We are subject to various routine and non-routine governmental reviews, audits, and investigations. Violation of the laws, regulations, or contract provisions governing our operations, or changes in interpretations of those laws and regulations, could result in the imposition of civil or criminal penalties, the cancellation of our contracts to provide managed care services, the suspension or revocation of our licenses, the exclusion from participation in government sponsored health programs, or the revision and recoupment of past payments made based on audit findings. If we are unable to correct any noted deficiencies, or become subject to material fines or other sanctions, we could suffer a substantial reduction in profitability, and could also lose one or more of our government contracts and as a result lose significant numbers of members and amounts of revenue. In addition, government receivables are subject to government audit and negotiation, and government contracts are vulnerable to disagreements with the government. The final amounts we ultimately receive under government contracts may be different from the amounts we initially recognize in our financial statements.

We rely on the accuracy of eligibility lists provided by state governments. Inaccuracies in those lists would negatively affect our results of operations.

Premium payments to our health plan segment are based upon eligibility lists produced by state governments. From time to time, states require us to reimburse them for premiums paid to us based on an eligibility list that a state later discovers contains individuals who are not in fact eligible for a government sponsored program or are eligible for a different premium category or a different program. Alternatively, a state could fail to pay us for members for whom we are entitled to payment. Our results of operations would be adversely affected as a result of such reimbursement to the state if we make or have made related payments to providers and are unable to recoup such payments from the providers.

We are subject to extensive fraud and abuse laws that may give rise to lawsuits and claims against us, the outcome of which may have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Because we receive payments from federal and state governmental agencies, we are subject to various laws commonly referred to as "fraud and abuse" laws, including federal and state anti-kickback statutes, prohibited referrals, and the federal False Claims Act, which permit agencies and enforcement authorities to institute a suit against us for violations and, in some cases, to seek treble damages, criminal and civil fines, penalties, and assessments. Violations of these laws can also result in exclusion, debarment, temporary or permanent suspension from participation in government health care programs, or the institution of corporate integrity agreements. Liability under such federal and state statutes and regulations may arise if we know, or it is found that we should have known, that information we provide to form the basis for a claim for government payment is false or fraudulent, and some courts have permitted False Claims Act suits to proceed if the claimant was out of compliance with program requirements. Fraud, waste and abuse prohibitions encompass a wide range of operating activities, including kickbacks or other inducements for referral of members or for the coverage of products (such as prescription drugs) by a plan, billing for unnecessary medical services by a provider, improper marketing, and the violation of patient privacy rights. Companies involved in public health care programs such as Medicaid and Medicare are required to maintain compliance programs to detect and deter fraud, waste and abuse, and are often the subject of fraud, waste and abuse investigations and audits. The regulations and contractual requirements applicable to participants in these public-sector programs are complex and subject to change. The federal government has taken the position that claims presented in violation of the federal anti-kickback statute may be considered a violation of the federal False Claims Act. In addition, under the federal civil monetary penalty statute, the U.S. Department of Health and Human Services (HHS), Office of Inspector General has the authority to impose civil penalties against any person who, among other things, knowingly presents, or causes to be presented, certain false or otherwise improper claims. *Qui tam* actions under federal and state law can be brought by any individual on behalf of the government. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines, or be excluded from the Medicare, Medicaid, or other state or federal health care programs as a result of an investigation arising out of such action. We are currently defending one *qui tam* action where the federal government has declined to intervene: *United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al*. Other qui tam actions may have been filed against us of which we are presently unaware, or other qui tam actions may be filed against us in the future. In the event we are subject to liability under these or other *qui tam* actions, our business, financial condition, cash flows, or results of operations could be adversely affected.

Our business could be adversely impacted by adoption of the new ICD-10 standardized coding set for diagnoses.

HHS released rules pursuant to the Health Insurance Portability and Accountability Act, or HIPAA, which mandate the use of standard formats in electronic health care transactions. HHS also published rules requiring the use of standardized code sets and unique identifiers for providers. These new standardized code sets, known as ICD-10, require substantial investments from health care organizations, including us. We implemented ICD-10 effective as of October 1, 2015. Use of the ICD-10 code sets require significant administrative changes and may result in errors and otherwise negatively impact our service levels. In addition, we may experience complications related to supporting customers that are not fully compliant with the revised requirements as of the applicable compliance date. Furthermore, if physicians fail to provide appropriate codes for services provided as a result of the new coding set, we may not be reimbursed, or adequately reimbursed, for such services.

If we are unable to deliver quality care, maintain good relations with the physicians, hospitals, and other providers with whom we contract, or if we are unable to enter into cost-effective contracts with such providers, our profitability could be adversely affected.

We contract with physicians, hospitals, and other providers as a means to ensure access to health care services for our members, to manage health care costs and utilization, and to better monitor the quality of care being delivered. We compete with other health plans to contract with these providers. We believe providers select plans in which they participate based on criteria including reimbursement rates, timeliness and accuracy of claims payment, potential to deliver new patient volume and/or retain existing patients, effectiveness of resolution of calls and complaints, and other factors. We cannot be sure that we will be able to successfully attract and retain providers to maintain a competitive network in the geographic areas we serve. In addition, in any particular market, providers could refuse to contract with us, demand higher payments, or take other actions which could result in higher health care costs, disruption to provider access for current members, a decline in our growth rate, or difficulty in meeting regulatory or accreditation requirements.

The Medicaid program generally pays doctors and hospitals at levels well below those of Medicare and private insurance. Large numbers of doctors, therefore, do not accept Medicaid patients. In the face of fiscal pressures, some states may reduce rates paid to providers, which may further discourage participation in the Medicaid program.

In some markets, certain providers, particularly hospitals, physician/hospital organizations, and some specialists, may have significant market positions or even monopolies. If these providers refuse to contract with us or utilize their market position to negotiate favorable contracts which are disadvantageous to us, our profitability in those areas could be adversely affected.

Some providers that render services to our members are not contracted with our health plans. In those cases, there is no pre-established understanding between the provider and our health plan about the amount of compensation that is due to the provider. In some states, the amount of compensation is defined by law or regulation, but in most instances it is either not defined or it is established by a standard that is not clearly translatable into dollar terms. In such instances, providers may believe they are underpaid for their services and may either litigate or arbitrate their dispute with our health plan. The uncertainty of the amount to pay and the possibility of subsequent adjustment of the payment could adversely affect our business, financial condition, results of operations, and cash flows.

The insolvency of a delegated provider could obligate us to pay its referral claims, which could have an adverse effect on our business, cash flows, or results of operations.

Circumstances may arise where providers to whom we have delegated risk, due to insolvency or other circumstances, are unable to pay claims they have incurred with third parties in connection with referral services provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so or we have already paid claims to a delegated provider and payments cannot be recouped when the delegated provider becomes insolvent. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability. In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These funds are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. However, there can be no assurances that these precautionary steps will fully protect us against the insolvency of a delegated provider. Liabilities incurred or losses suffered as a result of provider insolvency could have an adverse effect on our business, financial condition, cash flows, or results of operations.

Regulatory actions and negative publicity regarding Medicaid managed care and Medicare Advantage may lead to programmatic changes and intensified regulatory scrutiny and regulatory burdens.

Several of our health care competitors have recently been involved in governmental investigations and regulatory actions which have resulted in significant volatility in the price of their stock. In addition, there has been negative publicity and proposed programmatic changes regarding Medicare Advantage private fee-for-service plans, a part of the Medicare Advantage program in which we do not participate. These actions and the resulting negative publicity could become associated with or imputed to us, regardless of our actual regulatory compliance or programmatic participation. Such an association, as well as any perception of a recurring pattern of abuse among the health plan participants in government programs and the diminished reputation of the managed care sector as a whole, could result in public distrust, political pressure for changes in the programs in which we do not participate, intensified scrutiny by regulators, additional regulatory requirements and burdens, increased stock volatility due to speculative trading, and heightened barriers to new managed care markets and contracts, all of which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

If a state fails to renew its federal waiver application for mandated Medicaid enrollment into managed care or such application is denied, our membership in that state will likely decrease.

States may only mandate Medicaid enrollment into managed care under federal waivers or demonstrations. Waivers and programs under demonstrations are approved for two- to five-year periods and can be renewed on an ongoing basis if the state applies and the waiver request is approved or renewed by CMS. We have no control over this renewal process. If a state does not renew its mandated program or the federal government denies the state's application for renewal, our business would suffer as a result of a likely decrease in membership.

If state regulators do not approve payments of dividends and distributions by our subsidiaries, it may negatively affect our business strategy.

We are a corporate parent holding company and hold most of our assets at, and conduct most of our operations through, direct subsidiaries. As a holding company, our results of operations depend on the results of operations of our subsidiaries. Moreover, we are dependent on dividends or other intercompany transfers of funds from our subsidiaries to meet our debt service and other obligations. The ability of our subsidiaries to pay dividends or make other payments or advances to us will depend on their operating results and will be subject to applicable laws and restrictions contained in agreements governing the debt of such subsidiaries. In addition, our health plan subsidiaries are subject to laws and regulations that limit the amount of dividends and distributions that they can pay to us without prior approval of, or notification to, state regulators. In California, our health plan may dividend, without notice to or approval of the California Department of Managed Health Care, amounts by which its tangible net equity exceeds 130% of the tangible net equity requirement. Our other health plans must give thirty days' advance notice and the opportunity to disapprove "extraordinary" dividends to the respective state departments of insurance for amounts

over the lesser of (a) ten percent of surplus or net worth at the prior year end or (b) the net income for the prior year. The discretion of the state regulators, if any, in approving or disapproving a dividend is not clearly defined. Health plans that declare non-extraordinary dividends must usually provide notice to the regulators ten or fifteen days in advance of the intended distribution date of the non-extraordinary dividend. We received $125 million in dividends from our regulated health plan subsidiaries during 2015. We did not receive any dividends from our regulated health plan subsidiaries during 2014, because significant growth across all of our health plans necessitated that the plans retain their cash to meet increasing net worth requirements. The aggregate additional amounts our health plan subsidiaries could have paid us at December 31, 2015 and 2014, without approval of the regulatory authorities, were approximately $121 million and $96 million, respectively. If the regulators were to deny or significantly restrict our subsidiaries' requests to pay dividends to us, the funds available to our company as a whole would be limited, which could harm our ability to implement our business strategy. For example, we could be hindered in our ability to make debt service payments under the senior notes or the revolving credit facility.

Unforeseen changes in pharmaceutical regulations or market conditions may impact our revenues and adversely affect our results of operations.

A significant category of our health care costs relate to pharmaceutical products and services. Evolving regulations and state and federal mandates regarding coverage may impact the ability of our health plans to continue to receive existing price discounts on pharmaceutical products for our members. Other factors affecting our pharmaceutical costs include, but are not limited to, the price of pharmaceuticals, geographic variation in utilization of new and existing pharmaceuticals, and changes in discounts. The unpredictable nature of these factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Our use and disclosure of individually identifiable information, including health information, is subject to federal and state privacy and security regulations, and our failure to comply with those regulations or to adequately secure the information we hold could result in significant liability or reputational harm.

State and federal laws and regulations, including HIPAA and the Gramm-Leach-Bliley Act, govern the collection, dissemination, use, privacy, confidentiality, security, availability, and integrity of individually identifiable information, including protected health information, or PHI. HIPAA establishes basic national privacy and security standards for protection of PHI by covered entities, including health plans such as ours. HIPAA requires covered entities like us to develop and maintain policies and procedures for PHI that is used or disclosed, and to adopt administrative, physical, and technical safeguards to protect PHI. HIPAA also implemented the use of standard transaction code sets and standard identifiers that covered entities must use when submitting or receiving certain electronic health care transactions, including activities associated with the billing and collection of health care claims.

Mandatory penalties for HIPAA violations range from $100 to $50,000 per violation, and up to $1.5 million per violation of the same standard per calendar year. A single breach incident can result in violations of multiple standards, resulting in possible penalties potentially in excess of $1.5 million. If a person knowingly or intentionally obtains or discloses PHI in violation of HIPAA requirements, criminal penalties may also be imposed. HIPAA authorizes state attorneys general to file suit under HIPAA on behalf of state residents. Courts can award damages, costs, and attorneys' fees related to violations of HIPAA in such cases. While HIPAA does not create a private right of action allowing individuals to sue us in civil court for HIPAA violations, its standards have been used as the basis for a duty of care in state civil suits such as those for negligence or recklessness in the misuse or breach of PHI.

In addition, HIPAA mandates that the Secretary of HHS conduct periodic compliance audits of HIPAA covered entities for compliance with the HIPAA Privacy and Security Standards. Investigations of violations that indicate willful neglect, for which penalties are now mandatory, are statutorily required. It also tasks HHS with establishing a methodology whereby harmed individuals who were the victims of breaches of unsecured PHI may receive a percentage of the civil monetary penalty fine paid by the violator.

HIPAA further requires covered entities to notify affected individuals "without unreasonable delay and in no case later than 60 calendar days after discovery of the breach" if their unsecured PHI is subject to an unauthorized access, use, or disclosure. If a breach affects 500 patients or more, it must be reported to HHS and local media without unreasonable delay, and HHS will post the name of the breaching entity on its public website. If a breach affects fewer than 500 individuals, the covered entity must log it and notify HHS at least annually. We have experienced HIPAA breaches in the past, including breaches affecting over 500 individuals.

New health information standards, whether implemented pursuant to HIPAA, congressional action, or otherwise, could have a significant effect on the manner in which we must handle health care related data, and the cost of complying with standards could be significant. If we do not comply with existing or new laws and regulations related to PHI, we could be subject to criminal or civil sanctions. Any security breach involving the misappropriation, loss, or other unauthorized disclosure or use of confidential member information, whether by us or a third party, such as our vendors, could subject us to civil and criminal

penalties, divert management's time and energy, and have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Risks Related to the Operation of Our Molina Medicaid Solutions Segment

We may be unable to retain or renew the state government contracts of the Molina Medicaid Solutions segment on terms consistent with our expectations or at all.

Molina Medicaid Solutions currently provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida. If we are unable to continue to operate in any of those six jurisdiction, or if our current operations in any of those jurisdictions are significantly curtailed, the revenues and cash flows of Molina Medicaid Solutions could decrease materially, and as a result our profitability would be negatively impacted.

If the responsive bids to RFPs of Molina Medicaid Solutions are not successful, our revenues could be materially reduced and our operating results could be negatively impacted.

The government contracts of Molina Medicaid Solutions may be subject to periodic competitive bidding. In such process, Molina Medicaid Solutions may face competition as other service providers, some with much greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. Molina Medicaid Solutions also anticipates bidding in other states which have issued RFPs for procurement of a new MMIS. In the event our responsive bids in other states are not successful, we will be unable to grow in a manner consistent with our projections. Even if our responsive bids are successful, the bids may be based upon assumptions or other factors which could result in the contract being less profitable than we had expected or had been the case prior to competitive re-bidding.

Because of the complexity and duration of the services and systems required to be delivered under the government contracts of Molina Medicaid Solutions, there are substantial risks associated with full performance under the contracts.

The state contracts of Molina Medicaid Solutions typically require significant investment in the early stages that is expected to be recovered through billings over the life of the contracts. These contracts involve the construction of new computer systems and communications networks and the development and deployment of complex technologies. Substantial performance risk exists under each contract. Some or all elements of service delivery under these contracts are dependent upon successful completion of the design, development, construction, and implementation phases. Any increased or unexpected costs or delays in connection with the performance of these contracts, including delays caused by factors outside our control, could make these contracts less profitable or unprofitable, which could have an adverse effect on our business, financial condition, cash flows, or results of operations.

If we fail to comply with our state government contracts or government contracting regulations, our business could be adversely affected.

Molina Medicaid Solutions' contracts with state government customers may include unique and specialized performance requirements. In particular, contracts with state government customers are subject to various procurement regulations, contract provisions, and other requirements relating to their formation, administration, and performance. Any failure to comply with the specific provisions in our customer contracts or any violation of government contracting regulations could result in the imposition of various civil and criminal penalties, which may include termination of the contracts, forfeiture of profits, suspension of payments, imposition of fines, and suspension from future government contracting. Further, any negative publicity related to our state government contracts or any proceedings surrounding them may damage our business by affecting our ability to compete for new contracts. The termination of a state government contract, our suspension from government work, or any negative impact on our ability to compete for new contracts, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

System security risks and systems integration issues that disrupt our internal operations or information technology services provided to customers could adversely affect our financial results and damage our reputation.

Computer programmers and hackers may be able to penetrate our network security and misappropriate our confidential information or that of third parties, create system disruptions, or cause shutdowns. Computer programmers and hackers also may be able to develop and deploy viruses, worms, and other malicious software programs that attack our products or otherwise exploit any security vulnerabilities of our products. In addition, sophisticated hardware and operating system software and applications that we produce or procure from third parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the system. The costs to us to eliminate or alleviate security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and the efforts to address these problems could result in interruptions, delays, cessation of service, and loss of existing or potential government customers.

Molina Medicaid Solutions routinely processes, stores, and transmits large amounts of data for our clients, including sensitive and personally identifiable information. Breaches of our security measures could expose us, our customers, or the individuals affected to a risk of loss or misuse of this information, resulting in litigation and potential liability for us and damage to our brand and reputation. Accordingly, we could lose existing or potential government customers for outsourcing services or other information technology solutions or incur significant expenses in connection with our customers' system failures or any actual or perceived security vulnerabilities in our products. In addition, the cost and operational consequences of implementing further data protection measures could be significant.

Portions of our information technology infrastructure also may experience interruptions, delays, or cessations of service or produce errors in connection with systems integration or migration work that takes place from time to time. We may not be successful in implementing new systems and transitioning data, which could cause business disruptions and be more expensive, time consuming, disruptive, and resource-intensive. Such disruptions could adversely impact our ability to fulfill orders and interrupt other processes. Delayed sales, lower margins, or lost government customers resulting from these disruptions could adversely affect our financial results, reputation, and stock price.

In the course of providing services to customers, Molina Medicaid Solutions may inadvertently infringe on the intellectual property rights of others and be exposed to claims for damages.

The solutions we provide to our state government customers may inadvertently infringe on the intellectual property rights of third parties resulting in claims for damages against us. The expense and time of defending against these claims may have a material and adverse impact on our profitability. Additionally, the publicity we may receive as a result of infringing intellectual property rights may damage our reputation and adversely impact our ability to develop new MMIS business or retain existing MMIS business.

Inherent in the government contracting process are various risks which may materially and adversely affect our business and profitability.

We are subject to the risks inherent in the government contracting process. These risks include government audits of billable contract costs and reimbursable expenses and compliance with government reporting requirements. In the event we are found to be out of compliance with government contracting requirements, our reputation may be adversely impacted and our relationship with the government agencies we work with may be damaged, resulting in a material and adverse effect on our profitability.

Our performance of contracts, including those with respect to which we have partnered with third parties, may be adversely affected if we or the third parties fail to deliver on commitments.

In some instances, our contracts require that we partner with other parties, including software and hardware vendors, to provide the complex solutions required by our state government customers. Our ability to deliver the solutions and provide the services required by our customers is dependent on our and our partners' ability to meet our customers' delivery schedules. If we or our partners fail to deliver services or products on time, our ability to complete the contract may be adversely affected, which may have a material and adverse impact on our revenues and profitability.

Our business may be adversely affected by the transition from traditional fee-for-service to Medicaid managed care.

In order to save on costs, a number of state Medicaid programs are expected to pursue the transition from a fee-for-service focus of their Medicaid programs to a Medicaid managed care focus. A shift in Medicaid payment models from fee-for-service to managed care will require a concomitant shift in the focus of MMIS. In connection with such a transition, MMIS must also make a transition from a system built around claims adjudication to one that performs analytics and can be used to manage Medicaid population health outcomes. In the event Molina Medicaid Solutions is unable to accomplish this transition, our business, financial condition, cash flows, or results of operations may be adversely affected.

Risks Related to our General Business Operations

Ineffective management of our growth may negatively affect our business, financial condition, or results of operations.

We expect to continue to grow our membership and to expand into other markets through acquisitions and other opportunities. Continued rapid growth could place a significant strain on our management and on our other resources. Our ability to manage our growth may depend on our ability to strengthen our management team and attract, train, and retain skilled employees, and our ability to implement and improve operational, financial, and management information systems on a timely basis. If we are unable to manage our growth effectively, our business, financial condition, cash flows, or results of operations could be materially and adversely affected. In addition, due to the initial substantial costs related to acquisitions, rapid growth could adversely affect our short-term profitability and liquidity.

Any changes to the laws and regulations governing our business, or the interpretation and enforcement of those laws or regulations, could cause us to modify our operations and could negatively impact our operating results.

Our business is extensively regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect health plan members and providers rather than managed care organizations. The government agencies administering these laws and regulations have broad latitude in interpreting and applying them. These laws and regulations, along with the terms of our government contracts, regulate how we do business, what services we offer, and how we interact with members and the public. For instance, some states mandate minimum medical expense levels as a percentage of premium revenues. These laws and regulations, and their interpretations, are subject to frequent change. The interpretation of certain contract provisions by our governmental regulators may also change. Changes in existing laws or regulations, or their interpretations, or the enactment of new laws or regulations, could reduce our profitability by imposing additional capital requirements, increasing our liability, increasing our administrative and other costs, increasing mandated benefits, forcing us to restructure our relationships with providers, or requiring us to implement additional or different programs and systems. Changes in the interpretation of our contracts could also reduce our profitability if we have detrimentally relied on a prior interpretation.

Our business depends on our information and medical management systems, and our inability to effectively integrate, manage, and keep secure our information and medical management systems could disrupt our operations.

Our business is dependent on effective and secure information systems that assist us in, among other things, processing provider claims, monitoring utilization and other cost factors, supporting our medical management techniques, and providing data to our regulators. Our providers also depend upon our information systems for membership verifications, claims status, and other information. If we experience a reduction in the performance, reliability, or availability of our information and medical management systems, our operations, ability to pay claims, and ability to produce timely and accurate reports could be adversely affected. In addition, if the licensor or vendor of any software which is integral to our operations were to become insolvent or otherwise fail to support the software sufficiently, our operations could be negatively affected.

Our information systems and applications require continual maintenance, upgrading, and enhancement to meet our operational needs. Moreover, our acquisition activity requires transitions to or from, and the integration of, various information systems. If we experience difficulties with the transition to or from information systems or are unable to properly implement, maintain, upgrade or expand our system, we could suffer from, among other things, operational disruptions, loss of members, difficulty in attracting new members, regulatory problems, and increases in administrative expenses.

Our business requires the secure transmission of confidential information over public networks. Advances in computer capabilities, new discoveries in the field of cryptography, or other events or developments could result in compromises or breaches of our security systems and member data stored in our information systems. Anyone who circumvents our security measures could misappropriate our confidential information or cause interruptions in services or operations. The internet is a public network, and data is sent over this network from many sources. In the past, computer viruses or software programs that disable or impair computers have been distributed and have rapidly spread over the internet. Computer viruses could be introduced into our systems, or those of our providers or regulators, which could disrupt our operations, or make our systems inaccessible to our members, providers, or regulators. We may be required to expend significant capital and other resources to protect against the threat of security breaches or to alleviate problems caused by breaches. Because of the confidential health information we store and transmit, security breaches could expose us to a risk of regulatory action, litigation, possible liability, and loss. Our security measures may be inadequate to prevent security breaches, and our business operations would be negatively impacted by cancellation of contracts and loss of members if security breaches are not prevented.

Because our corporate headquarters are located in Southern California, our business operations may be significantly disrupted as a result of a major earthquake.

Our corporate headquarters is located in Long Beach, California. In addition, the claims of our health plans are also processed in Long Beach. Southern California is exposed to a statistically greater risk of a major earthquake than most other parts of the United States. If a major earthquake were to strike the Los Angeles area, our corporate functions and claims processing could be significantly impaired for a substantial period of time. Although we have established a disaster recovery and business resumption plan with back-up operating sites to be deployed in the case of such a major disruptive event, there can be no assurances that the disaster recovery plan will be successful or that the business operations of all our health plans, including those that are remote from any such event, would not be substantially impacted by a major Southern California earthquake.

We face claims related to litigation which could result in substantial monetary damages.

We are subject to a variety of legal actions, including medical malpractice actions, provider disputes, employment related disputes, health care regulatory law-based litigation, and breach of contract actions. In the event we incur liability materially in excess of the amount for which we have insurance coverage, our profitability would suffer. In addition, our providers involved in medical care decisions are exposed to the risk of medical malpractice claims. As an employer of physicians and ancillary

medical personnel and as an operator of primary care clinics, our plans are subject to liability for negligent acts, omissions, or injuries occurring at one of our clinics or caused by one of our employees. We maintain medical malpractice insurance for our clinics in an amount which we believe to be reasonable in light of our experience to date. However, given the significant amount of some medical malpractice awards and settlements, this insurance may not be sufficient or available at a reasonable cost to protect us from damage awards or other liabilities. Even if any claims brought against us are unsuccessful or without merit, we may have to defend ourselves against such claims. The defense of any such actions may be time-consuming and costly, and may distract our management's attention. As a result, we may incur significant expenses and may be unable to effectively operate our business.

Furthermore, claimants often sue managed care organizations for improper denials of or delays in care, and in some instances improper authorizations of care. Claims of this nature could result in substantial damage awards against us and our providers that could exceed the limits of any applicable medical malpractice insurance coverage. Successful malpractice or tort claims asserted against us, our providers, or our employees could adversely affect our business, financial condition, cash flows, or results of operations.

We cannot predict the outcome of any lawsuit with certainty. While we currently have insurance coverage for some of the potential liabilities relating to litigation, other such liabilities may not be covered by insurance, the insurers could dispute coverage, or the amount of insurance could be insufficient to cover the damages awarded. In addition, insurance coverage for all or certain types of liability may become unavailable or prohibitively expensive in the future or the deductible on any such insurance coverage could be set at a level which would result in us effectively self-insuring cases against us.

Although we establish reserves for litigation as we believe appropriate, we cannot assure you that our recorded reserves will be adequate to cover such costs. Therefore, the litigation to which we are subject could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and could prompt us to change our operating procedures.

We are subject to competition which negatively impacts our ability to increase penetration in the markets we serve.

We operate in a highly competitive environment and in an industry that is subject to ongoing changes from business consolidations, new strategic alliances, and aggressive marketing practices by other managed care organizations. We compete for members principally on the basis of size, location, and quality of provider network, benefits supplied, quality of service, and reputation. A number of these competitive elements are partially dependent upon and can be positively affected by the financial resources available to a health plan. Many other organizations with which we compete, including large commercial plans, have substantially greater financial and other resources than we do. For these reasons, we may be unable to grow our membership, or may lose members to other health plans.

Failure to maintain effective internal controls over financial reporting could have a material adverse effect on our business, operating results, and stock price.

The Sarbanes-Oxley Act of 2002 requires, among other things, that we maintain effective internal control over financial reporting. In particular, we must perform system and process evaluation and testing of our internal controls over financial reporting to allow management to report on, and our independent registered public accounting firm to attest to, our internal controls over financial reporting as required by Section 404 of the Sarbanes-Oxley Act of 2002. Our future testing, or the subsequent testing by our independent registered public accounting firm, may reveal deficiencies in our internal controls over financial reporting that are deemed to be material weaknesses. Our compliance with Section 404 will continue to require that we incur substantial accounting expense and expend significant management time and effort. Moreover, if we are not able to continue to comply with the requirements of Section 404 in a timely manner, or if we or our independent registered public accounting firm identify deficiencies in our internal control over financial reporting that are deemed to be material weaknesses, the market price of our stock could decline and we could be subject to sanctions or investigations by the New York Stock Exchange, SEC, or other regulatory authorities which would require additional financial and management resources.

Changes in accounting may affect our results of operations.

U.S. generally accepted accounting principles (GAAP) and related implementation guidelines and interpretations can be highly complex and involve subjective judgments. Changes in these rules or their interpretation, or the adoption of new pronouncements could significantly affect our stated results of operations.

The value of our investments is influenced by varying economic and market conditions, and a decrease in value could have an adverse effect on our results of operations, liquidity, and financial condition.

Our investments consist of investment-grade debt securities. The unrestricted portion of this portfolio is designated as available-for-sale. Our non-current restricted investments are designated as held-to-maturity. Available-for-sale investments are carried at fair value, and the unrealized gains or losses are included in accumulated other comprehensive income or loss as a separate component of stockholders' equity, unless the decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such securities until their full cost can be recovered. For our available-for-sale investments

and held-to-maturity investments, if a decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such security until its full cost can be recovered, the security is deemed to be other-than-temporarily impaired and it is written down to fair value and the loss is recorded as an expense.

In accordance with applicable accounting standards, we review our investment securities to determine if declines in fair value below cost are other-than-temporary. This review is subjective and requires a high degree of judgment. We conduct this review on a quarterly basis, using both quantitative and qualitative factors, to determine whether a decline in value is other-than-temporary. Such factors considered include the length of time and the extent to which market value has been less than cost, the financial condition and near term prospects of the issuer, recommendations of investment advisors, and forecasts of economic, market or industry trends. This review process also entails an evaluation of our ability and intent to hold individual securities until they mature or full cost can be recovered.

The current economic environment and recent volatility of the securities markets increase the difficulty of assessing investment impairment and the same influences tend to increase the risk of potential impairment of these assets. Over time, the economic and market environment may provide additional insight regarding the fair value of certain securities, which could change our judgment regarding impairment. This could result in realized losses relating to other-than-temporary declines to be recorded as an expense. Given the current market conditions and the significant judgments involved, there is continuing risk that declines in fair value may occur and material other-than-temporary impairments may result in realized losses in future periods which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Unanticipated changes in our tax rates or exposure to additional income tax liabilities could affect our profitability.

We are subject to income taxes in the United States. Our effective tax rate could be adversely affected by changes in the mix of earnings in states with different statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in U.S. tax laws and regulations, and changes in our interpretations of tax laws, including pending tax law changes, such as the health care federal excise tax discussed above. In addition, we are subject to the routine examination of our income tax returns by the Internal Revenue Service and other local and state tax authorities. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our estimated income tax liabilities. Adverse outcomes from tax examinations could have a material adverse effect on our provision for income taxes, estimated income tax liabilities, or results of operations.

We are dependent on our executive officers and other key employees.

Our operations are highly dependent on the efforts of our executive officers. The loss of their leadership, knowledge, and experience could negatively impact our operations. Replacing many of our executive officers might be difficult or take an extended period of time because a limited number of individuals in the managed care industry have the breadth and depth of skills and experience necessary to operate and expand successfully a business such as ours. Our success is also dependent on our ability to hire and retain qualified management, technical, and medical personnel. It is critical that we recruit, manage, enable, and retain talent to successfully execute our strategic objections which requires aligned policies, a positive work environment, and a robust succession and talent development process. Further, particularly in light of the changing health care environment, we must focus on building employee capabilities to help ensure that we can meet upcoming challenges and opportunities. If we are unsuccessful in recruiting, retaining, managing, and enabling such personnel and are unable to meet upcoming challenges and opportunities, our operations could be negatively impacted.

We are subject to risks associated with outsourcing services and functions to third parties.

We contract with independent third party vendors and service providers who provide services to us and our subsidiaries or to whom we delegate selected functions. Our arrangements with third party vendors and service providers may make our operations vulnerable if those third parties fail to satisfy their obligations to us, including their obligations to maintain and protect the security and confidentiality of our information and data. In addition, we may have disagreements with third party vendors and service providers regarding relative responsibilities for any such failures under applicable business associate agreements or other applicable outsourcing agreements. Further, we may not be adequately indemnified against all possible losses through the terms and conditions of our contracts with third party vendors and service providers. Our outsourcing arrangements could be adversely impacted by changes in vendors' or service providers' operations or financial condition or other matters outside of our control. If we fail to adequately monitor and regulate the performance of our third party vendors and service providers, we could be subject to additional risk. Violations of, or noncompliance with, laws and/or regulations governing our business or noncompliance with contract terms by third party vendors and service providers could increase our exposure to liability to our members, providers, or other third parties, or sanctions and/or fines from the regulators that oversee our business. In turn, this could increase the costs associated with the operation of our business or have an adverse impact on our business and reputation. Moreover, if these vendor and service provider relationships were terminated for any reason, we may not be able to find alternative partners in a timely manner or on acceptable financial terms, and may incur significant costs in connection with any such vendor or service provider transition. As a result, we may not be able to meet the full demands of our customers and, in turn, our business, financial condition, or results of operations may be harmed. In addition, we may not

fully realize the anticipated economic and other benefits from our outsourcing projects or other relationships we enter into with third party vendors and service providers, as a result of regulatory restrictions on outsourcing, unanticipated delays in transitioning our operations to the third party, vendor or service provider noncompliance with contract terms or violations of laws and/or regulations, or otherwise. This could result in substantial costs or other operational or financial problems that could adversely impact our business, financial condition, cash flows, or results of operations.

An impairment charge with respect to our recorded goodwill, or our finite-lived intangible assets, could have a material impact on our financial results.

As of December 31, 2015, goodwill was $519 million, and intangible assets, net, were $122 million. Intangible assets are amortized generally on a straight-line basis over their estimated useful lives.

Goodwill represents the amount of the purchase price in excess of the fair values assigned to the underlying identifiable net assets of acquired businesses. Goodwill is not amortized, but is subject to an annual impairment test. Tests are performed more frequently if events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Our intangible assets are subject to impairment tests when events or circumstances indicate that a finite-lived intangible asset's (or asset group's) carrying value may not be recoverable.

The determination of the value of goodwill, and intangible assets, net, requires us to make estimates and assumptions about estimated asset lives, future business trends, and growth. Such evaluation is significantly impacted by estimates and assumptions of future revenues, costs and expenses, and other factors. If an event or events occur that would cause us to revise our estimates and assumptions used in analyzing the value of our goodwill, and intangible assets, net, such revision could result in a non-cash impairment charge that could have a material impact on our financial results.

We are subject to the risks of owning and leasing real property.

We are a tenant under numerous leases in multiple states, including a 25-year lease of an approximately 460,000 square foot office building housing our principal executive offices in Long Beach, California. We also own a 186,000 square-foot office building in Troy, Michigan, a 26,700 square-foot data center in Albuquerque, New Mexico, a 24,000 square-foot community clinic in Pomona, California, and 40 properties in Pennsylvania, which are primarily residential housing facilities. Accordingly, we are subject to all of the risks generally associated with leasing and owning real estate, which include, but are not limited to: the possibility of environmental contamination, the costs associated with fixing any environmental problems and the risk of damages resulting from such contamination; adverse changes in the value of the property due to interest rate changes, changes in the neighborhood in which the property is located, or other factors; ongoing maintenance expenses and costs of improvements; the possible need for structural improvements in order to comply with changes in zoning, seismic, disability act, or other requirements; inability to renew or enter into leases for space not utilized by us on commercially acceptable terms or at all; and possible disputes with neighboring owners or other individuals and entities.

Our substantial indebtedness could adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry, expose us to interest rate risk to the extent of any variable rate debt, and prevent us from meeting our our outstanding indebtedness.

We have a significant amount of indebtedness. As of December 31, 2015, our total indebtedness was approximately $1,609 million, including lease financing obligations. As of December 31, 2015, we also had $244 million available for borrowing under our revolving credit facility. Our substantial indebtedness could have significant consequences, including:

- increasing our vulnerability to adverse economic, industry, or competitive developments;
- requiring a substantial portion of our cash flows from operations to be dedicated to the payment of principal and interest on our indebtedness, therefore reducing our ability to use our cash flows to fund operations, make capital expenditures, and pursue future business opportunities;
- exposing us to the risk of increased interest rates to the extent of any future borrowings, including borrowings under the revolving credit facility, at variable rates of interest;
- making it more difficult for us to satisfy our obligations with respect to our indebtedness, including the revolving credit facility and our outstanding senior notes, and any failure to comply with the obligations of any of our debt instruments, including restrictive covenants and borrowing conditions, could result in an event of default under the indenture governing our outstanding senior notes and the agreements governing such other indebtedness;
- restricting us from making strategic acquisitions or causing us to make non-strategic divestitures;
- limiting our ability to obtain additional financing for working capital, capital expenditures, product and service development, debt service requirements, acquisitions, and general corporate or other purposes; and

- limiting our flexibility in planning for, or reacting to, changes in our business or market conditions and placing us at a competitive disadvantage compared to our competitors who are less highly leveraged and who, therefore, may be able to take advantage of opportunities that our substantial indebtedness may prevent us from exploiting.

Despite our high indebtedness level, we and our subsidiaries are able to incur substantial additional amounts of debt, including secured debt, which could further exacerbate the risks associated with our substantial indebtedness.

We and our subsidiaries may be able to incur substantial additional indebtedness in the future. Although the indentures governing our outstanding senior notes and the credit agreement governing the revolving credit facility contain restrictions on the incurrence of additional indebtedness, these restrictions are subject to a number of significant qualifications and exceptions, and under certain circumstances, the amount of indebtedness that could be incurred in compliance with these restrictions could be substantial. As of December 31, 2015, we had approximately $244 million available for additional borrowing under our revolving credit facility. In addition, the indentures governing our outstanding senior notes and the credit agreement governing our revolving credit facility do not prevent us from incurring obligations that do not constitute prohibited indebtedness thereunder. If new debt is added to our and our subsidiaries' existing debt levels, the related risks that we now face would increase.

The terms of our debt impose, and will impose, restrictions on us that may affect our ability to successfully operate our business and our ability to make payments on our outstanding senior notes.

The indentures governing our outstanding senior notes and the credit agreement governing the revolving credit facility contain various covenants that could materially and adversely affect our ability to finance our future operations or capital needs and to engage in other business activities that may be in our best interest. These covenants limit our ability to, among other things:

- incur additional indebtedness or issue certain preferred equity;
- pay dividends on, repurchase, or make distributions in respect of our capital stock, prepay, redeem, or repurchase certain debt or make other restricted payments;
- make certain investments;
- create certain liens;
- sell assets, including capital stock of restricted subsidiaries;
- enter into agreements restricting our restricted subsidiaries' ability to pay dividends to us;
- consolidate, merge, sell, or otherwise dispose of all or substantially all of our assets;
- enter into certain transactions with our affiliates; and
- designate our restricted subsidiaries as unrestricted subsidiaries.

All of these covenants may restrict our ability to expand or to pursue our business strategies. Our ability to comply with these covenants may be affected by events beyond our control, such as prevailing economic conditions and changes in regulations, and if such events occur, we cannot be sure that we will be able to comply. A breach of these covenants could result in a default under the indentures for our outstanding senior notes and/or the credit agreement governing the revolving credit facility including, as a result of cross default provisions and, in the case of the revolving credit facility permit the lenders to cease making loans to us. If there were an event of default under the indentures governing our outstanding senior notes and/or the credit agreement governing the revolving credit facility, holders of such defaulted debt could cause all amounts borrowed under these instruments to be due and payable immediately. Our assets or cash flow may not be sufficient to repay borrowings under our outstanding debt instruments in the event of a default thereunder.

In addition, the restrictive covenants in the credit agreement governing the revolving credit facility require us to maintain specified financial ratios and satisfy other financial condition tests. Our ability to meet those financial ratios and tests will depend on our ongoing financial and operating performance, which, in turn, will be subject to economic conditions and to financial, market, and competitive factors, many of which are beyond our control.

If our operating performance declines, we may be required to obtain waivers from the lenders under the revolving credit facility, from the holders of our outstanding senior notes or from the holders of other obligations, to avoid defaults thereunder. If we are not able to obtain such waivers, our creditors could exercise their rights upon default, and we could be forced into bankruptcy or liquidation.

We may not have the funds necessary to pay the amounts due upon conversion or required repurchase of our outstanding notes, and our indebtedness may contain limitations on our ability to pay the amounts due upon conversion or required repurchase.

In February 2013, we issued $550.0 million aggregate principal amount of 1.125% cash convertible senior notes due January 15, 2020, unless earlier repurchased or converted. We refer to these notes as our 1.125% Notes. In September 2014, we issued $301.6 million aggregate principal amount of 1.625% convertible senior notes due August 14, 2044, unless earlier repurchased, redeemed, or converted. We refer to these notes as our 1.625% Notes. As of December 31, 2015, the aggregate outstanding principal amount of our 1.125% Notes and our 1.625% Notes was $550 million and $302 million, respectively. Both our 1.125% Notes and our 1.625% Notes are convertible into cash prior to their respective maturity dates under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger. The 1.125% Notes met the stock price trigger in the quarter ended December 31, 2015, and are convertible to cash through at least March 31, 2016. Because the 1.125% Notes may be converted into cash within 12 months, the $448 million carrying amount is reported in current portion of long-term debt as of December 31, 2015. In addition, holders of our 1.625% Notes may convert their notes into cash during any calendar quarter (and only during such calendar quarter) if the last reported sales price of our common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to $75.51 per share. The last reported sale price of our common stock as reported on the New York Stock Exchange on February 23, 2016 was $62.28 per share. As of December 31, 2015, our 1.625% Notes were not convertible. If conversion requests are received, the settlement of the notes must be paid primarily in cash pursuant to the terms of the relevant indentures.

For economic reasons related to the trading market for our 1.125% Notes, we believe that the amount of the notes that may be converted over the next twelve months, if any, will not be significant. However, if the trading market for our 1.125% Notes becomes closed or restricted due to market turmoil or other reasons such that the notes cannot be traded, or if the trading price of our 1.125% Notes, which normally trade at a marginal premium to the underlying composite stock-and-interest economic value, no longer includes that marginal premium, holders of our 1.125% Notes may elect to convert the notes to cash. As of December 31, 2015, we had sufficient available cash, combined with borrowing capacity available under our revolving credit facility, to fund such conversions.

In addition, in the event of a change in control or the termination in trading of our stock, each holder of our 1.125% Notes and our 1.625% Notes would have the right to require us to purchase some or all of their notes at a purchase price in cash equal to 100% of the principal amount of the notes, plus any accrued and unpaid interest.

In the event of conversions or required repurchases, we may not have enough available cash or be able to obtain financing at the time we are required to comply with our conversion or repurchase obligations. In addition, our ability to comply with these obligations may be limited by law, by regulatory authority, or by agreements governing our future indebtedness. The indentures for the 1.125% Notes and the 1.625% Notes provide that it would be an event of default if we do not make the cash payments due upon conversion or required repurchase of the notes. The occurrence of an event of default under one or both of these indentures may also constitute an event of default under our revolving credit facility and under our other indebtedness we may have outstanding at such time. Any such default could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly.

Our borrowings under the revolving credit facility are at variable rates of interest and expose us to interest rate risk. If interest rates increase, our debt service obligations on the variable rate indebtedness could increase even though the amount borrowed remained the same, and our net income could decrease. The applicable margin with respect to the loan under the revolving credit facility is a percentage per annum equal to a reference rate plus the applicable margin. In order to manage our exposure to interest rate risk, in the future we may enter into derivative financial instruments, typically interest rate swaps and caps, involving the exchange of floating for fixed rate interest payments. If we are unable to enter into interest rate swaps, it may adversely affect our cash flow and may impact our ability to make required principal and interest payments on our indebtedness.

We may not be able to generate sufficient cash to service all of our indebtedness and may be forced to take other actions to satisfy our obligations under our indebtedness, which may not be successful.

Our ability to make scheduled payments on or to refinance our debt obligations depends on our financial condition and operating performance, which is subject to prevailing economic and competitive conditions and to certain financial, business, and other factors beyond our control. We may not be able to maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, and interest on our indebtedness.

If our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to reduce or delay investments and capital expenditures, or to sell assets, seek additional capital, or restructure or refinance our indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments, including the revolving credit facility, and the indentures governing our outstanding senior notes, may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest and principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our credit rating, which would harm our ability to incur additional indebtedness. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations.

A lowering or withdrawal of the ratings assigned to our debt securities by rating agencies may increase our future borrowing costs and reduce our access to capital.

Our debt currently has a non-investment grade rating, and there can be no assurance that any rating assigned by the rating agencies to our debt or our corporate rating will remain for any given period of time or that a rating will not be lowered or withdrawn entirely by a rating agency if, in that rating agency's judgment, future circumstances relating to the basis of the rating, such as adverse changes, so warrant. A lowering or withdrawal of the ratings assigned to our debt securities by rating agencies would likely increase our future borrowing costs and reduce our access to capital, which could have a materially adverse impact on our financial condition and results of operations.

Risks Related to Our Common Stock

Delaware law and our charter documents may impede or discourage a takeover, which could cause the market price of our common stock to decline.

We are a Delaware corporation, and the anti-takeover provisions of Delaware law impose various impediments to the ability of a third party to acquire control of us, even if a change in control would be beneficial to our existing stockholders. In addition, our board of directors or a committee thereof has the power, without stockholder approval, to designate the terms of one or more series of preferred stock and issue shares of preferred stock. The ability of our board of directors or a committee thereof to create and issue a new series of preferred stock and certain provisions of Delaware law and our certificate of incorporation and bylaws could impede a merger, takeover or other business combination involving us or discourage a potential acquirer from making a tender offer for our common stock, which, under certain circumstances, could reduce the market price of our common stock and the value of our convertible senior notes.

Members of the Molina family own a significant amount of our capital stock, decreasing the influence of other stockholders on stockholder decisions.

Members of the Molina family, either directly or as trustees or beneficiaries of Molina family trusts, in the aggregate owned or were entitled to receive upon certain events approximately 26% of our capital stock as of December 31, 2015. Our president and chief executive officer, as well as our chief financial officer, are members of the Molina family, and they are also on our board of directors. Because of the amount of their shareholdings, Molina family members, if they were to act as a group with the trustees of their family trusts, have the ability to significantly influence all matters submitted to stockholders for approval, including the election of directors, amendments to our charter, and any merger, consolidation, or sale of our company. A significant concentration of share ownership can also adversely affect the trading price for our common stock because investors often discount the value of stock in companies that have controlling stockholders. Furthermore, the concentration of share ownership in the Molina family could delay or prevent a merger or consolidation, takeover, or other business combination that could be favorable to our stockholders. Finally, the interests and objectives of the Molina family may be different from those of our company or our other stockholders, and they may vote their common stock in a manner that is contrary to the vote of our other stockholders.

Future sales of our common stock or equity-linked securities in the public market could adversely affect the trading price of our common stock and our ability to raise funds in new stock offerings.

We may issue equity securities in the future, or securities that are convertible into or exchangeable for, or that represent the right to receive, shares of our common stock. Sales of a substantial number of shares of our common stock or other equity securities, including sales of shares in connection with any future acquisitions, could be substantially dilutive to our stockholders. These sales may have a harmful effect on prevailing market prices for our common stock and our ability to raise additional capital in the financial markets at a time and price favorable to us. Moreover, to the extent that we issue restricted stock units, stock appreciation rights, options, or warrants to purchase our common stock in the future and those stock appreciation rights, options, or warrants are exercised or as the restricted stock units vest, our stockholders may experience further dilution. Holders of our shares of common stock have no preemptive rights that entitle holders to purchase a pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to

our stockholders. Our certificate of incorporation provides that we have authority to issue 150,000,000 shares of common stock and 20,000,000 shares of preferred stock. As of December 31, 2015, approximately 56,000,000 shares of common stock and no shares of preferred or other capital stock were issued and outstanding.

It may be difficult for a third party to acquire us, which could inhibit stockholders from realizing a premium on their stock price.

We are subject to the Delaware anti-takeover laws regulating corporate takeovers. These provisions may prohibit stockholders owning 15% or more of our outstanding voting stock from merging or combining with us. In addition, any change in control of our state health plans would require the approval of the applicable insurance regulator in each state in which we operate.

Our certificate of incorporation and bylaws also contain provisions that could have the effect of delaying, deferring, or preventing a change in control of our company that stockholders may consider favorable or beneficial. These provisions could discourage proxy contests and make it more difficult for our stockholders to elect directors and take other corporate actions. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions include:

- a staggered board of directors, so that it would take three successive annual meetings to replace all directors,
- prohibition of stockholder action by written consent, and
- advance notice requirements for the submission by stockholders of nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting.

In addition, changes of control are often subject to state regulatory notification, and in some cases, prior approval.

Item 1B: Unresolved Staff Comments

None.

Item 2: Properties

As of December 31, 2015, the Health Plans segment leased a total of 84 facilities, the Molina Medicaid Solutions segment leased a total of 12 facilities and the Other segment leased a total of 215 facilities. We own a 186,000 square-foot office building in Troy, Michigan and a 24,000 square-foot mixed use (office and clinic) facility in Pomona, California under our Health Plans segment. We own a 26,700 square-foot data center in Albuquerque, New Mexico and 40 properties in Pennsylvania, which are primarily residential housing facilities, under our Other segment. While we believe our current and anticipated facilities will be adequate to meet our operational needs for the foreseeable future, we are continuing to periodically evaluate our employee and operations growth prospects to determine if additional space is required, and where it would be best located.

Item 3: Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

State of Louisiana v. Molina Medicaid Solutions et al. On June 26, 2014, the state of Louisiana filed a Petition for Damages against Molina Medicaid Solutions, Molina Healthcare, Inc., Unisys Corporation, and Paramax Systems Corporation, a subsidiary of Unisys, in the Parish of Baton Rouge, 19th Judicial District, versus number 631612. The Petition alleges that between 1989 and 2012, the defendants utilized an incorrect reimbursement formula for the payment of pharmaceutical claims. The petitioner seeks actual damages to be proved at trial, plus interest. We believe we have several meritorious defenses to the claims of the state, and any liability for the alleged claims is not currently probable or reasonably estimable.

United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al. On or around October 14, 2014, Molina Healthcare of California, Molina Healthcare of California Partner Plan, Inc., Mobile Medical Examination Services, Inc. (MedXM), and other health plan defendants were served with a Complaint previously filed under seal in the Central District Court of California by Relator, Anita Silingo, Case No. SACV13-1348-FMO(SHx). The Complaint alleges that MedXM improperly modified medical records and otherwise took inappropriate steps to increase members' risk adjustment scores, and that the defendants, including Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc., purportedly turned a "blind eye" to these unlawful practices. The relator seeks treble damages in the amount of $3 billion, plus interest and penalties. The Department of Justice has declined to intervene. The District Court dismissed this action as to Molina without leave to amend as to some allegations and with leave to amend as to other allegations. On October 22, 2015, the Relator filed a third amended complaint. We believe that we have several meritorious defenses to the claims of the Relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

Item 4: Mine Safety Disclosures

None.

PART II

Item 5: Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is listed on the New York Stock Exchange under the trading symbol "MOH." As of February 23, 2016, there were approximately 120 holders of record of our common stock. The high and low intra-day sales prices of our common stock for specified periods are set forth below:

	High	Low
2015		
First Quarter	$ 67.58	$ 49.37
Second Quarter	$ 73.98	$ 57.35
Third Quarter	$ 82.37	$ 65.72
Fourth Quarter	$ 70.82	$ 55.49
2014		
First Quarter	$ 39.21	$ 32.41
Second Quarter	$ 46.17	$ 32.86
Third Quarter	$ 48.03	$ 39.23
Fourth Quarter	$ 54.57	$ 40.79

Dividends

To date we have not paid cash dividends on our common stock. We currently intend to retain any future earnings to fund our projected business growth. However, we intend to periodically evaluate our cash position to determine whether to pay a cash dividend in the future.

Our ability to pay dividends is partially dependent on, among other things, our receipt of cash dividends from our regulated subsidiaries. The ability of our regulated subsidiaries to pay dividends to us is limited by the state departments of insurance in the states in which we operate or may operate, as well as requirements of the government-sponsored health programs in which we participate. Additionally, the indentures governing our outstanding senior notes and the credit agreement governing the revolving credit facility contain various covenants that limit our ability to pay dividends on our common stock.

Any future determination to pay dividends will be at the discretion of our board of directors and will depend upon, among other factors, our results of operations, financial condition, capital requirements and contractual and regulatory restrictions. For more information regarding restrictions on the ability of our regulated subsidiaries to pay dividends to us, please see Item 7 of this Form 10-K, Management's Discussion and Analysis of Financial Condition and Results of Operations, in "Liquidity and Capital Resources," under the subheading "Regulatory Capital and Dividend Restrictions."

Unregistered Issuances of Equity Securities

None.

Stock Repurchase Programs

Securities Repurchases and Repurchase Programs. Effective as of December 16, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock or senior notes. This newly authorized repurchase program extends through December 31, 2016.

Purchases of common stock made by or on behalf of the Company during the quarter ended December 31, 2015, including shares withheld by the Company to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (1)	Average Price Paid per Share (1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs (2)
October 1 — October 31	94	$ 66.79	—	$ 50,000,000
November 1 — November 30	576	$ 62.00	—	$ 50,000,000
December 1 — December 31	104,222	$ 59.15	—	$ 50,000,000
	104,892	$ 59.17	—	

(1) During the quarter we withheld 104,892 shares of common stock under our 2011 Equity Incentive Plan to settle our employees' income tax obligations.

(2) Effective as of February 25, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. This repurchase program expired December 31, 2015.

STOCK PERFORMANCE GRAPH

The following graph and related discussion are being furnished solely to accompany this Annual Report on Form 10-K pursuant to Item 201(e) of Regulation S-K and shall not be deemed to be "soliciting materials" or to be "filed" with the SEC (other than as provided in Item 201) nor shall this information be incorporated by reference into any future filing under the Securities Act or the Exchange Act, whether made before or after the date hereof and irrespective of any general incorporation language contained therein, except to the extent that the Company specifically incorporates it by reference into a filing.

The following line graph compares the percentage change in the cumulative total return on our common stock against the cumulative total return of the Standard & Poor's Corporation Composite 500 Index (S&P 500) and a peer group index for the five-year period from December 31, 2010 to December 31, 2015. The comparison assumes $100 was invested on December 31, 2010, in the Company's common stock and in each of the foregoing indices and assumes reinvestment of dividends. The stock performance shown on the graph below represents historical stock performance and is not necessarily indicative of future stock price performance.

The peer group index consists of Brookdale Senior Living, Inc. (BKD), Catamaran Corporation (CTRX), Centene Corporation (CNC), Community Health Systems, Inc. (CYH), DaVita HealthCare Partners, Inc. (DVA), Health Net, Inc. (HNT), Kindred Healthcare, Inc. (KND), Laboratory Corporation of America Holdings (LH), Life Point Hospitals, Inc. (LPNT), Magellan Health, Inc. (MGLN), Omnicare, Inc. (OCR), Quest Diagnostics, Inc. (DGX), Select Medical Holdings Corporation (SEM), Team Health Holdings, Inc. (TMH), Tenet Healthcare Corporation (THC), Universal American Corporation (UAM), Universal Health Services, Inc. (UHS) and WellCare Health Plans, Inc. (WCG).

Item 6. Selected Financial Data

SELECTED FINANCIAL DATA

We derived the following selected consolidated financial data (other than the data under the caption "Operating Statistics, Continuing Operations") for the five years ended December 31, 2015 from our audited consolidated financial statements. You should read the data in conjunction with our consolidated financial statements, related notes and other financial information included herein. All dollar amounts are presented in millions, except per-share data. The data under the caption "Operating Statistics, Continuing Operations" has not been audited.

	Year Ended December 31,				
	2015 (1)	2014	2013	2012	2011

Balance Sheet Data:					
Cash and cash equivalents	$ 2,329	$ 1,539	$ 936	$ 796	$ 494
Total assets [7]	6,576	4,435	2,988	1,901	1,631
Long-term debt, including current maturities [7] [8]	1,609	887	770	261	216
Total liabilities [7]	5,019	3,425	2,095	1,119	876
Stockholders' equity	1,557	1,010	893	782	755

(1) Service revenue and cost of service revenue include revenue and costs generated by our Pathways subsidiary, which was acquired on November 1, 2015.

(2) Income (loss) from discontinued operations is presented net of income tax expense (benefit), which was insignificant in 2015 and 2014, and $(10), and $(1), and $1, in 2013, 2012 and 2011, respectively.

(3) Source data for calculations in thousands.

(4) Medical care ratio represents medical care costs as a percentage of premium revenue. The medical care ratio is a key operating indicator used to measure our performance in delivering efficient and cost effective health care services. Changes in the medical care ratio from period to period result from changes in Medicaid funding by the states, utilization of medical services, our ability to effectively manage costs, contract changes, and changes in accounting estimates related to incurred but not paid claims. See Item 7 in this Form 10-K, "Management's Discussion and Analysis of Financial Condition and Results of Operations," for further discussion.

(5) Computed as a percentage of total revenue.

(6) Number of members at end of period.

(7) We have reclassified certain amounts in prior periods to conform to the 2015 presentation. Specifically, deferred issuance costs relating to our senior notes are now reported as a direct deduction of the applicable debt liabilities. Additionally, aggregate deferred income taxes are now reported as non-current. Both reclassifications are a result of recently adopted accounting pronouncements. See Item 8 in this Form 10-K, "Financial Statements and Supplementary Data," for further discussion.

(8) Includes senior notes, lease financing obligations, and other long-term debt.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition and results of operations should be read in conjunction with Items 6 and 8 of this Form 10-K, Selected Financial Data, and Financial Statements and Supplementary Data, respectively. This discussion contains forward-looking statements that involve known and unknown risks and uncertainties, including those set forth in Part I, Item 1A of this Form 10-K, Risk Factors.

Overview

Molina Healthcare, Inc. provides quality health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments include our Health Plans and Molina Medicaid Solutions segments, which comprise the vast majority of our operations, and our Other segment. As of December 31, 2015, we changed our reporting structure as a result of the Pathways acquisition in November 2015, which is reported in Other.

Our Health Plans segment consists of health plans in 11 states and the Commonwealth of Puerto Rico, and includes our direct delivery business. As of December 31, 2015, these health plans served over 3.5 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve Health Insurance Marketplace members, most of whom receive government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in several states in which we operate.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

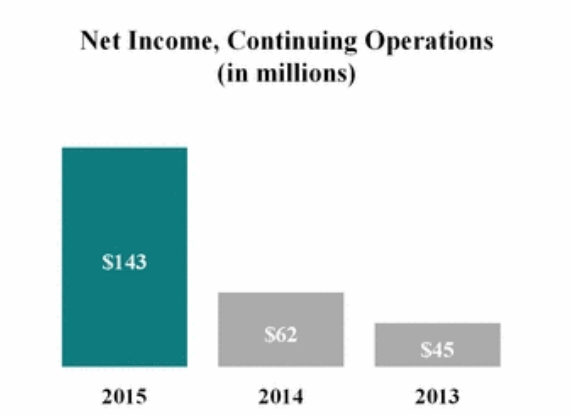
Our Other segment includes other businesses, such as our Pathways behavioral health and social services provider, that do not meet the quantitative thresholds for a reportable segment as defined by U.S. generally accepted accounting principles (GAAP), as well as corporate amounts not allocated to other reportable segments.

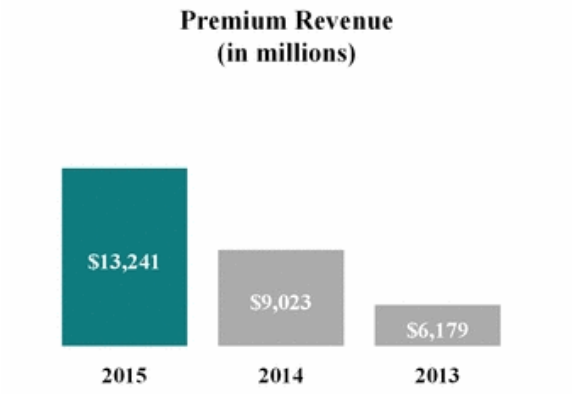
Refer to Part II, Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 2, "Significant Accounting Policies," for a comprehensive description of our Health Plans and Molina Medicaid Solutions revenues and costs, and how we recognize them.We report revenue and costs attributable to Pathways as service revenue and cost of service revenue, respectively.

Beginning in 2013, after our Medicaid contract with the state of Missouri expired, we have reported the results relating to the Missouri health plan as discontinued operations for all periods presented. The following discussion and analysis, with the exception of cash flow information, is presented in the context of continuing operations unless otherwise noted.

Fiscal Year 2015 Financial Highlights

- Earnings per diluted share nearly doubled in 2015 when compared with 2014, while net income more than doubled. Substantial increases in revenue, along with improved operating efficiency, were responsible for our improved performance. Our after-tax margin increased to 1.0% in 2015 from 0.6% in 2014.
- Strong enrollment growth across all of our programs, combined with a 5% increase in premium revenue per member, generated over $4 billion, or 47%, more premium revenue in 2015 compared with 2014.
- Medical care costs as a percentage of premium revenue (the "medical care ratio") decreased to 89.1% in 2015, from 89.5% in 2014.
- General and administrative expenses as a percentage of revenue (the "general and administrative expense ratio") increased slightly to 8.1% in 2015, versus 7.9% in 2014, primarily as a result of dramatic growth in our Marketplace membership. Excluding Marketplace broker and exchange fees from both years, the general and administrative expense ratio decreased to 7.5% in 2015 from 7.9% in 2014.
- Debt and equity financing transactions generated net cash of $1,062 million.





Market Updates—Health Plans

Medicare-Medicaid Plans. To coordinate care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to deliver services to these individuals in a more financially efficient manner, some states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual eligible individuals. The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). We operate MMPs in six states. Our MMPs in California, Illinois, and Ohio offered coverage beginning in 2014; our MMPs in South Carolina and Texas offered coverage beginning in the first quarter of 2015; and our MMP in Michigan offered coverage beginning in the second quarter of 2015. At December 31, 2015, our membership included approximately 51,000 integrated MMP members.

Florida. On November 1, 2015, our Florida health plan closed on its acquisition of the Medicaid contracts, and certain assets related to operation of the Medicaid business, of Integral Health Plan, Inc.

On August 1, 2015, our Florida health plan closed on its acquisition of the Medicaid contracts, and certain assets related to the operation of the Medicaid business, of Preferred Medical Plan, Inc.

Illinois. On January 1, 2016, our Illinois health plan closed on its acquisition of the Medicaid membership, and certain assets related to the Medicaid business of, Accountable Care Chicago, LLC, also known as MyCare Chicago. We assumed approximately 58,000 Medicaid members in this acquisition.

On January 1, 2016, our Illinois health plan closed on its acquisition of the Medicaid membership, and certain assets related to the Medicaid business, of Loyola Physician Partners, LLC. We assumed approximately 21,000 Medicaid members in this acquisition.

On November 30, 2015, we announced that our Illinois health plan entered into an agreement to assume the membership and certain Medicaid assets of Better Health Network, LLC (Better Health). As of November 30, 2015, Better Health served approximately 40,000 members in the Medicaid Family Health program in Cook County. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the first half of 2016.

Michigan. On January 1, 2016, our Michigan health plan closed on its acquisition of the Medicaid and MIChild membership, and certain Medicaid and MIChild assets, of HAP Midwest Health Plan, Inc. We assumed approximately 81,000 Medicaid and MIChild members in this acquisition.

In October 2015, the Michigan Department of Health and Human Services announced that Molina Healthcare of Michigan was recommended to serve the state's Medicaid members under Michigan's Comprehensive Health Plan, which commenced on January 1, 2016. The new contract has a five-year term with three one-year extensions, and covers Regions 2 through 6, and 8 through 10 of the state, representing an expansion into 18 additional counties compared with the previous Michigan Medicaid contract.

On September 1, 2015, our Michigan health plan closed on its acquisition of the Medicaid and MIChild contracts, and certain provider agreements, of HealthPlus of Michigan and its subsidiary, HealthPlus Partners, Inc.

Puerto Rico. Effective April 1, 2015, our Puerto Rico health plan served its first members. As of December 31, 2015, our Puerto Rico plan enrollment amounted to approximately 348,000 members.

Washington. In November 2015, our Washington health plan was selected by the Washington State Health Care Authority (HCA) to negotiate and enter into managed care contracts for the Southwest region of the state's Apple Health Fully Integrated Managed Care Program. The start date is scheduled for April 1, 2016.

On January 1, 2016, our Washington health plan closed on its acquisition of the Medicaid membership and certain Medicaid assets of Columbia United Providers, Inc. We assumed approximately 57,000 Medicaid members in this acquisition.

Market Update—Molina Medicaid Solutions

New Jersey. On April 9, 2015, the state of New Jersey announced its selection of Molina Medicaid Solutions to design and operate that state's new Medicaid management information system (MMIS). The new contract was effective May 1, 2015, and has a term of 10 years with three one-year renewal options. Molina Medicaid Solutions was the state's incumbent MMIS provider, and was awarded the new contract as a result of Molina Medicaid Solutions' submission in response to the state of New Jersey's request for proposals.

Market Update—Other

Pathways. On November 1, 2015, we acquired all of the outstanding ownership interests in Pathways Health and Community Support LLC (Pathways), formerly known as Providence Human Services, LLC. Pathways is one of the largest national providers of accessible, outcome-based behavioral/mental health and social services with operations in 23 states and the District of Columbia.

Financial Performance Summary

The following table summarizes our financial and operating performance from continuing operations for the years ended December 31, 2015, 2014, and 2013. All dollar amounts are presented in millions, except per-share data.

	Year Ended December 31,			Year Ended December 31,		
	2015	2014	% Change	2014	2013	% Change
Revenue:						
Premium revenue	$ 13,241	$ 9,023	46.7 %	$ 9,023	$ 6,179	46.0 %

Income tax expense	179	73	145.2	73	36	102.8
Income from continuing operations	$ 143	$ 62	130.6 %	$ 62	$ 45	37.8 %
Diluted net income per share, continuing operations (1)	$ 2.58	$ 1.30	98.5 %	$ 1.30	$ 0.96	35.4 %
Diluted weighted average shares outstanding	56	48	16.7 %	48	47	2.1 %
Non-GAAP Measures: (2)						
Adjusted net income per share, continuing operations (1)(3)	$ 3.11	$ 1.93	61.1 %	$ 1.93	$ 1.55	24.5 %
EBITDA	$ 508	$ 305	66.6 %	$ 305	$ 225	35.6 %
Operating Statistics: (1)						
Medical care ratio (4)	89.1%	89.5%		89.5%	87.1%	
Service revenue ratio (5)	76.4%	74.6%		74.6%	79.0%	
General and administrative expense ratio (6)	8.1%	7.9%		7.9%	10.1%	
Premium tax ratio (4)	2.9%	3.2%		3.2%	2.7%	
Effective tax rate	55.5%	53.8%		53.8%	44.8%	
Net profit margin (6)	1.0%	0.6%		0.6%	0.7%	

(1) Source data for calculations of per-share amounts and ratios in thousands.
(2) See reconciliation of non-GAAP financial measures to U.S. GAAP below.
(3) Effective January 1, 2016, we will no longer exclude amortization of convertible notes and lease financing obligations from our presentation of adjusted net income and adjusted net income per share. We made this change because various capital transactions that we completed in 2015 reduced our relative reliance on convertible notes and lease financing as sources of capital. We believe that this change will enhance the comparability of these non-GAAP measures with the corresponding non-GAAP measures used by our competitors.
(4) Medical care ratio represents medical care costs as a percentage of premium revenue; premium tax ratio represents premium tax expenses as a percentage of premium revenue plus premium tax revenue.
(5) Service revenue ratio represents cost of service revenue as a percentage of service revenue.
(6) Computed as a percentage of total revenue.

The following tables set forth our Health Plans segment membership as of the dates indicated:

	As of December 31,		
	2015	2014	2013
Ending Membership by Health Plan:			
California	620,000	531,000	368,000
Florida	440,000	164,000	89,000
Illinois	98,000	100,000	4,000
Michigan	328,000	242,000	213,000
New Mexico	231,000	212,000	168,000
Ohio	327,000	347,000	255,000
Puerto Rico (1)	348,000	—	—
South Carolina (2)	99,000	118,000	—
Texas	260,000	245,000	252,000
Utah	102,000	83,000	86,000
Washington	582,000	497,000	403,000
Wisconsin	98,000	84,000	93,000
	3,533,000	2,623,000	1,931,000
Ending Membership by Program:			
Temporary Assistance for Needy Families (TANF), CHIP (3)	2,312,000	1,809,000	1,603,000
Medicaid Expansion (4)	557,000	385,000	—
Aged, Blind or Disabled (ABD)	366,000	347,000	289,000
Marketplace (4)	205,000	15,000	—
Medicare-Medicaid Plan (MMP) – Integrated (5)	51,000	18,000	—
Medicare Special Needs Plans (Medicare)	42,000	49,000	39,000
	3,533,000	2,623,000	1,931,000

(1) Our Puerto Rico health plan began serving members effective April 1, 2015.

(2) Our South Carolina health plan began serving members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014.

(3) CHIP stands for Children's Health Insurance Program.

(4) Medicaid expansion membership phased in, and the Marketplace became available for consumers to access coverage, beginning January 1, 2014.

(5) MMP members who receive both Medicaid and Medicare coverage from Molina Healthcare.

Non-GAAP Financial Measures

We use the following non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance and the performance of other companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not substitutes for or superior to, GAAP measures.

The first of these non-GAAP measures is earnings before interest, taxes, depreciation and amortization, or EBITDA. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to EBITDA. The increases in EBITDA for both 2015 over 2014, and 2014 over 2013, were due primarily to increased net income and income taxes. The increases for both of these items are described below in Results of Operations, in the components of net income.

	Year Ended December 31,		
	2015	2014	2013
	(In millions)		
Net income	$ 143	$ 62	$ 53
Adjustments:			
Depreciation, and amortization of intangible assets and capitalized software	120	114	94
Interest expense	66	57	52
Income tax expense	179	72	26
EBITDA	$ 508	$ 305	$ 225

The second of these non-GAAP measures is adjusted net income and adjusted net income per diluted share, continuing operations. The following tables reconcile net income and net income per diluted share from continuing operations, which we believe to be the most comparable GAAP measures, to adjusted net income and adjusted net income per diluted share, continuing operations. The increases in adjusted net income and adjusted net income per diluted share for both 2015 over 2014, and 2014 over 2013, were due primarily to increased net income. Such increases are described below in Results of Operations, in the components of net income.

	Year Ended December 31,					
	2015		2014		2013	
	(In millions, except diluted per-share amounts)					
Net income, continuing operations	$ 143	$ 2.58	$ 62	$ 1.30	$ 45	$ 0.96
Adjustments, net of tax:						
Amortization of convertible senior notes and lease financing obligations	19	0.33	17	0.36	14	0.31
Amortization of intangible assets	11	0.20	13	0.27	13	0.28
Adjusted net income per diluted share, continuing operations (1)(2)	$ 173	$ 3.11	$ 92	$ 1.93	$ 72	$ 1.55

(1) Beginning in the first quarter of 2015, we revised the calculation of adjusted net income, continuing operations. We no longer subtract "depreciation, and amortization of capitalized software" and "share-based compensation" from net income, continuing operations to arrive at adjusted net income, continuing operations. We have made this change to better reflect how we evaluate financial performance, make financing and business decisions, and forecast and plans for future periods. All periods presented conform to this presentation.

(2) Effective January 1, 2016, we will no longer exclude amortization of convertible notes and lease financing obligations from our presentation of adjusted net income and adjusted net income per share. We made this change because various capital transactions that we completed in 2015 reduced our relative reliance on convertible notes and lease financing as sources of capital. We believe that this change will enhance the comparability of these non-GAAP measures with the corresponding non-GAAP measures used by our competitors.

Results of Operations, Continuing Operations

As described above, as of December 31, 2015, we changed our reporting structure as a result of the Pathways acquisition in November 2015. The following table presents gross margin as the appropriate earnings measure for our reportable segments, based on how our chief operating decision maker currently reviews results, assesses performance, and allocates resources.

Gross margin for our Health Plans segment is referred to as "Medical margin," and for our Molina Medicaid Solutions and Other segments, as "Service margin." Medical margin represents the actual dollars earned by the Health Plans segment after medical costs are deducted from premium revenue. The medical care ratio represents the amount of medical care costs as a percentage of premium revenue. One of the key metrics used to assess the performance of the Health Plans segment is the medical care ratio; therefore, the underlying medical margin is the most important measure of earnings reviewed by the chief operating decision maker. The service margin is equal to service revenue minus cost of service revenue.

	Year Ended December 31,		
	2015	2014	2013
	(In millions)		
Health Plans:			
Premium revenue	$ 13,241	$ 9,023	$ 6,179
Less: medical care costs	11,794	8,076	5,380
Medical margin	$ 1,447	$ 947	$ 799

Health Plans Segment

Premium Revenue. Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate, and, to a lesser degree, from Medicare contracts entered into with the Centers for Medicare and Medicaid Services (CMS), a federal government agency.

2015 Compared with 2014

In 2015, a 42% increase in membership and a 5% increase in revenue PMPM resulted in increased premium revenue of 47%, or over $4.2 billion, when compared with 2014.

Enrollment growth was primarily due to increased Medicaid expansion, Marketplace and integrated Medicare-Medicaid Plan (MMP) enrollment, and the start-up of the Puerto Rico health plan in April 2015.

2014 Compared with 2013

In 2014, premium revenue increased 46% over 2013, due to a 28% increase in membership, and an 18% increase in revenue PMPM.

Enrollment growth was primarily due to Medicaid expansion program membership added as a result of the Affordable Care Act, and membership added at our South Carolina and Illinois health plans. Higher PMPM premium revenue was primarily the result of the inclusion of long-term services and supports (LTSS) benefits in various Medicaid managed care programs in California, Florida, Illinois, New Mexico, and Ohio.

Premiums by Program. The amount of the premiums paid to us may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program, on a per-member per-month basis for the year ended December 31, 2015. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	PMPM Premiums		
	Low	High	Consolidated
TANF, CHIP	$ 120.00	$ 280.00	$ 180.00
Medicaid Expansion	310.00	500.00	410.00
ABD	470.00	1,470.00	970.00
Marketplace	180.00	400.00	250.00
MMP – Integrated	1,170.00	3,220.00	2,030.00
Medicare	900.00	1,110.00	1,040.00

Medical Care Costs. Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Estimates" below, and Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 11, "Medical Claims and Benefits Payable," for further information on how we estimate such liabilities.

2015 Compared with 2014

Our medical margin increased nearly 53% in 2015 over 2014, and our consolidated medical care ratio decreased to 89.1% in 2015 from 89.5% in 2014.

2014 Compared with 2013

Although medical margin increased nearly 20% in 2014 over 2013, our consolidated medical care ratio increased to 89.5% in 2014 from 87.1% in 2013.

The medical care ratio increased substantially in 2014 as a result of three developments:

- Much of our revenue growth has come from participation in Medicaid programs covering LTSS. Percentage profit margins for LTSS benefits are generally lower than percentage profit margins for acute medical benefits.
- Increases to our base premiums in recent years have not kept pace with medical cost trends.
- Lack of coordination in the design of profit caps and medical cost floors in some of our state Medicaid contracts is resulting in counterproductive outcomes. In some instances, givebacks due to profitable performance in one program cannot be offset against losses in other programs.

Medical Care Costs by Category. The following table provides the details of consolidated medical care costs by category for the periods indicated (dollars in millions except PMPM amounts):

	Year Ended December 31,								
	2015			2014			2013		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 8,572	$ 218.35	72.7%	$ 5,673	$ 202.87	70.2%	$ 3,612	$ 160.43	67.1%
Pharmacy	1,610	41.01	13.7	1,273	45.54	15.8	935	41.54	17.4

Direct delivery	128	3.26	1.1	96	3.44	1.2	48	2.14	0.9
Other	502	12.79	4.2	286	10.22	3.5	181	8.05	3.4
	$ 11,794	$ 300.43	100.0%	$ 8,076	$ 288.84	100.0%	$ 5,380	$ 238.99	100.0%

Financial Performance by Program. The following table presents the components of premium revenue and medical care costs by program.

	Year Ended December 31, 2015 (1)						
	Member Months[2]	Premium Revenue		Medical Care Costs		MCR[3]	Medical Margin
		Total	PMPM	Total	PMPM		
TANF and CHIP	25.5	$ 4,483	$ 175.64	$ 4,122	$ 161.50	92.0%	$ 361
Medicaid Expansion	5.9	2,389	408.51	1,931	330.18	80.8	458
ABD	4.3	4,124	966.83	3,784	887.27	91.8	340
Marketplace	2.6	652	251.96	481	185.85	73.8	171
MMP	0.5	1,063	2,034.51	974	1,863.93	91.6	89
Medicare	0.5	530	1,038.15	502	982.50	94.6	28
	39.3	$ 13,241	$ 337.28	$ 11,794	$ 300.43	89.1%	$ 1,447

(1) Year ended December 31, 2014 and 2013 data not presented due to lack of comparability.
(2) A member month is defined as the aggregate of each month's ending membership for the period presented.
(3) "MCR" represents medical costs as a percentage of premium revenue.

Financial Performance by State Health Plan. The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by state health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

	Year Ended December 31, 2015						
	Member Months	Premium Revenue		Medical Care Costs		MCR	Medical Margin
		Total	PMPM	Total	PMPM		
California	7.1	$ 2,200	$ 310.89	$ 1,926	$ 272.22	87.6%	$ 274
Florida	4.1	1,199	289.85	1,081	261.49	90.2	118
Illinois	1.2	397	328.93	367	303.72	92.3	30

(1) Our Puerto Rico health plan began serving members effective April 1, 2015. Our South Carolina health plan began serving members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014.
(2) "Other" medical care costs include primarily medically related administrative costs of the parent company, and direct delivery costs.

Individual Health Plan Analysis

2015 Compared with 2014

California. Premium revenue grew $677 million, or 44%, in 2015 compared with 2014, the result of higher membership. Overall, enrollment on a member-month basis increased 31% in 2015 compared with 2014. Increased premium revenue was also driven by a 15% increase in premium revenue PMPM, which was the result of the higher relative premium revenue PMPM among those programs experiencing enrollment growth (Medicaid expansion and MMP); and the addition of long-term care benefits to some of the California health plan's Medicaid membership. The medical care ratio increased to 87.6% in 2015, from 83.3% in 2014. During 2014, the plan benefited from the recognition of approximately $23 million in premium revenue and medical margin that related to 2013, as a result of certain programmatic changes implemented by the state of California. Absent this benefit, the medical care ratio of the California plan would have been 84.6% in 2014.

Florida. Premium revenue grew to $1,199 million in 2015, from $439 million in 2014, due to increased Marketplace membership. The medical care ratio decreased to 90.2% in 2015, from 95.5% in 2014, due to the lower medical care ratio of the Marketplace membership more than offsetting an increase in the medical care ratio for the Medicaid program.

Illinois. Premium revenue grew to $397 million in 2015, from $153 million in 2014, due to significant membership growth in late 2014. The medical care ratio increased to 92.3% in 2015, from 91.7% in 2014.

Michigan. Premium revenue grew $286 million, or 37%, in 2015 compared with 2014, due to increased Medicaid expansion membership and the startup of the MMP program. The medical care ratio of 84.6% for 2015 was unchanged from 2014.

New Mexico. Premium revenue grew $161 million, or 15%, in 2015 compared with 2014, due to substantial increases in membership in all Medicaid programs. The medical care ratio decreased to 89.4% in 2015, from 92.6% in 2014, due to improved profitability for the ABD and Medicaid expansion programs.

Ohio. Premium revenue grew $481 million, or 31%, in 2015 compared with 2014, due to growth in membership within the Medicaid expansion, and MMP programs. The medical care ratio decreased to 84.4% in 2015, from 86.0% in 2014, due to lower medical care ratios in these newer programs, as well as ABD.

Puerto Rico. The Puerto Rico health plan began serving members on April 1, 2015, and finished the year with a medical care ratio of 89.1%. See further discussion below, under *Financial Condition*, regarding the Commonwealth of Puerto Rico.

South Carolina. The medical care ratio decreased to 79.8% in 2015, from 84.7% in 2014. We believe that medical care ratios below 80% are not sustainable over time, and that the performance of the South Carolina health plan in 2014 is more representative of its likely long-term performance than are its financial results for 2015.

Texas. Premium revenue grew $643 million, or 49%, in 2015 compared with 2014, primarily due to the addition of ABD members receiving nursing facility benefits effective March 1, 2015, and the start-up of the Texas MMP program on that date. The medical care ratio increased to 92.3% in 2015, from 90.8% in 2014, primarily as a result of lower percentage margins on premiums to support nursing home services. As previously disclosed, we are unable to recognize certain quality related revenue in Texas because we do not have historical information, clear definitions, and clarity around minimum standards.

Utah. The medical care ratio of the Utah health plan decreased to 90.6% in 2015, from 92.2% in 2014, primarily due to improved financial performance of the plan's Medicare program.

Washington. Premium revenue grew $297 million, or 23%, in 2015 when compared with 2014, primarily due to growth in Medicaid expansion membership. The medical care ratio decreased to 91.7% in 2015, from 93.4% in 2014, as a lower medical care ratio for the ABD program more than offset a higher medical care ratio in the TANF and Medicaid expansion programs.

Wisconsin. Premium revenue grew $105 million, or 67%, in 2015 compared with 2014 as a result of increased Marketplace enrollment. The medical care ratio decreased to 82.4% in 2015, from 86.8% in 2014, primarily as a result of improvement in the financial performance of the Wisconsin health plan's Medicaid program.

2014 Compared with 2013

California. The medical care ratio for the California health plan decreased significantly to 83.3% in 2014 from 88.9% in 2013. Additionally, medical margin improved $171 million when compared with 2013. This improvement was the result of higher enrollment, primarily due to the addition of approximately 107,000 Medicaid expansion members; and premium increases effective October 1, 2013 (2.5%), and July 1, 2014 (5.5%). During 2014, the plan benefited from the recognition of approximately $23 million in premium revenue and medical margin that related to 2013 as a result of certain programmatic changes implemented by the state of California. In 2013, the plan recognized approximately $32 million of premium revenue related to 2012 and earlier years as a result of retroactive rate increases from the state of California. The plan served its first MMP members in 2014.

Florida. Due to the re-procurement undertaken by the Florida Agency for Health Care Administration starting in 2014, the Florida health plan transitioned many of its members to other health plans in the second quarter of 2014, and then added approximately 105,000 members in the second half of 2014, both from the addition of new service areas and through acquisitions. Although revenue increased approximately 66% at the plan for the year ended December 31, 2014, when compared with 2013, profitability fell in 2014. The higher medical care costs were the result of 1) the assumption of risk for LTSS benefits for certain members effective December 2013 (as noted above percentage profit margins for LTSS benefits are generally less than those for other benefits); and 2) our inability to recognize revenue related to a rate increase effective September 1, 2014, as a result of those rates not being finalized prior to year end.

Illinois. The medical care ratio for the Illinois health plan decreased to 91.7% in 2014, from 96.9% in 2013. The plan experienced significant growth in 2014; enrollment increased approximately 96,000 members overall, with 78,000 members added in the fourth quarter alone. This growth occurred primarily within the traditional TANF program, and to a lesser degree within the Medicaid expansion program. The Illinois health plan served its first MMP members in 2014.

Michigan. The medical care ratio of the Michigan health plan was consistent year over year, at 84.6% in 2014, compared with 84.4% in 2013.

New Mexico. Premium revenue at the New Mexico health plan increased 141% for 2014 compared with 2013, primarily as a result of the addition of Medicaid behavioral health and LTSS benefits effective January 1, 2014, and the addition of approximately 54,000 Medicaid expansion members during the course of 2014. The medical care ratio of the plan increased to 92.6% in 2014, from 86.1% in 2013. The higher medical care ratio was the result of: 1) the assumption of risk for LTSS benefits effective January 1, 2014; and 2) premium rates effective January 1, 2014 that did not keep pace with the increase in medical costs in 2014.

Ohio. The medical care ratio of the Ohio health plan increased to 86.0% in 2014, from 84.2% in 2013, primarily due to the increase in Medicaid expansion enrollment (which is incurring a medical care ratio slightly in excess of the plan's traditional experience), and the initiation of the Ohio MMP.

South Carolina. The South Carolina health plan began serving members on January 1, 2014, and finished the year with a medical care ratio of 84.7%.

Texas. Financial performance at the Texas health plan declined in 2014, when compared with 2013. The medical care ratio of the Texas health plan increased to 90.8% in 2014, from 86.4% in 2013. Our inability to recognize a portion of the plan's quality

revenue reduced income before taxes by approximately $26 million, or $0.33 per diluted share, for the year ended December 31, 2014. Approximately $20 million of this amount is related to measures for which we lack sufficient information to calculate our compliance. Removing quality revenue and profit-sharing adjustments would have resulted in a medical care ratio of approximately 88% in 2014 and 86% in 2013.

Utah. The medical care ratio of the Utah health plan increased to 92.2% in 2014, from 83.4% in 2013, due to deteriorating margins for both Medicaid and Medicare products.

Washington. Financial performance at the Washington health plan declined in 2014, when compared with 2013.The medical care ratio of the plan increased to 93.4% in 2014, compared with 88.0% in 2013, primarily due to the high cost of medical services relative to revenue for members served under the state's program for ABD members. The plan added approximately 102,000 Medicaid expansion members in 2014. The plan received a blended rate increase of approximately 3% effective January 1, 2015. For the plan's ABD membership, the rate increase effective January 1, 2015 was 11%.

Wisconsin. The medical care ratio of the Wisconsin health plan increased to 86.8% in 2014, compared with 79.7% in 2013.

Molina Medicaid Solutions Segment

2015 Compared with 2014

Service revenue declined $15 million in 2015 compared with 2014, primarily due to an extension of the Idaho contract under which we are now amortizing certain deferred revenues over a longer term. Service margin was consistent between 2015 and 2014, with 2015 showing a $2 million increase.

2014 Compared with 2013

Service margin improved $9 million for the year ended December 31, 2014, compared with 2013, primarily the result of increased revenues due to higher Medicaid transaction volumes and lower cost of services overall.

Other Segment

Our Other segment includes other businesses, such as our Pathways behavioral health and social services provider, that do not meet the quantitative thresholds for a reportable segment as defined by U.S. generally accepted accounting principles (GAAP), as well as corporate amounts not allocated to other reportable segments. The Other segment service margin for the year ended December 31, 2015, was insignificant.

Consolidated Expenses

General and Administrative Expenses. General and administrative expenses increased slightly to 8.1% of revenue in 2015, from 7.9% in 2014, primarily the result of dramatic growth in our Marketplace membership. Excluding Marketplace broker and exchange fees from both years, the general and administrative expense ratio decreased to 7.5% in 2015 from 7.9% in 2014.

General and administrative expenses decreased to 7.9% of revenue in 2014, from 10.1% in 2013. The significant decline in the ratio of general and administrative expenses relative to total revenue was primarily the result of improved leverage of fixed administrative expenses over higher total revenue.

Premium Tax Expense. The premium tax ratio (premium tax expense as a percentage of premium revenue plus premium tax revenue) decreased to 2.9% in 2015, from 3.2% in 2014. This decrease was primarily due to the current year increase in MMP revenues, which are not subject to premium taxes.

The premium tax ratio increased to 3.2% in 2014, from 2.7% in 2013. In June 2014, the state of Michigan instituted a 6% use tax on medical premiums. That state agreed to fund this tax through rate increases; as a result, we recorded approximately $30 million in additional premium revenue in 2014, as well as corresponding premium tax expense.

Health Insurer Fee (HIF) Revenue and Expenses. For our Medicaid program, actuarial standards require that we be reimbursed by state Medicaid agencies for both the expense associated with the HIF and the absence of tax deductibility for that expense. During 2015, we secured full reimbursement for our expenses under the HIF (including the absence of tax deductibility) and as a result HIF revenue, as a percentage of premium revenue, increased to 2.0% in 2015, from 1.3% in 2014. During 2015, we recognized approximately $20 million of HIF premium revenue meant to reimburse us for the cost of HIF expense recognized in 2014. Health insurer fee expenses, as a percentage of premium revenue, were 1.2% in 2015, compared with 1.0% in 2014.

In addition, both HIF revenue and expenses increased over the prior year proportionally to the increase in the total HIF tax base, which is assessed to all insurers. This base increased to $11.3 billion in 2015, from $8.0 billion in 2014. Refer to "Liquidity and Capital Resources—Financial Condition" below, for further discussion of the HIF.

Depreciation and Amortization. The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Year Ended December 31,			
	2015		2014	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in millions)			
Depreciation, and amortization of capitalized software, continuing operations	$ 87	0.6%	$ 75	0.8%
Amortization of intangible assets, continuing operations	17	0.1	18	0.2
Depreciation and amortization, continuing operations	104	0.7	93	1.0
Amortization recorded as reduction of service revenue	1	—	3	—
Amortization of capitalized software recorded as cost of service revenue	21	0.1	38	0.4
Depreciation and amortization reported in statement of cash flows	$ 126	0.8%	$ 134	1.4%

	Year Ended December 31,			
	2014		2013	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in millions)			
Depreciation, and amortization of capitalized software, continuing operations	$ 75	0.8%	$ 55	0.8%
Amortization of intangible assets, continuing operations	18	0.2	18	0.3
Depreciation and amortization, continuing operations	93	1.0	73	1.1
Amortization recorded as reduction of service revenue	3	—	3	—
Amortization of capitalized software recorded as cost of service revenue	38	0.4	18	0.3
Depreciation and amortization reported in statement of cash flows	$ 134	1.4%	$ 94	1.4%

Interest Expense. Interest expense increased to $66 million for the year ended December 31, 2015, compared with $57 million for the year ended December 31, 2014. The increase was due primarily to our issuance of $700 million aggregate principal amount of senior notes (5.375% Notes) due November 15, 2022, in the fourth quarter of 2015. For further details regarding this transaction, please refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 12, "Debt."

Interest expense increased to $57 million for the year ended December 31, 2014, compared with $52 million for the year ended December 31, 2013. The increase was due primarily to our 3.75% Notes exchange transaction and related issuance of 1.625% Notes in 2014, and lease financing transactions executed in 2013. For further details regarding these transactions, please refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 12, "Debt."

Interest expense includes non-cash interest expense relating to the amortization of the discount on our long-term debt obligations, which amounted to $30 million, $27 million and $23 million for the years ended December 31, 2015, 2014, and 2013, respectively.

We expect interest expense to continue to increase in the future due to interest on the 5.375% Notes which were issued in November 2015.

Income Taxes. The provision for income taxes in continuing operations is recorded at an effective rate of 55.5% for the year ended December 31, 2015, compared with 53.8% for the year ended December 31, 2014. The effective tax rate for 2015 is higher than 2014 primarily as a result of certain discrete tax benefits recorded in 2014 that were not recurring in 2015.

The provision for income taxes in continuing operations was recorded at an effective rate of 53.8% for the year ended December 31, 2014, compared with 44.8% for the year ended December 31, 2013. The increase is primarily due to the nondeductible health insurer fee in 2014 that did not exist in 2013.

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue a short time before we pay for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations.

Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of 10 years or less (excluding variable rate securities, for which interest rates are periodically reset) and that the average maturity be three years or less. Professional portfolio managers operating under documented guidelines manage our investments and a portion of our cash equivalents. Our portfolio managers must obtain our prior approval before selling investments where the loss position of those investments exceeds certain levels. As of December 31, 2015, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted primarily of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income increased to $18 million for the year ended December 31, 2015, compared with $8 million for the year ended December 31, 2014, primarily due to the increase in invested assets. Our annualized portfolio yields for the year ended December 31, 2015 was 0.5%, and for both years ended December 31, 2014 and 2013, was 0.4%.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our unregulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use. We received $125 million in dividends from our regulated health plan subsidiaries, and $17 million in dividends from our unregulated subsidiaries during 2015. We did not receive any dividends from our regulated health plan subsidiaries during the year ended December 31, 2014, because significant growth across all of our health plans necessitated that the plans retain their cash to meet increasing net worth requirements. See further discussion in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 19, "Commitments and Contingencies," under the subheading "Regulatory Capital and Dividend Restrictions," and Note 22, "Condensed Financial Information of Registrant," under "Note C - Dividends and Capital Contributions."

Liquidity

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Year Ended December 31,				
	2015	2014	2013	2014 to 2015 Change	2013 to 2014 Change
	(In millions)				
Net cash provided by operating activities	$ 1,125	$ 1,060	$ 190	$ 65	$ 870
Net cash used in investing activities	(1,420)	(536)	(543)	(884)	7
Net cash provided by financing activities	1,085	79	493	1,006	(414)
Net increase in cash and cash equivalents	$ 790	$ 603	$ 140	$ 187	$ 463

Operating Activities. Cash provided by operating activities was $1,125 million in 2015 compared with $1,060 million in 2014, an increase of $65 million. This increase was due primarily to increased net income of $81 million, and collection of premiums receivable at our California health plan in the first quarter of 2015. These sources of cash were partially offset by:

- A decrease in amounts due to government agencies of $268 million, primarily due to a fourth quarter 2015 Medicaid expansion-related payment to the state of Washington's Medicaid authority of $247 million. Changes in this account

relate primarily to Health Plans segment programs that contain medical cost floors or medical cost corridors. Under such programs, a portion of certain Medicaid, Medicare, and Marketplace premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs; and

- The change in medical claims and benefits payable, which resulted in the use of $49 million, primarily because membership and related medical costs grew at a higher rate in 2014 than in 2015, resulting in a lower year-over-year change in 2015.

In 2014, cash provided by operating activities was $1,060 million compared with $190 million for 2013, an increase of $870 million. This increase was primarily due to a $442 million increase in amounts due to government agencies because of a significant increase in amounts accrued for medical cost floor contract provisions, primarily associated with our Medicaid expansion membership. In addition, medical claims and benefits payable increased $356 million due to significant membership growth in 2014.

Investing Activities. Cash used in investing activities increased to $1,420 million in 2015, compared with $536 million in 2014, an increase of $884 million. This increase was due in part to higher purchases of investments, net of sales and maturities, amounting to $477 million, a result of cash generated from 2015 financing activities, described below.

In addition, cash paid for business acquisitions increased $406 million. As described in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 1 ,"Basis of Presentation," we closed several business acquisitions in 2015. Additionally, we announced several Health Plans acquisitions in 2015 that did not close until January 1, 2016. Because the closing dates for these acquisitions fell on January 1, 2016, a holiday, approximately $101 million was recorded to prepaid expenses and other assets as of December 31, 2015, for purchase price amounts funded in December 2015. Such amounts are reported in investing activities in the accompanying consolidated statements of cash flows.

In 2014, cash used in investing activities was $536 million, comparable with $543 million in 2013.

Financing Activities. Cash provided by financing activities was $1,085 million in 2015, primarily due to net proceeds from our fiscal 2015 offerings of 5.375% Notes, amounting to $689 million, and common stock, amounting to $373 million. In 2014, cash provided by financing activities was $79 million, which included primarily $123 million net proceeds from our fiscal 2014 offering of 1.625% Notes, partially offset by $50 million paid to settle contingent consideration liabilities associated with our 2013 business acquisitions. In 2013, net proceeds from our 1.125% Notes offering and lease financing transactions provided $623 million, which was partially offset by $53 million used to purchase treasury stock and $88 million to repay debt.

Financial Condition

We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

On a consolidated basis, at December 31, 2015, our working capital was $1,484 million compared with $1,028 million at December 31, 2014. At December 31, 2015, our cash and investments amounted to $4,241 million, compared with $2,666 million of cash and investments at December 31, 2014.

Regulatory Capital. Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements upon us that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us.

Based upon current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $1,229 million at December 31, 2015, and $859 million at December 31, 2014. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $612 million and $203 million as of December 31, 2015, and 2014, respectively.

Debt Ratings. Our 5.375% Notes are rated "BB" by Standard & Poor's, and "Ba3" by Moody's Investor Service, Inc. A significant downgrade in our ratings could adversely affect our borrowing capacity and costs.

Health Insurer Fee. Effective January 1, 2014, the ACA requires most health plans to pay a fee based on premium revenue (the Health Insurer Fee, or HIF). The HIF is not tax deductible. Actuarial standards require that states reimburse us for the HIF we incur related to Medicaid revenue, in addition to paying us a "tax gross up" to compensate us for incremental income taxes we pay because the HIF is not tax deductible. During 2015, we secured full reimbursement for our expenses under the HIF.

The following table provides the details of our HIF revenue reimbursement by health plan to date in 2015 (in millions):

	HIF Reimbursement Revenue, Gross[1]					
	Year Ended December 31, 2015					
	Recognized					Necessary for Full Reimbursement
	Q1 2015	Q2 2015	Q3 2015	Q4 2015	Total	
2015 HIF:						
California	$ —	$ 17	$ 6	$ 8	$ 31	$ 31
Florida	2	2	2	2	8	8
Illinois	1	1	1	1	4	4
Michigan	—	—	21	7	28	28
New Mexico	7	8	8	7	30	30
Ohio	12	12	12	12	48	48
South Carolina	3	3	3	3	12	12
Texas	6	6	6	5	23	23
Utah	—	—	4	2	6	6
Washington	11	11	6	9	37	37
Wisconsin	1	1	1	2	5	5
Subtotal, Medicaid	43	61	70	58	232	232
Marketplace	—	—	1	1	2	2
Medicare	6	4	4	5	19	19
	49	65	75	64	253	$ 253
2014 HIF:						
California	—	12	—	—	12	
Michigan	—	—	7	—	7	
Utah	—	—	1	—	1	
	$ 49	$ 77	$ 83	$ 64	$ 273	
Recognized in:						
Health insurer fee revenue	$ 48	$ 74	$ 81	$ 61	$ 264	
Premium tax revenue	1	3	2	3	9	
	$ 49	$ 77	$ 83	$ 64	$ 273	

(1) Amounts in the table include our estimate of the full economic impact of the excise tax including premium tax and the income tax effect.

Future Sources and Uses of Liquidity

Shelf Registration Statement. We have a shelf registration statement on file with the Securities and Exchange Commission to register an unlimited amount of any combination of debt or equity securities in one or more offerings. Specific information regarding the terms and securities being offered will be provided at the time of an offering. Proceeds from future offerings are expected to be used for general corporate purposes, including, but not limited to, the repayment of debt, investments in or extensions of credit to our subsidiaries and the financing of possible acquisitions or business expansion.

Credit Facility. In June 2015, we entered into an unsecured $250 million revolving credit facility (Credit Facility). Borrowings under the Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. The Credit Facility has a term of five years and all amounts outstanding will be due and payable on June 12, 2020. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $350 million. Our ability to borrow under the Credit Facility is subject to compliance with certain covenants. As of December 31, 2015, outstanding letters of credit amounting to $6 million reduced the borrowing capacity to $244 million, and no amounts were outstanding under the Credit Facility.

Announced Acquisitions. As described in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 1, "Basis of Presentation," we announced several Health Plans acquisitions in 2015 that did not close until January 1, 2016. Because the closing dates for these acquisitions fell on January 1, 2016, a holiday, approximately $101 million was recorded to prepaid expenses and other assets as of December 31, 2015, for purchase price amounts funded in December 2015. Such amounts are reported in investing activities in the accompanying consolidated statements of cash flows. The total aggregate purchase price for these acquisitions amounted to approximately $115 million.

Convertible Senior Notes. In February 2013, we issued $550 million aggregate principal amount of 1.125% cash convertible senior notes due January 15, 2020, unless earlier repurchased or converted. We refer to these notes as our 1.125% Notes. In September 2014, we issued $302 million aggregate principal amount of 1.625% convertible senior notes due August 14, 2044, unless earlier repurchased, redeemed, or converted. We refer to these notes as our 1.625% Notes. As of December 31, 2015, the aggregate outstanding principal amount of our 1.125% Notes and our 1.625% Notes was $550 million and $302 million, respectively. Both our 1.125% Notes and our 1.625% Notes are convertible into cash prior to their respective maturity dates under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger. The 1.125% Notes met the stock price trigger in the quarter ended December 31, 2015, and are convertible to cash through at least March 31, 2016. Because the 1.125% Notes may be converted into cash within 12 months, the $448 million carrying amount is reported in current portion of long-term debt as of December 31, 2015. In addition, holders of our 1.625% Notes may convert their notes into cash during any calendar quarter (and only during such calendar quarter) if the last reported sales price of our common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to $75.51 per share. The last reported sale price of our common stock as reported on the New York Stock Exchange on February 23, 2016 was $62.28 per share. As of December 31, 2015, our 1.625% Notes were not convertible. If conversion requests are received, the settlement of the notes must be paid primarily in cash pursuant to the terms of the relevant indentures.

For economic reasons related to the trading market for our 1.125% Notes, we believe that the amount of the notes that may be converted over the next twelve months, if any, will not be significant. However, if the trading market for our 1.125% Notes becomes closed or restricted due to market turmoil or other reasons such that the notes cannot be traded, or if the trading price of our 1.125% Notes, which normally trade at a marginal premium to the underlying composite stock-and-interest economic value, no longer includes that marginal premium, holders of our 1.125% Notes may elect to convert the notes to cash. As of December 31, 2015, we had sufficient available cash, combined with borrowing capacity available under our Credit Facility, to fund such conversions.

States' Budgets. From time to time the states in which our health plans operate may delay premium payments. For example, the state of Illinois is currently operating without a budget for its fiscal year ending June 30, 2016. As of December 31, 2015, our Illinois health plan served approximately 98,000 members, and recognized premium revenue of approximately $397 million for the year ended December 31, 2015. As of February 23, 2016, Illinois is current with its premium payments.

In another example, the Commonwealth of Puerto Rico has reported that it may lack sufficient resources to fund all necessary governmental programs including health care-related programs, as well as meet its debt obligations for its fiscal year ending June 30, 2016. Our Puerto Rico health plan became operational on April 1, 2015. As of December 31, 2015, the plan served approximately 348,000 members and recognized premium revenue of approximately $192 million in the fourth quarter of 2015, or approximately $64 million per month. As of February 23, 2016, the Commonwealth continues to pay us weekly for current membership.

It is the practice of the Commonwealth to pay us for eligible members only after those members have been assigned to us, and our plan has sent electronic confirmation of the receipt of eligibility. Particularly in the early stages of our contract with Puerto Rico, the plan's confirmation of eligibility of certain members was not accepted by the Commonwealth as a result of various technical issues. The plan has continued to pay for medical services for all members in question, but the Commonwealth is withholding payment of approximately $12 million of premium revenue related to those members. We believe we have a valid claim to all of the premiums withheld and we are in discussions with the Commonwealth regarding this matter.

It has been our practice in the past, and will remain so in the future, to continue to serve our members and pay health care providers for services rendered in circumstances where state (or Commonwealth) governments are temporarily unable to pay us, so long as we continue to believe that such state (or Commonwealth) governments will ultimately pay us.

Critical Accounting Estimates

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable* (see discussion below).
- *Health Plans segment contractual provisions that may adjust or limit revenue or profit.* For a comprehensive discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."
- *Health Plans segment quality incentives.* For a comprehensive discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."
- *Molina Medicaid Solutions segment revenue and cost recognition.* For a comprehensive discussion of this topic, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	December 31,		
	2015	2014	2013
	(In millions)		
Fee-for-service claims incurred but not paid (IBNP)	$ 1,191	$ 871	$ 424
Pharmacy payable	88	71	45
Capitation payable	140	28	20
Other (1)	266	231	181
	$ 1,685	$ 1,201	$ 670

(1) "Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. As of December 31, 2015, 2014 and 2013, we recorded non-risk provider payables relating to such intermediary arrangements of approximately $167 million, $119 million and $151 million, respectively.

The determination of our liability for medical claims and benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for medical claims and benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are incurred but not paid (IBNP). Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $1,191 million of our total medical claims and benefits payable of $1,685 million as of December 31, 2015.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further provision for adverse

claims deviation, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the hypothetical change in our estimate of claims liability as of December 31, 2015 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding December 31, 2015, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in millions.

Increase (Decrease) in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 348
(4)%	232
(2)%	116
2%	(116)
4%	(232)
6%	(348)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the hypothetical change in our estimate of claims liability as of December 31, 2015 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in millions.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (202)
(4)%	(135)
(2)%	(67)
2%	67
4%	135
6%	202

The following per-share amounts are based on a combined federal and state statutory tax rate of 37%, and 56 million diluted shares outstanding for the year ended December 31, 2015. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at December 31, 2015, net income for the year ended December 31, 2015 would increase or decrease by approximately $37 million, or $0.66 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at December 31, 2015, net income for the year ended December 31, 2015 would increase or decrease by approximately $21 million, or $0.38 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $183 million, or $3.29 per diluted share, and $106 million, or $1.91 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $37 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse deviation in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims deviation. The provision for adverse claims deviation is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled, changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims deviation.

We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date.

The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 11, "Medical Claims and Benefits Payable," for additional information regarding the specific factors used to determine our changes in estimates of IBNP for all periods presented in the accompanying consolidated financial statements.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts presented for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year ended December 31,		
	2015	2014	2013
	(Dollars in millions, except per-member amounts)		
Balances at beginning of period	$ 1,201	$ 670	$ 495
Components of medical care costs related to:			
Current period	11,935	8,123	5,434
Prior periods (1)	(141)	(46)	(53)
Total medical care costs	11,794	8,077	5,381
Change in non-risk provider payables	48	(32)	111
Payments for medical care costs related to:			
Current period	10,448	7,064	4,932
Prior periods	910	450	385
Total paid	11,358	7,514	5,317
Balances at end of period	$ 1,685	$ 1,201	$ 670
Benefit from prior periods as a percentage of:			
Balance at beginning of period	11.8%	6.9%	10.7%
Premium revenue	1.1%	0.5%	0.9%
Medical care costs	1.2%	0.6%	1.0%
Claims Data:			
Days in claims payable, fee for service	48	49	43
Number of members at end of period	3,533,000	2,623,000	1,931,000
Number of claims in inventory at end of period	380,800	307,700	145,800
Billed charges of claims in inventory at end of period	$ 816	$ 719	$ 277
Claims in inventory per member at end of period	0.11	0.12	0.08
Billed charges of claims in inventory per member end of period	$ 230.91	$ 273.92	$ 143.19
Number of claims received during the period	40,173,300	27,597,000	21,317,500
Billed charges of claims received during the period	$ 46,211	$ 30,316	$ 21,415

Commitments and Contingencies

We are not a party to off-balance sheet financing arrangements, except for operating leases which are disclosed in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 19 ,"Commitments and Contingencies."

Contractual Obligations

In the table below, we present our contractual obligations as of December 31, 2015. Some of the amounts included in this table are based on management's estimates and assumptions about these obligations, including their duration, the possibility of renewal, anticipated actions by third parties, and other factors. Because these estimates and assumptions are necessarily subjective, the contractual obligations we will actually pay in future periods may vary from those reflected in the table.

Additionally, we have a variety of other contractual agreements related to acquiring services used in our operations. However, we believe these other agreements do not contain material noncancelable commitments.

	Total (1)	2016	2017-2018	2019-2020	2021 and Beyond
			(In millions)		
Medical claims and benefits payable	$ 1,685	$ 1,685	$ —	$ —	$ —
Principal amount of senior notes (2)	1,552	—	—	550	1,002
Amounts due government agencies	729	729	—	—	—
Interest on long-term debt	424	49	97	91	187
Lease financing obligations	403	15	32	33	323
Operating leases	232	49	88	56	39
Purchase commitments	15	11	4	—	—
	$ 5,040	$ 2,538	$ 221	$ 730	$ 1,551

(1) As of December 31, 2015, we have recorded approximately $9 million of unrecognized tax benefits. The table does not contain this amount because we cannot reasonably estimate when or if such amount may be settled. For further information, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 14, "Income Taxes."

(2) Represents the principal amounts due on our 5.375% Senior Notes due 2022, 1.125% Cash Convertible Senior Notes due 2020, and our 1.625% Convertible Senior Notes due 2044 (1.625% Notes). The 1.625% Notes have a contractual maturity date in 2044; however, on specified dates beginning in 2018, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes, as described in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 12, "Debt."

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Quantitative and Qualitative Disclosures About Market Risk

Refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," Note 5, "Fair Value Measurements," and Note 6, "Investments."

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 8. Financial Statements and Supplementary Data

INDEX TO FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited the accompanying consolidated balance sheets of Molina Healthcare, Inc. (the Company) as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2015. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Molina Healthcare, Inc. at December 31, 2015 and 2014, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2015, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Molina Healthcare, Inc.'s internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 26, 2016 expressed an unqualified opinion thereon.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments include our Health Plans and Molina Medicaid Solutions segments, which comprise the vast majority of our operations, and our Other segment. As of December 31, 2015, we changed our reporting structure as a result of the Pathways acquisition in November 2015, which is reported in Other. See Note 20, "Segment Information," for further details.

Our Health Plans segment consists of health plans in 11 states and the Commonwealth of Puerto Rico, and includes our direct delivery business. As of December 31, 2015, these health plans served over 3.5 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve Health Insurance Marketplace members, most of whom receive government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in several states in which we operate.

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new request for proposals (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled (ABD); and regions or service areas.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

Our Other segment includes other businesses, such as our Pathways behavioral health and social services provider, that do not meet the quantitative thresholds for a reportable segment as defined by U.S. generally accepted accounting principles (GAAP), as well as corporate amounts not allocated to other reportable segments.

Market Update—Other

Pathways. On November 1, 2015, we acquired all of the outstanding ownership interests in Pathways Health and Community Support LLC (Pathways), formerly known as Providence Human Services, LLC. Pathways is one of the largest national providers of accessible, outcome-based behavioral/mental health and social services with operations in 23 states and the District of Columbia. See Note 4, "Business Combinations," for further information.

Market Updates—Health Plans

Medicare-Medicaid Plans. To coordinate care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to deliver services to these individuals in a more financially efficient manner, some states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual eligible individuals. The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). We operate MMPs in six states. Our MMPs in California, Illinois, and Ohio offered coverage beginning in 2014; our MMPs in South Carolina and Texas offered coverage beginning in the first quarter of 2015; and our MMP in Michigan offered coverage beginning in the second quarter of 2015. At December 31, 2015, our membership included approximately 51,000 integrated MMP members.

Florida. On November 1, 2015, our Florida health plan closed on its acquisition of the Medicaid contracts, and certain assets related to operation of the Medicaid business, of Integral Health Plan, Inc. See Note 4, "Business Combinations," for further information.

On August 1, 2015, our Florida health plan closed on its acquisition of the Medicaid contracts, and certain assets related to the operation of the Medicaid business, of Preferred Medical Plan, Inc. See Note 4, "Business Combinations," for further information.

Illinois. On January 1, 2016, our Illinois health plan closed on its acquisition of the Medicaid membership, and certain assets related to the Medicaid business of, Accountable Care Chicago, LLC, also known as MyCare Chicago. We assumed approximately 58,000 Medicaid members in this acquisition.

On January 1, 2016, our Illinois health plan closed on its acquisition of the Medicaid membership, and certain assets related to the Medicaid business, of Loyola Physician Partners, LLC. We assumed approximately 21,000 Medicaid members in this acquisition.

On November 30, 2015, we announced that our Illinois health plan entered into an agreement to assume the membership and certain Medicaid assets of Better Health Network, LLC (Better Health). As of November 30, 2015, Better Health served approximately 40,000 members in the Medicaid Family Health program in Cook County. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the first half of 2016.

Michigan. On January 1, 2016, our Michigan health plan closed on its acquisition of the Medicaid and MIChild membership, and certain Medicaid and MIChild assets, of HAP Midwest Health Plan, Inc. We assumed approximately 81,000 Medicaid and MIChild members in this acquisition.

In October 2015, the Michigan Department of Health and Human Services announced that Molina Healthcare of Michigan was recommended to serve the state's Medicaid members under Michigan's Comprehensive Health Plan, which commenced on January 1, 2016. The new contract has a five-year term with three one-year extensions, and covers Regions 2 through 6, and 8 through 10 of the state, representing an expansion into 18 additional counties compared with the previous Michigan Medicaid contract.

On September 1, 2015, our Michigan health plan closed on its acquisition of the Medicaid and MIChild contracts, and certain provider agreements, of HealthPlus of Michigan and its subsidiary, HealthPlus Partners, Inc. See Note 4, "Business Combinations," for further information.

Puerto Rico. Effective April 1, 2015, our Puerto Rico health plan served its first members. As of December 31, 2015, our Puerto Rico plan enrollment amounted to approximately 348,000 members.

Washington. In November 2015, our Washington health plan was selected by the Washington State Health Care Authority (HCA) to negotiate and enter into managed care contracts for the Southwest region of the state's Apple Health Fully Integrated Managed Care Program. Molina Healthcare of Washington was selected by HCA pursuant to the request for proposal HCA issued in August 2015. The start date for the new contract is scheduled for April 1, 2016.

On January 1, 2016, our Washington health plan closed on its acquisition of the Medicaid membership and certain Medicaid assets of Columbia United Providers, Inc. We assumed approximately 57,000 Medicaid members in this acquisition.

Market Update—Molina Medicaid Solutions

New Jersey. On April 9, 2015, the state of New Jersey announced its selection of Molina Medicaid Solutions to design and operate that state's new Medicaid management information system (MMIS). The new contract was effective May 1, 2015, and has a term of 10 years with three one-year renewal options. Molina Medicaid Solutions was the state's incumbent MMIS provider, and was awarded the new contract as a result of Molina Medicaid Solutions' submission in response to the state of New Jersey's request for proposals.

Consolidation

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. See Note 18, "Variable Interest Entities (VIEs)," for more information regarding these variable interest entities. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the periods presented have been included; such adjustments consist of normal recurring adjustments. All significant inter-company balances and transactions have been eliminated in consolidation. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

Presentation and Reclassifications

Beginning in 2013, after our Medicaid contract with the state of Missouri expired, we have reported the results relating to the Missouri health plan as discontinued operations for all periods presented. Additionally, we abandoned our equity interests in the Missouri health plan during the second quarter of 2013, resulting in the recognition of a tax benefit of $10 million, which is also included in discontinued operations in the consolidated statements of income. The Missouri health plan's premium revenues were insignificant for all periods presented.

We have reclassified certain amounts in the 2014 consolidated balance sheet to conform to the 2015 presentation relating to the presentation of deferred taxes and debt issuance costs. Both reclassifications are a result of recently adopted accounting pronouncements. See Note 2, "Significant Accounting Policies," for further information.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Principal areas requiring the use of estimates include:

- The determination of medical claims and benefits payable of our Health Plans segment;
- Health plan contractual provisions that may limit revenue recognition based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- Molina Medicaid Solutions segment revenue and cost recognition;
- Settlements under risk or savings sharing programs;
- The assessment of deferred contract costs, deferred revenue, long-lived and intangible assets, and goodwill for impairment;
- The determination of professional and general liability claims, and reserves for potential absorption of claims unpaid by insolvent providers;
- The determination of reserves for the outcome of litigation;
- The determination of valuation allowances for deferred tax assets; and
- The determination of unrecognized tax benefits.

2. Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that are both readily convertible into known amounts of cash and have a maturity of three months or less on the date of purchase.

Investments

Our investments are principally held in debt securities, which are grouped into two separate categories for accounting and reporting purposes: available-for-sale securities, and held-to-maturity securities. Available-for-sale securities are recorded at fair value and unrealized gains and losses, if any, are recorded in stockholders' equity as other comprehensive income, net of applicable income taxes. Held-to-maturity securities are recorded at amortized cost, which approximates fair value, and unrealized holding gains or losses are not generally recognized. Realized gains and losses and unrealized losses judged to be other than temporary with respect to available-for-sale and held-to-maturity securities are included in the determination of net income. The cost of securities sold is determined using the specific-identification method.

Our investment policy requires that all of our investments have final maturities of 10 years or less (excluding variable rate securities where interest rates may be periodically reset), and that the average maturity be three years or less. Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. Declines in interest rates over time will reduce our investment income.

In general, our available-for-sale securities are classified as current assets without regard to the securities' contractual maturity dates because they may be readily liquidated. We monitor our investments for other-than-temporary impairment. For comprehensive discussions of the fair value and classification of our current and non-current investments, see Note 5, "Fair Value Measurements," Note 6, "Investments," and Note 10, "Restricted Investments."

Receivables

Receivables are readily determinable and because our creditors are primarily state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. See Note 7, "Receivables."

Property, Equipment, and Capitalized Software

Property and equipment are stated at historical cost. Replacements and major improvements are capitalized, and repairs and maintenance are charged to expense as incurred. Furniture and equipment are generally depreciated using the straight-line method over estimated useful lives ranging from three to seven years. Software developed for internal use is capitalized. Software is generally amortized over its estimated useful life of three years. Leasehold improvements are amortized over the term of the lease, or over their useful lives from five to 10 years, whichever is shorter. Buildings are depreciated over their estimated useful lives of 31.5 to 40 years. See Note 8, "Property, Equipment, and Capitalized Software."

As discussed below, the costs associated with certain of our Molina Medicaid Solutions segment equipment and software are capitalized and recorded as deferred contract costs. Such costs are amortized on a straight-line basis over the shorter of the useful life or the contract period.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and amortization" in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service revenue;" and
- Amortization of capitalized software is recorded within the heading "Cost of service revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Year Ended December 31,		
	2015	2014	2013
	(In millions)		
Depreciation, and amortization of capitalized software, continuing operations	$ 87	$ 75	$ 55
Amortization of intangible assets, continuing operations	17	18	18
Depreciation and amortization, continuing operations	104	93	73
Amortization recorded as reduction of service revenue	1	3	3
Amortization of capitalized software recorded as cost of service revenue	21	38	18
Depreciation and amortization reported in the statement of cash flows	$ 126	$ 134	$ 94

Long-Lived Assets, including Intangible Assets

Long-lived assets consist primarily of property, equipment, capitalized software and intangible assets. Finite-lived, separately-identified intangible assets acquired in business combinations are assets that represent future expected benefits but lack physical substance (such as purchased contract rights and provider contracts). Intangible assets are initially recorded at fair value and are then amortized on a straight-line basis over their expected useful lives, generally between two and 15 years.

Our intangible assets are subject to impairment tests when events or circumstances indicate that a finite-lived intangible asset's (or asset group's) carrying value may not be recoverable. Consideration is given to a number of potential impairment indicators. For example, our health plan subsidiaries have generally been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that these contracts will continue to be renewed.

Following the identification of any potential impairment indicators, to determine whether an impairment exists, we would compare the carrying amount of a finite-lived intangible asset with the undiscounted cash flows that are expected to result from the use of the asset or related group of assets. If it is determined that the carrying amount of the asset is not recoverable, the amount by which the carrying value exceeds the estimated fair value is recorded as an impairment.

No significant impairment charges relating to long-lived assets, including intangible assets, were recorded in the years ended December 31, 2015, 2014, and 2013.

Goodwill

Goodwill represents the amount of the purchase price in excess of the fair values assigned to the underlying identifiable net assets of acquired businesses. Goodwill is not amortized, but is subject to an annual impairment test. Tests are performed more frequently if events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount.

To determine whether goodwill is impaired, we measure the fair values of our reporting units and compare them to the carrying values of the respective units, including goodwill. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared with the carrying amount of goodwill to determine whether goodwill is impaired.

We estimate the fair values of our reporting units using discounted cash flows. To determine fair values, we must make assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value, and discount rates.

No impairment charges relating to goodwill were recorded in the years ended December 31, 2015, 2014, and 2013.

Business Combinations

Accounting for acquisitions requires us to recognize separately from goodwill the assets acquired and the liabilities assumed at their acquisition date fair values. Goodwill as of the acquisition date is measured as the excess of consideration transferred over the net of the acquisition date fair values of the assets acquired and the liabilities assumed. While we use our best estimates and assumptions to accurately value assets acquired and liabilities assumed at the acquisition date, our estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which may be up to one year from the acquisition date, we record adjustments to the assets acquired and liabilities assumed with the corresponding offset to goodwill. Upon the conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded to our consolidated statements of income. Refer to Note 4, "Business Combinations," for further details regarding our 2015 acquisitions.

Restricted Investments

Restricted investments, which consist of certificates of deposit and U.S. treasury securities, are designated as held-to-maturity and are carried at amortized cost, which approximates fair value. The use of these funds is limited to specific purposes as required by regulation in the various states in which we operate, or as protection against the insolvency of capitated providers. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. See Note 10, "Restricted Investments."

Delegated Provider Insolvency

Circumstances may arise where providers to whom we have delegated risk are unable to pay claims they have incurred with third parties in connection with referral services (including hospital inpatient services) provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability.

In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These reserves are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. Additionally, we have recorded liabilities for estimated losses arising from provider instability or insolvency in excess of provider funds on deposit with us. Such liabilities were not material at December 31, 2015 and 2014.

Premium Revenue - Health Plans

Premium revenue is generated primarily from our Medicaid, Medicare and Marketplace contracts, including agreements with other managed care organizations for which we operate as a subcontractor. Premium revenue is generally received based on per member per month (PMPM) rates established in advance of the periods covered. These premium revenues are recognized in the month that members are entitled to receive health care services, and premiums collected in advance are deferred. The state Medicaid programs and the federal Medicare program periodically adjust premium. Additionally, many of our contracts contain provisions that may adjust or limit revenue or profit, as described below. Consequently, we recognize premium revenue as it is

earned under such provisions.

The following table summarizes premium revenue from continuing operations for the periods indicated:

	Year Ended December 31,					
	2015		2014		2013	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
	(Dollars in millions)					
California	$ 2,200	16.6%	$ 1,523	16.9%	$ 750	12.1%
Florida	1,199	9.0	439	4.9	265	4.3
Illinois	397	3.0	153	1.7	8	0.1
Michigan	1,067	8.1	781	8.7	676	11.0
New Mexico	1,237	9.3	1,076	11.9	447	7.2
Ohio	2,034	15.4	1,553	17.2	1,099	17.8
Puerto Rico	567	4.3	—	—	—	—
South Carolina	348	2.6	381	4.2	—	—
Texas	1,961	14.8	1,318	14.6	1,291	20.9
Utah	331	2.5	310	3.4	311	5.0
Washington	1,602	12.1	1,305	14.5	1,168	18.9
Wisconsin	261	2.0	156	1.7	143	2.3
Direct delivery	37	0.3	28	0.3	21	0.4
	$ 13,241	100.0%	$ 9,023	100.0%	$ 6,179	100.0%

Certain components of premium revenue are subject to accounting estimates and fall into the following categories:

Contractual Provisions That May Adjust or Limit Revenue or Profit

Medicaid

Medical Cost Floors (Minimums), Medical Cost Corridors, and Administrative Cost Ceilings (Maximums): A portion of certain premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $224 million and $392 million at December 31, 2015 and December 31, 2014, respectively, to amounts due government agencies. Approximately $208 million of the liability accrued at December 31, 2015 relates to our participation in Medicaid expansion programs.

In certain circumstances, the health plans may receive additional premiums if amounts spent on medical care costs exceed a defined maximum threshold. We had $3 million recorded at December 31, 2015 relating to such provisions. No such receivables were recorded at December 31, 2014.

Profit Sharing and Profit Ceiling: Our contracts with certain states contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage, in some cases in accordance with a tiered rebate schedule. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. As a result of profits in excess of the amount we are allowed to retain, we recorded a liability of $10 million at December 31, 2015. The amount recorded at December 31, 2014 was insignificant.

Retroactive Premium Adjustments: In New Mexico, when members are retroactively enrolled into our health plan we earn revenue only to the extent of the actual medical costs incurred by us for services provided during those retroactive periods, plus a small percentage of that medical cost for administration and profit. This cost plus arrangement for members retroactively enrolled in our health plan first became effective July 1, 2014 (retroactive to January 1, 2014). We are paid normal monthly capitation rates for the retroactive eligibility periods, and the difference between those capitation rates and the amounts due us on a cost plus basis are periodically settled with the state. To date, no such settlement has been made with the state. Our New Mexico contract is not specific as to the definition of retroactive membership, and the amount we owe the state (or that the state owes us) for the difference between capitation received and amounts due us under the cost plus arrangement varies widely depending upon the definition of retroactive membership.

In August 2015 the state provided us with a request for payment under the terms of this contract provision for the period January 1, 2014 through December 31, 2014. That request was based upon definitions of retroactive membership that were at odds with our interpretations of that term. The New Mexico health plan reduced revenue by approximately $24 million in 2015

as a result of aligning more closely our definition of retroactive membership with the state's definition. Using the state's definition of retroactive membership, however, we estimate that the state will ultimately seek repayment of an amount that ranges from $15 million to $20 million higher than what we have accrued. We do not believe that any reasonable definition of retroactive membership supports the state's position, and expect to resolve this matter with payment of the amount we have accrued at December 31, 2015. We are currently engaged in discussions with the state regarding the appropriate amount, if any, owed to the state under this contract term.

Medicare

Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services (CMS), our Medicare premiums are subject to retroactive increase or decrease based upon member medical conditions for up to two years after the original year of service. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses, we have recorded a net payable of $4 million and a net receivable of $8 million for anticipated Medicare risk adjustment premiums at December 31, 2015 and December 31, 2014, respectively.

Marketplace

Premium Stabilization Programs: The Affordable Care Act (ACA) established Marketplace premium stabilization programs effective January 1, 2014. These programs, commonly referred to as the "3R's," include a permanent risk adjustment program, a transitional reinsurance program, and a temporary risk corridor program.

- Permanent risk adjustment program: Under this permanent program, our health plans' risk scores are compared to the overall average risk score for the relevant state and market pool. Generally, our health plans will pay into the pool if their risk scores are below the average risk score, and will receive funds from the pool if their risk scores are above the average risk score. We estimate our ultimate premium based on insurance policy year-to-date experience, and recognize estimated premiums relating to the risk adjustment program as an adjustment to premium revenue in our consolidated statements of income.
- Transitional reinsurance program: This program is designed to provide reimbursement to insurers for high cost members. Our health plans pay an annual contribution on a per-member basis, and are eligible for recoveries if claims for individual members exceed a specified threshold, up to a maximum amount. This three-year program will end on December 31, 2016. We recognize the assessments to fund the transitional reinsurance program as a reduction to premium revenue in our consolidated statements of income. We recognize recoveries under the reinsurance program as a reduction to medical care costs in our consolidated statements of income.
- Temporary risk corridor program: This program is intended to limit gains and losses of insurers by comparing allowable costs to a target amount as defined by the U.S. Department of Health and Human Services (HHS). Variances from the target amount exceeding certain thresholds may result in amounts due to or receivables due from HHS. This three-year program will end on December 31, 2016. Due to uncertainties as to the amount of federal funding available to support the risk corridor program, we do not recognize amounts receivable under this program. All liabilities are recognized as incurred. We estimate our ultimate premium based on insurance policy year-to-date experience, and recognize estimated premiums relating to the risk corridor program as an adjustment to premium revenue in our consolidated statements of income.

Additionally, the ACA established a minimum annual medical loss ratio (Minimum MLR) of 80% for the Marketplace. The medical loss ratio represents medical costs as a percentage of premium revenue. What constitutes medical costs and premium revenue are specifically defined by federal regulations. If the Minimum MLR is not met, we may be required to pay rebates to our Marketplace policyholders. Each of the 3R programs is taken into consideration when computing the Minimum MLR. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of income.

We record receivables or payables related to the 3R programs and the Minimum MLR when the amounts are reasonably estimable as described above, and, for receivables, collection is reasonably assured.

Our receivables (payables) for each of these programs, as of the dates indicated, were as follows (in millions):

	December 31, 2015	December 31, 2014
Risk adjustment	$ (214)	$ (5)
Reinsurance	36	5
Risk corridor	(10)	—
Minimum MLR	(3)	—

Quality Incentives

At several of our health plans, revenue ranging from approximately 1% to 4% of certain health plan premiums is earned if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of December 31, 2015 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of December 31, 2015.

	Year Ended December 31,		
	2015	2014	2013
	(In millions)		
Maximum available quality incentive premium - current period	$ 118	$ 90	$ 63
Amount of quality incentive premium revenue recognized in current period:			
Earned current period	$ 66	$ 40	$ 46
Earned prior periods	13	4	9
Total	$ 79	$ 44	$ 55
Total premium revenue recognized for state health plans with quality incentive premiums	$ 11,107	$ 7,084	$ 2,980

Medical Care Costs - Health Plans

Expenses related to medical care services are captured in the following categories:

- *Fee-for-service expenses:* Nearly all hospital services and the majority of our primary care and physician specialist services and LTSS costs are paid on a fee-for-service basis. Under fee-for-service arrangements, we retain the financial responsibility for medical care provided and incur costs based on actual utilization of services. Such expenses are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit manager are included in fee-for-service costs.
- *Pharmacy expenses:* All drug, injectibles, and immunization costs paid through our pharmacy benefit manager are classified as pharmacy expenses. As noted above, drugs and injectibles not paid through our pharmacy benefit manager are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.
- *Capitation expenses:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated arrangements, we remain liable for the provision of certain health care services. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.
- *Direct delivery expenses:* All costs associated with our direct delivery of medical care are separately identified.
- *Other medical expenses:* All medically related administrative costs, certain provider incentive costs, and other health care expenses are classified as other medical expenses. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, care coordination, disease management,

and 24-hour on-call nurses. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2015, 2014, and 2013, medically related administrative costs were $398 million, $263 million, and $153 million, respectively.

The following table provides the details of our consolidated medical care costs from continuing operations for the periods indicated (dollars in millions, except PMPM amounts):

	Year Ended December 31,								
	2015			2014			2013		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$ 8,572	$ 218.35	72.7%	$ 5,673	$ 202.87	70.2%	$ 3,612	$ 160.43	67.1%
Pharmacy	1,610	41.01	13.7	1,273	45.54	15.8	935	41.54	17.4
Capitation	982	25.02	8.3	748	26.77	9.3	604	26.83	11.2
Direct delivery	128	3.26	1.1	96	3.44	1.2	48	2.14	0.9
Other	502	12.79	4.2	286	10.22	3.5	181	8.05	3.4
Total	$ 11,794	$ 300.43	100.0%	$ 8,076	$ 288.84	100.0%	$ 5,380	$ 238.99	100.0%

Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are incurred but not paid (IBNP). Our IBNP claims reserve, as reported in our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. For further information, see Note 11, "Medical Claims and Benefits Payable."

We report reinsurance premiums as a reduction to premium revenue, while related reinsurance recoveries are reported as a reduction to medical care costs. We limit our risk of catastrophic losses by maintaining high deductible reinsurance coverage. Such reinsurance coverage does not relieve us of our primary obligation to our policyholders. We do not consider this coverage to be material because the cost is not significant and the likelihood that coverage will apply is low.

Taxes Based on Premiums

Health Insurer Fee. The federal government under the ACA imposes an annual fee, or excise tax, on health insurers for each calendar year. The HIF is based on a company's share of the industry's net premiums written during the preceding calendar year, and is non-deductible for income tax purposes. We recognize expense for the HIF over the year on a straight-line basis. Because we primarily serve individuals in government-sponsored programs, we must secure additional reimbursement from our state partners for this added cost. We recognize the related revenue when we have obtained a contractual commitment or payment from a state to reimburse us for the HIF; such HIF revenue is recognized ratably throughout the year.

Premium and Use Tax. Certain of our health plans are assessed a tax based on premium revenue collected. The premium revenues we receive from these states include the premium tax assessment. We have reported these taxes on a gross basis, as premium tax revenue and as premium tax expense in the consolidated statements of income.

Premium Deficiency Reserves on Loss Contracts

We assess the profitability of our contracts for providing medical care services to our members and identify those contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared to anticipated medical care costs, including the cost of processing claims. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. No such accrual was recorded as of December 31, 2015 or 2014.

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid management information system (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element, and are therefore multiple-element service arrangements.

Additionally, we evaluate each required deliverable under our multiple-element service arrangements to determine whether it qualifies as a separate unit of accounting. Such evaluation is generally based on whether the deliverable has standalone value to the customer. If the deliverable has standalone value, the arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. Therefore, absent any contingencies as discussed in the following paragraph, or contract extensions, we would recognize all revenue associated with those contracts over the initial contract period. When a contract is extended, we generally consider the extension to be a continuation of the single unit of accounting; therefore, the deferred revenue as of the extension date is recognized prospectively over the new remaining term of the contract. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances, we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts, for example. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs;
- Employee costs incurred in performing transaction services;
- Vendor costs incurred in performing transaction services;
- Costs incurred in performing required monitoring of and reporting on contract performance;

- Costs incurred in maintaining and processing member and provider eligibility; and
- Costs incurred in communicating with members and providers.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state and Puerto Rico taxes, nondeductible expenses under the Affordable Care Act Health Insurer Fee (HIF), nondeductible compensation and other general and administrative expenses. The effective tax rate may be subject to fluctuations during the year, particularly as a result of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers. For further discussion and disclosure, see Note 14, "Income Taxes."

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Funds Prime Series — Institutional Class, and the PFM Funds Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. As of December 31, 2015 and 2014, our investments with PFM amounted to approximately $605 million and $321 million, respectively. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. Our portfolio managers must obtain our prior approval before selling investments where the loss position of those investments exceeds certain levels. Our investments consist primarily of investment-grade debt securities with a maximum maturity of 10 years and an average duration of three years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited because our payors consist principally of the governments of each state in which our health plan subsidiaries operate.

Risks and Uncertainties

Our profitability depends in large part on our ability to accurately predict and effectively manage medical care costs. We continually review our medical costs in light of our underlying claims experience and revised actuarial data. However, several factors could adversely affect medical care costs. These factors, which include changes in health care practices, inflation, new technologies, major epidemics, natural disasters, and malpractice litigation, are beyond our control and may have an adverse effect on our ability to accurately predict and effectively control medical care costs. Costs in excess of those anticipated could have a material adverse effect on our financial condition, results of operations, or cash flows.

We operate health plans primarily as a direct contractor with the states (or Commonwealth), and in Los Angeles County, California, as a subcontractor to another health plan holding a direct contract with the state. We are therefore dependent upon a small number of contracts to support our revenue. The loss of any one of those contracts could have a material adverse effect on our financial position, results of operations, or cash flows. Our ability to arrange for the provision of medical services to our members is dependent upon our ability to develop and maintain adequate provider networks. Our inability to develop or maintain such networks might, in certain circumstances, have a material adverse effect on our financial position, results of operations, or cash flows.

Recent Accounting Pronouncements Not Yet Adopted

Leases. In February 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) ASU 2016-02, *Leases*. ASU 2016-02 amends the existing accounting standards for lease accounting, including requiring lessees to recognize most leases on their balance sheets and making targeted changes to lessor accounting. The ASU is effective for us beginning in the first quarter of 2019, and requires a modified retrospective transition approach. Early adoption is permitted; we are currently evaluating the potential effects of the adoption to our financial statements.

Financial Instruments. In January 2016, the FASB issued ASU 2016-01, *Recognition and Measurement of Financial Assets and Financial Liabilities*, which will require public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes. Also, entities will have to assess the realizability of a deferred tax asset related to an available for sale debt security in combination with the entity's other deferred tax assets. Effective for us in the first quarter of 2018, ASU 2016-01 is applied prospectively with a cumulative-effect adjustment to beginning retained earnings as of the beginning of the first reporting period in which the guidance is adopted. Early adoption is permitted in regards to certain provisions of the standard; we are evaluating the potential effects of the adoption to our financial statements.

Revenue Recognition. In July 2015, the FASB affirmed its proposal to defer the effective date of ASU 2014-09, *Revenue from Contracts with Customers,* for all entities by one year. As a result, public business entities will apply the new revenue standard to annual reporting periods beginning after December 15, 2017, and for interim reporting periods within annual reporting periods beginning after December 15, 2017. We intend to adopt this standard on January 1, 2018. We are currently evaluating our plan for adoption and its impact to our revenue recognition policies, procedures and control framework, and the resulting impact to our consolidated financial position, results of operations and cash flows.

Short-Duration Contracts. In May 2015, the FASB issued ASU 2015-09, *Disclosures about Short-Duration Contracts*, which will require additional disclosure on the liability for unpaid claims and claim adjustment expenses. We intend to adopt this standard effective for our annual report for the year ending December 31, 2016, and for interim periods thereafter. It requires additional disclosure only and will not have a significant impact to our consolidated financial statements.

Software Licenses. In April 2015, the FASB issued ASU 2015-05, *Customer's Accounting for Fees Paid in a Cloud Computing Arrangement*, which will require customers to determine whether a cloud computing arrangement includes the license of software by applying the same guidance cloud service providers use to make this determination. The ASU also eliminates the existing requirement for customers to account for software licenses they acquire by analogizing to the guidance on leases. This ASU will be effective for us in the first quarter of 2016, and is applied either prospectively or retrospectively. We are evaluating the potential effects of adoption to our financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the SEC did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

Recent Accounting Pronouncements Adopted

Income Taxes. In the fourth quarter of 2015, we early adopted ASU 2015-17, *Balance Sheet Classification of Deferred Taxes*, which requires deferred tax assets and liabilities to be classified as non-current, in a classified statement of financial position. We have applied the guidance retrospectively to all periods presented. Such retrospective adoption had an insignificant impact to our consolidated balance sheets, and had no impact to our consolidated statements of income, stockholders' equity, and cash flows.

Business Combinations. In the fourth quarter of 2015, we early adopted ASU 2015-16, *Simplifying the Accounting for Measurement-Period Adjustments*, which requires acquirers to recognize adjustments to provisional amounts identified during the measurement period (a reasonable time period after the acquisition date) in the reporting period in which such adjustment amounts are determined. For the year ended December 31, 2015, there was no impact to our consolidated financial statements.

Debt Issuance Costs. In the fourth quarter of 2015, we early adopted ASU 2015-03, *Simplifying the Presentation of Debt Issuance Costs*, which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of such debt liability, consistent with debt discounts. In a subsequent Staff Announcement, the SEC announced that it would not object to the deferral and presentation of debt issuance costs relating to line-of-credit arrangements as an asset. We have applied the guidance retrospectively to all periods presented. Such retrospective adoption had an insignificant impact to our consolidated balance sheets, and had no impact to our consolidated statements of income, stockholders' equity, and cash flows.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	December 31,		
	2015	2014	2013
	(In millions)		
Shares outstanding at the beginning of the period	49	46	47
Weighted-average number of shares:			
Issued:			
Common stock offering	3	—	—
Convertible senior notes	—	1	—
Repurchased	—	—	(1)
Denominator for basic net income per share	52	47	46
Effect of dilutive securities:			
Share-based compensation	1	—	1
Convertible senior notes (1)	1	1	—
1.125% Warrants (1)	2	—	—
Denominator for diluted net income per share	56	48	47
Potentially dilutive common shares excluded from calculations (2):			
1.125% Warrants	—	13	12

(1) For more information regarding the convertible senior notes, including the 1.625% Notes, 3.75% Notes, and 3.75% Exchange, refer to Note 12, "Debt." For more information regarding the 1.125% Warrants, refer to Note 13, "Derivatives."

(2) The dilutive effect of all potentially dilutive common shares is calculated using the treasury-stock method. Certain potentially dilutive common shares issuable are not included in the computation of diluted net income per share because to do so would be anti-dilutive. For the years ended December 31, 2014 and 2013, the 1.125% Warrants were excluded from diluted shares outstanding because the exercise price exceeded the average market price of our common stock.

4. Business Combinations

During 2015, we closed on business combinations in both the Health Plans and Other segments. For all of these transactions we applied the acquisition method of accounting, where the total purchase price was allocated, or preliminarily allocated, to tangible and intangible assets acquired, and liabilities assumed based on their respective fair values. For Health Plans acquisitions, in general, only intangible assets are acquired. All of the 2015 acquisitions were funded using available cash.

Health Plans

Consistent with our strategy to grow in our existing markets, we closed the following Health Plans acquisitions in 2015:

Florida. On November 1, 2015, our Florida health plan closed on its acquisition of the Medicaid contracts, and certain assets related to operation of the Medicaid business, of Integral Health Plan, Inc. The final purchase price was $67 million, and the Florida health plan added approximately 101,000 members in the Northwest and Southwest regions of Florida as a result of this transaction. On the closing date, we withheld 10%, or approximately $7 million, of the purchase price to establish an indemnification amount held as security for the seller's indemnification obligations under the purchase agreement. We have recorded the indemnification amount to restricted assets, which will be settled in November 2016. If we do not have any claims against the seller on or before the settlement date, we will pay the full withhold amount to the seller. As of December 31, 2015, we had not made any claims against the withhold amount.

On August 1, 2015, our Florida health plan closed on its acquisition of the Medicaid contracts, and certain assets related to the operation of the Medicaid business, of Preferred Medical Plan, Inc. The final purchase price was $8 million, and the Florida health plan added approximately 23,000 members as a result of this transaction.

Michigan. On September 1, 2015, our Michigan health plan closed on its acquisition of the Medicaid and MIChild contracts, and certain provider agreements, of HealthPlus of Michigan and its subsidiary, HealthPlus Partners, Inc. The purchase price was $47 million, and the Michigan health plan added approximately 68,000 members as a result of this transaction.

For the Health Plans acquisitions closed in 2015, we recorded goodwill amounting to $90 million in the aggregate, which relates to future economic benefits arising from expected synergies to be achieved. Such synergies include use of our existing infrastructure to support the added membership. The amount recorded as goodwill represents intangible assets that do not qualify for separate recognition as identifiable intangible assets. The entire amount recorded as goodwill is deductible for income tax purposes. Refer to the table below for a summary of the intangible assets identified, and their economic lives.

Announced Acquisitions. As described in Note 1, "Basis of Presentation," we announced several Health Plans acquisitions in 2015 that did not close until January 1, 2016. Because the closing dates for these acquisitions fell on January 1, 2016, a holiday, approximately $101 million was recorded to prepaid expenses and other assets as of December 31, 2015, for purchase price amounts funded in December 2015. Such amounts are reported in investing activities in the accompanying consolidated statements of cash flows. The total aggregate purchase price for these acquisitions amounted to approximately $115 million, which will be allocated among goodwill and intangible assets. The initial accounting for these transactions is incomplete.

Transaction costs associated with the Health Plans acquisitions were insignificant.

Other

Pathways. Consistent with our strategy to acquire and develop new products and capabilities, on November 1, 2015, we acquired all of the outstanding ownership interests in Pathways Health and Community Support LLC (Pathways), formerly known as Providence Human Services, LLC. Pathways is one of the largest national providers of accessible, outcome-based behavioral/mental health and social services with operations in 23 states and the District of Columbia.

The following table summarizes the preliminary values of the assets acquired and liabilities assumed at the date of acquisition.

	November 1, 2015 (In millions)
Assets:	
Cash and cash equivalents	$ 20
Receivables	52
Prepaid expenses and other current assets	4
Property and equipment	14
Intangible assets	19
Goodwill	155
Other assets	1
Liabilities:	
Medical claims and benefits payable	(2)
Accounts payable and accrued liabilities	(23)
Deferred revenue	(2)
Other long-term liabilities	(7)
Total purchase price	$ 231

As of December 31, 2015, the purchase price allocation for the acquisition was preliminary and subject to completion. Adjustments to the current fair value estimates in the above table may occur as the process conducted for various valuations and assessments is finalized, including tax assets and liabilities. Goodwill is calculated as the excess of the consideration transferred over the net assets recognized and represents the estimated future economic benefits arising from other assets acquired that could not be individually identified and separately recognized, including expected medical cost synergies to be achieved, and the workforce acquired. Such synergies include the achievement of better outcomes for our members through more effective care coordination and integration, and our retention of the net profit margin captured by the mental health provider. The workforce acquired is a significant component of goodwill because it represents primarily the patient-facing employees, now employed by us, who provide the behavioral/mental health and social services. Approximately 10% of the goodwill recorded at December 31, 2015, is deductible for income tax purposes. This percentage may increase if certain tax elections are completed in 2016.

The gross contractual amount of receivables, at the acquisition date, was approximately $61 million. At the acquisition date, the best estimate of contractual cash flows not expected to be collected was approximately $9 million.

In connection with this acquisition, we incurred approximately $3 million in transaction costs, which are recorded in general and administrative expenses.

The following table presents the intangible assets identified, by segment. The weighted-average amortization period for the Health Plans identified intangible assets, in the aggregate, is 6.4 years. The weighted-average amortization period for the Other identified intangible assets, in the aggregate, is 4.2 years.

	Fair Value	Life (years)
	(In millions)	
Intangible asset type		
Health Plans:		
Contract rights - member list	$ 23	5
Provider network	9	10
Other:		
Contract licenses	5	2
Contract rights - member list	14	5
	$ 51	

5. Fair Value Measurements

We consider the carrying amounts of cash and cash equivalents and other current assets and current liabilities (not including derivatives and current portion of long-term debt) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs

Level 1 financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs

Level 2 financial instruments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs

Level 3 financial instruments are valued using unobservable inputs that represent management's best estimate of what market participants would use in pricing the financial instrument at the measurement date. Our Level 3 financial instruments include the following:

Derivative financial instruments. Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of December 31, 2015 included the price of our common stock, the time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 13, "Derivatives," the 1.125% Call Option asset and the 1.125% Conversion Option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of income. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated. The changes in Level 3 instruments for the year ended December 31, 2015 were insignificant.

Our financial instruments measured at fair value on a recurring basis at December 31, 2015, were as follows:

	Total	Level 1	Level 2	Level 3
		(In millions)		
Corporate debt securities	$ 1,184	$ —	$ 1,184	$ —
Government-sponsored enterprise securities (GSEs)	211	211	—	—
Municipal securities	185	—	185	—
Certificates of deposit	80	—	80	—
U.S. treasury notes	78	78	—	—
Asset-backed securities	63	—	63	—
Subtotal - current investments	1,801	289	1,512	—
1.125% Call Option derivative asset	374	—	—	374
Total assets measured at fair value on a recurring basis	$ 2,175	$ 289	$ 1,512	$ 374
1.125% Conversion Option derivative liability	$ 374	$ —	$ —	$ 374
Total liabilities measured at fair value on a recurring basis	$ 374	$ —	$ —	$ 374

Our financial instruments measured at fair value on a recurring basis at December 31, 2014, were as follows:

	Total	Level 1	Level 2	Level 3
		(In millions)		
Corporate debt securities	$ 641	$ —	$ 641	$ —
GSEs	122	122	—	—
Municipal securities	127	—	127	—
Certificates of deposit	69	—	69	—
U.S. treasury notes	60	60	—	—
Subtotal - current investments	1,019	182	837	—
1.125% Call Option derivative asset	329	—	—	329
Total assets measured at fair value on a recurring basis	$ 1,348	$ 182	$ 837	$ 329
1.125% Conversion Option derivative liability	$ 329	$ —	$ —	$ 329
Total liabilities measured at fair value on a recurring basis	$ 329	$ —	$ —	$ 329

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our senior notes, which are classified as Level 2 financial instruments, are indicated in the following table. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. As described in Note 2, "Significant Accounting Policies," the carrying amount of debt has been reduced by deferred issuance costs for all periods presented.

	December 31, 2015		December 31, 2014	
	Carrying Amount	Total Fair Value	Carrying Amount	Total Fair Value
		(In millions)		
5.375% Notes	$ 689	$ 700	$ —	$ —
1.125% Convertible Notes	448	865	426	767
1.625% Convertible Notes	273	365	264	337
	$ 1,410	$ 1,930	$ 690	$ 1,104

6. Investments

The following tables summarize our investments as of the dates indicated:

	December 31, 2015			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 1,189	$ —	$ 5	$ 1,184
GSEs	212	—	1	211
Municipal securities	186	—	1	185
Certificates of deposit	80	—	—	80
U.S. treasury notes	78	—	—	78
Asset-backed securities	63	—	—	63
	$ 1,808	$ —	$ 7	$ 1,801

	December 31, 2014			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 643	$ —	$ 2	$ 641
GSEs	122	—	—	122
Municipal securities	127	—	—	127
Certificates of deposit	69	—	—	69
U.S. treasury notes	60	—	—	60
	$ 1,021	$ —	$ 2	$ 1,019

The contractual maturities of our investments as of December 31, 2015 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 830	$ 829
Due after one year through five years	967	962
Due after five years through ten years	11	10
	$ 1,808	$ 1,801

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the years ended December 31, 2015, 2014 and 2013 were insignificant.

We have determined that unrealized gains and losses at December 31, 2015 and 2014 are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2015.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 825	$ 4	588	$ 119	$ 1	87
GSEs	182	1	77	—	—	—
Municipal securities	128	1	181	5	—	12
Certificates of deposit	53	—	218	—	—	—
U.S. treasury notes	53	—	32	—	—	—
Asset-backed securities	55	—	47	—	—	—
	$ 1,296	$ 6	1,143	$ 124	$ 1	99

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2014.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 379	$ 1	265	$ 29	$ 1	10
GSEs	75	—	22	3	—	3
Municipal securities	54	—	64	11	—	13
Certificates of deposit	13	—	52	—	—	—
U.S. treasury notes	19	—	13	—	—	—
	$ 540	$ 1	416	$ 43	$ 1	26

7. Receivables

Receivables consist primarily of amounts due from government Medicaid agencies, which may be subject to potential retroactive adjustments. Because all of our receivable amounts are readily determinable and substantially all of our creditors are governmental authorities, our allowance for doubtful accounts is immaterial. The information below is presented by segment.

	December 31,	
	2015	2014
	(In millions)	
California	$ 104	$ 311
Florida	22	2
Illinois	35	32
Michigan	39	20
New Mexico	51	50
Ohio	66	45
Puerto Rico	33	—
South Carolina	6	4
Texas	56	29
Utah	18	6
Washington	53	43
Wisconsin	22	8
Direct delivery and other	6	11
Total Health Plans segment	511	561
Molina Medicaid Solutions segment	37	35
Other segment	49	—
	$ 597	$ 596

8. Property, Equipment, and Capitalized Software

A summary of property, equipment, and capitalized software is as follows:

	December 31,	
	2015	2014
	(In millions)	
Land	$ 16	$ 15
Building and improvements	153	195
Furniture and equipment	250	141
Capitalized software	336	267
	755	618
Less: accumulated depreciation and amortization on building and improvements, furniture and equipment	(167)	(129)
Less: accumulated amortization for capitalized software	(195)	(148)
	(362)	(277)
Property, equipment, and capitalized software, net	$ 393	$ 341

Depreciation recognized for building and improvements, and furniture and equipment was $49 million, $35 million, and $27 million for the years ended December 31, 2015, 2014 and 2013, respectively. Amortization of capitalized software was $52 million, $59 million, and $46 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Molina Center. We acquired the Molina Center in December 2011. Subsequently, in June 2013 we entered into a sale-leaseback transaction for the Molina Center. Due to our continuing involvement with the leased property, the sale did not qualify for sales recognition and we remain the "accounting owner" of the property. See Note 12, "Debt."

Future minimum rental income on noncancelable leases from third party tenants of the Molina Center is sublease rental income, and is reported in other revenue in our consolidated statements of income. The future minimum rental income is as follows:

	2016	2017	2018	2019	2020	Thereafter	Total
	(In millions)						
Future minimum rentals	$ 4	4	4	2	2	1	$ 17

9. Goodwill and Intangible Assets

The following table provides the details of identified intangible assets, by major class, for the periods indicated:

	Cost	Accumulated Amortization	Net Balance
	(In millions)		
Intangible assets:			
Contract rights and licenses	$ 224	$ 120	$ 104
Customer relationships	25	23	2
Contract backlog	24	24	—
Provider networks	27	11	16
Balance at December 31, 2015	$ 300	$ 178	$ 122
Intangible assets:			
Contract rights and licenses	$ 182	$ 105	$ 77
Customer relationships	25	23	2
Contract backlog	24	23	1
Provider networks	18	9	9
Balance at December 31, 2014	$ 249	$ 160	$ 89

Based on the balances of our identifiable intangible assets as of December 31, 2015, we estimate that our intangible asset amortization will be $25 million in 2016, $25 million in 2017, $22 million in 2018, $18 million in 2019, and $13 million in 2020. For a presentation of our goodwill and intangible assets by reportable segment, refer to Note 20, "Segment Information."

The following table presents the balances of goodwill as of December 31, 2015 and 2014:

		Acquisitions by Segment		
	December 31, 2014	Health Plans	Other	December 31, 2015
	(In millions)			
Goodwill, gross	$ 330	$ 90	$ 157	$ 577
Accumulated impairment losses	(58)	—	—	(58)
Goodwill, net	$ 272	$ 90	$ 157	$ 519

The changes in the carrying amounts of goodwill and intangible assets, at cost, in 2015 were due to the acquisitions described in Note 4, "Business Combinations."

10. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by government authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. In connection with a Molina Medicaid Solutions segment state contract, we maintained restricted investments as collateral for a letter of credit as of December 31, 2014. The following table presents the balances of restricted investments:

	December 31,	
	2015	2014
	(In millions)	
Florida	$ 34	$ 29
Michigan	1	1
New Mexico	43	35
Ohio	12	13
Puerto Rico	10	5
South Carolina	—	6
Texas	4	3
Utah	4	4
Wisconsin	1	—
Other	—	1
Total Health Plans segment	109	97
Molina Medicaid Solutions segment	—	5
	$ 109	$ 102

The contractual maturities of our held-to-maturity restricted investments as of December 31, 2015 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 100	$ 100
Due one year through five years	9	9
	$ 109	$ 109

11. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated.

	December 31,		
	2015	2014	2013
	(In millions)		
Fee-for-service claims incurred but not paid (IBNP)	$ 1,191	$ 871	$ 424
Pharmacy payable	88	71	45
Capitation payable	140	28	20
Other	266	231	181
	$ 1,685	$ 1,201	$ 670

"Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various government agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. Non-risk provider payables amounted to $167 million, $119 million and $151 million, as of December 31, 2015, 2014 and 2013, respectively.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts presented for "Components of medical care costs

related to: Prior periods" represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year Ended December 31,		
	2015	2014	2013
	(Dollars in millions)		
Balances at beginning of period	$ 1,201	$ 670	$ 495
Components of medical care costs related to:			
Current period	11,935	8,123	5,434
Prior periods	(141)	(46)	(53)
Total medical care costs	11,794	8,077	5,381
Change in non-risk provider payables	48	(32)	111
Payments for medical care costs related to:			
Current period	10,448	7,064	4,932
Prior periods	910	450	385
Total paid	11,358	7,514	5,317
Balances at end of period	$ 1,685	$ 1,201	$ 670

That portion of our total medical claims and benefits payable liability that is most subject to variability in the estimate is fee-for-service claims incurred but not paid (IBNP). Our IBNP, as included in medical claims and benefits payable, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors.

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims deviation and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate—we only know when the circumstances for any one or more factors are out of the ordinary.

The use of a consistent methodology in estimating our liability for medical claims and benefits payable minimizes the degree to which the under– or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate.

As indicated above, the amounts ultimately paid out on our medical claims and benefits payable liabilities in fiscal years 2015, 2014, and 2013 were less than what we had expected when we had established those liabilities. The differences between our original estimates and the amounts ultimately paid out (or now expected to be ultimately paid out) for the most part related to IBNP. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

2015

We believe that the most significant factors that will determine the accuracy of our IBNP estimates at December 31, 2015 are:

- A new version of diagnosis codes was required for all claims with dates of service October 1, 2015 and later. As a result, payment was delayed for a significant number of claims due to the use of diagnosis codes that were no longer valid. Due to the resulting variability in the ratio of paid to billed amounts, the reserves are subject to more than the usual amount of uncertainty.

- At our Illinois, Puerto Rico and Wisconsin health plans, we overpaid certain provider and outpatient facility claims due to a system configuration error. For this reason, the reserves are subject to more than the usual amount of uncertainty.
- Our Michigan health plan added approximately 68,000 new members under an acquisition in the third quarter of 2015. Because these new members may have different utilization patterns than our legacy members, the reserves are subject to more than the usual amount of uncertainty.
- Our Puerto Rico health plan started operations on April 1, 2015. Because we lack sufficient historical claims data, our reserves as of December 31, 2015 are based on a combination of claims payment experience and the expected claims in the pricing assumptions. For this reason, the reserves are subject to more than the usual amount of uncertainty.

We recognized favorable prior period claims development in the amount of $141 million for the year ended December 31, 2015. This amount represents our estimate as of December 31, 2015, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2014 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation was due primarily to the following factors:

- At our Ohio and California health plans, approximately 61,000 and 100,000 members, respectively, were enrolled in the new Medicaid expansion program during 2014. Also in Ohio, approximately 17,000 members were enrolled in the new MMP program in 2014. Because we lacked sufficient historical claims data, we initially estimated the reserves for these new members based upon a number of factors that included pricing assumptions provided by the state; our expectations regarding pent up demand; our beliefs about the speed at which new members would utilize health care services; and other factors. Our actual costs were ultimately less than expected.
- At our New Mexico health plan, the state implemented a retroactive increase to the provider fee schedules in mid-2014. As a result, many claims that were previously settled were reopened, and subject to, additional payment. Because our reserving methodology is most accurate when claims payment patterns are consistent and predictable, the payment of additional amounts on claims that in some cases had been settled more than six months before added a substantial degree of complexity to our liability estimation process. Due to the difficulties in addressing that added complexity, liabilities recorded as of December 31, 2014, were in excess of amounts ultimately paid.
- At our Washington health plan, in 2015 we collected amounts related to certain claims paid in 2013. Such collections were not anticipated in our reserves as of December 31, 2014.

2014

We recognized favorable prior period claims development in the amount of $46 million for the year ended December 31, 2014. This amount represented our estimate as of December 31, 2014, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2013 was more than the amount that was ultimately paid out in satisfaction of that liability. We believe the overestimation was due primarily to the following factors:

- At our Ohio health plan, we entered new regions in the state, and a new product, ABD Kids, in July 2013. Because we lacked sufficient historical claims data, we initially estimated the reserves for these new members based upon a number of factors that included pricing assumptions provided by the state; our expectations regarding pent up demand; our beliefs about the speed at which new members would utilize health care services; and other factors. Our actual costs were ultimately less than expected.
- At our Michigan health plan, we overestimated the impact of certain unpaid potentially high-dollar claims. In addition, we overestimated the impact of the flu season on the outpatient claims for November and December 2013, which caused an overestimation in our outpatient reserve liability as of December 31, 2013.

2013

We recognized favorable prior period claims development in the amount of $53 million for the year ended December 31, 2013. This amount represented our estimate as of December 31, 2013, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2012 was more than the amount that was ultimately paid out in satisfaction of that liability. We believe the overestimation was due primarily to the following factors:

- At our Washington health plan certain high-cost newborns, as well as other high-cost disabled members, were covered by the health plan effective July 1, 2012. Because we lacked sufficient historical claims data, we initially estimated the reserves for these new members based upon a number of factors. Our actual costs were ultimately less than expected.
- At our New Mexico health plan, we overestimated the impact of certain high-dollar outstanding claim payments as of December 31, 2012.

- At our Ohio health plan, we overestimated the impact of several potential high-dollar claims relating to our ABD members.

12. Debt

As of December 31, 2015, contractual maturities of debt for the years ending December 31 are as follows (in millions):

	Total	2016	2017	2018	2019	2020	Thereafter
5.375% Notes	$ 700	$ —	$ —	$ —	$ —	$ —	$ 700
1.125% Convertible Notes	550	—	—	—	—	550	—
1.625% Convertible Notes (1)	302	—	—	—	—	—	302
Other	1	1	—	—	—	—	—
	$ 1,553	$ 1	$ —	$ —	$ —	$ 550	$ 1,002

(1) The 1.625% Notes have a contractual maturity date in 2044; however, on specified dates beginning in 2018 as described below, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes, or we may redeem any or all of the 1.625% Notes.

Substantially all of our debt is held at the parent, which is reported in the Other segment. The principal amounts, unamortized discount (net of premium related to 1.625% Notes), unamortized issuance costs, and net carrying amounts of debt were as follows:

	Principal Balance	Unamortized Discount	Unamortized Issuance Costs	Net Carrying Amount
	(In millions)			
December 31, 2015:				
5.375% Notes	$ 700	$ —	$ 11	$ 689
1.125% Convertible Notes	550	95	7	448
1.625% Convertible Notes	302	25	4	273
Other	1	—	—	1
	$ 1,553	$ 120	$ 22	$ 1,411
December 31, 2014:				
1.125% Convertible Notes	$ 550	$ 115	$ 9	$ 426
1.625% Convertible Notes	302	33	5	264
	$ 852	$ 148	$ 14	$ 690

	Years Ended December 31,		
	2015	2014	2013
	(In millions)		
Interest cost recognized for the period relating to:			
Contractual interest coupon rate	$ 17	$ 13	$ 13
Amortization of the discount	29	26	22
	$ 46	$ 39	$ 35

5.375% Senior Notes due 2022. On November 10, 2015, we completed the private offering of $700 million aggregate principal amount of senior notes (5.375% Notes) due November 15, 2022, unless earlier redeemed. Interest is payable semiannually in arrears on May 15 and November 15, beginning on May 15, 2016. The 5.375% Notes are not convertible into our common stock or any other securities.

The 5.375% Notes are guaranteed by certain of our wholly owned subsidiaries. The 5.375% Notes and the guarantees are effectively subordinated to all existing and future secured debt of us and our guarantors to the extent of the assets securing such debt. In addition, the 5.375% Notes and the guarantees are structurally subordinated to all indebtedness and other liabilities and preferred stock of our subsidiaries that do not guarantee the 5.375% Notes.

We may redeem some or all of the 5.375% Notes at any time, and prior to August 15, 2022, at a price equal to 100% of the principal amount redeemed plus accrued and unpaid interest thereon, plus a "make-whole" premium. Thereafter, we may redeem some or all of the 5.375% Notes at a price equal to 100% of the principal amount redeemed plus accrued and unpaid

interest thereon. The 5.375% Notes contain customary non-financial covenants and change of control provisions.

In connection with the issuance and sale of the 5.375% Notes, we entered into a registration rights agreement. Under this agreement, we will use commercially reasonable efforts to register substantially identical notes (the Exchange Notes) with the SEC in 2016. We will then offer such freely tradable Exchange Notes in exchange for the 5.375% Notes. We will pay additional interest on the 5.375% Notes if the Exchange Notes offering is not completed timely.

Credit Facility. In June 2015, we entered into an unsecured $250 million revolving credit facility (Credit Facility). The Credit Facility has a term of five years and all amounts outstanding will be due and payable on June 12, 2020. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $350 million. As of December 31, 2015, outstanding letters of credit amounting to $6 million reduced the borrowing capacity to $244 million, and no amounts were outstanding under the Credit Facility.

Borrowings under the Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee.

Although the Credit Facility is not secured by any of our assets, certain of our wholly owned subsidiaries have jointly and severally guaranteed our obligations under the Credit Facility.

The Credit Facility contains customary non-financial and financial covenants, including a minimum fixed charge coverage ratio, a maximum debt-to-EBITDA ratio and minimum statutory net worth. At December 31, 2015, we were in compliance with all financial covenants under the Credit Facility.

1.125% Cash Convertible Senior Notes due 2020. In February 2013, we issued $550 million aggregate principal amount of 1.125% cash convertible senior notes (1.125% Notes) due January 15, 2020, unless earlier repurchased or converted. Interest is payable semiannually in arrears on January 15 and July 15.

The 1.125% Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. The initial conversion rate for the 1.125% Notes is 24.5277 shares of our common stock per $1,000 principal amount of the 1.125% Notes. This represents an initial conversion price of approximately $40.77 per share of our common stock. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture. We may not redeem the 1.125% Notes prior to the maturity date. Holders may convert their 1.125% Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;

- during the five business day period immediately after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;

- upon the occurrence of specified corporate events; or

- at any time on or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date.

The 1.125% Notes met the stock price trigger in the quarter ended December 31, 2015, and are convertible into cash through at least March 31, 2016. Because the 1.125% Notes may be converted to cash within 12 months, the $448 million carrying amount is reported in current portion of long-term debt as of December 31, 2015.

The 1.125% Notes contain an embedded cash conversion option (the 1.125% Conversion Option), which was separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the 1.125% Conversion Option settles or expires. The initial fair value liability of the 1.125% Conversion Option simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount).

This discount is amortized to the 1.125% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate of approximately 6%. As of December 31, 2015, the 1.125% Notes have a remaining amortization period of 4.0 years. The 1.125% Notes' if-converted value exceeded their principal amount by approximately $332 million and $93 million as of December 31, 2015 and December 31, 2014, respectively.

1.625% Convertible Senior Notes due 2044. In September 2014, we issued $125 million principal amount of 1.625% convertible senior notes (1.625% Notes) due August 15, 2044, unless earlier repurchased, redeemed or converted. Combined with the 1.625% Notes issued in connection with the 3.75% Exchange described below, the aggregate principal amount issued under the 1.625% Notes was $302 million.

Interest is payable semiannually in arrears on February 15 and August 15. In addition, beginning with the semiannual interest period commencing immediately following the interest payment date on August 15, 2018, contingent interest will accrue on the 1.625% Notes during any semiannual interest period in which certain conditions or events occur, or under certain events of default. For example, additional interest of 0.25% per year will be payable on the 1.625% Notes for any semiannual interest period for which the principal amount of 1.625% Notes outstanding is less than $100 million.

The 1.625% Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.625% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The initial conversion rate for the 1.625% Notes is 17.2157 shares of our common stock per $1,000 principal amount of the 1.625% Notes. This represents an initial conversion price of approximately $58.09 per share of our common stock. Upon conversion, we will pay cash and, if applicable, deliver shares of our common stock to the converting holder in an amount per $1,000 principal amount of 1.625% Notes equal to the settlement amount (as defined in the related indenture).

Holders may convert their 1.625% Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on September 30, 2014 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;
- during the five business day period after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.625% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;
- upon the occurrence of specified corporate events;
- if we call any 1.625% Notes for redemption, at any time until the close of business on the business day immediately preceding the redemption date;
- during the period from, and including, May 15, 2018 to the close of business on the business day immediately preceding August 19, 2018; or
- at any time on or after February 15, 2044 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.625% Notes, in integral multiples of $1,000 principal amount, at the option of the holder regardless of the foregoing circumstances.

As of December 31, 2015, the 1.625% Notes were not convertible.

We may not redeem the 1.625% Notes prior to August 19, 2018. On or after August 19, 2018, we may redeem for cash all or part of the 1.625% Notes, except for the 1.625% Notes we are required to repurchase in connection with a fundamental change or on any specified repurchase date. The redemption price for the 1.625% Notes will equal 100% of the principal amount of the 1.625% Notes being redeemed, plus accrued and unpaid interest. In addition, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes for cash on August 19, 2018, August 19, 2024, August 19, 2029, August 19, 2034 and August 19, 2039, in each case, at a specified price equal to 100% of the principal amount of the 1.625% Notes to be repurchased, plus accrued and unpaid interest.

Because the 1.625% Notes are net share settled and have cash settlement features, we have allocated the principal amount between a liability component and an equity component. The reduced carrying value on the 1.625% Notes resulted in a debt discount that is amortized back to the 1.625% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. The expected life of the debt is approximately four years, beginning on the issuance date and

ending on the first date we may redeem the notes in August 2018. As of December 31, 2015, the 1.625% Notes have a remaining amortization period of 2.6 years. This has resulted in our recognition of interest expense on the 1.625% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 5%. The outstanding 1.625% Notes' if-converted value exceeded their principal amount by approximately $10 million as of December 31, 2015, and did not exceed their principal amount as of December 31, 2014. At December 31, 2015 and December 31, 2014, the equity component of the 1.625% Notes, including the impact of deferred taxes, was $23 million.

3.75% Exchange. In August 2014, we entered into separate, privately negotiated, exchange agreements (the 3.75% Exchange) with certain holders of our outstanding 3.75% convertible senior notes due 2014 (the 3.75% Notes). In this transaction, we exchanged $177 million aggregate principal amount of the 3.75% Notes for $177 million principal amount of 1.625% convertible senior notes due 2044, approximately 2 million shares of our common stock, and payment of accrued interest on the exchanged 3.75% Notes; additionally, we issued approximately 81,000 shares of common stock for services rendered in connection with the 3.75% Exchange. We did not receive any proceeds from the 3.75% Exchange.

3.75% Notes. As described above, we entered into the 3.75% Exchange transaction in August 2014, under which we exchanged $177 million of the outstanding principal amount of the 3.75% Notes for the 1.625% Notes. The remaining $10 million principal amount was repaid in full in October 2014.

Lease Financing Obligations. In 2013, we entered into a sale-leaseback transaction for the Molina Center located in Long Beach, California, and our Ohio health plan office building located in Columbus, Ohio. Due to our continuing involvement with these leased properties, the sale did not qualify for sales recognition and we remain the "accounting owner" of the properties. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated over their remaining useful lives. The lease financing obligation is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Rent will increase 3% per year through the initial term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest amounted to $13 million for both years ended December 31, 2015 and 2014.

As described and defined in further detail in Note 17, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings. We have concluded that we are the accounting owner of the buildings due to our continuing involvement with the properties. We have recorded $36 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of December 31, 2015, which represents the total cost incurred by the Landlord for the construction of the buildings, net of accumulated depreciation. As of December 31, 2015 and December 31, 2014, the aggregate amount recorded to lease financing obligations, including the current portion, amounted to $40 million and $41 million, respectively. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense was $4 million and $3 million for the year ended December 31, 2015 and 2014, respectively. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was $1 million for both years ended December 31, 2015 and 2014. For information regarding the future minimum lease obligation, refer to Note 19, "Commitments and Contingencies."

13. Derivatives

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

		December 31,	
	Balance Sheet Location	2015	2014
		(In millions)	
Derivative asset:			
1.125% Call Option	Current assets: Derivative asset	$ 374	$ —
	Non-current assets: Derivative asset	$ —	$ 329
Derivative liability:			
1.125% Conversion Option	Current liabilities: Derivative liability	$ 374	$ —
	Non-current liabilities: Derivative liability	$ —	$ 329

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of income, and reported in other expense, net. Gains and losses for our derivative financial instruments are presented individually in the consolidated statements of cash flows, supplemental cash flow information.

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Notes in 2013, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments in excess of the principal amount of the notes due upon any conversion of the 1.125% Notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 5, "Fair Value Measurements."

1.125% Conversion Option. The embedded cash conversion option within the 1.125% Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Conversion Option, refer to Note 5, "Fair Value Measurements."

As of December 31, 2015, the 1.125% Call Option and the 1.125% Conversion Option were classified as a current asset and current liability, respectively, because the 1.125% Notes may be converted within 12 months of December 31, 2015, as described in Note 12, "Debt."

14. Income Taxes

The provision for income taxes for continuing operations consisted of the following:

	Year Ended December 31,		
	2015	2014	2013
	(In millions)		
Current:			
Federal	$ 172	$ 72	$ 67
State	8	3	—
Foreign	6	—	—
Total current	186	75	67
Deferred:			
Federal	(10)	—	(25)
State	4	(2)	(6)
Foreign	(1)	—	—
Total deferred	(7)	(2)	(31)
	$ 179	$ 73	$ 36

A reconciliation of the U.S. federal statutory income tax rate to the combined effective income tax rate for continuing operations is as follows:

	Year Ended December 31,		
	2015	2014	2013
Statutory federal tax rate	35.0 %	35.0 %	35.0 %
State income taxes, net of federal benefit	2.4	0.4	(0.5)
Change in unrecognized tax benefits	0.9	(0.1)	(3.7)
Nondeductible health insurer fee (HIF)	17.0	22.9	—
Nondeductible compensation	0.6	(4.1)	9.6
Nondeductible fair value of 1.125% Warrants	—	—	2.4
Other	(0.4)	(0.3)	2.0
Effective tax rate	55.5 %	53.8 %	44.8 %

Our effective tax rate is based on expected income, statutory tax rates, and tax planning opportunities available to us in the various jurisdictions in which we operate. Significant management estimates and judgments are required in determining our

effective tax rate. We are routinely under audit by federal, state, or local authorities regarding the timing and amount of deductions, nexus of income among various tax jurisdictions, and compliance with federal, state, foreign, and local tax laws.

During 2014, the Internal Revenue Service (IRS) issued final regulations related to compensation deduction limitations applicable to certain health insurance issuers. Pursuant to these final regulations, we reversed amounts treated as nondeductible in 2013 and recognized a tax benefit during 2014.

During 2015, 2014, and 2013, excess tax benefits from share-based compensation amounted to $8 million, $3 million, and $2 million, respectively. These amounts were recorded as a decrease to income taxes payable and an increase to additional paid-in capital.

Deferred tax assets and liabilities are classified as non-current. Significant components of our deferred tax assets and liabilities as of December 31, 2015 and 2014 were as follows:

	December 31,	
	2015	2014
	(In millions)	
Accrued expenses	$ 37	$ 13
Reserve liabilities	14	4
Other accrued medical costs	5	4
Net operating losses	7	3
Unrealized losses	2	1
Unearned premiums	21	22
Lease financing obligation	35	34
Deferred compensation	8	10
Tax credit carryover	8	8
Valuation allowance	(9)	(6)
Total deferred income tax assets, net of valuation allowance	128	93
Prepaid expenses	(9)	(6)
Depreciation and amortization	(83)	(57)
Basis in debt	(18)	(15)
Total deferred income tax liabilities	(110)	(78)
Net deferred income tax asset - long term	$ 18	$ 15

At December 31, 2015, we had state net operating loss carryforwards of $180 million, which begin expiring in 2016.

At December 31, 2015, we had California enterprise zone tax credit carryovers of $11 million, which will begin to expire in 2024, and foreign tax credit carryovers of $1 million, which expire in 2025.

We evaluate the need for a valuation allowance taking into consideration the ability to carry back and carry forward tax credits and losses, available tax planning strategies and future income, including reversal of temporary differences. We have determined that as of December 31, 2015, $9 million of deferred tax assets did not satisfy the recognition criteria due to uncertainty regarding the realization of some of our state tax operating loss and foreign tax credit carryforwards. Therefore, we increased our valuation allowance by $3 million, from $6 million at December 31, 2014, to $9 million as of December 31, 2015.

We recognize tax benefits only if the tax position is more likely than not to be sustained. We are subject to income taxes in the United States, Puerto Rico, and numerous state jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. These reserves are established when we believe that certain positions might be challenged despite our belief that our tax return positions are fully supportable. We adjust these reserves in light of changing facts and circumstances, such as the outcome of tax audits. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate.

The roll forward of our unrecognized tax benefits is as follows:

	Year Ended December 31,		
	2015	2014	2013
	(In millions)		
Gross unrecognized tax benefits at beginning of period	$ (3)	$ (8)	$ (11)
Increases in tax positions for current year	(1)	—	—
Increases in tax positions for prior years	(5)	(1)	(2)
Decreases in tax positions for prior years	—	—	5
Settlements	—	6	—
Gross unrecognized tax benefits at end of period	$ (9)	$ (3)	$ (8)

The total amount of unrecognized tax benefits at December 31, 2015, 2014 and 2013 that, if recognized, would affect the effective tax rates is $7 million, $2 million and $6 million, respectively. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $1 million due to the normal expiration of statutes of limitation.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. Amounts accrued for the payment of interest and penalties as of December 31, 2015, and 2014 were insignificant.

We are under examination by the IRS for calendar year 2011 and may be subject to examination for calendar years 2012 through 2014. We are under examination, or may be subject to examination, in Puerto Rico and certain state and local jurisdictions, with the major state jurisdictions being California, Utah, and Michigan, for the years 2010 through 2014.

15. Stockholders' Equity

Stockholders' equity increased $547 million during the year ended December 31, 2015. The increase was primarily due to the common stock offering described below, net income of $143 million, and $34 million related to share-based compensation transactions.

Common Stock Offering. In June 2015, we completed an underwritten public offering of 5,750,000 shares of our common stock, including the over-allotment option. Net of issuance costs, proceeds from the offering amounted to $373 million, or $64.90 per share, resulting in an increase to additional paid-in capital. We are using the proceeds to finance working capital needs, acquisitions, capital expenditures, and other general corporate activities.

1.125% Warrants. In connection with the 1.125% Notes Call Spread Overlay transaction described in Note 13, "Derivatives," in 2013, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period (beginning on April 15, 2020) under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock exceeds the applicable strike price of the 1.125% Warrants. Refer to Note 3, "Net Income per Share," for dilution information for the periods presented. We will not receive any additional proceeds if the 1.125% Warrants are exercised.

Securities Repurchase Programs. Effective as of December 16, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock or senior notes. This newly authorized repurchase program extends through December 31, 2016.

In February 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. We did not repurchase any shares under this program, which expired December 31, 2015.

Stock Incentive Plans. At December 31, 2015, we had employee equity incentives outstanding under two plans: (1) the 2011 Equity Incentive Plan (2011 Plan); and (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded).

The 2011 Plan provides for the award of restricted shares and units, performance shares and units, stock options and stock bonuses to the company’s officers, employees, directors, consultants, advisers, and other service providers. The 2011 Plan provides for the issuance of up to 4.5 million shares of common stock.

Restricted share awards are granted with a fair value equal to the market price of our common stock on the date of grant, and generally vest in equal annual installments over periods up to four years from the date of grant. Stock option awards have an

exercise price equal to the fair market value of our common stock on the date of grant, generally vest in equal annual installments over periods up to four years from the date of grant, and have a maximum term of ten years from the date of grant.

In connection with our stock plans, we issued approximately 830,000 shares of common stock, net of shares used to settle employees' income tax obligations, in the year ended December 31, 2015.

The following table illustrates the components of our share-based compensation expense that are reported in general and administrative expenses in the consolidated statements of income:

	Year Ended December 31,					
	2015		2014		2013	
	(In millions)					
	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount
Restricted stock and performance awards	$ 19	$ 13	$ 19	$ 12	$ 26	$ 23
Employee stock purchase plan and stock options	4	3	3	2	3	2
	$ 23	$ 16	$ 22	$ 14	$ 29	$ 25

As of December 31, 2015, there was $25 million of total unrecognized compensation expense related to unvested restricted share awards, including those with performance conditions, which we expect to recognize over a remaining weighted-average period of 1.6 years. This unrecognized compensation cost assumes an estimated forfeiture rate of 6.5% for non-executive employees as of December 31, 2015. As of December 31, 2015, the unrecognized compensation expense related to unvested stock options was insignificant.

Restricted stock. Restricted and performance stock activity for the year ended December 31, 2015 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2014	1,282,072	$ 33.55
Granted - restricted shares	273,710	64.56
Granted - performance shares	162,827	63.90
Vested - restricted shares	(371,489)	34.58
Vested - performance shares	(264,604)	30.80
Forfeited	(47,759)	37.51
Unvested balance as of December 31, 2015	1,034,757	46.68

The total fair value of restricted and performance share awards granted during the years ended December 31, 2015, 2014, and 2013 was $28 million, $25 million, and $33 million, respectively. The total fair value of restricted share awards, including those with performance or market conditions which vested during the years ended December 31, 2015, 2014, and 2013 was $39 million, $24 million, and $22 million, respectively.

In 2015, our named executive officers were granted approximately 163,000 restricted shares with performance and market conditions. The grant date fair value for the awards with market conditions were determined based on a Monte Carlo Simulation which projected Total Stockholder Return (TSR) over the performance period using correlations and volatilities of our ISS peer groups. The weighted-average grant date fair value per share of the 2015 performance awards based on three-year TSR was $49.43, determined using additional inputs as follows: risk-free interest rate of 0.8%, dividend yield of 0%, and expected life of 2.8 years.

As of December 31, 2015, there were approximately 377,000 unvested restricted shares outstanding which contained one or more performance measures. In the event the vesting conditions are not achieved, the awards will lapse. Based on our assessment as of December 31, 2015, we expect the performance conditions relating to approximately 199,000 of these outstanding restricted share awards to be met in full.

In 2015, we reversed approximately $3 million in share-based compensation expense recognized from grant date through March 31, 2015, related to 178,000 of the awards granted in 2014, due to management's determination in the second quarter of 2015 that the achievement of the underlying performance conditions was not probable.

In December 2015, approximately 229,000 restricted stock awards with performance conditions, granted in 2013, vested due to achievement of the total revenue metric as defined in the terms of the grant.

Employee Stock Purchase Plan. Under our employee stock purchase plan (ESPP), eligible employees may purchase common shares at 85% of the lower of the fair market value of our common stock on either the first or last trading day of each six-month offering period. Each participant is limited to a maximum purchase of $25,000 (as measured by the fair value of the stock acquired) per year through payroll deductions. We estimate the fair value of the stock issued using the Black-Scholes option pricing model. For the years ended December 31, 2015, 2014, and 2013, the inputs to this model were as follows: risk-free interest rates of approximately 0.1%; expected volatilities ranging from approximately 30% to 50%, dividend yields of 0%, and an average expected life of 0.5 years. We issued approximately 301,900, 327,200 and 299,600 shares of our common stock under the ESPP during the years ended December 31, 2015, 2014, and 2013, respectively. The 2011 ESPP provides for the issuance of up to three million shares of common stock.

Stock Options. No stock options were granted in 2015 and 2014, and stock options outstanding as of December 31, 2015 were insignificant. The grant date fair value per share of the stock options awarded to the new members of our board of directors during 2013 was $14.67. We estimated the fair value of each stock option award using the Black-Scholes option pricing model, with the following inputs: risk-free interest rate of 1.4%, expected volatility of 41.3%, dividend yield of 0%, and expected life of 7 years. The total intrinsic value of options exercised during the years ended December 31, 2015, 2014, and 2013 was $6 million, $2 million, and $1 million, respectively.

16. Employee Benefits

We sponsor defined contribution 401(k) plans that cover substantially all full-time salaried and hourly employees of our company and its subsidiaries. Eligible employees are permitted to contribute up to the maximum amount allowed by law. We match up to the first 4% of compensation contributed by employees. Expense recognized in connection with our contributions to the 401(k) plans totaled $27 million, $21 million and $13 million in the years ended December 31, 2015, 2014, and 2013, respectively.

We also have a nonqualified deferred compensation plan for certain key employees. Under this plan, eligible participants may defer up to 100% of their base salary and 100% of their bonus to provide tax-deferred growth for retirement. The funds deferred are invested in corporate-owned life insurance, under a rabbi trust.

17. Related Party Transactions

Prior to December 22, 2015, we were the lessee under a lease with 6th & Pine Development, LLC (the Landlord) for two office buildings. The principal members of the Landlord were John C. Molina, our chief financial officer and a director of Molina Healthcare, Inc., and his wife. In addition, in connection with the development of the buildings being leased, John C. Molina pledged certain of his common stock holdings in Molina Healthcare, Inc. Dr. J. Mario Molina, our chief executive officer, president and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary. On December 22, 2015, the Landlord assigned the lease to an unrelated third party. There were no significant changes to the lease other than the assignment to the new owner. As a result of the assignment, as of December 31, 2015, amounts previously reported as lease financing obligations - related party were reported in lease financing obligations on the accompanying consolidated balance sheets. For information regarding the lease financing obligation associated with this lease, refer to Note 12, "Debt."

Our California health plan has entered into a provider agreement with Pacific Healthcare IPA (Pacific), which is 50% owned by the brother-in-law of Dr. J. Mario Molina and John C. Molina. Under the terms of this provider agreement, the California health plan paid Pacific approximately $1 million in each of 2015 and 2014 for medical care provided to health plan members. Payments in 2013 were insignificant.

Refer to Note 18, "Variable Interest Entities (VIEs)," for a discussion of the Joseph M. Molina, M.D. Professional Corporations.

18. Variable Interest Entities (VIEs)

Joseph M. Molina M.D., Professional Corporations

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's primary shareholder is Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides primary care medical services through its employed physicians and other medical professionals. Beginning in 2014, JMMPC also provided certain specialty referral services to our California health plan members through a contracted provider network. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, Molina Medical Management, Inc. (MMM), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will operate at break even, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by MMM are reviewed annually to assure the achievement of this goal.

Separately, our California, Florida, New Mexico, Utah and Washington health plans have entered into primary care services agreements with JMMPC. These agreements direct our health plans to perform a monthly reconciliation, to either fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, such that JMMPC will derive no profit or loss. Because the MMM services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are generally insignificant.

We have determined that JMMPC is a VIE, and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of December 31, 2015, JMMPC had total assets of $17 million, and total liabilities of $17 million. As of December 31, 2014, JMMPC had total assets of $31 million, and total liabilities of $31 million.

Our maximum exposure to loss as a result of our involvement with JMMPC is generally limited to the amounts needed to fund JMMPC's ongoing payroll, employee benefits and medical care costs associated with JMMPC's specialty referral activities. We believe that such loss exposures will be immaterial to our consolidated operating results and cash flows for the foreseeable future.

New Markets Tax Credit

In 2011, our New Mexico data center subsidiary entered into a financing transaction with Wells Fargo Community Investment Holdings, LLC (Wells Fargo), its wholly owned subsidiary New Mexico Healthcare Data Center Investment Fund, LLC (Investment Fund), and certain of Wells Fargo's affiliated Community Development Entities (CDEs), in connection with our participation in the federal government's New Markets Tax Credit Program (NMTC). The NMTC was established by Congress to facilitate new or increased investments in businesses and real estate projects in low-income communities. The NMTC attracts investment capital to low-income communities by permitting investors to receive a tax credit against their federal income tax return in exchange for equity investments in specialized financial institutions, called CDEs, which provide financing to qualified active businesses operating in low-income communities. The credit amounts to 39% of the original investment amount and is claimed over a period of seven years (five percent for each of the first three years, and six percent for each of the remaining four years). The investment in the CDE cannot be redeemed before the end of the seven-year period.

In 2011, as a result of a series of simultaneous financing transactions, Wells Fargo contributed capital of $6 million to the Investment Fund, and Molina Healthcare, Inc. loaned the principal amount of $16 million to the Investment Fund. The Investment Fund then contributed the proceeds to certain CDEs, which, in turn, loaned the proceeds of $21 million to our New Mexico data center subsidiary. Wells Fargo will be entitled to claim the NMTC while we effectively received net loan proceeds equal to Wells Fargo's contribution to the Investment Fund, or approximately $6 million. Additionally, financing costs incurred in structuring the arrangement amounting to $1 million were deferred and will be recognized as expense over the term of the loans. This transaction also includes a put/call feature that becomes enforceable at the end of the seven-year compliance period. Wells Fargo may exercise its put option or we can exercise the call, both of which will serve to transfer the debt obligation to us. Incremental costs to maintain the structure during the compliance period will be recognized as incurred.

We have determined that the financing arrangement with Investment Fund and CDEs is a VIE, and that we are the primary beneficiary of the VIE. We reached this conclusion based on the following:

- The ongoing activities of the VIE—collecting and remitting interest and fees and NMTC compliance—were all considered in the initial design and are not expected to significantly affect economic performance throughout the life of the VIE;
- Contractual arrangements obligate us to comply with NMTC rules and regulations and provide various other guarantees to Investment Fund and CDEs;
- Wells Fargo lacks a material interest in the underling economics of the project; and
- We are obligated to absorb losses of the VIE.

Because we are the primary beneficiary of the VIE, we have included it in our consolidated financial statements. Wells Fargo's contribution of $6 million is included in cash at December 31, 2015 and December 31, 2014 and the offsetting Wells Fargo's interest in the financing arrangement is included in other liabilities in the accompanying consolidated balance sheets.

As described above, this transaction also includes a put/call provision whereby we may be obligated or entitled to repurchase Wells Fargo's interest in the Investment Fund. The value attributed to the put/call is nominal. The NMTC is subject to 100% recapture for a period of seven years as provided in the Internal Revenue Code and applicable U.S. Treasury regulations. We are required to be in compliance with various regulations and contractual provisions that apply to the NMTC arrangement. Non-compliance with applicable requirements could result in Wells Fargo's projected tax benefits not being realized and, therefore, require us to indemnify Wells Fargo for any loss or recapture of NMTCs related to the financing until such time as the recapture provisions have expired under the applicable statute of limitations. We do not anticipate any credit recaptures will be required in connection with this arrangement.

19. Commitments and Contingencies

Certain Leasing Transactions. As described in Note 12, "Debt," we entered into certain leasing transactions that have been classified as lease financing obligations. Such leases have initial terms that range from 16.5 years to 25 years. Additionally, the leases provide for renewal options ranging from 10 years to 25 years in aggregate.

Operating Leases. We lease administrative and clinic facilities and certain equipment under non-cancelable operating leases expiring at various dates through 2025. Facility lease terms generally range from five to 10 years with one to two renewal options for extended terms. In most cases, we are required to make additional payments under facility operating leases for taxes, insurance and other operating expenses incurred during the lease period. Certain of our leases contain rent escalation clauses or lease incentives, including rent abatements and tenant improvement allowances. Rent escalation clauses and lease incentives are taken into account in determining total rent expense to be recognized during the lease term.

Future minimum lease payments by year and in the aggregate under all operating leases and lease financing obligations consist of the following approximate amounts:

	Lease Financing Obligations	Operating Leases	Total
		(In millions)	
2016	$ 15	$ 49	$ 64
2017	16	47	63
2018	16	41	57
2019	16	32	48
2020	17	24	41
Thereafter	323	39	362
	$ 403	$ 232	$ 635

Rental expense related to operating leases amounted to $44 million, $32 million, and $25 million for the years ended December 31, 2015, 2014, and 2013, respectively. The amounts reported in "Lease Financing Obligations" above represent our contractual lease commitments for the properties described in Note 12, "Debt" under the subheading "Lease Financing Obligations." Payments under these leases adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income.

Employment Agreements. In 2002 we entered into employment agreements with our Chief Executive Officer and Chief Financial Officer, which were amended and restated in 2009. These employment agreements had initial terms of one to three years and are subject to automatic one-year extensions thereafter. Should the executives be terminated without cause or resign for good reason before a change of control, as defined, we will pay one year's base salary and termination bonus, as defined, in addition to full vesting of equity compensation, and a cash payment for health and welfare benefits.

In 2013 we entered into employment agreements with our Chief Operating Officer, Chief Accounting Officer, and Chief Legal Officer. These agreements continue until terminated by us, or the executive resigns. If the executive's employment is terminated by us without cause or the executive resigns for good reason, the executive will be entitled to receive one year's base salary and termination bonus, as defined, full vesting of time-based equity compensation, and a cash payment for health and welfare benefits.

Payment of the severance benefits described above is contingent upon the executive's signing a release agreement waiving claims against us. If the executives are terminated for cause, no further payments are due under the contracts.

Legal Proceedings. The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

State of Louisiana. On June 26, 2014, the state of Louisiana filed a Petition for Damages against Molina Medicaid Solutions, Molina Healthcare, Inc., Unisys Corporation, and Paramax Systems Corporation, a subsidiary of Unisys, in the Parish of Baton Rouge, 19th Judicial District, versus number 631612. The Petition alleges that between 1989 and 2012, the defendants utilized an incorrect reimbursement formula for the payment of pharmaceutical claims. We believe we have several meritorious defenses to the claims of the state, and any liability for the alleged claims is not currently probable or reasonably estimable.

United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al. On or around October 14, 2014, Molina Healthcare of California, Molina Healthcare of California Partner Plan, Inc., Mobile Medical Examination Services, Inc. (MedXM), and other health plan defendants were served with a Complaint previously filed under seal in the Central District Court of California by Relator, Anita Silingo, Case No. SACV13-1348-FMO(SHx). The Complaint alleges that MedXM improperly modified medical records and otherwise took inappropriate steps to increase members' risk adjustment scores, and that the defendants, including Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc., purportedly turned a "blind eye" to these unlawful practices. The Department of Justice has declined to intervene. The District Court dismissed this action as to Molina without leave to amend as to some allegations and with leave to amend as to other allegations. On October 22, 2015, the Relator filed a third amended complaint. We believe that we have several meritorious defenses to the claims of the Relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

Hospital Management Contract. During the fourth quarter of 2015, we recorded a contract settlement charge of approximately $15 million as a result of our termination of a hospital management agreement.

Professional Liability Insurance. We carry medical professional liability insurance for health care services rendered in the primary care institutions that we manage. In addition, we also carry errors and omissions insurance for all Molina entities.

Provider Claims. Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

States' Budgets. From time to time the states in which our health plans operate may delay premium payments. For example, the state of Illinois is currently operating without a budget for its fiscal year ending June 30, 2016. As of December 31, 2015, our Illinois health plan served approximately 98,000 members, and recognized premium revenue of approximately $397 million for the year ended December 31, 2015. As of February 23, 2016, Illinois is current with its premium payments.

In another example, the Commonwealth of Puerto Rico has reported that it may lack sufficient resources to fund all necessary governmental programs including health care-related programs, as well as meet its debt obligations for its fiscal year ending June 30, 2016. Our Puerto Rico health plan became operational on April 1, 2015. As of December 31, 2015, the plan served approximately 348,000 members and recognized premium revenue of approximately $192 million in the fourth quarter of 2015, or approximately $64 million per month. As of February 23, 2016, the Commonwealth continues to pay us weekly for current membership.

It is the practice of the Commonwealth to pay us for eligible members only after those members have been assigned to us, and our plan has sent electronic confirmation of the receipt of eligibility. Particularly in the early stages of our contract with Puerto Rico, the plan's confirmation of eligibility of certain members was not accepted by the Commonwealth as a result of various technical issues. The plan has continued to pay for medical services for all members in question, but the Commonwealth is withholding payment of approximately $12 million of premium revenue related to those members. We believe we have a valid claim to all of the premiums withheld and we are in discussions with the Commonwealth regarding this matter.

It has been our practice in the past, and will remain so in the future, to continue to serve our members and pay health care providers for services rendered in circumstances where state (or Commonwealth) governments are temporarily unable to pay us, so long as we continue to believe that such state (or Commonwealth) governments will ultimately pay us.

Regulatory Capital and Dividend Restrictions. Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements upon us that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $1,229 million at December 31, 2015, and $859 million at December 31, 2014. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $612 million and $203 million as of December 31, 2015, and 2014, respectively.

The National Association of Insurance Commissioners (NAIC), adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules which may vary from state to state. All of the states in which our health plans operate, except California and Florida, have adopted these rules. California and Florida have not adopted NAIC risk-based capital requirements for HMOs, and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of December 31, 2015, our health plans had aggregate statutory capital and surplus of approximately $1,350 million compared with the required minimum aggregate statutory capital and surplus of approximately $776 million. All of our health plans were in compliance with the minimum capital requirements at December 31, 2015. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

20. Segment Information

We have three reportable segments. These segments include our Health Plans and Molina Medicaid Solutions segments, which comprise the vast majority of our operations, and our Other segment. As of December 31, 2015, we changed our reporting structure as a result of the Pathways acquisition in November 2015, which is reported in Other.

Our reportable segments are consistent with how we currently manage the business and view the markets we serve. The Health Plans segment consists of our health plans and our direct delivery business. Our health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics. The Molina Medicaid Solutions segment provides MMIS design, development, implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies. Our Other segment includes other businesses, such as our Pathways behavioral health and social services provider, that do not meet the quantitative thresholds for a

reportable segment as defined by U.S. generally accepted accounting principles (GAAP), as well as corporate amounts not allocated to other reportable segments.

The following table presents gross margin as the appropriate earnings measure for our reportable segments, based on how our chief operating decision maker currently reviews results, assesses performance, and allocates resources.

Gross margin for our Health Plans segment is referred to as "Medical margin," and for our Molina Medicaid Solutions and Other segments, as "Service margin." Medical margin represents the actual dollars earned by the Health Plans segment after medical costs are deducted from premium revenue. The medical care ratio represents the amount of medical care costs as a percentage of premium revenue. One of the key metrics used to assess the performance of the Health Plans segment is the medical care ratio; therefore, the underlying medical margin is the most important measure of earnings reviewed by the chief operating decision maker. The service margin is equal to service revenue minus cost of service revenue. We previously reported our segment results to the operating income level, where we reported the cost of all centralized services within our most significant segment, the Health Plans segment.

The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies."

	Health Plans	Molina Medicaid Solutions	Other	Consolidated
		(In millions)		
2015				
Total revenue (1)	$ 13,917	$ 195	$ 66	$ 14,178
Gross margin	1,447	55	5	1,507
Depreciation and amortization (2)	95	25	6	126
Goodwill, and intangible assets, net	393	73	175	641
Total assets	4,707	213	1,656	6,576
2014				
Total revenue (1)	9,449	210	8	9,667
Gross margin	947	53	—	1,000
Depreciation and amortization (2)	83	46	5	134
Goodwill, and intangible assets, net	286	75	—	361
Total assets	3,355	185	895	4,435
2013				
Total revenue (1)	6,376	205	8	6,589
Gross margin	799	44	—	843
Depreciation and amortization (2)	60	28	6	94
Goodwill, and intangible assets, net	249	81	—	330
Total assets	1,921	176	891	2,988

(1) Total revenues consists primarily of premium revenue for the Health Plans segment, and service revenue for the Molina Medicaid Solutions and Other segments.

(2) Depreciation and amortization reported in accompanying consolidated statements of cash flows.

The following table reconciles gross margin by segment to consolidated income from continuing operations before income tax expense:

	Year Ended December 31,		
	2015	2014	2013
	(In millions)		
Gross margin:			
Health Plans	$ 1,447	$ 947	$ 799
Molina Medicaid Solutions	55	53	44
Other	5	—	—
Other operating revenues (1)	684	434	205
Other operating expenses (2)	1,804	1,241	911
Operating income	387	193	137
Other expenses, net	65	58	56
Income from continuing operations before income tax expense	$ 322	$ 135	$ 81

(1) Other operating revenues include premium tax revenue, health insurer fee revenue, investment income and other revenue.

(2) Other operating expenses include general and administrative expenses, premium tax expenses, health insurer fee expenses and depreciation and amortization.

21. Quarterly Results of Operations (Unaudited)

The following table summarizes quarterly unaudited results of operations for the years ended December 31, 2015 and 2014.

	For The Quarter Ended			
	March 31, 2015	June 30, 2015	September 30, 2015	December 31, 2015
	(In millions, except per-share data)			
Premium revenue	$ 2,971	$ 3,304	$ 3,377	$ 3,589
Service revenue	52	47	47	107
Operating income	82	116	113	76
Income from continuing operations	28	39	46	30
Net income	28	39	46	30
Net income per share (1):				
Basic	$ 0.58	$ 0.78	$ 0.84	$ 0.54
Diluted	$ 0.56	$ 0.72	$ 0.77	$ 0.52

	For The Quarter Ended			
	March 31, 2014	June 30, 2014	September 30, 2014	December 31, 2014
	(In millions, except per-share data)			
Premium revenue	$ 1,940	$ 2,167	$ 2,317	$ 2,599
Service revenue	54	50	52	54
Operating income	24	32	40	97
Income from continuing operations	4	8	16	34
Net income	4	8	16	34
Net income per share (1):				
Basic	$ 0.10	$ 0.17	$ 0.34	$ 0.70
Diluted	$ 0.09	$ 0.16	$ 0.33	$ 0.69

(1) The dilutive effect of all potentially dilutive common shares is calculated using the treasury-stock method. Certain potentially dilutive common shares issuable are not included in the computation of diluted net income per share because to do so would be anti-dilutive. For the year ended December 31, 2014, the 1.125% Warrants were excluded from diluted shares outstanding because the exercise price exceeded the average market price of our common stock.

22. Condensed Financial Information of Registrant

The condensed balance sheets as of December 31, 2015 and 2014, and the related condensed statements of income, comprehensive income and cash flows for each of the three years in the period ended December 31, 2015 for our parent company Molina Healthcare, Inc. (the Registrant), are presented below.

Condensed Balance Sheets

Cash and cash equivalents at end of year	$ 360	$ 75	$ 100

Notes to Condensed Financial Information of Registrant

Note A - Basis of Presentation

The Registrant was incorporated in 2002. Prior to that date, Molina Healthcare of California (formerly known as Molina Medical Centers) operated as a California health plan and as the parent company for three other state health plans. In June 2003, the employees and operations of the corporate entity were transferred from Molina Healthcare of California to the Registrant.

The Registrant's investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries since the date of acquisition. The accompanying condensed financial information of the Registrant should be read in conjunction with the consolidated financial statements and accompanying notes.

Note B - Transactions with Subsidiaries

The Registrant provides certain centralized medical and administrative services to its subsidiaries pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems and human resources services. Fees are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the subsidiaries' ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate. Charges in 2015, 2014, and 2013 for these services amounted to $914 million, $692 million, and $592 million, respectively, and are included in operating revenue.

During 2013, the Registrant used a portion of the proceeds from the sale of the Molina Center, described in Note 12, "Debt," to repay the remaining principal balance of the related term loan, on behalf of a subsidiary of the Registrant.

The Registrant and its subsidiaries are included in the consolidated federal and state income tax returns filed by the Registrant. Income taxes are allocated to each subsidiary in accordance with an intercompany tax allocation agreement. The agreement allocates income taxes in an amount generally equivalent to the amount which would be expensed by the subsidiary if it filed a separate tax return. Net operating loss benefits are paid to the subsidiary by the Registrant to the extent such losses are utilized in the consolidated tax returns.

Note C - Dividends and Capital Contributions

When the Registrant receives dividends from its subsidiaries, such amounts are recorded as a reduction to the investments in the respective subsidiaries.

For all periods presented, the Registrant made capital contributions to certain subsidiaries primarily to comply with minimum net worth requirements and to fund contract acquisitions. Such amounts have been recorded as an increase in investment in the respective subsidiaries, net of insignificant returns of capital.

Note D - Related Party Transactions

The Registrant's related party transactions are described in Note 17, "Related Party Transactions."

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures: Our management is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934 (the "Exchange Act"). Our internal control over financial reporting is designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements. We maintain controls and procedures designed to ensure that we are able to collect the information we are required to disclose in the reports we file with the Securities and Exchange Commission, and to process, summarize and disclose this information within the time periods specified in the rules of the Securities and Exchange Commission.

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has conducted an evaluation of the design and operation of our "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e)) under the Exchange Act. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective as of the end of the period covered by this report to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management's Report on Internal Control over Financial Reporting: Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States. However, all internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and reporting.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2015. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework* (2013 framework).

Our management's evaluation did not include an assessment of the effectiveness of internal control over financial reporting at Pathways Health and Community Support LLC (Pathways), which was acquired on November 1, 2015. The total assets and net assets of Pathways included in our consolidated balance sheets at December 31, 2015, were $276 million and $231 million, respectively. Total revenue and net loss of Pathways included in our consolidated results of operations for the year ended December 31, 2015, were $57 million and $4 million, respectively. Our management has not had sufficient time to make an assessment of this subsidiary's internal control over financial reporting.

Based on our assessment, management believes that the Company maintained effective internal control over financial reporting as of December 31, 2015, based on the 2013 framework criteria.

Ernst & Young, LLP, the independent registered public accounting firm who audited the Company's Consolidated Financial Statements included in this Form 10-K, has issued a report on the Company's internal control over financial reporting, which is included herein.

Changes in Internal Control over Financial Reporting. There were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) during the quarter ended December 31, 2015, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited Molina Healthcare, Inc.'s (the "Company's") internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Pathways Health and Community Support LLC (Pathways), which is included in the 2015 consolidated financial statements of Molina Healthcare, Inc. and constituted $276 million and $231 million of total and net assets, respectively, as of December 31, 2015, and $57 million and $4 million of revenues and net loss, respectively, for the year then ended. Our audit of internal control over financial reporting of Molina Healthcare, Inc. also did not include an evaluation of the internal control over financial reporting of Pathways.

In our opinion, Molina Healthcare, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Molina Healthcare, Inc. as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2015 and our report dated February 26, 2016 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

Los Angeles, California

PART III

Item 10. Directors, Executive Officers, and Corporate Governance

Pursuant to General Instruction G(3) to Form 10-K and Instruction 3 to Item 401(b) of Regulation S-K, information regarding our executive officers is provided in Item 1 of Part I of this Annual Report on Form 10-K under the caption "Executive Officers of the Registrant," and will also appear in our definitive proxy statement for our 2016 Annual Meeting of Stockholders. The remaining information required by Items 401, 405, 406 and 407(c)(3), (d)(4) and (d)(5) of Regulation S-K will be included under the headings "Election of Directors," "Corporate Governance," and "Section 16(a) Beneficial Ownership Reporting Compliance" in our definitive proxy statement for our 2016 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Item 11. Executive Compensation

The information required by Items 402, 407(e)(4), and (e)(5) of Regulation S-K will be included under the headings "Executive Compensation" and "Compensation Committee Interlocks and Insider Participation" in our definitive proxy statement for our 2016 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Securities Authorized for Issuance Under Equity Compensation Plans (as of December 31, 2015)

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)		Weighted Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) (c)	
Equity compensation plans approved by security holders	121,711	(1)	$ 25.40	4,058,668	(2)

(1) Options to purchase shares of our common stock issued under the 2002 Equity Incentive Plan and 2011 Equity Incentive Plan. Further grants under the 2002 Equity Incentive Plan have been suspended.

(2) Includes shares remaining available to issue under the 2011 Equity Incentive Plan, and the 2011 Employee Stock Purchase Plan.

The remaining information required by Item 403 of Regulation S-K will be included under the heading "Security Ownership of Certain Beneficial Owners and Management" in our definitive proxy statement for our 2016 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by Items 404 and 407(a) of Regulation S-K will be included under the headings "Related Party Transactions," "Corporate Governance," and "Director Independence" in our definitive proxy statement for our 2016 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Additionally, refer to Part II, Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 17, "Related Party Transactions," and Note 18, "Variable Interest Entities (VIEs)," under the subheading "Joseph M. Molina M.D., Professional Corporations."

Item 14. Principal Accountant Fees and Services

The information required by Item 9(e) of Schedule 14A will be included under the heading "Disclosure of Auditor Fees" in our definitive proxy statement for our 2016 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

PART IV

Item 15. ***Exhibits and Financial Statement Schedules***

(a) The consolidated financial statements and exhibits listed below are filed as part of this report.

(1) The financial statements included in Item 8 of this Form 10-K, Financial Statements and Supplementary Data, above are filed as part of this annual report.

(2) Financial Statement Schedules

None of the schedules apply, or the information required is included in the Notes to the Consolidated Financial Statements.

(3) Exhibits

INDEX TO EXHIBITS

The following exhibits, which are furnished with this annual report or incorporated herein by reference, are filed as part of this annual report.

The agreements included or incorporated by reference as exhibits to this Annual Report on Form 10-K may contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties were made solely for the benefit of the other parties to the applicable agreement and (i) were not intended to be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate; (ii) may have been qualified in such agreement by disclosures that were made to the other party in connection with the negotiation of the applicable agreement; (iii) may apply contract standards of "materiality" that are different from "materiality" under the applicable securities laws; and (iv) were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement. The Company acknowledges that, notwithstanding the inclusion of the foregoing cautionary statements, it is responsible for considering whether additional specific disclosures of material information regarding material contractual provisions are required to make the statements in this Annual Report on Form 10-K not misleading.

Exhibit 2.2
Execution Copy

AMENDMENT TO MEMBERSHIP INTEREST PURCHASE AGREEMENT

This Amendment to Membership Interest Purchase Agreement (this "Amendment") is made and entered into as of October 30, 2015, by and among The Providence Service Corporation, a Delaware corporation ("PSC"), Ross Innovative Employment Solutions Corp., a Delaware Corporation ("Ross", and together with PSC, each a "Seller" and together, the "Sellers"), and Molina Pathways, LLC, a Delaware limited liability company ("Buyer") as assignee of all rights and obligations of Molina Healthcare, Inc., a Delaware corporation ("Molina").

WHEREAS, the Sellers and Molina entered into that certain Membership Interest Purchase Agreement (the "Purchase Agreement"), dated as of September 3, 2015;

WHEREAS, pursuant to that certain Assignment and Assumption Agreement, dated as of October 29, 2015, by and between Molina and Buyer, Molina assigned all of its rights and obligations under the Purchase Agreement to Buyer;

WHEREAS, the Sellers and Buyer have agreed, pursuant to Section 10.5 of the Purchase Agreement, to amend the Purchase Agreement as provided in this Amendment; and

WHEREAS, all capitalized terms used but not otherwise defined herein shall have the meanings ascribed to them in the Purchase Agreement.

NOW, THEREFORE, in consideration of the premises and the mutual promises contained herein and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged and incorporating the recitals set forth above, the parties hereto hereby agree as follows:

1. Certain Intercompany Obligations. Notwithstanding anything to the contrary in the Purchase Agreement, no Intercompanies between or among the Acquired Companies arising in the ordinary course of business consistent with past practice on or after October 15, 2015 through the Closing will be taken into account when determining Indebtedness of the Acquired Companies, the Estimated Purchase Price, Purchase Price or Final Purchase Price.

2. Defined Terms: Any reference to the defined term "Real Property Representations" in the Purchase Agreement is hereby amended and restated to read in its entirety as "Real Estate Representations".

3. No Other Amendments: Except as otherwise expressly amended or modified hereby, all of the terms and conditions of the Purchase Agreement shall continue in full force and effect.

4. Entire Agreement: This letter agreement and the Purchase Agreement together superseded any and all oral or written agreements and understandings heretofore made relating to the subject matter hereof and thereof and contain the entire agreement of the parties hereto relating to the subject matter hereof and thereof.

5. Incorporation of Miscellaneous Provisions: This letter agreement shall be subject to the miscellaneous provisions contained in Article 10 of the Purchase Agreement, which are hereby incorporated by reference herein, *mutatis mutandis*.

6. Counterparts: This letter agreement may be executed in two or more counterparts (including by means of facsimile or .pdf signature pages), each of which shall be deemed to constitute an original, but all of which together shall constitute one and the same document.

[*Remainder of Page Intentionally Blank*]

IN WITNESS WHEREOF, each of the parties hereto has caused this Amendment to be duly executed on its behalf as of the day and year first above written.

MOLINA HEALTHCARE OF CALIFORNIA

CAPITATED MEDICAL GROUP / IPA

PROVIDER SERVICES AGREEMENT

This Capitated Medical Group / IPA ("Agreement") is entered by and between Molina Healthcare of California, a California corporation ("Health Plan"), and **Pacific Healthcare IPA** ("Provider").

RECITALS

A. Health Plan arranges for the provision of certain Health Care services to Members pursuant to contracts with various government sponsored health programs. Health Plan intends to participate in additional government sponsored health programs and offer other health products as the opportunities become available.

B. Health Plan arranges for the provision of certain Health Care services to Members by entering into provider service agreements with individual physicians, groups of physicians, individual practice associations, hospitals, clinics, ancillary health providers, and other health providers.

C. Provider is licensed to render certain Health Care services and desires to provide such services to Health Plan's Members in connection with Health Plan's contractual obligations to provide and/or arrange for Health Care Services for Health Plan's Members.

Now, therefore, in consideration of the promises, covenants and warranties stated herein, Health Plan and Provider agree as follows:

 Provider or authorized representative's initials: FB

ARTICLE ONE - DEFINITIONS

1.1 Provider means the health care professional(s), or entity(ies) identified in Attachment A to this Agreement.

1.2 Capitalized words or phrases in this Agreement shall have the meaning set forth in Attachment B.

ARTICLE TWO - PROVIDER OBLIGATIONS

2.1 **Serving as a Panel Provider.** Provider shall serve on Health Plan's panel of providers for the products specified in Attachment C. Provider agrees that its practice information may be used in Health Plan's provider directories, promotional materials, advertising and other informational material made available to the public and Members. Practice Information includes, but is not limited to, name, address, telephone number, hours of operation, type of practice, and ability to accept new patients. Provider shall promptly notify Health Plan of any changes in this practice information.

2.2 **Standards for Provision of Care.**

a. Provision of Covered Services. Provider shall provide Covered Services to Members, within the scope of Provider's business and practice, in accordance with this Agreement, Health Plan's policies and procedures, the terms and conditions of the Health Plan product which covers the Member, and the requirements of any applicable government sponsored program.

b. Standard of Care. Provider shall provide Covered Services to Members at a level of care and competence that equals or exceeds the generally accepted and professionally recognized standard of practice at the time of treatment, all applicable rules and/or standards of professional conduct, and any controlling governmental licensing requirements.

c. Facilities, Equipment, and Personnel. Provider's facilities, equipment, personnel and administrative services shall be at a level and quality as necessary to perform Provider's duties and responsibilities under this

 Provider or authorized representative's initials: FB

Agreement and to meet all applicable legal requirements, including the accessibility requirements of the Americans with Disabilities Act.

d. Prior Authorization. If Provider determines that it is Medically Necessary to consult or obtain services from other health professionals that are Medically Necessary, Provider shall obtain the prior authorization of Health Plan in accordance with Health Plan's Provider Manual unless the situation is one involving the delivery of Emergency Services. Upon and following such referral, Provider shall coordinate the provision of such Covered Services to Members and ensure continuity of care.

e. Contracted Providers. Except in the case of Emergency Services or upon prior authorization of Health Plan, Provider shall use only those health professionals, hospitals, laboratories, skilled nursing and other facilities and providers which have contracted with Health Plan ("Participating Providers").

f. Member Eligibility Verification. Provider shall verify eligibility of Members prior to rendering services.

g. Admissions. Provider shall cooperate with and comply with Health Plan's hospital admission and prior authorization procedures.

h. Emergency Room Referral. If Provider refers a Member to an emergency room for Covered Services, Provider shall provide notification to Health Plan within twenty-four (24) hours of the referral.

i. Prescriptions. Except with respect to prescriptions and pharmaceuticals ordered for in-patient hospital services, Provider shall abide by Health Plan's drug formularies and prescription policies, including those regarding the prescription of generic or lowest cost alternative brand name pharmaceuticals. Provider shall obtain prior authorization from Health Plan if Provider believes a generic equivalent or formulary drug should not be dispensed. Provider acknowledges the authority of Health Plan contracting pharmacists to substitute generics for brand name pharmaceuticals unless counter indicated on the prescription by the Provider.

 Provider or authorized representative's initials: FB

j. Subcontract Arrangements. Any subcontract arrangement entered into by Provider for the delivery of Covered Services to Members shall be in writing and shall bind Provider's subcontractors to the terms and conditions of this Agreement including, but not limited to, terms relating to licensure, insurance, and billing of Members for Covered Services.

k. Availability of Services. Provider shall make necessary and appropriate arrangements to assure the availability of Covered Services to Members on a twenty-four (24) hours a day, seven (7) days a week basis, including arrangement to assure coverage of Member patient visits after hours. Provider shall meet the applicable standards for timely access to care and services, taking into account the urgency of the need for the services.

l. Treatment Alternatives. Health Plan encourages open Provider-Member communication regarding appropriate treatment alternatives. Health Plan promotes open discussion between Provider and Members regarding Medically Necessary or appropriate patient care, regardless of Covered Services limitations. Provider is free to communicate any and all treatment options to Members regardless of benefit coverage limitations.

2.3 **Promotional Activities.** At the request of Health Plan, Provider shall (a) display Health Plan promotional materials in its offices and facilities as practical, and (b) shall cooperate with and participate in all reasonable Health Plan's marketing efforts. Provider shall not use Health Plan's name in any advertising or promotional materials without the prior written permission of Health Plan.

2.4 **Nondiscrimination.**

a. Enrollment. Provider shall not differentiate or discriminate in providing Covered Services to Members because of race, color, religion, national origin, ancestry, age, sex, marital status, sexual orientation, physical, sensory or mental handicap, socioeconomic status, or participation in publicly financed programs of health care. Provider shall render Covered Services to Members in the same location, in the same manner, in accordance with the same standards, and within the same time availability regardless of payor.

b. Employment. Provider shall not differentiate or discriminate against any employee or applicant for employment, with respect to their hire, tenure, terms, conditions or privileges of employment, or any matter directly or indirectly related to employment, because of race, color, religion, national origin, ancestry, age, sex, height, weight, marital status, physical, sensory or mental disability unrelated to the individual's ability to perform the duties of the particular job or position.

2.5 **Recordkeeping.**

a. Maintaining Member Medical Records. Provider shall maintain a medical record for each Member to whom Provider renders health care services. Provider shall open each Member's medical record upon the Member's first encounter with Provider. The Member's medical record shall contain all information required by state and federal law, generally accepted and prevailing professional practice, applicable government sponsored health programs, and all Health Plan policies and procedures. Provider shall retain all such records for at least ten (10) years.

b. Confidentiality of Member Health Information. Provider shall comply with all applicable state and federal laws, Health Plan's policies and procedures, government sponsored program requirements regarding privacy and confidentiality of Members' health information and medical records, including mental health records. Provider shall not disclose or use Member names, addresses, social security numbers, identities, other personal information, treatment modalities, or medical records without obtaining appropriate authorization to do so. This provision shall not affect or limit Provider's obligation to make available medical records, encounter data and information concerning Member care to Health Plan, any authorized state or federal agency, or other Providers of health care upon authorized referral.

c. HIPAA. To the extent Provider is considered a covered entity under the Health Insurance Portability and Accountability Act ("HIPAA"), Provider shall comply with all provisions of HIPAA including, but not limited to, provisions addressing privacy, security, and confidentiality.

d. **National Provider Identification ("NPI").** In accordance with applicable statutes and regulations of the Health Insurance Portability and Accountability Act (HIPAA) of 1996, Provider shall comply with the Standard Unique Identifier for Health Care Provider regulations promulgated under HIPAA (45 CFR Section 162.402, et seq.) and use only the NPI to identify HIPAA covered health care providers in standard transactions. Provider shall obtain an NPI from the National Plan and Provider Enumeration System ("NPPES") for itself or for any subpart of the Provider. Provider shall make best efforts to report its NPI and any subparts to Health Plan. Provider shall report any changes in its NPI or subparts to Health Plan within thirty (30) days of the change. Provider shall use its NPI to identify itself on all claims and encounters (both electronic and paper formats) submitted to Health Plan.

e. **Delivery of Patient Care Information.** Provider shall promptly deliver to Health Plan, upon request and/or as may be required by state or federal law, Health Plan's policies and procedures, applicable government sponsored health programs, Health Plan's contracts with the government agencies, or third party payers, any information, statistical data, encounter data, or patient treatment information pertaining to Members served by Provider, including but not limited to, any and all information requested by Health Plan in conjunction with utilization review and management, grievances, peer review, HEDIS Studies, Health Plan's Quality Improvement Program, or claims payment. Provider shall further provide direct access at reasonable times to said patient care information as requested by Health Plan and/or as required to any governmental agency or any appropriate state and federal authority having jurisdiction over Health Plan. Health Plan shall have the right to withhold compensation from Provider in the event that Provider fails or refuses to promptly provide any such information to Health Plan.

f. **Member Access to Health Information.** Provider shall give Health Plan and Members access to Members' health information including, but not limited to, medical records and billing records, in accordance with the requirements of state and federal law, applicable government sponsored health programs, and Health Plan's policies and procedures.

2.6 **Program Participation.**

a. **Participation in Grievance Program.** Provider shall participate in Health Plan's Grievance Program and shall cooperate with Health Plan in identifying, processing, and promptly resolving all Member complaints, grievances, or inquiries.

b. **Participation in Quality Improvement Program.** Provider shall participate in Health Plan's Quality Improvement Program and shall cooperate with Health Plan in conducting peer review and audits of care rendered by Provider.

c. **Participation in Utilization Review and Management Program.** Provider shall participate in and comply with Health Plan's Utilization Review and Management Program, including all policies and procedures regarding prior authorizations, and shall cooperate with Health Plan in audits to identify, confirm, and/or assess utilization levels of Covered Services. If Provider is a medical group or IPA, Provider shall accept delegation of utilization management responsibilities from Health Plan at Health Plan's request. If delegation of utilization management responsibilities is revoked, Health Plan shall reduce any otherwise applicable payments owing to Provider by the Utilization Payment Reduction Amount specified in Attachment D.

d. **Participation in Credentialing.** Provider shall participate in Health Plan's credentialing and re-credentialing process and shall satisfy, throughout the term of this Agreement, all credentialing and re-credentialing criteria established by the Health Plan. Provider shall immediately notify Health Plan of any change in the information submitted or relied upon by Provider to achieve credentialed status. If Provider's credentialed status is revoked, suspended or limited by Health Plan, Health Plan may at its discretion terminate this Agreement and/or reassign Members to another provider. If Provider is a medical group or IPA, Provider shall accept delegation of credentialing responsibilities at Health Plan's request and shall cooperate with Health Plan in establishing and maintaining appropriate credentialing mechanisms within Provider's organization. If delegation of credentialing responsibilities to a group or IPA is revoked, Health Plan shall reduce any otherwise applicable payments owing to group or IPA by the Credentialing Reduction Amount specified in Attachment D.

 Provider or authorized representative's initials: FB

e. Provider Manual. Provider shall comply and render Covered Services in accordance with the contents, instructions and procedures set forth in Health Plan's Provider Manual, which may be amended from time to time. Health Plan's Provider Manual is incorporated in this Agreement by this reference.

f. Health Education/Training. Provider shall participate in and cooperate with Health Plan's Provider education and training efforts as well as Member education and efforts. Provider shall also comply with all Health Plan health education, cultural and linguistic standards, policies, and procedures, and such standards, policies, and procedures as may be necessary for Health Plan to comply with its contracts with employers, the state, or federal government. Provider shall ensure that Provider promptly delivers to Provider's constituent providers, if any, all informational, promotional, educational, or instructional materials prepared by Health Plan regarding any aspect of providing Covered Services to Members.

2.7 **Licensure and Standing.**

a. Licensure. Provider warrants and represents that it is appropriately licensed to render health care services within the scope of Provider's practice, including having and maintaining a current narcotics number, where appropriate, issued by all proper authorities. Provider shall provide evidence of licensure to Health Plan upon request. Provider shall maintain its licensure in good standing, free of disciplinary action, and in unrestricted status throughout the term of this Agreement. Provider shall immediately notify Health Plan of any change in Provider's licensure status, including any disciplinary action taken or proposed by any licensing agency responsible for oversight of Provider.

b. Unrestricted Status. Provider warrants and represents that it has not been convicted of crimes as specified in Section 1128 of the Social Security Act (42 U.S.C. 1320a-7), excluded from participation in the Medicare or Medicaid program, assessed a civil penalty under the provisions of Section 1128, entered into a contractual relationship with an entity convicted of a crime specified in Section 1128, or taken any other action that would prohibit it from participation in Medicaid and/or state health care programs.

c. **Malpractice and Other Actions.** Provider shall give immediate notice to Health Plan of: (a) any malpractice claim asserted against it by a Member, any payment made by or on behalf of Provider in settlement or compromise of such a claim, or any payment made by or on behalf of Provider pursuant to a judgment rendered upon such a claim; (b) any criminal investigations or proceedings against Provider; (c) any convictions of Provider for crimes involving moral turpitude or felonies; and (d) any civil claim asserted against Provider that may jeopardize Provider's financial soundness.

d. **Staffing Privileges for Providers.** Consistent with community standards, every physician Provider shall have staff privileges with at least one Health Plan contracted Hospital as necessary to provide services to members under this Agreement, and shall authorize each hospital at which he/she maintains staff privileges to notify Health Plan should any disciplinary or other action of any kind be initiated against such provider which could result in any suspension, reduction or modification of his/her hospital privileges.

e. **Liability Insurance.** Provider shall maintain premises and professional liability insurance in coverage amounts appropriate for the size and nature of Provider's facility and the nature of Provider's health care activities. Every physician Provider shall maintain, at a minimum, professional liability insurance with limits of not less than one million dollars ($1,000,000) per occurrence and three million dollars ($3,000,000) in the aggregate for the policy year and for each physician comprising Provider. If the coverage is claims made or reporting, Provider agrees to purchase similar "tail" coverage upon termination of the Provider's present or subsequent policy. Provider shall deliver copies of such insurance policies to Health Plan within five business days of a written request by Health Plan.

2.8 **Claims Payment.**

a. **Submitting Claims.** If applicable**,** Provider shall promptly submit to Health Plan claims for Covered Services rendered to Members. All claims shall be submitted in a form acceptable to and approved by Health Plan, and shall include any and all medical records pertaining to the claim if requested by Health Plan or otherwise required by Health Plan's policies and procedures. Except as otherwise provided by law or provided by government sponsored

program requirements, any claims that are not submitted by Provider to Health Plan within ninety (90) days of providing the Covered Services that are the subject of the claim shall not be eligible for payment, and Provider hereby waives any right to payment therefor.

b. Compensation. When applicable, Health Plan shall pay Provider for Clean Claims for Covered Services provided to Members, including Emergency Services, in accordance with applicable law and regulations and in accordance with the compensation schedule set forth in Attachment D. Provider shall accept such payment, applicable co-payments, deductibles, and coordination of benefits collections as payment in full for services provided under this Agreement. Provider shall not balance bill Members for any Covered Services.

c. Co-payments and Deductibles. Provider is responsible for collection of co-payments and deductibles, if any.

d. Coordination of Benefits. Health Plan is a secondary payer in any situation where there is another payer as primary carrier. Provider shall make reasonable inquiry of Members to learn whether Member has health insurance or health benefits other than from Health Plan or is entitled to payment by a third party under any other insurance or plan of any type, and Provider shall immediately notify Health Plan of said entitlement. In the event that coordination of benefits occurs, Provider shall be compensated in an amount equal to the allowable Clean Claim less the amount paid by other health plans, insurance carriers and payers, not to exceed the amount specified in Attachment D.

e. Offset. In the event that Health Plan determines that a claim has been overpaid or paid in duplicate, or that funds were paid which were not provided for under this Agreement, Provider shall make repayment to Health Plan within thirty (30) working days of written notification by Health Plan of the overpayment, duplicate payment, or other excess payment. In addition to any other contractual or legal remedy, Health Plan may recover the amounts owed by way of offset or recoupment from current or future amounts due Provider by giving Provider not less than thirty (30) working days notice in which to exercise Provider's appeal rights under this Agreement. As a material

condition to Health Plan's obligations under this Agreement, Provider agrees that the offset and recoupment rights set forth herein shall be deemed to be and to constitute rights of offset and recoupment authorized in state and federal law or in equity to the maximum extent legally permissible, and that such rights shall not be subject to any requirement of prior or other approval from any court or other governmental authority that may now or hereafter have jurisdiction over Health Plan and/or Provider.

f. Claims Review and Audit. Provider acknowledges Health Plan's right to review Provider's claims prior to payment for appropriateness in accordance with industry standard billing rules, including, but not limited to, current UB manual and editor, current CPT and HCPCS coding, CMS billing rules, CMS bundling/unbundling rules, National Correct Coding Initiatives (NCCI) Edits, CMS multiple procedure billing rules, and FDA definitions and determinations of designated implantable devices and/or implantable orthopedic devices. Provider acknowledges Health Plan's right to conduct such review and audit on a line-by-line basis or on such other basis as Health Plan deems appropriate, and Health Plan's right to exclude inappropriate line items to adjust payment and reimburse Provider at the revised allowable level. Provider also acknowledges Health Plan's right to conduct utilization reviews to determine medical necessity and to conduct post-payment billing audits. Provider shall cooperate with Health Plan's audits of claims and payments by providing access at reasonable times to requested claims information, all supporting medical records, Provider's charging policies, and other related data. Health Plan shall use established industry claims adjudication and/or clinical practices, state and federal guidelines, and/or Health Plan's policies and data to determine the appropriateness of the billing, coding and payment.

g. Payments which are the Responsibility of a Capitated Provider. Provider agrees that if Provider is or becomes a party to a subcontract or other agreement with another provider contracted with Health Plan; who receives capitation from Health Plan and is responsible for arranging for Covered Services through subcontract arrangements ("Capitated Provider"), Provider shall look solely to the Capitated Provider, and not Health Plan, for payment of Covered Services provided to Members that are covered by Health Plan's agreements with such Capitated Providers.

2.9 **Compliance with Applicable Law.** Provider shall comply with all applicable state and federal laws governing the delivery of Covered Services to Members including, but not limited to, title VI of the Civil Rights Act of 1964; title IX of the Education Amendments of 1972 (regarding education programs and activities); the Age Discrimination Act of 1975; the Rehabilitation act of 1973; the Balanced Budget Act of 1997; and the Americans with Disabilities Act:

a. Provider acknowledges that this Agreement and all Covered Services rendered pursuant to this Agreement are subject to state licensing statutes and regulations set forth in Attachment E and all applicable sub-attachments to Attachment E.

b. Provider acknowledges that all Covered Services rendered in conjunction with the state Medicaid program are subject to the additional provisions set forth in Attachment F and all applicable sub-attachments to Attachment F, the effect of which provisions is limited solely to activities and Covered Services related to the state Medicaid program.

c. Provider acknowledges that all Covered Services rendered in conjunction with the Medicare program are subject to the Medicare provisions set forth in Attachment H, the effect of which provisions is limited solely to activities and Covered Services related to the Medicare program.

2.10 **Provider Non-solicitation Obligations.** Provider shall not unilaterally assign or transfer patients served under this Agreement to another medical group, IPA, or provider without the prior written approval of Health Plan. Nor shall Provider solicit or encourage Members to select another health plan for the primary purpose of securing financial gain for Provider. Nothing in this provision is intended to limit Provider's ability to fully inform Members of all available health care treatment options or modalities.

2.11 **Fraud and Abuse Reporting.** Provider shall report to Health Plan's compliance officer all cases of suspected fraud and/or abuse, as defined in Title 42, of the Code of Federal Regulations, Section 455.2, where there is reason to believe that an incident of fraud and/or abuse has occurred, by subcontractors, Members, providers, or employees within ten (10) state working days of the date when Provider first becomes aware of, or is on notice of, such activity. Provider shall

establish policies and procedures for identifying, investigating, and taking appropriate corrective action against fraud and/or abuse in the provision of Health Care Services under the Medi-Cal program. Upon the request of Health Plan and/or the State, Provider shall consult with the appropriate State agency prior to and during the course of any such investigations.

2.12 **Advance Directive.** Provider shall document all patient records with respect to the existence of an Advance Directive in compliance with the Patient Self-Determination Act (Section 4751 of the Omnibus Reconciliation Act of 1990), as amended, and other appropriate laws.

2.13 **Reciprocity Agreements.** Provider shall cooperate with Health Plan's Participating Providers and affiliates of Health Plan and agrees to provide Covered Services to Members enrolled in various government sponsored health programs and other health products, and various government sponsored health programs and other health products of affiliates, and to assure reciprocity of health care services. Without limiting the foregoing, if any Member receives services or treatment constituting Covered Services from Provider and a capitated Participating Provider is financially responsible for such services, such Participating Provider shall be solely responsible for compensating Provider for any Covered Services provided by the Provider in accordance with the applicable Payments which are the Responsibility of a Capitated Provider provisions of this Agreement. Payment by the Participating Provider shall be at; (i) the rates agreed by the Participating Provider and Provider, or (ii) if there is no applicable agreement, at the lesser of Provider's billed charges or an amount equivalent to one hundred percent (100%) of the governing rates provided by applicable State and Federal Law specific to the Member's enrolled benefit plan (i.e. Medicaid, Medicare, etc) in place at the time services are rendered, or (iii) at the election of the Participating Provider, at the rates set forth in this Agreement. Provider agrees that the applicable provisions of the Compensation section of this Agreement shall continue to be binding upon Provider, especially in that Provider shall not balance bill Members for any Covered Services. Provider shall comply with the procedures established by Health Plan or its affiliates and this Agreement for reimbursement of such services or treatment. Provider shall not encourage Members to receive Covered Services from non-Participating Providers. Breach of this section shall constitute breach of a material term of the Agreement and will give rise to cause for termination of this Agreement pursuant to the applicable Termination with Cause provisions of this Agreement. Provider shall abide by all

provisions of this Agreement relating to non-billing of Members with respect to all services and treatment subject to this reciprocity arrangement.

2.14 **Reassignment of Members.** Health Plan reserves the right to reassign Members from Provider to another provider or to limit or deny the assignment or selection of new Members to Provider during any termination notice period or if Health Plan determines that assignment to Provider poses a threat to the Members' health and safety. If Provider requests reassignment of a Member, Health Plan, in its sole discretion, will make the determination regarding reassignment based upon good cause shown by the Provider. When the Health Plan reassigns Member(s), Provider shall forward copies of the Member's medical records to the new provider within ten (10) business days of receipt of the Plan's or the Member's request to transfer the records.

2.15 **Notification of Network Change.** Where Provider constitutes specialists, is a medical group, IPA, or any other similar entity/organization, Provider shall provide Health Plan and Member with timely written notification in the event a constituent specialty provider terminates its contract with Provider. Said written notification shall be in compliance with all state and federal laws or government sponsored program requirements.

ARTICLE THREE - HEALTH PLAN'S OBLIGATIONS

3.1 **Compensation.** Health Plan shall pay Provider in accordance with the terms and conditions of this Agreement and the compensation schedule set forth in Attachment D.

3.2 **Member Eligibility Determination.** Health Plan shall maintain data on Member eligibility and enrollment. Health Plan shall promptly verify Member eligibility at the request of Provider.

3.3 **Prior Authorization Review.** Health Plan shall timely respond to requests for prior authorization and/or determination of Covered Services.

3.4 **Medical Necessity Determination.** Health Plan's determination with regard to Medically Necessary services and scope of Covered Services, including determinations of level of care and length of stay benefits available under the Member's health program shall govern. The primary concern with respect to all medical determination shall be the interest of the Member.

3.5 **Member Services.** Health Plan will provide services to Members including, but not limited to, assisting Members in selecting a primary care physician, processing Member complaints and grievances, informing Members of the Health Plan's policies and procedures, providing Members with membership cards, providing Members with information about Health Plan, and providing Members with access to Health Plan's Provider Directory, updated from time to time, identifying the professional status, specialty, office address, and telephone number of Health Plan contracted providers.

3.6 **Provider Services.** Health Plan will maintain a Provider Manual describing Health Plan's policies and procedures, Covered Services, limitations and exclusions, and coordination of benefits information. Health Plan will maintain a Provider Services Department available to educate Provider regarding Health Plan's policies and procedures.

3.7 **Medical Director.** Health Plan will employ a physician as medical director who shall be responsible for the management of both the; (i) medical, and (ii) medically-related scientific and technical, aspects of Health Plan.

ARTICLE FOUR - TERM AND TERMINATION

4.1 **Term.** This Agreement shall commence on the effective date indicated by Health Plan on the signature page of this Agreement ("Effective Date") and shall continue in effect for one year; thereafter, it shall automatically renew for successive one (1) year terms unless and until terminated by either party in accordance with the provisions of this Agreement or in accordance with applicable provisions set forth in the attachments.

4.2 **Termination without Cause.** This Agreement may be terminated without cause by either party on at least one hundred and fifty (150) days written notice to the other party.

4.3 **Termination with Cause.** In the event of a breach of any material provision of this Agreement, the party claiming the breach will give the other party written notice of termination setting forth the facts underlying its claim(s) that the other party has breached the Agreement. The party receiving the notice of termination shall have thirty (30) days from the date of receipt of such notice to remedy or cure the claimed breach to the satisfaction of the other party. During this thirty (30) day period, the parties agree to meet as reasonably necessary and to confer in good faith in an attempt to resolve the claimed breach. If the party receiving the notice of termination has not remedied or cured the breach within such thirty (30) day period, the party who provided the notice of termination shall have the right to immediately terminate this Agreement.

4.4 **Immediate Termination.** Notwithstanding any other provision of this Agreement, Health Plan may immediately terminate this Agreement and transfer Member(s) to another provider by giving notice to Provider in the event of any of the following:

a. Provider's license or certificate to render health care services is limited, suspended or revoked, or disciplinary proceedings are commenced against Provider by the state licensing authority;

b. Provider fails to maintain insurance required by this Agreement;

c. Provider loses credentialed status;

d. Provider becomes insolvent or files a petition to declare bankruptcy or for reorganization under the bankruptcy laws of the United States, or a trustee in bankruptcy or receiver for Provider is appointed by appropriate authority;

e. If Provider is capitated and Health Plan determines Provider to be financially incapable of bearing capitation or other applicable risk-sharing compensation

methodology;

f. Health Plan determines that Provider's facility and/or equipment is insufficient to render Covered Services to Members;

g. Provider is excluded from participation in Medicare and state health care programs pursuant to Section 1128 of the Social Security Act or otherwise terminated as a provider by any state or federal health care program;

h. Provider engages in fraud or deception, or knowingly permits fraud or deception by another in connection with Provider's obligations under this Agreement;

i. Health Plan determines that health care services are not being properly provided, or arranged for, and that such failure poses a threat to Members' health and safety.

4.5 **Notice to Members of Termination.** In the event one of the parties to this Agreement provides notification of termination of this Agreement, Health Plan shall provide affected Members with timely written notification, of such termination, prior to the effective date of specialist termination, as required for compliance with any state and federal laws, government sponsored program requirement, or accreditation requirement. Notification to affected members shall comply with the notification requirements set forth in Health and Safety Code section 1373.65(f).

ARTICLE FIVE - GENERAL PROVISIONS

5.1 **Indemnification.** Each party shall indemnify and hold harmless the other party and its officers, directors, shareholders, employees, agents, and representatives from any and all liabilities, losses, damages, claims, and expenses of any kind, including costs and attorneys' fees, which result from the duties and obligations of the indemnifying party and/or its officers, directors, shareholders, employees, agents, and representatives under this Agreement.

5.2 **Relationship of the Parties.** Nothing contained in this Agreement is intended to create, nor shall it be construed to create, any relationship between the parties other than that of independent parties contracting with each other solely for the purpose of effectuating the provisions of this Agreement. This Agreement is not intended to create a relationship of agency, representation, joint venture, or employment between the parties. Nothing herein contained shall prevent any of the parties from entering into similar arrangements with other parties. Each of the parties shall maintain separate and independent management and shall be responsible for its own operations. Nothing contained in this Agreement is intended to create, nor shall be construed to create, any right in any third party, including but not limited to Health Plan's Members. Nor shall any third party have any right to enforce the terms of this Agreement.

5.3 **Entire Agreement.** This Agreement, together with Attachments and incorporated documents or materials, contains the entire agreement between Health Plan and Provider relating to the rights granted and obligations imposed by this Agreement. The contract between the state and the Health Plan is incorporated herein by reference and shall be the guiding and controlling document when interpreting the terms of this Agreement. Any prior agreements, promises, negotiations, or representations, either oral or written, relating to the subject matter of this Agreement are of no force or effect.

5.4 **Severability.** If any term, provision, covenant, or condition of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remaining provisions shall remain in full force and effect and shall in no way be affected, impaired, or invalidated as a result of such decision.

5.5 **Non-exclusivity.** This Agreement shall not be construed to be an exclusive Agreement between Health Plan and Provider. Nor shall it be deemed to be an Agreement requiring Health Plan to refer Members to Provider for health care services.

5.6 **Amendment.** Health Plan may, without Provider's consent, amend this Agreement to maintain consistency and/or compliance with any state or federal law, policy, directive, or government sponsored program requirement upon forty-five (45) business days' notice to Provider unless a shorter timeframe is necessary for compliance. Health Plan may otherwise materially amend this Agreement

only after forty-five (45) business days prior written notice to Provider and only if mutually agreed to by the parties as evidenced by the amendment being executed by each party hereto.

5.7 **Assignment.** Provider may not assign, transfer, subcontract or delegate, in whole or in part, any rights, duties, or obligations under this Agreement without the prior written consent of Health Plan. Subject to the foregoing, this Agreement is binding upon, and inures to the benefit of the Health Plan and Provider and their respective successors in interest and assigns. Neither the acquisition of Health Plan nor a change of its legal name shall be deemed an assignment.

5.8 **Arbitration.** Any claim or controversy arising out of or in connection with this Agreement shall be resolved, to the extent possible, within forty-five (45) days through informal meetings and discussions held in good faith between appropriate representatives of the parties. Any remaining claim or controversy shall be settled by binding arbitration administered by the American Arbitration Association ("AAA") in accordance with its Commercial Arbitration Rules then in effect by a single arbitrator in Los Angeles County; provided, however, that binding arbitration shall not be utilized to adjudicate matters that primarily involve review of Provider's professional competence or professional conduct, and shall not be available as a mechanism for appeal of any determinations made as to such matters. If possible, the arbitrator shall be an attorney with at least fifteen (15) years of experience, including at least five (5) years of experience in managed health care. The parties shall conduct a mandatory settlement conference at the initiation of arbitration, to be administered by AAA. The arbitrator shall have no authority to provide a remedy or award damages that would not be available to such prevailing party in a court of law, nor shall the arbitrator have the authority to award punitive damages. Each party shall bear its own costs and expenses, including its own attorneys' fees, and shall bear an equal share of the arbitrator's and administrative fees of arbitration. The parties agree to accept any decision by the arbitrator as a final determination of the matter in dispute, and judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction. Arbitration must be initiated within one year of the earlier of the date the claim or controversy arose, was discovered, or should have been discovered with reasonable diligence; otherwise it shall be deemed waived. The use of binding arbitration shall not preclude a request for equitable and injunctive relief made to a court of appropriate jurisdiction.

5.9 **Attachments.** Each of the Attachments identified below is hereby made a part of this Agreement:

Attachment A – Provider Identification Sheet
Attachment B – Definitions
Attachment C – Products/Programs
Attachment D – Compensation Schedule
Attachment E – Licensing Provisions
Attachment E-1 – Financial Solvency Provisions
Attachment E-2 – Provider Claims Processing Provisions
Attachment F – Medicaid Program Provisions
Attachment F-1 – Emergency Services Provisions
Attachment G – Acknowledgment of Receipt of Provider Manual
Attachment H – Medicare Program Provisions
Attachment I – Disclosure Form
Attachment J – Certificate of Ownership
Attachment K – Matrix of Financial Responsibility
Attachment L – Business Associate Addendum

5.10 **Notice.** All notices required or permitted by this Agreement shall be in writing and may be delivered in person or may be sent by registered or certified mail or U.S. Postal Service Express Mail, with postage prepaid, or by Federal Express or other overnight courier that guarantees next day delivery, or by facsimile transmission, and shall be deemed sufficiently given if served in the manner specified in this Section. The addresses below shall be the particular party's address for delivery or mailing of notice purposes:

If to Health Plan:
Molina Healthcare of California
200 Oceangate, Suite 100, Long Beach, California, 90802
Attention: President/CEO

If to Provider:
Pacific Healthcare IPA Associates, Inc.

5000 Airport Plaza Drive, Suite 150,Long Beach, CA 90815
Attention: Kathy Hegstrom

The parties may change the names and addresses noted above through written

notice in compliance with this Section. Any notice sent by registered or certified mail, return receipt requested, shall be deemed given on the date of delivery shown on the receipt card, or if no delivery date is shown, the postmark date. Notices delivered by U.S. Postal Service Express mail, Federal Express or overnight courier that guarantees next day delivery shall be deemed given twenty-four (24) hours after delivery of the notice to the United States Postal Service, Federal Express or overnight courier. If any notice is transmitted by facsimile transmission or similar means, the notice shall be deemed served or delivered upon telephone confirmation of receipt of the transmission, provided a copy is also delivered via delivery or mail.

ATTACHMENT B

Definitions

1. **Advance Directive** is a Member's written instructions, recognized under state law, relating to the provision of health care when the Member is not competent to make a health care decision as determined under state law. Examples of Advance Directives are living wills and durable powers of attorney for health care.

2. **Agreement** means this Provider Services Agreement, all Attachments, and incorporated documents or materials.

3. **Claim** means an invoice for services rendered to a Member by Provider, submitted in a format approved by Health Plan, and with all service and encounter information required by Health Plan.

4. **Clean Claim** means a claim for Covered Services that has no defect, impropriety, lack of any required substantiating documentation, or particular circumstance requiring special treatment that prevents timely payment from being made on the claim.

5. **CMS** means the Centers for Medicare and Medicaid Services, an administrative agency of the United States Government, responsible for administering the Medicare program.

6. **CMS Agreement** means the Medicare Advantage contract between Health Plan and CMS.

7. **Covered Services** means those health care services that are Medically Necessary, are within the normal scope of practice and licensure of Provider, and are benefits of the Health Plan product or a Health Plan affiliate's product which covers the Member.

8. **Credentialing Payment Reduction Amount** means that amount by which payments otherwise owing to Provider are reduced in the event Provider is dedelegated responsibility for credentialing.

9. **Emergency Services** are Covered Services necessary to evaluate or stabilize a medical or psychiatric condition manifesting itself by acute symptoms of sufficient severity (including severe pain) so as to cause a prudent layperson, who possesses an average knowledge of health and medicine, to reasonably expect the absence of immediate medical attention to result in: (a) placement of the Member's health (or the health of the Member's unborn child) in serious jeopardy; (b) serious impairment to bodily functions; or (c) serious dysfunction of any bodily organ or part. For Health Plan's Medicaid / Medi-Cal members, Emergency Services also includes any services defined as emergency services under 42 C.F.R. §438.114.

10. **Grievance Program** means the procedures established by Health Plan to timely address Enrollee and Provider complaints or grievances.

11. **Health Plan** means Molina Healthcare of California.

12. **HEDIS Studies** means Health Employer Data and Information Set.

13. **IPA** means Independent Practice Association.

14. **Medically Necessary** means those medical services and supplies which are provided in accordance with professionally recognized standards of practice which are determined to be: (a) appropriate and necessary for the symptoms, diagnosis or treatment of the Member's medical condition; (b) provided for the diagnosis and direct care and treatment of such condition; (c) not furnished primarily for the convenience of the Member, the Member's family, the treating provider, or other provider; (d) furnished at the most appropriate level which can be provided consistent

with generally accepted medical standards of care; and (e) consistent with Health Plan policy.

15. **Medicare** means the Hospital Insurance Plan (Part A) and the Supplementary Medical Insurance Plan (Part B) provided under Title XVIII of the Social Security Act, as amended.

16. **Medicare Advantage** means the managed care program established by the Medicare Modernization Act of 2003 to serve Medicare-eligible beneficiaries. Medicare Advantage plans generally cover Part A and Part B services and may also include Part D Services.

17. **Medicare Advantage Special Needs Plan (MA-SNP)** means the managed care program established by the Medicare Modernization Act of 2003 which allows health plans to create specialized plans for beneficiaries who are eligible for Medicare and Medicaid.

18. **Member(s)** means a person(s) enrolled in one of Health Plan's benefit products or a Health Plan affiliate's benefit product and who is eligible to received Covered Services.

19. **Provider** means the person(s) and/or entity identified in Attachment A to this Agreement. Where Provider is a Group/IPA or Hospital, Provider means and includes all constituent physicians, allied health professionals and staff persons who provide health care services to Members by and/or through the Group/IPA or Hospital. All of said persons are bound by the terms of this Agreement.

20. **Provider Manual** means the compilation of Health Plan policies, procedures, standards and specimen documents, as may be unilaterally amended or modified from time to time by Health Plan or mutually amended or modified from time to time by the parties, that have been compiled by Health Plan for the use and instruction of Provider, and to which Provider must adhere.

21. **Quality Improvement Program** means the policies, procedures and systems developed by Health Plan for monitoring, assessing and improving the accessibility, quality and continuity of care provided to Members.

22. **Utilization Review and Management Program** means the policies, procedures and systems developed by Health Plan for monitoring the utilization of Covered Services by Members, including but not limited to under-utilization and over-utilization.

23. **Utilization Management Reduction Amount** means that amount by which payments otherwise owing to Provider are reduced in the event that Provider is de-delegated responsibility for utilization management.

ATTACHMENT C

Products/Programs

Provider hereby elects to participate as a panel provider for each of the following Health Plan products as offered and applicable.

N Medi-Cal Geographic Managed Care

N Medi-Cal Two-Plan Model

Y MA-SNP (Molina Medicare Options Plus)

Y CFAD (Medicare Capitated Financial Alignment Demonstration and successor(s))

N Molina Health Benefit Exchange Product

N Other Products - Provider agrees that Health Plan may from time to time add additional products for which provider agrees to participate as a contracted provider

Health Plan shall maintain any applicable benefit and Covered Services descriptions in its Provider Manual.

ATTACHMENT D

Compensation Schedule

Health Plan shall pay Provider in accordance with the terms and conditions of this Agreement and the reimbursement terms set forth in this Attachment and any applicable sub-attachments referenced hereto and incorporated herein.

ARTICLE ONE – COMPENSATION TERMS

6.1 **Definitions.** The following terms shall have the meanings attributed below for purposes of this attachment. Capitalized terms not otherwise defined herein shall have the meanings ascribed to them in the Agreement.

a. Capitation Payments are the monthly payments made to Provider on a prepaid basis for Covered Services provided or arranged by Provider under this Agreement. Capitation Payments to Provider shall be made to the Provider by the fifteenth (15th) day of each month. In the event the fifteenth (15th) day of the month is not a business day, the Capitation Payment shall be due and payable on the next business day following the fifteenth (15th) day of the month.

b. Medicare Program Members are the Members enrolled in the following Medicare program(s) as specified in Attachment C and checked below:

Y MA-SNP (Molina Medicare Options Plus))
Y CFAD (Capitated Financial Alignment Demonstration and successor(s)

c. Medicare Program Revenue is the Part A and B Monthly CMS Payment that Health Plan receives from CMS for Medicare Program Members assigned to Provider.

6.2 **Capitation Payment Terms.**

a. Matrix of Financial Responsibility. For each Health Plan program or set of programs (ie. Medicaid Programs, Medicare Programs, etc) that Provider is reimbursed on a Capitation Payment basis, there is an attached Matrix of Financial Responsibility at Attachment K specifying the financial responsibility for Covered Services between Health Plan and Provider.

b. Capitation Payments for Medicare Program Members assigned to Provider shall be made based upon a per Member per month capitation rate.

For Medicare Program Members, Health Plan shall pay provider at thirty-eight percent (38%) of the Medicare Program Revenue per Medicare Program Member per month. Health Plan may amend this Agreement, in accordance with the applicable Amendment section of this Agreement, to modify these Capitation Payments in order to account for any revenue reduction in the applicable government-sponsored program(s) and benefits, if any.

c. **Collection of Copayments.** Provider shall be responsible for the collection of copayments and deductibles (if any) upon rendering Covered Services to Members. Any copayments or deductibles which are stated as a percentage shall be calculated utilizing the fee-for-service rates set forth in the "Non-Capitated Services Submission of Claims/Claims Payment" provisions in this Attachment, applicable to Member's Health Plan program, for such Covered Services. Provider shall not refuse to provide Covered Services in the event a Member is unable to pay their copayment or deductible except as may be specifically permitted in the Provider Manual or as approved in advance by Health Plan.

d. **Coordination of Benefits for Capitated Providers.** Notwithstanding any other provisions of this Agreement, if Provider is reimbursed on a capitated basis and a coordination of benefits occurs, Provider shall not be eligible for additional compensation from Health Plan beyond the applicable Capitation Payments or Non-Capitated Services Submission of Claims/Claims Payments.

e. **Retroactive Adjustments.** Capitation Payments shall be subject to retroactive adjustments due to retroactive changes in the following; (i) for those programs based on a percent of premium capitation payment method, the amounts related to such premium adjustments for each program as demographic (ie. age, gender, hospice, ESRD, part A/B coverage, institutionalized, working aged, Medicaid, etc) and/or risk adjustments (ie. CMS Hierarchical Condition Category "HCC" adjustments), if any, which Health Plan receives in government funding sources for each Member assigned to Provider, and/or (ii) for all capitation payment methods, whether on a per Member per month or percent of premium basis, the retroactive changes in the number of Members assigned to Provider for each program.

f. **Character of Payments.** Capitation Payments to Provider pursuant to this Agreement are for the primary purpose of compensating Provider for the value of Covered Services provided pursuant to this Agreement. Provider shall assure that claims and compensation for Covered Services provided or arranged pursuant to this Agreement are paid from the Capitation Payments from Health Plan to Provider as may be necessary for Provider to satisfy its financial obligations under this Agreement. Health Plan shall have the right, but not the obligation, to pay claims which Provider fails to pay for Covered Services provided to Members. Provider specifically agrees that Health Plan may recover such owed amounts by way of offset or recoupment in accordance with the Offset provisions of this Agreement.

g. **Legislation Regulating Provider Risk.** Provider recognizes that the compensation terms set forth in this Attachment are established in exchange for Provider's provision of Covered Services that are the financial responsibility of Provider, as outlined in the applicable Matrix of Financial Responsibility. In the event that any state or federal law, policy, directive, or government sponsored program requirement requires Health Plan to assume financial risk for certain Covered Services previously assigned to Provider, Health Plan may, without Provider's consent, amend this Agreement to comply. Health Plan will provide Provider with forty-five (45) business days' notice of the change unless a shorter timeframe is necessary for compliance.

   Health Plan will present Provider with its actuarial valuation of the services that will no longer be the financial risk of Provider. Provider will have the opportunity to either present Health Plan with its expense data or an independent actuarial valuation of the same services. If Provider chooses to retain an independent actuary at its expense, the selection of the actuary must be mutually agreeable to both parties. If the independent actuary's findings indicate that the value of the services is less than Health Plan's valuation and if Health Plan and Provider reach mutual agreement on a lower valuation, then an adjustment corresponding to the mutually agreed upon valuation shall be made to the Health Plan's compensation as of the effective date of Health Plan's implementation of the legislation. The negotiated rate will be documented via an amendment of the Agreement by the parties.

h. **Non-Capitated Services Submission of Claims/Claims Payment.** For Clean Claims for Covered Services rendered to Members which are provided

or arranged by Provider, but are (i) Health Plan's financial responsibility under the applicable Matrix of Financial Responsibility, and (ii) are not covered by Capitation Payments (collectively the "Non-Capitated Services"), Provider shall obtain the prior authorization of Health Plan in accordance with Health Plan's Provider Manual unless the situation is one involving the delivery of Emergency Services. Health Plan shall then reimburse Provider for such Non-Capitated Services on a fee-for-service basis in accordance with the applicable Claims Payment provisions of this Agreement, at the lesser of; (i) Provider's billed charges, or (ii) the applicable fee-for-service rates set forth below less any applicable Member co-payments, deductibles, co-insurance, or amounts paid or to be paid by other liable third parties, if any:

(1) Non-Capitated Services Payment Rate for Medicare Program Members. An amount equivalent to one hundred percent (100%) of the payment Provider would otherwise have been entitled to had the Covered Services been billed directly under the prevailing local and geographically adjusted Medicare Fee-For-Service program payment rates as of the date(s) of service.

If there is no payment rate in the prevailing local and geographically adjusted Medicare Fee-For-Service program as of the date(s) of service, payment shall be at thirty percent (30%) of Provider's billed charges.

(2) Non-Capitated Services Payment Rate for all other Members not otherwise designated above. An amount equivalent to sixty-five percent percent (65%) of the payment Provider would otherwise have been entitled to had the Covered Services been billed directly under the prevailing local and geographically adjusted Medicare Fee-For-Service program payment rates as of the date(s) of service.

If there is no payment rate in the prevailing local and geographically adjusted Medicare Fee-For-Service program as of the date(s) of service, payment shall be at thirty percent (30%) of Provider's billed charges.

i. Adequacy of Compensation. Provider shall accept payments as provided herein, along with any applicable co-payments, deductibles, and coordination of benefits collections as payment in full for providing or arranging Covered Services under this Agreement. Provider shall not balance bill Members for

any Covered Services.

ARTICLE TWO – REVOCATION OF DELEGATED RESPONSIBILITIES

7.1 **Revocation of Delegated Responsibilities.** If applicable, Health Plan shall reduce any otherwise applicable payments owing to Provider by the amounts specified below in the event delegation of the responsibilities set forth in the applicable Program Participation sections in this Agreement are revoked.

a. Utilization Management Payment Reduction Amount. If delegation of utilization management responsibilities is revoked, Health Plan shall reduce any otherwise applicable payments owing to Provider by sixty-five cents ($0.65) per Member per month.

b. Credentialing Payment Reduction Amount. If delegation of credentialing responsibilities is revoked, Health Plan shall reduce any otherwise applicable payments owing to Provider by sixty-five cents ($0.65) per Member per month.

ATTACHMENT E

REQUIRED PROVISIONS

(Health Care Service Plans)

The following provisions are required by (i) federal statutes and regulations applicable to Health Plan, or (ii) state statutes and regulations applicable to health care service plans. Any purported modifications to these provisions inconsistent with such statutes, regulations, and agreements shall be null and void.

DMHC Provisions

1. In the event that Health Plan fails to pay Provider for Covered Services, the Member or subscriber shall not be liable to Provider for any sums owed by Health Plan.

Provider shall not collect or attempt to collect from a Member or subscriber any sums owed to Provider by the Health Plan. Provider may not and will not maintain any action at law against a Member or subscriber to collect sums owed to the Provider by Health Plan. (Health and Safety Code section 1379)

2. To the extent that any of Health Plan's quality of care review functions or systems are administered by Provider, Provider shall deliver to Health Plan any information requested in order to monitor or require compliance with Health Plan's quality of care review system. (Rule 1300.51, J-5)

3. Provider is responsible for coordinating the provision of Health Care Services to Members who select Provider if Provider is a primary care physician. (Rule 1300.67.1(a))

4. Provider shall maintain Member medical records in a readily available manner that permits sharing within Health Plan of all pertinent information relating to the health care of Members. (Rule 1300.67.1(c))

5. Provider shall maintain reasonable hours of operation and make reasonable provisions for after-hour services. (Rule 1300.67.2(b))

6. To the extent Provider has any role in rendering Emergency Services, Provider shall make such Emergency Services available and accessible twenty-four (24) hours a day, seven days a week. (Rule 1300.67.2(c))

7. Provider shall participate in Plan's system for monitoring and evaluating accessibility of care including but not limited to waiting times and appointment availability, and addressing problems that may develop. Provider shall timely notify Health Plan of any changes to address or inability to maintain Health Plan's access standards. (Rule 1300.67(f))

 Provider or authorized representative's initials: FB

8. Health Plan is subject to the requirements of the Knox-Keene Health Care Service Plan Act of 1975, as amended (Chapter 2.2 of Division 2 of the Health and Safety Code), and the Regulations promulgated hereunder (subchapter 5.5 of Chapter 3 of Title 28 of the California Code of Regulations). Any provision of the aforementioned statutes or regulation that is required to be in this Agreement shall bind the Health Plan whether or not expressly set forth in this Agreement. (Rule 1300.67.4(a)(9))

9. Upon the termination of this Agreement, Health Plan shall be liable for Covered Services rendered by Provider (other than for copayments as defined in subdivision (g) of Section 1345 of the Health and Safety Code) to a subscriber or Member who retains eligibility under the applicable plan contract or by operation of law under the care of Provider at the time of termination of the Agreement until the services being rendered to the subscriber or Member by Provider are completed, unless the Health Plan makes reasonable and medically appropriate provision for the assumption of services by a contracting provider. (Health and Safety Code section 1373.96) (Rule 1300.67.4(a)(10))

10. Any written communications to Members that concern a termination of this agreement shall comply with the notification requirements set forth in Health and Safety Code section 1373.65(f)

11. Provider shall maintain all records and provide all information to the Health Plan or the DMHC as may be necessary for compliance by the Health Plan with the provisions of the Knox-Keene Health Care Service Plan Act of 1975, as amended and any regulations promulgated thereunder. To the extent feasible, all such records shall be located in this state. Provider shall retain such records for at least two years: this obligation shall not terminate upon termination of the Agreement, whether by rescission or otherwise. (Health and Safety Code section 1381) (Rule 1300.67.8(b))

12. Provider shall afford Health Plan and the DMHC access at reasonable times upon demand to the books, records and papers of Provider relating to health services provided to Members and subscribers, to the cost thereof, to payments received by Provider from Members and subscribers of the Health Plan (or from others on their behalf), and, unless Provider is compensated on a fee-for-services basis, to the

 Provider or authorized representative's initials: FB

financial condition of Provider. Provider shall promptly deliver to Health Plan, any financial information requested by Health Plan for the purpose of determining Provider's ability to bear capitation or other applicable forms of risk sharing compensation. (Rule 1300.67.8(c))

13. Provider shall not and is hereby prohibited from demanding surcharges from Members for Covered Services. Should Health Plan receive notice of any such surcharges by Provider, Health Plan may take any action it deems appropriate including but not limited to demanding repayment by Provider to Members of any surcharges, terminating this Agreement, repaying surcharges to Members and offsetting the cost of the same against any amounts otherwise owing to Provider. (Rule 1300.67.8(d))

14. Upon Health Plan's request, provider shall report all co-payments paid by Members to provider. (Health and Safety Code section 1385)

15. To the extent that any of Health Plan's quality assurance functions are delegated to Provider, Provider shall promptly deliver to Health Plan all information requested for the purpose of monitoring and evaluating Provider's performance of those quality assurance functions. (Rule 1300.70)

16. Provider may utilize Health Plan's Provider Dispute Resolution Process by phoning or writing the Provider Services Department, Molina Medical Centers, Third Floor, One Golden Shore Drive, Long Beach, CA 90802 (800) 526-8196, ext. 1249. The Provider Dispute Resolution Process, however, does not and cannot serve as an appeal process from any fair hearing proceeding held pursuant to Health and Safety Code Section 809, et. seq. Please see the Provider Manual for more information regarding the dispute resolution process. (Health and Safety Code Section 1367(h).) (Rule 1300.71.38)

17. Provider shall display in each reception and waiting area a notice informing Members how to contact their health plan, file a complaint with their plan, obtain assistance from the DMHC, and seek an independent medical review. (Rule 1300.67.8(f))

18. Provider shall provide grievance forms and assist Members in filing grievances. Provider shall cooperate with Health Plan in responding to Member grievances and requests for independent medical reviews. (Rule 1300.68(b))

19. In the event a Member seeks and obtains a recovery from a third party or a third party's insurer for injuries caused to that Member, and only to the extent permitted by the Member's evidence of coverage and by California law, Provider may have the right to assert a third party lien for and to recover from the Member the reasonable value of Covered Services provided to the Member by Provider for the injuries caused by the third party. Health Plan shall similarly have the right to assert a lien for and recover for payments made by Health Plan for such injuries. Provider shall cooperate with Health Plan in identifying such third party liability claims and in providing such information. Pursuit and recovery of under third party liens shall be conducted in accordance with California Civil Code section 3040.

20. The Provider Manual may be unilaterally amended or modified by Health Plan to maintain consistency and/or compliance with any state or federal law, policy, directive, or government sponsored program requirement upon forty-five (45) business days' notice to Provider unless a shorter timeframe is necessary for compliance. Health Plan may otherwise materially amend the Provider Manual only after forty-five (45) business days prior written notice to Provider and only if mutually agreed to by the parties as evidenced by the amendment being executed by each party.

21. Notwithstanding any other provision in this Agreement, if Health Plan or Health Plan's capitated provider is not the primary payer under coordination of benefits, Provider may submit claims to Health Plan or Health Plan's capitated provider within ninety (90) days from the date of payment or date of contest, denial or notice from the primary payer. Except as otherwise provided by law or provided by government sponsored program requirements, any claims that are not submitted by Provider to Health Plan within ninety (90) days from the date of payment or date of contest, denial or notice from the primary payer shall not be eligible for payment, and Provider hereby waives any right to payment therefore.

22. Notwithstanding any other provision in this Agreement, if Health Plan or Health Plan's capitated provider denies a claim because it was filed beyond the claim filing deadline, Health Plan will, upon Provider's submission of a provider dispute pursuant to Title 28, California Code of Regulations, section 1300.71.38 and the demonstration of good cause for the delay, accept, and adjudicate the claim according to California Health & Safety Code section 1371 or 1371.35, whichever is applicable, and the California Code of Regulations.

ATTACHMENT E-1

DMHC Financial Solvency Provisions

This Attachment is required to comply with the financial standards and reporting requirements Rules 1300.75.4 through 1300.75.4.8. References to the term "Rule" identify regulatory citations in Title 28 of the California Code of Regulations.

NOW THEREFORE, in consideration of the mutual promises and covenants contained herein, the parties agree as follows:

I. DEFINITIONS

1.1 **"Cash-to-Claims Ratio"** is Provider's cash, readily available marketable securities and receivables, excluding all risk pool, risk-sharing, incentive payment program and pay-for-performance receivables, reasonably anticipated to be collected within sixty (60) days divided by Provider's unpaid claims liability. Unpaid claims liability is claims payable plus incurred but not reported claims ("IBNR").

1.2 **"Contracted Plans"** means all full-service health care service plans as defined in Section 1345(f) of the California Health & Safety Code with which Provider has contracts involving a Risk Arrangement.

1.3 **"Corrective Action Plan" ("CAP")** means a plan reflected in a document containing requirements for correcting and monitoring Provider's efforts to correct any financial solvency deficiencies in the Grading Criteria, financial deficiencies or other claims payment deficiencies, determined through the DMHC's review or audit process, indicating that Provider may lack the capacity to meets its contractual obligations consistent with the requirements of Rule 1300.70(b)(2)(H)(1).

 Provider or authorized representative's initials: FB

1.4 **"DMHC"** means the California Department of Managed Health Care. Whenever the Solvency Regulations reference the Department, that reference includes the DMHC or its External Party.

1.5 **"External Party"** means the DMHC or its designated agent, which may be contracted or appointed to fulfill the functions stated in these Solvency Regulations.

1.6 **"Grading Criteria"** means the four grading/reviewing criteria specified in Health and Safety Code sections 1375.4(b)(1)(A) (i), (ii), (iii), and (iv) and the Cash-to-Claims Ratio as defined above.

1.7 **"Risk Arrangement"** is defined to include both "risk-sharing arrangement" and "risk-shifting arrangement," which are defined as follows:

(a) Risk-Sharing Arrangement means any compensation arrangement between Provider and Health Plan under which Provider shares the risk of financial gain or loss with Health Plan.

(b) Risk-Shifting Arrangement means a contractual arrangement between Provider and Health Plan under which Health Plan pays Provider on a fixed, periodic or capitated basis, and the financial risk for the cost of services provided pursuant to the contractual arrangement is assumed by Provider.

1.8 **"Solvency Regulations"** means Rules 1300.75.4 through 1300.75.4.8 .

II. OBLIGATIONS OF HEALTH PLAN

2.1 Monthly Membership Reports. Notwithstanding any different provisions of the Agreement, Health Plan will provide the following information to Provider on a monthly basis for members assigned to Provider, within ten (10) calendar days following the start of each month:

(a) Membership information containing at least the following elements for each member: i) identification number; ii) name; iii) birth date; iv) gender; v) address (including zip code); vi) benefit plan selected; vii) employer group identification (name and number); viii) identity of other third party coverage (if known); ix) dates of enrollment/disenrollment from Provider; x) Provider number; xi) primary care physician selected; xii) primary care physician effective date; xiii) type of change to coverage; xiv) co-payment amounts; xv) deductible (if applicable); xvi) amount of monthly capitation payment.

(b) The following additional information: i) member additions and terminations for the month (including at least: member name, member identification number); ii) number of additional members under each managed care plan; iii) number of terminated members under each managed care plan.

(c) Health Plan shall submit the information from Section 2.1(a) and 2.1(b) to Provider electronically, unless both Health Plan and Provider agree in writing that hard copy reports will be submitted instead.

(d) If the information from Section 2.1(a) and 2.1(b) above is provided to Provider in more than one report, all reports shall be processed by Health Plan on the same date.

(e) Within forty-five (45) calendar days of the close of each calendar quarter, Health Plan shall disclose to Provider a reconciliation of any variances between the reports for information listed in sections 2.1(a) and 2.1(b) above through electronic transmission, or in hard copy if mutually agreed upon by Provider and Health Plan.

2.2 Intentionally Left Blank.

2.3 Intentionally Left Blank.

2.4 Annual Financial Risk Disclosure. On the Agreement anniversary date each year, Health Plan shall disclose to Provider the financial risk assumed under the Agreement by providing to Provider the following information for each and every type of Risk Arrangement (including, but not limited to, Medicare Advantage, Medi-Cal, commercial, point of service, small group, and individual plans) covered under the Agreement:

(a) A matrix of responsibility for medical expenses (physician, institutional, ancillary, and pharmacy) which will be allocated to Provider, a hospital(s) or Health Plan under the Risk Arrangement.

(b) Expected/projected utilization rates and unit costs for each major expense service group (inpatient, outpatient, primary care physician, specialist, pharmacy, injectables, home health, durable medical equipment, ambulance and other), as well as the source of the data and the actuarial methods employed in determining the utilization rates and unit costs by each and every type of Risk Arrangement.

2.5 Annual Disclosure of Capitation Payments. On the Agreement anniversary date each year, Health Plan shall disclose to Provider the amount of capitation payments to be paid per member per month.

2.6 Capitation Deduction Detail. Health Plan shall provide to Provider sufficient details to allow Provider to verify the accuracy and appropriateness of any deductions from capitation payments made by Health Plan including, but not

limited to, member name, member number, member date-of-birth, billing provider name, date-of-service, procedure/service codes billed, and amount paid.

III. OBLIGATIONS OF MEDICAL GROUP

3.1 Cash-to-Claims Ratio. Provider shall maintain at least the following Cash-to-Claims Ratio:

(a) 0.60 – January 1, 2006 through June 30, 2006

(b) 0.65 – July 1, 2006 through December 31, 2006

(c) 0.75 – January 1, 2007 and thereafter

3.2 Quarterly Financial Survey. No later than forty-five (45) calendar days following the close of each quarter of its fiscal year beginning on or after July 1, 2005, Provider agrees to submit a quarterly financial survey report in an electronic format to the DMHC as required by Rule 1300.41.8 of Title 28 of the California Code of Regulations as set forth below:

(a) The quarterly financial survey report shall include the following if Provider has at least 10,000 covered lives under all Risk Arrangements as of December 31 of the preceding calendar year:

(i) A Financial survey report, (including a balance sheet, an income statement and a statement of cash flows), or comparable financial statements if Provider is a nonprofit entity, and supporting schedule information (including, but not limited to, aging of receivable information), reflecting the results of operations for the immediately preceding quarter, prepared in accordance with Generally Accepted Accounting Principles ("GAAP"). Financial survey reports must be on a combining basis with an affiliate, if Provider or such Provider affiliate is legally or financially responsible for payment of Provider's claims. Any affiliated entity included in this

financial survey report must be separately identified in a combining schedule format. For the purposes of this section, Provider's use: (1) of a "sponsoring organization" arrangement to reduce its liabilities for the purposes of calculating tangible net equity and working capital or (2) an affiliated entity to provide claims processing services shall not be construed to automatically create a legal or financial obligation to pay Provider's claims liability.

(ii) A claims report, which includes the percentage of claims that have been timely reimbursed, contested or denied during the quarter by Provider in accordance with the requirements of sections 1371 and 1371.35 of the California Health & Safety Code, Rule 1300.71, and any other applicable state and federal laws and regulations. If less than ninety-five percent (95%) of all complete claims have been reimbursed, contested or denied on a timely basis, the claims report must also describe the reasons why Provider's claims adjudication process is not meeting the requirements of applicable law, any actions taken to correct the deficiency, and any results of the actions. This claims report is for the purpose of monitoring the financial solvency of Provider and is not intended to change or alter existing state and federal laws and regulations relating to claims payment settlement practices and timeliness.

(iii) A statement as to whether or not Provider has estimated and documented, on a monthly basis, its liability for ("IBNR") claims in accordance with Rule 1300.77.2 ("IBNR Statement") and that these estimates are the basis for the quarterly financial survey report submitted to the DMHC. If the estimated and documented liability is not in compliance with Rule 1300.77.2 in any way, the IBNR Statement shall describe in detail for each deficiency the nature of the deficiency, the reasons for the deficiency, any actions taken to correct the deficiency, and any results of those actions. Provider's failure to: (1) estimate and document, on a monthly basis, its liability for IBNR claims or (2) maintain its books and records on an accrual accounting basis shall result in Provider's failure to maintain, at all times, positive tangible net equity ("TNE") and positive working capital as set forth in section 3.2(a)(iv) below.

(iv) A statement as to whether or not Provider has maintained at all times throughout the quarter (1) a positive TNE as defined in Rule 1300.76(e) and (2) a positive level of working capital, calculated according to GAAP ("TNE/Working Capital Statement"). If either the required TNE or the required working capital has not been maintained at all times, a statement must be included in the quarterly financial survey report that describes in detail the nature of the deficiency, the reasons for the deficiency, any actions taken to correct the deficiency, and any results of those actions. Provider may reduce its liabilities or increase its cash for purposes of calculating its TNE, working capital and Cash-to-Claim Ratio in a manner allowed by Health and Safety Code Section 1375.4(b)(1)(B) so long as the sponsoring organization has filed with the DMHC: (1) its audited annual financial statements within one hundred twenty (120) calendar days of the end of the sponsoring organization's fiscal year and (2) a copy of the written guarantee meeting the requirements of Health and Safety Code Rule 1375.4(b)(1)(B). For purposes of the Health and Safety Code Rule 1375.4(b)(1)(B), a sponsoring organization shall have a TNE of at least twice the total of all amounts that it has guaranteed to all persons and entities, or TNE in a lesser amount approved by the DMHC, in situations where Provider can demonstrate to the DMHC's satisfaction that a lesser amount of TNE is sufficient. If Provider has a sponsoring organization, Provider shall provide a statement demonstrating the capacity of the sponsoring organization to guarantee Provider's debts as well as the nature and scope of the guarantee provided consistent with Health and Safety Code Section 1375.4(b)(1)(B).

(v) For the quarter beginning on or after January 1, 2006, a statement as to whether or not Provider has, at all times during the quarter, maintained a Cash-to-Claims Ratio as required in section 3.1 above, calculated in a manner consistent with GAAP. If the required Cash-to-Claims Ratio has not been maintained at all times, a statement shall be included in the quarterly financial survey report that describes in detail the nature of the deficiency, the reasons for the deficiency, any action taken to correct the deficiency, and any results of that action.

 Provider or authorized representative's initials: FB

(b) The quarterly financial survey report shall include the following if Provider has fewer than 10,000 covered lives under all Risk Arrangements as of December 31 of the preceding calendar year:

(i) The disclosure statements set forth in sections 3.2(a)(ii),(iii), (iv) and (v) above.

(ii) In the event Provider serves fewer than 10,000 covered lives under all Risk Arrangements and it: (i) fails to satisfactorily demonstrate its compliance with the Grading Criteria; (ii) experiences an event that materially alters its ability to remain compliant with the Grading Criteria; (iii) is found, by the DMHC's (or the DMHC's designee's) review or audit activities, to potentially lack sufficient financial capacity to continue to accept financial risk for the delivery of health care services consistent with the requirements of Rule 1300.70(b)(2)(H)(1); or (iv) is found, through the DMHC's HMO Help Center, medical audits and surveys, or any other source, to be delaying referrals, authorizations, or access to basic health care services based on financial considerations, Provider shall, within thirty (30) calendar days of the DMHC's written request, begin submitting all quarterly financial survey reports set forth in sections 3.2(a) above.

3.3 Annual Financial Survey. Provider agrees to submit to the DMHC on a yearly basis, not more than one hundred fifty (150) calendar days after the close of Provider's fiscal year beginning on or after January 1, 2005, annual financial survey reports, in an electronic format determined by the DMHC as required by Rule 1300.41.8, based upon Provider's annual audited financial statement prepared in accordance with generally accepted auditing standards and containing all of the following:

(a) An annual financial survey report, based upon Provider's annual audited financial statements, (including at least a balance sheet, an income statement, a statement of cash flows, and footnote disclosures) or comparable financial statements if Provider is a nonprofit entity, and supporting schedule information, (including, but not limited to, aging of receivable information

and debt maturity information) for the immediately preceding fiscal year, prepared by an independent certified public accountant in accordance with GAAP. For the purposes of determining the independence of the certified public accountant, the regulations of the California State Board of Accountancy (Division 1, Sections 1 through 99.2, Title 16 of the California Code of Regulations) shall apply.

(b) The financial survey reports of Provider shall be on a combining basis with an affiliate if Provider or such affiliate is legally or financially responsible for the payment of Provider's claims. Any affiliated entity included in the report shall be separately identified. Provider's use of: (1) a "sponsoring organization" arrangement to reduce its liabilities for the purposes of calculating TNE and working capital or (2) an affiliated entity to provide claims processing services shall not be construed to automatically create a legal or financial obligation to pay Provider's claims liability. When combined financial statements are required, the independent accountant's report or opinion must address all the entities included in the combined financial statements. If the accountant's report or opinion makes reference to the fact that another auditor performed a part of the examination, Provider shall also file the report or opinion issued by the other auditor.

(c) Opinion of an independent certified public accountant indicating whether Provider's annual audited statements present fairly, in all material respects, the financial position of Provider and whether the financial statements were prepared in accordance with GAAP. If the opinion is qualified in any way, the survey report shall include an explanation regarding the nature of the qualification.

(d) An IBNR Statement consistent with the requirements outlined in section 3.2(a)(iii) of this Amendment. If the estimated and documented liability is not in compliance with Rule 1300.77.2 in any way, the IBNR Statement shall describe in detail for each deficiency the nature of the deficiency, the reasons for the deficiency, any actions taken to correct the deficiency, and any results of those actions. Provider's failure to: (1) estimate and document, on a monthly basis, its liability for IBNR claims or (2) maintain its books and

records on an accrual accounting basis shall result in Provider's failure to maintain, at all times, positive tangible net equity ("TNE") and positive working capital as set forth in section 3.3(e) below.

(e) A TNE/Working Capital Statement consistent with the TNE reporting requirements as outlined in Section 3.2(a)(iv) of this Amendment. If either the required TNE or the required working capital has not been maintained at all times, the TNE/Working Capital Statement shall describe in detail the nature of the deficiency, the reasons for the deficiency, any actions taken to correct the deficiency, and any results of those actions. Provider may reduce its liabilities for purposes of calculating its TNE and working capital in a manner as required by Rule 1300.41.8 and as outlined in section 3.2(a)(iv) of this Amendment.

(f) For fiscal years beginning on or after January 1, 2006, a statement as to whether or not Provider has at all times during the year maintained a Cash-to Claims Ratio as required in section 3.1 above, calculated in a manner consistent with GAAP. If the required Cash-to-Claims Ratio has not been maintained at all times, a statement shall be included in the quarterly financial survey report that describes in detail the nature of the deficiency, the reasons for the deficiency, any action taken to correct the deficiency, and any results of that action.

(g) A statement as to whether Provider maintains reinsurance and/or professional stop-loss coverage.

(h) A copy of Provider's complete annual audited financial statement, including footnotes and the certificate or opinion of the independent certified public accountant.

3.4 Annual Statement of Organization Survey. Provider shall submit to the DMHC a "Statement of Organization," in an electronic format determined by the DMHC to be filed with Provider's annual financial survey report. Such Statement of

Organization shall include the following information as of December 31 of each calendar year prior to the filing:

(a) Name and address of Provider;

(b) Financial and public contact person, with title, address, telephone, fax and e-mail address;

(c) A list of all health plans with which Provider has Risk Arrangements;

(d) Type of Provider: Independent Practice Association (IPA), Medical Group, Foundation or other entity, or some combination. If Provider is a foundation, identify each and every medical group within the foundation and whether any of those medical groups independently qualifies as a risk-bearing organization as defined in Health and Safety Code Section 1375.4(g).

(e) Corporate status: professional corporation, partnership, not-for-profit corporation, sole proprietor or other form of business;

(f) The name, address and principal officer of each of Provider's affiliates as defined in Rule 1300.45(c)(1) and (2);

(g) Whether Provider is partially or wholly owned by a hospital or hospital system;

(h) A matrix listing all major categories of medical care offered by Provider, including but not limited to anesthesiology, cardiology, orthopedics, ophthalmology, oncology, obstetrics/gynecology, and radiology, and next

 Provider or authorized representative's initials: FB

to each listed category in the matrix a disclosure of the compensation model (salary, fee-for-service, capitation, other) used by Provider to compensate the majority of providers of that category of care;

(i) An approximation of the number of enrollees served by Provider through Risk Arrangements, pursuant to a list of ranges developed by the DMHC;

(j) The name of any Management Services Organization ("MSO") that Provider contracts with for administrative services;

(k) Total number of contracted physicians in employment and/or contractual arrangements with Provider;

(l) Disclosure by California county or counties of Provider's primary service area (excluding out-of-area tertiary facilities and providers);

(m) Provider's address, telephone number and website link, if available, where providers may access written information and instructions for filing of provider disputes with Provider's dispute resolution mechanism consistent with requirements of Rule 1300.71.38;

(n) Any other information which the DMHC deems reasonable and necessary, as permitted by law, to understand the operational structure and finances of Provider.

3.5 Attestation. Provider shall submit a written verification for each report made under Sections 3.2, 3.3, and 3.4 of this Amendment stating that the report is true and correct to the best knowledge and belief of a principal officer of Provider, and signed by a principal officer, as defined by Rule 1300.45(o).

3.6 Notification to DMHC & Health Plan. Provider agrees to notify the DMHC and Health Plan no later than five (5) business days from discovering that Provider has experienced any event that materially alters its financial situation or threatens its solvency.

3.7 DMHC Evaluation of Provider. Provider shall:

(a) Permit the DMHC to make any examination that it deems reasonable and necessary to implement section 1375.4 of the Health and Safety Code, and provide to the DMHC for inspection and copying, upon request, any books or records that the DMHC deems relevant or useful in such examination, as permitted by law.

(b) Comply with the DMHC's review and audit process that is used to determine Provider's compliance with the Grading Criteria.

(c) Permit the DMHC to obtain and evaluate supplemental financial information pertaining to Provider when:

(i) Provider fails to satisfactorily demonstrate its compliance with the Grading Criteria;

(ii) Provider experiences an event that materially alters its ability to remain compliant with the Grading Criteria;

(ii) The External Party's review or audit process indicates that Provider may have insufficient financial capacity to continue to accept financial risk for the delivery of health care services consistent with the requirements of Rules 1300.70(b)(2)(H)(1);

(iv) The DMHC receives information from complaints submitted to the HMO Help Center, Health Plan reporting, medical audits and surveys or any other source that indicates Provider may be delaying referrals or authorizations or failing to meet access standards for basic health care services based on financial considerations.

IV. OBLIGATIONS OF MEDICAL GROUP & HEALTH PLAN

4.1 Corrective Action Plans. Provider and Health Plan shall comply with the DMHC's Corrective Action Plan ("CAP") process as set forth below.

(a) Beginning with the financial survey submission filed for the third quarter of calendar year 2005, in the event Provider has deficiencies in any of the Grading Criteria, it shall simultaneously submit a self-initiated CAP proposal, in an electronic format developed by the DMHC, to the DMHC and Health Plan that meets the following requirements:

(i) Identifies the Grading Criteria that Provider has failed to meet;

(ii) Identifies the amount by which Provider has failed to meet the Grading Criteria;

(ii) Identifies Health Plan and other Contracted Plans, including the identification of the name, title, telephone and facsimile numbers, and postal and e-mail addresses for the person responsible at Health Plan and each Contracted Plan for monitoring compliance with the CAP;

(iv) Describes the specific actions Provider has taken or will take to correct the identified deficiencies, including any written representations made by Health Plan and/or other Contracted Plans to assist Provider in the implementation of its CAP. The actions shall be appropriate and reasonable in scope and breadth depending upon the nature and degree of the deficiency, and acceptable to the DMHC;

(v) Describes the timeframe for completing the corrective action and specifies a schedule for submitting progress reports to the DMHC, Health Plan and all other Contracted Plans. All corrective actions must be completed within the following timeframes, unless an extension is approved in writing by the DMHC:

(A) Timeframes for correcting working capital deficiencies shall not exceed 12 months;

(B) Timeframes for correcting TNE deficiencies shall not exceed 12 months;

(C) Timeframes for correcting IBNR deficiencies shall not exceed three (3) months;

(D) Timeframes for correcting claims timeliness deficiencies shall not exceed six (6) months;

(E) Timeframes for correcting cash-to-claims ratio deficiencies shall not exceed twelve (12) months.

(vi) Identifies the name, title, telephone and facsimile numbers, and postal and e-mail addresses for the person responsible at Provider for ensuring compliance with the CAP;

(vii) Describes:

(A) Provider's patient record retention and storage policies;

(B) The procedures and the steps Provider will take to ensure that patient medical records are appropriately stored and maintained;

(C) The procedures and the steps Provider will take to ensure that patient medical records will be readily available and transferable to patients in the event Provider ceases operations or Provider fails to meet its obligations set forth in the CAP. At a minimum, Provider's patient medical records policies and procedures shall be consistent with existing laws relating to the responsibilities for the preservation and maintenance of medical records and the protection of the confidentiality of medical information.

(b) Notwithstanding section 4.1(a) above, Provider shall not be required to submit a CAP if Provider proactively demonstrates to the DMHC's written satisfaction that necessary and prudent capital investments have or may cause a temporary deficiency in Provider's TNE, working capital or Cash-to-Claims Ratios and that Provider has implemented an appropriate business plan that will correct the deficiency within a reasonable time period without causing a deficiency in its claim payment timeliness.

(c) To the extent possible, the self-initiated CAP proposal shall be set forth in a single document that addresses the concerns of Health Plan and all other Contracted Plans.

(d) The self-initiated CAP shall be considered a final CAP, subject to the DMHC's approval process as set forth in section 4.1(j) below, unless, within fifteen (15) calendar days of the receipt of Provider's self-initiated CAP proposal, Health Plan or another Contracted Plan provides written notice to the DMHC and Provider stating the reason for its objections and recommendations for revisions,

(e) In the event that Health Plan or another Contracted Plan files a written objection with the DMHC and Provider, Provider shall within twenty (20) calendar days: (1) implement all corrective action strategies contained in its self-initiated CAP proposal that were not objected to by Health Plan or another Contracted Plan; and (2) submit to Health Plan, all other Contracted Plans and the DMHC a revised CAP proposal that addresses the concerns raised by the objecting Contracted Plan(s), including Health Plan. To the extent possible, the revised CAP proposal shall be prepared as a single document that addresses the concerns of Health Plan and all other Contracted Plans.

(f) Health Plan shall have ten (10) calendar days to submit to Provider and the DMHC its objections and recommended revisions, in an electronic format determined by the DMHC, to the self-initiated revised CAP proposal.

(g) Within fifteen (15) calendar days of receipt of Health Plan's or any other Contracted Plan's objections and recommended revisions to the revised CAP proposal, the DMHC shall schedule a meeting ("CAP Settlement Conference") with Provider, Health Plan and all other Contracted Plans to discuss and reconcile the differences.

(h) Within seven (7) calendar days of the CAP Settlement Conference, Provider shall submit a final self-initiated CAP proposal to Health Plan and the DMHC.

(i) Within ten (10) calendar days of receipt of Provider's final self-initiated CAP proposal, the External Party shall submit its recommendation to the DMHC to approve, disapprove or modify Provider's final self-initiated CAP proposal.

(j) Within ten (10) calendar days of receipt of the External Party's recommendation, the DMHC shall approve, disapprove or modify Provider's final self-initiated CAP proposal, which shall then become the final CAP. If the DMHC does not act upon the recommendations of the External Party within ten (10) calendar days, the External Party's recommendation shall be deemed approved.

(k) A final CAP shall remain in effect until Provider demonstrates compliance with the requirements of the CAP, or the CAP expires in accordance with its own terms.

(l) In addition to the CAP requirements specified in section 4.1(a) above, the DMHC may direct Provider to initiate a CAP whenever it determines that Provider has experienced an event that materially alters its ability to remain compliant with the Grading Criteria or when the DMHC's review process indicates that Provider may lack sufficient financial capacity to meet its contractual obligations consistent with the requirements of Rule 1300.70(b)(2)(11)(1).

(m) Provider shall submit to the DMHC and Health Plan each periodic progress report prepared pursuant to a final CAP, and shall include a written verification stating that the periodic progress report is true and correct to the best knowledge and belief of a principal officer of Provider, as defined by Rule 1300.45(o) of Title 28 California Code of Regulations.

(n) Provider shall advise Health Plan and the DMHC in writing within five (5) calendar days if Provider experiences an event that materially alters Provider's ability to remain compliant with the requirements of a final CAP.

(o) Upon request from the DMHC, Provider shall provide additional documentation to the DMHC and Health Plan to demonstrate Provider's progress towards fulfilling the requirements of a CAP.

(p) All draft, preliminary and final CAPs and all CAP compliance reports required by a final CAP, including supporting documentation and supplemental financial information, submitted to the DMHC shall be received and maintained on a confidential basis by Health Plan and shall not be disclosed, except as allowed or required under this Amendment.

ATTACHMENT E-2

DMHC Provider Claims Processing Provisions

This Attachment is required to comply with the claims payment and processing requirements. In processing claims, Provider shall comply with Title 42 U.S.C. Section 1396u-2(f) and Health and Safety Code Sections 1371 through 1371.8. Unless otherwise stated, references to the term “Rule” identify regulatory citations in Title 28 of the California Code of Regulations.

NOW THEREFORE, in consideration of the mutual promises and covenants contained herein, the parties agree as follows:

(1) Provider shall accept and adjudicate claims for health care services provided to plan enrollees in accordance with the provisions of sections 1371, 1371.1, 1371.2, 1371.22, 1371.35, 1371.36, 1371.37, 1371.38, 1371.4, and 1371.8 of the Health and Safety Code and Rules 1300.71, 1300.71.38, 1300.71.4, and 1300.77.4.

(2) Provider shall establish and maintain a fair, fast and cost-effective dispute resolution mechanism to process and resolve provider disputes in accordance with the provisions of sections 1371, 1371.1, 1371.2, 1371.22, 1371.35, 1371.36, 1371.37, 1371.38, 1371.4, and 1371.8 of the Health and Safety Code and Rules 1300.71, 1300.71.38, 1300.71.4, and 1300.77.4.

(3) Provider shall submit a Quarterly Claims Payment Performance Report (“Quarterly Claims Report") to Health Plan within thirty (30) days of the close of each calendar quarter. The Quarterly Claims Report shall, at a minimum, disclose Provider's compliance status with sections 1371, 1371.1, 1371.2, 1371.22, 1371.35, 1371.36, 1371.37, 1371.4, and 1371.8 of the Health and Safety Code and Rules 1300.71, 1300.71.38, 1300.71.4, and 1300.77.4.

Provider shall include in its Quarterly Claims Report a tabulated record of each provider dispute it received, categorized by date of receipt, and including the identification of the provider, type of dispute, disposition, and working days to resolution, as to each provider dispute received. Each individual dispute contained in a Provider's bundled notice of provider dispute shall be reported separately to the Heath Plan

The Quarterly Claims Report be signed by and include the written verification of a principal officer, as defined by Rule 1300.45(o), of Provider, stating that the report is true and correct to the best knowledge and belief of the principal officer.

(4) Provider shall make available to Health Plan and the DMHC all records, notes and documents regarding its provider dispute resolution mechanism(s) and the resolution of its provider disputes.

(5) Any provider that submits a claim dispute to Provider's dispute resolution mechanism(s) involving an issue of medical necessity or utilization review shall have an unconditional right of appeal for that claim dispute to Health Plan's dispute resolution process for a de novo review and resolution for a period of 60 working days from Provider's Date of Determination, pursuant to the provisions of Rule 1300.71.38(a)(4).

(6) In the event Provider fails to timely and accurately reimburse its claims (including the payment of interest and penalties), Health Plan and Provider shall attempt to establish an approved corrective action plan consistent with section 1375.4(b)(4) of the Health and Safety Code. Health Plan shall have the authority to assume processing and timely reimbursement of Provider’s claims while the parties are attempting to establish a corrective action plan. In the event Health Plan and Provider fail to agree upon an approved corrective action plan or if Provider fails to comply with the corrective action plan, Health Plan shall have the authority to assume responsibility for the processing and timely reimbursement of Provider’s claims. Health Plan shall recover any such amounts paid by way of offset or recoupment from current or future amounts due Provider.

(7) In the event Provider fails to timely resolve its provider disputes including the issuance of a written decision, Health Plan and Provider shall attempt to establish an approved corrective action plan consistent with section 1375.4(b)(4) of the Health and Safety Code. Health Plan shall have the authority to assume responsibility for the administration of the Provider's dispute resolution mechanism(s) and for the timely resolution of provider disputes while the parties are attempting to establish a corrective action plan. In the event Health Plan and Provider fail to agree upon an approved corrective action plan or if Provider fails to comply with the corrective action plan, Health Plan shall have the authority to assume responsibility for the administration of the Provider's dispute resolution mechanism(s) and for the timely resolution of provider disputes.

ATTACHMENT F [Not Applicable]

DHCS Provisions

The following provisions apply exclusively to Covered Services provided and activities engaged in pursuant to Medicaid Program:

1. All Medicaid covered services are set forth in Attachment C and the Provider Manual as set forth in this Agreement. (Rule 53250(c)(1))

2. This Agreement shall be governed by and construed in accordance with all laws, regulations and contractual obligations incumbent upon the Health Plan. (Rule 53250(c)(2))

3. This Agreement shall become effective upon approval by the Department of Health Care Services ("DHCS") in writing, or by operation of law where the DHCS has acknowledged receipt of this Agreement and has failed to approve or disapprove the Agreement within 60 days of receipt. (Rule 53250(c)(3))

4. Amendments to this Agreement shall be submitted to the DHCS, for prior approval, at least thirty (30) days before the effective date of any proposed changes governing compensation, services or term. Proposed changes which are neither approved nor disapproved by the DHCS, shall become effective by operation of law thirty (30) days after the DHCS has acknowledged receipt, or upon the date specified in the Amendment, whichever is later. (Rule 53250(c)(3))

5. Provider agrees to submit all reports required and requested by Health Plan, in a form acceptable to Health Plan. (Rule 53250(c)(5))

6. Provider shall make all of its books and records, pertaining to the goods and services furnished under the terms of this Agreement, available for inspection, examination or copying:

   a. By the DHCS, the United States Department of Health and Human Services, the DMHC, and the Department of Justice;

   b. At all reasonable times, at Provider's place of business or at such other mutually agreeable location in California;

   c. In a form maintained in accordance with the general standards applicable to such book or record keeping;

   d. For a term of at least five years from the close of the fiscal year in which the date of service occurred, in which the record or data was created or applied, and for which the financial record was created;

   e. Including all encounter data for a period of at least five years. (Rule 53250(e)(1))

7. Provider agrees to notify the DHCS in the event that this Agreement is amended or terminated. Notice to the DHCS shall be considered given when properly addressed and deposited in the United States Postal Service as First Class Registered Mail, postage attached. (Rule 53250(e)(4))

8. Provider shall maintain and make available to the DHCS, upon request, copies of all subcontracts and shall ensure that all subcontracts are in writing and require that subcontractors:

a. Make all applicable books and records available at all reasonable times for inspection, examining or copying by the DHCS, the U.S. Department of Health and Human Services, the DMHC, and the Department of Justice;

b. Retain such books and records for a term of at least five years from the fiscal year in which the date of service occurred, in which the record or data was created or applied, and for which the financial record was created. (Rule 53250(e)(3))

9. Provider agrees that any assignment or delegation of this Agreement shall be void unless prior written approval is obtained from the DHCS in those instances where prior approval by the DHCS is required. (Rule 53250(e)(5))

10. Provider agrees to hold harmless both the State of California and Health Plan members in the event that Health Plan cannot or will not pay for services performed by Provider pursuant to this Agreement. (Rule 53250(e)(6))

11. Provider shall assist Health Plan in the transfer of care in the event Health Plan's Two-Plan Model Contract with the DHCS expires or terminates. Providers shall assist Health Plan in the transfer and care in the event this Agreement expires or terminates for any reason.

12. Provider shall not attempt recovery in circumstances involving casualty insurance, tort liability or workers' compensation. Provider shall report to the DHCS within ten (10) days after discovery any circumstances which may result in casualty insurance payments, tort liability payments, or workers' compensation award. (Rule 53222(b))

13. Provider shall disclose the names of the officers and owners of Provider, stockholders owning more than ten percent (10%) of the stock issued by Provider, if any, and major creditors holding more than five percent (5%) of the debt of Provider. For that purpose, Provider shall use the Disclosure Form made available by Health Plan. (W&I Code section 14452(a))

14. Provider acknowledges that Health Plan bears significant risk by assuming financial responsibility for all in-patient hospitalization expenditures, including expenditures for services connected with the period of hospitalization. (Rule 53251(c) & (e))

15. Non-Discrimination Clause.

a. During the performance of this Agreement, Provider and Provider's subcontractors will not unlawfully discriminate, harass, or allow harassment, against any employee or applicant for employment because of sex, race, color, ancestry, religious creed, national origin, physical disability (including HIV and AIDS), mental disability, medical condition (including cancer), age (over 40), marital status, and denial of family care leave. Provider and Provider's subcontractors will ensure the evaluation and treatment of their employees and applicants for employment are free from discrimination and harassment. Provider and Provider's subcontractors will comply with the provisions of the Fair Employment and Housing Act (Government Code, Section 12900, et. seq.) and the applicable regulations promulgated thereunder (California Code of Regulations, Title 2, Section 7285.0, et seq.). The applicable regulations of the Fair Employment and Housing Commission implementing Government Code Section 12990(a-f), set forth in Chapter 5 of Division 4 of Title 2 of the California Code of Regulations are incorporated into this Agreement by reference and made a part hereof as if set forth in full. Provider and Provider's subcontractors as the case may require will give notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreement.

b. Provider shall permit a Member to be visited by a Member's domestic partner, the children of the Member's domestic partner, and the domestic partner of the Member's parent or child.

16. Provider agrees to arrange for the provision of interpreter services for Members at all provider sites.

17. Nothing in this Agreement shall be interpreted in any manner to terminate or diminish Health Plan's independent obligations to the State of California under one or more of its contracts with the Department of Health Care Services.

18. Provider shall ensure the provision of a blood lead screening test to Members at ages one (1) and two (2) in accordance with Title 17, California Code of Regulations, Division 1, Chapter 9, commencing with Section 37000. Provider shall document and appropriately follow up on blood lead screening test results.

Provider shall make reasonable attempts to ensure the blood lead screen test is provided and shall document attempts to provide the test in the Member's Medical Record. If the blood lead screen test is refused, proof of voluntary refusal of the test in the form of a signed statement by the Member's parent(s) or guardian shall be documented in the Member's Medical Record. If the responsible party refuses to sign this statement, the refusal shall be documented in the Members Medical Record. Documented attempts that demonstrate Provider's unsuccessful efforts to provide the blood lead screen test shall be considered towards meeting this requirement.

19. Provider shall provide Health Plan with the Disclosure Statement set forth in Title 22, California Code of Regulations Section 51000.35 prior to commencing services under this Agreement

20. Upon request by DHCS, Provider shall timely gather, preserve and provide to DSHS, in the form and manner specified by DHCS, any information specified by DHCS, subject to lawful privileges, in Provider's possession, related to threatened or pending litigation by or against DHCS. If Provider asserts that any requested documents are covered by a privilege, Provider shall: (1) identify such privileged documents with sufficient particularity to reasonably identify the document while retaining the privilege; and (2) state the privilege being claimed that supports withholding production of the document. Such request shall include, but is not limited to, a response to a request for documents submitted by any party in any

litigation by or against DHCS. Provider acknowledges that time may be of the essence in responding to such request. Provider shall use all reasonable efforts to immediately notify DHCS and Health Plan of any subpoenas, document production requests, or requests for records, received by Provider related to Health Plan's contract with DHCS. Provider shall be reimbursed by DHCS for the services necessary to comply with this requirement under the reimbursement terms specified in Health Plan's contract with DHCS.

ATTACHMENT F-1 [Not Applicable]

DHCS Provisions

The following provisions apply exclusively to Covered Services provided and activities engaged in pursuant to Medicaid Program, and those Providers that have assumed financial obligations for certain Emergency Services:

Non-Contracting Emergency Service Providers

Provider shall cover Emergency Services in accordance with the requirements of Title 22, CCR, Section 53855 and 53912.5 including the following:

A. Provider shall pay for Emergency Services received by a Member from non-contracting providers. Payments to non-contracting providers shall be for the treatment of the emergency medical condition including Medically Necessary services rendered to a Member until the Member's condition has stabilized sufficiently to permit discharge, or referral and transfer in accordance with instructions from Health Plan. Emergency Services shall not be subject to Prior Authorization by Provider or Health Plan. The attending emergency physician, or the provider treating the Member is responsible for determining when the Member is sufficiently stabilized for transfer or discharge. Emergency Services shall not be subject to Prior Authorization by Provider.

B. At a minimum, Provider must reimburse the non-contracting emergency department and, if applicable, its affiliated providers for Physician services at the lowest level of emergency department evaluation and management CPT (Physician's Current Procedural Terminology) codes, unless a higher level is clearly supported by documentation, and for the facility fee and diagnostic services such as laboratory and radiology.

C. For all other non-contracting providers, reimbursement by Provider for properly documented claims for services rendered by a non-contracting provider pursuant to this provision shall be the lower of the following rates applicable at the time the services were rendered by the non-contracting provider:

1) The usual charges made to the general public by the non-contracting provider.

2) The maximum Fee-For-Service rates for similar services under the Medi-Cal program.

3) The rate agreed to by Provider and the non-contracting provider.

D. Provider shall not refuse to cover reimbursement for Emergency Services rendered by a non-contracting provider based on the emergency room provider, hospital, or fiscal agent not notifying the Member's Primary Care Physician or Provider of the Member's screening and treatment within 10 calendar days of presentation for emergency. Provider shall not limit what constitutes an emergency medical condition solely on the basis of lists of diagnoses or symptoms.

E. In accordance with California Code of Regulations, Title 28, Section 1300.71.4, Provider shall approve or disapprove a request for post-stabilization inpatient services made by a non-contracting provider on behalf of a Member within 30 minutes of the request. If Provider fails to approve or disapprove authorization within the required timeframe, the authorization will be deemed approve. Provider is financially responsible for post-stabilization service payment as provided by subprovision C above.

F. Disputed Emergency Services claims may be submitted to DHCS, Office of Administrative Hearings and Appeals, 1029 J Street, Suite 200, Sacramento, California 95814 for resolution under the provisions of Welfare and Institutions Code Section 14454 and California Code of Regulations, Title 22, Section

53620et. eq., except Section 53698. Provider agrees to abide by the findings of DHCS in such cases, to promptly reimburse the non-contracting provider within 30 calendar days of the effective date of a decision that Provider is liable for payment of a claim and to provide proof of reimbursement in such form as the DHCS Director may require. Failure to reimburse the non-contracting provider and provide proof or reimbursement to DHCS within 30 calendar days shall result in liability offsets in accordance with Welfare and Institutions Code Sections 14454(c) and 14115.5, and California Code of Regulations, Title 22, section 53702.

ATTACHMENT H

MEDICARE PROGRAM REQUIREMENTS---HEALTH CARE SERVICES

This Attachment H sets forth Medicare program requirements that are hereby incorporated into contracts and/or agreements with Providers covering the provision of health care services. The Agreement and this attachment shall be automatically modified to conform to subsequent amendments to Medicare program requirements. In the event of any inconsistency between the terms of this attachment and the Agreement, the terms of this attachment shall control.

1. **Downstream Compliance**. Provider agrees to require all of its downstream, related entity(s), and transferees that provide any services benefiting Health Plan's Medicare enrollees to agree in writing to all of the terms provided herein.

2. **Right to Audit**. HHS, the Comptroller General, or their designees have the right to audit, evaluate, and inspect any books, contracts, records, including medical records and documentation that pertain to any aspect of services performed, reconciliation of benefit liabilities, and determination of amounts payable under Health Plan's contract with CMS, or as the Secretary may deem necessary to enforce Health Plan's contract with CMS. Provider agrees to make available, for the purposes specified in this paragraph, its premises, physical facilities and equipment, records relating to its Medicare enrollees, and any additional relevant information that CMS may require. HHS, the Comptroller General, or their designee's right to inspect, evaluate, and audit extends through ten (10) years from the end of the final contract period or completion of audit, whichever is later. (42 CFR 422.504(e)(2), 422.504(e)(3), 422.504(e)(4) and 422.504(i)(2)(ii)).

3. **Confidentiality**. Provider shall comply with the confidentiality and enrollee record accuracy requirements set forth in 42 CFR 422.118. (42 CFR 422.504(a)(13)).

4. **Hold Harmless/Cost Sharing.** Provider agrees it may not under any circumstances, including nonpayment of moneys due the providers by the Health Plan, insolvency of the Health Plan, or breach of this Agreement, bill, charge, collect a deposit, seek compensation, remuneration, or reimbursement from, or have any recourse against the

Member, or any persons other than the Health Plan acting on their behalf, for services provided in accordance with this Agreement. Members who are dually eligible for Medicare and Medicaid will not be held liable for Medicare Part A and B cost sharing when the State or another payor such as a Medicaid Managed Care Plan is responsible for paying such amounts. Health Plan will inform providers of applicable Medicare and Medicaid benefits and rules for eligible Members. Provider agrees to accept payment from Health Plan as payment in full, or bill the appropriate State source, for any Medicare Part A and B cost sharing that is covered by Medicaid. Collection from the Member of copayments or supplemental charges in accordance with the terms of the Member's contract with the Health Plan, or charges for services not covered under the Member's contract, may be excluded from this provision. The Hold Harmless clause will survive the termination of this Agreement, regardless of the cause of termination. (42 CFR 422.504(g)(1)(i)) and (42 CFR 422.504(g)(1)(iii)).

5. **Delegation**. Health Plan may only delegate activities or functions to a first tier, downstream, or related entity, in a manner that is consistent with the provisions set forth in Attachment H-1. Any services or other activity performed by a first tier, downstream, or related entity in accordance with a contract or written agreement shall be consistent and comply with the Health Plan's contract with CMS. (42 CFR 422.504(i)(3)(iii) and 422.504(i)(4)).

6. **Prompt Payment**. Health Plan and Provider agree that Health Plan shall pay all clean claims for services that are covered by Medicare within sixty (60) days of the date such claim is delivered by Provider to Health Plan and Health Plan determines such claim is complete/clean. Any claims for services that are covered by Medicare that are not submitted to Health Plan within six (6) months of providing the services that are subject of the claim shall not be eligible for payment, and Provider hereby waives any right to payment therefor. Health Plan reserves the right to deny any claims that are not in accordance with the Medicare Claims Processing Manual and Medicare rules for billing. (42 CFR 422.520(b)).

7. **Reporting.** Provider agrees to provide relevant data to support Health Plan in complying with the requirements set forth in 42 CFR 422.516 and 42 CFR 422.310. (42 CFR 504(a)(8)).

8. **Accountability**. Health Plan may only delegate activities or functions to a first tier, downstream, or related entity, in a manner that is consistent with the provisions set forth in Attachment H-1. (42 CFR 422.504(i)(3)(ii)).

9. **Compliance with Medicare Laws and Regulations**. Provider shall comply with all applicable Medicare laws, regulations, and CMS instructions. (42 CFR 422.504(i)(4)(v)).

10. **Benefit Continuation.** Provider agrees to provide for continuation of enrollee health care benefits (i) for all Members, for the duration of the period for which CMS has made payments to Molina for Medicare services; and (ii) for Members who are hospitalized on the date Molina's contract with CMS terminates, or, in the event of an insolvency, through discharge. (42 CFR 422.504(g)(2)(i), 422.504(g)(2)(ii) and 422.504(g)(3).

ATTACHMENT H-1

Medicare Program Requirements---Delegated Services

This Attachment H-1 sets forth Medicare program requirements that are hereby incorporated into contracts and/or agreements that delegate to Provider responsibility for any management or administrative services. The Agreement and this attachment shall be automatically modified to conform to subsequent amendments to Medicare program requirements. In the event of any inconsistency between the terms of this attachment and the Agreement, the terms of this attachment shall control.

1. **Downstream Compliance.** Provider agrees to require all of its downstream, related entity(s), and transferees that provide any services benefiting Health Plan's Medicare enrollees to agree in writing to all of the terms provided herein.

2. **Medicare Compliance**. Provider shall comply with all applicable Medicare laws, regulations, and CMS instructions. (42 CFR 422.504(i)(4)(v)).

3. **Confidentiality**. Provider shall comply with the confidentiality and enrollee record accuracy requirements set forth in 42 CFR 422.118. (42 CFR 422.504(a)(13)).

4. **Right to Audit**. HHS, the Comptroller General, or their designees have the right to audit, evaluate, and inspect any books, contracts, records, including medical records and documentation that pertain to any aspect of services performed, reconciliation of benefit liabilities, and determination of amounts payable under the contract, or as the Secretary may deem necessary to enforce Health Plan's contract with CMS. Provider agrees to make available, for the purposes specified in this paragraph, its premises, physical facilities and equipment, records relating to its Medicare enrollees, and any additional relevant information that CMS may require. HHS, the Comptroller General, or their designee's right to inspect, evaluate, and audit extends through ten (10) years from the end of the final contract period or completion of audit, whichever is later. (42 CFR 422.504(e)(2), 422.504(e)(3), 422.504(e)(4) and 422.504(i)(2)(ii)).

5. **Responsibilities and Reporting Arrangements.** The Agreement specifies the delegated activities and reporting responsibilities. To the extent applicable, Provider shall support Health Plan in complying with the reporting requirements set forth in 42 CFR 422.516 and 42 CFR 310 by providing relevant data . (42 CFR 504(a)(8)).

6. **Revocation of Delegated Activities**. In the event CMS or Health Plan determines, in its sole discretion, that Provider has not performed the delegated activities or functions satisfactorily, the delegated activities shall be revoked upon not less than five (5) days prior written notice. (42 CFR 422.504(i)(4)(ii)).

7. **Accountability** Notwithstanding any relationship(s) Health Plan may have with first tier, downstream, and related entities, Health Plan maintains ultimate responsibility for adhering to and otherwise fully complying with all terms and conditions of its contract with CMS. Any services or other activity performed by a first tier, downstream, or related entity in accordance with a contract or written agreement shall be consistent and comply with the Health Plan's contract with CMS. (42 CFR 422.504(i)(1) and 422.504(i)(3)(iii)).

8. **Credentialing.** If Provider is delegated credentialing activities, Provider's credentialing process will be reviewed and approved by Health Plan, and such credentialing process will be audited by Health Plan on an ongoing basis; further, Provider agrees that its credentialing process will comply with all applicable NCQA standards. Health Plan retains the right to approve, suspend, or terminate any credentialing delegation arrangement. (422.504(i)(4) and 422.504(i)(5)).

9. **Monitoring.** Notwithstanding any relationship(s) Health Plan may have with first tier, downstream, and related entities, Health Plan maintains ultimate responsibility for adhering to and otherwise fully complying with all terms and conditions of its contract with CMS. Any services or other activity performed by a first tier, downstream, or related entity in accordance with a contract or written agreement shall be consistent and comply with the Health Plan's contractual obligations. Health Plan shall monitor the performance of first tier, downstream, and related entities. (42 CFR 422.504(i)(1) and 422.504(i)(4)).

---

10. **Further Requirements.** Any services or other activity performed by a first tier, downstream, or related entity in accordance with a contract or written agreement shall be consistent and comply with Health Plan's contractual obligations. If Health Plan delegates selection of the providers, contractors, or subcontractor to another organization, Health Plan retains the right to approve, suspend, or terminate any such arrangement. (42 CFR 422.504(i)(3)(iii), 42 CFR 422.504(i)(4) and 42 CFR 422.504(i)(5)).

DISCLOSURE FORM

(Welfare and Institutions Code Section 14452 (a))

Name of Subcontractor: **Pacific Healthcare IPA**

The undersigned hereby certifies that the following information regarding **Pacific Healthcare IPA** (the "Organization") is true and correct as of the date set forth below.

---

1. Officers/Directors General Partners:
Faustino Bernadett, Jr. MD, Robert Lugliani, MD

---

2. Co-Owner(s):
See #1

---

3. Stockholders owning more than ten percent (10%) of the stock of the Organization:
See #1

---

4. Major creditors holding more than five percent (5%) of Organization's debt:
N/A

---

5. Form of Organization (Corporation, Partnership, Sole Proprietorship, Individual):
corporation

---

6. If not already disclosed above, is Organization, either directly or indirectly, related to or affiliated with the Contracting Health Plan? Explain:

Date: 3/12/2013 By: Faustino Bernadett

Print Name: Faustino Bernadett, MD

Title: President

ATTACHMENT J

CERTIFICATE OF OWNERSHIP

I, Faustino Bernadett, MD, an authorized representative of Pacific Healthcare, IPA, do certify that, to the best of my knowledge, the individuals or entities listed below have a five percent or more ownership, direct or indirect, or control interest in the aforementioned entity as defined under 42 U.S. C. Section 1320 a 3 (2). This form is to be submitted annually to the organization contracting with the Managed Risk Medical Insurance Board for the Healthy Families Program and/or Access to Infants and Mothers Program.

Name of Individual/Entity	Employer Identification Number	Social Security Number
Faustino Bernadett, MD		
Robert Lugliani, MD		

- No one is listed because there are no individuals or entities with a five (5%) percent or more interest
- No one is listed because the plan is under government ownership.
- No one is listed because the provider of services is a non-profit, public benefit corporation for which there are no outside controlling interests.

ATTACHMENT K

Matrix of Financial Responsibility

The following matrices outlines the division of financial responsibility between Health Plan and Provider ("Matrix of Financial Responsibility"), the intent being to clarify Covered Services categories in order to provide for accurate administration of this Agreement. For services not specifically listed, each matrix serves as a model under which broad service categories suggest the appropriate financial responsibility. The applicable provisions and attachments of this Agreement, including Health Plan's Provider Manual, should be consulted for an accurate and complete description of Covered Services. Member benefit information and eligibility shall be verified by Provider prior to the provision of any services. The following matrices are included in this Agreement, referenced hereto and incorporated herein:

Business Associate Addendum

With respect to the creation, receipt, maintenance, or transmission of Protected Health Information in the performance of certain delegated functions on behalf of Health Plan ("Molina Healthcare") in accordance with the term and conditions set forth in this Agreement, Provider agrees that it is Health Plan's business associate ("Business Associate") with all the rights and obligations set forth in this Attachment.

RECITALS

WHEREAS, Business Associate may create, receive, maintain, or transmit protected health information on behalf of Molina Healthcare in conjunction with the services described in the Agreement;

WHEREAS, such protected health information may be used or disclosed only in accordance with the Privacy Rule issued by the U.S. Department of Health and Human Services under the Health Insurance Portability and Accountability Act of 1996 ("HIPAA");

WHEREAS, Business Associate must safeguard any electronic protected health information that it creates, receives, maintains, or transmits on behalf of Molina Healthcare as required by the Security Rule issued by the U.S. Department of Health and Human Services under HIPAA and;

WHEREAS, Subtitle D of the Health Information Technology for Economic and Clinical Health Act ("HITECH Act") provisions in the American Recovery and Reinvestment Act of 2009 ("ARRA") amended HIPAA and its implementing regulations.

NOW THEREFORE, the parties agree as follows:

1. **DEFINITIONS**

Unless otherwise provided for in this Addendum, terms used in this Attachment shall have the same meanings as set forth in HIPPA, ARRA, the Privacy Rule and the Security Rule.

“ARRA” means Subtitle D of the Health Information Technology for Economic and Clinical Health Act provisions of the American Recovery and Reinvestment Act of 2009, 42 U.S.C. §§17921-17954, and any and all references in this Addendum to sections of ARRA shall be deemed to include all associated existing and future implementing regulations, when and as each is effective.

"Availability" means the property that data or information is accessible and useable upon demand by an authorized person.

“Breach” shall mean the acquisition, access, use or disclosure of PHI in a manner not permitted by the Privacy Rule that compromises the security or privacy of the PHI as defined, and subject to the exceptions set forth, in 45 C.F.R. 164.402.

"Business Associate" means an entity or a person that performs a function on behalf of, or provides a service to, Molina Healthcare that involves the creation, receipt, use or disclosure of PHI.

“Compliance Date” shall mean, in each case, the date by which compliance is required under the referenced provision of ARRA and/or its implementing regulations, as applicable; provided that, in any case for which that date occurs prior to the effective date of this Addendum, the Compliance Date shall mean the effective date of this Addendum.

Confidentiality means the property that data or information is not made available or disclosed to unauthorized persons or processes.

Electronic Protected Health Information (“Electronic PHI”) means Protected Health Information that is transmitted by, or maintained in, electronic media.

Integrity means the property that data or information have not been altered or destroyed in an unauthorized manner.

Protected Health Information (“PHI”) means individually identifiable information, transmitted or maintained in any form or medium, relating to the past, present or future physical or mental health or condition of an individual, provision of health care to an individual, or the past, present or future payment for health care

provided to an individual, as more fully defined in 45 CFR § 160.103, and any amendments thereto.

Privacy Rule means the Standards for Privacy of Individually Identifiable Health Information, set forth at 45 CFR Parts 160 and 164.

Security Incident means the attempted or successful unauthorized access, use, disclosure, modification, or destruction of information or interference with system operations in an information system.

Security Rule means the Security Standards for the Protection of Electronic Protected Health Information, set forth at 45 CFR Parts 160 and 164.

"Services" shall mean, to the extent and only to the extent they involve the creation, use or disclosure of PHI, the services provided by Business Associate to Molina Healthcare under the Agreement, including those set forth in this Addendum, as amended by written agreement of the parties from time to time.

"Unsecured PHI" means PHI that is not rendered unusable, unreadable, or indecipherable to unauthorized individuals through the use of a technology or methodology specified by the Secretary of Health and Human Services (HHS) in guidance issued pursuant to ARRA.

2. **GENERAL PROVISIONS**

2.1 Effect. This Addendum supersedes any agreements between the parties involving the disclosure of PHI by Molina Healthcare to Business Associate. To the extent any conflict or inconsistency between this Addendum and the terms and conditions of any agreement exists, the terms of this Addendum shall prevail.

2.2 Amendment. The parties agree to amend this Addendum as necessary to comply with the Privacy Rule, the Security Rule, and such other regulations promulgated by the Secretary of Health and Human Services pursuant to HIPAA.

3. **SCOPE OF USE AND DISCLOSURE**

3.1 Business Associate may use or disclose PHI as required to provide Services and satisfy its obligations under this Agreement, if such use or disclosure of PHI would not violate the Privacy Rule. Unless otherwise limited herein, Business Associate may use or disclose PHI:

a. for Business Associate's proper management and administrative services;

b. to carry out the legal responsibilities of Business Associate; and

c. to provide data aggregation services relating to the health care operations of Molina Healthcare if required under the Agreement.

3.2 Business Associate shall not request, use or release more than the minimum amount of PHI necessary to accomplish the purpose of the use or disclosure and comply with 42 U.S.C. § 17935(b) as of its Compliance Date.. Business Associate hereby acknowledges that all PHI created or received from, or on behalf of, Molina Healthcare is the sole property of Molina Healthcare.

3.3 Business Associate. or its agents or subcontractors shall not perform any work outside the United States of America that involves access to, or the disclosure of, PHI without the prior written consent of Molina Healthcare.

3.4 As of the Compliance Date, Business Associate shall not directly or indirectly receive remuneration in exchange for any PHI as prohibited by 42 U.S.C. § 17935(d) as of its Compliance Date.

3.5 As of the Compliance Date, Business Associate shall not make or cause to be made any communication about a product or service that is prohibited by 42 U.S.C. § 17936(a) as of its Compliance Date.

3.6 As of the Compliance Date, Business Associate shall not make or cause to be made any written fundraising communication that is prohibited by 42 U.S.C. § 17936(b) as of its Compliance Date.

4. **OBLIGATIONS OF BUSINESS ASSOCIATE.**

4.1 Use or disclose PHI only as permitted or required by this Addendum or as required by law.

4.2 Establish and use appropriate safeguards to prevent unauthorized use or disclosure of PHI.

4.3 Implement administrative, physical, and technical safeguards that reasonably and appropriately protect the confidentiality, integrity, and availability of the electronic PHI that it creates, receives, maintains, or transmits on behalf of Health Plan.

4.4 Promptly report to Molina Healthcare any unauthorized use or disclosure of PHI, or security incident, with no more than three (3) days after Business Associate becomes aware of the unauthorized use of disclosure of PHI or security Incident..

Business Associate shall take all reasonable steps to mitigate any harmful effects of such breach or security incident. Business Associate shall indemnify Molina Healthcare against any losses, damages, expenses or other liabilities including reasonable attorney's fees incurred as a result of Business Associate's or its agent's or subcontractor's unauthorized use or disclosure of PHI or Breach of Unsecured PHI including but not limited to, the costs of notifying individuals affected by a Breach of Unsecured PHI.

4.5 Business Associate shall, following discovery of a Breach of Unsecured PHI that is caused by Business Associate or its agents or subcontractors, notify Molina Healthcare of such Breach, without unreasonably delay, and in no event more than thirty (30) days after the discovery of the Breach. The notification by the Business Associate to Molina Healthcare shall include: (1) the identification of each individual whose Unsecured PHI was accessed, acquired, used or disclosed during the Breach; and (2) any other available information that Molina Healthcare is required to include in its notification to individuals affected by the Breach including, but not limited to, the following:

a. a brief description of what happened, including the date of the Breach and the date of the discovery of the Breach;

b. a description of the types of Unsecured PHI that were involved in the Breach;

c. a brief description of what the Business Associate is doing to investigate the Breach, to mitigate harm to individuals, and to protect against any further Breaches.

4.6 Ensure that all of its subcontractors and agents are bound by the same restrictions and obligations contained herein, whenever PHI is made accessible to such subcontractors or agents.

4.7 Within ten (10) days of receiving a request, make all PHI and related information in its possession available as follows:

a. To the individual or Molina Healthcare to the extent necessary to permit Molina Healthcare to respond to an individual's request for access to their PHI for inspection and copying in accordance with 45 CFR § 164.524, to the extent the PHI is maintained in a Designated Record Set;

b. To the individual or Molina Healthcare to the extent necessary to permit Molina Healthcare to make an accounting of disclosures of PHI about the individual, in accordance with 45 CFR § 164.528. At a minimum, Business Associate shall provide Health Plan with the following information: (i) the date of the disclosure, (ii) the name of the entity or person who received the PHI, and if known, the address of such entity or person, (iii) a brief

description of the PHI disclosed, and (iv) a brief statement of the purpose of such disclosure which includes an explanation of the basis for such disclosure.

c. In the event that Business Associate in connection with the Services uses or maintains an Electronic Health Record of PHI of or about an individual, then Business Associate shall provide an accounting of disclosures of PHI, within ten (10) days, to Molina Healthcare, or when and as directed by Molina Healthcare, directly to an individual in accordance with the requirements for accounting for disclosures made through an Electronic Health Record in 42 U.S.C. 17935(c), as of its Compliance Date.

4.8 Within fifteen (15) days of receiving a request from Molina Healthcare, incorporate any amendment or correction to the PHI in accordance with the Privacy Rule, to the extent the PHI is maintained in a Designated Record Set.

4.9 Make its internal practices, books and records relating to the use or disclosure of PHI received from or on behalf of Molina Healthcare available to Molina Healthcare or the U. S. Secretary of Health and Human Services for purposes of determining compliance with the Privacy Rule.

4.10 Upon termination of the Agreement, Business Associate shall, at the option of Molina Healthcare, return or destroy all PHI created or received from, or on behalf of, Molina Healthcare. Business Associate shall not retain any copies of PHI except as required by law. If PHI is destroyed, Business Associate agrees to provide Molina Healthcare with certification of such destruction. If return or destruction of all PHI, and all copies of PHI, is not feasible, Business Associate shall extend the protections of this Attachment to such information for as long as it is maintained. Termination of this Agreement attached hereto shall not affect any of its provisions that, by wording or nature, are intended to remain effective and to continue in operation.

4.11 Standard Transactions. To the extent Business Associate conducts Standard Transaction(s) on behalf of Molina Healthcare, Business Associate shall comply with the HIPAA Regulations, "Administrative Requirements," 45 C.F.R. § 162.100 et seq., by the applicable compliance date(s) and shall not: (a) Change the definition, data condition or use of a data element or segment in a standard; (b) Add any data elements or segments to the maximum defined data set; (c) Use any code or data elements that are either marked "not used" in the standard's implementation specification or are not in the standard's implementation specification(s); or (d) Change the meaning or intent of the standard's implementation specifications.

5. **INDEMNIFICATION**

Each party will indemnify and defend the other party from and against any and all claims, losses, damages, expenses or other liabilities, including reasonable attorney's fees, incurred as a result of any breach by such party of any representation, warranty, covenant, agreement or other obligation contained herein by such party, its employees, agents, subcontractors or other representatives.

6. **TERMINATION OF AGREEMENT**

Notwithstanding any other provision of this Addendum or the Agreement, Molina Healthcare may terminate this Addendum and the Agreement upon five (5) days written notice to Business Associate if Molina Healthcare determines, in its sole discretion, that Business Associate has violated a material term of this Addendum and such breach is not cured within such five (5) day period.

Exhibit 10.43

REGULATORY AMENDMENT FOR THE CAPITATED FINANCIAL ALIGNMENT DEMONSTRATION PRODUCT TO MOLINA HEAL TH CARE OF CALIFORNIA GROUP/IPA PROVIDER SERVICES AGREEMENT(S)

This Regulatory Amendment for the Capitated Financial Alignment Demonstration Product to the Group/IPA Provider Services Agreement(s}, or other health care service contract applicable to Provider (the "Amendment") is made and entered into by and between Molina Healthcare of California ("Health Plan") and Pacific Healthcare IPA Associates, Inc. ("Provider").

A. **Whereas,** Health Plan and Provider have previously entered into a Group/IPA Provider Services Agreement, or other corresponding health care services agreement or contract as may have been amended from time to time ("Agreement"); and

B. Whereas, Health Plan desires to amend the Agreement to add regulatory provisions that Provider and Health Plan must remain in compliance with for the Capitated Financial Alignment Demonstration Product as governed by the 3-way agreement between DHCS, CMS and Health Plan and applicable regulations.

NOW, THEREFORE, in consideration of the promises, covenants and warranties stated herein, both parties agree as follows:

1. Section 5.11 **Attachments (**or equivalent section of the Agreement) is amended to add the following to the list of Attachments which are part of the Agreement:

   Attachment M -Capitated Financial Alignment Demonstration Program Requirements
   Attachment M-1- Capitated Financial Alignment Demonstration Program Requirements Delegated Services

2. Attachment M-Capitated Financial Alignment Demonstration Program Requirements, attached hereto, is hereby added to the Agreement.

3. Attachment M-1- Capitated Financial Alignment Demonstration Program Requirements-Delegated Services, attached hereto, is hereby added to the Agreement.

4. Health Plan and Provider acknowledge that Attachment H, Medicare Program Requirements Healthcare Services, and Attachment H-1, Medicare Program Requirements-Delegated Services, are applicable only to Health Plan's Medicare Advantage (Molina Medicare Options) and Medicare Advantage Special Needs Plan (Molina Medicare Options Plus) programs, and nothing in this Amendment or Agreement shall be construed to apply such requirements to the Medicare-Medicaid Program, otherwise known as the Capitated Financial Alignment Demonstration.

5. Health Plan and Provider acknowledge that the Capitated Financial Alignment product is part of the Medicare-Medicaid Program and is not a sub-product under the Medicare or Medicaid Products. In the event that the Capitated Financial Alignment Demonstration was categorized as a sub-productunder the Medicare or Medicaid Program in the Agreement or previous Amendments, they will now be treated as a separate product under the Capitated Financial Alignment Demonstration Program.

6. Compliance with Applicable Law, section 2.9 (or equivalent section of the Agreement), is modified to add the following subsection, which reads:

Provider acknowledges that all Covered Services rendered pursuant to the Medicare-Medicaid Program are subject to the additional provisions set forth in Attachment M.

7. Pursuant to Section 5.6, Amendment, or equivalent section of the Agreement, Health Plan may amend this Agreement to maintain compliance with any state or federal law, policy, directive or government sponsored program by providing forty-five (45) business days' notice, unless a shorter time is necessary for compliance.

8. Effective Date. This Amendment shall become effective immediately upon receipt.

9. Use of Defined Terms. Unless otherwise defined in this Amendment, capitalized terms utilized in this Amendment will have the same meaning(s) ascribed to such terms in the Agreement.

10. No Other Modifications. Except as provided herein, the terms and conditions of the Agreement shall remain the same, in full force and effect.

ATTACHMENT M

Capitated Financial Alignment Demonstration Program Requirements

This attachment sets forth the applicable Capitated Financial Alignment Demonstration Program requirements, which is otherwise known as the Medicare-Medicaid Program, covering the provision of health care services that are required by CMS and the State of California to be included in contracts and/or agreements between; (i) health plans I health maintenance organizations, and (ii) providers of health care services, authorized assignees, delegates or subcontractors. This attachment is hereby incorporated into the Agreement, and both will be automatically modified to conform to subsequent changes or amendments by CMS and the State of California requirements set forth herein. All terms and conditions of the Agreement not specifically modified by this attachment remain unchanged and will control. In the event of any inconsistency between this attachment and the Agreement, the terms and conditions of this attachment will control, notwithstanding anything to the contrary in the Agreement. Capitalized terms utilized in this attachment will have the same meanings ascribed to them in the Agreement unless otherwise set forth in this attachment and the applicable statute(s).

1. Downstream Compliance. Provider agrees to require all of its first tier, downstream, and related entity(ies) that provide any services benefiting Health Plan's Medicare-Medicaid Program Members to agree in writing to all of the terms provided herein.

2. Right to Audit. HHS, the Comptroller General, or their designees have the right to audit, evaluate, and inspect any pertinent information, including books, contracts, computer or other electronic systems, including medical records. Provider agrees to make available, for the purposes specified in this paragraph, its premises, physical facilities and equipment, records relating to its Medicare-Medicaid Program Members, and any additional relevant information that CMS may require. HHS, the Comptroller General, or their designee's right to inspect, evaluate, and audit extends through ten (10) years from the end of the final contract period between Health Plan and CMS or completion of audit, whichever is later.

3 . Confidentiality. Provider will comply with the confidentiality and Medicare-Medicaid Program Member record accuracy requirements set forth in 42 CFR 422.118.

4. Hold Harmless/Cost Sharing. Provider agrees it may not under any circumstances, including nonpayment of moneys due to the providers by the Health Plan, insolvency of the Health Plan, or breach of this Agreement, bill, charge, collect a deposit, seek compensation, remuneration, or reimbursement from, or have any recourse against the Medicare-Medicaid Program Member, or any persons other than the Health Plan acting on their behalf, for services provided in accordance with this Agreement. The Hold Harmless clause will survive the termination of this Agreement, regardless of the cause of termination. In addition, Medicare-Medicaid Program Members will not be held liable for any Medicare Part A and B cost sharing. Specifically, Medicare Parts A and B services will be provided at zero-cost share to the Medicare-Medicaid Program Member.5. Accountability. Health Plan may only delegate activities or functions to a first tier, downstream, or related entity, in a manner that is consistent with the provisions set forth in Attachment M-lof this Agreement.

6. Delegation. Any services or other activity performed by a first tier, downstream, or related entity in accordance with a contract or written agreement will be consistent and comply with the Health Plan's contract with CMS and DHCS.

7. Prompt Payment. Health Plan and Provider agree that Health Plan will pay all Clean Claims for Covered Services, which are determined by Health Plan to be payable, within sixty (60) days of the date

such Claim is delivered by Provider to Health Plan and Health Plan determines such Claim is complete/clean.

8. Reporting. Provider agrees to provide relevant data to support Health Plan in complying with the requirements set forth in 42 CFR 422.516 and 42 CFR 422.310.

9. Compliance with Medicare Laws and Regulations. Provider will comply with all federal and state laws, regulations, and CMS instructions.

10. Benefit Continuation. Provider agrees to provide for continuation of Medicare-Medicaid Program Member health care benefits (i) for all Medicare-Medicaid Program Members, for the duration of the period for which CMS has made payments to Health Plan for Medicare services; and (ii) for Medicare-Medicaid Program Members who are hospitalized on the date Health Plan's contract with CMS terminates, or, in the event of insolvency, through discharge.

11. Cultural Considerations. Provider agrees that services are provided in a culturally competent manner to all Medicare-Medicaid Program Members, including those with limited English proficiency or reading skills, and diverse cultural and ethnic backgrounds.

12. Provider will render all services in accordance with Health Plan's contractual obligations to CMS and DHCS.

13. Provider will render all services associated with the Medicare-Medicaid Program, which is otherwise known as the Capitated Financial Alignment Demonstration, in compliance with 42 C.F.R. § § 422.504, 423.505, and 438.6(1).

14. Provider must maintain Medicare-Medicaid Program Member records and information in an accurate and timely manner.

15. Provider must comply with the Federal Emergency Medical Treatment and Labor Act (EMT ALA) and all requirements outlined in 42 U.S. Code § 1395dd and Health Plan will not create any policies that conflict with the Provider's obligations under EMTALA.

16. Provider may not close or otherwise limit its acceptance of Medicare-Medicaid Program Members as patients unless the same limitations apply to all commercially insured Medicare-Medicaid Program Members.

17. Health Plan may not refuse to contract or pay an otherwise eligible health care provider for the provision of Covered Services solely because such provider has in good faith:

a. Communicated with or advocated on behalf of one or more of his or her prospective, current or former patients regarding the provisions, terms or requirements of the Health Plan's health benefit plans as they relate to the needs of such provider's patients; or

b. Communicated with one or more of his or her prospective, current, or former patients with respect to the method by which such provider is compensated by the Health Plan for services provided to the patient.

18. Provider is not required to indemnify Health Plan for any expenses and liabilities, including, without limitation, judgments, settlements, attorneys' fees, court costs and any associated charges, incurred in connection with any claim or action brought against the Health Plan based on the Health Plan's management decisions, utilization review provisions or other policies, guidelines or actions.

19. Prior written approval must be obtained from DHCS before this Agreement is assigned or delegated.

20. Provider is required to provider interpreter services to Members.

21. Provider must timely gather, preserve and provide to DHCS, any records in the Provider's possession.

22. Provider must comply with all applicable requirements governing physician incentive plans, including but not limited to such requirements appearing at 42 C.F.R. Parts 417, 422, 434, 438, and 1003.

23. Health Plan shall make no payment to Provider for a provider preventable condition as defined by law.

ATTACHMENT M-1

Capitated Financial Alignment Demonstration Program Requirements - Delegated Services

This attachment sets forth the applicable Capitated Financial Alignment Demonstration Program requirements, which is otherwise known as the Medicare-Medicaid Program, covering the delegation to Provider of any management responsibilities or administrative services, if any, that are required by CMS to be included in contracts and/or agreements between; (i) health plans I health maintenance organizations, and (ii) providers of health care services, authorized assignees, delegates or subcontractors. This attachment is hereby incorporated into the Agreement, and both will be automatically modified to conform to subsequent changes or amendments by CMS or DHCS to any Government Program requirements set forth herein. All terms and conditions of the Agreement not specifically modified by this attachment remain unchanged and will control. In the event of any inconsistency between this attachment and the Agreement, the terms and conditions of this attachment will control, notwithstanding anything to the contrary in the Agreement. Capitalized terms utilized in this attachment will have the same meanings ascribed to them in the Agreement unless otherwise set forth in this attachment and the applicable statute(s).

1. Downstream Compliance. Provider agrees to require all of its first tier, downstream, and related entity(s) that provide any services benefiting Health Plan's Medicare-Medicaid Program Members to agree in writing to all of the terms provided herein.

2. Medicare Compliance. Provider will comply with all federal and state laws, regulations, and CMS instructions.

3. Confidentiality. Provider will comply with the confidentiality and Medicare-Medicaid Program Member record accuracy requirements set forth in 42 CFR 422.118.

4. Right to Audit. HHS, the Comptroller General, or their designees have the right to audit, evaluate, and inspect any books, contracts, records, including medical records and documentation that pertain to any aspect of services performed, reconciliation of benefit liabilities, and determination of amounts payable under the contract, or as the Secretary may deem necessary to enforce Health Plan's contract with CMS. Provider agrees to make available, for the purposes specified in this paragraph, its premises, physical facilities and equipment, records relating to its Medicare-Medicaid Program Members, and any additional relevant information that CMS may require. HHS, the Comptroller General, or their designee's right to inspect, evaluate, and audit extends through ten (10) years from the end of the final contract period or completion of audit, whichever is later.

5. Responsibilities and Reporting Arrangements. The Agreement specifies the delegated activities and reporting responsibilities, if any. To the extent applicable, Provider will support Health Plan in complying with the reporting requirements set forth in 42 CFR 422.516 and 42 CFR 310 by providing relevant data.

6. Revocation of Delegated Activities. In the event CMS, DHCS or Health Plan determines, in its sole discretion, that Provider has not performed the delegated activities or functions satisfactorily, the delegated activities will be revoked.

7. Accountability. Notwithstanding any relationship(s) Health Plan may have with first tier, downstream, and related entities, Health Plan maintains ultimate responsibility for adhering to and otherwise fully complying with all terms and conditions of its contract with CMS. Any services or other activity performed by a first tier, downstream, or related entity in accordance with a contract or written agreement will be consistent and comply with the Health Plan's contract with CMS.

8. Credentialing. If Provider is delegated credentialing activities, Provider's credentialing process will be reviewed and approved by Health Plan, and such credentialing process will be audited by Health Plan on an ongoing basis; further, Provider agrees that its credentialing process will comply with all applicable NCQA standards. Health Plan retains the right to approve, suspend, or terminate any credentialing delegation arrangement.

9. Monitoring. Notwithstanding any relationship(s) Health Plan may have with first tier, downstream, and related entities, Health Plan maintains ultimate responsibility for adhering to and otherwise fully complying with all terms and conditions of its contract with CMS. Any services or other activity performed by a first tier, downstream, or related entity in accordance with a contract or written agreement will be consistent and comply with the Health Plan's contractual obligations. Health Plan will monitor the performance of first tier, downstream, and related entities.

10. Further Requirements. Any services or other activity performed by a first tier, downstream, or related entity in accordance with a contract or written agreement will be consistent and comply with Health Plan's contractual obligations. If Health Plan delegates selection of the providers, contractors, or subcontractor to another organization, Health Plan retains the right to approve, suspend, or terminate any such arrangement.

Exhibit 10.44

CAPITATED FINANCIAL ALIGNMENT DEMONSTRATION AMENDMENT TO
MOLINA HEALTHCARE OF CALIFORNIA
GROUP/IPA PROVIDER SERVICES AGREEMENT

This Capitated Financial Alignment Demonstration Amendment to the Group/IPA Provider Services Agreement (the "Amendment") is made and entered into by and between Molina Healthcare of California ("Health Plan") **and Pacific Healthcare IPA Associates, Inc.** ("Provider").

A. **Whereas**, Health Plan and Provider have previously entered into Group/IPA Provider Services Agreement, as may have been amended from time to time ("Agreement"); and

B. **Whereas,** Health Plan desires to amend the Agreement in regards to Provider's compensation for the Capitated Financial Alignment Demonstration product.

NOW, THEREFORE, in consideration of the promises, covenants and warranties stated herein, both parties agree as follows:

1. Attachment B, Definitions, is amended to add the following definition:

   Capitated Financial Alignment Demonstration (CFAD) Product, or Medicare and Medicaid Program, means the managed care program established by the Centers for Medicare and Medicaid Services (CMS) through the capitated financial alignment demonstration in which the state, CMS and Health Plan will enter into a three-way contract that will allow the health plan to provide care to beneficiaries eligible for both Medicaid and Medicare.

2. Attachment K-2 - CFAD Matrix of Financial Responsibility is hereby added to the Agreement and attached hereto.

3. Attachment D-1 - Compensation Schedule for CFAD Members, is hereby added to the Agreement and attached hereto.

4. All references in the Agreement which treat the CFAD product as a Medicare product are null and void. The CFAD product is its own separate and distinct product.

5. Any reference to additional payments for incentive programs or the preventive care compensation programs shall not be applicable to the CFAD product. If the CFAD product will be eligible for additional compensation, a separate amendment will be issued at a future date.

6. Attachment H, Medicare Program Provisions, shall also apply to the Capitated Financial Alignment Demonstration Product for all Medicare services provided under the Capitated Financial Alignment Demonstration Product.

7. Use of Defined Terms. Unless otherwise defined in this Amendment, capitalized terms utilized in this Amendment will have the same meaning(s) ascribed to such terms in the Agreement.

8. No Other Modifications. Except as provided herein, the terms and conditions of the Agreement shall remain the same, in full force and effect.

9. Counterparts. This Amendment may be executed in one or more counterparts, each of which shall be deemed an original, but all of which taken together shall constitute one and the same instrument.

IN WITNESS WHEREOF, the parties hereto have executed this Amendment by their officers thereunto duly authorized.

Long Term Services and Support (LTSS):

Health Plan shall be responsible for providing and/or coordinating Covered Services that are included as a part of the following programs: Long Term Care (LTC), Multipurpose Senior Services Program (MSSP), In-Home Support Services (IHSS) services, and Community-Based Adult Services (CBAS). Claims for these services should be billed directly to the Health Plan.

ATTACHMENT D-1

COMPENSATION SCHEDULE FOR CFAD MEMBERS

Capitation Payments for Capitated Financial Alignment Demonstration Members. Provider shall be compensated for all CFAD Members assigned to Provider based upon a per Member per month capitation rate. For Capitated Financial Alignment Demonstration Members, Health Plan shall pay Provider at a rate equivalent to Thirty Eight percent (38%) of the Medicare Part A and B premium it receives from CMS. Health Plan may amend the Agreement, in accordance with the applicable Amendment section of the Agreement to modify these Capitation Payments in order to account for any revenue reduction in the applicable government sponsored program(s) and benefits, if any.

Non-Capitated Services Submission of Claims/Claims Payment. For Clean Claims for Covered Services rendered to Members which are provided or arranged by Provider, but are (i) Health Plan financial responsibility or listed as Other Covered Services under the applicable Matrix of Financial Responsibility, and/or (ii) are not covered by Capitation Payments (collectively the "Non-Capitated Services"), Provider shall obtain the prior authorization of Health Plan in accordance with Health Plan's Provider Manual unless the situation is one involving the delivery of Emergency Services. Health Plan shall reimburse Provider for such Non-Capitated Services on a fee-for service basis in accordance with the applicable Claims Payment provisions of this Agreement, at the lesser of: (i) Provider's billed charges, or (ii) pursuant to the methodology described below.

(1) **Non-Capitated Services Payment Rate for Capitated Financial Alignment Demonstration Members.** Provider will receive an amount equivalent to the Medicare Fee-For-Service Program allowable payment rates (adjusted for place of service or geography) set forth by CMS in effect on the date(s) of service, and any portion, if any, that the Medicaid agency or Medicaid managed care plan would have been responsible for paying if the Member was enrolled in the Medicare Fee-For-Service Program. The Medicare Fee-For-Service Program allowable payment rate deducts any cost sharing amounts, including but not limited to co-payments, deductibles, co-insurance, or amounts paid or to be paid by other liable third parties that would have been deducted if the Member were enrolled in the Medicare Fee-For-Service Program.

In the event a Covered Service is covered by Medicaid or is primary to Medicaid, but not Medicare, Health Plan agrees to compensate Provider for such Covered Services rendered to Members, that are submitted on a Clean Claim and determined by Health Plan to be payable, on a fee-for-service basis, at the lesser of; (i) Provider's billed charges, or (ii) at an amount equivalent to the Medicaid Fee-For-Service Program allowable payment rates set forth by the State of California in effect on the date(s) of service, less any applicable Member co-payments, deductibles, co-insurance, or amounts paid or to be paid by other liable third parties, if any.

Provider acknowledges that CMS and the State of California have not released final joint-capitation rate to be paid to Health Plan for this product/program. If, after the final capitation rate is released, Health Plan determines that the above compensation for this product/program is unsustainable, Provider agrees to negotiate a new compensation rate for this product/program with Health Plan in good faith. If Health Plan and Provider cannot agree to a new rate before this product/program begins, Health Plan or Provider may immediately terminate this product/program from this Agreement, in compliance with applicable laws.

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the annual report on Form 10-K for the period ended December 31, 2015 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
September 30, 2015

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality health care to persons receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states and the Commonwealth of Puerto Rico, and includes our direct delivery business. As of September 30, 2015, these health plans served 3.5 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve Health Insurance Marketplace (Marketplace) members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in several states in which we operate, as well as the management of a hospital in southern California under a management services agreement.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

Market Updates - Health Plans Segment

Direct Delivery. On September 3, 2015, we entered into an agreement to acquire all the outstanding ownership interests in Providence Human Services, LLC (PHS) and Providence Community Services, LLC, both wholly owned subsidiaries of The Providence Service Corporation, for approximately $200 million. PHS is one of the largest national providers of accessible, outcome-based behavioral and mental health services and operates in 23 states and the District of Columbia. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the fourth quarter of 2015.

Medicare-Medicaid Plans. To coordinate care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to deliver services to the dual eligible in a more financially efficient manner, some states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual eligible individuals. The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). We operate MMPs in six states. Our MMPs in California, Illinois, and Ohio offered coverage beginning in 2014; our MMPs in South Carolina and Texas offered coverage beginning in the first quarter of 2015; and our MMP in Michigan offered coverage beginning in the second quarter of 2015. At September 30, 2015, our membership included approximately 56,000 integrated MMP members.

Florida. On August 3, 2015, we announced that our Florida health plan entered into an agreement with Integral Health Plan, Inc. (Integral) to assume Integral's Medicaid contract, as well as acquire certain assets related to the operations of its Medicaid business. As of August 3, 2015, Integral served approximately 90,000 Medicaid members. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the fourth quarter of 2015.

On August 1, 2015, our Florida health plan closed on its acquisition of the Medicaid contracts in Miami-Dade and Monroe counties, and certain assets related to the operation of the Medicaid business, of Preferred Medical Plan, Inc. The Florida health plan added approximately 23,000 members as a result of this transaction. See Note 4, "Business Combinations," for further information.

As of September 30, 2015, our Florida health plan served 148,000 Marketplace members, more than double its total membership as of December 31, 2014.

Illinois. On October 9, 2015, we announced that our Illinois health plan entered into an agreement with Loyola Physician Partners, LLC (Loyola). Under this agreement, we will receive the right to transition Loyola's Medicaid members in Cook County and assume certain assets related to the operation of its Medicaid business. Loyola serves approximately 20,000 members in the Medicaid Family Health program in Cook County. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the first quarter of 2016.

On July 15, 2015, we announced that our Illinois health plan entered into an agreement with Accountable Care Chicago, LLC, also known as MyCare Chicago. Under this agreement, we will receive the right to assume MyCare Chicago's Medicaid members in Cook County, as well as acquire certain assets related to the operation of its Medicaid business. As of July 15, 2015, MyCare Chicago served approximately 61,000 Medicaid members. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the first quarter of 2016.

Michigan. On October 13, 2015, the Michigan Department of Health and Human Services announced that Molina Healthcare of Michigan, Inc. is one of the health plans recommended to serve the state's Medicaid members under Michigan's Comprehensive Health Plan expected to commence effective January 1, 2016. The new contract has a five-year term with three one-year extensions, and covers Regions 2 through 6, and 8 through 10, of the state, representing an expansion into 15 additional counties as compared to the existing Michigan Medicaid contract.

On September 1, 2015, our Michigan health plan closed on its acquisition of the Medicaid and MIChild contracts, and certain provider agreements, of HealthPlus of Michigan and its subsidiary, HealthPlus Partners, Inc. The Michigan health plan added approximately 88,000 members as a result of this transaction. See Note 4, "Business Combinations," for further information.

Puerto Rico. Effective April 1, 2015, our Puerto Rico health plan served its first members. As of September 30, 2015, our Puerto Rico plan enrollment amounted to approximately 356,000 members.

Market Updates - Molina Medicaid Solutions Segment

New Jersey. On April 9, 2015, the state of New Jersey announced its selection of Molina Medicaid Solutions to design and operate that state's new Medicaid management information system (MMIS). The new contract is effective May 1, 2015, and has a term of 10 years with three one-year renewal options. Molina Medicaid Solutions is the state's incumbent MMIS provider, and was awarded the new contract as a result of Molina Medicaid Solutions' submission in response to the state of New Jersey's request for proposals.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities (VIEs) in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such VIEs are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2015.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2014. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2014 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2014 audited consolidated financial statements.

Reclassifications

We have reclassified certain amounts in the 2014 statement of cash flows to conform to the 2015 presentation.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services, and premiums collected in advance are deferred. Certain components of premium revenue are subject to accounting estimates as follows:

Contractual Provisions That May Adjust or Limit Revenue or Profit

Medicaid

Medical Cost Floors (Minimums), Medical Cost Corridors, and Administrative Cost Ceilings (Maximums): A portion of certain premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $536.5 million and $392.0 million

at September 30, 2015 and December 31, 2014, respectively, to amounts due government agencies. Approximately $523.2 million of the liability accrued at September 30, 2015 relates to our participation in Medicaid expansion programs.

In general, such amounts are subject to future changes in estimate based upon our actual cost performance and clarification and alteration of the definitions of allowable medical costs and revenue. At our Washington health plan (where we had recorded a liability of approximately $280 million related to the Medicaid expansion medical cost floor for 2014 and 2015 combined at September 30, 2015), premium revenue may be retroactively adjusted across the entire state Medicaid expansion program based upon the medical cost performance of the program as a whole. As such, our liability under Washington's contractual provisions is determined not just by our own medical cost performance, but by that of all health plans participating in the program; and we have limited visibility into the costs of those health plans. In October 2015, we settled our 2014 Medicaid expansion medical cost floor liability with the state of Washington with the payment of $246.6 million. This amount exceeded our estimate of that liability as of June 30, 2015 by approximately $7 million.

In certain circumstances, the health plans may receive additional premiums if amounts spent on medical care costs exceed a defined maximum threshold. We had $9.2 million recorded at September 30, 2015 relating to such provisions. No such receivables were recorded at December 31, 2014.

Profit Sharing and Profit Ceiling: Our contracts with certain states contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage, in some cases in accordance with a tiered rebate schedule. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. As a result of profits in excess of the amount we are allowed to retain, we recorded a liability of $9.3 million and $0.5 million at September 30, 2015 and December 31, 2014, respectively.

Retroactive Premium Adjustments: In New Mexico, when members are retroactively enrolled into our health plan we earn revenue only to the extent of the actual medical costs incurred by us for services provided during those retroactive periods, plus a small percentage of that medical cost for administration and profit. This cost plus arrangement for members retroactively enrolled in our health plan first became effective July 1, 2014 (retroactive to January 1, 2014). We are paid normal monthly capitation rates for the retroactive eligibility periods, and the difference between those capitation rates and the amounts due us on a cost plus basis are periodically settled with the state. To date, no such settlement has been made with the state. Our New Mexico contract is not specific as to the definition of retroactive membership, and the amount we owe back to the state for the difference between capitation received and amounts due us under the cost plus arrangement varies widely depending upon the definition of retroactive membership. In August 2015 the state provided us with a request for payment under the terms of this contract provision for the period January 1, 2014 through December 31, 2014. That request was based upon definitions of retroactive membership that were at odds with our interpretations of that term. The New Mexico health plan reduced revenue by approximately $20 million in the third quarter of 2015 to better align our interpretation of certain contractual provisions related to revenue for members added retroactively to the state's interpretation of those provisions. Even after that adjustment, however, we estimate that, based upon our interpretation of the state's proposed definition of retroactive membership, the amount we would owe for the period January 1, 2014 through September, 2015 would exceed our accrual for such liability at September 30, 2015 by between $15 million and $20 million. We are currently engaged in discussions with the state regarding the appropriate amount, if any, owed to the state under this contract term.

Medicare

Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services (CMS), our Medicare premiums are subject to retroactive increase or decrease based upon member medical conditions for up to two years after the original year of service. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses, we have recorded a net receivable of $2.3 million and $7.6 million for anticipated Medicare risk adjustment premiums at September 30, 2015 and December 31, 2014, respectively.

Marketplace

Premium Stabilization Programs: The Affordable Care Act (ACA) established Marketplace premium stabilization programs effective January 1, 2014. These programs, commonly referred to as the "3R's," include a permanent risk adjustment program, a transitional reinsurance program, and a temporary risk corridor program. We record receivables or payables related to the 3R programs based on our year-to-date experience when the amounts are reasonably estimable, and, for receivables, collection is reasonably assured.

- Permanent risk adjustment program: Under this permanent program, our health plans' risk scores are compared to the overall average risk score for the relevant state and market pool. Generally, our health plans will pay into the pool if their risk scores are below the average risk score, and will receive funds from the pool if their risk scores are above the average risk score.

- Transitional reinsurance program: This program is designed to provide reimbursement to insurers for high cost members. Our health plans pay an annual contribution on a per-member basis, and are eligible for recoveries if claims for individual members exceed a specified threshold, up to a maximum amount. This three-year program will end in 2016.
- Temporary risk corridor program: This program is intended to limit gains and losses of insurers by comparing allowable costs to a target amount as defined by the U.S. Department of Health and Human Services (HHS). Variances from the target amount exceeding certain thresholds may result in amounts due to or receivable from HHS. This three-year program will end in 2016. Due to uncertainties as to the amount of federal funding available to support the risk corridor program, we do not recognize amounts receivable under this program. All liabilities are recognized as incurred.

Additionally, the ACA established a minimum annual medical loss ratio (Minimum MLR) of 80% for the Marketplace. The medical loss ratio represents medical costs as a percentage of premium revenue, where the components of medical costs and premium revenue are specifically defined by federal regulations. Each of the 3R programs is taken into consideration when computing the Minimum MLR. If the Minimum MLR is not met, we may be required to pay rebates to our Marketplace policyholders.

Our receivables (payables) for each of these programs, as of the dates indicated, were as follows (in millions):

	September 30, 2015	December 31, 2014
Risk adjustment	$ (136.1)	$ (4.8)
Reinsurance	21.9	4.9
Risk corridor	(11.8)	(0.5)
Minimum MLR	(12.5)	—

Quality Incentives

At our California, Illinois, New Mexico, Ohio, South Carolina, Texas, Washington and Wisconsin health plans, revenue ranging from approximately 1% to 4% of certain health plan premiums is not earned unless specified performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of September 30, 2015 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of September 30, 2015.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(In thousands)			
Maximum available quality incentive premium - current period	$ 28,384	$ 24,477	$ 86,529	$ 68,941
Amount of quality incentive premium revenue recognized in current period:				
Earned current period	$ 17,073	$ 12,921	$ 37,849	$ 30,935
Earned prior periods	(609)	208	10,862	3,412
Total	$ 16,464	$ 13,129	$ 48,711	34,347
Total premium revenue recognized for state health plans with quality incentive premiums	$ 2,517,474	$ 1,818,375	$ 7,396,280	$ 5,005,444

California Health Plan Rate Settlement Agreement

In 2013, our California health plan entered into a settlement agreement with the California Department of Health Care Services (DHCS). The agreement settled rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in Medi-Cal (California's Medicaid program). Under the terms of the agreement, DHCS may be required to make a payment to us if the California health plan's pre-tax margin falls below certain levels. The maximum amount that DHCS

would pay to us under the terms of the settlement agreement is $40.0 million; no amounts receivable were recorded related to this agreement at September 30, 2015 or December 31, 2014. The agreement expires effective December 31, 2017.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes, nondeductible expenses under the Affordable Care Act Health Insurer Fee (HIF), nondeductible compensation and other general and administrative expenses. The effective tax rate may be subject to fluctuations during the year, particularly as a result of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

New Accounting Standards

Business Combinations. In September 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2015-16, *Simplifying the Accounting for Measurement-Period Adjustments*, which will require that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period (a reasonable time period after the acquisition date) in the reporting period in which the adjustment amounts are determined. Effective for us in the first quarter of 2016, ASU 2015-16 is applied prospectively.

Revenue Recognition. On July 9, 2015, the FASB affirmed its proposal to defer the effective date of ASU No. 2014-09, *Revenue from Contracts with Customers,* for all entities by one year. As a result, public business entities will apply the new revenue standard to annual reporting periods beginning after December 15, 2017, and for interim reporting periods within annual reporting periods beginning after December 15, 2017. We continue to evaluate whether to elect the full or modified retrospective adoption method, and the potential effects to our financial statements.

Short-Duration Contracts. In May 2015, the FASB issued ASU 2015-09, *Disclosures about Short-Duration Contracts*, which will require additional disclosure on the liability for unpaid claims and claim adjustment expenses. Effective for us in the first quarter of 2016, ASU 2015-09 is applied retrospectively to all prior periods presented in the financial statements. Early adoption is permitted; we are evaluating the potential effects of the adoption to our financial statements.

Debt Issuance Costs. In April 2015, the FASB issued ASU 2015-03, *Simplifying the Presentation of Debt Issuance Costs*, which will require debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of such debt liability, consistent with debt discounts. In a subsequent Staff Announcement, the Securities and Exchange Commission (SEC) announced that it would not object to an entity deferring and presenting debt issuance costs relating to a line-of-credit arrangement as an asset. This Staff Announcement was incorporated by the FASB through ASU 2015-15, issued in August 2015. Effective for us in the first quarter of 2016, ASU 2015-03 is applied retrospectively to all prior periods presented in the financial statements. Early adoption is permitted; we are evaluating the potential effects of the adoption to our financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the SEC did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(In thousands)			
Shares outstanding at the beginning of the period	54,788	46,494	48,578	45,871
Weighted-average number of shares issued:				
Common stock offering	—	—	2,393	—
Issued, 3.75% Notes and 3.75% Exchange (1)	—	460	—	155
Share-based compensation	15	37	295	409
Denominator for basic net income per share	54,803	46,991	51,266	46,435
Effect of dilutive securities:				
Share-based compensation	353	365	417	441
Convertible senior notes (1)	1,126	1,288	602	1,212
1.125% Warrants (1)	3,696	—	2,414	—
Denominator for diluted net income per share	59,978	48,644	54,699	48,088
Potentially dilutive common shares excluded from calculations (2):				
Restricted shares	—	—	3	—
1.125% Warrants	—	13,490	—	13,490

(1) For more information regarding the convertible senior notes, refer to Note 11, "Debt." For more information regarding the 1.125% Warrants, refer to Note 12, "Derivatives."

(2) The dilutive effect of all potentially dilutive common shares is calculated using the treasury-stock method. Certain potentially dilutive common shares issuable are not included in the computation of diluted net income per share because to do so would be anti-dilutive. For the three and nine months ended September 30, 2014, the 1.125% Warrants were excluded from diluted shares outstanding because the exercise price exceeded the average market price of our common stock.

4. Business Combinations

Health Plans Segment

Florida. On August 1, 2015, our Florida health plan closed on its acquisition of the Medicaid contracts in Miami-Dade and Monroe counties, and certain assets related to the operation of the Medicaid business, of Preferred Medical Plan, Inc. The final purchase price was $8.2 million, and the Florida health plan added approximately 23,000 members as a result of this transaction.

In December 2014, our Florida health plan acquired certain assets relating to the Medicaid business of First Coast Advantage, LLC (FCA). Under this transaction, we assumed FCA's Medicaid contract and certain provider agreements for Region 4 of the Statewide Medicaid Managed Care Managed Medical Assistance Program in the state of Florida. The Florida health plan added approximately 62,000 members as a result of this transaction. The final purchase price was $44.6 million, of which $36.6 million was paid in December 2014, and $8.0 million was paid in the first quarter of 2015.

Michigan. On September 1, 2015, our Michigan health plan closed on its acquisition of the Medicaid and MIChild contracts, and certain provider agreements, of HealthPlus of Michigan and its subsidiary, HealthPlus Partners, Inc.The purchase price was $61.1 million, and the Michigan health plan added approximately 88,000 members as a result of this transaction.

5. Share-Based Compensation

As of September 30, 2015, there were approximately 475,000 unvested restricted shares awarded to our named executive officers, with market and performance conditions, outstanding. In the event the vesting conditions are not achieved, the awards will lapse. Based on our assessment as of September 30, 2015, we expect the performance conditions relating to approximately

297,000 of such restricted share awards to be met in full. For the remaining 178,000 unvested restricted share awards, we reversed share-based compensation expense recognized from inception through March 31, 2015, or approximately $2.6 million, in the second quarter of 2015.

Charged to general and administrative expenses, total share-based compensation expense was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(In thousands)			
Restricted stock and performance awards	$ 5,707	$ 4,774	$ 12,962	$ 13,596
Employee stock purchase plan and stock options	1,278	885	3,264	2,519
	$ 6,985	$ 5,659	$ 16,226	$ 16,115

As of September 30, 2015, there was $30.1 million of total unrecognized compensation expense related to unvested restricted stock awards, including those with performance conditions, which we expect to recognize over a remaining weighted-average period of 1.6 years.

Restricted and performance stock activity for the nine months ended September 30, 2015 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2014	1,282,072	$ 33.55
Granted	428,223	64.25
Vested	(397,115)	33.39
Forfeited	(47,759)	37.51
Unvested balance as of September 30, 2015	1,265,421	43.84

The total fair value of restricted and performance awards granted during the nine months ended September 30, 2015 and 2014 was $27.9 million and $24.8 million, respectively. The total fair value of restricted awards, including those with performance and market conditions, which vested during the nine months ended September 30, 2015 and 2014 was $25.2 million and $22.5 million, respectively.

6. Fair Value Measurements

We consider the carrying amounts of cash and cash equivalents and other current assets and current liabilities (not including derivatives and current portion of long-term debt) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs

Level 1 financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs

Level 2 financial instruments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs

Level 3 financial instruments are valued using unobservable inputs that represent management's best estimate of what market participants would use in pricing the financial instrument at the measurement date. Our Level 3 financial instruments include the following:

Derivative financial instruments. Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine

fair value as of September 30, 2015 included the price of our common stock, the time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 12, "Derivatives," the 1.125% Call Option asset and the 1.125% Conversion Option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of income. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

Contingent consideration liability. The contingent consideration liability represents the remaining liability associated with the Medicare-Medicaid Plan (MMP) component of our South Carolina health plan acquisition in 2013, and is recorded in accounts payable and accrued liabilities. We applied a cash flow analysis to determine the fair value of this liability. The significant unobservable input is the purchase price estimate for the projected membership.

Auction rate securities. Auction rate securities are designated as available-for-sale and are reported at fair value in other assets. To estimate the fair value of these securities, we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of September 30, 2015.

Our financial instruments measured at fair value on a recurring basis at September 30, 2015, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 938,284	$ —	$ 938,284	$ —

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our convertible senior notes, which are classified as Level 2 financial instruments, are indicated in the following table. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

	September 30, 2015

	$ 1,025,951	$ 395	$ 2,037	$ 1,024,309

The contractual maturities of our investments as of September 30, 2015 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 659,930	$ 659,729
Due after one year through five years	771,762	770,930
Due after five years through ten years	30,744	30,808
Due after ten years	2,500	2,355
	$ 1,464,936	$ 1,463,822

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the three and nine months ended September 30, 2015 and 2014 were immaterial.

We have determined that unrealized gains and losses on our investments at September 30, 2015 and December 31, 2014, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of September 30, 2015:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in thousands)					
Corporate debt securities	$ 408,736	$ 1,611	300	$ 136,776	$ 384	80

	$ 539,475	$ 1,439	416	$ 47,576	$ 598	32

8. Receivables

Receivables consist primarily of amounts due from government Medicaid agencies, which may be subject to potential retroactive adjustments. Because all of our receivable amounts are readily determinable and substantially all of our creditors are governmental authorities, our allowance for doubtful accounts is immaterial.

	September 30, 2015	December 31, 2014
	(In thousands)

	$ 619,891	$ 596,456

9. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by government authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. In connection with a Molina Medicaid Solutions segment state contract as of December 31, 2014, we maintained restricted investments as collateral for a letter of credit. The

following table presents the balances of restricted investments:

	September 30, 2015	December 31, 2014
	(In thousands)	
California	$ 373	$ 373
Florida	27,029	28,649

Wisconsin	953	—
Other	242	888
Total Health Plans segment	101,970	97,478
Molina Medicaid Solutions segment	—	5,001
	$ 101,970	$ 102,479

The contractual maturities of our held-to-maturity restricted investments as of September 30, 2015 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 91,518	$ 91,519
Due one year through five years	10,452	10,464
	$ 101,970	$ 101,983

10. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated.

	September 30, 2015	December 31, 2014
	(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 1,184,147	$ 870,429
Pharmacy payable	93,953	71,412
Capitation payable	30,061	28,150
Other	251,409	230,531
	$ 1,559,570	$ 1,200,522

"Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various government agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. Non-risk provider payables amounted to $161.4 million and $119.3 million as of September 30, 2015 and December 31, 2014, respectively.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts presented for “Components of medical care costs related to: Prior periods” represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Nine Months Ended September 30, 2015	Year Ended December 31, 2014
	(Dollars in thousands)	
Medical claims and benefits payable, beginning balance	$ 1,200,522	$ 669,787
Components of medical care costs related to:		
Current period	8,723,573	8,122,885
Prior periods (1)	(142,948)	(45,979)
Total medical care costs	8,580,625	8,076,906
Change in non-risk provider payables	42,067	(31,973)
Payments for medical care costs related to:		
Current period	7,371,504	7,064,427
Prior periods	892,140	449,771
Total paid	8,263,644	7,514,198
Medical claims and benefits payable, ending balance	$ 1,559,570	$ 1,200,522
Benefit from prior period as a percentage of:		
Balance at beginning of period	11.9%	6.9%
Premium revenue, trailing twelve months	1.2%	0.5%
Medical care costs, trailing twelve months	1.3%	0.6%

(1) The benefit from prior period development of medical claims and benefits payable for the nine months ended September 30, 2015 included approximately $23 million relating to programs that contain medical cost floor or corridor provisions. Accordingly, premium revenue for the nine months ended September 30, 2015 was reduced by the same amount.

The portion of our total medical claims and benefits payable liability that is most subject to variability in the estimate is fee-for-service claims incurred but not paid (IBNP). IBNP represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors.

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims deviation and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate – we only know when the circumstances for any one or more factors are out of the ordinary.

The use of a consistent methodology in estimating our liability for medical claims and benefits payable minimizes the degree to which the under– or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate.

As indicated above, the amounts ultimately paid out on our medical claims and benefits payable liabilities in fiscal years 2015 and 2014 were less than what we had expected when we had established those liabilities. The differences between our original estimates and the amounts ultimately paid out (or now expected to be ultimately paid out) for the most part related to IBNP. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the

reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We believe that the most significant uncertainties surrounding our IBNP estimates at September 30, 2015 are as follows:

- At our Illinois and Wisconsin health plans, we overpaid certain outpatient facility claims due to a system configuration error. For this reason, the reserves are subject to more than the usual amount of uncertainty.
- At our Washington health plan, delays related to the implementation of revised fee schedules resulted in a significant increase to our outpatient claims inventory in the first quarter of 2015, followed by a reduction in inventory during the second quarter of 2015. This significant fluctuation in inventory adds to the uncertainty of our unpaid claims estimates.
- Our Michigan health plan added approximately 88,000 new members through an acquisition in the third quarter of 2015. Because these new members may have different utilization patterns than our legacy members, the reserves are subject to more than the usual amount of uncertainty.
- Our Texas health plan enrolled approximately 15,000 members to its new MMP (Medicare-Medicaid Program) in the second and third quarters of 2015. Because we lack sufficient historical claims data, we are estimating the reserves for these new members by applying an estimated medical care ratio (MCR) based upon the assumptions supporting our premium rates. Because estimating incurred claims in this way is not directly tied to the actual claims experience, the reserves are subject to more than the usual amount of uncertainty.

We recognized favorable prior period claims development in the amount of $142.9 million for the nine months ended September 30, 2015. This amount represents our estimate as of September 30, 2015, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2014 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation was due primarily to the following factors:

- At our Ohio and California health plans, approximately 61,000 and 100,000 members, respectively, were enrolled in the new Medicaid expansion program during 2014. Also in Ohio, approximately 17,000 members were enrolled in the new MMP program in 2014. Because we lacked sufficient historical claims data, we initially estimated the reserves for these new members based upon a number of factors that included pricing assumptions provided by the state; our expectations regarding pent up demand; our beliefs about the speed at which new members would utilize health care services; and other factors. Our actual costs were ultimately less than expected.
- At our New Mexico health plan, the state implemented a retroactive increase to the provider fee schedules in mid-2014. As a result, many claims that were previously settled were reopened, and subject to, additional payment. Because our reserving methodology is most accurate when claims payment patterns are consistent and predictable, the payment of additional amounts on claims that in some cases had been settled more than six months before added a substantial degree of complexity to our liability estimation process. Due to the difficulties in addressing that added complexity, liabilities recorded as of December 31, 2014 were in excess of amounts ultimately paid out.
- At our Washington health plan, in 2015 we collected amounts related to certain claims paid in 2013. Such collections were not anticipated in our reserves as of December 31, 2014.

11. Debt

As of September 30, 2015, contractual maturities of debt for the years ending December 31 are as follows (in thousands):

	Total	2015	2016	2017	2018	2019	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
1.625% Notes (1)	301,551	—	—	—	—	—	301,551
	$ 851,551	$ —	$ —	$ —	$ —	$ —	$ 851,551

(1) The 1.625% Notes have a contractual maturity date in 2044; however, on specified dates beginning in 2018 as described below, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes, or we may redeem any or all of the 1.625% Notes.

Credit Facility. On June 12, 2015, we entered into an unsecured $250 million revolving credit facility (Credit Facility) which will be used to finance working capital needs, acquisitions, capital expenditures, and other general corporate activities. The Credit Facility has a term of 5 years and all amounts outstanding will be due and payable on June 12, 2020. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit

Facility to up to $350 million. As of September 30, 2015, a $5 million letter of credit outstanding reduced borrowing available to $245 million, and no amounts were outstanding under the Credit Facility.

Borrowings under the Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee.

Although the Credit Facility is not secured by any of our assets, two of our wholly owned subsidiaries, Molina Medicaid Solutions and Molina Medical Management, Inc. (MMM), have jointly and severally guaranteed our obligations under the Credit Facility.

The Credit Facility contains customary non-financial and financial covenants, including a minimum fixed charge coverage ratio, a maximum debt-to-EBITDA ratio and minimum statutory net worth. We are required to not exceed a maximum debt-to-EBITDA ratio of 4.00 to 1.00. At September 30, 2015, we were in compliance with all financial covenants under the Credit Facility.

1.125% Cash Convertible Senior Notes due 2020. In February 2013, we issued $550.0 million aggregate principal amount of 1.125% cash convertible senior notes (the 1.125% Notes) due January 15, 2020, unless earlier repurchased or converted. Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 at a rate of 1.125% per annum.

The 1.125% Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. The initial conversion rate for the 1.125% Notes is 24.5277 shares of our common stock per $1,000 principal amount of the 1.125% Notes. This represents an initial conversion price of approximately $40.77 per share of our common stock. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture. We may not redeem the 1.125% Notes prior to the maturity date.

Holders may convert their 1.125% Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;

- during the five business day period immediately after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;

- upon the occurrence of specified corporate events; or

- at any time on or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date.

The 1.125% Notes met the stock price trigger in the quarter ended September 30, 2015, and are convertible to cash through at least December 31, 2015. Because the 1.125% Notes may be converted into cash within 12 months, the $450.3 million carrying amount is reported in current portion of long-term debt as of September 30, 2015.

The 1.125% Notes contain an embedded cash conversion option (the 1.125% Conversion Option), which was separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the 1.125% Conversion Option settles or expires. The initial fair value liability of the 1.125% Conversion Option simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). This discount is amortized to the 1.125% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate of approximately 6%. As of September 30, 2015, the 1.125% Notes have a remaining amortization period of 4.3 years. The 1.125% Notes' if-converted value exceeded their principal amount by approximately $458 million and $93 million as of September 30, 2015 and December 31, 2014, respectively.

1.625% Convertible Senior Notes due 2044. In September 2014, we issued $301.6 million aggregate principal amount of 1.625% convertible senior notes (the 1.625% Notes) due August 15, 2044, unless earlier repurchased, redeemed or converted. Interest on the 1.625% Notes is payable semiannually in arrears on February 15 and August 15, at a rate of 1.625% per annum, beginning on February 15, 2015. In addition, beginning with the semiannual interest period commencing immediately following the interest payment date on August 15, 2018, contingent interest will accrue on the 1.625% Notes during any semiannual interest period in which certain conditions or events occur, or under certain events of default. For example, additional interest of 0.25% per year will be payable on the 1.625% Notes for any semiannual interest period for which the principal amount of 1.625% Notes outstanding is less than $100 million.

The 1.625% Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.625% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The initial conversion rate for the 1.625% Notes is 17.2157 shares of our common stock per $1,000 principal amount of the 1.625% Notes. This represents an initial conversion price of approximately $58.09 per share of our common stock. Upon conversion, we will pay cash and, if applicable, deliver shares of our common stock to the converting holder in an amount per $1,000 principal amount of 1.625% Notes equal to the settlement amount (as defined in the related indenture).

Holders may convert their 1.625% Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on September 30, 2014 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;
- during the five business day period after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.625% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;
- upon the occurrence of specified corporate events;
- if we call any 1.625% Notes for redemption, at any time until the close of business on the business day immediately preceding the redemption date;
- during the period from, and including, May 15, 2018 to the close of business on the business day immediately preceding August 19, 2018; or
- at any time on or after February 15, 2044 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.625% Notes, in integral multiples of $1,000 principal amount, at the option of the holder regardless of the foregoing circumstances.

As of September 30, 2015, the 1.625% Notes were not convertible.

We may not redeem the 1.625% Notes prior to August 19, 2018. On or after August 19, 2018, we may redeem for cash all or part of the 1.625% Notes, except for the 1.625% Notes we are required to repurchase in connection with a fundamental change or on any specified repurchase date. The redemption price for the 1.625% Notes will equal 100% of the principal amount of the 1.625% Notes being redeemed, plus accrued and unpaid interest. In addition, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes for cash on August 19, 2018, August 19, 2024, August 19, 2029, August 19, 2034 and August 19, 2039, in each case, at a specified price equal to 100% of the principal amount of the 1.625% Notes to be repurchased, plus accrued and unpaid interest.

Because the 1.625% Notes are net share settled and have cash settlement features, we have allocated the principal amount between a liability component and an equity component. The reduced carrying value on the 1.625% Notes resulted in a debt discount that is amortized back to the 1.625% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. The expected life of the debt is approximately four years, beginning on the issuance date and ending on the first date we may redeem the notes in August 2018. As of September 30, 2015, the 1.625% Notes have a remaining amortization period of 2.9 years. This has resulted in our recognition of interest expense on the 1.625% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 5%. The outstanding 1.625% Notes' if-converted value exceeded their principal amount by approximately $89 million as of September 30, 2015, and did not exceed their principal amount as of December 31, 2014. At September 30, 2015, the equity component of the 1.625% Notes, including the impact of deferred taxes, was $22.9 million.

The principal amounts, unamortized discount (net of premium related to 1.625% Notes), and net carrying amounts of the convertible senior notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
September 30, 2015:			
1.125% Notes	$ 550,000	$ 99,696	$ 450,304
1.625% Notes	301,551	26,501	275,050
	$ 851,551	$ 126,197	$ 725,354
December 31, 2014:			
1.125% Notes	$ 550,000	$ 114,670	$ 435,330
1.625% Notes	301,551	32,784	268,767
	$ 851,551	$ 147,454	$ 704,097

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
		(In thousands)		
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate	$ 2,772	$ 3,132	$ 8,316	$ 9,732
Amortization of the discount	7,185	6,455	21,257	19,183
	$ 9,957	$ 9,587	$ 29,573	$ 28,915

Lease Financing Obligations. In 2013, we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of the Molina Center located in Long Beach, California, and our Ohio health plan office building located in Columbus, Ohio. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated over their remaining useful lives. The lease financing obligation is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Rent will increase 3% per year through the initial term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense amounted to $9.4 million and $9.3 million for the nine months ended September 30, 2015 and 2014, respectively.

As described and defined in further detail in Note 16, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings. We have concluded that we are the accounting owner of the buildings due to our continuing involvement with the properties. We have recorded $36.5 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheets as of September 30, 2015, which represents the total cost incurred by the Landlord for the construction of the buildings, net of accumulated depreciation. As of September 30, 2015 and December 31, 2014, the aggregate amount recorded to lease financing obligations, including the current portion, amounted to $40.3 million and $40.6 million, respectively. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense was $3.0 million and $2.2 million for the nine months ended September 30, 2015 and 2014, respectively. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was $0.9 million and $0.8 million for the nine months ended September 30, 2015 and 2014, respectively.

12. Derivatives

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

	Balance Sheet Location	September 30, 2015	December 31, 2014
		(In thousands)	
Derivative asset:			
1.125% Call Option	Current assets: Derivative asset	$ 490,087	$ —
	Non-current assets: Derivative asset	$ —	$ 329,323
Derivative liability:			
1.125% Conversion Option	Current liabilities: Derivative liability	$ 489,940	$ —
	Non-current liabilities: Derivative liability	$ —	$ 329,194

Our derivative financial instruments do not qualify for hedge treatment; therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of income, and reported in other expense, net. Gains and losses for our derivative financial instruments are presented individually in the consolidated statements of cash flows, supplemental cash flow information.

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Notes in 2013, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments in excess of the principal amount of the notes due upon any conversion of the 1.125% Notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 6, "Fair Value Measurements."

1.125% Conversion Option. The embedded cash conversion option within the 1.125% Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Conversion Option, refer to Note 6, "Fair Value Measurements."

As of September 30, 2015, the 1.125% Call Option and the 1.125% Conversion Option were classified as a current asset and current liability, respectively, because the 1.125% Notes may be converted within 12 months of September 30, 2015, as described in Note 11, "Debt."

13. Stockholders' Equity

Stockholders' equity increased $507.6 million during the nine months ended September 30, 2015 compared with stockholders' equity at December 31, 2014. The increase was due primarily to the common stock offering described below, net income of $113.4 million, and $20.7 million related to employee stock transactions.

Common Stock Offering. In June 2015, we completed an underwritten public offering of 5,750,000 shares of our common stock, including the over-allotment option, conducted pursuant to an effective shelf registration statement filed with the SEC in May 2015. Net of issuance costs, proceeds from the offering amounted to $373.2 million, or $64.90 per share, resulting in an increase to additional paid-in capital. We are using the proceeds to finance working capital needs, acquisitions, capital expenditures, and other general corporate activities.

1.125% Warrants. In connection with the 1.125% Notes Call Spread Overlay transaction described in Note 12, "Derivatives," we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period (beginning on April 15, 2020) under

the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants. Refer to Note 3, "Net Income per Share," for dilution information for the periods presented. We will not receive any additional proceeds if the 1.125% Warrants are exercised.

Securities Repurchase Programs. Effective as of February 25, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This repurchase program extends through December 31, 2015.

Stock Plans. In connection with our equity incentive plans and employee stock purchase plan, we issued approximately 480,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the nine months ended September 30, 2015.

14. Segment Information

We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our health plans and our direct delivery business. Our health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides MMIS design, development, and implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." For presentation purposes, the cost of centralized services is reported within the Health Plans segment.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(In thousands)			
Revenue, continuing operations:				
Health Plans segment:				
Premium revenue	$ 3,377,030	$ 2,316,759	$ 9,652,054	$ 6,424,238
Premium tax revenue	99,047	81,240	289,003	203,053
Health insurer fee revenue	81,158	29,427	202,996	67,785
Investment income	4,832	2,041	11,675	5,615

	$ 97,624	$ 24,497	$ 265,702	$ 53,429

	September 30, 2015	December 31, 2014
Total assets:		
Health Plans segment	$ 5,676,304	$ 4,270,870
Molina Medicaid Solutions segment	238,727	206,345
	$ 5,915,031	$ 4,477,215

15. Commitments and Contingencies

Legal Proceedings. The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

State of Louisiana. On June 26, 2014, the state of Louisiana filed a Petition for Damages against Molina Medicaid Solutions, Molina Healthcare, Inc., Unisys Corporation, and Paramax Systems Corporation, a subsidiary of Unisys, in the Parish of Baton Rouge, 19th Judicial District, versus number 631612. The Petition alleges that between 1989 and 2012, the defendants utilized an incorrect reimbursement formula for the payment of pharmaceutical claims. We believe we have several meritorious defenses to the claims of the state, and any liability for the alleged claims is not currently probable or reasonably estimable.

USA and State of Florida ex rel. Charles Wilhelm. On July 24, 2014, Molina Healthcare, Inc. and Molina Healthcare of Florida, Inc. were served with a Complaint filed under seal on December 5, 2012 in District Court for the Southern District of Florida by relator, Charles C. Wilhelm, M.D., Case No. 12-24298. The Complaint alleges that in late 2008 and early 2009, in connection with the acquisition of Florida NetPass under which Molina Healthcare of Florida, Inc. began conducting business in the state of Florida, the defendants failed to adequately staff the plan and provide other services, resulting in a disproportionate number of sicker beneficiaries of Florida NetPass moving back into the Florida fee-for-service Medicaid program. This alleged conduct purportedly resulted in a violation of the federal False Claims Act. Both the United States of America and the state of Florida have declined to intervene. The District Court dismissed this case with prejudice. The Relator filed a motion for rehearing, which we opposed and which we believe has little chance of success. Should the motion for rehearing be denied, this case will be over. Should the motion for rehearing be granted, we believe we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al. On or around October 14, 2014, Molina Healthcare of California, Molina Healthcare of California Partner Plan, Inc., Mobile Medical Examination Services, Inc. (MedXM), and other health plan defendants were served with a Complaint previously filed under seal in the Central District Court of California by relator, Anita Silingo, Case No. SACV13-1348-FMO(SHx). The Complaint alleges that MedXM improperly modified medical records and otherwise took inappropriate steps to increase members' risk adjustment scores, and that the defendants, including Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc., purportedly turned a "blind eye" to these unlawful practices. The Department of Justice has declined to intervene. The District Court dismissed this action as to Molina without leave to amend as to some allegations and with leave to amend as to other allegations. On October 22, 2015, the Relator filed a third amended complaint. We believe that we have several meritorious defenses to the claims of the Relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

Hospital Management Contract. Our subsidiary, Molina Hospital Management, Inc. (MHM), manages a portion of a hospital owned by College Health Enterprises (College) in Long Beach, California pursuant to the terms of a Management Services Agreement dated as of August 30, 2013 (the MSA) by and between MHM and CHLB, LLC, an affiliate of College. MHM's management services pursuant to the MSA have generated a financial loss each month since the inception of this arrangement, and could continue to generate losses. On August 27, 2015, MHM delivered to College a notice of immediate termination for

cause of the MSA by reason of alleged material breaches by CHLB, LLC of various duties, obligations, and covenants in the MSA. On September 8, 2015, College notified us that it disputes the validity of our notice of termination in its entirety and, if the parties are unable to resolve their differences, College will commence binding arbitration. It is not possible to accurately predict or determine the eventual outcome of this matter.

Provider Claims. Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions. Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements upon us that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $1,072 million at September 30, 2015, and $859 million at December 31, 2014. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $471.8 million and $202.6 million as of September 30, 2015 and December 31, 2014, respectively.

The National Association of Insurance Commissioners (NAIC), adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules which may vary from state to state.

As of September 30, 2015, our health plans had aggregate statutory capital and surplus of approximately $1,166 million compared with the required minimum aggregate statutory capital and surplus of approximately $592 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2015. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

16. Related Party Transactions

We have entered into a lease (the Amended Lease) with 6th & Pine Development, LLC (the Landlord) for two office buildings. The principal members of the Landlord are John C. Molina, our chief financial officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, John C. Molina pledged shares of common stock in the Company that he holds. Dr. J. Mario Molina, our chief executive officer, president and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary.

The Amended Lease provides for an annual rent escalator of 3.4% per year, and will expire on December 31, 2029, unless extended or earlier terminated. For information regarding the lease financing obligation, refer to Note 11, "Debt."

Refer to Note 17, "Variable Interest Entities (VIEs)," for a discussion of the Joseph M. Molina, M.D. Professional Corporations.

17. Variable Interest Entities (VIEs)

Joseph M. Molina M.D., Professional Corporations

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's primary shareholder is Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides primary care medical services through its employed physicians and other medical professionals. Beginning in the fourth quarter of 2014, JMMPC also provided certain specialty referral services to our California health plan

members through a contracted provider network. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, Molina Medical Management, Inc. (MMM), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will operate at break even, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by MMM are reviewed annually to assure the achievement of this goal.

Separately, our California, Florida, New Mexico, Utah and Washington health plans have entered into primary care services agreements with JMMPC. These agreements direct our health plans to perform a monthly reconciliation, to either fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, such that JMMPC will derive no profit or loss. Because the MMM services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are generally insignificant.

We have determined that JMMPC is a VIE, and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of September 30, 2015, JMMPC had total assets of $7.1 million, and total liabilities of $6.8 million. As of December 31, 2014, JMMPC had total assets of $31.1 million, and total liabilities of $30.8 million.

Our maximum exposure to loss as a result of our involvement with JMMPC is generally limited to the amounts needed to fund JMMPC's ongoing payroll, employee benefits and medical care costs associated with JMMPC's specialty referral activities. We believe that such loss exposures will be immaterial to our consolidated operating results and cash flows for the foreseeable future.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated. Those known risks and uncertainties include, but are not limited to, the following:

- uncertainties associated with the implementation of the Affordable Care Act, the Medicaid expansion, the insurance marketplaces, the effect of various implementing regulations, and uncertainties regarding the Medicare-Medicaid dual eligible demonstration programs in California, Illinois, Michigan, Ohio, South Carolina, and Texas;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations, and our ability to reduce over time the high medical costs commonly associated with new patient populations;
- federal or state medical cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit sharing arrangements, and conflicting interpretations thereof;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures, including 2014 and 2015 at-risk premium rules in the state of Texas;
- cyber-attacks or other privacy or data security incidents resulting in an inadvertent unauthorized disclosure of protected health information;
- the success of our new health plan in Puerto Rico, including the successful resolution of the Puerto Rico debt crisis and the payment of all amounts due under our Medicaid contract;
- newly FDA-approved specialty drugs such as Sovaldi, Olysio, Harvoni, and other specialty drugs or generic drugs that are exorbitantly priced but not factored into the calculation of our capitated rates;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria, including the resolution of the Illinois budget impasse and continued payment of our Illinois health plan;
- the accurate estimation of incurred but not reported or paid medical costs across our health plans;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates or retroactive premium rate increases;
- efforts by states to recoup previously paid amounts;
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states;
- the continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- complications, member confusion, or enrollment backlogs related to the annual renewal of Medicaid coverage;
- government audits and reviews, and any fine, enrollment freeze, or monitoring program that may result therefrom;
- changes with respect to our provider contracts and the loss of providers;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable or unfavorable resolution of litigation, arbitration, or administrative proceedings, including a pending qui tam action in California, and the litigation commenced against us by the state of Louisiana alleging that Molina Medicaid Solutions and its predecessors used an incorrect reimbursement formula for the payment of pharmaceutical claims;
- the relatively small number of states in which we operate health plans;
- our management of a portion of College Health Enterprises' hospital in Long Beach, California;

- the effect on our Los Angeles County subcontract of Centene's acquisition of Health Net;
- the availability of adequate financing on acceptable terms to fund and capitalize our expansion and growth, repay our outstanding indebtedness at maturity and meet our liquidity needs, including the interest expense and other costs associated with such financing;
- the failure of a state in which we operate to renew its federal Medicaid waiver;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- newly emergent viruses or widespread epidemics, and associated public alarm;
- changes in general economic conditions, including unemployment rates;
- the sufficiency of our funds, on hand, to pay the amounts due upon conversion of our outstanding notes; and
- increasing competition and consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014 and Part II, Item 1A of this Quarterly Report on Form 10-Q, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2014.

Company Overview

Molina Healthcare, Inc. provides quality health care to persons receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states and the Commonwealth of Puerto Rico, and includes our direct delivery business. As of September 30, 2015, these health plans served 3.5 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve Health Insurance Marketplace (Marketplace) members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in several states in which we operate, as well as the management of a hospital in southern California under a management services agreement.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

The following discussion and analysis, with the exception of cash flow information, is presented in the context of continuing operations unless otherwise noted.

Overview of Financial Results, Continuing Operations

Financial results for the third quarter of 2015 improved significantly over the same quarter of 2014 due to higher revenue, greater medical cost efficiency, and full state reimbursement of the Affordable Care Act Health Insurer Fee (HIF).

Income from continuing operations, before tax expense, increased to $98 million in the third quarter of 2015, from $24 million in the third quarter of 2014.

Premium revenue increased approximately 46% in the third quarter of 2015, compared with the third quarter of 2014, due to increased Medicaid expansion, integrated Medicare-Medicaid Plan and Marketplace enrollment, growth in our Illinois health plan, and the start-up of our Puerto Rico health plan earlier this year.

Medical care costs as a percent of premium revenue (the "medical care ratio") decreased to 89.3% in the third quarter of 2015, from 90.6% in the third quarter of 2014.

General and administrative expenses as a percentage of total revenue (the "general and administrative expense ratio") increased to 8.0% in the third quarter of 2015, from 7.2% in the third quarter of 2014, primarily due to broker and exchange fees associated with our Marketplace product.

Health Care Reform

Government-sponsored initiatives, including the Affordable Care Act (ACA), will remain the primary focus of our business. Three recently implemented government-sponsored initiatives that have a significant impact on our current operations are as follows:

- *Medicaid Expansion*. In the states that have elected to participate, the ACA provides for the expansion of the Medicaid program to offer eligibility to nearly all people under age 65 with incomes that are at or below 138% of the federal poverty line. Medicaid expansion membership phased in beginning January 1, 2014. Our health plans in California, Illinois, Michigan, New Mexico, Ohio, and Washington participate in Medicaid expansion. At September 30, 2015, our membership included approximately 540,000 Medicaid expansion members, or 16% of total membership.
- *Marketplace*. The ACA authorized the creation of Marketplace health insurance exchanges, allowing individuals and small groups to purchase health insurance that is federally subsidized, effective January 1, 2014. We participate in the Marketplace in all of the states in which we operate, except Illinois, Puerto Rico and South Carolina. At September 30, 2015, our membership included approximately 226,000 Marketplace members, with approximately 148,000, or 65%, of those members in Florida.
- Medicare-Medicaid Plans . To coordinate care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to deliver services to the dual eligible in a more financially efficient manner, some states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual eligible individuals. The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). We operate MMPs in six states. Our MMPs in California, Illinois, and Ohio offered coverage beginning in 2014; our MMPs in South Carolina and Texas offered coverage beginning in the first quarter of 2015; and our MMP in Michigan offered

coverage beginning in the second quarter of 2015. At September 30, 2015, our membership included approximately 56,000 integrated MMP members.

Health Insurer Fee Update

Effective January 1, 2014, the ACA requires most health plans to pay a fee based on premium revenue (the Health Insurer Fee, or HIF). The HIF is not tax deductible. Actuarial standards require that states reimburse us for the HIF we incur related to Medicaid revenue, in addition to paying us a "tax gross up" to compensate us for incremental income taxes we pay because the HIF is not tax deductible. From January 1, 2014 through June 30, 2015 we experienced varying degrees of success in securing formal commitments for the reimbursement of Medicaid related HIF and the associated tax gross up from our state partners. Consequently, we were not able to recognize as revenue such HIF reimbursement in full until the third quarter of 2015.

As of the third quarter of 2015, we have cumulatively recognized as revenue full reimbursement for Medicaid HIF and Medicaid HIF related tax effects for the period January 1, 2014 through September 30, 2015 across all of our health plans. During the third quarter of 2015, we recognized as revenue certain amounts of HIF reimbursement due from Michigan and Utah for prior periods. These amounts represented approximately $8 million ($0.08 per diluted share) of HIF revenue related to 2014 and approximately $17 million ($0.18 per diluted share) related to the first two quarters of 2015.

The amount of HIF reimbursement not recognized in the third quarter of 2014 was approximately $6 million ($0.07 per diluted share) and approximately $37 million ($0.49 per diluted share) for the nine months ended September 30, 2014.

For further discussion of the HIF, refer to the subheading below, "Liquidity and Capital Resources—Financial Condition."

Market Updates - Health Plans Segment and Molina Medicaid Solutions Segment

Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 1, "Basis of Presentation," for a discussion of the current year market updates for the Health Plans and Molina Medicaid Solutions segments.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, from our contracts with state Medicaid agencies, the federal Centers for Medicare and Medicaid Services (CMS), and our individual Marketplace membership.

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new RFP open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services), populations such as the aged, blind or disabled, and regions or service areas. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

Premium revenue is fixed in advance of the periods covered, and is not generally subject to significant accounting estimates, except as described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 2, "Significant Accounting Policies." These premium revenues are recognized in the month that members are entitled to receive health care services. Premiums received in advance are deferred.

The amount of the premiums paid to us may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program on a PMPM basis, for the nine months ended September 30, 2015. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	PMPM Premiums		
	Low	High	Consolidated
Temporary Assistance for Needy Families (TANF), CHIP (1)	$ 110.00	$ 280.00	$ 180.00
Medicaid Expansion	310.00	490.00	390.00
Aged, Blind or Disabled (ABD)	470.00	1,530.00	970.00
Marketplace	180.00	440.00	260.00
Medicare-Medicaid Plan (MMP) – Integrated (2)	1,100.00	3,220.00	1,980.00
Medicare Special Needs Plans (Medicare)	860.00	1,100.00	1,030.00

(1) CHIP stands for Children's Health Insurance Program.
(2) MMP members for whom we provide both Medicaid and Medicare coverage. We began serving members under this program in the second quarter of 2014.

The following tables set forth our Health Plans segment membership as of the dates indicated:

	September 30, 2015	June 30, 2015	December 31, 2014	September 30, 2014
Ending Membership by Health Plan:				
California	611,000	593,000	531,000	496,000
Florida	349,000	348,000	164,000	98,000
Illinois	101,000	101,000	100,000	21,000
Michigan	340,000	260,000	242,000	238,000
New Mexico	231,000	225,000	212,000	207,000
Ohio	344,000	332,000	347,000	337,000
Puerto Rico (1)	356,000	361,000	—	—
South Carolina	102,000	114,000	118,000	118,000
Texas	263,000	266,000	245,000	249,000
Utah	102,000	92,000	83,000	83,000
Washington	568,000	553,000	497,000	473,000
Wisconsin	103,000	107,000	84,000	84,000
	3,470,000	3,352,000	2,623,000	2,404,000
Ending Membership by Program:				
TANF/CHIP	2,249,000	2,180,000	1,809,000	1,678,000
Medicaid Expansion (2)	540,000	475,000	385,000	315,000
ABD	359,000	353,000	347,000	335,000
Marketplace (2)	226,000	261,000	15,000	16,000
MMP–Integrated	56,000	39,000	18,000	14,000
Medicare	40,000	44,000	49,000	46,000
	3,470,000	3,352,000	2,623,000	2,404,000

(1) The Puerto Rico health plan began serving members effective April 1, 2015.
(2) Medicaid expansion membership phased in, and the Marketplace became available for consumers to access coverage, beginning January 1, 2014.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of an MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When

providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the contract term during which BPO, hosting, and support and maintenance services are delivered. Our contracts may contain contingencies that require us to delay recognition of all or part of our service revenue until such contingencies have been removed.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services (including long-term services and supports, or LTSS), general and administrative expenses, premium tax and health insurer fee expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following categories:

- *Fee-for-service expenses:* Under fee-for-service arrangements, we retain the financial responsibility for medical care provided and incur costs based on the actual utilization of services. Such expenses are recorded in the period in which the related services are dispensed. Nearly all of our hospital services and the majority of our primary care and physician specialist services are paid on a fee-for-service basis.

- *Pharmacy expenses:* All drug, injectables, and immunization costs paid through our pharmacy benefit manager are classified as pharmacy expenses.

- *Capitation expenses:* Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.

- *Direct delivery expenses:* All costs associated with our direct delivery of medical care are separately identified.

- *Other medical expenses:* All medically related administrative costs, certain provider incentive costs, reinsurance costs and other health care expenses are classified as other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements in Note 10, "Medical Claims and Benefits Payable," for further information on how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide BPO and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs. In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the contract term, consistent with the revenue recognition period.

Financial Performance Summary, Continuing Operations

The following table summarizes our financial and operating performance from continuing operations for the three and nine months ended September 30, 2015 and 2014 (in thousands, except per-share data and percentages):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2015	2014	% Change	2015	2014	% Change
Revenue:						
Premium revenue	$ 3,377,030	$ 2,316,759	45.8 %	$ 9,652,054	$ 6,424,238	50.2 %
Service revenue	47,551	52,557	(9.5)	146,652	156,419	(6.2)
Premium tax revenue	99,047	81,240	21.9	289,003	203,053	42.3
Health insurer fee revenue	81,158	29,427	175.8	202,996	67,785	199.5
Investment income	4,832	2,041	136.7	11,675	5,615	107.9

Operating income	112,853	39,779	183.7	310,711	96,473	222.1
Other expenses, net:						
Interest expense	15,269	14,419	5.9	45,091	42,234	6.8
Other (income) expense, net	(40)	863	(104.6)	(82)	810	(110.1)
Total other expenses, net	15,229	15,282	(0.3)	45,009	43,044	4.6
Income from continuing operations before income tax expense	97,624	24,497	298.5	265,702	53,429	397.3
Income tax expense	51,329	8,427	509.1	152,335	24,784	514.7
Income from continuing operations	$ 46,295	$ 16,070	188.1 %	$ 113,367	$ 28,645	295.8 %
Diluted net income per share, continuing operations	$ 0.77	$ 0.33	133.3 %	$ 2.07	$ 0.59	250.8 %
Diluted weighted average shares outstanding	59,978	48,644	23.3 %	54,699	48,088	13.7 %
Non-GAAP Measures:						
Adjusted net income per share, continuing operations	$ 0.89	$ 0.48	85.4 %	$ 2.47	$ 1.06	133.0 %
EBITDA	$ 142,363	$ 68,287	108.5 %	$ 398,118	$ 178,614	122.9 %
Operating Statistics:						
Medical care ratio (1)	89.3%	90.6%		88.9%	89.6%	
Service revenue ratio (2)	72.7%	76.2%		70.4%	75.3%	
General and administrative expense ratio (3)	8.0%	7.2%		8.1%	8.2%	
Premium tax ratio (1)	2.8%	3.4%		2.9%	3.1%	
Effective tax rate	52.6%	34.4%		57.3%	46.4%	
Net profit margin, continuing operations (3)	1.3%	0.6%		1.1%	0.4%	

(1) Medical care ratio represents medical care costs as a percentage of premium revenue; premium tax ratio represents premium tax expenses as a percentage of premium revenue plus premium tax revenue.
(2) Service revenue ratio represents cost of service revenue as a percentage of service revenue.
(3) Computed as a percentage of total revenue.

Non-GAAP Financial Measures

We use the following non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance and the performance of other companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not substitutes for or superior to, GAAP measures (GAAP stands for U.S. generally accepted accounting principles).

The first of these non-GAAP measures is earnings before interest, taxes, depreciation and amortization, or EBITDA. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to EBITDA.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(In thousands)			
Net income	$ 46,299	$ 16,122	$ 113,395	$ 28,431
Adjustments:				
Depreciation, and amortization of intangible assets and capitalized software	29,463	29,307	87,261	83,513
Interest expense	15,269	14,419	45,091	42,234
Income tax expense	51,332	8,439	152,371	24,436
EBITDA	$ 142,363	$ 68,287	$ 398,118	$ 178,614

The second of these non-GAAP measures is adjusted net income and adjusted net income per diluted share, continuing operations. The following table reconciles net income and net income per diluted share from continuing operations, which we believe to be the most comparable GAAP measures, to adjusted net income and adjusted net income per diluted share, continuing operations.

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2015		2014		2015		2014	
	(In thousands, except per diluted share amounts)							
Net income, continuing operations	$ 46,295	$ 0.77	$ 16,070	$ 0.33	$ 113,367	$ 2.07	$ 28,645	0.59
Adjustments, net of tax:								
Amortization of convertible senior notes and lease financing obligations	4,672	0.08	4,246	0.09	13,924	0.25	12,723	0.26
Amortization of intangible assets	2,371	0.04	3,189	0.06	7,919	0.15	9,727	0.20
Adjusted net income, continuing operations (1)	$ 53,338	$ 0.89	$ 23,505	$ 0.48	$ 135,210	$ 2.47	$ 51,095	$ 1.06

(1) Beginning in the first quarter of 2015, we have revised the calculation of adjusted net income, continuing operations. We no longer subtract "depreciation, and amortization of capitalized software" and "share-based compensation" from net income, continuing operations to arrive at adjusted net income, continuing operations. We have made this change to better reflect the way in which we evaluate our financial performance, make financing and business decisions, and forecast and plan for future periods. All periods presented conform to this presentation.

Results of Operations, Continuing Operations

Three Months Ended September 30, 2015 Compared with Three Months Ended September 30, 2014

Health Plans Segment

Premium Revenue

Premium revenue increased approximately 46% in the third quarter of 2015, compared with the third quarter of 2014, due to increased Medicaid expansion, integrated Medicare-Medicaid Plan and Marketplace enrollment, growth in our Illinois health plan, and the start-up of our Puerto Rico health plan earlier this year.

Medical Care Costs

In the third quarter of 2015, medical care costs as a percent of premium revenue decreased to 89.3% in the third quarter of 2015 from 90.6% in the third quarter of 2014. Medical margin increased 65% in the third quarter of 2015 over the third quarter of 2014.

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended September 30,					
	2015			2014		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 2,224,141	$ 218.69	73.8%	$ 1,469,765	$ 206.43	70.1%
Pharmacy	417,721	41.07	13.9	337,150	47.35	16.1
Capitation	260,033	25.57	8.6	190,277	26.73	9.1
Direct delivery	30,226	2.97	1.0	24,863	3.49	1.1
Other	83,250	8.19	2.7	75,781	10.65	3.6
Total	$ 3,015,371	$ 296.49	100.0%	$ 2,097,836	$ 294.65	100.0%

The following table provides detailed fee-for-service medical claims data for the periods presented (dollars in thousands, except per-member amounts):

	Three Months Ended September 30,	
	2015	2014
Days in claims payable, fee for service	49	50
Number of claims in inventory at end of period	408,100	315,900
Billed charges of claims in inventory at end of period	$ 908,200	$ 749,300
Claims in inventory per member at end of period	0.12	0.13
Billed charges of claims in inventory per member at end of period	$ 261.73	$ 311.69
Number of claims received during the period	10,405,100	7,062,100
Billed charges of claims received during the period	$ 12,012,000	$ 7,897,500

Individual Health Plan Analysis

California. Premium revenue grew to $523.8 million in the third quarter of 2015, from $384.1 million in the third quarter of 2014, the result of higher Medicaid expansion membership (up 60,000 members) and TANF and ABD membership (up 44,000 members), as well as the start-up of an MMP plan in the second quarter of 2014 (15,000 members at September 30, 2015). Overall, enrollment on a member-month basis increased 27% in the third quarter of 2015 compared with the third quarter of 2014. The medical care ratio decreased to 83.6% in the third quarter of 2015, from 85.2% in the third quarter of 2014, as a higher medical care ratio for the Medicaid expansion program was more than offset by lower medical care ratios for other programs.

Florida. Premium revenue grew to $300.0 million in the third quarter of 2015, from $106.3 million in the third quarter of 2014, due to increases in Marketplace membership in 2015. In addition, medical margin improved $32.6 million in the third quarter of 2015 compared with the third quarter of 2014. The medical care ratio decreased to 88.3% from 97.8% in the third quarter of 2014, due to the lower medical care ratio of the Marketplace membership more than offsetting an increased medical care ratio for the Medicaid program.

Illinois. Premium revenue grew to $106.1 million in the third quarter of 2015, from $34.5 million in the third quarter of 2014. The plan experienced significant growth in late 2014, primarily within the traditional TANF program, and to a lesser degree within the Medicaid expansion program. Additionally, the plan served its first MMP members in the first half of 2014. The medical care ratio for the plan increased to 94.3% in the third quarter of 2015, from 82.1% in the third quarter of 2014. The plan's higher medical care ratio in 2015 was the result of higher medical care ratios among the health plan's TANF and ABD membership, which was only partially offset by lower medical care ratios for MMP and Medicaid expansion members.

Michigan. Premium revenue grew $72.5 million, or 35%, in the third quarter of 2015 compared with the third quarter of 2014, due to the addition of Medicaid expansion members beginning in the second quarter of 2014, and the Medicaid contract acquisition which closed in the third quarter of 2015. The medical care ratio decreased to 83.8% in the third quarter of 2015, from 85.1% in the third quarter of 2014, primarily due to growth of the Medicaid expansion program which has a lower medical care ratio than the plan's traditional Medicaid business.

New Mexico. Premium revenue grew $13.7 million, or 5%, in the third quarter of 2015 compared with the third quarter of 2014, due to substantial increases in membership in the Medicaid expansion program. The medical care ratio decreased to 92.5% in the third quarter of 2015, from 93.5% in the third quarter of 2014, due to lower medical care ratios for the ABD programs, which more than offset an increase in the medical care ratio for the Medicaid expansion and TANF programs. The New Mexico health plan reduced revenue by approximately $20 million in the third quarter of 2015 to better align our interpretation of certain contractual provisions related to revenue for members added retroactively to the state's interpretation of those provisions. Even after that adjustment, however, we estimate that, based upon our interpretation of the state's proposed definition of retroactive membership, the amount we would owe for the period January 1, 2014 through September, 2015 would exceed our accrual for such liability at September 30, 2015 by between $15 million and $20 million.

Ohio. Premium revenue grew $55.7 million, or 12%, in the third quarter of 2015 compared with the third quarter of 2014, due to growth in membership within the Medicaid expansion, MMP, and ABD programs. The medical care ratio decreased to 85.5% in the third quarter of 2015, from 86.9% in the third quarter of 2014, primarily due to lower medical care ratios for the health plan's Medicaid Expansion, MMP, and ABD membership, which were partially offset by a higher medical care ratio for its TANF membership.

Puerto Rico. The medical care ratio was 89.3% in the third quarter of 2015. The plan served its first members effective April 1, 2015.

South Carolina. The medical care ratio increased to 80.1% in the third quarter of 2015, from 78.0% in the third quarter of 2014.

Texas. Premium revenue grew $185.9 million, or 55%, in the third quarter of 2015 compared with the third quarter of 2014, primarily due to the addition of ABD members receiving nursing facility benefits effective March 1, 2015 and the start-up of the Texas MMP program on that same date. The medical care ratio for the Texas health plan increased to 94.1% in the third quarter of 2015, from 90.9% in the third quarter of 2014, primarily due to the addition of nursing facility benefits for ABD members and the startup of the MMP program. For a discussion of the plan's quality related revenue, refer to *Individual Health Plan Analysis* under "Nine Months Ended September 30, 2015 Compared with Nine Months Ended September 30, 2014," below.

Utah. The medical care ratio decreased to 90.5% in the third quarter of 2015, from 95.6% in the third quarter of 2014, due to improvement in the Medicaid medical care ratio and the addition of Marketplace membership which has a lower medical care ratio than the plan's traditional Medicaid business, which more than offset an increase to the medical care ratio for the health plan's Medicare membership.

Washington. Premium revenue grew $118.9 million, or 42%, in the third quarter of 2015 compared with the third quarter of 2014, primarily due to growth in Medicaid expansion membership. The medical care ratio decreased to 92.9% in the third quarter of 2015, from 97.6% in the third quarter of 2014, due to lower medical care ratios for the Medicaid expansion and ABD programs, which more than offset an increase in the medical care ratio for the TANF program.

Wisconsin. Premium revenue grew $28.5 million, or 66%, in the third quarter of 2015 when compared with the third quarter of 2014 as a result of increased Marketplace enrollment. The medical care ratio decreased to 79.6% in the third quarter of 2015, from 88.8% in the third quarter of 2014. We believe that medical care ratios below 80% are not sustainable over time.

Operating Data

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan and program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended September 30, 2015						
	Member Months[1]	Premium Revenue		Medical Care Costs		MCR[2]	Medical Margin
		Total	PMPM	Total	PMPM		
California	1,816	$ 523,798	$ 288.45	$ 437,785	$ 241.09	83.6%	$ 86,013
Florida	1,003	299,971	299.33	264,956	264.39	88.3	35,015

(1) Three months ended September 30, 2014 data not presented due to lack of comparability.
(2) A member month is defined as the aggregate of each month's ending membership for the period presented.
(3) "MCR" represents medical costs as a percentage of premium revenue.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended September 30,	
	2015	2014
	(In thousands)	
Service revenue before amortization	$ 47,551	$ 53,286
Amortization recorded as reduction of service revenue	—	(729)
Service revenue	47,551	52,557
Cost of service revenue	34,573	40,067
General and administrative costs	1,854	1,791
Amortization of customer relationship intangibles	170	794
Operating income	$ 10,954	$ 9,905

Operating income for our Molina Medicaid Solutions segment increased by $1.0 million in the third quarter of 2015, compared with the third quarter of 2014.

Results of Operations, Continuing Operations

Nine Months Ended September 30, 2015 Compared with Nine Months Ended September 30, 2014

Health Plans Segment

Premium Revenue

Premium revenue increased approximately 50% in the nine months ended September 30, 2015 compared with the nine months ended September 30, 2014, as a result of enrollment growth across all health plan programs.

Medical Care Costs

In the nine months ended September 30, 2015, medical care costs as a percent of premium revenue decreased to 88.9% from 89.6% during the nine months ended September 30, 2014. Medical margin increased 60% in the nine months ended September 30, 2015 over the nine months ended September 30, 2014.

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Nine Months Ended September 30,					
	2015			2014		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 6,275,222	$ 217.63	73.1%	$ 4,028,863	$ 198.61	70.0%
Pharmacy	1,160,818	40.26	13.5	919,374	45.32	16.0
Capitation	724,715	25.13	8.5	536,533	26.45	9.3
Direct delivery	84,882	2.94	1.0	69,947	3.45	1.2
Other	335,052	11.62	3.9	199,076	9.81	3.5
Total	$ 8,580,689	$ 297.58	100.0%	$ 5,753,793	$ 283.64	100.0%

The following table provides detailed fee-for-service medical claims data for the periods presented (dollars in thousands, except per-member amounts):

	Nine Months Ended September 30,	
	2015	2014
Days in claims payable, fee for service	49	50
Number of claims in inventory at end of period	408,100	315,900
Billed charges of claims in inventory at end of period	$ 908,200	$ 749,300
Claims in inventory per member at end of period	0.12	0.13
Billed charges of claims in inventory per member at end of period	$ 261.73	$ 311.69
Number of claims received during the period	29,084,100	19,703,300
Billed charges of claims received during the period	$ 33,517,100	$ 21,506,500

Individual Health Plan Analysis

California. Premium revenue grew $478.2 million, or 45%, in the nine months ended September 30, 2015 compared with the nine months ended September 30, 2014, the result of higher membership, as described above. Overall, enrollment on a member-month basis increased 34% in the nine months ended September 30, 2015 compared with the nine months ended September 30, 2014. Increased premium revenue was also driven by a 12% increase in premium revenue PMPM, which was the result of the higher relative premium revenue PMPM among those programs experiencing enrollment growth (Medicaid expansion and MMP); and the addition of long-term care benefits to some of the health plan's Medicaid membership. The medical care ratio increased to 87.7% in the nine months ended September 30, 2015, from 83.9% in the nine months ended September 30, 2014, as a lower medical care ratio for the ABD program was more than offset by higher medical care ratios for other programs.

Florida. Premium revenue grew to $868.3 million in the nine months ended September 30, 2015, from $312.9 million in the nine months ended September 30, 2014, due to increased Marketplace membership. The medical care ratio decreased to 87.9% in the nine months ended September 30, 2015, from 92.8% in the nine months ended September 30, 2014, due to the lower medical care ratio of the Marketplace membership more than offsetting an increase in the medical care ratio for the Medicaid program.

Illinois. Premium revenue grew to $312.0 million in the nine months ended September 30, 2015, from $68.9 million in the nine months ended September 30, 2014, due to significant membership growth in late 2014, as described above. The medical care ratio increased to 92.2% in the nine months ended September 30, 2015, from 91.8% in the nine months ended September 30, 2014.

Michigan. Premium revenue grew $170.7 million, or 30%, in the nine months ended September 30, 2015 compared with the nine months ended September 30, 2014, due to increased Medicaid expansion membership and the startup of the MMP program. The medical care ratio of 84.0% for the nine months ended September 30, 2015, was essentially unchanged from the 83.9% reported for the nine months ended September 30, 2014.

New Mexico. Premium revenue grew $156.1 million, or 20%, in the nine months ended September 30, 2015 compared with the nine months ended September 30, 2014, due to substantial increases in membership in all Medicaid programs. The medical care ratio of 90.4% in the nine months ended September 30, 2015, was comparable with the medical care ratio in the nine months ended September 30, 2014.

Ohio. Premium revenue grew $472.4 million, or 45%, in the nine months ended September 30, 2015 compared with the nine months ended September 30, 2014, due to growth in membership within the Medicaid expansion, MMP, and ABD programs. The medical care ratio decreased to 83.5% in the nine months ended September 30, 2015, from 85.7% in the nine months ended September 30, 2014, due to lower medical care ratios in all Medicaid programs.

Puerto Rico. As previously disclosed, the plan began serving members on April 1, 2015. The plan's medical care ratio was 92.3% for the nine months ended September 30, 2015.

South Carolina. The medical care ratio decreased to 77.5% in the nine months ended September 30, 2015, from 86.6% in the nine months ended September 30, 2014. We believe that medical care ratios below 80% are not sustainable over time.

Texas. Premium revenue grew $439.0 million, or 45%, in the nine months ended September 30, 2015 compared with the nine months ended September 30, 2014, primarily due to the addition of ABD members receiving nursing facility benefits effective March 1, 2015, and the start-up of the Texas MMP program on that date. The medical care ratio increased to 92.6% in the nine months ended September 30, 2015, from 91.7% in the nine months ended September 30, 2014.

As previously disclosed, we have deferred recognition of that portion of our quality related revenue in Texas that is based upon measures for which we do not have historical information, clear definitions, and clarity around minimum standards. Such revenue is estimated to be approximately $20 million for all of 2014 and $17 million for the nine months ended September 30, 2015. We have not recognized any of this revenue through September 30, 2015.

Utah. The financial performance of the plan was consistent between the nine months ended September 30, 2015, and the same period in 2014.

Washington. Premium revenue grew $244.6 million, or 26%, in the nine months ended September 30, 2015 when compared with the nine months ended September 30, 2014, primarily due to growth in Medicaid expansion membership. The medical care ratio decreased to 92.3% in the nine months ended September 30, 2015, from 93.2% in the nine months ended September 30, 2014, as a lower medical care ratio for members served under the ABD program more than offset a higher medical care ratio in the TANF and Medicaid expansion programs.

Wisconsin. Premium revenue grew $87.9 million, or 74%, in the nine months ended September 30, 2015 compared with the nine months ended September 30, 2014 as a result of increased Marketplace enrollment. The medical care ratio decreased to 78.4% in the nine months ended September 30, 2015, from 84.5% in the nine months ended September 30, 2014. We believe that medical care ratios below 80% are not sustainable over time.

Operating Data

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan and program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Nine Months Ended September 30, 2015

(1) Nine months ended September 30, 2014, data not presented due to lack of comparability.
(2) A member month is defined as the aggregate of each month's ending membership for the period presented.
(3) "MCR" represents medical costs as a percentage of premium revenue.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Nine Months Ended September 30,	
	2015	2014
	(In thousands)	
Service revenue before amortization	$ 147,713	$ 158,605
Amortization recorded as reduction of service revenue	(1,061)	(2,186)
Service revenue	146,652	156,419
Cost of service revenue	103,294	117,831
General and administrative costs	5,062	5,432
Amortization of customer relationship intangibles	509	2,562
Operating income	$ 37,787	$ 30,594

Operating income for our Molina Medicaid Solutions segment increased $7.2 million in the nine months ended September 30, 2015, compared with the nine months ended September 30, 2014, primarily as a result of renegotiated and extended state contracts, various operational efficiencies, and decreased intangible amortization.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses as a percentage of total revenue (the "general and administrative expense ratio") increased to 8.0% in the third quarter of 2015, from 7.2% in the third quarter of 2014, primarily due to increased broker and exchange fees associated with the Marketplace program. The general and administrative expense ratio decreased slightly to 8.1% for the nine months ended September 30, 2015, compared with 8.2% for the nine months ended September 30, 2014, primarily the result of improved leverage of fixed administrative expenses over higher total revenue.

Premium Tax Expense

The premium tax ratio (premium tax expense as a percentage of premium revenue plus premium tax revenue) was 2.8% in the third quarter of 2015 compared with 3.4% in the third quarter of 2014, and 2.9% in the nine months ended September 30, 2015 compared with 3.1% in the nine months ended September 30, 2014.

Health Insurer Fee Revenue and Expenses

As noted above, from January 1, 2014 through June 30, 2015, we experienced varying degrees of success in securing formal commitments for the reimbursement of Medicaid related HIF and the associated tax gross up from our state partners. Consequently, we were not able to recognize as revenue such HIF reimbursement in full until the third quarter of 2015.

As of the third quarter of 2015, we have cumulatively recognized as revenue full reimbursement for Medicaid HIF and Medicaid HIF related tax effects for the period January 1, 2014 through September 30, 2015 across all of our health plans.

Health insurer fee revenue, as a percentage of premium revenue, increased to 2.4% in the third quarter of 2015 from 1.3% in the third quarter of 2014, and increased to 2.1% in the nine months ended September 30, 2015, from 1.1% in the nine months ended September 30, 2014. HIF revenue increased in 2015 compared with 2014 due to improved reimbursement of Medicaid-related HIF expenses in 2015.

Health insurer fee expenses, as a percentage of premium revenue, were 1.1% in the third quarter of 2015, compared with 1.0% in the third quarter of 2014, and 1.2% in the nine months ended September 30, 2015, compared with 1.0% in the nine months ended September 30, 2014.

In addition, both HIF revenue and expenses increased over the prior year proportionally to the increase in the total HIF tax base, which is assessed to all insurers. This base increased to $11.3 billion in 2015, from $8.0 billion in 2014. Refer to "Liquidity and Capital Resources—Financial Condition" below, for further discussion of the HIF.

Depreciation and Amortization

The following tables present all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Three Months Ended September 30,			
	2015		2014	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 22,079	0.6%	$ 19,910	0.8%
Amortization of intangible assets, continuing operations	3,764	0.1	4,332	0.2
Depreciation and amortization, continuing operations	25,843	0.7	24,242	1.0
Amortization recorded as reduction of service revenue	—	—	729	—
Amortization of capitalized software recorded as cost of service revenue	4,664	0.1	8,839	0.4
	$ 30,507	0.8%	$ 33,810	1.4%

	Nine Months Ended September 30,			
	2015		2014	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 64,478	0.6%	$ 54,582	0.8%
Amortization of intangible assets, continuing operations	11,509	0.1	13,253	0.2
Depreciation and amortization, continuing operations	75,987	0.7	67,835	1.0
Amortization recorded as reduction of service revenue	1,061	—	2,186	—
Amortization of capitalized software recorded as cost of service revenue	15,535	0.2	29,443	0.4
Depreciation and amortization reported in the statement of cash flows	$ 92,583	0.9%	$ 99,464	1.4%

Interest Expense

Interest expense increased to $15.3 million for the third quarter of 2015, from $14.4 million for the third quarter of 2014. Interest expense increased to $45.1 million for the nine months ended September 30, 2015, from $42.2 million for the nine months ended September 30, 2014. The increase was due primarily to the issuance of the 1.625% Notes in the third quarter of 2014. For further details regarding convertible senior notes transactions, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 11, "Debt."

Interest expense includes non-cash interest expense relating primarily to the amortization of the discount on convertible senior notes, which amounted to $7.4 million and $6.7 million for the three months ended September 30, 2015 and 2014, respectively, and $22.1 million and $20.2 million for the nine months ended September 30, 2015 and 2014, respectively.

Income Taxes

The provision for income taxes in continuing operations was recorded at an effective rate of 52.6% for the third quarter of 2015, compared with 34.4% for the third quarter of 2014, and 57.3% for the nine months ended September 30, 2015 compared with 46.4% for the nine months ended September 30, 2014. The effective tax rate for 2015 is higher than 2014 primarily as a result of higher non-deductible HIF expenses in 2015, and our inability to record tax benefits for certain losses incurred at our Puerto Rico health plan, which commenced operations in 2015. The effective tax rate would have been approximately 60% for the third quarter of 2015 absent certain discrete tax benefits.

Liquidity and Capital Resources

Introduction

Our regulated health plan subsidiaries generate significant cash flows from premium revenue. We generally receive premium revenue a short time before we pay for the related health care services; such cash flows generate our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. In addition, the majority of our premium revenues comes from the joint federal and state funding of the Medicaid and CHIP programs. From time to time, states may delay premium payments. Whenever a state delays payments, for whatever the reason, our liquidity is reduced. See further discussion under *Financial Condition*, below.

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

A majority of the assets held by our regulated subsidiaries is in the form of cash, cash equivalents, and investments. Cash in excess of the capital needs of our regulated health plans is generally paid to us in the form of dividends, when and as permitted by applicable regulations, for general corporate use. For the nine months ended September 30, 2015, we received dividends from subsidiaries amounting to $42 million. For the nine months ended September 30, 2014, the parent received no dividends from subsidiaries.

We generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies that conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of 10 years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be three years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of September 30, 2015, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities.

All of our investments are classified as current assets, except for our restricted investments and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Liquidity

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Nine Months Ended September 30,		
	2015	2014	Change
	(In thousands)		
Net cash provided by operating activities	$ 905,786	$ 841,198	$ 64,588
Net cash used in investing activities	(665,075)	(261,280)	(403,795)
Net cash provided by financing activities	384,436	82,783	301,653
Net increase in cash and cash equivalents	$ 625,147	$ 662,701	$ (37,554)

Operating Activities. Net cash provided by operating activities increased $64.6 million in the nine months ended September 30, 2015 compared to the nine months ended September 30, 2014, primarily due to the following sources of cash:

- Net income increased $85.0 million;
- Accounts receivable provided $103.3 million, primarily due to collections of premiums receivable at our California health plan in the first quarter of 2015;
- Amounts due government agencies provided $112.3 million, in connection with Health Plans segment membership growth in programs that contain medical cost floors or medical cost corridors. Under such programs, a portion of certain Medicaid, Medicare, and Marketplace premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs; and
- Accounts payable and accrued liabilities provided $59.9 million, primarily due to increases in accruals for expenses associated with growth in our workforce.

The sources of cash were partially offset by the following uses of cash:

- Medical claims and benefits payable were a use of $95.0 million, primarily because membership and related medical costs grew at a higher rate for the same period in 2014 than in 2015, resulting in a lower year-over-year change; and
- Deferred revenue was a use of $197.5 million, primarily due to an advance premium payment received by our Washington health plan in September 2014, with no comparable activity in September 2015.

Investing Activities. Cash used in investing activities increased $403.8 million in the nine months ended September 30, 2015 compared to the nine months ended September 30, 2014, primarily due to the investment of the net proceeds from our common stock offering in June 2015, as described below. In addition, net cash paid in business combinations increased $69.8 million, as described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 4, "Business Combinations."

Financing Activities. Cash provided by financing activities increased $301.7 million year over year, primarily due to $373.2 million proceeds, net of issuance costs, from the June 2015 offering of 5.75 million shares of our common stock.

Financial Condition

On a consolidated basis, at September 30, 2015, working capital amounted to $1,049.2 million, compared with $1,070.6 million at December 31, 2014. We held cash and investments, including restricted investments, of $3,730.0 million and $2,665.9 million at September 30, 2015 and December 31, 2014, respectively.

Credit Facility Covenants. The $250 million revolving Credit Facility contains customary non-financial and financial covenants, including a minimum interest coverage ratio, a maximum net debt-to-EBITDA ratio, and minimum statutory net worth, as described in greater detail in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Debt." As of September 30, 2015, a $5 million letter of credit outstanding reduced borrowing available to $245 million, and no amounts were outstanding, under the Credit Facility. At September 30, 2015, we were in compliance with all financial covenants under the Credit Facility.

States' Budgets. As noted above, from time to time the states in which our health plans operate may delay premium payments. For example, the state of Illinois is currently operating without a budget for its fiscal year ending June 30, 2016. As of September 30, 2015, our Illinois health plan served approximately 101,000 members, and recognized premium revenue of approximately $312 million for the nine months ended September 30, 2015. As of October 23, 2015, Illinois is current with its premium payments through August 31, 2015, but has not paid us in full for September 2015.

In another example, the Commonwealth of Puerto Rico has reported that it may lack sufficient resources to fund all necessary governmental programs including healthcare-related programs, as well as meet its debt obligations for its fiscal year ending June 30, 2016. Our Puerto Rico health plan became operational on April 1, 2015. As of September 30, 2015, the plan served approximately 356,000 members and recognized premium revenue of approximately $181 million in the third quarter of 2015, or approximately $60 million per month. As of October 23, 2015, the Commonwealth continues to pay us weekly and is current with its payments.

It has been our practice in the past, and will remain so in the future, to continue to serve our members and pay health care providers for services rendered in circumstances where state (or Commonwealth) governments are temporarily unable to pay us, so long as we continue to believe that such state (or Commonwealth) governments will ultimately pay us.

Health Insurer Fee. Effective January 1, 2014, the ACA requires most health plans to pay a fee based on premium revenue (the Health Insurer Fee, or HIF). The HIF is not tax deductible. From January 1, 2014 through June 30, 2015, we experienced varying degrees of success in securing formal commitments for the reimbursement of Medicaid-related HIF and the associated tax gross up from our state partners. Consequently, we were not able to recognize as revenue such HIF reimbursement in full until the third quarter of 2015. As of the third quarter of 2015, however, we have been able to recognize as revenue full reimbursement for Medicaid HIF and Medicaid HIF related tax effects for the period January 1, 2014 through September 30, 2015 across all of our health plans. We do not believe that the failure to achieve full reimbursement of the HIF going forward represents a significant business risk.

The following table provides the details of our HIF revenue reimbursement by health plan as of September 30, 2015 (in thousands):

	HIF Reimbursement Revenue, Gross[1]					
	Nine Months Ended September 30, 2015					Year Ending Dec. 31, 2015
	Recognized				Necessary for Full Reimbursement	Necessary for Full Reimbursement
	Q1 2015	Q2 2015	Q3 2015	Total		
2015 HIF:						
California	$ —	$ 17,258	$ 5,925	$ 23,183	$ 23,183	$ 30,910
Florida	2,027	2,042	2,056	6,125	6,125	8,167
Illinois	965	973	922	2,860	2,860	3,814
Michigan	—	—	20,735	20,735	20,735	27,646
New Mexico	7,539	7,597	7,647	22,783	22,783	30,377
Ohio	11,936	12,027	12,105	36,068	36,068	48,091
South Carolina	3,053	3,077	3,097	9,227	9,227	12,303

Wisconsin	1,126	1,135	1,142	3,403	3,403	4,537
Subtotal, Medicaid	43,436	60,956	69,739	174,131	174,131	232,175
Marketplace	398	400	402	1,200	1,200	1,601
Medicare	5,702	3,652	4,711	14,065	14,065	18,754
	49,536	65,008	74,852	189,396	$ 189,396	$ 252,530
2014 HIF:						
California	—	11,616	—	11,616		
Michigan	—	—	6,797	6,797		
Utah	—	—	1,286	1,286		
	$ 49,536	$ 76,624	$ 82,935	$ 209,095		
Recognized in:						
Health insurer fee revenue	$ 47,948	$ 73,890	81,158	$ 202,996		
Premium tax revenue	1,588	2,734	1,777	6,099		
	$ 49,536	$ 76,624	$ 82,935	$ 209,095		

(1) Amounts in the table include our estimate of the full economic impact of the HIF including the premium tax and income tax effect.

Convertible Senior Notes Classification. As described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 11, "Debt," our 1.125% Notes met the stock price trigger in the quarter ended September 30, 2015, and are convertible to cash through at least December 31, 2015. Because the 1.125% Notes may be converted into cash within 12 months, the $450.3 million carrying amount is reported in current portion of long-term debt as of September 30, 2015, which resulted in decreased working capital as of September 30, 2015. We believe that the amount of the 1.125% Notes that may be converted over the next twelve months, if any, will be insignificant. For more information, refer to Part II, Item 1A of this Form 10-Q, "Risk Factors."

We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Future Sources and Uses of Liquidity

In Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 4, "Business Combinations," we describe two Medicaid contract acquisitions in Florida and Michigan that closed in the third quarter of 2015 for total consideration of approximately $69 million. We have also entered into agreements to acquire Medicaid contracts that we expect to add approximately 180,000 additional members within the next six months to our health plans in Florida and Illinois. In addition, we have entered into an agreement to acquire a behavioral and mental health services provider for approximately $200 million, which we expect to close in the fourth quarter of 2015. The aggregate amount we expect to spend for the acquisitions that have been announced but not yet closed as of October 29, 2015, is approximately $309 million.

For information on our Credit Facility, convertible senior notes, and other financing arrangements, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Debt."

For information on our common stock offering, shelf registration statement, and securities repurchase program, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 13, "Stockholders' Equity."

Regulatory Capital and Dividend Restrictions

For information on our regulatory capital requirements and dividend restrictions, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 15, "Commitments and Contingencies."

Contractual Obligations

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2014, was disclosed in our 2014 Annual Report on Form 10-K. There were no material changes to this previously filed information outside the ordinary course of business during the nine months ended September 30, 2015. For further discussion and maturities of our long-term debt, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Debt."

Critical Accounting Estimates

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 10, "Medical Claims and Benefits Payable," for a table which presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements.
- *Health Plans segment contractual provisions that may adjust or limit revenue or profit*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the third quarter of 2015 in connection with such contractual provisions.
- *Health Plans segment Marketplace premium stabilization programs*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the third quarter of 2015 in connection with such premium stabilization programs.
- *Health Plans segment quality incentives*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the third quarter of 2015 in connection with such quality incentives.
- *Molina Medicaid Solutions segment revenue and cost recognition*. Refer to Part II, Item 8 of our 2014 Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of Molina Medicaid Solutions' service revenue and cost of service revenue recognition.

There have been no significant changes during the nine months ended September 30, 2015, to the items that we disclosed as our critical accounting estimates in our discussion and analysis of financial condition and results of operations in our Annual Report on Form 10-K for the year ended December 31, 2014.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC, a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of 10 years and an average duration of three years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our chief executive officer and our chief financial officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the *"Exchange Act"*)), are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended September 30, 2015 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

A description of our legal proceedings is included in and incorporated by reference to Note 15 of the Notes to the Consolidated Financial Statements contained in Part I, Item 1 of this report.

Item 1A. Risk Factors

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed below, which supplement and should be read together with the risk factors, discussed in Part I, Item 1A – Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2014 and Part II, Item 1A - Risk Factors, in our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2015. The risk factors described herein, in our 2014 Annual Report on Form 10-K and our June 30, 2015 Quarterly Report on Form 10-Q, are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, or results of operations.

Centene's acquisition of Health Net could affect the Los Angeles county subcontract of our California health plan.

Our California health plan operates in Los Angeles County, California as a subcontractor to Health Net, which holds a direct Medi-Cal contract with the state of California. Health Net has entered into a merger agreement with Centene Corporation, with the merger expected to close in early 2016. We currently do not expect there to be any material change to our Los Angeles county subcontract in connection with Centene's acquisition of Health Net. However, if Centene seeks to modify our subcontract or otherwise refuses to perform under the contract, our business, financial condition, cash flows, or results of operations may be adversely affected.

Our management of a portion of a hospital owned by College Health Enterprises in Long Beach, California has generated, and could continue to generate, losses.

Our subsidiary, Molina Hospital Management, Inc. (MHM), manages a portion of a hospital owned by College Health Enterprises (College) in Long Beach, California pursuant to the terms of a Management Services Agreement dated as of August 30, 2013 (the MSA) by and between MHM and CHLB, LLC, an affiliate of College. MHM's management services pursuant to the MSA have generated a financial loss each month since the inception of this arrangement, and could continue to generate losses.

On August 27, 2015, MHM delivered to College a notice of immediate termination for cause of the MSA by reason of alleged material breaches by CHLB, LLC of various duties, obligations, and covenants in the MSA. On September 8, 2015, College notified us that it disputes the validity of our notice of termination in its entirety and, if the parties are unable to resolve their differences, College will commence binding arbitration. Subsequent to September 8, 2015, the parties engaged in extensive discussions regarding the issues presented, and additional discussions between the parties are anticipated. If the parties are unable to resolve this matter, the dispute will likely proceed to arbitration. The MSA provides that it may not be terminated until there has been a final determination that such termination was proper in accordance with the dispute resolution procedures provided for in the MSA. Until receipt of such final determination, the MSA provides that it shall remain in full force and effect, and thus prior to such final determination both parties are required to continue to perform under the MSA, and MHM would likely continue to generate losses under the MSA.

In addition to its rights with regard to termination for breach, MHM has the right to terminate the MSA without cause. However, termination without cause would trigger an obligation to pay CHLB, LLC all amounts due under the remaining eight-year term of the MSA, discounted to present value, as well as certain contract run-out costs (totaling between $30 million and $40 million).

The Commonwealth of Puerto Rico may become unable to pay the premiums of our Puerto Rico health plan.

The government of Puerto Rico currently faces major fiscal and liquidity challenges. The government recently warned that it may “lack sufficient resources to fund all necessary governmental programs and services as well as meet debt service obligations for fiscal year 2016.” Much of the Puerto Rican government’s revenue stream for the first part of its fiscal year, which began on July 1st, is earmarked to redeem revenue bonds. On June 29, 2015, Puerto Rico’s governor, Alejandro Garcia Padilla, stated during a televised address that “the debt is not payable.” Further, the island’s ability to access credit markets appears highly uncertain, and its ability to meet future debt service payments depends in part on the willingness of investors to roll over existing debt.

The extreme financial difficulties faced by the Commonwealth may make it impossible for ASES, the Puerto Rico Medicaid agency, to pay our Puerto Rico health plan under the terms of the parties’ Medicaid contract. As of September 30, 2015, our

Puerto Rico health plan served approximately 356,000 members, and had recognized premium revenue of approximately $181 million in the third quarter of 2015, or approximately $60 million per month. A default by ASES on its payment obligations under our Medicaid contract, or a determination by ASES to terminate our contract based on insufficient funds available, could result in our having paid, or in our having to pay, provider claims in amounts for which we are not paid reimbursement, and could make it unfeasible for the Puerto Rico health plan to continue to operate. A default by ASES or termination of our Puerto Rico Medicaid contract could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

We may not have the funds necessary to pay the amounts due upon conversion or required repurchase of our outstanding notes, and our indebtedness may contain limitations on our ability to pay the amounts due upon conversion or required repurchase.

In February 2013, we issued $550.0 million aggregate principal amount of 1.125% cash convertible senior notes due January 15, 2020, unless earlier repurchased or converted. We refer to these notes as our 1.125% Notes. In September 2014, we issued $301.6 million aggregate principal amount of 1.625% convertible senior notes due August 14, 2044, unless earlier repurchased, redeemed, or converted. We refer to these notes as our 1.625% Notes. As of September 30, 2015, the aggregate outstanding principal amount of our 1.125% Notes and our 1.625% Notes was $550.0 million and $301.6 million, respectively. Both our 1.125% Notes and our 1.625% Notes are convertible into cash prior to their respective maturity dates under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger. The 1.125% Notes met the stock price trigger in the quarter ended September 30, 2015, and are convertible to cash through at least December 31, 2015. Because the 1.125% Notes may be converted into cash within 12 months, the $450.3 million carrying amount is reported in current portion of long-term debt as of September 30, 2015. In addition, holders of our 1.625% Notes may convert their notes into cash during any calendar quarter (and only during such calendar quarter) if the last reported sales price of our common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to $75.51 per share. The last reported sale price of our common stock as reported on the New York Stock Exchange on October 28, 2015 was $67.80 per share. As of September 30, 2015, our 1.625% Notes were not convertible. If conversion requests are received, the settlement of the notes must be paid primarily in cash pursuant to the terms of the relevant indentures.

For economic reasons related to the trading market for our 1.125% Notes, we believe that the amount of the notes that may be converted over the next twelve months, if any, will not be significant. However, if the trading market for our 1.125% Notes becomes closed or restricted due to market turmoil or other reasons such that the notes cannot be traded, or if the trading price of our 1.125% Notes, which normally trade at a marginal premium to the underlying composite stock-and-interest economic value, no longer includes that marginal premium, holders of our 1.125% Notes may elect to convert the notes to cash. As of September 30, 2015, we had sufficient available cash, combined with borrowing capacity available under our Credit Facility, to fund such conversions.

In addition, in the event of a change in control or the termination in trading of our stock, each holder of our 1.125% Notes and our 1.625% Notes would have the right to require us to purchase some or all of their notes at a purchase price in cash equal to 100% of the principal amount of the notes, plus any accrued and unpaid interest.

In the event of conversions or required repurchases, we may not have enough available cash or be able to obtain financing at the time we are required to comply with our conversion or repurchase obligations. In addition, our ability to comply with these obligations may be limited by law, by regulatory authority, or by agreements governing our future indebtedness. The indentures for the 1.125% Notes and the 1.625% Notes provide that it would be an event of default if we do not make the cash payments due upon conversion or required repurchase of the notes. The occurrence of an event of default under one or both of these indentures may also constitute an event of default under our Credit Facility and under our other indebtedness we may have outstanding at such time. Any such default could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

There are performance risks related to medical cost expenditure floors and corridors, administrative cost and profit ceilings, premium stabilization programs, cost plus reimbursement and performance based revenue associated with a large portion of our premium revenues.

Approximately 85% of our premium revenue is subject to contract provisions pertaining to medical cost floors and corridors, administrative cost and profit ceilings, cost plus reimbursement, premium stabilization programs and profit-sharing arrangements. Many of these provisions are poorly defined and subject to differing interpretations between the contracting parties. In the event the applicable government agency disagrees with our interpretation or application of the sometimes complicated contract provisions at issue, we could be required to adjust the amount of our obligations under these provisions and/or make a payment or payments to the government agency. Any interpretation or application of these provisions at variance

with our interpretation, or inconsistent with our revenue recognition accounting treatment, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Many of our contracts also contain provisions pertaining to at-risk premiums that require us to meet certain quality performance measures to earn all of our contract revenues. In the event we are unsuccessful in achieving the stated performance measure, we will be unable to recognize the revenue associated with that measure. Any failure of our health plans to satisfy one of these performance measure provisions could have a material adverse effect on our business, financial condition, cash flows or results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Share repurchase activity during the three months ended September 30, 2015 was as follows:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (b)
July 1 - July 31	—	$ —	—	$ 50,000,000
August 1 - August 31	881	$ 75.43	—	$ 50,000,000
September 1 - September 30	329	$ 72.67	—	$ 50,000,000
Total	1,210	$ 74.68	—	

(a) During the three months ended September 30, 2015, we withheld 1,210 shares of common stock under our 2011 Equity Incentive Plan to settle our employees' income tax obligations.

(b) Effective as of February 25, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This repurchase program extends through December 31, 2015.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended September 30, 2015 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
June 30, 2015

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality health care to those receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states and the Commonwealth of Puerto Rico, and includes our direct delivery business. As of June 30, 2015, these health plans served 3.4 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve Health Insurance Marketplace (Marketplace) members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in several states in which we operate, as well as the management of a hospital in southern California under a management services agreement.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

Market Updates - Health Plans Segment

Florida. On July 14, 2015, we announced that our Florida health plan entered into an agreement with Preferred Medical Plan, Inc. Under this agreement, we will assume Preferred's Medicaid contract in Miami-Dade and Monroe counties, as well as acquire certain assets related to the operation of its Medicaid business. Preferred currently serves approximately 25,000 Medicaid members. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the third quarter of 2015.

As of June 30, 2015, our Florida health plan served 176,000 Marketplace members, more than double its total membership as of December 31, 2014.

Illinois. On July 15, 2015, we announced that our Illinois health plan entered into an agreement with Accountable Care Chicago, LLC, also known as MyCare Chicago. Under this agreement, we will receive the right to assume MyCare Chicago's Medicaid members in Cook County, as well as acquire certain assets related to the operation of the Medicaid business. MyCare Chicago currently serves approximately 61,000 Medicaid members. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the fourth quarter of 2015.

Michigan. On May 15, 2015, we announced that our Michigan health plan entered into an agreement with HealthPlus of Michigan and its subsidiary, HealthPlus Partners, Inc. (collectively, HealthPlus). Under this agreement, we will assume HealthPlus Partners' Medicaid contract and HealthPlus of Michigan's MIChild contract, as well as certain provider agreements. HealthPlus currently serves approximately 90,000 Medicaid and 6,000 MIChild members. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the third quarter of 2015.

Puerto Rico. Effective April 1, 2015, our Puerto Rico health plan served its first members. As of June 30, 2015, our Puerto Rico plan enrollment amounted to approximately 361,000 members.

Market Updates - Molina Medicaid Solutions Segment

New Jersey. On April 9, 2015, the state of New Jersey announced its selection of Molina Medicaid Solutions to design and operate its new Medicaid management information system (MMIS). The new contract is effective May 1, 2015, and has a term of 10 years with three one-year renewal options. Molina Medicaid Solutions was the state's previous MMIS provider, and was awarded the new contract as a result of Molina Medicaid Solutions' submission in response to the state of New Jersey's request for proposals.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are

insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2015.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2014. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2014 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2014 audited consolidated financial statements.

Reclassifications

We have reclassified certain amounts in the 2014 statement of cash flows to conform to the 2015 presentation.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services, and premiums collected in advance are deferred.

Certain components of premium revenue are subject to accounting estimates as follows:

Contractual Provisions That May Adjust or Limit Revenue or Profit

Health Plan Medical Cost Floors (Minimums), Medical Cost Corridors, and Administrative Cost Ceilings (Maximums): A portion of certain Medicaid, Medicare, and Marketplace premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $516.8 million and $392.4 million at June 30, 2015 and December 31, 2014, respectively, to amounts due government agencies. Approximately $458.1 million of the liability accrued at June 30, 2015 relates to our participation in Medicaid expansion programs.

In general, such amounts are subject to future changes in estimate based upon our actual cost performance and interpretations of allowable medical costs and revenue. At our Washington health plan (where we had recorded a liability of approximately $271.1 million related to the Medicaid expansion medical cost floor at June 30, 2015), premium revenue may be retroactively adjusted across the entire state Medicaid expansion program based upon the medical cost performance of the program as a whole. As such, our liability under Washington's contractual provisions is determined not just by our own medical cost performance, but by that of all health plans participating in the program; and we have limited visibility into the costs of those health plans.

In certain circumstances, the health plans may receive additional premiums if amounts spent on medical care costs exceed a defined maximum threshold; we had no receivables recorded at June 30, 2015 or December 31, 2014 that were related to such provisions.

Health Plan Profit Sharing and Profit Ceiling: Our contracts with certain states contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage, in some cases in accordance with a tiered rebate schedule. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. As a result of profits in excess of the amount we are allowed to retain, we recorded a liability of $5.4 million and $0.5 million at June 30, 2015 and December 31, 2014, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services (CMS), our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS will recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS will pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the

periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses, we have recorded a net receivable of $30.8 million and $7.6 million for anticipated Medicare risk adjustment premiums at June 30, 2015 and December 31, 2014, respectively.

Quality Incentives

At our California, Illinois, New Mexico, Ohio, South Carolina, Texas, Washington and Wisconsin health plans, revenue ranging from approximately 1% to 4% of certain health plan premiums is not earned unless specified performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of June 30, 2015 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of June 30, 2015.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(In thousands)			
Maximum available quality incentive premium - current period	$ 27,830	$ 24,300	$ 58,145	$ 44,464
Amount of quality incentive premium revenue recognized in current period:				
Earned current period	$ 11,225	$ 12,717	$ 20,776	$ 18,014
Earned prior periods	11,088	3,582	11,471	3,204
Total	$ 22,313	$ 16,299	$ 32,247	21,218
Total premium revenue recognized for state health plans with quality incentive premiums	$ 2,525,571	$ 1,708,808	$ 4,878,806	$ 3,187,069

California Health Plan Rate Settlement Agreement

In 2013, our California health plan entered into a settlement agreement with the California Department of Health Care Services (DHCS). The agreement settled rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in Medi-Cal (California's Medicaid program). Under the terms of the agreement, DHCS may be required to make a payment to us if the California health plan's pre-tax margin falls below certain levels. The maximum amount that DHCS would pay to us under the terms of the settlement agreement is $40.0 million; no amounts receivable were recorded related to this agreement at June 30, 2015 or December 31, 2014. The agreement expires effective December 31, 2017.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes, nondeductible expenses under the Affordable Care Act Health Insurer Fee (HIF), nondeductible compensation and other general and administrative expenses. The effective tax rate may be subject to fluctuations during the year, particularly as a result of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

New Accounting Standards

Revenue Recognition. On July 9, 2015, the Financial Accounting Standards Board (FASB) affirmed its proposal to defer the effective date of Accounting Standards Update (ASU) No. 2014-09, *Revenue from Contracts with Customers,* for all entities by one year. As a result, public business entities will apply the new revenue standard to annual reporting periods beginning after December 15, 2017, and for interim reporting periods within annual reporting periods beginning after December 15, 2017. We continue to evaluate whether to elect the full or modified retrospective adoption method, and the potential effects to our financial statements.

Short-Duration Contracts. In May 2015, the FASB issued ASU 2015-09, *Disclosures about Short-Duration Contracts*, which will require additional disclosure on the liability for unpaid claims and claim adjustment expenses. Effective for us in the first quarter of 2016, ASU 2015-09 is applied retrospectively to all prior periods presented in the financial statements. Early adoption is permitted; we are evaluating the potential effects of the adoption to our financial statements.

Debt Issuance Costs. In April 2015, the FASB issued ASU 2015-03, *Simplifying the Presentation of Debt Issuance Costs*, which will require debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of such debt liability, consistent with debt discounts. Effective for us in the first quarter of 2016, ASU 2015-03 is applied retrospectively to all prior periods presented in the financial statements. Early adoption is permitted; we are evaluating the potential effects of the adoption to our financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the Securities and Exchange Commission (SEC) did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(In thousands)			
Shares outstanding at the beginning of the period	48,852	46,263	48,578	45,871
Weighted-average number of shares issued:				
Common stock offering	1,365	—	687	—
Share-based compensation	25	16	203	279
Denominator for basic net income per share	50,242	46,279	49,468	46,150
Effect of dilutive securities:				
Share-based compensation	319	361	426	527
Convertible senior notes (1)	682	1,363	341	1,147
1.125% Warrants (1)	2,628	—	1,773	—
Denominator for diluted net income per share	53,871	48,003	52,008	47,824
Potentially dilutive common shares excluded from calculations (2):				
Stock options	—	—	—	45
1.125% Warrants	—	13,490	—	13,490

(1) For more information regarding the convertible senior notes, refer to Note 11, "Debt." For more information regarding the 1.125% Warrants, refer to Note 12, "Derivatives."

(2) The dilutive effect of all potentially dilutive common shares is calculated using the treasury-stock method. Certain potentially dilutive common shares issuable are not included in the computation of diluted net income per share because to do so would be anti-dilutive. For the three and six months ended June 30, 2014, the 1.125% Warrants were excluded from diluted shares outstanding because the exercise price exceeded the average market price of our common stock.

4. Business Combinations

Health Plans Segment

Florida. In December 2014, our Florida health plan acquired certain assets relating to the Medicaid business of First Coast Advantage, LLC (FCA). As part of the transaction, we assumed FCA's Medicaid contract and certain provider agreements for Region 4 of the Statewide Medicaid Managed Care Managed Medical Assistance Program in the state of Florida. The Florida health plan's membership increased by approximately 62,000 members as a result of this transaction. The final purchase price for this acquisition amounted to $44.6 million, of which $36.6 million was paid in December 2014, and $8.0 million was paid in the first quarter of 2015.

5. Share-Based Compensation

As of June 30, 2015, there are approximately 475,000 unvested restricted shares awarded to our named executive officers, with market and performance conditions, outstanding. In the event the vesting conditions are not achieved, the awards will lapse. Based on our assessment as of June 30, 2015, we expect the performance conditions relating to approximately 297,000 of such restricted share awards to be met in full. For the remaining 178,000 unvested restricted share awards, we reversed share-based compensation expense recognized from inception through March 31, 2015, or approximately $2.6 million, in the second quarter of 2015.

Charged to general and administrative expenses, total share-based compensation expense was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(In thousands)			
Restricted stock and performance awards	$ 2,654	$ 4,214	$ 7,255	$ 8,822
Employee stock purchase plan and stock options	912	646	1,986	1,634
	$ 3,566	$ 4,860	$ 9,241	$ 10,456

As of June 30, 2015, there was $34.3 million of total unrecognized compensation expense related to unvested restricted stock awards, including those with performance conditions, which we expect to recognize over a remaining weighted-average period of 1.8 years.

Restricted and performance stock activity for the six months ended June 30, 2015 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2014	1,282,072	$ 33.55
Granted	412,994	64.01
Vested	(386,634)	32.77
Forfeited	(46,634)	37.61
Unvested balance as of June 30, 2015	1,261,798	43.61

The total fair value of restricted and performance awards granted during the six months ended June 30, 2015 and 2014 was $26.8 million and $23.5 million, respectively. The total fair value of restricted awards, including those with performance and market conditions, which vested during the six months ended June 30, 2015 and 2014 was $24.4 million and $21.5 million, respectively.

6. Fair Value Measurements

We consider the carrying amounts of cash and cash equivalents and other current assets and current liabilities (not including derivatives) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs

Level 1 financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs

Level 2 financial instruments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs

Level 3 financial instruments are valued using unobservable inputs that represent management's best estimate of what market participants would use in pricing the financial instrument at the measurement date. Our Level 3 financial instruments include the following:

Derivative financial instruments. Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of June 30, 2015 included the price of our common stock, time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 12, "Derivatives," the 1.125% Call Option asset and the 1.125% Conversion Option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of income. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

Contingent consideration liability. The contingent consideration liability represents the remaining liability associated with the Medicare-Medicaid Plan (MMP) component of our South Carolina health plan acquisition in 2013, and is recorded in accounts payable and accrued liabilities. We applied a cash flow analysis to determine the fair value of this liability. The significant unobservable input is the purchase price estimate for the projected membership.

Auction rate securities. Auction rate securities are designated as available-for-sale and are reported at fair value in other assets. To estimate the fair value of these securities, we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of June 30, 2015.

Our financial instruments measured at fair value on a recurring basis at June 30, 2015, were as follows:

	Total	Level 1	Level 2	Level 3
	(In thousands)			
Corporate debt securities	$ 961,796	$ —	$ 961,796	$ —
Municipal securities	177,416	—	177,416	—
GSEs	162,413	162,413	—	—

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our convertible senior notes, which are classified as Level 2 financial instruments, are indicated in the following table. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

	June 30, 2015

	$ 1,025,951	$ 395	$ 2,037	$ 1,024,309

The contractual maturities of our investments as of June 30, 2015 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 695,555	$ 695,104
Due one year through five years	740,989	738,942
Due after five years through ten years	32,848	32,576
Due after ten years	2,500	2,365
	$ 1,471,892	$ 1,468,987

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the three and six months ended June 30, 2015 and 2014 were insignificant.

We have determined that unrealized gains and losses on our investments at June 30, 2015 and December 31, 2014, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of June 30, 2015:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in thousands)					
Corporate debt securities	$ 584,246	$ 2,253	422	$ 81,997	$ 327	41

Auction rate securities	—	—	—	4,847	253	6
	$ 539,475	$ 1,439	416	$ 47,576	$ 598	32

8. Receivables

Receivables consist primarily of amounts due from government Medicaid agencies, which may be subject to potential retroactive adjustments. Because all of our receivable amounts are readily determinable and substantially all of our creditors are governmental authorities, our allowance for doubtful accounts is immaterial.

	June 30, 2015	December 31, 2014
	(In thousands)	
California	$ 175,864	$ 310,938
Florida	16,529	2,141

	$ 631,124	$ 596,456

9. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by government authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. In connection with a Molina Medicaid Solutions segment state contract, we maintain restricted investments as collateral for a letter of credit. The following table presents the balances of restricted investments:

	June 30, 2015	December 31, 2014
	(In thousands)	
California	$ 373	$ 373
Florida	27,016	28,649

Texas	3,502	3,500
Utah	3,619	3,601
Washington	151	151
Wisconsin	954	—
Other	242	888
Total Health Plans segment	105,954	97,478
Molina Medicaid Solutions segment	5,002	5,001
	$ 110,956	$ 102,479

The contractual maturities of our held-to-maturity restricted investments as of June 30, 2015 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 100,792	$ 100,792
Due one year through five years	10,164	10,167
	$ 110,956	$ 110,959

10. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated.

	June 30, 2015	December 31, 2014
	(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 1,138,794	$ 870,429
Pharmacy payable	80,902	71,412
Capitation payable	30,673	28,150
Other	241,883	230,531
	$ 1,492,252	$ 1,200,522

"Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various government agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. Non-risk provider payables amounted to $134.2 million and $119.3 million as of June 30, 2015 and December 31, 2014, respectively.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts presented for “Components of medical care costs related to: Prior periods” represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Six Months Ended June 30, 2015	Year Ended December 31, 2014
	(Dollars in thousands)	
Medical claims and benefits payable, beginning balance	$ 1,200,522	$ 669,787
Components of medical care costs related to:		
Current period	5,703,391	8,122,885
Prior periods (1)	(138,131)	(45,979)
Total medical care costs	5,565,260	8,076,906
Change in non-risk provider payables	14,826	(31,973)
Payments for medical care costs related to:		
Current period	4,448,820	7,064,427
Prior periods	839,536	449,771
Total paid	5,288,356	7,514,198
Medical claims and benefits payable, ending balance	$ 1,492,252	$ 1,200,522
Benefit from prior period as a percentage of:		
Balance at beginning of period	11.5%	6.9%
Premium revenue, trailing twelve months	1.2%	0.5%
Medical care costs, trailing twelve months	1.4%	0.6%

(1) The benefit from prior period development of medical claims and benefits payable for the six months ended June 30, 2015 included approximately $22 million relating to programs that contain medical cost floor or corridor provisions. Accordingly, premium revenue for the six months ended June 30, 2015 was reduced by the same amount.

That portion of our total medical claims and benefits payable liability that is most subject to variability in the estimate is fee-for-service claims incurred but not paid (IBNP). IBNP represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors.

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims deviation and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate – we only know when the circumstances for any one or more factors are out of the ordinary.

The use of a consistent methodology in estimating our liability for medical claims and benefits payable minimizes the degree to which the under– or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate.

As indicated above, the amounts ultimately paid out on our medical claims and benefits payable liabilities in fiscal years 2015 and 2014 were less than what we had expected when we had established those liabilities. The differences between our original estimates and the amounts ultimately paid out (or now expected to be ultimately paid out) for the most part related to IBNP. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We believe that the most significant factors that will determine the accuracy of our IBNP estimates at June 30, 2015 are as follows:

- At our Florida health plan, Marketplace enrollment increased by 175,000 members in the first half of 2015. Because of these new members the reserves are more subject to change than usual.
- At our Illinois health plan, enrollment has increased by nearly 79,000 members during the fourth quarter of 2014 and the first half of 2015. Because of these new members the reserves are more subject to change than usual.
- At our Ohio health plan, enrollment in the MMP integrated duals program has increased by approximately 9,000 members during the first half of 2015. Because of these new members the reserves are more subject to change than usual.
- At our Washington health plan, certain delays related to the implementation of revised fee schedules resulted in a significant increase to our outpatient claims inventory in the first quarter of 2015, followed by a reduction in inventory during the second quarter of 2015. This significant change in inventory adds to the uncertainty of our unpaid claims estimates.

We recognized favorable prior period claims development in the amount of $138.1 million for the six months ended June 30, 2015. This amount represents our estimate as of June 30, 2015, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2014 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation was due primarily to the following factors:

- At our Ohio health plan, approximately 17,000 members were enrolled in the new MMP program during 2014. Since we did not have enough historical claims data to use the pattern of paid and incurred claims, we initially estimated the reserves for these new members by applying an estimated medical care ratio (MCR). This resulted in an overstatement in our reserve liability as of December 31, 2014.

- Also at our Ohio health plan, approximately 61,000 members were enrolled in the Medicaid expansion program in 2014. The reserves for such members were partially based on expected costs built into the pricing assumptions because this program was new in 2014. Our costs were ultimately less than those assumed in those pricing assumptions, resulting in an overestimation of our liability as of December 31, 2014.
- At our California health plan, more than 100,000 members were enrolled in the Medicaid expansion program in 2014. The reserves for such members were partially based on expected costs built into the pricing assumptions because this program was new in 2014. Our costs were ultimately less than those assumed in those pricing assumptions, resulting in an overestimation of our liability as of December 31, 2014.
- At our New Mexico health plan, there was a retroactive increase to the provider fee schedules implemented by the state in mid-2014. This resulted in many claims adjustments paid well after the dates of service, causing an increase in the average time between the date of service and the date of payment. This resulted in an overstatement of the reserves as of December 31, 2014.

11. Debt

As of June 30, 2015, maturities of debt for the years ending December 31 are as follows (in thousands):

	Total	2015	2016	2017	2018	2019	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
1.625% Notes (1)	301,551	—	—	—	—	—	301,551
	$ 851,551	$ —	$ —	$ —	$ —	$ —	$ 851,551

(1) The 1.625% Notes have a contractual maturity date in 2044; however, on specified dates beginning in 2018 as described below, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes, or we may redeem any or all of the 1.625% Notes.

Credit Facility. On June 12, 2015, we entered into an unsecured $250 million revolving Credit Facility which will be used to finance working capital needs, acquisitions, capital expenditures, and other general corporate activities. The Credit Facility has a term of 5 years and all amounts outstanding will be due and payable on June 12, 2020. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $350 million. As of June 30, 2015, no amounts were outstanding under the Credit Facility.

Borrowings under the Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee.

Although the Credit Facility is not secured by any of our assets, two of our wholly owned subsidiaries, Molina Medicaid Solutions and Molina Medical Management, Inc., have jointly and severally guaranteed our obligations under the Credit Facility.

The Credit Facility contains customary non-financial and financial covenants, including a minimum fixed charge coverage ratio, a maximum debt-to-EBITDA ratio and minimum statutory net worth. We are required to not exceed a maximum debt-to-EBITDA ratio of 4.00 to 1.00. At June 30, 2015, we were in compliance with all financial covenants under the Credit Facility.

1.125% Cash Convertible Senior Notes due 2020. In February 2013, we issued $550.0 million aggregate principal amount of 1.125% cash convertible senior notes (the 1.125% Notes) due January 15, 2020, unless earlier repurchased or converted. Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 at a rate of 1.125% per annum.

The 1.125% Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. The initial conversion rate for the 1.125% Notes is 24.5277 shares of our common stock per $1,000 principal amount of the 1.125% Notes. This represents an initial conversion price of approximately $40.77 per share of our common stock. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture. We may not redeem the 1.125% Notes prior to the maturity date.

Holders may convert their 1.125% Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;

- during the five business day period immediately after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;

- upon the occurrence of specified corporate events; or

- at any time on or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date.

The 1.125% Notes met the stock price trigger in the quarter ended June 30, 2015, and are convertible to cash through at least September 30, 2015. Because the 1.125% Notes may be converted into cash within 12 months, the $445.2 million carrying amount is reported in current portion of long-term debt as of June 30, 2015.

The 1.125% Notes contain an embedded cash conversion option (the 1.125% Conversion Option), which was separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the 1.125% Conversion Option transaction settles or expires. The initial fair value liability of the 1.125% Conversion Option simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). This discount is amortized to the 1.125% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate of approximately 6%. As of June 30, 2015, the 1.125% Notes have a remaining amortization period of 4.5 years. The 1.125% Notes' if-converted value exceeded their principal amount by approximately $361 million and $93 million as of June 30, 2015 and December 31, 2014, respectively.

1.625% Convertible Senior Notes due 2044. In September 2014, we issued $301.6 million aggregate principal amount of 1.625% convertible senior notes (the 1.625% Notes) due August 15, 2044, unless earlier repurchased, redeemed or converted. Interest on the 1.625% Notes is payable semiannually in arrears on February 15 and August 15, at a rate of 1.625% per annum, beginning on February 15, 2015. In addition, beginning with the semiannual interest period commencing immediately following the interest payment date on August 15, 2018, contingent interest will accrue on the 1.625% Notes during any semiannual interest period in which certain conditions or events occur, or under certain events of default. For example, additional interest of 0.25% per year will be payable on the 1.625% Notes for any semiannual interest period for which the principal amount of 1.625% Notes outstanding is less than $100 million.

The 1.625% Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.625% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The initial conversion rate for the 1.625% Notes is 17.2157 shares of our common stock per $1,000 principal amount of the 1.625% Notes. This represents an initial conversion price of approximately $58.09 per share of our common stock. Upon conversion, we will pay cash and, if applicable, deliver shares of our common stock to the converting holder in an amount per $1,000 principal amount of 1.625% Notes equal to the settlement amount (as defined in the related indenture).

Holders may convert their 1.625% Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on September 30, 2014 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;
- during the five business day period after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.625% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;
- upon the occurrence of specified corporate events;

- if we call any 1.625% Notes for redemption, at any time until the close of business on the business day immediately preceding the redemption date;
- during the period from, and including, May 15, 2018 to the close of business on the business day immediately preceding August 19, 2018; or
- at any time on or after February 15, 2044 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.625% Notes, in integral multiples of $1,000 principal amount, at the option of the holder regardless of the foregoing circumstances.

As of June 30, 2015, the 1.625% Notes were not convertible.

We may not redeem the 1.625% Notes prior to August 19, 2018. On or after August 19, 2018, we may redeem for cash all or part of the 1.625% Notes, except for the 1.625% Notes we are required to repurchase in connection with a fundamental change or on any specified repurchase date. The redemption price for the 1.625% Notes will equal 100% of the principal amount of the 1.625% Notes being redeemed, plus accrued and unpaid interest. In addition, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes for cash on August 19, 2018, August 19, 2024, August 19, 2029, August 19, 2034 and August 19, 2039, in each case, at a specified price equal to 100% of the principal amount of the 1.625% Notes to be repurchased, plus accrued and unpaid interest.

Because the 1.625% Notes have cash settlement features, we have allocated the principal amount between a liability component and an equity component. The reduced carrying value on the 1.625% Notes resulted in a debt discount that is amortized back to the 1.625% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. The expected life of the debt is approximately four years, beginning on the issuance date and ending on the first date we may redeem the notes in August 2018. As of June 30, 2015, the 1.625% Notes have a remaining amortization period of 3.1 years. This has resulted in our recognition of interest expense on the 1.625% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 5%. The outstanding 1.625% Notes' if-converted value exceeded their principal amount by approximately $58 million as of June 30, 2015, and did not exceed their principal amount as of December 31, 2014. At June 30, 2015, the equity component of the 1.625% Notes, including the impact of deferred taxes, was $22.9 million.

The principal amounts, unamortized discount (net of premium related to 1.625% Notes), and net carrying amounts of the convertible senior notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
June 30, 2015:			
1.125% Notes	$ 550,000	$ 104,761	$ 445,239
1.625% Notes	301,551	28,621	272,930
	$ 851,551	$ 133,382	$ 718,169
December 31, 2014:			
1.125% Notes	$ 550,000	$ 114,670	$ 435,330
1.625% Notes	301,551	32,784	268,767
	$ 851,551	$ 147,454	$ 704,097

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
		(In thousands)		
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate	$ 2,772	$ 3,300	$ 5,544	$ 6,600
Amortization of the discount	7,086	6,414	14,072	12,728
	$ 9,858	$ 9,714	$ 19,616	$ 19,328

Lease Financing Obligations. In 2013, we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of the Molina Center located in Long Beach, California, and our Ohio health plan office building located in Columbus, Ohio. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated over their remaining useful lives. The lease financing obligation is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Rent will increase 3% per year through the initial term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense amounted to $6.3 million and $6.2 million for the six months ended June 30, 2015 and 2014, respectively.

As described and defined in further detail in Note 16, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings. We have concluded that we are the accounting owner of the buildings due to our continuing involvement with the properties. We have recorded $37.1 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of June 30, 2015, which represents the total cost incurred by the Landlord for the construction of the buildings, net of accumulated depreciation. As of June 30, 2015 and December 31, 2014, the aggregate amount recorded to lease financing obligations, including the current portion, amounted to $40.4 million and $40.6 million, respectively. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense was $2.0 million and $1.1 million for the six months ended June 30, 2015 and 2014, respectively. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was $0.6 million and $0.4 million for the six months ended June 30, 2015 and 2014, respectively.

12. Derivatives

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

	Balance Sheet Location	June 30, 2015	December 31, 2014
		(In thousands)	
Derivative asset:			
1.125% Call Option	Current assets: Derivative asset	$ 508,504	$ —
	Non-current assets: Derivative asset	$ —	$ 329,323
Derivative liability:			
1.125% Conversion Option	Current liabilities: Derivative liability	$ 508,355	$ —
	Non-current liabilities: Derivative liability	$ —	$ 329,194

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of income, and reported in other expense, net. Gains and losses for our derivative financial instruments are presented individually in the consolidated statements of cash flows, supplemental cash flow information.

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Notes in 2013, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 6, "Fair Value Measurements."

1.125% Conversion Option. The embedded cash conversion option within the 1.125% Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion

option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Conversion Option, refer to Note 6, "Fair Value Measurements."

As of June 30, 2015, the 1.125% Call Option and the 1.125% Conversion Option were classified as a current asset and current liability, respectively, because the 1.125% Notes may be converted within 12 months of June 30, 2015, as described in Note 11, "Debt."

13. Stockholders' Equity

Stockholders' equity increased $452.7 million during the six months ended June 30, 2015 compared with stockholders' equity at December 31, 2014. The increase was due primarily to the common stock offering described below, net income of $67.1 million, and $13.2 million related to employee stock transactions.

Common Stock Offering. In June 2015, we completed an underwritten public offering of 5,750,000 shares of our common stock, including the over-allotment option, conducted pursuant to an effective shelf registration statement filed with the SEC in May 2015. Net of issuance costs, proceeds from the offering amounted to approximately $373.2 million, or $64.90 per share, resulting in an increase to additional paid-in capital. We will use the proceeds to finance working capital needs, acquisitions, capital expenditures, and other general corporate activities.

1.125% Warrants. In connection with the 1.125% Notes Call Spread Overlay transaction described in Note 12, "Derivatives," we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants. We will not receive any additional proceeds if the 1.125% Warrants are exercised.

Securities Repurchase Programs. Effective as of February 25, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This repurchase program extends through December 31, 2015.

Shelf Registration Statement. As noted above, we filed an automatic shelf registration statement on Form S-3 in May 2015 covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Plans. In connection with our equity incentive plans and employee stock purchase plan, we issued approximately 460,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the six months ended June 30, 2015.

14. Segment Information

We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our health plans and our direct delivery business. Our health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides MMIS design, development, and implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." For presentation purposes, the cost of centralized services is reported within the Health Plans segment.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(In thousands)			
Revenue, continuing operations:				
Health Plans segment:				
Premium revenue	$ 3,304,372	$ 2,167,142	$ 6,275,024	$ 4,107,479
Premium tax revenue	94,609	70,120	189,956	121,813
Health insurer fee revenue	73,890	19,662	121,838	38,358
Investment income	3,828	1,945	6,843	3,574
Other revenue	948	2,938	3,251	6,196
Molina Medicaid Solutions segment:				
Service revenue	47,243	50,232	99,101	103,862
	$ 3,524,890	$ 2,312,039	$ 6,696,013	$ 4,381,282
Income from continuing operations before income tax expense:				
Health Plans segment	$ 102,585	$ 21,986	$ 171,025	$ 36,005
Molina Medicaid Solutions segment	13,043	10,441	26,833	20,689
Operating income, continuing operations	115,628	32,427	197,858	56,694
Other expenses, net	14,914	13,984	29,780	27,762
	$ 100,714	$ 18,443	$ 168,078	$ 28,932

15. Commitments and Contingencies

Legal Proceedings. The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

State of Louisiana. On June 26, 2014, the state of Louisiana filed a Petition for Damages against Molina Medicaid Solutions, Molina Healthcare, Inc., Unisys Corporation, and Paramax Systems Corporation, a subsidiary of Unisys, in the Parish of Baton Rouge, 19th Judicial District, versus number 631612. The Petition alleges that between 1989 and 2012, the defendants utilized an incorrect reimbursement formula for the payment of pharmaceutical claims. We believe we have several meritorious defenses to the claims of the state, and any liability for the alleged claims is not currently probable or reasonably estimable.

USA and State of Florida ex rel. Charles Wilhelm. On July 24, 2014, Molina Healthcare, Inc. and Molina Healthcare of Florida, Inc. were served with a Complaint filed under seal on December 5, 2012 in District Court for the Southern District of Florida by relator, Charles C. Wilhelm, M.D., Case No. 12-24298. The Complaint alleges that in late 2008 and early 2009, in connection with the acquisition of Florida NetPass under which Molina Healthcare of Florida, Inc. began conducting business in the state of Florida, the defendants failed to adequately staff the plan and provide other services, resulting in a disproportionate number of sicker beneficiaries of Florida NetPass moving back into the Florida fee-for-service Medicaid program. This alleged conduct purportedly resulted in a violation of the federal False Claims Act. Both the United States of

America and the state of Florida have declined to intervene. We believe we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al. On or around October 14, 2014, Molina Healthcare of California, Molina Healthcare of California Partner Plan, Inc., Mobile Medical Examination Services, Inc. (MedXM), and other health plan defendants were served with a Complaint previously filed under seal in the Central District Court of California by relator, Anita Silingo, Case No. SACV13-1348-FMO(SHx). The Complaint alleges that MedXM improperly modified medical records and otherwise took inappropriate steps to increase members' risk adjustment scores, and that the defendants, including Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc., purportedly turned a "blind eye" to these unlawful practices. The Department of Justice has declined to intervene. We believe that we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

Provider Claims. Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions. Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements upon us that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $1,005 million at June 30, 2015, and $859 million at December 31, 2014. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $536.4 million and $202.6 million as of June 30, 2015 and December 31, 2014, respectively.

The National Association of Insurance Commissioners (NAIC), adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules which may vary from state to state.

As of June 30, 2015, our health plans had aggregate statutory capital and surplus of approximately $1,071 million compared with the required minimum aggregate statutory capital and surplus of approximately $589 million. All of our health plans were in compliance with the minimum capital requirements at June 30, 2015. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

16. Related Party Transactions

We have entered into a lease (the Amended Lease) with 6th & Pine Development, LLC (the Landlord) for two office buildings. The principal members of the Landlord are John C. Molina, our chief financial officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, John C. Molina has pledged shares of common stock in the Company that he holds. Dr. J. Mario Molina, our chief executive officer, president and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary.

The Amended Lease provides for an annual rent escalator of 3.4% per year, and will expire on December 31, 2029, unless extended or earlier terminated. For information regarding the lease financing obligation, refer to Note 11, "Debt."

Refer to Note 17, "Variable Interest Entities," for a discussion of the Joseph M. Molina, M.D. Professional Corporations.

17. Variable Interest Entities

Joseph M. Molina M.D., Professional Corporations

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's primary shareholder is Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides primary care medical services through its employed physicians and other medical professionals. Beginning in the fourth quarter of 2014, JMMPC also provided certain specialty referral services to our California health plan members through a contracted provider network. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, Molina Medical Management, Inc. (MMM), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will operate at break even, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by MMM are reviewed annually to assure the achievement of this goal.

Separately, our California, Florida, New Mexico, Utah and Washington health plans have entered into primary care services agreements with JMMPC. These agreements direct our health plans to perform a monthly reconciliation, to either fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, such that JMMPC will derive no profit or loss. Because the MMM services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are generally insignificant.

We have determined that JMMPC is a variable interest entity (VIE), and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of June 30, 2015, JMMPC had total assets of $14.2 million, and total liabilities of $14.1 million. As of December 31, 2014, JMMPC had total assets of $31.1 million, and total liabilities of $30.8 million.

Our maximum exposure to loss as a result of our involvement with JMMPC is generally limited to the amounts needed to fund JMMPC's ongoing payroll, employee benefits and medical care costs associated with JMMPC's specialty referral activities. We believe that such loss exposures will be immaterial to our consolidated operating results and cash flows for the foreseeable future.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated. Those known risks and uncertainties include, but are not limited to, the following:

- uncertainties associated with the implementation of the Affordable Care Act, including the full grossed up reimbursement by states of the non-deductible ACA health insurer fee, the Medicaid expansion, the insurance marketplaces, the effect of various implementing regulations, and uncertainties regarding the Medicare-Medicaid dual eligible demonstration programs in California, Illinois, Michigan, Ohio, South Carolina, and Texas;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations, and our ability to reduce over time the high medical costs commonly associated with new patient populations;
- federal or state medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures, including 2014 and 2015 at-risk premium rules in the state of Texas;
- cyber-attacks or other privacy or data security incidents resulting in an inadvertent unauthorized disclosure of protected health information;
- the success of our new health plan in Puerto Rico, including the successful resolution of the Puerto Rico debt crisis and the payment of all amounts due under our Medicaid contract;
- newly FDA-approved specialty drugs such as Sovaldi, Olysio, Harvoni, and other specialty drugs or generic drugs that are exorbitantly priced but not factored into the calculation of our capitated rates;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria, including the resolution of the Illinois budget impasse and continued payment of our Illinois health plan;
- the accurate estimation of incurred but not paid medical costs across our health plans;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates or retroactive premium rate increases;
- efforts by states to recoup previously paid amounts;
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, including the pending Medicaid RFP in Michigan;
- the continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- complications, member confusion, or enrollment backlogs related to the annual renewal of Medicaid coverage;
- government audits and reviews, and any fine, enrollment freeze, or monitoring program that may result therefrom;
- changes with respect to our provider contracts and the loss of providers;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable or unfavorable resolution of litigation, arbitration, or administrative proceedings, including pending qui tam actions in California and Florida, and the litigation commenced against us by the state of Louisiana alleging that Molina Medicaid Solutions and its predecessors used an incorrect reimbursement formula for the payment of pharmaceutical claims;
- the relatively small number of states in which we operate health plans;

- our management of a portion of College Health Enterprises' hospital in Long Beach, California;
- the availability of adequate financing on acceptable terms to fund and capitalize our expansion and growth, repay our outstanding indebtedness at maturity and meet our liquidity needs, including the interest expense and other costs associated with such financing;
- the failure of a state in which we operate to renew its federal Medicaid waiver;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- public alarm associated with newly emergent viruses or widespread epidemics;
- changes in general economic conditions, including unemployment rates; and
- increasing competition and consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014 and Part II, Item 1A of this Quarterly Report on Form 10-Q, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2014.

Company Overview

Molina Healthcare, Inc. provides quality health care to those receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states and the Commonwealth of Puerto Rico, and includes our direct delivery business. As of June 30, 2015, these health plans served 3.4 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve Health Insurance Marketplace (Marketplace) members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in several states in which we operate, as well as the management of a hospital in southern California under a management services agreement.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

The following discussion and analysis, with the exception of cash flow information, is presented in the context of continuing operations unless otherwise noted.

Overview of Financial Results, Continuing Operations

Financial results for the second quarter of 2015 improved significantly over the same quarter of 2014 due to higher revenue, greater medical and administrative cost efficiency, and more complete state reimbursement of the Affordable Care Act Health Insurer Fee (HIF).

Income from continuing operations, before tax expense, increased to $101 million in the second quarter of 2015, from $18 million in the second quarter of 2014, and $67 million in the first quarter of this year.

Premium revenue increased approximately 52% in the second quarter of 2015 compared with the second quarter of 2014 due to increased Medicaid expansion and Marketplace enrollment, growth in our Illinois health plan, and the recent start-up of our Puerto Rico health plan.

Medical care costs as a percent of premium revenue (the "medical care ratio") decreased to 88.7% in the second quarter of 2015, from 89.3% in the second quarter of 2014, and were unchanged from the first quarter of this year.

General and administrative expenses as a percentage of total revenue (the "general and administrative expense ratio") decreased to 8.1% in the second quarter of 2015, from 8.4% in the second quarter of 2014, and were unchanged from the first quarter of this year.

Financing Activities

In June 2015, we issued 5.75 million shares of common stock, raising $373 million, after offering costs. Additionally in June 2015, we entered into a $250 million revolving credit facility. Both of these actions will finance working capital needs, acquisitions, capital expenditures, and other general corporate activities.

Health Care Reform

Government-sponsored initiatives, including the Affordable Care Act (ACA), will remain the primary focus of our business. Three of those government-sponsored initiatives that have a significant impact on our current operations are as follows:

- *Medicaid Expansion*. In the states that have elected to participate, the ACA provides for the expansion of the Medicaid program to offer eligibility to nearly all low-income people under age 65 with incomes at or below 138% of the federal poverty line. Medicaid expansion membership phased in beginning January 1, 2014. Our health plans in California, Illinois, Michigan, New Mexico, Ohio, and Washington participate in Medicaid expansion. At June 30, 2015, our membership included approximately 475,000 Medicaid expansion members, or 14% of total membership.
- *Marketplace*. The ACA authorized the creation of Marketplace health insurance exchanges, allowing individuals and small groups to purchase health insurance that is federally subsidized, effective January 1, 2014. We participate in the Marketplace in all of the states in which we operate, except Illinois, Puerto Rico and South Carolina. At June 30, 2015, our membership included approximately 261,000 Marketplace members, with approximately 176,000, or 67%, of those members in Florida.

- *Medicare-Medicaid Plans*. To coordinate care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to deliver services to the dual eligible in a more financially efficient manner, 15 states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual-eligible individuals. The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). Our MMPs in California, Illinois, and Ohio offered coverage beginning in 2014; our MMPs in South Carolina and Texas offered coverage beginning in the first quarter of 2015; and our MMPs in Michigan offered coverage beginning in the second quarter of 2015. At June 30, 2015, our membership included approximately 39,000 integrated MMP members.

Health Insurer Fee Update

We continue to make progress in securing full reimbursement for the Medicaid portion of our expense under the HIF.

During the second quarter of 2015, we recognized as revenue the entire HIF reimbursement due from California for the period January 1, 2014 through June 30, 2015. We recognized approximately $12 million ($0.14 per diluted share) related to 2014; and approximately $17 million ($0.20 per diluted share) related to the first half of 2015. After allowing for HIF revenue not recognized for Michigan and Utah (approximately $8 million, or $0.10 per diluted share, for each of the first and second quarters), the net impact of HIF reimbursement was $12 million ($0.14 per diluted share) favorable for the second quarter and $5 million ($0.06 per diluted share) unfavorable for the six months ended June 30.

The comparable amount of HIF reimbursement not recognized in the second quarter of 2014 was approximately $15 million ($0.20 per diluted share) for the second quarter and approximately $32 million ($0.42 per diluted share) for the six months ended June 30.

For further discussion of the risks and uncertainties relating to the HIF, refer to the subheading below, "Liquidity and Capital Resources—Financial Condition."

Market Updates - Health Plans Segment

Florida. On July 14, 2015, we announced that our Florida health plan entered into an agreement with Preferred Medical Plan, Inc. Under this agreement, we will assume Preferred's Medicaid contract in Miami-Dade and Monroe counties, as well as acquire certain assets related to the operation of its Medicaid business. Preferred currently serves approximately 25,000 Medicaid members. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the third quarter of 2015.

As of second quarter of 2015, our Florida health plan served 176,000 Marketplace members, more than double its total membership as of December 31, 2014.

Illinois. On July 15, 2015, we announced that our Illinois health plan entered into an agreement with Accountable Care Chicago, LLC, also known as MyCare Chicago. Under this agreement, we will receive the right to assume MyCare Chicago's Medicaid members in Cook County, as well as acquire certain assets related to the operation of the Medicaid business. MyCare Chicago currently serves approximately 61,000 Medicaid members. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the fourth quarter of 2015.

Michigan. On May 15, 2015, we announced that our Michigan health plan entered into an agreement with HealthPlus of Michigan and its subsidiary, HealthPlus Partners, Inc. (collectively, HealthPlus). Under this agreement, we will assume HealthPlus Partners' Medicaid contract and HealthPlus of Michigan's MIChild contract, as well as certain provider agreements. HealthPlus currently serves approximately 90,000 Medicaid and 6,000 MIChild members. Subject to regulatory approvals and the satisfaction of other closing conditions, we expect the transaction to close during the third quarter of 2015.

Puerto Rico. Effective April 1, 2015, our Puerto Rico health plan served its first members. As of June 30, 2015, our Puerto Rico plan enrollment amounted to approximately 361,000 members.

Market Updates - Molina Medicaid Solutions Segment

New Jersey. On April 9, 2015, the state of New Jersey announced its selection of Molina Medicaid Solutions to design and operate its new Medicaid management information system (MMIS). The new contract is effective May 1, 2015, and has a term of 10 years with three one-year renewal options. Molina Medicaid Solutions was the state's previous MMIS provider, and was awarded the new contract as a result of Molina Medicaid Solutions' submission in response to the state of New Jersey's request for proposals.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from our health plans' Medicaid contracts and, to a lesser degree, from Medicare contracts entered into with the Centers for Medicare and Medicaid Services (CMS), a federal government agency.

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new RFP open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled; and regions or service areas. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

Premium revenue is fixed in advance of the periods covered and is not generally subject to significant accounting estimates, except as described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 2, "Significant Accounting Policies." These premium revenues are recognized in the month that members are entitled to receive health care services. Premiums received in advance are deferred.

The amount of the premiums paid to us may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program, on a PMPM basis for the six months ended June 30, 2015. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	PMPM Premiums		
	Low	High	Consolidated
Temporary Assistance for Needy Families (TANF), CHIP (1)	$ 110.00	$ 300.00	$ 180.00
Medicaid Expansion	320.00	500.00	410.00
Aged, Blind or Disabled (ABD)	460.00	1,530.00	940.00
Marketplace	220.00	420.00	260.00
Medicare Special Needs Plans (Medicare)	870.00	1,100.00	1,040.00
Medicare-Medicaid Plan (MMP) – Integrated (2)	1,180.00	3,150.00	1,990.00

(1) CHIP stands for Children's Health Insurance Program.
(2) MMP members for whom we provide both Medicaid and Medicare coverage. We began serving members under this program in the second quarter of 2014.

The following tables set forth our Health Plans segment membership as of the dates indicated:

	June 30, 2015	March 31, 2015	December 31, 2014	June 30, 2014
Ending Membership by Health Plan:				
California	593,000	574,000	531,000	455,000
Florida	348,000	352,000	164,000	58,000
Illinois	101,000	102,000	100,000	6,000
Michigan	260,000	256,000	242,000	244,000
New Mexico	225,000	222,000	212,000	195,000
Ohio	332,000	350,000	347,000	302,000
Puerto Rico (1)	361,000	—	—	—
South Carolina	114,000	111,000	118,000	119,000
Texas	266,000	268,000	245,000	247,000
Utah	92,000	90,000	83,000	83,000
Washington	553,000	533,000	497,000	461,000
Wisconsin	107,000	107,000	84,000	85,000
	3,352,000	2,965,000	2,623,000	2,255,000
Ending Membership by Program:				
TANF/CHIP	2,180,000	1,825,000	1,809,000	1,642,000
Medicaid Expansion (2)	475,000	437,000	385,000	232,000
ABD	353,000	358,000	347,000	314,000
Marketplace (2)	261,000	266,000	15,000	18,000
Medicare	44,000	45,000	49,000	44,000
MMP–Integrated	39,000	34,000	18,000	5,000
	3,352,000	2,965,000	2,623,000	2,255,000

(1) The Puerto Rico health plan began serving members effective April 1, 2015.
(2) Medicaid expansion membership phased in, and the Marketplace became available for consumers to access coverage, beginning January 1, 2014.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of an MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the contract term during which BPO, hosting, and support and maintenance services are delivered. Our contracts may contain contingencies that require us to delay recognition of all or part of our service revenue until such contingencies have been removed.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services (including long-term services and supports, or LTSS), general and administrative expenses, premium tax and health insurer fee expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following categories:

- *Fee-for-service expenses:* Under fee-for-service arrangements, we retain the financial responsibility for medical care provided and incur costs based on actual utilization of services. Such expenses are recorded in the period in which the related services are dispensed. Nearly all hospital services and the majority of our primary care and physician specialist services are paid on a fee-for-service basis.

- *Pharmacy expenses:* All drug, injectables, and immunization costs paid through our pharmacy benefit manager are classified as pharmacy expenses.

- *Capitation expenses:* Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.

- *Direct delivery expenses:* All costs associated with our direct delivery of medical care are separately identified.

- *Other medical expenses:* All medically related administrative costs, certain provider incentive costs, reinsurance costs and other health care expenses are classified as other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements in Note 10, "Medical Claims and Benefits Payable," for further information on how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide BPO and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs. In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the contract term, consistent with the revenue recognition period.

Financial Performance Summary, Continuing Operations

The following table briefly summarizes our financial and operating performance from continuing operations for the three months and six months ended June 30, 2015 and 2014 (in thousands, except per-share data and percentages):

	Three Months Ended June 30,			Six Months Ended June 30,		
	2015	2014	% Change	2015	2014	% Change
Revenue:						
Premium revenue	$ 3,304,372	$ 2,167,142	52.5 %	$ 6,275,024	$ 4,107,479	52.8 %
Service revenue	47,243	50,232	(6.0)	99,101	103,862	(4.6)
Premium tax revenue	94,609	70,120	34.9	189,956	121,813	55.9
Health insurer fee revenue	73,890	19,662	275.8	121,838	38,358	217.6
Investment income	3,828	1,945	96.8	6,843	3,574	91.5
Other revenue	948	2,938	(67.7)	3,251	6,196	(47.5)
Total revenue	3,524,890	2,312,039	52.5	6,696,013	4,381,282	52.8
Operating expenses:						
Medical care costs	2,929,534	1,934,299	51.5	5,565,318	3,655,957	52.2
Cost of service revenue	32,819	37,107	(11.6)	68,721	77,764	(11.6)
General and administrative expenses	286,496	193,239	48.3	542,586	381,326	42.3
Premium tax expenses	94,609	70,120	34.9	189,956	121,813	55.9
Health insurer fee expenses	40,652	21,945	85.2	81,430	44,135	84.5
Depreciation and amortization	25,152	22,902	9.8	50,144	43,593	15.0
Total operating expenses	3,409,262	2,279,612	49.6	6,498,155	4,324,588	50.3
Operating income	115,628	32,427	256.6	197,858	56,694	249.0
Other expenses, net:						
Interest expense	14,946	13,993	6.8	29,822	27,815	7.2
Other income, net	(32)	(9)	255.6	(42)	(53)	(20.8)
Total other expenses, net	14,914	13,984	6.7	29,780	27,762	7.3
Income from continuing operations before income tax expense	100,714	18,443	446.1	168,078	28,932	480.9
Income tax expense	61,783	10,702	477.3	101,006	16,357	517.5
Income from continuing operations	$ 38,931	$ 7,741	402.9 %	$ 67,072	$ 12,575	433.4 %
Diluted net income per share, continuing operations	$ 0.72	$ 0.16	350.0 %	$ 1.29	$ 0.26	396.2 %
Diluted weighted average shares outstanding	53,871	48,003	12.2 %	52,008	47,824	8.7 %
Non-GAAP Measures:						
Adjusted net income per share, continuing operations	$ 0.86	$ 0.32	168.8 %	$ 1.57	$ 0.58	170.7 %
EBITDA	$ 144,376	$ 60,856	137.2 %	$ 255,755	$ 110,327	131.8 %
Operating Statistics:						
Medical care ratio (1)	88.7%	89.3%		88.7%	89.0%	
Service revenue ratio (2)	69.5%	73.9%		69.3%	74.9%	
General and administrative expense ratio (3)	8.1%	8.4%		8.1%	8.7%	
Premium tax ratio (1)	2.8%	3.1%		2.9%	2.9%	
Effective tax rate	61.3%	58.0%		60.1%	56.5%	
Net profit margin, continuing operations (3)	1.1%	0.3%		1.0%	0.3%	

(1) Medical care ratio represents medical care costs as a percentage of premium revenue; premium tax ratio represents premium tax expenses as a percentage of premium revenue plus premium tax revenue.
(2) Service revenue ratio represents cost of service revenue as a percentage of service revenue.
(3) Computed as a percentage of total revenue.

Non-GAAP Financial Measures

We use the following non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance and the performance of other companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not substitutes for or superior to, GAAP measures (GAAP stands for U.S. generally accepted accounting principles).

The first of these non-GAAP measures is earnings before interest, taxes, depreciation and amortization, or EBITDA. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to EBITDA.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(In thousands)			
Net income	$ 38,943	$ 7,811	$ 67,096	$ 12,309
Adjustments:				
Depreciation, and amortization of intangible assets and capitalized software	28,688	28,292	57,798	54,206
Interest expense	14,946	13,993	29,822	27,815
Income tax expense	61,799	10,760	101,039	15,997
EBITDA	$ 144,376	$ 60,856	$ 255,755	$ 110,327

The second of these non-GAAP measures is adjusted net income and adjusted net income per diluted share, continuing operations. The following table reconciles net income and net income per diluted share from continuing operations, which we believe to be the most comparable GAAP measures, to adjusted net income and adjusted net income per diluted share, continuing operations.

	Three Months Ended June 30,				Six Months Ended June 30,			
	2015		2014		2015		2014	
	(In thousands, except per diluted share amounts)							
Net income, continuing operations	$ 38,931	$ 0.72	$ 7,741	$ 0.16	$ 67,072	$ 1.29	$ 12,575	0.26
Adjustments, net of tax:								
Amortization of convertible senior notes and lease financing obligations	4,659	0.09	4,272	0.09	9,252	0.18	8,477	0.18
Amortization of intangible assets	2,671	0.05	3,209	0.07	5,548	0.10	6,538	0.14
Adjusted net income, continuing operations (1)	$ 46,261	$ 0.86	$ 15,222	$ 0.32	$ 81,872	$ 1.57	$ 27,590	$ 0.58

(1) Beginning in the first quarter of 2015, we have revised the calculation of adjusted net income, continuing operations. We no longer subtract "depreciation, and amortization of capitalized software" and "share-based compensation" from net income, continuing operations to arrive at adjusted net income, continuing operations. We have made this change to better reflect the way in which we evaluate our financial performance, make financing and business decisions, and forecast and plan for future periods. All periods presented below conform to this presentation.

Results of Operations, Continuing Operations

Three Months Ended June 30, 2015 Compared with Three Months Ended June 30, 2014

Health Plans Segment

Premium Revenue

Premium revenue increased approximately 52% in the second quarter of 2015 compared with the second quarter of 2014 due to increased Medicaid expansion and Marketplace enrollment, growth in our Illinois health plan, and the recent start-up of our Puerto Rico health plan.

Medical Care Costs

In the second quarter of 2015, medical care costs as a percent of premium revenue decreased to 88.7% in the second quarter of 2015 from 89.3% in the second quarter of 2014. Medical margin increased 61% in the second quarter of 2015 over the second quarter of 2014.

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended June 30,					
	2015			2014		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 2,102,776	$ 209.34	71.8%	$ 1,378,037	$ 205.08	71.2%
Pharmacy	391,899	39.01	13.3	295,596	43.99	15.3
Capitation	248,357	24.72	8.5	176,817	26.31	9.1
Direct delivery	27,885	2.78	1.0	23,063	3.43	1.2
Other	158,617	15.80	5.4	60,786	9.06	3.2
Total	$ 2,929,534	$ 291.65	100.0%	$ 1,934,299	$ 287.87	100.0%

The following table provides detailed fee-for-service medical claims data for the periods presented (dollars in thousands, except per-member amounts):

	Three Months Ended June 30,	
	2015	2014
Days in claims payable, fee for service	49	46
Number of claims in inventory at end of period	463,200	180,600
Billed charges of claims in inventory at end of period	$ 904,800	$ 400,000
Claims in inventory per member at end of period	0.14	0.08
Billed charges of claims in inventory per member at end of period	$ 269.93	$ 177.38
Number of claims received during the period	10,043,400	6,655,300
Billed charges of claims received during the period	$ 11,613,100	$ 7,255,000

Individual Health Plan Analysis

California. Premium revenue grew 26.5% in the second quarter of 2015 compared with the second quarter of 2014, the result of higher Medicaid expansion membership (up 69,000 members) and TANF and ABD membership (up 51,000 members); as well as the start-up of an MMP plan in the second quarter of 2014 (15,000 members at June 30, 2015). Overall, enrollment on a member-month basis increased 31% in the second quarter of 2015 compared with the second quarter of 2014. The medical care ratio increased to 91.1% in the second quarter of 2015, from 81.6% in the second quarter of 2014, as a lower medical care ratio for the ABD program was more than offset by higher medical care ratios for other programs.

Florida. The Florida health plan added approximately 175,000 Marketplace members in the first half of 2015. As a result, premium revenue increased significantly, and medical margin improved $31.9 million in the second quarter of 2015 compared with the second quarter of 2014. The medical care ratio decreased to 84.3% from 91.6% in the second quarter of 2014, due to the lower medical care ratio of the Marketplace membership more than offsetting an increased medical care ratio for the Medicaid program.

Illinois. Premium revenue grew to $101.8 million in the second quarter of 2015, from $19.3 million in the second quarter of 2014. The plan experienced significant growth in late 2014, primarily within the traditional TANF program, and to a lesser degree within the Medicaid expansion program. Additionally, the plan served its first MMP members in the first half of 2014. The medical care ratio for the Illinois health plan decreased to 96.6% in the second quarter of 2015, from 106.3% in the second quarter of 2014. The plan's higher medical care ratio in 2014 was primarily the result of a small membership base transitioning to managed care, and increased medically related administrative costs incurred in preparation of anticipated enrollment growth in late 2014.

Michigan. Premium revenue grew $52.2 million, or 28%, in the second quarter of 2015 compared with the second quarter of 2014 due to the addition of Medicaid expansion members beginning in the second quarter of 2014. Medicaid expansion enrollment reached 53,000 members by June 30, 2015. The consolidated medical care ratio decreased to 84.2% in the second quarter of 2015, from 88.2% for the second quarter of 2014, due to growth of the Medicaid expansion program which has a lower medical care ratio than the plan's traditional Medicaid business.

New Mexico. Premium revenue grew $53.8 million, or 20%, in the second quarter of 2015 compared with the second quarter of 2014, due to substantial increases in membership in all Medicaid programs. The medical care ratio decreased to 85.8% in the second quarter of 2015, from 89.6% in the second quarter of 2014, due to lower medical care ratios for the TANF and ABD programs, which more than offset an increase in the medical care ratio for the Medicaid expansion program.

Ohio. Premium revenue grew $179.8 million, or 55%, in the second quarter of 2015 compared with the second quarter of 2014, due to growth in membership within the Medicaid expansion, MMP, and ABD programs. The medical care ratio increased to 85.0% in the second quarter of 2015, from 84.2% in the second quarter of 2014, primarily due to medical costs associated with the plan's higher-acuity MMP members.

Puerto Rico. The medical care ratio was 95.0% in the second quarter of 2015. The plan served its first members effective April 1, 2015.

South Carolina. The medical care ratio decreased to 71.3% in the second quarter of 2015, from 87.8% in the second quarter of 2014. In the first quarter of 2014, the plan enrolled its first members who were transitioned from Medicaid fee-for-service to managed care. We believe that medical care ratios below 80% are not sustainable over time.

Texas. Premium revenue grew $191.4 million, or 60%, in the second quarter of 2015 compared with the second quarter of 2014, primarily due to the addition of ABD members receiving nursing facility benefits effective March 1, 2015 and the start-up of the Texas MMP program on that same date. The medical care ratio for the Texas health plan decreased to 91.5% in the second quarter of 2015, from 92.8% in the second quarter of 2014. For a discussion of the plan's quality related revenue, refer to *Individual Health Plan Analysis* under "Six Months Ended June 30, 2015 Compared with Six Months Ended June 30, 2014," below.

Utah. The medical care ratio decreased to 89.7% in the second quarter of 2015, from 95.5% in the second quarter of 2014, due to improvement in the Medicare medical care ratio and the addition of Marketplace membership which has a lower medical care ratio than the plan's traditional Medicaid business.

Washington. Premium revenue grew $72.8 million, or 22%, in the second quarter of 2015 compared with the second quarter of 2014, primarily due to growth in Medicaid expansion membership. The medical care ratio was consistent at 90.4% in the second quarter of 2015, compared with 90.5% in the second quarter of 2014.

Wisconsin. Premium revenue grew $37.6 million, or 102%, in the second quarter of 2015 when compared with the second quarter of 2014 as a result of increased Marketplace enrollment. The medical care ratio decreased to 75.3% in the second quarter of 2015, from 89.8% in the second quarter of 2014. We believe that medical care ratios below 80% are not sustainable over time.

Operating Data

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan and program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended June 30, 2015						
	Member Months[1]	Premium Revenue		Medical Care Costs		MCR[2]	Medical Margin
		Total	PMPM	Total	PMPM		
California	1,767	$ 503,739	$ 285.14	$ 459,045	$ 259.85	91.1%	$ 44,694
Florida	1,053	257,317	244.35	216,906	205.97	84.3	40,411

(1) Three months ended June 30, 2014 data not presented due to lack of comparability.
(2) A member month is defined as the aggregate of each month's ending membership for the period presented.
(3) "MCR" represents medical costs as a percentage of premium revenue.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended June 30,	
	2015	2014
	(In thousands)	
Service revenue before amortization	$ 47,626	$ 50,960
Amortization recorded as reduction of service revenue	(383)	(728)
Service revenue	47,243	50,232
Cost of service revenue	32,819	37,107
General and administrative costs	1,212	1,891
Amortization of customer relationship intangibles	169	793
Operating income	$ 13,043	$ 10,441

Operating income for our Molina Medicaid Solutions segment increased $2.6 million in the second quarter of 2015, compared with the second quarter of 2014, primarily the result of a renegotiated state contract, various operational efficiencies, and decreased intangibles amortization.

Results of Operations, Continuing Operations

Six Months Ended June 30, 2015 Compared with Six Months Ended June 30, 2014

Health Plans Segment

Premium Revenue

Premium revenue increased approximately 53% in the six months ended June 30, 2015 compared with the six months ended June 30, 2014, as a result of enrollment growth across all health plan programs.

Medical Care Costs

In the six months ended June 30, 2015, medical care costs as a percent of premium revenue decreased slightly to 88.7% from 89.0% during the six months ended June 30, 2014. Medical margin increased 57% in six months ended June 30, 2015 over the six months ended June 30, 2014.

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Six Months Ended June 30,					
	2015			2014		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 4,051,081	$ 217.05	72.8%	$ 2,559,098	$ 194.38	70.0%
Pharmacy	743,097	39.81	13.4	582,224	44.22	15.9
Capitation	464,682	24.90	8.3	346,256	26.30	9.5
Direct delivery	54,656	2.93	1.0	45,084	3.42	1.2
Other	251,802	13.49	4.5	123,295	9.37	3.4
Total	$ 5,565,318	$ 298.18	100.0%	$ 3,655,957	$ 277.69	100.0%

The following table provides detailed fee-for-service medical claims data for the periods presented (dollars in thousands, except per-member amounts):

	Six Months Ended June 30,	
	2015	2014
Days in claims payable, fee for service	49	46
Number of claims in inventory at end of period	463,200	180,600
Billed charges of claims in inventory at end of period	$ 904,800	$ 400,000
Claims in inventory per member at end of period	0.14	0.08
Billed charges of claims in inventory per member at end of period	$ 269.93	$ 177.38
Number of claims received during the period	18,679,000	12,641,300
Billed charges of claims received during the period	$ 21,505,000	$ 13,609,000

Individual Health Plan Analysis

California. Premium revenue grew 50.1% in the six months ended June 30, 2015 compared with the six months ended June 30, 2014, the result of higher membership, as described above. Overall, enrollment on a member-month basis increased 37% in the six months ended June 30, 2015 compared with the six months ended June 30, 2014. Increased premium revenue was also driven by a 13% increase in premium revenue PMPM, which was the result of the higher relative premium revenue PMPM among those programs experiencing enrollment growth (Medicaid expansion and MMP); and the addition of long-term care benefits to some of the health plan's ABD membership. The medical care ratio increased to 89.9% in the six months ended June 30, 2015, from 83.2% in the six months ended June 30, 2014 due to higher medical care ratios for all programs.

Florida. The health plan's premium revenue increased significantly, and medical margin improved $49.7 million in the six months ended June 30, 2015 compared with the six months ended June 30, 2014, due to the increase in Marketplace membership described above. The medical care ratio decreased to 87.7% from 90.2% in the six months ended June 30, 2014, due to the lower medical care ratio of the Marketplace membership more than offsetting an increase in the medical care ratio for the Medicaid program.

Illinois. Premium revenue grew to $205.9 million in the six months ended June 30, 2015, from $34.4 million in the six months ended June 30, 2014, due to significant membership growth in late 2014, as described above. The medical care ratio for the

Illinois health plan decreased to 91.2% in the six months ended June 30, 2015, from 101.5% in the six months ended June 30, 2014. The plan's higher medical care ratio in 2014 was primarily the result of a small membership base transitioning to managed care, and increased medically related administrative costs incurred in preparation of anticipated enrollment growth in late 2014.

Michigan. Premium revenue grew $98.2 million, or 27%, in the six months ended June 30, 2015 compared with the six months ended June 30, 2014 due to the addition of Medicaid expansion members starting in the second quarter of 2014, as described above. Higher medical care ratios for both the TANF and ABD programs offset a lower medical care ratio for the Medicaid expansion program, resulting in an increased medical care ratio of 84.2% for the six months ended June 30, 2015, compared with 83.2% for the six months ended June 30, 2014.

New Mexico. Premium revenue grew $142.4 million, or 29%, in the six months ended June 30, 2015 compared with the six months ended June 30, 2014, due to substantial increases in membership in all Medicaid programs. The medical care ratio increased to 89.4% in the six months ended June 30, 2015, from 88.5% in the six months ended June 30, 2014, as increases in the medical care ratios of the TANF more than offset lower medical care ratios for the Medicaid expansion and ABD programs.

Ohio. Premium revenue grew $416.6 million, or 69%, in the six months ended June 30, 2015 compared with the six months ended June 30, 2014, due to growth in membership within the Medicaid expansion, MMP, and ABD programs. The medical care ratio of the Ohio health plan decreased to 82.6% in the six months ended June 30, 2015, from 84.7% in the six months ended June 30, 2014, due to lower medical care ratios in all Medicaid programs.

Puerto Rico. The plan began serving members on April 1, 2015; therefore its medical care ratio of 95.0% was the same for the six months ended June 30, 2015, as the second quarter of 2015.

South Carolina. The medical care ratio decreased to 76.2% in the six months ended June 30, 2015, from 90.9% in the six months ended June 30, 2014. In the first quarter of 2014, the plan enrolled its first members who were transitioned from Medicaid fee-for-service to managed care. We believe that medical care ratios below 80% are not sustainable over time.

Texas. Premium revenue grew $253.1 million, or 39%, in the six months ended June 30, 2015 compared with the six months ended June 30, 2014, primarily due to the addition of ABD members receiving nursing facility benefits effective March 1, 2015, and the start-up of the Texas MMP program on that same date. The medical care ratio decreased slightly to 91.7% in the six months ended June 30, 2015, from 92.2% in the six months ended June 30, 2014.

As previously disclosed, we have deferred recognition of that portion of our quality related revenue in Texas that is based upon measures for which we do not have historical information, clear definitions, and clarity around minimum standards. Such revenue is estimated to be approximately $20 million for all of 2014, and $12 million for the first half of 2015. We have not recognized any of this revenue through June 30, 2015.

Utah. The medical care ratio increased to 92.8% in the six months ended June 30, 2015, from 90.4% in the six months ended June 30, 2014, as a higher medical care ratio for members served under the TANF and ABD programs more than offset a lower medical care ratio in the Medicare program.

Washington. Premium revenue grew $125.7 million, or 19%, in the six months ended June 30, 2015 when compared with the six months ended June 30, 2014, primarily due to growth in Medicaid expansion membership. The medical care ratio increased to 91.9% in the six months ended June 30, 2015, from 91.3% in the six months ended June 30, 2014, as a higher medical care ratio for members served under the TANF program more than offset a lower medical care ratio in the ABD program.

Wisconsin. Premium revenue grew $59.4 million, or 79%, in the six months ended June 30, 2015 compared with the six months ended June 30, 2014 as a result of increased Marketplace enrollment. The medical care ratio of the Wisconsin health plan decreased to 77.7% in the six months ended June 30, 2015, from 82.1% in the six months ended June 30, 2014. We believe that medical care ratios below 80% are not sustainable over time.

Operating Data

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan and program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Six Months Ended June 30, 2015

MMP	213	422,806	1,986.04	413,474	1,942.20	97.8	9,332
	18,664	$ 6,275,024	$ 336.21	$ 5,565,318	$ 298.18	88.7%	$ 709,706

(1) Six months ended June 30, 2014 data not presented due to lack of comparability.
(2) A member month is defined as the aggregate of each month's ending membership for the period presented.
(3) "MCR" represents medical costs as a percentage of premium revenue.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Six Months Ended June 30,	
	2015	2014
	(In thousands)	
Service revenue before amortization	$ 100,162	$ 105,319
Amortization recorded as reduction of service revenue	(1,061)	(1,457)
Service revenue	99,101	103,862
Cost of service revenue	68,721	77,764
General and administrative costs	3,208	3,641
Amortization of customer relationship intangibles	339	1,768
Operating income	$ 26,833	$ 20,689

Operating income for our Molina Medicaid Solutions segment increased $6.1 million in the six months ended June 30, 2015, compared with the six months ended June 30, 2014, primarily the result of a renegotiated state contract, various operational efficiencies, and decreased intangible amortization.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses as a percentage of total revenue (the "general and administrative expense ratio") decreased to 8.1% in the second quarter of 2015 compared with 8.4% in the second quarter of 2014. The general and administrative expense ratio decreased to 8.1% for the six months ended June 30, 2015, compared with 8.7% for the six months ended June 30, 2014. For both periods, the decline in this ratio was primarily the result of improved leverage of fixed administrative expenses over higher total revenue.

Premium Tax Expense

The premium tax ratio (premium tax expense as a percentage of premium revenue plus premium tax revenue) was 2.8% in the second quarter of 2015 compared with 3.1% in the second quarter of 2014, and 2.9% in both the six months ended June 30, 2015 and the six months ended June 30, 2014.

Health Insurer Fee Revenue and Expenses

Health insurer fee revenue, as a percentage of premium revenue, increased to 2.2% in the second quarter of 2015 from 0.9% in the second quarter of 2014, and increased to 1.9% in the six months ended June 30, 2015, from 0.9% in the six months ended June 30, 2014.

Health insurer fee expenses, as a percentage of premium revenue, were 1.2% in the second quarter of 2015, compared with 1.0% in the second quarter of 2014, and 1.3% in the six months ended June 30, 2015, compared with 1.1% in the six months ended June 30, 2014.

HIF revenue increased in 2015 compared with 2014 due to improved reimbursement of Medicaid-related HIF expenses in 2015. In addition, both HIF revenue and expenses increased over the prior year proportionally to the increase in the total HIF tax base, which is assessed to all insurers. This base increased to $11.3 billion in 2015, from $8.0 billion in 2014. Refer to "Liquidity and Capital Resources—Financial Condition" below, for further discussion of the HIF.

Depreciation and Amortization

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Three Months Ended June 30,			
	2015		2014	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 21,296	0.6%	$ 18,536	0.8%
Amortization of intangible assets, continuing operations	3,856	0.1	4,366	0.2
Depreciation and amortization, continuing operations	25,152	0.7	22,902	1.0
Amortization recorded as reduction of service revenue	383	—	728	—
Amortization of capitalized software recorded as cost of service revenue	3,967	0.1	9,030	0.4
	$ 29,502	0.8%	$ 32,660	1.4%

	Six Months Ended June 30,			
	2015		2014	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 42,399	0.6%	$ 34,672	0.8%
Amortization of intangible assets, continuing operations	7,745	0.1	8,921	0.2
Depreciation and amortization, continuing operations	50,144	0.7	43,593	1.0
Amortization recorded as reduction of service revenue	1,061	—	1,457	—
Amortization of capitalized software recorded as cost of service revenue	10,871	0.2	20,604	0.5
Depreciation and amortization reported in the statement of cash flows	$ 62,076	0.9%	$ 65,654	1.5%

Interest Expense

Interest expense increased to $14.9 million for the second quarter of 2015, from $14.0 million for the second quarter of 2014. Interest expense increased to $29.8 million for the six months ended June 30, 2015, from $27.8 million for the six months ended June 30, 2014. The increase was due primarily to the issuance of the 1.625% Notes in the third quarter of 2014. For further details regarding convertible senior notes transactions, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 11, "Debt."

Interest expense includes non-cash interest expense relating primarily to the amortization of the discount on convertible senior notes, which amounted to $7.4 million and $6.8 million for the three months ended June 30, 2015 and 2014, respectively, and $14.7 million and $13.5 million for the six months ended June 30, 2015 and 2014, respectively.

Income Taxes

The provision for income taxes in continuing operations was recorded at an effective rate of 61.3% for the second quarter of 2015, compared with 58.0% for the second quarter of 2014, and 60.1% for the six months ended June 30, 2015 compared with

56.5% for the six months ended June 30, 2014. The effective tax rate for 2015 is higher than 2014 primarily as a result of higher non-deductible HIF expenses in 2015, and our inability to record tax benefits for losses incurred at our Puerto Rico health plan, which commenced operations in 2015.

Liquidity and Capital Resources

Introduction

Our regulated health plan subsidiaries generate significant cash flows from premium revenue. We generally receive premium revenue a short time before we pay for the related health care services; such cash flows generate our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. In addition, the majority of our premium revenues comes from the joint federal and state funding of the Medicaid and CHIP programs. From time to time, states may delay premium payments. Whenever a state delays payments, for whatever the reason, our liquidity is reduced. See further discussion under *Financial Condition*, below.

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

A majority of the assets held by our regulated subsidiaries is in the form of cash, cash equivalents, and investments. Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use. For the six months ended June 30, 2015, the non-regulated parent company received dividends from subsidiaries amounting to $42 million. For the six months ended June 30, 2014, the parent received no dividends from subsidiaries.

We generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of 10 years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be three years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of June 30, 2015, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities.

All of our investments are classified as current assets, except for our restricted investments and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Liquidity

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Six Months Ended June 30,		
	2015	2014	Change
	(In thousands)		
Net cash provided by operating activities	$ 647,710	$ 235,460	$ 412,250
Net cash used in investing activities	(556,849)	(102,336)	(454,513)
Net cash provided by (used in) financing activities	383,958	(41,668)	425,626
Net increase in cash and cash equivalents	$ 474,819	$ 91,456	$ 383,363

Operating Activities. Cash provided by operating activities increased $412.3 million year over year, primarily due to the changes in receivables, amounts due government agencies, and accounts payable and accrued liabilities.

The change in accounts receivable provided $139.9 million year over year, primarily due to collections of premiums receivable at our California health plan in the six months ended June 30, 2015. The change in amounts due government agencies provided $177.9 million in the six months ended June 30, 2015, in connection with Health Plans segment membership growth in

programs that contain medical cost floors or medical cost corridors. Under such programs, a portion of certain Medicaid, Medicare, and Marketplace premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs. The change in accounts payable and accrued liabilities provided $100.1 million, primarily due to the accrual of the 2015 HIF in the six months ended June 30, 2015.

Investing Activities. Cash used in investing activities in the six months ended June 30, 2015 increased to $556.8 million, from $102.3 million in the same period of 2014 primarily due to the investment of the net proceeds from our common stock offering, as described below. In addition, purchases of property, equipment and capitalized software increased approximately $28.2 million, primarily due to the start-up of our operations in Puerto Rico on April 1, 2015.

Financing Activities. Cash provided by financing activities in the six months ended June 30, 2015 amounted to $384.0 million, due primarily to $373.2 million proceeds, net of issuance costs, from the June 2015 offering of 5.75 million shares of our common stock. Cash used in financing activities in the six months ended June 30, 2014 related primarily to the settlement of $50.3 million of contingent consideration liabilities for our 2013 South Carolina health plan acquisition, with no comparable activity in the six months ended June 30, 2015.

Financial Condition

On a consolidated basis, at June 30, 2015, working capital amounted to $1,067.7 million, compared with $1,070.6 million at December 31, 2014. We held cash and investments, including restricted investments, of $3,593.8 million and $2,665.9 million at June 30, 2015 and December 31, 2014, respectively.

Credit Facility Covenants. The $250 million revolving Credit Facility contains customary non-financial and financial covenants, including a minimum interest coverage ratio, a maximum net debt-to-EBITDA ratio, and minimum statutory net worth, as described in greater detail in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Debt." As of June 30, 2015, there were no borrowings outstanding under our Credit Facility and we were in compliance with all covenants.

States' Budgets. As noted above, from time to time the states in which our health plans operate may delay premium payments. For example, the state of Illinois is currently operating without a budget for its fiscal year ending June 30, 2016. As of June 30, 2015, our Illinois health plan served approximately 101,000 members, and recognized premium revenue of approximately $205.9 million for the six months ended June 30, 2015. As of July 30, 2015, Illinois is current with its premium payments through June 30, 2015, but has not paid us for July or August 2015.

In another example, the Commonwealth of Puerto Rico has reported that it may lack sufficient resources to fund all necessary governmental programs including healthcare-related programs, as well as meet its debt obligations for its fiscal year ending June 30, 2016. Our Puerto Rico health plan became operational on April 1, 2015. As of June 30, 2015, the plan served approximately 361,000 members and recognized premium revenue of approximately $194 million in the second quarter of 2015. As of July 30, 2015, the Commonwealth continues to pay us weekly and is current with its payments.

It has been our practice in the past, and will remain so in the future, to continue to serve our members and pay health care providers for services rendered in circumstances where state (or Commonwealth) governments are temporarily unable to pay us, so long as we continue to believe that such state (or Commonwealth) governments will ultimately pay us.

Health Insurer Fee. We expect the 2015 HIF assessment related to our Medicaid business to be approximately $150 million, with an expected tax effect from the reimbursement of the assessment of approximately $92 million. Therefore, the total reimbursement necessary as a result of the Medicaid-related 2015 HIF assessment is approximately $242 million. We have secured agreements from all of our state partners except Michigan and Utah for the reimbursement of the 2015 HIF.

We continue to work with the states of Michigan and Utah to secure agreement for the reimbursement for the full economic impact of the HIF. The failure of our state partners to reimburse us in full for the HIF and its related tax effects could have a material adverse effect on our business, financial condition, cash flows and results of operations. Michigan and Utah combined need to pay us approximately $33 million for all of 2015 to make us whole for Medicaid-related 2015 HIF expenses in those two states.

The following table provides the details of our HIF revenue reimbursement by health plan as of June 30, 2015 (in thousands):

	HIF Reimbursement Revenue, Gross[1]				
	Six Months Ended June 30, 2015				Year Ending Dec. 31, 2015
	Recognized			Necessary for Full Reimbursement	Necessary for Full Reimbursement
	Q1 2015	Q2 2015	Total		
2015 HIF:					
California	$ —	$ 17,258	$ 17,258	$ 17,258	$ 34,517
Florida	2,027	2,042	4,069	4,069	8,139
Illinois	965	973	1,938	1,938	3,875
Michigan	—	—	—	13,776	27,551
New Mexico	7,539	7,597	15,136	15,136	30,273
Ohio	11,936	12,027	23,963	23,963	47,925
South Carolina	3,053	3,077	6,130	6,130	12,261
Texas	5,839	5,884	11,723	11,723	23,446
Utah	—	—	—	2,968	5,936
Washington	10,951	10,963	21,914	21,914	43,828
Wisconsin	1,126	1,135	2,261	2,261	4,522
Subtotal, Medicaid	43,436	60,956	104,392	121,136	242,273
Marketplace	398	400	798	798	1,595
Medicare	5,702	3,652	9,354	9,354	18,702
	49,536	65,008	114,544	$ 131,288	$ 262,570
2014 HIF:					
California	—	11,616	11,616		
	$ 49,536	$ 76,624	$ 126,160		
Recognized in:					
Health insurer fee revenue	$ 47,948	$ 73,890	$ 121,838		
Premium tax revenue	1,588	2,734	4,322		
	$ 49,536	$ 76,624	$ 126,160		

(1) Amounts in the table include the Company's estimate of the full economic impact of the HIF including premium tax and the income tax effect.

Convertible Senior Notes Classification. As described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 11, "Debt," our 1.125% Notes met the stock price trigger in the quarter ended June 30, 2015, and are convertible to cash through at least September 30, 2015. Because the 1.125% Notes may be converted into cash within 12 months, the $445.2 million carrying amount is reported in current portion of long-term debt as of June 30, 2015, which resulted in decreased working capital as of June 30, 2015. We believe that the amount of the 1.125% Notes that may be converted over the next twelve months, if any, will be insignificant. For more information, refer to Part II, Item 1A of this Form 10-Q, "Risk Factors."

We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Future Sources and Uses of Liquidity

During June and July 2015, we announced that we had entered into agreements to acquire Medicaid contracts that will add a total of approximately 180,000 members by the end of 2015 to our health plans in Florida, Illinois and Michigan. We expect to spend approximately $110 million in total for these three acquisitions.

For information on our Credit Facility, convertible senior notes, and other financing arrangements, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Debt."

For information on our common stock offering, shelf registration statement, and securities repurchase program, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 13, "Stockholders' Equity."

Regulatory Capital and Dividend Restrictions

For information on our regulatory capital requirements and dividend restrictions, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 15, "Commitments and Contingencies."

Contractual Obligations

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2014, was disclosed in our 2014 Annual Report on Form 10-K. There were no material changes to this previously filed information outside the ordinary course of business during the six months ended June 30, 2015. For further discussion and maturities of our long-term debt, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Debt."

Critical Accounting Estimates

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 10, "Medical Claims and Benefits Payable," for a table which presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements.
- *Health Plans segment contractual provisions that may adjust or limit revenue or profit*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the second quarter of 2015 in connection with such contractual provisions.
- *Health Plans segment quality incentives*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the second quarter of 2015 in connection with such quality incentives.
- *Health Plans segment Marketplace premium stabilization programs* (see discussion below).
- *Molina Medicaid Solutions segment revenue and cost recognition*. Refer to Part II, Item 8 of our 2014 Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of Molina Medicaid Solutions' service revenue and cost of service revenue recognition.

There have been no significant changes during the six months ended June 30, 2015, to the items that we disclosed as our critical accounting estimates in our discussion and analysis of financial condition and results of operations in our Annual Report on Form 10-K for the year ended December 31, 2014.

Marketplace Premium Stabilization Programs - Health Plans Segment

The ACA established Marketplace premium stabilization programs effective January 1, 2014. These programs, commonly referred to as the "3R's," include a permanent risk adjustment program, a transitional reinsurance program, and a temporary risk corridor program. Additionally, the ACA established a minimum annual medical loss ratio (Minimum MLR) of 80% for the Marketplace. The medical loss ratio represents medical costs as a percentage of premium revenue, where the components of medical costs and premium revenue are specifically defined by federal regulations. Each of the 3R programs are taken into consideration when computing the Minimum MLR. If the Minimum MLR is not met, we may be required to pay rebates to our Marketplace policyholders.

Our receivables (payables) for each of these programs were as follows (in millions):

	June 30, 2015	December 31, 2014
Risk adjustment	$ (78.1)	$ (4.8)
Reinsurance	18.1	4.9
Risk corridor	(20.4)	(0.5)
Minimum MLR	(18.3)	—

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC, a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of 10 years and an average duration of three years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our chief executive officer and our chief financial officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the *"Exchange Act"*)), are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended June 30, 2015 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

A description of our legal proceedings is included in and incorporated by reference to Note 15 of the Notes to the Consolidated Financial Statements contained in Part I, Item 1 of this report.

Item 1A. Risk Factors

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, you should be carefully consider the risk factors discussed below, which supplement and should be read together with the risk factors discussed in Part I, Item 1A – Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2014. The risk factors described herein and in our 2014 Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, or results of operations.

The Commonwealth of Puerto Rico may become unable to pay the premiums of our Puerto Rico health plan.

The government of Puerto Rico currently faces major fiscal and liquidity challenges. The government recently warned that it may "lack sufficient resources to fund all necessary governmental programs and services as well as meet debt service obligations for fiscal year 2016." Much of the Puerto Rican government's revenue stream for the first part of its fiscal year, which began on July 1st, is earmarked to redeem revenue bonds. On June 29, 2015, Puerto Rico's governor, Alejandro Garcia Padilla, stated during a televised address that "the debt is not payable." Further, the island's ability to access credit markets appears highly uncertain, and its ability to meet future debt service payments depends in part on the willingness of investors to roll over existing debt.

The extreme financial difficulties faced by the Commonwealth may make it impossible for ASES, the Puerto Rico Medicaid agency, to pay our Puerto Rico health plan under the terms of the parties' Medicaid contract. As of June 30, 2015, our Puerto Rico health plan served approximately 361,000 members, and had recognized premium revenue of approximately $194 million in the second quarter of 2015, or approximately $65 million per month. A default by ASES on its payment obligations under our Medicaid contract, or a determination by ASES to terminate our contract based on insufficient funds available, could result in our having paid, or in our having to pay, provider claims in amounts for which we are not paid reimbursement, and could make it unfeasible for the Puerto Rico health plan to continue to operate. A default by ASES or termination of our Puerto Rico Medicaid contract could have a materially adverse effect on our business, financial condition, cash flows, or results of operations.

Changes to health care regulatory laws under the Affordable Care Act including the recently proposed Medicaid managed care rule, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

The health care regulatory law landscape is constantly changing. For example, on May 26, 2015, CMS posted a new proposed rule to the Federal Register regarding Medicaid programs and CHIP, Medicaid Managed Care, CHIP Delivered in Managed Care, Medicaid and CHIP Comprehensive Quality Strategies, and Revisions Related to Third Party Liability that, if implemented, would, among other things, impose a medical loss ratio of 85% for Medicaid and CHIP programs, establish a Medicaid managed care quality rating system like the five-star system for Medicare Advantage plans, and expand health plans' responsibilities in program integrity efforts. It is difficult to predict what final rules may be adopted and implemented by CMS, and if the final rule would result in any material adverse effect on our business, financial condition, cash flows, or results of operations.

If the responsive bids of our health plans (including our Michigan health plan) for new or renewed Medicaid contracts are not successful, or if our government contracts are terminated or are not renewed, our premium revenues could be materially reduced and our operating results could be negatively impacted.

Our government contracts may be subject to periodic competitive bidding. In such process, our health plans may face competition as other plans, many with greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. In the event the responsive bid of one or more of our health plans is not successful, we will lose our Medicaid contract in the applicable state or states, and our premium revenues could be materially reduced as a result. Alternatively, even if our responsive bids are successful, the bids may be based upon assumptions regarding enrollment, utilization, medical costs, or other factors which could result in the Medicaid contract being less profitable than we had expected.

Our Michigan Medicaid contract is subject to a new RFP that was released on May 8, 2015. If we are successful in our attempt to renew this contract, we expect that the new contract will become effective on January 1, 2016. If our attempt to renew this contract is not successful, the contract will terminate effective December 31, 2015. If we are unable to renew,

successfully re-bid, or compete for any of our government contracts, including our Michigan contract, or if any of our contracts are terminated or renewed on less favorable terms, our business, financial condition, cash flows, or results of operations could be adversely affected.

We are subject to extensive fraud and abuse laws that may give rise to lawsuits and claims against us, the outcome of which may have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Because we receive payments from federal and state governmental agencies, we are subject to various laws commonly referred to as "fraud and abuse" laws, including federal and state anti-kickback statutes, prohibited referrals, the federal False Claims Act, which permit agencies and enforcement authorities to institute suit against us for violations and, in some cases, to seek treble damages, criminal and civil fines, penalties, and assessments. Violations of these laws can also result in exclusion, debarment, temporary or permanent suspension from participation in government health care programs, or the institution of corporate integrity agreements. Liability under such federal and state statutes and regulations may arise if we know, or it is found that we should have known, that information we provide to form the basis for a claim for government payment is false or fraudulent, and some courts have permitted False Claims Act suits to proceed if the claimant was out of compliance with program requirements. Fraud, waste and abuse prohibitions encompass a wide range of operating activities, including kickbacks or other inducements for referral of members or for the coverage of products (such as prescription drugs) by a plan, billing for unnecessary medical services by a provider, improper marketing, and the violation of patient privacy rights. Companies involved in public health care programs such as Medicaid and Medicare are required to maintain compliance programs to detect and deter fraud, waste and abuse, and are often the subject of fraud, waste and abuse investigations and audits. The regulations and contractual requirements applicable to participants in these public-sector programs are complex and subject to change. The federal government has taken the position that claims presented in violation of the federal anti-kickback statute may be considered a violation of the federal False Claims Act. In addition, under the federal civil monetary penalty statute, the U.S. Department of Health and Human Services (HHS), Office of Inspector General has the authority to impose civil penalties against any person who, among other things, knowingly presents, or causes to be presented, certain false or otherwise improper claims. *Qui tam* actions under federal and state law can be brought by any individual on behalf of the government. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines, or be excluded from the Medicare, Medicaid, or other state or federal health care programs as a result of an investigation arising out of such action. We are currently defending two *qui tam* actions where the federal government has declined to intervene: (i) *USA ex rel Anita Silingo v. Mobile Medical Examination Service, Molina Healthcare of California, et al; and (ii) USA and State of Florida ex rel Charles Wilhelm v. Molina Healthcare and Molina Healthcare of Florida.* We believe we have meritorious defenses to both matters, and intend to defend both matters vigorously. Other *qui tam* actions may have been filed against us of which we are presently unaware, or other *qui tam* actions may be filed against us in the future. In the event we are subject to liability under these or other *qui tam* actions, our business, financial condition, cash flows, or results of operations could be adversely affected.

Unforeseen changes in pharmaceutical regulations or market conditions may impact our revenues and adversely affect our results of operations.

A significant category of our health care costs relate to pharmaceutical products and services. Evolving regulations and state and federal mandates regarding coverage may impact the ability of our health plans to continue to receive existing price discounts on pharmaceutical products for our members. Other factors affecting our pharmaceutical costs include, but are not limited to, the price of pharmaceuticals, geographic variation in utilization of new and existing pharmaceuticals, and changes in discounts. The unpredictable nature of these factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Our use and disclosure of individually identifiable information, including health information, is subject to federal and state privacy and security regulations, and our failure to comply with those regulations or to adequately secure the information we hold could result in significant liability or reputational harm.

State and federal laws and regulations, including HIPAA and the Gramm-Leach-Bliley Act, govern the collection, dissemination, use, privacy, confidentiality, security, availability, and integrity of individually identifiable information, including protected health information, or PHI. HIPAA establishes basic national privacy and security standards for protection of PHI by covered entities, including health plans such as ours. HIPAA requires covered entities like us to develop and maintain policies and procedures for PHI that is used or disclosed, and to adopt administrative, physical, and technical safeguards to protect PHI. HIPAA also implemented the use of standard transaction code sets and standard identifiers that covered entities must use when submitting or receiving certain electronic health care transactions, including activities associated with the billing and collection of health care claims.

Mandatory penalties for HIPAA violations range from $100 to $50,000 per violation, and up to $1.5 million per violation of the same standard per calendar year. A single breach incident can result in violations of multiple standards, resulting in possible penalties potentially in excess of $1.5 million. If a person knowingly or intentionally obtains or discloses PHI in

violation of HIPAA requirements, criminal penalties may also be imposed. HIPAA authorizes state attorneys general to file suit under HIPAA on behalf of state residents. Courts can award damages, costs, and attorneys' fees related to violations of HIPAA in such cases. While HIPAA does not create a private right of action allowing individuals to sue us in civil court for HIPAA violations, its standards have been used as the basis for a duty of care in state civil suits such as those for negligence or recklessness in the misuse or breach of PHI.

In addition, HIPAA mandates that the Secretary of HHS conduct periodic compliance audits of HIPAA covered entities for compliance with the HIPAA Privacy and Security Standards. Investigations of violations that indicate willful neglect, for which penalties are now mandatory, are statutorily required. It also tasks HHS with establishing a methodology whereby harmed individuals who were the victims of breaches of unsecured PHI may receive a percentage of the civil monetary penalty fine paid by the violator.

HIPAA further requires covered entities to notify affected individuals "without unreasonable delay and in no case later than 60 calendar days after discovery of the breach" if their unsecured PHI is subject to an unauthorized access, use, or disclosure. If a breach affects 500 patients or more, it must be reported to HHS and local media without unreasonable delay, and HHS will post the name of the breaching entity on its public website. If a breach affects fewer than 500 individuals, the covered entity must log it and notify HHS at least annually. We have experienced HIPAA breaches in the past, including breaches affecting over 500 individuals.

New health information standards, whether implemented pursuant to HIPAA, congressional action, or otherwise, could have a significant effect on the manner in which we must handle health care related data, and the cost of complying with standards could be significant. If we do not comply with existing or new laws and regulations related to PHI, we could be subject to criminal or civil sanctions. Any security breach involving the misappropriation, loss, or other unauthorized disclosure or use of confidential member information, whether by us or a third party, such as our vendors, could subject us to civil and criminal penalties, divert management's time and energy, and have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Other large-scale medical emergencies may have a material adverse effect on our business, cash flows, financial condition, and results of operations.

Large-scale medical emergencies can take many forms and can cause widespread illness and death. For example, federal and state law enforcement officials have issued warnings about potential terrorist activity involving biological and other weapons. In addition, natural disasters and the potential for a wide-spread pandemic of influenza or other diseases, coupled with the lack of availability of appropriate preventative medicines, can have a significant impact on the health of the population of wide-spread areas. If the United States were to experience widespread bioterrorism or other attacks, large-scale natural disasters in our concentrated coverage areas, or a large-scale pandemic or epidemic, our covered medical expenses could rise and we could experience a material adverse effect on our business, cash flows, financial condition, and results of operations, or, in the event of extreme circumstances, our viability could be threatened.

We may not have the funds necessary to pay the amounts due upon conversion or required repurchase of our outstanding notes, and our indebtedness may contain limitations on our ability to pay the amounts due upon conversion or required repurchase.

In February 2013, we issued $550.0 million aggregate principal amount of 1.125% cash convertible senior notes due January 15, 2020, unless earlier repurchased or converted. We refer to these notes as our 1.125% Notes. In September 2014, we issued $301.6 million aggregate principal amount of 1.625% convertible senior notes due August 14, 2044, unless earlier repurchased, redeemed, or converted. We refer to these notes as our 1.625% Notes. As of June 30, 2015, the aggregate outstanding principal amount of our 1.125% Notes and our 1.625% Notes was $550.0 million and $301.6 million, respectively. Both our 1.125% Notes and our 1.625% Notes are convertible into cash prior to their respective maturity dates under certain situations, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger. The 1.125% Notes met the stock price trigger in the quarter ended June 30, 2015, and are convertible to cash through at least September 30, 2015. Because the 1.125% Notes may be converted into cash within 12 months, the $445.2 million carrying amount is reported in current portion of long-term debt as of June 30, 2015. In addition, holders of our 1.625% Notes may convert their notes into cash during any calendar quarter (and only during such calendar quarter) if the last reported sales price of our common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to $75.52 per share. The last reported sale price of our common stock as reported on the New York Stock Exchange on July 29, 2015 was $68.83 per share. As of June 30, 2015, our 1.625% Notes were not convertible. If conversion requests are received, the settlement of the notes must be paid primarily in cash pursuant to the terms of the relevant indentures.

For economic reasons related to the trading market for our 1.125% Notes, we believe that the amount of the notes that may be converted over the next twelve months, if any, will not be significant. However, if the trading market for our 1.125% Notes becomes closed or restricted due to market turmoil or other reasons such that the notes cannot be traded, or if the trading price

of our 1.125% Notes, which normally trade at a marginal premium to the underlying composite stock-and-interest economic value, no longer includes that marginal premium, holders of our 1.125% Notes may elect to convert the notes to cash. As of June 30, 2015, we have sufficient available cash, combined with borrowing capacity available under our Credit Facility, to fund such conversions.

In addition, in the event of a change in control or the termination in trading of our stock, each holder of our 1.125% Notes and our 1.625% Notes would have the right to require us to purchase some or all of their notes at a purchase price in cash equal to 100% of the principal amount of the notes, plus any accrued and unpaid interest.

In the event of conversions or required repurchases, we may not have enough available cash or be able to obtain financing at the time we are required to comply with our conversion or repurchase obligations. In addition, our ability to comply with these obligations may be limited by law, by regulatory authority, or by agreements governing our future indebtedness. The indentures for the 1.125% Notes and the 1.625% Notes provide that it would be an event of default if we do not make the cash payments due upon conversion or required repurchase of the notes. The occurrence of an event of default under one or both of these indentures may also constitute an event of default under our Credit Facility and under our other indebtedness we may have outstanding at such time. Any such default could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Share repurchase activity during the three months ended June 30, 2015 was as follows:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (b)
April 1 - April 30	508	$ 66.31	—	$ 50,000,000
May 1 - May 31	1,453	$ 59.55	—	$ 50,000,000
June 1 - June 30	388	$ 72.27	—	$ 50,000,000
Total	2,349	$ 63.11	—	

(a) During the three months ended June 30, 2015, we withheld 2,349 shares of common stock under our 2011 Equity Incentive Plan to settle our employees' income tax obligations.

(b) Effective as of February 25, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This repurchase program extends through December 31, 2015.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended June 30, 2015 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
March 31, 2015

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality health care to those receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states and the Commonwealth of Puerto Rico, and includes our direct delivery business. As of March 31, 2015, these health plans served nearly 3 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve Health Insurance Marketplace (Marketplace) members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in several states in which we operate, as well as of the management of a hospital in southern California under a management services agreement.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

Market Updates - Health Plans Segment

Florida. In the first quarter of 2015, our Florida health plan enrolled 185,000 Marketplace members, more than doubling its total membership as of December 31, 2014.

Puerto Rico. On April 1, 2015, our Puerto Rico health plan became operational, enrolling approximately 350,000 members.

Market Updates - Molina Medicaid Solutions Segment

New Jersey. On April 9, 2015, the state of New Jersey announced its selection of Molina Medicaid Solutions to design and operate its new Medicaid management information system (MMIS). The new contract is effective May 1, 2015, and has a term of 10 years with three one-year renewal options. Molina Medicaid Solutions was the state's previous MMIS provider, and was awarded the new contract as a result of Molina Medicaid Solutions' submission in response to the state of New Jersey's request for proposals.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2015.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2014. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2014 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2014 audited consolidated financial statements.

Reclassifications

We have reclassified certain amounts in the 2014 statement of cash flows to conform to the 2015 presentation.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services, and premiums collected in advance are deferred.

Certain components of premium revenue are subject to accounting estimates as follows:

Contractual Provisions That May Adjust or Limit Revenue or Profit

Health Plan Medical Cost Floors (Minimums), Medical Cost Corridors, and Administrative Cost Ceilings (Maximums): A portion of certain Medicaid, Medicare, and Marketplace premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $446.5 million and $392.4 million at March 31, 2015, and December 31, 2014, respectively, to amounts due government agencies. Approximately $430 million of the liability accrued at March 31, 2015 relates to our participation in Medicaid expansion programs.

In general, such amounts are subject to future changes in estimate based upon our actual cost performance and interpretations of allowable medical costs and revenue. At our Washington health plan (where we had recorded a liability of approximately $260 million related to the Medicaid expansion medical cost floor at March 31, 2015), premium revenue may be retroactively adjusted across the entire state Medicaid expansion program based upon the medical cost performance of the program as a whole. As such, our liability under Washington's contractual provisions is determined not just by our own medical cost performance, but by that of all health plans participating in the program; and we have limited visibility into the costs of those health plans.

In certain circumstances, the health plans may receive additional premiums if amounts spent on medical care costs exceed a defined maximum threshold, but we had no receivables recorded at March 31, 2015 or December 31, 2014 that were related to such provisions. Separately, in certain states we may be levied with non-monetary sanctions if certain minimum amounts are not spent on defined medical care costs, or if administrative costs exceed certain amounts.

Health Plan Profit Sharing and Profit Ceiling: Our contracts with certain states contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage, in some cases in accordance with a tiered rebate schedule. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. As a result of profits in excess of the amount we are allowed to retain, we recorded a liability of $5.6 million and $0.5 million at March 31, 2015 and December 31, 2014, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services (CMS), our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS will recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS will pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of $17.3 million and $7.6 million for anticipated Medicare risk adjustment premiums at March 31, 2015, and December 31, 2014, respectively.

Quality Incentives

At our California, Illinois, New Mexico, Ohio, South Carolina, Texas, Washington and Wisconsin health plans, revenue ranging from approximately 1% to 4% of certain health plan premiums is earned if specified performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of March 31, 2015 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of March 31, 2015.

	Three Months Ended March 31,	
	2015	2014
	(In thousands)	
Maximum available quality incentive premium - current period	$ 30,315	$ 20,164
Amount of quality incentive premium revenue recognized in current period:		
Earned current period	$ 9,551	$ 5,297
Earned prior periods	383	(378)
Total	$ 9,934	$ 4,919
Total premium revenue recognized for state health plans with quality incentive premiums	$ 2,353,235	$ 1,200,619

California Health Plan Rate Settlement Agreement

In 2013, our California health plan entered into a settlement agreement with the California Department of Health Care Services (DHCS). The agreement settled rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in Medi-Cal (California's Medicaid program). Under the terms of the agreement, a settlement account (the Account) applicable to the California health plan's managed care contracts has been established.

Effective January 1, 2014, the Account was established with an initial balance of zero, and will be settled after December 31, 2017. DHCS will make an interim partial settlement payment to us if it terminates early, without replacement, any of our managed care contracts. The Account will be adjusted annually to reflect a calendar year deficit or surplus, which is determined by comparing the California health plan's pre-tax margin and a target margin established in the settlement agreement. Upon expiration of the settlement agreement, if the Account is in a deficit position, then DHCS will pay the amount of the deficit to us, subject to an alternative minimum payment amount. If the Account is in a surplus position, then no amount is owed to either party. The maximum amount that DHCS would pay to us under the terms of the settlement agreement is $40.0 million.

We estimate and recognize the retrospective adjustments to premium revenue based on our experience to date under the California health plan's managed care contracts. As of March 31, 2015, the California health plan's pre-tax margin exceeded the target margin, resulting in a surplus position. Consequently, a retrospective premium adjustment was not required at March 31, 2015.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes, nondeductible expenses under the Affordable Care Act's Health Insurer Fee (HIF), nondeductible compensation and other general and administrative expenses. The effective tax rate may be subject to fluctuations during the year, particularly as a result of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

New Accounting Standards

In April 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2015-03 - *Simplifying the Presentation of Debt Issuance Costs*, which will require debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of such debt liability, consistent with debt discounts. This ASU will be effective for us in the first quarter of 2016, and is applied retrospectively to all prior periods presented in the financial statements; early adoption is permitted. We are evaluating the potential effects of the adoption of the ASU on our financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the Securities and Exchange Commission did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	Three Months Ended March 31,	
	2015	2014
	(In thousands)	
Shares outstanding at the beginning of the period	48,578	45,871
Weighted-average number of shares:		
Issued, share-based compensation	107	150
Denominator for basic net income per share	48,685	46,021
Effect of dilutive securities:		
Share-based compensation	468	597
Convertible senior notes (1)	—	902
1.125% Warrants (1)	918	—
Denominator for diluted net income per share	50,071	47,520
Potentially dilutive common shares excluded from calculations (2):		
Stock options	—	45
Restricted shares	55	192
1.125% Warrants	—	13,490

(1) For more information regarding the convertible senior notes, refer to Note 11, "Debt." For more information regarding the 1.125% Warrants, refer to Note 12, "Derivatives."

(2) The dilutive effect of all potentially dilutive common shares is calculated using the treasury-stock method. Certain potentially dilutive common shares issuable are not included in the computation of diluted net income per share because to do so would be anti-dilutive. For the three months ended March 31, 2014, the 1.125% Warrants were excluded from diluted shares outstanding because the exercise price exceeded the average market price of our common stock.

4. Business Combinations

Health Plans Segment

Florida. In December 2014, our Florida health plan acquired certain assets relating to the Medicaid business of First Coast Advantage, LLC (FCA). As part of the transaction, we assumed FCA's Medicaid contract and certain provider agreements for Region 4 of the Statewide Medicaid Managed Care Managed Medical Assistance Program in the state of Florida. The Florida health plan's membership increased by approximately 62,000 members as a result of this transaction. The final purchase price for this acquisition amounted to $44.6 million, of which $36.6 million was paid in December 2014, and $8.0 million was paid in the first quarter of 2015.

5. Share-Based Compensation

As of March 31, 2015, there are approximately 312,000 unvested restricted shares awarded to our named executive officers with market and performance conditions outstanding. In the event the vesting conditions are not achieved, the awards will lapse. As of March 31, 2015, we expect the performance conditions to be met in full.

Charged to general and administrative expenses, total share-based compensation expense was as follows:

	Three Months Ended March 31,	
	2015	2014
	(In thousands)	
Restricted stock and performance awards	$ 4,601	$ 4,608
Employee stock purchase plan and stock options	1,074	988
	$ 5,675	$ 5,596

As of March 31, 2015, there was $29.3 million of total unrecognized compensation expense related to unvested restricted stock awards, including those with performance conditions, which we expect to recognize over a remaining weighted-average period of 2.0 years.

Restricted and performance stock activity for the three months ended March 31, 2015 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2014	1,282,072	$ 33.55
Granted	171,835	63.07
Vested	(371,198)	32.03
Forfeited	(26,582)	37.35
Unvested balance as of March 31, 2015	1,056,127	38.79

The total fair value of restricted and performance awards granted during the three months ended March 31, 2015 and 2014 was $10.8 million and $22.9 million, respectively. The total fair value of restricted awards, including those with performance and market conditions, which vested during the three months ended March 31, 2015 and 2014 was $23.4 million and $20.9 million, respectively.

6. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, other assets, trade accounts payable, medical claims and benefits payable, amounts due government agencies, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs

Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs

Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, certificates of deposit, and asset-backed securities that are classified as current investments in the accompanying consolidated balance sheets. Such investments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs

Derivative financial instruments. Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of March 31, 2015 included the price of our common stock, time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 12, “Derivatives,” the 1.125%

Call Option asset and the 1.125% Conversion Option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of income. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

Contingent consideration liability. The contingent consideration liability represents the remaining liability associated with the Medicare-Medicaid Plan (MMP) component of our South Carolina health plan acquisition in 2013, and is recorded in accounts payable and accrued liabilities. We applied a cash flow analysis to determine the fair value of this liability. The significant unobservable input is the purchase price estimate for the projected membership.

Auction rate securities. Auction rate securities are designated as available-for-sale and are reported at fair value in other assets. To estimate the fair value of these securities we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of March 31, 2015.

Our financial instruments measured at fair value on a recurring basis at March 31, 2015, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 809,150	$ —	$ 809,150	$ —
Municipal securities	120,157	—	120,157	—
GSEs	142,859	142,859	—	—
U.S. treasury notes	64,327	64,327	—	—
Certificates of deposit	56,018	—	56,018	—
Asset-backed securities	11,355	—	11,355	—
Auction rate securities	2,800	—	—	2,800
1.125% Call Option derivative asset	474,121	—	—	474,121
Total assets measured at fair value on a recurring basis	$ 1,680,787	$ 207,186	$ 996,680	$ 476,921
1.125% Conversion Option derivative liability	$ 473,983	$ —	$ —	$ 473,983
Contingent consideration liability	500	—	—	500
Total liabilities measured at fair value on a recurring basis	$ 474,483	$ —	$ —	$ 474,483

Our financial instruments measured at fair value on a recurring basis at December 31, 2014, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 641,729	$ —	$ 641,729	$ —
Municipal securities	127,045	—	127,045	—
GSEs	122,269	122,269	—	—
U.S. treasury notes	59,543	59,543	—	—
Certificates of deposit	68,876	—	68,876	—
Auction rate securities	4,847	—	—	4,847
1.125% Call Option derivative asset	329,323	—	—	329,323
Total assets measured at fair value on a recurring basis	$ 1,353,632	$ 181,812	$ 837,650	$ 334,170
1.125% Conversion Option derivative liability	$ 329,194	$ —	$ —	$ 329,194
Contingent consideration liability	500	—	—	500
Total liabilities measured at fair value on a recurring basis	$ 329,694	$ —	$ —	$ 329,694

The following table presents activity relating to our assets (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	Changes in Level 3 Instruments		
	Auction Rate Securities	Derivatives, Net	Contingent Consideration Liability
		(In thousands)	
Balance at December 31, 2014	$ 4,847	$ 129	$ (500)
Total gains for the period recognized in:			
Other expenses, net	—	9	—
Other comprehensive income	53	—	—
Settlements	(2,100)	—	—
Balance at March 31, 2015	$ 2,800	$ 138	$ (500)

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our convertible senior notes, which are classified as Level 2 financial instruments, are indicated in the following table. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

	March 31, 2015				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
			(In thousands)		
1.125% Notes	$ 440,248	$ 919,919	$ —	$ 919,919	$ —
1.625% Notes	270,836	381,610	—	381,610	—
	$ 711,084	$ 1,301,529	$ —	$ 1,301,529	$ —

	December 31, 2014				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
			(In thousands)		
1.125% Notes	$ 435,330	$ 767,377	$ —	$ 767,377	$ —
1.625% Notes	268,767	337,292	—	337,292	—
	$ 704,097	$ 1,104,669	$ —	$ 1,104,669	$ —

7. Investments

The following tables summarize our investments as of the dates indicated:

	March 31, 2015			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Corporate debt securities	$ 809,009	$ 783	$ 642	$ 809,150
Municipal securities	119,896	291	30	120,157
GSEs	142,851	98	90	142,859

	$ 1,025,951	$ 395	$ 2,037	$ 1,024,309

The contractual maturities of our investments as of March 31, 2015 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 594,621	$ 594,574
Due one year through five years	601,243	601,953
Due after five years through ten years	7,331	7,339
Due after ten years	3,000	2,800
	$ 1,206,195	$ 1,206,666

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the three months ended March 31, 2015 and 2014 were insignificant.

For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at March 31, 2015 and December 31, 2014, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of March 31, 2015:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in thousands)					
Corporate debt securities	$ 307,035	$ 455	189	$ 75,899	$ 187	33
Municipal securities	23,469	13	31	3,820	17	9
GSEs	67,378	90	16	—	—	—
Certificates of deposit	7,037	2	29	—	—	—

Certificates of deposit	12,591	18	52	—	—	—
Auction rate securities	—	—	—	4,847	253	6
	$ 539,475	$ 1,439	416	$ 47,576	$ 598	32

Auction Rate Securities. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 16 years to 31 years. Considering the insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction rate securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at March 31, 2015. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $79.1 million of these instruments at par value.

For the three months ended March 31, 2015 and 2014, we recorded unrealized gains of $0.05 million and $0.03 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future impairment is other-than-temporary, we will record a charge to earnings as appropriate.

8. Receivables

Receivables consist primarily of amounts due from state Medicaid agencies, which may be subject to potential retroactive adjustments. Because all of our receivable amounts are readily determinable and substantially all of our creditors are governmental authorities, our allowance for doubtful accounts is immaterial.

	March 31, 2015	December 31, 2014
	(In thousands)	
California	$ 83,772	$ 310,938

Molina Medicaid Solutions segment	28,666	34,991
	$ 491,430	$ 596,456

9. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by government authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. In connection with a Molina Medicaid Solutions segment state contract, we maintain restricted investments as collateral for a letter of credit. The following table presents the balances of restricted investments:

	March 31, 2015	December 31, 2014
	(In thousands)	
California	$ 373	$ 373
Florida	28,661	28,649
Illinois	311	311
Michigan	1,014	1,014

Washington	151	151
Other	990	888
Total Health Plans segment	96,365	97,478
Molina Medicaid Solutions segment	5,001	5,001
	$ 101,366	$ 102,479

The contractual maturities of our held-to-maturity restricted investments as of March 31, 2015 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 96,101	$ 96,103
Due one year through five years	5,265	5,271
	$ 101,366	$ 101,374

10. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated.

	March 31, 2015	December 31, 2014
	(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 1,089,903	$ 870,429
Pharmacy payable	84,180	71,412
Capitation payable	47,171	28,150
Other	226,878	230,531
	$ 1,448,132	$ 1,200,522

"Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various government agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. Such non-risk provider payables amounted to $105.4 million and $119.3 million as of March 31, 2015 and December 31, 2014, respectively.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts presented for “Components of medical care costs related to: Prior periods” represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Three Months Ended March 31, 2015	Year Ended December 31, 2014
	(Dollars in thousands)	
Medical claims and benefits payable, beginning balance	$ 1,200,522	$ 669,787
Components of medical care costs related to:		
Current period	2,771,588	8,122,885
Prior periods (1)	(135,833)	(45,979)
Total medical care costs	2,635,755	8,076,906
Change in non-risk provider payables	(13,914)	(31,973)
Payments for medical care costs related to:		
Current period	1,647,981	7,064,427
Prior periods	726,250	449,771
Total paid	2,374,231	7,514,198
Medical claims and benefits payable, ending balance	$ 1,448,132	$ 1,200,522
Benefit from prior period as a percentage of:		
Balance at beginning of period	11.3%	6.9%
Premium revenue, trailing twelve months	1.4%	0.5%
Medical care costs, trailing twelve months	1.5%	0.6%

(1) The benefit from prior period development of medical claims and benefits payable for the three months ended March 31, 2015 included approximately $25 million relating to programs that contain medical cost floor or corridor provisions. Accordingly, premium revenue for the three months ended March 31, 2015 was reduced by the same amount.

That portion of our total medical claims and benefits payable liability that is most subject to variability in the estimate is fee-for-service claims incurred but not paid (IBNP). Our IBNP, as included in medical claims and benefits payable, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors.

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims deviation and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate – we only know when the circumstances for any one or more factors are out of the ordinary.

The use of a consistent methodology in estimating our liability for medical claims and benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate.

As indicated above, the amounts ultimately paid out on our medical claims and benefits payable liabilities in fiscal years 2015 and 2014 were less than what we had expected when we had established those liabilities. The differences between our original estimates and the amounts ultimately paid out (or now expected to be ultimately paid out) for the most part related to IBNP. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We believe that the most significant factors that will determine the accuracy of our IBNP estimates at March 31, 2015 are as follows:

- At our Florida health plan, Marketplace enrollment increased by 185,000 members in the first quarter of 2015. Because of these new members the reserves are more subject to change than usual.
- At our Illinois health plan, enrollment has increased by nearly 81,000 members during the fourth quarter of 2014 and the first quarter of 2015. Because of these new members the reserves are more subject to change than usual.
- At our Ohio health plan, enrollment in the MMP integrated duals program has increased by approximately 9,000 members during the first quarter of 2015. Because of these new members the reserves are more subject to change than usual.
- At our Washington health plan, certain delays related to the implementation of revised fee schedules resulted in a significant increase to our claims inventory in the first quarter of 2015. This additional inventory adds to the uncertainty of our unpaid claims estimates.

We recognized favorable prior period claims development in the amount of $135.8 million for the three months ended March 31, 2015. This amount represents our estimate as of March 31, 2015, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2014 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation was due primarily to the following factors:

- At our Ohio health plan, approximately 17,000 members were enrolled in the new MMP program during 2014. Since we did not have enough historical claims data to use the pattern of paid and incurred claims, we initially estimated the reserves for these new members by applying an estimated medical care ratio (MCR). This resulted in an overstatement in our reserve liability as of December 31, 2014.

- Also at our Ohio health plan, reserves for the Medicaid expansion population were partially based on expected costs built into the pricing assumptions because this program was new in 2014. Our costs were ultimately less than those assumed in those pricing assumptions, resulting in an overestimation of our liability as of December 31, 2014.
- At our California health plan, the reserves for the Medicaid expansion membership were also partially based on expected claims in the pricing assumptions. Since experience was ultimately better than assumed in the pricing, this caused an overstatement of reserves as of December 31, 2014.

11. Debt

As of March 31, 2015, maturities of debt for the years ending December 31 are as follows (in thousands):

	Total	2015	2016	2017	2018	2019	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
1.625% Notes (1)	301,551	—	—	—	—	—	301,551
	$ 851,551	$ —	$ —	$ —	$ —	$ —	$ 851,551

(1) The 1.625% Notes have a contractual maturity date in 2044; however, on specified dates beginning in 2018 as described below, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes, or we may redeem any or all of the 1.625% Notes.

1.125% Cash Convertible Senior Notes due 2020. In February 2013, we issued $550.0 million aggregate principal amount of 1.125% cash convertible senior notes (the 1.125% Notes) due January 15, 2020, unless earlier repurchased or converted. Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 at a rate of 1.125% per annum.

The 1.125% Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. The initial conversion rate for the 1.125% Notes is 24.5277 shares of our common stock per $1,000 principal amount of the 1.125% Notes. This represents an initial conversion price of approximately $40.77 per share of our common stock. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture. We may not redeem the 1.125% Notes prior to the maturity date.

Holders may convert their 1.125% Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;
- during the five business day period immediately after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;
- upon the occurrence of specified corporate events; or
- at any time on or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date.

The 1.125% Notes met the stock price trigger in the quarter ended March 31, 2015, and are convertible to cash through at least June 30, 2015. Because the 1.125% Notes may be converted within 12 months, the $440.2 million carrying amount is reported in current portion of long-term debt as of March 31, 2015.

The 1.125% Notes contain an embedded cash conversion option (the 1.125% Conversion Option), which was separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the 1.125% Conversion Option transaction settles or expires. The initial fair value liability of the 1.125% Conversion Option simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance

discount). This discount is amortized to the 1.125% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate of approximately 6%. As of March 31, 2015, the 1.125% Notes have a remaining amortization period of 4.8 years. The 1.125% Notes' if-converted value exceeded their principal amount by approximately $237 million and $93 million as of March 31, 2015, and December 31, 2014, respectively.

1.625% Convertible Senior Notes due 2044. In September 2014, we issued $301.6 million aggregate principal amount of 1.625% convertible senior notes (the 1.625% Notes) due August 15, 2044, unless earlier repurchased, redeemed or converted. Interest on the 1.625% Notes is payable semiannually in arrears on February 15 and August 15, at a rate of 1.625% per annum, beginning on February 15, 2015. In addition, beginning with the semiannual interest period commencing immediately following the interest payment date on August 15, 2018, contingent interest will accrue on the 1.625% Notes during any semiannual interest period in which certain conditions or events occur, or under certain events of default. For example, additional interest of 0.25% per year will be payable on the 1.625% Notes for any semiannual interest period for which the principal amount of 1.625% Notes outstanding is less than $100 million.

The 1.625% Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.625% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The initial conversion rate for the 1.625% Notes is 17.2157 shares of our common stock per $1,000 principal amount of the 1.625% Notes. This represents an initial conversion price of approximately $58.09 per share of our common stock. Upon conversion, we will pay cash and, if applicable, deliver shares of our common stock to the converting holder in an amount per $1,000 principal amount of 1.625% Notes equal to the settlement amount (as defined in the related indenture).

Holders may convert their 1.625% Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on September 30, 2014 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;
- during the five business day period after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.625% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;
- upon the occurrence of specified corporate events;
- if we call any 1.625% Notes for redemption, at any time until the close of business on the business day immediately preceding the redemption date;
- during the period from, and including, May 15, 2018 to the close of business on the business day immediately preceding August 19, 2018; or
- at any time on or after February 15, 2044 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.625% Notes, in integral multiples of $1,000 principal amount, at the option of the holder regardless of the foregoing circumstances.

As of March 31, 2015, the 1.625% Notes were not convertible.

We may not redeem the 1.625% Notes prior to August 19, 2018. On or after August 19, 2018, we may redeem for cash all or part of the 1.625% Notes, except for the 1.625% Notes we are required to repurchase in connection with a fundamental change or on any specified repurchase date. The redemption price for the 1.625% Notes will equal 100% of the principal amount of the 1.625% Notes being redeemed, plus accrued and unpaid interest. In addition, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes for cash on August 19, 2018, August 19, 2024, August 19, 2029, August 19, 2034 and August 19, 2039, in each case, at a specified price equal to 100% of the principal amount of the 1.625% Notes to be repurchased, plus accrued and unpaid interest.

Because the 1.625% Notes have cash settlement features, we have allocated the principal amount between a liability component and an equity component. The reduced carrying value on the 1.625% Notes resulted in a debt discount that is amortized back to the 1.625% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. The expected life of the debt is approximately four years, beginning on the issuance date and ending on the first date we may redeem the notes in August 2018. As of March 31, 2015, the 1.625% Notes have a remaining amortization period of 3.4 years. This has resulted in our recognition of interest expense on the 1.625% Notes at an effective rate approximating what we would

have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 5%. The outstanding 1.625% Notes' if-converted value exceeded their principal amount by approximately $29 million as of March 31, 2015, and did not exceed their principal amount as of December 31, 2014. At March 31, 2015, the equity component of the 1.625% Notes, including the impact of deferred taxes, was $22.9 million.

The principal amounts, unamortized discount (net of premium related to 1.625% Notes), and net carrying amounts of the convertible senior notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
March 31, 2015:			
1.125% Notes	$ 550,000	$ 109,752	$ 440,248
1.625% Notes	301,551	30,715	270,836
	$ 851,551	$ 140,467	$ 711,084
December 31, 2014:			
1.125% Notes	$ 550,000	$ 114,670	$ 435,330
1.625% Notes	301,551	32,784	268,767
	$ 851,551	$ 147,454	$ 704,097

	(In thousands)	
Interest cost recognized for the period relating to the:		
Contractual interest coupon rate	$ 2,772	$ 3,300
Amortization of the discount	6,986	6,314
	$ 9,758	$ 9,614

Lease Financing Obligations. In 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of the Molina Center located in Long Beach, California, and our Ohio health plan office building located in Columbus, Ohio. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated over their remaining useful lives. The lease financing obligation is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Rent will increase 3% per year through the initial term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense amounted to $3.1 million for the three months ended March 31, 2015 and 2014.

As described and defined in further detail in Note 16, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings. We have concluded that we are the accounting owner of the buildings due to our continuing involvement with the properties. We have recorded $37.7 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of March 31, 2015, which represents the total cost incurred by the Landlord for the construction of the buildings, net of accumulated depreciation. As of March 31, 2015, the aggregate amount recorded to lease financing obligations, including the current portion, amounted to $40.5 million. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense was $1.0 million and $0.6 million for the three months ended March 31, 2015 and 2014, respectively. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was insignificant for the three months ended March 31, 2015, and 2014.

12. Derivatives

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

	Balance Sheet Location	March 31, 2015	December 31, 2014
		(In thousands)	
Derivative asset:			
1.125% Call Option	Current assets: Derivative asset	$ 474,121	$ —
	Non-current assets: Derivative asset	$ —	$ 329,323
Derivative liability:			
1.125% Conversion Option	Current liabilities: Derivative liability	$ 473,983	$ —
	Non-current liabilities: Derivative liability	$ —	$ 329,194

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of income, and reported in other expense, net. Gains and losses for our derivative financial instruments are presented individually in the consolidated statements of cash flows, supplemental cash flow information.

As of March 31, 2015, the 1.125% Call Option and the 1.125% Conversion Option were classified as a current asset and current liability, respectively, because the 1.125% Notes may be converted within 12 months of March 31, 2015, as described in Note 11, "Debt."

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Notes in 2013, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 6, "Fair Value Measurements."

1.125% Conversion Option. The embedded cash conversion option within the 1.125% Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Conversion Option, refer to Note 6, "Fair Value Measurements."

13. Stockholders' Equity

Stockholders' equity increased $31.6 million during the three months ended March 31, 2015 compared with stockholders' equity at December 31, 2014. The increase was due to net income of $28.2 million, $1.3 million related to other comprehensive income and $2.1 million related to employee stock transactions.

1.125% Warrants. In connection with the 1.125% Notes Call Spread Overlay transaction described in Note 12, "Derivatives," we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants. We will not receive any additional proceeds if the 1.125% Warrants are exercised.

Securities Repurchase Programs. Effective as of February 25, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This repurchase program extends through December 31, 2015.

Shelf Registration Statement. In May 2012, we filed an automatic shelf registration statement on Form S-3 with the SEC covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Plans. In connection with our equity incentive plans, we issued approximately 273,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the three months ended March 31, 2015.

14. Segment Information

We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our health plans and our direct delivery business. Our health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides MMIS design, development, and implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." For presentation purposes, the cost of centralized services is reported within the Health Plans segment.

	Three Months Ended March 31,	
	2015	2014
	(In thousands)	
Revenue, continuing operations:		
Health Plans segment:		
Premium revenue	$ 2,970,652	$ 1,940,337
Premium tax revenue	95,347	51,693
Health insurer fee revenue	47,948	18,696
Investment income	3,015	1,629
Other revenue	2,303	3,258
Molina Medicaid Solutions segment:		
Service revenue	51,858	53,630
	$ 3,171,123	$ 2,069,243
Income from continuing operations before income tax expense:		
Health Plans segment	$ 68,440	$ 14,019
Molina Medicaid Solutions segment	13,790	10,248
Operating income, continuing operations	82,230	24,267
Other expenses, net	14,866	13,778
	$ 67,364	$ 10,489

15. Commitments and Contingencies

Legal Proceedings. The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem

the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

State of Louisiana. On June 26, 2014, the state of Louisiana filed a Petition for Damages against Molina Medicaid Solutions, Molina Healthcare, Inc., Unisys Corporation, and Paramax Systems Corporation, a subsidiary of Unisys, in the Parish of Baton Rouge, 19th Judicial District, versus number 631612. The Petition alleges that between 1989 and 2012, the defendants utilized an incorrect reimbursement formula for the payment of pharmaceutical claims. We believe we have several meritorious defenses to the claims of the state, and any liability for the alleged claims is not currently probable or reasonably estimable.

USA and State of Florida ex rel. Charles Wilhelm. On July 24, 2014, Molina Healthcare, Inc. and Molina Healthcare of Florida, Inc. were served with a Complaint filed under seal on December 5, 2012 in District Court for the Southern District of Florida by relator, Charles C. Wilhelm, M.D., Case No. 12-24298. The Complaint alleges that in late 2008 and early 2009, in connection with the acquisition of Florida NetPass under which Molina Healthcare of Florida, Inc. began conducting business in the state of Florida, the defendants failed to adequately staff the plan and provide other services, resulting in a disproportionate number of sicker beneficiaries of Florida NetPass moving back into the Florida fee-for-service Medicaid program. This alleged conduct purportedly resulted in a violation of the federal False Claims Act. Both the United States of America and the state of Florida have declined to intervene. We believe we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al. On or around October 14, 2014, Molina Healthcare of California, Molina Healthcare of California Partner Plan, Inc., Mobile Medical Examination Services, Inc. (MedXM), and other health plan defendants were served with a Complaint previously filed under seal in the Central District Court of California by relator, Anita Silingo, Case No. SACV13-1348-FMO(SHx). The Complaint alleges that MedXM improperly modified medical records and otherwise took inappropriate steps to increase members' risk adjustment scores, and that the defendants, including Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc., purportedly turned a "blind eye" to these unlawful practices. The Department of Justice has declined to intervene. We believe that we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

Provider Claims. Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions. Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements upon us that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $928 million at March 31, 2015, and $859 million at December 31, 2014. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $210.6 million and $202.6 million as of March 31, 2015 and December 31, 2014, respectively.

The National Association of Insurance Commissioners (NAIC), adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules which may vary from state to state.

As of March 31, 2015, our health plans had aggregate statutory capital and surplus of approximately $987 million compared with the required minimum aggregate statutory capital and surplus of approximately $581 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2015. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

16. Related Party Transactions

We have entered into a lease (the Amended Lease) with 6th & Pine Development, LLC (the Landlord) for two office buildings. The principal members of the Landlord are John C. Molina, our chief financial officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, John C. Molina has pledged shares of common stock in the Company that he holds. Dr. J. Mario Molina, our chief executive officer, president and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary.

The Amended Lease provides for an annual rent escalator of 3.4% per year, and will expire on December 31, 2029, unless extended or earlier terminated. For information regarding the lease financing obligation, refer to Note 11, "Debt."

Refer to Note 17, "Variable Interest Entities," for a discussion of the Joseph M. Molina, M.D. Professional Corporations.

17. Variable Interest Entities

Joseph M. Molina M.D., Professional Corporations

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's primary shareholder is Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides primary care medical services through its employed physicians and other medical professionals. Beginning in the fourth quarter of 2014, JMMPC also provided certain specialty referral services to our California health plan members through a contracted provider network. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, Molina Medical Management, Inc. (MMM), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will operate at break even, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by MMM are reviewed annually to assure the achievement of this goal.

Separately, our California, Florida, New Mexico, Utah and Washington health plans have entered into primary care services agreements with JMMPC. These agreements direct our health plans to perform a monthly reconciliation, to either fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, such that JMMPC will derive no profit or loss. Because the MMM services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are generally insignificant.

We have determined that JMMPC is a variable interest entity (VIE), and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of March 31, 2015, JMMPC had total assets of $10.7 million, and total liabilities of $8.8 million. As of December 31, 2014, JMMPC had total assets of $31.1 million, and total liabilities of $30.8 million.

Our maximum exposure to loss as a result of our involvement with JMMPC is generally limited to the amounts needed to fund JMMPC's ongoing payroll, employee benefits and medical care costs associated with JMMPC's specialty referral activities. We believe that such loss exposures will be immaterial to our consolidated operating results and cash flows for the foreseeable future.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated. Those known risks and uncertainties include, but are not limited to, the following:

- continuing uncertainties associated with the implementation of the Affordable Care Act, including the full grossed up reimbursement by states of the non-deductible ACA health insurer fee, the Medicaid expansion, the insurance marketplaces, the effect of various implementing regulations, the King v. Burwell case now pending before the Supreme Court, and uncertainties regarding the Medicare-Medicaid dual eligible demonstration programs in California, Illinois, Michigan, Ohio, South Carolina, and Texas;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations, and our ability to reduce over time the high medical costs commonly associated with new patient populations;
- federal or state medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures, including 2014 and 2015 at-risk premium rules in the state of Texas;
- cyber-attacks or other privacy or data security incidents resulting in an inadvertent unauthorized disclosure of protected health information;
- the success of our new health plan in Puerto Rico;
- newly FDA-approved specialty drugs such as Sovaldi, Olysio, Harvoni, and other specialty drugs or generic drugs that are exorbitantly priced but not factored into the calculation of our capitated rates;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- the accurate estimation of incurred but not paid medical costs across our health plans;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates or retroactive premium rate increases;
  efforts by states to recoup previously paid amounts;
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states;
- the continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- complications, member confusion, or enrollment backlogs related to the annual renewal of Medicaid coverage;
- government audits and reviews, and any fine, enrollment freeze, or monitoring program that may result therefrom;
- changes with respect to our provider contracts and the loss of providers;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable or unfavorable resolution of litigation, arbitration, or administrative proceedings, including pending qui tam actions in Florida and California, and the litigation commenced against us by the state of Louisiana alleging that Molina Medicaid Solutions and its predecessors used an incorrect reimbursement formula for the payment of pharmaceutical claims;
- the relatively small number of states in which we operate health plans;
- our management of a portion of College Health Enterprises' hospital in Long Beach, California;

- the availability of adequate financing on acceptable terms to fund and capitalize our expansion and growth, repay our outstanding indebtedness at maturity and meet our liquidity needs, including the interest expense and other costs associated with such financing;
- the failure of a state in which we operate to renew its federal Medicaid waiver;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- public alarm associated with the Ebola virus, measles, or any actual widespread epidemic;
- changes in general economic conditions, including unemployment rates; and
- increasing competition and consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2014.

Company Overview

Molina Healthcare, Inc. provides quality health care to those receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states and the Commonwealth of Puerto Rico, and includes our direct delivery business. As of March 31, 2015, these health plans served nearly 3 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve Health Insurance Marketplace (Marketplace) members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in several states in which we operate, as well as of the management of a hospital in southern California under a management services agreement.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

The following discussion and analysis, with the exception of cash flow information, is presented in the context of continuing operations unless otherwise noted.

Overview of Financial Results, Continuing Operations

Financial results for the first quarter of 2015 improved markedly over the first quarter of 2014 due to higher revenue, greater administrative cost efficiency, and steady medical care costs. Both income from continuing operations before income tax expense and net income per diluted share, continuing operations, increased substantially in the first quarter of 2015 compared with the first quarter of 2014.

Premium revenue increased approximately 53% in the first quarter of 2015 compared with the first quarter of 2014, resulting from:

- An increase of over 38% in enrollment due to growth across all health plan programs.
- An increase of nearly 15% in premium revenue per member per month (PMPM) due to membership growth in programs serving the needs of members with more complex medical conditions for whom we receive higher monthly premiums.

Medical care costs as a percent of premium revenue (the "medical care ratio") were consistent with the first quarter of 2014 at 88.7% and improved over the fourth quarter of 2014 medical care ratio of 89.4%. Medical margin (defined as the excess of premium revenue over medical care costs) increased 53% in 2015 over 2014.

General and administrative expenses as a percentage of total revenue (the "general and administrative expense ratio") decreased significantly to 8.1% in the first quarter of 2015 compared with 9.1% in the first quarter of 2014. The decrease in the general and administrative expense ratio would have been even greater but for expenses associated with the start-up of our Puerto Rico health plan, broker commissions and Marketplace fees. Without these costs, the first quarter 2015 general and administrative expense ratio would have been approximately 7.4%.

Health Care Reform

We believe that government-sponsored initiatives, including the Affordable Care Act (ACA) will continue to provide us with significant opportunities for membership growth in our existing markets and in new programs in the future as follows:

- *Medicaid Expansion*. In the states that have elected to participate, the ACA provides for the expansion of the Medicaid program to offer eligibility to nearly all low-income people under age 65 with incomes at or below 138% of the federal poverty line. Medicaid expansion membership phased in beginning January 1, 2014. Our health plans in California, Illinois, Michigan, New Mexico, Ohio, and Washington participate in Medicaid expansion. At March 31, 2015, our membership included approximately 437,000 Medicaid expansion members, or 15% of total membership.
- *Marketplace*. The ACA authorized the creation of Marketplace health insurance exchanges, allowing individuals and small groups to purchase health insurance that is federally subsidized, effective January 1, 2014. We participate in the Marketplace in all of the states in which we operate, except Illinois and South Carolina. At March 31, 2015, our membership included approximately 266,000 Marketplace members, with approximately 185,000, or 70%, of those members in Florida.

- *Medicare-Medicaid Plans*. To coordinate care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to deliver services to the dual eligible in a more financially efficient manner, 15 states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual-eligible individuals. The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). Our MMPs in California, Illinois, and Ohio offered coverage beginning in 2014; our MMPs in South Carolina and Texas offered coverage beginning in the first quarter of 2015; and we expect to begin offering MMP coverage in Michigan in the second quarter of 2015. At March 31, 2015, our membership included approximately 34,000 integrated MMP members.

Health Insurer Fee Update

Our results continue to be adversely affected by delays in reimbursement of the ACA's Health Insurer Fee (HIF) by some states. Due to progress made in securing agreements for the reimbursement of the HIF with various state Medicaid agencies in 2014, we recognized approximately 73% of the Medicaid-related reimbursement revenue associated with HIF expense in the first quarter of 2015, compared with only 51% in the first quarter of 2014.

Delay in recognition of the HIF expense reimbursement from California, Michigan and Utah reduced income before taxes by approximately $16 million, or $0.20 per diluted share in the first quarter of 2015.

The comparable amount of HIF reimbursement not recognized in the first quarter of 2014 was approximately $16 million, which reduced net income per diluted share, continuing operations, by approximately $0.21 per diluted share.

During the first quarter of 2015, we did not recognize any of the $20 million of outstanding HIF reimbursement related to 2014.

For further discussion of the risks and uncertainties relating to the HIF, refer to the subheading below, "Liquidity and Capital Resources—Financial Condition."

Market Updates - Health Plans Segment

Florida. In the first quarter of 2015, our Florida health plan enrolled 185,000 Marketplace members, more than doubling its total membership as of December 31, 2014.

Puerto Rico. On April 1, 2015, our Puerto Rico health plan became operational, enrolling approximately 350,000 members.

Market Updates - Molina Medicaid Solutions Segment

New Jersey. On April 9, 2015, the state of New Jersey announced its selection of Molina Medicaid Solutions to design and operate its new Medicaid management information system (MMIS). The new contract is effective May 1, 2015, and has a term of 10 years with three one-year renewal options. Molina Medicaid Solutions was the state's previous MMIS provider, and was awarded the new contract as a result of Molina Medicaid Solutions' submission in response to the state of New Jersey's request for proposals.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from our health plans' Medicaid contracts and, to a lesser degree, from Medicare contracts entered into with the Centers for Medicare and Medicaid Services (CMS), a federal government agency.

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new RFP open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled; and regions or service areas. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

Premium revenue is fixed in advance of the periods covered and is not generally subject to significant accounting estimates, except as described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 2, "Significant Accounting Policies." These premium revenues are recognized in the month that members are entitled to receive health care services. Premiums received in advance are deferred.

The amount of the premiums paid to us may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program, on a PMPM basis for the three months ended March 31, 2015. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	PMPM Premiums		
	Low	High	Consolidated
Temporary Assistance for Needy Families (TANF), CHIP (1)	$ 110.00	$ 300.00	$ 180.00
Medicaid Expansion	310.00	500.00	400.00
Aged, Blind or Disabled (ABD)	420.00	1,470.00	900.00
Marketplace	220.00	400.00	330.00
Medicare Special Needs Plans (Medicare)	820.00	1,070.00	1,010.00
Medicare-Medicaid Plan (MMP) – Integrated (2)	1,240.00	3,160.00	2,210.00

(1) CHIP stands for Children's Health Insurance Program.
(2) MMP members who receive both Medicaid and Medicare coverage from Molina Healthcare.

The following tables set forth our Health Plans segment membership as of the dates indicated:

	March 31, 2015	December 31, 2014	March 31, 2014
Ending Membership by Health Plan:			
California	574,000	531,000	418,000
Florida	352,000	164,000	91,000
Illinois	102,000	100,000	5,000
Michigan	256,000	242,000	218,000
New Mexico	222,000	212,000	183,000
Ohio	350,000	347,000	260,000
South Carolina	111,000	118,000	126,000
Texas	268,000	245,000	246,000
Utah	90,000	83,000	80,000
Washington	533,000	497,000	434,000
Wisconsin	107,000	84,000	90,000
	2,965,000	2,623,000	2,151,000
Ending Membership by Program:			
TANF/CHIP	1,825,000	1,809,000	1,659,000
Medicaid Expansion (1)	437,000	385,000	133,000
ABD	358,000	347,000	310,000
Marketplace (1)	266,000	15,000	8,000
Medicare	45,000	49,000	41,000
MMP–Integrated	34,000	18,000	—
	2,965,000	2,623,000	2,151,000

(1) Medicaid expansion membership phased in, and the Marketplace became available for consumers to access coverage, beginning January 1, 2014.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of an MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a

straight-line basis over the contract term during which BPO, hosting, and support and maintenance services are delivered. There may be certain contractual provisions containing contingencies, however that require us to delay recognition of all or part of our service revenue until such contingencies have been removed.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services (including long-term services and supports, or LTSS), general and administrative expenses, premium tax and health insurer fee expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following categories:

- *Fee-for-service expenses:* Under fee-for-service arrangements, we retain the financial responsibility for medical care provided and incur costs based on actual utilization of services. Such expenses are recorded in the period in which the related services are dispensed. Nearly all hospital services and the majority of our primary care and physician specialist services are paid on a fee-for-service basis.

- *Pharmacy expenses:* All drug, injectables, and immunization costs paid through our pharmacy benefit manager are classified as pharmacy expenses.

- *Capitation expenses:* Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.

- *Direct delivery expenses:* All costs associated with our direct delivery of medical care are separately identified.

- *Other medical expenses:* All medically related administrative costs, certain provider incentive costs, reinsurance costs and other health care expenses are classified as other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements in Note 10, "Medical Claims and Benefits Payable," for further information on how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide BPO and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs. In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the contract term, consistent with the revenue recognition period.

Financial Performance Summary, Continuing Operations

The following table briefly summarizes our financial and operating performance from continuing operations for the three months ended March 31, 2015 and 2014 (in thousands, except per-share data and percentages):

	Three Months Ended March 31,		% Change 2014 - 2015
	2015	2014	
Revenue:			
Premium revenue	$ 2,970,652	$ 1,940,337	53.1 %
Service revenue	51,858	53,630	(3.3)
Premium tax revenue	95,347	51,693	84.4
Health insurer fee revenue	47,948	18,696	156.5
Investment income	3,015	1,629	85.1
Other revenue	2,303	3,258	(29.3)
Total revenue	3,171,123	2,069,243	53.3
Operating expenses:			
Medical care costs	2,635,784	1,721,658	53.1
Cost of service revenue	35,902	40,657	(11.7)
General and administrative expenses	256,090	188,087	36.2
Premium tax expenses	95,347	51,693	84.4
Health insurer fee expenses	40,778	22,190	83.8
Depreciation and amortization	24,992	20,691	20.8
Total operating expenses	3,088,893	2,044,976	51.0
Operating income	82,230	24,267	238.9
Other expenses, net:			
Interest expense	14,876	13,822	7.6
Other income, net	(10)	(44)	(77.3)
Total other expenses, net	14,866	13,778	7.9
Income from continuing operations before income tax expense	67,364	10,489	542.2
Income tax expense	39,223	5,655	593.6
Income from continuing operations	$ 28,141	$ 4,834	482.1 %
Diluted net income per share, continuing operations	$ 0.56	$ 0.10	460.0 %
Diluted weighted average shares outstanding	50,071	47,520	5.4 %
Non-GAAP Measures:			
Adjusted net income per share, continuing operations	$ 0.71	$ 0.27	163.0 %
EBITDA	$ 111,379	$ 49,471	125.1 %
Operating Statistics, Continuing Operations:			
Medical care ratio (1)	88.7%	88.7%	
Service revenue ratio (2)	69.2%	75.8%	
General and administrative expense ratio (3)	8.1%	9.1%	
Premium tax ratio (1)	3.1%	2.6%	
Effective tax rate	58.2%	53.9%	
Net income, continuing operations (3)	0.9%	0.2%	

(1) Medical care ratio represents medical care costs as a percentage of premium revenue; premium tax ratio represents premium tax expenses as a percentage of premium revenue plus premium tax revenue.
(2) Service revenue ratio represents cost of service revenue as a percentage of service revenue.
(3) Computed as a percentage of total revenue.

Non-GAAP Financial Measures

We use the following non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance and the performance of other companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not substitutes for or superior to, GAAP measures (GAAP stands for U.S. generally accepted accounting principles).

The first of these non-GAAP measures is earnings before interest, taxes, depreciation and amortization, or EBITDA. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to EBITDA.

	Three Months Ended March 31,	
	2015	2014
	(In thousands)	
Net income	$ 28,153	$ 4,498
Adjustments:		
Depreciation, and amortization of intangible assets and capitalized software	29,110	25,914
Interest expense	14,876	13,822
Income tax expense	39,240	5,237
EBITDA	$ 111,379	$ 49,471

The second of these non-GAAP measures is adjusted net income and adjusted net income per diluted share, continuing operations. Effective for the first quarter of 2015, we have revised the calculation of adjusted net income, continuing operations. We no longer subtract "depreciation, and amortization of capitalized software" and "share-based compensation" from net income, continuing operations to arrive at adjusted net income, continuing operations. We have made this change to better reflect the way in which we evaluate our financial performance, make financing and business decisions, and forecast and plan for future periods. All periods presented below conform to this presentation.

The following tables reconcile net income and net income per diluted share from continuing operations, which we believe to be the most comparable GAAP measures, to adjusted net income and adjusted net income per diluted share, continuing operations.

	Three Months Ended March 31,			
	2015		2014	
	(In thousands, except diluted per-share amounts)			
Net income, continuing operations	$ 28,141	$ 0.56	$ 4,834	$ 0.10
Adjustments, net of tax:				
Amortization of convertible senior notes and lease financing obligations	4,593	0.09	4,205	0.10
Amortization of intangible assets	2,877	0.06	3,329	0.07
Adjusted net income per diluted share, continuing operations	$ 35,611	$ 0.71	$ 12,368	$ 0.27

Results of Operations, Continuing Operations

Three Months Ended March 31, 2015 Compared with Three Months Ended March 31, 2014

Health Plans Segment

Premium Revenue

Premium revenue increased approximately 53% in the first quarter of 2015 compared with the first quarter of 2014, resulting from:

- An increase of over 38% in enrollment due to growth across all health plan programs.
- An increase of nearly 15% in premium revenue PMPM due to membership growth in programs serving the needs of members with more complex medical conditions for whom we receive higher monthly premiums.

Medical Care Costs

In the first quarter of 2015, medical care costs as a percent of premium revenue were consistent with the first quarter of 2014 at 88.7%. Medical margin increased 53% in first quarter of 2015 over the first quarter of 2014.

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended March 31,					
	2015			2014		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 1,948,305	$ 226.04	73.9%	$ 1,181,061	$ 183.21	68.6%
Pharmacy	351,198	40.75	13.3	286,628	44.46	16.7
Capitation	216,325	25.10	8.2	169,439	26.28	9.8
Direct delivery	26,771	3.11	1.0	22,021	3.42	1.3
Other	93,185	10.80	3.6	62,509	9.71	3.6
Total	$ 2,635,784	$ 305.80	100.0%	$ 1,721,658	$ 267.08	100.0%

The following table provides detailed fee-for-service medical claims data for the periods presented (dollars in thousands, except per-member amounts):

	Three Months Ended March 31,	
	2015	2014
Days in claims payable, fee for service	51	46
Number of claims in inventory at end of period	319,300	287,300
Billed charges of claims in inventory at end of period	$ 848,200	$ 517,300
Claims in inventory per member at end of period	0.11	0.13
Billed charges of claims in inventory per member at end of period	$ 286.07	$ 240.49
Number of claims received during the period	8,635,500	5,986,000
Billed charges of claims received during the period	$ 9,891,800	$ 6,354,000

Individual Health Plan Analysis

California. Premium revenue grew approximately 84% in the first quarter of 2015 when compared with the first quarter of 2014, the result of higher Medicaid expansion membership (up 69,000 members) and TANF and ABD membership (up 58,000 members); as well as the start-up of an MMP plan in the second quarter of 2014 (18,000 members at March 31, 2015). Overall, enrollment on a member-month basis increased 46% in the first quarter of 2015 compared with the first quarter of 2014. Increased premium revenue was also driven by a 38% increase in premium revenue PMPM, which was the result of the higher relative premium revenue PMPM among those programs experiencing enrollment growth (Medicaid expansion and MMP); and the addition of long-term care benefits to some of the health plan's ABD membership. Medical margin improved $17.8 million at the California health plan when compared with the first quarter of 2014, primarily due to higher enrollment. The medical care ratio for the California health plan increased to 88.6% in the first quarter of 2015, from 85.5% in the first quarter of 2014 as higher medical care ratios for the TANF and ABD programs more than offset a lower medical care ratio for the Medicaid expansion program.

Florida. The Florida health plan added approximately 185,000 Marketplace members in the first quarter of 2015. As a result, premium revenue nearly tripled, and medical margin improved $17.9 million in the first quarter of 2015 when compared with the first quarter of 2014. The medical care ratio increased to 90.5% from 88.9% in the first quarter of 2014, as higher medical care ratios related to Medicaid programs offset the lower medical care ratio of the Marketplace membership.

Illinois. Premium revenue grew to approximately $104 million in the first quarter of 2015, from $15 million in the first quarter of 2014. The plan experienced significant growth in 2014, primarily within the traditional TANF program, and to a lesser degree within the Medicaid expansion program. Additionally, the plan served its first MMP members in the first half of 2014. The medical care ratio for the Illinois health plan decreased to 85.9% in the first quarter of 2015, from 95.5% in the first quarter of 2014. The plan's higher medical care ratio in early 2014 was primarily the result of a small membership base transitioning to managed care, and increased medically related administrative costs incurred in preparation of anticipated enrollment growth in late 2014.

Michigan. Premium revenue grew approximately $46 million, or 27%, in the first quarter of 2015 when compared with the first quarter of 2014 due to the addition of Medicaid expansion members starting in the second quarter of 2014. Medicaid expansion enrollment reached 51,000 members by March 31, 2015. Higher medical care ratios for both the TANF and ABD programs offset a lower medical care ratio for the Medicaid expansion program; resulting in an increase of the health plan’s consolidated medical care ratio to 84.2% in the first quarter of 2015, from 78.0% for the first quarter of 2014.

New Mexico. Premium revenue grew approximately $89 million, or 39%, in the first quarter of 2015 when compared with the first quarter of 2014, due to substantial increases in membership in all Medicaid programs. The medical care ratio increased to 93.0% in the first quarter of 2015, from 87.3% in the first quarter of 2014, as increases in the medical care ratios of the TANF and ABD programs offset lower medical care ratios for the Medicaid expansion and long-term care ABD programs. The medical care ratio in the first quarter of 2015 of 93.0% was significantly lower than the medical care ratio of 98.4% recorded in the fourth quarter of 2014.

Ohio. Premium revenue grew approximately $237 million, or 85%, in the first quarter of 2015 when compared with the first quarter of 2014, due to growth in membership within the Medicaid expansion, MMP, and ABD programs. The medical care ratio of the Ohio health plan decreased to 80.2% in the first quarter of 2015, from 85.3% in the first quarter of 2014, due to decreased medical care ratios across all programs.

South Carolina. The medical care ratio for the South Carolina health plan decreased to 81.3% in the first quarter of 2015, from 94.0% in the first quarter of 2014. In the first quarter of 2014, the plan enrolled its first members who were transitioned from Medicaid fee-for-service to managed care.

Texas. Premium revenue grew approximately $62 million, or 19%, in the first quarter of 2015 when compared with the first quarter of 2014, primarily due to the addition of ABD members receiving nursing facility benefits effective March 1, 2015. The medical care ratio for the Texas health plan increased slightly to 92.1% in the first quarter of 2015, from 91.5% in the first quarter of 2014.

We did not recognize approximately $7 million before income taxes, or $0.09 per diluted share, of the approximately $9 million of quality revenue available to the Texas health plan in the first quarter of 2015. This compares with approximately $6 million before income taxes, or $0.08 per diluted share, of the approximately $9 million of quality revenue available to the Texas health plan in the first quarter of 2014. Absent quality revenue and profit-sharing adjustments, the medical care ratio at the Texas health plan would have been approximately 89% for the first quarter of 2015 and 88% for the first quarter of 2014.

We recognized no Texas quality revenue related to 2014 in the first quarter of 2015. We previously disclosed that approximately $20 million of Texas quality revenue for 2014 has not been recognized because we lack sufficient information to calculate how much we are owed. We may be able to recognize additional revenue from 2014 Texas quality incentives in the future.

Utah. Financial performance at the Utah health plan declined in the first quarter of 2015, when compared with the first quarter of 2014, due to deteriorating margins for both Medicaid and Medicare products. The medical care ratio of the Utah health plan increased to 96.1% in the first quarter of 2015, from 85.4% in the first quarter of 2014.

Washington. Premium revenue grew approximately $53 million, or 16%, in the first quarter of 2015 when compared with the first quarter of 2014, primarily due to growth in Medicaid expansion membership. The medical care ratio of the Washington health plan increased to 93.6% in the first quarter of 2015, from 92.2% in the first quarter of 2014, as a higher medical care ratio for members served under the TANF program more than offset a lower medical care ratio in the ABD program.

Wisconsin. Premium revenue grew approximately $22 million, or 57%, in the first quarter of 2015 when compared with the first quarter of 2014 as a result of increased Marketplace enrollment. The medical care ratio of the Wisconsin health plan increased to 80.7% in the first quarter of 2015, from 74.8% in the first quarter of 2014. We have previously expressed our belief that medical care ratios below 80% are not sustainable.

Operating Data

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan and program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended March 31, 2015						
	Member Months[1]	Premium Revenue		Medical Care Costs		MCR[2]	Medical Margin
		Total	PMPM	Total	PMPM		
California	1,673	$ 510,544	$ 305.10	$ 452,435	$ 270.37	88.6%	$ 58,109

	8,619	$ 2,970,652	$ 344.65	$ 2,635,784	$ 305.80	88.7%	$ 334,868

(1) Three months ended March 31, 2014 data not presented due to lack of comparability.
(2) A member month is defined as the aggregate of each month's ending membership for the period presented.
(3) "MCR" represents medical costs as a percentage of premium revenue.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended March 31,	
	2015	2014
	(In thousands)	
Service revenue before amortization	$ 52,536	$ 54,359
Amortization recorded as reduction of service revenue	(678)	(729)
Service revenue	51,858	53,630
Cost of service revenue	35,902	40,657
General and administrative costs	1,996	1,750
Amortization of customer relationship intangibles	170	975
Operating income	$ 13,790	$ 10,248

Operating income for our Molina Medicaid Solutions segment increased $3.5 million in the first quarter of 2015, compared with the first quarter of 2014, primarily the result of a renegotiated state contract, various operational efficiencies, and decreased intangible amortization.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses as a percentage of total revenue decreased significantly to 8.1% in the first quarter of 2015 compared with 9.1% in the first quarter of 2014. The decrease in the general and administrative expense ratio would have been even greater but for expenses associated with our Puerto Rico start-up health plan, and the expansion of our Marketplace enrollment. Absent the costs of the Puerto Rico start-up and Marketplace broker commissions and exchange fees, the first quarter 2015 general and administrative expense ratio would have been approximately 7.4%.

Premium Tax Expense

Premium tax expense was 3.1% in the first quarter of 2015, compared with 2.6% in the first quarter of 2014. In June 2014, the state of Michigan instituted a 6% use tax on medical premiums. That state has agreed to fund this tax through rate increases; as a result, we recorded approximately $12 million in additional revenue in the first quarter of 2015, as well as a corresponding premium tax expense.

Health Insurer Fee Revenue and Expenses

Health insurer fee revenue, as a percentage of premium revenue, was 1.6% in the first quarter of 2015 and 1.0% in the first quarter of 2014. Health insurer fee expenses, as a percentage of premium revenue, were 1.4% in the first quarter of 2015 and 1.1% in the first quarter of 2014. Both HIF revenue and expenses increased over the prior year proportionally to the increase in

the total HIF tax base, which is assessed to all insurers. This base increased to $11.3 billion in 2015, from $8.0 billion in 2014. Refer to "Liquidity and Capital Resources—Financial Condition" below, for further discussion of the HIF.

Depreciation and Amortization

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Three Months Ended March 31,			
	2015		2014	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 21,103	0.7%	$ 16,136	0.8%
Amortization of intangible assets, continuing operations	3,889	0.1	4,555	0.2
Depreciation and amortization, continuing operations	24,992	0.8	20,691	1.0
Amortization recorded as reduction of service revenue	678	—	729	—
Amortization of capitalized software recorded as cost of service revenue	6,904	0.2	11,574	0.6
Depreciation and amortization reported in the statement of cash flows	$ 32,574	1.0%	$ 32,994	1.6%

Interest Expense

Interest expense increased to $14.9 million for the first quarter of 2015, from $13.8 million for the first quarter of 2014. The increase was due primarily to the issuance of the 1.625% Notes in third quarter of 2014. For further details regarding convertible senior notes transactions, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 11, "Debt."

Interest expense includes non-cash interest expense relating to the amortization of the discount on our long-term debt obligations, which amounted to $7.3 million and $6.7 million for the first quarter of 2015, and 2014, respectively.

Income Taxes

The provision for income taxes in continuing operations was recorded at an effective rate of 58.2% for the first quarter of 2015, compared with 53.9% for the first quarter of 2014. The first quarter 2015 rate is higher primarily due to the increase in the nondeductible HIF.

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue a short time before we pay for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of 10 years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be three years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of March 31, 2015, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our

restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income was $3.0 million for the three months ended March 31, 2015, compared with $1.6 million for the three months ended March 31, 2014. Our annualized portfolio yield for the three months ended March 31, 2015 and 2014 was 0.4%.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Liquidity

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Three Months Ended March 31,		
	2015	2014	Change
	(In thousands)		
Net cash provided by operating activities	$ 553,633	$ 210,897	$ 342,736
Net cash used in investing activities	(227,790)	(27,491)	(200,299)
Net cash provided by (used in) financing activities	5,118	(35,932)	41,050
Net increase in cash and cash equivalents	$ 330,961	$ 147,474	$ 183,487

Operating Activities. Cash provided by operating activities increased $342.7 million year over year, primarily due to the changes in receivables, accounts payable and accrued liabilities, and medical claims and benefits payable, partially offset by the change in deferred revenue.

The decrease in accounts receivable provided $144.3 million, primarily due to collections of premiums receivable at our California health plan in the first quarter of 2015. The increase in accounts payable and accrued liabilities provided $130.4 million, primarily due to the accrual of the 2015 HIF in the first quarter of 2015. The increase in medical claims and benefits payable provided $97.9 million in connection with our membership growth in the first quarter of 2015, as described above. These items were partially offset by the $50.3 million decline relating to the change in deferred revenue in the first quarter of 2015.

Investing Activities. Cash used in investing activities in the first quarter of 2015 increased to $227.8 million, from $27.5 million in the same period of 2014 primarily due to increased purchases of investments.

Financing Activities. Cash provided by financing activities in the first quarter of 2015 amounted to $5.1 million. Cash used in financing activities in the first quarter of 2014 related primarily to the settlement of $38.1 million of contingent consideration liabilities for our 2013 South Carolina health plan acquisition, with no comparable activity in the first quarter of 2015.

Financial Condition

On a consolidated basis, at March 31, 2015, working capital amounted to $682.4 million, compared with $1,070.6 million at December 31, 2014.

As described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 11, "Debt," our 1.125% Notes met the stock price trigger in the quarter ended March 31, 2015, and are convertible to cash through at least June 30, 2015. Because the 1.125% Notes may be converted within 12 months, the $440.2 million carrying amount is reported in current portion of long-term debt as of March 31, 2015, which resulted in decreased working capital as of March 31, 2015. We believe that the amount of the 1.125% Notes that may be converted over the next twelve months, if any, will be insignificant.

At March 31, 2015, and December 31, 2014, we had cash and investments, including restricted investments, of $3,178.1 million, and $2,665.9 million, respectively. We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Health Insurer Fee. We expect the 2015 HIF assessment related to our Medicaid business to be approximately $148 million, with an expected tax effect from the reimbursement of the assessment of approximately $91 million. Therefore, the total reimbursement necessary as a result of the Medicaid-related 2015 HIF assessment is approximately $239 million. We have

secured agreements from all of our state partners except California, Michigan and Utah for the reimbursement of the 2015 HIF. Of this total 2015 HIF assessment, $65 million relates to our California, Michigan and Utah health plans.

Delay in recognition of the HIF expense reimbursement from California, Michigan and Utah reduced income before taxes by approximately $16 million in the first quarter of 2015. We recognized no HIF reimbursement related to 2014 ($20 million in the aggregate) in the first quarter of 2015. However, in April 2015 we received reimbursement of the 2014 HIF, including the related tax effects, from the state of California.

We continue to work with the states of California, Michigan and Utah to secure agreement for the reimbursement for the full economic impact of the HIF. The failure of our state partners to reimburse us in full for the HIF and its related tax effects could have a material adverse effect on our business, financial condition, cash flows and results of operations.

The following table provides the details of our HIF revenue reimbursement by health plan as of March 31, 2015 (in thousands):

	HIF Reimbursement Revenue, Gross[1]		
	Three Months Ended March 31, 2015		Year Ended Dec. 31, 2015
	Recognized	Necessary for Full Reimbursement	Necessary for Full Reimbursement
2015 HIF:			
California	$ —	$ 7,724	$ 30,898
Florida	2,027	2,027	8,108
Illinois	965	965	3,861
Michigan	—	6,998	27,993
New Mexico	7,539	7,539	30,157
Ohio	11,936	11,936	47,743
South Carolina	3,053	3,053	12,214
Texas	5,839	5,839	23,357
Utah	—	1,453	5,813
Washington	10,951	10,951	43,802
Wisconsin	1,126	1,126	4,505
Subtotal, Medicaid	43,436	59,611	238,451
Marketplace	398	398	1,586
Medicare	5,702	5,702	22,801
	$ 49,536	$ 65,711	$ 262,838
Recognized in:			
Health insurer fee revenue	$ 47,948		
Premium tax revenue	1,588		
	$ 49,536		

(1) Amounts in the table include the Company's estimate of the full economic impact of the HIF including premium tax and the income tax effect.

Regulatory Capital and Dividend Restrictions

For information on our regulatory capital requirements and dividend restrictions, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, Note 15, "Commitments and Contingencies."

Future Sources and Uses of Liquidity

For information on our debt instruments, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Debt."

For information on our shelf registration statement and our securities repurchase program, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 13, "Stockholders' Equity."

Contractual Obligations

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2014, was disclosed in our 2014 Annual Report on Form 10-K. There were no material changes to this previously filed information outside the ordinary course of business during the three months ended March 31, 2015. For further discussion and maturities of our long-term debt, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Debt."

Critical Accounting Estimates

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 10, "Medical Claims and Benefits Payable," for a table which presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements.
- *Health Plans segment contractual provisions that may adjust or limit revenue or profit*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the first quarter of 2015 in connection with such contractual provisions.
- *Health Plans segment quality incentives*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the first quarter of 2015 in connection with such quality incentives.
- *Molina Medicaid Solutions segment revenue and cost recognition*.

There have been no significant changes during the three months ended March 31, 2015, to the items that we disclosed as our critical accounting estimates in our discussion and analysis of financial condition and results of operations in our Annual Report on Form 10-K for the year ended December 31, 2014.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC, a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of 10 years and an average duration of three years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our chief executive officer and our chief financial officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended March 31, 2015 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

A description of our legal proceedings is included in and incorporated by reference to Note 15 of the Notes to the Consolidated Financial Statements contained in Part I, Item 1 of this report.

Item 1A. Risk Factors

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in Part I, Item 1A – Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2014. The risk factors described herein and in our 2014 Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, or results of operations.

There have been no material changes to the risk factors disclosed in our 2014 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Share repurchase activity during the three months ended March 31, 2015 was as follows:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (b)
January 1 - January 31	3,541	$ 53.53	—	$ —
February 1 - February 28	1,721	$ 50.91	—	$ 50,000,000
March 1 - March 31	133,392	$ 63.69	—	$ 50,000,000
Total	138,654	$ 63.27	—	

(a) During the three months ended March 31, 2015, we withheld 138,654 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

(b) Effective as of February 25, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This repurchase program extends through December 31, 2015.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.

Item 6. Exhibits

Reference is made to the accompanying Index to Exhibits.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended March 31, 2015 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Molina Healthcare, Inc.
Form 10-K
For the Year Ended December 31, 2014
TABLE OF CONTENTS

This Annual Report on Form 10-K ("Form 10-K") contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that involve risks and uncertainties. Many of the forward-looking statements are located under the headings "Business," and "Management's Discussion and Analysis of Financial Condition and Results of Operations." Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Forward-looking statements can also be identified by words such as "future," "anticipates," "believes," "estimates," "expects," "intends," "plans," "predicts," "will," "would," "could," "can," "may," and similar terms. Forward-looking statements are not guarantees of future performance and the Company's actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, those discussed in Part I, Item 1A of this Form 10-K under the heading "Risk Factors." Each of the terms "Company," "Molina Healthcare," "we," "our," and "us," as used herein refers collectively to Molina Healthcare, Inc. and its wholly owned subsidiaries, unless otherwise stated. The Company assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law.

PART I

Item 1: Business

OVERVIEW

Molina Healthcare, Inc. provides quality health care to those receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program.

As of December 31, 2014, our health plans served over 2.6 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Dr. C. David Molina founded our company in 1980 as a provider organization serving the Medicaid population in Southern California. Today, we remain a provider-focused company led by his son, Dr. J. Mario Molina.

Significant Accomplishments in 2014

Our mission is to provide quality health care to those receiving government assistance. Our goal is to achieve this mission while improving our financial strength. Our significant operational, financial and strategic accomplishments supporting this goal during 2014 included:

- *Expanding existing markets.* Our Health Plans segment enrollment has grown approximately 36% since December 31, 2013, primarily a result of:
    - Our 2014 growth initiatives associated with the Affordable Care Act (ACA). Since the inception of these programs in January 2014 through the end of fiscal 2014, we have added approximately 385,000 Medicaid expansion members, 18,000 integrated Medicare-Medicaid Plan (MMP) members, and 15,000 Marketplace members;
    - The inception and growth of operations at our newer health plans in South Carolina and Illinois, adding over 200,000 members in the aggregate in fiscal 2014; and
    - Acquisition of two Medicaid contracts in Florida, which added approximately 73,000 new members in fiscal 2014.
- *Entering new strategic markets.* In 2014, we were awarded a managed care contract in the Commonwealth of Puerto Rico that is expected to enroll its first members April 1, 2015. Total enrollment is expected to be approximately 350,000 new members, with anticipated annualized revenue of $750 million.
- *Funding future growth.* Debt financing transactions generated net cash of approximately $123 million; such transactions both extended the maturity date and lowered the rate of our convertible senior notes previously due in 2014.

Our Structure

We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment. We derive our revenues primarily from health insurance premiums and service revenues. Refer to Part II, Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 2, "Significant Accounting Policies," and Note 21, "Segment Information," for revenue information by state health plan, and segment revenue, profit and total asset information, respectively.

The Health Plans segment consists of operational health plans in 11 states and our direct delivery business. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the management of a hospital in southern California under a management services agreement, and the operation of primary care clinics in several states in which we operate health plans. Our Health Plans segment operates in a highly regulated environment, with stringent minimum capitalization requirements that limit the ability of our health plan subsidiaries to pay dividends to us.

Our Molina Medicaid Solutions segment provides design, development, implementation (DDI), and business process outsourcing (BPO) solutions to state governments for their Medicaid management information systems (MMIS). MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia; the U.S. Virgin Islands; and a contract to provide pharmacy rebate administration services for the Florida Medicaid program. We added the Molina Medicaid Solutions segment to our business in 2010 to expand our product offerings to include support of state Medicaid agency administrative needs, reduce the variability in our earnings resulting from fluctuations in medical care costs, improve our operating profit margin percentages, and improve our cash flow by adding a business for which there are no restrictions on dividend payments.

Our reliance on operations in a limited number of states could cause our revenue and profitability to change suddenly and unexpectedly. Additionally, our inability to continue to operate in any of the states in which we currently operate, or a significant change in the nature of our existing operations, could adversely affect our business, financial condition, cash flows, or results of operations.

Health Care Reform

The ACA has made broad-based changes to the U.S. health care system that have significantly affected the U.S. economy and our business. We expect the ACA to continue to significantly impact our business operations and financial results, including our medical care ratios.

Key components of the legislation will continue to be phased in over the next several years, with the most significant changes having occurred at the start of 2014, including the implementation of the Medicaid expansion (in electing states) and Marketplace programs, Medicare and Marketplace minimum medical loss ratios (MLRs), and new industry-wide fees, assessments, and taxes. We have dedicated material resources and have incurred material expenses in implementing and complying with the ACA, and we will continue to do so. As a result of the novelty and extremely broad scale of all of the programmatic changes effected by the ACA, many of the business and market impacts of the ACA will not be known for several years. Further, given the inherent difficulty of foreseeing how individuals will respond to the choices afforded to them by the ACA, we cannot predict the full effect the ACA will have on us.

Our Strategic Growth Initiatives

Our mission is to provide quality health care to those receiving government assistance. This mission drives our strategic growth and growth-related initiatives as follows:

Enter New Programs Within Existing Markets

- *Medicaid Expansion*. In the states that have elected to participate, the ACA provides for the expansion of the Medicaid program to offer eligibility to nearly all low-income people under age 65 with incomes at or below 138% of the federal poverty line. Medicaid expansion membership phased in beginning January 1, 2014. Since that date, our health plans in California, Illinois, Michigan, New Mexico, Ohio, and Washington have begun participating in Medicaid expansion. At December 31, 2014, our membership included approximately 385,000 Medicaid expansion members, or 15% of total membership.
- *Health Insurance Marketplace*. The ACA authorized the creation of Marketplace insurance exchanges, allowing individuals and small groups to purchase health insurance that is federally subsidized, effective January 1, 2014. We participate in the Marketplace in all of the states in which we operate, except Illinois and South Carolina. At December 31, 2014, we had approximately 15,000 Marketplace members.
- *Medicare-Medicaid Plans*. Policymakers at the federal and state levels are increasingly focused on the design and implementation of programs that improve the coordination of care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to deliver services to the dual eligible in a more financially efficient manner. As a result of these efforts, 15 states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual-eligible individuals. The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). Our MMPs in California, Illinois, and Ohio offered coverage beginning in 2014, and we expect to begin offering MMP coverage in South Carolina and Texas in the first quarter of 2015, and in Michigan in the second quarter of 2015.

- *Direct Delivery*. Growth and aging of the U.S. population foreshadows an increasing shortage of physicians over the next 15 years. Health care reform is expected to worsen this shortage. We believe the shortage will be felt most acutely among already under-served populations, such as the financially vulnerable families and individuals we serve. While we have no plans to become an organization that fully integrates primary care delivery with our health plans, by leveraging our direct delivery capability on a selective basis we can improve access for our plan members in areas that are most under-served by primary care providers. We operate primary care clinics in the states of California, Florida, New Mexico, Utah, Virginia and Washington. In addition, we perform certain medical and administrative management services for a hospital in Long Beach, California, including the assumption of financial benefit and risk for a number of acute care beds at the hospital. We believe that this arrangement improves hospital access for our members in the Long Beach, California area, and enhances our overall direct delivery strategy. We may incur losses while we seek to modify various business operations and patient behaviors under the management services agreement.

Enter New Strategic Markets

We plan to continue to enter new markets through both acquisitions and by building our own start-up operations. We intend to focus our expansion in markets with competitive provider communities, supportive regulatory environments, significant size, and, where practicable, mandated Medicaid managed care enrollment. As described above, in December 2014 we entered into a Medicaid contract with the Puerto Rico Health Insurance Administration. The operational start date for the program is expected to be April 1, 2015.

Deliver Administrative Value to Medicaid Agencies

As Medicaid expenditures increase, we believe that an increasing number of states' and other Medicaid agencies will demand comprehensive solutions that improve both quality and cost-effectiveness. We intend to use our MMIS solution to provide state Medicaid agencies with a flexible and robust solution to their administrative needs. We believe that our MMIS platform, together with our extensive experience in health care management and health plan operations, enables us to offer state and other Medicaid agencies a comprehensive suite of Medicaid-related solutions that meets their needs for quality and for the cost-effective operation of their Medicaid programs.

Leverage Operational Efficiencies

We intend to leverage the operational efficiencies created by our centralized administrative infrastructure and flexible information systems to earn higher margins on future revenues. We believe our administrative infrastructure has significant expansion capacity, allowing us to integrate new members from expansion within existing markets and enter new markets at lower incremental cost. For example, our general and administrative expenses as a percentage of revenue (the general and administrative expense ratio) declined to 7.9% for the year ended December 31, 2014, compared with 10.1% for the year ended December 31, 2013.

OUR INDUSTRY

Medicaid

Medicaid was established in 1965 under the U.S. Social Security Act to provide health care and long-term care services and support to low-income Americans. Although jointly funded by federal and state governments, Medicaid is a state-operated and state-implemented program. Subject to federal laws and regulations, states have significant flexibility to structure their own programs in terms of eligibility, benefits, delivery of services, and provider payments. As a result, there are 56 separate Medicaid programs—one for each U.S. state, each U.S. territory, and the District of Columbia.

The federal government guarantees matching funds to states for qualifying Medicaid expenditures based on each state's federal medical assistance percentage (FMAP). A state's FMAP is calculated annually and varies inversely with average personal income in the state. The average FMAP across all states is currently about 57%, and ranges from a federally established FMAP floor of 50% to as high as 74%.

The most common state-administered Medicaid program is the Temporary Assistance for Needy Families program (TANF), which covers primarily low-income mothers and children. In states that have elected to participate, Medicaid expansion provides eligibility to nearly all low-income people under age 65 with incomes at or below 138% of the federal poverty line. Another common state-administered Medicaid program is for aged, blind or disabled (ABD) Medicaid beneficiaries, which covers low-income persons with chronic physical disabilities or behavioral health impairments. ABD beneficiaries represent a growing portion of all Medicaid recipients, and typically use more services because of their critical health issues. Additionally, the Children's Health Insurance Program (CHIP) is a joint federal and state matching program that provides health care coverage to children whose families earn too much to qualify for Medicaid coverage. States have the option of administering CHIP through their Medicaid programs. As of December 31, 2014, approximately 70% of our members were TANF beneficiaries, 15% were Medicaid expansion beneficiaries, 12% were ABD beneficiaries, 2% were Medicare beneficiaries, and 1% were integrated MMP and Marketplace beneficiaries combined. For the year ended December 31, 2014, approximately 54% of our premium revenue was from TANF and Medicaid expansion membership combined; 36% was from ABD membership, 7% was from Medicare membership, 2% was from MMP integrated membership, and 1% was from Marketplace membership.

Every state Medicaid program must balance many potentially competing demands, including the need for quality care, adequate provider access, and cost-effectiveness. To improve quality and provide more uniform and cost-effective care, many states have implemented Medicaid managed care programs. These programs seek to improve access to coordinated health care services, including preventive care, and to control health care costs. Under Medicaid managed care programs, a health plan receives capitation payments from the state. The health plan, in turn, arranges for the provision of health care services by contracting with a network of medical providers. The health plan implements care management and care coordination programs that seek to improve both care access and care quality, while controlling costs more effectively.

While many states have embraced Medicaid managed care programs, others continue to operate traditional fee-for-service programs to serve all or part of their Medicaid populations. Under fee-for-service Medicaid programs, health care services are made available to beneficiaries as they seek that care, without the benefit of a coordinated effort to maintain and improve their health. As a consequence, treatment is often postponed until medical conditions become more severe, leading to higher costs and more unfavorable outcomes. Additionally, providers paid on a fee-for-service basis are compensated based upon services they perform, rather than health outcomes, and therefore lack incentives to coordinate preventive care, monitor utilization, and control costs.

Medicare

Medicare is a federal program that provides eligible persons age 65 and over and some disabled persons a variety of hospital, medical insurance, and prescription drug benefits. Medicare is funded by Congress, and administered by the Centers for Medicare and Medicaid Services (CMS). Medicare beneficiaries may enroll in a Medicare Advantage plan, under which managed care plans contract with CMS to provide benefits that are comparable to original Medicare. Such benefits are provided in exchange for a fixed per-member per-month (PMPM) premium payment that varies based on the county in which a member resides, the demographics of the member, and the member's health condition.

Since 2006, Medicare beneficiaries have had the option of selecting a new prescription drug benefit from an existing Medicare Advantage plan. The drug benefit, available to beneficiaries for a monthly premium, is subject to certain cost sharing depending upon the specific benefit design of the selected plan.

Medicaid Management Information Systems

Because Medicaid is a state-administered program, every state must have mechanisms, policies, and procedures in place to perform a large number of crucial functions, including the determination of eligibility and the reimbursement of medical providers for services provided. This requirement exists regardless of whether a state has adopted a fee-for-service or a

managed care delivery model. MMIS are used by states to support these administrative activities. Although a small number of states build and operate their own MMIS, a far more typical practice is for states to sub-contract the design, development, implementation, and operation of their MMIS to private parties. Through our Molina Medicaid Solutions segment, we actively participate in this market.

Competition

The Medicaid managed care industry is fragmented, and the competitive landscape is subject to ongoing changes as a result of health care reform, business consolidations and new strategic alliances. We compete with a large number of national, regional, and local Medicaid service providers, principally on the basis of size, location, quality of provider network, quality of service, and reputation. Our primary competitors in the Medicaid managed care industry include Centene Corporation, WellCare Health Plans, Inc., UnitedHealth Group Incorporated, Anthem, Inc., and Aetna Inc. Competition can vary considerably from state to state. Below is a general description of our principal competitors for state contracts, members, and providers:

- Multi-Product Managed Care Organizations - National and regional managed care organizations that have Medicaid members in addition to numerous commercial health plan and Medicare members.
- Medicaid HMOs - National and regional managed care organizations that focus principally on providing health care services to Medicaid beneficiaries, many of which operate in only one city or state.
- Prepaid Health Plans - Health plans that provide less comprehensive services on an at-risk basis or that provide benefit packages on a non-risk basis.
- Primary Care Case Management Programs - Programs established by the states through contracts with primary care providers to provide primary care services to Medicaid beneficiaries, as well as to provide limited oversight of other services.

We will continue to face varying levels of competition. Health care reform proposals may cause organizations to enter or exit the market for government sponsored health programs. However, the licensing requirements and bidding and contracting procedures in some states may present partial barriers to entry into our industry.

We compete for government contracts, renewals of those government contracts, members, and providers. State agencies consider many factors in awarding contracts to health plans. Among such factors are the health plan's provider network, medical management, degree of member satisfaction, timeliness of claims payment, and financial resources. Potential members typically choose a health plan based on a specific provider being a part of the network, the quality of care and services available, accessibility of services, and reputation or name recognition of the health plan. We believe factors that providers consider in deciding whether to contract with a health plan include potential member volume, payment methods, timeliness and accuracy of claims payment, and administrative service capabilities.

Molina Medicaid Solutions competes with large MMIS vendors, such as HP Enterprise Services (formerly known as EDS), ACS (owned by Xerox Corporation), Computer Services Corporation, and CNSI.

BUSINESS OPERATIONS

Our Strengths

From a strategic perspective, we believe our two business segments allow us to participate in an expanding sector of the economy and continue our mission to provide quality health services to financially vulnerable families and individuals covered by government programs. Our approach to our business is based on the following strengths:

Comprehensive Medicaid Services. We offer a complete suite of Medicaid services, ranging from quality care, disease management, cost management, and direct delivery of health care services, to state-level MMIS administration through our Molina Medicaid Solutions segment. We have the ability to draw upon our experience and expertise in each of these areas to enhance the quality of the services we offer in the others. We also believe that we may have opportunities to market to state Medicaid agencies various cost containment and quality practices used by our health plans, such as care management and care coordination, for incorporation into their own fee-for-service Medicaid programs.

Flexible Service Delivery Systems. Our health plan care delivery systems are diverse and readily adaptable to different markets and changing conditions. We arrange health care services with a variety of providers, including independent physicians and medical groups, hospitals, ancillary providers, and our own clinics. Our systems support multiple types of contract models. Our provider networks are well-suited, based on medical specialty, member proximity, and cultural sensitivity, to provide services to our members. We believe that our Molina Medicaid Solutions platform, which is based on commercial off-the-shelf technology, has the flexibility to meet a wide variety of state Medicaid administrative needs in a timely and cost-effective manner.

Proven Expansion and Acquisition Capability. We have successfully replicated the business model of our Health Plans segment through the acquisition of health plans, the start-up development of new operations, and the transition of members from other health plans. The initial acquisitions of our New Mexico, South Carolina and Wisconsin health plans have demonstrated our ability to expand into new states. The establishment of our health plans in Florida, Illinois, Ohio, Texas and Utah reflects our ability to replicate our business model on a start-up basis in new states, while significant contract acquisitions in California, Michigan, New Mexico and Washington have demonstrated our ability to expand our operations within states in which we were already operating.

Administrative Efficiency. Operationally, our two business segments share a common systems platform, which allows for economies of scale and common experience in meeting the needs of state Medicaid programs. We have centralized and standardized various functions and practices to increase administrative efficiency. The steps we have taken include centralizing claims processing and information services onto a single platform and standardization of medical management programs, pharmacy benefits management contracts, and health education programs. In addition, we have designed our administrative and operational infrastructure to be scalable for cost-effective expansion into new and existing markets.

Recognition for Quality of Care. The National Committee for Quality Assurance (NCQA) has accredited nine of our 11 Medicaid managed care plans. We believe that these objective measures of the quality of the services that we provide will become increasingly important to state Medicaid agencies.

Experience and Expertise. Since the founding of our company in 1980 to serve the Medicaid population in southern California through a small network of primary care clinics, we have increased our membership to 2.6 million members as of December 31, 2014, expanded our Health Plans segment to 11 states, and added our Molina Medicaid Solutions segment. Our experience over more than 30 years has allowed us to develop strong relationships with the constituents we serve, establish significant expertise as a government contractor, and develop sophisticated disease management, care coordination and health education programs that address the particular health care needs of our members. We also benefit from a thorough understanding of the cultural and linguistic needs of Medicaid populations.

Pricing

Medicaid. Under our Medicaid contracts, state government agencies pay our health plans fixed PMPM rates that vary by state, line of business and demographics; and we arrange, pay for and manage health care services provided to Medicaid beneficiaries. Therefore, our health plans are at risk for the medical costs associated with their members' health care. The rates we receive are subject to change by each state and, in some instances, provide for adjustments for health risk factors. CMS requires these rates to be actuarially sound. Payments to us under each of our Medicaid contracts are subject to the annual appropriation process in the applicable state.

Medicare. Under Medicare Advantage, managed care plans contract with CMS to provide benefits in exchange for a fixed PMPM premium payment that varies based on the county in which a member resides, and adjusted for demographic and health risk factors. CMS also considers inflation, changes in utilization patterns and average per capita fee-for-service Medicare costs in the calculation of the fixed PMPM premium payment.

Amounts payable to us under the Medicare Advantage contracts are subject to annual revision by CMS, and we elect to participate in each Medicare service area or region on an annual basis. Medicare Advantage premiums paid to us are subject to

federal government reviews and audits which can result, and have resulted, in retroactive and prospective premium adjustments. Compared with our Medicaid plans, Medicare Advantage contracts generate higher average PMPM revenues and health care costs.

Marketplace. For our Marketplace plans, we develop premium rates during early spring of any given year to take effect on January 1st of the following year. We develop our premium rates based on our estimates of projected member utilization, medical unit costs, and administrative costs, with the intent of realizing a target pretax percentage profit margin. In setting premium rates for our Marketplace plans, we also take into account the competitive environment on a region–by–region basis. Our actuaries certify the actuarial soundness of Marketplace premiums in the rate filings submitted to the various state and federal authorities for approval.

Medical Management

Our experience in medical management extends back to our roots as a provider organization. Primary care physicians are the focal point of the delivery of health care to our members, providing routine and preventive care, coordinating referrals to specialists, and assessing the need for hospital care. This model has proved to be an effective method for coordinating medical care for our members. The underlying challenge we face is to coordinate health care so that our members receive timely and appropriate care from the right provider at the appropriate cost. In support of this goal, and to ensure medical management consistency among our various state health plans, we continuously refine and upgrade our medical management efforts at both the corporate and subsidiary levels.

We seek to ensure quality care for our members on a cost-effective basis through the use of certain key medical management and cost control tools. These tools include utilization management, case and health management, and provider network and contract management.

Utilization Management. We continuously review utilization patterns with the intent to optimize quality of care and ensure that only appropriate services are rendered in the most cost-effective manner. Utilization management, along with our other tools of medical management and cost control, is supported by a centralized corporate medical informatics function which utilizes third-party software and data warehousing tools to convert data into actionable information. We use predictive modeling that supports a proactive case and health management approach both for us and our affiliated physicians.

Case and Health Management. We seek to encourage quality, cost-effective care through a variety of case and health management programs, including disease management programs, educational programs, and pharmacy management programs such as the following:

- *Disease Management Programs.* We develop specialized disease management programs that address the particular health care needs of our members. "*motherhood matters!*℠" is a comprehensive program designed to improve pregnancy outcomes and enhance member satisfaction. "*breathe with ease!"* is a multi-disciplinary disease management program that provides health education resources and case management services to assist physicians caring for asthmatic members between the ages of three and 15. "*Healthy Living with Diabetes"* is a diabetes disease management program. "*Heart Healthy Living"* is a cardiovascular disease management program for members who have suffered from congestive heart failure, angina, heart attack, or high blood pressure.
- *Educational Programs.* Educational programs are an important aspect of our approach to health care delivery. These programs are designed to increase awareness of various diseases, conditions, and methods of prevention in a manner that supports our providers while meeting the unique needs of our members. For example, we provide our members with information to guide them through various episodes of care. This information, which is available in several languages, is designed to educate members on the use of primary care physicians, emergency rooms, and nurse call centers.
- *Pharmacy Management Programs.* Our pharmacy management programs focus on physician education regarding appropriate medication utilization and encouraging the use of generic medications. Our pharmacists and medical directors work with our pharmacy benefits manager to maintain a formulary that promotes both improved patient care and generic drug use. We employ full-time pharmacists and pharmacy technicians who work with physicians to educate them on the uses of specific drugs, the implementation of best practices, and the importance of cost-effective care.

Provider Network and Contract Management. The quality, depth, and scope of our provider network are essential if we are to ensure quality, cost-effective care for our members. In partnering with quality, cost-effective providers, we utilize clinical and financial information derived by our medical informatics function, as well as the experience we have gained in serving Medicaid members, to gain insight into the needs of both our members and our providers. As we grow in size, we seek to strengthen our ties with high-quality, cost-effective providers by offering them greater patient volume.

Provider Networks

We arrange health care services for our members through contracts with providers that include independent physicians and groups, hospitals, ancillary providers, and our own clinics. Our network of providers includes primary care physicians, specialists and hospitals. Our strategy is to contract with providers in those geographic areas and medical specialties necessary to meet the needs of our members. We also strive to ensure that our providers have the appropriate cultural and linguistic experience and skills.

Physicians. We contract with both primary care physicians and specialists, many of whom are organized into medical groups or independent practice associations (IPAs). Primary care physicians provide office-based primary care services. Primary care physicians may be paid under capitation or fee-for-service contracts and may receive additional compensation by providing certain preventive services. Our specialists care for patients for a specific episode or condition, usually upon referral from a primary care physician, and are usually compensated on a fee-for-service basis. When we contract with groups of physicians on a capitated basis, we monitor their solvency.

Hospitals. We generally contract with hospitals that have significant experience dealing with the medical needs of the Medicaid population. We reimburse hospitals under a variety of payment methods, including fee-for-service, per diems, diagnostic-related groups (DRGs) capitation, and case rates.

Direct Delivery. The clinics we operate are located in neighborhoods where our members live, and provide us a first-hand opportunity to understand the special needs of our members. The clinics we operate, and the clinics and hospital services we manage, assist us in developing and implementing community education, disease management, and other programs. Direct clinic management experience also enables us to better understand the needs of our contracted providers.

Reinsurance

Our health plans currently have reinsurance agreements with an unaffiliated insurer to cover certain claims. We enter into these contracts to reduce the risk of catastrophic losses which in turn reduce our capital and surplus requirements. We frequently evaluate reinsurance opportunities and review our reinsurance and risk management strategies on a regular basis.

Management Information Systems

All of our health plan information technology systems operate on a single platform. This approach avoids the costs associated with maintaining multiple systems, improves productivity, and enables medical directors to compare costs, identify trends, and exchange best practices among our plans. Our single platform also facilitates our compliance with current and future regulatory requirements.

The software we use is based on client-server technology and is scalable. We believe the software is flexible, easy to use, and allows us to accommodate anticipated enrollment growth and new contracts. The open architecture of the system gives us the ability to transfer data from other systems without the need to write a significant amount of computer code, thereby facilitating the integration of new plans and acquisitions.

We have designed our corporate website with a focus on ease of use and visual appeal. Our website has a secure ePortal which allows providers, members, and trading partners to access individualized data. The ePortal allows the following self-services:

- Provider Self Services - Providers have the ability to access information regarding their members and claims. Key functionalities include "Check Member Eligibility," "View Claim," and "View/Submit Authorizations."
- Member Self Services - Members can access information regarding their personal data, and can perform the following key functionalities: "View Benefits," "Request New ID Card," "Print Temporary ID Card," and "Request Change of Address/PCP."
- File Exchange Services - Various trading partners, such as service partners, providers, vendors, management companies, and individual IPAs, are able to exchange data files (such as those that may be required by federal health care privacy regulations, or any other proprietary format) with us using the file exchange functionality.

Best Practices. We continuously seek to promote best practices. Our approach to quality is broad, encompassing traditional medical management and the improvement of our internal operations. We have staff assigned full-time to the development and implementation of a uniform, efficient, and quality-based medical care delivery model for our health plans. These employees coordinate and implement company-wide programs and strategic initiatives such as preparation of the Healthcare Effectiveness Data and Information Set (HEDIS), and accreditation by the NCQA. We use measures established by the NCQA in credentialing the physicians in our network. We routinely use peer review to assess the quality of care rendered by providers.

Claims Processing. All of our health plans operate on a single managed care platform for claims processing (the QNXT system).

Centralized Management Services. We provide certain centralized medical and administrative services to our health plans pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems, and human resources services. Fees for such services are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the health plan's ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate.

Compliance. Our health plans have established high standards of ethical conduct. Our compliance programs are modeled after the compliance guidance statements published by the Office of the Inspector General of the U.S. Department of Health and Human Services (HHS). Our uniform approach to compliance makes it easier for our health plans to share information and practices and reduces the potential for compliance errors and any associated liability.

Disaster Recovery. We have established a disaster recovery and business resumption plan, with back-up operating sites, to be deployed in the case of a major disruptive event.

CONTRACTING AND REGULATORY COMPLIANCE

Government Contracts

Medicaid. In all the states in which we operate health plans, we enter into a contract with the state's Medicaid agency to offer managed care benefits to Medicaid-eligible individuals. Some states award contracts to any applicant demonstrating that it meets the state's requirements, while other states engage in a competitive bidding process. In all cases, we must demonstrate to the satisfaction of the state Medicaid program that we are able to meet the state's operational and financial requirements. These requirements are in addition to those required for a license and are targeted to the specific needs of the Medicaid population; for example:

- We must measure provider access and availability in terms of the time needed to reach the doctor's office using public transportation;
- Our quality improvement programs must emphasize member education and outreach and include measures designed to promote utilization of preventive services;
- We must have linkages with schools, city or county health departments, and other community-based providers of health care, to demonstrate our ability to coordinate all of the sources from which our members may receive care;
- We must be able to meet the needs of the disabled and others with special needs;
- Our providers and member service representatives must be able to communicate with members who do not speak English or who are deaf; and
- Our member handbook, newsletters, and other communications must be written at the prescribed reading level, and must be available in languages other than English.

To operate a health plan in a given state, we must apply for and obtain a certificate of authority or license from that state. We are regulated by the state agency with responsibility for the oversight of HMOs which, in most cases, is the state department of insurance. In California, however, the agency with responsibility for the oversight of HMOs is the Department of Managed Health Care. Licensing requirements are the same for us as they are for health plans serving commercial or Medicare members. For example, we must demonstrate that:

- Our provider network is adequate;
- Our quality and utilization management processes comply with state requirements;
- We have adequate procedures in place for responding to member and provider complaints and grievances;
- We can meet requirements for the timely processing of provider claims;
- We can collect and analyze the information needed to manage our quality improvement activities;
- We have the financial resources necessary to pay our anticipated medical care expenses and the infrastructure needed to account for our costs;
- We have the systems required to process enrollment information, to report on care and services provided, and to process claims for payment in a timely fashion; and
- We have the financial resources needed to protect the state, our providers, and our members against the insolvency of one of our health plans.

Our state contracts determine the type and scope of health care services that we arrange for our members. Generally, our contracts require us to arrange for preventive care, office visits, inpatient and outpatient hospital and medical services, and pharmacy benefits. The contracts also detail the requirements for operating in the Medicaid sector, including provisions relating to: eligibility; enrollment and dis-enrollment processes; covered benefits; eligible providers; subcontractors; record-keeping and record retention; periodic financial and informational reporting; quality assurance; marketing; financial standards; timeliness of claims payments; health education, wellness and prevention programs; safeguarding of member information; fraud and abuse detection and reporting; grievance procedures; and organization and administrative systems. A health plan's compliance with these requirements is subject to monitoring by state regulators. A health plan is subject to periodic comprehensive quality assurance evaluation by a third-party reviewing organization and generally by the insurance department of the jurisdiction that licenses the health plan.

The contractual relationship with the state is generally for a period of three to four years and is renewable on an annual or biennial basis at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause upon 30 days to nine months' prior written notice.

Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals (RFP), subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, in early 2012 our Missouri health plan was notified that it was not awarded a new contract under that state's RFP, and therefore its contract expired in that year.

Medicare. Under annually renewable contracts with CMS, our state health plans offer Medicare Advantage special needs plans which include a mandatory Part D prescription drug benefit. Molina Medicare Options Plus, our trade name for these plans, serves beneficiaries who are dually eligible for both Medicare and Medicaid, such as low-income seniors and people with disabilities. We believe offering these Medicare plans is consistent with our historical mission of serving low-income and medically under-served families and individuals. We employ sales personnel, and engage independent brokers, agents and consultants to enroll new Molina Medicare Options Plus members. None of our health plans operates a Medicare Advantage private fee-for-service plan.

Total enrollment in our Medicare Advantage plans as of December 31, 2014 was approximately 49,000 members. For the year ended December 31, 2014, Medicare premium revenues in the aggregate represented approximately 7% of our total premium revenues.

Federal regulations place prohibitions and limitations on certain sales and marketing activities of Medicare Advantage plans. Among other things, Medicare Advantage plans are not permitted to make unsolicited outbound calls to potential members or engage in other forms of unsolicited contact, establish appointments without documented consent from potential members, or conduct sales events in certain provider-based settings. Additionally, there are certain restrictions on agent and broker compensation.

Molina Medicaid Solutions. We continually monitor the status of various states' legacy MMIS capabilities and contracts to determine whether Molina Medicaid Solutions' value proposition and core strengths will address a state's MMIS goals. Once an RFP with a Medicaid agency is won, our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we deliver extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the initial terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. The terms of our other Molina Medicaid Solutions contracts - which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) - are shorter in duration than our Idaho and Maine contracts.

The federal government typically reimburses the states for 90% of the costs incurred in the design, development, and implementation of an MMIS and for 75% of the costs incurred in operating a certified MMIS. Federal certification increases the share of the claims processing costs the federal government will pay for monthly operations. With an uncertified system, the federal government contributes approximately 50% of claims processing costs, with the state paying the other half. With a certified system, the federal government pays 75% of costs, reducing the state's share.

Regulatory Compliance

Our health plans are highly regulated by both state and federal government agencies. Regulation of managed care products and health care services varies from jurisdiction to jurisdiction, and changes in applicable laws and rules occur frequently. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Such agencies have become increasingly active in recent years in their review and scrutiny of health insurers and managed care organizations, including those operating in the Medicaid and Medicare programs.

Health Insurer Fee (HIF). One notable provision of the ACA is an excise tax or annual fee that applies to most health plans, including commercial health plans and Medicaid managed care plans like Molina Healthcare. While characterized as a "fee" in the text of the ACA, the intent of Congress was to impose a broad-based health insurance industry excise tax, with the understanding that the tax could be passed on to consumers, most likely through higher commercial insurance premiums.

However, because Medicaid is a government funded program, Medicaid health plans have no alternative but to look to their respective state partners for payment to offset the impact of this tax. Additionally, when states reimburse us for the amount of the HIF, that reimbursement is itself subject to income tax, the HIF, and applicable state premium taxes. Because the HIF is not deductible for income tax purposes, our net income is reduced by the full amount of the assessment. We expect our 2015 HIF assessment related to our Medicaid business to be approximately $143 million, with an expected tax effect from the reimbursement of the assessment of approximately $88 million. Therefore, the total reimbursement needed as a result of the Medicaid-related HIF is approximately $231 million.

For further discussion of the risks and uncertainties relating to this excise tax, refer to Part II, Item 7 of this Form 10-K, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the subheading "Liquidity and Capital Resources—Financial Condition."

States' Risk-Based Capital Requirements. Our health plans are required to file quarterly and annual reports of their operating results with the appropriate state regulatory agencies. These reports are accessible for public viewing. Each health plan undergoes periodic examinations and reviews by the state in which it operates. The health plans generally must obtain approval from the state before declaring dividends in excess of certain thresholds. Each health plan must maintain its net worth at an amount determined by statute or regulation. The minimum statutory net worth requirements differ by state, and are generally based on statutory minimum risk-based capital (RBC) requirements. The RBC requirements are based on guidelines established by the National Association of Insurance Commissioners (NAIC) and are administered by the states. All of our state health plans are subject to RBC requirements, except California and Florida. Any acquisition of another plan's members or its state contracts must also be approved by the state, and our ability to invest in certain financial securities may be prescribed by statute. For further information regarding RBC requirements, refer to Part II, Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 20, "Commitments and Contingencies."

In addition, we are also regulated by each state's department of health services or the equivalent agency charged with oversight of Medicaid and CHIP. These agencies typically require demonstration of the same capabilities mentioned above and perform periodic audits of performance, usually annually.

HIPAA. In 1996, Congress enacted the Health Insurance Portability and Accountability Act (HIPAA). All health plans are subject to HIPAA, including ours. HIPAA generally requires health plans to:

- Establish the capability to receive and transmit electronically certain administrative health care transactions, like claims payments, in a standardized format;
- Afford privacy to patient health information; and
- Protect the privacy of patient health information through physical and electronic security measures.

Health care reform created additional tools for fraud prevention, including increased oversight of providers and suppliers participating or enrolling in Medicaid, CHIP, and Medicare. Those enhancements included mandatory licensure for all providers, and site visits, fingerprinting, and criminal background checks for higher risk providers.

The Health Information Technology for Economic and Clinical Health Act (HITECH Act), a part of the American Recovery and Reinvestment Act of 2009, or ARRA, modified certain provisions of HIPAA by, among other things, extending the privacy and security provisions to business associates, mandating new regulations around electronic medical records, expanding enforcement mechanisms, allowing the state Attorneys General to bring enforcement actions, and increasing penalties for violations. As required by ARRA, the Secretary of HHS has promulgated regulations implementing various provisions of the HITECH Act. The Final Omnibus Rule promulgated by HHS in January 2013, included the Final Breach Notification Rule as well as provisions that apply the HIPAA regulatory scheme to business associates. We anticipate that HHS will promulgate additional rules under the HITECH Act to implement provisions of the statute which were not addressed in the Final Omnibus Rule. The various requirements of the HITECH Act and the Final Omnibus Rule have different compliance dates, and in some cases, the applicable compliance date may depend on the publication of additional rules or guidance by HHS. With respect to those requirements whose compliance dates have passed, we believe that we are in compliance with such provisions. With respect to additional requirements that may be issued in the future by HHS, it is our intention to implement any such new requirements on or before the applicable compliance dates.

Fraud and Abuse Laws. Our operations are subject to various state and federal health care laws commonly referred to as "fraud and abuse" laws. Fraud and abuse prohibitions encompass a wide range of activities, including kickbacks for referral of members, billing for unnecessary medical services, improper marketing, and violations of patient privacy rights. These fraud and abuse laws include the federal False Claims Act which prohibits the knowing filing of a false claim or the knowing use of false statements to obtain payment from the federal government. Many states have false claim act statutes that closely resemble the federal False Claims Act. If an entity is determined to have violated the federal False Claims Act, it must pay three times the actual damages sustained by the government, plus mandatory civil penalties up to fifty thousand dollars for each separate false claim. Suits filed under the Federal False Claims Act, known as "*qui tam*" actions, can be brought by any individual on behalf of the government and such individuals (known as "relators" or, more commonly, as "whistleblowers") may share in any amounts paid by the entity to the government in fines or settlement. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines or be excluded from the Medicaid, Medicare or other state or Federal health care programs as a result of an investigation arising out of such action. In addition, the Deficit Reduction Act of 2005 (DRA) encourages states to enact state-versions of the federal False Claims Act that establish liability to the state for false and fraudulent Medicaid claims and that provide for, among other things, claims to be filed by *qui tam* relators.

Companies involved in public health care programs such as Medicaid are often the subject of fraud and abuse investigations. The regulations and contractual requirements applicable to participants in these public sector programs are complex and subject to change. Violations of certain fraud and abuse laws applicable to us could result in civil monetary penalties, criminal fines and imprisonment, and/or exclusion from participation in Medicaid, Medicare, other federal health care programs and federally funded state health programs.

Federal and state governments have made investigating and prosecuting health care fraud and abuse a priority. Although we believe that our compliance efforts are adequate, we will continue to devote significant resources to support our compliance efforts.

OTHER INFORMATION

Intellectual Property

We have registered and maintain various service marks, trademarks and trade names that we use in our businesses, including marks and names incorporating the "Molina" or "Molina Healthcare" phrase, and from time to time we apply for additional registrations of such marks. We utilize these and other marks and names in connection with the marketing and identification of products and services. We believe such marks and names are valuable and material to our marketing efforts.

Employees

As of December 31, 2014, we had approximately 10,500 employees. Our employee base is multicultural and reflects the diverse membership we serve. We believe we have good relations with our employees. None of our employees is represented by a union.

Available Information

We are organized as a C corporation under Delaware law. Our principal executive offices are located at 200 Oceangate, Suite 100, Long Beach, California 90802, and our telephone number is (562) 435-3666.

You can access our website at *www.molinahealthcare.com* to learn more about our Company. From that site, you can download and print copies of our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, along with amendments to those reports. You can also download our Corporate Governance Guidelines, Board of Directors committee charters, and Code of Business Conduct and Ethics. We make periodic reports and amendments available, free of charge, as soon as reasonably practicable after we file or furnish these reports to the SEC. We will also provide a copy of any of our corporate governance policies published on our website free of charge, upon request. To request a copy of any of these documents, please submit your request to: Molina Healthcare, Inc., 200 Oceangate, Suite 100, Long Beach, California 90802, Attn: Investor Relations. Information on or linked to our website is neither part of nor incorporated by reference into this Annual Report on Form 10-K or any other SEC filings.

Executive Officers of the Registrant

The following sets forth certain information regarding our executive officers, including the business experience of each executive officer during the past five years:

Name	Age	Position
J. Mario Molina, M.D.	56	President and Chief Executive Officer
John C. Molina, J.D.	50	Chief Financial Officer
Terry P. Bayer	64	Chief Operating Officer
Joseph W. White	56	Chief Accounting Officer
Jeff D. Barlow	52	Chief Legal Officer and Corporate Secretary

Dr. Molina has served as President and Chief Executive Officer since succeeding his father and company founder, Dr. C. David Molina, in 1996. He has also served as Chairman of the Board of Directors since 1996. Dr. Molina is the brother of John C. Molina.

Mr. Molina has served as Chief Financial Officer since 1995. He also has served as a member of the Board of Directors since 1994. Mr. Molina is the brother of Dr. J. Mario Molina.

Ms. Bayer has served as Chief Operating Officer since 2005.

Mr. White has served as Chief Accounting Officer since 2007.

Mr. Barlow has served as Chief Legal Officer and Corporate Secretary since 2010. From 2004 to 2010, Mr. Barlow served as Vice President, Assistant Secretary, and Assistant General Counsel of Molina Healthcare.

Item 1A: Risk Factors

RISK FACTORS

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

This Annual Report on Form 10-K and the documents we incorporate by reference in this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Other than statements of historical fact, all statements that we include in this report and in the documents we incorporate by reference may be deemed to be forward-looking statements for purposes of the Securities Act and the Exchange Act. Such forward-looking statements may be identified by words such as "anticipates," "believes," "could," "estimates," "expects," "guidance," "intends," "may," "outlook," "plans," "projects," "seeks," "will," or similar words or expressions.

Investing in our securities involves a high degree of risk. Before making an investment decision, you should carefully read and consider the following risk factors, as well as the other information we include or incorporate by reference in this report and the information in the other reports we file with the U.S. Securities Exchange Commission, or SEC. Such risk factors should be considered not only with regard to the information contained in this annual report, but also with regard to the information and statements in the other periodic or current reports we file with the SEC, as well as our press releases, presentations to securities analysts or investors, or other communications made by or with the approval of one of our executive officers. No assurance can be given that we will actually achieve the results contemplated or disclosed in our forward-looking statements. Such statements may turn out to be wrong due to the inherent uncertainties associated with future events. Accordingly, you should not place undue reliance on our forward-looking statements, which reflect management's analyses, judgments, beliefs, or expectations only as of the date they are made.

If any of the events described in the following risk factors actually occur, our business, results of operations, financial condition, cash flows, or prospects could be materially adversely affected. The risks and uncertainties described below are those that we currently believe may materially affect us. Additional risks and uncertainties not currently known to us or that we currently deem immaterial may also affect our business and operations. As such, you should not consider this list to be a complete statement of all potential risks or uncertainties. Except to the extent otherwise required by federal securities laws, we do not undertake to address or update forward-looking statements in future filings or communications regarding our business or operating results, and do not undertake to address how any of these factors may have caused results to differ from discussions or information contained in previous filings or communications.

Risks Related to Our Health Plans Segment

Numerous risks associated with the Affordable Care Act and its implementation could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

In March 2010, President Obama signed both the Patient Protection and Affordable Care Act and the Health Care and Education Affordability Reconciliation Act (collectively, the Affordable Care Act, or ACA). The ACA enacts comprehensive changes to the United States health care system, elements of which will be phased in at various stages over the next several years. However, the most significant changes effected by the ACA were implemented as of January 1, 2014. There are a multitude of risks associated with the scope of change in the health care system represented by the ACA, including, but not limited to, the following:

- *Risks associated with the health care federal excise tax*. One notable provision of the ACA is an excise tax or annual fee that applies to most health plans, including commercial health plans and Medicaid managed care plans like Molina Healthcare. While characterized as a "fee" in the text of the ACA, the intent of Congress was to impose a broad-based health insurance industry excise tax, with the understanding that the tax could be passed on to consumers, most likely through higher commercial insurance premiums. However, because Medicaid is a government funded program, Medicaid health plans have no alternative but to look to their respective state partners for payment to offset the impact of this tax. Additionally, when states reimburse us for the amount of the HIF, that reimbursement is itself subject to income tax, the HIF, and applicable state premium taxes. Because the HIF is not deductible for income tax purposes, our net income is reduced by the full amount of the assessment. The state of California has not formally committed to reimburse us for either the HIF itself, or the related tax effects. The states of Michigan and Utah have reimbursed us for the HIF, but have not formally committed to reimbursement for the related tax effect. The total amount of HIF revenue for which agreements were not secured (and revenue was not recognized) amounted to approximately $20 million for fiscal 2014. We expect to collect and recognize this revenue related to 2014 in 2015. We further expect to recognize revenue in 2015 sufficient to reimburse us for the full amount of the HIF we will pay (along with related tax effects) in September of 2015. We expect our 2015 HIF assessment related to our Medicaid business to be approximately $143 million, with an expected tax effect from the reimbursement of the assessment of approximately $88 million. Therefore, the total reimbursement needed as a result of the Medicaid-related HIF is approximately $231

million. The failure of our state partners to reimburse us in full for the HIF and its related tax effects could have a material adverse effect on our business, financial condition, cash flows or results of operations.

- *Risks associated with the duals expansion*. Nine million low-income elderly and disabled people are covered under both the Medicare and Medicaid programs. These beneficiaries are more likely than other Medicare beneficiaries to be frail, live with multiple chronic conditions, and have functional and cognitive impairments. Medicare is their primary source of health insurance coverage, as it is for the nearly 50 million elderly and under-65 disabled beneficiaries in 2012. Medicaid supplements Medicare by paying for services not covered by Medicare, such as dental care and long-term care services and support, and by helping to cover Medicare's premiums and cost-sharing requirements. Together, these two programs help to shield very low-income Medicare beneficiaries from potentially unaffordable out-of-pocket medical and long-term care costs. Policymakers at the federal and state levels are increasingly focused on the design and implementation of programs that improve the coordination of care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to deliver services to the dual eligible in a more financially efficient manner. As a result of these efforts, 15 states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual-eligible individuals. The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). Our MMPs in California, Illinois, and Ohio offered coverage beginning in 2014, and we expect to begin offering MMP coverage in South Carolina and Texas in the first quarter of 2015, and in Michigan in the second quarter of 2015.

  There are numerous risks associated with the initial implementation of a new program, with a health plan's expansion into a new service area, and with the provision of medical services to a new population which has not previously been in managed care. One such risk is the development of actuarially sound rates. Because there is limited historical information on which to develop rates, certain assumptions are required to be made which may subsequently prove to have been inaccurate. Rates of utilization could be significantly higher than had been projected, or the assumptions of policymakers about the amount of savings that could be achieved through the use of utilization management in managed care could be flawed. Moreover, because of our lack of actuarial experience for that program, region, or population, our reserve levels may be set at an inadequate level. For instance, these problems arose at our Texas health plan in the second quarter of 2012, leading to extremely elevated medical care costs and substantial losses at the health plan. All of these risks are present in the implementation of the duals demonstration programs. In the event these risks materialize at one or more of our health plans, the negative results of the health plan or plans could adversely affect our business, financial condition, cash flows, or results of operations.

- *Risks associated with Medicaid expansion*. In the states that have elected to participate, the ACA provides for the expansion of the Medicaid program to offer eligibility to nearly all low-income people under age 65 with incomes at or below 138% of the federal poverty line. Medicaid expansion membership phased in beginning January 1, 2014. Since that date, our health plans in California, Illinois, Michigan, New Mexico, Ohio, and Washington have begun participating in Medicaid expansion. At December 31, 2014, our membership included approximately 385,000 Medicaid expansion members, or 15% of total membership. The new enrollees in our health plans represent a population that is different from the population of Medicaid enrollees we have historically managed. All of the risk factors described above with regard to the duals demonstration programs apply equally to Medicaid expansion.

- *Risks associated with health insurance marketplaces*. The ACA authorized the creation of Marketplace insurance exchanges, allowing individuals and small groups to purchase health insurance that is federally subsidized, effective January 1, 2014. We participate in the Marketplace in all of the states in which we operate, except Illinois and South Carolina. At December 31, 2014, we had approximately 15,000 Marketplace members, and that enrollment is expected to grow appreciably in 2015, particularly at our Florida health plan. All of the risk factors described above with regard to the duals demonstration programs apply equally to our participation in the insurance marketplaces.

- *Risks associated with the King v. Burwell case*. There is a case currently pending before the United States Supreme Court to be argued on March 4, 2015, challenging whether the IRS may permissibly promulgate regulations to extend tax-credit subsidies to coverage purchased through exchanges established by the federal government under Section 1321 of the ACA. In the event the Supreme Court rules against Health and Human Services Secretary Burwell, no federal subsidies would be allowed to be paid to those individuals purchasing health insurance through the federally facilitated exchanges, of which there are currently 36. This would undermine the functioning of those exchanges, and cause major disruption under the entire ACA throughout the nation.

- *Risk associated with implementing regulations*. There are many parts of the ACA that require further guidance in the form of regulations. Due to the breadth and complexity of the ACA, the lack of implementing regulations and interpretive guidance, and the phased nature of the ACA's implementation, the overall impact of the ACA on our business and on the health industry in general over the coming years is difficult to predict and not yet fully known, and implementing regulations could contain provisions that have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Our profitability depends on our ability to accurately predict and effectively manage our medical care costs.

Our profitability depends to a significant degree on our ability to accurately predict and effectively manage our medical care costs. Historically, our medical care cost ratio, meaning our medical care costs as a percentage of our premium revenue net of premium tax, has fluctuated substantially, and has also varied across our state health plans. Because the premium payments we receive are generally fixed in advance and we operate with a narrow profit margin, relatively small changes in our medical care cost ratio can create significant changes in our overall financial results. For example, if our overall medical care ratio, continuing operations, for the year ended December 31, 2014 of 89.5% had been one percentage point higher, or 90.5%, our net income from continuing operations for the year ended December 31, 2014 would have been approximately $0.12 per diluted share rather than our actual income from continuing operations of $1.30 per diluted share, a decrease of approximately 91%.

Factors that may affect our medical care costs include the level of utilization of health care services, unexpected patterns in the annual flu season, increases in hospital costs, an increased incidence or acuity of high dollar claims related to catastrophic illnesses or medical conditions for which we do not have adequate reinsurance coverage, increased maternity costs, payment rates that are not actuarially sound, changes in state eligibility certification methodologies, relatively low levels of hospital and specialty provider competition in certain geographic areas, increases in the cost of pharmaceutical products and services, changes in health care regulations and practices, epidemics, new medical technologies, and other various external factors. Many of these factors are beyond our control and could reduce our ability to accurately predict and effectively manage the costs of providing health care services. The inability to forecast and manage our medical care costs or to establish and maintain a satisfactory medical care cost ratio, either with respect to a particular state health plan or across the consolidated entity, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

State and federal budget deficits may result in Medicaid, CHIP, or Medicare funding cuts which could reduce our revenues and profit margins.

Nearly all of our premium revenues come from the joint federal and state funding of the Medicaid and CHIP programs. Due to high unemployment levels, Medicaid enrollment levels and Medicaid costs remain elevated at the same time that state budgets are suffering from significant fiscal strain. Because Medicaid is one of the largest expenditures in every state budget, and one of the fastest-growing, it is a prime target for cost-containment efforts. The states in which we operate our health plans regularly face significant budgetary pressures. These budgetary pressures may result in unexpected Medicaid, CHIP, or Medicare rate cuts which could reduce our revenues and profit margins. Moreover, some federal deficit reduction or entitlement reform proposals would fundamentally change the structure and financing of the Medicaid program. A number of these proposals include both tax increases and spending reductions in discretionary programs and mandatory programs, such as Social Security, Medicare, and Medicaid.

We are unable to determine how any future Congressional spending cuts will affect Medicare and Medicaid reimbursement. There likely will continue to be legislative and regulatory proposals at the federal and state levels directed at containing or lowering the cost of health care that, if adopted, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

A failure to accurately estimate incurred but not reported medical care costs may negatively impact our results of operations.

Because of the time lag between when medical services are actually rendered by our providers and when we receive, process, and pay a claim for those medical services, we must continually estimate our medical claims liability at particular points in time, and establish claims reserves related to such estimates. Our estimated reserves for such "incurred but not paid" (IBNP) medical care costs are based on numerous assumptions. We estimate our medical claims liabilities using actuarial methods based on historical data adjusted for claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our ability to accurately estimate claims for our newer lines of business or populations, such as with respect to duals, Medicaid expansion members, or aged, blind or disabled Medicaid members, is impacted by the more limited experience we have had with those populations.

The IBNP estimation methods we use and the resulting reserves that we establish are reviewed and updated, and adjustments, if deemed necessary, are reflected in the current period. Given the numerous uncertainties inherent in such estimates, our actual claims liabilities for a particular quarter or other period could differ significantly from the amounts estimated and reserved for that quarter or period. Our actual claims liabilities have varied and will continue to vary from our estimates, particularly in times of significant changes in utilization, medical cost trends, and populations and markets served.

If our actual liability for claims payments is higher than estimated, our earnings per share in any particular quarter or annual period could be negatively affected. Our estimates of IBNP may be inadequate in the future, which would negatively affect our

results of operations for the relevant time period. Furthermore, if we are unable to accurately estimate IBNP, our ability to take timely corrective actions may be limited, further exacerbating the extent of the negative impact on our results.

An increased incidence of flu in one or more of the states in which we operate a health plan could significantly increase utilization rates and medical costs.

Our results can be significantly impacted by a severe flu season in the states in which we operated our health plans. We seek to set our IBNP reserves appropriately to account for seasonal spikes in the incidence of the flu. However, if the actual utilization rates of our members are higher than we had anticipated, our results in the relevant periods could be materially and adversely affected.

If the responsive bids of our health plans for new or renewed Medicaid contracts are not successful, or if our government contracts are terminated or are not renewed, our premium revenues could be materially reduced and our operating results could be negatively impacted.

Our government contracts may be subject to periodic competitive bidding. In such process, our health plans may face competition as other plans, many with greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. In the event the responsive bid of one or more of our health plans is not successful, we will lose our Medicaid contract in the applicable state or states, and our premium revenues could be materially reduced as a result. Alternatively, even if our responsive bids are successful, the bids may be based upon assumptions regarding enrollment, utilization, medical costs, or other factors which could result in the Medicaid contract being less profitable than we had expected.

In addition, all of our contracts may be terminated for cause if we breach a material provision of the contract or violate relevant laws or regulations. Our contracts with the states are also subject to cancellation by the state in the event of the unavailability of state or federal funding. In some jurisdictions, such cancellation may be immediate and in other jurisdictions a notice period is required. Further, most of our contracts are terminable without cause.

Our government contracts generally run for periods of three to four years, and may be successively extended by amendment for additional periods if the relevant state agency so elects. Our current contracts expire on various dates over the next several years. Although our health plans have generally been successful in obtaining the renewal and/or extension of their state contracts, there can be no guarantee that any of our state government contracts will be renewed or extended, as shown by the loss of our Missouri contract in 2012 in connection with an unsuccessful RFP bid. During 2015, our Michigan Medicaid contract will be subject to a new RFP. We expect the Michigan RFP to be released on May 1, 2015, and for the new contract to become effective on October 1, 2015. If we are unable to renew, successfully re-bid, or compete for any of our government contracts, including our Michigan contract, or if any of our contracts are terminated or renewed on less favorable terms, our business, financial condition, cash flows, or results of operations could be adversely affected.

If we sustain a cyberattack or suffer privacy or data security breaches that disrupt our operations or result in the dissemination of sensitive personal or confidential information, we could suffer increased costs, exposure to significant liability, reputational harm, loss of business, and other serious negative consequences.

As part of our normal operations, we routinely collect, process, store, and transmit large amounts of data in our operations, including sensitive personal information as well as proprietary or confidential information relating to our business or third parties. We may be subject to breaches of the information technology systems we use. Experienced computer programmers and hackers may be able to penetrate our layered security controls and misappropriate or compromise sensitive personal information or proprietary or confidential information, create system disruptions, or cause shutdowns. They also may be able to develop and deploy viruses, worms, and other malicious software programs that attack our systems or otherwise exploit any security vulnerabilities. Because the techniques used to circumvent security systems can be highly sophisticated and change frequently, often are not recognized until launched against a target, and may originate from less regulated and remote areas around the world, we may be unable to proactively address these techniques or to implement adequate preventive measures. Our facilities may also be vulnerable to security incidents or security attacks; acts of vandalism or theft; misplaced or lost data; human errors; acts of malicious insiders, or other similar events that could negatively affect our systems and our and our members' data. The cost to eliminate or address the foregoing security threats and vulnerabilities before or after a cyber-incident could be significant. Our remediation efforts may not be successful and could result in interruptions, delays, or cessation of service, and loss of members, vendors, and state contracts. In addition, breaches of our security measures and the unauthorized dissemination of sensitive personal information or proprietary information or confidential information about our members could expose our members to the risk of financial or medical identity theft, or expose us or other third parties to a risk of loss or misuse of this information, result in litigation and potential liability for us, damage our reputation, or otherwise have a material adverse effect on our business, financial condition, cash flows, or results of operations.

The exorbitant cost of specialty drugs and new generic drugs could have a material adverse effect on the level of our medical costs and our results of operations.

In 2014, Gilead's pricing of the hepatitis C drug, Sovaldi, at $84,000 per standard course of therapy received major attention as a health care policy and public policy matter. Because of the relatively high incidence of hepatitis C throughout the nation, particularly in the Medicaid population, the pricing of specialty drugs for the treatment of hepatitis C represents a major public health and public financing problem. In the case of Sovaldi, because of its advent on the health care market in early 2014, the cost of the drug was generally not factored into our 2014 capitation rates, thus threatening to undermine the actuarial soundness of those rates. New high priced specialty drugs and generic drugs are expected to enter the health care market in 2015. In addition, evolving regulations and state and federal mandates regarding coverage may impact the ability of our health plans to continue to receive existing price discounts on pharmaceutical products for our members. Other factors affecting our pharmaceutical costs include, but are not limited to, geographic variation in utilization of new and existing pharmaceuticals, and changes in discounts. We will seek to work with state Medicaid agencies to ensure that we receive appropriate and actuarially sound reimbursement for all new drug therapies and pharmaceuticals. In the event we are required to bear the high costs of new specialty drugs or generic drugs without an appropriate rate adjustment or other reimbursement mechanism, or if new regulations or mandates affect our pharmaceutical costs, our business, financial condition, cash flows, or results of operations could be adversely affected.

States may not adequately compensate us for the value of drug rebates that were previously earned by us but that are now collectible by the states.

ACA includes certain provisions that change the way drug rebates are handled for drug claims filled by Medicaid managed care plans. Retroactive to March 23, 2010, state Medicaid programs are now required to collect federal rebates on all Medicaid-covered outpatient drugs dispensed or administered to Medicaid managed care enrollees (excluding certain drugs that are already discounted), and pharmaceutical manufacturers are required to pay specified rebates directly to the state Medicaid programs for those claims. This has impacted the level of rebates received by managed care plans from the manufacturers for Medicaid managed care enrollees. Many manufacturers have renegotiated or discontinued their rebate contracts with Medicaid managed care plans and pharmacy benefits managers to offset these new rebates paid directly to state Medicaid programs. As a result, the drug rebate amounts paid to managed care plans like ours continue to remain at levels that are much lower than prior to ACA implementation. There are provisions in the ACA that require rates paid to Medicaid managed care plans to be actuarially sound in regard to drug rebates. Although we will be pursuing rate increases with state agencies to make us whole for the rebate amounts lost, there can be no assurances that the premium increases we may receive, if any, will be adequate to offset the amount of the lost rebates. If such premium increases prove to be inadequate, our business, financial condition, cash flows, or results of operations could be adversely affected.

We derive our premium revenues from a relatively small number of state health plans.

We currently derive our premium revenues from 11 state health plans, with our Puerto Rico health plan expected to commence operations in April 2015. If we are unable to continue to operate in any of those 11 states, or if our current operations in any portion of the states we are in are significantly curtailed, our revenues could decrease materially. Our reliance on operations in a limited number of states could cause our revenue and profitability to change suddenly and unexpectedly, depending on an abrupt loss of membership, significant rate reductions, a loss of a material contract, legislative actions, changes in Medicaid eligibility methodologies, catastrophic claims, an epidemic, an unexpected increase in utilization, general economic conditions, and similar factors in those states. Our inability to continue to operate in any of the states in which we currently operate, or a significant change in the nature of our existing operations, could adversely affect our business, financial condition, cash flows, or results of operations.

There are performance risks and other risks associated with certain provisions in the state Medicaid contracts of several of our health plans.

The state contracts of our California, Illinois, New Mexico, Ohio, Texas, Washington, and Wisconsin health plans contain provisions pertaining to at-risk premiums that require us to meet certain quality performance measures to earn all of our contract revenues in those states. In the event we are unsuccessful in achieving the stated performance measure, the health plan will be unable to recognize the revenue associated with that measure. Any failure of our health plans to satisfy one of these performance measure provisions could have a material adverse effect on our business, financial condition, cash flows or results of operations. In addition, the state contracts of our California, Florida, Illinois, Michigan, New Mexico, Ohio, Texas, and Washington health plans contain provisions pertaining to medical cost floors and corridors, administrative cost and profit ceilings, and profit-sharing arrangements. Our Medicare and Marketplace business is also subject to medical cost floor requirements enacted by the Federal government. These provisions are subject to interpretation and application by our health plans. In the event the applicable state government agency disagrees with our health plan's interpretation or application of the sometimes complicated contract provisions at issue, the health plan could be required to adjust the amount of its obligations under these provisions and/or make a payment or payments to the state. Any interpretation or application of these provisions at

variance with our health plan's interpretation or inconsistent with our revenue recognition accounting treatment could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Failure to attain profitability in any new start-up operations, including in our new Puerto Rico health plan, could negatively affect our results of operations.

Start-up costs associated with a new business can be substantial. For example, to obtain a certificate of authority to operate as a health maintenance organization in most jurisdictions, we must first establish a provider network, have infrastructure and required systems in place, and demonstrate our ability to obtain a state contract and process claims. Often, we are also required to contribute significant capital to fund mandated net worth requirements, performance bonds or escrows, or contingency guaranties. If we are unsuccessful in obtaining the certificate of authority, winning the bid to provide services, or attracting members in sufficient numbers to cover our costs, any new business of ours would fail. We also could be required by the state to continue to provide services for some period of time without sufficient revenue to cover our ongoing costs or to recover our significant start-up costs.

Even if we are successful in establishing a profitable health plan in a new state, increasing membership, revenues, and medical costs will trigger increased mandated net worth requirements which could substantially exceed the net income generated by the health plan. Rapid growth in an existing state will also result in increased net worth requirements. In such circumstances, we may not be able to fund on a timely basis or at all the increased net worth requirements with our available cash resources. All of these risks will pertain to our new start-up Puerto Rico health plan, which is expected to commence operations in April 2015. The expenses associated with starting up a health plan in a new state or commonwealth, or expanding a health plan in an existing state could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Receipt of inadequate or significantly delayed premiums could negatively affect our business, financial condition, cash flows, or results of operations.

Our premium revenues consist of fixed monthly payments per member, and supplemental payments for other services such as maternity deliveries. These premiums are fixed by contract, and we are obligated during the contract periods to provide health care services as established by the state governments. We use a large portion of our revenues to pay the costs of health care services delivered to our members. If premiums do not increase when expenses related to medical services rise, our medical margins will be compressed, and our earnings will be negatively affected. A state could increase hospital or other provider rates without making a commensurate increase in the rates paid to us, or could lower our rates without making a commensurate reduction in the rates paid to hospitals or other providers. In addition, if the actuarial assumptions made by a state in implementing a rate or benefit change are incorrect or are at variance with the particular utilization patterns of the members of one of our health plans, our medical margins could be reduced. Any of these rate adjustments in one or more of the states in which we operate could have a material adverse effect our business, financial condition, cash flows, or results of operations.

Furthermore, a state undergoing a budget crisis may significantly delay the premiums paid to one of our health plans. Any significant delay in the monthly payment of premiums to any of our health plans could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Reductions in Medicare payments could reduce our earnings potential for our Medicare Advantage plans and our duals demonstration programs.

The Sequestration Transparency Act of 2012 included a 2% reduction of payments from CMS to our Medicare Advantage plans beginning April 1, 2013. Medicare Advantage plans will continue to be affected until Congress lifts the sequestration mandated under the Sequestration Transparency Act of 2012. The impact of sequestration cuts on our Medicare Advantage revenues is partially mitigated by reductions in provider reimbursements paid to those providers with rates indexed to the Medicare fee-for-service reimbursement rates. Such reduction in our Medicare payments may have an adverse effect on our earnings potential for our Medicare Advantage plans and our duals demonstration programs. In addition, reductions to provider reimbursement rates associated with sequestration may adversely impact our relations with the impacted providers.

Difficulties in executing our acquisition strategy could adversely affect our business.

The acquisitions of other health plans and the assignment and assumption of Medicaid contract rights of other health plans have accounted for a significant amount of our growth over the last several years. Although we cannot predict with certainty our rate of growth as the result of acquisitions, we believe that additional acquisitions of all sizes will be important to our future growth strategy. Many of the other potential purchasers of these assets—particularly operators of large commercial health plans—have significantly greater financial resources than we do. Also, many of the sellers may insist on selling assets that we do not want, such as commercial lines of business, or may insist on transferring their liabilities to us as part of the sale of their companies or assets. Even if we identify suitable targets, we may be unable to complete acquisitions on terms favorable to us, or at all, or obtain the necessary financing for these acquisitions. For these reasons, among others, we cannot provide assurance that we will be able to complete favorable acquisitions, especially in light of the volatility in the capital markets over the past several years, or that we will not complete acquisitions that turn out to be unfavorable. Further, to the extent we complete an acquisition, we

may be unable to realize the anticipated benefits from such acquisition because of operational factors or difficulty in integrating the acquisition with our existing business. This may include problems involving the integration of:

- additional employees who are not familiar with our operations or our corporate culture,
- new provider networks which may operate on terms different from our existing networks,
- additional members who may decide to transfer to other health care providers or health plans,
- disparate information, claims processing, and record-keeping systems,
- internal controls and accounting policies, including those which require the exercise of judgment and complex estimation processes, such as estimates of claims incurred but not reported, accounting for goodwill, intangible assets, stock-based compensation, and income tax matters, and
- new regulatory schemes, relationships, practices, and compliance requirements.

Also, we are generally required to obtain regulatory approval from one or more state agencies when making acquisitions of health plans. In the case of an acquisition of a business located in a state in which we do not already operate, we would be required to obtain the necessary licenses to operate in that state. In addition, although we may already operate in a state in which we acquire a new business, we would be required to obtain regulatory approval if, as a result of the acquisition, we will operate in an area of that state in which we did not operate previously. Furthermore, we may be required to renegotiate contracts with the network providers of the acquired business. We may be unable to obtain the necessary governmental approvals, comply with these regulatory requirements or renegotiate the necessary provider contracts in a timely manner, if at all.

In addition, we may be unable to successfully identify, consummate, and integrate future acquisitions, including integrating the acquired businesses on our information technology platform, or to implement our operations strategy in order to operate acquired businesses profitably. Furthermore, we may incur significant transaction expenses in connection with a potential acquisition which may or may not be consummated. These expenses could impact our selling, general and administrative expense ratio.

For all of the above reasons, we may not be able to consummate our proposed acquisitions as announced from time to time to sustain our pattern of growth or to realize benefits from completed acquisitions.

We face periodic routine and non-routine reviews, audits, and investigations by government agencies, and these reviews and audits could have adverse findings, which could negatively impact our business.

We are subject to various routine and non-routine governmental reviews, audits, and investigations. Violation of the laws, regulations, or contract provisions governing our operations, or changes in interpretations of those laws and regulations, could result in the imposition of civil or criminal penalties, the cancellation of our contracts to provide managed care services, the suspension or revocation of our licenses, the exclusion from participation in government sponsored health programs, or the revision and recoupment of past payments made based on audit findings. If we are unable to correct any noted deficiencies, or become subject to material fines or other sanctions, we could suffer a substantial reduction in profitability, and could also lose one or more of our government contracts and as a result lose significant numbers of members and amounts of revenue. In addition, government receivables are subject to government audit and negotiation, and government contracts are vulnerable to disagreements with the government. The final amounts we ultimately receive under government contracts may be different from the amounts we initially recognize in our financial statements.

We rely on the accuracy of eligibility lists provided by state governments. Inaccuracies in those lists would negatively affect our results of operations.

Premium payments to our health plan segment are based upon eligibility lists produced by state governments. From time to time, states require us to reimburse them for premiums paid to us based on an eligibility list that a state later discovers contains individuals who are not in fact eligible for a government sponsored program or are eligible for a different premium category or a different program. Alternatively, a state could fail to pay us for members for whom we are entitled to payment. Our results of operations would be adversely affected as a result of such reimbursement to the state if we make or have made related payments to providers and are unable to recoup such payments from the providers.

We are subject to extensive fraud and abuse laws which may give rise to lawsuits and claims against us, the outcome of which may have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Because we receive payments from federal and state governmental agencies, we are subject to various laws commonly referred to as "fraud and abuse" laws, including the federal False Claims Act, which permit agencies and enforcement authorities to institute suit against us for violations and, in some cases, to seek treble damages, penalties, and assessments. Liability under such federal and state statutes and regulations may arise if we know, or it is found that we should have known, that information

we provide to form the basis for a claim for government payment is false or fraudulent, and some courts have permitted False Claims Act suits to proceed if the claimant was out of compliance with program requirements. *Qui tam* actions under federal and state law can be brought by any individual on behalf of the government. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines, or be excluded from the Medicare, Medicaid, or other state or federal health care programs as a result of an investigation arising out of such action. We are currently defending two *qui tam* actions where both the federal and state governments declined to intervene: (i) *USA and State of Florida ex rel Charles Wilhelm v. Molina Healthcare and Molina Healthcare of Florida*; and (ii) *USA ex rel Anita Silingo v. Mobile Medical Examination Service, Molina Healthcare of California, et al*. We believe we have meritorious defenses to both matters, and intend to defend both matters vigorously. In the event we are subject to liability under these or other *qui tam* actions, our business, financial condition, cash flows, or results of operations could be adversely affected.

Our business could be adversely impacted by adoption of the new ICD-10 standardized coding set for diagnoses.

The U.S. Department of Health and Human Services, or HHS, has released rules pursuant to the Health Insurance Portability and Accountability Act, or HIPAA, which mandate the use of standard formats in electronic health care transactions. HHS also has published rules requiring the use of standardized code sets and unique identifiers for providers. These new standardized code sets, known as ICD-10, will require substantial investments from health care organizations, including us. CMS has now scheduled implementation of ICD-10 by October 1, 2015. Use of the ICD-10 code sets will require significant administrative changes and may result in errors and otherwise negatively impact our service levels. In addition, we may experience complications related to supporting customers that are not fully compliant with the revised requirements as of the applicable compliance date. Furthermore, if physicians fail to provide appropriate codes for services provided as a result of the new coding set, we may not be reimbursed, or adequately reimbursed, for such services.

If we are unable to deliver quality care, maintain good relations with the physicians, hospitals, and other providers with whom we contract, or if we are unable to enter into cost-effective contracts with such providers, our profitability could be adversely affected.

We contract with physicians, hospitals, and other providers as a means to ensure access to health care services for our members, to manage health care costs and utilization, and to better monitor the quality of care being delivered. We compete with other health plans to contract with these providers. We believe providers select plans in which they participate based on criteria including reimbursement rates, timeliness and accuracy of claims payment, potential to deliver new patient volume and/or retain existing patients, effectiveness of resolution of calls and complaints, and other factors. We cannot be sure that we will be able to successfully attract and retain providers to maintain a competitive network in the geographic areas we serve. In addition, in any particular market, providers could refuse to contract with us, demand higher payments, or take other actions which could result in higher health care costs, disruption to provider access for current members, a decline in our growth rate, or difficulty in meeting regulatory or accreditation requirements.

The Medicaid program generally pays doctors and hospitals at levels well below those of Medicare and private insurance. Large numbers of doctors, therefore, do not accept Medicaid patients. In the face of fiscal pressures, some states may reduce rates paid to providers, which may further discourage participation in the Medicaid program.

In some markets, certain providers, particularly hospitals, physician/hospital organizations, and some specialists, may have significant market positions or even monopolies. If these providers refuse to contract with us or utilize their market position to negotiate favorable contracts which are disadvantageous to us, our profitability in those areas could be adversely affected.

Some providers that render services to our members are not contracted with our health plans. In those cases, there is no pre-established understanding between the provider and our health plan about the amount of compensation that is due to the provider. In some states, the amount of compensation is defined by law or regulation, but in most instances it is either not defined or it is established by a standard that is not clearly translatable into dollar terms. In such instances, providers may believe they are underpaid for their services and may either litigate or arbitrate their dispute with our health plan. The uncertainty of the amount to pay and the possibility of subsequent adjustment of the payment could adversely affect our business, financial condition, results of operations, and cash flows.

The insolvency of a delegated provider could obligate us to pay its referral claims, which could have an adverse effect on our business, cash flows, or results of operations.

Circumstances may arise where providers to whom we have delegated risk, due to insolvency or other circumstances, are unable to pay claims they have incurred with third parties in connection with referral services provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so or we have already paid claims to a delegated provider and payments cannot be recouped when the delegated provider becomes insolvent. To reduce the risk that delegated providers are unable to pay referral claims,

we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability. In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These funds are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. However, there can be no assurances that these precautionary steps will fully protect us against the insolvency of a delegated provider. Liabilities incurred or losses suffered as a result of provider insolvency could have an adverse effect on our business, financial condition, cash flows, or results of operations.

Regulatory actions and negative publicity regarding Medicaid managed care and Medicare Advantage may lead to programmatic changes and intensified regulatory scrutiny and regulatory burdens.

Several of our health care competitors have recently been involved in governmental investigations and regulatory actions which have resulted in significant volatility in the price of their stock. In addition, there has been negative publicity and proposed programmatic changes regarding Medicare Advantage private fee-for-service plans, a part of the Medicare Advantage program in which we do not participate. These actions and the resulting negative publicity could become associated with or imputed to us, regardless of our actual regulatory compliance or programmatic participation. Such an association, as well as any perception of a recurring pattern of abuse among the health plan participants in government programs and the diminished reputation of the managed care sector as a whole, could result in public distrust, political pressure for changes in the programs in which we do not participate, intensified scrutiny by regulators, additional regulatory requirements and burdens, increased stock volatility due to speculative trading, and heightened barriers to new managed care markets and contracts, all of which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

If a state fails to renew its federal waiver application for mandated Medicaid enrollment into managed care or such application is denied, our membership in that state will likely decrease.

States may only mandate Medicaid enrollment into managed care under federal waivers or demonstrations. Waivers and programs under demonstrations are approved for two- to five-year periods and can be renewed on an ongoing basis if the state applies and the waiver request is approved or renewed by CMS. We have no control over this renewal process. If a state does not renew its mandated program or the federal government denies the state's application for renewal, our business would suffer as a result of a likely decrease in membership.

If state regulators do not approve payments of dividends and distributions by our subsidiaries, it may negatively affect our business strategy.

We are a corporate parent holding company and hold most of our assets at, and conduct most of our operations through, direct subsidiaries. As a holding company, our results of operations depend on the results of operations of our subsidiaries. Moreover, we are dependent on dividends or other intercompany transfers of funds from our subsidiaries to meet our debt service and other obligations. The ability of our subsidiaries to pay dividends or make other payments or advances to us will depend on their operating results and will be subject to applicable laws and restrictions contained in agreements governing the debt of such subsidiaries. In addition, our health plan subsidiaries are subject to laws and regulations that limit the amount of dividends and distributions that they can pay to us without prior approval of, or notification to, state regulators. In California, our health plan may dividend, without notice to or approval of the California Department of Managed Health Care, amounts by which its tangible net equity exceeds 130% of the tangible net equity requirement. Our other health plans must give thirty days' advance notice and the opportunity to disapprove "extraordinary" dividends to the respective state departments of insurance for amounts over the lesser of (a) ten percent of surplus or net worth at the prior year end or (b) the net income for the prior year. The discretion of the state regulators, if any, in approving or disapproving a dividend is not clearly defined. Health plans that declare non-extraordinary dividends must usually provide notice to the regulators ten or fifteen days in advance of the intended distribution date of the non-extraordinary dividend. For the years ended December 31, 2013 and 2012, we received dividends from our health plan subsidiaries amounting to $24.4 million and $101.8 million, respectively. We did not receive any dividends from our health plan subsidiaries during the year ended December 31, 2014. The aggregate additional amounts our health plan subsidiaries could have paid us at December 31, 2014, 2013 and 2012, without approval of the regulatory authorities, were approximately $96 million, $54 million, and $24 million, respectively. If the regulators were to deny or significantly restrict our subsidiaries' requests to pay dividends to us, the funds available to our company as a whole would be limited, which could harm our ability to implement our business strategy. For example, we could be hindered in our ability to make debt service payments under our convertible senior notes or any credit facility.

Risks Related to the Operation of Our Molina Medicaid Solutions Segment

We may be unable to retain or renew the state government contracts of the Molina Medicaid Solutions segment on terms consistent with our expectations or at all.

Molina Medicaid Solutions currently has management contracts in only six states. If we are unable to continue to operate in any of those six states, or if our current operations in any of those six states are significantly curtailed, the revenues and cash flows of Molina Medicaid Solutions could decrease materially, and as a result our profitability would be negatively impacted.

If the responsive bids to RFPs of Molina Medicaid Solutions are not successful, our revenues could be materially reduced and our operating results could be negatively impacted.

The government contracts of Molina Medicaid Solutions may be subject to periodic competitive bidding. In such process, Molina Medicaid Solutions may face competition as other service providers, some with much greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. For instance, in 2012, the government contract of Molina Medicaid Solutions in Louisiana was subject to competitive bidding, and we were unsuccessful in being awarded a new contract. Molina Medicaid Solutions also anticipates bidding in other states which have issued RFPs for procurement of a new MMIS. In the event our responsive bids in other states are not successful, we will be unable to grow in a manner consistent with our projections. Even if our responsive bids are successful, the bids may be based upon assumptions or other factors which could result in the contract being less profitable than we had expected or had been the case prior to competitive re-bidding.

Because of the complexity and duration of the services and systems required to be delivered under the government contracts of Molina Medicaid Solutions, there are substantial risks associated with full performance under the contracts.

The state contracts of Molina Medicaid Solutions typically require significant investment in the early stages that is expected to be recovered through billings over the life of the contracts. These contracts involve the construction of new computer systems and communications networks and the development and deployment of complex technologies. Substantial performance risk exists under each contract. Some or all elements of service delivery under these contracts are dependent upon successful completion of the design, development, construction, and implementation phases. Any increased or unexpected costs or delays in connection with the performance of these contracts, including delays caused by factors outside our control, could make these contracts less profitable or unprofitable, which could have an adverse effect on our business, financial condition, cash flows, or results of operations.

If we fail to comply with our state government contracts or government contracting regulations, our business could be adversely affected.

Molina Medicaid Solutions' contracts with state government customers may include unique and specialized performance requirements. In particular, contracts with state government customers are subject to various procurement regulations, contract provisions, and other requirements relating to their formation, administration, and performance. Any failure to comply with the specific provisions in our customer contracts or any violation of government contracting regulations could result in the imposition of various civil and criminal penalties, which may include termination of the contracts, forfeiture of profits, suspension of payments, imposition of fines, and suspension from future government contracting. Further, any negative publicity related to our state government contracts or any proceedings surrounding them may damage our business by affecting our ability to compete for new contracts. The termination of a state government contract, our suspension from government work, or any negative impact on our ability to compete for new contracts, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

System security risks and systems integration issues that disrupt our internal operations or information technology services provided to customers could adversely affect our financial results and damage our reputation.

Computer programmers and hackers may be able to penetrate our network security and misappropriate our confidential information or that of third parties, create system disruptions, or cause shutdowns. Computer programmers and hackers also may be able to develop and deploy viruses, worms, and other malicious software programs that attack our products or otherwise exploit any security vulnerabilities of our products. In addition, sophisticated hardware and operating system software and applications that we produce or procure from third parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the system. The costs to us to eliminate or alleviate security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and the efforts to address these problems could result in interruptions, delays, cessation of service, and loss of existing or potential government customers.

Molina Medicaid Solutions routinely processes, stores, and transmits large amounts of data for our clients, including sensitive and personally identifiable information. Breaches of our security measures could expose us, our customers, or the individuals affected to a risk of loss or misuse of this information, resulting in litigation and potential liability for us and damage to our

brand and reputation. Accordingly, we could lose existing or potential government customers for outsourcing services or other information technology solutions or incur significant expenses in connection with our customers' system failures or any actual or perceived security vulnerabilities in our products. In addition, the cost and operational consequences of implementing further data protection measures could be significant.

Portions of our information technology infrastructure also may experience interruptions, delays, or cessations of service or produce errors in connection with systems integration or migration work that takes place from time to time. We may not be successful in implementing new systems and transitioning data, which could cause business disruptions and be more expensive, time consuming, disruptive, and resource-intensive. Such disruptions could adversely impact our ability to fulfill orders and interrupt other processes. Delayed sales, lower margins, or lost government customers resulting from these disruptions could adversely affect our financial results, reputation, and stock price.

In the course of providing services to customers, Molina Medicaid Solutions may inadvertently infringe on the intellectual property rights of others and be exposed to claims for damages.

The solutions we provide to our state government customers may inadvertently infringe on the intellectual property rights of third parties resulting in claims for damages against us. The expense and time of defending against these claims may have a material and adverse impact on our profitability. Additionally, the publicity we may receive as a result of infringing intellectual property rights may damage our reputation and adversely impact our ability to develop new MMIS business or retain existing MMIS business.

Inherent in the government contracting process are various risks which may materially and adversely affect our business and profitability.

We are subject to the risks inherent in the government contracting process. These risks include government audits of billable contract costs and reimbursable expenses and compliance with government reporting requirements. In the event we are found to be out of compliance with government contracting requirements, our reputation may be adversely impacted and our relationship with the government agencies we work with may be damaged, resulting in a material and adverse effect on our profitability.

Our performance on contracts, including those on which we have partnered with third parties, may be adversely affected if we or the third parties fail to deliver on commitments.

In some instances, our contracts require that we partner with other parties, including software and hardware vendors, to provide the complex solutions required by our state government customers. Our ability to deliver the solutions and provide the services required by our customers is dependent on our and our partners' ability to meet our customers' delivery schedules. If we or our partners fail to deliver services or products on time, our ability to complete the contract may be adversely affected, which may have a material and adverse impact on our revenues and profitability.

Risks Related to our General Business Operations

Ineffective management of our growth may negatively affect our business, financial condition, or results of operations.

We expect to continue to grow our membership and to expand into other markets through acquisitions and other opportunities. Continued rapid growth could place a significant strain on our management and on our other resources. Our ability to manage our growth may depend on our ability to strengthen our management team and attract, train, and retain skilled employees, and our ability to implement and improve operational, financial, and management information systems on a timely basis. If we are unable to manage our growth effectively, our business, financial condition, cash flows, or results of operations could be materially and adversely affected. In addition, due to the initial substantial costs related to acquisitions, rapid growth could adversely affect our short-term profitability and liquidity.

Any changes to the laws and regulations governing our business, or the interpretation and enforcement of those laws or regulations, could cause us to modify our operations and could negatively impact our operating results.

Our business is extensively regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect health plan members and providers rather than managed care organizations. The government agencies administering these laws and regulations have broad latitude in interpreting and applying them. These laws and regulations, along with the terms of our government contracts, regulate how we do business, what services we offer, and how we interact with members and the public. For instance, some states mandate minimum medical expense levels as a percentage of premium revenues. These laws and regulations, and their interpretations, are subject to frequent change. The interpretation of certain contract provisions by our governmental regulators may also change. Changes in existing laws or regulations, or their interpretations, or the enactment of new laws or regulations, could reduce our profitability by imposing additional capital requirements, increasing our liability, increasing our administrative and other costs, increasing mandated benefits, forcing us to restructure our relationships with providers, or requiring us to implement additional or

different programs and systems. Changes in the interpretation of our contracts could also reduce our profitability if we have detrimentally relied on a prior interpretation.

Our business depends on our information and medical management systems, and our inability to effectively integrate, manage, and keep secure our information and medical management systems could disrupt our operations.

Our business is dependent on effective and secure information systems that assist us in, among other things, processing provider claims, monitoring utilization and other cost factors, supporting our medical management techniques, and providing data to our regulators. Our providers also depend upon our information systems for membership verifications, claims status, and other information. If we experience a reduction in the performance, reliability, or availability of our information and medical management systems, our operations, ability to pay claims, and ability to produce timely and accurate reports could be adversely affected. In addition, if the licensor or vendor of any software which is integral to our operations were to become insolvent or otherwise fail to support the software sufficiently, our operations could be negatively affected.

Our information systems and applications require continual maintenance, upgrading, and enhancement to meet our operational needs. Moreover, our acquisition activity requires transitions to or from, and the integration of, various information systems. If we experience difficulties with the transition to or from information systems or are unable to properly implement, maintain, upgrade or expand our system, we could suffer from, among other things, operational disruptions, loss of members, difficulty in attracting new members, regulatory problems, and increases in administrative expenses.

Our business requires the secure transmission of confidential information over public networks. Advances in computer capabilities, new discoveries in the field of cryptography, or other events or developments could result in compromises or breaches of our security systems and member data stored in our information systems. Anyone who circumvents our security measures could misappropriate our confidential information or cause interruptions in services or operations. The internet is a public network, and data is sent over this network from many sources. In the past, computer viruses or software programs that disable or impair computers have been distributed and have rapidly spread over the internet. Computer viruses could be introduced into our systems, or those of our providers or regulators, which could disrupt our operations, or make our systems inaccessible to our members, providers, or regulators. We may be required to expend significant capital and other resources to protect against the threat of security breaches or to alleviate problems caused by breaches. Because of the confidential health information we store and transmit, security breaches could expose us to a risk of regulatory action, litigation, possible liability, and loss. Our security measures may be inadequate to prevent security breaches, and our business operations would be negatively impacted by cancellation of contracts and loss of members if security breaches are not prevented.

Because our corporate headquarters are located in Southern California, our business operations may be significantly disrupted as a result of a major earthquake.

Our corporate headquarters is located in Long Beach, California. In addition, the claims of our health plans are also processed in Long Beach. Southern California is exposed to a statistically greater risk of a major earthquake than most other parts of the United States. If a major earthquake were to strike the Los Angeles area, our corporate functions and claims processing could be significantly impaired for a substantial period of time. Although we have established a disaster recovery and business resumption plan with back-up operating sites to be deployed in the case of such a major disruptive event, there can be no assurances that the disaster recovery plan will be successful or that the business operations of all our health plans, including those that are remote from any such event, would not be substantially impacted by a major Southern California earthquake.

We face claims related to litigation which could result in substantial monetary damages.

We are subject to a variety of legal actions, including medical malpractice actions, provider disputes, employment related disputes, and breach of contract actions. In the event we incur liability materially in excess of the amount for which we have insurance coverage, our profitability would suffer. In addition, our providers involved in medical care decisions are exposed to the risk of medical malpractice claims. As an employer of physicians and ancillary medical personnel and as an operator of primary care clinics, our plans are subject to liability for negligent acts, omissions, or injuries occurring at one of our clinics or caused by one of our employees. We maintain medical malpractice insurance for our clinics in an amount which we believe to be reasonable in light of our experience to date. However, given the significant amount of some medical malpractice awards and settlements, this insurance may not be sufficient or available at a reasonable cost to protect us from damage awards or other liabilities. Even if any claims brought against us are unsuccessful or without merit, we may have to defend ourselves against such claims. The defense of any such actions may be time-consuming and costly, and may distract our management's attention. As a result, we may incur significant expenses and may be unable to effectively operate our business.

Furthermore, claimants often sue managed care organizations for improper denials of or delays in care, and in some instances improper authorizations of care. Claims of this nature could result in substantial damage awards against us and our providers that could exceed the limits of any applicable medical malpractice insurance coverage. Successful malpractice or tort claims asserted against us, our providers, or our employees could adversely affect our business, financial condition, cash flows, or results of operations.

We cannot predict the outcome of any lawsuit with certainty. While we currently have insurance coverage for some of the potential liabilities relating to litigation, other such liabilities may not be covered by insurance, the insurers could dispute coverage, or the amount of insurance could be insufficient to cover the damages awarded. In addition, insurance coverage for all or certain types of liability may become unavailable or prohibitively expensive in the future or the deductible on any such insurance coverage could be set at a level which would result in us effectively self-insuring cases against us.

Although we establish reserves for litigation as we believe appropriate, we cannot assure you that our recorded reserves will be adequate to cover such costs. Therefore, the litigation to which we are subject could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and could prompt us to change our operating procedures.

We are subject to competition which negatively impacts our ability to increase penetration in the markets we serve.

We operate in a highly competitive environment and in an industry that is subject to ongoing changes from business consolidations, new strategic alliances, and aggressive marketing practices by other managed care organizations. We compete for members principally on the basis of size, location, and quality of provider network, benefits supplied, quality of service, and reputation. A number of these competitive elements are partially dependent upon and can be positively affected by the financial resources available to a health plan. Many other organizations with which we compete, including large commercial plans, have substantially greater financial and other resources than we do. For these reasons, we may be unable to grow our membership, or may lose members to other health plans.

Failure to maintain effective internal controls over financial reporting could have a material adverse effect on our business, operating results, and stock price.

The Sarbanes-Oxley Act of 2002 requires, among other things, that we maintain effective internal control over financial reporting. In particular, we must perform system and process evaluation and testing of our internal controls over financial reporting to allow management to report on, and our independent registered public accounting firm to attest to, our internal controls over financial reporting as required by Section 404 of the Sarbanes-Oxley Act of 2002. Our future testing, or the subsequent testing by our independent registered public accounting firm, may reveal deficiencies in our internal controls over financial reporting that are deemed to be material weaknesses. Our compliance with Section 404 will continue to require that we incur substantial accounting expense and expend significant management time and effort. Moreover, if we are not able to continue to comply with the requirements of Section 404 in a timely manner, or if we or our independent registered public accounting firm identify deficiencies in our internal control over financial reporting that are deemed to be material weaknesses, the market price of our stock could decline and we could be subject to sanctions or investigations by the NYSE, SEC, or other regulatory authorities which would require additional financial and management resources.

Changes in accounting may affect our results of operations.

U.S. generally accepted accounting principles (GAAP) and related implementation guidelines and interpretations can be highly complex and involve subjective judgments. Changes in these rules or their interpretation, or the adoption of new pronouncements could significantly affect our stated results of operations.

The value of our investments is influenced by varying economic and market conditions, and a decrease in value could have an adverse effect on our results of operations, liquidity, and financial condition.

Our investments consist solely of investment-grade debt securities. The unrestricted portion of this portfolio is designated as available-for-sale. Our non-current restricted investments are designated as held-to-maturity. Available-for-sale investments are carried at fair value, and the unrealized gains or losses are included in accumulated other comprehensive income or loss as a separate component of stockholders' equity, unless the decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such securities until their full cost can be recovered. For our available-for-sale investments and held-to-maturity investments, if a decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such security until its full cost can be recovered, the security is deemed to be other-than-temporarily impaired and it is written down to fair value and the loss is recorded as an expense.

In accordance with applicable accounting standards, we review our investment securities to determine if declines in fair value below cost are other-than-temporary. This review is subjective and requires a high degree of judgment. We conduct this review on a quarterly basis, using both quantitative and qualitative factors, to determine whether a decline in value is other-than-temporary. Such factors considered include the length of time and the extent to which market value has been less than cost, the financial condition and near term prospects of the issuer, recommendations of investment advisors, and forecasts of economic, market or industry trends. This review process also entails an evaluation of our ability and intent to hold individual securities until they mature or full cost can be recovered.

The current economic environment and recent volatility of the securities markets increase the difficulty of assessing investment impairment and the same influences tend to increase the risk of potential impairment of these assets. Over time, the economic and market environment may provide additional insight regarding the fair value of certain securities, which could change our

judgment regarding impairment. This could result in realized losses relating to other-than-temporary declines to be recorded as an expense. Given the current market conditions and the significant judgments involved, there is continuing risk that declines in fair value may occur and material other-than-temporary impairments may result in realized losses in future periods which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Unanticipated changes in our tax rates or exposure to additional income tax liabilities could affect our profitability.

We are subject to income taxes in the United States. Our effective tax rate could be adversely affected by changes in the mix of earnings in states with different statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in U.S. tax laws and regulations, and changes in our interpretations of tax laws, including pending tax law changes, such as the health care federal excise tax discussed above. In addition, we are subject to the routine examination of our income tax returns by the Internal Revenue Service and other local and state tax authorities. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our estimated income tax liabilities. Adverse outcomes from tax examinations could have a material adverse effect on our provision for income taxes, estimated income tax liabilities, or results of operations.

We are dependent on our executive officers and other key employees.

Our operations are highly dependent on the efforts of our executive officers. The loss of their leadership, knowledge, and experience could negatively impact our operations. Replacing many of our executive officers might be difficult or take an extended period of time because a limited number of individuals in the managed care industry have the breadth and depth of skills and experience necessary to operate and expand successfully a business such as ours. Our success is also dependent on our ability to hire and retain qualified management, technical, and medical personnel. It is critical that we recruit, manage, enable, and retain talent to successfully execute our strategic objections which requires aligned policies, a positive work environment, and a robust succession and talent development process. Further, particularly in light of the changing healthcare environment, we must focus on building employee capabilities to help ensure that we can meet upcoming challenges and opportunities. If we are unsuccessful in recruiting, retaining, managing, and enabling such personnel and are unable to meet upcoming challenges and opportunities, our operations could be negatively impacted.

We are subject to risks associated with outsourcing services and functions to third parties.

We contract with independent third party vendors and service providers who provide services to us and our subsidiaries or to whom we delegate selected functions. Our arrangements with third party vendors and service providers may make our operations vulnerable if those third parties fail to satisfy their obligations to us, including their obligations to maintain and protect the security and confidentiality of our information and data. In addition, we may have disagreements with third party vendors and service providers regarding relative responsibilities for any such failures under applicable business associate agreements or other applicable outsourcing agreements. Further, we may not be adequately indemnified against all possible losses through the terms and conditions of our contracts with third party vendors and service providers. Our outsourcing arrangements could be adversely impacted by changes in vendors' or service providers' operations or financial condition or other matters outside of our control. If we fail to adequately monitor and regulate the performance of our third party vendors and service providers, we could be subject to additional risk. Violations of, or noncompliance with, laws and/or regulations governing our business or noncompliance with contract terms by third party vendors and service providers could increase our exposure to liability to our members, providers, or other third parties, or sanctions and/or fines from the regulators that oversee our business. In turn, this could increase the costs associated with the operation of our business or have an adverse impact on our business and reputation. Moreover, if these vendor and service provider relationships were terminated for any reason, we may not be able to find alternative partners in a timely manner or on acceptable financial terms, and may incur significant costs in connection with any such vendor or service provider transition. As a result, we may not be able to meet the full demands of our customers and, in turn, our business, financial condition, or results of operations may be harmed. In addition, we may not fully realize the anticipated economic and other benefits from our outsourcing projects or other relationships we enter into with third party vendors and service providers, as a result of regulatory restrictions on outsourcing, unanticipated delays in transitioning our operations to the third party, vendor or service provider noncompliance with contract terms or violations of laws and/or regulations, or otherwise. This could result in substantial costs or other operational or financial problems that could adversely impact our business, financial condition, cash flows, or results of operations.

An impairment charge with respect to our recorded goodwill, or our finite-lived intangible assets, could have a material impact on our financial results.

As of December 31, 2014, the balance of goodwill was $272.0 million, and the balance of intangible assets, net, was $89.3 million. Intangible assets are amortized generally on a straight-line basis over their estimated useful lives.

Goodwill represents the amount of the purchase price in excess of the fair values assigned to the underlying identifiable net assets of acquired businesses. Goodwill is not amortized, but is subject to an annual impairment test. Tests are performed more frequently if events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit

below its carrying amount. Our intangible assets are subject to impairment tests when events or circumstances indicate that a finite-lived intangible asset's (or asset group's) carrying value may not be recoverable.

The determination of the value of goodwill, and intangible assets, net, requires us to make estimates and assumptions about estimated asset lives, future business trends, and growth. Such evaluation is significantly impacted by estimates and assumptions of future revenues, costs and expenses, and other factors. If an event or events occur that would cause us to revise our estimates and assumptions used in analyzing the value of our goodwill, and intangible assets, net, such revision could result in a non-cash impairment charge that could have a material impact on our financial results.

We are subject to the risks of owning and leasing real property.

We are a tenant under numerous leases in multiple states, including a 25-year lease of an approximately 460,000 square foot office building housing our principal executive offices in Long Beach, California. We also own a 186,000 square-foot office building in Troy, Michigan, a 26,700 square-foot data center in Albuquerque, New Mexico, and a 24,000 square-foot community clinic in Pomona, California. Accordingly, we are subject to all of the risks generally associated with leasing and owning real estate, which include, but are not limited to: the possibility of environmental contamination, the costs associated with fixing any environmental problems and the risk of damages resulting from such contamination; adverse changes in the value of the property due to interest rate changes, changes in the neighborhood in which the property is located, or other factors; ongoing maintenance expenses and costs of improvements; the possible need for structural improvements in order to comply with changes in zoning, seismic, disability act, or other requirements; inability to renew or enter into leases for space not utilized by us on commercially acceptable terms or at all; and possible disputes with neighboring owners or other individuals and entities.

Risks Related to Our Common Stock

Delaware law and our charter documents may impede or discourage a takeover, which could cause the market price of our common stock to decline.

We are a Delaware corporation, and the anti-takeover provisions of Delaware law impose various impediments to the ability of a third party to acquire control of us, even if a change in control would be beneficial to our existing stockholders. In addition, our board of directors or a committee thereof has the power, without stockholder approval, to designate the terms of one or more series of preferred stock and issue shares of preferred stock. The ability of our board of directors or a committee thereof to create and issue a new series of preferred stock and certain provisions of Delaware law and our certificate of incorporation and bylaws could impede a merger, takeover or other business combination involving us or discourage a potential acquirer from making a tender offer for our common stock, which, under certain circumstances, could reduce the market price of our common stock and the value of our convertible senior notes.

Members of the Molina family own a significant amount of our capital stock, decreasing the influence of other stockholders on stockholder decisions.

Members of the Molina family, either directly or as trustees or beneficiaries of Molina family trusts, in the aggregate owned or were entitled to receive upon certain events approximately 32% of our capital stock as of December 31, 2014. Our president and chief executive officer, as well as our chief financial officer, are members of the Molina family, and they are also on our board of directors. Because of the amount of their shareholdings, Molina family members, if they were to act as a group with the trustees of their family trusts, have the ability to significantly influence all matters submitted to stockholders for approval, including the election of directors, amendments to our charter, and any merger, consolidation, or sale of our company. A significant concentration of share ownership can also adversely affect the trading price for our common stock because investors often discount the value of stock in companies that have controlling stockholders. Furthermore, the concentration of share ownership in the Molina family could delay or prevent a merger or consolidation, takeover, or other business combination that could be favorable to our stockholders. Finally, the interests and objectives of the Molina family may be different from those of our company or our other stockholders, and they may vote their common stock in a manner that is contrary to the vote of our other stockholders.

Future sales of our common stock or equity-linked securities in the public market could adversely affect the trading price of our common stock and our ability to raise funds in new stock offerings.

We may issue equity securities in the future, or securities that are convertible into or exchangeable for, or that represent the right to receive, shares of our common stock. Sales of a substantial number of shares of our common stock or other equity securities, including sales of shares in connection with any future acquisitions, could be substantially dilutive to our stockholders. These sales may have a harmful effect on prevailing market prices for our common stock and our ability to raise additional capital in the financial markets at a time and price favorable to us. Moreover, to the extent that we issue restricted stock units, stock appreciation rights, options, or warrants to purchase our common stock in the future and those stock appreciation rights, options, or warrants are exercised or as the restricted stock units vest, our stockholders may experience further dilution. Holders of our shares of common stock have no preemptive rights that entitle holders to purchase a pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our stockholders. Our certificate of incorporation provides that we have authority to issue 150,000,000 shares of common stock and 20,000,000 shares of preferred stock. As of December 31, 2014, approximately 49,727,000 shares of common stock and no shares of preferred or other capital stock were issued and outstanding.

It may be difficult for a third party to acquire us, which could inhibit stockholders from realizing a premium on their stock price.

We are subject to the Delaware anti-takeover laws regulating corporate takeovers. These provisions may prohibit stockholders owning 15% or more of our outstanding voting stock from merging or combining with us. In addition, any change in control of our state health plans would require the approval of the applicable insurance regulator in each state in which we operate.

Our certificate of incorporation and bylaws also contain provisions that could have the effect of delaying, deferring, or preventing a change in control of our company that stockholders may consider favorable or beneficial. These provisions could discourage proxy contests and make it more difficult for our stockholders to elect directors and take other corporate actions. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions include:

- a staggered board of directors, so that it would take three successive annual meetings to replace all directors,
- prohibition of stockholder action by written consent, and
- advance notice requirements for the submission by stockholders of nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting.

In addition, changes of control are often subject to state regulatory notification, and in some cases, prior approval.

Item 1B: Unresolved Staff Comments

None.

Item 2: Properties

As of December 31, 2014, the Health Plans segment leases a total of 70 facilities and the Molina Medicaid Solutions segment leases a total of 12 facilities. We own a 186,000 square-foot office building in Troy, Michigan, a 26,700 square-foot data center in Albuquerque, New Mexico, and a 24,000 square-foot mixed use (office and clinic) facility in Pomona, California under our Health Plans segment. While we believe our current and anticipated facilities will be adequate to meet our operational needs for the foreseeable future, we are continuing to periodically evaluate our employee and operations growth prospects to determine if additional space is required, and where it would be best located.

Item 3: Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

State of Louisiana v. Molina Medicaid Solutions et al. On June 26, 2014, the state of Louisiana filed a Petition for Damages against Molina Medicaid Solutions, Molina Healthcare, Inc., Unisys Corporation, and Paramax Systems Corporation, a subsidiary of Unisys, in the Parish of Baton Rouge, 19th Judicial District, versus number 631612. The Petition alleges that between 1989 and 2012, the defendants utilized an incorrect reimbursement formula for the payment of pharmaceutical claims. The petitioner seeks actual damages to be proved at trial, plus interest. We believe we have several meritorious defenses to the claims of the state, and any liability for the alleged claims is not currently probable or reasonably estimable.

USA and State of Florida ex rel. Charles Wilhelm v Molina Healthcare of Florida et al. On July 24, 2014, Molina Healthcare, Inc. and Molina Healthcare of Florida, Inc. were served with a Complaint filed under seal on December 5, 2012 in District Court for the Southern District of Florida by relator, Charles C. Wilhelm, M.D., Case No. 12-24298. The Complaint alleges that, in late 2008 and early 2009, in connection with the acquisition of Florida NetPass by which Molina Healthcare entered into the state of Florida, the defendants failed to adequately staff the plan and provide other services, resulting in a disproportionate number of sicker beneficiaries of Florida NetPass moving back into the Florida fee-for-service Medicaid program. This alleged conduct purportedly resulted in a violation of the federal False Claims Act. The relator seeks treble damages in the alleged amount of $62.3 million, plus interest and penalties. Both the United States of America and the state of Florida have declined to intervene. We believe we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al. On or around October 14, 2014, Molina Healthcare of California, Molina Healthcare of California Partner Plan, Inc., Mobile Medical Examination Services, Inc. (MedXM), and other health plan defendants were served with a Complaint previously filed under seal in the Central District Court of California by relator, Anita Silingo, Case No. SACV13-1348-FMO(SHx). The Complaint alleges that MedXM improperly modified medical records and otherwise took inappropriate steps to increase members' risk adjustment scores, and that the defendants, including Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc., purportedly turned a "blind eye" to these unlawful practices. The relator seeks treble damages in the amount of $3 billion, plus interest and penalties. The Department of Justice has declined to intervene. We believe that we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

Item 4: Mine Safety Disclosures

None.

PART II

Item 5: Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is listed on the New York Stock Exchange under the trading symbol "MOH." As of February 20, 2015, there were approximately 120 holders of record of our common stock. The high and low intra-day sales prices of our common stock for specified periods are set forth below:

Date Range	High	Low
2014		
First Quarter	$ 39.21	$ 32.41
Second Quarter	$ 46.17	$ 32.86
Third Quarter	$ 48.03	$ 39.23
Fourth Quarter	$ 54.57	$ 40.79
2013		
First Quarter	$ 33.85	$ 25.70
Second Quarter	$ 38.74	$ 30.26
Third Quarter	$ 40.90	$ 33.31
Fourth Quarter	$ 37.39	$ 31.10

Dividends

To date we have not paid cash dividends on our common stock. We currently intend to retain any future earnings to fund our projected business growth. However, we intend to periodically evaluate our cash position to determine whether to pay a cash dividend in the future.

Our ability to pay dividends is partially dependent on, among other things, our receipt of cash dividends from our regulated subsidiaries. The ability of our regulated subsidiaries to pay dividends to us is limited by the state departments of insurance in the states in which we operate or may operate, as well as requirements of the government-sponsored health programs in which we participate. Any future determination to pay dividends will be at the discretion of our Board and will depend upon, among other factors, our results of operations, financial condition, capital requirements and contractual and regulatory restrictions. For more information regarding restrictions on the ability of our regulated subsidiaries to pay dividends to us, please see Item 7 of this Form 10-K, Management's Discussion and Analysis of Financial Condition and Results of Operations, in "Liquidity and Capital Resources," under the subheading "Regulatory Capital and Dividend Restrictions."

Unregistered Issuances of Equity Securities

None.

Stock Repurchase Programs

Securities Repurchases and Repurchase Programs. Effective as of February 25, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This newly authorized repurchase program extends through December 31, 2015.

Purchases of common stock made by or on behalf of the Company during the quarter ended December 31, 2014, including shares withheld by the Company to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (1)	Average Price Paid per Share (1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs (2)
October 1 — October 31	1,052	$ 41.66	—	$ 47,338,505
November 1 — November 30	1,781	$ 48.64	—	$ 47,338,505
December 1 — December 31	1,523	$ 49.96	—	$ 47,338,505
	4,356	$ 47.42	—	

(1) During the quarter we withheld 4,356 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

(2) Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. This repurchase program expired December 31, 2014.

STOCK PERFORMANCE GRAPH

The following graph and related discussion are being furnished solely to accompany this Annual Report on Form 10-K pursuant to Item 201(e) of Regulation S-K and shall not be deemed to be "soliciting materials" or to be "filed" with the SEC (other than as provided in Item 201) nor shall this information be incorporated by reference into any future filing under the Securities Act or the Exchange Act, whether made before or after the date hereof and irrespective of any general incorporation language contained therein, except to the extent that the Company specifically incorporates it by reference into a filing.

The following line graph compares the percentage change in the cumulative total return on our common stock against the cumulative total return of the Standard & Poor's Corporation Composite 500 Index (S&P 500) and a peer group index for the five-year period from December 31, 2009 to December 31, 2014. The comparison assumes $100 was invested on December 31, 2009, in the Company's common stock and in each of the foregoing indices and assumes reinvestment of dividends. The stock performance shown on the graph below represents historical stock performance and is not necessarily indicative of future stock price performance.

The old peer group index, used in last year's Annual Report on Form 10-K and also set forth below, consists of Centene Corporation (CNC), Community Health Systems, Inc. (CYH), Coventry Health Care, Inc. (CVH), Health Management Associates, Inc. (HMA), Health Net, Inc. (HNT), Laboratory Corporation of America Holdings (LH), Lifepoint Hospitals, Inc. (LPNT), Magellan Health Services, Inc. (MGLN), Select Medical Holdings Corporation (SEM), Team Health Holdings, Inc. (TMH), Triple-S Management Corporation (GTS), Universal American Corporation (UAM), and WellCare Health Plans, Inc. (WCG).

The new peer group index consists of Brookdale Senior Living, Inc. (BKD), Catamaran Corporation (CTRX), Centene Corporation (CNC), Community Health Systems, Inc. (CYH), DaVita HealthCare Partners, Inc. (DVA), Health Net, Inc. (HNT), Kindred Healthcare, Inc. (KND), Laboratory Corporation of America Holdings (LH), Life Point Hospitals, Inc. (LPNT), Magellan Health, Inc. (MGLN), Omnicare, Inc. (OCR), Quest Diagnostics, Inc. (DGX), Select Medical Holdings Corporation (SEM), Team Health Holdings, Inc. (TMH), Tenet Healthcare Corporation (THC), Universal American Corporation (UAM), Universal Health Services, Inc. (UHS) and WellCare Health Plans, Inc. (WCG).

Item 6. Selected Financial Data

SELECTED FINANCIAL DATA

We derived the following selected consolidated financial data (other than the data under the caption "Operating Statistics, Continuing Operations") for the five years ended December 31, 2014 from our audited consolidated financial statements. You should read the data in conjunction with our consolidated financial statements, related notes and other financial information included herein. All dollar amounts are presented in thousands, except per-share data. The data under the caption "Operating Statistics, Continuing Operations" has not been audited.

	Year Ended December 31,				
	2014	2013	2012	2011	2010 (1)

Stockholders' equity	1,010,442	892,937	782,314	755,073	719,057

(1) Service revenue and cost of service revenue represent revenue and costs generated by our Molina Medicaid Solutions segment. Because we acquired this business on May 1, 2010, results for the year ended December 31, 2010 include eight months of results for this segment.

(2) As previously reported, in February 2012 the Division of Purchasing of the Missouri Office of Administration notified our Missouri health plan that it was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, the Missouri health plan's existing contract with the state expired without renewal on June 30, 2012. In connection with this notification, the Missouri health plan recorded a non-cash impairment charge of $64.6 million in the fourth quarter of 2011. Results relating to the Missouri health plan have been reported as discontinued operations for all periods presented. (Loss) income from discontinued operations is presented net of income tax (benefit) expense of $(203), $(9,912), $(1,238), $922, and $4,011, respectively.

(3) Medical care ratio represents medical care costs as a percentage of premium revenue. The medical care ratio is a key operating indicator used to measure our performance in delivering efficient and cost effective health care services. Changes in the medical care ratio from period to period result from changes in Medicaid funding by the states, utilization of medical services, our ability to effectively manage costs, contract changes, and changes in accounting estimates related to incurred but not paid claims. See Item 7 in this Form 10-K, "Management's Discussion and Analysis of Financial Condition and Results of Operations," for further discussion.

(4) General and administrative expense ratio represents such expenses as a percentage of total revenue.

(5) Premium tax ratio represents such expenses as a percentage of premium revenue plus premium tax revenue.

(6) Number of members at end of period.

(7) Includes convertible senior notes, lease financing obligations, and other long-term debt.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition and results of operations should be read in conjunction with Items 6 and 8 of this Form 10-K, Selected Financial Data, and Financial Statements and Supplementary Data, respectively. This discussion contains forward-looking statements that involve known and unknown risks and uncertainties, including those set forth in Part I, Item 1A of this Form 10-K, Risk Factors.

Overview

Molina Healthcare, Inc. provides quality health care to those receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. As of December 31, 2014, these health plans served over 2.6 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve a small number of Health Insurance Marketplace members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the management of a hospital in southern California under a management services agreement, and the operation of primary care clinics in several states in which we operate.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal in 2012, and effective June 2013 the transition obligations associated with that contract terminated. Therefore, beginning in the second quarter of 2013, we reported the results relating to the Missouri health plan as discontinued operations for all periods presented. The following discussion and analysis, with the exception of cash flow information, is presented in the context of continuing operations unless otherwise noted.

Fiscal Year 2014 Financial Highlights

- Net income from continuing operations increased to $62.6 million in 2014, from $44.8 million in 2013 due to increases in enrollment and revenue, and improved administrative cost efficiency; which offset higher medical costs and higher tax rates.
- Strong enrollment growth across all of our programs combined with an 18% increase in premium revenue per member, generated almost $3 billion, or 46%, more premium revenue in 2014 compared with 2013.
- General and administrative expenses as a percentage of revenue declined to 7.9% in 2014, versus 10.1% in 2013.
- Medical care costs as a percentage of premium revenue increased to 89.5% in 2014, from 87.1% in 2013.
- Debt financing transactions generated net cash of $122.6 million; such transactions both extended the maturity date and lowered the rate of our convertible senior notes previously due in 2014.

Health Care Reform

We believe that the government-sponsored initiatives, including the Affordable Care Act (ACA), will continue to provide us with significant opportunities for membership growth in our existing markets and in new programs in the future as follows:

- *Medicaid Expansion*. In the states that have elected to participate, the ACA provides for the expansion of the Medicaid program to offer eligibility to nearly all low-income people under age 65 with incomes at or below 138% of the federal poverty line. Medicaid expansion membership phased in beginning January 1, 2014. Since that date, our health plans in California, Illinois, Michigan, New Mexico, Ohio, and Washington have begun participating in Medicaid expansion. At December 31, 2014 our membership included approximately 385,000 Medicaid expansion members, or 15% of total membership.
- *Marketplace*. The ACA authorized the creation of Marketplace insurance exchanges, allowing individuals and small groups to purchase health insurance that is federally subsidized, effective January 1, 2014. We participate in the Marketplace in all of the states in which we operate, except Illinois and South Carolina. At December 31, 2014, we had approximately 15,000 Marketplace members, and that enrollment is expected to grow appreciably in 2015, particularly at our Florida health plan.

- *Medicare-Medicaid Plans*. Policymakers at the federal and state levels are increasingly focused on the design and implementation of programs that improve the coordination of care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to deliver services to the dual eligible in a more financially efficient manner. As a result of these efforts, 15 states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual-eligible individuals. The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). Our MMPs in California, Illinois, and Ohio offered coverage beginning in 2014, and we expect to begin offering MMP coverage in South Carolina and Texas in the first quarter of 2015, and in Michigan in the second quarter of 2015.

Health Insurer Fee. The ACA imposes an annual fee, or excise tax, on health insurers for each calendar year beginning on or after January 1, 2014. A health insurer's liability for the payment of the fee (the health insurer fee, or HIF) is established upon first writing business in 2014 or any subsequent year. In other words, an active health insurer becomes liable for the fee on January 1st of any given year. The amount of the HIF for the insurer is based upon the insurer's share of the industry's net premiums written during the preceding calendar year. The HIF must be paid by the insurer by September 30th of the year in which the insurer becomes liable for the HIF. During the third quarter of 2014 we paid our 2014 HIF assessment, which amounted to $88.6 million. This expense was recognized on a straight-line basis in 2014; and is non-deductible for income tax purposes.

We believe that state Medicaid agencies are required to reimburse us for the HIF imposed on our Medicaid premiums, as well as for the negative financial impact associated with the absence of tax deductibility for the HIF. Although all of our state Medicaid partners have agreed informally to reimbursement of the HIF and the costs of its related tax effects, we have not secured binding commitments to that effect from California, Michigan and Utah. Our 2014 results were adversely affected by our inability to recognize as revenue reimbursement (including reimbursement for tax effects) for the full impact of the HIF from those states. The state of California has not formally committed to reimburse us for either the HIF itself, or the related tax effects. The states of Michigan and Utah have reimbursed us for the HIF, but have not formally committed to reimbursement for the related tax effect. The total amount of HIF revenue for which agreements were not secured (and revenue was not recognized) amounted to approximately $20 million for fiscal 2014. We expect to collect and recognize this revenue related to 2014 in 2015. We further expect to recognize revenue in 2015 sufficient to reimburse us for the full amount of the HIF we will pay (along with related tax effects) in September of 2015. We expect our 2015 HIF assessment related to our Medicaid business to be approximately $143 million, with an expected tax effect from the reimbursement of the assessment of approximately $88 million. Therefore, the total reimbursement needed as a result of the Medicaid-related HIF is approximately $231 million.

For further discussion of the risks and uncertainties relating to the HIF, refer to the subheading below, "Liquidity and Capital Resources—Financial Condition."

Market Updates—Health Plans Segment

Florida. During 2014, our Florida health plan acquired two Medicaid contracts, adding approximately 73,000 members.

Puerto Rico. In 2014, we were awarded a managed care contract in the Commonwealth of Puerto Rico that is expected to enroll its first members April 1, 2015. Total enrollment is expected to be approximately 350,000 new members, with anticipated annualized revenue of $750 million.

South Carolina. Our South Carolina health plan began serving members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014.

Market Update—Molina Medicaid Solutions Segment

In 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intended to award the contract for a replacement Medicaid management information system (MMIS) to a different vendor, CNSI. However, in March 2013, the state of Louisiana canceled its contract award to CNSI. The state had informed us that we will continue to perform under our current contract until a successor is named. On December 18, 2014, Molina Medicaid Solutions received notice from the state of Louisiana that they have extended our contract through December 31, 2015. We recognized approximately $41 million of service revenue under this contract in 2014.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate; and, to a lesser degree, from Medicare contracts entered into with the Centers for Medicare and Medicaid Services (CMS), a federal government agency.

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or

without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new request for proposals (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled (ABD); and regions or service areas.

Premium revenue is fixed in advance of the periods covered and, except as described in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 2 "Significant Accounting Policies," is not generally subject to significant accounting estimates. For the year ended December 31, 2014, we received more than 95% of our premium revenue as a fixed amount per member per month (PMPM), pursuant to our Medicaid, Medicare and Marketplace contracts, including agreements with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. Revenue not received on a fixed PMPM basis is recognized as earned.

The amount of the premiums paid to us may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program, on a per-member per-month basis for the year ended December 31, 2014. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	Ending	PMPM Premiums		
	Membership	Low	High	Consolidated
Temporary Assistance for Needy Families (TANF), CHIP (1)	1,831,000	$ 130.00	$ 280.00	$ 180.00
Medicaid Expansion	385,000	340.00	520.00	420.00
Aged, Blind or Disabled (ABD)	325,000	320.00	1,580.00	900.00
Medicare Special Needs Plans (Medicare)	49,000	970.00	1,480.00	1,180.00
Medicare-Medicaid Plan (MMP) – Integrated (2)	18,000	1,510.00	3,240.00	1,970.00
Marketplace	15,000	190.00	560.00	320.00

(1) CHIP stands for Children's Health Insurance Program.
(2) MMP members who receive both Medicaid and Medicare coverage from Molina Healthcare.

The following tables set forth our Health Plans segment membership as of the dates indicated:

	As of December 31,		
	2014	2013	2012
Ending Membership by Health Plan:			
California	531,000	368,000	336,000
Florida	164,000	89,000	73,000
Illinois	100,000	4,000	—
Michigan	242,000	213,000	220,000
New Mexico	212,000	168,000	91,000
Ohio	347,000	255,000	244,000
South Carolina (1)	118,000	—	—
Texas	245,000	252,000	282,000
Utah	83,000	86,000	87,000
Washington	497,000	403,000	418,000
Wisconsin	84,000	93,000	46,000
	2,623,000	1,931,000	1,797,000
Ending Membership by Program:			
TANF/CHIP	1,831,000	1,624,000	1,517,000
Medicaid Expansion (2)	385,000	—	—
ABD	325,000	268,000	244,000
Medicare	49,000	39,000	36,000
MMP - Integrated	18,000	—	—
Marketplace (2)	15,000	—	—
	2,623,000	1,931,000	1,797,000

(1) Our South Carolina health plan began serving members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014.

(2) Medicaid expansion membership phased in, and the Marketplace became available for consumers to access coverage, beginning January 1, 2014.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid management information system (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the contract term during which BPO, hosting, and support and maintenance services are delivered. There may be certain contractual provisions containing contingencies, however that require us to delay recognition of all or part of our service revenue until such contingencies have been removed. For further information regarding revenue recognition for the Molina Medicaid Solutions segment, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services (including long-term services and supports, or LTSS), general and administrative expenses, premium tax and health insurer fee expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following categories:

- *Fee-for-service expenses:* Nearly all hospital services and the majority of our primary care and physician specialist services and LTSS costs are paid on a fee-for-service basis. Under fee-for-service arrangements, we retain the financial responsibility for medical care provided and incur costs based on actual utilization of services. Such expenses are

recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit manager are included in fee-for-service costs.

- *Pharmacy expenses:* All drug, injectibles, and immunization costs paid through our pharmacy benefit manager are classified as pharmacy expenses. As noted above, drugs and injectibles not paid through our pharmacy benefit manager are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.
- *Capitation expenses:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated arrangements, we remain liable for the provision of certain health care services. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.
- *Direct delivery expenses:* All costs associated with our direct delivery of medical care are separately identified.
- *Other medical expenses:* All medically related administrative costs, certain provider incentive costs, reinsurance costs and other health care expenses are classified as other medical expenses. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, care coordination, disease management, and 24-hour on-call nurses. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2014, 2013, and 2012, medically related administrative costs were $262.6 million, $153.0 million, and $125.2 million, respectively.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Estimates" below, and Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 11, "Medical Claims and Benefits Payable," for further information on how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide BPO and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs. In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the contract term, consistent with the revenue recognition period.

Financial Performance Summary, Continuing Operations

The following table and narrative briefly summarize our financial and operating performance from continuing operations for the years ended December 31, 2014, 2013, and 2012. All ratios, with the exception of the medical care ratio and the premium tax ratio, are computed as a percentage of total revenue. The medical care ratio is computed as a percentage of premium revenue, and the premium tax ratio is computed as a percentage of premium revenue plus premium tax revenue, because direct relationships exist between premium revenue earned, and the cost of health care and premium taxes.

	Year Ended December 31,		
	2014	2013	2012
	(Dollar amounts in thousands, except per-share data)		
Net income per diluted share	$ 1.30	$ 0.96	$ 0.27
Adjusted net income per diluted share	$ 3.43	$ 3.13	$ 1.72
Premium revenue	$ 9,022,511	$ 6,179,170	$ 5,544,121
Service revenue	$ 210,051	$ 204,535	$ 187,710
Operating income	$ 192,917	$ 136,560	$ 41,093
Net income	$ 62,578	$ 44,830	$ 12,866
Total ending membership	2,623,000	1,931,000	1,797,000
Premium revenue	93.3%	93.8%	93.7%
Service revenue	2.2	3.1	3.2
Premium tax revenue	3.1	2.6	2.7
Health insurer fee revenue	1.2	—	—
Investment income	0.1	0.1	0.1
Other revenue	0.1	0.4	0.3
Total revenue	100.0%	100.0%	100.0%
Medical care ratio	89.5%	87.1%	90.0%

Net income	0.6%	0.7%	0.2%
Effective tax rate	53.8%	44.8%	45.0%

Non-GAAP Financial Measures

We use the following non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance and the performance of other companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not substitutes for or superior to, GAAP measures (GAAP stands for U.S. generally accepted accounting principles).

The first of these non-GAAP measures is earnings before interest, taxes, depreciation and amortization, or EBITDA. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to EBITDA.

	Year Ended December 31,		
	2014	2013	2012
	(In thousands)		
Net income	$ 62,223	$ 52,929	$ 9,790
Adjustments:			
Depreciation, and amortization of intangible assets and capitalized software	113,715	93,866	78,764
Interest expense	56,811	52,071	16,769
Income tax expense	72,523	26,404	9,275
EBITDA	$ 305,272	$ 225,270	$ 114,598

The second of these non-GAAP measures is adjusted net income and adjusted net income per diluted share, continuing operations. The following tables reconcile net income and net income per diluted share from continuing operations, which we believe to be the most comparable GAAP measures, to adjusted net income and adjusted net income per diluted share, continuing operations.

	Year Ended December 31,					
	2014		2013		2012	
	(In thousands, except diluted per-share amounts)					
Net income, continuing operations	$ 62,578	$ 1.30	$ 44,830	$ 0.96	$ 12,866	$ 0.27
Adjustments, net of tax:						
Depreciation, and amortization of capitalized software	58,770	1.21	46,018	0.98	35,267	0.75
Amortization of convertible senior notes and lease financing obligations	17,249	0.36	14,377	0.31	3,714	0.08
Share-based compensation	14,288	0.29	24,501	0.52	14,556	0.31
Amortization of intangible assets	12,870	0.27	13,117	0.28	13,592	0.29
Change in fair value of derivatives	(10)	—	3,580	0.08	817	0.02
Adjusted net income per diluted share, continuing operations	$ 165,745	$ 3.43	$ 146,423	$ 3.13	$ 80,812	$ 1.72

Results of Operations, Continuing Operations

Year Ended December 31, 2014 Compared with the Year Ended December 31, 2013

Health Plans Segment

Premium Revenue

A 28% increase in membership and an 18% increase in revenue PMPM in 2014 resulted in an increase in premium revenue of 46%, or over $2.8 billion, when compared with 2013. Medicare premium revenue was approximately $627 million in the year ended December 31, 2014, compared with approximately $526 million in the year ended December 31, 2013.

Enrollment growth was primarily due to Medicaid expansion program membership added as a result of the Affordable Care Act, and membership added at our South Carolina and Illinois health plans. Higher PMPM premium revenue was primarily the result of the inclusion of long-term services and supports (LTSS) benefits in various Medicaid managed care programs in California, Florida, Illinois, New Mexico, and Ohio.

Medical Care Costs

Although medical margin (defined as the excess of premium revenue over medical care costs) increased nearly 20% in 2014 over 2013; our consolidated medical care ratio (defined as medical care costs as a percentage of premium revenue) increased to 89.5% in 2014 from 87.1% in 2013.

The medical care ratio increased substantially in 2014 as a result of three developments:

- Much of our revenue growth has come from participation in Medicaid programs covering LTSS. Percentage profit margins for LTSS benefits are generally lower than percentage profit margins for acute medical benefits.
- Increases to our base premiums in recent years have not kept pace with medical cost trends.
- Lack of coordination in the design of profit caps and medical cost floors in some of our state Medicaid contracts is resulting in counterproductive outcomes. In some instances, givebacks due to profitable performance in one product cannot be offset against losses in other products.

Medical care ratios by program for 2014 were as follows: TANF and CHIP - 89.3%; Medicaid expansion - 79.4%; ABD - 92.3%; Medicare - 95.8%; MMP integrated - 92.1%; and Marketplace - 83.7%.

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Year Ended December 31,					
	2014			2013		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 5,672,483	$ 202.87	70.2%	$ 3,611,529	$ 160.43	67.1%
Pharmacy	1,273,329	45.54	15.8	935,204	41.54	17.4
Capitation	748,388	26.77	9.3	603,938	26.83	11.2
Direct delivery	96,196	3.44	1.2	48,288	2.14	0.9
Other	285,935	10.22	3.5	181,165	8.05	3.4
	$ 8,076,331	$ 288.84	100.0%	$ 5,380,124	$ 238.99	100.0%

Individual Health Plan Analysis

California. The medical care ratio for the California health plan decreased significantly to 83.3% in 2014, from 88.9% in 2013. Additionally, medical margin improved $171.0 million when compared with 2013. This improvement was the result of higher enrollment, primarily due to the addition of approximately 107,000 Medicaid expansion members; and premium increases effective October 1, 2013 (2.5%), and July 1, 2014 (5.5%). During 2014, the California health plan benefited from the recognition of approximately $23 million in premium revenue that related to 2013 as a result of certain programmatic changes implemented by the state of California. In 2013, the California health plan recognized approximately $32 million of premium revenue related to 2012 and earlier years as a result of retroactive rate increases from the state of California. The California health plan served its first MMP members in 2014.

Florida. Due to the re-procurement undertaken by the Florida Agency for Health Care Administration as part of its Managed Medical Assistance program starting in 2014, the Florida health plan transitioned many of its members to other health plans in the second quarter of 2014, and then added approximately 105,000 members in the second half of 2014, both from the addition of new service areas and through acquisitions. Although revenue increased approximately 66% at the Florida health plan for the year ended December 31, 2014, when compared with 2013, profitability fell in 2014. Medical margin declined $14.1 million, and the medical care ratio increased to 95.5% from 87.3% in 2013. The higher medical care costs were the result of 1) the assumption of risk for LTSS benefits for certain members effective December 2013 (as noted above percentage profit margins for LTSS benefits are generally less than those for other benefits); and 2) our inability to recognize revenue related to a rate increase effective September 1, 2014, as a result of those rates not being finalized prior to year end.

Illinois. The medical care ratio for the Illinois health plan decreased to 91.7% in 2014, from 96.9% in 2013. The plan experienced significant growth in 2014; enrollment increased approximately 96,000 members overall, with 78,000 members added in the fourth quarter alone. This growth occurred primarily within the traditional TANF program, and to a lesser degree within the Medicaid expansion program. The Illinois health plan served its first MMP members in 2014.

Michigan. The medical care ratio of the Michigan health plan was consistent year over year, at 84.6% in 2014, compared with 84.4% in 2013.

New Mexico. Premium revenue at the New Mexico health plan increased 141% for 2014 compared with 2013, primarily as a result of the addition of Medicaid behavioral health and LTSS benefits effective January 1, 2014, and the addition of approximately 54,000 Medicaid expansion members during the course of 2014. The medical care ratio of the New Mexico health plan increased to 92.6% in 2014, from 86.1% in 2013. The higher medical care ratio was the result of 1) the assumption of risk for LTSS benefits effective January 1, 2014; and 2) premium rates effective January 1, 2014 that did not keep pace with the increase in medical costs in 2014. The New Mexico health plan received a blended rate increase of approximately 3% effective January 1, 2015. For the portion of New Mexico health plan's membership that is eligible for LTSS benefits, the rate increase effective January 1, 2015 was 8%.

Ohio. The medical care ratio of the Ohio health plan increased to 86.0% in 2014, from 84.2% in 2013, primarily due to the increase in Medicaid expansion enrollment (which is incurring a medical care ratio slightly in excess of the plan's traditional experience), and the initiation of the Ohio MMP.

South Carolina. Our South Carolina health plan commenced operations effective January 1, 2014 and finished the year with a medical care ratio of 84.7%.

Texas. Financial performance at the Texas health plan declined in 2014, when compared with 2013. The medical care ratio of the Texas health plan increased to 90.8% in 2014, from 86.4% in 2013. Our inability to recognize a portion of the Texas health

plan's quality revenue reduced income before taxes by approximately $26 million, or $0.33 per diluted share, for the year ended December 31, 2014. Approximately $20 million of this amount is related to measures for which we lack sufficient information to calculate our compliance. Should such information become available in the future, we may be able to recognize all or a portion of such revenue. Removing quality revenue and profit-sharing adjustments would have resulted in a medical care ratio at the Texas health plan of approximately 88% in 2014 and 86% in 2013.

Utah. The medical care ratio of the Utah health plan increased to 92.2% in 2014, from 83.4% in 2013, due to deteriorating margins for both Medicaid and Medicare products.

Washington. Financial performance at the Washington health plan declined in 2014, when compared with 2013. The medical care ratio of the Washington health plan increased to 93.4% in 2014, compared with 88.0% in 2013, primarily due to the high cost of medical services relative to revenue for members served under the state's program for ABD members; and to the $11.2 million net settlement with the Washington Health Care Authority, as described in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 20, "Commitments and Contingencies." The Washington health plan added approximately 102,000 Medicaid expansion members in 2014. The Washington health plan received a blended rate increase of approximately 3% effective January 1, 2015. For the Washington health plan’s ABD membership, the rate increase effective January 1, 2015 was 11%.

Wisconsin. The medical care ratio of the Wisconsin health plan increased to 86.8% in 2014, compared with 79.7% in 2013.

Operating Data

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Year Ended December 31, 2014						
	Member Months (1)	Premium Revenue		Medical Care Costs		MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM		
California	5,630	$ 1,523,084	$ 270.51	$ 1,268,937	$ 225.37	83.3%	$ 254,147
Florida	1,104	439,107	397.79	419,422	379.95	95.5	19,685

Wisconsin	1,060	143,465	135.40	114,340	107.91	79.7	29,125
Other (3)	—	20,977	—	77,818	—	—	(56,841)
	22,512	$ 6,179,170	$ 274.48	$ 5,380,124	$ 238.99	87.1%	$ 799,046

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) "MCR" represents medical costs as a percentage of premium revenue.
(3) "Other" medical care costs include primarily medically related administrative costs of the parent company, and direct delivery costs.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Year Ended December 31,	
	2014	2013
	(In thousands)	
Service revenue before amortization	$ 212,965	$ 207,449
Amortization recorded as reduction of service revenue	(2,914)	(2,914)
Service revenue	210,051	204,535
Cost of service revenue	156,764	161,494
General and administrative costs	7,105	5,285
Amortization of customer relationship intangibles	3,355	5,127
Operating income	$ 42,827	$ 32,629

Operating income for our Molina Medicaid Solutions segment improved $10.2 million for the year ended December 31, 2014, compared with 2013. This improvement was primarily the result of increased revenues due to higher Medicaid transaction volumes and lower cost of services overall, as existing contract operations gained efficiencies.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses decreased to 7.9% of revenue in 2014, from 10.1% in 2013. The significant decline in the ratio of general and administrative expenses relative to total revenue was primarily the result of improved leverage of fixed administrative expenses over higher total revenue.

Premium Tax Expense

Premium tax expense was 3.2% in 2014, compared with 2.7% in 2013. In June 2014, the state of Michigan instituted a 6% use tax on medical premiums. That state has agreed to fund this tax through rate increases; as a result, we recorded approximately $30 million in additional premium revenue in 2014, as well as corresponding premium tax expense.

Health Insurer Fee Revenue and Expenses

Refer to "Liquidity and Capital Resources—Financial Condition" below for a comprehensive discussion of the HIF.

Depreciation and Amortization

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Year Ended December 31,			
	2014		2013	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 75,402	0.8%	$ 54,837	0.8%
Amortization of intangible assets, continuing operations	17,515	0.2	17,906	0.3
Depreciation and amortization, continuing operations	92,917	1.0	72,743	1.1
Depreciation and amortization, discontinued operations	—	—	2	—
Amortization recorded as reduction of service revenue	2,914	—	2,914	—
Amortization of capitalized software recorded as cost of service revenue	38,573	0.4	18,207	0.3
Depreciation and amortization reported in statement of cash flows	$ 134,404	1.4%	$ 93,866	1.4%

Interest Expense

Interest expense increased to $56.8 million for the year ended December 31, 2014, compared with $52.1 million for the year ended December 31, 2013. The increase was due primarily to our 3.75% Notes exchange transaction and related issuance of 1.625% Notes in the third quarter of 2014, and lease financing transactions executed in 2013. For further details regarding these transactions, please refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 12, "Long-Term Debt."

Interest expense includes non-cash interest expense relating to the amortization of the discount on our long-term debt obligations, which amounted to $27.4 million and $22.8 million for the years ended December 31, 2014 and 2013, respectively.

Other Expenses, Net

Other expenses, net decreased to $0.8 million for the year ended December 31, 2014, from $3.3 million for the year ended December 31, 2013. Other expenses, net include primarily gains or losses associated with changes in the fair value of our derivative financial instruments. In the second quarter of 2013 we recorded a one-time non-cash charge of $3.9 million related to the change in fair value of warrants issued in connection with the 1.125% Notes, with no comparable activity in 2014.

Income Taxes

The provision for income taxes in continuing operations is recorded at an effective rate of 53.8% for the year ended December 31, 2014, compared with 44.8% for the year ended December 31, 2013. The increase is primarily due to the nondeductible health insurer fee in 2014 that did not exist in 2013.

Results of Operations, Continuing Operations

Year Ended December 31, 2013 Compared with the Year Ended December 31, 2012

Premium Revenue

Premium revenue in 2013 increased 11% over 2012, due to a 6% increase in member months, and a 5% increase in revenue PMPM. Medicare premium revenue was $526 million for the year ended December 31, 2013, compared with $468 million for the year ended December 31, 2012.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Year Ended December 31,					
	2013			2012		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 3,611,529	$ 160.43	67.1%	$ 3,423,751	$ 161.67	68.6%
Pharmacy	935,204	41.54	17.4	835,830	39.47	16.7
Capitation	603,938	26.83	11.2	552,136	26.07	11.1
Direct delivery	48,288	2.14	0.9	33,920	1.60	0.7
Other	181,165	8.05	3.4	145,551	6.87	2.9
	$ 5,380,124	$ 238.99	100.0%	$ 4,991,188	$ 235.68	100.0%

Excluding our Illinois health plan, which was not operational until 2013, eight of our nine health plans reported higher medical margins in 2013 than in 2012. The consolidated medical margin increased by approximately 45% year over year. Our consolidated medical care ratio decreased to 87.1% for the year ended December 31, 2013, compared with 90.0% for the year ended December 31, 2012.

Individual Health Plan Analysis

California. Financial performance improved at the California health plan in 2013, when compared with 2012, primarily due to the receipt of premium rate increases for both TANF and ABD membership; and lower inpatient facility costs for the TANF membership. Approximately $32 million of premium revenue received and recognized in 2013 related to 2012 and earlier years. The medical care ratio at the California health plan decreased to 88.9% in 2013 from 91.1% in 2012.

Florida. The medical care ratio of the Florida health plan increased to 87.3% in 2013, from 85.3% in 2012, due to higher fee-for-service costs that more than offset lower pharmacy costs.

Illinois. The medical care ratio for the Illinois health plan was 96.9% in 2013. The Illinois health plan served its first member effective September 2013.

Michigan. Financial performance improved at the Michigan health plan in 2013, when compared with 2012. The medical care ratio of the Michigan health plan decreased to 84.4% in 2013, from 88.3% in 2012, primarily due to lower fee-for-service and pharmacy costs for both the ABD and the TANF membership.

New Mexico. Financial performance improved at the New Mexico health plan in 2013, when compared with 2012. The medical care ratio of the New Mexico health plan decreased to 86.1% in 2013, from 87.0% in 2012, primarily as a result of higher Medicaid premium rates PMPM effective January 1, 2013, and stable medical costs PMPM. The New Mexico health plan added approximately 80,000 new members in 2013, as a result of its acquisition of Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program effective August 1, 2013.

Ohio. Financial performance improved at the Ohio health plan in 2013, when compared with 2012. The medical care ratio of the Ohio health plan decreased to 84.2% in 2013, from 88.6% in 2012, primarily due to lower fee-for-service and pharmacy costs for both the ABD and the TANF membership. Financial performance deteriorated in the second half of 2013 due to both premium decreases, and increases to fee schedules effective July 1, 2013, that combined to reduce medical margin approximately 3% for the second half of 2013. We also experienced an additional 1.5% decrease in premium rates in Ohio effective July 1, 2013, due to a re-basing of revenue risk adjusters.

Texas. Financial performance improved at the Texas health plan in 2013, when compared with 2012. The medical care ratio of the Texas health plan decreased to 86.4% in 2013, from 93.7% in 2012, primarily due to rate increases received on September 1, 2013 and 2012, respectively.

Utah. Financial performance deteriorated at the Utah health plan in 2013, when compared with 2012. Reductions to the medical portion of the Medicaid premium, and the addition of the pharmacy benefit to our Medicaid premium, both effective January 1, 2013, more than offset stable medical costs. The medical care ratio of the Utah health plan increased to 83.4% in 2013, from 82.3% in 2012.

Washington. The medical care ratio of the Washington health plan increased to 88.0% in 2013, compared with 86.8% in 2012, due to the addition of ABD members effective July 1, 2012 and lower TANF premium rates. The higher premium revenue PMPM associated with the ABD membership, however, offset the increased medical care ratio, so that medical margin increased to $140.2 million in 2013, from $129.0 million in 2012.

Wisconsin. Financial performance improved at the Wisconsin health plan in 2013, when compared with 2012. The medical care ratio of the Wisconsin health plan decreased to 79.7% in 2013, compared with 96.2% in 2012, due to both higher revenue PMPM and lower fee-for-service physician, specialty and outpatient costs PMPM. Additionally, the health plan gained approximately 50,000 members in the first half of 2013 due to another health plan's exit from the market.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Year Ended December 31, 2013						
	Member Months (2)	Premium Revenue (1)		Medical Care Costs (1)		MCR (3)	Medical Margin
		Total	PMPM	Total	PMPM		
California	4,233	$ 749,755	$ 177.10	$ 666,592	$ 157.46	88.9%	$ 83,163
Florida	973	264,998	272.23	231,261	237.57	87.3	33,737
Illinois	7	8,121	1,201.34	7,869	1,164.10	96.9	252
Michigan	2,581	676,000	261.91	570,644	221.09	84.4	105,356
New Mexico	1,492	446,758	299.36	384,466	257.62	86.1	62,292
Ohio	3,007	1,098,795	365.44	924,675	307.53	84.2	174,120
Texas	3,178	1,291,001	406.27	1,114,852	350.84	86.4	176,149
Utah	1,040	310,895	299.05	259,397	249.51	83.4	51,498
Washington	4,941	1,168,405	236.47	1,028,210	208.10	88.0	140,195
Wisconsin	1,060	143,465	135.40	114,340	107.91	79.7	29,125
Other(4)	—	20,977	—	77,818	—	—	(56,841)
	22,512	$ 6,179,170	$ 274.48	$ 5,380,124	$ 238.99	87.1%	$ 799,046

	Year Ended December 31, 2012						
	Member Months (2)	Premium Revenue (1)		Medical Care Costs (1)		MCR (3)	Medical Margin
		Total	PMPM	Total	PMPM		
California	4,177	$ 665,600	$ 159.36	$ 606,494	$ 145.20	91.1%	$ 59,106
Florida	850	228,832	269.36	195,226	229.80	85.3	33,606
Illinois	—	—	—	—	—	—	—
Michigan	2,639	646,551	244.97	570,636	216.20	88.3	75,915
New Mexico	1,069	321,853	301.08	280,108	262.03	87.0	41,745
Ohio	3,065	1,095,137	357.36	970,504	316.69	88.6	124,633
Texas	3,245	1,233,621	380.18	1,155,433	356.08	93.7	78,188
Utah	1,026	298,392	290.78	245,671	239.41	82.3	52,721
Washington	4,600	974,712	211.91	845,733	183.87	86.8	128,979
Wisconsin	508	70,678	139.25	67,968	133.91	96.2	2,710
Other(4)	—	8,745	—	53,415	—	—	(44,670)
	21,179	$ 5,544,121	$ 261.79	$ 4,991,188	$ 235.68	90.0%	$ 552,933

(1) Premium revenue for our former Missouri health plan was $0.2 million and $114.4 million for the years ended December 31, 2013 and 2012, respectively. Medical care costs for the plan were $1.5 million and $105.6 million for the years ended December 31, 2013 and 2012, respectively. These amounts are excluded from the tables above because the results of this health plan are classified as discontinued operations.
(2) A member month is defined as the aggregate of each month's ending membership for the period presented.
(3) "MCR" represents medical costs as a percentage of premium revenue.
(4) "Other" medical care costs include primarily medically related administrative costs of the parent company, and direct delivery costs.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Year Ended December 31,	
	2013	2012
	(In thousands)	
Service revenue before amortization	$ 207,449	$ 189,281
Amortization recorded as reduction of service revenue	(2,914)	(1,571)
Service revenue	204,535	187,710
Cost of service revenue	161,494	141,208
General and administrative costs	5,285	17,648
Amortization of customer relationship intangibles	5,127	5,127
Operating income	$ 32,629	$ 23,727

Operating income for our Molina Medicaid Solutions segment increased $8.9 million for the year ended December 31, 2013, compared with 2012. The increase in operating income was primarily the result of additional sales in existing markets, and the favorable resolution of certain contingencies related to the Maine contract.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses increased to 10.1% of revenue in 2013, from 8.8% in 2012, primarily due to higher costs incurred as we prepared for significant membership growth anticipated in 2014. Increased administrative expenses related to anticipated membership growth represented approximately 2% of premium revenue, or $135 million during 2013.

Premium Tax Expense

Premium tax expense was consistent year over year.

Depreciation and Amortization

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Year Ended December 31,			
	2013		2012	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 54,837	0.8%	$ 42,938	0.7%
Amortization of intangible assets, continuing operations	17,906	0.3	20,176	0.3
Depreciation and amortization, continuing operations	72,743	1.1	63,114	1.0
Depreciation and amortization, discontinued operations	2	—	590	—
Amortization recorded as reduction of service revenue	2,914	—	1,571	—
Amortization of capitalized software recorded as cost of service revenue	18,207	0.3	13,489	0.2
	$ 93,866	1.4%	$ 78,764	1.2%

Interest Expense

Interest expense was $52.1 million for the year ended December 31, 2013, compared with $16.8 million for the year ended December 31, 2012. Interest expense includes non-cash interest expense relating to the amortization of the discount on our long-term debt obligations, which amounted to $22.8 million and $5.9 million for the years ended December 31, 2013 and 2012, respectively. The increase in interest expense for the year ended December 31, 2013, was primarily due to our issuance of $550.0 million aggregate principal amount 1.125% cash convertible senior notes due 2020 (the 1.125% Notes) in the first quarter of 2013. Interest expense in 2013 also included the immediate recognition of approximately $6 million in debt issuance costs associated with this transaction. The remaining fees associated with that issuance, amounting to approximately $12 million, are being amortized over the life of the 1.125% Notes. For the year ended December 31, 2013, interest expense also includes amounts relating to lease financing transactions executed in the second quarter of 2013.

Other Expenses, Net

Other expenses, net increased to $3.3 million for the year ended December 31, 2013, from $0.9 million for the year ended December 31, 2012. Other expenses, net include primarily gains or losses associated with changes in the fair value of our derivative financial instruments. In the second quarter of 2013 we recorded a one-time non-cash charge of $3.9 million related to the change in fair value of warrants issued in connection with the 1.125% Notes. We settled the interest rate swap in the second quarter of 2013, which resulted in a gain of $0.4 million, partially offsetting the $3.9 million charge described above. Other expenses, net was $0.9 million for the year ended December 31, 2012, primarily due to the change in fair value of the interest rate swap.

Income Taxes

The provision for income taxes in continuing operations is recorded at an effective rate of 44.8% for the year ended December 31, 2013, compared with 45.0% for the year ended December 31, 2012.

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue a short time before we pay for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of 10 years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be three years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of December 31, 2014, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income increased to $8.1 million for the year ended December 31, 2014, compared with $6.9 million for the year ended December 31, 2013, primarily due to the increase in invested assets. Our annualized portfolio yields for the years ended December 31, 2014 and 2013 were 0.4% and for 2012 was 0.5%.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use. We did not receive any dividends from our health plan subsidiaries during the year ended December 31, 2014, because significant growth across all of our health plans necessitated that the plans retain their capital for operations. See further discussion in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 20, "Commitments and Contingencies," under the subheading

"Regulatory Capital and Dividend Restrictions," and Note 23, "Condensed Financial Information of Registrant," under "Note C - Dividends and Capital Contributions."

Liquidity

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Year Ended December 31,		
	2014	2013	Change
	(In thousands)		
Net cash provided by operating activities	$ 1,060,257	$ 190,083	$ 870,174
Net cash used in investing activities	(535,729)	(543,311)	7,582
Net cash provided by financing activities	78,640	493,353	(414,713)
Net increase in cash and cash equivalents	$ 603,168	$ 140,125	$ 463,043

	Year Ended December 31,		
	2013	2012	Change
	(In thousands)		
Net cash provided by operating activities	$ 190,083	$ 347,784	$ (157,701)
Net cash used in investing activities	(543,311)	(93,584)	(449,727)
Net cash provided by financing activities	493,353	47,743	445,610
Net increase in cash and cash equivalents	$ 140,125	$ 301,943	$ (161,818)

*Operating Activities***.** Cash provided by operating activities was $1,060.3 million in 2014 compared with $190.1 million in 2013, an increase of $870.2 million. This increase was due primarily to the following:

- $441.8 million increase in amounts due to government agencies, due to a significant increase in amounts accrued for medical cost floor contract provisions primarily associated with our Medicaid expansion membership; and
- $355.5 million increase in medical claims and benefits payable due to significant membership growth in 2014.

In 2013, cash provided by operating activities was $190.1 million compared with $347.8 million for 2012, a decrease of $157.7 million. In 2013, deferred revenue was a use of cash from operations amounting to $19.6 million, compared with a source of cash amounting to $90.9 million in 2012. This was primarily due to an advance premium payment received by our Washington health plan in December 2012, with no comparable advance premium receipts in December 2013.

Investing Activities. Cash used in investing activities decreased to $535.7 million in 2014, compared with $543.3 million in 2013. This $7.6 million decline in cash used was primarily due to lower purchases of investments, net of sales and maturities, compared with 2013. As described below, there was greater investment activity in 2013 associated with significant debt financing transactions.

In 2013, cash used in investing activities was $543.3 million compared with $93.6 million in 2012. This $449.7 million increase was primarily due to greater purchases of investments in 2013, as a result of the cash generated in financing activities, described below. In addition to increased purchases of investments, we paid $61.5 million in connection with business combinations in 2013, with no comparable activity in 2012.

Financing Activities. Cash provided by financing activities was $78.6 million in 2014 compared with $493.4 million in 2013, a decrease of $414.7 million. Cash provided by financing activities in 2014 included primarily $122.6 million net proceeds from our fiscal 2014 offering of 1.625% Notes, partially offset by $50.3 million paid in the settlement of contingent consideration liabilities associated with our 2013 business combinations. Cash provided by financing activities in 2014 was significantly outpaced by debt financing activities in 2013, as described below.

In 2013, cash provided by financing activities was $493.4 million compared with $47.7 million in 2012, an increase of $445.6 million. The increase in cash provided by financing activities was primarily due to 2013 activity including $538.0 million in proceeds received from our offering of 1.125% Notes, $158.7 million received from sale-leaseback transactions, and $75.1 million from the sale of warrants, partially offset by $149.3 million paid for the purchased call option relating to 1.125% Notes, $52.7 million paid for repurchases of our common stock, $47.5 million used to repay our term loan, and $40.0 million used to repay our credit facility. Our credit facility was terminated in early 2013 when the balance was repaid.

Financial Condition

On a consolidated basis, at December 31, 2014, our working capital was $1,070.6 million compared with $745.7 million at December 31, 2013. At December 31, 2014, our cash and investments amounted to $2,665.9 million, compared with $1,712.9 million of cash and investments at December 31, 2013.

Health Insurer Fee. One notable provision of the ACA is an excise tax or annual fee that applies to most health plans, including commercial health plans and Medicaid managed care plans like Molina Healthcare. While characterized as a "fee" in the text of the ACA, the intent of Congress was to impose a broad-based health insurance industry excise tax, with the understanding that the tax could be passed on to consumers, most likely through higher commercial insurance premiums.

However, because Medicaid is a government funded program, Medicaid health plans have no alternative but to look to their respective state partners for payment to offset the impact of this tax. Additionally, when states reimburse us for the amount of the HIF, that reimbursement is itself subject to income tax, the HIF, and applicable state premium taxes. Because the HIF is not deductible for income tax purposes, our net income is reduced by the full amount of the assessment. We expect our 2015 HIF assessment related to our Medicaid business to be approximately $143 million, with an expected tax effect from the reimbursement of the assessment of approximately $88 million. Therefore, the total reimbursement needed as a result of the Medicaid-related HIF is approximately $231 million.

Our 2014 HIF assessment amounted to $88.6 million, which was paid in September 2014. As indicated in the table below, it was necessary for the states to pay us an incremental amount of approximately $131 million during 2014 to account for the HIF and the absence of its deductibility.

The state of California has not formally committed to reimburse us for either the HIF itself, or the related tax effects. The states of Michigan and Utah have reimbursed us for the HIF, but have not formally committed to reimbursement for the related tax effect. The total amount of HIF revenue for which agreements were not secured (and revenue was not recognized) amounted to approximately $20 million for fiscal 2014. We expect to collect and recognize this revenue related to 2014 in 2015. We further expect to recognize revenue in 2015 sufficient to reimburse us for the full amount of the HIF we will pay (along with related tax effects) in September of 2015.

We continue to work with our state partners to obtain reimbursement for the full economic impact of the excise tax. The failure of our state partners to reimburse us in full for the HIF and its related tax effects could have a material adverse effect on our business, financial condition, cash flows or results of operations.

The following table provides the details of our HIF revenue reimbursement by health plan to date in 2014 (in thousands):

	HIF Reimbursement Recognized					Required HIF Reimbursement through Dec. 31, 2014
	Three Months Ended				Year Ended Dec. 31, 2014	
	March 31, 2014	June 30, 2014	Sept. 30, 2014	Dec. 31, 2014		
	Gross (1)					
California	$ —	$ —	$ —	$ —	$ —	$ 11,616
Florida	1,416	1,473	1,487	1,459	5,835	5,835
Illinois	40	42	40	40	162	162
Michigan	—	—	8,011	2,663	10,674	17,471
New Mexico	—	—	—	11,322	11,322	11,322
Ohio	7,791	8,117	6,912	7,606	30,426	30,426
Texas	—	—	—	18,518	18,518	18,518
Utah	—	—	3,000	1,049	4,049	5,332
Washington	6,229	6,489	6,217	6,311	25,246	25,246

Medicaid	16,556	17,247	27,039	50,161	111,003	130,699
Medicare	2,892	3,199	3,068	3,053	12,212	12,212
	$ 19,448	$ 20,446	$ 30,107	$ 53,214	$ 123,215	$ 142,911
Recognized in:						
Health insurer fee revenue	$ 18,696	$ 19,662	$ 29,427	$ 51,699	$ 119,484	
Premium tax revenue	752	784	680	1,515	3,731	
	$ 19,448	$ 20,446	$ 30,107	$ 53,214	$ 123,215	

(1) Amounts in the table include the full economic impact of the excise tax including premium tax and the income tax effect.

Regulatory Capital and Dividend Restrictions

For a comprehensive discussion of our regulatory capital requirements and dividend restrictions, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 20 "Commitments and Contingencies."

Future Sources and Uses of Liquidity

For a comprehensive discussion of our debt instruments, including our convertible senior notes transactions in 2014 and 2013, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 12 "Long-Term Debt."

For a discussion of our shelf registration statement, and our securities repurchase programs through December 31, 2014, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 15, "Stockholders' Equity."

Effective as of February 25, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This newly authorized repurchase program extends through December 31, 2015.

Critical Accounting Estimates

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable* (see discussion below).
- *Health Plans segment contractual provisions that may adjust or limit revenue or profit.* For a comprehensive discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."
- *Health Plans segment quality incentives.* For a comprehensive discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."
- *Molina Medicaid Solutions segment revenue and cost recognition.* For a comprehensive discussion of this topic, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	December 31,		
	2014	2013	2012
	(In thousands)		
Fee-for-service claims incurred but not paid (IBNP)	$ 870,429	$ 424,173	$ 377,614
Pharmacy payable	71,412	45,037	38,992
Capitation payable	28,150	20,267	49,066
Other (1)	230,531	180,310	28,858
	$ 1,200,522	$ 669,787	$ 494,530

(1) "Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. As of December 31, 2014 and 2013, we recorded non-risk provider payables relating to such intermediary arrangements of approximately $119.3 million and $151.3 million, respectively.

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated

liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are incurred but not paid (IBNP). Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $870.4 million of our total medical claims and benefits payable of $1,200.5 million as of December 31, 2014. Excluding amounts that we anticipate paying on behalf of certain capitated providers in Ohio (which we will subsequently withhold from those providers' monthly capitation payments), our IBNP liability at December 31, 2014, was $861.8 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further provision for adverse claims deviation, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of December 31, 2014 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding December 31, 2014, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

Increase (Decrease) in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 223,129
(4)%	148,753
(2)%	74,376
2%	(74,376)
4%	(148,753)
6%	(223,129)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of December 31, 2014 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (135,631)
(4)%	(90,421)
(2)%	(45,210)
2%	45,210
4%	90,421
6%	135,631

The following per-share amounts are based on a combined federal and state statutory tax rate of 37%, and 48.3 million diluted shares outstanding for the year ended December 31, 2014. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at December 31, 2014, net income for the year ended December 31, 2014 would increase or decrease by approximately $23 million, or $0.48 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at December 31, 2014, net income for the year ended December 31, 2014 would increase or decrease by approximately $14 million, or $0.29 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $117 million, or $2.42 per diluted share, and $71 million, or $1.47 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $23 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse deviation in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims deviation. The provision for adverse claims deviation is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims deviation.

We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date.

The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended

PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 11, "Medical Claims and Benefits Payable," for additional information regarding the specific factors used to determine our changes in estimates of IBNP for all periods presented in the accompanying consolidated financial statements.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts presented for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year ended December 31,		
	2014	2013	2012

Commitments and Contingencies

We are not a party to off-balance sheet financing arrangements, except for operating leases which are disclosed in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 20 ,"Commitments and Contingencies."

Contractual Obligations

In the table below, we present our contractual obligations as of December 31, 2014.[1] Some of the amounts we have included in this table are based on management's estimates and assumptions about these obligations, including their duration, the possibility of renewal, anticipated actions by third parties, and other factors. Because these estimates and assumptions are necessarily subjective, the contractual obligations we will actually pay in future periods may vary from those reflected in the table. Amounts are in thousands.

	Total	2015	2016-2017	2018-2019	2020 and Beyond
Medical claims and benefits payable	$ 1,200,522	$ 1,200,522	$ —	$ —	$ —
Principal amount of convertible senior notes (2)	851,551	—	—	—	851,551
Amounts due government agencies	527,193	527,193	—	—	—
Lease financing obligations	380,956	11,397	23,830	25,282	320,447
Interest on long-term debt	176,405	11,088	22,176	22,175	120,966
Operating leases	122,035	29,142	44,591	33,073	15,229
Lease financing obligations - related party	102,394	5,346	11,243	12,021	73,784
Purchase commitments	26,029	14,232	11,797	—	—
	$ 3,387,085	$ 1,798,920	$ 113,637	$ 92,551	$ 1,381,977

(1) As of December 31, 2014, we have recorded approximately $2.6 million of unrecognized tax benefits. The table does not contain this amount because we cannot reasonably estimate when or if such amount may be settled. For further information, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 14, "Income Taxes."

(2) Represents the principal amounts due on our 1.125% Cash Convertible Senior Notes due 2020, and our 1.625% Convertible Senior Notes due 2044 (1.625% Notes). The 1.625% Notes have a contractual maturity date in 2044; however, on specified dates beginning in 2018 holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes, as described in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 12, "Long-Term Debt."

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Quantitative and Qualitative Disclosures About Market Risk

Refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," Note 5, "Fair Value Measurements," and Note 6, "Investments."

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 8. Financial Statements and Supplementary Data

INDEX TO FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited the accompanying consolidated balance sheets of Molina Healthcare, Inc. (the Company) as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2014. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Molina Healthcare, Inc. at December 31, 2014 and 2013, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Molina Healthcare, Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 26, 2015 expressed an unqualified opinion thereon.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality health care to those receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. As of December 31, 2014, these health plans served over 2.6 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve a small number of Health Insurance Marketplace members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the management of a hospital in southern California under a management services agreement, and the operation of primary care clinics in several states in which we operate.

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new request for proposals (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

Market Updates—Health Plans Segment

Florida. During 2014, our Florida health plan acquired two Medicaid contracts, adding approximately 73,000 members. See Note 4, "Business Combinations," for further information.

Puerto Rico. In 2014, we were awarded a managed care contract in the Commonwealth of Puerto Rico that is expected to enroll its first members April 1, 2015.

South Carolina. Our South Carolina health plan began serving members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014.

Market Update—Molina Medicaid Solutions Segment

In 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intended to award the contract for a replacement Medicaid management information system (MMIS) to a different vendor, CNSI. However, in March 2013, the state of Louisiana canceled its contract award to CNSI. The state had informed us that we will continue to perform under our current contract until a successor is named. On December 18, 2014, Molina Medicaid Solutions received notice from the state of Louisiana that they have extended our contract through December 31, 2015. We recognized approximately $41 million of service revenue under this contract in 2014.

Consolidation

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. See Note 19, "Variable Interest Entities," for more information regarding these variable interest entities. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the periods presented have been included; such adjustments consist of normal recurring adjustments. All significant inter-company balances and transactions have been eliminated in consolidation. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

Presentation and Reclassifications

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal in 2012, and effective June 2013 the transition obligations associated with that contract terminated. Therefore, beginning in the second quarter of 2013, we reported the results relating to the Missouri health plan as discontinued operations for all periods presented. Additionally, we abandoned our equity interests in the Missouri health plan during the second quarter of 2013, resulting in the

recognition of a tax benefit of $9.5 million, which is also included in discontinued operations in the consolidated statements of income. The Missouri health plan's premium revenues were insignificant in 2014 and 2013, and amounted to $114.4 million for the year ended December 31, 2012.

We have reclassified certain amounts in the 2013 consolidated balance sheet, and 2013 and 2012 statements of cash flows to conform to the 2014 presentation, including the presentation of amounts due government agencies as a separate line item in the consolidated balance sheets and statements of cash flows.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Principal areas requiring the use of estimates include:

- Health plan contractual provisions that may limit revenue recognition based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The determination of medical claims and benefits payable of our Health Plans segment;
- The valuation of certain investments;
- Settlements under risk or savings sharing programs;
- The assessment of deferred contract costs, deferred revenue, long-lived and intangible assets, and goodwill for impairment;
- The determination of professional and general liability claims, and reserves for potential absorption of claims unpaid by insolvent providers;
- The determination of reserves for the outcome of litigation;
- The determination of valuation allowances for deferred tax assets; and
- The determination of unrecognized tax benefits.

2. Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that are both readily convertible into known amounts of cash and have a maturity of three months or less on the date of purchase.

Investments

Our investments are principally held in debt securities, which are grouped into two separate categories for accounting and reporting purposes: available-for-sale securities, and held-to-maturity securities. Available-for-sale securities are recorded at fair value and unrealized gains and losses, if any, are recorded in stockholders' equity as other comprehensive income, net of applicable income taxes. Held-to-maturity securities are recorded at amortized cost, which approximates fair value, and unrealized holding gains or losses are not generally recognized. Realized gains and losses and unrealized losses judged to be other than temporary with respect to available-for-sale and held-to-maturity securities are included in the determination of net income. The cost of securities sold is determined using the specific-identification method, on an amortized cost basis.

Our investment policy requires that all of our investments have final maturities of 10 years or less (excluding auction rate and variable rate securities where interest rates may be periodically reset), and that the average maturity be three years or less. Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. Declines in interest rates over time will reduce our investment income.

In general, our available-for-sale securities are classified as current assets without regard to the securities' contractual maturity dates because they may be readily liquidated. Our auction rate securities are classified as non-current assets and reported in other assets. We monitor our investments for other-than-temporary impairment. For comprehensive discussions of the fair value and classification of our current and non-current investments, including auction rate securities, see Note 5, "Fair Value Measurements," Note 6, "Investments," and Note 10, "Restricted Investments."

Receivables

Receivables are readily determinable and because our creditors are primarily state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. See Note 7, "Receivables."

Property, Equipment, and Capitalized Software

Property and equipment are stated at historical cost. Replacements and major improvements are capitalized, and repairs and maintenance are charged to expense as incurred. Furniture and equipment are generally depreciated using the straight-line method over estimated useful lives ranging from three to seven years. Software developed for internal use is capitalized. Software is generally amortized over its estimated useful life of three years. Leasehold improvements are amortized over the term of the lease, or over their useful lives from five to 10 years, whichever is shorter. Buildings are depreciated over their estimated useful lives of 31.5 to 40 years. See Note 8, "Property, Equipment, and Capitalized Software."

As discussed below, the costs associated with certain of our Molina Medicaid Solutions segment equipment and software are capitalized and recorded as deferred contract costs. Such costs are amortized on a straight-line basis over the shorter of the useful life or the contract period.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service revenue;" and
- Amortization of capitalized software is recorded within the heading "Cost of service revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Year Ended December 31,		
	2014	2013	2012
	(In thousands)		
Depreciation, and amortization of capitalized software, continuing operations	$ 75,402	$ 54,837	$ 42,938
Amortization of intangible assets, continuing operations	17,515	17,906	20,176
Depreciation and amortization, continuing operations	92,917	72,743	63,114
Depreciation and amortization, discontinued operations	—	2	590
Amortization recorded as reduction of service revenue	2,914	2,914	1,571
Amortization of capitalized software recorded as cost of service revenue	38,573	18,207	13,489
Depreciation and amortization reported in the statement of cash flows	$ 134,404	$ 93,866	$ 78,764

Long-Lived Assets, including Intangible Assets

Long-lived assets comprise primarily property, equipment, capitalized software and intangible assets. Finite-lived, separately-identifiable intangible assets are acquired in business combinations and are assets that represent future expected benefits but lack physical substance (such as purchased contract rights and provider contracts). Intangible assets are initially recorded at their fair values and are then amortized on a straight-line basis over their expected useful lives, generally between three and 15 years.

Identifiable intangible assets associated with Molina Medicaid Solutions are classified as either contract backlog or customer relationships as follows:

- The contract backlog intangible asset comprises all contractual cash flows anticipated to be received during the remaining contracted period for each specific contract relating to work that was performed prior to acquisition. Because each acquired contract constitutes a single revenue stream, amortization of the contract backlog intangible is recorded to contra-service revenue so that amortization is matched to any revenues associated with contract performance that occurred prior to the acquisition date. The contract backlog intangible asset is amortized on a

straight-line basis for each specific contract over periods generally ranging from one to six years. The contract backlog intangible assets will be fully amortized in 2015.

- The customer relationship intangible asset comprises all contractual cash flows that are anticipated to be received during the option periods of each specific contract as well as anticipated renewals of those contracts. The customer relationship intangible is amortized on a straight-line basis for each specific contract over periods generally ranging from four to nine years.

Our intangible assets are subject to impairment tests when events or circumstances indicate that a finite-lived intangible asset's (or asset group's) carrying value may not be recoverable. Consideration is given to a number of potential impairment indicators. For example, our health plan subsidiaries have generally been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that these contracts will continue to be renewed.

Following the identification of any potential impairment indicators, to determine whether an impairment exists, we would compare the carrying amount of a finite-lived intangible asset with the undiscounted cash flows that are expected to result from the use of the asset or related group of assets. If it is determined that the carrying amount of the asset is not recoverable, the amount by which the carrying value exceeds the estimated fair value is recorded as an impairment.

No significant impairment charges relating to long-lived assets, including intangible assets, were recorded in the years ended December 31, 2014, 2013, and 2012.

Goodwill

Goodwill represents the amount of the purchase price in excess of the fair values assigned to the underlying identifiable net assets of acquired businesses. Goodwill is not amortized, but is subject to an annual impairment test. Tests are performed more frequently if events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount.

To determine whether goodwill is impaired, we measure the fair values of our reporting units and compare them to the carrying values of the respective units, including goodwill. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared to the carrying amount of goodwill to determine whether goodwill is impaired.

We estimate the fair values of our reporting units using discounted cash flows. To determine fair values, we must make assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value, and discount rates.

No impairment charges relating to goodwill were recorded in the years ended December 31, 2014, 2013, and 2012.

Restricted Investments

Restricted investments, which consist of certificates of deposit and U.S. treasury securities, are designated as held-to-maturity and are carried at amortized cost, which approximates market value. The use of these funds is limited to specific purposes as required by each state, or as protection against the insolvency of capitated providers. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. See Note 10, "Restricted Investments."

Other Assets

Other assets primarily includes deferred financing costs associated with our convertible senior notes and lease financing obligations, and certain investments held in connection with our employee deferred compensation program. The deferred financing costs are being amortized on a straight-line basis over the terms of the convertible senior notes and lease financing obligations.

Delegated Provider Insolvency

Circumstances may arise where providers to whom we have delegated risk are unable to pay claims they have incurred with third parties in connection with referral services (including hospital inpatient services) provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability.

In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These reserves are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. Additionally, we have recorded liabilities for estimated losses arising from provider instability or insolvency in excess of provider funds on deposit with us. Such liabilities were not material at December 31, 2014 and 2013.

Premium Revenue

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. For the year ended December 31, 2014, we received more than 95% of our premium revenue as a fixed amount per member per month (PMPM), pursuant to our Medicaid, Medicare and Marketplace contracts, including agreements with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. Revenue not received on a fixed PMPM basis is recognized as earned. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

The following table summarizes premium revenue from continuing operations for the periods indicated:

	Year Ended December 31,					
	2014		2013		2012	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
	(Dollars in thousands)					
California	$ 1,523,084	16.9%	$ 749,755	12.1%	$ 665,600	12.0%
Florida	439,107	4.9	264,998	4.3	228,832	4.1
Illinois	153,271	1.7	8,121	0.1	—	—
Michigan	780,896	8.7	676,000	11.0	646,551	11.7
New Mexico	1,075,330	11.9	446,758	7.2	321,853	5.8
Ohio	1,552,949	17.2	1,098,795	17.8	1,095,137	19.7
South Carolina	381,317	4.2	—	—	—	—
Texas	1,318,192	14.6	1,291,001	20.9	1,233,621	22.2

	$ 9,022,511	100.0%	$ 6,179,170	100.0%	$ 5,544,121	100.0%

Certain components of premium revenue are subject to accounting estimates and fall into the following categories:

Contractual Provisions That May Adjust or Limit Revenue or Profit

Health Plan Medical Cost Floors (Minimums), Medical Cost Corridors, and Administrative Cost Ceilings (Maximums): A portion of certain Medicaid, Medicare, and Marketplace premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $392.4 million and $1.4 million at December 31, 2014, and December 31, 2013, respectively, to amounts due government agencies. Such liability amounts could be subject to future changes in estimate. The increase is primarily driven by contractual provisions relating to the Medicaid expansion program, which began to phase in during January 2014. Beginning in 2014, the health plans may receive additional premiums if amounts spent on medical care costs exceed a defined

maximum threshold. Separately, in certain states we may be levied with non-monetary sanctions if certain minimum amounts are not spent on defined medical care costs, or if administrative costs exceed certain amounts.

Health Plan Profit Sharing and Profit Ceiling: Our contracts with certain states contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage, in some cases in accordance with a tiered rebate schedule. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. As a result of profits in excess of the amount we are allowed to fully retain, we recorded a liability of $0.5 million and $2.5 million at December 31, 2014 and December 31, 2013, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services (CMS), our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of $7.6 million and $20.8 million for anticipated Medicare risk adjustment premiums at December 31, 2014 and December 31, 2013, respectively.

Quality Incentives

At our California, Illinois, New Mexico, Ohio, Texas, Washington and Wisconsin health plans, revenue ranging from approximately 1% to 4% of certain health plan premiums is earned if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of December 31, 2014 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of December 31, 2014.

	Year Ended December 31,		
	2014	2013	2012
	(In thousands)		
Maximum available quality incentive premium - current period	$ 90,327	$ 63,311	$ 74,564
Amount of quality incentive premium revenue recognized in current period:			
Earned current period	$ 40,396	$ 45,803	$ 62,489
Earned prior periods	3,950	9,056	2,202
Total	$ 44,346	$ 54,859	$ 64,691
Total premium revenue recognized for state health plans with quality incentive premiums	$ 7,083,660	$ 2,980,019	$ 2,721,289

California Health Plan Rate Settlement Agreement

In the fourth quarter of 2013, our California health plan entered into a settlement agreement with the California Department of Health Care Services (DHCS). The agreement settled rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in Medi-Cal (California's Medicaid program). Under the terms of the agreement, a settlement account (the Account) applicable to the California health plan's managed care contracts has been established.

Effective January 1, 2014, the Account was established with an initial balance of zero, and will be settled after December 31, 2017. DHCS will make an interim partial settlement payment to us if it terminates early, without replacement, any of our managed care contracts. The Account will be adjusted annually to reflect a calendar year deficit or surplus, which is determined by comparing the California health plan's pre-tax margin and a target margin established in the settlement agreement. Upon expiration of the settlement agreement, if the Account is in a deficit position, then DHCS will pay the amount of the deficit to us, subject to an alternative minimum payment amount. If the Account is in a surplus position, then no amount is owed to either party. The maximum amount that DHCS would pay to us under the terms of the settlement agreement is $40.0 million.

We estimate and recognize the retrospective adjustments to premium revenue based on our experience to date under the California health plan's managed care contracts. As of December 31, 2014, the California health plan's pre-tax margin exceeded the target margin, resulting in a surplus position. Consequently, a retrospective premium adjustment was not required for the year ended December 31, 2014.

Medical Care Costs

Expenses related to medical care services are captured in the following categories:

- *Fee-for-service expenses:* Nearly all hospital services and the majority of our primary care and physician specialist services and LTSS costs are paid on a fee-for-service basis. Under fee-for-service arrangements, we retain the financial responsibility for medical care provided and incur costs based on actual utilization of services. Such expenses are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit manager are included in fee-for-service costs.
- *Pharmacy expenses:* All drug, injectibles, and immunization costs paid through our pharmacy benefit manager are classified as pharmacy expenses. As noted above, drugs and injectibles not paid through our pharmacy benefit manager are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.
- *Capitation expenses:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated arrangements, we remain liable for the provision of certain health care services. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.
- *Direct delivery expenses:* All costs associated with our direct delivery of medical care are separately identified.
- *Other medical expenses:* All medically related administrative costs, certain provider incentive costs, reinsurance costs and other health care expenses are classified as other medical expenses. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, care coordination, disease management, and 24-hour on-call nurses. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2014, 2013, and 2012, medically related administrative costs were $262.6 million, $153.0 million, and $125.2 million, respectively.

The following table provides the details of our consolidated medical care costs from continuing operations for the periods indicated (dollars in thousands, except PMPM amounts):

	Year Ended December 31,								
	2014			2013			2012		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$ 5,672,483	$ 202.87	70.2%	$ 3,611,529	$ 160.43	67.1%	$ 3,423,751	$ 161.67	68.6%
Pharmacy	1,273,329	45.54	15.8	935,204	41.54	17.4	835,830	39.47	16.7
Capitation	748,388	26.77	9.3	603,938	26.83	11.2	552,136	26.07	11.1
Direct delivery	96,196	3.44	1.2	48,288	2.14	0.9	33,920	1.60	0.7
Other	285,935	10.22	3.5	181,165	8.05	3.4	145,551	6.87	2.9
Total	$ 8,076,331	$ 288.84	100.0%	$ 5,380,124	$ 238.99	100.0%	$ 4,991,188	$ 235.68	100.0%

The Missouri health plan's medical care costs, which are not included in the table above, amounted to $0.6 million, $1.5 million, and $105.6 million for the years ended December 31, 2014, 2013, and 2012, respectively.

Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are incurred but not paid (IBNP). Our IBNP claims reserve, as reported in our

balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. For further information, see Note 11, "Medical Claims and Benefits Payable."

We report reinsurance premiums as medical care costs, while related reinsurance recoveries are reported as deductions from medical care costs. We limit our risk of catastrophic losses by maintaining high deductible reinsurance coverage. We do not consider this coverage to be material because the cost is not significant and the likelihood that coverage will apply is low.

Taxes Based on Premiums

Health Insurer Fee. The federal government under the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively, the Affordable Care Act, or ACA) imposes an annual fee, or excise tax, on health insurers for each calendar year. The health insurer fee (HIF) is based on a company's share of the industry's net premiums written during the preceding calendar year, and is non-deductible for income tax purposes. We recognize expense for the HIF over the year on a straight-line basis. Because we primarily serve individuals in government-sponsored programs, we must secure additional reimbursement from our state partners for this added cost. We recognize the related revenue when we have obtained a contractual commitment from a state to reimburse us for the HIF; such HIF revenue is recognized ratably throughout the year.

Premium and Use Tax. Certain of our health plans are assessed a tax based on premium revenue collected. The premium revenues we receive from these states include the premium tax assessment. We have reported these taxes on a gross basis, as premium tax revenue and as premium tax expense in the consolidated statements of income.

Premium Deficiency Reserves on Loss Contracts

We assess the profitability of our contracts for providing medical care services to our members and identify those contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared to anticipated medical care costs, including the cost of processing claims. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. No such accrual was recorded as of December 31, 2014, or 2013.

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid management information system (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the contract term during which BPO, hosting, and support and maintenance services are delivered. There may be certain contractual provisions containing contingencies, however that require us to delay recognition of all or part of our service revenue until such contingencies have been removed.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element, and are therefore multiple-element service arrangements.

Additionally, we evaluate each required deliverable under our multiple-element service arrangements to determine whether it qualifies as a separate unit of accounting. Such evaluation is generally based on whether the deliverable has standalone value to the customer. If the deliverable has standalone value, the arrangement’s consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and

- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. Therefore, absent any contingencies as discussed in the following paragraph, or contract extensions, we would recognize all revenue associated with those contracts over the initial contract period. When a contract is extended, we generally consider the extension to be a continuation of the single unit of accounting; therefore, the deferred revenue as of the extension date is recognized prospectively over the new remaining term of the contract. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances, we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts, for example. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs;
- Employee costs incurred in performing transaction services;
- Vendor costs incurred in performing transaction services;
- Costs incurred in performing required monitoring of and reporting on contract performance;
- Costs incurred in maintaining and processing member and provider eligibility; and
- Costs incurred in communicating with members and providers.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes, nondeductible HIF expenses, nondeductible compensation and other general and administrative expenses. The effective tax rate may be subject to fluctuations during the year, particularly as a result of the mathematical impact of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers. For further discussion and disclosure, see Note 14, "Income Taxes."

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Funds Prime Series — Institutional Class, and the PFM Funds Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end

management investment fund. As of December 31, 2014, and 2013, our investments with PFM amounted to approximately $321 million and $374 million, respectively. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of 10 years and an average duration of three years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our health plan subsidiaries operate.

Risks and Uncertainties

Our profitability depends in large part on our ability to accurately predict and effectively manage medical care costs. We continually review our medical costs in light of our underlying claims experience and revised actuarial data. However, several factors could adversely affect medical care costs. These factors, which include changes in health care practices, inflation, new technologies, major epidemics, natural disasters, and malpractice litigation, are beyond our control and may have an adverse effect on our ability to accurately predict and effectively control medical care costs. Costs in excess of those anticipated could have a material adverse effect on our financial condition, results of operations, or cash flows.

We operate health plans in 11 states, primarily as a direct contractor with the states, and in Los Angeles County, California, as a subcontractor to another health plan holding a direct contract with the state. We are therefore dependent upon a small number of contracts to support our revenue. The loss of any one of those contracts could have a material adverse effect on our financial position, results of operations, or cash flows. Our ability to arrange for the provision of medical services to our members is dependent upon our ability to develop and maintain adequate provider networks. Our inability to develop or maintain such networks might, in certain circumstances, have a material adverse effect on our financial position, results of operations, or cash flows.

Recent Accounting Pronouncements

Health Insurer Fee. In the first quarter of 2014, we adopted the guidance of the Financial Accounting Standards Board (FASB) related to accounting for the fees to be paid by health insurers to the federal government under the ACA, specifically the HIF. The HIF is imposed beginning in 2014, is based on a company's share of the industry's net premiums written during the preceding calendar year, and is payable on September 30 of each year. Effective January 1, 2014, we recorded our estimate of the 2014 liability to accounts payable and accrued liabilities. During the third quarter of 2014 we paid our 2014 HIF assessment, which amounted to $88.6 million.

Revenue Recognition. In May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09 - *Revenue from Contracts with Customers*, which will supersede nearly all existing revenue recognition guidance under U.S. generally accepted accounting principles (GAAP). The core principal of this ASU is that an entity should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. This ASU will be effective for us in the first quarter of 2017; early adoption is not permitted. The ASU allows for either full retrospective or modified retrospective adoption. We are evaluating the transition method that will be elected and the potential effects of the adoption of this ASU on our financial statements.

Discontinued Operations. In April 2014, the FASB issued ASU 2014-08 - *Reporting Discontinued Operations and Disclosures of Disposal of Components of an Entity*, which raises the threshold for disposals to qualify as discontinued operations by focusing on strategic shifts that have or will have a major effect on an entity’s operations and financial results. This ASU will be effective for us in the first quarter of 2015, and is applied prospectively. Early adoption is permitted but only for disposals (or classifications as held for sale) that have not been reported in financial statements previously issued or available for issue. We are evaluating the potential effects of the adoption of the ASU on our financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants (AICPA), and the Securities and Exchange Commission (SEC), did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	December 31,		
	2014	2013	2012
	(In thousands)		
Shares outstanding at the beginning of the period	45,871	46,762	45,815
Weighted-average number of shares:			
Repurchased	—	(1,445)	(2)
Issued, 3.75% Notes and 3.75% Exchange (1)	566	—	—
Issued, share-based compensation	498	400	567
Denominator for basic net income per share	46,935	45,717	46,380
Effect of dilutive securities:			
Share-based compensation	498	643	619
3.75% Notes and 3.75% Exchange (1)	907	502	—
Denominator for diluted net income per share	48,340	46,862	46,999
Potentially dilutive common shares excluded from calculations (2):			
Stock options	—	51	87
1.125% Warrants	13,490	11,975	—
Restricted shares	—	—	304

(1) For more information regarding the 3.75% Exchange and 3.75% Notes, refer to Note 12, "Long-Term Debt."

(2) Potentially dilutive shares issuable pursuant to certain of our employee stock options, 1.125% Warrants (defined in Note 13, "Derivative Financial Instruments"), and 1.625% Notes (defined in Note 12, "Long-Term Debt") were not included in the computation of diluted net income per share because to do so would have been anti-dilutive.

4. Business Combinations

Health Plans Segment

Florida. In December 2014, our Florida health plan acquired certain assets relating to the Medicaid business of First Coast Advantage, LLC (FCA). As part of the transaction, we assumed FCA's Medicaid contract and certain provider agreements for Region 4 of the Statewide Medicaid Managed Care Managed Medical Assistance Program in the state of Florida. The Florida health plan's membership increased by approximately 62,000 members as a result of this transaction. We estimate that the final purchase price for this acquisition, to be settled in the first quarter of 2015, will be approximately $44.6 million.

In August 2014, our Florida health plan acquired certain assets relating to the Medicaid business of Healthy Palm Beaches, Inc. The final purchase price for this acquisition was $7.5 million. The Florida health plan's membership increased by approximately 11,000 members as a result of this transaction.

In connection with these transactions, we recorded goodwill amounting to $41.2 million, which relates to future economic benefits arising from expected synergies to be achieved. Such synergies include use of our existing infrastructure to support the added membership. The amount recorded as goodwill represents intangible assets that do not qualify for separate recognition as identifiable intangible assets. Goodwill is not amortized, but is subject to an annual impairment test. The entire amount recorded as goodwill is deductible for income tax purposes. We also recorded intangible assets in the following major classes: contract rights and licenses amounting to $5.8 million, and provider networks amounting to $5.0 million. Contract rights and licenses are amortized over a period of five years, and provider networks are amortized over a period of 10 years. The weighted-average amortization period, in the aggregate, is 7.3 years.

South Carolina. In July 2013, we entered into an agreement with Community Health Solutions of America, Inc. (CHS) to acquire certain assets, including rights to convert certain of CHS' Medicaid members covered by South Carolina's full-risk Medicaid managed care program. The conversion conditions under the agreement were satisfied by January 1, 2014, and on that date such Medicaid members were converted to the managed care program and enrolled with our South Carolina health plan. The total purchase price for the converted Medicaid membership amounted to $57.2 million, of which $49.7 million was

paid in the first half of 2014, and $7.5 million was paid when the agreement was executed in 2013. The total amount paid included indemnification withhold funds transferred to restricted investments amounting to $5.7 million, which were released to CHS in January 2015.

Because the number of Medicaid members we would ultimately convert was unknown as of the acquisition date in 2013, we recorded a contingent consideration liability for such members to be settled when the final purchase price was known in the second quarter of 2014. In addition, we recorded a contingent consideration liability for dual-eligible members we expect to enroll in our Medicare-Medicaid Plan (MMP) implementation in South Carolina in 2015. The contingent consideration liability is remeasured to fair value at each quarter until the contingency is resolved with fair value adjustments, if any, recorded to operations. As of December 31, 2014, the fair value of the remaining contingent consideration liability for the MMP implementation amounted to $0.5 million. The aggregate contingent consideration liability fair value adjustments for the South Carolina transaction resulted in a gain of $5.2 million in the year ended December 31, 2014.

New Mexico. In August 2013, our New Mexico health plan acquired Lovelace Community Health Plan's contract for the state of New Mexico's Medicaid program. In addition to Lovelace's Medicaid members, we also added membership previously covered under New Mexico's State Coverage Insurance (SCI) program with Lovelace. Effective January 1, 2014, these SCI members were either enrolled in New Mexico's Medicaid program, or eligible to enroll in New Mexico's Marketplace. Because the number of SCI members we would ultimately retain was unknown as of the acquisition date in 2013, we recorded a contingent consideration liability for such members to be settled when the final purchase price was known in the second quarter of 2014. The aggregate contingent consideration liability fair value adjustments for the New Mexico transaction resulted in a gain of $1.5 million in the year ended December 31, 2014.

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, other assets, trade accounts payable, medical claims and benefits payable, amounts due government agencies, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities (excluding contingent consideration) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs

Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs

Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit that are classified as current investments in the accompanying consolidated balance sheets. Such investments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs

Derivative financial instruments. Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Notes Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of December 31, 2014 included our common stock price, time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 13, "Derivative Financial Instruments," the 1.125% Call Option asset and the 1.125% Notes Conversion Option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of income. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

Contingent consideration liability. Such liability relates to our South Carolina health plan acquisition described in Note 4, "Business Combinations," and is recorded in accounts payable and accrued liabilities. We applied a cash flow analysis to determine the fair value of this liability. Significant unobservable inputs primarily related to the purchase price estimate for the projected membership.

Auction rate securities. Auction rate securities are designated as available-for-sale and are reported at fair value in other assets. To estimate the fair value of these securities we use valuation data from our primary pricing source, a third party who provides

a marketplace for illiquid assets with over 10,000 participants. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of December 31, 2014.

Our financial instruments measured at fair value on a recurring basis at December 31, 2014, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 641,729	$ —	$ 641,729	$ —
Municipal securities	127,045	—	127,045	—
GSEs	122,269	122,269	—	—
U.S. treasury notes	59,543	59,543	—	—
Certificates of deposit	68,876	—	68,876	—
Auction rate securities	4,847	—	—	4,847
1.125% Call Option derivative asset	329,323	—	—	329,323
Total assets measured at fair value on a recurring basis	$ 1,353,632	$ 181,812	$ 837,650	$ 334,170
1.125% Notes Conversion Option derivative liability	$ 329,194	$ —	$ —	$ 329,194
Contingent consideration liability	500	—	—	500
Total liabilities measured at fair value on a recurring basis	$ 329,694	$ —	$ —	$ 329,694

Our financial instruments measured at fair value on a recurring basis at December 31, 2013, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 449,772	$ —	$ 449,772	$ —
Municipal securities	113,330	—	113,330	—
GSEs	68,817	68,817	—	—
U.S. treasury notes	37,376	37,376	—	—
Certificates of deposit	33,757	—	33,757	—
Auction rate securities	10,898	—	—	10,898
1.125% Call Option derivative asset	186,351	—	—	186,351
Total assets measured at fair value on a recurring basis	$ 900,301	$ 106,193	$ 596,859	$ 197,249
1.125% Notes Conversion Option derivative liability	$ 186,239	$ —	$ —	$ 186,239
Contingent consideration liabilities	57,548	—	—	57,548
Total liabilities measured at fair value on a recurring basis	$ 243,787	$ —	$ —	$ 243,787

The following table presents activity relating to our assets (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	Changes in Level 3 Instruments		
	Auction Rate Securities	Derivatives, Net	Contingent Consideration Liabilities
	(In thousands)		
Balance at December 31, 2013	$ 10,898	$ 112	$ (57,548)
Total gains for the period recognized in:			
General and administrative expenses	—	—	6,699
Other expense, net	—	17	—
Other comprehensive income	249	—	—
Settlements	(6,300)	—	50,349
Balance at December 31, 2014	$ 4,847	$ 129	$ (500)

Fair Value Measurements - Disclosure Only

The carrying amounts and estimated fair values of our convertible senior notes, which are classified as Level 2 financial instruments, are indicated in the following table. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

	December 31, 2014				
	Carrying Amount	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
1.125% Notes	$ 435,330	$ 767,377	$ —	$ 767,377	$ —
1.625% Notes	268,767	337,292	—	337,292	—
	$ 704,097	$ 1,104,669	$ —	$ 1,104,669	$ —

	December 31, 2013				
	Carrying Amount	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
1.125% Notes	$ 416,368	$ 572,627	$ —	$ 572,627	$ —
3.75% Notes	181,872	219,491	—	219,491	—
	$ 598,240	$ 792,118	$ —	$ 792,118	$ —

6. Investments

The following tables summarize our investments as of the dates indicated:

	December 31, 2014			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 642,910	$ 201	$ 1,382	$ 641,729
Municipal securities	127,185	129	269	127,045
GSEs	122,317	34	82	122,269
U.S. treasury notes	59,546	30	33	59,543
Certificates of deposit	68,893	1	18	68,876

	$ 715,702	$ 613	$ 2,365	$ 713,950

The contractual maturities of our investments as of December 31, 2014 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 448,880	$ 448,732
Due one year through five years	571,971	570,730
Due after ten years	5,100	4,847
	$ 1,025,951	$ 1,024,309

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the year ended December 31, 2014, 2013, and 2012 were insignificant.

For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at December 31, 2014, and 2013, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2014.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More

Auction Rate Securities. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 16 years to 32 years. Considering the insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction rate securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at December 31, 2014. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $77.0 million of these instruments at par value.

For the years ended December 31, 2014, 2013 and 2012, we recorded unrealized gains of $0.2 million, $0.7 million and $1.6 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future impairment is other-than-temporary, we will record a charge to earnings as appropriate.

7. Receivables

Receivables consist primarily of amounts due from the various states in which we operate, which may be subject to potential retroactive adjustments. Because all of our receivable amounts are readily determinable and substantially all of our creditors are state governments, our allowance for doubtful accounts is immaterial. Accounts receivable increased as of December 31, 2014, primarily due to significant enrollment growth in 2014.

	December 31,	
	2014	2013
	(In thousands)	
California	$ 310,938	$ 148,654

	$ 596,456	$ 298,935

8. Property, Equipment, and Capitalized Software

A summary of property, equipment, and capitalized software is as follows:

	December 31,	
	2014	2013
	(In thousands)	
Land	$ 15,514	$ 15,764
Building and improvements	195,405	165,670
Furniture and equipment	140,691	131,478
Capitalized software	266,782	187,105
	618,392	500,017
Less: accumulated depreciation and amortization on building and improvements, furniture and equipment	(129,161)	(103,918)
Less: accumulated amortization for capitalized software	(148,453)	(104,016)
	(277,614)	(207,934)
Property, equipment, and capitalized software, net	$ 340,778	$ 292,083

Depreciation recognized for building and improvements, and furniture and equipment was $34.6 million, $26.6 million, and $20.5 million for the years ended December 31, 2014, 2013 and 2012, respectively. Amortization of capitalized software was $58.7 million, $46.4 million, and $36.2 million for the years ended December 31, 2014, 2013 and 2012, respectively.

Molina Center. We acquired the Molina Center in December 2011. Subsequently, in June 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of the Molina Center. Due to our continuing involvement with the leased property, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the property. See Note 12, "Long-Term Debt."

Future minimum rental income on noncancelable leases from third party tenants of the Molina Center is sublease rental income, and is reported in other revenue in our consolidated statements of income. The future minimum rental income is as follows:

	(In thousands)
2015	$ 4,313
2016	4,035
2017	4,256
2018	4,116
2019	1,557
Thereafter	2,164
Total minimum future rentals	$ 20,441

9. Goodwill and Intangible Assets

The following table provides the details of identified intangible assets, by major class, for the periods indicated:

	Cost	Accumulated Amortization	Net Balance
		(In thousands)	
Intangible assets:			
Contract rights and licenses	$ 182,228	$ 105,613	$ 76,615
Customer relationships	24,550	22,154	2,396
Contract backlog	23,600	22,540	1,060
Provider networks	18,401	9,199	9,202
Balance at December 31, 2014	$ 248,779	$ 159,506	$ 89,273
Intangible assets:			
Contract rights and licenses	$ 176,428	$ 92,789	$ 83,639
Customer relationships	24,550	18,801	5,749
Contract backlog	23,600	19,624	3,976
Provider networks	13,370	7,863	5,507
Balance at December 31, 2013	$ 237,948	$ 139,077	$ 98,871

Based on the balances of our identifiable intangible assets as of December 31, 2014, we estimate that our intangible asset amortization will be $16.3 million in 2015, $14.4 million in 2016, $14.1 million in 2017, $13.8 million in 2018, and $9.2 million in 2019. For a presentation of our goodwill and intangible assets by reportable segment, refer to Note 21, "Segment Information."

The following table presents the balances of goodwill as of December 31, 2014 and 2013:

	December 31, 2013	Acquisitions	December 31, 2014
		(In thousands)	
Goodwill, gross	$ 289,268	$ 41,226	$ 330,494
Accumulated impairment losses	(58,530)	—	(58,530)
Goodwill, net	$ 230,738	$ 41,226	$ 271,964

The change in the carrying amount of goodwill in 2014 was due to the acquisitions described in Note 4, "Business Combinations."

10. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by state authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. Additionally, in connection with a Molina Medicaid Solutions segment state contract, we maintain restricted investments as collateral for a letter of credit. The following table presents the balances of restricted investments:

	December 31,	
	2014	2013
	(In thousands)	
California	$ 373	$ 373
Florida	28,649	9,242
Illinois	311	310
Michigan	1,014	1,014
New Mexico	35,135	24,622
Ohio	12,719	9,080
South Carolina	6,040	310
Texas	3,500	3,500
Utah	3,601	3,301
Washington	151	151
Other	5,985	886
Total Health Plans segment	97,478	52,789
Molina Medicaid Solutions segment	5,001	10,304
	$ 102,479	$ 63,093

The contractual maturities of our held-to-maturity restricted investments as of December 31, 2014 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 101,017	$ 101,022
Due one year through five years	1,462	1,462
	$ 102,479	$ 102,484

11. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated.

	December 31,		
	2014	2013	2012
	(In thousands)		
Fee-for-service claims incurred but not paid (IBNP)	$ 870,429	$ 424,173	$ 377,614
Pharmacy payable	71,412	45,037	38,992
Capitation payable	28,150	20,267	49,066
Other	230,531	180,310	28,858
	$ 1,200,522	$ 669,787	$ 494,530

"Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. Such non-risk provider payables amounted to $119.3 million and $151.3 million as of December 31, 2014 and 2013, respectively.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts presented for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year Ended December 31,		
	2014	2013	2012
	(Dollars in thousands)		
Balances at beginning of period	$ 669,787	$ 494,530	$ 402,476
Components of medical care costs related to:			
Current period	8,122,885	5,434,443	5,136,055
Prior periods	(45,979)	(52,779)	(39,295)
Total medical care costs	8,076,906	5,381,664	5,096,760
Change in non-risk provider payables	(31,973)	111,267	(7,004)
Payments for medical care costs related to:			
Current period	7,064,427	4,932,195	4,689,395
Prior periods	449,771	385,479	308,307
Total paid	7,514,198	5,317,674	4,997,702
Balances at end of period	$ 1,200,522	$ 669,787	$ 494,530

That portion of our total medical claims and benefits payable liability that is most subject to variability in the estimate is fee-for-service claims incurred but not paid (IBNP). Our IBNP, as included in medical claims and benefits payable, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors.

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims deviation and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate—we only know when the circumstances for any one or more factors are out of the ordinary.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under– or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate.

As indicated above, the amounts ultimately paid out on our medical claims and benefits payable liabilities in fiscal years 2014, 2013, and 2012 were less than what we had expected when we had established those liabilities. The differences between our original estimates and the amounts ultimately paid out (or now expected to be ultimately paid out) for the most part related to IBNP. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

2014

We believe that the most significant factors that will determine the accuracy of our IBNP estimates at December 31, 2014 are:

- The addition since January 1, 2014, of 385,000 members under Medicaid expansion in six of our health plans. Because these members are transitioning into managed care, and have different demographics than those of our legacy membership, we have little insight into their utilization of medical services. Additionally, as of December 31, 2014, we have relatively little medical claims payment history related to Medicaid expansion membership in Illinois, Michigan and Ohio because such members were enrolled in these states later in the year. Accordingly, our estimates of the claims liability for this population are subject to a higher degree of uncertainty.
- The addition of approximately 6,000 to 8,000 members per month on a retroactive basis during the last several months of 2014 at our New Mexico health plan. Because we have no claims payment history for these members, our estimates of the claims liability for this population are subject to a higher degree of uncertainty. However, for these members, the state will reimburse the health plan for claims with dates of services during the retroactive period on a cost-plus basis (claims paid plus an administration fee).
- The addition of new membership to our MMP and aged, blind or disabled (ABD) programs at several of our health plans whose benefits include a substantial amount of managed LTSS benefits. Because these are newer members with substantially different benefits than our legacy members, our estimates of the claims liability for this population are subject to a higher degree of uncertainty.

We recognized favorable prior period claims development in the amount of $46.0 million for the year ended December 31, 2014. This amount represents our estimate as of December 31, 2014, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2013 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation was due primarily to the following factors:

- At our Ohio health plan, we entered new regions in the state, and a new product, ABD Kids, in July 2013. Since we did not have enough historical claims data to use the pattern of paid and incurred claims, we initially estimated the reserves for these new members by applying an estimated medical care ratio (MCR). This resulted in an overstatement of our reserve liability as of December 31, 2013.
- At our Michigan health plan, we overestimated the impact of certain unpaid potentially high-dollar claims. In addition, we overestimated the impact of the flu season on the outpatient claims for November and December 2013, which caused an overestimation in our outpatient reserve liability as of December 31, 2013.

2013

We recognized favorable prior period claims development in the amount of $52.8 million for the year ended December 31, 2013. This amount represents our estimate as of December 31, 2013, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2012 was more than the amount that was ultimately paid out in satisfaction of that liability. We believe the overestimation was due primarily to the following factors:

- At our Washington health plan certain high-cost newborns, as well as other high-cost disabled members, were covered by the health plan effective July 1, 2012. At the end of 2012, we had limited claims history with which to estimate the claims liability of these members, and overstated the liability for such members.
- At our New Mexico health plan, we overestimated the impact of certain high-dollar outstanding claim payments as of December 31, 2012.
- At our Ohio health plan, we overestimated the impact of several potential high-dollar claims relating to our ABD members.

2012

Prior period claims development of our estimate as of December 31, 2011 through December 31, 2012 was favorable by $39.3 million.

12. Long-Term Debt

As of December 31, 2014, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2015	2016	2017	2018	2019	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
1.625% Notes (1)	301,551	—	—	—	—	—	301,551
	$ 851,551	$ —	$ —	$ —	$ —	$ —	$ 851,551

(1) The 1.625% Notes have a contractual maturity date in 2044; however, on specified dates beginning in 2018 as described below, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes, or we may redeem any or all of the 1.625% Notes.

1.125% Cash Convertible Senior Notes due 2020. In February 2013, we issued $550.0 million aggregate principal amount of 1.125% cash convertible senior notes (the 1.125% Notes) due January 15, 2020, unless earlier repurchased or converted. Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 at a rate of 1.125% per annum.

The 1.125% Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. The initial conversion rate for the 1.125% Notes is 24.5277 shares of our common stock per $1,000 principal amount of the 1.125% Notes. This represents an initial conversion price of approximately $40.77 per share of our common stock. The conversion rate is subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest. Holders may convert their 1.125% Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;

- during the five business day period immediately after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;

- upon the occurrence of specified corporate events; or

- at any time on or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture. We may not redeem the 1.125% Notes prior to the maturity date.

As of December 31, 2014, the 1.125% Notes were not convertible.

The 1.125% Notes contain an embedded cash conversion option (the 1.125% Notes Conversion Option), which was separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the 1.125% Notes Conversion Option transaction settles or expires. The initial fair value liability of the 1.125% Notes Conversion Option simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). This discount is amortized to the 1.125% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 6%. As of December 31, 2014, we expect the 1.125% Notes to be outstanding until their maturity date, for a remaining amortization period of 5.0 years. The 1.125% Notes' if-converted value exceeded their principal amount by approximately $93 million as of December 31, 2014, and did not exceed their principal amount as of December 31, 2013.

3.75% Exchange. In August 2014, we entered into separate, privately negotiated, exchange agreements (the 3.75% Exchange) with certain holders of our outstanding 3.75% convertible senior notes due 2014 (the 3.75% Notes). In this transaction, we

exchanged $176.6 million aggregate principal amount of the 3.75% Notes for $176.6 million principal amount of 1.625% convertible senior notes due 2044 (see further discussion below), approximately 1.7 million shares of our common stock, and payment of accrued interest on the exchanged 3.75% Notes. We did not receive any proceeds related to the 3.75% Exchange.

1.625% Convertible Senior Notes due 2044. In September 2014, we issued $125.0 million principal amount of 1.625% convertible senior notes (the 1.625% Notes) due August 15, 2044, unless earlier repurchased, redeemed or converted. Combined with the 1.625% Notes issued in connection with the 3.75% Exchange described above, the aggregate principal amount issued under the 1.625% Notes was $301.6 million.

Interest on the 1.625% Notes is payable semiannually in arrears on February 15 and August 15, at a rate of 1.625% per annum, beginning on February 15, 2015. In addition, beginning with the semiannual interest period commencing immediately following the interest payment date on August 15, 2018, contingent interest will accrue on the 1.625% Notes during any semiannual interest period in which certain conditions or events occur, or under certain events of default. For example, additional interest of 0.25% per year will be payable on the 1.625% Notes for any semiannual interest period for which the principal amount of 1.625% Notes outstanding is less than $100 million.

The proceeds from the issuance of the 1.625% Notes amounted to $122.6 million, including a premium of $0.6 million, and net of deferred issuance costs paid for both the 3.75% Exchange and the additional $125.0 million principal amount issued. In connection with aggregate principal amount of the 1.625% Notes, we have recorded total deferred issuance costs of approximately $6 million, which will be amortized over the expected term of the debt, as discussed further below.

The 1.625% Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.625% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The initial conversion rate for the 1.625% Notes is 17.2157 shares of our common stock per $1,000 principal amount of the 1.625% Notes. This represents an initial conversion price of approximately $58.09 per share of our common stock. Upon conversion, we will pay cash and, if applicable, deliver shares of our common stock to the converting holder in an amount per $1,000 principal amount of 1.625% Notes equal to the settlement amount (as defined in the related indenture). Holders may convert their 1.625% Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on September 30, 2014 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;
- during the five business day period after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.625% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;
- upon the occurrence of specified corporate events;
- if we call any 1.625% Notes for redemption, at any time until the close of business on the business day immediately preceding the redemption date;
- during the period from, and including, May 15, 2018 to the close of business on the business day immediately preceding August 19, 2018; or
- at any time on or after February 15, 2044 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.625% Notes, in integral multiples of $1,000 principal amount, at the option of the holder regardless of the foregoing circumstances.

As of December 31, 2014, the 1.625% Notes were not convertible.

We may not redeem the 1.625% Notes prior to August 19, 2018. On or after August 19, 2018, we may redeem for cash all or part of the 1.625% Notes, except for the 1.625% Notes we are required to repurchase in connection with a fundamental change or on any specified repurchase date. The redemption price for the 1.625% Notes will equal 100% of the principal amount of the 1.625% Notes being redeemed, plus accrued and unpaid interest. In addition, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes for cash on August 19, 2018, August 19, 2024, August 19, 2029, August 19, 2034 and August 19, 2039, in each case, at a specified price equal to 100% of the principal amount of the 1.625% Notes to be repurchased, plus accrued and unpaid interest.

Because the 1.625% Notes have cash settlement features, we have allocated the principal amount between a liability component and an equity component. The reduced carrying value on the 1.625% Notes resulted in a debt discount that is amortized back to the 1.625% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. The expected life of the debt is approximately four years, beginning on the issuance date and ending on the first date we may redeem the notes in August 2018. As of December 31, 2014, we expect the 1.625% Notes to be outstanding until August 2018, for a remaining amortization period of 3.6 years. This has resulted in our recognition of interest expense on the 1.625% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 5%. The outstanding 1.625% Notes' if-converted value did not exceed their principal amount as of December 31, 2014. At December 31, 2014, the equity component of the 1.625% Notes, including the impact of deferred taxes, was $22.9 million.

3.75% Convertible Senior Notes due 2014. As described above, we entered into the 3.75% Exchange transaction in August 2014, under which we exchanged $176.6 million of the outstanding principal amount of the 3.75% Notes for the 1.625% Notes. The remaining $10.4 million principle amount was repaid in full in October 2014. In addition to the repayment of the outstanding principle balance, in early October 2014 we issued approximately 0.1 million shares to settle the 3.75% Notes' conversion feature.

The principal amounts, unamortized discount (net of premium related to 1.625% Notes), and net carrying amounts of the convertible senior notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
December 31, 2014:			
1.125% Notes	$ 550,000	$ 114,670	$ 435,330
1.625% Notes	301,551	32,784	268,767
	$ 851,551	$ 147,454	$ 704,097
December 31, 2013:			
1.125% Notes	$ 550,000	$ 133,632	$ 416,368
3.75% Notes	187,000	5,128	181,872
	$ 737,000	$ 138,760	$ 598,240

	Years Ended December 31,		
	2014	2013	2012
		(In thousands)	
Interest cost recognized for the period relating to the:			
Contractual interest coupon rate	$ 12,504	$ 12,427	$ 7,012
Amortization of the discount	26,064	22,103	5,942
	$ 38,568	$ 34,530	$ 12,954

Lease Financing Obligations. In 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of the Molina Center located in Long Beach, California, and our Ohio health plan office building located in Columbus, Ohio. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated and amortized over their remaining useful lives. The lease financing obligation is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Rent will increase 3% per year through the initial term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest amounted to $12.5 million and $6.8 million for the year ended December 31, 2014 and 2013, respectively.

As described and defined in further detail in Note 18, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings. We have concluded that we are the accounting owner of the buildings due to our continuing involvement with the properties. We have recorded $38.4 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of December 31, 2014, which represents the total cost incurred by the Landlord for the construction of the buildings, net of accumulated depreciation. As of December 31, 2014, the aggregate amount recorded to lease financing obligations, including the current portion, amounted to $40.6 million. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense for the years ended December 31, 2014, and 2013, was $3.2 million and $1.3

million, respectively. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, amounting to $1.1 million for the year ended December 31, 2014, and insignificant for the year ended December 31, 2013. For information regarding the future minimum lease obligation, refer to Note 20, "Commitments and Contingencies."

13. Derivative Financial Instruments

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

		December 31,	
	Balance Sheet Location	2014	2013
		(In thousands)	
Derivative asset:			
1.125% Call Option	Non-current assets: Derivative asset	$ 329,323	$ 186,351
Derivative liability:			
1.125% Notes Conversion Option	Non-current liabilities: Derivative liability	$ 329,194	$ 186,239

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of income, and reported in other expense, net. Gains and losses for our derivative financial instruments are presented individually in the consolidated statements of cash flows, supplemental cash flow information.

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Notes in 2013 as described in Note 12, "Long-Term Debt," we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 5, "Fair Value Measurements."

1.125% Notes Conversion Option. The embedded cash conversion option within the 1.125% Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Notes Conversion Option, refer to Note 5, "Fair Value Measurements."

Interest Rate Swap. In 2012, we entered into a $42.5 million notional amount interest rate swap, which was intended to reduce our exposure to fluctuations in the contractual variable interest rates under our term loan agreement that was repaid in June 2013. In June 2013, we settled the interest rate swap for $0.9 million.

14. Income Taxes

The provision for income taxes for continuing operations consisted of the following:

	Year Ended December 31,		
	2014	2013	2012
	(In thousands)		
Current:			
Federal	$ 72,040	$ 66,883	$ 23,019
State	3,038	581	1,254
Total current	75,078	67,464	24,273
Deferred:			
Federal	(72)	(25,498)	(9,205)
State	(2,280)	(5,650)	(4,555)
Total deferred	(2,352)	(31,148)	(13,760)
	$ 72,726	$ 36,316	$ 10,513

A reconciliation of the U.S. federal statutory income tax rate to the combined effective income tax rate for continuing operations is as follows:

	Year Ended December 31,		
	2014	2013	2012
Statutory federal tax rate	35.0 %	35.0 %	35.0 %
State income taxes, net of federal benefit	0.4	(0.5)	(9.2)
Change in unrecognized tax benefits	(0.1)	(3.7)	0.7
Nondeductible health insurer fee (HIF)	22.9	—	—
Nondeductible compensation	(4.1)	9.6	6.2
Nondeductible lobbying	(0.3)	1.6	4.2
Nondeductible fair value of 1.125% Warrants	—	2.4	—
Change in fair value of contingent consideration liabilities	—	(0.3)	4.8
Other	—	0.7	3.3
Effective tax rate	53.8 %	44.8 %	45.0 %

Our effective tax rate is based on expected income, statutory tax rates, and tax planning opportunities available to us in the various jurisdictions in which we operate. Significant management estimates and judgments are required in determining our effective tax rate. We are routinely under audit by federal, state, or local authorities regarding the timing and amount of deductions, nexus of income among various tax jurisdictions, and compliance with federal, state, and local tax laws.

During 2014, the Internal Revenue Service (IRS) issued final regulations related to compensation deduction limitations applicable to certain health insurance issuers. Pursuant to these final regulations, we reversed amounts treated as nondeductible in 2013 and recognized a tax benefit during 2014.

During 2014, 2013, and 2012, excess tax benefits from share-based compensation amounted to $3.0 million, $1.6 million, and $3.1 million, respectively. These amounts were recorded as a decrease to income taxes payable and an increase to additional paid-in capital.

Deferred tax assets and liabilities are classified as current or non-current according to the classification of the related asset or liability. Significant components of our deferred tax assets and liabilities as of December 31, 2014 and 2013 were as follows:

	December 31,	
	2014	2013
	(In thousands)	
Accrued expenses	$ 13,323	$ 19,545
Reserve liabilities	2,487	1,712
State taxes	(134)	(1,323)
Other accrued medical costs	3,800	2,540
Net operating losses	27	27
Unrealized losses	444	380
Unearned premiums	21,749	10,543
Prepaid expenses	(5,920)	(5,354)
Basis in debt	(210)	(2,162)
Deferred compensation	5,252	2,087
Other, net	(244)	(928)
Valuation allowance	(1,042)	(511)
Deferred tax asset, net of valuation allowance — current	39,532	26,556
Reserve liabilities	2,017	1,909
State tax credit carryover	8,157	7,027
Net operating losses	3,138	2,326
Unrealized losses	181	286
Depreciation and amortization	(57,068)	(40,433)
Deferred compensation	4,405	3,404
Lease financing obligation	34,084	27,543
Basis in debt	(14,724)	466
Other, net	(96)	(24)
Valuation allowance	(4,365)	(3,084)
Deferred tax liability, net of valuation allowance — long term	(24,271)	(580)
Net deferred income tax asset	$ 15,261	$ 25,976

At December 31, 2014, we had federal and state net operating loss carryforwards of $0.2 million and $84.0 million, respectively. The federal net operating loss begins expiring in 2018, and state net operating losses begin expiring in 2015. The utilization of the net operating losses is subject to certain limitations under federal law.

At December 31, 2014, we had California enterprise zone tax credit carryovers of $12.5 million which expire in 2024.

We evaluate the need for a valuation allowance taking into consideration the ability to carry back and carry forward tax credits and losses, available tax planning strategies and future income, including reversal of temporary differences. We have determined that as of December 31, 2014, $5.4 million of deferred tax assets did not satisfy the recognition criteria due to uncertainty regarding the realization of some of our state tax operating loss carryforwards. Therefore, we increased our valuation allowance by $1.8 million, from $3.6 million at December 31, 2013, to $5.4 million as of December 31, 2014.

We recognize tax benefits only if the tax position is more likely than not to be sustained. We are subject to income taxes in the U.S. and numerous state jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. These reserves are established when we believe that certain positions might be challenged despite our belief that our tax return positions are fully supportable. We adjust these reserves in light of changing facts and circumstances, such as the outcome of tax audits. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate.

The roll forward of our unrecognized tax benefits is as follows:

	Year Ended December 31,		
	2014	2013	2012
	(In thousands)		
Gross unrecognized tax benefits at beginning of period	$ (8,030)	$ (10,622)	$ (10,712)
Increases in tax positions for prior years	—	—	(441)
Decreases in tax positions for prior years	—	3,615	320
Increases in tax positions for current year	(777)	(2,084)	—
Decreases in tax positions for current year	—	886	—
Settlements	5,960	—	—
Lapse in statute of limitations	253	175	211
Gross unrecognized tax benefits at end of period	$ (2,594)	$ (8,030)	$ (10,622)

The total amount of unrecognized tax benefits at December 31, 2014, 2013 and 2012 that, if recognized, would affect the effective tax rates is $1.6 million, $5.7 million and $7.4 million, respectively. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $0.1 million due to the normal expiration of statutes of limitation.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. Amounts accrued for the payment of interest and penalties as of December 31, 2014, and 2013 were insignificant.

We are under examination by the IRS for calendar year 2011 and may be subject to examination for calendar years 2012 through 2014. We are under examination, or may be subject to examination, in certain state and local jurisdictions, with the major jurisdictions being California, Utah, and Michigan, for the years 2010 through 2014.

15. Stockholders' Equity

Stockholders' equity increased $117.5 million during the year ended December 31, 2014. The increase was due to net income of $62.2 million, $22.0 million related to 1.625% Notes and 3.75% Exchange, $33.2 million related to share-based compensation transactions, and $0.1 million related to other comprehensive income.

3.75% Exchange and 3.75% Notes. As described in Note 12, "Long-Term Debt," we issued approximately 1.8 million shares in connection with the 3.75% Exchange, and the 3.75% Notes settlement in 2014; additionally, we issued approximately 81,000 shares of common stock for services rendered in connection with the 3.75% Exchange.

1.125% Warrants. In connection with the 1.125% Notes Call Spread Overlay transaction described in Note 13, "Derivative Financial Instruments," we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants. We will not receive any additional proceeds if the 1.125% Warrants are exercised.

Securities Repurchases. In connection with the issuance and settlement of the 1.125% Notes, we used a portion of the net proceeds from the offering to repurchase $50 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. In February 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Securities Repurchase Programs. Effective as of February 25, 2015, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This newly authorized repurchase program extends through December 31, 2015.

Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Under this program, we purchased approximately 85,000 shares of our common stock for $2.7 million (average cost of $31.28 per share) during November 2013. This repurchase program expired December 31, 2014.

Shelf Registration Statement. In May 2012, we filed an automatic shelf registration statement on Form S-3 with the SEC covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Plans. In connection with the stock plans described in Note 17, "Share-Based Compensation," we issued approximately 840,000, and 820,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the years ended December 31, 2014 and 2013, respectively.

16. Employee Benefits

We sponsor a defined contribution 401(k) plan that covers substantially all full-time salaried and hourly employees of our company and its subsidiaries. Eligible employees are permitted to contribute up to the maximum amount allowed by law. We match up to the first 4% of compensation contributed by employees. Expense recognized in connection with our contributions to the 401(k) plan totaled $21.2 million, $12.8 million and $10.7 million in the years ended December 31, 2014, 2013, and 2012, respectively.

We also have a nonqualified deferred compensation plan for certain key employees. Under this plan, eligible participants may defer up to 100% of their base salary and 100% of their bonus to provide tax-deferred growth for retirement. The funds deferred are invested in corporate-owned life insurance, under a rabbi trust.

17. Share-Based Compensation

At December 31, 2014, we had employee equity incentives outstanding under two plans: (1) the 2011 Equity Incentive Plan (2011 Plan); and (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded).

The 2011 Plan provides for the award of stock options, restricted shares and units, performance shares and units, and stock bonuses to the company's officers, employees, directors, consultants, advisers, and other service providers. The 2011 Plan allows for the issuance of 4.5 million shares of common stock.

In March 2014, our named executive officers were granted a total of 356,292 restricted shares with service, market, and performance conditions. In the event the vesting conditions are not achieved, the awards shall lapse. As of December 31, 2014, we expect the performance conditions to be met in full.

Restricted share awards are granted with a fair value equal to the market price of our common stock on the date of grant, and generally vest in equal annual installments over periods up to four years from the date of grant. Stock option awards have an exercise price equal to the fair market value of our common stock on the date of grant, generally vest in equal annual installments over periods up to four years from the date of grant, and have a maximum term of ten years from the date of grant.

Under our employee stock purchase plan (ESPP), eligible employees may purchase common shares at 85% of the lower of the fair market value of our common stock on either the first or last trading day of each six-month offering period. Each participant is limited to a maximum purchase of $25,000 (as measured by the fair value of the stock acquired) per year through payroll deductions. We estimate the fair value of the stock issued using the Black-Scholes option pricing model. For the years ended December 31, 2014, 2013, 2012, the inputs to this model were as follows: risk-free interest rates ranging from approximately 0.1% to 0.2%; expected volatilities ranging from approximately 30% to 50%, dividend yields of 0%, and an average expected life of 0.5 years. We issued approximately 327,200, 299,600 and 277,400 shares of our common stock under the ESPP during the years ended December 31, 2014, 2013, and 2012, respectively. The 2011 ESPP allows for the issuance of three million shares of common stock.

The following table illustrates the components of our share-based compensation expense that are reported in general and administrative expenses in the consolidated statements of income:

	Year Ended December 31,					
	2014		2013		2012	
	(In thousands)					
	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount
Restricted stock and performance awards	$ 18,535	$ 11,936	$ 26,116	$ 22,489	$ 18,106	$ 12,943
Employee stock purchase plan and stock options	3,192	2,352	2,578	2,012	1,912	1,613
	$ 21,727	$ 14,288	$ 28,694	$ 24,501	$ 20,018	$ 14,556

As of December 31, 2014, there was $24.5 million of total unrecognized compensation expense related to unvested restricted share awards, including those with performance conditions, which we expect to recognize over a remaining weighted-average period of 1.7 years. This unrecognized compensation cost assumes an estimated forfeiture rate of 4.0% as of December 31,

2014. Also as of December 31, 2014, there was $0.3 million of unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 1.0 year.

Restricted and performance stock activity for the year ended December 31, 2014 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2013	1,299,852	$ 29.03
Granted - restricted stock	420,352	38.06
Granted - performance stock	249,402	34.61
Vested - restricted stock	(423,970)	26.70
Vested - performance stock	(199,948)	30.18
Forfeited	(63,616)	31.31
Unvested balance as of December 31, 2014	1,282,072	33.55

The total fair value of restricted and performance awards granted during the year ended December 31, 2014, 2013, and 2012 was $25.4 million, $33.3 million, and $16.2 million, respectively. The total fair value of restricted awards, including those with performance and market conditions which vested during the year ended December 31, 2014, 2013, and 2012 was $23.7 million, $22.3 million, and $25.4 million, respectively.

The weighted-average grant date fair value per share of the performance awards with vesting conditions based on one-year Total Stockholder Return (TSR) was $27.25. We estimated the fair value on the grant date using a Monte Carlo Simulation to project TSR over the performance period using correlations and volatilities of the ISS peer group. Additional inputs included a risk-free interest rate of 0.1%, dividend yield of 0%, and an expected life of 0.8 years. The weighted-average grant date fair value per share of the performance awards with vesting conditions based on three-year TSR, as described above, was $26.60. Additional inputs included a risk-free interest rate of 0.5%, dividend yield of 0%, and an expected life of 2.8 years.

The total fair value of restricted stock units granted during the year ended December 31, 2012 was $0.3 million with a weighted average grant date fair value of $35.01. These restricted stock units vested during 2013. No restricted stock units were granted in 2014 and 2013 and there were no outstanding restricted stock units as of December 31, 2014.

Stock option activity for the year ended December 31, 2014 is summarized below:

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Stock options outstanding as of December 31, 2013	379,221	$ 24.14		
Exercised	(122,523)	24.93		
Stock options outstanding as of December 31, 2014	256,698	23.77	$ 7,640	3.3
Stock options exercisable and expected to vest as of December 31, 2014	256,698	23.77	$ 7,640	3.3
Exercisable as of December 31, 2014	221,698	22.26	$ 6,932	2.5

The weighted-average grant date fair value per share of the stock options awarded to the new members of our board of directors during 2013 was $14.67. The weighted-average grant date fair value per share of the stock option awarded to the director appointed during 2012 was $13.97. We estimate the fair value of each stock option award on the grant date using the Black-Scholes option pricing model. To determine the fair value of these stock options we applied risk-free interest rates of 1.1% to 1.4%, expected volatilities of 41.3% to 43.0%, dividend yields of 0%, and expected lives of 6 years to 7 years. No stock options were granted in 2014.

The total intrinsic value of options exercised during the year ended December 31, 2014, 2013, and 2012 was $2.1 million, $1.2 million, and $2.0 million, respectively. The following is a summary of information about stock options outstanding and exercisable at December 31, 2014:

	Options Outstanding			Options Exercisable	
Range of Exercise Prices	Number Outstanding	Weighted-Average Remaining Contractual Life (Years)	Weighted-Average Exercise Price	Number Exercisable	Weighted-Average Exercise Price
$19.11	46,148	1.1	$ 19.11	46,148	$ 19.11
$20.88	139,500	2.2	20.88	139,500	20.88
$22.86 – $34.82	71,050	6.9	32.46	36,050	31.66
	256,698			221,698	

18. Related Party Transactions

In February 2013, the Parent (as defined in Note 23, "Condensed Financial Information of Registrant,") entered into a lease with 6th & Pine Development, LLC (the Landlord) for two office buildings, referred to as Building A and Building B, in Long Beach, California. The lease term for Building A commenced in June 2013, and the lease term for Building B commenced in July 2014.

The principal members of the Landlord are John C. Molina, our chief financial officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, John C. Molina has pledged shares of common stock in the Company that he holds. Dr. J. Mario Molina, our chief executive officer, president and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary.

Effective October 31, 2014, the Parent entered into the First Amendment to Office Building Lease (the Amended Lease) with the Landlord. The Amended Lease reduced the annual rent escalator under the original lease from 3.75% per year to 3.4% per year. The Amended Lease also extended the initial base term of the original lease by five years such that the Amended Lease will now expire on December 31, 2029, unless extended or earlier terminated. The Amended Lease also converted the original lease from a full service gross lease to a triple-net lease. For information regarding the future minimum lease payments, refer to Note 20, "Commitments and Contingencies." For information regarding the lease financing obligation, refer to Note 12, "Long-Term Debt."

Refer to Note 19, "Variable Interest Entities," for a discussion of the Joseph M. Molina, M.D. Professional Corporations.

19. Variable Interest Entities

Joseph M. Molina M.D., Professional Corporations

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's sole shareholder is Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides primary care medical services through its employed physicians and other medical professionals. Beginning in the fourth quarter of 2014, JMMPC also provided certain specialty referral services to our California health plan members through a contracted provider network. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, Molina Medical Management, Inc. (MMM), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will operate at break even, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by MMM are reviewed annually to assure the achievement of this goal.

Separately, our California, Florida, New Mexico, Utah and Washington health plans have entered into primary care services agreements with JMMPC. These agreements direct our health plans to perform a monthly reconciliation, to either fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, such that JMMPC will derive no profit or loss. Because the MMM services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are generally insignificant.

We have determined that JMMPC is a variable interest entity (VIE), and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive

benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of December 31, 2014, JMMPC had total assets of $31.1 million, and total liabilities of $30.8 million. As of December 31, 2013, JMMPC had total assets of $6.9 million, and total liabilities of $6.6 million.

Our maximum exposure to loss as a result of our involvement with JMMPC is generally limited to the amounts needed to fund JMMPC's ongoing payroll and employee benefits. Additionally, in connection with specialty referral services provided beginning in 2014, our exposure to loss includes medical care costs associated with such services. We believe that such loss exposures will be immaterial to our consolidated operating results and cash flows for the foreseeable future.

New Markets Tax Credit

In 2011, our New Mexico data center subsidiary entered into a financing transaction with Wells Fargo Community Investment Holdings, LLC (Wells Fargo), its wholly owned subsidiary New Mexico Healthcare Data Center Investment Fund, LLC (Investment Fund), and certain of Wells Fargo's affiliated Community Development Entities (CDEs), in connection with our participation in the federal government's New Markets Tax Credit Program (NMTC). The NMTC was established by Congress in 2000 to facilitate new or increased investments in businesses and real estate projects in low-income communities. The NMTC attracts investment capital to low-income communities by permitting investors to receive a tax credit against their federal income tax return in exchange for equity investments in specialized financial institutions, called CDEs, which provide financing to qualified active businesses operating in low-income communities. The credit amounts to 39% of the original investment amount and is claimed over a period of seven years (five percent for each of the first three years, and six percent for each of the remaining four years). The investment in the CDE cannot be redeemed before the end of the seven-year period.

In the fourth quarter of 2011, as a result of a series of simultaneous financing transactions, Wells Fargo contributed capital of $5.9 million to the Investment Fund, and Molina Healthcare, Inc. loaned the principal amount of $15.5 million to the Investment Fund. The Investment Fund then contributed the proceeds to certain CDEs, which, in turn, loaned the proceeds of $20.9 million to our New Mexico data center subsidiary. Wells Fargo will be entitled to claim the NMTC while we effectively received net loan proceeds equal to Wells Fargo's contribution to the Investment Fund, or approximately $5.9 million. Additionally, financing costs incurred in structuring the arrangement amounting to $1.2 million were deferred and will be recognized as expense over the term of the loans. This transaction also includes a put/call feature that becomes enforceable at the end of the seven-year compliance period. Wells Fargo may exercise its put option or we can exercise the call, both of which will serve to transfer the debt obligation to us. Incremental costs to maintain the structure during the compliance period will be recognized as incurred.

We have determined that the financing arrangement with Investment Fund and CDEs is a VIE, and that we are the primary beneficiary of the VIE. We reached this conclusion based on the following:

- The ongoing activities of the VIE—collecting and remitting interest and fees and NMTC compliance—were all considered in the initial design and are not expected to significantly affect economic performance throughout the life of the VIE;
- Contractual arrangements obligate us to comply with NMTC rules and regulations and provide various other guarantees to Investment Fund and CDEs;
- Wells Fargo lacks a material interest in the underling economics of the project; and
- We are obligated to absorb losses of the VIE.

Because we are the primary beneficiary of the VIE, we have included it in our consolidated financial statements. Wells Fargo's contribution of $5.9 million is included in cash at December 31, 2014 and December 31, 2013 and the offsetting Wells Fargo's interest in the financing arrangement is included in other liabilities in the accompanying consolidated balance sheets.

As described above, this transaction also includes a put/call provision whereby we may be obligated or entitled to repurchase Wells Fargo's interest in the Investment Fund. The value attributed to the put/call is nominal. The NMTC is subject to 100% recapture for a period of seven years as provided in the Internal Revenue Code and applicable U.S. Treasury regulations. We are required to be in compliance with various regulations and contractual provisions that apply to the NMTC arrangement. Non-compliance with applicable requirements could result in Wells Fargo's projected tax benefits not being realized and, therefore, require us to indemnify Wells Fargo for any loss or recapture of NMTCs related to the financing until such time as the recapture provisions have expired under the applicable statute of limitations. We do not anticipate any credit recaptures will be required in connection with this arrangement.

20. Commitments and Contingencies

Certain Leasing Transactions. As described in Note 12, "Long-Term Debt," we entered into certain leasing transactions that have been classified as lease financing obligations. Such leases have initial terms that range from 16.5 years to 25 years. Additionally, the leases provide for renewal options ranging from 10 years to 25 years in aggregate.

Operating Leases. We lease administrative and clinic facilities and certain equipment under non-cancelable operating leases expiring at various dates through 2023. Facility lease terms generally range from five to 10 years with one to two renewal options for extended terms. In most cases, we are required to make additional payments under facility operating leases for taxes, insurance and other operating expenses incurred during the lease period. Certain of our leases contain rent escalation clauses or lease incentives, including rent abatements and tenant improvement allowances. Rent escalation clauses and lease incentives are taken into account in determining total rent expense to be recognized during the lease term.

Future minimum lease payments by year and in the aggregate under all operating leases and lease financing obligations consist of the following approximate amounts:

	Lease Financing Obligations	Lease Financing Obligations - Related Party	Operating Leases	Total
		(In thousands)		
2015	$ 11,397	$ 5,346	$ 29,142	$ 45,885
2016	11,739	5,528	22,989	40,256
2017	12,091	5,715	21,602	39,408
2018	12,454	5,910	20,296	38,660
2019	12,828	6,111	12,777	31,716
Thereafter	320,447	73,784	15,229	409,460
	$ 380,956	$ 102,394	$ 122,035	$ 605,385

Rental expense related to operating leases amounted to $32.4 million, $24.5 million, and $20.5 million for the years ended December 31, 2014, 2013, and 2012, respectively. The amounts reported in "Lease Financing Obligations," and "Lease Financing Obligations - Related Party," above represent our contractual lease commitments for the properties described in Note 12, "Long-Term Debt" under the subheading "Lease Financing Obligations." Payments under these leases adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income.

Employment Agreements. In 2002 we entered into employment agreements with our Chief Executive Officer and Chief Financial Officer, which were amended and restated in 2009. These employment agreements had initial terms of one to three years and are subject to automatic one-year extensions thereafter. Should the executives be terminated without cause or resign for good reason before a change of control, as defined, we will pay one year's base salary and termination bonus, as defined, in addition to full vesting of stock-based awards, and a cash payment for health and welfare benefits.

In 2013 we entered into employment agreements with our Chief Operating Officer, Chief Accounting Officer, and Chief Legal Officer. These agreements continue until terminated by us, or the executive resigns. If the executive's employment is terminated by us without cause or the executive resigns for good reason, the executive will be entitled to receive one year's base salary and termination bonus, as defined, full vesting of all time-based equity compensation, and a cash payment for health and welfare benefits.

Payment of the executives' severance benefits is contingent upon the executive's signing a release agreement waiving claims against us. If the executives are terminated for cause, no further payments are due under the contracts.

Legal Proceedings. The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through

discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Washington Health Plan. In September 2014, our Washington health plan paid $19.2 million to the Washington Health Care Authority (HCA) to settle two outstanding overpayment matters. The matters related to demands for recoupment of claims for psychotropic drugs and claims for health plan members under the Washington Community Options Program Entry System (COPES). Additionally, in September 2014 HCA paid our Washington health plan $8.0 million to settle certain matters brought by the Washington health plan related to auto-assignment provisions in the parties' contract. The net effect of these settlements resulted in a premium revenue reduction of $11.2 million in the third quarter of 2014, and resolved all pending disputes between the parties.

State of Louisiana. On June 26, 2014, the state of Louisiana filed a Petition for Damages against Molina Medicaid Solutions, Molina Healthcare, Inc., Unisys Corporation, and Paramax Systems Corporation, a subsidiary of Unisys, in the Parish of Baton Rouge, 19th Judicial District, versus number 631612. The Petition alleges that between 1989 and 2012, the defendants utilized an incorrect reimbursement formula for the payment of pharmaceutical claims. We believe we have several meritorious defenses to the claims of the state, and any liability for the alleged claims is not currently probable or reasonably estimable.

USA and State of Florida ex rel. Charles Wilhelm. On July 24, 2014, Molina Healthcare, Inc. and Molina Healthcare of Florida, Inc. were served with a Complaint filed under seal on December 5, 2012 in District Court for the Southern District of Florida by relator, Charles C. Wilhelm, M.D., Case No. 12-24298. The Complaint alleges that, in late 2008 and early 2009, in connection with the acquisition of Florida NetPass by which Molina Healthcare entered into the state of Florida, the defendants failed to adequately staff the plan and provide other services, resulting in a disproportionate number of sicker beneficiaries of Florida NetPass moving back into the Florida fee-for-service Medicaid program. This alleged conduct purportedly resulted in a violation of the federal False Claims Act. Both the United States of America and the state of Florida have declined to intervene. We believe we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al. On or around October 14, 2014, Molina Healthcare of California, Molina Healthcare of California Partner Plan, Inc., Mobile Medical Examination Services, Inc. (MedXM), and other health plan defendants were served with a Complaint previously filed under seal in the Central District Court of California by relator, Anita Silingo, Case No. SACV13-1348-FMO(SHx). The Complaint alleges that MedXM improperly modified medical records and otherwise took inappropriate steps to increase members' risk adjustment scores, and that the defendants, including Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc., purportedly turned a "blind eye" to these unlawful practices. The Department of Justice has declined to intervene. We believe that we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

Professional Liability Insurance. We carry medical professional liability insurance for health care services rendered in the primary care and hospital institutions that we manage. In addition, we also carry errors and omissions insurance for all Molina entities.

Provider Claims. Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions. Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements upon us that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $859 million at December 31, 2014, and $608 million at December 31, 2013. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained

earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $202.6 million and $365.2 million as of December 31, 2014, and 2013, respectively.

The National Association of Insurance Commissioners (NAIC), adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC), rules. Illinois, Michigan, New Mexico, Ohio, South Carolina, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not adopted NAIC risk-based capital requirements for HMOs, and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of December 31, 2014, our health plans had aggregate statutory capital and surplus of approximately $955 million compared with the required minimum aggregate statutory capital and surplus of approximately $541 million. All of our health plans were in compliance with the minimum capital requirements at December 31, 2014, with the exception of our Florida health plan, which was funded in February 2015 to meet the minimum capital requirement. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

21. Segment Information

We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans and our direct delivery business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides MMIS design, development, implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." For presentation purposes, the cost of centralized services is reported within the Health Plans segment.

	Year Ended December 31,		
	2014	2013	2012
	(In thousands)		
Revenue, continuing operations:			
Health Plans segment:			
Premium revenue	$ 9,022,511	$ 6,179,170	$ 5,544,121
Premium tax revenue	294,388	172,017	158,991
Health insurer fee revenue	119,484	—	—
Investment income	8,093	6,890	5,075

Other expenses, net	57,613	55,414	17,714
	$ 135,304	$ 81,146	$ 23,379

	As of December 31,		
	2014	2013	2012
	(In thousands)		
Goodwill and intangible assets, net:			
Health Plans segment	$ 286,459	$ 248,562	$ 139,710
Molina Medicaid Solutions segment	74,778	81,047	89,089
	$ 361,237	$ 329,609	$ 228,799
Total assets:			
Health Plans segment	$ 4,270,870	$ 2,809,439	$ 1,702,212
Molina Medicaid Solutions segment	206,345	193,498	232,610
	$ 4,477,215	$ 3,002,937	$ 1,934,822

Goodwill and intangible assets increased in the Health Plans segment due to the acquisitions described in Note 4, "Business Combinations."

22. Quarterly Results of Operations (Unaudited)

The following table summarizes quarterly unaudited results of operations for the years ended December 31, 2014 and 2013. As described in Note 1, "Basis of Presentation," the results of the Missouri health plan are reported as discontinued operations for all periods presented. For further information relating to our segment reporting, refer to Note 21, "Segment Information."

Basic	$ 0.65	$ 0.54	$ 0.17	$ (0.20)
Diluted	$ 0.64	$ 0.53	$ 0.16	$ (0.20)

(1) Potentially dilutive shares issuable pursuant to our 1.125% Warrants and 1.625% Notes were not included in the computation of diluted net income per share, because to do so would have been anti-dilutive. Potentially dilutive shares issuable pursuant to our 3.75% Notes were not included in the computation of diluted net income per share for the quarter ended March 31, 2013, because to do so would have been anti-dilutive.

(2) We abandoned our equity interests in the Missouri health plan during the second quarter of 2013, resulting in the recognition of a tax benefit of $9.5 million, which is reported in (loss) income from discontinued operations.

23. Condensed Financial Information of Registrant

Following are our parent company only condensed balance sheets as of December 31, 2014 and 2013, and our condensed statements of income, condensed statements of comprehensive income and condensed statements of cash flows for each of the three years in the period ended December 31, 2014.

Notes to Condensed Financial Information of Registrant

Note A - Basis of Presentation

Molina Healthcare, Inc. (the Registrant, or the Parent), was incorporated on July 24, 2002. Prior to that date, Molina Healthcare of California (formerly known as Molina Medical Centers) operated as a California health plan and as the parent company for Molina Healthcare of Utah, Inc., Molina Healthcare of Michigan, Inc., and Molina Healthcare of Washington, Inc. In June 2003, the employees and operations of the corporate entity were transferred from Molina Healthcare of California to the Registrant.

The Registrant's investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries since the date of acquisition. The accompanying condensed financial information of the Registrant should be read in conjunction with the consolidated financial statements and accompanying notes.

Note B - Transactions with Subsidiaries

The Registrant provides certain centralized medical and administrative services to its subsidiaries pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management,

financial, legal, information systems and human resources services. Fees are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the subsidiaries' ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate. Charges in 2014, 2013, and 2012 for these services amounted to $691.6 million, $592.1 million, and $406.4 million, respectively, and are included in operating revenue.

During 2013, the Registrant used a portion of the proceeds from the sale of the Molina Center, described in Note 12, "Long-Term Debt," to repay the remaining principal balance of the related term loan, on behalf of a subsidiary of the Registrant.

The Registrant and its subsidiaries are included in the consolidated federal and state income tax returns filed by the Registrant. Income taxes are allocated to each subsidiary in accordance with an intercompany tax allocation agreement. The agreement allocates income taxes in an amount generally equivalent to the amount which would be expensed by the subsidiary if it filed a separate tax return. Net operating loss benefits are paid to the subsidiary by the Registrant to the extent such losses are utilized in the consolidated tax returns.

Note C - Dividends and Capital Contributions

During 2013 and 2012, the Registrant received dividends from its subsidiaries. Such amounts have been recorded as a reduction to the investments in the respective subsidiaries.

During 2014, 2013, and 2012, the Registrant made capital contributions to certain subsidiaries primarily to comply with minimum net worth requirements and to fund contract acquisitions. Such amounts have been recorded as an increase in investment in the respective subsidiaries, net of insignificant returns of capital.

Note D - Related Party Transactions

The Registrant's related party transactions are described in Note 18, "Related Party Transactions."

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures: Our management is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934 (the "Exchange Act"). Our internal control over financial reporting is designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements. We maintain controls and procedures designed to ensure that we are able to collect the information we are required to disclose in the reports we file with the Securities and Exchange Commission, and to process, summarize and disclose this information within the time periods specified in the rules of the Securities and Exchange Commission.

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has conducted an evaluation of the design and operation of our "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e)) under the Exchange Act. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective as of the end of the period covered by this report to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management's Report on Internal Control over Financial Reporting: Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States. However, all internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and reporting.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework* (2013 framework).

Based on our assessment, management believes that the Company maintained effective internal control over financial reporting as of December 31, 2014, based on those criteria.

Ernst & Young, LLP, the independent registered public accounting firm who audited the Company's Consolidated Financial Statements included in this Form 10-K, has issued a report on the Company's internal control over financial reporting, which is included herein.

Changes in Internal Control over Financial Reporting. There were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) during the quarter ended December 31, 2014, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited Molina Healthcare, Inc.'s (the "Company's") internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Molina Healthcare, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Molina Healthcare, Inc. as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2014 and our report dated February 26, 2015 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

Los Angeles, California
February 26, 2015

PART III

Item 10. Directors, Executive Officers, and Corporate Governance

Pursuant to General Instruction G(3) to Form 10-K and Instruction 3 to Item 401(b) of Regulation S-K, information regarding our executive officers is provided in Item 1 of Part I of this Annual Report on Form 10-K under the caption "Executive Officers of the Registrant," and will also appear in our definitive proxy statement for our 2015 Annual Meeting of Stockholders. The remaining information required by Items 401, 405, 406 and 407(c)(3), (d)(4) and (d)(5) of Regulation S-K will be included under the headings "Election of Directors," "Corporate Governance," and "Section 16(a) Beneficial Ownership Reporting Compliance" in our definitive proxy statement for our 2015 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Item 11. Executive Compensation

The information required by Items 402, 407(e)(4), and (e)(5) of Regulation S-K will be included under the headings "Executive Compensation" and "Compensation Committee Interlocks and Insider Participation" in our definitive proxy statement for our 2015 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Securities Authorized for Issuance Under Equity Compensation Plans (as of December 31, 2014)

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)		Weighted Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) (c)	
Equity compensation plans approved by security holders	256,698	(1)	$ 23.77	4,529,223	(2)

(1) Options to purchase shares of our common stock issued under the 2002 Equity Incentive Plan and 2011 Equity Incentive Plan. Further grants under the 2002 Equity Incentive Plan have been suspended.

(2) Includes shares remaining available to issue under the 2011 Equity Incentive Plan, and the 2011 Employee Stock Purchase Plan.

The remaining information required by Item 403 of Regulation S-K will be included under the heading "Security Ownership of Certain Beneficial Owners and Management" in our definitive proxy statement for our 2015 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by Items 404 and 407(a) of Regulation S-K will be included under the headings "Related Party Transactions," "Corporate Governance," and "Director Independence" in our definitive proxy statement for our 2015 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Additionally, refer to Part II, Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 18, "Related Party Transactions," and Note 19, "Variable Interest Entities," under the subheading "Joseph M. Molina M.D., Professional Corporations."

Item 14. Principal Accountant Fees and Services

The information required by Item 9(e) of Schedule 14A will be included under the heading "Disclosure of Auditor Fees" in our definitive proxy statement for our 2015 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

PART IV

Item 15. ***Exhibits and Financial Statement Schedules***

(a) The consolidated financial statements and exhibits listed below are filed as part of this report.

(1) The financial statements included in Item 8 of this Form 10-K, Financial Statements and Supplementary Data, above are filed as part of this annual report.

(2) Financial Statement Schedules

None of the schedules apply, or the information required is included in the Notes to the Consolidated Financial Statements.

(3) Exhibits

Reference is made to the accompanying Index to Exhibits.

INDEX TO EXHIBITS

The following exhibits, which are furnished with this annual report or incorporated herein by reference, are filed as part of this annual report.

The agreements included or incorporated by reference as exhibits to this Annual Report on Form 10-K may contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties were made solely for the benefit of the other parties to the applicable agreement and (i) were not intended to be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate; (ii) may have been qualified in such agreement by disclosures that were made to the other party in connection with the negotiation of the applicable agreement; (iii) may apply contract standards of "materiality" that are different from "materiality" under the applicable securities laws; and (iv) were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement. The Company acknowledges that, notwithstanding the inclusion of the foregoing cautionary statements, it is responsible for considering whether additional specific disclosures of material information regarding material contractual provisions are required to make the statements in this Annual Report on Form 10-K not misleading.

EXHIBIT 10.4

AMENDMENT NO. 2
TO THE
MOLINA HEALTHCARE, INC.
AMENDED AND RESTATED DEFERRED COMPENSATION PLAN (2013)

WHEREAS, Molina Healthcare, Inc., a Delaware corporation ("Company"), has previously adopted the Molina Healthcare, Inc. Amended and Restated Deferred Compensation Plan (2013), as amended by Amendment No. 1 to the Amended and Restated Deferred Compensation Plan executed on November 14, 2013 (the "Plan") for the benefit of a select group of employees of the Company;

WHEREAS, the Company desires to amend the Plan to remove the requirement that a participant's written deferral election remain in effect for subsequent plan years and replace in its stead that a participant must provide a written deferral election for each plan year;

WHEREAS, Section 7.1 of the Plan permits the Company to amend the Plan; and

WHEREAS, the Board of Directors of the Company has approved this Amendment and authorized and directed the appropriate officers of the Company to execute this Amendment and to take such other actions as they deem necessary or appropriate to implement this Amendment.

NOW, THEREFORE, the Plan is amended as follows effective as of October 29, 2014:

1. Section 2.3.b. is deleted in its entirety and replaced in its stead with the following:

b. A Participant must provide a separate Written Election for each subsequent Plan Year that specifies the dollar amount or percentage of Plan Year Compensation that Participant has determined to defer for each such Plan Year. Such Written Election is only effective for the Plan Year for which the election is made and if no Written Election to defer Plan Year Compensation is executed in relation to a subsequent Plan Year, no Plan Year Compensation will be deferred for such subsequent Plan Year. Any election of the amount of Plan Year Compensation to defer for a given Plan Year shall be irrevocable on and after the first day of the Plan Year for which the election was made.

c. A Participant may change the investment vehicle(s) in which he desires to have that portion of his Account attributable to Plan Year Compensation and investment income invested and the percentage of his Account allocated to each investment vehicle by completing and submitting any form or forms required by the Company. Changes in investment vehicle(s) will be made as of the last business day of each month. The Participant must submit the completed form or forms with the requested changes to the Trustee on or before the twenty-fifth (25th) day of the current month (or the last business day immediately preceding the twenty-fifth of the month) for the changes to be made by the last business day of the current month. Changes requested on forms submitted after the twenty-fifth (25th) day of the current month will be made on the last business day of the following month.

d. Notwithstanding the foregoing, the Trustee shall, at the direction of the Plan Committee, have the duty and authority to invest the trust assets and funds in accordance with the terms of the Trust Agreement, and all rights associated with the trust assets shall be exercised by the Trustee as designated by the Plan Committee and shall in no event be exercisable by or be settled upon Participants or their Beneficiaries.

e. Participant may change the date or form of distribution by submitting a new Written Election to the Company, provided that the following conditions are met:

   i. That such election may not take effect until at least twelve (12) months after the date on which the election is made;

   ii. In the case of an election related to a payment other than a payment on account of death, disability or the occurrence of an financial hardship, such payment must be deferred for a period of not less than five (5) years from the date such payment would have otherwise been made, and

   iii. Any election related to a payment at a specified time or pursuant to a fixed schedule may not be made less than twelve (12) months prior to the date of the first scheduled payment.

IN WITNESS WHEREOF, this Amendment is executed this 29th day of October, 2014.

MOLINA HEALTHCARE, INC.

By: /s/ Joseph M. Molina, M.D.
Joseph M. Molina, M.D.
Chief Executive Officer

EXHIBIT 10.6

MOLINA HEALTHCARE, INC.

2011 EMPLOYEE STOCK PURCHASE PLAN

1. Establishment of Plan. Molina Healthcare, Inc., a Delaware corporation (the "Company"), proposes to grant options to purchase shares of the Company's common stock, $0.001 par value per share (the "Common Stock"), to eligible employees of the Company and its Participating Affiliates (as defined below) pursuant to this 2011 Employee Stock Purchase Plan (this "Plan"). For purposes of this Plan, "Parent Corporation" and "Subsidiary Corporation" shall have the same meanings as "parent corporation" and "subsidiary corporation" in Sections 424(e) and 424(f), respectively, of the Internal Revenue Code of 1986, as amended (the "Code"). "Participating Affiliates" are Parent Corporations or Subsidiary Corporations that the Board of Directors of the Company (the "Board") designates from time to time as corporations that shall participate in this Plan. Affiliates may be designated as Participating Affiliates either before or after this Plan is approved by the Company's stockholders as provided in Section 22. The Company intends this Plan to qualify as an "employee stock purchase plan" under Section 423 of the Code (including any amendments to or replacements of such Section), and this Plan shall be so construed. Any term not expressly defined in this Plan but defined for purposes of Section 423 of the Code shall have the same definition herein. A total of three million (3,000,000) shares of the Common Stock are reserved for issuance under this Plan.

2. Purpose. The purpose of this Plan is to provide eligible employees of the Company and Participating Affiliates with a convenient means of acquiring an equity interest in the Company through payroll deductions, to enhance such employees' sense of participation in the affairs of the Company and Participating Affiliates, and to provide an incentive for continued employment.

3. Administration

(a) This Plan shall be administered by the Compensation Committee of the Board (the "Committee"). Subject to the provisions of this Plan and the limitations of Section 423 of the Code or any successor provision in the Code, all questions of interpretation or application of this Plan shall be determined by the Committee in its sole discretion and its decisions shall be final and binding upon all participants. Members of the Committee shall receive no compensation for their services in connection with the administration of this Plan, other than standard fees as established from time to time by the Board for services rendered by Board members serving on Board committees. All expenses incurred in connection with the administration of this Plan shall be paid by the Company.

(b) The Committee may, from time to time, consistent with this Plan and the requirements of Section 423 of the Code, establish, change or terminate such rules, guidelines, policies, procedures, limitations, or adjustments as deemed advisable by the Company, in its sole discretion, for the proper administration of this Plan, including, without limitation: (a) a

minimum payroll deduction amount required for participation in an Offering Period, (b) a limitation on the frequency or number of changes permitted in the rate of payroll deduction during an Offering Period, (c) a payroll deduction greater or less than the amount designated by a participant in order to adjust for the Company's delay or mistake in processing an Enrollment Form or in otherwise effecting a participant's election under this Plan or as advisable to comply with the requirements of Section 423 of the Code, (d) determination of the date and manner by which the Fair Market Value of the Common Stock is determined for purposes of administration of this Plan, (e) delegate responsibility for Plan operation, management and administration, subject to the Committee's oversight and control, on such terms as the Committee may establish, and (f) delegate to other persons the responsibility for performing appropriate functions as necessary, desirable or appropriate to further the purposes of this Plan.

4. Eligibility. Any individual employed by the Company or the Participating Affiliates on the "Offering Date" of an "Offering Period" (each as defined in Section 5 below) is eligible to participate in such Offering Period except the following:

(a) employees who are customarily employed for less than (20) hours per week; and

(b) employees who, together with any other person whose stock would be attributed to such employee pursuant to Section 424(d) of the Code, own stock or hold options to purchase stock possessing five percent (5%) or more of the total combined voting power or value of all classes of stock of the Company or any of its Participating Affiliates or who, as a result of being granted an option under this Plan with respect to such Offering Period, would own stock or hold options to purchase stock possessing five percent (5%) or more of the total combined power or value of all classes of stock of the Company or any of its Participating Affiliates; and

(c) individuals who provide services to the Company or any of its Participating Affiliates as independent contractors who are reclassified as common law employees for any reason except for federal income and employment tax purposes.

5. Offering Periods. The offering periods of this Plan (each, an "Offering Period") shall be of six (6) months duration commencing on January 1 and July 1 of the Company's fiscal year. The first day of each Offering Period is referred to as the "Offering Date." The last day of each Offering Period is referred to as the "Purchase Date." The Committee shall have the power to change the Offering Dates or Purchase Dates and the duration of Offering Periods without stockholder approval if such change is announced prior to the start of the relevant Offering Period, or prior to such other time period as specified by the Committee; provided, however, that no Offering Period may have a duration exceeding twenty-seven (27) months. If the first or last day of an Offering Period is not a day on which the New York Stock Exchange is open for trading, the Company shall specify the trading day that will be deemed the first or last day, as the case may be, of the Offering Period.

6. Participation in this Plan. An employee may participate during an Offering Period on the first Offering Date after such employee satisfies the eligibility requirements set forth in Section 4 above and delivers an appropriate enrollment form (the "Enrollment Form") to the Company prior to such Offering Date, or such other time period as specified by the Committee. Notwithstanding the foregoing, the Committee may set a later time for filing the Enrollment Form authorizing payroll deductions for all eligible employees with respect to a given Offering Period. An eligible employee who does not timely deliver an Enrollment Form to the Company after becoming eligible to participate in such Offering Period shall not participate in that Offering Period or any subsequent Offering Period until filing an Enrollment Form with the Company prior to the applicable Offering Date, or such other time period as specified by the Committee. Once an employee becomes a participant in an Offering Period, such employee will automatically participate in the Offering Period commencing immediately following the last day of the prior Offering Period unless the employee withdraws or is deemed to withdraw from this Plan or terminates further participation in the Offering Period as set forth in Section 11 below. A participant who has not otherwise withdrawn from this Plan under Section 11 is not required to file any additional Enrollment Form in order to continue participation in this Plan. However a participant may deliver a new Enrollment Form for a subsequent Offering Period in accordance with applicable rules and procedures if the participant wishes to change any of the elections contained in the participant's then effective Enrollment Form.

7. Grant of Option on Enrollment. Enrollment by an eligible employee in an Offering Period under this Plan will constitute the grant (as of the Offering Date for such Offering Period) by the Company to such employee of an option to purchase on the Purchase Date up to that number of shares of Common Stock of the Company determined by dividing (a) the amount accumulated in such employee's payroll deduction account during such Offering Period by (b) the Per Share Purchase Price as determined pursuant to Section 8 below (but in no event less than the par value of a share of Company's Common Stock), provided, however, that the number of shares of the Company's Common Stock subject to any option granted pursuant to this Plan shall not exceed the maximum number of shares which may be purchased pursuant to Section 10 below with respect to the applicable Purchase Date. The Fair Market Value of a share of the Company's Common Stock shall be determined as provided in Section 8 below.

8. Purchase Price. The purchase price per share ("Per Share Purchase Price") at which a share of Common Stock will be sold in any Offering Period shall be eighty-five percent (85%) of the lesser of:

(a) The Fair Market Value on the Offering Date; or

(b) The Fair Market Value on the Purchase Date.

For purposes of this Plan, the term "Fair Market Value" of the Common Stock on any given date means (i) the last reported closing price for a share of Stock on the New York Stock Exchange or, (ii) in the absence of reported sales on the New York Stock Exchange on a given date, the closing price of the New York Stock Exchange on the last date on which

a sale occurred prior to such date; or (iii) if the stock is no longer publicly traded on the New York Stock Exchange, the Committee in good faith shall determine Fair Market Value; provided that, if the date for which the Fair Market Value is determined is the first day when trading prices for the Stock are reported on the New York Stock Exchange, the Fair Market Value shall be the public offering price set forth on the cover page for the final prospectus relating to the Company's Initial Public Offering.

9. Payment of Purchase Price; Changes in Payroll Deductions; Issuance of Shares.

(a) The purchase price of the shares shall be accumulated by regular payroll deductions made during each Offering Period. The deductions are made as a percentage of the participant's Compensation in one percent (1%) increments not less than one percent (1%) (except as a result of an election pursuant to Section 9(c) to stop payroll deductions during an Offering Period), nor greater than fifteen percent (15%) or such lower limit set by the Committee. "Compensation" shall mean all W-2 cash compensation, including base salary, wages, commissions, overtime, shift premiums and bonuses, provided, however, that for purposes of determining a participant's compensation, any election by such participant to reduce his or her regular cash remuneration under Sections 125 or 401(k) of the Code shall be treated as if the participant did not make such election. Notwithstanding the foregoing, Compensation shall not include reimbursements of expenses, allowances, long-term disability, workers' compensation or any amount deemed received without the actual transfer of cash or any amounts directly or indirectly paid pursuant to this Plan or any other stock purchase or stock option plan, or any other compensation not included above. Payroll deductions shall commence on the first payday of the Offering Period and shall continue to the end of the Offering Period unless sooner altered or terminated as provided in this Plan.

(b) A participant may increase or decrease the rate of payroll deductions during an Offering Period by providing to the Company a new Enrollment Form, in which case the new rate shall become effective for the next payroll period commencing after the Company's receipt of the Enrollment Form and shall continue for the remainder of the Offering Period unless changed as described below. Such change in the rate of payroll deductions may be made at any time during an Offering Period, but not more than one (1) increase and one (1) decrease in the rate of payroll deductions may be made during any Offering Period. A participant may increase or decrease the rate of payroll deductions for any subsequent Offering Period by filing with the Company a new Enrollment Form prior to the beginning of such Offering Period, or prior to such other time period as specified by the Committee. Any changes to the rate of payroll deductions during an Offering Period which are received by the Company after the commencement of the enrollment period for a new Offering Period will be made by the Company at its discretion, only to the extent such changes are administratively possible.

(c) A participant may reduce his or her payroll deduction percentage to zero during an Offering Period by providing to the Company a revised Enrollment Form. Such reduction shall be effective beginning with the next payroll period after the Company's receipt of the request and no further payroll deductions will be made for the duration of the Offering Period. Payroll deductions credited to the participant's account prior to the effective date of

the request shall be used to purchase shares of Common Stock in accordance with Section (e) below. Notwithstanding Section 9(b), a participant may not resume making payroll deductions during the Offering Period in which he or she reduced his or her payroll deductions to zero. Any reduction to a participant's payroll deduction percentage to zero during an Offering Period which is received by the Company after the commencement of the enrollment period for a new Offering Period will be made by the Company at its discretion, only to the extent such changes are administratively possible.

(d) All payroll deductions made for a participant are credited to his or her account under this Plan and are deposited with the general funds of the Company. No interest accrues on the payroll deductions. All payroll deductions received or held by the Company may be used by the Company for any corporate purpose, and the Company shall not be obligated to segregate such payroll deductions.

(e) On each Purchase Date, so long as this Plan remains in effect and provided that the participant has not submitted a revised Enrollment Form withdrawing from this Plan before such Purchase Date in accordance with Section 11, the Company shall apply the funds then in the participant's account (or, if applicable, the lump sum cash payment received from the participant) to the purchase of whole shares of Common Stock reserved under the option granted to such participant with respect to the Offering Period to the extent that such option is exercisable on the Purchase Date. The Per Share Purchase Price shall be as specified in Section 8. Any cash remaining in such participant's account on a Purchase Date which is less than the amount necessary to purchase a full share of Common Stock of the Company shall be carried forward, without interest, into the next Offering Period. If this Plan has been oversubscribed, all funds not used to purchase shares on the Purchase Date shall be returned to the participant, without interest. No Common Stock shall be purchased on a Purchase Date on behalf of any employee whose participation in this Plan has terminated prior to such Purchase Date.

(f) As promptly as practicable after the Purchase Date, the Company shall issue shares for the participant's benefit representing the shares purchased upon exercise of his or her option, subject to compliance with Section 24 below.

(g) During a participant's lifetime, his or her option to purchase shares hereunder is exercisable only by him or her. The participant will have no interest or voting right in shares covered by his or her option until such option has been exercised.

10. Limitations on Shares to be Purchased.

(a) No participant shall be entitled to purchase Common Stock under this Plan at a rate which, when aggregated with his or her rights to purchase stock under all other employee stock purchase plans of the Company or any Parent Corporation or Subsidiary Corporation, exceeds $25,000 in Fair Market Value, determined as of the Offering Date (or such other limit as may be imposed by the Code) for each calendar year in which the employee participates in this Plan. The Company shall automatically suspend the payroll deductions of any participant as necessary to enforce such limit; provided that when the Company

automatically resumes such payroll deductions, the Company must apply the rate in effect immediately prior to such suspension.

(b) No participant shall be entitled to purchase more than the Maximum Share Amount (as defined below) on any single Purchase Date. Prior to the commencement of any Offering Period or before such time period as specified by the Committee, the Committee may, in its sole discretion, set a maximum number of shares which may be purchased by any employee at any single Purchase Date (the "Maximum Share Amount"). Until otherwise determined by the Committee, there shall be no Maximum Share Amount. If a new Maximum Share Amount is set, then all participants must be notified of such Maximum Share Amount before commencing the next Offering Period. The Maximum Share Amount shall continue to apply with respect to all succeeding Purchase Dates and Offering Periods unless revised by the Committee as set forth above.

(c) If the number of shares to be purchased on a Purchase Date by all employees participating in this Plan exceeds the number of shares then available for issuance under this Plan, then the Company will make a pro rata allocation of the remaining shares in as uniform a manner as shall be reasonably practicable and as the Committee shall determine to be equitable.

(d) Any payroll deductions accumulated in a participant's account which are not used to purchase stock due to the limitations in this Section 10 shall be returned to the participant as soon as practicable after the end of the applicable Offering Period, without interest, provided that, any amount remaining in such participant's account which is less than the amount necessary to purchase a full share of Common Stock of the Company shall be carried forward, without interest, into the next Offering Period or Offering Period.

11. Withdrawal.

(a) Each participant may withdraw from an Offering Period under this Plan by signing and delivering to the Company a revised Enrollment Form indicating such participant's intention to withdraw. Such withdrawal may be elected at any time prior to the end of an Offering Period, or such other time period as specified by the Committee.

(b) Upon withdrawal from this Plan, the accumulated payroll deductions shall be returned to the withdrawn participant, without interest, and his or her interest in this Plan shall terminate. If a participant voluntarily elects to withdraw from this Plan, he or she may not resume his or her participation in this Plan during the same Offering Period, but he or she may participate in any Offering Period under this Plan commencing after such withdrawal by filing a new authorization for payroll deductions in the same manner as set forth in Section 6 above for initial participation in this Plan.

12. Termination of Employment. Termination of a participant's employment for any reason, including retirement, death or the failure of a participant to remain an eligible employee of the Company or of a Participating Affiliate, immediately terminates his or her participation in this Plan. In such event, the payroll deductions credited to the participant's account will

be returned to him or her or, in the case of his or her death, to his or her legal representative, without interest. For purposes of this Section 12, an employee will not be deemed to have terminated employment or failed to remain in the continuous employ of the Company or of a Participating Affiliate in the case of sick leave, military leave, or any other leave of absence approved by the Board; provided that such leave is for a period of not more than ninety (90) days or reemployment upon the expiration of such leave is guaranteed by contract or statute.

13. Return of Payroll Deductions. If a participant's interest in this Plan is terminated by withdrawal, termination of employment or otherwise, or if this Plan is terminated by the Board, the Company shall deliver to the participant all payroll deductions credited to such participant's account. No interest shall accrue on the payroll deductions of a participant in this Plan.

14. Capital Changes. Subject to any required action by the stockholders of the Company, the number of shares of Common Stock covered by each option under this Plan which has not yet been exercised and the number of shares of Common Stock which have been authorized for issuance under this Plan but have not yet been placed under option (collectively, the "Reserves"), as well as the price per share of Common Stock covered by each option under this Plan which has not yet been exercised, shall be proportionately adjusted for any increase or decrease in the number of issued and outstanding shares of Common Stock resulting from a stock split or the payment of a stock dividend (but only on the Common Stock) or any other increase or decrease in the number of issued and outstanding shares of Common Stock effected without receipt of any consideration by the Company; provided, however, that conversion of any convertible securities of the Company shall not be deemed to have been "effected without receipt of consideration". Notwithstanding the foregoing, any fractional shares resulting from an adjustment pursuant to this Section 14 shall be rounded down to the nearest whole number, and in no event may the Per Share Purchase Price be decreased to an amount less than the par value, if any, of the Common Stock. Such adjustment shall be made by the Committee, whose determination shall be final, binding and conclusive.

In the event of the proposed dissolution or liquidation of the Company, the Offering Period will terminate immediately prior to the consummation of such proposed action, unless otherwise provided by the Committee. The Committee may, in its sole discretion in such instances, declare that this Plan shall terminate as of a date fixed by the Committee and either give each participant the right to purchase shares under this Plan prior to such termination or return all accumulated payroll deductions to each participant, without interest. In the event of (i) a merger or consolidation in which the Company is not the surviving corporation (other than a merger or consolidation with a wholly-owned subsidiary, a reincorporation of the Company in a different jurisdiction, or other transaction in which there is no substantial change in the stockholders of the Company or their relative stock holdings, provided that the options under this Plan are assumed, converted or replaced by the successor corporation, which assumption will be binding on all participants), (ii) a merger in which the Company is the surviving corporation but after which the stockholders of the Company immediately prior to such merger (other than any stockholder that merges, or which owns or controls another corporation that merges, with the Company in such merger) cease to own

their shares or other equity interest in the Company, (iii) the sale of all or substantially all of the assets of the Company or (iv) the acquisition, sale, or transfer of more than 50% of the outstanding shares of the Company by tender offer or similar transaction, (each a "Sale Event") the Company shall apply the funds contributed under this Plan to the purchase of shares of Common Stock pursuant to the provisions of Section 9 immediately prior to the effective date of such Sale Event. Notwithstanding the foregoing, the surviving, continuing, successor or purchasing corporation or parent corporation thereof (the "Acquiring Corporation"), may elect to assume the Company's rights and obligations under this Plan and, in that event, there shall be no purchase before the end of the Offering Period in which the Sale Event occurs.

The Committee may, if it so determines in its sole discretion, also make provision for adjusting the share reserve set forth in Section 1, as well as the price per share of Common Stock covered by each outstanding option, solely in the event that the Company effects one or more reorganizations, recapitalizations, rights offerings or other increases or reductions of shares of its outstanding Common Stock, or in the event of the Company being consolidated with or merged into any other corporation.

15. Withholding. The participant shall make adequate provision for the foreign, federal, state and local tax withholding obligations of the Company or any of its Participating Affiliates, if any, which arise in connection with participation in this Plan. The Company and its Participating Affiliates shall, to the extent permitted by law, have the right to deduct any such taxes from any payment of any kind otherwise due to the participant.

16. Nonassignability. Neither payroll deductions credited to a participant's account nor any rights with regard to the exercise of an option or to receive shares under this Plan may be assigned, transferred, pledged or otherwise disposed of in any way (other than by will, the laws of descent and distribution or as provided in Section 23 below) by the participant. Any such attempt at assignment, transfer, pledge or other disposition shall be void and without effect.

17. Reports. Individual accounts will be maintained for each participant in this Plan. Each participant shall receive as soon as practicable after the end of each Offering Period a report of his or her account setting forth the total payroll deductions accumulated, the number of shares purchased, the per share price thereof and the remaining cash balance, if any, carried forward to the next Offering Period.

18. Notice of Disqualifying Disposition. Each participant shall notify the Company in writing if the participant disposes of any of the shares purchased in any Offering Period pursuant to this Plan if such disposition occurs within two (2) years from the Offering Date or within one (1) year from the Purchase Date on which such shares were purchased (the "Notice Period"). The Company may, at any time during the Notice Period, place a legend or legends on any certificate representing shares acquired pursuant to this Plan requesting the Company's transfer agent to notify the Company of any transfer of the shares. The obligation of the participant to provide such notice shall continue notwithstanding the placement of any such legend on the certificates.

19. No Rights as Stockholder or to Continued Employment. A participant shall have no rights as a stockholder by virtue of participation in this Plan until the date of the issuance of a certificate for the shares purchased pursuant to the exercise of the participant's purchase right (as evidenced by the appropriate entry on the books of the Company or of a duly authorized transfer agent of the Company). No adjustment shall be made for dividends, distributions or other rights for which the record date is prior to the date such certificate is issued, except as provided in Section 14. Neither this Plan nor the grant of any option hereunder shall confer any right on any employee to remain in the employ of the Company or any Participating Affiliate, or restrict the right of the Company or any Participating Affiliate to terminate such employee's employment at any time.

20. Equal Rights and Privileges. All eligible employees shall have equal rights and privileges with respect to this Plan so that this Plan qualifies as an "employee stock purchase plan" within the meaning of Section 423 or any successor provision of the Code and the related regulations. Any provision of this Plan which is inconsistent with Section 423 or any successor provision of the Code shall, without further act or amendment by the Company, the Committee or the Board, be reformed to comply with the requirements of Section 423. This Section 20 shall take precedence over all other provisions in this Plan.

21. Notices. All notices or other communications by a participant to the Company under or in connection with this Plan shall be deemed to have been duly given when received in the form specified by the Company at the location, or by the person, designated by the Company for the receipt thereof.

22. Term; Stockholder Approval. This Plan was adopted by the Board of Directors of the Company on March 18, 2011, effective as of July 1, 2011 (the "Effective Date"), and shall apply to any purchase right granted, or stock transferred pursuant to any purchase right granted, on or after the Effective Date. This Plan shall continue until the earlier to occur of (a) termination of this Plan by the Board (which termination may be effected by the Board at any time), (b) issuance of all of the shares of Common Stock reserved for issuance under this Plan, or (c) April 27, 2021.

23. Designation of Beneficiary

(a) A participant may file a written designation of a beneficiary who is to receive any shares and cash, if any, from the participant's account under this Plan in the event of such participant's death subsequent to the end of any Offering Period but prior to delivery to him of such shares and cash. In addition, a participant may file a written designation of a beneficiary who is to receive any cash from the participant's account under this Plan in the event of such participant's death prior to a Purchase Date.

(b) Such designation of beneficiary may be changed by the participant at any time by written notice. In the event of the death of a participant and in the absence of a beneficiary validly designated under this Plan who is living at the time of such participant's death, the Company shall deliver such shares or cash to the executor or administrator of the estate of the participant, or if no such executor or administrator has been appointed (to the

knowledge of the Company), the Company, in its discretion, may deliver such shares or cash to the spouse or to any one or more dependents or relatives of the participant, or if no spouse, dependent or relative is known to the Company, then to such other person as the Company may designate.

24. Conditions Upon Issuance of Shares; Limitation on Sale of Shares. Shares shall not be issued with respect to an option unless the exercise of such option and the issuance and delivery of such shares pursuant thereto shall comply with all applicable provisions of law, domestic or foreign, including, without limitation, the Securities Act of 1933, as amended, the Securities Exchange Act of 1934, as amended, the rules and regulations promulgated thereunder, and the requirements of any stock exchange or automated quotation system upon which the shares may then be listed, and shall be further subject to the approval of counsel for the Company with respect to such compliance.

25. Applicable Law. This Plan shall be governed by the substantive laws (excluding the conflict of laws rules) of the State of California.

26. Amendment or Termination of this Plan. The Board may at any time amend, terminate or extend the term of this Plan, except that (i) any such termination cannot affect options previously granted under this Plan unless the Board determines that the termination of this Plan immediately following any Purchase Date is in the best interests of the Company and its stockholders, (ii) any amendment may not adversely affect the previously granted purchase right of any participant unless permitted by this Plan or as may be necessary to qualify this Plan as an employee stock purchase plan pursuant to Section 423 of the Code or to obtain qualification or registration of the Common Stock under applicable federal, state or foreign securities laws, and (iii) any amendment must be approved by the stockholders of the Company in accordance with Section 2 above within twelve (12) months of the adoption of such amendment (or earlier if required by Section 22) if such amendment would:

(a) increase the number of shares that may be issued under this Plan;

(b) change the designation of the employees (or class of employees) eligible for participation in this Plan; or

(c) any other action taken by the Board that, by its terms, is contingent on stockholder approval.

Notwithstanding the foregoing, the Board may make such amendments to this Plan as the Board determines to be advisable, if the continuation of this Plan or any Offering Period would result in financial accounting treatment for this Plan that is different from the financial accounting treatment in effect on the Effective Date.

SECTION 302 CERTIFICATION

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed this annual report on Form 10-K for the fiscal year ended December 31, 2014, of Molina Healthcare, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
September 30, 2014

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. As of September 30, 2014, these health plans served approximately 2.4 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve a small number of Health Insurance Marketplace (Marketplace) members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the management of a hospital in southern California under a management services agreement, and the operation of primary care clinics in several states in which we operate.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

On October 15, 2014, the Puerto Rico Health Insurance Administration announced that it has selected Molina Healthcare of Puerto Rico to operate the Commonwealth's Medicaid-funded Government Health Plan program in the East and Southwest regions. We expect to begin serving members in the second quarter of 2015.

In August 2014, we announced that our Florida health plan entered into an agreement with First Coast Advantage, LLC (FCA) to acquire certain assets related to FCA's Medicaid business. As part of the transaction, we will assume FCA's Medicaid contract and certain provider agreements for Region 4 of the Statewide Medicaid Managed Care Managed Medical Assistance Program in the state of Florida. We have received approval for the transaction from the Florida Agency for Health Care Administration, and expect to close in late 2014 or early 2015.

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal in 2012, and effective June 2013 the transition obligations associated with that contract terminated. Therefore, beginning in the second quarter of 2013, we classified the operations for our Missouri health plan as discontinued operations for all periods presented in our consolidated financial statements.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2014.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2013. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2013 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2013 audited consolidated financial statements.

Reclassifications

We have reclassified certain amounts in the 2013 consolidated balance sheet and statement of cash flows to conform to the 2014 presentation.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates and fall into the following categories:

(1) Contractual provisions that may adjust or limit revenue or profit:

Health Plan Medical Cost Floors (Minimums), Medical Cost Corridors, and Administrative Cost Ceilings (Maximums): A portion of certain Medicaid, Medicare, and Marketplace premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $272.6 million and $1.4 million at September 30, 2014, and December 31, 2013, respectively, to accounts payable and accrued liabilities. The increase is primarily driven by contractual provisions relating to the Medicaid expansion program, which began to phase in during January 2014. Beginning in 2014, the health plans may receive additional premiums if amounts spent on medical care costs exceed a defined maximum threshold. In the aggregate, we recorded a receivable under the terms of such contract provisions of $3.6 million at September 30, 2014. Separately, in certain states we may be levied with non-monetary sanctions if certain minimum amounts are not spent on defined medical care costs, or if administrative costs exceed certain amounts.

Health Plan Profit Sharing and Profit Ceiling: Our contracts with certain states contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage, in some cases in accordance with a tiered rebate schedule. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. As a result of profits in excess of the amount we are allowed to fully retain, we recorded a liability of $24.5 million and $2.5 million at September 30, 2014 and December 31, 2013, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services (CMS), our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of $18.6 million and $20.8 million for anticipated Medicare risk adjustment premiums at September 30, 2014, and December 31, 2013, respectively.

(2) Quality incentives:

At our California, Illinois, New Mexico, Ohio, Texas, Washington and Wisconsin health plans, revenue ranging from approximately 1% to 4% of health plan premiums is earned if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the periods presented and in prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of September 30, 2014 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of September 30, 2014.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(In thousands)			
Maximum available quality incentive premium - current period	$ 24,477	$ 20,939	$ 68,941	$ 62,050
Amount of quality incentive premium revenue recognized in current period:				
Earned current period	$ 12,921	$ 17,538	$ 30,935	$ 52,483
Earned prior periods	208	(50)	3,412	7,759
Total	$ 13,129	$ 17,488	$ 34,347	60,242
Total premium revenue recognized for state health plans with quality incentive premiums	$ 1,818,375	$ 771,615	$ 5,005,444	$ 2,192,249

(3) California health plan rate settlement agreement:

In the fourth quarter of 2013, our California health plan entered into a settlement agreement with the California Department of Health Care Services (DHCS). The agreement settled rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in Medi-Cal (California's Medicaid program). Under the terms of the agreement, a settlement account (the Account) applicable to the California health plan's managed care contracts has been established.

Effective January 1, 2014, the Account was established with an initial balance of zero, and will be settled after December 31, 2017. DHCS will make an interim partial settlement payment to us if it terminates early, without replacement, any of our managed care contracts. The Account will be adjusted annually to reflect a calendar year deficit or surplus, which is determined by comparing the California health plan's pre-tax margin and a target margin established in the settlement agreement. Upon expiration of the settlement agreement, if the Account is in a deficit position, then DHCS will pay the amount of the deficit to us, subject to an alternative minimum payment amount. If the Account is in a surplus position, then no amount is owed to either party. The maximum amount that DHCS would pay to us under the terms of the settlement agreement is $40.0 million.

We estimate and recognize the retrospective adjustments to premium revenue based on our experience to date under the California health plan's managed care contracts. As of September 30, 2014, we recorded a deficit, or receivable, of $3.5 million, net of a valuation discount of $0.2 million, reflecting our estimated retrospective premium adjustment to the Account based on the California health plan's actual pretax margin for the nine months ended September 30, 2014.

In addition to the three categories of accounting estimates discussed above, our California health plan recognized a benefit of approximately $15 million in the second quarter of 2014 for certain premium revenue which related to the year ended December 31, 2013.

Service Revenue and Cost of Service Revenue – Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid management information system (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the contract term during which BPO, hosting, and support and maintenance services are delivered. There may be certain contractual provisions containing contingencies, however that require us to delay recognition of all or part of our service revenue until such contingencies have been removed.

Cost of service revenue consists primarily of the costs incurred to provide BPO and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs. In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the contract term, consistent with the revenue recognition period.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes, nondeductible health insurer fee expenses, nondeductible compensation and other general and administrative expenses. The effective tax rate may be subject to fluctuations during the year, particularly as a result of the mathematical impact of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

During the third quarter of 2014, the Internal Revenue Service (IRS) issued final regulations related to compensation deduction limitations applicable to certain health insurance issuers. Pursuant to these final regulations, we recognized a tax benefit during the third quarter of 2014 of approximately $7 million, or $0.15 per diluted share, for periods prior to the third quarter of 2014.

The total amount of unrecognized tax benefits was $1.8 million and $8.0 million as of September 30, 2014 and December 31, 2013, respectively. The unrecognized tax benefits recorded at December 31, 2013 decreased by $6.2 million during the nine months ended September 30, 2014 as a result of the execution of a state settlement agreement and the expiration of statutes of limitation. This decrease had a nominal impact to the tax provision for the nine months ended September 30, 2014. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $1.6 million and $5.7 million as of September 30, 2014 and December 31, 2013, respectively. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $0.1 million due to the expiration of statute of limitations.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. Amounts accrued for the payment of interest and penalties as of September 30, 2014 and December 31, 2013 were insignificant.

Income taxes relating to discontinued operations for the three months ended September 30, 2014 and 2013 were insignificant. During the nine months ended September 30, 2014 and 2013, we recognized tax benefits of $0.3 million and $10.0 million, respectively, related to discontinued operations.

New Accounting Standards

Health Insurer Fee. In the first quarter of 2014, we adopted the guidance of the Financial Accounting Standards Board (FASB) related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively, the Affordable Care Act, or ACA). The ACA imposes an annual fee, or excise tax, on health insurers for each calendar year beginning on or after January 1, 2014. The health insurer fee (HIF) is imposed beginning in 2014, is based on a company's share of the industry's net premiums written during the preceding calendar year, and is payable on September 30 of each year.

Effective January 1, 2014, we recorded our estimate of the 2014 liability to accounts payable and accrued liabilities. During the third quarter of 2014 we paid our 2014 HIF assessment, which amounted to $88.6 million. This expense is being recognized on a straight-line basis in 2014; and is non-deductible for income tax purposes.

Because we primarily serve individuals in government-sponsored programs, we must secure additional reimbursement from our state partners for this added cost. We recognize HIF revenue when we have obtained a contractual commitment from a state to reimburse us for the health insurer fee. Such HIF revenue is recognized ratably throughout the year.

Revenue Recognition. In May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09 - *Revenue from Contracts with Customers*, which will supersede nearly all existing revenue recognition guidance under U.S. generally accepted accounting principles (GAAP). The core principal of this ASU is that an entity should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. This ASU will be effective for us in the first quarter of 2017; early adoption is not permitted. The ASU allows for either full retrospective or modified retrospective adoption. We are evaluating the transition method that will be elected and the potential effects of the adoption of this ASU on our financial statements.

Discontinued Operations. In April 2014, the FASB issued ASU 2014-08 - *Reporting Discontinued Operations and Disclosures of Disposal of Components of an Entity*, which raises the threshold for disposals to qualify as discontinued operations by focusing on strategic shifts that have or will have a major effect on an entity's operations and financial results. This ASU will be effective for us in the first quarter of 2015, and is applied prospectively. Early adoption is permitted but only for disposals (or classifications as held for sale) that have not been reported in financial statements previously issued or available for issue. We are evaluating the potential effects of the adoption of the ASU on our financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the Securities and Exchange Commission did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(In thousands)			
Shares outstanding at the beginning of the period	46,494	45,683	45,871	46,762
Weighted-average number of shares:				
Repurchased	—	—	—	(1,375)
Issued, 3.75% Exchange (1)	460	—	155	—
Issued, stock-based compensation and other	37	16	409	321
Denominator for basic net income per share	46,991	45,699	46,435	45,708
Effect of dilutive securities:				
Stock-based compensation	365	453	441	532
3.75% Notes and 3.75% Exchange (1)	1,288	910	1,212	527
Denominator for diluted net income per share	48,644	47,062	48,088	46,767
Potentially dilutive common shares excluded from calculations (2):				
Stock options	—	60	—	49
1.125% Warrants	13,490	13,490	13,490	11,464

(1) For more information regarding the 3.75% Exchange and 3.75% Notes, refer to Note 11, "Long-Term Debt."

(2) Potentially dilutive shares issuable pursuant to certain of our employee stock options, 1.125% Warrants (defined in Note 12, "Derivative Financial Instruments"), and 1.625% Notes (defined in Note 11, "Long-Term Debt") were not included in the computation of diluted net income per share because to do so would have been anti-dilutive.

4. Business Combinations

Health Plans Segment

South Carolina. In July 2013, we entered into an agreement with Community Health Solutions of America, Inc. (CHS) to acquire certain assets, including the rights to convert certain of CHS' Medicaid members covered by South Carolina's full-risk Medicaid managed care program. The conversion conditions under the agreement were satisfied by January 1, 2014, and on that date such Medicaid members were converted to the managed care program and enrolled with our South Carolina health plan. Because the number of Medicaid members we would ultimately convert was unknown as of the acquisition date in 2013, we recorded a contingent consideration liability for such members to be settled when the final purchase price was known in the second quarter of 2014. The total purchase price for the converted Medicaid membership amounted to $57.2 million, of which $49.7 million was paid in the first half of 2014, and $7.5 million was paid when the agreement was executed in 2013. The total amount paid includes indemnification withhold funds transferred to restricted investments amounting to $5.7 million. Any unused and remaining portion of such indemnification funds will become unrestricted and released to CHS on the one-year anniversary date of the conversion, or January 1, 2015.

As part of this transaction, we have also recorded a contingent consideration liability for dual-eligible members we expect to enroll in our Medicare-Medicaid Plan (MMP) implementation in South Carolina. The contingent consideration liability is remeasured to fair value at each quarter until the contingency is resolved with fair value adjustments, if any, recorded to operations. As of September 30, 2014, the fair value of the remaining contingent consideration liability for the MMP implementation amounted to $1.5 million.

The aggregate contingent consideration liability fair value adjustments for the South Carolina transaction have resulted in a gain of $4.2 million in the nine months ended September 30, 2014.

New Mexico. In August 2013, our New Mexico health plan acquired Lovelace Community Health Plan's contract for the state of New Mexico's Medicaid program. In addition to Lovelace's Medicaid members, we also added membership previously covered under New Mexico's State Coverage Insurance (SCI) program with Lovelace. Effective January 1, 2014, these SCI members were either enrolled in New Mexico's Medicaid program, or eligible to enroll in New Mexico's Marketplace. Because the number of SCI members we would ultimately retain was unknown as of the acquisition date in 2013, we recorded a contingent consideration liability for such members to be settled when the final purchase price was known in the second quarter of 2014. The aggregate contingent consideration liability fair value adjustments for the New Mexico transaction have resulted in a gain of $1.5 million in the nine months ended September 30, 2014.

Florida. In August 2014, our Florida health plan acquired certain assets relating to the Medicaid business of Healthy Palm Beaches, Inc. The final purchase price for this acquisition was $7.5 million. The Florida health plan's membership increased by approximately 11,000 members as a result of this transaction.

5. Stock-Based Compensation

In March 2014, our named executive officers were granted a total of 356,292 restricted shares with service, market, and performance conditions. In the event the vesting conditions are not achieved, the awards will lapse. As of September 30, 2014, we expect the performance conditions to be met in full.

Charged to general and administrative expenses, total stock-based compensation expense was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(In thousands)			
Restricted stock and performance awards	$ 4,774	$ 7,634	$ 13,596	$ 18,593
Employee stock purchase plan and stock options	885	870	2,519	2,061
	$ 5,659	$ 8,504	$ 16,115	$ 20,654

As of September 30, 2014, there was $28.6 million of total unrecognized compensation expense related to unvested restricted stock awards, including those with performance conditions, which we expect to recognize over a remaining weighted-average period of 2.0 years.

Restricted and performance stock activity for the nine months ended September 30, 2014 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2013	1,299,852	$ 29.03
Granted	656,452	36.68
Vested	(597,301)	27.70
Forfeited	(60,742)	31.20
Unvested balance as of September 30, 2014	1,298,261	33.40

The total fair value of restricted and performance awards granted during the nine months ended September 30, 2014 and 2013 was $24.8 million and $33.3 million, respectively. The total fair value of restricted awards, including those with performance and market conditions, which vested during the nine months ended September 30, 2014 and 2013 was $22.5 million and $19.3 million, respectively.

6. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, other assets, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities (excluding contingent consideration) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs

Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs

Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit that are classified as current investments in the accompanying consolidated balance sheets. Such investments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs

Derivative financial instruments. Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Notes Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of September 30, 2014 included our common stock price, time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 12, “Derivative Financial Instruments,” the 1.125% Call Option asset and the 1.125% Notes Conversion Option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of income. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

Contingent consideration liability. Such liability relates to our South Carolina health plan acquisition described in Note 4, "Business Combinations," and is recorded in accounts payable and accrued liabilities. We applied discounted cash flow analysis to determine the fair value of this liability. Significant unobservable inputs primarily related to the probability weighted present value of the purchase price estimate for the projected membership.

Auction rate securities. Auction rate securities are designated as available-for-sale and are reported at fair value in other assets. To estimate the fair value of these securities we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of September 30, 2014.

Our financial instruments measured at fair value on a recurring basis at September 30, 2014, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 553,936	$ —	$ 553,936	$ —
Municipal securities	96,873	—	96,873	—
GSEs	99,254	99,254	—	—
U.S. treasury notes	41,031	41,031	—	—
Certificates of deposit	51,589	—	51,589	—
Auction rate securities	6,891	—	—	6,891
1.125% Call Option derivative asset	222,997	—	—	222,997
Total assets measured at fair value on a recurring basis	$ 1,072,571	$ 140,285	$ 702,398	$ 229,888
1.125% Notes Conversion Option derivative liability	$ 222,877	$ —	$ —	$ 222,877
Contingent consideration liability	1,500	—	—	1,500
Total liabilities measured at fair value on a recurring basis	$ 224,377	$ —	$ —	$ 224,377

Our financial instruments measured at fair value on a recurring basis at December 31, 2013, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 449,772	$ —	$ 449,772	$ —

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our convertible senior notes, which are classified as Level 2 financial instruments, are indicated in the following table. Fair value for these securities is determined using a market approach based on

quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

	September 30, 2014				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)

7. Investments

The following tables summarize our investments as of the dates indicated:

	September 30, 2014			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 554,359	$ 448	$ 871	$ 553,936
Municipal securities	96,899	179	205	96,873
GSEs	99,436	16	198	99,254
U.S. treasury notes	41,074	13	56	41,031
Certificates of deposit	51,601	3	15	51,589
Subtotal - current investments	843,369	659	1,345	842,683
Auction rate securities	7,200	—	309	6,891
	$ 850,569	$ 659	$ 1,654	$ 849,574

	December 31, 2013			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 450,162	$ 442	$ 832	$ 449,772
Municipal securities	114,126	119	915	113,330
GSEs	68,898	6	87	68,817
U.S. treasury notes	37,360	44	28	37,376
Certificates of deposit	33,756	2	1	33,757
Subtotal - current investments	704,302	613	1,863	703,052
Auction rate securities	11,400	—	502	10,898
	$ 715,702	$ 613	$ 2,365	$ 713,950

The contractual maturities of our investments as of September 30, 2014 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 312,449	$ 312,493
Due one year through five years	530,920	530,190
Due after ten years	7,200	6,891
	$ 850,569	$ 849,574

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the three and nine months ended September 30, 2014 and 2013 were insignificant.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at September 30, 2014 and December 31, 2013, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of September 30, 2014:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(Dollars in thousands)					
Corporate debt securities	$ 231,598	$ 639	163	$ 43,112	$ 232	13
Municipal securities	39,331	90	34	13,419	115	14
GSEs	71,602	161	21	5,992	37	6
U.S. treasury notes	21,545	51	12	4,245	5	2
Certificates of deposit	11,762	15	49	—	—	—
Auction rate securities	—	—	—	6,891	309	10
	$ 375,838	$ 956	279	$ 73,659	$ 698	45

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of December 31, 2013:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities

Auction Rate Securities. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 16 years to 32 years. Considering the insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current

intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction rate securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at September 30, 2014. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $74.9 million of these instruments at par value.

For the nine months ended September 30, 2014 and 2013, we recorded pretax unrealized gains of $0.2 million and $0.5 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future impairment is other-than-temporary, we will record a charge to earnings as appropriate.

8. Receivables

Receivables consist primarily of amounts due from the various states in which we operate, which may be subject to potential retroactive adjustments. Because all of our receivable amounts are readily determinable and substantially all of our creditors are state governments, our allowance for doubtful accounts is immaterial.

	September 30, 2014	December 31, 2013
	(In thousands)	
California	$ 184,368	$ 148,654

Molina Medicaid Solutions segment	31,688	20,635
	$ 425,683	$ 298,935

9. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by state authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. Additionally, in connection with the Molina Medicaid Solutions contract with the state of Maine, we maintain restricted investments as collateral for a letter of credit. The following table

presents the balances of restricted investments:

	September 30, 2014	December 31, 2013
	(In thousands)	
California	$ 373	$ 373
Florida	23,291	9,242
Illinois	312	310
Michigan	1,014	1,014
New Mexico	31,132	24,622
Ohio	12,719	9,080
South Carolina	6,038	310
Texas	3,500	3,500

Total Health Plans segment	88,118	52,789
Molina Medicaid Solutions segment	5,001	10,304
	$ 93,119	$ 63,093

The contractual maturities of our held-to-maturity restricted investments as of September 30, 2014 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 92,807	$ 92,817
Due one year through five years	312	312
	$ 93,119	$ 93,129

10. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated:

	September 30, 2014	December 31, 2013
	(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 796,433	$ 424,173
Pharmacy payable	62,322	45,037
Capitation payable	31,535	20,267
Other	233,556	180,310
	$ 1,123,846	$ 669,787

"Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. Such non-risk provider payables amounted to $136.0 million and $151.3 million as of September 30, 2014 and December 31, 2013, respectively.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts presented for “Components of medical care costs related to: Prior period” represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Nine Months Ended September 30, 2014	Year Ended December 31, 2013
	(Dollars in thousands)	
Balances at beginning of period	$ 669,787	$ 494,530
Components of medical care costs related to:		
Current period	5,795,404	5,434,443
Prior period	(41,033)	(52,779)
Total medical care costs	5,754,371	5,381,664
Change in non-risk provider payables	(15,344)	111,267
Payments for medical care costs related to:		
Current period	4,841,429	4,932,195
Prior period	443,539	385,479
Total paid	5,284,968	5,317,674
Balances at end of period	$ 1,123,846	$ 669,787
Benefit from prior period as a percentage of:		
Balance at beginning of period	6.1%	10.7%
Premium revenue, trailing twelve months	0.5%	0.9%
Medical care costs, trailing twelve months	0.6%	1.0%

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate – we only know when the circumstances for any one or more factors are out of the ordinary.

As indicated above, the amounts ultimately paid out on our liabilities in fiscal years 2014 and 2013 were less than what we had expected when we established our reserves. For example, for the year ended December 31, 2013, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2012 by 10.7%. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

While prior period development of our estimate as of December 31, 2013 through September 30, 2014 has been favorable by $41.0 million, that amount is substantially less than the favorable prior period development of $52.8 million that we recognized in all of 2013.

In estimating our claims liability at September 30, 2014, we adjusted our base calculation to take account of the numerous factors that we believe will likely change our final claims liability amount. We believe the most significant among those factors are:

- Since January 1, 2014, we have added 314,500 members under Medicaid expansion in six of our health plans. Because these members are transitioning into managed care, and have different demographics than those of our legacy membership, we have little insight into their utilization of medical services. Additionally, as of September 30, 2014, we have relatively little medical claims payment history related to Medicaid expansion membership in Illinois, Michigan and Ohio because such membership was enrolled in these states later in the year. Accordingly, our estimates of the claims liability for this population are subject to a higher degree of uncertainty.

- Since January 1, 2014, we have added 118,000 new members at our South Carolina health plan. Because we have only nine months of claims payment history, the reserves are subject to greater uncertainty than that of our legacy Medicaid membership.
- At our New Mexico health plan, the state has been adding approximately 10,000 to 15,000 members per month on a retroactive basis since March 2014. Because we have no claims payment history for these members, our estimates of the claims liability for this population are subject to a higher degree of uncertainty. However, for these members, the state will reimburse the health plan for claims with dates of service during the retroactive period on a cost-plus basis, i.e., for claims paid plus an administration fee.
- Beginning in the third quarter of 2014, there was a substantial backlog of inpatient claims at our Washington health plan. This backlog was a result of payments held as the state of Washington considered whether to adjust its payment methodology for inpatient claims. We have adjusted the inpatient reserves to reflect the estimated impact of the claims backlog.

The use of a consistent methodology in estimating our liability for medical claims and benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2013, and for the nine months ended September 30, 2014, the absence of adverse development of the liability for medical claims and benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both periods, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the replenishment of reserves in the respective periods generally offset the benefit from the prior period.

11. Long-Term Debt

As of September 30, 2014, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2014	2015	2016	2017	2018	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
1.625% Notes (1)	301,551	—	—	—	—	—	301,551
3.75% Notes	10,449	10,449	—	—	—	—	—
	$ 862,000	$ 10,449	$ —	$ —	$ —	$ —	$ 851,551

(1) The 1.625% Notes have a contractual maturity date in 2044; however, on specified dates beginning in 2018 as described below, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes.

1.125% Cash Convertible Senior Notes due 2020. In February 2013, we issued $550.0 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020 (the 1.125% Notes), which were outstanding as of September 30, 2014 and December 31, 2013. Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15, at a rate of 1.125% per annum. The 1.125% Notes will mature on January 15, 2020 unless repurchased or converted in accordance with their terms prior to such date. The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities.

The initial conversion rate for the 1.125% Notes is 24.5277 shares of our common stock per $1,000 principal amount of the 1.125% Notes. This represents an initial conversion price of approximately $40.77 per share of our common stock. The conversion rate is subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest.

The 1.125% Notes contain an embedded cash conversion option (the 1.125% Notes Conversion Option), which was separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the 1.125% Notes Conversion Option transaction settles or expires. The initial fair value liability of the 1.125% Notes Conversion Option simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). This discount is amortized to the 1.125% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 5.9%. As of September 30, 2014, we expect the 1.125% Notes to be

outstanding until their January 15, 2020 maturity date, for a remaining amortization period of 5.3 years. The 1.125% Notes' if-converted value exceeded their principal amount by approximately $48 million as of September 30, 2014, and did not exceed their principal amount as of December 31, 2013.

3.75% Exchange. In August 2014, we entered into separate, privately negotiated, exchange agreements (the 3.75% Exchange) with certain holders of our outstanding 3.75% Convertible Senior Notes due 2014 (the 3.75% Notes). In this transaction, we exchanged $176.6 million aggregate principal amount of the 3.75% Notes for $176.6 million aggregate principal amount of 1.625% Convertible Senior Notes due 2044 (the 1.625% Notes, see further discussion below), approximately 1.7 million shares of our common stock (the Exchange Shares), and payment of accrued interest on the exchanged 3.75% Notes. In connection with the 3.75% Exchange, we did not receive any proceeds from the issuance of the 1.625% Notes or the Exchange Shares.

1.625% Convertible Senior Notes due 2044. In addition to the 1.625% Notes issued in connection with the 3.75% Exchange described above, we issued $125.0 million principal amount of 1.625% Notes in September 2014, amounting to $301.6 million aggregate principal amount outstanding under the 1.625% Notes as of September 30, 2014. The proceeds from the issuance of the $125.0 million principal amount of the 1.625% Notes amounted to $123.4 million, including a premium of $0.6 million, and net of deferred issuance costs paid. In connection with the 1.625% Notes, we have recorded total deferred issuance costs of approximately $6 million, which will be amortized over the expected term of the debt (discussed below).

Interest on the 1.625% Notes is payable semiannually in arrears on February 15 and August 15, at a rate of 1.625% per annum, beginning on February 15, 2015. The 1.625% Notes will mature on August 15, 2044 unless repurchased or converted in accordance with their terms prior to such date. In addition, beginning with the semiannual interest period commencing immediately following the interest payment date on August 15, 2018, contingent interest will accrue on the 1.625% Notes during any semiannual interest period in which certain conditions are satisfied, or under certain events of default. Furthermore, additional interest of 0.25% per year will be payable on the 1.625% Notes for any semiannual interest period for which the principal amount of 1.625% Notes outstanding is less than $100 million.

The initial conversion rate for the 1.625% Notes is 17.2157 shares of our common stock per $1,000 principal amount of the 1.625% Notes. This represents an initial conversion price of approximately $58.09 per share of our common stock. Upon conversion, we will pay cash and, if applicable, deliver shares of our common stock to the converting holder in an amount per $1,000 principal amount of 1.625% Notes equal to the settlement amount (as defined in the related indenture). We may not redeem the 1.625% Notes prior to August 19, 2018. On or after August 19, 2018, we may redeem for cash all or part of the 1.625% Notes, except for the 1.625% Notes we are required to repurchase in connection with a fundamental change (as defined in the related indenture) or on any specified repurchase date (as defined in the indenture). The redemption price for the 1.625% Notes will equal 100% of the principal amount of the 1.625% Notes being redeemed, plus accrued and unpaid interest. In addition, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes for cash on August 19, 2018, August 19, 2024, August 19, 2029, August 19, 2034 and August 19, 2039, in each case, at a specified price equal to 100% of the principal amount of the 1.625% Notes to be repurchased, plus accrued and unpaid interest.

Because the 1.625% Notes have cash settlement features, we have allocated the principal amount between a liability component and an equity component. The reduced carrying value on the 1.625% Notes resulted in a debt discount that is amortized back to the 1.625% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. The expected life of the debt is approximately four years, beginning on the issuance date and ending on the first date we may redeem the notes in August 2018. This has resulted in our recognition of interest expense on the 1.625% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 5%. The outstanding 1.625% Notes' if-converted value did not exceed principal amount as of September 30, 2014. At September 30, 2014, the equity component of the 1.625% Notes, including the impact of deferred taxes, was $22.6 million.

3.75% Convertible Senior Notes due 2014. We had $10.4 million and $187.0 million of the 3.75% Notes outstanding as of September 30, 2014 and December 31, 2013, respectively. As described above, we entered into the 3.75% Exchange transaction in August 2014, under which we exchanged $176.6 million of the outstanding principal amount of the 3.75% Notes for the 1.625% Notes. The remaining $10.4 million principal amount outstanding as of September 30, 2014 was repaid in full in early October 2014. In addition to the repayment of the outstanding principal balance, in early October 2014 we issued approximately 0.1 million shares to settle the 3.75% Notes' conversion feature.

Because the 3.75% Notes had cash settlement features, we allocated the principal amount between a liability component and an equity component. The reduced carrying value on the 3.75% Notes resulted in a debt discount that was amortized back to the 3.75% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This resulted in our recognition of interest expense on the 3.75% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or 7.5%. The outstanding 3.75% Notes' if-converted value exceeded their principal amount by approximately $4 million and $11 million as of September 30, 2014, and December 31, 2013, respectively.

The principal amounts, unamortized discount (net of premium related to the 1.625% Notes), and net carrying amounts of the convertible senior notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
September 30, 2014:			
1.125% Notes	$ 550,000	$ 119,516	$ 430,484
1.625% Notes	301,551	34,825	266,726
3.75% Notes	10,449	—	10,449
	$ 862,000	$ 154,341	$ 707,659
December 31, 2013:			
1.125% Notes	$ 550,000	$ 133,632	$ 416,368
3.75% Notes	187,000	5,128	181,872
	$ 737,000	$ 138,760	$ 598,240

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
		(In thousands)		
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate	$ 3,132	$ 3,300	$ 9,732	$ 9,127
Amortization of the discount	6,455	6,059	19,183	15,747
Total interest cost recognized	$ 9,587	$ 9,359	$ 28,915	$ 24,874

Lease Financing Obligations. In 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of the Molina Center located in Long Beach, California, and our Ohio health plan office building in Columbus, Ohio. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated and amortized over their remaining useful lives. The lease financing obligation is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense amounted to $9.3 million and $3.7 million for the nine months ended September 30, 2014 and 2013, respectively.

As described and defined in further detail in Note 16, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings then under construction. We have concluded that we are the accounting owner of the properties due to our continuing involvement with the properties. We have recorded $38.9 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of September 30, 2014, which represents the total cost, including imputed interest, incurred by the Landlord for the construction of the buildings, net of accumulated depreciation. As of September 30, 2014, the aggregate amount recorded to lease financing obligations amounted to $40.7 million. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense was $2.2 million for the nine months ended September 30, 2014. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was $0.8 million for the nine months ended September 30, 2014.

12. Derivative Financial Instruments

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

	Balance Sheet Location	September 30, 2014	December 31, 2013
		(In thousands)	
Derivative asset:			
1.125% Call Option	Non-current assets: Derivative asset	$ 222,997	$ 186,351
Derivative liability:			
1.125% Notes Conversion Option	Non-current liabilities: Derivative liability	$ 222,877	$ 186,239

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of income, and reported in other expenses, net. Gains and losses for our derivative financial instruments are presented individually in the consolidated statements of cash flows, supplemental cash flow information.

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Notes in 2013 as described in Note 11, "Long-Term Debt," we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 6, "Fair Value Measurements."

1.125% Notes Conversion Option. The embedded cash conversion option within the 1.125% Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Notes Conversion Option, refer to Note 6, "Fair Value Measurements."

13. Stockholders' Equity

Stockholders' equity increased $71.4 million during the nine months ended September 30, 2014 compared with stockholders' equity at December 31, 2013. The increase was due to net income of $28.4 million, $25.0 million related to 1.625% Notes and 3.75% Exchange, $0.5 million related to other comprehensive income and $17.5 million related to employee stock transactions.

3.75% Exchange and 3.75% Notes. As described in Note 11, "Long-Term Debt," we issued approximately 1.7 million shares in connection with the exchange of our 3.75% Notes for the 1.625% Notes in the third quarter of 2014. Additionally, we issued 0.1 million shares in connection with the conversion of the 3.75% Notes in the fourth quarter of 2014.

1.125% Warrants. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants.

Securities Repurchases and Repurchase Program. Effective September 30, 2013, our board of directors authorized the repurchase of up to $50.0 million in aggregate of our common stock through December 31, 2014. Stock repurchases under this

program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and other market conditions. As of September 30, 2014, the remaining balance available to repurchase our stock under this program was $47.3 million.

Shelf Registration Statement. In May 2012, we filed an automatic shelf registration statement on Form S-3 with the SEC covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Plans. In connection with our equity incentive plans, we issued approximately 643,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the nine months ended September 30, 2014.

14. Segment Information

We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans and our direct delivery business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides MMIS design, development, implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segment is charged to the Health Plans segment.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(In thousands)			
Revenue from continuing operations:				
Health Plans segment:				
Premium revenue	$ 2,316,759	$ 1,584,656	$ 6,424,238	$ 4,583,818
Premium tax revenue	81,240	43,723	203,053	127,606
Health insurer fee revenue	29,427	—	67,785	—
Investment income	2,041	1,740	5,615	4,884
Other revenue	2,327	5,860	8,523	16,476
Molina Medicaid Solutions segment:				
Service revenue	52,557	51,100	156,419	150,528
Total revenue	$ 2,484,351	$ 1,687,079	$ 6,865,633	$ 4,883,312
Income from continuing operations before income tax:				
Health Plans segment	$ 29,874	$ 16,929	$ 65,879	$ 118,600
Molina Medicaid Solutions segment	9,905	7,997	30,594	20,645
Total operating income from continuing operations	39,779	24,926	96,473	139,245
Other expenses, net	15,282	13,508	43,044	41,583
Income from continuing operations before income tax expense	$ 24,497	$ 11,418	$ 53,429	$ 97,662

15. Commitments and Contingencies

Legal Proceedings. The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem

the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Washington Health Plan. In September 2014, our Washington health plan paid $19.2 million to the Washington Health Care Authority (HCA) to settle two outstanding overpayment matters. The matters related to demands for recoupment of claims for psychotropic drugs and claims for health plan members under the Washington Community Options Program Entry System (COPES). Additionally, in September 2014 HCA paid our Washington health plan $8.0 million to settle certain matters brought by the Washington health plan related to auto-assignment provisions in the parties' contract. The net effect of these settlements resulted in a premium revenue reduction of $11.2 million in the third quarter of 2014, and resolved all pending disputes between the parties.

State of Louisiana. On June 26, 2014, the State of Louisiana filed a Petition for Damages against Molina Medicaid Solutions, Molina Healthcare, Inc., Unisys Corporation, and Paramax Systems Corporation, a subsidiary of Unisys, in the Parish of Baton Rouge, 19th Judicial District. The Petition alleges that between 1989 and 2012, the defendants utilized an incorrect reimbursement formula for the payment of pharmaceutical claims. We believe we have several meritorious defenses to the claims of the state, and any liability for the alleged claims is not currently probable or reasonably estimable.

USA and State of Florida ex rel. Charles Wilhelm. On July 24, 2014, Molina Healthcare, Inc. and Molina Healthcare of Florida, Inc. were served with a Complaint filed under seal on December 5, 2012 in District Court for the Southern District of Florida by relator, Charles C. Wilhelm, M.D., Case No. 12-24298. The Complaint alleges that, in late 2008 and early 2009, in connection with the acquisition of Florida NetPass by which Molina Healthcare entered into the state of Florida, the defendants failed to adequately staff the plan and provide other services, resulting in a disproportionate number of sicker beneficiaries of Florida NetPass moving back into the Florida fee-for-service Medicaid program. This alleged conduct purportedly resulted in a violation of the federal False Claims Act. Both the United States of America and the State of Florida have declined to intervene. We believe we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al. On or around October 14, 2014, Molina Healthcare of California, Molina Healthcare of California Partner Plan, Inc., Mobile Medical Examination Services, Inc. (MedXM), and other health plan defendants were served with a Complaint previously filed under seal in the Central District Court of California by relator, Anita Silingo. The Complaint alleges that MedXM improperly modified medical records and otherwise took inappropriate steps to increase members' risk adjustment scores, and that the defendants, including Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc., turned a "blind eye" to these unlawful practices. The Department of Justice has declined to intervene. We believe that we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

Provider Claims. Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions. Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements upon us that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statues, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $717 million at September 30, 2014, and $608 million at December 31, 2013. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained

earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $374.3 million and $365.2 million as of September 30, 2014 and December 31, 2013, respectively.

The National Association of Insurance Commissioners (NAIC) adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Illinois, Michigan, New Mexico, Ohio, South Carolina, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of September 30, 2014, our health plans had aggregate statutory capital and surplus of approximately $798 million compared with the required minimum aggregate statutory capital and surplus of approximately $413 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2014. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

16. Related Party Transactions

In February 2013, we entered into a lease with 6th & Pine Development, LLC (the Landlord) for office space located in Long Beach, California. The lease consists of two office buildings, referred to as Building A and Building B.

The principal members of the Landlord are John C. Molina, our chief financial officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, John C. Molina has pledged shares of common stock in the Company that he holds as trustee. Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary.

The lease term for Building A commenced in June 2013, and the lease term for Building B commenced in July 2014. The initial lease term for both buildings expires on December 31, 2024, subject to two five-year renewal options. Annual rent for Building A is approximately $3 million, and initial annual rent for Building B is approximately $4 million. Rent increases 3.75% per year during the initial term. Rent during the extension terms will be the greater of then-current rent or fair market rent.

Refer to Note 17, "Variable Interest Entity," for a discussion of the Joseph M. Molina, M.D. Professional Corporations.

17. Variable Interest Entity

Joseph M. Molina M.D., Professional Corporations. The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's sole shareholder is Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides professional medical services to the general public for routine non-life threatening, outpatient health care needs. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, Molina Medical Management, Inc. (MMM), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will operate at break even, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by MMM are reviewed annually to assure the achievement of this goal.

Separately, our California, Florida, New Mexico, Utah and Washington health plans have entered into primary care services agreements with JMMPC. These agreements direct our health plans to perform a monthly reconciliation, to either fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, such that JMMPC will derive no profit or loss. Because the MMM services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are generally insignificant.

We have determined that JMMPC is a variable interest entity (VIE), and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of September 30, 2014, JMMPC had total assets

of $12.1 million, and total liabilities of $11.8 million. As of December 31, 2013, JMMPC had total assets of $6.9 million and total liabilities of $6.6 million.

Our maximum exposure to loss as a result of our involvement with JMMPC is generally limited to the amounts needed to fund JMMPC's ongoing payroll and employee benefits. We believe that such loss exposure will be immaterial to our consolidated operating results and cash flows for the foreseeable future.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated. Those known risks and uncertainties include, but are not limited to, the following:

- uncertainties associated with the implementation of the Affordable Care Act, including the full grossed up reimbursement by states of the non-deductible health insurer fee, the expansion of Medicaid eligibility in the states that participate to previously uninsured populations unfamiliar with managed care, the implementation of state insurance marketplaces, the effect of various implementing regulations, and uncertainties regarding the impact of other federal or state health care and insurance reform measures, including the dual eligibles demonstration programs in California, Illinois, Michigan, Ohio, and South Carolina;
- newly FDA-approved specialty drugs such as Sovaldi, Olysio, Harvoni, and other specialty drugs that are exorbitantly priced but not factored into the calculation of our capitated rates;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations, and our ability to reduce over time the high medical costs commonly associated with new patient populations;
- the accurate estimation of incurred but not paid medical costs across our health plans;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates or retroactive premium rate increases;
- efforts by states to recoup previously paid amounts;
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, including the success of the proposal of Molina Medicaid Solutions in New Jersey;
- the continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed, including the extension of the Louisiana contract of Molina Medicaid Solutions through 2015;
- complications, member confusion, or enrollment backlogs related to the annual renewal of Medicaid coverage;
- government audits and reviews, and any fine, enrollment freeze, or monitoring program that may result therefrom;
- changes with respect to our provider contracts and the loss of providers;
- federal or state medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures, including 2014 at-risk premium rules in the state of Texas;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable or unfavorable resolution of litigation, arbitration, or administrative proceedings, including pending qui tam actions in Florida and California, and the litigation commenced against us by the state of Louisiana alleging that Molina Medicaid Solutions and its predecessors used an incorrect reimbursement formula for the payment of pharmaceutical claims;
- the relatively small number of states in which we operate health plans;
- our management of a portion of College Health Enterprises' hospital in Long Beach, California;

- the availability of adequate financing on acceptable terms to fund and capitalize our expansion and growth, repay our outstanding indebtedness at maturity and meet our liquidity needs, including the interest expense and other costs associated with such financing;
- the failure of a state in which we operate to renew its federal Medicaid waiver;
- cyber-attacks or other privacy or data security incidents resulting in an inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- public alarm associated with the Ebola virus, or any actual widespread epidemic;
- changes in general economic conditions, including unemployment rates; and
- increasing consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2013, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2013.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. As of September 30, 2014, these health plans served approximately 2.4 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve a small number of Health Insurance Marketplace (Marketplace) members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the management of a hospital in southern California under a management services agreement, and the operation of primary care clinics in several states in which we operate.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal in 2012, and effective June 2013 the transition obligations associated with that contract terminated. Therefore, beginning in the second quarter of 2013, we classified the operations for our Missouri health plan as discontinued operations for all periods presented in our consolidated financial statements. The following discussion and analysis, with the exception of cash flow information, is presented in the context of continuing operations unless otherwise identified.

Health Care Reform

New Markets. We believe that the government-sponsored initiatives, including the Affordable Care Act (defined below) will continue to provide us with significant opportunities for membership growth in our existing markets and, potentially, in new markets in the future as follows:

- *Medicaid Expansion*. In the states that have elected to participate, the Affordable Care Act provides for the expansion of the Medicaid program to provide eligibility to nearly all low-income people under age 65 with incomes at or below 138 percent of the federal poverty line. Medicaid expansion membership phased in beginning January 1, 2014. Since that date, our health plans in California, Illinois, Michigan, New Mexico, Ohio, and Washington have begun participating in Medicaid expansion. In the nine months ended September 30, 2014, we added approximately 314,500 Medicaid expansion members, or 13% of total membership.
- *Health Insurance Marketplace*. On October 1, 2013, Marketplace became available for consumers to access and begin the enrollment process for coverage beginning January 1, 2014. The Marketplace allows individuals and small groups to purchase health insurance that is federally subsidized. We participate in the Marketplace in all of the states in which we operate, except Illinois and South Carolina. At September 30, 2014, we had fewer than 20,000 Marketplace members.
- *Medicare-Medicaid Plans*. Policymakers at the federal and state levels are increasingly focused on the design and implementation of programs that improve the coordination of care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to deliver services to the dual eligible in a more financially efficient manner. As a result of these efforts, 15 states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual-eligible individuals. The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). Our MMPs in California, Illinois, and Ohio offered coverage beginning in the second quarter of 2014.

Health Insurer Fee. The ACA imposes an annual fee, or excise tax, on health insurers for each calendar year beginning on or after January 1, 2014. The health insurer fee (HIF) is imposed beginning in 2014, is based on a company's share of the industry's net premiums written during the preceding calendar year, and is payable on September 30 of each year.

During the third quarter of 2014 we paid our 2014 HIF assessment, which amounted to $88.6 million. This expense is being recognized on a straight-line basis in 2014; and is non-deductible for income tax purposes. For further discussion of the risks and uncertainties relating to the HIF, refer to the subheading below, "Liquidity and Capital Resources—Financial Condition."

Market Updates - Health Plans Segment

NCQA Rankings. In September 2014, we announced that the National Committee for Quality Assurance (NCQA) has included our health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington and Wisconsin in NCQA's Medicaid Health Insurance Plan Rankings for 2014-2015.

Florida. Enrollment at the Florida health plan declined between the first and second quarters of 2014 due to a reassignment of membership as part of the implementation of Florida's Managed Medical Assistance (MMA) program. In the third quarter of 2014, such enrollment increased by approximately 40,000 members due primarily to the addition of certain service areas effective August 1, 2014.

In August 2014, we announced that our Florida health plan entered into an agreement with First Coast Advantage, LLC (FCA) to acquire certain assets related to FCA's Medicaid business. As part of the transaction, we will assume FCA's Medicaid contract and certain provider agreements for Region 4 of the Statewide Medicaid Managed Care Managed Medical Assistance Program in the state of Florida. We have received approval for the transaction from the Florida Agency for Health Care Administration, and expect to close in late 2014 or early 2015.

In August 2014, our Florida health plan acquired certain assets relating to the Medicaid business of Healthy Palm Beaches, Inc. The final purchase price for this acquisition was $7.5 million. The Florida health plan's membership increased by approximately 11,000 members as a result of this transaction.

Puerto Rico. On October 15, 2014, the Puerto Rico Health Insurance Administration announced that it has selected Molina Healthcare of Puerto Rico to operate the Commonwealth's Medicaid-funded Government Health Plan program in the East and Southwest regions. We expect to begin serving members in the second quarter of 2015.

South Carolina. Our South Carolina health plan began serving members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014. For further information on this transaction, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 4, "Business Combinations."

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate; and, to a lesser degree, from Medicare contracts entered into with the Centers for Medicare and Medicaid Services (CMS), a federal government agency.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new RFP open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled; and regions or service areas.

Premium revenue is fixed in advance of the periods covered and, except as described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," is not generally subject to significant accounting estimates. For the nine months ended September 30, 2014, we received the majority of our premium revenue as a fixed amount per member per month (PMPM), pursuant to our Medicaid and Medicare contracts; and agreements with other managed care organizations for which we operate as subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates. For the nine months ended September 30, 2014, we recognized approximately 3% of our premium revenue in the form of "birth income"—a one-time payment for the delivery of a child—from the Medicaid programs in all of our state health plans except Illinois and New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans in the nine months ended September 30, 2014, by program:

	Ending Membership	PMPM Premiums		
		Low	High	Consolidated
Temporary Assistance for Needy Families (TANF)	1,608,900	$ 110.00	$ 250.00	$ 160.00
Medicaid Expansion	314,500	330.00	530.00	420.00
Aged, Blind or Disabled (ABD)	314,400	380.00	1,410.00	820.00
Children's Health Insurance Program (CHIP)	69,000	90.00	130.00	120.00
Medicare Special Needs Plans (Medicare)	46,400	990.00	1,320.00	1,210.00
MMP–Medicaid Only (1) (2)	20,500	1,380.00	1,520.00	1,490.00
MMP–Integrated (1) (3)	14,400	1,320.00	3,510.00	2,030.00
Marketplace	15,900	170.00	610.00	340.00

(1) MMP members are dually eligible for Medicare and Medicaid.

(2) MMP members who receive Medicaid coverage only from Molina Healthcare.

(3) MMP members who receive both Medicaid and Medicare coverage from Molina Healthcare.

The following tables set forth our Health Plans segment membership as of the dates indicated:

	September 30, 2014	June 30, 2014	December 31, 2013	September 30, 2013
Ending Membership by Health Plan:				
California	496,000	455,000	368,000	363,000
Florida (1)	98,000	58,000	89,000	84,000
Illinois	21,000	6,000	4,000	—
Michigan	238,000	244,000	213,000	213,000
New Mexico	207,000	195,000	168,000	172,000
Ohio	337,000	302,000	255,000	261,000
South Carolina (2)	118,000	119,000	—	—
Texas	249,000	247,000	252,000	258,000
Utah	83,000	83,000	86,000	87,000
Washington	473,000	461,000	403,000	409,000
Wisconsin	84,000	85,000	93,000	95,000
	2,404,000	2,255,000	1,931,000	1,942,000
Ending Membership by Program:				
TANF	1,608,900	1,564,500	1,503,800	1,519,200
Medicaid Expansion (3)	314,500	232,300	—	—
ABD	314,400	305,300	288,600	283,200
CHIP	69,000	77,000	99,200	101,500
Medicare	46,400	44,000	39,400	38,100
MMP–Medicaid Only	20,500	8,400	—	—
MMP–Integrated	14,400	5,200	—	—
Marketplace (3)	15,900	18,300	—	—
	2,404,000	2,255,000	1,931,000	1,942,000

(1) Enrollment at the Florida health plan declined between the first and second quarters of 2014 due to a reassignment of membership as part of the implementation of Florida's Managed Medical Assistance (MMA) program. In the third quarter of 2014, such enrollment increased by approximately 40,000 members due primarily to the addition of certain service areas effective August 1, 2014.

(2) Our South Carolina health plan began serving members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014.

(3) Medicaid expansion membership phased in, and the Marketplace became available for consumers to access coverage, beginning January 1, 2014.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid management information system (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the contract term during which BPO, hosting, and support and maintenance services are delivered. There may be certain contractual provisions containing contingencies, however that require us to delay recognition of all or part of our service revenue until such contingencies have been removed.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services (including long-term services and supports, or LTSS), general and administrative expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following categories:

- *Fee-for-service expenses:* Under fee-for-service arrangements, we retain the financial responsibility for medical care provided and incur costs based on actual utilization of services. Such expenses are recorded in the period in which the related services are dispensed. Nearly all hospital services and the majority of our primary care and physician specialist services are paid on a fee-for-service basis.

- *Pharmacy expenses:* All drug, injectables, and immunization costs paid through our pharmacy benefit manager are classified as pharmacy expenses.

- *Capitation expenses:* Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.

- *Direct delivery expenses:* All costs associated with our direct delivery of medical care are separately identified.

- *Other medical expenses:* All medically related administrative costs, certain provider incentive costs, reinsurance costs and other health care expenses are classified as other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements in Note 10, "Medical Claims and Benefits Payable," for further information on how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide BPO and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs. In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the contract term, consistent with the revenue recognition period.

Financial Performance Summary, Continuing Operations

The following table and narrative briefly summarize our financial and operating performance from continuing operations for the three and nine months ended September 30, 2014 and 2013. All ratios, with the exception of the medical care ratio and the premium tax ratio, are computed as a percentage of total revenue. The medical care ratio is computed as a percentage of premium revenue; and the premium tax ratio is computed as a percentage of premium revenue plus premium tax revenue, because direct relationships exist between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(Dollar amounts in thousands, except per share data)			
Net income per diluted share	$ 0.33	$ 0.16	$ 0.60	$ 1.15
Premium revenue	$ 2,316,759	$ 1,584,656	$ 6,424,238	$ 4,583,818
Service revenue	$ 52,557	$ 51,100	$ 156,419	$ 150,528
Operating income	$ 39,779	$ 24,926	$ 96,473	$ 139,245
Net income	$ 16,070	$ 7,553	$ 28,645	$ 53,871
Total ending membership	2,404,000	1,942,000	2,404,000	1,942,000
Premium revenue	93.3%	93.9%	93.6%	93.9%
Service revenue	2.1	3.0	2.3	3.1
Premium tax revenue	3.2	2.6	2.9	2.6
Health insurer fee revenue	1.2	—	1.0	—
Investment income	0.1	0.2	0.1	0.1
Other revenue	0.1	0.3	0.1	0.3
Total revenue	100.0%	100.0%	100.0%	100.0%
Operating Statistics:				
Medical care ratio	90.6%	87.3%	89.6%	86.5%
Service revenue ratio	76.2%	78.5%	75.3%	79.2%
General and administrative expense ratio	7.2%	10.4%	8.2%	9.8%
Premium tax ratio	3.4%	2.7%	3.1%	2.7%
Operating income	1.6%	1.5%	1.4%	2.9%
Net income	0.6%	0.4%	0.4%	1.1%
Effective tax rate	34.4%	33.9%	46.4%	44.8%
Medical Claims Data:				
Days in claims payable, fee for service	50	41	50	41
Number of claims in inventory at end of period	315,900	137,100	315,900	137,100
Billed charges of claims in inventory at end of period	$ 749,300	$ 257,600	$ 749,300	$ 257,600
Claims in inventory per member at end of period	0.13	0.07	0.13	0.07
Billed charges of claims in inventory per member at end of period	$ 311.69	$ 132.65	$ 311.69	$ 132.65
Number of claims received during the period	7,062,100	5,227,000	19,703,300	15,751,500
Billed charges of claims received during the period	$ 7,897,500	$ 5,371,100	$ 21,506,500	$ 15,848,900

Non-GAAP Financial Measures

We use the following non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance and the performance of other companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not substitutes for or superior to, GAAP measures (GAAP stands for U.S. generally accepted accounting principles).

The first of these non-GAAP measures is earnings before interest, taxes, depreciation and amortization, or EBITDA. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to EBITDA.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(In thousands)			
Net income	$ 16,122	$ 7,569	$ 28,431	$ 62,055
Adjustments:				
Depreciation, and amortization of intangible assets and capitalized software	29,307	24,128	83,513	68,035
Interest expense	14,419	13,532	42,234	38,236
Income tax expense	8,439	3,962	24,436	33,745
EBITDA	$ 68,287	$ 49,191	$ 178,614	$ 202,071

The second of these non-GAAP measures is adjusted net income and adjusted net income per diluted share, continuing operations. The following tables reconcile net income and net income per diluted share from continuing operations, which we believe to be the most comparable GAAP measures, to adjusted net income and adjusted net income per diluted share, continuing operations.

	Three Months Ended September 30,			
	2014		2013	
	(In thousands, except diluted per-share amounts)			
Net income, continuing operations	$ 16,070	$ 0.33	$ 7,553	$ 0.16
Adjustments, net of tax:				
Depreciation, and amortization of capitalized software	15,275	0.31	11,821	0.25
Amortization of convertible senior notes and lease financing obligations	4,246	0.09	4,058	0.08
Stock-based compensation	1,739	0.04	7,010	0.15
Amortization of intangible assets	3,189	0.06	3,378	0.07
Change in fair value of derivatives, net	1	—	(1)	—
Adjusted net income, continuing operations	$ 40,520	$ 0.83	$ 33,819	$ 0.71

	Nine Months Ended September 30,			
	2014		2013	
	(In thousands, except diluted per-share amounts)			
Net income, continuing operations	$ 28,645	$ 0.60	$ 53,871	$ 1.15
Adjustments, net of tax:				
Depreciation, and amortization of capitalized software	42,887	0.89	33,375	0.71
Amortization of convertible senior notes and lease financing obligations	12,723	0.26	10,161	0.21
Stock-based compensation	10,960	0.23	17,026	0.36
Amortization of intangible assets	9,727	0.20	9,485	0.20
Change in fair value of derivatives, net	(5)	—	3,582	0.08
Adjusted net income, continuing operations	$ 104,937	$ 2.18	$ 127,500	$ 2.71

Analysis of Financial Results – Trends and Developments

Strong enrollment growth across all of our products (Medicaid, Medicare special needs plans and dual eligible Medicare-Medicaid Plans) generated almost $2 billion, or 40%, more premium revenue for the nine months ended September 30, 2014, when compared with the same period in 2013.

Despite an increase in medical care costs as a percentage of premium revenue (the medical care ratio), higher per-member per-month (PMPM) premiums produced an increase of 8.5%, or $52.5 million, in medical margin for the nine months ended September 30, 2014, when compared with the same period in 2013.

The medical care ratio increased substantially in 2014 as a result of three developments:

- Much of our revenue growth has come from participation in Medicaid programs covering long-term services and supports (LTSS). Percentage profit margins for LTSS benefits are generally lower than percentage profit margins for acute medical benefits. The addition of members eligible for LTSS benefits at the Florida and New Mexico health

plans, as well as members who have joined our California, Illinois, and Ohio health plans through participation in Medicare-Medicaid Plan implementations, added 1.2% to our consolidated medical care ratio in the third quarter of 2014, and 0.8% for the nine months ended September 30, 2014.

- Increases to our base premiums in recent years have not kept pace with medical cost trends.
- Lack of coordination in the design of profit caps and medical cost floors in some of our contracts is resulting in counterproductive outcomes. In some instances, givebacks due to profitable performance in one product cannot be offset against losses in other products.

  For example, at the Washington health plan, a minimum medical loss ratio requirement for the Medicaid expansion program reduced income from continuing operations before income taxes by approximately $17 million for the third quarter of 2014, and $23 million for the nine months ended September 30, 2014. Simultaneously, the Washington health plan incurred a medical care ratio in excess of 100% for its aged, blind or disabled members. However, the health plan is unable to offset profits from its Medicaid expansion contract against its other contracts. The Washington health plan is therefore left in a position where it must return profits under its Medicaid expansion contract to the state; while it receives no relief from losses incurred under another contract.

  In a similar manner, at the New Mexico health plan, a contract provision limiting profits on retroactively added members reduced income from continuing operations before income taxes by approximately $6 million for the nine months ended September 30, 2014. At the same time, the New Mexico health plan's LTSS program operated at a medical care ratio in excess of 100%.

We reported substantial improvements in administrative cost efficiency in 2014. General and administrative expenses as a percentage of revenue declined to 7.2% for the third quarter of 2014, from 10.4% for the same period in 2013, and to 8.2% for the nine months ended September 30, 2014, from 9.8% for the same period of 2013. Our general and administrative expense ratio has not been below 7.2% since the second quarter of 2009.

Health Insurer Fee Update

We previously reported that our results have been adversely affected by delays in reimbursement (including reimbursement for tax effects) of the HIF from California, Michigan, New Mexico, Texas and Utah.

During the third quarter, Michigan and Utah committed to reimbursement of the HIF, but not to the reimbursement of the related tax effects. However, both states have informally indicated that it is their desire to reimburse us for those tax effects. As a result of these developments, we were able to recognize an additional $11 million in HIF revenue (but not amounts related to tax effects) from Michigan and Utah during the third quarter of 2014.

Nevertheless, HIF not reimbursed by California, New Mexico and Texas, as well as tax effects not yet reimbursed by Michigan and Utah, reduced income from continuing operations before income taxes by approximately $6 million or $0.07 per diluted share, for the third quarter of 2014, and $37 million, or $0.49 per diluted share, for the nine months ended September 30, 2014 (per-share amounts for both periods on a GAAP and adjusted basis). While we remain guardedly optimistic that we will eventually secure reimbursement from all of our state partners, we no longer expect that all reimbursement will be secured prior to the close of 2014. Accordingly, we do not expect to recognize the full amount of revenue associated with reimbursement of the HIF payment during 2014.

The following table summarizes the status of HIF Medicaid revenue recognition for the nine months ended September 30, 2014:

	HIF Medicaid Revenue		
	Recognized	Required Reimbursement through Sept. 30, 2014	Not Recognized
	(In millions)		
Quarter 1	$ 16.6	$ 32.7	$ 16.1
Quarter 2	17.2	32.7	15.5
Quarter 3	27.0	32.7	5.7
Nine months ended September 30, 2014	$ 60.8	$ 98.1	$ 37.3

We have secured agreements allowing the recognition of approximately $20 million of HIF revenue in the fourth quarter of 2014. We have not yet secured agreements from the states of California, New Mexico, Texas, Michigan (tax effect not secured), and Utah (tax effect not secured). The total amount of HIF revenue for which agreements have not been secured is approximately $50 million for the full year of 2014.

Texas Health Plan Quality Revenue Update

Our non-recognition of a portion of the Texas health plan's quality revenue reduced income from continuing operations before income taxes by approximately $4 million, or $0.05 per diluted share, for the third quarter of 2014, and $18 million, or $0.23 per diluted share, for the nine months ended September 30, 2014 (per-share amounts for both periods on a GAAP and adjusted basis). Unless we receive clarification of the standards and full transparency on the calculations by which quality revenue is to be assessed by the state, we are unable to independently assess the Texas health plan's performance against those standards. As such, we are doubtful that we will be able to recognize the full amount of the Texas quality revenue in 2014.

The following table summarizes the status of Texas quality revenue recognition for the nine months ended September 30, 2014:

	Texas Quality Revenue		
	Recognized	Available	Not Recognized
	(In millions)		
Quarter 1	$ 2.6	$ 8.6	$ 6.0
Quarter 2	1.1	8.6	7.5
Quarter 3	4.6	8.8	4.2
Nine months ended September 30, 2014	$ 8.3	$ 26.0	$ 17.7

Washington Health Plan Settlement Update

As previously disclosed, we recorded a net decrease to premium revenue and income from continuing operations before income taxes of $11.2 million, or $0.14 per diluted share, in the third quarter of 2014 as a result of the settlements of three unrelated issues with the Washington Health Care Authority (HCA) that related to periods prior to 2014.

Income Tax Update

During the third quarter of 2014, the Internal Revenue Service (IRS) issued final regulations related to compensation deduction limitations applicable to certain health insurance issuers. Pursuant to these final regulations, we recognized a tax benefit during the third quarter of 2014 of approximately $7 million, or $0.15 per diluted share, for periods prior to the third quarter of 2014.

Full Year 2014 Update

We have previously disclosed issues relating to our inability to fully recognize HIF revenue and Texas quality revenue in 2014. These issues, along with medical care costs that are trending higher than we anticipated compared with our full-year estimate, and the impact of certain contractual provisions that limit our ability to retain profits, will adversely impact 2014 earnings. Accordingly, we now expect that our net income per diluted share, continuing operations, and adjusted net income per diluted share, continuing operations, may fall short of the low end of the ranges for those respective metrics as included in our previously issued 2014 guidance.

Results of Operations, Continuing Operations

Three Months Ended September 30, 2014 Compared with Three Months Ended September 30, 2013

Health Plans Segment

Premium Revenue

Premium revenue for the third quarter of 2014 increased 46% over the third quarter of 2013, due to a 24% increase in member months, and an 18% increase in revenue per member per month (PMPM). Membership increased primarily as a result of members added through Medicaid expansion and the startup of our South Carolina health plan. PMPM revenue increased due to proportionally higher per-member revenue associated with Medicaid expansion members and an increase in the number of chronically ill members we serve through our Medicare-Medicaid Plans and state Medicaid programs for the aged, blind or disabled.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended September 30,					
	2014			2013		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 1,469,765	$ 206.43	70.1%	$ 928,165	$ 161.39	67.1%
Pharmacy	337,150	47.35	16.1	237,073	41.22	17.1
Capitation	190,277	26.73	9.1	162,554	28.27	11.8
Direct delivery	24,863	3.49	1.1	9,612	1.67	0.7
Other	75,781	10.65	3.6	45,809	7.97	3.3
Total	$ 2,097,836	$ 294.65	100.0%	$ 1,383,213	$ 240.52	100.0%

Our consolidated medical care ratio increased to 90.6% in the third quarter of 2014, from 87.3% in the third quarter of 2013.

Individual Health Plan Analysis

California. Medical margin improved $39.3 million at the California health plan, when compared with the third quarter of 2013. This improvement was the result of higher enrollment—particularly as a result of 90,000 members added due to Medicaid expansion—and premium increases effective October 1, 2013 (2.5%), and July 1, 2014 (5.5%).

Florida. Although revenue increased nearly 60% in the third quarter of 2014 when compared to the third quarter of 2013, medical margin at the Florida health plan fell $5.2 million and the medical care ratio increased to 97.8% from 88.8% in the third quarter of 2013. Effective December 2013, the plan assumed risk for LTSS benefits for certain members. Although premium revenue for members receiving LTSS benefits is substantially higher than that earned for those receiving only medical benefits, the percentage margin for profit and administrative cost included in such premiums is much lower than for stand-alone medical benefits.

Additionally, as a result of the re-procurement undertaken by the Florida Agency for Health Care Administration (AHCA) as part of its Managed Medical Assistance program (MMA) starting in 2014, the Florida health plan transitioned many of its members to other health plans in the second quarter of 2014, and then added approximately 40,000 members in the third quarter of 2014, both from the addition of new service areas and through an acquisition. We customarily experience a short-term increase in the medical care ratio when we enroll new member populations. Therefore, while a portion of the higher medical care ratio we experienced in Florida during the third quarter of 2014 was related to reduced margins we expected as a result of the MMA program, we also believe that a portion of the higher medical care ratio is the result of the transition of new members into our Florida health plan. We believe the plan's medical care ratio will therefore decline during 2015.

Illinois. The medical care ratio for the Illinois health plan was 82.1% in the third quarter of 2014. The Illinois health plan served its first member effective September 2013 and its first Medicaid expansion members in August 2014.

Michigan. Financial performance at the Michigan health plan declined in the third quarter of 2014, when compared with the third quarter of 2013, primarily due to comparatively higher medical care ratios for the Medicaid expansion (new in 2014) and Medicare programs. The medical care ratio of the Michigan health plan increased to 85.1% for the third quarter of 2014, from 82.1% for the third quarter of 2013. The Michigan health plan added its first Medicaid expansion members during the second quarter of 2014, with enrollment of approximately 33,000 members as of September 30, 2014.

New Mexico. Financial performance at the New Mexico health plan declined in the third quarter of 2014, when compared with the third quarter of 2013. The medical care ratio increased to 93.5% in the third quarter of 2014, from 85.6% in the third quarter of 2013, primarily the result of the addition of Medicaid behavioral health and LTSS benefits effective January 1, 2014 (which are reimbursed at a higher medical care ratio than traditional medical benefits), and a return to more typical medical cost levels overall in 2014. The New Mexico health plan added approximately 50,000 Medicaid expansion members in 2014; as well as approximately 60,000 new members in a business combination effective August 1, 2013.

Ohio. The medical care ratio of the Ohio health plan decreased slightly to 86.9% for the third quarter of 2014, from 87.3% for the third quarter of 2013. The Ohio health plan added its first meaningful number of Medicaid expansion members during the second quarter of 2014, with enrollment of approximately 51,000 members as of September 30, 2014.

South Carolina. The medical care ratio for the South Carolina health plan was 78.0% in the third quarter of 2014. The South Carolina health plan served its first members effective January 2014, with enrollment of 118,000 members as of September 30, 2014.

Texas. The medical care ratio of the Texas health plan increased slightly to 90.9% in the third quarter of 2014, from 89.6% in the third quarter of 2013 due to a decrease in quality revenue as described above and an increase in amounts returned to the state under a profit-sharing agreement. Removing quality revenue and profit-sharing adjustments would have resulted in a medical care ratio at the Texas health plan of approximately 88% for the third quarter of 2014 and 90% for the third quarter of 2013.

Utah. Financial performance at the Utah health plan declined in the third quarter of 2014, when compared with the third quarter of 2013, due to deteriorating margins for both Medicaid and Medicare products. The medical care ratio of the Utah health plan increased to 95.6% in the third quarter of 2014, from 78.7% in the third quarter of 2013. We believe that medical care ratios below 80% are not sustainable over time.

Washington. Financial performance at the Washington health plan declined in the third quarter of 2014, when compared with the third quarter of 2013. The medical care ratio of the Washington health plan increased to 97.6% in the third quarter of 2014, from 86.3% in the third quarter of 2013, primarily due to the high cost of medical services relative to revenue for members served under the state's program for aged, blind, or disabled members; and to the $11.2 million net settlement with the HCA, as described above and in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 15, "Commitments and Contingencies." Removing the net HCA settlement would have resulted in a medical care ratio of approximately 94% for the third quarter of 2014. The Washington health plan added approximately 89,000 Medicaid expansion members in 2014.

Wisconsin. Financial performance at the Wisconsin health plan declined in the third quarter of 2014, when compared with the third quarter of 2013. The medical care ratio of the Wisconsin health plan increased to 88.8% in the third quarter of 2014, from 69.8% in the third quarter of 2013. We believe that medical care ratios below 80% are not sustainable over time.

Operating Data

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended September 30, 2014						
	Member Months (1)	Premium Revenue		Medical Care Costs		MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM		
California	1,451	$ 384,147	$ 264.79	$ 327,389	$ 225.66	85.2%	$ 56,758
Florida	243	106,275	437.47	103,898	427.69	97.8	2,377

	7,120	$ 2,316,759	$ 325.40	$ 2,097,836	$ 294.65	90.6%	$ 218,923

	Three Months Ended September 30, 2013						
	Member Months (1)	Premium Revenue		Medical Care Costs		MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM		
California	1,076	$ 184,235	$ 171.16	$ 166,774	$ 154.93	90.5%	$ 17,461
Florida	251	67,688	269.58	60,127	239.46	88.8	7,561
Illinois (3)	—	—	—	—	—	—	—
Michigan	641	174,706	272.65	143,498	223.95	82.1	31,208
New Mexico	435	130,318	299.19	111,599	256.21	85.6	18,719
Ohio	786	280,964	357.66	245,148	312.07	87.3	35,816
South Carolina	—	—	—	—	—	—	—
Texas	780	320,657	411.17	287,446	368.59	89.6	33,211
Utah	261	84,525	323.83	66,555	254.98	78.7	17,970
Washington	1,234	294,808	238.96	254,430	206.23	86.3	40,378
Wisconsin	287	39,676	138.36	27,694	96.58	69.8	11,982
Other (3)(4)	—	7,079	—	19,942	—	—	(12,863)
	5,751	$ 1,584,656	$ 275.55	$ 1,383,213	$ 240.52	87.3%	$ 201,443

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) The MCR represents medical costs as a percentage of premium revenue.
(3) The Illinois health plan's results prior to October 1, 2013, were insignificant and reported in "Other."
(4) "Other" medical care costs include primarily medically related administrative costs at the parent company, and direct delivery costs.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended September 30,	
	2014	2013
	(In thousands)	
Service revenue before amortization	$ 53,286	$ 51,829
Amortization recorded as reduction of service revenue	(729)	(729)
Service revenue	52,557	51,100
Cost of service revenue	40,067	40,113
General and administrative costs	1,791	1,708
Amortization of customer relationship intangibles recorded as amortization	794	1,282
Operating income	$ 9,905	$ 7,997

Operating income for our Molina Medicaid Solutions segment increased $1.9 million in the third quarter of 2014, compared with the third quarter of 2013, primarily the result of increased revenues due to higher Medicaid transaction volumes.

Results of Operations, Continuing Operations

Nine Months Ended September 30, 2014 Compared with Nine Months Ended September 30, 2013

Health Plans Segment

Premium Revenue

Premium revenue for the nine months ended September 30, 2014 increased 40% over the nine months ended September 30, 2013, due to a 21% increase in member months, and a 15% increase in revenue PMPM. The increase in member months was due to the addition of Medicaid expansion membership and the addition of Medicaid members at our South Carolina health plan, all effective January 1, 2014. Additionally, our New Mexico health plan added approximately 60,000 new members in a business combination effective August 1, 2013. PMPM revenue increased due to proportionally higher per member revenue associated with Medicaid expansion members and an increase in the number of chronically ill members we serve through our Medicare-Medicaid Plans and state Medicaid programs for the aged, blind, or disabled.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Nine Months Ended September 30,					
	2014			2013		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 4,028,863	$ 198.61	70.0%	$ 2,674,785	$ 160.14	67.5%
Pharmacy	919,374	45.32	16.0	691,903	41.42	17.4
Capitation	536,533	26.45	9.3	441,287	26.42	11.1
Direct delivery	69,947	3.45	1.2	27,739	1.66	0.7
Other	199,076	9.81	3.5	130,120	7.79	3.3
Total	$ 5,753,793	$ 283.64	100.0%	$ 3,965,834	$ 237.43	100.0%

Our consolidated medical care ratio increased to 89.6% in the nine months ended September 30, 2014, from 86.5% in the nine months ended September 30, 2013.

Individual Health Plan Analysis

California. Medical margin improved $114.6 million at the California health plan, when compared with the nine months ended September 30, 2013. This improvement was the result of the following:

- Higher enrollment, primarily as a result of Medicaid expansion;

- Premium increases effective October 1, 2013 (2.5%), and July 1, 2014 (5.5%); and
- Approximately $15 million benefit from recognition, in the second quarter of 2014, of certain premium revenue which related to the year ended December 31, 2013.

The California health plan served its first MMP members in 2014.

Florida. Although revenue increased over 65% for the nine months ended September 30, 2014 when compared to 2013, medical margin at the Florida health plan fell $3.6 million, and the medical care ratio increased to 92.8% from 86.0% in 2013. As noted above, the addition of members receiving LTSS benefits, and changes related to the state's transition to its MMA program reduced margins in 2014.

Illinois. The medical care ratio for the Illinois health plan was 91.8% in the nine months ended September 30, 2014. The plan served its first MMP members in 2014.

Michigan. The medical care ratio of the Michigan health plan decreased to 83.9% for the nine months ended September 30, 2014, from 84.9% for the nine months ended September 30, 2013.

New Mexico. Premium revenue at the New Mexico health plan increased 160% for the nine months ended September 30, 2014 compared to the same period in 2013. Premium revenue increased primarily as a result of the transfer of behavioral health and LTSS benefits to the health plan effective January 1, 2014, and significantly increased membership, as described above. Although medical margin improved in the nine months ended September 30, 2014, the medical care ratio increased to 90.4% from 84.3% for the nine months ended September 30, 2013. The higher medical care ratio was primarily the result of the addition of benefits as described above.

Ohio. The medical care ratio of the Ohio health plan increased to 85.7% for the nine months ended September 30, 2014, from 83.9% for the nine months ended September 30, 2013, primarily due to the increase in Medicaid expansion enrollment (which is incurring a medical care ratio in excess of the plan's traditional experience), and the initiation of the Ohio MMP.

South Carolina. The medical care ratio for the South Carolina health plan was 86.6% in the nine months ended September 30, 2014.

Texas. Financial performance at the Texas health plan declined in the nine months ended September 30, 2014, when compared with the nine months ended September 30, 2013, as described above. The medical care ratio of the Texas health plan increased to 91.7% in the nine months ended September 30, 2014, from 85.6% in the nine months ended September 30, 2013. Removing quality revenue and profit-sharing adjustments would have resulted in a medical care ratio at the Texas health plan of approximately 88% for the nine months ended September 30, 2014 and 86% for the nine months ended September 30, 2013.

Utah. The medical care ratio of the Utah health plan increased to 92.1% in the nine months ended September 30, 2014, from 81.5% in the nine months ended September 30, 2013, due to deteriorating margins for both Medicaid and Medicare products.

Washington. Financial performance at the Washington health plan declined in the nine months ended September 30, 2014, when compared with the nine months ended September 30, 2013. The medical care ratio of the Washington health plan increased to 93.2% in the nine months ended September 30, 2014, from 87.3% in the nine months ended September 30, 2013, primarily due to the high cost of medical services relative to revenue for members served under the state’s program for aged, blind, or disabled members; and to the net settlement with the HCA. Removing the net HCA settlement would have resulted in a medical care ratio of approximately 92% for the nine months ended September 30, 2014.

Wisconsin. The medical care ratio of the Wisconsin health plan increased to 84.5% in the nine months ended September 30, 2014, from 79.0% in the nine months ended September 30, 2013.

Operating Data

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Nine Months Ended September 30, 2014						
	Member Months (1)	Premium Revenue		Medical Care Costs		MCR (2)	Medical Margin

Other (3)(4)	—	12,563	—	49,705	—	—	(37,142)
	16,703	$ 4,583,818	$ 274.43	$ 3,965,834	$ 237.43	86.5%	$ 617,984

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) The MCR represents medical costs as a percentage of premium revenue.
(3) The Illinois health plan's results prior to October 1, 2013, were insignificant and reported in "Other."
(4) "Other" medical care costs include primarily medically related administrative costs at the parent company, and direct delivery costs.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Nine Months Ended September 30,	
	2014	2013
	(In thousands)	
Service revenue before amortization	$ 158,605	$ 152,714
Amortization recorded as reduction of service revenue	(2,186)	(2,186)
Service revenue	156,419	150,528
Cost of service revenue	117,831	119,188
General and administrative costs	5,432	6,849
Amortization of customer relationship intangibles recorded as amortization	2,562	3,846
Operating income	$ 30,594	$ 20,645

Operating income for our Molina Medicaid Solutions segment increased $9.9 million in the nine months ended September 30, 2014, compared with the nine months ended September 30, 2013, primarily the result of increased revenues due to higher Medicaid transaction volumes and lower general and administrative costs overall.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses decreased to 7.2% of total revenue for the third quarter of 2014, compared with 10.4% of total revenue for the third quarter of 2013. General and administrative expenses decreased to 8.2% of total revenue for the nine months ended September 30, 2014, compared with 9.8% of total revenue for the nine months ended September 30, 2013. The declines in the ratio of general and administrative expenses relative to total revenue for both periods in 2014 was primarily the result of improved leverage of fixed administrative expenses over higher total revenue.

Premium Tax Expense

Premium tax expense was 3.4% of premium revenue plus premium tax revenue in the third quarter of 2014, compared with 2.7% in the third quarter of 2013 and 3.1% of premium revenue plus premium tax revenue in the nine months ended September 30, 2014, compared with 2.7% in the nine months ended September 30, 2013. In June 2014, the state of Michigan instituted a 6% use tax on medical premiums. The state has agreed to fund this tax through rate increases; as a result, we recorded approximately $11 million and $20 million in additional premium revenue in the three and nine months ended September 30, 2014, respectively, as well as a corresponding premium tax payable.

Health Insurer Fee Revenue and Expenses

Refer to "Liquidity and Capital Resources—Financial Condition" below, for a comprehensive discussion of the HIF.

Depreciation and Amortization

The following tables present all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Three Months Ended September 30,			
	2014		2013	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 19,910	0.8%	$ 14,237	0.8%
Amortization of intangible assets, continuing operations	4,332	0.2	4,634	0.3
Depreciation and amortization, continuing operations	24,242	1.0	18,871	1.1
Amortization recorded as reduction of service revenue	729	—	729	—
Amortization recorded as cost of service revenue	8,839	0.4	4,528	0.3
Depreciation and amortization reported in the consolidated statements of cash flows	$ 33,810	1.4%	$ 24,128	1.4%

	Nine Months Ended September 30,			
	2014		2013	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 54,582	0.8%	$ 39,578	0.8%
Amortization of intangible assets, continuing operations	13,253	0.2	12,871	0.3
Depreciation and amortization, continuing operations	67,835	1.0	52,449	1.1
Depreciation and amortization, discontinued operations	—	—	2	—
Amortization recorded as reduction of service revenue	2,186	—	2,186	—
Amortization recorded as cost of service revenue	29,443	0.4	13,398	0.3
Depreciation and amortization reported in the consolidated statements of cash flows	$ 99,464	1.4%	$ 68,035	1.4%

Interest Expense

Interest expense increased to $14.4 million for the third quarter of 2014, from $13.5 million for the third quarter of 2013. Interest expense increased to $42.2 million for the nine months ended September 30, 2014, from $38.2 million for the nine months ended September 30, 2013 primarily due to lease financing transactions in the second quarter of 2013. Interest expense includes non-cash interest expense relating to the amortization of the discount on our long-term debt obligations, which amounted to $6.7 million and $6.4 million for the three months ended September 30, 2014, and 2013, respectively and $20.2 million and $16.1 million for the nine months ended September 30, 2014 and 2013, respectively.

Income Taxes

The provision for income taxes in continuing operations was recorded at an effective rate of 34.4% for the third quarter of 2014, compared with 33.9% for the third quarter of 2013, and 46.4% for the nine months ended September 30, 2014 compared with 44.8% for the nine months ended September 30, 2013.

During the third quarter of 2014, the Internal Revenue Service (IRS) issued final regulations related to compensation deduction limitations applicable to certain health insurance issuers. Pursuant to these final regulations, we recognized a tax benefit during the third quarter of 2014 of approximately $7 million, or $0.15 per diluted share, for periods prior to the third quarter of 2014.

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of September 30, 2014, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income was $5.6 million for the nine months ended September 30, 2014, compared with $4.9 million for the nine months ended September 30, 2013. Our annualized portfolio yield for the nine months ended September 30, 2014 and 2013 was 0.4%.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Liquidity

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Nine Months Ended September 30,		
	2014	2013	Change
	(In thousands)		
Net cash provided by operating activities	$ 841,198	$ 111,744	$ 729,454
Net cash used in investing activities	(261,280)	(541,416)	280,136
Net cash provided by financing activities	82,783	490,458	(407,675)
Net increase in cash and cash equivalents	$ 662,701	$ 60,786	$ 601,915

Operating Activities. Cash provided by operating activities increased $729.5 million year over year, primarily due to the change in medical claims and benefits payable, which increased $315.9 million in connection with our membership growth in the nine months ended September 30, 2014, as described above in "Results of Operations." Additionally, accrued liabilities increased $293.4 million due to a significant increase in amounts accrued for medical cost floor contract provisions, primarily at our Washington health plan. Finally, deferred revenue increased $86.1 million primarily due to the advanced receipt of premiums at our Washington health plan. Both accrued liabilities and deferred revenue had much less significant comparable activity in 2013.

Investing Activities. Cash used in investing activities in the nine months ended September 30, 2014 decreased to $261.3 million, from $541.4 million in the same period of 2013. The year-over-year decrease was primarily due to significant purchases of investments, net of sales and maturities, amounting to $400.2 million in the nine months ended September 30, 2013. Such

significant purchases of investments were a result of the investment of proceeds from the issuance of our 1.125% Notes in February 2013.

Financing Activities. Cash provided by financing activities in the nine months ended September 30, 2014 related primarily to $123.4 million net proceeds we received from our offering of 1.625% Notes in the third quarter of 2014, partially offset by the settlement of $50.3 million of contingent consideration liabilities relating to our 2013 South Carolina health plan acquisition in the first half of 2014. Financing activities generated net cash of $490.5 million in the nine months ended September 30, 2013, primarily due to the issuance of the 1.125% Notes and related financing transactions in February 2013.

Financial Condition

On a consolidated basis, at September 30, 2014, we had working capital of $1,051.4 million compared with $745.7 million at December 31, 2013. At September 30, 2014, and December 31, 2013, we had cash and investments, including restricted investments, of $2,541.3 million, and $1,712.9 million, respectively. We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Health Insurer Fee. One notable provision of the ACA is an excise tax or annual fee that applies to most health plans, including commercial health plans and Medicaid managed care plans like Molina Healthcare. While characterized as a "fee" in the text of the ACA, the intent of Congress was to impose a broad-based health insurance industry excise tax, with the understanding that the tax could be passed on to consumers, most likely through higher commercial insurance premiums.

However, because Medicaid is a government–funded program, Medicaid health plans have no alternative but to look to their respective state partners for payment to offset the impact of this tax. Additionally, when states reimburse us for the amount of the HIF, that reimbursement will itself be subject to income tax, the HIF, and applicable state premium taxes. Our 2014 HIF assessment amounted to $88.6 million, which was paid in September 2014. Because this amount is not deductible for income tax purposes, our net income is reduced by the full amount of the assessment. As indicated in the table below, states will need to pay us an incremental amount of approximately $131 million during 2014 to account for the HIF and the absence of its tax deductibility.

We have not yet secured agreements from the states of California, New Mexico, Texas, Michigan (tax effect not secured), and Utah (tax effect not secured). The total amount of HIF revenue for which agreements have not been secured is approximately $50 million for the full year of 2014.

We continue to work with our state partners to obtain reimbursement for the full economic impact of the excise tax. If we are unable to obtain either premium increases or direct reimbursements to offset the impact of the tax on a fully grossed up basis, our business, financial condition, cash flows or results of operations could be materially adversely affected.

The following table provides the details of our HIF revenue reimbursement by health plan to date in 2014 (in thousands):

	Three Months Ended			Nine Months Ended Sept. 30, 2014	Required ACA HIF Reimbursement through Dec. 31, 2014
	March 31, 2014	June 30, 2014	Sept. 30, 2014		
			Gross (1)		
California	$ —	$ —	$ —	$ —	$ 11,616
Florida	1,416	1,473	1,487	4,376	5,835
Illinois	40	42	40	122	162
Michigan	—	—	8,011	8,011	17,471
New Mexico	—	—	—	—	11,322
Ohio	7,791	8,117	6,912	22,820	30,426
Texas	—	—	—	—	18,518
Utah	—	—	3,000	3,000	5,332
Washington	6,229	6,489	6,217	18,935	25,246
Wisconsin	1,080	1,126	1,372	3,578	4,771
Medicaid	16,556	17,247	27,039	60,842	130,699
Medicare	2,892	3,199	3,068	9,159	12,212
	$ 19,448	$ 20,446	$ 30,107	$ 70,001	$ 142,911

(1) Amounts in the table include the full economic impact of the excise tax including premium tax and the income tax effect.

Regulatory Capital and Dividend Restrictions

For information on our regulatory capital requirements and dividend restrictions, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 15, "Commitments and Contingencies."

Future Sources and Uses of Liquidity

For information on our debt instruments, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Long-Term Debt."

For information on our shelf registration statement and our securities repurchase program, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 13, "Stockholders' Equity."

Contractual Obligations

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2013, was disclosed in our 2013 Annual Report on Form 10-K. We have experienced significant changes in certain categories of contractual obligations since that date. Therefore, in the table below, we present our contractual obligations as of September 30, 2014. Some of the amounts included in this table are based on management's estimates and assumptions about these obligations, including their duration, the possibility of renewal, anticipated actions by third parties, and other factors. Because these estimates and assumptions are necessarily subjective, the contractual obligations we will actually pay in future periods may vary from those reflected in the table. Amounts are in thousands.

	Total	2014	2015-2016	2017-2018	2019 and Beyond
Significant changes from December 31, 2013: (1)					
Medical claims and benefits payable (2)	$ 1,123,846	$ 1,123,846	$ —	$ —	$ —
Principal amount of convertible senior notes (3)	862,000	10,449	—	—	851,551
Amounts due under various contractual provisions (4)	297,083	297,083	—	—	—
Interest (coupon) on long-term debt (3)	179,176	2,772	22,175	22,175	132,054
Contingent consideration liability (5)	1,500	1,500	—	—	—
No significant changes from December 31, 2013: (6)					
Lease financing obligations	392,021	11,065	23,136	24,545	333,275
Operating leases	109,038	29,117	39,086	27,266	13,569
Lease financing obligations - related party	84,974	3,330	14,018	15,088	52,538
Purchase commitments	27,522	21,548	5,974	—	—
Total contractual obligations	$ 3,077,160	$ 1,500,710	$ 104,389	$ 89,074	$ 1,382,987

(1) These categories of contractual obligations have changed significantly since December 31, 2013. The amounts presented represent the remaining obligation for 2014 as of September 30, 2014.

(2) Increase due to significantly increased membership in 2014, as described further in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 10, "Medical Claims and Benefits Payable," and Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

(3) Increases due to our third quarter 2014 issuance of 1.625% Convertible Senior Notes due 2044 (1.625% Notes), including an exchange transaction, as described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Long-Term Debt." The 1.625% Notes have a contractual maturity date in 2044; however, on specified dates beginning in 2018, holders of the 1.625% Notes may require us to repurchase some or all of the 1.625% Notes.

(4) Represents amounts due under various contractual provisions that may adjust or limit revenue or profit, as discussed in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies." The increase is primarily driven by contractual provisions relating to the Medicaid expansion program, which began to phase in effective January 1, 2014.

(5) Decrease due to settlement of contingent consideration liabilities during 2014 as described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 4, "Business Combinations."

(6) Amounts presented reflect the amounts reported in our 2013 Annual Report on Form 10-K because there have been no significant changes since that date.

Critical Accounting Estimates

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 10, "Medical Claims and Benefits Payable," for a table which presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements.
- *Health Plans segment contractual provisions that may adjust or limit revenue or profit*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the third quarter of 2014 in connection with such contractual provisions.
- *Health Plans segment quality incentives*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the third quarter of 2014 in connection with such quality incentives.
- *Molina Medicaid Solutions segment revenue and cost recognition*.

There have been no significant changes during the nine months ended September 30, 2014, to the items that we disclosed as our critical accounting estimates in our discussion and analysis of financial condition and results of operations in our Annual Report on Form 10-K for the year ended December 31, 2013.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC, a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended September 30, 2014 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

A description of our legal proceedings is included in and incorporated by reference to Note 15 of the Notes to the Consolidated Financial Statements contained in Part I, Item 1 of this report.

Item 1A. Risk Factors

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in Part I, Item 1A – Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2013. The risk factors described herein and in our 2013 Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition, cash flows, or results of operations.

There have been no material changes to the risk factors disclosed in our 2013 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Share repurchase activity during the three months ended September 30, 2014 was as follows:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (b)
July 1 - July 31	276	$ 46.10	—	$ 47,338,505
August 1 - August 31	2,108	$ 41.19	—	$ 47,338,505
September 1 - September 30	897	$ 47.84	—	$ 47,338,505
Total	3,281	$ 43.42	—	

(a) During the three months ended September 30, 2014, we withheld 3,281 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

(b) Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50.0 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This repurchase program extends through December 31, 2014.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.

Item 6. Exhibits

Reference is made to the accompanying Index to Exhibits.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended September 30, 2014 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Dated: October 30, 2014

/s/ Joseph M. Molina, M.D.

Joseph M. Molina, M.D.

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, John C. Molina, J.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended September 30, 2014 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
June 30, 2014

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. As of June 30, 2014, these health plans served approximately 2.3 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve a small number of Health Insurance Marketplaces (Marketplaces) members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in California.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal in 2012, and effective June 2013 the transition obligations associated with that contract terminated. Therefore, beginning in the second quarter of 2013, we classified the operations for our Missouri health plan as discontinued operations for all periods presented in our consolidated financial statements.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2014.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2013. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2013 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2013 audited consolidated financial statements.

Reclassifications

We have reclassified certain amounts in the 2013 consolidated statements of income to conform to the 2014 presentation of separately presenting premium tax revenue and premium revenue.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates and fall into two categories:

(1) Contractual provisions that may adjust or limit revenue or profit:

Health Plan Medical Cost Floors (Minimums), Medical Cost Corridors, and Administrative Cost Ceilings (Maximums): A portion of certain Medicaid, Medicare, and Marketplaces premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs. In some cases, the health plans may receive additional premiums if amounts spent on medical care costs exceed a defined maximum threshold. In the aggregate, we recorded a liability under the terms of such contract provisions of $80.6 million and $1.4 million at June 30, 2014, and December 31, 2013, respectively. The increase is driven by contractual provisions relating to Medicaid expansion populations, which began to phase in during January 2014. Separately, in certain states we may be levied with non-monetary sanctions if certain minimum amounts are not spent on defined medical care costs, or if administrative costs exceed certain amounts.

Health Plan Profit Sharing and Profit Ceiling: Our contracts with the states of New Mexico, Texas, and Washington contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage, in some cases in accordance with a tiered rebate schedule. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. As a result of profits in excess of the amount we are allowed to fully retain, we recorded a liability of $19.2 million and $2.5 million at June 30, 2014 and December 31, 2013, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services (CMS), our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of $34.1 million and $20.8 million for anticipated Medicare risk adjustment premiums at June 30, 2014, and December 31, 2013, respectively.

(2) Quality incentives:

At our California, Illinois, New Mexico, Ohio, Texas, Washington and Wisconsin health plans, revenue ranging from approximately 1.00% to 5.00% of health plan premiums is earned if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the periods presented and in prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of June 30, 2014 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of June 30, 2014.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(In thousands)			
Maximum available quality incentive premium - current period	$ 24,300	$ 20,496	$ 44,464	$ 41,111
Amount of quality incentive premium revenue recognized in current period:				
Earned current period	$ 12,717	$ 17,297	$ 18,014	$ 32,193
Earned prior periods	3,582	3,849	3,204	10,561
Total	$ 16,299	$ 21,146	$ 21,218	42,754
Total premium revenue recognized for state health plans with quality incentive premiums	$ 1,708,808	$ 711,251	$ 3,187,069	$ 1,420,634

We recognized a benefit of approximately $25 million from the recognition in the second quarter of 2014 of certain premium revenues of which $15 million related to the year ended December 31, 2013, and $5 million related to the first quarter of 2014.

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid management information system (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we generally recognize revenue associated with such contracts on a straight-line basis over the original contract term during which BPO, hosting, and support and maintenance services are delivered. There may be certain contractual provisions containing contingencies, however that require us to delay recognition of all or part of our service revenue until such contingencies have been removed.

Cost of service revenue consists primarily of the costs incurred to provide BPO and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs. In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes, nondeductible health insurer fee expenses, nondeductible compensation and other general and administrative expenses. The effective tax rate may be subject to fluctuations during the year, particularly as a result of the mathematical impact of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $2.0 million and $8.0 million as of June 30, 2014 and December 31, 2013, respectively. The unrecognized tax benefits recorded at December 31, 2013 decreased by $6.0 million during the six months ended June 30, 2014 as a result of the execution of a state settlement agreement. This decrease had a nominal impact to the tax provision for the six months ended June 30, 2014. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $1.8 million and $5.7 million as of June 30, 2014 and December 31, 2013, respectively. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $0.2 million due to the expiration of statute of limitations.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of June 30, 2014 and December 31, 2013, we had accrued $0.08 million for the payment of interest and penalties.

During the three months ended June 30, 2014 and 2013, we recognized tax expense of $0.1 million and tax benefits of $10.0 million, respectively, related to discontinued operations. During the six months ended June 30, 2014 and 2013, we recognized tax benefits related to discontinued operations of $0.4 million and $10.1 million, respectively.

New Accounting Standards

Health Insurer Fee. In the first quarter of 2014, we adopted the guidance of the Financial Accounting Standards Board (FASB) related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively, the Affordable Care Act, or ACA). The ACA imposes an annual fee, or excise tax, on health insurers for each calendar year beginning on or after January 1, 2014. The health insurer fee (HIF) is imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year, and is payable on September 30 of each year.

Effective January 1, 2014, we recorded our estimate of the 2014 liability to accounts payable and accrued liabilities. As of June 30, 2014, we expect the liability to amount to $88.3 million. We are recognizing this expense on a straight-line basis in

2014, and recorded $21.9 million and $44.1 million to health insurer fee expenses in the three months and six months ended June 30, 2014, respectively. As enacted, this federal premium-based assessment is non-deductible for income tax purposes.

Because we primarily serve individuals in government-sponsored programs, we must secure additional reimbursement from our state partners for this added cost. We recognize health insurer fee revenue when we have obtained a contractual commitment from a state to reimburse us for the full economic impact of the health insurer fee, including the effect of premium tax and federal non-deductibility. Such health insurer fee revenue is recognized ratably throughout the year.

Revenue Recognition. In May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09 - *Revenue from Contracts with Customers*, which will supersede nearly all existing revenue recognition guidance under U.S. generally accepted accounting principles (GAAP). The core principal of this ASU is that an entity should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. This ASU will be effective for us in our first quarter of 2017. Early adoption is not permitted. The ASU allows for either full retrospective or modified retrospective adoption. We are evaluating the transition method that will be elected and the potential effects of the adoption of this ASU on our financial statements.

Discontinued Operations. In April 2014, the FASB issued ASU 2014-08 - *Reporting Discontinued Operations and Disclosures of Disposal of Components of an Entity*, which raises the threshold for disposals to qualify as discontinued operations by focusing on strategic shifts that have or will have a major effect on an entity's operations and financial results. The guidance allows companies to have significant continuing involvement and continuing cash flows with the disposed component. The standard requires additional disclosures for discontinued operations and new disclosures for individually material disposal transactions that do not meet the definition of a discontinued operation. This ASU will be effective for us in our first quarter of 2015. The ASU is applied prospectively. Early adoption is permitted but only for disposals (or classifications as held for sale) that have not been reported in financial statements previously issued or available for issue. We are evaluating the potential effects of the adoption of the ASU on our financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the Securities and Exchange Commission did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(In thousands)			
Shares outstanding at the beginning of the period	46,263	45,415	45,871	46,762
Weighted-average number of shares repurchased	—	—	—	(1,248)
Weighted-average number of shares issued	16	31	279	198
Denominator for basic net income per share	46,279	45,446	46,150	45,712
Dilutive effect of employee restricted stock awards and stock options	361	378	527	488
Dilutive effect of 3.75% Notes	1,363	683	1,147	306
Denominator for diluted net income per share	48,003	46,507	47,824	46,506
Potentially dilutive amounts excluded from calculations:				
Stock options	—	60	45	43
1.125% Warrants (1)	13,490	13,490	13,490	10,434

(1) Potentially dilutive shares issuable pursuant to our 1.125% Warrants (defined in Note 12, "Derivative Financial Instruments") were not included in the computation of diluted net income per share because to do so would have been anti-dilutive.

4. Business Combinations

Health Plans Segment

South Carolina. In July 2013, we entered into an agreement with Community Health Solutions of America, Inc. (CHS) to acquire certain assets, including the rights to convert certain of CHS' Medicaid members covered by South Carolina's full-risk Medicaid managed care program. The conversion conditions under the agreement were satisfied by January 1, 2014, and on that date such Medicaid members were converted to the managed care program and enrolled with our South Carolina health plan. Because the number of Medicaid members we would ultimately convert was unknown as of the acquisition date in 2013, we recorded a contingent consideration liability for members we expected to enroll until the final purchase price was settled in the second quarter of 2014. The total purchase price for the converted Medicaid membership amounted to $57.2 million, of which $49.7 million was paid in the first half of 2014, and $7.5 million was paid when the agreement was executed in 2013. The total amount paid includes indemnification withhold funds transferred to restricted investments amounting to $5.7 million. If unused, such indemnification funds will become unrestricted on the one-year anniversary date of the conversion, or January 1, 2015.

As part of this transaction, we have also recorded a contingent consideration liability for dual-eligible members we expect to enroll in our Medicare-Medicaid Plan (MMP) implementation in South Carolina. The contingent consideration liability is remeasured to fair value at each quarter until the contingency is resolved with fair value adjustments, if any, recorded to operations. As of June 30, 2014, the fair value of the remaining contingent consideration liability for the MMP implementation amounted to $3.0 million.

The aggregate contingent consideration liability fair value adjustments for the South Carolina transaction have resulted in a gain of $2.7 million in the six months ended June 30, 2014.

New Mexico. In August 2013, our New Mexico health plan acquired the Lovelace Community Health Plan's contract for the state of New Mexico's Medicaid program. In addition to Lovelace's Medicaid members, we also added membership previously covered under New Mexico's State Coverage Insurance (SCI) program with Lovelace. Effective January 1, 2014, these SCI members were either a) enrolled in New Mexico's Medicaid program, or b) eligible to enroll in New Mexico's Marketplace.

Because the number of SCI members we would ultimately retain was unknown as of the acquisition date in 2013, we recorded a contingent consideration liability for such members until the final purchase price was settled in the second quarter of 2014. The aggregate contingent consideration liability fair value adjustments for the New Mexico transaction have resulted in a gain of $1.5 million in the six months ended June 30, 2014.

5. Stock-Based Compensation

In March 2014, our named executive officers were granted a total of 356,292 restricted shares with service, market, and performance conditions. In the event the vesting conditions are not achieved, the awards will lapse. As of June 30, 2014, we expect the performance conditions to be met in full.

Charged to general and administrative expenses, total stock-based compensation expense was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(In thousands)			
Restricted stock and performance awards	$ 4,214	$ 7,111	$ 8,822	$ 10,959
Employee stock purchase plan and stock options	646	618	1,634	1,191
	$ 4,860	$ 7,729	$ 10,456	$ 12,150

As of June 30, 2014, there was $33.3 million of total unrecognized compensation expense related to unvested restricted stock awards, including those with performance conditions, which we expect to recognize over a remaining weighted-average period of 2.2 years. Also as of June 30, 2014, there was $0.4 million of total unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 1.6 years.

Restricted and performance stock activity for the six months ended June 30, 2014 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2013	1,299,852	$ 29.03
Granted	643,852	36.49
Vested	(574,708)	27.35
Forfeited	(37,594)	30.18
Unvested balance as of June 30, 2014	1,331,402	33.33

The total fair value of restricted and performance awards granted during the six months ended June 30, 2014 and 2013 was $23.5 million and $33.1 million, respectively. The total fair value of restricted awards, including those with performance and market conditions, vested during the six months ended June 30, 2014 and 2013 was $21.5 million and $16.2 million, respectively.

Stock option activity for the six months ended June 30, 2014 is summarized below:

	Options	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Outstanding as of December 31, 2013	379,221	$ 24.14		
Exercised	(81,300)	23.37		
Outstanding as of June 30, 2014	297,921	24.35	$ 6,041	3.4
Stock options exercisable and expected to vest as of June 30, 2014	297,921	24.35	$ 6,041	3.4
Exercisable as of June 30, 2014	262,921	23.16	$ 5,644	2.8

6. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, other assets, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities (excluding contingent consideration) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs

Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs

Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit that are classified as current investments in the accompanying consolidated balance sheets. Such investments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs

Derivative financial instruments. Derivative financial instruments include the 1.125% Call Option derivative asset and the embedded cash conversion option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of June 30, 2014 included our common stock price, time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 12, “Derivative Financial

Instruments," the 1.125% Call Option asset and the embedded cash conversion option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of income. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

Contingent consideration liability. Such liability relates to our South Carolina health plan acquisition described in Note 4, "Business Combinations," and is recorded in accounts payable and accrued liabilities. We applied discounted cash flow analysis to determine the fair value of this liability. Significant unobservable inputs primarily related to the probability weighted present values of the purchase price estimate for the projected membership.

Auction rate securities. Auction rate securities are designated as available-for-sale and are reported at fair value. To estimate the fair value of these securities we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of June 30, 2014.

Our financial instruments measured at fair value on a recurring basis at June 30, 2014, were as follows:

	Total	Level 1	Level 2	Level 3
	(In thousands)			
Corporate debt securities	$ 484,437	$ —	$ 484,437	$ —
Municipal securities	96,898	—	96,898	—
GSEs	71,499	71,499	—	—
U.S. treasury notes	37,026	37,026	—	—
Certificates of deposit	51,014	—	51,014	—
Auction rate securities	11,025	—	—	11,025
1.125% Call Option derivative asset	250,160	—	—	250,160
Total assets measured at fair value on a recurring basis	$ 1,002,059	$ 108,525	$ 632,349	$ 261,185
Embedded cash conversion option derivative liability	$ 250,038	$ —	$ —	$ 250,038
Contingent consideration liability	3,000	—	—	3,000
Total liabilities measured at fair value on a recurring basis	$ 253,038	$ —	$ —	$ 253,038

Our financial instruments measured at fair value on a recurring basis at December 31, 2013, were as follows:

	Total	Level 1	Level 2	Level 3
	(In thousands)			
Corporate debt securities	$ 449,772	$ —	$ 449,772	$ —
Municipal securities	113,330	—	113,330	—
GSEs	68,817	68,817	—	—
U.S. treasury notes	37,376	37,376	—	—
Certificates of deposit	33,757	—	33,757	—
Auction rate securities	10,898	—	—	10,898
1.125% Call Option derivative asset	186,351	—	—	186,351
Total assets measured at fair value on a recurring basis	$ 900,301	$ 106,193	$ 596,859	$ 197,249
Embedded cash conversion option derivative liability	$ 186,239	$ —	$ —	$ 186,239
Contingent consideration liabilities	57,548	—	—	57,548
Total liabilities measured at fair value on a recurring basis	$ 243,787	$ —	$ —	$ 243,787

The following table presents activity relating to our assets (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	Change in Level 3 Instruments		
	Auction Rate Securities	Derivatives, Net	Contingent Consideration Liabilities
	(In thousands)		
Balance at December 31, 2013	$ 10,898	$ 112	$ (57,548)
Total gains for the period recognized in:			
General and administrative expenses	—	—	4,199
Other expenses, net	—	10	—
Other comprehensive income	127	—	—
Settlements	—	—	50,349
Balance at June 30, 2014	$ 11,025	$ 122	$ (3,000)

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our convertible senior notes, which are classified as Level 2 financial instruments, are indicated in the following table. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

	June 30, 2014				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
1.125% Notes	$ 425,709	$ 687,819	$ —	$ 687,819	$ —
3.75% Notes	185,258	269,905	—	269,905	—
	$ 610,967	$ 957,724	$ —	$ 957,724	$ —

	December 31, 2013				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
1.125% Notes	$ 416,368	$ 572,627	$ —	$ 572,627	$ —
3.75% Notes	181,872	219,491	—	219,491	—
	$ 598,240	$ 792,118	$ —	$ 792,118	$ —

7. Investments

The following tables summarize our investments as of the dates indicated:

	June 30, 2014			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 484,130	$ 563	$ 256	$ 484,437
Municipal securities	96,763	278	143	96,898
GSEs	71,522	25	48	71,499
U.S. treasury notes	36,992	51	17	37,026
Certificates of deposit	51,027	2	15	51,014
Subtotal - current investments	740,434	919	479	740,874
Auction rate securities	11,400	—	375	11,025
	$ 751,834	$ 919	$ 854	$ 751,899

	December 31, 2013			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 450,162	$ 442	$ 832	$ 449,772
Municipal securities	114,126	119	915	113,330
GSEs	68,898	6	87	68,817
U.S. treasury notes	37,360	44	28	37,376
Certificates of deposit	33,756	2	1	33,757
Subtotal - current investments	704,302	613	1,863	703,052
Auction rate securities	11,400	—	502	10,898
	$ 715,702	$ 613	$ 2,365	$ 713,950

The contractual maturities of our investments as of June 30, 2014 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 328,339	$ 328,437
Due one year through five years	412,095	412,437
Due after ten years	11,400	11,025
	$ 751,834	$ 751,899

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Net realized investment gains for the three and six months ended June 30, 2014 and 2013 were insignificant.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at June 30, 2014 and December 31, 2013, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of June 30, 2014:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(Dollars in thousands)					
Corporate debt securities	$ 139,464	$ 155	74	$ 22,928	$ 101	7
Municipal securities	25,715	49	18	13,877	94	15
GSEs	27,136	24	9	6,009	24	6
U.S. treasury notes	6,971	14	5	4,276	3	2
Certificates of deposit	14,977	15	55	—	—	—
Auction rate securities	—	—	—	11,025	375	15
	$ 214,263	$ 257	161	$ 58,115	$ 597	45

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of December 31, 2013:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(Dollars in thousands)					
Corporate debt securities	$ 210,057	$ 802	91	$ 2,540	$ 30	3
Municipal securities	30,715	398	49	31,091	517	39
GSEs	53,308	87	21	—	—	—
U.S. treasury notes	12,037	28	11	—	—	—
Certificates of deposit	414	1	2	—	—	—
Auction rate securities	—	—	—	10,898	502	15
	$ 306,531	$ 1,316	174	$ 44,529	$ 1,049	57

Auction Rate Securities. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not

been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 17 years to 32 years. Considering the relative insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction rate securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at June 30, 2014. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $70.7 million of these instruments at par value.

For the six months ended June 30, 2014 and 2013, we recorded pretax unrealized gains of $0.1 million and $0.4 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future impairment is other-than-temporary, we will record a charge to earnings as appropriate.

8. Receivables

Receivables consist primarily of amounts due from the various states in which we operate, which may be subject to potential retroactive adjustments. Because all of our receivable amounts are readily determinable and substantially all of our creditors are state governments, our allowance for doubtful accounts is immaterial.

	June 30, 2014	December 31, 2013
	(In thousands)	
California	$ 221,336	$ 148,654

	$ 473,514	$ 298,935

9. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by state authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. Additionally, in connection with the Molina Medicaid Solutions contract with the state of Maine, we maintain restricted investments as collateral for a letter of credit. The following table

presents the balances of restricted investments:

	June 30, 2014	December 31, 2013
	(In thousands)	
California	$ 373	$ 373
Florida	23,620	9,242
Illinois	310	310
Michigan	1,014	1,014
New Mexico	26,628	24,622
Ohio	12,718	9,080
South Carolina	6,037	310
Texas	3,500	3,500
Utah	3,601	3,301
Washington	151	151
Other	1,487	886
Total Health Plans segment	79,439	52,789
Molina Medicaid Solutions segment	5,001	10,304
	$ 84,440	$ 63,093

The contractual maturities of our held-to-maturity restricted investments as of June 30, 2014 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 83,840	$ 83,851
Due one year through five years	600	601
	$ 84,440	$ 84,452

10. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	June 30, 2014	December 31, 2013
	(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 697,038	$ 424,173
Pharmacy payable	54,935	45,037
Capitation payable	29,560	20,267
Other	142,649	180,310
	$ 924,182	$ 669,787

"Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. Non-risk provider payables amounted to $68.3 million and $151.3 million as of June 30, 2014 and December 31, 2013, respectively.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts displayed for “Components of medical care costs related to: Prior periods” represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Six Months Ended June 30, 2014	Year Ended December 31, 2013
	(Dollars in thousands)	
Balances at beginning of period	$ 669,787	$ 494,530
Components of medical care costs related to:		
Current period	3,693,730	5,434,443
Prior period	(37,131)	(52,779)
Total medical care costs	3,656,599	5,381,664
Change in non-risk provider payables	(83,044)	111,267
Payments for medical care costs related to:		
Current period	2,891,174	4,932,195
Prior period	427,986	385,479
Total paid	3,319,160	5,317,674
Balances at end of period	$ 924,182	$ 669,787
Benefit from prior period as a percentage of:		
Balance at beginning of period	5.5%	10.7%
Premium revenue, trailing twelve months	0.5%	0.9%
Medical care costs, trailing twelve months	0.6%	1.0%

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate – we only know when the circumstances for any one or more factors are out of the ordinary.

As indicated above, the amounts ultimately paid out on our liabilities in fiscal years 2014 and 2013 were less than what we had expected when we had established our reserves. For example, for the year ended December 31, 2013, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2012 by 10.7%. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

While prior period development of our estimate as of December 31, 2013 through June 30, 2014 has been favorable by $37.1 million, that amount is substantially less than the favorable prior period development of $52.8 million that we recognized in all of 2013. Furthermore, favorable development through June 30, 2014 was less than the 8% to 10% we typically expect.

In estimating our claims liability at June 30, 2014, we adjusted our base calculation to take account of the numerous factors that we believe will likely change our final claims liability amount. We believe the most significant among those factors are:

- Since January 1, 2014, we have added approximately 232,300 members under Medicaid expansion. Because these members have different demographics than our current members and are transitioning into managed are, we have little insight into their utilization of medical services. Additionally, as of June 30, 2014, we have relatively little medical claims payment history related to these members. Accordingly, our estimates of our liability are subject to a high degree of uncertainty.
- Since January 1, 2014, we have added approximately 119,000 new members at our South Carolina health plan. Because we have only six months of claims payment history, the reserves are more subject to change than usual.

- At our Texas health plan, we have recorded reserves to cover estimated liabilities for potential payment of additional claims where the initial claim payments were disputed by the providers. The actual additional payments may differ from the amount we have reserved.
- At our New Mexico health plan, the state has been adding 10,000 to 15,000 members per month on a retroactive basis since March, 2014. Because we have no claims payment history for these members, our estimates of our liability are subject to a high degree of uncertainty.

The use of a consistent methodology in estimating our liability for medical claims and benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2013, and for the six months ended June 30, 2014, the absence of adverse development of the liability for medical claims and benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both periods, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the replenishment of reserves in the respective periods generally offset the benefit from the prior period.

11. Long-Term Debt

As of June 30, 2014, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2014	2015	2016	2017	2018	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
3.75% Notes	187,000	187,000	—	—	—	—	—
	$ 737,000	$ 187,000	$ —	$ —	$ —	$ —	$ 550,000

1.125% Cash Convertible Senior Notes due 2020. In February 2013, we issued $550.0 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020 (the 1.125% Notes), which were outstanding as of June 30, 2014 and December 31, 2013. Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 of each year, at a rate of 1.125% per annum, and commenced on July 15, 2013. The 1.125% Notes will mature on January 15, 2020 unless repurchased or converted in accordance with their terms prior to such date. The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities.

The initial conversion rate for the 1.125% Notes is 24.5277 shares of our common stock per $1,000 principal amount of 1.125% Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate is subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest.

The 1.125% Notes contain an embedded cash conversion option, which was separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the embedded cash conversion option transaction settles or expires. The initial fair value liability of the embedded cash conversion option simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). This discount is amortized to the 1.125% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 5.9%. As of June 30, 2014, we expect the 1.125% Notes to be outstanding until their January 15, 2020 maturity date, for a remaining amortization period of 5.5 years. The 1.125% Notes' if-converted value did not exceed their principal amount as of June 30, 2014 and December 31, 2013.

3.75% Convertible Senior Notes due 2014. We had $187.0 million of 3.75% Convertible Senior Notes due 2014 (the 3.75% Notes) outstanding as of June 30, 2014 and December 31, 2013. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock.

Because the 3.75% Notes have cash settlement features, we have allocated the proceeds from their issuance between a liability component and an equity component. The reduced carrying value on the 3.75% Notes resulted in a debt discount that is amortized back to the 3.75% Notes' principal amount through the recognition of non-cash interest expense over the expected

life of the debt. This has resulted in our recognition of interest expense on the 3.75% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued. The effective interest rate of the 3.75% Notes is 7.5%, principally based on the seven-year U.S. Treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. While the 3.75% Notes may be converted beginning July 1, 2014, we expect the 3.75% Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 3 months. The 3.75% Notes' if-converted value exceeded their principal amount by approximately $79 million and $11 million as of June 30, 2014, and December 31, 2013, respectively. At June 30, 2014, the equity component of the 3.75% Notes, net of the impact of deferred taxes, was $24.0 million.

The principal amounts, unamortized discount and net carrying amounts of the convertible senior notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
June 30, 2014:			
1.125% Notes	$ 550,000	$ 124,291	$ 425,709
3.75% Notes	187,000	1,742	185,258
	$ 737,000	$ 126,033	$ 610,967
December 31, 2013:			
1.125% Notes	$ 550,000	$ 133,632	$ 416,368
3.75% Notes	187,000	5,128	181,872
	$ 737,000	$ 138,760	$ 598,240

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
		(In thousands)		
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate	$ 3,300	$ 3,300	$ 6,600	$ 5,827
Amortization of the discount	6,414	5,965	12,728	9,688
Total interest cost recognized	$ 9,714	$ 9,265	$ 19,328	$ 15,515

Lease Financing Obligations. In 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of two properties, including the Molina Center located in Long Beach, California, and our Ohio health plan office building in Columbus, Ohio. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated and amortized over their remaining useful lives. The lease financing obligation is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income.

As described and defined in further detail in Note 16, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings then under construction. We have concluded that we are the accounting owner of the properties due to of our continuing involvement with the properties. We have recorded $38.5 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of June 30, 2014, which represents the total cost, including imputed interest, incurred by the Landlord thus far for the construction of the buildings. As of June 30, 2014, the aggregate amount recorded to lease financing obligations amounted to $39.4 million. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Such interest expense was $1.1 million for the six months ended June 30, 2014. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was $0.4 million for the six months ended June 30, 2014.

12. Derivative Financial Instruments

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

	Balance Sheet Location	June 30, 2014	December 31, 2013
		(In thousands)	
Derivative asset:			
1.125% Call Option	Non-current assets: Derivative asset	$ 250,160	$ 186,351
Derivative liability:			
Embedded cash conversion option	Non-current liabilities: Derivative liability	$ 250,038	$ 186,239

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of income, and reported in other expenses, net. Gains and losses for our derivative financial instruments are presented individually in the consolidated statements of cash flows, supplemental cash flow information.

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Notes in 2013 as described in Note 11, "Long-Term Debt," we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 6, "Fair Value Measurements."

Embedded Cash Conversion Option. The embedded cash conversion option within the 1.125% Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the embedded cash conversion option, refer to Note 6, "Fair Value Measurements."

13. Stockholders' Equity

Stockholders' equity increased $24.1 million during the six months ended June 30, 2014 compared with stockholders' equity at December 31, 2013. The increase was due to net income of $12.3 million, $1.1 million related to other comprehensive income and $10.7 million related to employee stock transactions.

1.125% Warrants. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants.

Securities Repurchases and Repurchase Program. Effective September 30, 2013, our board of directors authorized the repurchase of up to $50.0 million in aggregate of our common stock through December 31, 2014. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and other market conditions. As of June 30, 2014, the remaining balance available to repurchase our stock under this program was $47.3 million.

Shelf Registration Statement. In May 2012, we filed an automatic shelf registration statement on Form S-3 with the SEC covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Plans. In connection with our equity incentive plans, we issued approximately 623,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the six months ended June 30, 2014.

14. Segment Information

We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans and our direct delivery business. Our state health plans represent operating segments that have been aggregated for reporting purposes as they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides MMIS design, development, implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segment is charged to the Health Plans segment.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(In thousands)			
Revenue from continuing operations:				
Health Plans segment:				
Premium revenue	$ 2,167,142	$ 1,501,729	$ 4,107,479	$ 2,999,162
Premium tax revenue	70,120	46,883	121,813	83,883
Health insurer fee revenue	19,662	—	38,358	—

Other expenses, net	13,984	15,169	27,762	28,075
Income from continuing operations before income tax expense	$ 18,443	$ 31,277	$ 28,932	$ 86,244

15. Commitments and Contingencies

California Health Plan Rate Settlement Agreement. In the fourth quarter of 2013, our California health plan entered into a settlement agreement with the California Department of Health Care Services (DHCS). The agreement settled rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in Medi-Cal (California's Medicaid program). Under the terms of the agreement, a settlement account (the Account) applicable to the California health plan's managed care contracts has been established.

Effective January 1, 2014, the Account was established with an initial balance of zero, and will be settled after December 31, 2017. DHCS will make an interim partial settlement payment to us if it terminates early, without replacement, any of our managed care contracts. The Account will be adjusted annually to reflect a calendar year deficit or surplus, which is determined by comparing the California health plan's pre-tax margin and a target margin established in the settlement agreement. Upon expiration of the settlement agreement, if the Account is in a deficit position, then DHCS will pay the amount of the deficit to us, subject to an alternative minimum payment amount. If the Account is in a surplus position, then no amount is owed to either party. The maximum amount that DHCS would pay to us under the terms of the settlement agreement is $40.0 million.

We estimate and recognize the retrospective adjustments to premium revenue based on our experience to date under the California health plan's managed care contracts. As of June 30, 2014, we recorded a deficit, or receivable, of $9.5 million, net of a valuation discount of $0.5 million, reflecting our estimated retrospective premium adjustment to the Account based on the California health plan's actual pretax margin for the six months ended June 30, 2014.

Legal Proceedings. The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Washington Health Plan. The Washington Health Care Authority (HCA) has communicated that it believes it has overpaid our Washington health plan with regard to certain claims. The alleged overpayments purportedly involve an undifferentiated incremental component of the capitation rates paid to our Washington health plan from and after July 1, 2012, the start date of the contract at issue. On March 25, 2014, HCA alleged that the total "overpayments" related to HCA's delayed enrollment of so-called Washington Community Options Program Entry System (COPES) members were $14.4 million, and demanded payment in that amount. On April 7, 2014, HCA alleged that the total "overpayments" related to certain psychotropic drug claims that had been included in the Request for Proposal (RFP) rate book were $5.8 million, and demanded payment in that amount. HCA has provided us with minimal data by which we might independently validate HCA's allegations. Furthermore, both alleged errors, if they in fact occurred, were unilateral errors committed and caused by HCA for which our Washington health plan had no contemporaneous knowledge and had assumed and bore no contractual risk. We have responded to HCA's demands for payment, noting, among other things, that the demands are improper as a matter of law because under the Washington statue cited regarding the definition of an "overpayment," there were in fact no "overpayments" since payment was made consistent with the express terms of the parties' contract. We believe that any actual liability for the alleged overpayment claims is not currently probable or reasonably estimable.

State of Louisiana. On June 26, 2014, the State of Louisiana filed a Petition for Damages against Molina Medicaid Solutions, Molina Healthcare, Inc., Unisys Corporation, and Paramax Systems Corporation, a subsidiary of Unisys, in the Parish of Baton Rouge, 19th Judicial District. The Petition alleges that between 1989 and 2012, the defendants utilized an incorrect reimbursement formula for the payment of pharmaceutical claims. We believe we have several meritorious defenses to the claims of the state, and any liability for the alleged claims is not currently probable or reasonably estimable.

USA and State of Florida ex rel. Charles Wilhelm. On July 24, 2014, Molina Healthcare, Inc. and Molina Healthcare of Florida, Inc. were served with a Complaint filed under seal on December 5, 2012 in District Court for the Southern District of Florida by relator, Charles C. Wilhelm, M.D., Case No. 12-24298. The Complaint alleges that, in late 2008 and early 2009, in connection with the acquisition of Florida NetPass by which Molina Healthcare entered into the state of Florida, the defendants failed to adequately staff the plan and provide other services, resulting in a disproportionate number of sicker beneficiaries of Florida NetPass moving back into the Florida fee-for-service Medicaid program. This alleged conduct purportedly resulted in a violation of the federal False Claims Act. Both the United States of America and the State of Florida have reviewed the allegations made in the Complaint, and have declined to intervene. We believe we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

Provider Claims. Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions. Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements upon us that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statues, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $663 million at June 30, 2014, and $608 million at December 31, 2013. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $299.8 million and $365.2 million as of June 30, 2014 and December 31, 2013, respectively.

The National Association of Insurance Commissioners (NAIC) adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Illinois, Michigan, New Mexico, Ohio, South Carolina, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of June 30, 2014, our health plans had aggregate statutory capital and surplus of approximately $728 million compared with the required minimum aggregate statutory capital and surplus of approximately $418 million. All of our health plans were in compliance with the minimum capital requirements at June 30, 2014. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

16. Related Party Transactions

In February 2013, we entered into a lease with 6th & Pine Development, LLC (the Landlord) for office space located in Long Beach, California. The lease consists of two office buildings, referred to as Building A and Building B.

The principal members of the Landlord are John C. Molina, our chief financial officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, the Landlord has pledged shares of common stock in the Company the Landlord holds as trustee. Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary.

The lease term for Building A commenced in June 2013, and the lease term for Building B commenced in July 2014. The initial lease term for both buildings expires on December 31, 2024, subject to two five-year renewal options. Annual rent for Building A is approximately $3 million, and initial annual rent for Building B is approximately $4 million. Rent increases 3.75% per year during the initial term. Rent during the extension terms will be the greater of then-current rent or fair market rent.

Refer to Note 17, "Variable Interest Entities," for a discussion of the Joseph M. Molina, M.D. Professional Corporations.

17. Variable Interest Entities

Joseph M. Molina M.D., Professional Corporations. The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's sole shareholder is Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides professional medical services to the general public for routine non-life threatening, outpatient health care needs. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, American Family Care, Inc. (AFC), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will operate at break even, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by AFC are reviewed annually to assure the achievement of this goal.

Separately, our California, Florida, New Mexico, Utah and Washington health plans have entered into primary care services agreements with JMMPC. These agreements direct our health plans to perform a monthly reconciliation, to either fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, such that JMMPC will derive no profit or loss. Because

the AFC services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are generally insignificant.

We have determined that JMMPC is a variable interest entity (VIE), and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of June 30, 2014, JMMPC had total assets of $10.4 million, and total liabilities of $10.1 million. As of December 31, 2013, JMMPC had total assets of $6.9 million and total liabilities of $6.6 million.

Our maximum exposure to loss as a result of our involvement with JMMPC is generally limited to the amounts needed to fund JMMPC's ongoing payroll and employee benefits. We believe that such loss exposure will be immaterial to our consolidated operating results and cash flows for the foreseeable future.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated. Those known risks and uncertainties include, but are not limited to, the following:

- uncertainties associated with the implementation of the Affordable Care Act, including the full grossed up reimbursement by states of the non-deductible health insurer fee, the expansion of Medicaid eligibility in the states that participate to previously uninsured populations unfamiliar with managed care, the implementation of state insurance marketplaces, the effect of various implementing regulations, and uncertainties regarding the impact of other federal or state health care and insurance reform measures, including the dual eligibles demonstration programs in California, Illinois, Michigan, Ohio, and South Carolina;
- newly FDA-approved drugs such as Sovaldi, Olysio, and other drugs for hepatitis C or other medical conditions that are exorbitantly priced but not factored into the calculation of our capitated rates for 2014;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations, and our ability to reduce over time the high medical costs commonly associated with new patient populations;
- the accurate estimation of incurred but not paid medical costs across our health plans;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates or retroactive premium rate increases;
- efforts by states to recoup previously paid amounts, including claims by the Washington Health Care Authority (HCA) that it overpaid our Washington health plan for certain claims related to psychotropic drugs and the Washington Community Options Program Entry System (COPES);
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, including the success of the proposal of Molina Medicaid Solutions in New Jersey;
- the continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed, including the extension of the Louisiana contract of Molina Medicaid Solutions through 2015;
- government audits and reviews, and any fine, enrollment freeze, or monitoring program that may result therefrom;
- changes with respect to our provider contracts and the loss of providers;
- federal or state medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures, including 2014 at-risk premium rules in the state of Texas;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable or unfavorable resolution of litigation, arbitration, or administrative proceedings, including the litigation commenced against us by the state of Louisiana alleging that Molina Medicaid Solutions and its predecessors used an incorrect reimbursement formula for the payment of pharmaceutical claims;
- the relatively small number of states in which we operate health plans;
- our management of a portion of College Health Enterprises' hospital in Long Beach, California;

- the availability of adequate financing on acceptable terms to fund and capitalize our expansion and growth, repay our outstanding indebtedness at maturity and meet our liquidity needs, including the interest expense and other costs associated with such financing;
- the failure of a state in which we operate to renew its federal Medicaid waiver;
- an inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- changes in general economic conditions, including unemployment rates; and
- increasing consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2013, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2013.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. As of June 30, 2014, these health plans served approximately 2.3 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve a small number of Health Insurance Marketplaces (Marketplaces) members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in California.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal in 2012, and effective June 2013 the transition obligations associated with that contract terminated. Therefore, beginning in the second quarter of 2013, we classified the operations for our Missouri health plan as discontinued operations for all periods presented in our consolidated financial statements. The following discussion and analysis, with the exception of cash flow information, is presented in the context of continuing operations unless otherwise identified.

Health Care Reform

We believe that the Affordable Care Act (defined below) will continue to provide us with significant opportunities for membership growth in our existing markets and, potentially, in new markets in the future as follows:

Medicaid Expansion. In the states that have elected to participate, the Affordable Care Act provides for the expansion of the Medicaid program to provide eligibility to nearly all low-income people under age 65 with incomes at or below 138 percent of the federal poverty line. Medicaid expansion membership phased in beginning January 1, 2014. Since that date, our health plans in California, Illinois, Michigan, New Mexico, Ohio, and Washington have begun participating in Medicaid expansion. In the six months ended June 30, 2014, we added approximately 232,300 Medicaid expansion members, or 10% of total membership.

Health Insurance Marketplaces. On October 1, 2013, Marketplaces became available for consumers to access and begin the enrollment process for coverage beginning January 1, 2014. Marketplaces allow individuals and small groups to purchase health insurance that is federally subsidized. We participate in Marketplaces in all of the states in which we operate, except Illinois and South Carolina. At June 30, 2014, we had fewer than 20,000 Marketplaces members.

Dual Eligibles. Policymakers at the federal and state levels are increasingly developing initiatives, and the Centers for Medicare and Medicaid Services (CMS) has implemented several demonstrations, designed to improve the coordination of care for dual eligibles and reduce spending under Medicare and Medicaid. These demonstrations include issuing contracts to 15 states to design a program to integrate Medicare and Medicaid services for dual eligibles in the state. We refer to such demonstrations as our Medicare-Medicaid Plan (MMP) implementations. Our MMP implementations in California, Illinois, and Ohio offered coverage beginning in the second quarter of 2014.

Health Insurer Fee. In the first quarter of 2014, we adopted the guidance of the Financial Accounting Standards Board (FASB) related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively, the Affordable Care Act, or ACA). The ACA imposes an annual fee, or excise tax, on health insurers for each calendar year beginning on or after January 1, 2014. The health insurer fee (HIF) is imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year, and is payable on September 30 of each year.

As of June 30, 2014, we expect the liability to amount to $88.3 million. We are recognizing this expense on a straight-line basis in 2014, and recorded $21.9 million and $44.1 million to health insurer fee expenses in the three months and six months ended June 30, 2014, respectively. As enacted, this federal premium-based assessment is non-deductible for income tax purposes.

For further discussion of the risks and uncertainties relating to the HIF, refer to the subheading below, "Liquidity and Capital Resources—Financial Condition."

Market Updates - Health Plans Segment

Florida. Enrollment at the Florida health plan declined between the first and second quarters of 2014 due to a reassignment of membership as part of the implementation of Florida's Managed Medical Assistance program. We believe that enrollment at the Florida health plan will grow later in the year.

On March 12, 2014, our Florida health plan entered into an agreement with Healthy Palm Beaches, Inc. (HPB) to acquire certain assets relating to HPB's Medicaid business for $7.5 million. Our Florida health plan expects to close on this transaction in the third quarter of 2014.

South Carolina. Our South Carolina health plan began serving members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014. For further information on this transaction, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 4, "Business Combinations."

Composition of Revenue and Membership

Health Plans Segment

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new RFP open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled; and regions or service areas.

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," is not generally subject to significant accounting estimates. For the six months ended June 30, 2014, we received approximately 97% of our premium revenue as a fixed amount per member per month (PMPM), pursuant to our Medicaid contracts with state agencies, Medicare and other managed care organizations for which we operate as subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the six months ended June 30, 2014, we recognized approximately 3% of our premium revenue in the form of "birth income"—a one-time payment for the delivery of a child—from the Medicaid programs in all of our state health plans except Illinois and New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans in the six months ended June 30, 2014, by program:

	Ending	PMPM Premiums		
	Membership	Low	High	Consolidated
Temporary Assistance for Needy Families (TANF)	1,564,500	$ 100.00	$ 260.00	$ 160.00
Aged, Blind or Disabled (ABD)	305,300	370.00	1,260.00	770.00
Medicaid Expansion	232,300	370.00	550.00	500.00
Children's Health Insurance Program (CHIP)	77,000	90.00	130.00	120.00
Medicare Special Needs Plans (Medicare)	44,000	530.00	1,280.00	1,190.00
Marketplaces	18,300	170.00	640.00	300.00
MMP–Integrated (1)	5,200	1,230.00	3,240.00	1,910.00
MMP–Medicare Opt Out (1)	8,400	1,370.00	1,420.00	1,390.00

(1) MMPs serve members who are dually eligible for Medicare and Medicaid.

(2) MMP members who have elected to "opt out" of Medicare coverage and receive Medicaid coverage only.

The following tables set forth our Health Plans segment membership as of the dates indicated:

	June 30, 2014	March 31, 2014	December 31, 2013	June 30, 2013
Ending Membership by Health Plan:				
California	455,000	418,000	368,000	355,000
Florida (1)	58,000	91,000	89,000	81,000
Illinois	6,000	5,000	4,000	—
Michigan	244,000	218,000	213,000	215,000
New Mexico	195,000	183,000	168,000	92,000
Ohio	302,000	260,000	255,000	240,000
South Carolina (2)	119,000	126,000	—	—
Texas	247,000	246,000	252,000	266,000
Utah	83,000	80,000	86,000	87,000
Washington	461,000	434,000	403,000	413,000
Wisconsin	85,000	90,000	93,000	98,000
	2,255,000	2,151,000	1,931,000	1,847,000
Ending Membership by Program:				
TANF	1,564,500	1,575,300	1,503,800	1,435,400
ABD	305,300	309,900	288,600	270,300
Medicaid Expansion (3)	232,300	133,000	—	—
CHIP	77,000	83,700	99,200	105,000
Medicare	44,000	41,400	39,400	36,300
Marketplaces (3)	18,300	7,700	—	—
MMP–Integrated	5,200	—	—	—
MMP–Medicare Opt Out	8,400	—	—	—
	2,255,000	2,151,000	1,931,000	1,847,000

(1) Enrollment at our Florida health plan declined between the first and second quarters of 2014 due to a reassignment of membership as part of the implementation of Florida's Managed Medical Assistance program. We believe enrollment at our Florida health plan will grow later in the year.

(2) Our South Carolina health plan began serving members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014.

(3) Medicaid expansion membership phased in, and Health Insurance Marketplaces became available for consumers to access coverage, beginning January 1, 2014.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid management information system (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we generally recognize revenue associated with such contracts on a straight-line basis over the original contract term during which BPO, hosting, and support and maintenance services are delivered. There may be certain contractual provisions containing contingencies, however that require us to delay recognition of all or part of our service revenue until such contingencies have been removed.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, general and administrative expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following categories:

- *Fee-for-service expenses:* Under fee-for-service arrangements, we retain the financial responsibility for medical care provided and incur costs based on actual utilization of services. Such expenses are recorded in the period in which the related services are dispensed. Nearly all hospital services and the majority of our primary care and physician specialist services are paid on a fee-for-service basis.

- *Pharmacy expenses:* All drug, injectables, and immunization costs paid through our pharmacy benefit manager are classified as pharmacy expenses.

- *Capitation expenses:* Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.

- *Direct delivery expenses:* All costs associated with our operation of primary care clinics are classified as direct delivery expenses.

- *Other medical expenses:* All medically related administrative costs, certain provider incentive costs, reinsurance costs and other health care expenses are classified as other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements in Note 10, "Medical Claims and Benefits Payable," for further information on how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide BPO and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs. In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

Second Quarter Financial Performance Summary, Continuing Operations

The following table and narrative briefly summarize our financial and operating performance from continuing operations for the three and six months ended June 30, 2014 and 2013. All ratios, with the exception of the medical care ratio and the premium tax ratio, are computed as a percentage of total revenue. The medical care ratio is computed as a percentage of premium revenue, the premium tax ratio is computed as a percentage of premium revenue plus premium tax revenue because direct relationships exist between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(Dollar amounts in thousands, except per share data)			
Net income per diluted share	$ 0.16	$ 0.34	$ 0.26	$ 1.00
Premium revenue	$ 2,167,142	$ 1,501,729	$ 4,107,479	$ 2,999,162
Service revenue	$ 50,232	$ 49,672	$ 103,862	$ 99,428
Operating income	$ 32,427	$ 46,446	$ 56,694	$ 114,319
Net income	$ 7,741	$ 15,796	$ 12,575	$ 46,318
Total ending membership	2,255,000	1,847,000	2,255,000	1,847,000
Premium revenue	93.7%	93.5%	93.7%	93.9%
Service revenue	2.2	3.1	2.4	3.1
Premium tax revenue	3.0	2.9	2.8	2.6
Health insurer fee revenue	0.9	—	0.9	—
Investment income	0.1	0.1	0.1	0.1
Other revenue	0.1	0.4	0.1	0.3
Total revenue	100.0%	100.0%	100.0%	100.0%
Operating Statistics:				
Medical care ratio	89.3%	86.2%	89.0%	86.1%
Service revenue ratio	73.9%	79.1%	74.9%	79.5%
General and administrative expense ratio	8.4%	10.1%	8.7%	9.5%
Premium tax ratio	3.1%	3.0%	2.9%	2.7%
Operating income	1.4%	2.9%	1.3%	3.6%
Net income	0.3%	1.0%	0.3%	1.4%
Effective tax rate	58.0%	49.5%	56.5%	46.3%
Medical Claims Data:				
Days in claims payable, fee for service	46	38	46	38
Number of claims in inventory at end of period	180,600	109,900	180,600	109,900
Billed charges of claims in inventory at end of period	$ 400,000	$ 200,400	$ 400,000	$ 200,400
Claims in inventory per member at end of period	0.08	0.06	0.08	0.06
Billed charges of claims in inventory per member at end of period	$ 177.38	$ 108.50	$ 177.38	$ 108.50
Number of claims received during the period	6,655,300	5,253,500	12,641,300	10,524,500
Billed charges of claims received during the period	$ 7,255,000	$ 5,307,200	$ 13,609,000	$ 10,477,900

Non-GAAP Financial Measures

We use the following non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance and the performance of other companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not substitutes for or superior to, GAAP measures (GAAP stands for U.S. generally accepted accounting principles).

The first of these non-GAAP measures is earnings before interest, taxes, depreciation and amortization, or EBITDA. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to EBITDA.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(In thousands)			
Net income	$ 7,811	$ 24,571	$ 12,309	$ 54,486
Adjustments:				
Depreciation, and amortization of intangible assets and capitalized software	28,292	22,108	54,206	43,907
Interest expense	13,993	11,667	27,815	24,704
Income tax expense	10,760	5,513	15,997	29,783
EBITDA	$ 60,856	$ 63,859	$ 110,327	$ 152,880

The second of these non-GAAP measures is adjusted net income, continuing operations. The following table reconciles net income from continuing operations, which we believe to be the most comparable GAAP measure, to adjusted net income, continuing operations.

	Three Months Ended June 30,			
	2014		2013	
	(In thousands, except diluted per-share amounts)			
Net income, continuing operations	$ 7,741	$ 0.16	$ 15,796	$ 0.34
Adjustments, net of tax:				
Depreciation, and amortization of capitalized software	14,614	0.30	10,875	0.23
Stock-based compensation	4,322	0.09	5,890	0.13
Amortization of convertible senior notes and lease financing obligations	4,272	0.09	3,758	0.08
Amortization of intangible assets	3,209	0.07	3,053	0.07
Change in fair value of derivatives, net	(5)	—	3,658	0.08
Adjusted net income, continuing operations	$ 34,153	$ 0.71	$ 43,030	$ 0.93

	Six Months Ended June 30,			
	2014		2013	
	(In thousands, except diluted per-share amounts)			
Net income, continuing operations	$ 12,575	$ 0.26	$ 46,318	$ 1.00
Adjustments, net of tax:				
Depreciation, and amortization of capitalized software	27,612	0.58	21,554	0.46
Stock-based compensation	9,221	0.19	9,490	0.20
Amortization of convertible senior notes and lease financing obligations	8,477	0.18	6,103	0.13
Amortization of intangible assets	6,538	0.14	6,107	0.13
Change in fair value of derivatives, net	(6)	—	3,583	0.08
Adjusted net income, continuing operations	$ 64,417	$ 1.35	$ 93,155	$ 2.00

Analysis of Second Quarter 2014 Financial Results - Trends and Developments

We previously reported that our first quarter of 2014 results were adversely affected by delays in securing agreements for the reimbursement (including reimbursement for tax effect) of the HIF, and delays in the recognition of quality related revenue. Those circumstances continued through the end of the second quarter of 2014. Net income reported for the second quarter and six months ended June 30, 2014 would have been higher except for:

- HIF not reimbursed by our state partners reduced earnings approximately $16 million, or $0.14 per diluted share for the second quarter of 2014, and $32 million, or $0.29 per diluted share for the six months ended June 30, 2014 (per-share amounts for both periods on a GAAP and adjusted basis). We remain guardedly optimistic that we will secure reimbursement agreements with all of our state partners prior to the close of 2014.
- Our non-recognition of a portion of the Texas health plan's quality incentive program reduced earnings approximately $7 million, or $0.06 per diluted share for the second quarter of 2014, and $13 million, or $0.12 per diluted share, for the six months ended June 30, 2014 (per-share amounts for both periods on a GAAP and adjusted basis). We remain guardedly optimistic that we will be able to recognize most of our quality revenue in Texas prior to the close of 2014.

Results of Operations, Continuing Operations

Health Plans Segment

Premium Revenue

Premium revenue for the second quarter of 2014 increased 44% over the second quarter of 2013, due to a 21% increase in member months, and a 19% increase in revenue per member per month (PMPM). The increase in member months was due to the addition of Medicaid expansion membership primarily at our health plans in California, New Mexico, Ohio and Washington, and the addition of Medicaid members at our South Carolina health plan, all effective January 1, 2014.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended June 30,					
	2014			2013		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 1,378,037	$ 205.08	71.2%	$ 879,865	$ 158.96	68.0%
Pharmacy	295,596	43.99	15.3	222,992	40.29	17.2
Capitation	176,817	26.31	9.1	138,409	25.00	10.7
Direct delivery	23,063	3.43	1.2	9,443	1.71	0.7
Other	60,786	9.06	3.2	43,997	7.95	3.4
Total	$ 1,934,299	$ 287.87	100.0%	$ 1,294,706	$ 233.91	100.0%

Our consolidated medical care ratio increased to 89.3% in the second quarter of 2014, from 86.2% in the second quarter of 2013. We recognized approximately $15 million of revenue related to 2013 in the second quarter of 2014. This out of period benefit was offset by unfavorable development of our consolidated medical claims and benefits payable liability at the end of the prior year; when compared with the second quarter of 2013.

Individual Health Plan Analysis

California. Medical margin improved $63.0 million at the California health plan, when compared with the second quarter of 2013. This improvement was the result of the following:

- Higher enrollment and PMPM premiums, particularly as a result of 66,000 members added due to Medicaid expansion;
- Approximately $25 million benefit from recognition in the second quarter of 2014 of certain premium revenues of which $15 million related to the year ended December 31, 2013, and $5 million related to the first quarter of 2014; and
- A $4.5 million benefit from the rate settlement agreement with the DHCS.

Florida. Despite an increase in revenue of over 60%, medical margin fell at the Florida health plan by $1.4 million in the second quarter of 2014 when compared with the second quarter of 2013. Although we earn a comparatively large premium for long-term care members, the medical care ratio associated with these services is very high compared to the benefits traditionally offered by us. Accordingly, the medical care ratio of the Florida health plan increased to 91.6% in the second quarter of 2014 from 84.0% in the second quarter of 2013.

Illinois. The medical care ratio for the Illinois health plan was 106.3% in the second quarter of 2014. The Illinois health plan served its first member effective September 2013. The high medical care ratio at the Illinois health plan is the result of: 1) a small membership base transitioning into managed care; and 2) the need to incur relatively high medically related administrative costs in light of the enrollment increase anticipated at the health plan later in 2014.

Michigan. Financial performance at the Michigan health plan declined in the second quarter of 2014, when compared with the second quarter of 2013, primarily due to to comparatively higher medical care ratios for the Medicaid expansion (new in 2014) and Medicare programs. The medical care ratio of the Michigan health plan increased to 88.2% for the second quarter of 2014, from 84.7% for the second quarter of 2013. The Michigan health plan added its first Medicaid expansion members during the second quarter of 2014. Medicaid expansion enrollment as of June 30, 2014 was approximately 20,000.

New Mexico. Medical margin improved at the New Mexico health plan in the second quarter of 2014, when compared with the second quarter of 2013, primarily due to higher revenues that offset an increase in the medical care ratio to 89.6% in the second quarter of 2014, from 80.8% in the second quarter of 2013. The New Mexico health plan added approximately 42,000 Medicaid expansion members in the first half of 2014; as well as approximately 60,000 new members in a business combination effective August 1, 2013. The higher medical care ratio was primarily the result of the addition of Medicaid behavioral health and long-term care services effective January 1, 2014 (which are reimbursed at a higher medical care ratio than traditional medical benefits); and a return to more typical medical cost levels overall in 2014.

Ohio. The medical care ratio of the Ohio health plan increased to 84.2% for the second quarter of 2014, from 79.8% for the second quarter of 2013. Medical care costs increased to a more typical level in the second quarter of 2014. We do not believe that medical care ratios below 80% are sustainable over time. The Ohio health plan added its first meaningful number of Medicaid expansion members during the second quarter of 2014. Medicaid expansion enrollment as of June 30, 2014 was approximately 30,000.

South Carolina. The medical care ratio for the South Carolina health plan was 87.8% in the second quarter of 2014. The South Carolina health plan served its first members effective January 2014.

Texas. Financial performance worsened at the Texas health plan in the second quarter of 2014, when compared with the second quarter of 2013, due to a decrease in quality revenue as described above and an increase in amounts returned to the state under a profit-sharing agreement. The medical care ratio of the Texas health plan increased to 92.8% in the second quarter of 2014, from 86.5% in the second quarter of 2013. Removing quality revenue and profit-sharing adjustments for both quarters would have resulted in a medical care ratio at the Texas health plan of approximately 91% for the second quarter of 2014 and 92% for the second quarter of 2013.

Utah. Financial performance worsened at the Utah health plan in the second quarter of 2014, when compared with the second quarter of 2013, due to higher inpatient utilization and a general return of medical costs to a more typical level in the second quarter of 2014. The medical care ratio of the Utah health plan increased to 95.5% in the second quarter of 2014, from 79.6% in the second quarter of 2013. We do not believe that medical care ratios below 80% are sustainable over time.

Washington. Financial performance worsened at the Washington health plan in the second quarter of 2014, when compared with the second quarter of 2013, primarily due to lower premiums relative to the risk assumed for our members. The medical care ratio of the Washington health plan increased to 90.5% in the second quarter of 2014, from 88.0% in the second quarter of 2013. The Washington health plan added approximately 73,000 Medicaid expansion members in the first half of 2014.

Wisconsin. Financial performance worsened at the Wisconsin health plan in the second quarter of 2014, when compared with the second quarter of 2013. The medical care ratio of the Wisconsin health plan increased to 89.8% in the second quarter of 2014, from 82.6% in the second quarter of 2013.

Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended June 30, 2014						
	Member Months (1)	Premium Revenue		Medical Care Costs		MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM		
California	1,335	$ 398,071	$ 298.11	$ 324,923	$ 243.33	81.6%	$ 73,148

Utah	261	77,511	296.69	61,677	236.08	79.6	15,834
Washington	1,238	299,533	241.89	263,512	212.80	88.0	36,021
Wisconsin	293	37,740	128.79	31,185	106.43	82.6	6,555
Other (3)(4)	—	3,185	—	13,905	—	—	(10,720)
	5,535	$ 1,501,729	$ 271.30	$ 1,294,706	$ 233.91	86.2%	$ 207,023

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) The MCR represents medical costs as a percentage of premium revenue.
(3) The Illinois health plan's results prior to October 1, 2013, were insignificant and reported in "Other."
(4) "Other" medical care costs include primarily medically related administrative costs at the parent company, and direct delivery costs.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended June 30,	
	2014	2013
	(In thousands)	
Service revenue before amortization	$ 50,960	$ 50,400
Amortization recorded as reduction of service revenue	(728)	(728)
Service revenue	50,232	49,672
Cost of service revenue	37,107	39,305
General and administrative costs	1,891	2,790
Amortization of customer relationship intangibles recorded as amortization	793	1,282
Operating income	$ 10,441	$ 6,295

Operating income for our Molina Medicaid Solutions segment increased $4.1 million in the second quarter of 2014, compared with the second quarter of 2013, primarily due to reduced service costs associated with our West Virginia and Maine contracts, and lower general and administrative costs overall.

Results of Operations, Continuing Operations

Six Months Ended June 30, 2014 Compared with Six Months Ended June 30, 2013

Health Plans Segment

Premium Revenue

Premium revenue for the six months ended June 30, 2014 increased 37% over the six months ended June 30, 2013, due to a 20% increase in member months, and a 14% increase in revenue PMPM. The increase in member months was due to the addition of Medicaid expansion membership primarily at our health plans in California, New Mexico, Ohio and Washington, and the addition of Medicaid members at our South Carolina health plan, all effective January 1, 2014. Additionally, our New Mexico health plan added approximately 60,000 new members in a business combination effective August 1, 2013.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Six Months Ended June 30,					
	2014			2013		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 2,559,098	$ 194.38	70.0%	$ 1,746,620	$ 159.48	67.6%
Pharmacy	582,224	44.22	15.9	454,830	41.53	17.6
Capitation	346,256	26.30	9.5	278,733	25.45	10.8
Direct delivery	45,084	3.42	1.2	18,127	1.66	0.7
Other	123,295	9.37	3.4	84,311	7.69	3.3
Total	$ 3,655,957	$ 277.69	100.0%	$ 2,582,621	$ 235.81	100.0%

Our consolidated medical care ratio increased to 89.0% in the six months ended June 30, 2014, from 86.1% in the six months ended June 30, 2013.

Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Six Months Ended June 30, 2014						
	Member Months (1)	Premium Revenue		Medical Care Costs		MCR (2)	Medical Margin

Texas	1,637	648,406	396.01	542,408	331.27	83.7	105,998
Utah	520	152,467	293.16	126,706	243.63	83.1	25,761
Washington	2,488	597,819	240.29	524,909	210.98	87.8	72,910
Wisconsin	493	64,864	131.53	54,849	111.22	84.6	10,015
Other (3)(4)	—	5,484	—	29,763	—	—	(24,279)
	10,952	$ 2,999,162	$ 273.85	$ 2,582,621	$ 235.81	86.1%	$ 416,541

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) The MCR represents medical costs as a percentage of premium revenue.
(3) The Illinois health plan's results prior to October 1, 2013, were insignificant and reported in "Other."
(4) "Other" medical care costs include primarily medically related administrative costs at the parent company, and direct delivery costs.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Six Months Ended June 30,	
	2014	2013
	(In thousands)	
Service revenue before amortization	$ 105,319	$ 100,885
Amortization recorded as reduction of service revenue	(1,457)	(1,457)
Service revenue	103,862	99,428
Cost of service revenue	77,764	79,075
General and administrative costs	3,641	5,141
Amortization of customer relationship intangibles recorded as amortization	1,768	2,564
Operating income	$ 20,689	$ 12,648

Operating income for our Molina Medicaid Solutions segment increased $8.0 million in the six months ended June 30, 2014, compared with the six months ended June 30, 2013, primarily the result of increased revenues due to Medicaid expansion membership, reduced service costs associated with our West Virginia and Maine contracts, and lower general and administrative costs overall.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses decreased to 8.4% of total revenue for the second quarter of 2014, compared with 10.1% of total revenue for the second quarter of 2013. General and administrative expenses decreased to 8.7% of total revenue for the six months ended June 30, 2014, compared with 9.5% of total revenue for the six months ended June 30, 2013.

Premium Tax Expense

Premium tax expense was 3.1% of premium revenue plus premium tax revenue in the second quarter of 2014, compared with 3.0% in the second quarter of 2013 and 2.9% of premium revenue plus premium tax revenue in the six months ended June 30, 2014, compared with 2.7% in the six months ended June 30, 2013.

Health Insurer Fee Revenue and Expenses

Refer to "Liquidity and Capital Resources—Financial Condition" below, for a comprehensive discussion of the HIF.

Depreciation and Amortization

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Three Months Ended June 30,			
	2014		2013	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 18,536	0.8%	$ 12,896	0.8%
Amortization of intangible assets, continuing operations	4,366	0.2	4,119	0.3
Depreciation and amortization, continuing operations	22,902	1.0	17,015	1.1

Depreciation and amortization, discontinued operations	—	—	2	—
Amortization recorded as reduction of service revenue	1,457	—	1,457	—
Amortization recorded as cost of service revenue	20,604	0.5	8,870	0.3
Depreciation and amortization reported in the consolidated statements of cash flows	$ 65,654	1.5%	$ 43,907	1.4%

Interest Expense

Interest expense increased to $14.0 million for the second quarter of 2014, from $11.7 million for the second quarter of 2013, and increased to $27.8 million for the six months ended June 30, 2014, from $24.7 million for the six months ended June 30, 2013 primarily due to lease financing transactions in the second quarter of 2013. Interest expense includes non-cash interest expense relating to the amortization of the discount on our long-term debt obligations, which amounted to $6.8 million and $6.0 million for the three months ended June 30, 2014, and 2013, respectively and $13.5 million and $9.7 million for the six months ended June 30, 2014 and 2013, respectively.

Income Taxes

The provision for income taxes in continuing operations is recorded at an effective rate of 58.0% for the second quarter of 2014, compared with 49.5% for the second quarter of 2013, and 56.5% for the six months ended June 30, 2014 compared with 46.3% for the six months ended June 30, 2013. The disparity between rates in 2014 and 2013 is primarily due to the nondeductible HIF in 2014.

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of June 30, 2014, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income was $3.6 million for the six months ended June 30, 2014, compared with $3.1 million for the six months ended June 30, 2013. Our annualized portfolio yield for the six months ended June 30, 2014 and 2013 was 0.4%.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Liquidity

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Six Months Ended June 30,		
	2014	2013	Change
	(In thousands)		
Net cash provided by (used in) operating activities	$ 235,460	$ (111,748)	$ 347,208
Net cash used in investing activities	(102,336)	(431,812)	329,476
Net cash (used in) provided by financing activities	(41,668)	490,460	(532,128)
Net increase (decrease) in cash and cash equivalents	$ 91,456	$ (53,100)	$ 144,556

Operating Activities. Cash provided by operating activities increased $347.2 million, primarily due to the year-over-year change in medical claims and benefits payable, which increased $283.4 million in connection with our membership growth in the six months ended June 30, 2014, as described above in "Results of Operations."

Investing Activities. Cash used in investing activities decreased $329.5 million primarily due to significant purchases of investments, net of sales and maturities, amounting to $382.7 million in the second quarter of 2013. Such significant purchases of investments were a result of financing transactions described below in "Financing Activities," with no comparable activity in 2014.

Financing Activities. Cash used in financing activities for the six months ended June 30, 2014 related primarily to the settlement of $50.3 million of contingent consideration liabilities relating to our 2013 South Carolina health plan acquisition. Financing activities generated net cash of $490.5 million in the six months ended June 30, 2013, primarily due to proceeds from the issuance of the 1.125% Notes and related financing transactions, with no comparable activity in the six months ended June 30, 2014.

Financial Condition

On a consolidated basis, at June 30, 2014, we had working capital of $740.9 million compared with $745.7 million at December 31, 2013. At June 30, 2014, and December 31, 2013, we had cash and investments, including restricted investments, of $1,863.7 million, and $1,712.9 million, respectively. We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Health Insurer Fee. One notable provision of the ACA is an excise tax or annual fee that applies to most health plans, including commercial health plans and Medicaid managed care plans like Molina Healthcare. While characterized as a "fee" in the text of the ACA, the intent of Congress was to impose a broad-based health insurance industry excise tax, with the understanding that the tax could be passed on to consumers, most likely through higher commercial insurance premiums.

However, because Medicaid is a government–funded program, Medicaid health plans have no alternative but to look to their respective state partners for payment to offset the impact of this tax. We continue to work with our state partners to obtain reimbursement for the full economic impact of the excise tax. Currently, we project that the HIF payable by September 30, 2014 will be $88.3 million. Because this amount is not deductible for income tax purposes, our net income will be reduced by the full amount of the assessment.

When states reimburse us for the amount of the HIF, that reimbursement will itself be subject to income tax, the HIF, and applicable state premium taxes. If our estimate of the $88.3 million HIF liability in 2014 is correct, and if our estimate of the amount allocable to Medicaid of approximately $81 million is correct, states will need to pay us an incremental amount of approximately $132 million in revenue during 2014 to account for the HIF and the absence of its tax deductibility. As of June 30, 2014, we had received contract amendments for reimbursement representing approximately 50% of the Medicaid-related HIF. On a percentage basis, we anticipate that states will need to increase our Medicaid premium rates by approximately 1.5% to reimburse us for the HIF we will owe (based upon our estimated pro-rata share of total industry revenue in 2013). In addition, we estimate that states will need to increase our Medicaid premium rates by a further 0.9% to make us

whole for the lack of tax deductibility of the HIF, representing an estimated overall premium rate increase of approximately 2.4%.

As of July 30, 2014, we have contractual commitments from the states of Florida, Illinois, Ohio, Washington and Wisconsin to reimburse us by way of a lump sum payment for the full economic impact of the HIF in their respective states. While all of our remaining states have acknowledged the actuarial requirement that they reimburse us for the HIF, and its related income tax effects, no state other than those indicated above have contractually committed to do so.

Furthermore, states which have acknowledged the requirement to include the impact of the tax in our premium payments may argue that current premium rates will remain actuarially sound even if no adjustment is made to those rates. We continue to work with state officials to address the issue of fully grossed up reimbursement. If we are unable to obtain either premium increases or direct reimbursements to offset the impact of the tax on a fully grossed up basis, our business, financial condition, cash flows or results of operations could be materially adversely affected.

Regulatory Capital and Dividend Restrictions

For information on our regulatory capital requirements and dividend restrictions, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 15, "Commitments and Contingencies."

Future Sources and Uses of Liquidity

For information on our debt instruments, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Long-Term Debt."

For information on our shelf registration statement and our securities repurchase program, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 13, "Stockholders' Equity."

Contractual Obligations

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2013, was disclosed in our 2013 Annual Report on Form 10-K. There were no material changes to this previously filed information outside the ordinary course of business during the six months ended June 30, 2014. For further discussion and maturities of our long-term debt, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Long-Term Debt."

Critical Accounting Estimates

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 10, "Medical Claims and Benefits Payable," for a table which presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements.
- *Health Plans segment contractual provisions that may adjust or limit revenue or profit*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the second quarter of 2014 in connection with such contractual provisions.
- *Health Plans segment quality incentives*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the second quarter of 2014 in connection with such quality incentives.
- *Molina Medicaid Solutions segment revenue and cost recognition*.

There have been no significant changes during the six months ended June 30, 2014, to the items that we disclosed as our critical accounting estimates in our discussion and analysis of financial condition and results of operations in our Annual Report on Form 10-K for the year ended December 31, 2013.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC, a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended June 30, 2014 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Washington Health Plan. The Washington Health Care Authority (HCA) has communicated that it believes it has overpaid our Washington health plan with regard to certain claims. The alleged overpayments purportedly involve an undifferentiated incremental component of the capitation rates paid to our Washington health plan from and after July 1, 2012, the start date of the contract at issue. On March 25, 2014, HCA alleged that the total "overpayments" related to HCA's delayed enrollment of so-called Washington Community Options Program Entry System (COPES) members were $14.4 million, and demanded payment in that amount. On April 7, 2014, HCA alleged that the total "overpayments" related to certain psychotropic drug claims that had been included in the Request for Proposal (RFP) rate book were $5.8 million, and demanded payment in that amount. HCA has provided us with minimal data by which we might independently validate HCA's allegations. Furthermore, both alleged errors, if they in fact occurred, were unilateral errors committed and caused by HCA for which our Washington health plan had no contemporaneous knowledge and had assumed and bore no contractual risk. We have responded to HCA's demands for payment, noting, among other things, that the demands are improper as a matter of law because under the Washington statue cited regarding the definition of an "overpayment," there were in fact no "overpayments" since payment was made consistent with the express terms of the parties' contract. We believe that any actual liability for the alleged overpayment claims is not currently probable or reasonably estimable.

State of Louisiana. On June 26, 2014, the State of Louisiana filed a Petition for Damages against Molina Medicaid Solutions, Molina Healthcare, Inc., Unisys Corporation, and Paramax Systems Corporation, a subsidiary of Unisys, in the Parish of Baton Rouge, 19th Judicial District. The Petition alleges that between 1989 and 2012, the defendants utilized an incorrect reimbursement formula for the payment of pharmaceutical claims. We believe we have several meritorious defenses to the claims of the state, and any liability for the alleged claims is not currently probable or reasonably estimable.

USA and State of Florida ex rel. Charles Wilhelm. On July 24, 2014, Molina Healthcare, Inc. and Molina Healthcare of Florida, Inc. were served with a Complaint filed under seal on December 5, 2012 in District Court for the Southern District of Florida by relator, Charles C. Wilhelm, M.D., Case No. 12-24298. The Complaint alleges that, in late 2008 and early 2009, in connection with the acquisition of Florida NetPass by which Molina Healthcare entered into the state of Florida, the defendants failed to adequately staff the plan and provide other services, resulting in a disproportionate number of sicker beneficiaries of Florida NetPass moving back into the Florida fee-for-service Medicaid program. This alleged conduct purportedly resulted in a violation of the federal False Claims Act. Both the United States of America and the State of Florida have reviewed the allegations made in the Complaint, and have declined to intervene. We believe we have several meritorious defenses to the claims of the relator, and any liability for the alleged claims is not currently probable or reasonably estimable.

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 1A. Risk Factors

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in Part I, Item 1A – Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2013. The risk factors described herein and in our 2013 Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition, cash flows, or results of operations.

There have been no material changes to the risk factors disclosed in our 2013 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Share repurchase activity during the three months ended June 30, 2014 was as follows:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (b)
April 1 - April 30	360	$ 37.50	—	$ 47,338,505
May 1 - May 31	1,490	$ 37.82	—	$ 47,338,505
June 1 - June 30	2,702	$ 43.09	—	$ 47,338,505
Total	4,552	$ 40.92	—	

(a) During the three months ended June 30, 2014, we withheld 4,552 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

(b) Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50.0 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This repurchase program extends through December 31, 2014.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.

Item 6. Exhibits

Reference is made to the accompanying Index to Exhibits.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

EXHIBIT 3.1

THIRD AMENDED AND RESTATED BYLAWS

OF

MOLINA HEALTHCARE, INC.

a Delaware corporation

THIRD AMENDED AND RESTATED BYLAWS
OF
MOLINA HEALTHCARE, INC.

ARTICLE I

OFFICES

Section 1.1. Registered Office. The registered office of the Corporation shall be maintained in the County of New Castle, State of Delaware, and the registered agent in charge thereof is Corporation Service Company.

Section 1.2. Other Offices. The Corporation may also have offices and keep the books and records of the Corporation, except as may otherwise be required by law, at such other places both within and outside the State of Delaware as the Board of Directors of the Corporation (the "Board of Directors") may from time to time determine or the business of the Corporation may require.

ARTICLE II

STOCKHOLDERS' MEETINGS

Section 2.1. Place of Meetings. All meetings of the stockholders, whether annual or special, shall be held at an office of the Corporation or at such other place, within or outside the State of Delaware, as may be fixed from time to time by the Board of Directors.

Section 2.2. Annual Meetings.

(a) The annual meeting of the stockholders shall be held at such date and time as shall be designated from time to time by the Board of Directors and stated in the notice of annual meeting, at which such stockholders shall elect members to the Board of Directors and transact such other business as may properly be brought before such meeting. Nominations of persons for election to the Board of Directors of the Corporation and the proposal of business to be considered by the stockholders may be made at an annual meeting of stockholders (i) pursuant to the Corporation's notice of meeting of stockholders, (ii) by or at the direction of the Board of Directors or (iii) by any stockholder of the Corporation who was a stockholder of record at the time of giving of notice provided for in Section 2.2(b), who is entitled to vote at such meeting and who complied with the notice procedures set forth in Section 2.2(b). In lieu of holding an annual meeting of stockholders at a designated place, the Board of Directors may, in its sole discretion, determine that any annual meeting of stockholders may be held solely by means of remote communication, pursuant to Section 2.12.

(b) At an annual meeting of the stockholders, only such business as shall have been properly brought before such meeting shall be conducted. For nominations or other business to be properly brought before an annual meeting by a stockholder pursuant to Section 2.2(c) of these Amended and Restated Bylaws (these "Bylaws"), (i) such stockholder must have given timely notice thereof in writing to the Secretary of the Corporation, (ii) such other business must be a proper matter for stockholder action under the General Corporation Law of the State of Delaware, (iii) if such stockholder, or the beneficial owner on whose behalf any such nomination or proposal is made, has provided the Corporation with a Solicitation Notice (as such term is hereinafter defined), such stockholder or beneficial owner must, in the case of a nomination or nominations, have delivered a proxy statement and form of proxy to holders of a percentage of the Corporation's voting shares reasonably believed by such stockholder or beneficial owner to be sufficient to elect the nominee or nominees proposed to be nominated by such stockholder, and must, in either case, have included in such materials the Solicitation Notice or, in the case of a proposal, have delivered a proxy statement and form of proxy to holders of at least the percentage of the Corporation's voting shares required under applicable law to carry any such proposal and (iv) if no Solicitation Notice relating thereto has been timely provided pursuant to this Section 2.2(b), the stockholder or beneficial owner proposing such nomination or business must not have solicited a number of proxies sufficient to have required the delivery of such a Solicitation Notice under this Section 2.2. To be timely, a stockholder's notice shall be delivered to the Secretary of the Corporation at the principal executive offices of the Corporation not later than the close of business on the ninetieth (90th) day nor earlier than the close of business on the one hundred twentieth (120th) day prior to the first anniversary of the preceding year's annual meeting of the stockholders; provided, however, that in the event that the date of the annual meeting is scheduled more than thirty (30) days prior to the anniversary of the preceding year's annual meeting, notice by the stockholder, to be timely, must be so delivered not earlier than the close of business on the one hundred twentieth (120th) day prior to such annual meeting and not later than the close of business on the later of the ninetieth (90th) day prior to such annual meeting or the tenth (10th) day following the day on which public announcement of the date of such meeting is first made. In no event shall the public announcement of an adjournment of an annual meeting of the stockholders commence a new time period for the giving of a stockholder's notice as described above (the "Stockholder's Notice"). The Stockholder's Notice shall set forth (A) as to each person that the stockholder proposes to nominate for election or reelection as a director all information relating to such person that is required to be disclosed in solicitations of proxies for the election of directors in an election contest or is otherwise required, in each case pursuant to Regulation 14A under the Securities Exchange Act of 1934, as amended (the "1934 Act") (including such person's written consent to being named in the proxy statement as a nominee and to serving as a director if elected), (B) as to any other business that such stockholder proposes to bring before the meeting, a brief description of the business desired to be brought before such meeting, the text of the proposal or business (including the text of any resolutions proposed for consideration and in the event that such business includes a proposal to amend the Bylaws of the Corporation, the language of the proposed amendment), the reasons for conducting such business at the meeting and any material interest in such business of such stockholder and the beneficial owner, if any, on whose behalf such proposal is made and (C) as to the stockholder giving the notice and the beneficial owner, if any, on whose behalf such stockholder's nomination or proposal is made (i) the name and address of such stockholder, as they appear on the Corporation's books, and of such beneficial owner, (ii) the following information regarding the ownership interests

of the stockholder or such other beneficial owner, which shall be supplemented by such stockholder and such other beneficial owner not later than 10 days after the record date for the meeting to disclose such interests as of the record date: (A) the class and number of shares of the corporation that are owned beneficially and of record by the stockholder and such other beneficial owner; (B) any option, warrant, convertible security, stock appreciation right, or similar right with an exercise or conversion privilege or a settlement payment or mechanism at a price related to any class or series of shares of the Corporation or with a value derived in whole or in part from the value of any class or series of shares of the Corporation, whether or not such instrument or right shall be subject to settlement in the underlying class or series of capital stock of the Corporation or otherwise (a "Derivative Instrument") directly or indirectly owned beneficially by such stockholder and any other direct or indirect opportunity to profit or share in any profit derived from any increase or decrease in the value of shares of the Corporation; (C) any proxy, contract, arrangement, understanding, or relationship with respect to a nomination or proposal between or among such stockholder and/or such beneficial owner, any of their respective affiliates or associates, and any others acting in concert with any of the foregoing, including in the case of a nomination, the nominee or pursuant to which such stockholder or beneficial owner has a right or obligation to vote any shares of any security of the Corporation; (D) any short interest in any security of the Corporation (for purposes of this Section 2.2, a person shall be deemed to have a short interest in a security if such person directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, has the opportunity to profit or share in any profit derived from any decrease in the value of the subject security); (E) any rights to dividends on the shares of the Corporation owned beneficially by such stockholder that are separated or separable from the underlying shares of the Corporation; (F) any proportionate interest in shares of the Corporation or Derivative Instruments held, directly or indirectly, by a general or limited partnership in which such stockholder is a general partner or, directly or indirectly, beneficially owns an interest in a general partner; and (G) any performance-related fees (other than an asset-based fee) to which such stockholder is entitled based on any increase or decrease in the value of shares of the Corporation or Derivative Instruments, if any, as of the date of such notice, including, without limitation, any such interests held by members of such stockholder's immediate family sharing the same household, (iii) a representation that the stockholder is a holder of record of stock of the Corporation entitled to vote at such meeting and intends to appear in person or by proxy at the meeting to propose such business or nomination, and (iv) whether either such stockholder or beneficial owner intends (or is part of a group that intends) to deliver a proxy statement and form of proxy to holders of, in the case of a nomination or nominations, a sufficient number of holders of the Corporation's voting shares to elect such nominee or nominees or, in the case of the proposal, at least the percentage of the Corporation's voting shares required under applicable law to carry the proposal (an affirmative statement of such intent, a "Solicitation Notice").

(c) Notwithstanding anything in the second sentence of Section 2.2(b) of these Bylaws to the contrary, in the event that the number of directors to be elected to the Board of Directors of the Corporation is increased effective after the time period for which nominations would otherwise be due under Section 2.2(b) and there is no public announcement naming all of the nominees for director or specifying the size of the increased Board of Directors made by the Corporation at least one hundred (100) days prior to the first anniversary of the preceding year's annual meeting, a stockholder's notice required by this Section shall also be considered timely, but

only with respect to nominees for any new positions created by such increase, if it shall be delivered to the Secretary at the principal executive offices of the Corporation not later than the close of business on the tenth (10th) day following the day on which such public announcement is first made by Corporation.

(d) Notwithstanding the foregoing provisions of this Section 2.2, in order to include information with respect to a stockholder proposal in the proxy statement and form of proxy for a stockholders' meeting, stockholders must provide notice as required by the regulations promulgated under the 1934 Act. Nothing in these Bylaws shall be deemed to affect any rights of stockholders to request inclusion of proposals in the Corporation proxy statement pursuant to Rule 14a-8 under the 1934 Act.

(e) For purposes of this Section 2.2, "public announcement" shall mean disclosure in a press release reported by the Dow Jones News Service, Associated Press or comparable national news service or in a document publicly filed by the Corporation with the Securities and Exchange Commission pursuant to Section 13, 14 or 15(d) of the 1934 Act.

Section 2.3. Notice of Annual Meeting. Written notice of the annual meeting stating the place, date and time of the meeting, shall be given not less than ten nor more than sixty days before the date of the meeting to each stockholder entitled to vote at such meeting. If mailed, notice is given when deposited in the United States mail, postage prepaid, directed to the stockholder at his address as it appears on the records of the Corporation. In lieu of holding an annual meeting of stockholders at a designated place, the Board of Directors may, in its sole discretion, determine that any annual meeting of stockholders may be held solely by means of remote communication in accordance with Section 2.12.

Section 2.4. Stockholders' List. At least ten (10) days before every meeting of stockholders, a complete list of the stockholders entitled to vote at said meeting, arranged in alphabetical order and showing the address of each stockholder and the number of shares registered in the name of each stockholder, shall be prepared by the Secretary. Such list shall be open to the examination of any stockholder, for any purpose germane to the meeting, during ordinary business hours, for a period of at least ten days prior to the meeting at the place where the meeting is to be held. The list shall also be produced and kept at the time and place of the meeting during the whole time thereof, and may be inspected by any stockholder who is present. If the meeting is held solely by means of remote communication, then the list shall be open to the examination of any stockholder during the whole time of the meeting on a reasonably accessible electronic network, and the information required to access the list shall be provided with the notice of the meeting.

Section 2.5. Special Meetings.

(a) Pursuant to the Certificate of Incorporation, special meetings of the stockholders of the Corporation for any purpose or purposes may be called at any time by the President or Chief Executive Officer of the Corporation, the Chairperson of the Board of Directors, the Board of Directors or by a committee of the Board of Directors which has been duly designated by the Board of Directors and the powers and authority of which, as provided in a resolution of the

Board of Directors or in the Bylaws of the Corporation, include the power to call such meetings. Such special meetings may not be called by any other person or persons.

(b) If a special meeting is properly called by any person or persons other than the Board of Directors, the request shall be in writing, specifying the general nature of the business proposed to be transacted, and shall be delivered personally or sent by registered mail or by telegraphic or other facsimile transmission to the Secretary of the Corporation. No business may be transacted at such special meeting, otherwise than specified in such notice or as resolved by the Board of Directors. The Board of Directors shall determine the time and place of such special meeting, which shall be held not less than thirty- five (35) nor more than one hundred twenty (120) days after the date of the receipt of the request. Upon determination of the time and place of the meeting, the Secretary shall cause notice to be given to the stockholders entitled to vote, in accordance with the provisions of Section 2.6 of these Bylaws. If the notice is not given within one hundred (100) days after the receipt of the request, the person or persons properly requesting the meeting may set the time and place of the meeting and give the notice. Nothing contained in this paragraph (b) shall be construed as limiting, fixing, or affecting the time when a meeting of stockholders called by action of the Board of Directors may be held.

(c) Nominations of persons for election to the Board of Directors may be made at a special meeting of stockholders at which directors are to be elected pursuant to the Corporation's notice of meeting (i) by or at of the direction of the Board of Directors or (ii) provided that the Board of Directors has determined that directors shall be elected at such meeting, by any stockholder of the Corporation who is a stockholder of record at the time of giving notice provided for in these Bylaws who shall be entitled to vote at the meeting and who complies with the notice procedures set forth in this Section 2.5(c). In the event the Corporation calls a special meeting of stockholders for the purpose of electing one or more directors to the Board of Directors, any such stockholder may nominate a person or persons (as the case may be), for election to such position(s) as specified in the Corporation's notice of meeting, if a Stockholder's Notice (as provided pursuant to Section 2.2(b) of these Bylaws) shall be delivered to the Secretary at the principal executive offices of the Corporation not earlier than the close of business on the one hundred twentieth (120th) day prior to such special meeting and not later than the close of business on the later of the ninetieth (90th) day prior to such meeting or the tenth (10th) day following the day on which public announcement is first made of the date of the special meeting and of the nominees proposed by the Board of Directors to be elected at such meeting. In no event shall the public announcement of an adjournment of a special meeting commence a new time period for the giving of a stockholder's notice as described above.
