unless Tenant exercises its rescission right pursuant to Paragraph 5 above, promptly after the Fair Market Value is determined pursuant to this Exhibit "I-2" (whether by agreement of the parties or by arbitration), negotiate in good faith for and enter into and deliver a mutually acceptable and commercially reasonable purchase and sale agreement and open a purchase and sale escrow for the purchase and sale of the Project. Such sale shall be for cash at close of a purchase and sale escrow at the Option Price. In addition, in connection with such sale:

(a) An Escrow (as defined in Exhibit "I-2" shall be opened with a mutually acceptable title/escrow company in Los Angeles or Orange County, California (the "**Escrow Agent**") within ten (10) business days after the execution and delivery of a purchase and sale agreement;

(b) Tenant shall have an agreed thirty (30) day period to conduct a due diligence review of the Project, which shall be limited solely to a review of title, environmental, entitlement, structural and parking matters. Provided Tenant does not terminate the Escrow within the due diligence period, Escrow shall close within ten (10) days following the expiration of the due diligence period;

(c) The Option Price to be paid shall be paid by delivery of immediately available funds at close of the Escrow;

(d) The Project shall be sold to Tenant "AS IS" and with no representations and warranties by Landlord, except as set forth in the purchase and sale agreement. Landlord shall, however, assign to Tenant all design and construction warranties and rights obtained by Landlord and all other ongoing rights of Landlord under the design, development and construction documents with respect to the Project;

(e) Landlord will pay the premium for a standard owner's CLTA or ALTA title policy with respect to the Project in the amount of the purchase price therefor and the cost

of any endorsements required to cure title defects. Tenant shall be responsible for all additional premiums and costs for an ALTA extended coverage policy of title insurance (i.e., the premium difference between a CLTA or ALTA standard policy and an ALTA extended coverage policy), plus the cost of any endorsements required by Tenant (other than those required to cure title defects). Landlord shall convey title to the Project to Tenant free and clear of any and all mortgages, deeds of trust or other monetary liens created or suffered by, through or under Landlord, other than any such deeds of trust or other monetary liens that Tenant has agreed in its sole discretion to assume or take title subject to and for which an appropriate reduction in the Option Price has been made at the closing of the Escrow; and

(f) Rent shall be prorated at close of Escrow. Landlord shall pay the documentary transfer tax with respect to the grant deed, the recording fee for the deed and one-half of escrow agent's fees and costs. Tenant shall pay the recording fees for the mutual cancellation of any recorded memorandum of this Lease, all recording fees for any mortgage or deed of trust placed on the Project by Tenant and one-half of escrow agent's fees and costs. All other costs and fees in connection with the Escrow shall be paid in accordance with customary escrow practice in Los Angeles County, California

7. Terms. All terms used in this Exhibit "I-2" unless otherwise defined in this Exhibit shall have the same meaning as the terms defined elsewhere in this Lease.

EXHIBIT "J"

OPTIONS TO EXTEND

1. Options. Provided no Event of Default by Tenant has occurred and is continuing at the time of the exercise of the options set forth herein, Tenant may elect to extend the Term ("**Extension Options**") for all of the Premises for two (2) additional periods of five (5) years each (collectively, the "**Extension Periods**"; individually, the "**First Extension Period**" and the "**Second Extension Period**"), by delivering to Landlord not later than twelve (12) months nor earlier than eighteen (18) months before the end of the initial Term or the First Extension Period, as applicable, a written notice (the "**Option Notice**") of such election. The First Extension Period shall commence on the day immediately following the last day of the Term and the Second Extension Period shall commence on the day immediately following the last day of the First Extension Period, and shall be subject to all the terms and conditions of this Lease except that the Base Rent for the applicable Extension Period shall be determined in accordance with Paragraph 3 below.

2. Options Not Personal. The Extension Options set forth herein are not personal to Tenant and may be exercised by any assignee of Tenant's interest in this Lease permitted under the terms hereof; provided, however, that, Extension Options are not assignable separate and apart from Tenant's interest this Lease.

3. Base During Extension Periods. The Base Rent for each Extension Period shall be one hundred percent (100%) of the Fair Market Rental Rate (as hereinafter defined) as of the commencement of the applicable Extension Period and the Base Year shall be the first (1st) calendar year of such Extension Period.

4. Fair Market Rental Rate. For the purposes of this Exhibit "J" the term "**Fair Market Rental Rate**" shall mean the annual effective rent per rental square foot, plus annual percentage increases therein, that landlords of Comparable Buildings (as defined below) have accepted in current transactions (i.e., if available, those transactions where the essential economic terms and conditions were agreed upon six to twelve (6 to 12) months prior to Tenant's exercise of the applicable Extension Period or such other then most recent transactions as are available for comparison) between non-affiliated parties from new, non-expansion (unless the expansion is pursuant to a comparable definition of Fair Market Rental Rate), non‑renewal (unless the renewal is pursuant to a comparable definition of Fair Market Rental Rate), and non‑equity tenants of comparable credit-worthiness, for Comparable Buildings with comparable space (size), for a comparable use and for a comparable period of time ("**Comparable Transactions**"). "**Comparable Buildings**" shall be buildings of comparable size (including floor height), quality, vintage and construction in Downtown Long Beach. In any determination of Comparable Transactions, appropriate consideration shall be given to the annual rental rates per rentable square foot, the standard of measurement by which the rentable square footage is measured, the ratio of rentable square feet to usable square feet, the type of escalation clause (e.g., whether increases in additional rent are determined on a net or gross basis, and if gross, whether such increases are determined according to a base year or a base dollar amount expense stop), the extent of Tenant's liability under this Lease, parking rights (and costs therefor) and obligations, signage rights, abatement provisions reflecting free rent and/or no rent during the period of construction or subsequent to the commencement date as to the space in question, length

of the lease term, size and location of premises being leased, building standard work letter and/or tenant improvement allowances, if any, the condition of the base building and the Landlord's responsibility with respect thereto, the value, if any, of the existing tenant improvements (with such value being judged with respect to the utility of such existing tenant improvements to the general business office user and not this particular Tenant) and other generally applicable conditions of tenancy for such Comparable Transactions. The intent is that Tenant will obtain the same rent and other economic benefits that Landlord would otherwise give in Comparable Transactions and that Landlord will make, and receive the same economic payments and concessions that Landlord would otherwise make, and receive in Comparable Transactions.

Landlord shall determine the Fair Market Rental Rate by using its good faith judgment. Landlord shall provide written notice of such amount within thirty (30) days after Tenant delivers an Option Notice Tenant shall have thirty (30) days ("**Tenant's Review Period**") after receipt of Landlord's notice of the new rental within which to accept such rental in writing. In the event Tenant fails to accept the new rental proposed by Landlord, Landlord and Tenant shall attempt to agree upon such Fair Market Rental Rate, using their good faith efforts. If Landlord and Tenant fail to reach agreement within fifteen (15) days following Tenant's Review Period ("**Outside Agreement Date**"), then each party shall place in a separate sealed envelope their final proposal as to Fair Market Rental Rate and such determination shall be submitted to arbitration in accordance with subsections (a) through (e) below. Failure of Tenant to so elect in writing within Tenant's Review Period shall conclusively be deemed its disapproval of the Fair Market Rental Rate determined by Landlord.

In the event that Landlord fails to timely generate the initial written notice of Landlord's opinion of the Fair Market Rental Rate which triggers the negotiation period of this Paragraph 4, then Tenant may commence such negotiations by providing the initial notice, in which event Landlord shall have fifteen (15) days ("**Landlord's Review Period**") after receipt of Tenant's notice of the new rental within which to accept such rental. In the event Landlord fails to accept in writing such rental proposed by Tenant, then such proposal shall be deemed rejected, and Landlord and Tenant shall attempt in good faith to agree upon such Fair Market Rental Rate, using their good faith efforts. If Landlord and Tenant fail to reach agreement within fifteen (15) days following Landlord's Review Period (which shall be, in such event, the "**Outside Agreement Date**" in lieu of the above definition of such date), then each party shall place in a separate sealed envelope their final proposal as to Fair Market Rental Rate and such determination shall be submitted to arbitration in accordance with subsections (a) through (e) below.

(a) Landlord and Tenant shall meet with each other within five (5) business days of the Outside Agreement Date and exchange the sealed envelopes and then open such envelopes in each other's presence. If Landlord and Tenant do not mutually agree upon the Fair Market Rental Rate within one (1) business day of the exchange and opening of envelopes, then, within ten (10) business days of the exchange and opening of envelopes Landlord and Tenant shall agree upon and jointly appoint a single arbitrator who shall by profession be a real estate broker who shall have been active over the five (5) year period ending on the date of such appointment in the leasing of Comparable Buildings. Neither Landlord nor Tenant shall consult with such arbitrator directly or indirectly as to his or her opinion as to Fair Market Rental Rate prior to the appointment. The

determination of the arbitrator shall be limited solely to the issue of whether Landlord's or Tenant's submitted Fair Market Rental Rate for the Premises is the closer to the actual Fair Market Rental Rate for the Premises as determined by the arbitrator, taking into account the definition of Fair Market Rental Rate set forth in and the other requirements of this Paragraph 4. Such arbitrator may hold such hearings and require such briefs as the arbitrator, in his or her sole discretion, determines is necessary. In addition, Landlord or Tenant may submit to the arbitrator with a copy to the other party within five (5) business days after the appointment of the arbitrator any market data and additional information that such party deems relevant to the determination of Fair Market Rental Rate (" **FMRR Data**") and the other party may submit a reply in writing within five (5) business days after receipt of such FMRR Data.

(b) The arbitrator shall, within thirty (30) days of his or her appointment, reach a decision as to whether the parties shall use Landlord's or Tenant's submitted Fair Market Rental Rate, and shall notify Landlord and Tenant of such determination.

(c) The decision of the arbitrator shall be binding upon Landlord and Tenant, except as provided in Paragraph 5 below.

(d) If Landlord and Tenant fail to agree upon and appoint an arbitrator, then the appointment of the arbitrator shall be made by the Presiding Judge of the Superior Court, or, if he or she refuses to act, by any judge having jurisdiction over the parties.

(e) The cost of arbitration shall be paid by Landlord and Tenant equally.

5. Rescission by Tenant for Insufficient Parking. In the event that Landlord has not reached a mutual agreement with the City to extend the term of the Off-Site Parking Agreement for the applicable extension period no later than six (6) months prior to the commencement of such extension period (in each case, the " **Parking Extension Deadline**"), Tenant may elect to rescind its Option Notice at any time within thirty (30) days following the applicable Parking Extension Deadline. In the event Tenant elects to rescind such notice, this Lease shall expire on the then-current expiration date (unless earlier terminated pursuant to the terms of this Lease), and Landlord and Tenant shall have no further obligations hereunder, except for those obligations that expressly survive the expiration or earlier termination of this Lease.

6. Documentation. Unless Tenant exercises its rescission right pursuant to Paragraph 5 above, promptly after the Base Rent for the applicable Extension Period is determined pursuant to this Exhibit "J", Landlord and Tenant shall execute an amendment to the Lease stating the new Base Rent in effect for such Extension Term.

7. Terms. All terms used in this Exhibit "J" unless otherwise defined in this Exhibit shall have the same meaning as the terms defined elsewhere in this Lease.

WORK LETTER AGREEMENT

This Work Letter Agreement (the "Work Letter") is made and entered into as of

February 28, 2013, by and between 6th & Pine Development, LLC, a California limited liability company (" Landlord"), and Molina Healthcare, Inc., a Delaware corporation (" Tenant"), and is attached to and made a part of that certain Lease dated as of the date hereof (the "Lease"), by and between Landlord and Tenant for the Project located at 604 Pine Avenue, Long Beach, California. All capitalized terms used but not otherwise defined herein shall have the meanings given them in the Lease.

1. General Requirements.

1.1. Authorized Representatives.

1.1.1. Tenant designates Sal Gutierrez ("Tenant's Authorized Representative") as the person authorized to initial all plans, drawings, changes orders and approvals pursuant to this Work Letter. Landlord shall not be obligated to respond to or act upon any such item until such item has been initialed by Tenant's Authorized Representative. Tenant may change Tenant's Authorized Representative upon five (5) days' prior written notice to Landlord.

1.1.2. Landlord designates Michelle Molina ("Landlord's Authorized Representative") as the person authorized to initial all plans, drawings, changes orders and approvals pursuant to this Work Letter. Tenant shall not be obligated to respond to or act upon any such item until such item has been initialed by Landlord's Authorized Representative. Landlord may change Landlord's Authorized Representative upon five (5) days' prior written notice to Tenant.

1.2. Landlord's Construction Work. Landlord and Tenant acknowledge and agree that the Project will be constructed and delivered by Landlord in two phases (referred to herein as " Phase I" and "Phase II", respectively), each on a "turnkey" basis, subject to the terms and conditions of this Work Letter. Phase I will include the Phase I Base Building and Site Work and the Phase I Tenant Improvements (each as defined below, and collectively, the "Phase I Work"), and Phase II will include the Phase II Base Building and Site Work and the Phase II Tenant Improvements (each as defined below, and collectively, the "Phase II Work"). The Phase I Base Building and Site Work and the Phase II Base Building and Site Work are collectively referred to herein as " Landlord's Base Building and Site Work", the Phase I Tenant Improvements and the Phase II Tenant Improvements are collectively referred to herein as the "Tenant Improvements", and the Phase I Work and the Phase II Work are collectively referred to as "Landlord's Construction Work". Landlord's anticipated schedules for the design, governmental approvals (i.e., building department, historical commissions, planning, etc.), development, construction and performance of Landlord's Construction Work are attached hereto as **Schedule 1** to this Work Letter (the "Landlord's Construction Work Schedule"). The Landlord's Construction Work Schedule shall be subject to adjustment as mutually agreed upon in writing by the parties, or as provided in this Work Letter.

Additionally, Tenant acknowledges that Landlord's Construction Schedule with respect to the Phase II Work is conceptual and preliminary in nature, and remains subject to further revision by Landlord until such time as Landlord has received all approvals that are required from applicable governmental agencies in connection with the Phase II Work. Notwithstanding the foregoing, nothing in this Section 1.2 shall limit Tenant's rights and remedies pursuant to Section 2.6 of the Lease.

1.3. Architects and Consultants. The architect, engineering consultants, design team, general contractor and subcontractors responsible for the design, construction and performance of Landlord's Construction Work shall be selected by Landlord and approved by Tenant, which approval Tenant shall not unreasonably withhold, condition or delay. Tenant hereby approves of Nadel Architects and GMA Architects as the architects for Landlord's Base Building and Site Work (collectively, the "Base Building Architect"), GMA Architects as the architect for the Tenant Improvements (the "TI Architect"), ARCO National Construction Company as Landlord's general contractor for Landlord's Base Building and Site Work (the "Base Building Contractor"), and ARCO National Construction Company as Landlord's general contractor for the Tenant Improvements (the "TI Contractor", and together with the Base Building Architect, the TI Architect and the Base Building Contractor, the "Approved Consultants"). Tenant acknowledges that Landlord will use the Approved Consultants for the Phase I Work, but that Landlord may elect to replace one or more of such Approved Consultants with respect to the Phase II Work, subject to Tenant's right to reasonably approve such replacement pursuant to this Section 1.3.

1.4. Logical Evolutions. For purposes of this Work Letter, the term "Logical Evolution" or "Logical Evolutions" shall mean refinement and amplification of the applicable plans which is consistent with and a direct outgrowth of the scope of such plans and which flow naturally and foreseeably from said plans and are in accordance with custom and practice in the related fields of the architectural and engineering design professions and the construction industry in Southern California, in each case with respect to the construction of a "First-class" office project (taking into account that the Project involves (i) with respect to Phase I, a material restoration and renovation of a historic building and (ii) with respect to Phase II, material reconstruction of an existing building, whereby the historic façade will be retained and incorporated into the New Building), Applicable Laws, and plan check and permit conditions.

2. Landlord's Base Building and Site Work.

2.1. Phase I Base Building and Site Work. Landlord shall, at Landlord's sole cost and expense (but subject to Section 2.5 below), cause Base Building Contractor (or such replacement thereof as Landlord may make from time to time with Tenant's approval, which approval shall not be unreasonably withheld or delayed), to commence and thereafter diligently prosecute to completion the refurbishment and/or construction of the shell and core of the Existing Building and such other portions of the Project, including the Phase I On-Site Parking Spaces and related common areas, as are necessary for Tenant's use and occupancy of the Existing Building (collectively, the "Phase I Base Building and Site Work"), in accordance with the final plans described in the Drawing Log attached hereto as **Schedule 2** (the "Final Phase I Base Building and Site Plans"), Landlord's Construction Work Schedule with respect thereto, and subject only to those changes approved in accordance with Section 2.5 below. The Phase I Base Building and Site Work shall be performed

in accordance with industry custom and practice for a "first-class" office project (taking into account that the Phase I Base Building and Site Work involves a material restoration and renovation of a historic building), and in compliance with all Applicable Laws. The commencement and completion of the Phase I Base Building and Site Work shall be subject to delays resulting from acts of God; acts of terrorism; adverse weather conditions; war; invasion; insurrection; acts of a public enemy; terrorism; riot; mob violence; civil commotion; sabotage; labor disputes; general shortage of labor, materials, facilities, equipment or supplies on the open market; delay in transportation; delays caused by new, or changes to existing, laws, rules, regulations or orders of any governmental authority; moratorium or other governmental action; inability to obtain permits or approvals, including, without limitation, city and public utility approvals beyond the time periods that generally prevail for obtaining such permits and approvals; the acts or inaction of any contractor and/or subcontractors, if any; or any other cause beyond the reasonable control of Landlord, financial ability and failure to order long lead time items sufficiently in advance excepted, whether similar or dissimilar to the foregoing (collectively, " Force Majeure").

2.2. Phase II Base Building and Site Work. Landlord shall, at Landlord's sole cost and expense (but subject to Section 2.5 below), cause Base Building Contractor (or such replacement thereof as Landlord may make from time to time with Tenant's approval, which approval shall not be unreasonably withheld or delayed), to commence and thereafter diligently prosecute to completion the refurbishment and/or construction of the shell and core of the New Building and the remaining balance of the Project, including the Phase II On-Site Parking Spaces and related common areas (collectively, the " Phase II Base Building and Site Work"), in accordance with the Final Phase II Base Building and Site Plans (as defined below) , Landlord's Construction Work Schedule with respect thereto, and subject only to changes approved in accordance with Section 2.5 below. The Phase II Base Building and Site Work shall be performed in accordance with industry custom and standard for a "first-class" office project (taking into account that the Phase II Base Building and Site Work involves the material reconstruction of an existing building, whereby the historic façade will be retained and incorporated into the New Building), and in compliance with all Applicable Laws. The commencement and completion of the Phase II Base Building and Site Work shall be subject to delays resulting from acts of Force Majeure.

2.3. Phase II Design Plans. Landlord shall cause the Base Building Architect (or such replacement thereof as Landlord may make from time to time with Tenant's approval, which approval shall not be unreasonably withheld or delayed), with Tenant's cooperation, to prepare and submit to Tenant for approval, design plans for the Phase II Base Building and Site Work (the " Phase II Design Plans"). The Phase II Design Plans shall contain sufficient information and detail to accurately describe the proposed design of the Phase II Base Building and Site Work to Tenant and such other information as Tenant may reasonably request. Tenant shall be solely responsible for ensuring that the Phase II Design Plans satisfy Tenant's business requirements. Tenant shall notify Landlord in writing within ten (10) business days after receipt of the Phase II Design Plans whether Tenant approves or reasonably disapproves of the Phase II Design Plans and the manner, if any, in which the Phase II Design Plans are reasonable objectionable. If Tenant reasonably objects to the Phase II Design Plans, then Landlord shall cause the Base Building Architect (with Tenant's cooperation) to revise the Phase II Design Plans to address Tenant's reasonable objections thereto. Landlord shall then resubmit the revised Phase II Design Plans to Tenant for approval within seven

(7) business days after Landlord received Tenant's comments to the Phase II TI Space Plans. Tenant's approval of or reasonable objection to revised Phase II Design Plans and Landlord's correction of the same shall be in accordance with this Section 2.3, until Tenant has approved the Phase II Design Plans in writing. The iteration of the Phase II Design Plans that is approved by Tenant without objection shall be referred to herein as the "Approved Phase II Design Plans."

2.4. Final Phase II Base Building and Site Plans. Landlord shall cause the Base Building Architect (or such replacement thereof as Landlord may make from time to time with Tenant's approval, which approval shall not be unreasonably withheld or delayed) to prepare working drawings for the Phase II Base Building and Site Work (the "Phase II Working Drawings") that are consistent with and are Logical Evolutions of (i) the Approved Phase II Design Plans and (ii) to the extent applicable, the Final Phase I Base Building and Site Plans. As soon as Phase II Working Drawings have been prepared, Landlord shall deliver the same to Tenant for Tenant's approval, which approval may be reasonably withheld only if: (i) the Phase II Working Drawings are not consistent with or Logical Evolutions of the Approved Phase II Design Plans and, to the extent applicable, the Final Phase I Base Building and Site Plans, (ii) Tenant requests changes to the Phase II Working Drawings in accordance with Section 2.5(a)(i) (other than Base Building Permitted Changes), or (iii) Tenant objects to any Landlord-requested Base Building Change (other than Base Building Permitted Changes) to the Phase II Working Drawings. Such Phase II Working Drawings shall be approved or disapproved by Tenant within ten (10) business days after delivery to Tenant. If Tenant fails to respond within such ten (10)-business day period, then Landlord shall provide Tenant with a second written notice stating that "Tenant's failure to respond within three (3) days after Landlord's second notice shall be deemed Tenant's approval to such Phase II Working Drawings," and if Tenant does not respond within such three (3) day period, then Tenant shall be deemed to have approved the Phase II Working Drawings. If the Phase II Working Drawings are disapproved by Tenant, Tenant shall notify Landlord in writing of its objections to such Phase II Working Drawings and, if applicable, shall submit any requested Base Building Changes through a Base Building Tenant Change Order Request (as defined below), then the parties shall confer and negotiate in good faith to reach agreement on the Phase II Working Drawings. Promptly after the Phase II Working Drawings are approved by Landlord and Tenant (thereafter, the "Final Phase II Base Building and Site Plans"), two (2) copies of such Final Phase II Base Building and Site Plans shall be initialed and dated by Landlord and Tenant as soon as approved by Landlord and Tenant and Landlord shall promptly submit such Final Phase II Base Building and Site Plans to all appropriate governmental agencies for approval.

2.5. Changes to Landlord's Base Building and Site Work. Any changes to the Final Phase I Base Building and Site Plans, the Phase II Working Drawings or the Final Phase II Base Building and Site Plans (each, a "Base Building Change") requested by Landlord or Tenant shall be requested and instituted in accordance with the provisions of this Section 2.5 and, except for Base Building Permitted Changes, shall be subject to the written approval of the other party in accordance with this Work Letter.

(a) Base Building Changes Requested by Tenant.

(i) Base Building Tenant Change Order Request. Tenant may request Base Building Changes to the Final Phase I Base Building and Site Plans, the Phase II Working Drawings or the Final Phase II Base Building and Site Plans by notifying Landlord thereof in writing (a "Base Building Tenant Change Order Request"), which Base Building Tenant Change Order Request shall detail the nature and extent of any requested Base Building Changes, including, without limitation, (a) the Base Building Change, and (b) any modification of the Final Phase I Base Building and Site Plans, the Phase II Working Drawings or the Final Phase II Base Building and Site Plans, as applicable. If the nature of a Base Building Change requires revisions to the Final Phase I Base Building and Site Plans, the Phase II Working Drawings or the Final Phase II Base Building and Site Plans, as applicable, or would cause a delay in the Substantial Completion of the Phase I Work or the Phase II Work, as applicable (in each case as set forth in Landlord's Construction Work Schedule), then Tenant shall be solely responsible for the cost and expense of such revisions. In the event Landlord approves or is deemed to have approved of any such Base Building Change resulting from a Base Building Tenant Change Order Request in accordance with Section 2.5(a)(ii) below, Landlord shall: (1) notify Tenant if it reasonably believes such Base Building Change could cause a delay in the Substantial Completion of the Phase I Work or the Phase II Work, as applicable (in each case as set forth in Landlord's Construction Work Schedule); and (2) provide Landlord's reasonable estimate of any additional costs and expenses associated with such Base Building Change. Tenant shall deposit with Landlord the additional cost and expense payable by Landlord, as reasonably estimated by Landlord, to complete the Base Building Tenant Change Order Request (the "Base Building Deposit") within thirty (30) days following Tenant's receipt of Landlord's written estimate. In the event that such Base Building Deposit is not sufficient to cover the actual cost of such approved Base Building Change, Tenant shall reimburse Landlord the difference between the actual cost of such Base Building Change and the Base Building Deposit within thirty (30) days following Tenant's receipt of an invoice therefor, which invoice shall include reasonable back-up documentation with respect to the amount of such difference. In the event that such Base Building Deposit exceeds the actual cost of such approved Base Building Change, Landlord shall return such excess amount to Tenant within thirty (30) days following the completion of such approved Base Building Change. Base Building Tenant Change Order Requests shall be signed by Tenant's Authorized Representative.

(ii) Landlord's Approval of Base Building Changes. Landlord shall have five (5) business days after receipt of a Base Building Tenant Change Order Request to notify Tenant in writing of Landlord's approval or rejection of the Tenant-requested Base Building Change, which approval shall not be unreasonably withheld or conditioned so long as such Base Building Change requested by Tenant could not reasonably be expected, as reasonably determined by Landlord, to cause a Design Problem or a delay in Substantial Completion of the Phase I Work or the Phase II Work, as applicable (in each case as set forth in the Landlord's Construction Work Schedule). If Landlord fails to respond within such five (5)-business day period, then Tenant shall provide Landlord with a second written notice stating that "Landlord's failure to respond within three (3) days after Tenant's second notice shall be deemed Landlord's approval to such Base Building Tenant Change Order Request," and if Landlord does not respond within such three (3) day period, then Landlord shall be deemed to have approved such Base Building Tenant Change

Order Request, and Tenant shall be permitted to cause Landlord to alter the Phase I Base Building and Site Work or the Phase II Base Building and Site Work, as contemplated by such Base Building Tenant Change Order Request.

(b) Changes Requested by Landlord.

(i) Base Building Landlord Change Order Request. Landlord may request Base Building Changes to the Final Phase I Base Building and Site Plans, the Phase II Working Drawings or the Final Phase II Base Building and Site Plans by notifying Tenant thereof in writing (a "Base Building Landlord Change Order Request"), which Base Building Landlord Change Order Request shall detail the nature and extent of any requested Base Building Changes, including, without limitation, (a) the Base Building Change, and (b) any modification of the Final Phase I Base Building and Site Plans, the Phase II Working Drawings or the Final Phase II Base Building and Site Plans, as applicable, and any delay in the Substantial Completion of the Phase I Work or the Phase II Work, as applicable (in each case as set forth in the Landlord's Construction Work Schedule), necessitated by the Base Building Change. In the event Tenant approves or is deemed to have approved of any such Base Building Change resulting from a Base Building Landlord Change Order Request in accordance with Section 2.5(b)(ii) below, Landlord shall be solely responsible for any and all any additional costs and expenses associated with such Base Building Change. Base Building Landlord Change Order Requests shall be signed by Landlord's Authorized Representative.

(ii) Tenant's Approval of Base Building Change. Tenant shall have five (5) business days after receipt of a Base Building Landlord Change Order Request to notify Landlord in writing of Tenant's approval or rejection of the Landlord-requested Base Building Change, which approval shall not be unreasonably withheld or conditioned so long as such Base Building Change requested by Landlord could not reasonably be expected, as reasonably determined by Tenant, to interfere with Tenant's ability to operate its business in the Premises or cause a delay in Substantial Completion of the Phase I Work or the Phase II Work, as applicable (in each case as set forth in the Landlord's Construction Work Schedule). If Tenant fails to respond within such five (5)-business day period, then Landlord shall provide Tenant with a second written notice stating that "Tenant's failure to respond within three (3) days after Landlord's second notice shall be deemed Tenant's approval to such Base Building Landlord Change Order Request," and if Tenant does not respond within such three (3) day period, then Tenant shall be deemed to have approved such Base Building Landlord Change Order Request, and Landlord shall be permitted to alter the Phase I Base Building and Site Work or the Phase II Base Building and Site Work, as contemplated by such Base Building Landlord Change Order Request.

(c) Base Building Permitted Changes. Notwithstanding anything to the contrary contained in this Work Letter, neither Landlord nor Tenant shall disapprove a Base Building Permitted Change requested by the other. For purposes of this Work Letter, a "Base Building Permitted Change" shall mean: (i) minor field changes; (ii) changes required by governmental authority; (iii) with respect to the Phase II Working Drawings only, any change required to make such drawings consistent with or Logical Evolutions of the approved Phase II Design Plans; (iv) with respect to the Final Phase I Base Building and Site Plans and the Final Phase II Base Building

and Site Plans, any changes that would constitute Logical Evolutions thereof; and (v) any other changes that: (1) do not materially and adversely affect the Building Structure and Building Systems to be constructed as part of the Phase I Base Building and Site Work or the Phase II Base Building and Site Work, as applicable, (2) do not materially change the size, cost, configuration, or overall appearance of the Project or Landlord's ability to construct the Phase I Base Building and Site Work or the Phase II Base Building and Site Work, as applicable, (3) do not materially change the size, cost, configuration, or overall appearance of Phase I Tenant Improvements or the Phase II Tenant Improvements, as applicable, or Tenant's ability to operate its business in the Project, and (4) will not cause a delay in Substantial Completion of the Phase I Work or the Phase II Work, as applicable (and in each case as set forth in the Landlord's Construction Work Schedule). Additionally, notwithstanding to anything the contrary contained in this Work Letter, Landlord shall not be required to provide Tenant with notice or obtain Tenant's approval of any Base Building Change that satisfies the requirements set forth in (1) through (4) of subsection (v) of this paragraph.

(d) The Final Phase I Base Building and Site Plans, as modified by any Base Building Changes thereto that are approved in accordance with this Section 2.5 above, including any Base Building Permitted Changes thereto (collectively, the "Approved Phase I Base Building and Site Plans"), and the Final Phase II Base Building and Site Plans, as modified by any Base Building Changes thereto that are approved in accordance with this Section 2.5 above, including any Base Building Permitted Changes thereto (collectively, the "Approved Phase II Base Building and Site Plans"), are collectively referred to herein as the "Approved Base Building and Site Plans" and shall become part of the Lease as though set forth in full.

3. Tenant Improvements.

3.1. Phase I Tenant Improvements. Landlord shall, at Landlord's sole cost and expense (subject to Section 3.6 below), cause TI Contractor (or such replacement thereof as Landlord may make from time to time with Tenant's approval, which approval shall not be unreasonably withheld or delayed) to commence and thereafter diligently prosecute to completion the construction of the tenant improvements to the Existing Building (the "Phase I Tenant Improvements") in accordance with the Final Phase I TI Plans (defined below), Landlord's Construction Work Schedule with respect thereto, and subject only to those changes approved in accordance with Section 3.6 below. The Phase I Tenant Improvements shall be performed in accordance with industry custom and practice for a "first-class" office project (taking into account that the Phase I Work involves a material restoration and renovation of a historic building), and in compliance with all Applicable Laws. The commencement and completion of the Phase I Tenant Improvements shall be subject to delays resulting from acts of Force Majeure.

3.2. Final Phase I TI Plans. Landlord shall cause the TI Architect (or such replacement thereof as Landlord may make from time to time with Tenant's approval, which approval shall not be unreasonably withheld or delayed) to prepare working drawings for the Phase I Tenant Improvements (the "Phase I TI Working Drawings") that: (a) are consistent with and are Logical Evolutions of those certain space plans dated April 9, 2012 (and last revised on December 10, 2012) and prepared by the TI Architect, which are attached hereto as **Schedule 3** and are hereby approved by Tenant (the "Approved Phase I TI Space Plans"), (b) incorporate TI Permitted Changes, and

(c) incorporate any other Landlord-requested (and Tenant approved) TI Changes. As soon as Phase I TI Working Drawings are completed, Landlord shall deliver the same to Tenant for Tenant's approval, which approval may be reasonably withheld only if: (i) the Phase I TI Working Drawings are not consistent with or Logical Evolutions of the Approved Phase I TI Space Plans, (ii) Tenant intends to request changes to the Phase I TI Working Drawings in accordance with Section 3.6(a)(i) (other than TI Permitted Changes), or (iii) Tenant objects to any Landlord-requested TI Change (other than TI Permitted Changes) to the Phase I TI Working Drawings. Such Phase I TI Working Drawings shall be approved or disapproved by Tenant within ten (10) business days after delivery to Tenant. If Tenant fails to notify Landlord of disapproval within such ten (10)-business day period, then Tenant shall be deemed to have approved such Phase I TI Working Drawings. If the Phase I TI Working Drawings are disapproved by Tenant, Tenant shall notify Landlord in writing of its objections to such Phase I TI Working Drawings and, if applicable, shall submit any requested TI Changes through a TI Tenant Change Order Request (as defined below), then the parties shall confer and negotiate in good faith to reach agreement on the Phase I TI Working Drawings (thereafter, the "Final Phase I TI Plans"). Promptly after the Final Phase I TI Plans are approved by Landlord and Tenant, two (2) copies of such Final Phase I TI Plans shall be initialed and dated by Landlord and Tenant as soon as approved by Landlord and Tenant and Landlord shall promptly submit such Final Phase I TI Plans to all appropriate governmental agencies for approval.

3.3. Phase II Tenant Improvements. Landlord shall, at Landlord's sole cost and expense (subject to Section 3.6 below), cause TI Contractor (or such replacement thereof as Landlord may make from time to time with Tenant's approval, which approval shall not be unreasonably withheld or delayed) to commence and thereafter diligently prosecute to completion the construction of the tenant improvements to the New Building (the "Phase II Tenant Improvements") in accordance with the Final Phase II TI Plans (as defined below), Landlord's Construction Work Schedule with respect thereto, and subject only to those changes approved in accordance with Section 3.6 below. The Phase II Tenant Improvements shall be performed in accordance with industry custom and practice for a "first-class" office project (taking into account that the Phase I Work involves a material restoration and renovation of a historic building), and in compliance with all Applicable Laws. The commencement and completion of the Tenant Improvements shall be subject to delays resulting from acts of Force Majeure.

3.4. Phase II TI Space Plans. Landlord shall cause the TI Architect (or such replacement thereof as Landlord may make from time to time with Tenant's approval, which approval shall not be unreasonably withheld or delayed), with Tenant's cooperation, to prepare and submit to Tenant for approval, space plans for the Phase II Tenant Improvements that are substantially consistent with the general standard and scope of the Final Phase I TI Plans (the "Phase II TI Space Plans"). The Phase II TI Space Plans shall contain sufficient information and detail to accurately describe the proposed design to Tenant and such other information as Tenant may reasonably request. Tenant shall be solely responsible for ensuring that the Phase II TI Space Plans satisfy Tenant's business requirements. Tenant shall notify Landlord in writing within ten (10) business days after receipt of the Phase II TI Space Plans whether Tenant approves or reasonably disapproves of the Phase II TI Space Plans and the manner, if any, in which the Phase II TI Space Plans are reasonable objectionable. If Tenant reasonably objects to the Phase II TI Space Plans, then Landlord shall cause the TI Architect (with Tenant's cooperation) to revise the Phase II TI Space Plans to address

Tenant's reasonable objections thereto. Landlord shall then resubmit the revised Phase II TI Space Plans to Tenant for approval within seven (7) business days after Landlord received Tenant's comments to the Phase II TI Space Plans. Tenant's approval of or reasonable objection to revised Phase II TI Space Plans and Landlord's correction of the same shall be in accordance with this Section 3.4, until Tenant has approved the Phase II TI Space Plans in writing. Tenant shall not unreasonably withhold its approval of any iteration of the Phase II TI Space Plans so long as such iteration is substantially consistent with the standard and scope of the Final Phase I TI Plans . The iteration of the Phase II TI Space Plans that is approved by Tenant without objection shall be referred to herein as the " Approved Phase II TI Space Plans."

3.5. Final Phase II TI Plans. Landlord shall cause the TI Architect (or such replacement thereof as Landlord may make from time to time with Tenant's approval, which approval shall not be unreasonably withheld or delayed) to prepare working drawings for the Phase II Tenant Improvements (the "Phase II TI Working Drawings") that: (a) are consistent with and are Logical Evolutions of the Approved Phase II TI Space Plans, (b) incorporate TI Permitted Changes, and (c) incorporate any other Landlord-requested (and Tenant approved) TI Changes. As soon as Phase II TI Working Drawings are completed, Landlord shall deliver the same to Tenant for Tenant's approval, which approval may be reasonably withheld only if: (i) the Phase II TI Working Drawings are not consistent with or Logical Evolutions of the Approved Phase II TI Space Plans, (ii) Tenant intends to request changes to the Phase II TI Working Drawings in accordance with Section 3.6(a)(i) (other than TI Permitted Changes), or (iii) Tenant objects to any Landlord-requested TI Change (other than TI Permitted Changes) to the Phase II TI Working Drawings. Such Phase II TI Working Drawings shall be approved or disapproved by Tenant within ten (10) business days after delivery to Tenant. If Tenant fails to notify Landlord of disapproval within such ten (10)-business day period, then Tenant shall be deemed to have approved such Phase II TI Working Drawings. If the Phase II TI Working Drawings are disapproved by Tenant, Tenant shall notify Landlord in writing of its objections to such Phase II TI Working Drawings and, if applicable, shall submit any requested TI Changes through a TI Tenant Change Order Request (as defined below), then the parties shall confer and negotiate in good faith to reach agreement on the Phase II TI Working Drawings (thereafter, the " Final Phase II TI Plans"). Promptly after the Final Phase II TI Plans are approved by Landlord and Tenant, two (2) copies of such Final Phase II TI Plans shall be initialed and dated by Landlord and Tenant as soon as approved by Landlord and Tenant and Landlord shall promptly submit such Final Phase II TI Plans to all appropriate governmental agencies for approval.

3.6. Changes to Tenant Improvements. Any changes to the Final Phase I TI Plans, the Phase II TI Working Drawings or the Final Phase II TI Plans (each, a "TI Change") requested by Landlord or Tenant shall be requested and instituted in accordance with the provisions of this Section 3.6 and, except for TI Permitted Changes, shall be subject to the written approval of the other party in accordance with this Work Letter.

(a) TI Changes Requested by Tenant.

(i) TI Tenant Change Order Request. Tenant may request TI Changes to the Final Phase I TI Plans, the Phase II TI Working Drawings or the Final Phase II TI Plans by notifying Landlord thereof in writing (a " TI Tenant Change Order Request"), which TI

Tenant Change Order Request shall detail the nature and extent of any requested TI Changes, including, without limitation, (a) the TI Change, and (b) any modification of the Final Phase I TI Plans, the Phase II TI Working Drawings or the Final Phase II TI Plans, as applicable. If the nature of a TI Change requires revisions to the Final Phase I TI Plans, the Phase II TI Working Drawings or the Final Phase II TI Plans, as applicable, or would cause a delay in Substantial Completion of the Phase I Work or the Phase II Work, as applicable (in each case as set forth in the Landlord's Construction Work Schedule), then Tenant shall be solely responsible for the cost and expense of such revisions (except to the extent that such TI Change is required as the result of a Landlord-requested Base Building Change that has been approved by Tenant pursuant to Section 2.5(b)(ii) above, in which case such cost and expense shall be part of Landlord's Turnkey Costs (as defined below)). In the event Landlord approves or is deemed to have approved of any such TI Change resulting from a TI Tenant Change Order Request in accordance with Section 3.6(a)(ii) below, Landlord shall: (1) notify Tenant if it reasonably believes such TI Change could cause a delay in Substantial Completion of the Phase I Work or the Phase II Work (in each case as set forth in the Landlord's Construction Work Schedule); and (2) provide Landlord's reasonable estimate of any additional costs and expenses associated with such TI Change. Tenant shall deposit with Landlord the additional cost and expense payable by Landlord, as reasonably estimated by Landlord, to complete the TI Tenant Change Order Request (the "TI Deposit") within thirty (30) days following Tenant receipt of Landlord's written estimate. In the event such TI Deposit is not sufficient to cover the actual cost of such approved TI Change, Tenant shall reimburse Landlord the difference between the actual cost of such TI Change and the TI Deposit within thirty (30) days following Tenant's receipt of an invoice therefor, which invoice shall include reasonable back-up documentation with respect to the amount of such difference. In the event such TI Deposit exceeds the actual cost of such approved Base Building Change, Landlord shall return such excess amount to Tenant within thirty (30) days following the completion of such approved TI Change. TI Tenant Change Order Requests shall be signed by Tenant's Authorized Representative.

(ii) Landlord's Approval of TI Changes. Landlord shall have five (5) business days after receipt of a TI Tenant Change Order Request to notify Tenant in writing of Landlord's approval or rejection of the Tenant-requested TI Change, which approval shall not be unreasonably withheld or conditioned so long as such TI Change requested by Tenant could not reasonably be expected, as reasonably determined by Landlord, to cause a Design Problem or cause a delay in Substantial Completion of the Phase I Work or the Phase II Work, as applicable (in each case as set forth in the Landlord's Construction Work Schedule). If Landlord fails to respond within such five (5)-business day period, then Landlord shall be deemed to have approved such TI Tenant Change Order Request, and Tenant shall be permitted to cause Landlord to alter the Phase I Tenant Improvements or the Phase II Tenant Improvements, as contemplated by such TI Tenant Change Order Request.

(b) TI Changes Requested by Landlord.

(i) TI Landlord Change Order Request. Landlord may request TI Changes to the Final Phase I TI Plans, the Phase II TI Working Drawings or the Final Phase II TI Plans by notifying Tenant thereof in writing (a "TI Landlord Change Order Request"), which TI Landlord Change Order Request shall detail the nature and extent of any requested TI Changes,

including, without limitation, (a) the TI Change, and (b) any modification of the Final Phase I TI Plans, the Phase II TI Working Drawings or the Final Phase II TI Plans, as applicable, and any delay in the Substantial Completion of the Phase I Work or the Phase II Work, as applicable (in each case as set forth in the Landlord's Construction Work Schedule), necessitated by the TI Change. In the event Tenant approves or is deemed to have approved of any such TI Change resulting from a TI Landlord Change Order Request in accordance with Section 3.6(b)(ii) below, Landlord shall be solely responsible for any and all any additional costs and expenses associated with such TI Change as part of the Turnkey Costs. TI Landlord Change Order Requests shall be signed by Tenant's Authorized Representative.

(ii) Tenant's Approval of TI Change. Tenant shall have five (5) business days after receipt of a TI Landlord Change Order Request to notify Landlord in writing of Tenant's approval or rejection of the Landlord-requested TI Change, which approval shall not be unreasonably withheld or conditioned so long as such TI Change requested by Landlord could not reasonably be expected, as reasonably determined by Tenant, to interfere with Tenant's ability to operate its business in the Premises or cause a delay in Substantial Completion of the Phase I Work or the Phase II Work, as applicable (in each case as set forth in the Landlord's Construction Work Schedule). If Tenant fails to respond within such five (5)-business day period, then Tenant shall be deemed to have approved such TI Landlord Change Order Request, and Landlord shall be permitted to alter the Phase I Tenant Improvements or the Phase II Tenant Improvements, as contemplated by such TI Landlord Change Order Request.

(c) TI Permitted Changes. Notwithstanding anything to the contrary contained in this Work Letter, neither Landlord nor Tenant shall disapprove a TI Permitted Change requested by the other. For purposes of this Work Letter, a "TI Permitted Change" shall mean: (i) minor field changes; (ii) changes required by governmental authority; (iii) with respect to the Phase II TI Working Drawings only, any change required to make such plans consistent with or Logical Evolutions of the Approved Phase II TI Space Plans; (iv) with respect to the Final Phase I TI Plans and the Final Phase II TI Plans, any changes that would constitute Logical Evolutions thereof; and (v) any other changes that: (1) do not materially and adversely affect the Building Structure and Building Systems to be constructed as part of the Phase I Tenant Improvements or Phase II Tenant Improvements, as applicable, (2) do not materially change the size, cost, configuration, or overall appearance of the Phase I Tenant Improvements or the Phase II Tenant Improvements, as applicable, or Tenant's ability to operate its business in the Project, and (3) will not cause a delay in Substantial Completion of the Phase I Work or the Phase II Work, as applicable (in each case as set forth in the Landlord's Construction Work Schedule). Additionally, notwithstanding anything the contrary contained in this Work Letter, Landlord shall not be required to provide Tenant with notice or obtain Tenant's approval of any TI Change that satisfies the requirements set forth in (1) through (3) of subsection (v) of this paragraph.

(d) The Final Phase I TI Plans, as modified by any TI Changes thereto that are approved in accordance with this Section 3.6 above, including any TI Permitted Changes thereto (collectively, the "Approved Phase I TI Plans"), and the Final Phase II TI Plans, as modified by any TI Changes thereto that are approved in accordance with this Section 3.6 above, including any TI

Permitted Changes thereto (collectively, the "Approved Phase II TI Plans"), are collectively referred to herein as the "Approved TI Plans" and shall become part of the Lease as though set forth in full.

3.7. Turnkey Costs. Subject to Section 3.6 above, Landlord shall be responsible for the costs and expenses of constructing the Tenant Improvements (as further described herein, the "Turnkey Costs"). The "Turnkey Costs" shall include the costs of (i) construction, (ii) space planning, architect, engineering and other related services, (iii) costs and expenses for labor, materials, building system equipment and fixtures, (iv) building permits and other taxes, fees, charges and levies by governmental and quasi-governmental agencies for permits or for inspections of the Tenant Improvements, and (v) any costs and expenses of Landlord pursuant to Section 3.6 above. Notwithstanding the foregoing, in no event shall Turnkey Costs include the costs of (w) any security, low voltage cable, telephone cable/switch handsets, relocation, technology, audio visual equipment or signage; (x) any furniture, personal property or other non-building system equipment, (y) resulting from any default by Tenant of its obligations under the Lease, or (z) costs that are recoverable or reasonably recoverable by Tenant from a third party (e.g., insurers, warrantors or tortfeasors).

3.8. Completion of Phase I Work. The Phase I Work shall be deemed "Substantially Complete" or there shall be "Substantial Completion" thereof if (i) Landlord has completed, in compliance with all Applicable Laws, (a) all of the Phase I Base Building and Site Work identified on and substantially in accordance with the Approved Phase I Base Building and Site Plans, and (b) all of the Phase I Tenant Improvements identified on and substantially in accordance with the Approved Phase I TI Plans, subject only to such incomplete or defective work as will not materially or adversely impact Tenant's continuous and uninterrupted use of Phase I (including the Existing Building and the Phase I On-Site Parking Spaces) for its permitted use pursuant to the Lease following the Substantial Completion of the Phase I Work (collectively, the "Phase I Punchlist Items"), and minor deviations that do not alter the type, scope and quality of the Phase I Tenant Improvements depicted on the Approved Phase I TI Plans, (ii) Tenant is provided with continuous and uninterrupted use of the Existing Building and the Phase I On-Site Parking Spaces for its permitted use pursuant to the Lease, except to the extent reasonably necessary for TI Contractor to complete any Phase I Punchlist Items, and (iii) Landlord has obtained a certificate of occupancy or temporary certificate of occupancy (or its equivalent) allowing Tenant to legally occupy the Existing Building. Landlord shall cause the TI Contractor to complete with reasonable promptness the Phase I Punchlist Items and repair with reasonable promptness all defects in the construction of the Phase I Work as to which Tenant notifies Landlord in writing (which notice Tenant shall give within ten (10) business days following the Commencement Date for the Existing Building). Notwithstanding the foregoing, Landlord shall cause all Phase I Punchlist Items that reasonably can be completed within forty-five (45) days after Substantial Completion of the Phase I Work to be completed within such forty-five (45)-day period (subject to availability of materials). Except for such Phase I Punchlist Items and except for latent defects and non-compliance of Phase I Work with Applicable Laws, Tenant shall, subject to the terms hereof, be deemed to have accepted the Phase I Work in the condition delivered to it "As Is," provided, however, that the Phase I Work shall be subject to the Landlord warranties set forth in General Condition B of the Lease.

3.9. Completion of Phase II Work. The Phase II Work shall be deemed "Substantially Complete" or there shall be "Substantial Completion" thereof if (i) Landlord has completed, in compliance with all Applicable Laws, (a) all of the Phase II Base Building and Site Work identified on and substantially in accordance with the Approved Phase II Base Building and Site Plans, and (b) all of the Phase II Tenant Improvements identified on and substantially in accordance with the Approved Phase II TI Plans, subject only to such incomplete or defective work as will not materially or adversely impact Tenant's continuous and uninterrupted use of Phase II (including the New Building and the Phase II On-Site Parking Spaces) for its permitted use pursuant to the Lease following the Substantial Completion of the Phase II Work (collectively, the "Phase II Punchlist Items"), and minor deviations that do not alter the type, scope and quality of the Phase II Tenant Improvements depicted on the Approved Phase II TI Plans, (ii) Tenant is provided with continuous and uninterrupted use of the New Building and the Phase II On-Site Parking Spaces for its permitted use pursuant to the Lease, except to the extent reasonably necessary for TI Contractor to complete any Phase II Punchlist Items, and (iii) Landlord has obtained a certificate of occupancy or temporary certificate of occupancy (or its equivalent) allowing Tenant to legally occupy the New Building. Landlord shall cause the TI Contractor to complete with reasonable promptness the Phase II Punchlist Items and repair with reasonable promptness all defects in the construction of the Phase II Work as to which Tenant notifies Landlord in writing (which notice Tenant shall give within ten (10) business days following the Commencement Date for the New Building). Notwithstanding the foregoing, Landlord shall cause all Phase II Punchlist Items that reasonably can be completed within forty-five (45) days after Substantial Completion of the Phase II Work to be completed within such forty-five (45)-day period (subject to availability of materials) . Except for such Phase II Punchlist Items and except for latent defects and non-compliance of Phase II Work with Applicable Laws, Tenant shall, subject to the terms hereof, be deemed to have accepted the Phase II Work in the condition delivered to it "As Is," provided, however, that the Phase II Work shall be subject to the Landlord warranties set forth in General Condition B of the Lease.

4. Tenant Delay. Landlord shall endeavor (but shall not be obligated) to tender possession of each Phase of the Project on or before the applicable Scheduled Commencement Date. If the Phase I Work or the Phase II Work, as applicable, as required pursuant to the terms of this Work Letter, is not Substantially Complete on or before the applicable Scheduled Commencement Date for any reason whatsoever, then, except as provided in the Lease, the Lease shall not be void or voidable, Landlord shall not be liable to Tenant for any loss or damage resulting therefrom and the applicable Commencement Date shall not occur until Substantial Completion of the Phase I Work or the Phase II Work, as applicable, occurs; provided, however, if the satisfaction of the requirements for Substantial Completion of the Phase I Work or the Phase II Work, as applicable, have been actually delayed by any Tenant Delay (as defined below), then, subject to the terms hereof, Substantial Completion of the Phase I Work or the Phase II Work, as applicable, shall be deemed to occur when (as reasonably determined and substantiated by Landlord) Substantial Completion of the Phase I Work or the Phase II Work, as applicable, would have occurred if such Tenant Delay had not occurred. "Tenant Delay" shall mean: (1) delays or failure of Tenant to deliver items in accordance with this Work Letter; (2) Tenant's failure to timely fulfill its obligations as set forth in this Work Letter within the time periods set forth therein; (3) delays caused by Base Building Tenant Change Order Requests or TI Tenant Change Order Requests; (4) unavailability of materials, components or finishes for the Tenant Improvements that have an unusually long lead-time for delivery (unless

Landlord, the TI Contractor or any subcontractors or suppliers fail to timely order such items); (5) a willful or negligent act or omission of Tenant or Tenant's consultants, vendors, contractors, subcontractors, or agents that interferes with the progress of the work; or (6) any other event or circumstance expressly described as a Tenant Delay in this Work Letter. Landlord shall not assess any day towards a Tenant Delay for delays caused by Landlord, any architect, engineering consultant, design team, general contractor, subcontractor or vendor selected by Landlord or any third parties or due to Force Majeure. Notwithstanding anything above to the contrary, (i) no delay shall be considered a Tenant Delay unless Landlord provides Tenant written notice of such Tenant Delay within ten (10) days of the date that Landlord becomes aware of the occurrence of a Tenant Delay, and Tenant fails to cure such delay within three (3) days; provided that no such notice and cure period shall be required if such delay is with respect to interference with the Landlord's construction activities and Landlord has previously notified Tenant of similar Tenant Delays, and (ii) no delay shall be considered a Tenant Delay in the event Substantial Completion of the Phase I Work or the Phase II Work, as applicable, occurs on or before the applicable Scheduled Commencement Date. Landlord and its contractors shall take commercially reasonable actions, remedial or otherwise, to complete the Phase I Work and the Phase II Work by the applicable Scheduled Commencement Dates notwithstanding any Tenant Delay. All additional cost and expense payable by Landlord, if any, to complete the Phase I Work or the Phase II Work due to Tenant Delay ("Tenant Delay Costs"), shall be paid by Tenant within thirty (30) days following Tenant's receipt of an invoice therefor, which invoice shall include reasonable back-up documentation with respect to such Tenant Delay Costs.

5. Requests for Consent. Except as otherwise provided in this Work Letter, each of Landlord and Tenant shall respond to all requests for consents, approvals or directions made by the other pursuant to this Work Letter within five (5) business days following such party's receipt of such request from the other. If a party fails to respond within such five (5)-business day period, then the non-responding party shall be deemed to have approved such item.

6. Completion of Landlord's Construction Work. Without limiting any other provision of this Work Letter, Landlord shall complete Landlord's Construction Work described in this Work Letter in all respects in accordance with the provisions of the Lease and this Work Letter. Landlord's Construction Work shall be deemed completed at such time as Landlord shall furnish to Tenant evidence that (a) all Landlord's Construction Work has been completed (which shall be evidenced by the Base Building Architect's and the TI Architect's respective certificates of completion certifying that all work performed in, on or about the Project is in accordance with the Approved Base Building and Site Plans and the Approved TI Plans) and paid for in full (or for which final lien waivers have otherwise been obtained), and (b) all certifications and approvals with respect to Landlord's Construction Work that may be required from any governmental authority and any board of fire underwriters or similar body for the use and occupancy of the Premises have been obtained.

7. Miscellaneous.

7.1. Headings, Etc. Where applicable in this Work Letter, the singular includes the plural and the masculine or neuter includes the masculine, feminine and neuter. The Section headings of

this Work Letter are not a part of this Work Letter and shall have no effect upon the construction or interpretation of any part hereof.

7.2. Time of the Essence. Time is of the essence with respect to the performance of every provision of this Work Letter in which time of performance is a factor.

7.3. Covenants. Each provision of this Work Letter performable by Landlord or Tenant shall be deemed both a covenant and a condition.

7.4. Consent. Whenever consent or approval of either party is required, that party shall not unreasonably withhold, condition or delay such consent or approval, except as may be expressly set forth to the contrary. Whenever the written consent or approval of either party is required, such consent or approval may be provided in the form of electronic mail from Landlord's Authorized Representative or Tenant's Authorized Representative, as applicable.

7.5. Entire Agreement. The terms of this Work Letter are intended by the parties as a final expression of their agreement with respect to the terms as are included herein, and may not be contradicted by evidence of any prior or contemporaneous agreement, other than the Lease. To the extent there is any conflict between the terms of this Work Letter and the terms of the Lease, with respect to the design, construction or performance of Landlord's Construction Work, the terms and provisions of this Work Letter shall control.

7.6. Invalid Provisions. Any provision of this Work Letter that shall prove to be invalid, void or illegal shall in no way affect, impair or invalidate any other provision hereof, and all other provisions of this Work Letter shall remain in full force and effect and shall be interpreted as if the invalid, void or illegal provision did not exist.

7.7. Construction. The language in all parts of this Work Letter shall be in all cases construed as a whole according to its fair meaning and not strictly for or against either Landlord or Tenant.

7.8. Assigns. Each of the covenants, conditions and agreements herein contained shall inure to the benefit of and shall apply to and be binding upon the parties hereto and their respective heirs; legatees; devisees; executors; administrators; and permitted successors, assigns, sublessees. Nothing in this Section 7.8 shall in any way alter the provisions of the Lease restricting assignment or subletting.

7.9. Authority. That individual or those individuals signing this Work Letter guarantee, warrant and represent that said individual or individuals have the power, authority and legal capacity to sign this Work Letter on behalf of and to bind all entities, corporations, partnerships, limited liability companies, joint venturers or other organizations and entities on whose behalf said individual or individuals have signed.

7.10. Counterparts. This Work Letter may be executed in one or more counterparts, each of which, when taken together, shall constitute one and the same document.

7.11. Notice of Completion. Within thirty (30) days after completion of construction of Landlord's Construction Work, Landlord shall cause a Notice of Completion to be recorded in the office of the Recorder of the County in which the Project is located and shall furnish a copy thereof to Tenant upon such recordation.

7.12. No Fee to Landlord. Except as otherwise provided in the Lease, Landlord shall receive no fee for supervision, profit, over overhead in connection with the Landlord's Construction Work. In no event shall this Section 7.12 limit the fees that are payable to the architect, engineering consultants, design team, general contractor, subcontractors and any third-party construction manager .

[REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK]

IN WITNESS WHEREOF, Landlord and Tenant have executed this Work Letter to be effective on the date first above written.

143	Hang/Tape/Finish Drywall - Basement	5 days	Tue 3/19/13	Mon 3/25/13
144	Paint Walls - Prime/1st coat - Basement	8 days	Thu 3/14/13	Mon 3/25/13
145	Install Fencing and Gates - Basement	21 days	Mon 12/17/12	Mon 1/14/13
146	Paint Final Coat - Basement	5 days	Tue 3/26/13	Mon 4/1/13
147	MEP/FP Trim Out/Start Up - Basement	3 days	Tue 4/2/13	Thu 4/4/13
148	Install Doors/Hardware/Specialties - Basement	3 days	Fri 4/5/13	Tue 4/9/13
149	Install Flooring and Base - Basement	2 days	Wed 4/10/13	Thu 4/11/13
150	Final Cleaning - Basement	3 days	Fri 4/12/13	Tue 4/16/13
151	**Testing and Inspections**	**40 days**	**Thu 4/4/13**	**Wed 5/29/13**
152	Punch List Creation - Floors 5-3	3 days	Mon 4/22/13	Wed 4/24/13
153	Complete Punch List Work - Floors 5 - 3	10 days	Thu 4/25/13	Wed 5/8/13
154	Punch List Creation - Floors 2, 1, Basement and Exterior	3 days	Thu 5/9/13	Mon 5/13/13
155	Complete Punch List Work - Floors 2, 1, Basement and Exterior	10 days	Tue 5/14/13	Mon 5/27/13
156	Life Safety and Occupancy Inspections	20 days	Thu 5/2/13	Wed 5/29/13
157	Achieve Certificate of Occupancy	0 days	Wed 5/29/13	Wed 5/29/13
158	ARCO Compile Closeout Documents and Manuals	30 days	Thu 4/4/13	Wed 5/15/13
159	Owner Training	5 days	Thu 5/23/13	Wed 5/29/13
160	Project Completion	0 days	Wed 5/29/13	Wed 5/29/13

SUBORDINATION AGREEMENT AND
AGREEMENT OF NON-DISTURBANCE AND ATTORNMENT

(EWB Form – Rev. 2-2007)

This Subordination Agreement and Agreement of Non-Disturbance and Attornment ("Agreement") is made and entered into as of this ___ day of _____, 2013, among (i) East West Bank ("Lender"), (ii) Molina Healthcare, Inc. ("Tenant") and (iii) 6th & Pine Development, LLC ("Owner"), with reference to the following:

RECITALS

A. Lender has made a loan in the amount of approximately $1,530,000 and is proposing to make additional loans (collectively, the "Loans") to Owner, which are secured or are to be secured by, among other things, (i) certain deeds of trust recorded or to be recorded against all or a portion of the real property legally described in Exhibit A attached hereto and the improvements thereon (collectively, the "Real Property"), consisting of (a) an existing Deed of Trust in the amount of $1,530,000 in connection with Owner's development of Phase II (as such term is defined in the Lease described below) (which, upon the recordation of the Construction Deed of Trust for Phase II described in (c) below, is expected to be paid in full and reconveyed), (b) a Construction Deed of Trust, which is expected to be recorded in the amount of approximately $15,795,000 in connection with Owner's development of Phase I (as such term is defined in the Lease described below), and (c) a Construction Deed of Trust, which is expected to be recorded in the amount of approximately $25,350,000 in connection with Owner's development of Phase II (each, a "Deed of Trust" and collectively, the "Deeds of Trust"), and (ii) a collateral assignment (the "Collateral Assignment") of Owner's rights under that certain Parking License Agreement dated as of May 25, 2012 (together with all amendments thereto, the "Parking Agreement"), between the City of Long Beach, as "Licensor," and Owner, as "Licensee". The Real Property, together with Owner's rights under the Parking Agreement, shall be referred to herein, collectively, as the "Property".

B. Tenant has leased the Real Property and been granted certain off-site parking rights which Owner intends to satisfy, to the extent possible, with parking spaces provided to it under the Parking Agreement (collectively, the "Premises), pursuant to that certain Office Building Lease – Full Service Gross – Single Tenant Building(s) dated as of February 28, 2013 (together with all amendments thereto being referred to as the "Lease"), by and between Owner and Tenant.

C. Lender and Tenant desire to enter into this Agreement under which Tenant subordinates the Lease and its interest in the Property and agrees to attorn to Lender and under which Lender agrees to not disturb Tenant's possession of or right to use the Premises all to the extent set forth herein, and so long as Tenant is not in default under the Lease.

NOW THEREFORE, with reference to the foregoing recitals and for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties to this Agreement agree as follows:

1. Subordination. Subject to the terms and conditions of this Agreement, the Lease, and the rights of Tenant in, to and under the Lease and the Premises, are hereby subjected and subordinated to the lien of each Deed of Trust, it being understood and agreed that the foregoing subordination shall apply to any and all increases, renewals, modifications, extensions, substitutions, replacements and/or consolidations of each Deed of Trust, provided that any and all such increases, renewals, modifications, extensions, substitutions, replacements and/or consolidations shall nevertheless be subject to the terms of this Agreement.

2. Tenant Not to Be Disturbed; Rights Preserved. So long as Tenant is not in default in the payment of rent or of any of the terms, covenants or conditions of the Lease on Tenant's part to be performed (beyond any period given Tenant in the Lease to cure such default) and Tenant attorns to Lender as provided herein, (a) neither Tenant's possession or use or right to possession or use of the Premises, nor any other right or privilege granted or inuring to the benefit of Tenant under the Lease, shall be diminished, disturbed or interfered with by Lender, and (b) Lender will not join Tenant as a party defendant in any action or proceeding foreclosing any one or more of the Deeds of Trust unless such joinder is necessary to foreclose such Deed(s) of Trust and then only for such purpose and not for the purpose of terminating the Lease. Lender acknowledges that Tenant has a right of first offer to purchase the Premises, as set forth in Exhibit "I-1" of the Lease, and an option to purchase the Premises, as set forth in Exhibit "I-2" of the Lease (collectively, the "Tenant Purchase Rights"). Lender acknowledges and agrees that the Tenant Purchase Rights will expressly survive (and may be exercised by Tenant pursuant to the respective terms thereof following) any transfer of the Premises to any third-party purchaser that occurs as the result of a foreclosure or other proceeding brought to enforce any one or more of the Deeds of Trust, or any such transfer of the Premises by deed in lieu of foreclosure; provided, however, that Tenant's Purchase Rights shall not be exercisable (i) in any transfer that occurs as the result of a foreclosure, deed in lieu of foreclosure or other such proceeding or (ii) during such time as Lender is the owner of the Premises (provided that Tenant's Purchase Rights shall be exercisable pursuant to their respective terms against any other Successor Landlord, as defined in Section 3 below).

3. Tenant to Attorn To Lender. Subject to Section 2 above, if Lender shall become the owner of the Premises or the Premises shall be sold by reason of foreclosure or other proceedings brought to enforce any one or more of the Deeds of Trust or the Premises shall be transferred by deed in lieu of foreclosure, the Lease shall continue in full force and effect as a direct Lease between the then owner of the Premises (a "Successor Landlord"), who shall succeed to the rights and duties of the landlord under the Lease. Subject to Section 2 above, Tenant shall attorn to such Successor Landlord as its landlord under the Lease, said attornment to be effective and self-operative without the execution of any further instruments. Tenant hereby waives the provisions of any statute or rule of law, now or hereafter in effect, which may give or purport to give Tenant any right or election to terminate or otherwise adversely affect the Lease and the obligations of Tenant thereunder as a result of any such foreclosure or deed-in-lieu of foreclosure.

4. Notice of Default; Rent Payments to Lender. In the event that Lender notifies Tenant of a default under any one or more of the Deeds of Trust and requests Tenant to pay its rent and all other sums due under the Lease to Lender, Tenant shall pay such sums directly to Lender, or as Lender may otherwise request, without any further consent of Owner. Owner hereby irrevocably authorizes and directs Tenant to make such payments to Lender despite the receipt of any contrary instructions from Owner or any other party, except a court of competent jurisdiction. Payment of rent and any other sums due under the Lease by Tenant in accordance with the provisions of this Section shall constitute performance by Tenant under the Lease as to all amounts paid.

5. Limitations.

(a) The following terms shall have the following meanings for purposes of this Section 5:

(i) Construction-Related Obligation. A "Construction-Related Obligation" means any obligation of Owner under the Lease to make, pay for, or reimburse Tenant for any alterations, demolition, or other improvements at the Premises, including the construction of any on-site parking spaces. "Construction-Related Obligations" shall not include: (a) reconstruction or repair following fire, casualty or condemnation; or (b) ordinary maintenance and repairs.

(ii) Former Landlord. A “Former Landlord” means Owner and any other party that was landlord under the Lease at any time before the occurrence of any attornment under this Agreement.

(iii) Offset Right. An "Offset Right" means any right or alleged right of Tenant to any offset, defense (other than one arising from actual payment and performance, which payment and performance would bind a Successor Landlord pursuant to this Agreement), claim, counterclaim, reduction, deduction, or abatement against Tenant's payment of Rent or performance of Tenant's other obligations under the Lease, arising (whether under the Lease or other applicable law) from Owner's breach or default under the Lease, other than in connection with Construction-Related Obligations.

(iv) Rent. The "Rent" means any fixed rent, base rent or additional rent under the Lease.

(b) A Successor Landlord shall not be liable for or bound by (i) any Offsite Right that Tenant may have against any Former Landlord relating to any event or occurrence before the date of attornment, including any claim for damages of any kind whatsoever as the result of any breach by Former Landlord that occurred before the date of attornment (provided, that subject to subsection (iii) of this paragraph below, the foregoing shall not limit either (A) Tenant’s right to exercise any Offset Right against Successor Landlord otherwise available to Tenant because of events occurring after the date of attornment, or (B) Successor Landlord’s obligation to correct any conditions that existed as of the date of attornment and violate Successor Landlord’s obligations as landlord under the Lease), (ii) any security deposit or payment of rent (for more than one month in advance of the date due under the Lease) made by Tenant to any Former Landlord, except to the extent actually received by Successor Landlord, (iii) any Construction-Related Obligations (provided, that the foregoing shall not limit (y) any Successor Landlord’s maintenance and repair obligations under the Lease, including, without limitation, under General Condition N or Article 9 thereof, or (z) Tenant’s rights with respect to warranty claims under General Condition B of the Lease with respect to any Successor Landlord other than Lender, against whom such rights of Tenant shall not be enforceable), or (iv) any obligation to expend funds which are capital in nature, except for items of ordinary maintenance and repair for the Premises. Notwithstanding the foregoing, or any provision to the contrary set forth in this Agreement, subject to Section 6 below, nothing in this Agreement is intended to limit Tenant’s right to terminate the Lease in the event that Owner or any Successor Landlord fails to satisfy the obligations of the landlord under the Lease, including, without limitation, the failure to satisfy the conditions set forth in General Condition R or Section 2.6 of the Lease.

(c) Notwithstanding any term of the Lease, upon foreclosure of any one or more of the Deeds of Trust, or acceptance of a deed in lieu thereof or other similar transfer, any environmental/hazardous materials indemnity and/or reimbursement provisions under the Lease shall not be applicable to, or enforceable against any Successor Landlord with respect to any period prior to such Successor Landlord’s ownership and thereafter only to the extent caused by such Successor Landlord. If Lender becomes the owner of all or a portion of the Property or the Property (or a portion thereof) is sold to a third party by reason of foreclosure or other proceedings brought to enforce any one or more of the Deeds of Trust or the Property (or a portion thereof) is conveyed by deed-in-lieu of foreclosure, Tenant agrees that, notwithstanding anything to the contrary contained in the Lease, after such foreclosure sale or conveyance by deed-in-lieu of foreclosure, neither Lender nor any such third party shall have any personal liability to Tenant under the Lease and Tenant shall look solely to the owner’s interest in the Property (or portion thereof) for satisfaction of any of its remedies for collection of a judgment or other judicial process requiring payment of money. Further, in the event Lender transfers its interest in the Lease to a third party, Lender shall be automatically

freed and released, from and after the date of such transfer or conveyance, of all liability for the performance of any covenants and agreements which accrue after the date of such transfer of Lender's interest.

6. Modification; Notice and Cure Rights**.** The Lease shall not be amended, modified or supplemented, nor will the Lease be terminated (except as set forth in the Lease after a default or other trigger event and after the notice and cure rights set forth below) or any party having liability under the Lease be released by the other, without the prior written consent of Lender. Tenant shall not terminate or seek to terminate the Lease until Tenant has given written notice, by personal service, overnight courier or registered or certified mail, return receipt requested, of said act or omission to Lender, which notice shall be addressed to East West Bank, 9300 Flair Drive, 6th Floor, El Monte, CA 91731; and until a period of time equal to the greater of: (a) the time allowed landlord under the Lease or (b) thirty days following such notice has elapsed, during which period Lender has the right, but not the obligation, to remedy such act, omission or other matter. If possession by Lender of the Property is necessary to effect such remedy and would be commercially reasonable, then the period of time for remedying such act or omission shall include a reasonable period of time for Lender to gain possession of the Premises, whether by foreclosure or otherwise (but in no event to exceed ninety (90) days).

7. Tenant Representations and Warranties. Tenant hereby represents and warrants that (a) the Lease is solely and exclusively for the Premises described in the Lease and located on the Property identified in Exhibit "A" attached to this Agreement and the off-site parking areas described in the Lease, (b) the Lease is not a "master lease" for any other premises and/or property leased by Tenant from Owner, (c) any default under the Lease, and the exercise of Owner's rights and remedies in connection with such default, shall only impact and/or effect Tenant's obligations with respect to the Premises and/or the Property, and (d) any default by Tenant under any other lease with Owner or any other landlord, and the exercise of any such landlord's rights and remedies in connection with such default, shall not affect Tenant's obligations under the Lease.

8. Miscellaneous. This Agreement and each and every covenant, agreement and other provision hereof shall be binding upon and shall inure to the benefit of the parties hereto and their representatives, successors and assigns. This Agreement may not be modified orally or in any manner other than by an agreement in writing signed by the parties hereto or their respective successors in interest. The term "Lender" as used throughout this Agreement includes any successor or assign of Lender and any holder(s) of any interest in the indebtedness secured by the Deeds of Trust. This Agreement and the rights and duties of the parties hereunder shall be governed for all purposes by the law of the State of California and the law of the United States applicable to transactions within such state. This Agreement may be executed in multiple counterparts, and by the different parties hereto in separate counterparts, each of which when so executed and delivered shall be deemed to be one and the same instrument with the same signature as if all parties to this Agreement had signed the same signature page.

8. Attorneys' Fees. If any lawsuit, judicial reference or arbitration is commenced which arises out of or relates to this Agreement, the prevailing party shall be entitled to recover from each other party such sums as the court, referee or arbitrator may adjudge to be reasonable attorneys' fees, in addition to costs and expenses otherwise allowed by law.

[signatures follow]

IN WITNESS WHEREOF, the parties hereto have each caused this Agreement to be executed as of the date first above written.

PARKING LICENSE AGREEMENT

THIS PARKING LICENSE AGREEMENT ("Agreement") is entered into this 25th day of May, 2012, by the CITY OF LONG BEACH, a California municipal corporation ("Licensor"), pursuant to a minute order adopted by its City Council on May 1, 2012, and 6TH & PINE DEVELOPMENT, LLC, a California limited liability company ("Licensee").

For and in consideration of the faithful performance of the terms and conditions hereinafter set forth, the parties agree as follows:

1. PARKING SPACES AND PREMISES. City hereby grants Licensee the use of not more than five hundred (500) parking spaces on all weekdays during the Term from the hours of 7:00am through 6:00pm ("Parking Spaces") for purposes of providing parking to its tenant at the development at the corner of 6th Street and Pine Avenue, Long Beach, California, and commonly known as the "Press-Telegram Building" (the "Development"). The Parking Spaces may be located on more than one City-owned parking lot or structure, located anywhere within the City limits, as designated by City (collectively, the "Premises"). City, upon sixty (60) days advance written notice to Licensee and at its sole and absolute discretion, may relocate all or a portion of the Parking Spaces to alternate Premises located anywhere within the City limits. City shall issue to Licensee annual parking permits authorizing use of the Parking Spaces ("Permits") in accordance with its standard procedures. City shall issue only as many Permits as Licensee requests

in writing, which such total requested number of Permits may increase or decrease from month-to-month and costs associated with such Permits shall be pro-rated accordingly. This Agreement is meant to meet the parking demands of Licensee's tenant at the Development only, and in no way shall the parking rights granted to Licensee under this Agreement be interpreted to satisfy or displace any code-required parking in connection with new construction at the Development as required by the Long Beach Municipal Code or other applicable regulations.

2. TERM. The term of this Agreement shall commence on January 1, 2013 (the "Commencement Date"), and shall terminate at midnight on December 31, 2024, unless sooner terminated as provided herein (the "Term"). City and Licensee may mutually agree to renew this Agreement for two (2) additional five (5)-year terms. All provisions of this Agreement applicable to the original term shall apply with equal force to the extended term.

3. PARKING PERMIT FEES. Subject to the provisions of Section 4, Licensee shall pay an annual fee equal to Six Hundred Dollars ($600) per Permit issued by City ("Parking Fee").

4. ADJUSTMENT TO PARKING FEES. The Parking Fee to be paid to City by Licensee for each Permit shall be adjusted annually effective on the adjustment date of January 1st, by the 12 Months Percent Change in the Consumer Price Index for All Urban Consumers, All Items, Base Period 1982-84=100, for the Los Angeles-Riverside-Orange County, CA Area, published by the United States Department of Labor, Bureau of Labor Statistics. The December Index immediately prior to the adjustment date shall be the "Current Index," and the December Index

for the year previous shall be the "Beginning Index". If the Current Index is greater than the Beginning Index, the then-current rent or adjusted Parking Fee shall increase by the same percentage rounded to the nearest tenth as did the Current Index increase over the Beginning Index, so that the Parking Fee shall increase each year by the same percentage as did the Consumer Price Index. In no event shall any Parking Fee adjustment result in a Parking Fee less than that paid during the preceding period.

5. USE OF PREMISES. The Premises shall be used during Licensee's periods of exclusive occupancy for parking by employees of Licensee's tenant at the Development and for no other purpose. Licensee shall not occupy, use, or grant permission to anyone to occupy or use the Premises for any unlawful purpose. Licensee shall conduct its business and activities and control its agents, employees, invitees, licensees, volunteers, and visitors in such a manner that will not create any nuisance, unreasonable annoyance or waste. On weekends and weekday overnights between the hours of 6:00pm through 7:00am the Premises shall be available to the public. Nothing contained in this Section 5 shall require Licensee to supervise, control, or be responsible for activities upon or use of the Premises by the public. Prior to issuing a parking citation to any vehicle displaying a valid Permit issued pursuant to this Agreement, City shall grant such vehicle a 30-minute grace period.

6. CONDITION OF PREMISES. City shall deliver the Premises to Licensee paved, striped, and free of debris on the Commencement Date. Any replacement Premises designated by City pursuant to Section 1 shall also be

delivered to Licensee, paved, striped and free of debris. Except as otherwise described above, City delivers the Premises to Licensee “AS IS” and with all faults.

7. MAINTENANCE OF PREMISES. City shall provide for the ordinary care and maintenance of the Premises; provided, however, that Licensee shall be responsible for all costs associated with damage caused by Licensee’s use of the Premises beyond reasonable wear and tear.

8. INDEMNIFICATION. Licensee shall defend, indemnify, and hold harmless City, its officers and employees (“City Indemnified Parties”) from and against all causes of actions, damage, proceedings, claims, demands, loss, liens, costs and expenses alleging injury to or death of persons, or damage to property, or any other claim of damage brought, made, filed against, imposed on or sustained by the City Indemnified Parties, or any of them, and arising from or attributable to or caused, directly or indirectly (collectively or individually, a “claim"):

(i) by the use of the Premises or any equipment or materials located thereon, or from activities conducted thereon by Licensee, its employees, invitees, agents, or by any person or persons acting on behalf of Licensee and with Licensee's knowledge and consent, express or implied during periods of Licensee’s exclusive use; or

City shall defend, indemnify, and hold harmless Licensee, its officers and employees (“Licensee Indemnified Parties”) from and against all causes of actions, damage, proceedings, claims, demands, loss, liens, costs and expenses alleging injury to or death of persons, or damage to

property, or any other claim of damage brought, made, filed against, imposed on or sustained by the Licensee Indemnified Parties, or any of them, and arising from or attributable to or caused, directly or indirectly (collectively or individually, a "claim") by the use of the Premises by the public, or the employees, agents or invitees of City or by any person or persons acting on behalf of City.

9. INSURANCE. Upon execution of this Agreement and in partial performance of Licensee's obligations hereunder, Licensee shall procure and maintain, at its cost, during the Term and any extensions or renewals thereof, from an insurer admitted in California or having a minimum rating of or equivalent to A:VIII in Best's Insurance Guide:

(i) Comprehensive General Liability insurance with a combined single limit of at least $1,000,000 for each occurrence or Two Million Dollars ($2,000,000) general aggregate. City, its officials, employees and agents shall be covered as additional insureds with respect to liability arising from activities performed by or on behalf of Licensee. Said insurance shall be primary insurance with respect to City and shall contain a cross-liability endorsement. (ii) "All Risk" property insurance in an amount sufficient to cover the full replacement value of Licensee's personal property, improvements and equipment on the Premises.

(iii) Upon the execution of this Agreement, Licensee shall deliver to City certificates of insurance with original endorsements evidencing the coverage required by this Agreement. The certificates and endorsements shall be

signed by a person authorized by the insurer to bind coverage on its behalf. City reserves the right to require complete certified copies of all policies at any time.

(iv) Said insurance shall contain an endorsement requiring thirty (30) days' prior written notice from insurers to City before cancellation or change of coverage.

(v) Said insurances may provide for such deductibles or self-insured retention as may be acceptable to the City Manager or his designee. In the event such insurance does provide for deductibles or self-insured retention, Licensee agrees that it will fully protect City, its officials, and employees in the same manner as these interests would have been protected had the policy or policies not contained a deductible or retention provisions. With respect to damage to property, City and Licensee hereby waive all rights of subrogation, one against the other, but only to the extent that collectible commercial insurance is available for said damage.

(vi) Not more frequently than every two (2) years, if, in the opinion of City, or of an insurance broker retained by City, the amount of the foregoing insurance coverages is not adequate, Licensee shall increase the insurance coverage as required by City.

(vii) The procuring of said insurance shall not be construed as a limitation on Licensee's liability or as full performance on Licensee's part of the indemnification and hold harmless provisions of this Agreement; and Licensee understands and agrees that, notwithstanding any insurance, Licensee's obligation

to defend, indemnify and hold City, its officials and employees harmless hereunder is for the full and total amount of any damage, injuries, loss, expense, costs or liabilities in any manner connected with or attributed to the acts or omissions of Licensee, its officers, agents, employees, patrons or visitors, or the operations conducted by Licensee, or the Licensee's use, misuse or neglect of the Premises.

(viii) Any modification or waiver of the insurance requirements herein shall only be made with the written approval of the City's Risk Manager or designee.

10. CITY'S NON-LIABILITY. Except as expressly provided for in this Agreement, City shall not be liable for any damage to Licensee or Licensee's property or any of Licensee's employees, agents, invitees, licensees, volunteers or visitors, and Licensee, as a material part of the consideration of this Agreement, hereby waives all claims and demands against City for any such damage, to the extent allowed by law, except to the extent that such damage is caused by City's negligence. Licensee assumes all risk of theft, misappropriation, damage, injury, claims or losses of its personal property kept, stored, held, placed or otherwise left on the Premises, except as expressly provided for in this Agreement. Licensee shall not be responsible for theft, misappropriation, damage, injury, claims or losses of personal property belonging to members of the public.

11. ASSIGNMENT AND SUBLETTING. Licensee may not assign or sub-license the Premises without the express written consent of the City, which may be withheld at City's sole discretion. Notwithstanding the preceding sentence,

Licensee may assign this Agreement to a purchaser of the Development. No assumption or sub-licensing of this Agreement will be effective without the express written assumption by such assignee of the obligations of Licensee under this Agreement, nor shall such sub-licensing or assignment alter the primary liability of Licensee for the payment of Parking Fees or for the performance of any other obligations to be performed by Licensee.

12. TAXES. Licensee shall pay all assessments or real estate taxes or possessory interest taxes, if any, levied against the Premises due to Licensee's periods of exclusive use; provided that Licensee shall only be responsible for its pro-rata share of taxes levied against the Premises.

13. INSPECTION AND ENTRY. City shall have the right, at all reasonable times, to enter the Premises to inspect them to determine if Licensee is complying with the terms, covenants and conditions of this Agreement, to comply with any law, order, or requirement of any governmental authority, and to serve or post any notice.

14. DEFAULT. The occurrence of any one or more of the following acts shall constitute a default by Licensee, if said failure is not cured within thrity (30) days after City gives notice to Licensee of said failure:

(i) Failure to use the Premises as described in Section 5;

(ii) Failure to pay Parking Fees;

(iii) Failure to maintain the insurance required herein;

(iv) Failure to execute a Lease with Molina Health Care Group respecting the Development with a term of at least ten (10) years;

(iv) Failure to comply with any applicable law, rule, ordinance, or regulation; or

(v) Any failure to perform any other term, covenant, or condition of this Agreement not specifically identified in this Section or in elsewhere in this Agreement. If the default cannot reasonably be cured in thirty (30) days, then Licensee shall not be in default if Licensee begins to cure within said period and diligently proceeds to cure to completion; provided that in no event shall such cure period extend beyond ninety (90) days.

15. NOTICE. Any notice or request given under this Agreement shall be in writing and personally delivered or deposited in the U.S. Postal Service, postage prepaid, first class, addressed as follows:

To City: City of Long Beach
333 West Ocean Boulevard, 13th Floor
Long Beach, CA 90802
Attn: City Manager

To Licensee: 6th & Pine Development, LLC
741 Atlantic Avenue
Long Beach, CA 90813
Attn: Michelle Molina

Notice shall be effective on the date of personal delivery or deposit in the mail, whichever first occurs. Notice of change of address or the person to whom notice shall be directed shall be given in the manner prescribed herein.

16. NO WAIVER. The failure or delay of either party to insist on strict enforcement of any term, covenant, or condition herein shall not be deemed a waiver of any right or remedy either party may have and shall not be deemed a waiver of any subsequent or other breach of any term, covenant, or condition. Any waiver or permission of any kind by either party shall be in writing and signed to be effective.

17. SURRENDER OF PREMISES. On the expiration or sooner termination of this Agreement, Licensee shall deliver to City possession of the Premises. Licensee shall remove its equipment, supplies and other items so as to leave the Premises in a condition which does not damage the Premises and the improvements thereto in any way.

18. CITY'S RIGHT TO RE-ENTER ON TERMINATION OR EXPIRATION. Licensee shall peaceably deliver possession of the Premises to City on the date of expiration or sooner termination of this Agreement. On giving notice of termination to Licensee, City shall have the right to re-enter and take possession of the Premises on the date such termination becomes effective without further notice of any kind and without instituting summary or regular legal proceedings.

19. RELOCATION WAIVER. Licensee expressly waives any rights to relocation benefits or other compensation pursuant to the California Relocation Act or applicable laws governing eminent domain.

20. PERMANENT PARKING. City and Licensee agree to work together in good faith to identify property suitable to provide for permanent parking for the Development, whether publicly-owned or privately-owned, it being the intent of the parties that such permanent parking would replace the Parking Spaces provided pursuant to this Agreement.

21. MISCELLANEOUS.

A. Each party shall bear its own costs and expenses in connection with the preparation of this Agreement. In the event any action is brought with respect to theenforcement of this Agreement, the prevailing party shall be entitled to recover its costs and expenses from the other party, including, but not limited to, attorney's fees and court costs.

B. This Agreement shall be binding on and inure to the benefit of the parties and their successors, heirs, personal representatives, and all of the parties shall be jointly and severally liable hereunder.

C. This Agreement constitutes the entire understanding between the parties and supersedes all prior negotiations, agreements and understandings, oral or written, with respect to the subject matter hereof.

D. This Agreement may not be amended except in a writing duly executed by both parties.

E. This Agreement shall be governed by and construed under the laws of the State of California, and no choice of laws or principles thereof shall apply.

F. The captions and numbers herein and the grouping of the provisions of this Agreement into separate sections and paragraphs are for the purpose of convenience only and shall not be considered a part hereof, and shall have no effect on the interpretation of this Agreement.

G. If any term, covenant, or condition of this Agreement is found to be invalid, ineffective, void, or unenforceable for any reason by a court of competent jurisdiction, the remaining terms, covenants and conditions shall remain in full force and effect.

H. Time is of the essence in this Agreement and all of its provisions.

I. This Agreement shall not be recorded.

J. The relationship of the parties hereto is that of City and Licensee, and the parties agree that nothing contained in this Agreement shall be deemed or construed as creating a partnership, joint venture, principal-agent relationship, association, or employer-employee relationship between them or between City and any third party.

K. This Agreement is created as a joint effort between the parties and fully negotiated as to its terms covenants and conditions. This Agreement shall not be construed against either party as the drafter.

L. Each provision of this Agreement shall be deemed both a covenant and a condition.

M. This Agreement is created for the benefit of the parties only and is not intended to benefit any third person or entity.

N. Where consent or approval is required from either Licensee or City by the provisions of this Agreement, the giving of consent or approval shall not be unreasonably withheld or delayed by the party from whom consent or approval is required.

O. All exhibits to this Agreement are hereby incorporated herein by reference.

ESTOPPEL AND AGREEMENT REGARDING PARKING AGREEMENT

This **ESTOPPEL AND AGREEMENT REGADING PARKING AGREEMENT** (this "**Agreement**") dated _____, 2013, is made among **6TH & PINE DEVELOPMENT, LLC**, a California limited liability company, whose address is 741 Atlantic Avenue, Long Beach, California 90813 ("**Licensee**"), the **CITY OF LONG BEACH**, a California municipal corporation, whose address is 333 West Ocean Boulevard, 13th Floor, Long Beach, California 90802 (the "**City**"), and **MOLINA HEALTHCARE, INC.**, a Delaware corporation, whose address is 200 Oceangate, Suite 100, Long Beach, California 90802, Attention: General Counsel ("**Tenant**").

WHEREAS, Tenant and Licensee have entered into an Office Building Lease–Full Service Gross–Single Tenant Building(s), dated as of February 28, 2013 (the "**Lease**"), a Memorandum of which is to be recorded in the Official Records of Los Angeles County, California covering, among other property, the land (the "**Land**") described in **Exhibit "A"** which is attached hereto and incorporated herein by reference, and the improvements ("**Improvements**") thereon (or to be built thereon) (such Land and Improvements being herein together called the "**Property**");

WHEREAS, Licensee is the licensee under a Parking License Agreement by and between the City and Licensee entered into as of May 25, 2012 (as the same may from time to time be renewed, extended, amended or supplemented, the "**Parking Agreement**"), covering the use of up to five hundred (500) parking spaces located at one or more City-owned parking lots or structures, located within the City of Long Beach, California (herein referred to as the "**Parking Premises**"); and

WHEREAS, the term the "City" as used herein means the present licensor under the Parking Agreement, or, if the licensor's interest is transferred or assigned in any manner, the successor(s) or assign(s) occupying the position of licensor under the Parking Agreement at the time in question.

NOW THEREFORE, in consideration of the mutual agreements herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Estoppel Certificate. The City and Licensee agree to execute and deliver from time to time, upon the reasonable request of the other party or of Tenant, a certificate regarding the status of the Parking Agreement, consisting of statements, if true (or if not, specifying why not), (a) that the Parking Agreement is in full force and effect, (b) the date through which payments have been paid, (c) the nature of any amendments or modifications of the Parking Agreement, (d) to the best of the City's and Licensee's knowledge, respectively, no default exists under the Parking Agreement, (e) to the best of the City's and Licensee's knowledge, respectively, no setoffs, recoupments, estoppels, claims or counterclaims exist against the City, and (f) such other matters as may be reasonably requested.

2. Acknowledgement and Agreement by the City. The City acknowledges and agrees as follows:

(a) From and after the date hereof, in the event of a default by the Licensee under the Parking Agreement, the City shall give Tenant notice of such default concurrently at the time of delivery of notice of such default to the Licensee, and shall afford Tenant an opportunity to cure such default prior to termination of the Parking Agreement by the City, all pursuant to Section 14 of the Parking Agreement; provided, however, that Tenant shall have no duty or obligation to cure or remedy any breach or default. Notwithstanding the terms of the Parking Agreement, the City hereby grants Tenant, in addition to the period given to Licensee for remedying defaults, an additional thirty (30) days to remedy, or cause to be remedied, any such default. It is specifically agreed that the City shall not, as to Tenant, require cure of any such default which is personal to Licensee, and therefore not susceptible to cure by Tenant. In the event that such default shall be cured, either by Tenant or by Licensee, the City agrees that Tenant's use of the Parking Premises pursuant to the Parking Agreement shall not be disturbed and that the Parking Agreement shall not be subject to termination as a result of the occurrence of such default, which is cured either by Tenant or Licensee. The City shall accept performance by Tenant of any term, covenant, condition or agreement to be performed by Licensee under the Parking Agreement with the same force and effect as though performed by Licensee. No Licensee default under the Parking Agreement shall exist or shall be deemed to exist as long as Tenant, in good faith, shall have commenced to cure such default within the above referenced time period and shall be prosecuting the same to completion with reasonable diligence, subject to force majeure; provided that in no event shall such cure period exceed ninety (90) days.

(b) In the event of the termination of the Parking Agreement by reason of any default thereunder by Licensee, upon Tenant's written request, given within thirty (30) days after any such termination, the City, within fifteen (15) days after receipt of such request, shall execute and deliver to Tenant a new lease of the Parking Premises for the remainder of the term of the Parking Agreement upon all of the terms, covenants and conditions of the Parking Agreement. Tenant shall not become liable under the Parking Agreement unless and until Tenant becomes, and then only with respect to periods in which the Tenant succeeds to the interests of Licensee under the Parking Agreement.

(c) The City shall send a copy of any notice or statement under the Parking Agreement to Tenant at the same time such notice or statement is sent to Licensee if such notice or statement has a material impact on the economic terms, operating covenants or duration of the Parking Agreement. The City represents and warrants to Tenant that a true and complete copy of the Parking Agreement has been delivered by the City to Tenant.

3. Acknowledgment and Agreement by Licensee. Licensee, as licensee under the Parking Agreement, acknowledges and agrees for itself and its heirs, representatives, successors and assigns, that: (a) this Agreement does not constitute a waiver by Tenant of any of its rights under the Lease, or in any way release Licensee from its obligations to comply with the terms, provisions, conditions, covenants, agreements and clauses of the Lease; and (b) the provisions of the Lease remain in full force and effect and must be complied with by Licensee. Licensee shall send a copy of any notice or statement under the Parking Agreement to Tenant at the same time such notice or statement is sent the City if such notice or statement has a material impact on the economic terms, operating covenants or duration of the Parking Agreement.

4. Parking Agreement Status. The City and Licensee certify to Tenant that neither the City nor Licensee has knowledge of any default on the part of the other under the Parking Agreement, that the Parking Agreement is bona fide and contains all of the agreements of the parties thereto with respect to the letting of the Parking Premises, that the Parking Agreement has not been modified or amended and that all of the agreements and provisions therein contained are in full force and effect.

5. Notices. All notices, request, consents, demands and other communications required or which any party desires to give hereunder shall be in writing and shall be deemed sufficiently given or furnished if delivered by personal delivery, by expedited delivery service with proof of delivery, or by registered or certified United States mail, postage prepaid, at the addresses specified at the beginning of this Agreement (unless changed by similar notice in writing given by the particular party whose address is to be changed). Any such notice or communication shall be deemed to have been given either at the time of personal delivery or, in the case of delivery service or mail, as of the date of first attempted delivery at the address and in the manner provided herein. Notwithstanding the foregoing, no notice of change of address shall be effective except upon receipt. This Paragraph 5 shall not be construed in any way to affect or impair any waiver of notice or demand provided in this Agreement or in the Parking Agreement or to require giving notice or demand to or upon any persons in any situation or for any person.

6. Miscellaneous.

(a) Nothing contained in this Agreement shall be construed to derogate from or in any way impair, or affect the estate and rights created pursuant to the Lease.

(b) This Agreement shall inure to the benefit of the parties hereto, their respective successors and permitted assigns, and any subsequent owner of the Property, and its heirs, personal representatives, successors and assigns; provided, however, that in such event, the Parking Agreement shall remain in full force and effect, and thereupon all such obligations and liabilities shall be the responsibility of the party to whom Licensee's interest is assigned or transferred; and provided further that the interest of Licensee under this Agreement may not be assigned or transferred without the prior written consent of Tenant and the City.

(c) THIS AGREEMENT AND ITS VALIDITY, ENFORCEMENT AND INTERPRETATION SHALL BE GOVERNED BY THE LAWS OF THE STATE OF CALIFORNIA, WITHOUT REGARD TO CONFLICT OF LAW PRINCIPLES THAT WOULD RESULT IN THE APPLICATION OF ANY LAW OTHER THAN THE LAW OF THE STATE OF CALIFORNIA.

(d) The words "herein", "hereof", "hereunder" and other similar compounds of the word "here" as used in this Agreement refer to this entire Agreement and not to any particular section or provision.

(e) This Agreement may not be modified orally or in any manner other than by an agreement in writing signed by the parties hereto or their respective successors in interest.

(f) If any provision of the Agreement, shall be held to be invalid, illegal, or unenforceable in any respect, such invalidity, illegality or unenforceability shall not apply to or affect any other provision hereof, but this Agreement shall be construed as if such invalidity, illegibility, or unenforceability did not exist.

(g) Each individual executing this Agreement on behalf of the parties hereto represents and warrants that s/he is duly authorized to execute and deliver this Agreement on behalf of such entity, and that this Agreement is binding upon such party, in accordance with the terms of this Agreement.

(h) This Agreement may be executed in any number of counterparts and all of such counterparts shall together constitute one and the same instrument.

[Signatures appear on the following page]

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed and sealed as of the date first above written.

EXHIBIT 31.1

SECTION 302 CERTIFICATION

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed this annual report on Form 10-K for the fiscal year ended December 31, 2012, of Molina Healthcare, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
September 30, 2012

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of September 30, 2012, these health plans served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of primary care community clinics in California, Florida, New Mexico and Washington; additionally, we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts are renewable at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause upon 30 days to nine months with prior written notice. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's prior contract with the state expired without renewal on June 30, 2012 subject to certain transition obligations. For the six months ended June 30, 2012, our Missouri health plan contributed premium revenue of $113.8 million, or 4.1% of total premium revenue, and comprised 79,000 members, or 4.3% of total Health Plans segment membership as of June 30, 2012.

Our state Medicaid contracts may be periodically adjusted to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas. For example, our Texas health plan added significant membership effective March 1, 2012, in service areas we had not previously served (the Hidalgo and El Paso service areas); and among populations we had not previously served within existing service areas, such as the Temporary Assistance for Needy Families, or TANF, population in the Dallas service area. Additionally, the health benefits provided to our TANF and ABD members in Texas under our contracts with the state were expanded to include inpatient facility and pharmacy services.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On July 13, 2012, our Molina Medicaid Solutions segment received full federal certification of its Medicaid Management Information System, or MMIS, in the state of Idaho from the Centers for Medicare and Medicaid Services, or CMS. As a result of the CMS certification, the state of Idaho is entitled to receive federal reimbursement of 75% of its MMIS operations costs retroactive to June 1, 2010, the date that the system first began processing claims.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement MMIS to another company For the nine months ended September 30, 2012, our revenue under the Louisiana MMIS contract was approximately $38.8 million, or 29.3% of total service revenue. We expect that we will continue to perform under this contract through implementation and acceptance of the successor MMIS. Based upon our past experience and our knowledge of the Louisiana MMIS bid process, we believe that implementation and acceptance of the successor MMIS will not occur until 2014 at the earliest. Through implementation and acceptance of the successor MMIS we expect to recognize approximately $40 million in revenue annually under our Louisiana MMIS contract.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2012. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2011. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2011 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2011 audited financial statements.

Reclassifications

We have reclassified certain amounts in the 2011 consolidated statement of cash flows to conform to the 2012 presentation.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn will lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of $0.5 million and $1.0 million at September 30, 2012, and December 31, 2011, respectively.

Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health: A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At both September 30, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): Our contract with the state of New Mexico directs that a portion of premiums received may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. At both September 30, 2012, and December 31, 2011, we had not recorded any liability under the terms of these contract provisions.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $3.2 million and $0.7 million pursuant to our profit-sharing agreement with the state of Texas at September 30, 2012, and December 31, 2011, respectively.

Washington Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our Washington health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At both September 30, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision since medical expenses are not less than the contractual floor.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to CMS our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $1.7 million and $5.0 million for anticipated Medicare risk adjustment premiums as of September 30, 2012, and December 31, 2011, respectively.

Quality incentives that allow us to recognize incremental revenue if certain quality standards are met. These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, effective beginning in 2011, up to 3.25% of the premium is withheld by the state. The withheld premiums can be earned by the health plan by meeting certain performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of September 30, 2012 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of September 30, 2012.

	Three Months Ended September 30, 2012

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements under the scope of FASB Accounting Standards Codification Subtopic 605-25, *Revenue Recognition — Multiple –Element Arrangements,* and SEC Staff Accounting Bulletin Topic 13, *Revenue Recognition*.

Effective January 1, 2011, we adopted a new accounting standard that amends the guidance on the accounting for multiple-element arrangements. Pursuant to the new standard, each required deliverable is evaluated to determine whether it qualifies as a separate unit of accounting which is generally based on whether the deliverable has standalone value to the customer. In addition to standalone value, previous guidance also required objective and reliable evidence of fair value of a deliverable in order to treat the deliverable as a separate unit of accounting. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent. We have adopted this guidance on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Our adoption of this guidance has not impacted the timing or pattern of our revenue recognition in 2011 or 2012. Also, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. For contracts entered into prior to January 1, 2011, objective and reliable evidence of fair value would be required, in addition to DDI standalone value which we do not have, in order to treat DDI as a separate unit of accounting. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs
- Employee costs incurred in performing transaction services
- Vendor costs incurred in performing transaction services
- Costs incurred in performing required monitoring of and reporting on contract performance
- Costs incurred in maintaining and processing member and provider eligibility
- Costs incurred in communicating with members and providers

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Premium Deficiency Charges

We assess the profitability of each contract by state for providing medical care services to our members and identify any contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared with the sum of anticipated future health care costs and maintenance costs. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. In the second quarter of 2012, our Texas and Wisconsin health plans recorded premium deficiency charges of $10.0 million and $3.0 million, respectively. Such charges were recorded to medical care costs. As of September 30, 2012, the aggregate premium deficiency reserve balance was $1.5 million.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of non-deductible compensation and state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $10.3 million as of September 30, 2012, and $10.7 million as of December 31, 2011. Approximately $8.4 million of the unrecognized tax benefits recorded at September 30, 2012, relate to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $7.2 million as of September 30, 2012. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $8.6 million due to the expiration of statute of limitations and the resolution to the state refund claim described above.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of September 30, 2012, and December 31, 2011, we had accrued $59,000 and $65,000, respectively, for the payment of interest and penalties.

Recent Accounting Pronouncements

Balance Sheet Offsetting. In December 2011, the Financial Accounting Standards Board ("FASB") issued guidance for new disclosure requirements related to the nature of an entity's rights of setoff and related arrangements associated with its financial instruments and derivative instruments. The new guidance is effective for annual reporting periods, and interim periods within those years, beginning on or after January 1, 2013. While we do not expect the adoption of this guidance in 2013 to impact our financial position, results of operations or cash flows, we do expect it to change our disclosure policies relative to certain arrangements with rights of setoff.

Goodwill. In September 2011, the FASB issued guidance related to evaluating goodwill for impairment. The new guidance provides entities with the option to perform a qualitative assessment of whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before applying the quantitative two-step goodwill impairment test. If an entity concludes that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it would not be required to perform the quantitative two-step goodwill impairment test. Entities also have the option to bypass the assessment of qualitative factors for any reporting unit in any period and proceed directly to performing the first step of the quantitative two-step goodwill impairment test, as was required prior to the issuance of this new guidance. An entity may begin or resume performing the qualitative assessment in any subsequent period. The new guidance became effective for annual reporting periods, and interim periods within those years, beginning after December 15, 2011, with early adoption permitted. The adoption of this new guidance in 2012 did not impact our financial position, results of operations or cash flows.

Federal Premium-Based Assessment. In July 2011, the FASB issued guidance related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (the "Affordable Care Act"). The Affordable Care Act imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014 that is allocated to health insurers based on the ratio of the amount of an entity's net premium revenues written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. The new guidance specifies that the liability for the fee should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. The new guidance is effective for annual reporting periods beginning after December 31, 2013, when the fee initially becomes effective. As enacted, this federal premium-based assessment is non-deductible for income tax purposes, and is anticipated to be significant. It is yet undetermined how this premium-based assessment will be factored into the calculation of our premium rates, if at all. Accordingly, adoption of this guidance and the enactment of this assessment as currently written could have a material impact on our financial position, results of operations, or cash flows in future periods.

Comprehensive Income. In June 2011, the FASB issued guidance, as amended in December 2011, related to the presentation of other comprehensive income. The new guidance provides entities with an option to either replace the statement of income with a statement of comprehensive income which would display both the components of net income and comprehensive income in a combined statement, or to present a separate statement of comprehensive income immediately following the statement of income. The new guidance does not affect the components of other comprehensive income or the calculation of earnings per share. To be applied retrospectively with early adoption permitted, the new guidance became effective for annual reporting periods, and interim periods within those years, beginning after December 15, 2011. We have elected to present a separate statement of comprehensive income immediately following the statement of income. The adoption of this new guidance in 2012 did not impact our financial position, results of operations or cash flows.

Fair Value. In May 2011, the FASB issued guidance related to fair value measurement and disclosure. The new guidance is a result of joint efforts by the FASB and the International Accounting Standards Board to develop a single converged fair value framework. The new guidance expands existing disclosure requirements for fair value measurements and makes other amendments; mostly to eliminate wording differences between U.S. generally accepted accounting principles ("GAAP") and international financial reporting standards. To be applied prospectively, the new guidance became effective for annual reporting periods, and interim periods within those years, beginning after December 15, 2011. Although the adoption of this new guidance in 2012 did not impact our financial position, results of operations or cash flows, it did change our disclosure policies relative to fair value measurements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, or AICPA, and the Securities and Exchange Commission, or SEC, did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income (Loss) per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income (loss) per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(In thousands)			
Shares outstanding at the beginning of the period	46,527	46,062	45,815	45,463
Weighted-average number of shares repurchased	—	(235)	—	(160)
Weighted-average number of shares issued	19	7	486	390
Denominator for basic income (loss) per share	46,546	45,834	46,301	45,693
Dilutive effect of employee stock options and stock grants (1)	334	462	—	641
Denominator for diluted income (loss) per share (2)	46,880	46,296	46,301	46,334

(1) Unvested restricted shares are included in the calculation of diluted income per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. Options to purchase common shares are included in the calculation of diluted income per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three months ended September 30, 2012 and 2011, there were approximately 370,000 and 57,000 anti-dilutive weighted restricted shares, respectively. For the three months ended September 30, 2012 and 2011 there were approximately 125,000 and 316,000 anti-dilutive weighted options, respectively. Potentially dilutive unvested restricted shares and stock options were not included in the computation of diluted loss per share for the nine months ended September 30, 2012, because to do so would have been anti-dilutive. For the nine months ended September 30, 2011, there were no anti-dilutive weighted restricted shares. For the nine months ended September 30, 2011 there were approximately 126,000 anti-dilutive weighted options.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted income (loss) per share for the three month and nine month periods ended September 30, 2012 and 2011, because to do so would have been anti-dilutive.

4. Share-Based Compensation

At September 30, 2012, we had employee equity incentives outstanding under three plans: (1) the 2011 Equity Incentive Plan; (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded); and (3) the 2000 Omnibus Stock and Incentive Plan (from which equity incentives are no longer awarded). In March 2012, our chief executive officer, chief financial officer, and chief operating officer were awarded 94,050 performance units, 53,236 performance units, and 30,167 performance units, respectively, that would vest and be settled in shares of the Company's common stock equal in number to the units granted upon the achievement of certain service and performance conditions. Each of the grants shall vest in 2012, provided that: (i) the Company's total operating revenue for 2012 is equal to or greater than $5.5 billion, and (ii) the respective officer continues to be employed by the Company if and when the operating revenue target is met. As of September 30, 2012, we expect such performance awards to vest in full. In the event the vesting conditions are not achieved, the awards shall lapse. Also in March 2012, our chief executive officer, chief financial officer, chief operating officer, and chief accounting officer were awarded 8,000 shares, 8,000 shares, 8,000 shares, and 3,000 shares, respectively, of performance units that would vest and be settled in shares of the Company's common stock equal in number to the units granted upon the certification of our Idaho MMIS by CMS. Such awards vested when the Idaho MMIS was certified in July 2012.

Charged to general and administrative expenses, total share-based compensation expense was as follows for the three month and nine month periods ended September 30, 2012 and 2011:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(in thousands)			
Restricted share and performance/restricted unit awards	$ 5,093	$ 4,004	$ 13,943	$11,742
Stock options (including shares issued under our employee stock purchase plan)	543	345	1,505	981
Total share-based compensation expense	$5,636	$4,349	$15,448	$12,723

As of September 30, 2012, there was $19.0 million of total unrecognized compensation expense related to unvested restricted share awards, which we expect to recognize over a remaining weighted-average period of 2.3 years. As of September 30, 2012, there was $1.9 million of total unrecognized compensation expense related to performance and restricted units, which we expect to recognize in the fourth quarter of 2012.

Restricted share activity for the nine months ended September 30, 2012 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2011	1,435,882	$ 18.97
Granted	498,057	31.86
Vested	(744,360)	20.47
Forfeited	(79,999)	23.21
Unvested balance as of September 30, 2012	1,109,580	23.45

The total fair value of restricted shares vested during the nine months ended September 30, 2012 and 2011 was $24.3 million and $11.5 million, respectively.

Performance and restricted unit activity for the nine months ended September 30, 2012 is summarized below:

	Units	Weighted Average Grant Date Fair Value	Aggregate Intrinsic Value (In thousands)	Weighted Average Remaining Contractual term (Years)
Outstanding as of December 31, 2011	—	$ —		
Granted	213,022	33.59		
Vested	(31,285)	33.73	$ 823	
Outstanding as of September 30, 2012	181,737	33.56	$ 4,571	0.3
Performance and restricted units expected to vest as of September 30, 2012	181,737	33.56	$ 4,571	0.3

Stock option activity for the nine months ended September 30, 2012 is summarized below:

	Options	Weighted Average Exercise Price	Aggregate Intrinsic Value (In thousands)	Weighted Average Remaining Contractual term (Years)
Outstanding as of December 31, 2011	553,049	$ 20.91		
Granted	15,000	34.82		
Exercised	(114,229)	19.29	$ 1,553	
Forfeited	(750)	22.37		
Outstanding as of September 30, 2012	453,070	21.78	$ 1,966	3.4
Stock options exercisable and expected to vest as of September 30, 2012	453,070	21.78	$ 1,966	3.4
Exercisable as of September 30, 2012	438,070	21.33	$ 1,966	3.2

The weighted-average grant date fair value per share of the sole stock option awarded during the nine months ended September 30, 2012 was $13.97. No stock options were granted in 2011.

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

- *Level 1 — Observable inputs such as quoted prices in active markets:* Our Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.
- *Level 2 — Inputs other than quoted prices in active markets that are either directly or indirectly observable:* Our Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit that are classified as current investments in the accompanying consolidated balance sheets, and an interest rate swap derivative recorded as a noncurrent liability. Our investments classified as Level 2 are traded frequently though not necessarily daily. Fair value for the investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. Fair value for the interest rate swap derivative is based on forward LIBOR rates that are and will be observable at commonly quoted intervals for the full term of the interest rate swap agreement. See Note 10, “Long-Term Debt,” for further information regarding the interest rate swap agreement.
- *Level 3 — Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions:* Our level 3 financial instruments recorded at fair value consist of non-current auction rate securities that are designated as available-for-sale, and are reported at fair value of $13.5 million (par value of $15.0 million) as of September 30, 2012. To estimate the fair value of these securities, we use valuations from third-party pricing models that include factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. To validate the reasonableness of these valuations, we compare such valuations to other third party valuations that provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of September 30, 2012.

Our financial instruments recorded at fair value on a recurring basis at September 30, 2012, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$208,862	$ —	$208,862	$ —
Government-sponsored enterprise securities (GSEs)	33,066	33,066	—	—
Municipal securities	73,899	—	73,899	—
U.S. treasury notes	33,691	33,691	—	—
Certificates of deposit	7,377	—	7,377	—
Auction rate securities	13,523	—	—	13,523
Total assets at fair value	$ 370,418	$66,757	$ 290,138	$13,523
Interest rate swap liability	$ 1,270	$ —	$ 1,270	$ —

Our financial instruments recorded at fair value on a recurring basis at December 31, 2011, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$231,634	$ —	$ 231,634	$ —
GSEs	33,949	33,949	—	—
Municipal securities	47,313	—	47,313	—
U.S. treasury notes	21,748	21,748	—	—
Certificates of deposit	2,272	—	2,272	—
Auction rate securities	16,134	—	—	16,134
Total assets at fair value	$353,050	$55,697	$281,219	$16,134
Interest rate swap liability	$ —	$ —	$ —	$ —

The following table presents activity for the nine months ended September 30, 2012, relating to our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3)
	(In thousands)
Balance at December 31, 2011	$ 16,134
Total gains (unrealized only):	
Included in other comprehensive income	1,439
Settlements	(4,050)
Balance at September 30, 2012	$ 13,523
The amount of total unrealized gains for the period included in other comprehensive income attributable to the change in accumulated other comprehensive losses relating to assets still held at September 30, 2012	$ 903

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our long-term debt as well as the applicable fair value hierarchy tier, at September 30, 2012, are contained in the table below. Our convertible senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. Borrowings under our credit facility and our term loan are classified as Level 3 financial instruments, because certain inputs used to determine the fair value of these agreements are unobservable. The carrying value of the credit facility at September 30, 2012 approximates fair value because of the short period of time between the borrowing under the credit facility in 2012, and September 30, 2012. The carrying value of the term loan at September 30, 2012, approximates its fair value because there has been no significant change to our credit risk relating to this instrument from the term loan's origination date in December 2011, to September 30, 2012.

	September 30, 2012				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
			(In thousands)		
Convertible senior notes	$ 173,940	$ 209,040	$—	$ 209,040	$ —
Credit facility	40,000	40,000	—	—	40,000
Term loan	47,754	47,754	—	—	47,754
	$ 261,694	$296,794	$—	$ 209,040	$87,754

	December 31, 2011				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
			(In thousands)		
Convertible senior notes	$169,526	$ 192,049	$—	$192,049	$ —
Credit facility	—	—	—	—	—
Term loan	48,600	48,600	—	—	48,600
	$ 218,126	$ 240,649	$—	$192,049	$ 48,600

6. Investments

The following tables summarize our investments as of the dates indicated:

	September 30, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Corporate debt securities	$ 208,217	$ 688	$ 43	$ 208,862
GSEs	33,015	55	4	33,066
Municipal securities	73,750	232	83	73,899
U.S. treasury notes	33,640	51	—	33,691
Certificates of deposit	7,377	—	—	7,377
Auction rate securities	14,950	—	1,427	13,523
	$ 370,949	$ 1,026	$ 1,557	$ 370,418

	December 31, 2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Corporate debt securities	$ 231,407	$ 442	$ 215	$ 231,634
GSEs	33,912	46	9	33,949
Municipal securities	47,099	232	18	47,313
U.S. treasury notes	21,627	121	—	21,748
Certificates of deposit	2,272	—	—	2,272
Auction rate securities	19,000	—	2,866	16,134
	$ 355,317	$ 841	$ 3,108	$ 353,050

The contractual maturities of our investments as of September 30, 2012 are summarized below:

	Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 210,489	$ 210,828
Due one year through five years	145,510	146,067
Due after ten years	14,950	13,523
	$ 370,949	$ 370,418

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales and maturities of available-for-sale securities were $76.8 million and $105.0 million for the three months ended September 30, 2012, and 2011, respectively. Total proceeds from sales and maturities of available-for-sale securities were $213.7 million and $226.4 million for the nine months ended September 30, 2012, and 2011, respectively. Net realized investment gains for the three months ended September 30, 2012, and 2011 were $12,000 and $153,000 respectively. Net realized investment gains for the nine months ended September 30, 2012, and 2011 were $250,000 and $331,000 respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at September 30, 2012, and December 31, 2011, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

Auction Rate Securities

Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 18 years to 35 years. Considering the relative insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at September 30, 2012. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $67.1 million of these instruments at par value.

For the nine months ended September 30, 2012, and 2011, we recorded pretax unrealized gains of $1.4 million and $0.9 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of September 30, 2012.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(Dollars in thousands)					
Corporate debt securities	$ 23,103	$ 43	15	$ —	$ —	—
GSEs	8,602	4	3	—	—	—
Municipal securities	15,077	81	30	3,693	2	2
Auction rate securities	—	—	—	13,523	1,427	22
U.S. treasury notes	—	—	—	—	—	—
Total temporarily impaired securities	$46,782	$ 128	48	$17,216	$1,429	24

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2011.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(Dollars in thousands)					
Corporate debt securities	$ 72,766	$ 215	47	$ —	$ —	—
GSEs	11,493	9	9	—	—	—
Municipal securities	12,033	18	8	—	—	—
Auction rate securities	—	—	—	16,134	2,866	27
U.S. treasury notes	—	—	—	—	—	—
Total temporarily impaired securities	$96,292	$ 242	64	$16,134	$2,866	27

7. Receivables

Health Plans segment receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustment. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable were as follows:

	September 30, 2012	December 31, 2011
	(In thousands)	
Health Plans segment:

8. Restricted Investments

Pursuant to the regulations governing our Health Plan subsidiaries, we maintain statutory deposits and deposits required by state authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of certain capitated providers. The following table presents the balances of restricted investments.

	September 30, 2012	December 31, 2011
	(In thousands)	
California	$ 373	$ 372
Florida	5,733	5,198
Insurance Company	—	4,711
Michigan	1,000	1,000
Missouri	500	504
New Mexico	15,911	15,905
Ohio	9,079	9,078

Utah	2,979	2,895
Washington	151	151
Other	5,256	2,832
	$ 44,488	$ 46,164

The contractual maturities of our held-to-maturity restricted investments as of September 30, 2012 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$44,177	$44,186
Due one year through five years	311	311
	$44,488	$44,497

9. Medical Claims and Benefits Payable

The following table presents the components of the change in our medical claims and benefits payable as of and for the periods indicated. The amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Nine Months Ended September 30, 2012	Three Months Ended September 30, 2012	Year Ended Dec. 31, 2011
	(Dollars in thousands)		
Balances at beginning of period	$ 402,476	$ 525,538	$ 354,356
Components of medical care costs related to:			
Current period	3,860,825	1,361,539	3,911,803
Prior periods	(37,689)	(46,968)	(51,809)
Total medical care costs	3,823,136	1,314,571	3,859,994
Payments for medical care costs related to:			
Current period	3,332,896	875,236	3,516,994
Prior periods	356,253	428,410	294,880
Total paid	3,689,149	1,303,646	3,811,874
Balances at end of period	$ 536,463	$ 536,463	$ 402,476
Benefit from prior period as a percentage of:			
Balance at beginning of period	9.4%	8.9%	14.6%
Premium revenue	0.9%	3.2%	1.1%
Total medical care costs	1.0%	3.6%	1.3%

We recognized favorable prior period claims development in the amount of $37.7 million for the nine months ended September 30, 2012. This amount represents our estimate as of September 30, 2012 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 was more than the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2011 was due primarily to the following factors:

- For our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- For our Texas health plan, we overestimated the cost of new members in STAR+PLUS (the name of our ABD program in Texas), in the Dallas region.
- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in the lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all of the claims overestimation.
- Offsetting some of the overestimation items described above, our Missouri health plan reserves were underestimated as a result of an unusually large number of premature infants during the fourth quarter of 2011.

We recognized favorable prior period claims development in the amount of $47.0 million for the three months ended September 30, 2012. This amount represents our estimate as of September 30, 2012 of the extent to which our initial estimate of medical claims and benefits payable at June 30, 2012 was more than the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at June 30, 2012 was due primarily to the following factors:

- For our Texas health plan, we had only four months of paid claims data for the expansion regions that were added March 1, 2012. As a result, we overestimated the medical costs for those regions.
- Our contract with the state of Missouri expired without renewal on June 30, 2012; however we continue to be liable for services rendered to members who were admitted to the hospital on or before June 30, 2012, until the earlier of 90 days or their date of discharge. We overestimated the impact of 90 days of run-out claims for these members.
- For our Washington health plan, we overpaid certain outpatient claims during 2011 and early 2012, disrupting our payment patterns and leading to an overstatement of our liability at June 30, 2012.
- For our Michigan health plan, certain inpatient claims with an unusually long run-out were paid in late 2011 and early 2012, resulting in an artificial increase in the amount of time we typically apply for claims payments when estimating the reserve. In the process of developing the reserves as of June 30, 2012, an adjustment was applied to offset these late claim payments, but the adjustment did not completely remove the effect. As a result, reserves were overstated as of June 30, 2012.

We recognized favorable prior period claims development in the amount of $49.5 million and $51.8 million for the nine months ended September 30, 2011, and the year ended December 31, 2011, respectively. This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2010, as a result of the following factors:

- We overestimated the impact of a buildup in claims inventory in Ohio.
- We overestimated the impact of the settlement of disputed provider claims in California.
- We underestimated the reduction in outpatient facility claims costs as a result of a fee schedule reduction in New Mexico effective November 2010.

In estimating our claims liability at September 30, 2012, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- Our Texas health plan membership nearly doubled effective March 1, 2012. In addition, effective March 1, 2012, we assumed inpatient medical liability for ABD members for which we were not previously responsible. Reserves for new coverage and new regions are now based on the newly developing claims lag patterns and comparisons with similar coverage in other regions with more historical data. The lag patterns are still incomplete and therefore the true reserve liability is more uncertain than usual.
- Our California health plan has enrolled approximately 20,000 new ABD members since September 30, 2011, as a result of the mandatory assignment of ABD members to managed care plans effective July 1, 2011. These new members converted from a fee-for-service environment. Due to the relatively recent transition of these members to managed care, their utilization of medical services is less predictable than it is for many of our other members.
- Our claims inventory had increased significantly during the first quarter of 2012, followed by a significant reduction in claims inventory in the second quarter of 2012 and a slight drop in the third quarter. Changes in claims inventory can impact historical claims lag patterns.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2011 and for the nine months ended September 30, 2012, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

10. Long-Term Debt

Credit Facility

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility (the "Credit Facility") with various lenders and U.S. Bank National Association, as LC Issuer, Swing Line Lender, and Administrative Agent. The Credit Facility is used for general corporate purposes.

The Credit Facility has a term of five years under which all amounts outstanding will be due and payable on September 9, 2016. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $195 million. As of September 30, 2012 there was $40.0 million outstanding under the Credit Facility. Additionally, as of September 30, 2012, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, which reduces the amount available under the Credit Facility.

Borrowings under the Credit Facility bear interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. The applicable margins range between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan).

The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also requires us to maintain as of the end of any fiscal quarter (calculated for each four consecutive fiscal quarter period) a ratio of total consolidated debt to total consolidated EBITDA, as defined in the Credit Facility, of not more than 2.75 to 1.00, and a fixed charge coverage ratio of not less than 1.75 to 1.00. At September 30, 2012, we were in compliance with all financial covenants under the Credit Facility.

In the event of a default, including cross-defaults relating to specified other debt in excess of $20.0 million, the lenders may terminate the commitments under the Credit Facility and declare the amounts outstanding, including all accrued interest and unpaid fees, payable immediately. In addition, the lenders may enforce any and all rights and remedies created under the Credit Facility or applicable law.

Convertible Senior Notes

As of September 30, 2012, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the Notes. This represents a conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

The proceeds from the issuance of the Notes have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of September 30, 2012, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 24 months. The Notes' if-converted value did not exceed their principal amount as of September 30, 2012. At September 30, 2012, the equity component of the Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	As of September 30, 2012	As of December 31, 2011
	(In thousands)	
Details of the liability component:		
Principal amount	$ 187,000	$ 187,000
Unamortized discount	(13,060)	(17,474)
Net carrying amount	$ 173,940	$169,526

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(in thousands)			
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate of 3.75%	$ 1,753	$1,753	$5,259	$5,259
Amortization of the discount on the liability component	1,499	1,384	4,414	4,095
Total interest cost recognized	$ 3,252	$ 3,137	$ 9,673	$ 9,354

Term Loan

On December 7, 2011, our wholly owned subsidiary Molina Center LLC entered into a Term Loan Agreement with various lenders and East West Bank, as Administrative Agent (the "Administrative Agent"). Pursuant to the terms of the Term Loan Agreement, Molina Center LLC borrowed the aggregate principal amount of $48.6 million to finance a portion of the $81.0 million purchase price for the acquisition of the approximately 460,000 square foot office building, or Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period (as defined below) commencing January 1, 2012. The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. "Interest Period" means the period commencing on the first day of each calendar month and ending on the last day of such calendar month. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commenced on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Interest Rate Swap

In May 2012, we entered into a $42.5 million notional amount interest rate swap agreement, or Swap Agreement, with an effective date of March 1, 2013. While not designated as a hedge instrument, the Swap Agreement is intended to reduce our exposure to fluctuations in the contractual variable interest rates under our Term Loan Agreement, and expires on the maturity date of the Term Loan Agreement, which is November 30, 2018. Under the Swap Agreement beginning on March 1, 2013, we will receive a variable rate of the one-month LIBOR plus 3.25%, and pay a fixed rate of 5.34%. The Swap Agreement is measured and reported at fair value on a recurring basis, within Level 2 of the fair value hierarchy. Gains and losses relating to changes in its fair value are reported in earnings in the current period. For the three months and nine months ended September 30, 2012, we have recorded losses of $0.2 million and $1.3 million, respectively, to general and administrative expense. As of September 30, 2012, the fair value of the Swap Agreement is a liability of $1.3 million, recorded to other noncurrent liabilities. We do not use derivatives for trading or speculative purposes. We believe that we are not exposed to more than a nominal amount of credit risk relating to the Swap Agreement because the counterparty is an established and well-capitalized financial institution.

11. Stockholders' Equity

Securities Repurchase Program. Effective as of October 26, 2011, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see Note 10, "Long-Term Debt"). The repurchase program expired October 25, 2012. No securities were purchased under this program in the nine months ended September 30, 2012.

Stock Plans. In connection with the plans described in Note 4, "Share-Based Compensation," we issued approximately 755,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the nine months ended September 30, 2012. Stock plan activity resulted in a $14.7 million increase to additional paid-in capital for the same period.

12. Segment Reporting

We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans which serve Medicaid populations in nine states (subsequent to the termination of our Medicaid contract in Missouri effective June 30, 2012), and also includes our smaller direct delivery line of business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in an additional five states.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

13. Commitments and Contingencies

Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Molina Medicaid Solutions

On April 6, 2012, Molina Medicaid Solutions received a schedule from the state of Maine purporting to represent approximately $32.6 million in unspecified damages suffered by the state related to the state's MMIS that was designed, developed, and implemented by Molina Medicaid Solutions. The level of detail provided in the schedule is not adequate for us to determine the specific nature of the damages claimed by the state. No formal claim has been asserted against us by the state, nor has any legal basis been asserted for any potential claims against us. To the extent that the state decides at some point in the future to pursue its alleged claims against us, Unisys Corporation, or Unisys, the former owner of the MMIS, has agreed to assume the defense of that portion of the claim related to the delay in the MMIS "go live" date from March 1, 2010 to August 1, 2010, since that delay had been agreed upon with the state prior to our May 1, 2010 acquisition of Molina Medicaid Solutions from Unisys. The amount of our potential liability related to this matter, if any, cannot be reasonably estimated at this time, nor can a range of such possible liability be established.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $519.2 million at September 30, 2012, and $492.4 million at December 31, 2011.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of September 30, 2012, our health plans had aggregate statutory capital and surplus of approximately $525.4 million compared with the required minimum aggregate statutory capital and surplus of approximately $270.0 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2012. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Receivable/Liability for Ceded Life and Annuity Contracts

Prior to February 17, 2012, we reported a 100% ceded reinsurance arrangement for life insurance policies written and held by our wholly owned insurance subsidiary, Molina Healthcare Insurance Company, by recording a non-current receivable from the reinsurer with a corresponding non-current liability for ceded life and annuity contracts. Effective February 17, 2012, we sold Molina Healthcare Insurance Company. The transaction resulted in the elimination of both the noncurrent receivable and liability for ceded life and annuity contracts, each amounting to $23.4 million as of December 31, 2011. Additionally, a gain of approximately $2.4 million was recorded upon closing of the transaction, recorded to general and administrative expenses in the accompanying consolidated income statement.

We remain liable for benefits payable under the life insurance policies that were held by Molina Healthcare Insurance Company, in the event that both the reinsurer and the buyer of Molina Healthcare Insurance Company are unable to pay those benefits. We believe the possibility of our having to pay such benefits is remote, and no provision for the payment of such benefits is included in our consolidated financial statements.

14. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. For the three months ended September 30, 2012 and 2011, we paid $7.0 million, and $5.0 million, respectively, for medical service fees to this provider. For the nine months ended September 30, 2012 and 2011, we paid $20.6 million, and $16.8 million, respectively, for medical service fees to this provider.

Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations.*

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- the effectiveness of our medical cost containment initiatives in Texas;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- uncertainties regarding the implementation of the Patient Protection and Affordable Care Act, including the potential refusal of a state to expand Medicaid eligibility to its uninsured population, issues surrounding state insurance exchanges, the impact of the health insurance industry excise tax, the effect of various implementing regulations, and uncertainties regarding the impact of other federal or state health care and insurance reform measures;
- management of the Company's medical costs, including seasonal flu patterns and rates of utilization that are consistent with the Company's expectations, and the reduction over time of the high medical costs associated with new populations;
- the success of the Company's efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, including the pending RFP in New Mexico, and the Company's ability to grow the Company's revenues consistent with the Company's expectations;
- the accurate estimation of incurred but not reported medical costs across the Company's health plans;
- risks associated with the continued growth in new Medicaid and Medicare enrollees, and the development of actuarially sound rates with respect to such new enrollees, including dually eligible enrollees;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates;
- the continuation and renewal of the government contracts of both the Company's health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- the timing of receipt and recognition of revenue and the amortization of expense under the state contracts of Molina Medicaid Solutions in Maine or Idaho;
- additional administrative costs and the potential payment of additional amounts to providers and/or the state by Molina Medicaid Solutions as a result of MMIS implementation issues in Maine or Idaho;
- government audits and reviews, and any enrollment freeze or monitoring program that may result therefrom;
- changes with respect to the Company's provider contracts and the loss of providers;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive, and the interpretation and implementation of medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures;
- approval by state regulators of dividends and distributions by the Company's health plan subsidiaries;
- changes in funding under the Company's contracts as a result of regulatory changes, programmatic adjustments, or other reforms;

- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation, arbitration, or administrative proceedings;
- restrictions and covenants in the Company's credit facility;
- the relatively small number of states in which we operate health plans;
- the availability of financing to fund and capitalize the Company's acquisitions and start-up activities and to meet the Company's liquidity needs;
- a state's failure to renew its federal Medicaid waiver;
- an inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- changes in general economic conditions, including unemployment rates; and
- increasing consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2011, as updated in Part II, Item 1A —Risk Factors, in our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2012, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2011.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: Health Plans; and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of September 30, 2012, these health plans served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of primary care community clinics in California, Florida, New Mexico and Washington; additionally, we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts are renewable at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause upon 30 days to nine months with prior written notice. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's prior contract with the state expired without renewal on June 30, 2012 subject to certain transition obligations. For the six months ended June 30, 2012, our Missouri health plan contributed premium revenue of $113.8 million, or 4.1% of total premium revenue, and comprised 79,000 members, or 4.3% of total Health Plans segment membership as of June 30, 2012.

Our state Medicaid contracts may be periodically adjusted to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas. For example, our Texas health plan added significant membership effective March 1, 2012, in service areas we had not previously served (the Hidalgo and El Paso service areas); and among populations we had not previously served within existing service areas, such as the Temporary Assistance for Needy Families, or TANF, population in the Dallas service area. Additionally, the health benefits provided to our TANF and ABD members in Texas under our contracts with the state were expanded to include inpatient facility and pharmacy services.

With regard to our Ohio health plan, as a result of a lawsuit challenging the selection of several plans including our health plan for the new Medicaid managed care program in Ohio, the Ohio Office of Medical Assistance (OMA) announced on October 5, 2012 that the operation of the program is being delayed from the previously scheduled January 1, 2013 start date and will now commence on July 1, 2013. Following the trial court's dismissal of the lawsuit, the court of appeals has permitted the state of Ohio to move forward with working on implementing the new program and finalizing the provider agreements with our Ohio plan and the other selected managed care plans.

During fiscal year 2012, we expect to respond to several RFPs and invitations to negotiate with respect to new business, including proposals to serve dual eligible populations and applications to participate in CMS' Capitated Financial Alignment Demonstration project. On August 27, 2012, our Ohio health plan was chosen to participate in the Southwest, West Central, and Central markets under the Ohio Integrated Care Delivery System (ICDS). The Ohio ICDS is intended to improve care coordination for individuals enrolled in both Medicaid and Medicare. The selection of Molina of Ohio was made by the Ohio Department of Jobs and Family Services (ODJFS) pursuant to the request for applications for qualified health plans to serve in the ICDS issued in April 2012. The commencement of the ICDS is subject to the readiness review of the selected health plans, and the execution of three-way provider agreements between the health plans, ODJFS, and CMS. Enrollment of dual eligible members in the ICDS is expected to begin on April 1, 2013. Furthermore, on June 29, 2012, the Florida Agency for Health Care Administration (AHCA) issued invitations to negotiate for the Long-term Care Managed Care component of the Statewide Medicaid Managed Care program. We submitted a bid for eight of eleven regions on August 27, 2012, representing approximately thirty counties and 90,000 beneficiaries. We expect the state to announce contract awards in January 2013 with phased-in enrollment beginning August 2013 and extending through March 2014.

In addition, with regard to existing business, on August 31, 2012, the state of New Mexico issued an RFP for all covered Medicaid services (physical health, behavioral health, and long-term care), with such services expected to commence on January 1, 2014 under the new Medicaid contract. The awards are expected to be announced in January 2013.

Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program.

On October 12, 2012, the Governor of the U.S. Virgin Islands announced a partnership in which the Company will provide MMIS to the U.S. Virgin Islands through our West Virginia fiscal agent operation. The contract outlining the sharing of the Company's platform went through several rounds of review at the federal level and has been approved by CMS. The partnership will benefit both the Virgin Islands and taxpayers by circumventing the costs associated with establishing an independent system while gaining leverage from operating under a common platform. This partnership can serve as a model for the country by demonstrating that state and territorial governments can reduce local and federal costs by sharing such technologies for their Medicaid populations.

On July 13, 2012, our Molina Medicaid Solutions segment received full federal certification of its MMIS in the state of Idaho from the Centers for Medicare and Medicaid Services, or CMS. As a result of the CMS certification, the state of Idaho is entitled to receive federal reimbursement of 75% of its MMIS operations costs retroactive to June 1, 2010, the date that the system first began processing claims.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement MMIS to another company. For the nine months ended September 30, 2012, our revenue under the Louisiana MMIS contract was $38.8 million, or 29.3% of total service revenue. We expect that we will continue to perform under this contract through implementation and acceptance of the successor MMIS. Based upon our past experience and our knowledge of the Louisiana MMIS bid process, we believe that implementation and acceptance of the successor MMIS will not occur until 2014 at the earliest. Through implementation and acceptance of the successor MMIS we expect to recognize approximately $40 million in revenue annually under our Louisiana MMIS contract.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the nine months ended September 30, 2012, we received approximately 96% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the nine months ended September 30, 2012, we recognized approximately 4% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children's Health Insurance Program, or CHIP, members are generally among our lowest, with rates as low as approximately $75 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the TANF Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $110 in California to $260 in Ohio. Among our ABD membership, PMPM premiums range from approximately $330 in Utah to $1,400 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, inpatient, behavioral health and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums in the aggregate, at approximately $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	September 30, 2012	June 30, 2012	December 31, 2011	September 30, 2011
Total Ending Membership by Health Plan:				
California	346,000	350,000	355,000	350,000
Florida	71,000	70,000	69,000	67,000
Michigan	219,000	220,000	222,000	217,000
Missouri (1)	—	79,000	79,000	78,000
New Mexico	90,000	89,000	88,000	89,000
Ohio	272,000	260,000	248,000	256,000
Texas	291,000	301,000	155,000	148,000
Utah	85,000	86,000	84,000	82,000
Washington	411,000	356,000	355,000	350,000
Wisconsin	41,000	42,000	42,000	41,000
Total	1,826,000	1,853,000	1,697,000	1,678,000
Total Ending Membership by State for our Medicare Advantage Plans:				
California	7,300	7,000	6,900	6,500
Florida	900	900	800	700
Michigan	9,300	8,900	8,200	7,600
New Mexico	900	900	800	800
Ohio	200	200	200	100
Texas	1,100	800	700	600
Utah	8,300	8,300	8,400	7,400
Washington	6,100	5,700	5,000	4,500
Total	34,100	32,700	31,000	28,200
Total Ending Membership by State for our Aged, Blind or Disabled Population:				
California	44,100	41,100	31,500	23,700
Florida	10,300	10,400	10,400	10,400
Michigan	40,700	40,000	37,500	31,600
New Mexico	5,600	5,600	5,600	5,600
Ohio	29,000	29,600	29,100	29,900
Texas	101,300	111,000	63,700	61,800
Utah	8,900	8,800	8,500	8,300
Washington	23,400	4,400	4,800	4,700
Wisconsin	1,600	1,700	1,700	1,700
Total	264,900	252,600	192,800	177,700

(1) Our contract with the state of Missouri expired without renewal on June 30, 2012.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service* — Expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.

- *Capitation* — Expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- *Pharmacy* — Expenses for all drug, injectible, and immunization costs paid through our pharmacy benefit manager.
- *Other* — Expenses for medically related administrative costs of approximately $94.6 million, and $76.3 million, for the nine months ended September 30, 2012 and 2011, respectively, as well as certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Policies" below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

Third Quarter Financial Performance Summary

The following table and narrative briefly summarizes our financial and operating performance for the three and nine months ended September 30, 2012. Comparable metrics for the third quarter of 2011 are also shown. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are computed as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(Dollar amounts in thousands, except per share data)			
Net income (loss) per diluted share	$ 0.07	$ 0.41	$ (0.34)	$ 1.16
Premium revenue	$ 1,488,718	$ 1,138,230	$ 4,308,439	$ 3,348,438
Service revenue	$ 48,422	$ 37,728	$ 132,351	$ 111,290
Operating income (loss)	$ 7,187	$ 33,566	$ (18,660)	$ 96,276
Net income (loss)	$ 3,364	$ 18,950	$ (15,853)	$ 53,778
Total ending membership	1,826,000	1,678,000	1,826,000	1,678,000
Premium revenue	96.7%	96.7%	96.8%	96.7%
Service revenue	3.1	3.2	3.0	3.2
Investment income	0.1	0.1	0.1	0.1
Rental income	0.1	—	0.1	—
Total revenue	100.0%	100.0%	100.0%	100.0%
Medical care ratio	88.3%	84.3%	88.7%	84.3%
General and administrative expense ratio	8.3%	8.5%	8.5%	8.4%
Premium tax ratio	2.5%	3.2%	2.8%	3.3%
Operating income (loss)	0.5%	2.9%	(0.4)%	2.8%
Net income (loss)	0.2%	1.6%	(0.4)%	1.6%
Effective tax rate	(17.1)%	35.1%	49.0%	36.4%

Third Quarter 2012 Overview

For the third quarter of 2012, net income was $3.4 million, or $0.07 per diluted share, compared with net income of $19.0 million, or $0.41 per diluted share, for the third quarter of 2011.

Our financial performance in the third quarter of 2012 improved substantially over the second quarter of 2012 due to a significant improvement in the profitability of the Texas health plan. Revenue was consistent between the second and third quarters of 2012 as a 30% increase in revenue at the Washington health plan offset the termination of our Missouri enrollment and a slight decline in Texas enrollment.

Results of Operations

Three Months Ended September 30, 2012 Compared with the Three Months Ended September 30, 2011

Health Plans Segment

Premium Revenue

Premium revenue for the third quarter of 2012 increased 30.8% over the third quarter of 2011, due primarily to an increase in membership, a shift in member mix to populations generating higher premium revenue per member per month (PMPM), and benefit expansions. Medicare premium revenue was $116.1 million for the third quarter of 2012 compared with $101.5 million for the third quarter of 2011.

Membership at the Texas health plan nearly doubled year over year, while also growing significantly in Ohio and Washington. Growth in our ABD membership led to higher premium revenue PMPM in 2012. ABD membership, as a percent of total membership, has increased approximately 37% year over year. Premium revenue PMPM also increased in the third quarter of 2012 as a result of the inclusion of revenue from the pharmacy benefit for our Ohio health plan effective October 1, 2011, and as a result of the inclusion of revenue from the inpatient facility and pharmacy benefits across all of our Texas health plan membership effective March 1, 2012.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended September 30,					
	2012			2011		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 908,201	$165.97	69.1%	$698,995	$140.55	72.9%
Pharmacy	219,823	40.17	16.7	89,191	17.93	9.3
Capitation	142,714	26.08	10.9	129,315	26.00	13.5
Other	43,833	8.03	3.3	41,657	8.39	4.3
Total	$1,314,571	$ 240.25	100.0%	$959,158	$192.87	100.0%

Medical care costs increased in the third quarter of 2012 primarily due to the same shifts in member mix and the benefit expansions that led to increased premium revenue. Medical care costs as a percentage of premium revenue (the medical care ratio) also increased in the third quarter of 2012 when compared with the third quarter of 2011 because increases in premium rates have not kept pace with increases in medical costs.

Individual Health Plan Analysis

The Texas health plan's financial performance improved dramatically in the third quarter from the second quarter of 2012. The medical care ratio of the Texas health plan was 90.3% in the third quarter of 2012 compared with 109.4% in the second quarter of 2012, and 93.7% in the third quarter of 2011. The medical care ratio for the Texas health plan's ABD membership declined to 94% in the third quarter of 2012 from 119% in the second quarter. We received a blended rate increase in Texas of approximately 4%, or $4.5 million per month, effective September 1, 2012. The loss before taxes at the Texas health plan was approximately $5 million for the third quarter of 2012, compared with approximately $68 million for the second quarter of 2012 (which included a premium deficiency reserve charge of $10 million). In our Quarterly Report on Form 10-Q for the period ended June 30, 2012, we discussed the steps we are taking to return the Texas health plan to profitability. We confirm the previously disclosed expectation that the Texas health plan will be operating at financial break even on a go forward basis by December 2012.

The medical care ratio at the California health plan increased to 96.1% in the third quarter of 2012 from 88.8% in the third quarter of 2011. The higher medical care ratio was primarily the result of a shift in member mix to include more ABD members. The medical care ratio for the California health plan's ABD membership was 110% in the third quarter of 2012, 100% for the nine months ended September 30, 2012, and 84% for the third quarter of 2011. The California Department of Health Care Services has recently solicited health plan input as to whether to conduct a review of the adequacy of ABD premium rates in California. The California health plan, which believes the ABD premium rates to be inadequate, has provided input supporting such a review. During the fourth quarter of 2012, we intend to exit an unprofitable service area in California, reducing enrollment by approximately 6,000 members.

The California health plan's medical care ratio also increased by 1.4% in the third quarter of 2012 due to reductions to premium revenue of $2.4 million related to the expected reduction in premium rates of 2.35% for the elimination of the gross premium tax effective July 1, 2012. The reduction in premium was offset by an equivalent decrease in premium tax of $2.4 million. Although the state has not yet reduced the premium rates, we believe that both premium taxes and premium rates will be reduced equivalently retroactive to July 1, 2012.

The medical care ratio of the Florida health plan decreased to 84.0% in the third quarter of 2012, from 89.2% in the third quarter of 2011 due to a premium rate increase effective September 1, 2011, the re-contracting of portions of the health plan's specialty care network, lower inpatient utilization and lower pharmacy costs.

The medical care ratio of the Michigan health plan increased to 89.3% in the third quarter of 2012, from 82.0% in the third quarter of 2011. The primary reason for the increase in the medical care ratio in 2012 was a reduction to premium rates linked to a decrease in premium taxes, in which both premium taxes and premium revenue were reduced equivalently effective April 1, 2012. The result was a higher medical care ratio in 2012, but there was no impact on profitability as premium tax expense was reduced by the same amount as premium revenue. The remainder of the deterioration in the Michigan plan's medical care ratio was the result of higher pharmacy and fee for service costs. We expect to receive a blended rate increase in Michigan of approximately 2%, effective October 1, 2012.

The medical care ratio of the New Mexico health plan increased to 86.9% in the third quarter of 2012, from 84.2% in the third quarter of 2011, primarily as a result of higher inpatient facility costs.

The medical care ratio of the Ohio health plan increased to 82.7% for the third quarter of 2012 from 78.4% for the third quarter of 2011. The increase in the Ohio health plan's medical care ratio was primarily the result of a 2% rate reduction effective January 1, 2012, together with the assumption of the lower margin pharmacy benefit effective October 1, 2011. Although the Ohio health plan's medical care ratio increased in 2012, the medical margin (measured as total premium revenue less total medical care costs) increased to $52.9 million in the third quarter of 2012, from $50.2 million in the third quarter of 2011.

The medical care ratio of the Utah health plan increased to 85.2% in the third quarter of 2012 from 79.3% in the third quarter of 2011. The Utah health plan received a premium rate reduction of approximately 2% effective July 1, 2012.

The addition of ABD members to the Washington health plan effective July 1, 2012 increased its medical care ratio to 86.4% in the third quarter of 2012 compared with 82.8% in the third quarter of 2011. The higher premium revenue PMPM associated with the ABD membership, however, offset the increased medical care ratio, so that income from operations was consistent between the third quarters of 2012 and 2011. The medical care ratio for the Washington health plan's new ABD membership was 93% in the third quarter of 2012.

The Wisconsin health plan reported a medical care ratio of 93.5% for the third quarter of 2012 compared with 79.1% for the third quarter of 2011. We believe that the state's premium rates in effect through December 31, 2012 are not adequate to cover the costs of servicing that contract. Accordingly, we recorded a premium deficiency reserve for the Wisconsin health plan at June 30, 2012 of $3.0 million. One-half of that reserve was reversed during the third quarter corresponding with the reduction in the number of months remaining in the rating period. Absent the $1.5 million partial reversal of the premium deficiency reserve, the medical care ratio of the Wisconsin health plan would have been approximately 102.6% for the third quarter of 2012. Inpatient costs in the TANF program are the primary driver of the increased costs in the third quarter of 2012, when compared with the third quarter 2011. The Wisconsin health plan will receive new premium rates effective January 1, 2013. Company management believes that premiums remain too low to cover medical costs and is working with the state and CMS to achieve actuarially sound rates. Additionally, our Wisconsin plan has implemented provider contracting initiatives and new utilization management techniques as a part of its efforts to improve profitability. If we are unable to achieve rates that are actuarially sound, it may no longer be feasible for us to continue as a health plan in the state.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended September 30, 2012							
		Premium Revenue		Medical Care Costs				
	Member Months (1)	Total	PMPM	Total	Expense	Medical Care Ratio	Premium Tax Expense	MCR Excluding Premium Tax Expense (4)
California	1,041	$ 162,389	$ 156.00	$ 156,106	$149.96	96.1%	$ —	96.1%

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) Our contract with the state of Missouri expired without renewal on June 30, 2012. The Missouri health plan's claims run-out activity subsequent to June 30, 2012, is reported in "Other."

(3) "Other" medical care costs also include medically related administrative costs at the parent company.

(4) The MCR Excluding Premium Tax Expense represents medical costs as a percentage of premium revenues, where premium revenue is reduced by premium tax expense.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended September 30, 2012	2011
	(In thousands)	
Service revenue before amortization	$ 48,958	$ 39,273
Amortization recorded as reduction of service revenue	(536)	(1,545)
Service revenue	48,422	37,728
Cost of service revenue	37,004	34,584
General and administrative costs	1,980	2,069
Amortization of customer relationship intangibles recorded as amortization	1,282	1,282
Operating income (loss)	$ 8,156	$ (207)

Operating income for our Molina Medicaid Solutions segment improved $8.4 million for the three months ended September 30, 2012, compared with the same prior year period. This improvement was primarily the result of stabilization of our newest Medicaid Management Information Systems, or MMIS, in Idaho and Maine. As discussed earlier, our Idaho MMIS has received full federal certification. Among the reasons cited by the Company for purchasing Molina Medicaid Solutions effective May 1, 2010, was the benefit of reducing our reliance on health plan operations. For the quarter ended September 30, 2012, the Molina Medicaid Solutions segment gross margin rate was 23.6%, compared with 11.7% for the Health Plans segment.

Nine Months Ended September 30, 2012 Compared with the Nine Months Ended September 30, 2011

Health Plans Segment

Premium Revenue

In the nine months ended September 30, 2012, compared with the nine months ended September 30, 2011, premium revenue grew 28.7% primarily due to an increase in membership, a shift in member mix to populations generating higher premium revenue per member per month (PMPM), and benefit expansions. Medicare premium revenue was $346.6 million for the nine months ended September 30, 2012, compared with $282.3 million for the nine months ended September 30, 2011.

Growth in our ABD membership led to higher premium revenue PMPM in 2012. ABD membership, as a percent of total membership, has increased approximately 37% year over year. Premium revenue PMPM also increased in the nine months ended September 30, 2012, as a result of the inclusion of revenue from the pharmacy benefit for our Ohio health plan effective October 1, 2011, and as a result of the inclusion of revenue from the inpatient facility and pharmacy benefits across all of our Texas health plan membership effective March 1, 2012.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Nine Months Ended September 30, 2012			2011		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$2,666,470	$164.09	69.8%	$ 2,050,430	$ 138.40	72.7%
Pharmacy	606,004	37.29	15.9	268,637	18.13	9.5
Capitation	417,643	25.70	10.9	383,955	25.92	13.6
Other	133,019	8.19	3.4	119,027	8.03	4.2
Total	$ 3,823,136	$235.27	100.0%	$2,822,049	$190.48	100.0%

Our medical care ratio and medical margin deteriorated in the nine months ended September 30, 2012, when compared with the nine months ended September 30, 2011, for the same reasons described above in the “Three Months Ended September 30, 2012 Compared with the Three Months Ended September 30, 2011.”

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Nine Months Ended September 30, 2012

Wisconsin	364	51,526	141.42	47,450	130.23	92.1	44	92.2
Other (3)	—	6,389	—	30,824	—	—	183	—
	14,816	$ 3,348,438	$ 226.01	$2,822,049	$ 190.48	84.3%	$ 110,633	87.2%

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) Our contract with the state of Missouri expired without renewal on June 30, 2012. The Missouri health plan's claims run-out activity subsequent to June 30, 2012, is reported in "Other."

(3) "Other" medical care costs also include medically related administrative costs of the parent company.

(4) The MCR Excluding Premium Tax Expense represents medical costs as a percentage of premium revenues, where premium revenue is reduced by premium tax expense.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Nine Months Ended September 30, 2012	2011
	(In thousands)	
Service revenue before amortization	$ 133,193	$ 116,567
Amortization recorded as reduction of service revenue	(842)	(5,277)
Service revenue	132,351	111,290
Cost of service revenue	98,111	105,020
General and administrative costs	7,187	6,421
Amortization of customer relationship intangibles recorded as amortization	3,846	3,846
Operating income (loss)	$ 23,207	$ (3,997)

Operating income for our Molina Medicaid Solutions segment improved $27.2 million for the nine months ended September 30, 2012, compared with the same prior year period for the reasons discussed above in "Three Months Ended September 30, 2012 Compared with the Three Months Ended September 30, 2011."

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses decreased to 8.3% of total revenue for the three months ended September 30, 2012, compared with 8.5% of total revenue for the three months ended September 30, 2011. General and administrative expenses increased to 8.5% of total revenue for the nine months ended September 30, 2012, compared with 8.4% of total revenue for the nine months ended September 30, 2011. The increased ratio of general and administrative expenses to total revenue for the nine months ended September 30, 2012, was primarily due to investments in administrative infrastructure relating to our membership growth in Texas, and in anticipation of opportunities among the dual-eligible population.

Premium Tax Expense

Premium tax expense decreased to 2.5% of premium revenue for the three months ended September 30, 2012, from 3.2% in the three months ended September 30, 2011, and decreased to 2.8% of premium revenue, in the nine months ended September 30, 2012, from 3.3% in the nine months ended September 30, 2011. The quarter and year-to-date decreases were primarily due to the reduction of premium taxes at the Michigan and California health plans effective in 2012, as discussed in "Three Months Ended September 30, 2012 Compared with the Three Months Ended September 30, 2011," above, and the growth in revenue at our Texas health plan, which is subject to a lower premium tax rate (measured as a percentage of premium revenue) than our consolidated average.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and Amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service Revenue;" and
- Amortization of capitalized software is recorded within the heading "Cost of Service Revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Three Months Ended September 30,			
	2012		2011	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software	$ 11,201	0.7%	$ 8,234	0.7%
Amortization of intangible assets	4,833	0.3	5,196	0.4
Depreciation and amortization reported as such in the consolidated statements of income	16,034	1.0	13,430	1.1
Amortization recorded as reduction of service revenue	536	0.1	1,545	0.1
Amortization of capitalized software recorded as cost of service revenue	3,709	0.2	2,837	0.2
Total	$20,279	1.3%	$17,812	1.4%

	Nine Months Ended September 30,			
	2012		2011	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software	$ 31,524	0.7%	$22,859	0.7%
Amortization of intangible assets	15,922	0.4	15,728	0.5
Depreciation and amortization reported as such in the consolidated statements of income	47,446	1.1	38,587	1.2
Amortization recorded as reduction of service revenue	842	—	5,277	0.1
Amortization of capitalized software recorded as cost of service revenue	10,001	0.2	8,550	0.2
Total	$58,289	1.3%	$ 52,414	1.5%

Interest Expense

Interest expense decreased to $4.3 million for the three months ended September 30, 2012, from $4.4 million for the three months ended September 30, 2011, and increased to $12.4 million for the nine months ended September 30, 2012, from $11.7 million for the nine months ended September 30, 2011 primarily due to interest expense associated with the long-term debt we incurred to purchase our corporate headquarters building in December 2011. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $1.5 million and $1.4 million for the three months ended September 30, 2012, and 2011, respectively, and $4.4 million and $4.1 million for the nine months ended September 30, 2012, and 2011, respectively

Income Taxes

The provision for income taxes is recorded at an effective rate of (17.1%) for the three months ended September 30, 2012 compared with 35.1% for the three months ended September 30, 2011, and 49.0% for the nine months ended September 30, 2012 compared with 36.4% for the nine months ended September 30, 2011. The higher rate in 2012 is primarily due to the greater proportional impact of non-deductible on the effective tax rate as earnings before taxes decrease. We recorded a tax benefit for the three months ended September 30, 2012 primarily due to the incremental impact of the increase in our estimated annual tax rate relating to the year-to-date net loss.

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of September 30, 2012, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income increased to $4.0 million for the nine months ended September 30, 2012, compared with $3.8 million for the nine months ended September 30, 2011. Our annualized portfolio yield for the nine months ended September 30, 2012 was 0.5% compared with 0.6% for the nine months ended September 30, 2011.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash provided by operating activities for the nine months ended September 30, 2012 was $264.0 million compared with $155.2 million for the nine months ended September 30, 2011, an increase of $108.8 million. Higher medical claims and benefits payable at our Texas health plan was the primary reason for the increase in cash flow provided by operating activities, followed by an increase in deferred revenue. Medical claims and benefits payable were a source of operating cash of $134.0 million in the nine months ended September 30, 2012 compared with $6.7 million in the nine months ended September 30, 2011. Deferred revenue was a source of operating cash amounting to $92.4 million in the nine months ended September 30, 2012, compared with $25.4 million in the nine months ended September 30, 2011.

Reconciliation of Non-GAAP [1] to GAAP Financial Measures

EBITDA [2]

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(In thousands)			
Net income (loss)	$ 3,364	$18,950	$(15,853)	$ 53,778
Add back:				
Depreciation and amortization reported in the consolidated statements of cash flows	20,279	17,812	58,289	52,414
Interest expense	4,315	4,380	12,421	11,666
Income tax (benefit) expense	(492)	10,236	(15,228)	30,832
EBITDA	$27,466	$ 51,378	$ 39,629	$148,690

(1) GAAP stands for U.S. generally accepted accounting principles.

(2) EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities, nor should EBITDA be considered in isolation from these GAAP measures of operating performance. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At September 30, 2012, the parent company — Molina Healthcare, Inc. — held cash and investments of approximately $41.0 million, compared with approximately $23.6 million of cash and investments at December 31, 2011.

On a consolidated basis, at September 30, 2012, we had working capital of $482.4 million compared with $446.2 million at December 31, 2011. At September 30, 2012, and December 31, 2011, we had cash and investments, including restricted investments, of $1,130.4 million, and $893.0 million, respectively.

Effective as of October 26, 2011, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see discussion of "Convertible Senior Notes" below). This repurchase program expired October 25, 2012. No securities were purchased under this program in the nine months ended September 30, 2012.

We believe that our cash resources, Credit Facility (as defined below) and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Credit Facility

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility (the "Credit Facility") with various lenders and U.S. Bank National Association, as LC Issuer, Swing Line Lender, and Administrative Agent. The Credit Facility is used for general corporate purposes.

The Credit Facility has a term of five years under which all amounts outstanding will be due and payable on September 9, 2016. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $195 million. As of September 30, 2012 there was $40.0 million outstanding under the Credit Facility. Additionally, as of September 30, 2012, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, which reduces the amount available under the Credit Facility.

Borrowings under the Credit Facility bear interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. The applicable margins range between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan).

The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also requires us to maintain as of the end of any fiscal quarter (calculated for each four consecutive fiscal quarter period) a ratio of total consolidated debt to total consolidated EBITDA, as defined in the Credit Facility, of not more than 2.75 to 1.00, and a fixed charge coverage ratio of not less than 1.75 to 1.00. At September 30, 2012, we were in compliance with all financial covenants under the Credit Facility.

In the event of a default, including cross-defaults relating to specified other debt in excess of $20.0 million, the lenders may terminate the commitments under the Credit Facility and declare the amounts outstanding, including all accrued interest and unpaid fees, payable immediately. In addition, the lenders may enforce any and all rights and remedies created under the Credit Facility or applicable law.

Convertible Senior Notes

As of September 30, 2012, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The conversion rate is 31.9601 shares of our common stock per $1,000 principal amount of the Notes. This represents a conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Term Loan

On December 7, 2011, our wholly owned subsidiary Molina Center LLC entered into a Term Loan Agreement with various lenders and East West Bank, as Administrative Agent (the "Administrative Agent"). Pursuant to the terms of the Term Loan Agreement, Molina Center LLC borrowed the aggregate principal amount of $48.6 million to finance a portion of the $81.0 million purchase price for the acquisition of the approximately 460,000 square foot office building, or Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period (as defined below) commencing January 1, 2012. The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. "Interest Period" means the period commencing on the first day of each calendar month and ending on the last day of such calendar month. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commenced on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Interest Rate Swap

In May 2012, we entered into a $42.5 million notional amount interest rate swap agreement, or Swap Agreement, with an effective date of March 1, 2013. While not designated as a hedge instrument, the Swap Agreement is intended to reduce our exposure to fluctuations in the contractual variable interest rates under our Term Loan Agreement, and expires on the maturity date of the Term Loan Agreement, which is November 30, 2018. Under the Swap Agreement beginning on March 1, 2013, we will receive a variable rate of the one-month LIBOR plus 3.25%, and pay a fixed rate of 5.34%. The Swap Agreement is measured and reported at fair value on a recurring basis, within Level 2 of the fair value hierarchy. Gains and losses relating to changes in its fair value are reported in earnings in the current period. For the three months and nine months ended September 30, 2012, we have recorded losses of $0.2 million and $1.3 million, respectively, to general and administrative expense. As of September 30, 2012, the fair value of the Swap Agreement is a liability of $1.3 million, recorded to other noncurrent liabilities. We do not use derivatives for trading or speculative purposes. We believe that we are not exposed to more than a nominal amount of credit risk relating to the Swap Agreement because the counterparty is an established and well-capitalized financial institution.

Shelf Registration Statement

In the second quarter of 2012, we filed a shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the registration, issuance, and sale of an indeterminate amount of our securities, including common stock, preferred stock, senior or subordinated debt securities, or warrants. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $519.2 million at September 30, 2012, and $492.4 million at December 31, 2011.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of September 30, 2012, our health plans had aggregate statutory capital and surplus of approximately $525.4 million compared with the required minimum aggregate statutory capital and surplus of approximately $270.0 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2012. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Contractual Obligations

In our Annual Report on Form 10-K for the year ended December 31, 2011, we reported on our contractual obligations as of that date. There have been no material changes to our contractual obligations since that report.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The recognition of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and
- The determination of medical claims and benefits payable.

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn will lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of $0.5 million and $1.0 million at September 30, 2012, and December 31, 2011, respectively.

Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health: A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At both September 30, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): Our contract with the state of New Mexico directs that a portion of premiums received may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. At both September 30, 2012, and December 31, 2011, we had not recorded any liability under the terms of these contract provisions.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $3.2 million and $0.7 million pursuant to our profit-sharing agreement with the state of Texas at September 30, 2012, and December 31, 2011, respectively.

Washington Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our Washington health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At both September 30, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision since medical expenses are not less than the contractual floor.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to CMS our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $1.7 million and $5.0 million for anticipated Medicare risk adjustment premiums as of September 30, 2012, and December 31, 2011, respectively.

Quality incentives that allow us to recognize incremental revenue if certain quality standards are met. These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, effective beginning in 2011, up to 3.25% of the premium is withheld by the state. The withheld premiums can be earned by the health plan by meeting certain performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of September 30, 2012 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of September 30, 2012.

	Three Months Ended September 30, 2012				
	Maximum Available Quality Incentive Premium - Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements under the scope of FASB Accounting Standards Codification Subtopic 605-25, *Revenue Recognition — Multiple –Element Arrangements,* and SEC Staff Accounting Bulletin Topic 13, *Revenue Recognition*.

Effective January 1, 2011, we adopted a new accounting standard that amends the guidance on the accounting for multiple-element arrangements. Pursuant to the new standard, each required deliverable is evaluated to determine whether it qualifies as a separate unit of accounting which is generally based on whether the deliverable has standalone value to the customer. In addition to standalone value, previous guidance also required objective and reliable evidence of fair value of a deliverable in order to treat the deliverable as a separate unit of accounting. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent. We have adopted this guidance on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Our adoption of this guidance has not impacted the timing or pattern of our revenue recognition in 2011 or 2012. Also, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. For contracts entered into prior to January 1, 2011, objective and reliable evidence of fair value would be required, in addition to DDI standalone value which we do not have, in order to treat DDI as a separate unit of accounting. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs
- Employee costs incurred in performing transaction services
- Vendor costs incurred in performing transaction services
- Costs incurred in performing required monitoring of and reporting on contract performance
- Costs incurred in maintaining and processing member and provider eligibility
- Costs incurred in communicating with members and providers

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	September 30, 2012	Dec. 31, 2011	September 30, 2011
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 414,725	$ 301,020	$ 283,160
Capitation payable	55,314	53,532	49,259
Pharmacy	42,681	26,178	16,615
Other	23,743	21,746	12,021
	$536,463	$402,476	$361,055

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are “Incurred But Not Paid,” or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $414.7 million of our total medical claims and benefits payable of $536.5 million as of September 30, 2012. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider’s monthly capitation payment), our IBNP liability at September 30, 2012, was $408.3 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of September 30, 2012 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding September 30, 2012, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ 144,100
(4%)	96,067
(2%)	48,033
2%	(48,033)
4%	(96,067)
6%	(144,100)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of September 30, 2012 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ (76,155)
(4%)	(50,770)
(2%)	(25,385)
2%	25,385
4%	50,770
6%	76,155

The following per-share amounts are based on a combined federal and state statutory tax rate of 37.5%, and 46.3 million diluted shares outstanding for the nine months ended September 30, 2012. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at September 30, 2012, net income for the nine months ended September 30, 2012 would increase or decrease by approximately $15.0 million, or $0.32 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at September 30, 2012, net income for the nine months ended September 30, 2012 would increase or decrease by approximately $7.9 million, or $0.17 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $75.1 million, or $1.62 per diluted share, and $40.0 million, or $0.86 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $15.0 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2011, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 14.6%.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2012 and 2011 were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

We recognized favorable prior period claims development in the amount of $37.7 million for the nine months ended September 30, 2012. This amount represents our estimate as of September 30, 2012 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 was more than the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2011 was due primarily to the following factors:

- For our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- For our Texas health plan, we overestimated the cost of new members in STAR+PLUS (the name of our ABD program in Texas), in the Dallas region.
- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in the lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all of the claims overestimation.

- Offsetting some of the overestimation items described above, our Missouri health plan reserves were underestimated as a result of an unusually large number of premature infants during the fourth quarter of 2011.

We recognized favorable prior period claims development in the amount of $47.0 million for the three months ended September 30, 2012. This amount represents our estimate as of September 30, 2012 of the extent to which our initial estimate of medical claims and benefits payable at June 30, 2012 was more than the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at June 30, 2012 was due primarily to the following factors:

- For our Texas health plan, we had only four months of paid claims data for the expansion regions that were added March 1, 2012. As a result, we overestimated the medical costs for those regions.
- Our contract with the state of Missouri expired without renewal on June 30, 2012; however we continue to be liable for services rendered to members who were admitted to the hospital on or before June 30, 2012, until the earlier of 90 days or their date of discharge. We overestimated the impact of 90 days of run-out claims for these members.
- For our Washington health plan, we overpaid certain outpatient claims during 2011 and early 2012, disrupting our payment patterns and leading to an overstatement of our liability at June 30, 2012.
- For our Michigan health plan, certain inpatient claims with an unusually long run-out were paid in late 2011 and early 2012, resulting in an artificial increase in the amount of time we typically apply for claims payments when estimating the reserve. In the process of developing the reserves as of June 30, 2012, an adjustment was applied to offset these late claim payments, but the adjustment did not completely remove the effect. As a result, reserves were overstated as of June 30, 2012.

We recognized favorable prior period claims development in the amount of $49.5 million and $51.8 million for the nine months ended September 30, 2011, and the year ended December 31, 2011, respectively. This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2010, as a result of the following factors:

- We overestimated the impact of a buildup in claims inventory in Ohio.
- We overestimated the impact of the settlement of disputed provider claims in California.
- We underestimated the reduction in outpatient facility claims costs as a result of a fee schedule reduction in New Mexico effective November 2010.

In estimating our claims liability at September 30, 2012, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- Our Texas health plan membership nearly doubled effective March 1, 2012. In addition, effective March 1, 2012, we assumed inpatient medical liability for ABD members for which we were not previously responsible. Reserves for new coverage and new regions are now based on the newly developing claims lag patterns and comparisons with similar coverage in other regions with more historical data. The lag patterns are still incomplete and therefore the true reserve liability is more uncertain than usual.
- Our California health plan has enrolled approximately 20,000 new ABD members since September 30, 2011, as a result of the mandatory assignment of ABD members to managed care plans effective July 1, 2011. These new members converted from a fee-for-service environment. Due to the relatively recent transition of these members to managed care, their utilization of medical services is less predictable than it is for many of our other members.
- Our claims inventory had increased significantly during the first quarter of 2012, followed by a significant reduction in claims inventory in the second quarter of 2012 and a slight drop in the third quarter. Changes in claims inventory can impact historical claims lag patterns.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2011 and for the nine months ended September 30, 2012, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Nine Months Ended September 30,		Three Months Ended September 30,		Year Ended
	2012	2011	2012	2011	Dec. 31, 2011
	(Dollars in thousands, except per-member amounts)				
Balances at beginning of period	$ 402,476	$ 354,356	$ 525,538	$ 341,613	$ 354,356
Components of medical care costs related to:					
Current period	3,860,825	2,871,515	1,361,539	990,449	3,911,803
Prior periods	(37,689)	(49,466)	(46,968)	(31,291)	(51,809)
Total medical care costs	3,823,136	2,822,049	1,314,571	959,158	3,859,994
Payments for medical care costs related to:					
Current period	3,332,896	2,522,374	875,236	670,066	3,516,994
Prior periods	356,253	292,976	428,410	269,650	294,880
Total paid	3,689,149	2,815,350	1,303,646	939,716	3,811,874
Balances at end of period	$ 536,463	$ 361,055	$ 536,463	$ 361,055	$ 402,476
Benefit from prior period as a percentage of:					
Balance at beginning of period	9.4%	14.0%	8.9%	9.2%	14.6%
Premium revenue	0.9%	1.5%	3.2%	2.7%	1.1%
Total medical care costs	1.0%	1.8%	3.6%	3.3%	1.3%
Claims Data:					
Days in claims payable, fee for service	45	39	45	39	40
Number of members at end of period	1,826,000	1,678,000	1,826,000	1,678,000	1,697,000
Number of claims in inventory at end of period	163,600	132,200	163,600	132,200	111,100
Billed charges of claims in inventory at end of period	$ 304,600	$ 187,000	$ 304,600	$ 187,000	$ 207,600
Claims in inventory per member at end of period	0.09	0.08	0.09	0.08	0.07
Billed charges of claims in inventory per member at end of period	$ 166.81	$ 111.44	$ 166.81	$ 111.44	$ 122.33
Number of claims received during the period	15,455,000	12,864,800	5,079,200	4,149,600	17,207,500
Billed charges of claims received during the period	$ 14,339,700	$ 10,573,900	$ 4,951,000	$ 3,610,700	$ 14,306,500

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

We are also exposed to interest rate risk relating to contractual variable interest rates under our Term Loan Agreement which matures on November 30, 2018. We manage this floating rate debt using an interest rate swap agreement that we expect will reduce our exposure to the impact of changing interest rates to our consolidated results of operations and future outflows for interest. The interest rate swap is not designated as a hedging instrument.

Item 4. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended September 30, 2012 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. *Legal Proceedings*

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 1A. *Risk Factors*

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in Part I, Item 1A — Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2011, as updated in Part II, Item 1A—Risk Factors, in our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2012. The risk factors described herein and in our 2011 Annual Report on Form 10-K as updated by our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2012 are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition, cash flows, or results of operations.

There have been no material changes to the risk factors disclosed in our 2011 Form 10-K as updated by our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2012.

Item 2. ***Unregistered Sales of Equity Securities and Use of Proceeds***

Issuer Purchases of Equity Securities

Effective as of October 26, 2011, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014. The repurchase program expired October 25, 2012. No securities were purchased under this program in the nine months ended September 30, 2012.

Purchases of common stock made by or on behalf of the Company during the quarter ended September 30, 2012, including shares withheld by the Company to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
July 1—July 30	13,220	$ 26.48	—	$ —
August 1—August 31	2,444	$ 24.44	—	$ —
September 1—September 30	638	$ 24.24	—	$ —
Total	16,302	$ 26.09	—	

(a) During the three months ended September 30, 2012, we did not repurchase any shares of our common stock outside of our publicly announced stock repurchase program. During the quarter we withheld 16,302 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended September 30, 2012 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Dated: October 26, 2012

EXHIBIT 31.2

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, John C. Molina, J.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended September 30, 2012 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
June 30, 2012

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri (through June 30, 2012), New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. As of June 30, 2012, these health plans served approximately 1.9 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts are renewable at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause upon 30 days to nine months with prior written notice. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's prior contract with the state expired without renewal on June 30, 2012 subject to certain transition obligations. For the six months ended June 30, 2012, our Missouri health plan contributed premium revenue of $113.8 million, or 4.1% of total premium revenue, and comprised 79,000 members, or 4.3% of total Health Plans segment membership as of June 30, 2012.

Our state Medicaid contracts may be periodically adjusted to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas. For example, our Texas health plan added significant membership effective March 1, 2012, in service areas we had not previously served (the Hidalgo and El Paso service areas); and among populations we had not previously served within existing service areas, such as the Temporary Assistance for Needy Families, or TANF, population in the Dallas service area. Additionally, the health benefits provided to our TANF and ABD members in Texas under our contracts with the state were expanded to include inpatient facility and pharmacy services.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On July 13, 2012, our Molina Medicaid Solutions segment received full federal certification of its Medicaid Management Information System, or MMIS, from the Centers for Medicare and Medicaid Services, or CMS. As a result of the CMS certification, the state of Idaho is entitled to receive federal reimbursement of 75% of its MMIS operations costs retroactive to June 1, 2010, the date that the system first began processing claims.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement MMIS to another company For the six months ended June 30, 2012, our revenue under the Louisiana MMIS contract was approximately $24.7 million, or 29.4% of total service revenue. We expect that we will continue to perform under this contract through implementation and acceptance of the successor MMIS. Based upon our past experience and our knowledge of the Louisiana MMIS bid process, we believe that implementation and acceptance of the successor MMIS will not occur until 2014 at the earliest. Through implementation and acceptance of the successor MMIS we expect to recognize approximately $40 million in revenue annually under our Louisiana MMIS contract.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2012. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2011. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2011 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2011 audited financial statements.

Reclassifications

We have reclassified certain amounts in the 2011 consolidated statement of cash flows to conform to the 2012 presentation.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn will lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of $0.5 million and $1.0 million at June 30, 2012, and December 31, 2011, respectively.

Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health: A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At both June 30, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): A portion of premiums received by our New Mexico health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). The New Mexico health plan contract also contains certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At both June 30, 2012, and December 31, 2011, we had not recorded any liability under the terms of these contract provisions.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $6.9 million and $0.7 million pursuant to our profit-sharing agreement with the state of Texas at June 30, 2012, and December 31, 2011, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to CMS our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $13.4 million and $5.0 million for anticipated Medicare risk adjustment premiums as of June 30, 2012, and December 31, 2011, respectively.

Quality incentives that allow us to recognize incremental revenue if certain quality standards are met. These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. Effective February 1, 2010 through June 30, 2011, we were eligible to earn additional incremental revenue of up to 0.25% of our total premium if we met certain pharmacy specific performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state. Based upon our assessment of the performance measures at June 30, 2012, we have accrued an estimated $4.0 million of premiums that were not earned under this program.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, effective beginning in 2011, up to 3.25% of the premium is withheld by the state. The withheld premiums can be earned by the health plan by meeting certain performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of June 30, 2012 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of June 30, 2012.

	Three Months Ended June 30, 2012				
	Maximum Available Quality Incentive Premium - Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements under the scope of FASB Accounting Standards Codification Subtopic 605-25, *Revenue Recognition — Multiple –Element Arrangements,* and SEC Staff Accounting Bulletin Topic 13, *Revenue Recognition*.

Effective January 1, 2011, we adopted a new accounting standard that amends the guidance on the accounting for multiple-element arrangements. Pursuant to the new standard, each required deliverable is evaluated to determine whether it qualifies as a separate unit of accounting which is generally based on whether the deliverable has standalone value to the customer. In addition to standalone value, previous guidance also required objective and reliable evidence of fair value of a deliverable in order to treat the deliverable as a separate unit of accounting. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent. We have adopted this guidance on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Our adoption of this guidance has not impacted the timing or pattern of our revenue recognition in 2011 or 2012. Also, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. For contracts entered into prior to January 1, 2011, objective and reliable evidence of fair value would be required, in addition to DDI standalone value which we do not have, in order to treat DDI as a separate unit of accounting. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs
- Employee costs incurred in performing transaction services
- Vendor costs incurred in performing transaction services
- Costs incurred in performing required monitoring of and reporting on contract performance
- Costs incurred in maintaining and processing member and provider eligibility
- Costs incurred in communicating with members and providers

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Premium Deficiency Charges

We assess the profitability of each contract by state for providing medical care services to our members and identify any contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared with the sum of anticipated future health care costs and maintenance costs. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. In the second quarter of 2012, our Texas and Wisconsin health plans recorded premium deficiency charges of $10.0 million and $3.0 million, respectively. Such charges were recorded to medical care costs.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of non-deductible compensation and state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $10.5 million as of June 30, 2012, and $10.7 million as of December 31, 2011. Approximately $8.4 million of the unrecognized tax benefits recorded at June 30, 2012, relate to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $7.3 million as of June 30, 2012. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $8.6 million due to the expiration of statute of limitations and the resolution to the state refund claim described above.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of June 30, 2012, and December 31, 2011, we had accrued $77,000 and $65,000, respectively, for the payment of interest and penalties.

Recent Accounting Pronouncements

Goodwill. In September 2011, the Financial Accounting Standards Board ("FASB") issued new guidance related to evaluating goodwill for impairment. The new guidance provides entities with the option to perform a qualitative assessment of whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before applying the quantitative two-step goodwill impairment test. If an entity concludes that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it would not be required to perform the quantitative two-step goodwill impairment test. Entities also have the option to bypass the assessment of qualitative factors for any reporting unit in any period and proceed directly to performing the first step of the quantitative two-step goodwill impairment test, as was required prior to the issuance of this new guidance. An entity may begin or resume performing the qualitative assessment in any subsequent period. The new guidance became effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with early adoption permitted. The adoption of this new guidance in 2012 did not impact our financial position, results of operations or cash flows.

Federal Premium-Based Assessment. In July 2011, the FASB issued new guidance related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (the "Affordable Care Act"). The Affordable Care Act imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014 that is allocated to health insurers based on the ratio of the amount of an entity's net premium revenues written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. The new guidance specifies that the liability for the fee should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. The new guidance is effective for calendar years beginning after December 31, 2013, when the fee initially becomes effective. As enacted, this federal premium-based assessment is non-deductible for income tax purposes, and is anticipated to be significant. It is yet undetermined how this premium-based assessment will be factored into the calculation of our premium rates, if at all. Accordingly, adoption of this guidance and the enactment of this assessment as currently written could have a material impact on our financial position, results of operations, or cash flows in future periods.

Comprehensive Income. In June 2011, the FASB issued new guidance, as amended in December 2011, related to the presentation of other comprehensive income. The new guidance provides entities with an option to either replace the statement of income with a statement of comprehensive income which would display both the components of net income and comprehensive income in a combined statement, or to present a separate statement of comprehensive income immediately following the statement of income. The new guidance does not affect the components of other comprehensive income or the calculation of earnings per share; became effective for fiscal years, and interim periods within those years, beginning after December 15, 2011; and is to be applied retrospectively with early adoption permitted. We have elected to present a separate statement of comprehensive income immediately following the statement of income. The adoption of this new guidance in 2012 did not impact our financial position, results of operations or cash flows.

Fair Value. In May 2011, the FASB issued new guidance related to fair value measurement and disclosure. The new guidance is a result of joint efforts by the FASB and the International Accounting Standards Board to develop a single converged fair value framework. The new guidance expands existing disclosure requirements for fair value measurements and makes other amendments; mostly to eliminate wording differences between U.S. generally accepted accounting principles ("GAAP") and international financial reporting standards. The new guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011; is to be applied prospectively; and early adoption was not permitted. Although the adoption of this new guidance in 2012 did not impact our financial position, results of operations or cash flows, it did change our disclosure policies relative to fair value measurements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, or AICPA, and the Securities and Exchange Commission, or SEC, did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(In thousands)			
Shares outstanding at the beginning of the period	46,347	45,828	45,815	45,463
Weighted-average number of shares issued	8	69	361	280
Denominator for basic earnings per share	46,355	45,897	46,176	45,743
Dilutive effect of employee stock options and stock grants (1)	—	574	—	649
Denominator for diluted earnings per share (2)	46,355	46,471	46,176	46,392

(1) Unvested restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. Potentially dilutive unvested restricted shares and stock options were not included in the computation of diluted loss per share for the three and six months ended June 30, 2012, because to do so would have been anti-dilutive. For the three and six months ended June 30, 2011, there were no anti-dilutive weighted restricted shares, respectively. For the three and six months ended June 30, 2011 there were approximately 81,200 and 122,100 anti-dilutive weighted options, respectively.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted (loss) earnings per share for the three month and six month periods ended June 30, 2012 and 2011, because to do so would have been anti-dilutive.

4. Share-Based Compensation

At June 30, 2012, we had employee equity incentives outstanding under three plans: (1) the 2011 Equity Incentive Plan; (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded); and (3) the 2000 Omnibus Stock and Incentive Plan (from which equity incentives are no longer awarded). In March 2012, our chief executive officer, chief financial officer, and chief operating officer were awarded 94,050 performance units, 53,236 performance units, and 30,167 performance units, respectively, that would vest and be settled in shares of the Company's common stock equal in number to the units granted upon the achievement of certain service and performance conditions. Each of the grants shall vest in 2012, provided that: (i) the Company's total operating revenue for 2012 is equal to or greater than $5.5 billion, and (ii) the respective officer continues to be employed by the Company if and when the operating revenue target is met. As of June 30, 2012, we expect such performance awards to vest in full. In the event the vesting conditions are not achieved, the equity compensation awards shall lapse. Also in March 2012, our chief executive officer, chief financial officer, chief operating officer, and chief accounting officer were awarded 8,000 shares, 8,000 shares, 8,000 shares, and 3,000 shares, respectively, of performance units that would vest and be settled in shares of the Company's common stock equal in number to the units granted upon the certification of our Idaho MMIS by CMS. Such awards vested when the Idaho MMIS was certified in July 2012.

Charged to general and administrative expenses, total stock-based compensation expense was as follows for the three month and six month periods ended June 30, 2012 and 2011:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(in thousands)			
Restricted stock/performance unit awards	$ 4,452	$3,932	$ 8,850	$7,738
Stock options (including shares issued under our employee stock purchase plan)	694	378	962	636
Total stock-based compensation expense	$5,146	$ 4,310	$9,812	$ 8,374

As of June 30, 2012, there was $21.5 million of total unrecognized compensation expense related to unvested restricted stock awards, which we expect to recognize over a remaining weighted-average period of 2.5 years. As of June 30, 2012, there was $4.0 million of total unrecognized compensation expense related to performance units, which we expect to recognize by December 31, 2012.

Restricted stock/performance units activity for the six months ended June 30, 2012 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2011	1,435,882	$ 18.97
Restricted stock awards granted	483,057	32.10
Performance units granted	213,022	33.59
Vested	(714,699)	20.33
Performance units vested	(2,143)	35.01
Forfeited	(67,372)	22.58
Unvested balance as of June 30, 2012	1,347,747	25.06

The total fair value of restricted stock and stock unit awards, including those with performance conditions, granted during the six months ended June 30, 2012 and 2011 was $22.4 million and $17.7 million, respectively. The total fair value of restricted shares vested during the six months ended June 30, 2012 and 2011 was $23.6 million and $10.9 million, respectively.

Stock option activity for the six months ended June 30, 2012 is summarized below:

	Shares	Weighted Average Grant Date Fair Value	Average Intrinsic Value (In thousands)	Weighted Average Remaining Contractual term (Years)
Stock options outstanding as of December 31, 2011	553,049	$ 20.91		
Granted	15,000	34.82		
Exercised	(113,129)	19.30		
Forfeited	(750)	22.37		
Stock options outstanding as of June 30, 2012	454,170	21.77	$ 1,407	3.7
Stock options exercisable and expected to vest as of June 30, 2012	454,170	21.77	$ 1,407	3.7
Exercisable as of June 30, 2012	439,170	21.33	$ 1,407	3.5

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

- *Level 1 — Observable inputs such as quoted prices in active markets:* Our Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes which Level 1 financial instruments are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.
- *Level 2 — Inputs other than quoted prices in active markets that are either directly or indirectly observable:* Our Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit, which are classified as current investments in the accompanying consolidated balance sheets, and an interest rate swap derivative recorded as a noncurrent liability. Our investments classified as Level 2 are traded frequently though not necessarily daily. Fair value for the investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. Fair value for the interest rate swap derivative is based on forward LIBOR rates that will be observable at commonly quoted intervals for the full term of the interest rate swap agreement. See Note 10, “Long-Term Debt,” for further information regarding the interest rate swap agreement.

- *Level 3 — Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions:* Our level 3 financial instruments recorded at fair value consist of auction rate securities which are designated as available-for-sale, and are reported at fair value of $13.1 million (par value of $15.0 million) as of June 30, 2012. To estimate the fair value of these securities, we use valuations from third-party pricing models that include factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. To validate the reasonableness of these valuations, we compare such valuations to other third party valuations that provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of June 30, 2012.

Our financial instruments recorded at fair value on a recurring basis at June 30, 2012, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$220,746	$ —	$220,746	$ —
Government-sponsored enterprise securities (GSEs)	28,508	28,508	—	—
Municipal securities	61,922	—	61,922	—
U.S. treasury notes	31,359	31,359	—	—
Certificates of deposit	2,375	—	2,375	—
Auction rate securities	13,101	—	—	13,101
Total assets at fair value	$358,011	$59,867	$285,043	$13,101
Interest rate swap liability	$ 1,086	$ —	$ 1,086	$ —

Our financial instruments recorded at fair value on a recurring basis at December 31, 2011, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$231,634	$ —	$ 231,634	$ —
GSEs	33,949	33,949	—	—
Municipal securities	47,313	—	47,313	—
U.S. treasury notes	21,748	21,748	—	—
Certificates of deposit	2,272	—	2,272	—
Auction rate securities	16,134	—	—	16,134
Total assets at fair value	$353,050	$55,697	$281,219	$16,134
Interest rate swap liability	$ —	$ —	$ —	$ —

The following table presents activity for the six months ended June 30, 2012, relating to our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3)
	(In thousands)
Balance at December 31, 2011	$ 16,134
Total gains (unrealized only):	
Included in other comprehensive income	1,017
Settlements	(4,050)
Balance at June 30, 2012	$ 13,101
The amount of total unrealized gains for the period included in other comprehensive income attributable to the change in accumulated other comprehensive losses relating to assets still held at June 30, 2012	$ 481

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our long-term debt as well as the applicable fair value hierarchy tier, at June 30, 2012, are contained in the table below. Our convertible senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. Borrowings under our credit facility and our term loan are classified as Level 3 financial instruments, because certain inputs used to determine the fair value of these agreements are unobservable. The carrying value of the credit facility at June 30, 2012 approximates fair value because of the short period of time between the borrowing under the credit facility in the second quarter of 2012, and June 30, 2012. The carrying value of the term loan at June 30, 2012, approximates its fair value because there has been no significant change to our credit risk relating to this instrument from the term loan's origination date of December 7, 2011 to June 30, 2012.

	June 30, 2012				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
Convertible senior notes	$ 172,441	$207,688	$—	$207,688	$ —
Credit facility	50,000	50,000	—	—	50,000
Term loan	48,027	48,027	—	—	48,027
	$270,468	$305,715	$—	$207,688	$98,027

	December 31, 2011				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
Convertible senior notes	$169,526	$192,049	$—	$192,049	$ —

The contractual maturities of our investments as of June 30, 2012 are summarized below:

	Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$198,369	$198,590
Due one year through five years	145,958	146,320
Due after ten years	14,950	13,101
	$359,277	$ 358,011

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales and maturities of available-for-sale securities were $71.0 million and $60.1 million for the three months ended June 30, 2012, and 2011, respectively. Total proceeds from sales and maturities of available-for-sale securities were $136.8 million and $121.4 million for the six months ended June 30, 2012, and 2011, respectively. Net realized investment gains for the three months ended June 30, 2012, and 2011 were $174,000 and $21,000 respectively. Net realized investment gains for the six months ended June 30, 2012, and 2011 were $238,000 and $178,000 respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at June 30, 2012, and December 31, 2011, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

Auction Rate Securities

Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 3 years to 35 years. Considering the relative insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at June 30, 2012. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $67.1 million of these instruments at par value.

For six months ended June 30, 2012, and 2011, we recorded pretax unrealized gains of $1.0 million and $0.7 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of June 30, 2012.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More

7. Receivables

Health Plans segment receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustment. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable were as follows:

	June 30, 2012	December 31, 2011
	(In thousands)	
Health Plans segment:		
California	$ 21,319	$ 22,175
Michigan	12,462	8,864
Missouri	22,793	27,092
New Mexico	9,843	9,350
Ohio	37,838	27,458
Texas	6,237	1,608
Utah	4,647	2,825
Washington	14,139	15,006
Wisconsin	10,228	4,909
Others	2,134	2,489
Total Health Plans segment	141,640	121,776
Molina Medicaid Solutions segment	19,367	46,122
	$161,007	$167,898

8. Restricted Investments

Pursuant to the regulations governing our Health Plan subsidiaries, we maintain statutory deposits and deposits required by state Medicaid authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of certain capitated providers. The following table presents the balances of restricted investments.

	June 30, 2012	December 31, 2011
	(In thousands)	
California	$ 373	$ 372
Florida	5,526	5,198
Insurance Company	—	4,711
Michigan	1,000	1,000
Missouri	502	504
New Mexico	15,909	15,905
Ohio	9,078	9,078
Texas	3,510	3,518
Utah	2,985	2,895
Washington	151	151
Other	4,574	2,832
	$ 43,608	$ 46,164

The contractual maturities of our held-to-maturity restricted investments as of June 30, 2012 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$42,257	$41,581
Due one year through five years	1,351	1,357
	$ 43,608	$ 42,938

9. Medical Claims and Benefits Payable

The following table presents the components of the change in our medical claims and benefits payable as of and for the periods indicated. The amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Six Months Ended June 30, 2012	Three Months Ended June 30, 2012	Year Ended Dec. 31, 2011
	(Dollars in thousands)		
Balances at beginning of period	$ 402,476	$ 455,833	$ 354,356
Components of medical care costs related to:			
Current period	2,544,922	1,377,084	3,911,803
Prior periods	(36,357)	493	(51,809)
Total medical care costs	2,508,565	1,377,577	3,859,994
Payments for medical care costs related to:			
Current period	2,033,611	891,573	3,516,994
Prior periods	351,892	416,299	294,880
Total paid	2,385,503	1,307,872	3,811,874
Balances at end of period	$ 525,538	$ 525,538	$ 402,476
Benefit from prior period as a percentage of:			
Balance at beginning of period	9.0%	(0.1)%	14.6%
Premium revenue	1.3%	0.0%	1.1%
Total medical care costs	1.4%	0.0%	1.3%

We recognized favorable prior period claims development in the amount of $36.4 million for the six months ended June 30, 2012. This amount represents our estimate as of June 30, 2012 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 was more than the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2011 was due primarily to the following factors:

- For our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- For our Texas health plan, we overestimated the cost of new members in STAR+PLUS (the name of our ABD program in Texas), in the Dallas region.
- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in the lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all of the claims overestimation.
- Offsetting some of the overestimation items described above, our Missouri health plan reserves were underestimated as a result of an unusually large number of premature infants during the fourth quarter.

We recognized unfavorable prior period claims development in the amount of $0.5 million for the three months ended June 30, 2012. This amount represents our estimate as of June 30, 2012 of the extent to which our initial estimate of medical claims and benefits payable at March 31, 2012 was less than the amount that will ultimately be paid out in satisfaction of that liability. The underestimation of claims liability at March 31, 2012 was due primarily to the following factors:

- For our Texas health plan, our initial estimates of reserves at March 31, 2012 for new coverage (inpatient medical costs on STAR+PLUS members) and new regions were based on the state's pricing assumptions. We have since learned that the claims costs are much higher than initially expected.
- For our Missouri health plan, reserves were underestimated due to a large number of very high cost claims, including premature infants, during the first quarter of 2012.
- We underestimated the impact of a buildup in claims inventory in our Michigan and Ohio health plans as of March 31, 2012.

We recognized favorable prior period claims development in the amount of $45.4 million and $51.8 million for the six months ended June 30, 2011, and the year ended December 31, 2011, respectively. This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2010, as a result of the following factors:

- We overestimated the impact of a buildup in claims inventory in Ohio.
- We overestimated the impact of the settlement of disputed provider claims in California.
- We underestimated the reduction in outpatient facility claims costs as a result of a fee schedule reduction in New Mexico effective November 2010, partially offsetting the impact of the two items above.

In estimating our claims liability at June 30, 2012, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- Our Texas health plan membership has nearly doubled effective March 1, 2012. In addition, effective March 1, 2012, we assumed inpatient medical liability for STAR+PLUS (an area of coverage that was previously carved out). Reserves for new coverage and new regions are now based on the newly developing claims lag patterns and comparisons with similar coverage in other regions with more historical data.
- Our California health plan has enrolled approximately 24,000 new ABD members since June 30, 2011, as a result of the mandatory assignment of ABD members to managed care plans effective July 1, 2011. These new members converted from a fee-for-service environment, and are higher cost than our base ABD members.
- Our claims inventory had increased significantly during the first quarter of 2012, followed by a significant reduction in claims inventory in the second quarter of 2012. Changes in claims inventory can impact historical claims lag patterns.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2011 and for the six months ended June 30, 2012, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

10. Long-Term Debt

Credit Facility

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility (the “Credit Facility”) with various lenders and U.S. Bank National Association, as LC Issuer, Swing Line Lender, and Administrative Agent. The Credit Facility is used for general corporate purposes.

The Credit Facility has a term of five years under which all amounts outstanding will be due and payable on September 9, 2016. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $195 million. As of June 30, 2012 there was $50.0 million outstanding under the Credit Facility. Additionally, as of June 30, 2012, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, which reduces the amount available under the Credit Facility.

Borrowings under the Credit Facility bear interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders’ commitments under the Credit Facility. The applicable margins range between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan).

The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA for the trailing twelve month period of not more than 2.75 to 1.00, and a fixed charge coverage ratio of not less than 1.75 to 1.00. At June 30, 2012, we were in compliance with all financial covenants under the Credit Facility.

In the event of a default, including cross-defaults relating to specified other debt in excess of $20 million, the lenders may terminate the commitments under the Credit Facility and declare the amounts outstanding, including all accrued interest and unpaid fees, payable immediately. In addition, the lenders may enforce any and all rights and remedies created under the Credit Facility or applicable law.

Convertible Senior Notes

As of June 30, 2012, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the Notes. This represents a conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

The proceeds from the issuance of the Notes have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of June 30, 2012, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 27 months. The Notes' if-converted value did not exceed their principal amount as of June 30, 2012. At June 30, 2012, the equity component of the Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	As of June 30, 2012	As of December 31, 2011
	(In thousands)	
Details of the liability component:
