Total interest cost recognized	$ 3,225	$ 3,124	$ 6,421	$ 6,217

Term Loan

On December 7, 2011, our wholly owned subsidiary Molina Center LLC entered into a Term Loan Agreement with various lenders and East West Bank, as Administrative Agent (the "Administrative Agent"). Pursuant to the terms of the Term Loan Agreement, Molina Center LLC borrowed the aggregate principal amount of $48.6 million to finance a portion of the $81 million purchase price for the acquisition of the approximately 460,000 square foot office building, or Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period (as defined below) commencing January 1, 2012. The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. "Interest Period" means the period commencing on the first day of each calendar month and ending on the last day of such calendar month. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commenced on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Interest Rate Swap

In May 2012, we entered into a $42.5 million notional amount interest rate swap agreement, or Swap Agreement, with an effective date of March 1, 2013. While not designated as a hedge during the quarter ended June 30, 2012, the Swap Agreement is intended to reduce our exposure to fluctuations in the contractual variable interest rates under our Term Loan Agreement, and expires on the maturity date of the Term Loan Agreement, November 30, 2018. Under the Swap Agreement, we will receive a variable rate of the one-month LIBOR plus 3.25%, and pay a fixed rate of 5.34%. The Swap Agreement is measured and reported at fair value on a recurring basis, within Level 2 of the fair value hierarchy. Gains and losses relating to changes in its fair value are reported in earnings in the current period. As of June 30, 2012, the fair value of the Swap Agreement is a liability of $1.1 million, recorded to other noncurrent liabilities. Because the fair value of the Swap Agreement was zero at its inception in May 2012, the entire amount of the liability was charged to general and administrative expense in the quarter ended June 30, 2012. We do not use derivatives for trading or speculative purposes. We believe that we are not exposed to more than a nominal amount of credit risk relating to the Swap Agreement because the counterparty is an established and well-capitalized financial institution.

11. Stockholders' Equity

Securities Repurchase Program. Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see Note 10, "Long-Term Debt"). The repurchase program will be funded with working capital or the Company's credit facility, and repurchases may be made from time to time on the open market or through privately negotiated transactions. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time. No securities were purchased under this program in the six months ended June 30, 2012.

Stock Plans. In connection with the plans described in Note 4, "Share-Based Compensation," we issued approximately 712,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the six months ended June 30, 2012. Stock plan activity resulted in a $9.5 million increase to additional paid-in capital for the same period.

12. Segment Reporting

We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans which serve Medicaid populations in nine states (subsequent to the termination of our Medicaid contract in Missouri effective June 30, 2012), and also includes our smaller direct delivery line of business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in an additional five states.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

13. Commitments and Contingencies

Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Molina Medicaid Solutions

On April 6, 2012, Molina Medicaid Solutions received a schedule from the state of Maine purporting to represent the approximately $32.6 million in damages suffered by the state related to the delay in the "go live" date for the state's MMIS from March 1, 2010 to September 1, 2010, and for other unspecified matters. The level of detail provided in the schedule is not adequate for us to determine the specific nature of the damages claimed by the state. No formal claim has been asserted against us by the state, nor has any legal basis been asserted for any potential claims against us. To the extent that the state decides to pursue its alleged claims against us, Unisys Corporation, or Unisys, the former owner of the MMIS, has agreed to assume the defense of that portion of the claim related to the delay in the "go live" date from March 1, 2010 to August 1, 2010, since that delay had been agreed upon with the state prior to our May 1, 2010 acquisition of Molina Medicaid Solutions from Unisys. The amount of our potential liability related to this matter, if any, cannot be reasonably estimated at this time, nor can a range of such possible liability be established.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $528.3 million at June 30, 2012, and $492.4 million at December 31, 2011.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of June 30, 2012, our health plans had aggregate statutory capital and surplus of approximately $542.1 million compared with the required minimum aggregate statutory capital and surplus of approximately $265.8 million. All of our health plans except our Wisconsin health plan were in compliance with the minimum capital requirements at June 30, 2012. In late July 2012 we contributed sufficient capital to our Wisconsin health plan to ensure compliance with its minimum capital requirements. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Receivable/Liability for Ceded Life and Annuity Contracts

Prior to February 17, 2012, we reported a 100% ceded reinsurance arrangement for life insurance policies written and held by our wholly owned insurance subsidiary, Molina Healthcare Insurance Company, by recording a non-current receivable from the reinsurer with a corresponding non-current liability for ceded life and annuity contracts. Effective February 17, 2012, we sold Molina Healthcare Insurance Company. The transaction resulted in the elimination of both the noncurrent receivable and liability for ceded life and annuity contracts, each amounting to $23.4 million as of December 31, 2011. Additionally, a gain of approximately $2.4 million was recorded upon closing of the transaction, recorded to general and administrative expenses in the accompanying consolidated income statement.

We remain liable for benefits payable under the life insurance policies that were held by Molina Healthcare Insurance Company, in the event that both the reinsurer and the buyer of Molina Healthcare Insurance Company are unable to pay those benefits. We believe the possibility of our having to pay such benefits is remote, and no provision for the payment of such benefits is included in our consolidated financial statements.

14. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. For the three months ended June 30, 2012 and 2011, we paid $7.0 million, and $6.6 million, respectively, for medical service fees to this provider. For the six months ended June 30, 2012 and 2011, we paid $13.6 million, and $11.9 million, respectively, for medical service fees to this provider.

Item 2. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbour provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbour provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- the success and timing of our medical cost containment initiatives in Texas, the finalization of rate increases in Texas effective September 1, 2012, and other risks associated with the expansion of our Texas health plan's service areas as of March 1, 2012;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- uncertainties regarding the implementation of the Patient Protection and Affordable Care Act, including the potential refusal of a state to expand Medicaid eligibility to its uninsured population, issues surrounding state insurance exchanges, the impact of the health insurance industry excise tax, the effect of various implementing regulations, and uncertainties regarding the impact of other federal or state health care and insurance reform measures;
- management of the Company's medical costs, including seasonal flu patterns and rates of utilization that are consistent with the Company's expectations, and the reduction over time of the high medical costs associated with new populations;
- the success of the Company's efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, and the Company's ability to grow the Company's revenues consistent with the Company's expectations;
- the accurate estimation of incurred but not reported medical costs across the Company's health plans;
- risks associated with the continued growth in new Medicaid and Medicare enrollees, and the development of actuarially sound rates with respect to such new enrollees, including dually eligible enrollees;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates;
- the continuation and renewal of the government contracts of both the Company's health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;

- the timing of receipt and recognition of revenue and the amortization of expense under the state contracts of Molina Medicaid Solutions in Maine or Idaho;
- additional administrative costs and the potential payment of additional amounts to providers and/or the state by Molina Medicaid Solutions as a result of MMIS implementation issues in Maine or Idaho;
- government audits and reviews, and any enrollment freeze or monitoring program that may result therefrom;
- changes with respect to the Company's provider contracts and the loss of providers;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive, and the interpretation and implementation of medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures;
- approval by state regulators of dividends and distributions by the Company's health plan subsidiaries;
- changes in funding under the Company's contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation, arbitration, or administrative proceedings, including the Medicaid RFA litigation and duals RFA protest matters now pending in the state of Ohio;
- restrictions and covenants in the Company's credit facility;
- the relatively small number of states in which we operate health plans;
- the availability of financing to fund and capitalize the Company's acquisitions and start-up activities and to meet the Company's liquidity needs;
- a state's failure to renew its federal Medicaid waiver;
- an inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- changes in general economic conditions, including unemployment rates; and
- increasing consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2011, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2011.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. Our business comprises our Health Plans segment, consisting of licensed health maintenance organizations serving Medicaid populations in nine states, and our Molina Medicaid Solutions segment, which provides design, development, implementation, and business process outsourcing solutions to Medicaid agencies in an additional five states. We also have a direct delivery business that currently consists of primary care community clinics in California and Washington; additionally, we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

We report our financial performance based on the following two reportable segments: Health Plans; and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. This segment serves approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts are renewable at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause upon 30 days to nine months with prior written notice. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's prior contract with the state expired without renewal on June 30, 2012 subject to certain transition obligations. For the six months ended June 30, 2012, our Missouri health plan contributed premium revenue of $113.8 million, or 4.1% of total premium revenue, and comprised 79,000 members, or 4.3% of total Health Plans segment membership as of June 30, 2012.

Our state Medicaid contracts may be periodically adjusted to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas. For example, our Texas health plan added significant membership effective March 1, 2012, in service areas we had not previously served (the Hidalgo and El Paso service areas); and among populations we had not previously served within existing service areas, such as the Temporary Assistance for Needy Families, or TANF, population in the Dallas service area. Additionally, the health benefits provided to our TANF and ABD members in Texas under our contracts with the state were expanded to include inpatient facility and pharmacy services.

Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program.

On July 13, 2012, our Molina Medicaid Solutions segment received full federal certification of its MMIS from the Centers for Medicare and Medicaid Services, or CMS. As a result of the CMS certification, the state of Idaho is entitled to receive federal reimbursement of 75% of its MMIS operations costs retroactive to June 1, 2010, the date that the system first began processing claims.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement MMIS to another company. For the six months ended June 30, 2012, our revenue under the Louisiana MMIS contract was $24.7 million, or 29.4% of total service revenue. We expect that we will continue to perform under this contract through implementation and acceptance of the successor MMIS. Based upon our past experience and our knowledge of the Louisiana MMIS bid process, we believe that implementation and acceptance of the successor MMIS will not occur until 2014 at the earliest. Through implementation and acceptance of the successor MMIS we expect to recognize approximately $40 million in revenue annually under our Louisiana MMIS contract.

During fiscal year 2012, we expect to respond to several RFPs and invitations to negotiate with respect to new business, including proposals to serve dual eligible populations and applications to participate in CMS' Capitated Financial Alignment Demonstration project. In addition, with regard to existing business, we expect the state of New Mexico to issue an RFP for all Medicaid services (Salud!, Behavioral Health, and Coordination of Long-Term Care Services (duals)) in September 2012, with the new Medicaid contract to start on January 1, 2014.

The Company's Board of Directors has organized a special committee of independent directors to consider and negotiate a possible transaction involving certain real property located in Long Beach, California. The property is owned by 6th and Pine Development, LLC, the members of which include John C. Molina, our chief financial officer and a director, and his wife. Negotiations between the special committee and 6th and Pine Development are currently ongoing. In the event we agree to enter into a transaction for space with 6th and Pine Development, we will promptly report our execution of such agreement in a current report on Form 8-K.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the six months ended June 30, 2012, we received approximately 95% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the six months ended June 30, 2012, we recognized approximately 5% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children's Health Insurance Program, or CHIP, members are generally among our lowest, with rates as low as approximately $75 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the TANF Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $110 in California to $260 in Ohio. Among our ABD membership, PMPM premiums range from approximately $340 in Utah to $1,400 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, inpatient, behavioral health and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums, at approximately $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	June 30, 2012	March 31, 2012	December 31, 2011	June 30, 2011
Total Ending Membership by Health Plan:				
California	350,000	351,000	355,000	348,000
Florida	70,000	69,000	69,000	66,000
Michigan	220,000	222,000	222,000	220,000
Missouri (1)	79,000	81,000	79,000	80,000
New Mexico	89,000	89,000	88,000	89,000
Ohio	260,000	249,000	248,000	245,000
Texas	301,000	280,000	155,000	129,000
Utah	86,000	86,000	84,000	82,000
Washington	356,000	356,000	355,000	345,000
Wisconsin	42,000	42,000	42,000	41,000
Total	1,853,000	1,825,000	1,697,000	1,645,000
Total Ending Membership by State for our Medicare Advantage Plans:				
California	7,000	6,900	6,900	6,000
Florida	900	800	800	600
Michigan	8,900	8,500	8,200	7,100
New Mexico	900	900	800	700
Ohio	200	200	200	200
Texas	800	800	700	600
Utah	8,300	8,100	8,400	7,000
Washington	5,700	5,200	5,000	4,000
Total	32,700	31,400	31,000	26,200
Total Ending Membership by State for our Aged, Blind or Disabled Population:				
California	41,100	37,300	31,500	17,000
Florida	10,400	10,500	10,400	10,300
Michigan	40,000	38,800	37,500	31,600
New Mexico	5,600	5,600	5,600	5,600
Ohio	29,600	29,700	29,100	28,700
Texas	111,000	109,000	63,700	52,000
Utah	8,800	8,700	8,500	8,300
Washington	4,400	4,700	4,800	4,400
Wisconsin	1,700	1,700	1,700	1,700
Total	252,600	246,000	192,800	159,600

(1) Our contract with the state of Missouri expired without renewal on June 30, 2012.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service* — Expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.
- *Capitation* — Expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- *Pharmacy* — Expenses for all drug, injectible, and immunization costs paid through our pharmacy benefit manager.
- *Other* — Expenses for medically related administrative costs of approximately $62.6 million, and $49.6 million, for the six months ended June 30, 2012 and 2011, respectively, as well as certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Policies" below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our contracts in Idaho, Louisiana, Maine, New Jersey, West Virginia, and Florida. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

Second Quarter Financial Performance Summary

The following table and narrative briefly summarizes our financial and operating performance for the three and six months ended June 30, 2012. Comparable metrics for the second quarter of 2011 are also shown. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are computed as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(Dollar amounts in thousands, except per share data)			
(Loss) earnings per diluted share	$ (0.80)	$ 0.38	$ (0.42)	$ 0.75
Premium revenue	$1,492,272	$1,128,770	$2,819,721	$2,210,208
Service revenue	$ 41,724	$ 36,888	$ 83,929	$ 73,562
Operating (loss) income	$ (59,267)	$ 31,410	$ (25,847)	$ 62,710
Net (loss) income	$ (37,306)	$ 17,440	$ (19,217)	$ 34,828
Total ending membership	1,853,000	1,645,000	1,853,000	1,645,000
Premium revenue	97.1 %	96.7 %	96.9 %	96.7 %
Service revenue	2.7	3.2	2.9	3.2

Effective tax rate	(40.9) %	37.1 %	(43.4) %	37.2 %

Second Quarter 2012 Overview

For the second quarter of 2012, our net loss was $37.3 million, or $0.80 per diluted share, compared with net income of $17.4 million, or $0.38 per diluted share, for the second quarter of 2011.

Our financial performance in the second quarter of 2012 was impacted by challenges with our aged, blind or disabled, or ABD, contracts in Texas, particularly in the Hidalgo and El Paso service areas, and losses in Missouri (where our health plan terminated operations effective June 30, 2012), and in Wisconsin. We believe that our financial performance issues in the quarter were limited to our Texas, Missouri, and Wisconsin health plans. Excluding the Texas, Missouri and Wisconsin health plans, our overall medical care ratio was 85.3% and 84.4% for the three months and six months ended June 30, 2012, respectively. We will receive rate increases in Texas effective September 1, 2012, which together with various initiatives to reduce utilization and decrease unit costs, are expected to improve the performance of the Texas health plan.

Results of Operations

Three Months Ended June 30, 2012 Compared with the Three Months Ended June 30, 2011

Health Plans Segment

Premium Revenue

Premium revenue for the second quarter of 2012 increased 32% over the second quarter of 2011, due primarily to membership increases, a shift in member mix to populations generating higher premium revenue per member per month (PMPM), and increased revenue linked to benefit expansions.

Membership at the Texas health plan more than doubled year over year, while also growing significantly in Ohio and Washington. Growth in our ABD membership led to higher premium revenue PMPM in 2012. ABD membership, as a percent of total membership, has increased over 40% year over year. Premium revenue PMPM also increased in the second quarter of 2012 as a result of the inclusion of revenue from the pharmacy benefit for our Ohio health plan effective October 1, 2011, and as a result of the inclusion of revenue from the inpatient facility and pharmacy benefits across all of our Texas health plan membership effective March 1, 2012.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended June 30,					
	2012			2011		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 981,002	$176.60	71.2 %	$695,551	$ 140.80	73.2 %
Capitation	138,891	25.00	10.1	125,958	25.50	13.2
Pharmacy	212,944	38.33	15.5	87,870	17.79	9.4
Other	44,740	8.07	3.2	39,980	8.09	4.2
Total	$1,377,577	$ 248.00	100.0 %	$ 949,359	$192.18	100.0 %

Medical care costs increased in the second quarter of 2012 primarily due to high costs at our Texas health plan and the addition of the pharmacy benefit in Ohio effective October 1, 2011. The Company's medical margin deteriorated year over year primarily due to:

- Higher medical costs in Texas and higher medical costs for ABD members in California; and
- Rate decreases of approximately 2% in Ohio effective January 1, 2012, and of approximately 3% in California effective July 1, 2011.

Individual Health Plan Analysis

The Texas health plan added 172,000 members and $255.1 million in revenue year over year. Most of this growth was due to regional and benefit expansions effective March 1, 2012. The medical care ratio of the Texas health plan was 109.4% for the second quarter of 2012, compared with 95.0% for the second quarter of 2011. Because revenues of the Texas health plan constituted nearly 25% of our total premium revenue for the second quarter of 2012, the high medical care ratio in that state had a disproportionately large impact on our overall financial results. Absent $14.1 million of unfavorable prior period development of claims reserves from the first quarter of 2012 and the impact of the $10.0 million premium deficiency reserve discussed below, the medical care ratio of the Texas health plan would have been approximately 102.7% in the second quarter of 2012. The following table captures the effect of prior period development and the premium deficiency reserve on the Texas health plan's medical care ratio and medical care costs for the three months ended June 30, 2012:

	Texas Results for the Quarter Ended June 30, 2012 (Dollars in thousands)	
	Medical Care Ratio	Medical Care Costs
Reported financial performance	109.4%	$ 393,237
Impact of prior period claims development	(3.9)	(14,100)
Impact of premium deficiency reserve (two months ending August 31, 2012)	(2.8)	(10,000)
Medical ratio and medical care costs adjusted to exclude impact of prior period development and premium deficiency reserve	102.7%	$369,137

We believe that premium rates associated with the ABD contracts in the Hidalgo and El Paso service areas are not adequate to cover the medical costs associated with serving members under existing conditions. Utilization of long term care services, including personal attendant services and adult day health care services, is currently far exceeding the utilization of those services elsewhere in the state, and also far exceeding the utilization assumptions used by the state of Texas in the development, and our evaluation of, premium rates.

We recorded a premium deficiency reserve for the Texas health plan at June 30, 2012 of $10.0 million. This premium deficiency reserve encompasses the contract period ending August 31, 2012. The state of Texas has released preliminary rates effective September 1, 2012. We believe that these preliminary rates, if enacted, will yield a blended rate increase of approximately 6% overall (approximately $7.4 million per month) for the Texas health plan. We believe that the premium rates effective in Texas on September 1, 2012, together with various medical cost containment initiatives, will allow the Texas health plan to return to profitability during Texas state fiscal year 2013 (September 1, 2012 through August 31, 2013).

The medical care ratio for the ABD membership in the Hidalgo and El Paso service areas was 139% and 146%, respectively, during the second quarter of 2012. Absent unfavorable prior period development from the first quarter of 2012 and the premium deficiency reserve, the medical care ratios of the ABD membership in the Hidalgo and El Paso service areas would have been 116% and 133%, respectively, consistent with our estimates. The medical care ratio for the aggregate ABD membership in Texas was approximately 119%. Absent unfavorable prior period development of claims reserves and the premium deficiency reserve, the medical care ratio for the aggregate ABD membership in Texas was approximately 109%. ABD membership overall constitutes approximately 70% of all Texas health plan revenue. ABD membership in the Hidalgo and El Paso service areas alone contributed 28% of the Texas health plan's total revenue for the second quarter of 2012.

We estimate that the current monthly loss before taxes for the Texas health plan overall is approximately $14 million, inclusive of payments made under its management services agreement with Molina Healthcare, Inc., the corporate parent of the Texas health plan. We believe that the profitability of the Texas health plan will improve over time by the estimated amounts shown below. We also believe that enrollment may decrease at the Texas health plan during the third quarter of 2012.

	Expected Monthly Increase to Profitability (In thousands)
Blended rate increase effective September 1, 2012	$ 7,400
Provider contract changes expected to be effective by December 2012	3,400
Other initiatives (including changes to hospital payments and prior authorizations) expected to be effective by December 2012)	3,200
	$ 14,000

The increase in the medical care ratio of the California health plan year over year was primarily due to premium rate reductions effective July 1, 2011, and the mandatory assignment of ABD members previously served under fee-for-service arrangements. These members were transitioned into managed care plans effective upon their month of birth beginning in June 2011. The last of these members were transitioned into managed care in May 2012. The medical care ratio for these new members is approximately 95% compared with a medical care ratio of approximately 85% for ABD members not subject to mandatory enrollment. Individuals who are new to managed care often have higher utilization of medical services upon initially enrolling into managed care plans. Utilization of heath care services is declining, however, for those ABD members added earlier in the mandatory enrollment process. This data leads us to believe that medical care costs will decrease for the mandatory ABD members over time.

Profitability at the Florida health plan improved substantially year over year due to a premium rate increase effective September 1, 2011, the re-contracting of portions of the health plan's specialty care network, and lower inpatient utilization.

The medical care ratio of the Michigan health plan increased to 87.1% in the second quarter of 2012, from 78.7% in the second quarter of 2011. The higher medical care ratio in 2012 was the result of a reduction to premium rates that was linked to a decrease in premium taxes, and higher pharmacy and inpatient facility costs. Partially offsetting the higher medical care ratio was a decrease of $8.7 million in premium tax expense. Both premium taxes and premium rates were reduced equivalently effective April 1, 2012. If the reduction to premium rates linked to a decrease in premium taxes had been in effect in the prior year, the medical care ratio for the second quarter of 2011 would have been approximately 82%.

The medical care ratio of the Missouri health plan increased to 104.9% in the second quarter of 2012 compared with 90.2% in the second quarter of 2011. The increase in the medical care ratio was primarily the result of higher inpatient utilization and high dollar claims. Unfavorable prior period development of claims reserves from the first quarter of 2012 was $7.6 million in the second quarter of 2012.

Profitability at the New Mexico health plan improved substantially year over year due to the absence in 2012 of contractually required reductions to revenue made in 2011.

The medical care ratio of the Ohio health plan increased to 82.6% for the second quarter of 2012 from 77.6% for the second quarter of 2011. The increase in the Ohio health plan's medical care ratio was primarily the result of a 2% rate reduction effective January 1, 2012, together with the assumption of the lower margin pharmacy benefit effective October 1, 2011. Although the Ohio health plan's medical care ratio increased in 2012, the medical margin (measured as total premium revenue less total medical care costs) remained constant.

Absent a one-time revenue benefit of $12.1 million recorded in the second quarter of 2011, the medical care ratio of the Utah health plan decreased to 82.5% in the second quarter of 2012 from 89.4% in the second quarter of 2011.

Lower inpatient facility costs tied to reduced inpatient utilization led the Washington health plan to report improved profitability year over year.

The Wisconsin health plan reported a medical care ratio of 121.1% for the second quarter of 2012 compared with 80.8% for the second quarter of 2011. We believe that premium rates associated with its contract in the state of Wisconsin are not adequate to cover the costs of servicing that contract. Accordingly, we recorded a premium deficiency reserve for the Wisconsin health plan at June 30, 2012 of $3.0 million. The Wisconsin health plan will receive new premium rates effective January 1, 2013. Absent the $3.0 million premium deficiency reserve, the medical care ratio of the Wisconsin health plan would have been approximately 105.2% for the second quarter of 2012.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended June 30, 2012						
	Member Months (1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	1,056	$ 167,644	$ 158.77	$ 149,239	$ 141.34	89.0 %	$ 2,695
Florida	210	57,303	273.00	48,442	230.79	84.5	(20)

Wisconsin	125	18,788	150.12	22,758	181.84	121.1	—
Other (3)	—	2,372	—	11,654	—	—	144
	5,555	$1,492,272	$268.65	$1,377,577	$ 248.00	92.3 %	$ 39,629

	Three Months Ended June 30, 2011						
	Member Months (1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	1,043	$ 139,097	$ 133.35	$ 117,511	$112.66	84.5 %	$ 1,921
Florida	197	49,770	252.78	48,294	245.29	97.0	34
Michigan	668	165,575	247.74	130,325	195.00	78.7	9,728
Missouri (2)	243	56,625	232.80	51,100	210.08	90.2	—
New Mexico	270	81,973	304.29	68,579	254.57	83.7	2,423
Ohio	736	230,874	313.36	179,102	243.09	77.6	17,782
Texas	391	104,399	267.06	99,154	253.64	95.0	2,063
Utah	244	77,507	318.32	58,473	240.15	75.4	—
Washington	1,027	202,595	197.39	171,742	167.33	84.8	3,662
Wisconsin	121	17,840	147.02	14,415	118.79	80.8	44
Other (3)	—	2,515	—	10,664	—	—	52
	4,940	$1,128,770	$ 228.50	$ 949,359	$192.18	84.1 %	$ 37,709

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) Our contract with the state of Missouri expired without renewal on June 30, 2012.
(3) "Other" medical care costs also include medically related administrative costs at the parent company.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended June 30, 2012	2011
	(In thousands)	
Service revenue before amortization	$ 41,877	$ 38,434
Amortization recorded as reduction of service revenue	(153)	(1,546)
Service revenue	41,724	36,888
Cost of service revenue	30,613	39,215
General and administrative costs	3,187	1,875
Amortization of customer relationship intangibles recorded as amortization	1,282	1,282
Operating income (loss)	$ 6,642	$ (5,484)

Operating income for our Molina Medicaid Solutions segment improved $12.1 million for the three months ended June 30, 2012, compared with the same prior year period. This improvement was primarily the result of stabilization of our newest Medicaid Management Information Systems, or MMIS, in Idaho and Maine. As discussed earlier, our Idaho MMIS has received full federal certification. Among the reasons cited by the Company for purchasing Molina Medicaid Solutions effective May 1, 2010, was the benefit of reducing our reliance on health plan operations. For the quarter ended June 30, 2012, the Molina Medicaid Solutions segment gross margin rate was 27%, compared with 8% for the Health Plans segment.

Six Months Ended June 30, 2012 Compared with the Six Months Ended June 30, 2011

Health Plans Segment

Premium Revenue

In the six months ended June 30, 2012, compared with the six months ended June 30, 2011, premium revenue grew 28% due to a membership increase of approximately 9.5% (on a member-month basis), and PMPM revenue increase of approximately 16.6%. Medicare premium revenue was $230.5 million for the six months ended June 30, 2012, compared with $180.8 million for the six months ended June 30, 2011.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Six Months Ended June 30,					
	2012			2011		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$1,758,269	$ 163.13	70.1 %	$ 1,351,435	$ 137.31	72.5 %
Capitation	274,929	25.51	11.0	254,640	25.87	13.7
Pharmacy	386,181	35.83	15.4	179,446	18.23	9.6
Other	89,186	8.28	3.5	77,370	7.86	4.2
Total	$2,508,565	$232.75	100.0 %	$1,862,891	$189.27	100.0 %

Our medical care ratio and medical margin deteriorated in the six months ended June 30, 2012, when compared with the six months ended June 30, 2011, for the same reasons described above in the “Three Months Ended June 30, 2012 Compared with the Three Months Ended June 30, 2011.”

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Six Months Ended June 30, 2012						
	Member Months (1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	2,115	$ 329,329	$ 155.70	$ 290,588	$ 137.39	88.2 %	$ 5,004
Florida	418	113,493	271.44	98,011	234.41	86.4	(13)

Texas	740	185,210	250.28	172,769	233.47	93.3	3,403
Utah	480	145,442	303.28	112,312	234.20	77.2	—
Washington	2,061	397,867	193.09	340,857	165.42	85.7	7,323
Wisconsin	241	34,257	142.17	33,794	140.25	98.7	44
Other (3)	—	4,448	—	19,819	—	—	95
	9,843	$ 2,210,208	$ 224.56	$ 1,862,891	$ 189.27	84.3 %	$ 74,259

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) Our contract with the state of Missouri expired without renewal on June 30, 2012.
(3) "Other" medical care costs also include medically related administrative costs of the parent company.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Six Months Ended June 30,	
	2012	2011
	(In thousands)	
Service revenue before amortization	$ 84,235	$ 77,294
Amortization recorded as reduction of service revenue	(306)	(3,732)
Service revenue	83,929	73,562
Cost of service revenue	61,107	70,436
General and administrative costs	5,207	4,352
Amortization of customer relationship intangibles recorded as amortization	2,564	2,564
Operating income (loss)	$15,051	$ (3,790)

Operating income for our Molina Medicaid Solutions segment improved $18.8 million for the six months ended June 30, 2012, compared with the same prior year period for the reasons discussed above in "Three Months Ended June 30, 2012 Compared with the Three Months Ended June 30, 2011."

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses increased to 8.6% of total revenue for the three months ended June 30, 2012, compared with 8.3% of total revenue for the three months ended June 30, 2011. General and administrative expenses increased to 8.6% of total revenue for the six months ended June 30, 2012, compared with 8.4% of total revenue for the six months ended June 30, 2011. The increased ratio of general and administrative expenses to total revenue, for both the three months and six months ended June 30, 2012, was due primarily to investment in administrative infrastructure relating to our membership growth in Texas, and in anticipation of opportunities among the dual-eligible population.

Premium Tax Expense

Premium tax expense decreased to 2.7% of premium revenue for the three months ended June 30, 2012, from 3.3% in the three months ended June 30, 2011, and decreased to 2.9% of premium revenue, in the six months ended June 30, 2012, from 3.4% in the six months ended June 30, 2011. This decrease was primarily due to the reduction of premium taxes at the Michigan health plan effective April, 2012, as discussed in "Three Months Ended June 30, 2012 Compared with the Three Months Ended June 30, 2011," above, and the growth in revenue at our Texas health plan, which is subject to a lower premium tax (measured as a percentage of premium revenue) than our consolidated average.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of operations. Amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of operations as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and Amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service Revenue;" and
- Amortization of capitalized software is recorded within the heading "Cost of Service Revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of operations, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Three Months Ended June 30,			
	2012		2011	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software	$ 10,851	0.7 %	$ 7,225	0.6 %
Amortization of intangible assets	5,536	0.4	5,265	0.5
Depreciation and amortization reported as such in the consolidated statements of operations	16,387	1.1	12,490	1.1
Amortization recorded as reduction of service revenue	153	—	1,546	0.1
Amortization of capitalized software recorded as cost of service revenue	3,131	0.2	2,472	0.2
Total	$19,671	1.3 %	$16,508	1.4 %

	Six Months Ended June 30,			
	2012		2011	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software	$ 20,323	0.7 %	$ 14,625	0.6 %
Amortization of intangible assets	11,089	0.4	10,532	0.5
Depreciation and amortization reported as such in the consolidated statements of operations	31,412	1.1	25,157	1.1
Amortization recorded as reduction of service revenue	306	—	3,732	0.2
Amortization of capitalized software recorded as cost of service revenue	6,292	0.2	5,713	0.2
Total	$ 38,010	1.3 %	$ 34,602	1.5 %

Interest Expense

Interest expense increased to $3.8 million for the three months ended June 30, 2012, from $3.7 million for the three months ended June 30, 2011, and increased to $8.1 million for the six months ended June 30, 2012, from $7.3 million for the six months ended June 30, 2011 due primarily to interest expense associated with the Company's purchase of its corporate headquarters building in December 2011. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $1.5 million and $1.4 million for the three months ended June 30, 2012, and 2011, respectively, and $2.9 million and $2.7 million for the six months ended June 30, 2012, and 2011, respectively

Income Taxes

The provision for income taxes is recorded at an effective rate of 40.9% for the three months ended June 30, 2012 compared with 37.1% for the three months ended June 30, 2011, and 43.4% for the six months ended June 30, 2012 compared with 37.2% for the six months ended June 30, 2011. The higher rates in 2012 are primarily due to the greater proportional impact of non-deductible expenses on the effective tax rate as earnings before taxes decrease.

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of June 30, 2012, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income decreased to $2.8 million for the six months ended June 30, 2012, compared with $3.0 million for the six months ended June 30, 2011. Our annualized portfolio yield for the six months ended June 30, 2012 was 0.5% compared with 0.7% for the six months ended June 30, 2011.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash provided by operating activities for the six months ended June 30, 2012 was $236.0 million compared with $114.9 million for the six months ended June 30, 2011, an increase of $121.1 million. Higher medical claims and benefits payable at our Texas health plan was the primary reason for the increase in cash flow provided by operating activities, followed by an increase in deferred revenue. Medical claims and benefits payable were a source of operating cash of $123.1 million in the six months ended June 30, 2012 compared with a use of operating cash of $12.7 million in the six months ended June 30, 2011. Deferred revenue was a source of operating cash amounting to $125.4 million in the six months ended June 30, 2012, compared with $38.1 million in the six months ended June 30, 2011.

Reconciliation of Non-GAAP [1] to GAAP Financial Measures

EBITDA [2]

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(In thousands)			
Net (loss) income	$ (37,306)	$ 17,440	$(19,217)	$ 34,828
Add back:				
Depreciation and amortization reported in the consolidated statements of cash flows	19,671	16,508	38,010	34,602
Interest expense	3,808	3,683	8,106	7,286
Provision for income taxes	(25,769)	10,287	(14,736)	20,596
EBITDA	$(39,596)	$47,918	$ 12,163	$ 97,312

(1) GAAP stands for U.S. generally accepted accounting principles.

(2) EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities, nor should EBITDA be considered in isolation from these GAAP measures of operating performance. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At June 30, 2012, the parent company — Molina Healthcare, Inc. — held cash and investments of approximately $39.8 million, compared with approximately $23.6 million of cash and investments at December 31, 2011.

On a consolidated basis, at June 30, 2012, we had working capital of $481.9 million compared with $446.2 million at December 31, 2011. At June 30, 2012 we had cash and investments of $1,128.7 million, compared with $893.0 million of cash and investments at December 31, 2011.

Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see discussion of "Convertible Senior Notes" below). The repurchase program will be funded with working capital or draws under our credit facility (see discussion of "Credit Facility" below).

We believe that our cash resources, Credit Facility, and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Credit Facility

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility (the "Credit Facility") with various lenders and U.S. Bank National Association, as LC Issuer, Swing Line Lender, and Administrative Agent. The Credit Facility is used for general corporate purposes.

The Credit Facility has a term of five years under which all amounts outstanding will be due and payable on September 9, 2016. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $195 million. As of June 30, 2012 there was $50.0 million outstanding under the Credit Facility. Additionally, as of June 30, 2012, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, which reduces the amount available under the Credit Facility.

Borrowings under the Credit Facility bear interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility. The applicable margins range between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan).

The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA for the trailing twelve month period of not more than 2.75 to 1.00, and a fixed charge coverage ratio of not less than 1.75 to 1.00. At June 30, 2012, we were in compliance with all financial covenants under the Credit Facility.

In the event of a default, including cross-defaults relating to specified other debt in excess of $20 million, the lenders may terminate the commitments under the Credit Facility and declare the amounts outstanding, including all accrued interest and unpaid fees, payable immediately. In addition, the lenders may enforce any and all rights and remedies created under the Credit Facility or applicable law.

Convertible Senior Notes

As of June 30, 2012, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The conversion rate is 31.9601 shares of our common stock per $1,000 principal amount of the Notes. This represents a conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Term Loan

On December 7, 2011, our wholly owned subsidiary Molina Center LLC entered into a Term Loan Agreement with various lenders and East West Bank, as Administrative Agent (the "Administrative Agent"). Pursuant to the terms of the Term Loan Agreement, Molina Center LLC borrowed the aggregate principal amount of $48.6 million to finance a portion of the $81 million purchase price for the acquisition of the approximately 460,000 square foot office building, or Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period (as defined below) commencing January 1, 2012. The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. "Interest Period" means the period commencing on the first day of each calendar month and ending on the last day of such calendar month. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commenced on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Interest Rate Swap

In May 2012, we entered into a $42.5 million notional amount interest rate swap agreement, or Swap Agreement, with an effective date of March 1, 2013. While not designated as a hedge during the quarter ended June 30, 2012, the Swap Agreement is intended to reduce our exposure to fluctuations in the contractual variable interest rates under our Term Loan Agreement, and expires on the maturity date of the Term Loan Agreement, November 30, 2018. Under the Swap Agreement, we will receive a variable rate of the one-month LIBOR plus 3.25%, and pay a fixed rate of 5.34%. The Swap Agreement is measured and reported at fair value on a recurring basis, within Level 2 of the fair value hierarchy. Gains and losses relating to changes in its fair value are reported in earnings in the current period. As of June 30, 2012, the fair value of the Swap Agreement is a liability of $1.1 million, recorded to other noncurrent liabilities. Because the fair value of the Swap Agreement was zero at its inception in May 2012, the entire amount of the liability was charged to general and administrative expense in the quarter ended June 30, 2012. We do not use derivatives for trading or speculative purposes. We believe that we are not exposed to more than a nominal amount of credit risk relating to the Swap Agreement because the counterparty is an established and well-capitalized financial institution.

Shelf Registration Statement

In the second quarter of 2012, we filed a shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the registration, issuance, and sale of an indeterminate amount of our securities, including common stock, preferred stock, senior or subordinated debt securities, or warrants. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $528.3 million at June 30, 2012, and $492.4 million at December 31, 2011.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of June 30, 2012, our health plans had aggregate statutory capital and surplus of approximately $542.1 million compared with the required minimum aggregate statutory capital and surplus of approximately $265.8 million. All of our health plans except our Wisconsin health plan were in compliance with the minimum capital requirements at June 30, 2012. In late July 2012 we contributed sufficient capital to our Wisconsin health plan to ensure compliance with its minimum capital requirements. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Contractual Obligations

In our Annual Report on Form 10-K for the year ended December 31, 2011, we reported on our contractual obligations as of that date. There have been no material changes to our contractual obligations since that report.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The recognition of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and;
- The determination of medical claims and benefits payable.

Revenue Recognition — Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn will lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of $0.5 million and $1.0 million at June 30, 2012, and December 31, 2011, respectively.

Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health: A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At both June 30, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): A portion of premiums received by our New Mexico health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). The New Mexico health plan contract also contains certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At both June 30, 2012, and December 31, 2011, we had not recorded any liability under the terms of these contract provisions.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $6.9 million and $0.7 million pursuant to our profit-sharing agreement with the state of Texas at June 30, 2012, and December 31, 2011, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to CMS our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $13.4 million and $5.0 million for anticipated Medicare risk adjustment premiums as of June 30, 2012, and December 31, 2011, respectively.

Quality incentives that allow us to recognize incremental revenue if certain quality standards are met. These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. Effective February 1, 2010 through June 30, 2011, we were eligible to earn additional incremental revenue of up to 0.25% of our total premium if we met certain pharmacy specific performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state. Based upon our assessment of the performance measures at June 30, 2012, we have accrued an estimated $4.0 million of premiums that were not earned under this program.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, effective beginning in 2011, up to 3.25% of the premium is withheld by the state. The withheld premiums can be earned by the health plan by meeting certain performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of June 30, 2012 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of June 30, 2012.

	Three Months Ended June 30, 2012				
	Maximum Available Quality Incentive Premium - Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements under the scope of FASB Accounting Standards Codification Subtopic 605-25, *Revenue Recognition — Multiple –Element Arrangements,* and SEC Staff Accounting Bulletin Topic 13, *Revenue Recognition*.

Effective January 1, 2011, we adopted a new accounting standard that amends the guidance on the accounting for multiple-element arrangements. Pursuant to the new standard, each required deliverable is evaluated to determine whether it qualifies as a separate unit of accounting which is generally based on whether the deliverable has standalone value to the customer. In addition to standalone value, previous guidance also required objective and reliable evidence of fair value of a deliverable in order to treat the deliverable as a separate unit of accounting. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent. We have adopted this guidance on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Our adoption of this guidance has not impacted the timing or pattern of our revenue recognition in 2011 or 2012. Also, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. For contracts entered into prior to January 1, 2011, objective and reliable evidence of fair value would be required, in addition to DDI standalone value which we do not have, in order to treat DDI as a separate unit of accounting. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs
- Employee costs incurred in performing transaction services
- Vendor costs incurred in performing transaction services
- Costs incurred in performing required monitoring of and reporting on contract performance
- Costs incurred in maintaining and processing member and provider eligibility
- Costs incurred in communicating with members and providers

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	June 30, 2012	Dec. 31, 2011	June 30, 2011
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 378,782	$ 301,020	$270,558
Capitation payable	79,739	53,532	43,131
Pharmacy	34,848	26,178	15,094
Other	32,169	21,746	12,830
	$525,538	$402,476	$ 341,613

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are “Incurred But Not Paid,” or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $378.8 million of our total medical claims and benefits payable of $525.5 million as of June 30, 2012. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider’s monthly capitation payment), our IBNP liability at June 30, 2012, was $372.9 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of June 30, 2012 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding June 30, 2012, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ 125,335
(4%)	83,556
(2%)	41,778
2%	(41,778)
4%	(83,556)
6%	(125,335)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of June 30, 2012 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ (81,966)
(4%)	(54,644)
(2%)	(27,322)
2%	27,322
4%	54,644
6%	81,966

The following per-share amounts are based on a combined federal and state statutory tax rate of 37.5%, and 46.2 million diluted shares outstanding for the six months ended June 30, 2012. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at June 30, 2012, net income for the six months ended June 30, 2012 would increase or decrease by approximately $13.1 million, or $0.28 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at June 30, 2012, net income for the six months ended June 30, 2012 would increase or decrease by approximately $8.5 million, or $0.18 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $65.3 million, or $1.41 per diluted share, and $42.7 million, or $0.92 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $13.1 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2011, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 14.6%.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2012 and 2011 were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

We recognized favorable prior period claims development in the amount of $36.4 million for the six months ended June 30, 2012. This amount represents our estimate as of June 30, 2012 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 was more than the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2011 was due primarily to the following factors:

- For our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- For our Texas health plan, we overestimated the cost of new members in STAR+PLUS (the name of our ABD program in Texas), in the Dallas region.
- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in the lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all of the claims overestimation.
- Offsetting some of the overestimation items described above, our Missouri health plan reserves were underestimated as a result of an unusually large number of premature infants during the fourth quarter.

We recognized unfavorable prior period claims development in the amount of $0.5 million for the three months ended June 30, 2012. This amount represents our estimate as of June 30, 2012 of the extent to which our initial estimate of medical claims and benefits payable at March 31, 2012 was less than the amount that will ultimately be paid out in satisfaction of that liability. The underestimation of claims liability at March 31, 2012 was due primarily to the following factors:

- For our Texas health plan, our initial estimates of reserves at March 31, 2012 for new coverage (inpatient medical costs on STAR+PLUS members) and new regions were based on the state's pricing assumptions. We have since learned that the claims costs are much higher than initially expected.
- For our Missouri health plan, reserves were underestimated due to a large number of very high cost claims, including premature infants, during the first quarter of 2012.
- We underestimated the impact of a buildup in claims inventory in our Michigan and Ohio health plans as of March 31, 2012.

We recognized favorable prior period claims development in the amount of $45.4 million and $51.8 million for the six months ended June 30, 2011, and the year ended December 31, 2011, respectively. This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2010, as a result of the following factors:

- We overestimated the impact of a buildup in claims inventory in Ohio.
- We overestimated the impact of the settlement of disputed provider claims in California.
- We underestimated the reduction in outpatient facility claims costs as a result of a fee schedule reduction in New Mexico effective November 2010, partially offsetting the impact of the two items above.

In estimating our claims liability at June 30, 2012, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- Our Texas health plan membership has nearly doubled effective March 1, 2012. In addition, effective March 1, 2012, we assumed inpatient medical liability for STAR+PLUS (an area of coverage that was previously carved out). Reserves for new coverage and new regions are now based on the newly developing claims lag patterns and comparisons with similar coverage in other regions with more historical data.
- Our California health plan has enrolled approximately 24,000 new ABD members since June 30, 2011, as a result of the mandatory assignment of ABD members to managed care plans effective July 1, 2011. These new members converted from a fee-for-service environment, and are higher cost than our base ABD members.
- Our claims inventory had increased significantly during the first quarter of 2012, followed by a significant reduction in claims inventory in the second quarter of 2012. Changes in claims inventory can impact historical claims lag patterns.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2011 and for the six months ended June 30, 2012, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Six Months Ended June 30,		Three Months Ended June 30,		Year Ended
	2012	2011	2012	2011	Dec. 31, 2011
	(Dollars in thousands, except per-member amounts)				
Balances at beginning of period	$ 402,476	$ 354,356	$ 455,833	$ 351,382	$ 354,356
Components of medical care costs related to:

Balances at end of period	$ 525,538	$ 341,613	$ 525,538	$ 341,613	$ 402,476
Benefit from prior period as a percentage of:					
Balance at beginning of period	9.0%	12.8%	(0.1)%	5.6%	14.6%
Premium revenue	1.3%	2.1%	0.0%	1.7%	1.1%
Total medical care costs	1.4%	2.4%	0.0%	2.1%	1.3%
Claims Data:					
Days in claims payable, fee for service	44	39	44	39	40
Number of members at end of period	1,853,000	1,645,000	1,853,000	1,645,000	1,697,000
Number of claims in inventory at end of period	209,200	121,900	209,200	121,900	111,100
Billed charges of claims in inventory at end of period	$ 324,500	$ 205,800	$ 324,500	$ 205,800	$ 207,600
Claims in inventory per member at end of period	0.11	0.07	0.11	0.07	0.07
Billed charges of claims in inventory per member at end of period	$ 175.12	$ 125.11	$ 175.12	$ 125.11	$ 122.33
Number of claims received during the period	10,375,700	8,715,200	5,520,100	4,373,000	17,207,500
Billed charges of claims received during the period	$ 9,388,700	$ 6,963,300	$ 5,051,800	$ 3,576,700	$ 14,306,500

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 3. ***Quantitative and Qualitative Disclosures About Market Risk***

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

We are also exposed to interest rate risk relating to contractual variable interest rates under our Term Loan Agreement which matures on November 30, 2018. We manage this floating rate debt using an interest rate swap agreement that we expect will reduce our exposure to the impact of changing interest rates to our consolidated results of operations and future outflows for interest. The interest rate swap is not designated as a hedging instrument.

Item 4. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended June 30, 2012 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. *Legal Proceedings*

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 1A. *Risk Factors*

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, the following risk factors were identified by the Company during the second quarter of 2012, and is a supplement to, and should be read together with, the risk factors discussed in Part I, Item 1A — Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2011. The risk factors described herein and in our 2011 Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition, cash flows, or results of operations.

There are numerous risks associated with our medical cost containment initiatives in Texas.

We have estimated that the monthly profitability of our Texas health plan will improve by $14 million by December 2012 as a result of a blended rate increase effective September 1, 2012, provider contract changes, changes to hospital payments and prior authorization requirements, and other medical cost containment initiatives. No assurances can be given that the expected rate increase will be fully implemented on September 1, 2012 as proposed, that all of the described measures together will improve the profitability of our Texas health plan by $14 million, or that such measures will have become fully effective in lowering our medical costs by December 2012. The failure of these measures to have the expected effects could result in continued monthly losses at our Texas health plan, which could adversely affect our business, financial condition, cash flows, or results of operations.

There is continuing uncertainty regarding the full applicability of the Affordable Care Act with regard to the Medicaid expansion.

On June 28, 2012, the United States Supreme Court held, among other things, that states may opt out of the Medicaid expansion under the Affordable Care Act. Several state governors, including governors in states in which we operate health plans, have stated that they do not intend for their states to participate in the Medicaid expansion expected to occur in January 2014. In addition, some governors have contended that the Supreme Court's ruling calls into question the "maintenance of effort" requirement under the Affordable Care Act which requires states to maintain their Medicaid eligibility standards as they had existed prior to the enactment of the Affordable Care Act. If the states in which we operate our health plans do not participate in the Medicaid expansion, or if states in which we currently operate are determined to be not subject to the maintenance of effort requirement and change their eligibility standards, our Medicaid enrollment levels could be less than projected or could even drop, which could have a materially adverse effect on our business, financial condition, cash flows, or results of operations.

Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds*

Issuer Purchases of Equity Securities

Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014. The repurchase program will be funded with working capital or draws under our credit facility, and repurchases may be made from time to time on the open market or through privately negotiated transactions. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time. No securities were purchased under this program as of June 30, 2012.

Purchases of common stock made by or on behalf of the Company during the quarter ended June 30, 2012, including shares withheld by the Company to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
April 1 - April 30	1,364	$ 33.63	—	$ —
May 1 - May 31	—	$ —	—	$ —
June 1 - June 30	2,732	$ 24.57	—	$ —
Total	4,096	$ 27.59	—	

(a) During the three months ended June 30, 2012, we did not repurchase any shares of our common stock outside of our publicly announced stock repurchase program. During the quarter we withheld 4,096 shares of common stock under our 2011 Equity Incentive Plan to settle our employees'

income tax obligations.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended June 30, 2012 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
March 31, 2012

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. As of March 31, 2012, these health plans served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

Our health plans' state Medicaid contracts generally have a term of one- to two-years and are renewable on an annual or biannual basis at the discretion of the state. Additionally, our state health plans submit proposals for additional membership opportunities that arise from time to time. For example, our Texas health plan has added significant membership since the first quarter of 2011, including approximately 76,000 Temporary Assistance for Needy Families, or TANF, members, 57,800 ABD members, and 18,000 Children's Health Insurance Program, or CHIP, members. At April 30, 2012, the Texas health plan's enrollment was approximately 300,000 members, an increase of 172,000 members since March 31, 2011. Our health plan subsidiaries have often been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. For example, in January 2012 our Washington health plan was named as a successful bidder in the request for proposal, or RFP, process for Medicaid and Basic Health coverage in the state of Washington through 2013. However, there can be no assurance that these contracts will continue to be renewed as in the case of our Ohio and Missouri health plans, described below.

On April 6, 2012, the Ohio Department of Jobs and Family Services notified our Ohio health plan that it had not been selected to participate under the recently issued Ohio Medicaid Managed Care Plan Request for Applications, or RFA. As a result, the Ohio health plan's existing Medicaid contract with the state is scheduled to expire without renewal on December 31, 2012. We appealed the outcome of the RFA process on April 16, 2012. The Ohio health plan's Medicaid contract comprises nearly all of its revenue and expenses; therefore should the appeal be unsuccessful most of its business activities will be suspended effective January 1, 2013. We intend to continue serving members under our Medicare Advantage contract in Ohio subsequent to December 31, 2012, and will also pursue other business opportunities. With statutory net worth in excess of $121 million at March 31, 2012, we believe our Ohio health plan has adequate resources to operate indefinitely in the absence of its Medicaid contract. For the three months ended March 31, 2012, our Ohio health plan contributed premium revenue of $293.5 million, or 22.1% of total premium revenue, and comprised 249,000 members, or 13.6% of total Health Plans segment membership.

On February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's existing contract with the state is scheduled to expire without renewal on June 30, 2012. For the three months ended March 31, 2012, our Missouri health plan contributed premium revenue of $56.6 million, or 4.3% of total premium revenue, and comprised 81,000 members, or 4.4% of total Health Plans segment membership.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement Medicaid Management Information System, or MMIS, to another firm. For the three months ended March 31, 2012, our revenue under the Louisiana MMIS contract was approximately $12.3 million, or 29.3% of total service revenue. We expect that we will continue to perform under this contract through implementation and acceptance of the successor MMIS. Based upon our past experience and our knowledge of the Louisiana MMIS bid process, we believe that implementation and acceptance of the successor MMIS will not occur until 2014 at the earliest. Through implementation and acceptance of the successor MMIS we expect to recognize between $45 million and $50 million in revenue annually under our Louisiana MMIS contract.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2012. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2011. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2011 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2011 audited financial statements.

Adjustments

We have adjusted all applicable share and per-share amounts to reflect the retroactive effects of the three-for-two stock split in the form of a stock dividend that was effective May 20, 2011.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue — Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn will lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At both March 31, 2012, and December 31, 2011, we recorded a liability of $1.0 million under the terms of these contract provisions.

Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health: A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At both March 31, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): A portion of premiums received by our New Mexico health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). The New Mexico health plan contract also contains certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At both March 31, 2012, and December 31, 2011, we had not recorded any liability under the terms of these contract provisions. In the fourth quarter of 2011, our New Mexico health plan entered into a contract amendment that more closely aligns the calculation of revenue with the methodology adopted under the Affordable Care Act. The contract amendment changed the calculation of the amount of revenue that may be recognized relative to medical costs.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $2.0 million and $0.7 million pursuant to our profit-sharing agreement with the state of Texas at March 31, 2012, and December 31, 2011, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services, or CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $8.0 million for anticipated Medicare risk adjustment premiums at March 31, 2012. We recorded a net receivable of $5.0 million for anticipated Medicare risk adjustment premiums at December 31, 2011.

Quality incentives that allow us to recognize incremental revenue if certain quality standards are met. These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. Effective February 1, 2010 through June 30, 2011, we were eligible to earn additional incremental revenue of up to 0.25% of our total premium if we met certain pharmacy specific performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, effective beginning in 2011, up to 3.25% of the premium is withheld by the state. The withheld premiums can be earned by the health plan by meeting certain performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of March 31, 2012 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of March 31, 2012.

	Three Months Ended March 31, 2012				
	Maximum Available Quality Incentive Premium - Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized
	(In thousands)				
New Mexico	$ 555	$ 336	$ 28	$ 364	$ 83,261
Ohio	2,678	2,678	966	3,644	293,525
Texas	5,750	5,750	—	5,750	198,236
Wisconsin	416	—	—	—	17,142
	$ 9,399	$ 8,764	$ 994	$ 9,758	$592,164

	Three Months Ended March 31, 2011				
	Maximum Available Quality Incentive Premium - Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized
	(In thousands)				
New Mexico	$ 581	$ 444	$ (168)	$ 276	$ 84,606
Ohio	2,662	1,350	1,823	3,173	230,340
Wisconsin	416	—	—	—	16,417
	$ 3,659	$ 1,794	$ 1,655	$ 3,449	$ 331,363

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements under the scope of FASB Accounting Standards Codification Subtopic 605-25, *Revenue Recognition — Multiple –Element Arrangements,* and SEC Staff Accounting Bulletin Topic 13, *Revenue Recognition*.

Effective January 1, 2011, we adopted a new accounting standard that amends the guidance on the accounting for multiple-element arrangements. Pursuant to the new standard, each required deliverable is evaluated to determine whether it qualifies as a separate unit of accounting which is generally based on whether the deliverable has standalone value to the customer. In addition to standalone value, previous guidance also required objective and reliable evidence of fair value of a deliverable in order to treat the deliverable as a separate unit of accounting. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent. We have adopted this guidance on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Our adoption of this guidance has not impacted the timing or pattern of our revenue recognition in 2011. Also, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. For contracts entered into prior to January 1, 2011, objective and reliable evidence of fair value would be required, in addition to DDI standalone value which we do not have, in order to treat DDI as a separate unit of accounting. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. We began to recognize revenue associated with our Maine contract upon state acceptance in September 2010. In Idaho, we will begin recognition of revenue upon state acceptance.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs
- Employee costs incurred in performing transaction services
- Vendor costs incurred in performing transaction services
- Costs incurred in performing required monitoring of and reporting on contract performance
- Costs incurred in maintaining and processing member and provider eligibility
- Costs incurred in communicating with members and providers

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

We are currently deferring recognition of all revenue as well as all direct costs (to the extent that such costs are estimated to be recoverable) in Idaho until the MMIS in that state receives certification from CMS.

Premium Deficiency Charges

We assess the profitability of each contract by state for providing medical care services to our members and identify any contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared to anticipated medical care costs, including the cost of processing claims. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. In the first quarter of 2011, our Wisconsin health plan recorded a premium deficiency charge in the amount of $3.35 million to medical claims and benefits payable. No premium deficiency charges were recorded in the first quarter of 2012.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of non-deductible compensation and state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $10.7 million as of March 31, 2012 and December 31, 2011. Approximately $8.4 million of the unrecognized tax benefits recorded at March 31, 2012, relate to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $7.4 million as of March 31, 2012. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $8.9 million due to the expiration of statute of limitations and the resolution to the state refund claim described above.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of March 31, 2012, and December 31, 2011, we had accrued $70,000 and $65,000, respectively, for the payment of interest and penalties.

Recent Accounting Pronouncements

On May 12, 2011, the Financial Accounting Standards Board (“FASB”) ratified Accounting Standards Update (“ASU”) No. 2011-04, “Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS.” This ASU establishes a global standard for measuring amounts at fair value, and although it did not have a material effect on our financial position or results of operations, it did change our disclosure policies for fair value. This ASU became effective for reporting periods (including interim periods) beginning after December 15, 2011, and we adopted this ASU for the interim period ending March 31, 2012.

On June 16, 2011, the FASB ratified ASU No. 2011-05, “Presentation of Comprehensive Income.” This ASU eliminates the previous option to report other comprehensive income and its components in the statement of changes in equity. Upon adoption, other comprehensive income must be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. We adopted this ASU for the interim period ending March 31, 2012, which is the period for which it became effective for calendar year-end entities, and have elected to utilize ‘two separate but consecutive statements’ disclosure for this interim presentation.

On September 15, 2011, the FASB ratified ASU No. 2011-08, “Intangibles-Goodwill and Other (Topic 350): Testing Goodwill for Impairment.” This ASU permits an entity to first assess qualitative factors to determine whether it is more likely than not (a likelihood of more than 50 percent) that the fair value of a reporting unit is less than its carrying amount. After assessing qualitative factors, if an entity determines that it is not more likely than not that the fair value of the reporting unit is less than its carrying amount, no further testing is necessary. If an entity determines that it is more likely than not that the fair value of the reporting unit is less than its carrying value, then the traditional two-step goodwill impairment test must be performed. This ASU became effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, but early adoption was permitted. Although we did not early-adopt ASU No. 2011-08 during 2011, we will evaluate the standard when performing our future goodwill impairment tests.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, or AICPA, and the Securities and Exchange Commission, or SEC, did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	Three Months Ended March 31,	
	2012	2011 (2)
	(In thousands)	
Shares outstanding at the beginning of the period	45,815	45,463
Weighted-average number of shares issued	183	125
Denominator for basic earnings per share	45,998	45,588
Dilutive effect of employee stock options and stock grants (1)	857	669
Dilutive effect of convertible senior notes	32	—
Denominator for diluted earnings per share	46,887	46,257

(1) Restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. For the three months ended March 31, 2012 and 2011, there were approximately 199,700 and 112,500 antidilutive weighted restricted shares, respectively. Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three months ended March 31, 2012, and 2011, there were approximately 7,900 and 138,000 antidilutive weighted options, respectively.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted earnings per share for the three months ended March 31, 2011 because to do so would have been anti-dilutive.

4. Share-Based Compensation

At March 31, 2012, we had employee equity incentives outstanding under three plans: (1) the 2011 Equity Incentive Plan; (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded); and (3) the 2000 Omnibus Stock and Incentive Plan (from which equity incentives are no longer awarded). On March 1, 2012, our chief executive officer, chief financial officer, and chief operating officer were awarded 94,050 shares, 53,236 shares, and 30,167 shares, respectively, of restricted units with performance and service conditions. Each of the grants shall vest on December 31, 2012, provided that: (i) the Company's total operating revenue for 2012 is equal to or greater than $5.5 billion, and (ii) the respective officer continues to be employed by the Company as of December 31, 2012. Also on March 1, 2012, our chief executive officer, chief financial officer, chief operating officer, and chief accounting officer were awarded 8,000 shares, 8,000 shares, 8,000 shares, and 3,000 shares, respectively, of restricted units subject to certification of our Idaho MMIS by CMS. The respective officers must also be employed by the Company when the performance conditions are met. In the event the vesting conditions are not achieved for both sets of awards, the equity compensation awards shall lapse. As of March 31, 2012, we expect both performance awards to vest in full.

Charged to general and administrative expenses, total stock-based compensation expense was as follows for the three months ended March 31, 2012 and 2011:

	Three Months Ended March 31,	
	2012	2011
	(In thousands)	
Restricted stock/unit awards	$ 4,398	$ 3,806
Stock options (including shares issued under our employee stock purchase plan)	268	258
Total stock-based compensation expense	$ 4,666	$ 4,064

As of March 31, 2012, there was $22.0 million of total unrecognized compensation expense related to unvested restricted stock awards, which we expect to recognize over a remaining weighted-average period of 2.8 years. As of March 31, 2012, there was $5.9 million of total unrecognized compensation expense related to restricted units with performance conditions, which we expect to recognize by December 31, 2012.

Unvested restricted stock and restricted stock activity for the three months ended March 31, 2012 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2011	1,435,882	$ 18.97
Restricted stock awards granted	385,457	33.54
Restricted stock units with performance conditions granted	204,453	33.53
Vested	(683,649)	20.24
Forfeited	(23,026)	20.38
Unvested balance as of March 31, 2012	1,319,117	24.80

The total fair value of restricted stock and stock unit awards, including those with performance conditions, granted during the three months ended March 31, 2012 and 2011 was $19.8 million and $15.6 million, respectively. The total fair value of restricted shares vested during the three months ended March 31, 2012 and 2011 was $22.8 million and $8.6 million, respectively.

Stock option activity for the three months ended March 31, 2012 is summarized below:

	Shares	Weighted Average Grant Date Fair Value	Average Intrinsic Value (In thousands)	Weighted Average Remaining Contractual term (Years)
Stock options outstanding as of December 31, 2011	553,049	$ 20.91		
Granted	15,000	34.82		
Exercised	(109,929)	19.30		
Stock options outstanding as of March 31, 2012	458,120	21.75	$ 5,458	3.9
Stock options exercisable and expected to vest as of March 31, 2012	458,120	21.75	$ 5,458	3.9
Exercisable as of March 31, 2012	443,120	21.31	$ 5,458	3.7

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our assets measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

- *Level 1 — Observable inputs such as quoted prices in active markets:* Our Level 1 financial instruments consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes. Level 1 financial instruments are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.
- *Level 2 — Inputs other than quoted prices in active markets that are either directly or indirectly observable:* Our Level 2 financial instruments consist of investments including corporate debt securities, municipal securities, and certificates of deposit, which are classified as current investments in the accompanying consolidated balance sheets. Our financial instruments classified as Level 2 are traded frequently though not necessarily daily. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.
- *Level 3 — Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions:* Our Level 3 financial instruments consist of auction rate securities which are designated as available-for-sale, and are reported at fair value of $16.1 million (par value of $18.8 million) as of March 31, 2012. To estimate the fair value of these securities, we use valuations from third-party pricing models that include factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. To validate the reasonableness of these valuations, we compare such valuations to other third party valuations that provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of March 31, 2012.

Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008. As such, quoted prices in active markets were not readily available during the majority of 2008, 2009 through 2011, and continued to be unavailable as of March 31, 2012. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 3 years to 35 years. Considering the relative insignificance of these securities in comparison to our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at March 31, 2012. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have sold $63.3 million of these instruments at par value.

For three months ended March 31, 2012, and 2011, we recorded pretax unrealized gains of $0.1 million and $0.3 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income (loss). If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

Our assets measured at fair value on a recurring basis at March 31, 2012, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$235,759	$ —	$235,759	$ —
Government-sponsored enterprise securities (GSEs)	36,618	36,618	—	—
Municipal securities	52,240	—	52,240	—
U.S. treasury notes	30,990	30,990	—	—
Certificates of deposit	2,374	—	2,374	—
Auction rate securities	16,129	—	—	16,129
	$ 374,110	$67,608	$ 290,373	$16,129

Our assets measured at fair value on a recurring basis at December 31, 2011, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$231,634	$ —	$ 231,634	$ —
GSEs	33,949	33,949	—	—
Municipal securities	47,313	—	47,313	—
U.S. treasury notes	21,748	21,748	—	—
Certificates of deposit	2,272	—	2,272	—
Auction rate securities	16,134	—	—	16,134
	$353,050	$55,697	$281,219	$16,134

The following table presents our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3) (In thousands)
Balance at December 31, 2011	$ 16,134
Total gains (unrealized only):	
Included in other comprehensive income	145
Settlements	(150)
Balance at March 31, 2012	$ 16,129
The amount of total unrealized gains for the period included in other comprehensive income attributable to the change in accumulated other comprehensive losses relating to assets still held at March 31, 2012	$ 115

The carrying amounts and estimated fair values of our long-term debt as well as the applicable fair value hierarchy tier, at March 31, 2012, are contained in the table below. Our convertible senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. Borrowings under our credit facility and our term loan are classified as Level 3 financial instruments, because certain inputs used to determine the fair value of these agreements are unobservable. The carrying value of the credit facility and the term loan at March 31, 2012 approximates fair value because of the short period of time between the borrowing under the credit facility in the first quarter of 2012, and the term loan's origination date of December 7, 2011, and March 31, 2012, respectively.

	Carrying Value	Estimated Fair Value	Fair Value Level Hierarchy
	(In thousands)		
Credit facility	$ 10,000	$ 10,000	Level 3
Term loan	48,299	48,299	Level 3
Convertible senior notes	170,969	239,117	Level 2
	$229,268	$297,416	

6. Investments

The following tables summarize our investments as of the dates indicated:

	March 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 235,184	$ 678	$ 103	$235,759
GSEs	36,574	50	6	36,618
Municipal securities	51,963	305	28	52,240
U.S. treasury notes	30,953	41	4	30,990
Certificates of deposit	2,374	—	—	2,374
Auction rate securities	18,850	—	2,721	16,129
	$ 375,898	$1,074	$ 2,862	$ 374,110

	December 31, 2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 231,407	$ 442	$ 215	$231,634
GSEs	33,912	46	9	33,949
Municipal securities	47,099	232	18	47,313
U.S. treasury notes	21,627	121	—	21,748
Certificates of deposit	2,272	—	—	2,272
Auction rate securities	19,000	—	2,866	16,134
	$355,317	$ 841	$ 3,108	$353,050

The contractual maturities of our investments as of March 31, 2012 are summarized below:

	Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$193,996	$194,299
Due one year through five years	163,552	164,118
Due after ten years	18,350	15,693
	$ 375,898	$ 374,110

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales and maturities of available-for-sale securities were $65.8 million and $61.3 million for the three months ended March 31, 2012, and 2011, respectively. Net realized investment gains for the three months ended March 31, 2012, and 2011 were $64,000 and $157,000 respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities discussed in Note 5, “Fair Value Measurements,” we have determined that unrealized gains and losses at March 31, 2012, and December 31, 2011, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of March 31, 2012.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Corporate debt securities	$ 32,085	$ 103	$ —	$ —	$ 32,085	$ 103
GSEs	4,674	6	—	—	4,674	6
Municipal securities	12,565	28	—	—	12,565	28
Auction rate securities	—	—	16,129	2,721	16,129	2,721
U.S. treasury notes	7,052	4	—	—	7,052	4
	$ 56,376	$ 141	$16,129	$2,721	$ 72,505	$2,862

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2011.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Corporate debt securities	$ 72,766	$ 215	$ —	$ —	$ 72,766	$ 215
GSEs	11,493	9	—	—	11,493	9
Municipal securities	12,033	18	—	—	12,033	18
Auction rate securities	—	—	16,134	2,866	16,134	2,866
	$96,292	$ 242	$16,134	$2,866	$112,426	$ 3,108

7. Receivables

Health Plans segment receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustment. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable were as follows:

	March 31, 2012	December 31, 2011
	(In thousands)	
Health Plans segment:		
California	$ 61,799	$ 22,175
Michigan	11,362	8,864
Missouri	24,390	27,092
New Mexico	10,728	9,350
Ohio	31,655	27,458
Texas	16,335	1,608
Utah	3,886	2,825
Washington	17,014	15,006
Wisconsin	2,001	4,909
Others	2,809	2,489
Total Health Plans segment	181,979	121,776
Molina Medicaid Solutions segment	40,275	46,122
	$ 222,254	$167,898

The increase in our California health plan receivables at March 31, 2012, compared with December 31, 2011 is due to a change in premium payment timing by the state of California. The state is now paying capitation one month in arrears, so the California health plan's receivables balance at March 31, 2012 includes an additional month of premiums receivable.

8. Restricted Investments

Pursuant to the regulations governing our health plan subsidiaries, we maintain statutory deposits and deposits required by state Medicaid authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of certain capitated providers. The following table presents the balances of restricted investments:

	March 31, 2012	December 31, 2011
	(In thousands)	
California	$ 373	$ 372
Florida	5,200	5,198
Insurance Company	—	4,711
Michigan	1,000	1,000
Missouri	503	504
New Mexico	15,907	15,905
Ohio	9,078	9,078
Texas	3,514	3,518
Utah	2,990	2,895
Washington	151	151
Other	3,231	2,832
	$ 41,947	$ 46,164

The contractual maturities of our held-to-maturity restricted investments as of March 31, 2012 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$40,906	$ 40,912
Due one year through five years	1,041	1,047
	$41,947	$41,959

9. Medical Claims and Benefits Payable

The following table presents the components of the change in our medical claims and benefits payable as of and for the periods indicated. The negative amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Three Months Ended March 31, 2012	Year Ended December 31, 2011
	(Dollars in thousands)	
Balances at beginning of period	$ 402,476	$ 354,356
Components of medical care costs related to:		
Current period	1,167,580	3,911,803
Prior periods	(36,592)	(51,809)
Total medical care costs	1,130,988	3,859,994
Payments for medical care costs related to:		
Current period	750,994	3,516,994
Prior periods	326,637	294,880
Total paid	1,077,631	3,811,874
Balances at end of period	$ 455,833	$ 402,476
Benefit from prior period as a percentage of:		
Balance at beginning of period	9.1%	14.6%
Premium revenue	2.8%	1.1%
Total medical care costs	3.2%	1.3%

We recognized a benefit from prior period claims development in the amount of $36.6 million for the three months ended March 31, 2012. This amount represents our estimate as of March 31, 2012 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 exceeded the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2011 was due primarily to the following factors:

- For our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- For our Texas health plan, we overestimated the cost of new members in STAR+ (the name of our ABD program in Texas), in the Dallas region.
- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in the lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all

of the claims overestimation.

- Offsetting some of the overestimation items described above, our Missouri health plan reserves were underestimated as a result of an unusually large number of premature infants during the fourth quarter.

We recognized a benefit from prior period claims development in the amount of $44.4 million and $51.8 million for the three months ended March 31, 2011, and the year ended December 31, 2011, respectively. This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2010, as a result of the following factors:

- We overestimated the impact of a buildup in claims inventory in Ohio.
- We overestimated the impact of the settlement of disputed provider claims in California.
- We underestimated the reduction in outpatient facility claims costs as a result of a fee schedule reduction in New Mexico effective November 2010, partially offsetting the impact of the two items above.

In estimating our claims liability at March 31, 2012, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- Our Texas health plan membership nearly doubled in March 2012. In addition, effective March 1, 2012, we have assumed inpatient medical liability for STAR+ (an area of coverage that was previously carved out). Reserves for new coverage and new regions are based on the state's pricing estimates.
- Our California health plan is enrolling about 2,000 new ABD members per month as a result of the mandatory assignment of ABD members to managed care plans effective July 1, 2011. These new members are converting from fee-for-service and are higher cost than our base ABD members
- Our Michigan health plan's billed charges of claims in inventory at March 31, 2012 were about 2.5 times higher than the amount at December 31, 2011. This was due in part to approximately 6,000 new dual-eligible members that were enrolled for Medicaid benefits only in December 2011. As we are responsible only for the Medicaid portion of these benefits, the ratio of paid to billed claims for dual eligible members is very small, and this inventory buildup may not represent a large increase in liability.
- Our Wisconsin health plan converted from its legacy claims processing system to the Company's single managed care platform, or QNXT, effective February 1, 2012.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2011 and through March 31, 2012, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

10. Long-Term Debt

Credit Facility

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility (the "Credit Facility") with various lenders and U.S. Bank National Association, as LC Issuer, Swing Line Lender, and Administrative Agent. The Credit Facility is used for general corporate purposes.

The Credit Facility has a term of five years under which all amounts outstanding will be due and payable on September 9, 2016. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $195 million. As of March 31, 2012 there was $10.0 million outstanding under the Credit Facility. Additionally, as of March 31, 2012, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, which reduces the amount available under the Credit Facility.

Borrowings under the Credit Facility bear interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility. The applicable margins range between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan).

The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 as of the end of each fiscal quarter and a fixed charge coverage ratio of not less than 1.75 to 1.00. At March 31, 2012, we were in compliance with all financial covenants under the Credit Facility.

In the event of a default, including cross-defaults relating to specified other debt in excess of $20 million, the lenders may terminate the commitments under the Credit Facility and declare the amounts outstanding, including all accrued interest and unpaid fees, payable immediately. In addition, the lenders

may enforce any and all rights and remedies created under the Credit Facility or applicable law.

Term Loan

On December 7, 2011, our wholly owned subsidiary Molina Center LLC entered into a Term Loan Agreement with various lenders and East West Bank, as Administrative Agent (the "Administrative Agent"). Pursuant to the terms of the Term Loan Agreement, Molina Center LLC borrowed the aggregate principal amount of $48.6 million to finance a portion of the $81 million purchase price for the acquisition of the approximately 460,000 square foot office building, or Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period (as defined below) commencing January 1, 2012. The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commenced on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Convertible Senior Notes

As of March 31, 2012, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

The proceeds from the issuance of the Notes have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of March 31, 2012, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 30 months. The Notes' if-converted value did not exceed their principal amount as of March 31, 2012. At March 31, 2012, the equity component of the Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	As of March 31, 2012	As of December 31, 2011
	(In thousands)	
Details of the liability component:		
Principal amount	$ 187,000	$ 187,000
Unamortized discount	(16,031)	(17,474)
Net carrying amount	$170,969	$169,526

	Three Months Ended March 31,	
	2012	2011
	(In thousands)	
Interest cost for the period relating to the:		
Contractual interest coupon rate of 3.75%	$ 1,753	$ 1,753
Amortization of the discount on the liability component	1,443	1,340
Total interest cost recognized	$ 3,196	$ 3,093

11. Stockholders' Equity

Securities Repurchase Program. Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see Note 10, "Long-Term Debt"). The repurchase program will be funded with working capital or the Company's credit facility, and repurchases may be made from time to time on the open market or through privately negotiated transactions. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time. No securities were purchased under this program in the three months ended March 31, 2012.

Stock Plans. In connection with the plans described in Note 4, "Share-Based Compensation," we issued approximately 531,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the three months ended March 31, 2012. Stock plan activity resulted in a $1.9 million increase to additional paid-in capital for the same period.

12. Segment Reporting

We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans which serve Medicaid populations in ten states, and also includes our smaller direct delivery line of business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid

agencies in an additional five states.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, “Significant Accounting Policies.” The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

	Three Months Ended March 31,

13. Commitments and Contingencies

Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Molina Medicaid Solutions

On April 6, 2012, Molina Medicaid Solutions received a schedule from the state of Maine purporting to represent the approximately $32.6 million in damages suffered by the state related to the delay in the "go live" date for the state's MMIS from March 1, 2010 to September 1, 2010, and for other unspecified matters. The level of detail provided in the schedule is not adequate for us to determine the specific nature of the damages claimed by the state. No formal claim has been asserted against us by the state, nor has any legal basis been asserted for any potential claims against us. To the extent that the state decides to pursue its alleged claims against us, Unisys Corporation, or Unisys, the former owner of the MMIS, has agreed to assume the defense of that portion of the claim related to the delay in the "go live" date from March 1, 2010 to August 1, 2010, since that delay had been agreed upon with the state prior to our May 1, 2010 acquisition of Molina Medicaid Solutions from Unisys. The amount of our potential liability related to this matter, if any, cannot be reasonably estimated at this time, nor can a range of such possible liability be established.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $519.5 million at March 31, 2012, and $492.4 million at December 31, 2011.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of March 31, 2012, our health plans had aggregate statutory capital and surplus of approximately $536.3 million compared with the required minimum aggregate statutory capital and surplus of approximately $265.1 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2012. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Receivable/Liability for Ceded Life and Annuity Contracts

Prior to February 17, 2012, we reported a 100% ceded reinsurance arrangement for life insurance policies written and held by our wholly owned insurance subsidiary, Molina Healthcare Insurance Company, by recording a non-current receivable from the reinsurer with a corresponding non-current liability for ceded life and annuity contracts. Effective February 17, 2012, we sold Molina Healthcare Insurance Company. The transaction resulted in the elimination of both the noncurrent receivable and liability for ceded life and annuity contracts, each amounting to $23.4 million as of December 31, 2011. Additionally, a gain of approximately $2.4 million was recorded upon closing of the transaction, recorded to general and administrative expenses in the accompanying consolidated income statement.

We remain liable for benefits payable under the life insurance policies that were held by Molina Healthcare Insurance Company, in the event that both the reinsurer and the buyer of Molina Healthcare Insurance Company are unable to pay those benefits. We believe the possibility of our having to pay such benefits is remote, and no provision for the payment of such benefits is included in our consolidated financial statements.

14. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of both March 31, 2012, and December 31, 2011, our carrying amount for this investment amounted to $3.9 million. For the three months ended March 31, 2012 and 2011, we paid $6.6 million, and $5.4 million, respectively, for medical service fees to this provider.

Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations.*

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbour provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbour provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- uncertainties regarding the impact of the Patient Protection and Affordable Care Act, including its possible repeal, judicial overturning of the individual insurance mandate or Medicaid expansion, the effect of various implementing regulations, and uncertainties regarding the impact of other federal or state health care and insurance reform measures;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations, and the reduction over time of the high medical costs associated with new populations;
- the success of our efforts to retain existing government contracts and to obtain new government contracts (including those serving dual-eligible members) in connection with requests for proposals, or RFPs, in both existing and new states, and our ability to grow our revenues consistent with our expectations;
- the accurate estimation of incurred but not reported medical costs across our health plans;
- risks associated with the continued growth in new Medicaid and Medicare enrollees, and the development of actuarially sound rates with respect to such new enrollees;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates;
- the continuation without termination of the government contracts of both our health plans and Molina Medicaid Solutions;
- the timing of receipt and recognition of revenue and the amortization of expense under the state contracts of Molina Medicaid Solutions in Maine and Idaho;
- additional administrative costs and the potential payment of additional amounts to providers and/or the state by Molina Medicaid Solutions as a result of MMIS implementation issues in Maine or Idaho;
- government audits and reviews, and any enrollment freeze or monitoring program that may result therefrom;
- changes with respect to our provider contracts and the loss of providers;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive, and the interpretation and implementation of medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;

- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation, arbitration, or administrative proceedings, including our RFP protests or appeals;
- restrictions and covenants in our credit facility;
- the relatively small number of states in which we operate health plans;
- the availability of financing to fund and capitalize our acquisitions and start-up activities and to meet our liquidity needs;
- a state's failure to renew its federal Medicaid waiver;
- an inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments; and
- changes in general economic conditions, including unemployment rates.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2011, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2011.

Adjustments

We have adjusted all applicable share and per-share amounts to reflect the retroactive effects of the three-for-two stock split in the form of a stock dividend that was effective May 20, 2011.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. Our business comprises our Health Plans segment, consisting of licensed health maintenance organizations serving Medicaid populations in ten states, and our Molina Medicaid Solutions segment, which provides design, development, implementation, and business process outsourcing solutions to Medicaid agencies in an additional five states. We also have a direct delivery business that currently consists of primary care community clinics in California and Washington; additionally, we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

We report our financial performance based on the following two reportable segments: Health Plans; and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. This segment served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals as of March 31, 2012. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

Our health plans' state Medicaid contracts generally have a term of one- to two-years and are renewable on an annual or biannual basis at the discretion of the state. Additionally, our state health plans submit proposals for additional membership opportunities that arise from time to time. For example, our Texas health plan has added significant membership since the first quarter of 2011, including approximately 76,000 Temporary Assistance for Needy Families, or TANF, members, 57,800 ABD members, and 18,000 Children's Health Insurance Program, or CHIP, members. At April 30, 2012, the Texas health plan's enrollment was approximately 300,000 members, an increase of 172,000 members since March 31, 2011. Our health plan subsidiaries have often been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. For example, in January 2012 our Washington health plan was named as a successful bidder in the RFP process for Medicaid and Basic Health coverage in the state of Washington through 2013. However, there can be no assurance that these contracts will continue to be renewed as in the case of our Ohio and Missouri health plans, described below.

On April 6, 2012, the Ohio Department of Jobs and Family Services notified our Ohio health plan that it had not been selected to participate under the recently issued Ohio Medicaid Managed Care Plan Request for Applications, or RFA. As a result the Ohio health plan's existing Medicaid contract with the state is scheduled to expire without renewal on December 31, 2012. We appealed the outcome of the RFA process on April 16, 2012. The Ohio health plan's Medicaid contract comprises nearly all of its revenue and expenses; therefore should the appeal be unsuccessful most of its business activities will be suspended effective January 1, 2013. We intend to continue serving members under our Medicare Advantage contract in Ohio subsequent to December 31, 2012, and will also pursue other business opportunities. With statutory net worth in excess of $121 million at March 31, 2012, we believe our Ohio health plan has adequate resources to operate indefinitely in the absence of its Medicaid contract. For the three months ended March 31, 2012, our Ohio health plan contributed premium revenue of $293.5 million, or 22.1% of total premium revenue, and comprised 249,000 members, or 13.6% of total Health Plans segment membership.

On February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's existing contract with the state is scheduled to expire without renewal on June 30, 2012. For the three months ended March 31, 2012, our Missouri health plan contributed premium revenue of $56.6 million, or 4.3% of total premium revenue, and comprised 81,000 members, or 4.4% of total Health Plans segment membership.

Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement Medicaid Management Information System, or MMIS, to another firm. For the three months ended March 31, 2012, our revenue under the Louisiana MMIS contract was $12.3 million, or 29.3% of total service revenue. We expect that we will continue to perform under this contract through implementation and acceptance of the successor MMIS. Based upon our past experience and our knowledge of the Louisiana MMIS bid process, we believe that implementation and acceptance of the successor MMIS will not occur until 2014 at the earliest. Through implementation and acceptance of the successor MMIS we expect to recognize between $45 million and $50 million in revenue annually under our Louisiana MMIS contract.

In the second quarter of 2012, we expect to respond to several RFPs and invitations to negotiate with respect to new business, including proposals to serve dual eligible populations and applications to participate in CMS' Capitated Financial Alignment Demonstration project. In addition, with regard to existing business, we expect the state of New Mexico to issue an RFP for its Salud! and State Coverage Insurance (SCI) programs in September 2012, with the new Salud! and SCI contract to start in late 2013 or early 2014.

The Company's Board of Directors has organized a special committee of independent directors to consider and negotiate a possible lease transaction involving certain real property located in Long Beach, California. The property is owned by 6th and Pine Development, LLC, the members of which include John C. Molina, our chief financial officer and a director, and his wife. Negotiations between the special committee and 6th and Pine Development are currently ongoing. In the event we agree to enter into a lease for space with 6th and Pine Development, we will promptly report our execution of such agreement in a current report on Form 8-K.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the three months ended March 31, 2012, we received approximately 95% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the three months ended March 31, 2012, we recognized approximately 5% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children's Health Insurance Program, or CHIP, members are generally among our lowest, with rates as low as approximately $70 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the Temporary Assistance for Needy Families, or TANF, Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $110 in California to $260 in Ohio. Among our Medicaid Aged, Blind or Disabled, or ABD, membership, PMPM premiums range from approximately $340 in Utah to $1,400 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, inpatient, behavioral health and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums, at approximately $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	March 31, 2012	December 31, 2011	March 31, 2011
Total Ending Membership by Health Plan:			
California	351,000	355,000	347,000
Florida	69,000	69,000	66,000
Michigan	222,000	222,000	225,000
Missouri (1)	81,000	79,000	82,000
New Mexico	89,000	88,000	90,000
Ohio (2)	249,000	248,000	248,000
Texas	280,000	155,000	128,000
Utah	86,000	84,000	80,000
Washington	356,000	355,000	341,000
Wisconsin	42,000	42,000	40,000
Total	1,825,000	1,697,000	1,647,000
Total Ending Membership by State for our Medicare Advantage Plans:			
California	6,900	6,900	5,300
Florida	800	800	600
Michigan	8,500	8,200	6,700
New Mexico	900	800	700
Ohio (2)	200	200	400
Texas	800	700	600
Utah	8,100	8,400	6,700
Washington	5,200	5,000	3,300
Total	31,400	31,000	24,300
Total Ending Membership by State for our Aged, Blind or Disabled Population:			
California	37,300	31,500	14,100
Florida	10,500	10,400	10,300
Michigan	38,800	37,500	32,000
New Mexico	5,600	5,600	5,600
Ohio (2)	29,700	29,100	28,200
Texas	109,000	63,700	51,200
Utah	8,700	8,500	8,200
Washington	4,700	4,800	4,300
Wisconsin	1,700	1,700	1,700
Total	246,000	192,800	155,600

(1) Our existing contract with the state of Missouri is scheduled to expire without renewal on June 30, 2012.

(2) Our existing contract with the state of Ohio is scheduled to expire without renewal on December 31, 2012.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service* — Expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.
- *Capitation* — Expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- *Pharmacy* — Expenses for all drug, injectible, and immunization costs paid through our pharmacy benefit manager.
- *Other* — Expenses for medically related administrative costs of approximately $32.1 million, and $24.4 million, for the three months ended March 31, 2012 and 2011, respectively, including certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See “Critical Accounting Policies” below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our contracts in Idaho, Louisiana, Maine, New Jersey, West Virginia, and Florida. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period. We began to recognize deferred contract costs for our Maine contract in September 2010, at the same time we began to recognize revenue associated with that contract. In Idaho, we expect to begin recognition of deferred contract costs in the second half of 2012, in a manner consistent with our anticipated recognition of revenue.

First Quarter Financial Performance Summary

The following table and narrative briefly summarizes our financial and operating performance for the three months ended March 31, 2012. Comparable metrics for the first quarter of 2011 are also shown. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are computed as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended March 31,	
	2012	2011
	(Dollar amounts in thousands, except per-share data)	
Earnings per diluted share	$ 0.39	$ 0.38
Premium revenue	$1,327,449	$1,081,438
Service revenue	$ 42,205	$ 36,674
Operating income	$ 33,420	$ 31,300
Net income	$ 18,089	$ 17,388
Total ending membership	1,825,000	1,647,000
Premium revenue	96.6%	96.6%
Service revenue	3.1	3.3
Investment income	0.1	0.1
Rental income	0.2	—
Total revenue	100.0 %	100.0 %
Medical care ratio	85.2 %	84.5 %
General and administrative expense ratio	8.8 %	8.4 %
Premium tax ratio	3.3 %	3.4 %
Operating income	2.4 %	2.8 %
Net income	1.3 %	1.6 %
Effective tax rate	37.9 %	37.2 %

First Quarter 2012 Overview

For the first quarter of 2012, our net income was $18.1 million, or $0.39 per diluted share, compared with net income of $17.4 million, or $0.38 per diluted share, for the first quarter of 2011.

We recorded higher revenue in our Health Plans segment and experienced a higher margin in our Molina Medicaid Solutions segment. These increases were offset by lower margins in the Health Plans segment. In the aggregate, we achieved higher net income for the first quarter of 2012 when compared with the first quarter of 2011.

Our established health plans continue to perform well, with the Florida, Michigan, New Mexico, Utah, Texas, Washington and Wisconsin health plans reporting improved medical margins over the first quarter of 2011. The medical margin of our Ohio health plan was reduced as a result of a premium rate reduction effective January 1, 2012. In addition, the Ohio health plan is earning lower margins on the pharmacy benefit (added October 1, 2011) than on its business as a whole. The medical margin of our California health plan decreased primarily due to premium rate reductions effective July 1, 2011, and the mandatory assignment of SPD members to managed care plans starting June 1, 2011. The California health plan is currently experiencing a medical care ratio in excess of 90% for these members. It has been our experience that state funding agencies often underestimate the cost of serving new populations or of providing new benefits, requiring them to increase premium rates paid to managed care plans in subsequent periods.

Results of Operations

Three Months Ended March 31, 2012 Compared with the Three Months Ended March 31, 2011

Health Plans Segment

Premium Revenue

Premium revenue for the first quarter of 2012 increased 22.7% over the first quarter of 2011, due to a membership increase of approximately 6.5% (on a member-month basis), and a premium revenue PMPM increase of approximately 15.2%. Premium revenue PMPM increased as a result of both the extensions of additional benefits, such as pharmacy and inpatient facility care, to some of our membership and a shift in member mix to more medically intensive populations.

We also experienced notable membership growth at our Utah and Washington health plans. We care for a larger percentage of aged, blind or disabled, or ABD, members and Medicare members than a year ago. In the first quarter of 2012, 15% of our membership (on a member-month basis) comprised ABD members (including California SPD and Texas STAR+ members) and Medicare members, compared with just 11% of membership in the first quarter of 2011. Premium revenue PMPM also increased due to the inclusion of revenue from the pharmacy benefit for our Ohio health plan, which did not provide this benefit in the first quarter of 2011.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended March 31,					
	2012			2011		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 777,267	$ 148.81	68.7%	$655,884	$ 133.78	71.8%
Capitation	136,038	26.04	12.0	128,682	26.25	14.1
Pharmacy	173,237	33.17	15.3	91,576	18.68	10.0
Other	44,446	8.51	4.0	37,390	7.63	4.1
Total	$1,130,988	$216.53	100.0%	$ 913,532	$186.34	100.0%

Medical care costs increased in the first quarter of 2012 primarily due to the growth of membership in the Texas health plan. The Texas health plan experienced significant growth of members in its ABD program. These members have higher medical costs than other populations. The percentage of ABD member months in our Texas plan increased from 35% in the first quarter of 2011 to 40% in the first quarter of 2012. Overall, Texas health plan membership more than doubled when compared with the first quarter of 2011. The Company's medical margin deteriorated in the first quarter of 2012, when compared with the first quarter of 2011. The decrease in the medical margin was primarily due to:

- A shift in member mix to more costly members that are transitioning to a managed care environment, including Texas and California ABD members. These members start out with higher medical care ratios; and
- Rate decreases of approximately 2% in Ohio effective January 1, 2012, and approximately 3% in California effective July 1, 2011.

The medical care ratio of the California health plan increased to 87.4% in the three months ended March 31, 2012, from 84.3% in the three months ended March 31, 2011, primarily due to premium rate reductions of approximately 3% effective July 1, 2011. Additionally, the California health plan has added approximately 23,000 new ABD members since the first quarter of 2011. While this change in member mix has increased blended health plan premium revenue PMPM by 18% to $153 in the first quarter of 2012 from $130 in the first quarter of 2011, associated medical care costs are also higher for these members. The California health plan's aggregate medical care costs increased approximately 22% PMPM in the three months ended March 31, 2012 compared with the same period in 2011.

The medical care ratio of the Florida health plan decreased to 88.2% in the three months ended March 31, 2012, from 96.6% in the three months ended March 31, 2011, primarily due to initiatives that have reduced pharmacy and behavioral health costs, and a premium rate increase of approximately 7.5% effective September 1, 2011.

The medical care ratio of the Michigan health plan decreased to 79.9% in the three months ended March 31, 2012, from 81.2% in the three months ended March 31, 2011, primarily due to improved Medicare performance and lower inpatient facility costs.

The medical care ratio of the Missouri health plan increased to 93.8% in the three months ended March 31, 2012, from 93.6% in the three months ended March 31, 2011, primarily due to increased inpatient facility costs associated with an unusually large number of premature infants delivered. The health plan received a premium rate increase of approximately 5% effective July 1, 2011.

The medical care ratio of the New Mexico health plan decreased to 80.6% in the three months ended March 31, 2012, from 82.8% in the three months ended March 31, 2011. The New Mexico health plan received a premium rate reduction of approximately 2.5% effective July 1, 2011.

The medical care ratio of the Ohio health plan increased to 80.6% in the three months ended March 31, 2012, from 74.6% in the three months ended March 31, 2011, partially due to a premium rate reduction of approximately 2.0% PMPM effective January 1, 2012, Additionally, the restoration of the pharmacy benefit to all managed care plans in Ohio effective October 1, 2011 has increased the Ohio health plan's medical care ratio. The medical care ratio attributable to the pharmacy benefit alone was approximately 87%, which resulted in a 180 basis point increase to the Ohio health plan's aggregate medical care ratio for the first quarter of 2012.

The medical care ratio of the Texas health plan decreased to 90.8% in the three months ended March 31, 2012, from 91.1% in the three months ended March 31, 2011. Additionally, in March 2012 the Texas health plan received rate increases to provide for its assumption of inpatient and pharmacy risk for all existing populations. The Texas health plan has added significant membership since the first quarter of 2011, including approximately 76,000 Temporary Assistance for Needy Families, or TANF, members, 57,800 ABD members, and 18,000 Children's Health Insurance Program, or CHIP, members. At April 30, 2012 the Company's Texas enrollment was approximately 300,000 members.

The medical care ratio of the Utah health plan decreased to 77.0% in the three months ended March 31, 2012, from 79.3% in the three months ended March 31, 2011, primarily due to reduced fee-for-service inpatient and physician costs. Lower fee-for-service costs were the result of both lower unit costs and lower utilization. The Utah health plan received a premium rate reduction of approximately 2% effective July 1, 2011.

The medical care ratio of the Washington health plan decreased to 84.1% in the three months ended March 31, 2012, from 86.6% in the three months ended March 31, 2011, primarily due to lower Medicaid fee-for-service utilization.

The medical care ratio of the Wisconsin health plan decreased to 98.5% in the three months ended March 31, 2012, from 118.1% in the three months ended March 31, 2011. In the first quarter of 2011, the Wisconsin health plan recorded a premium deficiency reserve amounting to $3.35 million; there was no such reserve recorded in the first quarter of 2012. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Wisconsin health plan.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended March 31, 2012						
	Member Months (1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	1,059	$ 161,685	$152.65	$ 141,349	$ 133.45	87.4%	$ 2,309
Florida	208	56,190	269.87	49,569	238.07	88.2	7
Michigan	665	167,906	252.49	134,211	201.82	79.9	9,084
Missouri (2)	243	56,613	233.32	53,120	218.93	93.8	—
New Mexico	266	83,261	313.29	67,111	252.52	80.6	1,953
Ohio (3)	746	293,525	393.73	236,701	317.51	80.6	22,853
Texas	592	198,236	334.61	180,089	303.97	90.8	3,197
Utah	252	75,138	297.59	57,881	229.24	77.0	—
Washington	1,067	215,610	202.08	181,425	170.04	84.1	3,912
Wisconsin	125	17,142	136.97	16,886	134.92	98.5	—
Other (4)	—	2,143	—	12,646	—	—	115
	5,223	$1,327,449	$ 254.14	$1,130,988	$216.53	85.2%	$ 43,430

	Three Months Ended March 31, 2011						
	Member Months (1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	1,041	$ 134,976	$ 129.63	$ 113,737	$ 109.24	84.3%	$ 1,902
Florida	192	49,222	256.63	47,568	248.01	96.6	17
Michigan	678	164,760	243.06	133,728	197.28	81.2	9,846
Missouri (2)	245	55,166	225.33	51,608	210.79	93.6	—

Ohio (3)	737	230,340	312.68	171,752	233.15	74.6	17,775
Texas	349	80,811	231.49	73,615	210.88	91.1	1,340
Utah	236	67,935	287.77	53,839	228.06	79.3	—
Washington	1,034	195,272	188.81	169,116	163.52	86.6	3,642
Wisconsin	120	16,417	137.25	19,380	162.02	118.1	—
Other (4)	—	1,933	—	9,151	—	—	63
	4,903	$1,081,438	$ 220.58	$ 913,532	$ 186.34	84.5%	$ 36,550

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) Our existing contract with the state of Missouri is scheduled to expire without renewal on June 30, 2012.
(3) Our existing contract with the state of Ohio is scheduled to expire without renewal on December 31, 2012.
(4) "Other" medical care costs also include medically related administrative costs at the parent company.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended March 31,	
	2012	2011
	(In thousands)	
Service revenue before amortization	$ 42,358	$ 38,860
Amortization recorded as reduction of service revenue	(153)	(2,186)
Service revenue	42,205	36,674
Cost of service revenue	30,494	31,221
General and administrative costs	2,020	2,477
Amortization of customer relationship intangibles recorded as amortization	1,282	1,282
Operating income	$ 8,409	$ 1,694

We are currently deferring recognition of all revenue as well as all direct costs (to the extent that such costs are estimated to be recoverable) in Idaho until the MMIS in that state receives certification from CMS.

Consolidated Expenses

General and Administrative Expenses

General and administrative, or G&A, expenses for the consolidated entity were $120.2 million, or 8.8% of total revenue, for the three months ended March 31, 2012, compared with $94.4 million, or 8.4% of total revenue, for the three months ended March 31, 2011. The Company incurred additional expenses in the first quarter of 2012 due to investment in administrative infrastructure in anticipation of opportunities in Texas and among the dual-eligible population.

Premium Tax Expenses

Premium tax expense decreased to 3.3% of premium revenue in the three months ended March 31, 2012, from 3.4% in the three months ended March 31, 2011.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and Amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service Revenue;" and
- Amortization of capitalized software is recorded within the heading "Cost of Service Revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Three Months Ended March 31,			
	2012		2011	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software	$ 9,472	0.7%	$ 7,401	0.7%
Amortization of intangible assets	5,553	0.4	5,266	0.4
Depreciation and amortization reported as such in the consolidated statements of income	15,025	1.1	12,667	1.1
Amortization recorded as reduction of service revenue	153	—	2,186	0.2
Amortization of capitalized software recorded as cost of service revenue	3,161	0.2	3,241	0.3
Total	$ 18,339	1.3%	$ 18,094	1.6%

Interest Expense

Interest expense increased to $4.3 million for the three months ended March 31, 2012, from $3.6 million for the three months ended March 31, 2011, due primarily to interest expense associated with the purchase of our corporate headquarters building in December 2011. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $1.4 million and $1.3 million for the three months ended March 31, 2012, and 2011, respectively.

Income Taxes

Income tax expense is recorded at an effective rate of 37.9% for the three months ended March 31, 2012 compared with 37.2% for the three months ended March 31, 2011. The higher rate in 2012 is primarily due to current period share-based compensation expense that is expected to be non-deductible for tax purposes when related awards vest.

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of March 31, 2012, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income increased to $1.7 million for the three months ended March 31, 2012, compared with $1.6 million for the three months ended March 31, 2011. Our annualized portfolio yield for the three months ended March 31, 2012 was 0.6% compared with 0.7% for the three months ended March 31, 2011.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash provided by operating activities for the three months ended March 31, 2012 was $50.6 million compared with $84.1 million for the three months ended March 31, 2011, a decrease of $33.5 million. Deferred revenue was a source of operating cash amounting to $44.5 million in the three months ended March 31, 2012, compared with $62.6 million in the three months ended March 31, 2011.

Reconciliation of Non-GAAP [1] to GAAP Financial Measures

EBITDA [2]

	Three Months Ended March 31,	
	2012	2011
	(In thousands)	
Net income	$ 18,089	$17,388
Add back:		
Depreciation and amortization reported in the consolidated statements of cash flows	18,339	18,094
Interest expense	4,298	3,603
Provision for income taxes	11,033	10,309
EBITDA	$51,759	$49,394

(1) GAAP stands for U.S. generally accepted accounting principles.

(2) EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities, nor should EBITDA be considered in isolation from these GAAP measures of operating performance. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At March 31, 2012, the parent company — Molina Healthcare, Inc. — held cash and investments of approximately $37.8 million, compared with approximately $23.6 million of cash and investments at December 31, 2011.

On a consolidated basis, at March 31, 2012, we had working capital of $474.9 million compared with $446.2 million at December 31, 2011. At March 31, 2012 we had cash and investments of $933.8 million, compared with $893.0 million of cash and investments at December 31, 2011.

Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see discussion of "Convertible Senior Notes" below). The repurchase program will be funded with working capital or draws under our credit facility (see discussion of "Credit Facility" below).

We believe that our cash resources, Credit Facility, and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Credit Facility

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility (the "Credit Facility") with various lenders and U.S. Bank National Association, as LC Issuer, Swing Line Lender, and Administrative Agent. The Credit Facility is used for general corporate purposes.

The Credit Facility has a term of five years under which all amounts outstanding will be due and payable on September 9, 2016. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $195 million. As of March 31, 2012 there was $10.0 million outstanding under the Credit Facility. Additionally, as of March 31, 2012, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, which reduces the amount available under the Credit Facility.

Borrowings under the Credit Facility bear interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility. The applicable margins range between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan).

The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 as of the end of each fiscal quarter and a fixed charge coverage ratio of not less than 1.75 to 1.00. At March 31, 2012, we were in compliance with all financial covenants under the Credit Facility.

In the event of a default, including cross-defaults relating to specified other debt in excess of $20 million, the lenders may terminate the commitments under the Credit Facility and declare the amounts outstanding, including all accrued interest and unpaid fees, payable immediately. In addition, the lenders may enforce any and all rights and remedies created under the Credit Facility or applicable law.

Term Loan

On December 7, 2011, our wholly owned subsidiary Molina Center LLC entered into a Term Loan Agreement with various lenders and East West Bank, as Administrative Agent (the "Administrative Agent"). Pursuant to the terms of the Term Loan Agreement, Molina Center LLC borrowed the aggregate principal amount of $48.6 million to finance a portion of the $81 million purchase price for the acquisition of the approximately 460,000 square foot office building, or Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the Eurodollar rate for each Interest Period (as defined below) commencing January 1, 2012. The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commenced on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Convertible Senior Notes

As of March 31, 2012, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per $1,000 principal amount of the Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Shelf Registration Statement

In the second quarter of 2012, we expect to file a shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the registration, issuance, and sale of an indeterminate amount of our securities, including common stock, preferred stock, senior or subordinated debt securities, or warrants. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $519.5 million at March 31, 2012, and $492.4 million at December 31, 2011.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of March 31, 2012, our health plans had aggregate statutory capital and surplus of approximately $536.3 million compared with the required minimum aggregate statutory capital and surplus of approximately $265.1 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2012. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Contractual Obligations

In our Annual Report on Form 10-K for the year ended December 31, 2011, we reported on our contractual obligations as of that date. There have been no material changes to our contractual obligations since that report.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The recognition of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and;
- The determination of medical claims and benefits payable.

Revenue Recognition — Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn will lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At both March 31, 2012, and December 31, 2011, we recorded a liability of $1.0 million under the terms of these contract provisions.

Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health: A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At both March 31, 2012, and December 31, 2011, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): A portion of premiums received by our New Mexico health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). The New Mexico health plan contract also contains certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At both March 31, 2012, and December 31, 2011, we had not recorded any liability under the terms of these contract provisions. In the fourth quarter of 2011, our New Mexico health plan entered into a contract amendment that more closely aligns the calculation of revenue with the methodology adopted under the Affordable Care Act. The contract amendment changed the calculation of the amount of revenue that may be recognized relative to medical costs.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $2.0 million and $0.7 million pursuant to our profit-sharing agreement with the state of Texas at March 31, 2012, and December 31, 2011, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services, or CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $8.0 million for anticipated Medicare risk adjustment premiums at March 31, 2012. We recorded a net receivable of $5.0 million for anticipated Medicare risk adjustment premiums at December 31, 2011.

Quality incentives that allow us to recognize incremental revenue if certain quality standards are met. These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. Effective February 1, 2010 through June 30, 2011, we were eligible to earn additional incremental revenue of up to 0.25% of our total premium if we met certain pharmacy specific performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, effective beginning in 2011, up to 3.25% of the premium is withheld by the state. The withheld premiums can be earned by the health plan by meeting certain performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of March 31, 2012 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of March 31, 2012.

	Three Months Ended March 31, 2012				
	Maximum Available Quality Incentive Premium - Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized
	(In thousands)				
New Mexico	$ 555	$ 336	$ 28	$ 364	$ 83,261
Ohio	2,678	2,678	966	3,644	293,525
Texas	5,750	5,750	—	5,750	198,236
Wisconsin	416	—	—	—	17,142
	$ 9,399	$ 8,764	$ 994	$ 9,758	$592,164

Wisconsin	416	—	—	—	16,417
	$ 3,659	$ 1,794	$ 1,655	$ 3,449	$ 331,363

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements under the scope of FASB Accounting Standards Codification Subtopic 605-25, *Revenue Recognition — Multiple –Element Arrangements,* and SEC Staff Accounting Bulletin Topic 13, *Revenue Recognition*.

Effective January 1, 2011, we adopted a new accounting standard that amends the guidance on the accounting for multiple-element arrangements. Pursuant to the new standard, each required deliverable is evaluated to determine whether it qualifies as a separate unit of accounting which is generally based on whether the deliverable has standalone value to the customer. In addition to standalone value, previous guidance also required objective and reliable evidence of fair value of a deliverable in order to treat the deliverable as a separate unit of accounting. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent. We have adopted this guidance on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Our adoption of this guidance has not impacted the timing or pattern of our revenue recognition in 2011. Also, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. For contracts entered into prior to January 1, 2011, objective and reliable evidence of fair value would be required, in addition to DDI standalone value which we do not have, in order to treat DDI as a separate unit of accounting. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. We began to recognize revenue associated with our Maine contract upon state acceptance in September 2010. In Idaho, we will begin recognition of revenue upon state acceptance.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs
- Employee costs incurred in performing transaction services
- Vendor costs incurred in performing transaction services
- Costs incurred in performing required monitoring of and reporting on contract performance
- Costs incurred in maintaining and processing member and provider eligibility
- Costs incurred in communicating with members and providers

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

We are currently deferring recognition of all revenue as well as all direct costs (to the extent that such costs are estimated to be recoverable) in Idaho until the MMIS in that state receives certification from CMS.

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	March 31, 2012	December 31, 2011	March 31, 2011
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 347,307	$ 301,020	$ 273,378
Capitation payable	37,289	53,532	43,738
Pharmacy	38,443	26,178	16,953
Other	32,794	21,746	17,313
	$ 455,833	$ 402,476	$ 351,382

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $347.3 million of our total medical claims and benefits payable of $455.8 million as of March 31, 2012. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider's monthly capitation payment), our IBNP liability at March 31, 2012, was $340.4 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of March 31, 2012 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding March 31, 2012, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ 120,683
(4%)	80,456
(2%)	40,228
2%	(40,228)
4%	(80,456)
6%	(120,683)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of March 31, 2012 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ (83,846)
(4%)	(55,897)
(2%)	(27,949)
2%	27,949
4%	55,897
6%	83,846

The following per-share amounts are based on a combined federal and state statutory tax rate of 37.5%, and 46.9 million diluted shares outstanding for the three months ended March 31, 2012. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at March 31, 2012, net income for the three months ended March 31, 2012 would increase or decrease by approximately $12.6 million, or $0.27 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at March 31, 2012, net income for the three months ended March 31, 2012 would increase or decrease by approximately $8.7 million, or $0.19 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $62.9 million, or $1.34 per diluted share, and $43.7 million, or $0.93 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $12.6 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2011, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 14.6%.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2012 and 2011 were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

We recognized a benefit from prior period claims development in the amount of $36.6 million for the three months ended March 31, 2012. This amount represents our estimate as of March 31, 2012 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 exceeded the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2011 was due primarily to the following factors:

- For our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- For our Texas health plan, we overestimated the cost of new members in STAR+ (the name of our ABD program in Texas), in the Dallas region.
- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in the lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all of the claims overestimation.
- Offsetting some of the overestimation items described above, our Missouri health plan reserves were underestimated as a result of an unusually large number of premature infants during the fourth quarter.

We recognized a benefit from prior period claims development in the amount of $44.4 million and $51.8 million for the three months ended March 31, 2011, and the year ended December 31, 2011, respectively. This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2010, as a result of the following factors:

- We overestimated the impact of a buildup in claims inventory in Ohio.
- We overestimated the impact of the settlement of disputed provider claims in California.
- We underestimated the reduction in outpatient facility claims costs as a result of a fee schedule reduction in New Mexico effective November 2010, partially offsetting the impact of the two items above.

In estimating our claims liability at March 31, 2012, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- Our Texas health plan membership nearly doubled in March 2012. In addition, effective March 1, 2012, we have assumed inpatient medical liability for STAR+ (an area of coverage that was previously carved out). Reserves for new coverage and new regions are based on the state's pricing estimates.
- Our California health plan is enrolling about 2,000 new ABD members per month as a result of the mandatory assignment of ABD members to managed care plans effective July 1, 2011. These new members are converting from fee-for-service and are higher cost than our base ABD members
- Our Michigan health plan's billed charges of claims in inventory at March 31, 2012 were about 2.5 times higher than the amount at December 31, 2011. This was due in part to approximately 6,000 new dual-eligible members that were enrolled for Medicaid benefits only in December 2011. As we are responsible only for the Medicaid portion of these benefits, the ratio of paid to billed claims for dual eligible members is very small, and this inventory buildup may not represent a large increase in liability.
- Our Wisconsin health plan converted from its legacy claims processing system to the Company's single managed care platform, or QNXT, effective February 1, 2012.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2011 and through March 31, 2012, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The negative amounts displayed for "Components of medical care costs related to: Prior year" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Three Months Ended March 31,		Year Ended
	2012	2011	Dec. 31, 2011
	(Dollars in thousands, except per-member amounts)		
Balances at beginning of period	$ 402,476	$ 354,356	$ 354,356
Components of medical care costs related to:			
Current period	1,167,580	957,909	3,911,803
Prior periods	(36,592)	(44,377)	(51,809)
Total medical care costs	1,130,988	913,532	3,859,994
Payments for medical care costs related to:			
Current period	750,994	646,428	3,516,994
Prior periods	326,637	270,078	294,880
Total paid	1,077,631	916,506	3,811,874

Benefit from prior period as a percentage of:			
Balance at beginning of period	9.1%	12.5%	14.6%
Premium revenue	2.8%	4.1%	1.1%
Total medical care costs	3.2%	4.9%	1.3%
Claims Data:			
Days in claims payable, fee for service	44(1)	41	40
Number of members at end of period	1,825,000	1,647,000	1,697,000
Number of claims in inventory at end of period	260,800	185,300	111,100
Billed charges of claims in inventory at end of period	$ 403,800	$ 250,600	$ 207,600
Claims in inventory per member at end of period	0.14	0.11	0.07
Billed charges of claims in inventory per member at end of period	$ 221.26	$ 152.16	$ 122.33
Number of claims received during the period	4,855,600	4,342,200	17,207,500
Billed charges of claims received during the period	$ 4,337,000	$3,386,600	$ 14,306,500

(1) The increase in the days in claims payable is primarily the result of the increased membership in the Texas health plan and the rise in medical claims reserves associated with that increased membership in the first quarter of 2012. Absent the increased Texas health plan membership, the days in claims payable would have been approximately 41 days.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended March 31, 2012 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. *Legal Proceedings*

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 1A. *Risk Factors*

In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in Part I, Item 1A — Risk Factors, in our 2011 Annual Report on Form 10-K, which risk factors could materially affect our business, financial condition, cash flows, or results of operations. The risks described in our 2011 Form 10-K are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition, cash flows, or results of operations.

There have been no material changes to the risk factors disclosed in our 2011 Form 10-K.

Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds*

Issuer Purchases of Equity Securities

Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014. The repurchase program will be funded with working capital or draws under our credit facility, and repurchases may be made from time to time on the open market or through privately negotiated transactions. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time. No securities were purchased under this program as of March 31, 2012.

Purchases of common stock made by or on behalf of the Company during the quarter ended March 31, 2012, including shares withheld by the Company to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (b)	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (b)
January 1 — January 31	4,213	$ 22.95	—	$ —
February 1 — February 29	2,240	$ 31.85	—	$ —
March 1 — March 31	256,485	$ 33.53	—	$ —
Total	262,938	$ 33.35	—	

(a) During the three months ended March 31, 2012, we did not repurchase any shares of our common stock outside of our publicly announced stock repurchase program. During the quarter we withheld 262,938 shares of common stock under our 2011 Equity Incentive Plan to settle our employees' income tax obligations.

(b) Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time. No repurchases have been made by the Company pursuant to this repurchase plan during the quarter ended March 31, 2012.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended March 31, 2012 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Portions of the registrant's Proxy Statement for the 2012 Annual Meeting of Stockholders to be held on May 2, 2012, are incorporated by reference into Part III of this Form 10-K.

MOLINA HEALTHCARE, INC.

Table of Contents
Form 10-K

PART I

Item 1: *Business*

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. Our business focuses exclusively on government-sponsored health care programs, and includes our Health Plans segment, our Molina Medicaid Solutions℠ segment, and our smaller direct delivery line of business. Our Health Plans segment consists of licensed health maintenance organizations serving Medicaid populations in ten states. Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to Medicaid agencies in an additional five states. Our direct delivery line of business currently consists of 17 primary care community clinics in California, two clinics in Washington, and three county-owned clinics in Fairfax County, Virginia that we manage on behalf of the county. Dr. C. David Molina founded our company in 1980 as a provider organization serving the Medicaid population in Southern California. Today, we remain a provider-focused company led by his son, Dr. J. Mario Molina.

Our Health Plans segment currently operates Medicaid managed care plans in the states of California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin that serve a total of approximately 1.7 million members. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our Health Plans segment derives its revenue principally in the form of premiums paid under Medicaid contracts with the states in which our health plans operate. While the health plans receive fixed per-member per-month, or PMPM, premium payments from the states, the health plans are at risk for the medical costs associated with their members' health care. Our Health Plans segment operates in a highly regulated environment, with stringent minimum capitalization requirements which limit the ability of our health plan subsidiaries to pay dividends to us.

Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS, a core information technology tool used to support the administration of state Medicaid and other health care entitlement programs. Our Molina Medicaid Solutions segment currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program. We added the Molina Medicaid Solutions segment to our business in May 2010 to expand our product offerings to include support of state Medicaid agency administrative needs; to reduce the variability in our earnings resulting from fluctuations in medical care costs; to improve our operating profit margin percentages; and to improve our cash flow by adding a business for which there are no restrictions on dividend payments.

From a strategic perspective, we believe our two business segments and our direct delivery business line allow us to participate in an expanding sector of the economy and continue our mission of serving low-income families and individuals eligible for government-sponsored health care programs. Operationally, our two business segments share a common systems platform, which allows for economies of scale and common experience in meeting the needs of state Medicaid programs. We also believe that we have opportunities to market to state Medicaid agencies various cost containment and quality practices used by our health plans, such as care management and care coordination, for incorporation into their own fee-for-service Medicaid programs.

Our principal executive offices are located at 200 Oceangate, Suite 100, Long Beach, California 90802, and our telephone number is (562) 435-3666. Our website is *www.molinahealthcare.com.*

Information contained on our website or linked to our website is not incorporated by reference into, or as part of, this annual report. Unless the context otherwise requires, references to "Molina Healthcare," the "Company," "we," "our," and "us" herein refer to Molina Healthcare, Inc. and its subsidiaries. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to these reports, are available free of charge under the "investors" tab of our website, *www.molinahealthcare.com*, as soon as reasonably practicable after such reports are electronically filed with or furnished to the Securities and Exchange Commission, or SEC. Information regarding our officers and directors, and copies of our Code of Business Conduct and Ethics, Corporate Governance Guidelines, and our Audit, Compensation, Corporate Governance and Nominating Committee, and Compliance Committee Charters, are also available on our website. Such information is also available in print upon the request of any stockholder to our Investor Relations department at the address of our executive offices set forth above. In accordance with New York Stock Exchange, or NYSE, rules, on May 26, 2011, we filed the annual certification by our Chief Executive Officer certifying that he was unaware of any violation by us of the NYSE's corporate governance listing standards at the time of the certification.

Molina Healthcare, the Molina Healthcare logo, Molina Medicaid Solutions sm and motherhood matters! sm are registered servicemarks of Molina Healthcare, Inc.

Our Industry

The Medicaid and CHIP Programs. The Medicaid program is a federal entitlement program administered by the states. Medicaid provides health care and long-term care services and support to low-income Americans. Subject to federal rules, states have significant flexibility to structure their own programs in terms of eligibility, benefits, delivery of services, and provider payments. Medicaid is funded jointly by the states and the federal government. The federal government guarantees matching funds to states for qualifying Medicaid expenditures based on each state's federal medical assistance percentage, or FMAP. A state's FMAP is calculated annually and varies inversely with average personal income in the state. The average FMAP across all states currently about 59 percent, and ranges from a federally established FMAP floor of 50 percent to as high as 74 percent.

The most common state-administered Medicaid program is the Temporary Assistance for Needy Families program, or TANF (often pronounced "TAN-if"). Another common state-administered Medicaid program is for the aged, blind or disabled, or ABD, Medicaid members. In addition, the Children's Health Insurance Program, or CHIP, is a joint federal and state matching program that provides health care coverage to children whose families earn too much to qualify for Medicaid coverage. States have the option of administering CHIP through their Medicaid programs.

Each state establishes its own eligibility standards, benefit packages, payment rates, and program administration within broad federal statutory and regulatory guidelines. Every state Medicaid program must balance many potentially competing demands, including the need for quality care, adequate provider access, and cost-effectiveness. In an effort to improve quality and provide more uniform and more cost-effective care, many states have implemented Medicaid managed care programs. These programs seek to improve access to coordinated health care services, including preventive care, and to control health care costs. Under Medicaid managed care programs, a health plan receives capitation payments from the state. The health plan, in turn, arranges for the provision of health care services by contracting with a network of medical providers. The health plan implements care management and care coordination programs that seek to improve both care access and care quality, while controlling costs more effectively.

While many states have embraced Medicaid managed care programs, others continue to operate traditional fee-for-service programs to serve all or part of their Medicaid populations. Under fee-for-service Medicaid programs, health care services are made available to beneficiaries as they seek that care, without the benefit of a coordinated effort to maintain and improve their health. As a consequence, treatment is often postponed until medical conditions become more severe, leading to higher costs and more unfavorable outcomes. Additionally, providers paid on a fee-for-service basis are compensated based upon services they perform, rather than health outcomes, and therefore lack incentives to coordinate preventive care, monitor utilization, and control costs.

Because Medicaid is a state-administered program, every state must have mechanisms, policies, and procedures in place to perform a large number of crucial functions, including the determination of eligibility and the reimbursement of medical providers for services provided. This requirement exists regardless of whether a state has adopted a fee-for-service or a managed care delivery model. MMIS are used by states to support these administrative activities. The federal government typically reimburses the states for 90% of the costs incurred in the design, development, and implementation of an MMIS and for 50% of the costs incurred in operating an MMIS. Although a small number of states build and operate their own MMIS, a far more typical practice is for states to sub-contract the design, development, implementation, and operation of their MMIS to private parties. Through our Molina Medicaid Solutions segment, we now actively participate in this market.

In certain instances, states have elected to provide medical benefits to individuals and families who are not served by Medicaid. In New Mexico and Washington, our health plan segment participates in programs that are administered in a manner similar to Medicaid and CHIP, but without federal matching funds.

Medicare Advantage Plans. During 2011, each of our health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, and Washington operated Medicare Advantage plans, each of which included a mandatory Part D prescription drug benefit. Our Medicare Advantage special needs plans, or SNPs, operate under the trade name, Molina Medicare Options Plus, and serve those beneficiaries who are dually eligible for both Medicare and Medicaid, such as low-income seniors and people with disabilities. Our Medicare Advantage Prescription Drug plans, or MA-PDs, operate under the trade name, Molina Medicare Options. Although our MA-PD benefit plans do not exclusively enroll dual eligible beneficiaries, the plans' benefit structure is designed to appeal to lower income beneficiaries. We believe offering these Medicare plans is consistent with our historical mission of serving low-income and medically underserved families and individuals. None of our health plans operate a Medicare Advantage private fee-for-service plan. Total enrollment in our Medicare Advantage plans at December 31, 2011 was approximately 31,000 members. Our 2011 premium revenues from Medicare across all health plans represented approximately 8.4% of our total premium revenues.

Overall, approximately 79% of our members are TANF, 11% are ABD, 8% are CHIP, and 2% are Medicare.

Our Strengths

We focus on serving low-income families and individuals who receive health care benefits through government-sponsored programs within a managed care model. Additionally, we support state Medicaid agencies by providing them with comprehensive solutions to their MMIS development and operating needs. Our approach to our business is based on the following strengths:

Comprehensive Medicaid Services. We offer a complete suite of Medicaid services, ranging from quality care, disease management, and cost management through our Health Plans segment, to state-level MMIS administration through our Molina Medicaid Solutions segment, to the direct delivery of health care services at our clinics. We have the ability to draw upon our experience and expertise in each of these areas to enhance the quality of the services we offer in the others.

Flexible Service Delivery Systems. Our health plan care delivery systems are diverse and readily adaptable to different markets and changing conditions. We arrange health care services with a variety of providers, including independent physicians and medical groups, hospitals, ancillary providers, and our own clinics. Our systems support multiple types of contract models. Our provider networks are well-suited, based on medical specialty, member proximity, and cultural sensitivity, to provide services to our members. Our Molina Medicaid Solutions platform is based upon commercial off-the-shelf technology, or COTS. As a result, we believe that our Molina Medicaid Solutions platform has the flexibility to meet a wide variety of state Medicaid administrative needs in a timely and cost-effective manner.

Proven Expansion and Acquisition Capability. We have successfully replicated the business model of our health plan segment through the acquisition of health plans, the start-up development of new operations, and the transition of members from other health plans. The acquisition of our New Mexico and Wisconsin health plans demonstrated our ability to expand into new states. The establishment of our health plans in Utah, Ohio, Texas, and Florida reflects our ability to replicate our business model on a start-up basis in new states, while contract acquisitions in California, Michigan, and Washington have demonstrated our ability to expand our operations within states in which we were already operating.

Administrative Efficiency. We have centralized and standardized various functions and practices to increase administrative efficiency. The steps we have taken include centralizing claims processing and information services onto a single platform. We have standardized medical management programs, pharmacy benefits management contracts, and health education programs. In addition, we have designed our administrative and operational infrastructure to be scalable for cost-effective expansion into new and existing markets.

Recognition for Quality of Care. The National Committee for Quality Assurance, or NCQA, has accredited nine of our ten Medicaid managed care plans. Our Wisconsin plan acquired in September 2010 currently plans to seek NCQA accreditation in early 2014. We believe that these objective measures of the quality of the services that we provide will become increasingly important to state Medicaid agencies.

Experience and Expertise. Since the founding of our Company in 1980 to serve the Medicaid population in Southern California through a small network of primary care clinics, we have increased our membership to 1.7 million members, expanded our Health Plans segment to ten states, and added our Molina Medicaid Solutions segment. Our experience over the last 30 years has allowed us to develop strong relationships with the constituents we serve, establish significant expertise as a government contractor, and develop sophisticated disease management, care coordination and health education programs that address the particular health care needs of our members. We also benefit from a thorough understanding of the cultural and linguistic needs of Medicaid populations.

Our Strategy

Our objective is to provide a comprehensive suite of Medicaid-related services to meet the health care needs of low-income families and individuals and the state Medicaid agencies that serve them. To achieve our objective, we intend to:

Continue to expand within existing markets. We plan to continue our growth in existing markets by expanding our service areas and provider networks, increasing awareness of the Molina brand name, extending our services to new populations (including the aged, blind, or disabled), maintaining positive provider relationships, and integrating members from other health plans.

Continue to enter new strategic markets. We plan to continue to enter new markets through both acquisitions and by building our own start-up operations. For example, on September 1, 2010, we acquired for approximately $16.8 million Abri Health Plan, a provider of Medicaid managed care services in Wisconsin. We intend to focus our expansion in markets with competitive provider communities, supportive regulatory environments, significant size and, where practicable, mandated Medicaid managed care enrollment.

Continue to provide quality cost-effective care. We plan to use our strong provider networks and the knowledge gained through the operation of our clinics to further develop and utilize effective medical management and other coordinated programs that address the distinct needs of our members and improve the quality and cost-effectiveness of their care.

Leverage operational efficiencies. We intend to leverage the operational efficiencies created by our centralized administrative infrastructure and flexible information systems to earn higher margins on future revenues. We believe our administrative infrastructure has significant expansion capacity, allowing us to integrate new members from expansion within existing markets and enter new markets at lower incremental cost.

Deliver administrative value to state Medicaid agencies. As Medicaid expenditures increase, we believe that an increasing number of states will demand comprehensive solutions that improve both quality and cost-effectiveness. We intend to use our MMIS solution to provide state Medicaid agencies with a flexible and robust solution to their administrative needs. For example, we can apply analytics to improve the functionality of care management processes. We believe that we can help strengthen these tools in ways that translate into both better care and cost containment. We believe that our MMIS platform, together with our extensive experience in health care management and health plan operations, enables us to offer state Medicaid agencies a comprehensive suite of Medicaid-related solutions that meets their needs for quality and for the cost-effective operation of their Medicaid programs.

Open additional primary care clinics. The community clinic model offers an integrated approach that helps us improve both the quality and cost-effectiveness of the care our members receive. Our direct delivery line of business currently consists of 17 primary care community clinics in California, two in Washington, and three county-owned clinics in Fairfax County, Virginia that we manage on behalf of the county. We will also be opening up a clinic in each of New Mexico and Florida in March 2012, and intend to open up additional clinics in California, New Mexico, Florida, Ohio, and Texas during 2012. The growth and aging of the population of the United States foreshadows an increasing shortage of physicians over the next 15 years. Health care reform is expected to worsen this shortage. We believe the shortage will be felt most acutely among already underserved populations, such as the low income families and individuals we serve. While we have no plans to become an organization that fully integrates primary care delivery with our health plans, by leveraging our direct delivery capability on a selective basis we can improve access for our plan members in areas that are most underserved by primary care providers.

Pursue opportunities presented by ICD-10 conversion requirements. Over the next two years, health insurance plans are required to upgrade their systems for diagnosis, medical procedure coding, and claims processing under the tenth revisions of the International Statistical Classification of Diseases, or ICD-10. The United States Department of Health and Human Services will require payers and providers to transition to ICD-10 by October 2013. However, in February 2012, CMS announced that it will postpone implementation of ICD-10 and will be issuing shortly a notice with a new timeline governing the pace of implementation. Thus, although delayed, the transition to ICD-10 is still expected to occur. For many smaller health plans with less than one million members, the costs of making the necessary systems upgrades will be substantial. For companies like ours, the benefits of scale in this environment will be significant. We believe we will be positioned to reduce the cost per member for compliance with ICD-10. At the same time, the new requirements will create revenue opportunities for Molina Medicaid Solutions.

Prepare for health care reform. In preparation for the large scale changes associated with federal health care reform, we have organized a dedicated business unit to address issues of strategy, policy, reform readiness, and implementation. Health care reform opportunities include an estimated 16 million more members eligible for Medicaid by 2019, 30 million more individuals covered by health insurance exchanges, and increasing demand for long-term care and behavioral health services. In the next two years, we anticipate that many states will be offering new Medicaid RFP expansions in order to avoid disruptions in 2014 in connection with the full implementation of health care reform.

Medicaid Contracts

With the exception of our Missouri health plan, which does not serve ABD or Medicare members, and our Wisconsin health plan, which does not serve Medicare members, all of our health plans serve TANF, CHIP, ABD, and Medicare members. For its Medicare members, each health plan enters into a one-year annually renewable contract with the Centers for Medicare and Medicaid Services, or CMS. For its other members, each health plan enters into a contract with the state's Medicaid agency. The contractual relationship with the state is generally for a period of one- to two-years and renewable on an annual or biannual basis at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause upon 30 days to nine months prior written notice. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, our Missouri health plan was notified that it was not awarded a new contract under that state's RFP, and therefore its contract will now expire on June 30, 2012.

Our contracts with the state determine the type and scope of health care services that we arrange for our members. Generally, our contracts require us to arrange for preventive care, office visits, inpatient and outpatient hospital and medical services, and pharmacy benefits. The contracts also detail the requirements for operating in the Medicaid sector, including provisions relating to: eligibility; enrollment and disenrollment processes; covered benefits; eligible providers; subcontractors; record-keeping and record retention; periodic financial and informational reporting; quality assurance; marketing; financial standards; timeliness of claims payments; health education, wellness and prevention programs; safeguarding of member information; fraud and abuse detection and reporting; grievance procedures; and organization and administrative systems. A health plan's compliance with these requirements is subject to monitoring by state regulators. A health plan is subject to periodic comprehensive quality assurance evaluation by a third-party reviewing organization and generally by the insurance department of the jurisdiction that licenses the health plan. Most health plans must also submit quarterly and annual statutory financial statements and utilization reports, as well as many other reports in accordance with individual state requirements.

We are usually paid a negotiated PMPM amount, with the PMPM amount varying from contract to contract. Generally, that amount is higher in states where we are required to offer more extensive health benefits. We are also paid an additional amount for each newborn delivery from the Medicaid programs in all of our state health plans, except with respect to our New Mexico health plan.

Provider Networks

We arrange health care services for our members through contracts with providers that include independent physicians and groups, hospitals, ancillary providers, and our own clinics. Our network of providers includes primary care physicians, specialists and hospitals. Our strategy is to contract with providers in those geographic areas and medical specialties necessary to meet the needs of our members. We also strive to ensure that our providers have the appropriate cultural and linguistic experience and skills.

Physicians. We contract with both primary care physicians and specialists, many of whom are organized into medical groups or independent practice associations, or IPAs. Primary care physicians provide office-based primary care services. Primary care physicians may be paid under capitation or fee-for-service contracts and may receive additional compensation by providing certain preventive services. Our specialists care for patients for a specific episode or condition, usually upon referral from a primary care physician, and are usually compensated on a fee-for-service basis. When we contract with groups of physicians on a capitated basis, we monitor their solvency.

Hospitals. We generally contract with hospitals that have significant experience dealing with the medical needs of the Medicaid population. We reimburse hospitals under a variety of payment methods, including fee-for-service, per diems, diagnostic-related groups, or DRGs, capitation, and case rates.

Primary Care Clinics. Our California health plan operates 16 company-owned primary care clinics in California staffed by our physicians, physician assistants, and nurse practitioners. These clinics are located in neighborhoods where our members live, and provide us a first-hand opportunity to understand the special needs of our members. The clinics assist us in developing and implementing community education, disease management, and other programs. The clinics also give us direct clinic management experience that enables us to better understand the needs of our contracted providers. In addition, we have a non-licensed subsidiary in Virginia which manages three health care clinics for Fairfax County, and our Washington health plan operates two Company-owned primary care clinics.

Medical Management

Our experience in medical management extends back to our roots as a provider organization. Primary care physicians are the focal point of the delivery of health care to our members, providing routine and preventive care, coordinating referrals to specialists, and assessing the need for hospital care. This model has proven to be an effective method for coordinating medical care for our members. The underlying challenge we face is to coordinate health care so that our members receive timely and appropriate care from the right provider at the appropriate cost. In support of this goal, and to ensure medical management consistency among our various state health plans, we continuously refine and upgrade our medical management efforts at both the corporate and subsidiary levels.

We seek to ensure quality care for our members on a cost-effective basis through the use of certain key medical management and cost control tools. These tools include utilization management, case and health management, and provider network and contract management.

Utilization Management. We continuously review utilization patterns with the intent to optimize quality of care and ensure that only appropriate services are rendered in the most cost-effective manner. Utilization management, along with our other tools of medical management and cost control, is supported by a centralized corporate medical informatics function which utilizes third-party software and data warehousing tools to convert data into actionable information. We use a predictive modeling capability that supports a proactive case and health management approach both for us and our affiliated physicians.

Case and Health Management. We seek to encourage quality, cost-effective care through a variety of case and health management programs, including disease management programs, educational programs, and pharmacy management programs.

Disease Management Programs. We develop specialized disease management programs that address the particular health care needs of our members. *motherhood matters!*℠ is a comprehensive program designed to improve pregnancy outcomes and enhance member satisfaction. *"breathe with ease!"* is a multi-disciplinary disease management program that provides health education resources and case management services to assist physicians caring for asthmatic members between the ages of three and fifteen. *"Healthy Living with Diabetes"* is a diabetes disease management program. *"Heart Health Living"* is a cardiovascular disease management program for members who have suffered from congestive heart failure, angina, heart attack, or high blood pressure.

Educational Programs. Educational programs are an important aspect of our approach to health care delivery. These programs are designed to increase awareness of various diseases, conditions, and methods of prevention in a manner that supports our providers while meeting the unique needs of our members. For example, we provide our members with information to guide them through various episodes of care. This information, which is available in several languages, is designed to educate parents on the use of primary care physicians, emergency rooms, and nurse call centers.

Pharmacy Management Programs. Our pharmacy management programs focus on physician education regarding appropriate medication utilization and encouraging the use of generic medications. Our pharmacists and medical directors work with our pharmacy benefits manager to maintain a formulary that promotes both improved patient care and generic drug use. We employ full-time pharmacists and pharmacy technicians who work with physicians to educate them on the uses of specific drugs, the implementation of best practices, and the importance of cost-effective care.

Provider Network and Contract Management. The quality, depth, and scope of our provider network are essential if we are to ensure quality, cost-effective care for our members. In partnering with quality, cost-effective providers, we utilize clinical and financial information derived by our medical informatics function, as well as the experience we have gained in serving Medicaid members to gain insight into the needs of both our members and our providers. As we grow in size, we seek to strengthen our ties with high-quality, cost-effective providers by offering them greater patient volume.

Plan Administration and Operations

Management Information Systems. All of our health plan information technology and systems operate on a single platform. This approach avoids the costs associated with maintaining multiple systems, improves productivity, and enables medical directors to compare costs, identify trends, and exchange best practices among our plans. Our single platform also facilitates our compliance with current and future regulatory requirements.

The software we use is based on client-server technology and is scalable. We believe the software is flexible, easy to use, and allows us to accommodate anticipated enrollment growth and new contracts. The open architecture of the system gives us the ability to transfer data from other systems without the need to write a significant amount of computer code, thereby facilitating the integration of new plans and acquisitions.

We have designed our corporate website with a focus on ease of use and visual appeal. Our website has a secure ePortal which allows providers, members, and trading partners to access individualized data. The ePortal allows the following self-services:

- *Provider Self Services.* Providers have the ability to access information regarding their members and claims. Key functionalities include Check Member Eligibility, View Claim, and View/Submit Authorizations.
- *Member Self Services.* Members can access information regarding their personal data, and can perform the following key functionalities: View Benefits, Request New ID Card, Print Temporary ID Card, and Request Change of Address/PCP.
- *File Exchange Services.* Various trading partners — such as service partners, providers, vendors, management companies, and individual IPAs — are able to exchange data files (such as those that may be required by the Health Insurance Portability and Accountability Act of 1996, or HIPAA, or any other proprietary format) with us using the file exchange functionality.

Best Practices. We continuously seek to promote best practices. Our approach to quality is broad, encompassing traditional medical management and the improvement of our internal operations. We have staff assigned full-time to the development and implementation of a uniform, efficient, and quality-based medical care delivery model for our health plans. These employees coordinate and implement Company-wide programs and strategic initiatives such as preparation of the Healthcare Effectiveness Data and Information Set, or HEDIS, and accreditation by the NCQA. We use measures established by the NCQA in credentialing the physicians in our network. We routinely use peer review to assess the quality of care rendered by providers. Nine of our ten health plans are accredited by the NCQA. Our Wisconsin plan acquired in September 2010 currently plans to seek NCQA accreditation in early 2014.

Claims Processing. All of our health plans operate on a single managed care platform for claims processing (the QNXT 3.4 system).

Centralized Management Services. We provide certain centralized medical and administrative services to our health plans pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems, and human resources services. Fees for such services are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the health plan's ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate.

Compliance. Our health plans have established high standards of ethical conduct. Our compliance programs are modeled after the compliance guidance statements published by the Office of the Inspector General of the U.S. Department of Health and Human Services. Our uniform approach to compliance makes it easier for our health plans to share information and practices and reduces the potential for compliance errors and any associated liability.

Disaster Recovery. We have established a disaster recovery and business resumption plan, with back-up operating sites, to be deployed in the case of a major disruptive event.

Competition

We operate in a highly competitive environment. The Medicaid managed care industry is fragmented, and the competitive landscape is subject to ongoing changes as a result of business consolidations and new strategic alliances. We compete with a large number of national, regional, and local Medicaid service providers, principally on the basis of size, location, and quality of provider network, quality of service, and reputation. Competition can vary considerably from state to state. Below is a general description of our principal competitors for state contracts, members, and providers:

- *Multi-Product Managed Care Organizations* — National and regional managed care organizations that have Medicaid members in addition to numerous commercial health plan and Medicare members.
- *Medicaid HMOs* — National and regional managed care organizations that focus principally on providing health care services to Medicaid beneficiaries, many of which operate in only one city or state.

- *Prepaid Health Plans* — Health plans that provide less comprehensive services on an at-risk basis or that provide benefit packages on a non-risk basis.
- *Primary Care Case Management Programs* — Programs established by the states through contracts with primary care providers to provide primary care services to Medicaid beneficiaries, as well as to provide limited oversight of other services.

We will continue to face varying levels of competition. Health care reform proposals may cause organizations to enter or exit the market for government sponsored health programs. However, the licensing requirements and bidding and contracting procedures in some states may present partial barriers to entry into our industry.

We compete for government contracts, renewals of those government contracts, members, and providers. State agencies consider many factors in awarding contracts to health plans. Among such factors are the health plan's provider network, medical management, degree of member satisfaction, timeliness of claims payment, and financial resources. Potential members typically choose a health plan based on a specific provider being a part of the network, the quality of care and services available, accessibility of services, and reputation or name recognition of the health plan. We believe factors that providers consider in deciding whether to contract with a health plan include potential member volume, payment methods, timeliness and accuracy of claims payment, and administrative service capabilities.

Molina Medicaid Solutions competes with large MMIS vendors, such as HP Enterprise Services (formerly known as EDS), ACS (owned by Xerox Corporation), Computer Services Corporation, or CSC, and CNSI.

Regulation

Our health plans are highly regulated by both state and federal government agencies. Regulation of managed care products and health care services varies from jurisdiction to jurisdiction, and changes in applicable laws and rules can occur frequently. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Such agencies have become increasingly active in recent years in their review and scrutiny of health insurers and managed care organization, including those operating in the Medicaid and Medicare programs.

To operate a health plan in a given state, we must apply for and obtain a certificate of authority or license from that state. Our operating health plans are licensed to operate as health maintenance organizations, or HMOs, in each of California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. In those states we are regulated by the agency with responsibility for the oversight of HMOs which, in most cases, is the state department of insurance. In California, however, the agency with responsibility for the oversight of HMOs is the Department of Managed Health Care. Licensing requirements are the same for us as they are for health plans serving commercial or Medicare members. We must demonstrate that our provider network is adequate, that our quality and utilization management processes comply with state requirements, and that we have adequate procedures in place for responding to member and provider complaints and grievances. We must also demonstrate that we can meet requirements for the timely processing of provider claims, and that we can collect and analyze the information needed to manage our quality improvement activities. In addition, we must prove that we have the financial resources necessary to pay our anticipated medical care expenses and the infrastructure needed to account for our costs.

Our health plans are required to file quarterly and annual reports of their operating results with the appropriate state regulatory agencies. These reports are accessible for public viewing. Each health plan undergoes periodic examinations and reviews by the state in which it operates. The health plans generally must obtain approval from the state before declaring dividends in excess of certain thresholds. Each health plan must maintain its net worth at an amount determined by statute or regulation. The minimum statutory net worth requirements differ by state, and are generally based on statutory minimum risk-based capital, or RBC, requirements. The RBC requirements are based on guidelines established by the National Association of Insurance Commissioners, or NAIC, and are administered by the states. Our Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin health plans are subject to RBC requirements. Any acquisition of another plan's members or its state contracts must also be approved by the state, and our ability to invest in certain financial securities may be prescribed by statute.

In addition, we are also regulated by each state's department of health services or the equivalent agency charged with oversight of Medicaid and CHIP. These agencies typically require demonstration of the same capabilities mentioned above and perform periodic audits of performance, usually annually.

Medicaid. Medicaid was established in 1965 under the U.S. Social Security Act to provide medical assistance to the poor. Although both the federal and state governments jointly fund it, Medicaid is a state-operated and state-implemented program. Our contracts with the state Medicaid programs impose various requirements on us in addition to those imposed by applicable federal and state laws and regulations. Within broad guidelines established by the federal government, each state:

- establishes its own member eligibility standards;
- determines the type, amount, duration, and scope of services;
- sets the rate of payment for health care services; and
- administers its own program.

We obtain our Medicaid contracts in different ways. Some states award contracts to any applicant demonstrating that it meets the state's requirements. Other states engage in a competitive bidding process. In all cases, we must demonstrate to the satisfaction of the state Medicaid program that we are able to meet the state's operational and financial requirements. These requirements are in addition to those required for a license and are targeted to the specific needs of the Medicaid population. For example:

- We must measure provider access and availability in terms of the time needed to reach the doctor's office using public transportation;
- Our quality improvement programs must emphasize member education and outreach and include measures designed to promote utilization of preventive services;
- We must have linkages with schools, city or county health departments, and other community-based providers of health care, to demonstrate our ability to coordinate all of the sources from which our members may receive care;
- We must be able to meet the needs of the disabled and others with special needs;
- Our providers and member service representatives must be able to communicate with members who do not speak English or who are deaf; and
- Our member handbook, newsletters, and other communications must be written at the prescribed reading level, and must be available in languages other than English.

In addition, we must demonstrate that we have the systems required to process enrollment information, to report on care and services provided, and to process claims for payment in a timely fashion. We must also have the financial resources needed to protect the state, our providers, and our members against the insolvency of one of our health plans.

Medicare. Medicare is a federal program that provides eligible persons age 65 and over and some disabled persons a variety of hospital, medical insurance, and prescription drug benefits. Medicare is funded by Congress, and administered by the Centers for Medicare and Medicaid Services, or CMS. Medicare beneficiaries have the option to enroll in a Medicare Advantage plan. Under Medicare Advantage, managed care plans contract with CMS to provide benefits that are comparable to original Medicare in exchange for a fixed PMPM premium payment that varies based on the county in which a member resides, the demographics of the member, and the member's health condition.

The Medicare Prescription Drug, Improvement and Modernization Act of 2003, or MMA, made numerous changes to the Medicare program, including expanding the Medicare program to include a prescription drug benefit. Since 2006, Medicare beneficiaries have had the option of selecting a new prescription drug benefit from an existing Medicare Advantage plan. The drug benefit, available to beneficiaries for a monthly premium, is subject to certain cost sharing depending upon the specific benefit design of the selected plan. Plans are not required to offer the same benefits, but are required to provide coverage that is at least actuarially equivalent to the standard drug coverage delineated in the MMA.

On July 15, 2008, the Medicare Improvements for Patients and Providers Act, or MIPPA, became law and, in September 2008, CMS promulgated implementing regulations. MIPPA impacts a broad range of Medicare activities and impacts all types of Medicare managed care plans. MIPPA and subsequent CMS guidance place prohibitions and limitations on certain sales and marketing activities

of Medicare Advantage plans. Among other things, Medicare Advantage plans are not permitted to make unsolicited outbound calls to potential members or engage in other forms of unsolicited contact, establish appointments without documented consent from potential members, or conduct sales events in certain provider-based settings. MIPPA also establishes certain restrictions on agent and broker compensation.

HIPAA. In 1996, Congress enacted the Health Insurance Portability and Accountability Act, or HIPAA. All health plans are subject to HIPAA, including ours. HIPAA generally requires health plans to:

- Establish the capability to receive and transmit electronically certain administrative health care transactions, like claims payments, in a standardized format,
- Afford privacy to patient health information, and
- Protect the privacy of patient health information through physical and electronic security measures.

The Patient Protection and Affordable Care Act of 2010, or ACA, created additional tools for fraud prevention, including increased oversight of providers and suppliers participating or enrolling in Medicaid, CHIP, and Medicare. Those enhancements included mandatory licensure for all providers, and site visits, fingerprinting, and criminal background checks for higher risk providers. On September 23, 2010, CMS issued proposed regulations designed to implement these requirements. It is not clear at this time the degree to which managed care providers would have to comply with these new requirements, many of which resemble procedures that we already have in place.

The Health Information Technology for Economic and Clinical Health Act ("HITECH Act"), a part of the ARRA, modified certain provisions of HIPAA by, among other things, extending the privacy and security provisions to business associates, mandating new regulations around electronic medical records, expanding enforcement mechanisms, allowing the state Attorneys General to bring enforcement actions, and increasing penalties for violations. The U.S. Department of Health and Human Services, as required by the HITECH Act, has issued interim final rules that set forth the breach notification obligations applicable to covered entities and their business associates (the "HHS Breach Notification Rule"). The various requirements of the HITECH Act and the HHS Breach Notification Rule have different compliance dates, some of which have passed and some of which will occur in the future. With respect to those requirements whose compliance dates have passed, we believe that we are in compliance with these provisions. With respect to those requirements whose compliance dates are in the future, we are reviewing our current practices and identifying those which may be impacted by upcoming regulations. It is our intention to implement these new requirements on or before the applicable compliance dates.

Fraud and Abuse Laws. Our operations are subject to various state and federal health care laws commonly referred to as "fraud and abuse" laws. Fraud and abuse prohibitions encompass a wide range of activities, including kickbacks for referral of members, billing for unnecessary medical services, improper marketing, and violations of patient privacy rights. These fraud and abuse laws include the federal False Claims Act which prohibits the knowing filing of a false claim or the knowing use of false statements to obtain payment from the federal government. Many states have false claim act statutes that closely resemble the federal False Claims Act. If an entity is determined to have violated the federal False Claims Act, it must pay three times the actual damages sustained by the government, plus mandatory civil penalties up to fifty thousand dollars for each separate false claim. Suits filed under the Federal False Claims Act, known as *"qui tam"* actions, can be brought by any individual on behalf of the government and such individuals (known as "relators" or, more commonly, as "whistleblowers") may share in any amounts paid by the entity to the government in fines or settlement. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines or be excluded from the Medicaid, Medicare or other state or Federal health care programs as a result of an investigation arising out of such action. In addition, the Deficit Reduction Action of 2005 ("DRA") encourages states to enact state-versions of the federal False Claims Act that establish liability to the state for false and fraudulent Medicaid claims and that provide for, among other things, claims to be filed by *qui tam* relators.

Companies involved in public health care programs such as Medicaid are often the subject of fraud and abuse investigations. The regulations and contractual requirements applicable to participants in these public sector programs are complex and subject to change. Violations of certain fraud and abuse laws applicable to us could result in civil monetary penalties, criminal fines and imprisonment, and/or exclusion from participation in Medicaid, Medicare, other federal health care programs and federally funded state health programs.

Federal and state governments have made investigating and prosecuting health care fraud and abuse a priority. Although we believe that our compliance efforts are adequate, we will continue to devote significant resources to support our compliance efforts.

Employees

As of December 31, 2011, we had approximately 5,200 employees. Our employee base is multicultural and reflects the diverse Medicaid and Medicare membership we serve. We believe we have good relations with our employees. None of our employees is represented by a union.

Executive Officers of the Registrant

J. Mario Molina, M.D., 53, has served as President and Chief Executive Officer since succeeding his father and company founder, Dr. C. David Molina, in 1996. He has also served as Chairman of the Board since 1996. Prior to that, he served as Medical Director from 1991 through 1994 and was Vice President responsible for provider contracting and relations, member services, marketing and quality assurance from 1994 to 1996. He earned an M.D. from the University of Southern California and performed his medical internship and residency at the Johns Hopkins Hospital. Dr. Molina is the brother of John C. Molina.

John C. Molina, J.D., 47, has served in the role of Chief Financial Officer since 1995. He also has served as a director since 1994. Mr. Molina has been employed by us for over 30 years in a variety of positions. Mr. Molina is a past president of the California Association of Primary Care Case Management Plans. He was recently named to the Los Angeles branch of the Federal Reserve Bank of San Francisco's board of directors. He earned a Juris Doctorate from the University of Southern California School of Law. Mr. Molina is the brother of J. Mario Molina, M.D.

Terry P. Bayer, 61, has served as our Chief Operating Officer since November 2005. She had formerly served as our Executive Vice President, Health Plan Operations since January 2005. Ms. Bayer has over 30 years of health care management experience, including staff model clinic administration, provider contracting, managed care operations, disease management, and home care. Prior to joining us, her professional experience included regional responsibility at FHP, Inc. and multi-state responsibility as Regional Vice-President at Maxicare; Partners National Health Plan, a joint venture of Aetna Life Insurance Company and Voluntary Hospital Association (VHA); and Lincoln National. She has also served as Executive Vice President of Managed Care at Matria Healthcare, President and Chief Operating Officer of Praxis Clinical Services, and as Western Division President of AccentCare. She holds a Juris Doctorate from Stanford University, a Master's degree in Public Health from the University of California, Berkeley, and a Bachelor's degree in Communications from Northwestern University.

Joseph W. White, 53, has served as our Chief Accounting Officer since 2003. In his role as Chief Accounting Officer, Mr. White is responsible for oversight of the Company's accounting, reporting, forecasting, budgeting, actuarial, procurement, treasury and facilities functions. Mr. White has over 25 years of financial management experience in the health care industry. Prior to joining the Company in 2003, Mr. White worked for Maxicare Health Plans, Inc. from 1987 through 2002. Mr. White holds a Master's degree in Business Administration and a Bachelor's degree in Commerce from the University of Virginia. Mr. White is a Certified Public Accountant.

Stephen T. O'Dell, 60, has served as our Senior Vice President, Growth & Corporate Development, since December 2010. Mr. O'Dell is responsible for leading the Company's strategic growth efforts, including mergers and acquisitions, business development and health care reform readiness strategy and implementation. Prior to this role, Mr. O'Dell served the Company as President and CEO of our California health plan and more recently as a Regional Vice President overseeing the strategic direction and operations of our health plans in Washington, Utah, New Mexico and Texas as well as the Company's medical clinics in California. Mr. O'Dell has more than 30 years of executive experience in the managed health care industry. He has held executive positions at First Consulting Group, Blue Cross Blue Shield of Colorado, Nevada and New Mexico and FHP International. Mr. O'Dell holds a Master of Science degree in Health Administration from the University of Colorado Health Sciences Center and a Bachelor of Arts degree in History from Lewis & Clark College in Oregon.

Item 1A: ***Risk Factors***

RISK FACTORS

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

This annual report on Form 10-K and the documents we incorporate by reference in this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Other than statements of historical fact, all statements that we include in this report and in the documents we incorporate by reference may be deemed to be forward-looking statements for purposes of the Securities Act and the Exchange Act. Such forward-looking statements may be identified by words such as "anticipates," "believes," "could," "estimates," "expects," "guidance," "intends," "may," "outlook," "plans," "projects," "seeks," "will," or similar words or expressions.

Investing in our securities involves a high degree of risk. Before making an investment decision, you should carefully read and consider the following risk factors, as well as the other information we include or incorporate by reference in this report and the information in the other reports we file with the SEC. Such risk factors should be considered not only with regard to the information contained in this annual report, but also with regard to the information and statements in the other periodic or current reports we file with the SEC, as well as our press releases, presentations to securities analysts or investors, or other communications made by or with the approval of one of our executive officers. No assurance can be given that we will actually achieve the results contemplated or disclosed in our forward-looking statements. Such statements may turn out to be wrong due to the inherent uncertainties associated with future events. Accordingly, you should not place undue reliance on our forward-looking statements, which reflect management's analyses, judgments, beliefs, or expectations only as of the date they are made.

If any of the events described in the following risk factors actually occur, our business, results of operations, financial condition, cash flows, or prospects could be materially adversely affected. The risks and uncertainties described below are those that we currently believe may materially affect us. Additional risks and uncertainties not currently known to us or that we currently deem immaterial may also affect our business and operations. As such, you should not consider this list to be a complete statement of all potential risks or uncertainties. Except to the extent otherwise required by federal securities laws, we do not undertake to address or update forward-looking statements in future filings or communications regarding our business or operating results, and do not undertake to address how any of these factors may have caused results to differ from discussions or information contained in previous filings or communications.

Risks Related to Our Health Plans Business

State and federal budget deficits may result in Medicaid, CHIP, or Medicare funding cuts which could reduce our revenues and profit margins.

Nearly all of our premium revenues come from the joint federal and state funding of the Medicaid and CHIP programs. Due to high unemployment levels, Medicaid enrollment levels and Medicaid costs are continuing to increase at the same time that state budgets are suffering from unprecedented deficits. Because governmental health care programs account for such a large portion of state budgets, efforts to contain overall government spending and to achieve a balanced budget often result in significant political pressure being directed at the funding for these health care programs. Resolving the budget shortfalls is now particularly difficult since program reductions and one-time strategies to plug the gaps have already been used in most states. In fiscal year 2011, 47 states implemented at least one new policy to control Medicaid costs and 50 states planned to do so in fiscal year 2012. Most states reported program reductions in multiple areas. However, the "maintenance of eligibility" requirements under the Patient Protection and Affordable Care Act generally prohibit states from restricting Medicaid eligibility or tightening enrollment procedures. States are also moving forward with a range of delivery system changes and programmatic initiatives designed to improve care and control costs.

Headed into state fiscal year 2013 (which in most instances starts on July 1, 2012), states do not expect revenue collections to recover to a level sufficient to avoid additional budget cuts. Already, 29 states have projected or have addressed shortfalls totaling $44 billion for fiscal year 2013. Among them are California and Texas, two of the most populous states in the country. Because Medicaid is one of the largest expenditures in every state budget, and one of the fastest-growing, it is a prime target for cost-containment efforts. All of the states in which we currently operate our health plans are currently facing significant budgetary pressures. The mandate of health reform adding millions of individuals to Medicaid and CHIP will put further pressures on state Medicaid programs. These budgetary pressures may result in unexpected Medicaid, CHIP, or Medicare rate cuts which could reduce our revenues and profit margins.

Moreover, some federal deficit reduction proposals would fundamentally change the structure and financing of the Medicaid program. Recently, various proposals have been advanced to reduce annual federal deficits and to slow the increase in the national debt. A number of these proposals include both tax increases and spending reductions in discretionary programs and mandatory programs, such as Social Security, Medicare, and Medicaid. Some of the proposals relating to Medicaid would fundamentally change the structure and financing of the program, with major implications for providers and beneficiaries. One such proposal would be to convert Medicaid into a block grant, capping federal Medicaid payments to each state at a specified dollar amount, and limiting the growth in that dollar amount each year. Based on analysis of previous proposals to cap Medicaid, these dollar caps and growth limits would have to be set below the levels at which Medicaid is now expected to grow based on enrollment and health care inflation to save money. In the event the Medicaid program is fundamentally restructured, our business could be adversely affected.

Most recently, on August 2, 2011, the President signed into law the Budget Control Act of 2011, which, among other things, creates the Joint Select Committee on Deficit Reduction to recommend proposals in spending reductions to Congress. The Joint Select Committee was tasked with proposing legislation to reduce the United States federal deficit by $1.5 trillion for fiscal years 2012-2021 by December 23, 2011. Reductions in Medicare and Medicaid spending were initially included as a part of these deficit reduction measures. On September 19, 2011, President Obama presented his Plan for Economic Growth and Deficit Reduction to the Joint Select Committee, which included $72 billion in Medicaid savings. The Joint Select Committee, however, failed to propose legislation by the December 23, 2011 deadline. Therefore, approximately $1.2 trillion in domestic and defense spending reductions will automatically begin on January 1, 2013 and will be split evenly between domestic and defense spending. Payments to Medicare providers are included in the automatic spending cuts; however, the Budget Control Act of 2011 provides that Medicare payments may be reduced by no more than 2% and certain other programs, including Medicaid, would be exempt from the automatic spending cuts. At this time, we are unable to determine how the automatic Congressional spending cuts will affect Medicare and Medicaid reimbursement in the future. We also cannot predict the initiatives that may be adopted in the future or their full impact. There likely will continue to be legislative and regulatory proposals at the federal and state levels directed at containing or lowering the cost of health care that, if adopted, could potentially have a material adverse effect on our business, financial condition, cash flows, or results of operations.

The recently enacted health care reform law and the implementation of that law could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

In March 2010, President Obama signed both the Patient Protection and Affordable Care Act and the Health Care and Education Affordability Reconciliation Act, commonly referred to together as the "ACA". This legislation enacts comprehensive changes to the U.S. health care system, components of which will be phased in at various stages over the next eight years. Among other things, by January 1, 2014, the Medicaid program will be expanded to provide eligibility to nearly all low-income people under age 65 with income below 133 percent of the federal poverty line. As a result, millions of low-income adults without children who currently cannot qualify for coverage, as well as many low-income parents and, in some instances, children now covered through CHIP, will be made eligible for Medicaid. In total, the Congressional Budget Office estimates that Medicaid and CHIP will cover an additional 16 million people by 2019. The legislation also imposes a franchise tax or premium excise tax of $8 billion starting in 2014, with increasing annual amounts thereafter. Such assessment may not be deductible for income tax purposes. As a result, several state officials have stated that the fiscal pressure that Medicaid puts on states is expected to increase if the federal health-care overhaul takes place in 2014. Although the federal government is required to pick up the costs for people newly eligible for the program, many who are now eligible but not enrolled are expected to be drawn in, and states must shoulder part of those costs.

There are many parts of the legislation that will require further guidance in the form of regulations. Due to the breadth and complexity of the health reform legislation, the lack of implementing regulations and interpretive guidance, and the phased-in nature of the implementation, the overall impact of the health reform legislation on our business over the coming years is difficult to predict and not yet fully known.

In addition, there have been a number of lawsuits filed that challenge all or part of the health care reform law. On January 31, 2011, a Florida District Court ruled that the entire health care reform law is unconstitutional. Other courts have ruled in favor of the law or have only struck down certain provisions of the law. These cases are under appeal and others are in process. The United States Supreme Court is scheduled to hear oral arguments on certain aspects of these cases in March 2012, including the constitutionality of the individual mandate and of the requirement imposed on states that they expand coverage under the Medicaid program. We cannot predict the ultimate outcome of any of the litigation. Further, various Congressional leaders have indicated a desire to revisit or repeal the health care reform law. While the U.S House of Representatives voted to repeal the whole health care reform law, the U.S. Senate voted against such a repeal. There have separately been a number of bills introduced that would change certain provisions of the law. Because of these challenges, we cannot predict whether any or all of the legislation will be implemented as enacted, overturned, repealed, or modified. Any partial or complete repeal or amendment or implementation difficulties, or uncertainty regarding such events, could materially and adversely impact our ability to capitalize on the opportunities presented by the ACA or may cause us to incur additional costs of compliance.

If we fail to effectively accommodate the growth in Medicaid enrollment anticipated under the health reform legislation, our business may be materially adversely affected. In addition, if the new $8 billion insurance industry assessment is imposed as enacted, or if we are unable to obtain premium increases to offset the impact of the assessment or otherwise adjust our business model to address the assessment, our business, financial condition, cash flows, or results of operations could be materially adversely affected.

Our profitability depends on our ability to accurately predict and effectively manage our medical care costs.

Our profitability depends to a significant degree on our ability to accurately predict and effectively manage our medical care costs. Historically, our medical care cost ratio, meaning our medical care costs as a percentage of our premium revenue, has fluctuated substantially, and has also varied across our state health plans. Because the premium payments we receive are generally fixed in advance and we operate with a narrow profit margin, relatively small changes in our medical care cost ratio can create significant changes in our overall financial results. For example, if our overall medical care ratio for 2011 of 83.9% had been one percentage point higher, or 84.9%, our earnings for 2011 would have been approximately $0.25 per diluted share rather than our actual 2011 earnings of $0.45 per diluted share, a 44% reduction in our earnings.

Factors that may affect our medical care costs include the level of utilization of health care services, unexpected patterns in the annual flu season, increases in hospital costs, an increased incidence or acuity of high dollar claims related to catastrophic illnesses or medical conditions such as hemophilia for which we do not have adequate reinsurance coverage, increased maternity costs, payment rates that are not actuarially sound, changes in state eligibility certification methodologies, relatively low levels of hospital and specialty provider competition in certain geographic areas, increases in the cost of pharmaceutical products and services, changes in health care regulations and practices, epidemics, new medical technologies, and other various external factors. Many of these factors are beyond our control and could reduce our ability to accurately predict and effectively manage the costs of providing health care services. The inability to forecast and manage our medical care costs or to establish and maintain a satisfactory medical care cost ratio, either with respect to a particular state health plan or across the consolidated entity, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

A failure to accurately estimate incurred but not reported medical care costs may negatively impact our results of operations.

Because of the time lag between when medical services are actually rendered by our providers and when we receive, process, and pay a claim for those medical services, we must continually estimate our medical claims liability at particular points in time, and establish claims reserves related to such estimates. Our estimated reserves for such "incurred but not paid," or IBNP, medical care costs, are based on numerous assumptions. We estimate our medical claims liabilities using actuarial methods based on historical data adjusted for claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our ability to accurately estimate claims for our newer lines of business or populations, such as with respect to Medicare Advantage or aged, blind, and disabled Medicaid members, is impacted by the more limited experience we have had with those populations. Finally, with regard to the new Medicaid and CHIP members we expect to enroll in 2012 through organic growth due primarily to the recession, certain new members may be disproportionately costly due to high utilization in their first several months of Medicaid or CHIP membership as a result of their previously having been uninsured and therefore not seeking or deferring medical treatment.

The IBNP estimation methods we use and the resulting reserves that we establish are reviewed and updated, and adjustments, if deemed necessary, are reflected in the current period. Given the numerous uncertainties inherent in such estimates, our actual claims liabilities for a particular quarter or other period could differ significantly from the amounts estimated and reserved for that quarter or period. Our actual claims liabilities have varied and will continue to vary from our estimates, particularly in times of significant changes in utilization, medical cost trends, and populations and markets served.

If our actual liability for claims payments is higher than estimated, our earnings per share in any particular quarter or annual period could be negatively affected. Our estimates of IBNP may be inadequate in the future, which would negatively affect our results of operations for the relevant time period. Furthermore, if we are unable to accurately estimate IBNP, our ability to take timely corrective actions may be limited, further exacerbating the extent of the negative impact on our results.

An increased incidence of flu in 2012 in one or more of the states in which we operate a health plan could significantly increase utilization rates and medical costs.

Our results during 2009 were significantly impacted by the widespread incidence of the H1N1 flu in the states in which we operate our health plans. An atypically high incidence of flu in 2012, or the outbreak and rapid spread of any other highly contagious and potentially virulent disease, could increase the utilization rates among our members, resulting in significantly increased outpatient, inpatient, emergency room, and pharmacy costs.

If the responsive bids of our health plans for new or renewed Medicaid contracts are not successful, or if our government contracts are terminated or are not renewed, our premium revenues could be materially reduced and our operating results could be negatively impacted.

Our government contracts may be subject to periodic competitive bidding. In such process, our health plans may face competition as other plans, many with greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. For instance, the state contract of our Ohio and New Mexico health plans will be subject to competitive bidding during 2012. In the event the responsive bids of our Ohio or New Mexico health plans or those of our other health plans are not successful, we will lose our Medicaid contract in the applicable state, and our premium revenues could be materially reduced as a result. Alternatively, even if our responsive bids are successful, the bids may be based upon assumptions regarding enrollment, utilization, medical costs, or other factors which could result in the Medicaid contract being less profitable than we had expected.

In addition, all of our contracts may be terminated for cause if we breach a material provision of the contract or violate relevant laws or regulations. Our contracts with the states are also subject to cancellation by the state in the event of the unavailability of state or federal funding. In some jurisdictions, such cancellation may be immediate and in other jurisdictions a notice period is required. Further, most of our contracts are terminable without cause.

Our government contracts generally run for periods of one year to three years, and may be successively extended by amendment for additional periods if the relevant state agency so elects. Our current contracts expire on various dates over the next several years. Although our health plans have generally been successful in obtaining the renewal and/or extension of their state contracts, there can be no guarantee that any of our state government contracts will be renewed or extended, as shown by the recent loss of our Missouri contract. If we are unable to renew, successfully re-bid, or compete for any of our government contracts, or if any of our contracts are terminated or renewed on less favorable terms, our business, financial condition, cash flows, or results of operations could be adversely affected.

There are numerous risks associated with the expansion of our Texas health plan's service areas and with any other expansion into new markets.

Effective March 1, 2012, our Texas health plan will be expanding into three new service delivery areas, representing the addition of approximately 148,000 additional members. There are numerous risks associated with a health plan's initial expansion into a new service area or the provision of medical services to a new population, including pent-up demand for medical services, elevated medical care costs, unfamiliarity with managed care processes, and our lack of actuarial experience in setting appropriate reserve levels. In the event the medical care costs of our Texas health plan or of our other health plans are higher than anticipated, we are unable to lower the medical care ratio associated with these new populations, our reserve levels are inadequate, or our enrollment projections are overestimated, the negative results of our Texas health plan could adversely affect our business, financial condition, cash flows, or results of operations.

In the event the expected reduction in the rates paid to our California health plan is not finally implemented, is not made effective retroactive to July 1, 2011, or is otherwise modified, our results of operations may be affected.

California Assembly Bill 97, or AB 97, is legislation that was signed by Governor Jerry Brown on March 24, 2011. Among other things, AB 97 proposes to effect a 10% reduction in Medi-Cal provider rates. The California Department of Health Care Services has preliminarily indicated that the 10% rate reduction could be effective retroactive to July 1, 2011. The Company believes that this reduction in provider payments, if effected, will translate into a premium reduction of approximately 3.5% for the California health plan.

The proposed rate reduction was submitted for approval to CMS, and on October 27, 2011, CMS indicated its general approval of the rate cut. However, the United States District Court for the Central District of California issued a series of injunctions barring the California Department of Health Care Services from implementing the rate reductions as to various classes of providers. The California Department of Health Care Services recently reported that CMS asked for a delay of the submission of the AB 97 managed care rates to allow CMS to research its authority to review and approve the AB 97 managed care rates in light of the current fee-for-service injunction.

If the proposed rate cut is not finally implemented, if it is not made retroactive to July 1, 2011, or if it is otherwise modified from its current form, the results of our California health plan could be affected — positively or negatively — depending on the action taken. In addition, recoveries from providers related to any final implemented rate cut could also affect the results of our California health plan.

States may not adequately compensate us for the value of drug rebates that were previously earned by the Company but that are now collectible by the states.

ACA includes certain provisions that change the way drug rebates are handled for drug claims filled by Medicaid managed care plans. Retroactive to March 23, 2010, state Medicaid programs are now required to collect federal rebates on all Medicaid-covered outpatient drugs dispensed or administered to Medicaid managed care enrollees (excluding certain drugs that are already discounted), and pharmaceutical manufacturers are required to pay specified rebates directly to the state Medicaid programs for those claims. This has impacted the level of rebates received by managed care plans from the manufacturers for Medicaid managed care enrollees. Many manufacturers are in the process of or have completed renegotiating their rebate contracts with Medicaid managed care plans and pharmacy benefits managers to offset these new rebates paid directly to state Medicaid programs. As a result, the drug rebate amounts paid to managed care plans like ours will likely decline significantly in the future. There are provisions in the ACA that require rates paid to Medicaid managed care to be actuarially sound in regard to drug rebates. Although we will be pursuing rate increases with state agencies to make us whole for the rebate amounts lost, there can be no assurances that the premium increases we may receive, if any, will be adequate to offset the amount of the lost rebates. If such premium increases prove to be inadequate, our business, financial condition, cash flows, or results of operations could be adversely affected.

We derive our premium revenues from a relatively small number of state health plans.

We currently derive our premium revenues from ten state health plans, and as of June 30, 2012, when the contract of our Missouri health plan is scheduled to end, we will derive premium revenues from nine state health plans. If we were unable to continue to operate in any of those nine states, or if our current operations in any portion of the states we are in were significantly curtailed, our revenues could decrease materially. Our reliance on operations in a limited number of states could cause our revenue and profitability to change suddenly and unexpectedly, depending on an abrupt loss of membership, significant rate reductions, a loss of a material contract, legislative actions, changes in Medicaid eligibility methodologies, catastrophic claims, an epidemic or an unexpected increase in utilization, general economic conditions, and similar factors in those states. Our inability to continue to operate in any of the states in which we currently operate, or a significant change in the nature of our existing operations, could adversely affect our business, financial condition, cash flows, or results of operations.

There are performance risks and other risks associated with certain provisions in the state Medicaid contracts of several of our health plans.

The state contracts of our New Mexico, Ohio, Texas, and Wisconsin health plans contain provisions pertaining to at-risk premiums that require us to meet certain quality performance measures to earn all of our contract revenues in those states. In the event we are unsuccessful in achieving the stated performance measure, the health plan will be unable to recognize the revenue associated with that measure. Any failure of our health plan to satisfy one of these performance measure provisions could adversely affect our business, financial condition, cash flows, or results of operations.

In addition, the state contracts of our California, Florida, New Mexico, and Texas health plans contain provisions pertaining to medical cost floors, administrative cost and profit ceilings, and profit-sharing arrangements. These provisions are subject to interpretation and application by our health plans. In the event the applicable state government agency disagrees with our health plan's interpretation or application of the sometimes complicated contract provisions at issue, the health plan could be required to adjust the amount of its obligations under these provisions and/or make a payment or payments to the state. Any interpretation or application of these provisions at variance with our health plan's interpretation or inconsistent with our revenue recognition accounting treatment could adversely affect our business, financial condition, cash flows, or results of operations.

Failure to attain profitability in any new start-up operations could negatively affect our results of operations.

Start-up costs associated with a new business can be substantial. For example, to obtain a certificate of authority to operate as a health maintenance organization in most jurisdictions, we must first establish a provider network, have infrastructure and required systems in place, and demonstrate our ability to obtain a state contract and process claims. Often, we are also required to contribute significant capital to fund mandated net worth requirements, performance bonds or escrows, or contingency guaranties. If we were unsuccessful in obtaining the certificate of authority, winning the bid to provide services, or attracting members in sufficient numbers to cover our costs, any new business of ours would fail. We also could be required by the state to continue to provide services for some period of time without sufficient revenue to cover our ongoing costs or to recover our significant start-up costs.

Even if we are successful in establishing a profitable health plan in a new state, increasing membership, revenues, and medical costs will trigger increased mandated net worth requirements which could substantially exceed the net income generated by the health plan. Rapid growth in an existing state will also create increased net worth requirements. In such circumstances, we may not be able to fund on a timely basis or at all the increased net worth requirements with our available cash resources. The expenses associated with starting up a health plan in a new state or expanding a health plan in an existing state could have an adverse impact on our business, financial condition, cash flows, or results of operations.

Receipt of inadequate or significantly delayed premiums could negatively affect our business, financial condition, cash flows, or results of operations.

Our premium revenues consist of fixed monthly payments per member, and supplemental payments for other services such as maternity deliveries. These premiums are fixed by contract, and we are obligated during the contract periods to provide health care services as established by the state governments. We use a large portion of our revenues to pay the costs of health care services delivered to our members. If premiums do not increase when expenses related to medical services rise, our medical margins will be compressed, and our earnings will be negatively affected. A state could increase hospital or other provider rates without making a commensurate increase in the rates paid to us, or could lower our rates without making a commensurate reduction in the rates paid to hospitals or other providers. In addition, if the actuarial assumptions made by a state in implementing a rate or benefit change are incorrect or are at variance with the particular utilization patterns of the members of one of our health plans, our medical margins could be reduced. Any of these rate adjustments in one or more of the states in which we operate could adversely affect our business, financial condition, cash flows, or results of operations.

Furthermore, a state undergoing a budget crisis may significantly delay the premiums paid to one of our health plans. During 2010, due to a prolonged budget impasse, some of the monthly premium payments made by the State of California to our California health plan were several months late. In January 2012, State Controller John Chiang warned that the State of California could run out of cash by March 2012 if quick action was not taken. Mr. Chiang added that revenue is $2.6 billion lower than projected for California's 2012 fiscal year while spending is higher by about the same amount. In a monthly report released by Mr. Chiang in February 2012 covering California's cash balance, receipts and disbursements for the prior month, it was noted that monthly revenues for the month of January had come in $528 million below the latest projections contained in the Governor's proposed 2012-13 budget and when compared against the 2011-12 Budget Act, January revenues were $1.2 billion below estimates. While the State Assembly of California passed a bill permitting short term borrowing from existing funds held by certain state departments in order to get the State of California through what is expected to be a seven-week cash shortfall, and though California also has access to an additional $865 million of internal borrowable funds due to recent legislation (SB 95) signed by the Governor, the State also warned that one of the consequences of such short term borrowing would be the delay of payments to providers of state services, including Medi-Cal. Any significant delay in the monthly payment of premiums to any of our health plans could have a material adverse affect on our business, financial condition, cash flows, or results of operations.

Difficulties in executing our acquisition strategy could adversely affect our business.

The acquisitions of other health plans and the assignment and assumption of Medicaid contract rights of other health plans have accounted for a significant amount of our growth over the last several years. Although we cannot predict with certainty our rate of growth as the result of acquisitions, we believe that additional acquisitions of all sizes will be important to our future growth strategy. Many of the other potential purchasers of these assets — particularly operators of large commercial health plans — have significantly greater financial resources than we do. Also, many of the sellers may insist on selling assets that we do not want, such as commercial lines of business, or may insist on transferring their liabilities to us as part of the sale of their companies or assets. Even if we identify suitable targets, we may be unable to complete acquisitions on terms favorable to us or obtain the necessary financing for these acquisitions. For these reasons, among others, we cannot provide assurance that we will be able to complete favorable acquisitions, especially in light of the volatility in the capital markets over the past several years. Further, to the extent we complete an acquisition, we may be unable to realize the anticipated benefits from such acquisition because of operational factors or difficulty in integrating the acquisition with our existing business. This may include problems involving the integration of:

- additional employees who are not familiar with our operations or our corporate culture,
- new provider networks which may operate on terms different from our existing networks,
- additional members who may decide to transfer to other health care providers or health plans,

- disparate information, claims processing, and record-keeping systems,
- internal controls and accounting policies, including those which require the exercise of judgment and complex estimation processes, such as estimates of claims incurred but not reported, accounting for goodwill, intangible assets, stock-based compensation, and income tax matters, and
- new regulatory schemes, relationships, practices, and compliance requirements.

Also, we are generally required to obtain regulatory approval from one or more state agencies when making acquisitions of health plans. In the case of an acquisition of a business located in a state in which we do not already operate, we would be required to obtain the necessary licenses to operate in that state. In addition, although we may already operate in a state in which we acquire a new business, we would be required to obtain regulatory approval if, as a result of the acquisition, we will operate in an area of that state in which we did not operate previously. Furthermore, we may be required to renegotiate contracts with the network providers of the acquired business. We may be unable to obtain the necessary governmental approvals, comply with these regulatory requirements or renegotiate the necessary provider contracts in a timely manner, if at all.

In addition, we may be unable to successfully identify, consummate and integrate future acquisitions, including integrating the acquired businesses on our information technology platform, or to implement our operations strategy in order to operate acquired businesses profitabley. Furthermore, we may incur significant transaction expenses in connection with a potential acquisition which may or may not be consummated. These expenses could impact our selling, general and administrative expense ratio.

For all of the above reasons, we may not be able to consummate our proposed acquisitions as announced from time to time to sustain our pattern of growth or to realize benefits from completed acquisitions.

We face periodic routine and non-routine reviews, audits, and investigations by government agencies, and these reviews and audits could have adverse findings, which could negatively impact our business.

We are subject to various routine and non-routine governmental reviews, audits, and investigations. Violation of the laws, regulations, or contract provisions governing our operations, or changes in interpretations of those laws, could result in the imposition of civil or criminal penalties, the cancellation of our contracts to provide managed care services, the suspension or revocation of our licenses, the exclusion from participation in government sponsored health programs, or the revision and recoupment of past payments made based on audit findings. If we are unable to correct any noted deficiencies, or become subject to material fines or other sanctions, we might suffer a substantial reduction in profitability, and might also lose one or more of our government contracts and as a result lose significant numbers of members and amounts of revenue. In addition, government receivables are subject to government audit and negotiation, and government contracts are vulnerable to disagreements with the government. The final amounts we ultimately receive under government contracts may be different from the amounts we initially recognize in our financial statements.

We rely on the accuracy of eligibility lists provided by state governments. Inaccuracies in those lists would negatively affect our results of operations.

Premium payments to our health plan segment are based upon eligibility lists produced by state governments. From time to time, states require us to reimburse them for premiums paid to us based on an eligibility list that a state later discovers contains individuals who are not in fact eligible for a government sponsored program or are eligible for a different premium category or a different program. Alternatively, a state could fail to pay us for members for whom we are entitled to payment. Our results of operations would be adversely affected as a result of such reimbursement to the state if we had made related payments to providers and were unable to recoup such payments from the providers.

We are subject to extensive fraud and abuse laws which may give rise to lawsuits and claims against us, the outcome of which may have a material adverse effect on our financial position, results of operations and cash flows.

Because we receive payments from federal and state governmental agencies, we are subject to various laws commonly referred to as “fraud and abuse” laws, including the federal False Claims Act, which permit agencies and enforcement authorities to institute suit against us for violations and, in some cases, to seek treble damages, penalties, and assessments. Liability under such federal and state statutes and regulations may arise if we know, or it is found that we should have known, that information we provide to form the basis for a claim for government payment is false or fraudulent, and some courts have permitted False Claims Act suits to proceed if the

claimant was out of compliance with program requirements. *Qui tam* actions under federal and state law can be brought by any individual on behalf of the government. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines, or be excluded from the Medicare, Medicaid, or other state or federal health care programs as a result of an investigation arising out of such action. Many states, including states where we currently operate, have enacted parallel legislation. In the event we are subject to liability under a *qui tam* action, our business and operating results could be adversely affected.

Federal regulations require entities subject to HIPAA to update their transaction formats for electronic data exchange to the new HIPAA 5010 standards; however, some entities are currently in transition to the new standards which could adversely impact administrative expense and compliance.

A federal mandate known as HIPAA 5010 requires health plans to use new standards for conducting certain operational and administrative transactions electronically beginning in January 2012. These administrative transactions include: claims, remittance, eligibility and claims status requests and responses. The HIPAA 5010 upgrade was prompted by government and industry's shared goal of providing higher-quality, lower-cost health care and the need for a comprehensive electronic data exchange environment for the ICD-10 mandate to be implemented by October 2013. Upgrading to the new HIPAA 5010 standards should increase transaction uniformity, support pay for performance, and streamline reimbursement transactions. We, along with other health plans, faced significant pressure to make sure that we installed our software and tested it for compatibility with our business partners. Because HIPAA 5010 affects electronic transactions such as patient eligibility, claims filing, claims status, and remittance advice, we proceeded proactively to achieve full functionality of HIPAA 5010 transactions, and did so, before the January 1, 2012 deadline. However, in November 2011, CMS announced it would delay enforcement actions related to implementation of HIPAA 5010 until March 31, 2012. As the delayed implementation deadline approaches for full implementation of HIPAA 5010, we will continue to test our claims management systems to prevent any operational disruptions.

Our business could be adversely impacted by adoption of the new ICD-10 standardized coding set for diagnoses.

The U.S. Department of Health and Human Services, or HHS, has released rules pursuant to HIPAA which mandate the use of standard formats in electronic health care transactions. HHS also has published rules requiring the use of standardized code sets and unique identifiers for providers. Originally, the federal government required that health care organizations, including health insurers, upgrade to updated and expanded standardized code sets used for documenting health conditions by October 2013. These new standardized code sets, known as ICD-10, will require substantial investments from health care organizations, including us. However, in February 2012, it was reported that CMS will postpone implementation of ICD-10 and will be issuing shortly a notice with a new timeline governing the pace of implementation. While use of the ICD-10 code sets will require significant administrative changes, we believe that the cost of compliance with these regulations has not had and is not expected to have a material adverse effect on our cash flows, financial position, or results of operations. However, these changes may result in errors and otherwise negatively impact our service levels, and we may experience complications related to supporting customers that are not fully compliant with the revised requirements as of the applicable compliance date. Furthermore, if physicians fail to provide, appropriate codes for services provided as a result of the new coding set, we may not be reimbursed, or adequately reimbursed, for such services.

If we are unable to deliver quality care, maintain good relations with the physicians, hospitals, and other providers with whom we contract, or if we are unable to enter into cost-effective contracts with such providers, our profitability could be adversely affected.

We contract with physicians, hospitals, and other providers as a means to ensure access to health care services for our members, to manage health care costs and utilization, and to better monitor the quality of care being delivered. We compete with other health plans to contract with these providers. We believe providers select plans in which they participate based on criteria including reimbursement rates, timeliness and accuracy of claims payment, potential to deliver new patient volume and/or retain existing patients, effectiveness of resolution of calls and complaints, and other factors. We cannot be sure that we will be able to successfully attract and retain providers to maintain a competitive network in the geographic areas we serve. In addition, in any particular market, providers could refuse to contract with us, demand higher payments, or take other actions which could result in higher health care costs, disruption to provider access for current members, a decline in our growth rate, or difficulty in meeting regulatory or accreditation requirements.

The Medicaid program generally pays doctors and hospitals at levels well below those of Medicare and private insurance. Large numbers of doctors, therefore, do not accept Medicaid patients. In the face of fiscal pressures, some states may reduce rates paid to providers, which may further discourage participation in the Medicaid program.

In some markets, certain providers, particularly hospitals, physician/hospital organizations, and some specialists, may have significant market positions or even monopolies. If these providers refuse to contract with us or utilize their market position to negotiate favorable contracts which are disadvantageous to us, our profitability in those areas could be adversely affected.

Some providers that render services to our members are not contracted with our plans. In those cases, there is no pre-established understanding between the provider and our plan about the amount of compensation that is due to the provider. In some states, the amount of compensation is defined by law or regulation, but in most instances it is either not defined or it is established by a standard that is not clearly translatable into dollar terms. In such instances, providers may believe they are underpaid for their services and may either litigate or arbitrate their dispute with our plan. The uncertainty of the amount to pay and the possibility of subsequent adjustment of the payment could adversely affect our business, financial position, cash flows, or results of operations.

The insolvency of a delegated provider could obligate us to pay their referral claims, which could have an adverse effect on our business, cash flows, or results of operations.

Circumstances may arise where providers to whom we have delegated risk, due to insolvency or other circumstances, are unable to pay claims they have incurred with third parties in connection with referral services provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so or we have already paid claims to a delegated provider and payments cannot be recouped if the delegated provider becomes insolvent. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability. In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These funds are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. However, there can be no assurances that these precautionary steps will fully protect us against the insolvency of a delegated provider. Liabilities incurred or losses suffered as a result of provider insolvency could have an adverse effect on our business, financial condition, cash flows, or results of operations.

Regulatory actions and negative publicity regarding Medicaid managed care and Medicare Advantage may lead to programmatic changes and intensified regulatory scrutiny and regulatory burdens.

Several of our health care competitors have recently been involved in governmental investigations and regulatory actions which have resulted in significant volatility in the price of their stock. In addition, there has been negative publicity and proposed programmatic changes regarding Medicare Advantage private fee-for-service plans, a part of the Medicare Advantage program in which the Company does not participate. These actions and the resulting negative publicity could become associated with or imputed to the Company, regardless of the Company's actual regulatory compliance or programmatic participation. Such an association, as well as any perception of a recurring pattern of abuse among the health plan participants in government programs and the diminished reputation of the managed care sector as a whole, could result in public distrust, political pressure for changes in the programs in which the Company does participate, intensified scrutiny by regulators, additional regulatory requirements and burdens, increased stock volatility due to speculative trading, and heightened barriers to new managed care markets and contracts, all of which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

If a state fails to renew its federal waiver application for mandated Medicaid enrollment into managed care or such application is denied, our membership in that state will likely decrease.

States may only mandate Medicaid enrollment into managed care under federal waivers or demonstrations. Waivers and programs under demonstrations are approved for two- to five-year periods and can be renewed on an ongoing basis if the state applies and the waiver request is approved or renewed by CMS. We have no control over this renewal process. If a state does not renew its mandated program or the federal government denies the state's application for renewal, our business would suffer as a result of a likely decrease in membership.

If state regulators do not approve payments of dividends and distributions by our subsidiaries, it may negatively affect our business strategy.

We are a corporate parent holding company and hold most of our assets at, and conduct most of our operations through, direct subsidiaries. As a holding company, our results of operations depend on the results of operations of our subsidiaries. Moreover, we are dependent on dividends or other intercompany transfers of funds from our subsidiaries to meet our debt service and other obligations. The ability of our subsidiaries to pay dividends or make other payments or advances to us will depend on their operating results and will be subject to applicable laws and restrictions contained in agreements governing the debt of such subsidiaries. In addition, our health plan subsidiaries are subject to laws and regulations that limit the amount of dividends and distributions that they can pay to us without prior approval of, or notification to, state regulators. In California, our health plan may dividend, without notice to or approval of the California Department of Managed Health Care, amounts by which its tangible net equity exceeds 130% of the tangible net equity requirement. Our other health plans must give thirty days' advance notice and the opportunity to disapprove "extraordinary" dividends to the respective state departments of insurance for amounts over the lesser of (a) ten percent of surplus or net worth at the prior year end or (b) the net income for the prior year. The discretion of the state regulators, if any, in approving or disapproving a dividend is not clearly defined. Health plans that declare non-extraordinary dividends must usually provide notice to the regulators ten or fifteen days in advance of the intended distribution date of the non-extraordinary dividend. The aggregate amounts our health plan subsidiaries could have paid us at December 31, 2011, 2010, and 2009 without approval of the regulatory authorities were approximately $17.6 million, $18.8 million, and $9.0 million, respectively. If the regulators were to deny or significantly restrict our subsidiaries' requests to pay dividends to us, the funds available to our company as a whole would be limited, which could harm our ability to implement our business strategy. For example, we could be hindered in our ability to make debt service payments under our credit facility and/or our convertible senior notes.

Unforeseen changes in pharmaceutical regulations or market conditions may impact our revenues and adversely affect our results of operations.

A significant category of our health care costs relate to pharmaceutical products and services. Evolving regulations and state and federal mandates regarding coverage may impact the ability of our health plans to continue to receive existing price discounts on pharmaceutical products for our members. Other factors affecting our pharmaceutical costs include, but are not limited to, the price of pharmaceuticals, geographic variation in utilization of new and existing pharmaceuticals, and changes in discounts. The unpredictable nature of these factors may have an adverse effect on our business, financial condition, cash flows, or results of operations.

An unauthorized disclosure of sensitive or confidential member information could have an adverse effect on our business.

As part of our normal operations, we collect, process, and retain confidential member information. We are subject to various federal and state laws and rules regarding the use and disclosure of confidential member information, including HIPAA and the Gramm-Leach-Bliley Act. The Health Information Technology for Economic and Clinical Health Act provisions of the ARRA further expand the coverage of HIPAA by, among other things, extending the privacy and security provisions, mandating new regulations around electronic medical records, expanding enforcement mechanisms, allowing the state Attorneys General to bring enforcement actions, increasing penalties for violations, and requiring public disclosure of improper disclosures of health information of more than 500 individuals.

Under ARRA, civil penalties for HIPAA violations by covered entities are increased up to an annual maximum of $1.5 million for uncorrected violations based on willful neglect. In addition, imposition of these penalties is now more likely because ARRA strengthens enforcement. For example, commencing February 2010, HHS was required to conduct periodic audits to confirm compliance. Investigations of violations that indicate willful neglect, for which penalties are now mandatory, are statutorily required. In addition, state attorneys general are authorized to bring civil actions seeking either injunctions or damages in response to violations of HIPAA privacy and security regulations that threaten the privacy of state residents. Initially monies collected will be transferred to a division of HHS for further enforcement, and within three years, a methodology will be adopted for distributing a percentage of those monies to affected individuals to fund enforcement and provide incentive for individuals to report violations. In addition, ARRA requires us to notify affected individuals, HHS, and in some cases the media when unsecured personal health information is subject to a security breach.

ARRA also contains a number of provisions that provide incentives for states to initiate certain programs related to health care and health care technology, such as electronic health records. While provisions such as these do not apply to us directly, states wishing to apply for grants under ARRA, or otherwise participating in such programs, may impose new health care technology requirements on us through our contracts with state Medicaid agencies. We are unable to predict what such requirements may entail or what their effect on our business may be.

We will continue to assess our compliance obligations as regulations under ARRA are promulgated and more guidance becomes available from HHS and other federal agencies. The new privacy and security requirements, however, may require substantial operational and systems changes, employee education and resources and there is no guarantee that we be able to implement them adequately or prior to their effective date. Given HIPAA's complexity and the anticipated new regulations, which may be subject to changing and perhaps conflicting interpretation, our ongoing ability to comply with all of the HIPAA requirements is uncertain, which may expose us to the criminal and increased civil penalties provided under ARRA and may require us to incur significant costs in order to seek to comply with its requirements.

While we currently expend significant resources and implemented solutions, processes and procedures to protect against cyber attacks and security breaches and have no evidence to suggest that such attacks have resulted in a breach of our systems, we may need to expend additional significant resources in the future to continue to protect against potential security breaches or to address problems caused by such attacks or any breach of our systems. Because the techniques used to circumvent security systems can be highly sophisticated and change frequently, often are not recognized until launched against a target and may originate from less regulated and remote areas around the world, we may be unable to proactively address these techniques or to implement adequate preventive measures.

Despite the security measures we have in place to ensure compliance with applicable laws and rules, our facilities and systems, and those of our third-party service providers, may be vulnerable to security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming and/or human errors or other similar events. Any security breach involving the misappropriation, loss or other unauthorized disclosure or use of confidential member information, whether by us or a third party, could subject us to civil and criminal penalties, divert management's time and energy and have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Risks Related to the Operation of Our Molina Medicaid Solutions Business

MMIS operational problems in Idaho or Maine could result in reduced or withheld payments, damage assessments, increased administrative costs, or even contract termination, any of which could adversely affect our business, financial condition, cash flows, or results of operations.

From and after the MMIS operational or "go live" date of June 1, 2010 after which it began pilot operations, Molina Medicaid Solutions has experienced certain problems with the MMIS in Idaho. In the event Molina Medicaid Solutions is unsuccessful in correcting all of the identified problems, the Idaho Department of Administration may: (i) reduce or withhold its payments to Molina Medicaid Solutions, (ii) require Molina Medicaid Solutions to provide services at no additional cost to Idaho, (iii) require the payment of damages, or (iv) terminate its contract with Molina Medicaid Solutions. In addition, Molina Medicaid Solutions may incur much greater administrative costs than expected in correcting the MMIS problems, or in advancing interim payments to Idaho providers. For example, the consulting and outside service costs for Idaho following its go-live operational date have not declined from the pre-operational level as had been previously expected. Finally, Idaho DHW may not accept the MMIS developed and implemented by Molina Medicaid Solutions, or CMS may not certify such MMIS. All of such risks are also applicable to the MMIS in Maine which became operational and began pilot operations as of September 1, 2010. In addition, the state of Maine, in order to balance its budget, has requested that we renegotiate our contract with the state under terms which would reduce the amount of payments made under the life of the contract. The realization of any of the foregoing risks could adversely affect our business, financial condition, cash flows, or results of operations.

We may be unable to retain or renew the state government contracts of the Molina Medicaid Solutions segment on terms consistent with our expectations or at all.

Molina Medicaid Solutions currently has management contracts in only six states. If we are unable to continue to operate in any of those six states, or if our current operations in any of those six states were significantly curtailed, the revenues and cash flows of Molina Medicaid Solutions could decrease materially, and as a result our profitability would be negatively impacted.

If the responsive bids to RFPs of Molina Medicaid Solutions are not successful, including its responsive bid in West Virginia during 2012, our revenues could be materially reduced and our operating results could be negatively impacted.

The government contracts of Molina Medicaid Solutions may be subject to periodic competitive bidding. In such process, Molina Medicaid Solutions may face competition as other service providers, some with much greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. For instance, in 2011, the government

contract of Molina Medicaid Solutions in Louisiana was subject to competitive bidding, and we were unsuccessful in being awarded a new contract. During 2012, the state MMIS contract of West Virginia will be subject to competitive bidding. Molina Medicaid Solutions also anticipates bidding in other states which have issued RFPs for procurement of a new MMIS. In the event the responsive bid in West Virginia is not successful, we will lose our fiscal agent contract in that state, and our revenues could be materially reduced as a result. In addition, in the event our responsive bids in other states are not successful, we will be unable to grow in a manner consistent with our projections. Even if our responsive bids are successful, the bids may be based upon assumptions or other factors which could result in the contract being less profitable than we had expected or had been the case prior to competitive re-bidding.

Because of the complexity and duration of the services and systems required to be delivered under the government contracts of Molina Medicaid Solutions, there are substantial risks associated with full performance under the contracts.

The state contracts of Molina Medicaid Solutions typically require significant investment in the early stages that is expected to be recovered through billings over the life of the contracts. These contracts involve the construction of new computer systems and communications networks and the development and deployment of complex technologies. Substantial performance risk exists under each contract. Some or all elements of service delivery under these contracts are dependent upon successful completion of the design, development, construction, and implementation phases. Any increased or unexpected costs or unanticipated delays in connection with the performance of these contracts, including delays caused by factors outside our control, could make these contracts less profitable or unprofitable, which could have an adverse effect on our overall business, financial condition, cash flows, or results of operations.

If we fail to comply with our state government contracts or government contracting regulations, our business may be adversely affected.

Molina Medicaid Solutions' contracts with state government customers may include unique and specialized performance requirements. In particular, contracts with state government customers are subject to various procurement regulations, contract provisions, and other requirements relating to their formation, administration, and performance. Any failure to comply with the specific provisions in our customer contracts or any violation of government contracting regulations could result in the imposition of various civil and criminal penalties, which may include termination of the contracts, forfeiture of profits, suspension of payments, imposition of fines, and suspension from future government contracting. Further, any negative publicity related to our state government contracts or any proceedings surrounding them may damage our business by affecting our ability to compete for new contracts. The termination of a state government contract, our suspension from government work, or any negative impact on our ability to compete for new contracts, could have an adverse effect on our business, financial condition, cash flows, or results of operations.

System security risks and systems integration issues that disrupt our internal operations or information technology services provided to customers could adversely affect our financial results or damage our reputation.

Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate our confidential information or that of third parties, create system disruptions or cause shutdowns. Computer programmers and hackers also may be able to develop and deploy viruses, worms, and other malicious software programs that attack our products or otherwise exploit any security vulnerabilities of our products. In addition, sophisticated hardware and operating system software and applications that we produce or procure from third parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the system. The costs to us to eliminate or alleviate security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and the efforts to address these problems could result in interruptions, delays, cessation of service, and loss of existing or potential government customers.

Molina Medicaid Solutions routinely processes, stores, and transmits large amounts of data for our clients, including sensitive and personally identifiable information. Breaches of our security measures could expose us, our customers, or the individuals affected to a risk of loss or misuse of this information, resulting in litigation and potential liability for us and damage to our brand and reputation. Accordingly, we could lose existing or potential government customers for outsourcing services or other information technology solutions or incur significant expenses in connection with our customers' system failures or any actual or perceived security vulnerabilities in our products. In addition, the cost and operational consequences of implementing further data protection measures could be significant.

Portions of our information technology infrastructure also may experience interruptions, delays, or cessations of service or produce errors in connection with systems integration or migration work that takes place from time to time. We may not be successful in implementing new systems and transitioning data, which could cause business disruptions and be more expensive, time consuming,

disruptive, and resource-intensive. Such disruptions could adversely impact our ability to fulfill orders and interrupt other processes. Delayed sales, lower margins, or lost government customers resulting from these disruptions could adversely affect our financial results, reputation, and stock price.

In the course of providing services to customers, Molina Medicaid Solutions may inadvertently infringe on the intellectual property rights of others and be exposed to claims for damages.

The solutions we provide to our state government customers may inadvertently infringe on the intellectual property rights of third parties resulting in claims for damages against us. The expense and time of defending against these claims may have a material and adverse impact on our profitability. Additionally, the publicity we may receive as a result of infringing intellectual property rights may damage our reputation and adversely impact our ability to develop new MMIS business.

Inherent in the government contracting process are various risks which may materially and adversely affect our business and profitability.

We are subject to the risks inherent in the government contracting process. These risks include government audits of billable contract costs and reimbursable expenses and compliance with government reporting requirements. In the event we are found to be out of compliance with government contracting requirements, our reputation may be adversely impacted and our relationship with the government agencies we work with may be damaged, resulting in a material and adverse effect on our profitability.

Our performance on contracts, including those on which we have partnered with third parties, may be adversely affected if we or the third parties fail to deliver on commitments.

In some instances, our contracts require that we partner with other parties including software and hardware vendors to provide the complex solutions required by our state government customers. Our ability to deliver the solutions and provide the services required by our customers is dependent on our and our partners' ability to meet our customers' delivery schedules. If we or our partners fail to deliver services or products on time, our ability to complete the contract may be adversely affected, which may have a material and adverse impact on our revenue and profitability.

Risks Related to our General Business Operations

Restrictions and covenants in our credit facility may limit our ability to make certain acquisitions or reduce our liquidity and capital resources.

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility with various lenders and U.S. Bank National Association. The credit facility imposes numerous restrictions and covenants, including, but not limited to, prescribed consolidated leverage and fixed charge coverage ratios, net worth requirements, and acquisition and disposition limitations that restrict our financial and operating flexibility, including our ability to make certain acquisitions above specified values and declare dividends and other distributions without lender approval. Our ability to comply with these covenants may be affected by events beyond our control. As a result of the restrictions and covenants imposed under our credit facility, our growth strategy may be negatively impacted by our inability to react to market conditions, finance our operations, engage in strategic acquisitions or disposals, act with complete flexibility, or to use our credit facility in the manner intended. In addition, our credit facility matures in September 2016. If we are in default at a time when funds under the credit facility are required to finance an acquisition, or if a proposed acquisition does not satisfy the pro forma financial requirements under our credit facility, or if we are unable to renew or refinance our credit facility prior to its maturity, and if the default is not cured or waived, we may be unable to use the credit facility in the manner intended, and our operations, liquidity, and capital resources could be materially adversely affected.

Ineffective management of our growth may negatively affect our business, financial condition, or results of operations.

Depending on acquisitions and other opportunities, we expect to continue to grow our membership and to expand into other markets. In fiscal year 2007, we had total premium revenue of $2.5 billion. In fiscal year 2011, we had total premium revenue of $4.6 billion, an increase of 87% over a five-year span. Continued rapid growth could place a significant strain on our management and on other Company resources. Our ability to manage our growth may depend on our ability to strengthen our management team and attract, train, and retain skilled employees, and our ability to implement and improve operational, financial, and management information systems on a timely basis. If we are unable to manage our growth effectively, our business, financial condition, cash flows, and results of operations could be materially and adversely affected. In addition, due to the initial substantial costs related to acquisitions, rapid growth could adversely affect our short-term profitability and liquidity.

Any changes to the laws and regulations governing our business, or the interpretation and enforcement of those laws or regulations, could cause us to modify our operations and could negatively impact our operating results.

Our business is extensively regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect health plan members and providers rather than managed care organizations. The government agencies administering these laws and regulations have broad latitude in interpreting and applying them. These laws and regulations, along with the terms of our government contracts, regulate how we do business, what services we offer, and how we interact with members and the public. For instance, some states mandate minimum medical expense levels as a percentage of premium revenues. These laws and regulations, and their interpretations, are subject to frequent change. The interpretation of certain contract provisions by our governmental regulators may also change. Changes in existing laws or regulations, or their interpretations, or the enactment of new laws or regulations, could reduce our profitability by imposing additional capital requirements, increasing our liability, increasing our administrative and other costs, increasing mandated benefits, forcing us to restructure our relationships with providers, or requiring us to implement additional or different programs and systems. Changes in the interpretation of our contracts could also reduce our profitability if we have detrimentally relied on a prior interpretation.

Our business depends on our information and medical management systems, and our inability to effectively integrate, manage, and keep secure our information and medical management systems, could disrupt our operations.

Our business is dependent on effective and secure information systems that assist us in, among other things, processing provider claims, monitoring utilization and other cost factors, supporting our medical management techniques, and providing data to our regulators. Our providers also depend upon our information systems for membership verifications, claims status, and other information. If we experience a reduction in the performance, reliability, or availability of our information and medical management systems, our operations, ability to pay claims, and ability to produce timely and accurate reports could be adversely affected. In addition, if the licensor or vendor of any software which is integral to our operations were to become insolvent or otherwise fail to support the software sufficiently, our operations could be negatively affected.

Our information systems and applications require continual maintenance, upgrading, and enhancement to meet our operational needs. Moreover, our acquisition activity requires transitions to or from, and the integration of, various information systems. If we experience difficulties with the transition to or from information systems or are unable to properly implement, maintain, upgrade or expand our system, we could suffer from, among other things, operational disruptions, loss of members, difficulty in attracting new members, regulatory problems, and increases in administrative expenses.

Our business requires the secure transmission of confidential information over public networks. Advances in computer capabilities, new discoveries in the field of cryptography, or other events or developments could result in compromises or breaches of our security systems and member data stored in our information systems. Anyone who circumvents our security measures could misappropriate our confidential information or cause interruptions in services or operations. The internet is a public network, and data is sent over this network from many sources. In the past, computer viruses or software programs that disable or impair computers have been distributed and have rapidly spread over the internet. Computer viruses could be introduced into our systems, or those of our providers or regulators, which could disrupt our operations, or make our systems inaccessible to our members, providers, or regulators. We may be required to expend significant capital and other resources to protect against the threat of security breaches or to alleviate problems caused by breaches. Because of the confidential health information we store and transmit, security breaches could expose us to a risk of regulatory action, litigation, possible liability and loss. Our security measures may be inadequate to prevent security breaches, and our business operations would be negatively impacted by cancellation of contracts and loss of members if security breaches are not prevented.

Because our corporate headquarters are located in Southern California, our business operations may be significantly disrupted as a result of a major earthquake.

Our corporate headquarters is located in Long Beach, California. In addition, the claims of our health plans are also processed in Long Beach. Southern California is exposed to a statistically greater risk of a major earthquake than most other parts of the United States. If a major earthquake were to strike the Los Angeles area, our corporate functions and claims processing could be significantly impaired for a substantial period of time. Although we have established a disaster recovery and business resumption plan with back-up operating sites to be deployed in the case of such a major disruptive event, there can be no assurances that the disaster recovery plan will be successful or that the business operations of all our health plans, including those that are remote from any such event, would not be substantially impacted by a major Southern California earthquake.

We face claims related to litigation which could result in substantial monetary damages.

We are subject to a variety of legal actions, including medical malpractice actions, provider disputes, employment related disputes, and breach of contract actions. In the event we incur liability materially in excess of the amount for which we have insurance coverage, our profitability would suffer. In addition, our providers involved in medical care decisions are exposed to the risk of medical malpractice claims. As an employer of physicians and ancillary medical personnel and as an operator of primary care clinics, our plans are subject to liability for negligent acts, omissions, or injuries occurring at one of its clinics or caused by one of their employees. We maintain medical malpractice insurance for our clinics in an amount which we believe to be reasonable in light of our experience to date. However, given the significant amount of some medical malpractice awards and settlements, this insurance may not be sufficient or available at a reasonable cost to protect us from damage awards or other liabilities. Even if any claims brought against us were unsuccessful or without merit, we would have to defend ourselves against such claims. The defense of any such actions may be time-consuming and costly, and may distract our management's attention. As a result, we may incur significant expenses and may be unable to effectively operate our business.

Furthermore, claimants often sue managed care organizations for improper denials of or delays in care, and in some instances improper authorizations of care. Claims of this nature could result in substantial damage awards against us and our providers that could exceed the limits of any applicable medical malpractice insurance coverage. Successful malpractice or tort claims asserted against us, our providers, or our employees could adversely affect our financial condition and profitability.

We cannot predict the outcome of any lawsuit with certainty. While we currently have insurance coverage for some of the potential liabilities relating to litigation, other such liabilities may not be covered by insurance, the insurers could dispute coverage, or the amount of insurance could be insufficient to cover the damages awarded. In addition, insurance coverage for all or certain types of liability may become unavailable or prohibitively expensive in the future or the deductible on any such insurance coverage could be set at a level which would result in us effectively self-insuring cases against us.

Although we establish reserves for litigation as we believe appropriate, we cannot assure you that our recorded reserves will be adequate to cover such costs. Therefore, the litigation to which we are subject could have a material adverse effect on our business, financial condition, cash flows, or results of operations, and could prompt us to change our operating procedures.

We are subject to competition which negatively impacts our ability to increase penetration in the markets we serve.

We operate in a highly competitive environment and in an industry that is subject to ongoing changes from business consolidations, new strategic alliances, and aggressive marketing practices by other managed care organizations. We compete for members principally on the basis of size, location, and quality of provider network, benefits supplied, quality of service, and reputation. A number of these competitive elements are partially dependent upon and can be positively affected by the financial resources available to a health plan. Many other organizations with which we compete, including large commercial plans, have substantially greater financial and other resources than we do. For these reasons, we may be unable to grow our membership, or may lose members to other health plans.

Failure to maintain effective internal controls over financial reporting could have a material adverse effect on our business, operating results, and stock price.

The Sarbanes-Oxley Act of 2002 requires, among other things, that we maintain effective internal control over financial reporting. In particular, we must perform system and process evaluation and testing of our internal controls over financial reporting to allow management to report on, and our independent registered public accounting firm to attest to, our internal controls over financial reporting as required by Section 404 of the Sarbanes-Oxley Act of 2002. Our future testing, or the subsequent testing by our independent registered public accounting firm, may reveal deficiencies in our internal controls over financial reporting that are deemed to be material weaknesses. Our compliance with Section 404 will continue to require that we incur substantial accounting expense and expend significant management time and effort. Moreover, if we are not able to continue to comply with the requirements of Section 404 in a timely manner, or if we or our independent registered public accounting firm identifies deficiencies in our internal control over financial reporting that are deemed to be material weaknesses, the market price of our stock could decline and we could be subject to sanctions or investigations by the NYSE, SEC or other regulatory authorities, which would require additional financial and management resources.

Changes in accounting may affect our results of operations.

U.S. generally accepted accounting principles ("GAAP") and related implementation guidelines and interpretations can be highly complex and involve subjective judgments. Changes in these rules or their interpretation, or the adoption of new pronouncements could significantly affect our stated results of operations.

The value of our investments is influenced by varying economic and market conditions, and a decrease in value could have an adverse effect on our results of operations, liquidity, and financial condition.

Our investments consist solely of investment-grade debt securities. The unrestricted portion of this portfolio is designated as available-for-sale. Our non-current restricted investments are designated as held-to-maturity. Available-for-sale investments are carried at fair value, and the unrealized gains or losses are included in accumulated other comprehensive income or loss as a separate component of stockholders' equity, unless the decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such securities until their full cost can be recovered. For our available-for-sale investments and held-to-maturity investments, if a decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such security until its full cost can be recovered, the security is deemed to be other-than-temporarily impaired and it is written down to fair value and the loss is recorded as an expense.

In accordance with applicable accounting standards, we review our investment securities to determine if declines in fair value below cost are other-than-temporary. This review is subjective and requires a high degree of judgment. We conduct this review on a quarterly basis, using both quantitative and qualitative factors, to determine whether a decline in value is other-than-temporary. Such factors considered include the length of time and the extent to which market value has been less than cost, the financial condition and near term prospects of the issuer, recommendations of investment advisors and forecasts of economic, market or industry trends. This review process also entails an evaluation of our ability and intent to hold individual securities until they mature or full cost can be recovered.

The current economic environment and recent volatility of the securities markets increase the difficulty of assessing investment impairment and the same influences tend to increase the risk of potential impairment of these assets. Over time, the economic and market environment may provide additional insight regarding the fair value of certain securities, which could change our judgment regarding impairment. This could result in realized losses relating to other-than-temporary declines to be recorded as an expense. Given the current market conditions and the significant judgments involved, there is continuing risk that declines in fair value may occur and material other-than-temporary impairments may result in realized losses in future periods which could have an adverse effect on our business, financial condition, cash flows, or results of operations.

Unanticipated changes in our tax rates or exposure to additional income tax liabilities could affect our profitability.

We are subject to income taxes in the United States. Our effective tax rate could be adversely affected by changes in the mix of earnings in states with different statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in U.S. tax laws and regulations, and changes in our interpretations of tax laws, including pending tax law changes. In addition, we are subject to the routine examination of our income tax returns by the Internal Revenue Service and other local and state tax authorities. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our estimated income tax liabilities. Adverse outcomes from tax examinations, or the accounting reversal of any tax benefits or revenue previously recognized by us, could have an adverse effect on our provision for income taxes, estimated income tax liabilities, or results of operations.

We are dependent on our executive officers and other key employees.

Our operations are highly dependent on the efforts of our executive officers. The loss of their leadership, knowledge, and experience could negatively impact our operations. Replacing many of our executive officers might be difficult or take an extended period of time because a limited number of individuals in the managed care industry have the breadth and depth of skills and experience necessary to operate and expand successfully a business such as ours. Our success is also dependent on our ability to hire and retain qualified management, technical, and medical personnel. It is critical that we recruit, manage, enable and retain talent to successfully execute our strategic objections which requires aligned policies, a positive work environment and a robust succession and talent development process. Further, particularly in light of the changing healthcare environment, we must focus on building employee capabilities to help ensure that we can meet upcoming challenges and opportunities. If we are unsuccessful in recruiting, retaining, managing and enabling such personnel and are unable to meet upcoming challenges and opportunities, our operations could be negatively impacted.

We are subject to risks associated with outsourcing services and functions to third parties.

We contract with independent third party vendors and service providers who provide services to us and our subsidiaries or to whom we delegate selected functions. Our arrangements with third party vendors and service providers may make our operations vulnerable if those third parties fail to satisfy their obligations to us, including their obligations to maintain and protect the security and confidentiality of our information and data. In addition, we may have disagreements with third party vendors and service providers regarding relative responsibilities for any such failures under applicable business associate agreements or other applicable outsourcing agreements. Further, we may not be adequately indemnified against all possible losses through the terms and conditions of our contracts with third party vendors and service providers. Our outsourcing arrangements could be adversely impacted by changes in the vendors' or service provider's operations or financial condition or other matters outside of our control. If we fail to adequately monitor and regulate the performance of our third party vendors and service providers, we could be subject to additional risk. Violations of, or noncompliance with, laws and/or regulations governing our business or noncompliance with contract terms by third party vendors and service providers could increase our exposure to liability to our members, providers or other third parties, or sanctions and/or fines from the regulators that oversee our business. In turn, this could increase the costs associated with the operation of our business or have an adverse impact on our business and reputation. Moreover, if these vendor and service provider relationships were terminated for any reason, we may not be able to find alternative partners in a timely manner or on acceptable financial terms, and may incur significant costs in connection with any such vendor or service provider transition. As a result, we may not be able to meet the full demands of our customers and, in turn, our business, financial condition and results of operations may be harmed. In addition, we may not fully realize the anticipated economic and other benefits from our outsourcing projects or other relationships we enter into with third party vendors and service providers, as a result of regulatory restrictions on outsourcing, unanticipated delays in transitioning our operations to the third party, vendor or service provider noncompliance with contract terms or violations of laws and/or regulations, or otherwise. This could result in substantial costs or other operational or financial problems that could adversely impact our business, financial condition and results of operations.

An impairment charge with respect to our recorded goodwill or indefinite-lived intangible assets could have a material impact on our financial results.

We conduct formal impairment tests on material long-lived assets, such as goodwill and indefinite-lived intangible assets, and intangible assets, net, at least annually; additionally, we continually evaluate whether events or changes in business conditions suggest potential impairment of such assets. Our judgments regarding the existence of impairment indicators are based on legal factors, market conditions, and operational performance. For example, our health plan subsidiaries have generally been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that these contracts will continue to be renewed. The non-renewal of such a contract would be an indicator of impairment.

As of December 31, 2011, the balance of goodwill and indefinite-lived intangible assets was $154.0 million. Goodwill and indefinite-lived assets are not amortized, but are subject to impairment tests on an annual basis or more frequently if indicators of impairment exist. As of December 31, 2011, the balance of intangible assets, net, was $101.8 million. Intangible assets are amortized generally on a straight-line basis over their estimated useful lives. The determination of the value of goodwill and indefinite-lived intangible assets, and intangible assets, net, requires us to make estimates and assumptions about estimated asset lives, future business trends, and growth. Such evaluation is significantly impacted by estimates and assumptions of future revenues, costs and expenses, and other factors.

If an event or events occur that would cause us to revise our estimates and assumptions used in analyzing the value of our goodwill and indefinite-lived intangible assets, and intangible assets, net, such revision could result in a non-cash impairment charge that could have a material impact on our financial results.

We are subject to the risks of owning real property.

We own an approximately 460,000 square foot office building housing our principal executive offices, which we purchased in a transaction that closed on December 7, 2011. Accordingly, we are subject to all of the risks generally associated with owning and leasing real estate, which includes, but is not limited to: the possibility of environmental contamination, the costs associated with fixing any environmental problems and the risk of damages resulting from such contamination; adverse changes in the value of the property due to interest rate changes, changes in the neighborhood in which the property is located or other factors; ongoing

maintenance expenses and costs of improvements; the possible need for structural improvements in order to comply with changes in zoning, seismic, disability act, or other requirements; inability to renew or enter into leases for space not utilized by the Company on commercially acceptable terms or at all; and possible disputes with neighboring owners or other individuals and entities.

Because we have guaranteed one of our subsidiary's obligations under a loan agreement, if this subsidiary fails to meet its obligations under the loan agreement, we may be required to satisfy such obligations, and such an undertaking could have an adverse affect on our financial condition.

On December 7, 2011, Molina Center LLC, a wholly owned subsidiary of the Company, entered into a Term Loan Agreement with various lenders and East West Bank, as Administrative Agent, to borrow the aggregate principal amount of $48.6 million to finance a portion of the $81 million purchase price for the acquisition of the office building housing our corporate headquarters. While all amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the office building in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement, the Company has additionally guaranteed Molina Center's obligations of payment and performance under the Term Loan Agreement, certain promissory notes executed in connection therewith, and other loan documents. The maximum amount of the promissory notes for which the Company is liable under the Guaranty will in no event exceed $20 million, but there is no cap on the Company's total liability under the Guaranty. Furthermore, Molina Center and the Company also entered into an Environmental Indemnity in favor of the Administrative Agent and the other lenders pursuant to which the Company, jointly and severally with Molina Center, has agreed to indemnify and hold harmless the Administrative Agent and each of the other lenders under the Term Loan Agreement from and against any loss, damage, cost, expense, claim, or liability directly or indirectly arising out of or attributable to the use, generation, storage, release, discharge or disposal, or presence of certain hazardous materials on or about the office building. Neither the Company's nor Molina Center's liability under the Environmental Indemnity is limited by a maximum dollar amount. If Molina Center is unable to comply with the various customary financial covenants of the Term Loan Agreement, if it defaults under the Term Loan Agreement or if there are major environmental liabilities attributed to hazardous materials, such events could have an adverse effect on our business, financial condition, cash flows, or results of operations.

Risks Related to Our Common Stock

Volatility of our stock price could adversely affect stockholders.

Since our initial public offering in July 2003, the sales price of our common stock has ranged from a low of $10.75 (on a split-adjusted basis) to a high of $36.83. A number of factors will continue to influence the market price of our common stock, including:

- state and federal budget pressures,
- changes in expectations as to our future financial performance or changes in financial estimates, if any, of public market analysts,
- announcements relating to our business or the business of our competitors,
- changes in government payment levels,
- adverse publicity regarding health maintenance organizations and other managed care organizations,
- government action regarding member eligibility,
- changes in state mandatory programs,
- conditions generally affecting the managed care industry or our provider networks,
- the success of our operating or acquisition strategy,
- the operating and stock price performance of other comparable companies in the health care industry,
- the termination of our Medicaid or CHIP contracts with state or county agencies, or subcontracts with other Medicaid managed care organizations that contract with such state or county agencies,

- regulatory or legislative change,
- general economic conditions, including unemployment rates, inflation, and interest rates, and
- the factors set forth under “Risk Factors” in this report.

Our stock may not trade at the same levels as the stock of other health care companies or the market in general. Also, if the trading market for our stock does not continue to develop, securities analysts may not maintain or initiate research coverage of our Company and our shares, and this could depress the market for our shares.

Members of the Molina family own a majority of our capital stock, decreasing the influence of other stockholders on stockholder decisions.

Members of the Molina family, either directly or as trustees or beneficiaries of Molina family trusts, in the aggregate own or are entitled to receive upon certain events approximately 40% of our capital stock. Our president and chief executive officer, as well as our chief financial officer, are members of the Molina family, and they are also on our board of directors. Because of the amount of their shareholdings, Molina family members, if they were to act as a group with the trustees of their family trusts, have the ability to significantly influence all matters submitted to stockholders for approval, including the election and removal of directors, amendments to our charter, and any merger, consolidation, or sale of our Company. A significant concentration of share ownership can also adversely affect the trading price for our common stock because investors often discount the value of stock in companies that have controlling stockholders. Furthermore, the concentration of share ownership in the Molina family could delay or prevent a merger or consolidation, takeover, or other business combination that could be favorable to our stockholders. Finally, the interests and objectives of the Molina family may be different from those of our company or our other stockholders, and they may vote their common stock in a manner that is contrary to the vote of our other stockholders.

Future sales of our common stock or equity-linked securities in the public market could adversely affect the trading price of our common stock and our ability to raise funds in new stock offerings.

We may issue equity securities in the future, including securities that are convertible into or exchangeable for, or that represent the right to receive, common stock. Sales of a substantial number of shares of our common stock or other equity securities, including sales of shares in connection with any future acquisitions, could be substantially dilutive to our stockholders. These sales may have a harmful effect on prevailing market prices for our common stock and our ability to raise additional capital in the financial markets at a time and price favorable to us. Moreover, to the extent that we issue restricted stock units, stock appreciation rights, options, or warrants to purchase our common stock in the future and those stock appreciation rights, options, or warrants are exercised or as the restricted stock units vest, our stockholders may experience further dilution. Holders of our shares of common stock have no preemptive rights that entitle holders to purchase a pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our stockholders. Our certificate of incorporation provides that we have authority to issue 80,000,000 shares of common stock and 20,000,000 shares of preferred stock. As of December 31, 2011, 45,815,392 shares of common stock and no shares of preferred or other capital stock were issued and outstanding.

It may be difficult for a third party to acquire our Company, which could inhibit stockholders from realizing a premium on their stock price.

We are subject to the Delaware anti-takeover laws regulating corporate takeovers. These provisions may prohibit stockholders owning 15% or more of our outstanding voting stock from merging or combining with us. In addition, any change in control of our state health plans would require the approval of the applicable insurance regulator in each state in which we operate.

Our certificate of incorporation and bylaws also contain provisions that could have the effect of delaying, deferring, or preventing a change in control of our Company that stockholders may consider favorable or beneficial. These provisions could discourage proxy contests and make it more difficult for our stockholders to elect directors and take other corporate actions. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions include:

- a staggered board of directors, so that it would take three successive annual meetings to replace all directors,
- prohibition of stockholder action by written consent, and
- advance notice requirements for the submission by stockholders of nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting.

In addition, changes of control are often subject to state regulatory notification, and in some cases, prior approval.

We do not anticipate paying any cash dividends in the foreseeable future.

We have never declared or paid any cash dividends. While we have in the past and may again in the future use our available cash to repurchase our securities, we do not anticipate declaring or paying any cash dividends in the foreseeable future.

Item 1B: ***Unresolved Staff Comments***

None.

Item 2: ***Properties***

We lease a total of 68 facilities. We own a 460,000 square foot office building housing our corporate headquarters in Long Beach, California, and we also own a nearby 32,000 square-foot office building in Long Beach, California, a 26,000 square-foot data center in Albuquerque, New Mexico, and a community clinic in Pomona, California. While we believe our current facilities are adequate to meet our operational needs for the foreseeable future, we are continuing to periodically evaluate our employee and operations growth prospects to determine if additional space is required.

Item 3: ***Legal Proceedings***

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly-funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. Based upon the evaluation of information currently available, we believe that these actions, when finally concluded and determined, are not likely to have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Item 4: ***Mine Safety Disclosures***

None.

PART II

Item 5: ***Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***

Our common stock is listed on the New York Stock Exchange under the trading symbol "MOH." As of February 15, 2012, there were 131 holders of record of our common stock. The high and low sales prices of our common stock for specified periods are set forth below:

Date Range	High	Low
2011		
First Quarter (1)	$ 26.86	$ 17.77
Second Quarter (1)	$ 29.03	$ 24.72
Third Quarter	$ 28.21	$ 14.82
Fourth Quarter	$ 26.31	$ 13.93
2010 (1)		
First Quarter	$ 17.59	$ 13.35
Second Quarter	$ 20.80	$ 16.67
Third Quarter	$ 21.20	$ 16.85
Fourth Quarter	$ 18.85	$ 16.43

(1) All applicable share and per-share amounts reflect the retroactive effects of the three-for-two common stock split in the form of a stock dividend that was effective May 20, 2011.

Dividends

We have never paid cash dividends on our common stock. We currently intend to retain any future earnings to fund our business, and we do not anticipate paying any cash dividends in the future.

Our ability to pay dividends is partially dependent on, among other things, our receipt of cash dividends from our regulated subsidiaries. The ability of our regulated subsidiaries to pay dividends to us is limited by the state departments of insurance in the states in which we operate or may operate, as well as requirements of the government-sponsored health programs in which we participate. Any future determination to pay dividends will be at the discretion of our Board and will depend upon, among other factors, our results of operations, financial condition, capital requirements and contractual restrictions. For more information regarding restrictions on the ability of our regulated subsidiaries to pay dividends to us, please see Item 7 — Management's Discussion and Analysis of Financial Condition and Results of Operations — Regulatory Capital and Dividends Restrictions.

Unregistered Issuances of Equity Securities

None.

Stock Repurchase Program

On July 27, 2011, our board of directors approved a stock repurchase program of up to $7 million to be used to purchase shares of our common stock under a Rule 10b5-1 trading plan. Under this program, we purchased approximately 400,000 shares of our common stock for $7 million (average cost of approximately $17.47 per share) during August 2011. This repurchase program was funded with working capital.

Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014. The repurchase program will be funded with working capital or draws under our credit facility, and repurchases may be made from time to time on the open market or through privately negotiated transactions. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time. No securities were purchased under this program in 2011.

Purchases of common stock made by or on behalf of the Company during the quarter ended December 31, 2011, including shares withheld by the Company to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (b)(c)	Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Plans or Programs (b)(c)
October 1 — October 31	2,431(d)	$ 15.44	—	$ 75,000,000
November 1 — November 30	2,150(d)	$ 20.53	—	$ 75,000,000
December 1 — December 31	1,213(d)	$ 21.82	—	$ 75,000,000
Total	5,794(d)	$ 18.66	—	

(a) During the three months ended December 31, 2011, we did not repurchase any shares of our common stock outside of our publicly announced stock repurchase program except 5,794 shares of common stock withheld to settle our employees' income tax obligations.

(b) On July 27, 2011, our board of directors approved a stock repurchase program of up to $7 million to be used to purchase shares of our common stock under a Rule 10b5-1 trading plan. Our repurchases under this program were completed in August 2011.

(c) Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time. No repurchases have been made by the Company pursuant to this repurchase plan during the quarter ended December 31, 2011.

(d) Includes shares withheld by the Company to satisfy our employees' income tax withholdings.

Securities Authorized for Issuance Under Equity Compensation Plans (as of December 31, 2011)

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) (c)
Equity compensation plans approved by security holders	553,049	$ 20.91	7,377,188(2)

(1) Options to purchase shares of our common stock issued under the 2000 Omnibus Stock and Incentive Plan, and the 2002 Equity Incentive Plan. Further grants under the 2000 Omnibus Stock and 2002 Equity Incentive Plan have been suspended.

(2) Includes only shares remaining available to issue under the 2011 Equity Incentive Plan (the "2011 Incentive Plan"), and the 2011 Employee Stock Purchase Plan (the "ESPP"). Further grants under the 2002 Equity Incentive Plan and the 2002 Employee Stock Purchase Plan have been suspended.

STOCK PERFORMANCE GRAPH

The following discussion shall not be deemed to be "soliciting material" or to be "filed" with the SEC nor shall this information be incorporated by reference into any future filing under the Securities Act or the Exchange Act, except to the extent that the Company specifically incorporates it by reference into a filing.

The following line graph compares the percentage change in the cumulative total return on our common stock against the cumulative total return of the Standard & Poor's Corporation Composite 500 Index (the "S&P 500") and a peer group index for the five-year period from December 31, 2006 to December 31, 2011. The graph assumes an initial investment of $100 in Molina Healthcare, Inc. common stock and in each of the indices.

The peer group index consists of Amerigroup Corporation (AGP), Centene Corporation (CNC), Coventry Health Care, Inc. (CVH), Health Net, Inc. (HNT), Humana, Inc. (HUM), UnitedHealth Group Incorporated (UNH), and WellPoint, Inc. (WLP).

(1) Service revenue and cost of service revenue represent revenue and costs generated by our Molina Medicaid Solutions segment. Because we acquired this business on May 1, 2010, results for the year ended December 31, 2010 include eight months of results for this segment.

(2) On February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's existing contract with the state will expire without renewal on June 30, 2012. In connection with this notification, we recorded a non-cash impairment charge of approximately $64.6 million in the fourth quarter of 2011.

(3) All applicable share and per-share amounts reflect the retroactive effects of the three-for-two common stock split in the form of a stock dividend that was effective May 20, 2011.

(4) Medical care ratio represents medical care costs as a percentage of premium revenue. The medical care ratio is a key operating indicator used to measure our performance in delivering efficient and cost effective health care services. Changes in the medical care ratio from period to period result from changes in Medicaid funding by the states, our ability to effectively manage costs, contract changes, and changes in accounting estimates related to incurred but not reported claims. See *Management's Discussion and Analysis of Financial Condition and Results of Operations* for further discussion.

(5) General and administrative expense ratio represents such expenses as a percentage of total revenue.

(6) Premium tax ratio represents such expenses as a percentage of premium revenue.

(7) Number of members at end of period.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

The following discussion of our financial condition and results of operations should be read in conjunction with the "Selected Financial Data" and the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report. This discussion contains forward-looking statements that involve known and unknown risks and uncertainties, including those set forth under Item 1A — Risk Factors, above.

Adjustments

We have adjusted all applicable share and per-share amounts to reflect the retroactive effects of the three-for-two stock split in the form of a stock dividend that was effective May 20, 2011.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. Our business comprises our Health Plans segment, consisting of licensed health maintenance organizations serving Medicaid populations in ten states, and our Molina Medicaid Solutions segment, which provides design, development, implementation, and business process outsourcing solutions to Medicaid agencies in an additional five states. We also have a direct delivery business that currently consists of primary care community clinics in California and Washington; additionally, we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

We report our financial performance based on the following two reportable segments: Health Plans; and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. This segment served approximately 1.7 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals as of December 31, 2011. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

On February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's existing contract with the state will expire without renewal on June 30, 2012. In connection with this notification, we recorded a non-cash impairment charge of approximately $64.6 million, or $1.34 per diluted share. Most of the impairment charge is not tax deductible, resulting in a disproportionate impact to net income. For the year ended December 31, 2011, our Missouri health plan contributed premium revenue of $229.6 million, or 5% of total premium revenue, and comprised 79,000 members, or 4.7% of total Health Plans segment membership.

On May 1, 2010, we acquired a health information management business which we operate under the name, Molina Medicaid Solutions. Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement Medicaid Management Information System, or MMIS, to another firm. Our revenue under the Louisiana MMIS contract from May 1, 2010, the date we acquired Molina Medicaid Solutions, through December 31, 2010, was approximately $32 million. For the year ended December 31, 2011, our revenue under the Louisiana MMIS contract was approximately $57 million. We expect that we will continue to perform under this contract through implementation and acceptance of the successor MMIS. Based upon our past experience and our knowledge of the Louisiana MMIS bid process, we believe that implementation and acceptance of the successor MMIS will not occur until 2014 at the earliest. Through implementation and acceptance of the successor MMIS we expect to recognize between $45 million and $50 million in revenue annually under our Louisiana MMIS contract.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the year ended December 31, 2011, we received approximately 94% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with the Centers for Medicare and Medicaid Services, or CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the year ended December 31, 2011, we received approximately 6% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. Premiums PMPM for the Children's Health Insurance Program, or CHIP, members are generally among our lowest, with rates as low as approximately $70 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the Temporary Assistance for Needy Families, or TANF, Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $110 in California to $250 in Missouri. Among our Medicaid Aged, Blind or Disabled, or ABD, membership, PMPM premiums range from approximately $330 in Utah to $1,400 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, inpatient, behavioral health and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest average PMPM premiums, at approximately $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	As of December 31,		
	2011	2010	2009
Total Ending Membership by Health Plan:			
California	355,000	344,000	351,000
Florida	69,000	61,000	50,000
Michigan	222,000	227,000	223,000
Missouri	79,000	81,000	78,000
New Mexico	88,000	91,000	94,000
Ohio	248,000	245,000	216,000
Texas	155,000	94,000	40,000
Utah	84,000	79,000	69,000
Washington	355,000	355,000	334,000
Wisconsin (1)	42,000	36,000	—
Total	1,697,000	1,613,000	1,455,000
Total Ending Membership by State for our Medicare Advantage Plans(1):			
California	6,900	4,900	2,100
Florida	800	500	—
Michigan	8,200	6,300	3,300
New Mexico	800	600	400
Ohio	200	—	—
Texas	700	700	500
Utah	8,400	8,900	4,000
Washington	5,000	2,600	1,300
Total	31,000	24,500	11,600

	As of December 31,		
	2011	2010	2009
Total Ending Membership by State for our Aged, Blind or Disabled Population:			
California	31,500	13,900	13,900
Florida	10,400	10,000	8,800
Michigan	37,500	31,700	32,200
New Mexico	5,600	5,700	5,700
Ohio	29,100	28,200	22,600
Texas	63,700	19,000	17,600
Utah	8,500	8,000	7,500
Washington	4,800	4,000	3,200
Wisconsin (1)	1,700	1,700	—
Total	192,800	122,200	111,500

(1) We acquired the Wisconsin health plan on September 1, 2010. As of December 31, 2011, the Wisconsin health plan had approximately 2,000 Medicare Advantage members covered under a reinsurance contract with a third party; these members are not included in the membership tables herein.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service:* Physician providers paid on a fee-for-service basis are paid according to a fee schedule set by the state or by our contracts with these providers. Most hospitals are paid on a fee-for-service basis in a variety of ways, including per diem amounts, diagnostic-related groups or DRGs, percent of billed charges, and case rates. As discussed below, we also pay a small portion of hospitals on a capitated basis. We also have stop-loss agreements with the hospitals with which we contract. Under all fee-for-service arrangements, we retain the financial responsibility for medical care provided. Expenses related to fee-for-service contracts are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit managers are included in fee-for-service costs.

- *Capitation:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation contracts, we typically pay a fixed per-member per-month, or PMPM, payment to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated contracts, we remain liable for the provision of certain health care services. Certain of our capitated contracts also contain incentive programs based on service delivery, quality of care, utilization management, and other criteria. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.

- *Pharmacy:* Pharmacy costs include all drug, injectibles, and immunization costs paid through our pharmacy benefit managers. As noted above, drugs and injectibles not paid through our pharmacy benefit managers are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.

- *Other:* Other medical care costs include medically related administrative costs, certain provider incentive costs, reinsurance cost, and other health care expense. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, disease management, 24-hour on-call nurses, and a portion of our information technology costs. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2011, 2010, and 2009, medically related administrative costs were approximately $102.3 million, $85.5 million, and $74.6 million, respectively.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Policies" below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our contracts in Idaho, Louisiana, Maine, New Jersey, West Virginia, and Florida. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period. We began to recognize deferred contract costs for our Maine contract in September 2010, at the same time we began to recognize revenue associated with that contract. In Idaho, we expect to begin recognition of deferred contract costs in 2012, in a manner consistent with our anticipated recognition of revenue.

2011 Financial Performance Summary

The following table and narrative briefly summarizes our financial and operating performance for the years ended December 31, 2011, 2010, and 2009. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are computed as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Year Ended December 31,		
	2011	2010	2009
	(Dollar amounts in thousands, except per-share data)		
Earnings per diluted share	$ 0.45	$ 1.32	$ 0.79
Premium revenue	$ 4,603,407	$ 3,989,909	$ 3,660,207
Service revenue	$ 160,447	$ 89,809	$ —
Operating income	$ 80,173	$ 105,001	$ 51,934
Net income	$ 20,818	$ 54,970	$ 30,868
Total ending membership	1,697,000	1,613,000	1,455,000
Premium revenue	96.5%	97.6%	99.8%
Service revenue	3.4%	2.2%	—
Investment income	0.1%	0.2%	0.2%
Total revenue	100.0%	100.0%	100.0%

Operating income	1.7%	2.6%	1.4%
Net income	0.4%	1.3%	0.8%
Effective tax rate	67.8%	38.6%	19.1%

Year Ended December 31, 2011 Compared with the Year Ended December 31, 2010

Fiscal Year 2011 Overview and Highlights

For the year, our net income was $20.8 million, or $0.45 per diluted share, a decrease of 66% over 2010. As described above, we recorded a non-cash impairment charge of approximately $64.6 million, or $1.34 per diluted share, in connection with the expiration of our Missouri health plan's contract with the state of Missouri effective June 30, 2012. Absent this impairment charge, improved performance of the Health Plans segment drove our improved performance overall for the year ended December 31, 2011.

We earned premium revenues of $4.6 billion, up 15.4% over the previous year. Meanwhile, we achieved a medical care ratio of 83.9%, compared with a medical care ratio of 84.5% for fiscal year 2010. We have continued to lay the foundation for further growth, achieving certification of our Medicaid management information system in Maine, winning large contract awards in Texas, serving more of the ABD population in California, and preparing to serve dual-eligible members in many of our states.

During 2011, we continued to pursue the expansion of our Health Plans segment; membership grew 8.4% on a member-month basis over 2010. We have expanded our growing presence in Texas, where new contracts in 2010 and 2011 have led to the addition of approximately 61,000 members in 2011, which includes nearly 45,000 new ABD members. This membership growth not only provides increased scale for leveraging our resources in Texas, it makes us an increasingly important player in a state where the potential revenue opportunity will grow as new Medicaid beneficiaries qualify for coverage under health care reform.

Our Texas and Wisconsin health plans continue to face challenges. We have undertaken a number of measures—focused on both utilization and unit cost reductions—to improve the profitability of these health plans.

We remain concerned about state budget deficits, which are not expected to improve in 2012. Accordingly, the rate environment for our health plans remains uncertain, and we have received several rate reductions in 2011, including a 2.5% reduction in New Mexico effective July 1, 2011, a 2% reduction in Utah effective July 1, 2011, a 2% rate reduction in Texas effective September 1, 2011, and a 1% reduction in California effective October 1, 2011. Additionally, we have received a proposed rate reduction in California that we believe will translate into a premium reduction of approximately 3.5% retroactive to July 1, 2011. However, we have also received rate increases, including a 5% rate increase at our Missouri health plan effective July 1, 2011, a 7.5% rate increase at our Florida plan effective September 1, 2011, and a 1% rate increase at our Michigan plan effective October 1, 2011.

With respect to our Molina Medicaid Solutions business, our MMIS in Maine received full certification from CMS in December 2011. The state of Idaho has sent their formal request for system certification to CMS, and we anticipate certification review in early 2012, with formal certification in the second half of 2012.

Health Plans Segment

Premium Revenue

In the year ended December 31, 2011, compared with the year ended December 31, 2010, premium revenue increased 15.4% due to a membership increase of approximately 8.4% (on a member-month basis), and PMPM revenue increase of approximately 6.4%. Premium revenues were impacted by the following in 2011:

- In the fourth quarter of 2011, our New Mexico health plan entered into a contract amendment that more closely aligns the calculation of revenue with the methodology adopted under the Affordable Care Act. The contract amendment changed the calculation of the amount of revenue that may be recognized relative to medical costs, and resulted in the recognition of approximately $5.6 million of premium revenue which all related to periods prior to 2011.
- Also in the fourth quarter of 2011, the addition of pharmacy benefits at our Ohio health plan effective October 1, 2011, increased premium revenue.

Absent the adjustment to New Mexico premium revenue and the addition of the pharmacy benefit in Ohio, premium revenue PMPM increased approximately 4.4%, from $218 in 2010 to $227 in 2011. Increased enrollment among the ABD and Medicare populations contributed to the higher premium revenue PMPM. Medicare premium revenue was $388.2 million for the year ended December 31, 2011, compared with $265.2 million for the year ended December 31, 2010.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Year Ended December 31,					
	2011			2010		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 2,764,309	$ 139.02	71.6 %	$ 2,360,858	$ 128.73	70.0 %
Capitation	518,835	26.09	13.4	555,487	30.29	16.5
Pharmacy	418,007	21.02	10.8	325,935	17.77	9.7
Other	158,843	8.00	4.2	128,577	7.01	3.8
Total	$ 3,859,994	$ 194.13	100.0 %	$ 3,370,857	$ 183.80	100.0 %

The medical care ratio decreased to 83.9% for the year ended December 31, 2011, compared with 84.5% for the year ended December 31, 2010. Absent that portion of the adjustment to New Mexico premium revenue that related to 2010, the medical care ratio was 84.0% for the year ended December 31, 2011. Total medical care costs increased less than 6% PMPM.

- Pharmacy costs (excluding the addition of pharmacy benefits at our Ohio health plan effective October 1, 2011) increased approximately 7% PMPM. Approximately two-thirds of the increase in pharmacy costs was attributable to higher unit costs, with the remainder due to increased utilization.
- Capitation costs decreased approximately 14% PMPM, primarily due to the transition of members in Michigan and Washington into fee-for-service networks.
- Fee-for-service costs increased approximately 8% PMPM, partially due to the transition of members from capitated provider networks into fee-for-service networks.
- Fee-for-service and capitation costs combined increased approximately 4% PMPM. Excluding the Texas health plan, fee-for-service and capitation costs combined increased approximately 2% PMPM.
- Hospital utilization decreased approximately 5%.

The medical care ratio of the California health plan increased to 85.8% for the year ended December 31, 2011, from 83.5% for the year ended December 31, 2010. The California health plan received premium reductions of approximately 3% and 1% effective July 1, 2011, and October 1, 2011, respectively. In the second half of 2011, the California health plan added approximately 14,500 new ABD members with average premium revenue of approximately $385 PMPM.

The medical care ratio of the Florida health plan decreased to 91.9% for the year ended December 31, 2011, from 95.4% for the year ended December 31, 2010, primarily due to initiatives that have reduced pharmacy and behavioural health costs, and a premium rate increase of approximately 7.5% effective September 1, 2011.

The medical care ratio of the Michigan health plan decreased to 81.2% for the year ended December 31, 2011, from 83.7% for the year ended December 31, 2010, primarily due to improved Medicare performance and lower inpatient facility costs. The Michigan health plan received a premium rate increase of approximately 1% effective October 1, 2011.

The medical care ratio of the Missouri health plan decreased to 85.3% for the year ended December 31, 2011, from 85.5% for the year ended December 31, 2010. The health plan received a premium rate increase of approximately 5% effective July 1, 2011.

The medical care ratio of the New Mexico health plan decreased to 80.2% for the year ended December 31, 2011, from 80.6 % for the year ended December 31, 2010. The New Mexico health plan received a premium rate reduction of approximately 2.5% effective July 1, 2011. As discussed above, the New Mexico health plan entered into a contract amendment changed the calculation of the amount of revenue that may be recognized relative to medical costs in the fourth quarter of 2011. Consequently, premium revenue recognized in the year ended December 31, 2011, includes $5.6 million related to periods prior to 2011.

The medical care ratio of the Ohio health plan decreased to 77.6% for the year ended December 31, 2011, from 79.1% for the year ended December 31, 2010, due to an increase in Medicaid premium PMPM of approximately 4.5% effective January 1, 2011, and relatively flat fee-for-service costs. The pharmacy benefit was restored to all managed care plans in Ohio effective October 1, 2011.

The medical care ratio of the Texas health plan increased to 93.4% for the year ended December 31, 2011, from 86.2% for the year ended December 31, 2010. Effective February 1, 2011, we added approximately 30,000 ABD members in the Dallas-Fort Worth area and effective September 1, 2011, we added approximately 8,000 ABD members and 3,000 TANF members in the Jefferson Service area. Medical costs in the Dallas-Fort Worth area were well in excess of premium revenue. Excluding the ABD population in the Dallas-Fort Worth region, the medical care ratio of the Texas health plan was 85.7% for the year ended December 31, 2011.

The medical care ratio of the Utah health plan decreased to 78.1% for the year ended December 31, 2011, from 91.3% for the year ended December 31, 2010, primarily due to reduced fee-for-service inpatient and physician costs and an increase in Medicaid premiums PMPM. Effective July 1, 2010, the Utah health plan received a premium rate increase of approximately 7%. Lower fee-for-service costs were the result of both lower unit costs and lower utilization. During the second quarter of 2011 we settled certain claims with the state regarding the savings share provision of our contract in effect from 2003 through June of 2009. We settled for the contract years 2006 through 2009 and recognized $6.9 million in premium revenue without any corresponding charge to expense. The Utah health plan received a premium rate reduction of approximately 2% effective July 1, 2011.

The medical care ratio of the Washington health plan remained flat at 83.9% for the year ended December 31, 2011 compared with the year ended December 31, 2010. Higher fee-for-service and pharmacy costs were offset by lower capitation costs.

The medical care ratio of the Wisconsin health plan (acquired September 1, 2010) was 92.5% for the year ended December 31, 2011. The state of Wisconsin reduced capitation rates by 11% on January 1, 2011. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Wisconsin health plan. Significant improvements in inpatient utilization were realized in the second half of 2011.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Year Ended December 31, 2011						
		Premium Revenue		Medical Care Costs			
	Member Months(1)	Total	PMPM	Total	PMPM	Medical Care Ratio	Premium Tax Expense
California	4,190	$ 575,176	$ 137.27	$ 493,419	$ 117.75	85.8 %	$ 7,499
Florida	788	203,945	258.70	187,358	237.66	91.9	41
Michigan	2,660	662,127	248.91	537,779	202.16	81.2	38,733
Missouri	959	229,584	239.38	195,832	204.19	85.3	—
New Mexico	1,074	345,732	321.94	277,338	258.25	80.2	9,285
Ohio	2,966	988,896	333.40	766,949	258.57	77.6	76,677
Texas	1,616	409,295	253.40	382,390	236.74	93.4	7,117

	19,884	$ 4,603,407	$ 231.51	$ 3,859,994	$ 194.13	83.9 %	$ 154,589

	Year Ended December 31, 2010						
		Premium Revenue		Medical Care Costs			
	Member Months(1)	Total	PMPM	Total	PMPM	Medical Care Ratio	Premium Tax Expense
California	4,197	$ 506,871	$ 120.77	$ 423,021	$ 100.79	83.5 %	$ 6,912
Florida	664	170,683	256.87	162,839	245.07	95.4	1
Michigan	2,708	630,134	232.66	527,596	194.80	83.7	39,187
Missouri	946	210,852	222.98	180,291	190.66	85.5	—
New Mexico	1,104	366,784	332.02	295,633	267.61	80.6	9,300
Ohio	2,817	860,324	305.42	680,802	241.69	79.1	67,358
Texas	708	188,716	266.72	162,714	229.97	86.2	3,251
Utah	921	258,076	280.27	235,576	255.84	91.3	—
Washington	4,141	758,849	183.27	636,617	153.75	83.9	13,513
Wisconsin(2)	134	30,033	224.75	27,574	206.35	91.8	—
Other(3)	—	8,587	—	38,194	—	—	253
	18,340	$ 3,989,909	$ 217.56	$ 3,370,857	$ 183.80	84.5 %	$ 139,775

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) We acquired the Wisconsin health plan on September 1, 2010.

(3) "Other" medical care costs also include medically related administrative costs of the parent company.

Days in Medical Claims and Benefits Payable

The days in medical claims and benefits payable were as follows:

	December 31,		
	2011	2010	2009
Days in claims payable: fee-for-service only	40 days	42 days	44 days
Number of claims in inventory at end of period	111,100	143,600	93,100
Billed charges of claims in inventory at end of period (in thousands)	$ 207,600	$ 218,900	$ 131,400

Molina Medicaid Solutions Segment

We acquired Molina Medicaid Solutions on May 1, 2010; therefore, the year ended December 31, 2010 includes only eight months of operating results for this segment. Performance of the Molina Medicaid Solutions segment was as follows:

	Twelve Months Ended December 31, 2011	Eight Months Ended December 31, 2010
	(In thousands)	
Service revenue before amortization	$ 167,269	$ 98,125
Amortization recorded as reduction of service revenue	(6,822)	(8,316)
Service revenue	160,447	89,809
Cost of service revenue	143,987	78,647
General and administrative costs	9,270	5,135
Amortization of customer relationship intangibles recorded as amortization	5,127	3,418
Operating income	$ 2,063	$ 2,609

We are currently deferring recognition of all revenue as well as all direct costs (to the extent that such costs are estimated to be recoverable) in Idaho until the MMIS in that state receives certification from CMS. For the year ended December 31, 2011, cost of service revenue includes $11.5 million of direct costs associated with the Idaho contract that would otherwise have been recorded as deferred contract costs. In assessing the recoverability of the deferred contract costs associated with the Idaho contract during 2011, we determined that these costs should be expensed as a period cost. In December 2011, our MMIS in Maine received full certification from CMS.

Consolidated Expenses and Other

General and Administrative Expenses

General and administrative expenses were $415.9 million, or 8.7% of total revenue, for the year ended December 31, 2011, compared with $346.0 million, or 8.5% of total revenue, for the year ended December 31, 2010.

Premium Tax Expense

Premium tax expense decreased to 3.4% of premium revenue, for the year ended December 31, 2011, from 3.5% for the year ended December 31, 2010.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and Amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service Revenue;" and
- Amortization of capitalized software is recorded within the heading "Cost of Service Revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Year Ended December 31,			
	2011		2010	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software	$ 30,864	0.7%	$ 27,230	0.7%
Amortization of intangible assets	19,826	0.4	18,474	0.4
Depreciation and amortization reported as such in the consolidated statements of income	50,690	1.1	45,704	1.1
Amortization recorded as reduction of service revenue	6,822	0.1	8,316	0.2
Amortization of capitalized software recorded as cost of service revenue	16,871	0.4	6,745	0.2
Total	$ 74,383	1.6%	$ 60,765	1.5%

Impairment of Goodwill and Intangible Assets

We recorded a non-cash impairment charge of approximately $64.6 million, or $1.34 per diluted share, in connection with the expiration of our Missouri health plan's contract with the state of Missouri effective June 30, 2012. Of the total charge, $58.5 million is not tax deductible, resulting in a disproportionate impact to net income.

Interest Expense

Interest expense was $15.5 million for the years ended December 31, 2011 and 2010. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $5.5 million and $5.1 million for the years ended December 31, 2011 and 2010, respectively.

Income Taxes

Income tax expense is recorded at an effective rate of 67.8% for the year ended December 31, 2011, compared with 38.6% for the year ended December 31, 2010. The effective rate for the year ended December 31, 2011 reflects the non-deductible nature of the majority of the Missouri impairment charge, discrete tax benefits of $1.7 million recognized for statute closures, prior year tax return to provision reconciliations, and certain non-recurring income that is not subject to income tax. Excluding the impact from the Missouri impairment charge and discrete tax benefits, the effective tax rate for the year ended December 31, 2011 was 37.9%.

Year Ended December 31, 2010 Compared with the Year Ended December 31, 2009

Health Plans Segment

Premium Revenue

In the year ended December 31, 2010, compared with the year ended December 31, 2009, premium revenue increased 9.0% due to a membership increase of approximately 10.9% (on a member-month basis). On a PMPM basis, however, consolidated premium revenue decreased 2.1% because of declines in premium rates. The decrease in PMPM revenue was due to the transfer of the pharmacy benefit to the state fee-for-service programs in Ohio (effective February 1, 2010) and Missouri (effective October 1, 2009). Exclusive of the transfer of the pharmacy benefit in Ohio and Missouri, Medicaid premium revenue PMPM increased approximately 1.5% over the year ended December 31, 2009. Medicare enrollment exceeded 24,000 members at December 31, 2010, and Medicare premium revenue was $265.2 million for the year ended December 31, 2010, compared with $135.9 million for the year ended December 31, 2009.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Year Ended December 31,					
	2010			2009		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 2,360,858	$ 128.73	70.0 %	$ 2,077,489	$ 126.14	65.4 %
Capitation	555,487	30.29	16.5	558,538	33.91	17.6
Pharmacy	325,935	17.77	9.7	414,785	25.18	13.1
Other	128,577	7.01	3.8	125,424	7.62	3.9
Total	$ 3,370,857	$ 183.80	100.0 %	$ 3,176,236	$ 192.85	100.0 %

The medical care ratio decreased to 84.5% for the year ended December 31, 2010, compared with 86.8% for the year ended December 31, 2009.

The medical care ratio of the California health plan decreased to 83.5% for the year ended December 31, 2010, from 92.2% for the year ended December 31, 2009, primarily due to lower inpatient facility fee-for-service costs resulting from provider network restructuring and improved medical management.

The medical care ratio of the Florida health plan increased to 95.4% for the year ended December 31, 2010, from 93.8% for the year ended December 31, 2009, primarily due to higher capitation costs and higher fee-for-service costs in the outpatient and physician categories.

The medical care ratio of the Michigan health plan increased to 83.7% for the year ended December 31, 2010, from 81.5% for the year ended December 31, 2009, primarily due to higher inpatient facility fee-for-service costs.

The medical care ratio of the New Mexico health plan decreased to 80.6% for the year ended December 31, 2010, from 85.7% for the year ended December 31, 2009, primarily due to reduced fee-for-service costs which more than offset decreased premium revenue PMPM.

The medical care ratio of the Ohio health plan decreased to 79.1% for the year ended December 31, 2010, from 86.1% for the year ended December 31, 2009, primarily due to an increase in Medicaid premium PMPM of approximately 6% effective January 1, 2010 (exclusive of the reduction related to pharmacy benefits), partially offset by higher inpatient facility fee-for-service costs.

The medical care ratio of the Utah health plan decreased to 91.3% for the year ended December 31, 2010, from 91.8% for the year ended December 31, 2009, due to improved financial performance in the second half of 2010. That improved financial performance was the result of reduced fee-for-service costs in the second half of 2010 and an increase in Medicaid premium PMPM of approximately 7% effective July 1, 2010.

The medical care ratio of the Washington health plan decreased to 83.9% for the year ended December 31, 2010, from 84.5% for the year ended December 31, 2009, primarily due to reduced fee-for-service costs which more than offset decreased premium revenue PMPM. Premium revenue PMPM decreased for all of 2010 compared with 2009 because the rate increase of approximately 2.5% effective July 1, 2010 was not enough to offset decreases received during the second half of 2009.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Year Ended December 31, 2010						
		Premium Revenue		Medical Care Costs			
	Member Months(1)	Total	PMPM	Total	PMPM	Medical Care Ratio	Premium Tax Expense

Other(3)(4)	—	12,774	—	37,957	—	—	57
	16,466	$ 3,660,207	$ 222.24	$ 3,176,236	$ 192.85	86.8 %	$ 128,581

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) We acquired the Wisconsin health plan on September 1, 2010.

(3) "Other" medical care costs also include medically related administrative costs at the parent company.

(4) As of December 31, 2009, our Nevada health plan no longer served members. Premium revenue and medical care costs for the Nevada health plan have been included in "Other."

Molina Medicaid Solutions Segment

Molina Medicaid Solutions contributed $2.6 million to operating income for the year ended December 31, 2010, but reported an operating loss of $3.6 million for the quarter ended December 31, 2010. The operating loss for the fourth quarter of 2010 was primarily the result of system stabilization costs incurred for two of Molina Medicaid Solutions' contracts.

Performance of the Molina Medicaid Solutions segment for the year ended December 31, 2010 was as follows:

	(In thousands)
Service revenue before amortization	$ 98,125
Amortization recorded as reduction of service revenue	(8,316)
Service revenue	89,809
Cost of service revenue	78,647
General and administrative costs	5,135
Amortization of customer relationship intangibles recorded as amortization	3,418
Operating income	$ 2,609

Consolidated Expenses and Other

General and Administrative Expenses

General and administrative expenses were $346.0 million, or 8.5% of total revenue, for the year ended December 31, 2010, compared with 276.0 million, or 7.5% of total revenue, for the year ended December 31, 2009. The increase in the G&A ratio was the result of higher administrative expenses for the Health Plans segment, driven in part by the cost of our Medicare expansion, higher variable compensation expense as a result of substantially improved financial performance in 2010, employee severance and settlement costs, and costs relating to the acquisitions of Molina Medicaid Solutions and the Wisconsin health plan.

Premium Tax Expense

Premium tax expense relating to Health Plans segment premium revenue was 3.5% of revenue for both years ended December 31, 2010, and 2009.

Depreciation and Amortization

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Year Ended December 31,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software	$ 27,230	0.7 %	$ 25,172	0.7 %
Amortization of intangible assets	18,474	0.4	12,938	0.3
Depreciation and amortization reported as such in the consolidated statements of income	45,704	1.1	38,110	1.0
Amortization recorded as reduction of service revenue	8,316	0.2	—	—
Amortization of capitalized software recorded as cost of service revenue	6,745	0.2	—	—
Total	$ 60,765	1.5 %	$ 38,110	1.0 %

Interest Expense

Interest expense increased to $15.5 million for the year ended December 31, 2010, from $13.8 million for the year ended December 31, 2009. We incurred higher interest expense relating to the $105 million draw on our credit facility (beginning May 1, 2010) to fund the acquisition of Molina Medicaid Solutions. Amounts borrowed to fund this acquisition were repaid in the third quarter using proceeds from our equity offering in the third quarter of 2010. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $5.1 million and $4.8 million for the years ended December 31, 2010 and 2009, respectively.

Income Taxes

Income tax expense was recorded at an effective rate of 38.6% for the year ended December 31, 2010, compared with 19.1% for the year ended December 31, 2009. The lower rate in 2009 was primarily due to discrete tax benefits recorded in 2009 as a result of settling tax examinations, and higher than previously estimated tax credits.

Acquisitions

Molina Center. On December 7, 2011, our wholly owned subsidiary Molina Center LLC closed on its acquisition of the 460,000 square foot office building located in Long Beach, California. The building, or Molina Center, consists of two conjoined fourteen-story office towers on approximately five acres of land. For the last several years we have leased approximately 155,000 square feet of the Molina Center for use as our corporate headquarters and also for use by our California health plan subsidiary. The final purchase price was $81 million, which amount was paid with a combination of cash on hand and bank financing under a term loan agreement. We acquired this business primarily to facilitate space needs for the projected future growth of the Company.

Molina Medicaid Solutions. On May 1, 2010, we acquired a health information management business which we operate under the name, *Molina Medicaid Solutions*℠ as described in Overview, above.

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of December 31, 2011, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income decreased to $5.5 million for the year ended December 31, 2011, compared with $6.3 million for the year ended December 31, 2010. Our annualized portfolio yields for the years ended December 31, 2011, 2010, and 2009 were 0.6%, 0.7%, and 1.2%, respectively.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash provided by operating activities for the year ended December 31, 2011 was $225.4 million compared with $161.4 million for the year ended December 31, 2010, an increase of $64.0 million. This increase was primarily due to the change in deferred revenue. In 2011, deferred revenue was a use of cash amounting to $8.2 million, compared with $41.9 million in 2010.

Cash provided by financing activities decreased due to $111.1 million of net proceeds from our common stock offering in the third quarter of 2010, offset by the $48.6 million borrowed under a term loan used to purchase the Molina Center in 2011.

Reconciliation of Non-GAAP (1) to GAAP Financial Measures

EBITDA (2)

	Year Ended December 31,	
	2011	2010
	(In thousands)	
Net income	$ 20,818	$ 54,970
Add back:		
Depreciation and amortization reported in the consolidated statements of cash flows	74,383	60,765
Interest expense	15,519	15,509
Provision for income taxes	43,836	34,522
EBITDA	$ 154,556	$ 165,766

(1) GAAP stands for U.S. generally accepted accounting principles.

(2) EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities, nor should EBITDA be considered in isolation from these GAAP measures of operating performance. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At December 31, 2011, the parent company — Molina Healthcare, Inc. — held cash and investments of approximately $23.6 million, compared with approximately $65.1 million of cash and investments at December 31, 2010. This decline was primarily due to a capital contribution to our Texas health plan in the fourth quarter of 2011 and cash paid to acquire the Molina Center.

On a consolidated basis, at December 31, 2011, we had working capital of $446.2 million compared with $392.4 million at December 31, 2010. At December 31, 2011 we had cash and investments of $893.0 million, compared with $813.8 million of cash and investments at December 31, 2010.

Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see discussion of “Convertible Senior Notes” below). The repurchase program will be funded with working capital or draws under our credit facility (see discussion of “Credit Facility” below).

On July 27, 2011, our board of directors approved a stock repurchase program of up to $7 million to be used to purchase shares of our common stock under a Rule 10b5-1 trading plan. Under this program, we purchased approximately 400,000 shares of our common stock for $7 million (average cost of approximately $17.47 per share) during August 2011. These purchases did not materially impact diluted earnings per share for the year ended December 31, 2011. Subsequently, we retired the $7.0 million of treasury shares purchased, which reduced additional paid-in capital as of December 31, 2011.

We believe that our cash resources, Credit Facility, and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Credit Facility

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility (the "Credit Facility") with various lenders and U.S. Bank National Association, as LC Issuer, Swing Line Lender, and Administrative Agent. The Credit Facility will be used for general corporate purposes.

The Credit Facility has a term of five years under which all amounts outstanding will be due and payable on September 9, 2016. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $195 million. As of December 31, 2011, there was no outstanding principal balance under the Credit Facility. However, as of December 31, 2011, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million as required under the Molina Medicaid Solutions contracts with the states of Maine and Idaho, which reduced the amount available under the Credit Facility by $10.3 million.

Borrowings under the Credit Facility will bear interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility. The initial commitment fee shall be set at 0.35% until our delivery of its financials for the year ended December 31, 2011. The applicable margins range between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan).

The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 as of the end of each fiscal quarter and a fixed charge coverage ratio of not less than 1.75 to 1.00. At December 31, 2011, we were in compliance with all financial covenants under the Credit Facility.

In the event of a default, including cross-defaults relating to specified other debt in excess of $20 million, the lenders may terminate the commitments under the Credit Facility and declare the amounts outstanding, including all accrued interest and unpaid fees, payable immediately. In addition, the lenders may enforce any and all rights and remedies created under the Credit Facility or applicable law.

In connection with our entrance into the Credit Facility, on September 9, 2011, we terminated our existing credit agreement with Bank of America, dated March 9, 2005, as amended to date, which had provided us with a $150 million revolving credit facility.

Convertible Senior Notes

As of December 31, 2011, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") were outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per $1,000 principal amount of the Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Term Loan

On December 7, 2011, our wholly owned subsidiary, Molina Center LLC, entered into a Term Loan Agreement, dated as of December 1, 2011, with various lenders and East West Bank, as Administrative Agent (the "Administrative Agent"). Pursuant to the terms of the Term Loan Agreement, Molina Center LLC borrowed the aggregate principal amount of $48.6 million to finance a portion of the $81 million purchase price for the acquisition of the approximately 460,000 square foot office building, now named "Molina Center," located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the rate of 4.25% per annum from the date of the closing of the loan through December 31, 2011, and at the Eurodollar rate for each Interest Period (as defined below) commencing January 1, 2012. The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commences on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. We have agreed to pay to the Administrative Agent a loan fee in the amount of $486,000 and an agency fee of $50,000. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $492.4 million at December 31, 2011, and $397.8 million at December 31, 2010.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital, or RBC, rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of December 31, 2011, our health plans had aggregate statutory capital and surplus of approximately $509.9 million compared with the required minimum aggregate statutory capital and surplus of approximately $265.7 million. All of our health plans were in compliance with the minimum capital requirements at December 31, 2011. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The recognition of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and;
- The determination of medical claims and benefits payable.

Revenue Recognition — Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn will lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

- *California Health Plan Medical Cost Floors (Minimums):* A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At December 31, 2011, we recorded a liability of $1.0 million under the terms of these contract provisions.

- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health:* A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At December 31, 2011, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.

- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* A portion of premiums received by our New Mexico health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). The New Mexico health plan contract also contains certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At December 31, 2011, we had not recorded any liability under the terms of these contract provisions. In the fourth quarter of 2011, our New Mexico health plan entered into a contract amendment that more closely aligns the calculation of revenue with the methodology adopted under the Affordable Care Act. The contract amendment changed the calculation of the amount of revenue that may be recognized relative to medical costs, and resulted in the recognition of approximately $5.6 million of premium revenue which all related to periods prior to 2011.

- *Texas Health Plan Profit Sharing:* Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. The rebates, if any, are calculated separately for the TANF/CHIP and ABD products. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had an aggregate liability of approximately $0.7 million accrued pursuant to our profit-sharing agreement with the state of Texas at December 31, 2011.

- *Medicare Revenue Risk Adjustment:* Based on member encounter data that we submit to CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member

requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a receivable of approximately $5.0 million for anticipated Medicare risk adjustment premiums at December 31, 2011.

Quality incentives that allow us to recognize incremental revenue if certain quality standards are met. These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. Effective February 1, 2010 through June 30, 2011, we were eligible to earn additional incremental revenue of up to 0.25% of our total premium if we met certain pharmacy specific performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Under our contract with the state of Texas, incremental revenue of up to 1% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state. The time period for the assessment of these performance measures previously followed the state's fiscal year, but effective January 1, 2011, it follows the calendar year. However, during 2011 the state of Texas notified us that it had discontinued the program for the 2011 calendar year. We anticipate that the program will be reinstituted in 2012.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, effective beginning in 2011, up to 3.25% of the premium is withheld by the state. The withheld premiums can be earned by the health plan by meeting certain performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of December 31, 2011 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of December 31, 2011.

	Year Ended December 31, 2011				
	Maximum Available Quality Incentive Premium – Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized
	(In thousands)				
New Mexico	$ 2,271	$ 1,558	$ 378	$ 1,936	$ 345,732
Ohio	10,212	8,363	3,501	11,864	988,896

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements under the scope of FASB Accounting Standards Codification Subtopic 605-25, *Revenue Recognition — Multiple–Element Arrangements,* and SEC Staff Accounting Bulletin Topic 13, *Revenue Recognition*.

Effective January 1, 2011, we adopted a new accounting standard that amends the guidance on the accounting for multiple-element arrangements. Pursuant to the new standard, each required deliverable is evaluated to determine whether it qualifies as a separate unit of accounting which is generally based on whether the deliverable has standalone value to the customer. In addition to standalone value, previous guidance also required objective and reliable evidence of fair value of a deliverable in order to treat the deliverable as a separate unit of accounting. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent. We have adopted this guidance on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Our adoption of this guidance has not impacted the timing or pattern of our revenue recognition in 2011. Also, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. For contracts entered into prior to January 1, 2011, objective and reliable evidence of fair value would be required, in addition to DDI standalone value which we do not have, in order to treat DDI as a separate unit of accounting. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. We began to recognize revenue associated with our Maine contract upon state acceptance in September 2010. In Idaho, we will begin recognition of revenue upon state acceptance.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly

associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs
- Employee costs incurred in performing transaction services
- Vendor costs incurred in performing transaction services
- Costs incurred in performing required monitoring of and reporting on contract performance
- Costs incurred in maintaining and processing member and provider eligibility
- Costs incurred in communicating with members and providers

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

We are currently deferring recognition of all revenue as well as all direct costs (to the extent that such costs are estimated to be recoverable) in Idaho until the MMIS in that state receives certification from CMS. For the year ended December 31, 2011, cost of service revenue includes $11.5 million of direct costs associated with the Idaho contract that would otherwise have been recorded as deferred contract costs. In assessing the recoverability of the deferred contract costs associated with the Idaho contract during 2011, we determined that these costs should be expensed as a period cost.

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	December 31,		
	2011	2010	2009
	(In thousands)		
Fee-for-service claims incurred but not paid (IBNP)	$ 301,020	$ 275,259	$ 246,508
Capitation payable	53,532	49,598	39,995
Pharmacy	26,178	14,649	20,609
Other	21,746	14,850	8,204
	$ 402,476	$ 354,356	$ 315,316

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $301.0 million of our total medical claims and benefits payable of $402.5 million as of December 31, 2011. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider's monthly capitation payment), our IBNP liability at December 31, 2011, was $294.9 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of December 31, 2011 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding December 31, 2011, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ 119,317
(4%)	79,598
(2%)	39,799
2%	(39,799)
4%	(79,598)
6%	(119,317)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of December 31, 2011 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ (69,169)
(4%)	(46,113)
(2%)	(23,056)
2%	23,056
4%	46,113
6%	69,169

The following per-share amounts are based on a combined federal and state statutory tax rate of 37.5%, and 46.4 million diluted shares outstanding for the year ended December 31, 2011. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at December 31, 2011, net income for the year ended December 31, 2011 would increase or decrease by approximately $12.4 million, or $0.27 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at December 31, 2011, net income for the year ended December 31, 2011 would increase or decrease by approximately $7.2 million, or $0.16 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $62.2 million, or $1.34 per diluted share, and $36.0 million, or $0.78 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $12.4 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2011, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 14.6%.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2010 and 2011 were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

We recognized a benefit from prior period claims development in the amount of $51.8 million for the year ended December 31, 2011. This amount represents our estimate as of December 31, 2011 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2010 exceeded the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2010 was due primarily to the following factors:

- We overestimated the impact of a buildup in claims inventory in Ohio.
- We overestimated the impact of the settlement of disputed provider claims in California.
- We underestimated the reduction in outpatient facility claims costs as a result of a fee schedule reduction in New Mexico effective November 2010, partially offsetting the impact of the two items above.

We recognized a benefit from prior period claims development in the amount of $49.4 million for the year ended 2010. This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2009. The overestimation of claims liability at December 31, 2009 was the result of the following factors:

- In New Mexico, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- In California, we underestimated the extent to which various network restructuring, provider contracting, and medical management initiatives had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

In estimating our claims liability at December 31, 2011, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- The increasing amount of claims recoveries in Texas.
- Recent increases in inpatient utilization in Missouri, as well as a substantial increase in inpatient claims inventory.
- A significant reduction to our outstanding claims recoveries in Ohio.
- An increase to our ABD membership in California.
- Late enrollment of newborns, and hence late claims payments, in Michigan due to issues with the state’s administration system, which has disrupted the normal completion pattern for claims in that state.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2010 and 2011, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The negative amounts displayed for "Components of medical care costs related to: Prior year" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year ended December 31,	
	2011	2010
	(Dollars in thousands, except per-member amounts)	
Balances at beginning of period	$ 354,356	$ 315,316
Balance of acquired subsidiary	—	3,228
Components of medical care costs related to:		
Current year	3,911,803	3,420,235
Prior year	(51,809)	(49,378)
Total medical care costs	3,859,994	3,370,857
Payments for medical care costs related to:		
Current year	3,516,994	3,085,388
Prior year	294,880	249,657
Total paid	3,811,874	3,335,045
Balances at end of year	$ 402,476	$ 354,356
Benefit from prior years as a percentage of:		
Balance at beginning of year	14.6%	15.7%
Premium revenue	1.1%	1.2%
Total medical care costs	1.3%	1.5%

Billed charges of claims in inventory per member end of period	$ 122.33	$ 135.71
Number of claims received during the period	17,207,500	14,554,800
Billed charges of claims received during the period	$ 14,306,500	$ 11,686,100

(1) "Claims Data" for the year ended December 31, 2010 does not include our Wisconsin health plan acquired September 1, 2010.

Commitments and Contingencies

We are not an obligor to or guarantor of any indebtedness of any other party. We are not a party to off-balance sheet financing arrangements except for operating leases which are disclosed in Note 18 to the accompanying audited consolidated financial statements for the year ended December 31, 2011.

Contractual Obligations

In the table below, we present our contractual obligations as of December 31, 2011. Some of the amounts we have included in this table are based on management's estimates and assumptions about these obligations, including their duration, the possibility of renewal, anticipated actions by third parties, and other factors. Because these estimates and assumptions are necessarily subjective, the contractual obligations we will actually pay in future periods may vary from those reflected in the table. Amounts are in thousands.

	Total	2012	2013-2014	2015-2016	2017 and Beyond
Medical claims and benefits payable	$ 402,476	$ 402,476	$ —	$ —	$ —
Principal amount of long-term debt(1)	235,600	1,197	189,361	2,568	42,474
Operating leases	101,424	25,553	40,936	22,338	12,597
Interest on long-term debt	32,527	9,061	16,267	3,788	3,411
Purchase commitments	33,595	19,845	12,142	1,608	—
Total contractual obligations	$ 805,622	$ 458,132	$ 258,706	$ 30,302	$ 58,482

(1) Represents the principal amount due on our 3.75% Convertible Senior Notes due 2014, and our term loan due 2018.

As of December 31, 2011, we have recorded approximately $10.7 million of unrecognized tax benefits. The above table does not contain this amount because we cannot reasonably estimate when or if such amount may be settled. See Note 13 to the accompanying audited consolidated financial statements for the year ended December 31, 2011 for further information.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk***

Quantitative and Qualitative Disclosures About Market Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

MOLINA HEALTHCARE, INC.

Item 8. ***Financial Statements and Supplementary Data***

INDEX TO FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited the accompanying consolidated balance sheets of Molina Healthcare, Inc. (the Company) as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Molina Healthcare, Inc. at December 31, 2011 and 2010, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Molina Healthcare, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 29, 2012 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

(Decrease) increase in payable to seller	(1,952)	4,723	5,300
Net cash paid in business combinations	$ (84,253)	$ (130,743)	$ (11,294)

See accompanying notes.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. As of December 31, 2011, these health plans served approximately 1.7 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

On February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, our Missouri health plan's existing contract with the state will expire without renewal on June 30, 2012. In connection with this notification, we recorded a non-cash impairment charge of approximately $64.6 million, or $1.34 per diluted share. Most of the impairment charge is not tax deductible, resulting in a disproportionate impact to net income. For the year ended December 31, 2011, our Missouri health plan contributed premium revenue of $229.6 million, or 5% of total premium revenue, and comprised 79,000 members, or 4.7% of total Health Plans segment membership. For further discussion of the impairment charge, see Note 2, "Significant Accounting Policies."

Our Molina Medicaid Solutions segment, which we acquired during the second quarter of 2010, provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement Medicaid Management Information System, or MMIS, to another firm. Our revenue under the Louisiana MMIS contract from May 1, 2010, the date we acquired Molina Medicaid Solutions, through December 31, 2010, was approximately $32 million. For the year ended December 31, 2011, our revenue under the Louisiana MMIS contract was approximately $57 million. We expect that we will continue to perform under this contract through implementation and acceptance of the successor MMIS. Based upon our past experience and our knowledge of the Louisiana MMIS bid process, we believe that implementation and acceptance of the successor MMIS will not occur until 2014 at the earliest. Through implementation and acceptance of the successor MMIS we expect to recognize between $45 million and $50 million in revenue annually under our Louisiana MMIS contract.

Consolidation and Presentation

The consolidated financial statements include the accounts of Molina Healthcare, Inc. and all majority owned subsidiaries. See Note 18, "Commitments and Contingencies," for the discussion of a financing arrangement classified as a variable interest entity that is included in our consolidated financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated in consolidation. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Principal areas requiring the use of estimates include:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;

- The determination of medical claims and benefits payable of our Health Plans segment;
- The determination of allowances for uncollectible accounts;
- The valuation of certain investments;
- Settlements under risk or savings sharing programs;
- The assessment of deferred contract costs, deferred revenue, long-lived and intangible assets, and goodwill for impairment;
- The determination of professional and general liability claims, and reserves for potential absorption of claims unpaid by insolvent providers;
- The determination of reserves for the outcome of litigation;
- The determination of valuation allowances for deferred tax assets; and
- The determination of unrecognized tax benefits.

Adjustments and Reclassifications

We have adjusted all applicable share and per-share amounts to reflect the retroactive effects of the three-for-two stock split in the form of a stock dividend that was effective May 20, 2011.

We have reclassified certain prior year balance sheet amounts to conform to the 2011 presentation.

2. Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that are both readily convertible into known amounts of cash and have a maturity of three months or less on the date of purchase.

Investments

Our investments are principally held in debt securities, which are grouped into two separate categories for accounting and reporting purposes: available-for-sale securities, and held-to-maturity securities. Available-for-sale securities are recorded at fair value and unrealized gains and losses, if any, are recorded in stockholders' equity as other comprehensive income, net of applicable income taxes. Held-to-maturity securities are recorded at amortized cost, which approximates fair value, and unrealized holding gains or losses are not generally recognized. Realized gains and losses and unrealized losses judged to be other than temporary with respect to available-for-sale and held-to-maturity securities are included in the determination of net income. The cost of securities sold is determined using the specific-identification method, on an amortized cost basis.

Our investment policy requires that all of our investments have final maturities of five years or less (excluding auction rate and variable rate securities where interest rates may be periodically reset), and that the average maturity be two years or less. Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. Declines in interest rates over time will reduce our investment income.

In general, our available-for-sale securities are classified as current assets without regard to the securities' contractual maturity dates because they may be readily liquidated. Our auction rate securities are classified as non-current assets. For comprehensive discussions of the fair value and classification of our current and non-current investments, including auction rate securities, see Note 5, "Fair Value Measurements," Note 6, "Investments" and Note 10, "Restricted Investments."

Receivables

Receivables consist primarily of amounts due from the various states in which we operate, and are subject to potential retroactive adjustment. Because such receivables are readily determinable and our creditors are primarily state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. See Note 7, "Receivables." Additionally, we cede 100% of the financial responsibility for Medicare members covered by our Wisconsin health plan to third a party health reinsurer. In connection with the arrangement, as of December 31, 2011, we have recorded a receivable from the third party reinsurer of $3.0 million along with a corresponding current liability of $3.0 million.

Property, Equipment, and Capitalized Software

Property and equipment are stated at historical cost. Replacements and major improvements are capitalized, and repairs and maintenance are charged to expense as incurred. Furniture and equipment are generally depreciated using the straight-line method over estimated useful lives ranging from three to seven years. Software developed for internal use is capitalized. Software is generally amortized over its estimated useful life of three years. Leasehold improvements are amortized over the term of the lease, or over their useful lives from five to 10 years, whichever is shorter. Buildings are depreciated over their estimated useful lives of 25 to 31.5 years. See Note 8, "Property, Equipment, and Capitalized Software."

As discussed below, the costs associated with certain of our Molina Medicaid Solutions segment equipment and software are capitalized and recorded as deferred contract costs. Such costs are amortized on a straight-line basis over the shorter of the useful life or the contract period.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and Amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service Revenue;" and
- Amortization of capitalized software is recorded within the heading "Cost of Service Revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Year Ended December 31,		
	2011	2010	2009
	(Dollar amounts in thousands)		
Depreciation, and amortization of capitalized software	$ 30,864	$ 27,230	$ 25,172
Amortization of intangible assets	19,826	18,474	12,938
Depreciation and amortization reported as such in the consolidated statements of income	50,690	45,704	38,110
Amortization recorded as reduction of service revenue	6,822	8,316	—
Amortization of capitalized software recorded as cost of service revenue	16,871	6,745	—
Total	$ 74,383	$ 60,765	$ 38,110

Long-Lived Assets, including Intangible Assets

Long-lived assets comprise primarily property, equipment, capitalized software and intangible assets. Finite-lived, separately-identifiable intangible assets are acquired in business combinations and are assets that represent future expected benefits but lack physical substance (such as purchased contract rights and provider contracts). Intangible assets are initially recorded at their fair values and are then amortized on a straight-line basis over their expected useful lives, generally between one and 15 years.

Identifiable intangible assets associated with Molina Medicaid Solutions are classified as either contract backlog or customer relationships as follows:

- The contract backlog intangible asset comprises all contractual cash flows anticipated to be received during the remaining contracted period for each specific contract relating to work that was performed prior to the acquisition. Because each acquired contract constitutes a single revenue stream, amortization of the contract backlog intangible is recorded to contra-service revenue so that amortization is matched to any revenues associated with contract performance that occurred prior to the acquisition date. The contract backlog intangible asset is amortized on a straight-line basis for each specific contract over periods generally ranging from one to six years.

- The customer relationship intangible asset comprises all contractual cash flows that are anticipated to be received during the option periods of each specific contract as well as anticipated renewals of those contracts. The customer relationship intangible is amortized on a straight-line basis for each specific contract over periods generally ranging from four to nine years.

Our intangible assets are subject to impairment tests when events or circumstances indicate that a finite-lived intangible asset's (or asset group's) carrying value may not be recoverable. Consideration is given to a number of potential impairment indicators. For example, our health plan subsidiaries have generally been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that these contracts will continue to be renewed as in the case of our Missouri health plan, described below.

Following the identification of any potential impairment indicators, to determine whether an impairment exists, we would compare the carrying amount of a finite-lived intangible asset with the undiscounted cash flows that are expected to result from the use of the asset or related group of assets. If it is determined that the carrying amount of the asset is not recoverable, the amount by which the carrying value exceeds the estimated fair value is recorded as an impairment.

On February 17, 2012, we received notification that our Missouri health plan's existing contract with the state of Missouri will expire without renewal on June 30, 2012. In connection with this notification, we recorded a total non-cash impairment charge of $64.6 million in 2011, of which $6.1 million related to finite-lived intangible assets, and $58.5 million related to goodwill, discussed below. Because the existing contract expires without renewal on June 30, 2012, the impairment charge comprised substantially all intangible assets relating to contract rights and licenses, and provider networks recorded at the time of our acquisition of the Missouri health plan in 2007. As described in Note 19, "Segment Reporting," the Missouri health plan is a component of our Health Plans segment. No impairment charges relating to long-lived assets, including intangible assets, were recorded in the years ended December 31, 2010, and 2009.

Goodwill

Goodwill represents the amount of the purchase price in excess of the fair values assigned to the underlying identifiable net assets of acquired businesses. Goodwill is not amortized, but is subject to an annual impairment test. Tests are performed more frequently if events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying amount.

To determine whether goodwill is impaired, we perform an impairment test. We measure the fair values of our reporting units and compare them to their aggregate carrying values, including goodwill. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared to the carrying amount of goodwill to determine whether goodwill is impaired.

We estimate the fair values of our reporting units using discounted cash flows. To determine fair values, we must make assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value, and discount rates.

In connection with our Missouri health plan as described above, we recorded a non-cash impairment charge of $58.5 million in 2011. Because the existing contract expires without renewal on June 30, 2012, the impairment charge comprised all of the goodwill recorded at the time of our acquisition of the Missouri health plan in 2007. The goodwill impairment charge is not tax deductible. No impairment charges relating to goodwill were recorded in the years ended December 31, 2010, and 2009.

Restricted Investments

Restricted investments, which consist of certificates of deposit and treasury securities, are designated as held-to-maturity and are carried at amortized cost, which approximates market value. The use of these funds is limited to specific purposes as required by each state, or as protection against the insolvency of capitated providers. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. See Note 10, "Restricted Investments."

Receivable/Liability for Ceded Life and Annuity Contracts

We report a 100% ceded reinsurance arrangement for life insurance policies written and held by our wholly owned insurance subsidiary, Molina Healthcare Insurance Company, by recording a non-current receivable from the reinsurer with a corresponding non-current liability for ceded life and annuity contracts. See Note 22, "Subsequent Events."

Other Assets

Significant items included in other assets include deferred financing costs associated with our convertible senior notes and with our credit facility, certain investments held in connection with our employee deferred compensation program, and an investment in a vision services provider (see Note 17, "Related Party Transactions"). The deferred financing costs are being amortized on a straight-line basis over the seven-year term of the convertible senior notes and the five year term of the credit facility.

Delegated Provider Insolvency

Circumstances may arise where providers to whom we have delegated risk, due to insolvency or other circumstances, are unable to pay claims they have incurred with third parties in connection with referral services (including hospital inpatient services) provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability.

In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These reserves are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. Additionally, we have recorded liabilities for estimated losses arising from provider instability or insolvency in excess of provider funds on deposit with us. Such liabilities were not material at December 31, 2011, or December 31, 2010.

Premium Revenue

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. For the year ended December 31, 2011 we received approximately 94% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our contracts with state Medicaid agencies, Medicare and other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

The following table summarizes premium revenue by health plan for the periods indicated:

	Year Ended December 31,		
	2011	2010	2009
	(In thousands)		
California	$ 575,176	$ 506,871	$ 481,717
Florida	203,945	170,683	102,232
Michigan	662,127	630,134	557,421
Missouri	229,584	210,852	230,222
New Mexico	345,732	366,784	404,026
Ohio	988,896	860,324	803,521
Texas	409,295	188,716	134,860
Utah	287,290	258,076	207,297
Washington	823,323	758,849	726,137
Wisconsin(1)	69,596	30,033	—
Other	8,443	8,587	12,774
	$ 4,603,407	$ 3,989,909	$ 3,660,207

(1) We acquired the Wisconsin health plan on September 1, 2010.

For the year ended December 31, 2010, we received approximately 6% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn will lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

- *California Health Plan Medical Cost Floors (Minimums):* A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At December 31, 2011, we recorded a liability of $1.0 million under the terms of these contract provisions.
- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health:* A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs. At December 31, 2011, we had not recorded any liability under the terms of this contract provision since behavioral health expenses are not less than the contractual floor.
- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* A portion of premiums received by our New Mexico health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). The New Mexico health plan contract also contains certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At December 31, 2011, we had not recorded any liability under the terms of these contract provisions. In the fourth quarter of 2011, our New Mexico health

plan entered into a contract amendment that more closely aligns the calculation of revenue with the methodology adopted under the Affordable Care Act. The contract amendment changed the calculation of the amount of revenue that may be recognized relative to medical costs, and resulted in the recognition of approximately $5.6 million of premium revenue which all related to periods prior to 2011.

- *Texas Health Plan Profit Sharing:* Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. The rebates, if any, are calculated separately for the TANF/CHIP and ABD products. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had an aggregate liability of approximately $0.7 million accrued pursuant to our profit-sharing agreement with the state of Texas at December 31, 2011.

- *Medicare Revenue Risk Adjustment:* Based on member encounter data that we submit to CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a receivable of approximately $5.0 million for anticipated Medicare risk adjustment premiums at December 31, 2011.

Quality incentives that allow us to recognize incremental revenue if certain quality standards are met. These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. Effective February 1, 2010 through June 30, 2011, we are eligible to earn additional incremental revenue of up to 0.25% of our total premium if we meet certain pharmacy specific performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Under our contract with the state of Texas, incremental revenue of up to 1% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state. The time period for the assessment of these performance measures previously followed the state's fiscal year, but effective January 1, 2011, it follows the calendar year. The state of Texas has notified us that it has discontinued the program for the 2011 calendar year.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, effective beginning in 2011, up to 3.25% of the premium is withheld by the state. The withheld premiums can be earned by the health plan by meeting certain performance measures. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of December 31, 2011 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of December 31, 2011.

	Year Ended December 31, 2011				
	Maximum Available Quality Incentive Premium – Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized
	(In thousands)				
New Mexico	$ 2,271	$ 1,558	$ 378	$ 1,936	$ 345,732

	$ 10,740	$ 8,134	$ 766	$ 8,900	$ 1,342,407

Medical Care Costs

Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service:* Physician providers paid on a fee-for-service basis are paid according to a fee schedule set by the state or by our contracts with these providers. Most hospitals are paid on a fee-for-service basis in a variety of ways, including per diem amounts, diagnostic-related groups or DRGs, percent of billed charges, and case rates. As discussed below, we also pay a small portion of hospitals on a capitated basis. We also have stop-loss agreements with the hospitals with which we contract. Under all fee-for-service arrangements, we retain the financial responsibility for medical care provided. Expenses related to fee-for-service contracts are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit managers are included in fee-for-service costs.

- *Capitation:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation contracts, we typically pay a fixed per-member per-month, or PMPM, payment to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated contracts, we remain liable for the provision of certain health care services. Certain of our capitated contracts also contain incentive programs based on service delivery, quality of care, utilization management, and other criteria. Capitation payments are fixed

in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.

- *Pharmacy:* Pharmacy costs include all drug, injectibles, and immunization costs paid through our pharmacy benefit managers. As noted above, drugs and injectibles not paid through our pharmacy benefit managers are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.

- *Other:* Other medical care costs include medically related administrative costs, certain provider incentive costs, reinsurance cost, and other health care expense. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, disease management, 24-hour on-call nurses, and a portion of our information technology costs. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2011, 2010, and 2009, medically related administrative costs were approximately $102.3 million, $85.5 million, and $74.6 million, respectively.

The following table provides the details of our consolidated medical care costs for the periods indicated (dollars in thousands, except PMPM amounts):

	Year Ended December 31,								
	2011			2010			2009		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$ 2,764,309	$ 139.02	$ 71.6 %	$ 2,360,858	$ 128.73	$ 70.0 %	$ 2,077,489	$ 126.14	$ 65.4 %
Capitation	518,835	26.09	13.4	555,487	30.29	16.5	558,538	33.91	17.6
Pharmacy	418,007	21.02	10.8	325,935	17.77	9.7	414,785	25.18	13.1
Other	158,843	8.00	4.2	128,577	7.01	3.8	125,424	7.62	3.9
Total	$ 3,859,994	$ 194.13	$ 100.0 %	$ 3,370,857	$ 183.80	$ 100.0 %	$ 3,176,236	$ 192.85	$ 100.0 %

Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are “Incurred But Not Paid,” or IBNP. Our IBNP claims reserve, as reported in our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates. See Note 11, “Medical Claims and Benefits Payable.”

We report reinsurance premiums as medical care costs, while related reinsurance recoveries are reported as deductions from medical care costs. We limit our risk of catastrophic losses by maintaining high deductible reinsurance coverage. We do not consider this coverage to be material because the cost is not significant and the likelihood that coverage will apply is low.

Taxes Based on Premiums

Our California, Florida, Michigan, New Mexico, Ohio, Texas and Washington health plans are assessed a tax based on premium revenue collected. We report these taxes on a gross basis, included in premium tax expense.

Premium Deficiency Reserves on Loss Contracts

We assess the profitability of our contracts for providing medical care services to our members and identify those contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared to anticipated medical care costs, including the cost of processing claims. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. No such accrual was recorded as of December 31, 2011, or 2010.

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements under the scope of FASB Accounting Standards Codification Subtopic 605-25, *Revenue Recognition — Multiple–Element Arrangements,* and SEC Staff Accounting Bulletin Topic 13, *Revenue Recognition*.

Effective January 1, 2011, we adopted a new accounting standard that amends the guidance on the accounting for multiple-element arrangements. Pursuant to the new standard, each required deliverable is evaluated to determine whether it qualifies as a separate unit of accounting which is generally based on whether the deliverable has standalone value to the customer. In addition to standalone value, previous guidance also required objective and reliable evidence of fair value of a deliverable in order to treat the deliverable as a separate unit of accounting. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent. We have adopted this guidance on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Our adoption of this guidance has not impacted the timing or pattern of our revenue recognition in 2011. Also, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. For contracts entered into prior to January 1, 2011, objective and reliable evidence of fair value would be required, in addition to DDI standalone value which we do not have, in order to treat DDI as a separate unit of accounting. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the service provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, and because we are unable to determine a pattern of performance of services during the contract period, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. We began to recognize revenue associated with our Maine contract upon state acceptance in September 2010. In Idaho, we will begin recognition of revenue upon state acceptance.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs
- Employee costs incurred in performing transaction services
- Vendor costs incurred in performing transaction services
- Costs incurred in performing required monitoring of and reporting on contract performance
- Costs incurred in maintaining and processing member and provider eligibility
- Costs incurred in communicating with members and providers

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

We are currently deferring recognition of all revenue as well as all direct costs (to the extent that such costs are estimated to be recoverable) in Idaho until the MMIS in that state receives certification from CMS. For the year ended December 31, 2011, cost of service revenue includes $11.5 million of direct costs associated with the Idaho contract that would otherwise have been recorded as deferred contract costs. In assessing the recoverability of the deferred contract costs associated with the Idaho contract at December 31, 2011, we determined that these costs should be expensed as a period cost.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers. For further discussion and disclosure, see Note 13, “Income Taxes.”

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Funds Prime Series — Institutional Class, and the PFM Funds Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. As of December 31, 2011, and 2010, our investments with PFM totaled $209 million and $327 million, respectively. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our health plan subsidiaries operate.

Risks and Uncertainties

Our profitability depends in large part on our ability to accurately predict and effectively manage medical care costs. We continually review our medical costs in light of our underlying claims experience and revised actuarial data. However, several factors could adversely affect medical care costs. These factors, which include changes in health care practices, inflation, new technologies, major epidemics, natural disasters, and malpractice litigation, are beyond our control and may have an adverse effect on our ability to accurately predict and effectively control medical care costs. Costs in excess of those anticipated could have a material adverse effect on our financial condition, results of operations, or cash flows.

At December 31, 2011, we operated health plans in 10 states, primarily as a direct contractor with the states, and in Los Angeles County, California, as a subcontractor to another health plan holding a direct contract with the state. We are therefore dependent upon a small number of contracts to support our revenue. The loss of any one of those contracts could have a material adverse effect on our financial position, results of operations, or cash flows. Our ability to arrange for the provision of medical services to our members is dependent upon our ability to develop and maintain adequate provider networks. Our inability to develop or maintain such networks might, in certain circumstances, have a material adverse effect on our financial position, results of operations, or cash flows.

Recent Accounting Pronouncements

Goodwill Impairment Testing. The FASB issued the following guidance which modifies goodwill impairment testing.

- ASU No. 2011-08, Intangibles—Goodwill and Other (ASC Topic 350) — Testing Goodwill for Impairment, a consensus of the FASB Emerging Issues Task Force. This guidance allows an entity the option to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. Under that option, an entity would no longer be required to calculate the fair value of a reporting unit unless the entity determines, based on the qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. This guidance is effective for interim and annual goodwill impairment tests performed for fiscal years beginning after December 15, 2011. We do not expect the adoption of this guidance to impact our consolidated financial position, results of operations, or cash flows.

Presentation of Financial Statements. In June 2011, the FASB and International Accounting Standards Board, or IASB, issued the following guidance which modifies how other comprehensive income, or OCI, is reported under U.S. Generally Accepted Accounting Principles, or GAAP, and International Financial Reporting Standards, or IFRS.

- *ASU No. 2011-05, Comprehensive Income (ASC Topic 220) — Presentation of Comprehensive Income,* a consensus of the FASB Emerging Issues Task Force. This guidance eliminates the option to present components of OCI as part of the statement of changes to stockholders' equity. All filers are required to present all non-owner changes in stockholders' equity in a single statement of comprehensive income or in two separate but consecutive statements. This guidance is effective for interim and annual reporting beginning on or after December 15, 2011. We do not expect the adoption of this guidance to impact our consolidated financial position, results of operations or cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, or AICPA, and the Securities and Exchange Commission, or SEC, did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	December 31,		
	2011	2010	2009
	(In thousands)		
Shares outstanding at the beginning of the period	45,463	38,410	40,088
Weighted-average number of shares issued under equity offering	—	2,506	—
Weighted-average number of shares purchased	(160)	—	(1,482)
Weighted-average number of shares issued under employee stock plans	453	258	159
Denominator for basic earnings per share	45,756	41,174	38,765
Dilutive effect of employee stock options and stock grants(1)	669	457	211
Denominator for diluted earnings per share(2)	46,425	41,631	38,976

(1) Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the years ended December 31, 2011, 2010, and 2009 there were approximately 137,000, 478,000 and 620,000 antidilutive weighted options, respectively. Restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. For the years ended December 31, 2011, 2010, and 2009, anti-dilutive restricted shares were insignificant.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the years ended December 31, 2011, 2010, and 2009.

4. Business Combinations

Molina Center

On December 7, 2011, our wholly owned subsidiary Molina Center LLC closed on its acquisition of the 460,000 square foot office building located in Long Beach, California. The building, or Molina Center, consists of two conjoined fourteen-story office towers on approximately five acres of land. For the last several years we have leased approximately 155,000 square feet of the Molina Center for use as our corporate headquarters and also for use by our California health plan subsidiary. The final purchase price was $81 million, which amount was paid with a combination of cash on hand and bank financing under a term loan agreement (see Note 12, “Long-Term Debt”). This business combination included the acquisition of the business interests associated with the Molina Center, such as leases to third-party tenants in place as of the acquisition date, and the day-to-day management and operations of the Molina Center. We acquired this business primarily to facilitate space needs for the projected future growth of the Company.

We have recorded $0.5 million in rental income in 2011 since the acquisition date. We incurred approximately $2.3 million and $0.2 million in transaction costs relating to this acquisition in 2011 and 2010, respectively, recorded to general and administrative expenses. Additionally, we recorded $0.6 million in deferred loan costs that are being amortized over the seven-year term of the loan.

Recording of assets acquired: The transaction has been accounted for using the acquisition method of accounting which requires, among other things, that most assets acquired and liabilities assumed be recognized at their fair values as of the acquisition date. The following table summarizes the acquisition-date fair values of the assets acquired as of December 7, 2011 (in thousands):

Allocation of purchase price:	
Building and improvements	$ 43,116
Land	10,570
Identifiable intangible assets	28,990
	82,676
Less fair value of total consideration:	
Cash paid	32,400
Term loan	48,600
Gain on acquisition	$ 1,676

A single estimate of fair value results from a complex series of judgments about future events and uncertainties and relies heavily on estimates and assumptions. Results that differ from the estimates and judgments used to determine the estimated fair value assigned to each class of assets acquired, as well as asset lives, can materially impact our results of operations.

Building and improvements: The fair value of the building amounted to $42.9 million, and will be amortized over a remaining useful life of 25 years. The fair value of improvements amounted to $0.2 million, to be amortized over a remaining useful life of 5 years.

Identifiable intangible assets: The fair value of the identifiable intangible assets we acquired amounted to $29.0 million, and was attributable to the value assigned to in-place leases of the Molina Center as of the acquisition date. This intangible asset has a weighted average useful life of 6.4 years. Accumulated amortization was approximately $0.4 million as of December 31, 2011, which reflects total amortization recorded since the acquisition date. For identifiable intangible assets recorded as of December 31, 2011, we expect to record amortization in future years as follows — 2012: $5.7 million, 2013: $5.6 million, 2014: $3.8 million, 2015: $3.5 million, and 2016: $3.1 million.

Gain on acquisition: In this acquisition, the fair value of the assets acquired exceeded the fair value of the total consideration paid by $1.7 million, resulting in a bargain purchase gain. This gain was recorded to general and administrative expenses in the accompanying consolidated income statement.

Wisconsin Health Plan

On September 1, 2010, we acquired 100% of the voting equity interests in Avatar Partners, LLC, which was the sole shareholder of Abri Health Plan, Inc., a Medicaid managed care organization based in Milwaukee, Wisconsin. Based on the final membership reconciliation performed in the first quarter of 2011, the final purchase price increased to $16.8 million as of December 31, 2011, from $15.5 million as of December 31, 2010. The $1.3 million increase was recorded to goodwill in 2011.

Additionally, we recorded a $2.8 million liability for contingent consideration in December 2010, based on an estimate of the Wisconsin health plan's minimum surplus requirements as of February 1, 2011. This liability was measured at fair value on a recurring basis using significant unobservable inputs, or Level 3 in the fair value measurement hierarchy. In 2011, we determined that there was no liability for contingent consideration. The following table presents a roll forward of this liability for 2011:

	Fair Value Hierarchy Level 3 (In thousands)
Balance at December 31, 2010	$ (2,800)
Total gains included in earnings	2,800
Balance at December 31, 2011	$ —

Molina Medicaid Solutions

On May 1, 2010, we acquired Molina Medicaid Solutions, previously an operating unit of Unisys Corporation for a purchase price of $131.3 million. Molina Medicaid Solutions provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems. In the first quarter of 2011, we recorded a $1.0 million reduction to goodwill to adjust certain acquisition date accruals as a result of information obtained regarding facts and circumstances that existed as of the acquisition date.

Florida Health Plan

On December 31, 2009, we acquired 100% of the voting equity interests in Florida NetPASS, LLC, or NetPASS. The final purchase price for this acquisition totalled $29.6 million. In 2010 we entered into arbitration with the sellers of NetPASS regarding certain alleged breaches of contract. That arbitration was settled prior to final hearing in December 2011 for $4.1 million paid to the sellers. This amount is recorded to general and administrative expenses in the accompanying consolidated income statements.

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For a comprehensive discussion of fair value measurements with regard to our current and non-current investments, see below.

As described in Note 12, “Long-Term Debt,” the carrying amount of the convertible senior notes was $169.5 million and $164.0 million as of December 31, 2011 and 2010, respectively. Based on quoted market prices, the fair value of the convertible senior notes was approximately $192.0 million and $188.4 million as of December 31, 2011 and 2010, respectively. The carrying value of the term loan approximates fair value because of the short period of time between the loan origination date of December 7, 2011 and December 31, 2011.

To prioritize the inputs we use in measuring fair value, we apply a three-tier fair value hierarchy as follows:

- *Level 1 — Observable inputs such as quoted prices in active markets:* Our Level 1 securities consist of government-sponsored enterprise securities (GSEs) and U.S. treasury notes. Level 1 securities are classified as current investments in the accompanying consolidated balance sheets. These securities are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

- *Level 2 — Inputs other than quoted prices in active markets that are either directly or indirectly observable:* Our Level 2 securities consist of corporate debt securities, municipal securities, and certificates of deposit, and are classified as current investments in the accompanying consolidated balance sheets. Our investments in securities classified as Level 2 are traded frequently though not necessarily daily. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

- *Level 3 — Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions:* We hold investments in auction rate securities which are designated as available-for-sale, and are reported at fair value of $16.1 million (par value of $19.0 million) as of December 31, 2011. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government. We continued to earn interest on substantially all of these auction rate securities as of December 31, 2011. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008. As such, quoted prices in active markets were not readily available during the majority of 2008, 2009, and 2010, and continued to be unavailable as of December 31, 2011. To estimate the fair value of these securities, we used pricing models that included factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. The estimated values of these securities were also compared, when possible, to valuation data with respect to similar securities held by other parties. We concluded that these estimates, given the lack of market available pricing, provided a reasonable basis for determining the fair value of the auction rate securities as of December 31, 2011. For our investments in auction rate securities, we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost.

As a result of changes in the fair value of auction rate securities designated as available-for-sale, we recorded pretax unrealized gains of $1.2 million and pretax unrealized losses of $0.2 million to accumulated other comprehensive loss for the year ended December 31, 2011, and 2010, respectively. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income (loss). If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

Until July 2, 2010, we held certain auction rate securities (designated as trading securities) with an investment securities firm. In 2008, we entered into a rights agreement with this firm that (1) allowed us to exercise rights (the "Rights") to sell the eligible auction rate securities at par value to this firm between June 30, 2010 and July 2, 2012, and (2) gave the investment securities firm the right to purchase the auction rate securities from us any time after the agreement date as long as we received the par value. On June 30, 2010, and July 1, 2010, all of the eligible auction rate securities remaining at that time were settled at par value. During 2010, the aggregate auction rate securities (designated as trading securities) settled amounted to $40.9 million par value (fair value $36.7 million). Substantially all of the difference between par value and fair value on these securities was recovered through the rights agreement. For the year ended December 31, 2010, we recorded pretax gains of $4.2 million on the auction rate securities underlying the Rights.

We accounted for the Rights as a freestanding financial instrument and, until July 2, 2010, recorded the value of the Rights under the fair value option. For the year ended December 31, 2010, we recorded pretax losses of $3.8 million on the Rights, attributable to the decline in the fair value of the Rights. When the remaining eligible auction rate securities were sold at par value on July 1, 2010, the value of the Rights was zero.

Our assets measured at fair value on a recurring basis at December 31, 2011, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 231,634	$ —	$ 231,634	$ —
Government-sponsored enterprise securities (GSEs)	33,949	33,949	—	—
Municipal securities	47,313	—	47,313	—
U.S. treasury notes	21,748	21,748	—	—
Auction rate securities	16,134	—	—	16,134
Certificates of deposit	2,272	—	2,272	—
	$ 353,050	$ 55,697	$ 281,219	$ 16,134

Our assets measured at fair value on a recurring basis at December 31, 2010, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 177,929	$ —	$ 177,929	$ —
Government-sponsored enterprise securities (GSEs)	59,713	59,713	—	—
Municipal securities	30,563	—	30,563	—
U.S. treasury notes	23,918	23,918	—	—
Auction rate securities	20,449	—	—	20,449
Certificates of deposit	3,252	—	3,252	—
	$ 315,824	$ 83,631	$ 211,744	$ 20,449

In prior periods we reported our investments in corporate debt securities, municipal securities and certificates of deposit in Level 1. As a result of analysis of the characteristics of our financial instruments in 2011, we have determined that these investments should be reported in Level 2, and have reclassified the tabular disclosure accordingly.

The following table presents our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3) (In thousands)
Balance at December 31, 2010	$ 20,449
Total gains (unrealized only):	
Included in other comprehensive income	1,235
Settlements	(5,550)
Balance at December 31, 2011	$ 16,134
The amount of total unrealized gains for the period included in other comprehensive income attributable to the change in accumulated other comprehensive losses relating to assets still held at December 31, 2011	$ 483

Our assets measured at fair value on a non-recurring basis in 2011, consisted of the goodwill and intangible assets associated with the acquisition of our Missouri health plan in 2007. As described in Note 1, "Basis of Presentation – Organization and Operations" we recorded a non-cash impairment charge of $64.6 million related to the loss of our Missouri health plan's existing contract with the state of Missouri. To arrive at this impairment charge, we conducted fair value measurements of the goodwill and intangible assets of our Missouri health plan. We used Level 3 inputs in applying an income approach to determining the fair value of these assets.

6. Investments

The following tables summarize our investments as of the dates indicated:

	December 31, 2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 231,407	$ 442	$ 215	$ 231,634
GSEs	33,912	46	9	33,949
Municipal securities	47,099	232	18	47,313
U.S. treasury notes	21,627	121	—	21,748
Auction rate securities	19,000	—	2,866	16,134
Certificates of deposit	2,272	—	—	2,272
	$ 355,317	$ 841	$ 3,108	$ 353,050

	December 31, 2010			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 177,692	$ 419	$ 182	$ 177,929
GSEs	59,386	353	26	59,713
Municipal securities	30,483	111	31	30,563
U.S. treasury notes	23,836	118	36	23,918
Auction rate securities	24,550	—	4,101	20,449
Certificates of deposit	3,252	—	—	3,252
	$ 319,199	$ 1,001	$ 4,376	$ 315,824

The contractual maturities of our investments as of December 31, 2011 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 183,607	$ 183,775
Due one year through five years	153,210	153,573
Due after ten years	18,500	15,702
	$ 355,317	$ 353,050

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales and maturities of available-for-sale securities were $302.7 million, $182.3 million, and $201.9 million for the year ended December 31, 2011, 2010, and 2009, respectively. Net realized investment gains for the year ended December 31, 2011, 2010, and 2009 were $367,000, $110,000, and $267,000, respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities, we have determined that unrealized gains and losses at December 31, 2011, and 2010, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

As described in Note 5, "Fair Value Measurements," the unrealized losses on our auction rate securities were caused primarily by the illiquidity in the auction markets. Because the decline in market value is not due to the credit quality of the issuers, and because we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost, we do not consider the auction rate securities that are designated as available-for-sale to be other-than-temporarily impaired at December 31, 2011.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2011.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Corporate debt securities	$ 72,766	$ 215	$ —	$ —	$ 72,766	$ 215
GSEs	11,493	9	—	—	11,493	9
Municipal securities	12,033	18	—	—	12,033	18
Auction rate securities	—	—	16,134	2,866	16,134	2,866
	$ 96,292	$ 242	$ 16,134	$ 2,866	$ 112,426	$ 3,108

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2010.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Corporate debt securities	$ 55,578	$ 167	$ 1,848	$ 14	$ 57,426	$ 181
GSEs	7,244	26	—	—	7,244	26
Municipal securities	12,629	31	—	—	12,629	31
Auction rate securities	—	—	20,449	4,101	20,449	4,101
U.S. treasury notes	3,414	37	—	—	3,414	37
	$ 78,865	$ 261	$ 22,297	$ 4,115	$ 101,162	$ 4,376

7. Receivables

Health Plans segment receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustment. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable were as follows:

	December 31,	
	2011	2010
	(In thousands)	
Health Plans segment:		
California	$ 22,175	$ 46,482
Michigan	8,864	13,596
Missouri	27,092	22,841
New Mexico	9,350	18,310
Ohio	27,458	21,622
Texas	1,608	1,221
Utah	2,825	1,589
Washington	15,006	14,486
Wisconsin	4,909	5,437
Others	2,489	2,377
Total Health Plans segment	121,776	147,961
Molina Medicaid Solutions segment	46,122	20,229
	$ 167,898	$ 168,190

During the second quarter of 2011, we settled certain claims we had made against the state of Utah regarding the savings share provision of our contract in effect from 2003 through June of 2009. Additionally, we recognized a liability for certain overpayments received from the state for the period 2003 through 2009. As a result of these developments, we recognized $6.9 million in premium revenue without any corresponding charge to expense during the second quarter of 2011.

8. Property, Equipment, and Capitalized Software

A summary of property and equipment is as follows:

	December 31,	
	2011	2010
	(In thousands)	
Land	$ 14,094	$ 3,524
Building and improvements	109,789	49,735
Furniture and equipment	79,112	60,074
Capitalized software	116,389	90,003
	319,384	203,336
Less: accumulated depreciation and amortization on building and improvements, furniture and equipment	(65,518)	(54,341)
Less: accumulated amortization for capitalized software	(62,932)	(48,458)
	(128,450)	(102,799)
Property, equipment, and capitalized software, net	$ 190,934	$ 100,537

Depreciation recognized for building and improvements, and furniture and equipment was $17.5 million, $13.9 million, and $11.0 million for the years ended December 31, 2011, 2010 and 2009, respectively. Amortization of capitalized software was $30.2 million, $20.1 million, and $14.2 million for the years ended December 31, 2011, 2010 and 2009, respectively.

Molina Center

As described in Note 4, "Business Combinations," we acquired the Molina Center in December 2011. As of December 31, 2011, the carrying amount of the building was $42.9 million, and accumulated depreciation was insignificant. Future minimum rentals on noncancelable leases are as follows:

	(In thousands)
2012	$ 5,943
2013	6,053
2014	4,395
2015	4,545
2016	4,749
Thereafter	32,310
Total minimum future rentals	$ 57,995

9. Goodwill and Intangible Assets

Other intangible assets are amortized over their useful lives ranging from one to 15 years. The weighted average amortization period for contract rights and licenses is approximately 10 years, for customer relationships is approximately 5 years, for backlog is approximately 2 years, and for provider networks is approximately 10 years. Based on the balances of our identifiable intangible assets as of December 31, 2011, we estimate that our intangible asset amortization will be $22.2 million in 2012, $21.6 million in 2013, $16.9 million in 2014, $9.7 million in 2015, and $8.8 million in 2016. The following table provides the details of identified intangible assets, by major class, for the periods indicated. As described in Note 2, "Significant Accounting Policies," we recorded impairment charges to goodwill and intangible assets amounting to $58.5 million and $6.1 million, respectively, for the year ended December 31, 2011. For a description of our goodwill and intangible assets by reportable segment, refer to Note 19, "Segment Reporting."

	Cost	Accumulated Amortization	Net Balance
		(In thousands)	
Intangible assets:			
Contract rights and licenses	$ 140,242	$ 69,515	$ 70,727
Customer relationships	24,550	8,546	16,004
Contract backlog	23,600	15,139	8,461
Provider networks	11,990	5,386	6,604
Balance at December 31, 2011	$ 200,382	$ 98,586	$ 101,796
Intangible assets:			
Contract rights and licenses	$ 121,017	$ 64,201	$ 56,816
Customer relationships	24,550	3,418	21,132
Contract backlog	23,600	8,316	15,284
Provider networks	18,525	6,257	12,268
Balance at December 31, 2010	$ 187,692	$ 82,192	$ 105,500

The changes in the carrying amount of goodwill and indefinite-lived intangible assets were as follows (in thousands):

Balance as of December 31, 2010	$ 212,228
Impairment of Missouri health plan goodwill	(58,530)
Goodwill adjustments relating to the acquisitions of Molina Medicaid Solutions and the Wisconsin health plan	256
Balance at December 31, 2011	$ 153,954

10. Restricted Investments

Pursuant to the regulations governing our health plan subsidiaries, we maintain statutory deposits and deposits required by state Medicaid authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of certain capitated providers. The following table presents the balances of restricted investments by health plan, and for our insurance company:

	December 31,	
	2011	2010
	(In thousands)	
California	$ 372	$ 372
Florida	5,198	4,508
Insurance Company	4,711	4,689
Michigan	1,000	1,000
Missouri	504	508
New Mexico	15,905	15,881
Ohio	9,078	9,066
Texas	3,518	3,501
Utah	2,895	1,279
Washington	151	151
Wisconsin	—	260
Other	2,832	885
	$ 46,164	$ 42,100

The contractual maturities of our held-to-maturity restricted investments as of December 31, 2011 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 36,900	$ 36,909
Due one year through five years	9,264	9,307
	$ 46,164	$ 46,216

11. Medical Claims and Benefits Payable

The following table presents the components of the change in our medical claims and benefits payable for the years ended December 31, 2011 and 2010. The negative amounts displayed for "Components of medical care costs related to: Prior years" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year Ended December 31,	
	2011	2010
	(Dollars in thousands, except per-member amounts)	
Balances at beginning of year	$ 354,356	$ 315,316
Balance of acquired subsidiary	—	3,228
Components of medical care costs related to:		
Current year	3,911,803	3,420,235
Prior years	(51,809)	(49,378)
Total medical care costs	3,859,994	3,370,857
Payments for medical care costs related to:		
Current year	3,516,994	3,085,388
Prior years	294,880	249,657
Total paid	3,811,874	3,335,045
Balances at end of year	$ 402,476	$ 354,356
Benefit from prior years as a percentage of:		
Balance at beginning of year	14.6%	15.7%
Premium revenue	1.1%	1.2%
Total medical care costs	1.3%	1.5%

We recognized a benefit from prior period claims development in the amount of $51.8 million for the year ended December 31, 2011. This amount represents our estimate as of December 31, 2011 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2010 exceeded the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2010 was due primarily to the following factors:

- We overestimated the impact of a buildup in claims inventory in Ohio.
- We overestimated the impact of the settlement of disputed provider claims in California.
- We underestimated the reduction in outpatient facility claims costs as a result of a fee schedule reduction in New Mexico effective November 2010, partially offsetting the impact of the two items above.

We recognized a benefit from prior period claims development in the amount of $49.4 million for the year ended 2010. This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2009. The overestimation of claims liability at December 31, 2009 was the result of the following factors:

- In New Mexico, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- In California, we underestimated the extent to which various network restructuring, provider contracting, and medical management initiatives had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

In estimating our claims liability at December 31, 2011, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- The increasing amount of claims recoveries in Texas.
- Recent increases in inpatient utilization in Missouri, as well as a substantial increase in inpatient claims inventory.
- A significant reduction to our outstanding claims recoveries in Ohio.
- An increase to our aged blind and disabled membership in California.
- Late enrollment of newborns, and hence late claims payments, in Michigan due to issues with the State’s administration system, which has disrupted the normal completion pattern for claims in that state.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2010 and 2011, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

12. Long-Term Debt

Maturities of long-term debt for the years ending December 31 are as follows:

	Total	2012	2013	2014	2015	2016	Thereafter
Convertible senior notes	$ 187,000	$ —	$ —	$ 187,000	$ —	$ —	$ —
Term loan	48,600	1,197	1,155	1,206	1,259	1,309	42,474
	$ 235,600	$ 1,197	$ 1,155	$ 188,206	$ 1,259	$ 1,309	$ 42,474

Credit Facility

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility (the "Credit Facility") with various lenders and U.S. Bank National Association, as LC Issuer, Swing Line Lender, and Administrative Agent. The Credit Facility will be used for general corporate purposes.

The Credit Facility has a term of five years under which all amounts outstanding will be due and payable on September 9, 2016. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $195 million. As of December 31, 2011 there was no outstanding principal balance under the Credit Facility. However, as of December 31, 2011, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, which reduces the amount available under the Credit Facility.

Borrowings under the Credit Facility will bear interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility. The initial commitment fee shall be set at 0.35% until our delivery of its financials for the year ended December 31, 2011. The applicable margins range between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan).

The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 as of the end of each fiscal quarter and a fixed charge coverage ratio of not less than 1.75 to 1.00. At December 31, 2011, we were in compliance with all financial covenants under the Credit Facility.

In the event of a default, including cross-defaults relating to specified other debt in excess of $20 million, the lenders may terminate the commitments under the Credit Facility and declare the amounts outstanding, including all accrued interest and unpaid fees, payable immediately. In addition, the lenders may enforce any and all rights and remedies created under the Credit Facility or applicable law.

In connection with our entrance into the Credit Facility, on September 9, 2011, we terminated our existing credit agreement with Bank of America, dated March 9, 2005, as amended to date, which had provided us with a $150 million revolving credit facility. As of December 31, 2011 and December 31, 2010, there was no outstanding principal balance under this credit agreement.

Term Loan

On December 7, 2011, our wholly owned subsidiary Molina Center LLC entered into a Term Loan Agreement, dated as of December 1, 2011, with various lenders and East West Bank, as Administrative Agent (the "Administrative Agent"). Pursuant to the terms of the Term Loan Agreement, Molina Center LLC borrowed the aggregate principal amount of $48.6 million to finance a portion of the $81 million purchase price for the acquisition of the approximately 460,000 square foot office building, or Molina Center, located in Long Beach, California.

The outstanding principal amount under the Term Loan Agreement bears interest at the rate of 4.25% per annum from the date of the closing of the loan through December 31, 2011, and at the Eurodollar rate for each Interest Period (as defined below) commencing January 1, 2012. The Eurodollar rate is a per annum rate of interest equal to the greater of (a) the rate that is published in the Wall Street Journal as the London interbank offered rate for deposits in United States dollars, for a period of one month, two business days prior to the commencement of an Interest Period, multiplied by a statutory reserve rate established by the Board of Governors of the Federal Reserve System, or (b) 4.25%. The loan matures on November 30, 2018, and is subject to a 25-year amortization schedule that commences on January 1, 2012.

The Term Loan Agreement contains customary representations, warranties, and financial covenants. In the event of a default as described in the Term Loan Agreement, the outstanding principal amount under the Term Loan Agreement will bear interest at a rate 5.00% per annum higher than the otherwise applicable rate. We have agreed to pay to the Administrative Agent a loan fee in the amount of $486,000 and an agency fee of $50,000. All amounts due under the Term Loan Agreement and related loan documents are secured by a security interest in the Molina Center in favor of and for the benefit of the Administrative Agent and the other lenders under the Term Loan Agreement.

Convertible Senior Notes

As of December 31, 2011, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances. Prior to July 2014, holders may convert their Notes only under the following circumstances:

- During any fiscal quarter after our fiscal quarter ending December 31, 2007, if the closing sale price per share of our common stock, for each of at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, is greater than or equal to 120% of the conversion price per share of our common stock;
- During the five business day period immediately following any five consecutive trading day period in which the trading price per one thousand dollar principal amount of the Notes for each trading day of such period was less than 98% of the product of the closing price per share of our common stock on such day and the conversion rate in effect on such day; or
- Upon the occurrence of specified corporate transactions or other specified events.

On or after July 1, 2014, holders may convert their Notes at any time prior to the close of business on the scheduled trading day immediately preceding the stated maturity date regardless of whether any of the foregoing conditions is satisfied.

We will deliver cash and shares of our common stock, if any, upon conversion of each $1,000 principal amount of Notes, as follows:

- An amount in cash (the "principal return") equal to the sum of, for each of the 20 Volume-Weighted Average Price (VWAP) trading days during the conversion period, the lesser of the daily conversion value for such VWAP trading day and fifty dollars (representing 1/20th of one thousand dollars); and
- A number of shares based upon, for each of the 20 VWAP trading days during the conversion period, any excess of the daily conversion value above fifty dollars.

The proceeds from the issuance of the Notes have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of December 31, 2011, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 33 months. The Notes' if-converted value did not exceed their principal amount as of December 31, 2011. At December 31, 2011, the equity component of the Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	December 31,	
	2011	2010
	(In thousands)	
Details of the liability component:		
Principal amount	$ 187,000	$ 187,000
Unamortized discount	(17,474)	(22,986)
Net carrying amount	$ 169,526	$ 164,014

	Years Ended December 31,		
	2011	2010	2009
	(in thousands)		
Interest cost recognized for the period relating to the:			
Contractual interest coupon rate of 3.75%	$ 7,012	$ 7,012	$ 7,076
Amortization of the discount on the liability component	5,512	5,114	4,782
Total interest cost recognized	$ 12,524	$ 12,126	$ 11,858

13. Income Taxes

The provision for income taxes consisted of the following:

	Years Ended December 31,		
	2011	2010	2009
	(in thousands)		
Current:			
Federal	$ 28,336	$ 36,395	$ 9,421
State	1,639	2,144	(1,558)
Total current	29,975	38,539	7,863
Deferred:			
Federal	14,028	(4,717)	1,924
State	(167)	700	(2,498)
Total deferred	13,861	(4,017)	(574)
Total provision for income taxes	$ 43,836	$ 34,522	$ 7,289

A reconciliation of the effective income tax rate to the statutory federal income tax rate is as follows:

	Years Ended December 31,		
	2011	2010	2009
	(in thousands)		
Taxes on income at statutory federal tax rate (35)%	$ 22,630	$ 31,323	$ 13,355
State income taxes, net of federal benefit	957	1,849	(2,637)
Benefit for unrecognized tax benefits	(396)	(57)	(3,315)
Nondeductible goodwill	20,485	—	—
Other	160	1,407	(114)
Reported income tax expense	43,836	34,522	7,289

Our effective tax rate is based on expected income, statutory tax rates, and tax planning opportunities available to us in the various jurisdictions in which we operate. Significant management estimates and judgments are required in determining our effective tax rate. We are routinely under audit by federal, state, or local authorities regarding the timing and amount of deductions, nexus of income among various tax jurisdictions, and compliance with federal, state, and local tax laws. We have pursued various strategies to reduce our federal, state and local taxes. As a result, we have reduced our state income tax expense due to California enterprise zone credits.

During 2011, excess tax benefits from shared-based compensation were $937,000. This amount was recorded as a decrease to income taxes payable and an increase to additional paid-in capital. During 2010 and 2009, tax-related deficiencies on share-based compensation were $673,000 and $718,000, respectively. Such amounts were recorded as adjustments to income taxes payable with a corresponding decrease to additional paid-in capital.

Deferred tax assets and liabilities are classified as current or non-current according to the classification of the related asset or liability. Significant components of our deferred tax assets and liabilities as of December 31, 2011 and 2010 were as follows:

	December 31,	
	2011	2010
	(in thousands)	
Accrued expenses	$ 14,541	$ 12,618
Reserve liabilities	1,292	877
State taxes	(396)	(120)
Other accrued medical costs	2,051	2,126
Net operating losses	27	27
Unrealized gains	(316)	(254)
Unearned premiums	4,139	3,517
Prepaid expenses	(3,032)	(3,006)
Other, net	21	(69)
Deferred tax asset, net of valuation allowance — current	18,327	15,716
Accrued expenses	223	791
Reserve liabilities	3,015	3,071
State tax credit carryover	2,609	1,960
Net operating losses	2,694	1,362
Unrealized losses	1,176	1,559
Depreciation and amortization	(39,939)	(20,110)
Deferred compensation	7,904	6,829
Debt basis	(7,604)	(9,673)
Other, net	(278)	(830)
Valuation allowance	(2,927)	(1,194)
Deferred tax liability, net of valuation allowance — long term	(33,127)	(16,235)
Net deferred income tax liability	$ (14,800)	$ (519)

At December 31, 2011, we had federal and state net operating loss carryforwards of $397,000 and $57 million, respectively. The federal net operating loss begins expiring in 2018, and state net operating losses begin expiring in 2013. The utilization of the net operating losses is subject to certain limitations under federal law.

At December 31, 2011, we had California enterprise zone tax credit carryovers of $4 million which do not expire.

We evaluate the need for a valuation allowance taking into consideration the ability to carry back and carry forward tax credits and losses, available tax planning strategies and future income, including reversal of temporary differences. We have determined that as of December 31, 2011, $2.9 million of deferred tax assets did not satisfy the recognition criteria due to uncertainty regarding the realization of some of our state tax operating loss carryforwards. We increased our valuation allowance $1.7 million from $1.2 million at December 31, 2010 to $2.9 million as of December 31, 2011.

We recognize tax benefits only if the tax position is more likely than not to be sustained. We are subject to income taxes in the U.S. and numerous state jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax

determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. These reserves are established when we believe that certain positions might be challenged despite our belief that our tax return positions are fully supportable. We adjust these reserves in light of changing facts and circumstances, such as the outcome of tax audits. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate.

The rollforward of our unrecognized tax benefits is as follows:

	Years Ended December 31,		
	2011	2010	2009
	(in thousands)		
Gross unrecognized tax benefits at beginning of period	$ (10,962)	$ (4,128)	$ (11,676)
Increases in tax positions for prior years	(137)	(6,891)	(3,748)
Decreases in tax positions for prior years	—	—	6,804
Settlements	—	—	4,355
Lapse in statute of limitations	387	57	137
Gross unrecognized tax benefits at end of period	$ (10,712)	$ (10,962)	$ (4,128)

As of December 31, 2011, we had $10.7 million of unrecognized tax benefits of which $7.4 million, if fully recognized, would affect our effective tax rate. Approximately $8.4 million of the unrecognized tax benefits recorded at December 31, 2011 relate to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $8.9 million due the resolution to the state refund claim as well as the normal expiration of statute of limitations.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of December 31, 2011, December 31, 2010, and December 31, 2009, we had accrued $65,000, $82,000, and $75,000, respectively, for the payment of interest and penalties.

We may be subject to examination by the Internal Revenue Service (“IRS”) for calendar years 2008 through 2011. We are under examination, or may be subject to examination, in certain state and local jurisdictions, with the major jurisdictions being California, Missouri, and Michigan, for the years 2004 through 2011. Our subsidiary, HCLB, entered into a closing agreement with the IRS in December 2009 that successfully concluded with certainty the IRS examination of HCLB for the year ended May 2006.

14. Stockholders’ Equity

Securities Repurchase Program. Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see Note 12, “Long-Term Debt”). The repurchase program will be funded with working capital or the Company’s credit facility, and repurchases may be made from time to time on the open market or through privately negotiated transactions. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time. No securities were purchased under this program in 2011.

In late July 2011, our board of directors approved a stock repurchase program of up to $7.0 million, to be used to purchase shares of our common stock under a Rule 10b5-1 trading plan. Under this program, we purchased approximately 400,000 shares of our common stock for $7 million (average cost of approximately $17.47 per share) during August 2011. These purchases did not materially impact diluted earnings per share for the year ended December 31, 2011. Subsequently, we retired the $7.0 million of treasury shares purchased, which reduced additional paid-in capital as of December 31, 2011.

Stock Split. On April 27, 2011, we announced that our board of directors authorized a 3-for-2 stock split of our common stock to be effected in the form of a stock dividend of one share of our stock for every two shares outstanding. The dividend was distributed on May 20, 2011.

Stock Plans. In connection with the plans described in Note 16, “Share-Based Compensation,” we issued approximately 752,000 shares of common stock, net of shares used to settle employees’ income tax obligations, for the year ended December 31, 2011. Stock plan activity resulted in a $21.4 million increase to additional paid-in capital for the same period.

15. Employee Benefits

We sponsor a defined contribution 401(k) plan that covers substantially all full-time salaried and hourly employees of our company and its subsidiaries. Eligible employees are permitted to contribute up to the maximum amount allowed by law. We match up to the first 4% of compensation contributed by employees. Expense recognized in connection with our contributions to the 401(k) plan totaled $8.5 million, $5.9 million and $4.7 million in the years ended December 31, 2011, 2010, and 2009, respectively.

We also have a nonqualified deferred compensation plan for certain key employees. Under this plan, eligible participants may defer up to 100% of their base salary and 100% of their bonus to provide tax-deferred growth for retirement. The funds deferred are invested in corporate-owned life insurance, under a rabbi trust.

16. Share-Based Compensation

In 2011, we adopted the 2011 Equity Incentive Plan (the "2011 Plan") , which provides for the award of stock options, restricted stock, performance shares, and stock bonuses to the company's officers, employees, directors, consultants, advisors, and other service providers. The 2011 Plan allows for the issuance of 4.5 million shares of common stock.

At December 31, 2011, we had employee equity incentives outstanding under three plans: (1) the 2011 Plan; (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded); and (3) the 2000 Omnibus Stock and Incentive Plan (from which equity incentives are no longer awarded). On March 1, 2011, our chief executive officer, chief financial officer, and chief operating officer were awarded 150,000 shares, 112,500 shares, and 27,000 shares, respectively, of restricted stock with performance and service conditions. Each of the grants shall vest on March 1, 2012, provided that: (i) the Company's total operating revenue for 2011 is equal to or greater than $3.7 billion, and (ii) the respective officer continues to be employed by the Company as of March 1, 2012. In the event both vesting conditions are not achieved, the equity compensation awards shall lapse. As of December 31, 2011, we expect these awards to vest in full.

Restricted stock awards are granted with a fair value equal to the market price of our common stock on the date of grant, and generally vest in equal annual installments over periods up to four years from the date of grant. Stock option awards have an exercise price equal to the fair market value of our common stock on the date of grant, generally vest in equal annual installments over periods up to four years from the date of grant, and have a maximum term of ten years from the date of grant.

Under our employee stock purchase plan (the "ESPP"), eligible employees may purchase common shares at 85% of the lower of the fair market value of our common stock on either the first or last trading day of each six-month offering period. Each participant is limited to a maximum purchase of $25,000 (as measured by the fair value of the stock acquired) per year through payroll deductions. We issued 201,700 and 164,700 shares of our common stock under the ESPP during the years ended December 31, 2011 and 2010, respectively. In 2011, stockholders approved our 2011 ESPP, which superseded the 2002 Employee Stock Purchase Plan. The 2011 ESPP allows for the issuance of three million shares of common stock.

The following table illustrates the components of our stock-based compensation expense that are reported in general and administrative expenses in the consolidated statements of income:

	Year Ended December 31,					
	2011		2010		2009	
	(In thousands)					
	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount
Restricted stock awards	$ 15,914	$ 9,946	$ 8,007	$ 5,044	$ 5,789	$ 3,589
Stock options (including expense relating to our ESPP)	1,138	712	1,524	960	1,696	1,052
Total stock-based compensation expense	$ 17,052	$ 10,658	$ 9,531	$ 6,004	$ 7,485	$ 4,641

As of December 31, 2011, there was $14.2 million of total unrecognized compensation expense related to unvested restricted stock awards, which we expect to recognize over a remaining weighted-average period of 1.8 years. This unrecognized compensation cost assumes an estimated forfeiture rate of 6.6% as of December 31, 2011. As of December 31, 2011, there was no remaining unrecognized compensation expense related to unvested stock options.

Unvested restricted stock and restricted stock activity for the year ended December 31, 2011 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2010	1,253,624	$ 15.55
Granted	792,300	23.21
Vested	(520,071)	17.76
Forfeited	(89,971)	15.60
Unvested balance as of December 31, 2011	1,435,882	18.97

The total fair value of restricted shares granted during the year ended December 31, 2011, 2010, and 2009 was $18.4 million, $12.7 million, and $8.0 million, respectively. The total fair value of restricted shares vested during the year ended December 31, 2011, 2010, and 2009 was $12.2 million, $6.4 million, and $3.2 million, respectively.

Stock option activity for the year ended December 31, 2011 is summarized below:

	Shares	Weighted Average Grant Date Fair Value	Average Intrinsic Value (In thousands)	Weighted Average Remaining Contractual term (Years)
Stock options outstanding as of December 31, 2010	770,421	$ 20.39		
Exercised	(195,672)	18.82		
Forfeited	(21,700)	21.45		
Stock options outstanding as of December 31, 2011	553,049	20.91	$ 1,435	3.9
Stock options exercisable and expected to vest as of December 31, 2011	553,049	20.91	$ 1,435	3.9
Exercisable as of December 31, 2011	550,799	20.90	$ 1,435	3.9

The following is a summary of information about stock options outstanding and exercisable at December 31, 2011:

	Options Outstanding			Options Exercisable	
Range of Exercise Prices	Number Outstanding	Weighted-Average Remaining Contractual Life (Years)	Weighted-Average Exercise Price	Number Exercisable	Weighted-Average Exercise Price
$11.32 – $19.11	231,861	3.2	$ 17.31	231,861	$ 17.31
$20.03 – $21.59	184,275	5.0	20.86	184,275	20.86
$21.72 – $29.53	136,913	3.7	27.07	134,663	27.13
	553,049			550,799	

17. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of December 31, 2011, and 2010 our carrying amount for this investment amounted to $3.9 million, and $3.8 million, respectively. For the years ended December 31, 2011, 2010, and 2009, we paid $24.3 million, $22.0 million, and $21.8 million, respectively, for medical service fees to this provider.

We are a party to a fee-for-service agreement with Pacific Hospital of Long Beach ("Pacific Hospital"). Until October 2010, Pacific Hospital was owned by Abrazos Healthcare, Inc., the shares of which are held as community property by the husband of Dr. Martha Bernadett, the sister of Dr. J. Mario Molina, our Chief Executive Officer, and John Molina, our Chief Financial Officer. Amounts paid to Pacific Hospital under the terms of this fee-for-service agreement were $0.7 million, $1.0 million, and $0.7 million, for the years ended December 31, 2011, 2010 and 2009, respectively. As of October 2010, Pacific Hospital was no longer owned by Abrazos Healthcare, Inc. or any other related party to the Company.

18. Commitments and Contingencies

Leases

We lease office space, clinics, equipment, and automobiles under agreements that expire at various dates through 2018. Future minimum lease payments by year and in the aggregate under all non-cancelable operating leases consist of the following approximate amounts:

	(In thousands)
2012	$ 25,553
2013	22,425
2014	18,511
2015	14,544
2016	7,794
Thereafter	12,597
Total minimum lease payments	$ 101,424

Rental expense related to these leases amounted to $23.1 million, $25.1 million, and $20.8 million for the years ended December 31, 2011, 2010, and 2009, respectively.

Employment Agreements

In 2002 we entered into employment agreements with our Chief Executive Officer and Chief Financial Officer, which have been amended and restated as of December 31, 2009. These employment agreements had initial terms of one to three years and are subject to automatic one-year extensions thereafter. Should the executives be terminated without cause or resign for good reason before a change of control, as defined, we will pay one year's base salary and termination bonus, as defined, in addition to full vesting of 401(k) employer contributions and stock-based awards, and a cash sum equal in value to health and welfare benefits provided for 18 months. If the executives are terminated for cause, no further payments are due under the contracts.

If termination occurs within two years following a change of control, the executives will receive two times their base salary and termination bonus, in addition to full vesting of 401(k) employer contributions and stock-based awards, and a cash sum equal in value to health and welfare benefits provided for three years.

Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Professional Liability Insurance

We carry medical professional liability insurance for health care services rendered through our clinics in California, Virginia and Washington. Claims-made coverage under the policies for California and Washington is $1.0 million per occurrence with an annual aggregate limit of $3.0 million for Washington, beginning in 2010, and for California, each of the years ended December 31, 2011, 2010, and 2009. Claims-made coverage under the Virginia policy is $2.0 million per occurrence with an annual aggregate limit of $6.0 million for each of the years ended December 31, 2011 and 2010, and beginning July 1, 2008. We also carry claims-made managed care errors and omissions professional liability insurance for our health plan operations. This insurance is subject to a coverage limit of $15.0 million per occurrence and $15.0 million in the aggregate for each policy year.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $492.4 million at December 31, 2011, and $397.8 million at December 31, 2010.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital, or RBC, rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of December 31, 2011, our health plans had aggregate statutory capital and surplus of approximately $509.9 million compared with the required minimum aggregate statutory capital and surplus of approximately $265.7 million. All of our health plans were in compliance with the minimum capital requirements at December 31, 2011. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

New Markets Tax Credit

During the fourth quarter of 2011 our New Mexico data center subsidiary entered into a financing transaction with Wells Fargo Community Investment Holdings, LLC, or Wells Fargo, its wholly owned subsidiary New Mexico Healthcare Data Center Investment Fund, LLC, or Investment Fund, and certain of Wells Fargo's affiliated Community Development Entities, or CDEs, in connection with our participation in the federal government's New Markets Tax Credit Program, or NMTC. The NMTC was established by Congress in 2000 to facilitate new or increased investments in businesses and real estate projects in low-income communities. The NMTC attracts investment capital to low-income communities by permitting investors to receive a tax credit against their federal income tax return in exchange for equity investments in specialized financial institutions called CDEs which provide financing to qualified active businesses operating in low-income communities. The credit totals 39 percent of the original investment amount and is claimed over a period of seven years (five percent for each of the first three years, and six percent for each of the remaining four years). The investment in the CDE cannot be redeemed before the end of the seven-year period.

In the fourth quarter of 2011, as a result of a series of simultaneous financing transactions, Wells Fargo made a capital contribution of $5.9 million in and Molina Healthcare, Inc. made a loan in the principal amount of $15.5 million to the Investment Fund. The Investment Fund then contributed the proceeds to certain CDEs, which, in turn, loaned the proceeds of $20.9 million to our New Mexico data center subsidiary. Wells Fargo will be entitled to claim the NMTC while we effectively received net loan proceeds equal to Wells Fargo contribution to the Investment Fund or approximately $5.9 million. Additionally, financing costs incurred in structuring the arrangement amounting to $1.2 million were deferred and will be recognized as expense over the term of the loans. This transaction also includes a put/call feature that becomes enforceable at the end of the seven-year compliance period. Wells Fargo may exercise its put option or we can exercise the call, both of which will serve to transfer the debt obligation to us. Incremental costs to maintain the structure during the compliance period will be recognized as incurred.

We have determined that the financing arrangement with Investment Fund and CDEs is a variable interest entity, or VIE, and that we are the primary beneficiary of the VIE. We reached this conclusion based on the following:

- The ongoing activities of the VIE—collecting and remitting interest and fees and NMTC compliance—were all considered in the initial design and are not expected to significantly affect economic performance throughout the life of the VIE;
- Contractual arrangements obligate us to comply with NMTC rules and regulations and provide various other guarantees to Investment Fund and CDEs;
- Wells Fargo lacks a material interest in the underling economics of the project; and
- We are obligated to absorb losses of the VIE.

Because we are the primary beneficiary of the VIE, we have included it in our consolidated financial statements. Wells Fargo's contribution of $5.9 million is included in cash at December 31, 2011 and the offsetting Wells Fargo interest in the financing arrangement is included in other liabilities in the accompanying consolidated balance sheets.

As described above, this transaction also includes a put/call provision whereby we may be obligated or entitled to repurchase Wells Fargo's interest in the Investment Fund. The value attributed to the put/call is nominal. The NMTC is subject to 100% recapture for a period of seven years as provided in the Internal Revenue Code and applicable U.S. Treasury regulations. We are required to be in compliance with various regulations and contractual provisions that apply to the NMTC arrangement. Non-compliance with applicable requirements could result in Wells Fargo's projected tax benefits not being realized and, therefore, require us to indemnify Wells Fargo for any loss or recapture of NMTCs related to the financing until such time as the recapture provisions have expired under the applicable statute of limitations. We do not anticipate any credit recaptures will be required in connection with this arrangement.

19. Segment Reporting

We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans which serve Medicaid populations in ten states, and also includes our smaller direct delivery line of business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides design, development, implementation; business process outsourcing solutions; hosting services; and information technology support services to Medicaid agencies in an additional five states. The Molina Medicaid Solutions segment was added to our internal financial reporting structure when we acquired this business in the second quarter of 2010.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

Molina Medicaid Solutions was acquired on May 1, 2010; therefore, the year ended December 31, 2010 includes only eight months of operating results for this segment. Operating segment information is as follows:

	Year Ended December 31,		
	2011	2010	2009
	(In thousands)		
Segment Information:			
Revenue:			
Health Plans:			
Premium revenue	$ 4,603,407	$ 3,989,909	$ 3,660,207

20. Quarterly Results of Operations (Unaudited)

The following is a summary of the quarterly results of operations for the years ended December 31, 2011 and 2010.

	For The Quarter Ended,			
	March 31, 2011	June 30, 2011	September 30, 2011	December 31, 2011
	(In thousands)			
Premium revenue	$ 1,081,438	$ 1,128,770	$ 1,138,230	$ 1,254,969
Service revenue	36,674	36,888	37,728	49,157
Operating income	31,300	31,410	33,566	(16,103)
Income before income taxes	27,697	27,727	29,186	(19,956)
Net income	17,388	17,440	18,950	(32,960)
Net income per share (1):				
Basic	$ 0.38	$ 0.38	$ 0.41	$ (0.72)
Diluted	$ 0.38	$ 0.38	$ 0.41	$ (0.72)

	For The Quarter Ended,			
	March 31, 2010	June 30, 2010	September 30, 2010	December 31, 2010
	(In thousands)			
Premium revenue	$ 965,220	$ 976,685	$ 1,005,115	$ 1,042,889
Service revenue	—	21,054	32,271	36,484
Operating income	20,438	21,178	29,953	33,432
Income before income taxes	17,081	17,079	25,353	29,979
Net income	10,590	10,579	16,173	17,628
Net income per share (1)(2):				
Basic	$ 0.28	$ 0.27	$ 0.38	$ 0.39
Diluted	$ 0.27	$ 0.27	$ 0.38	$ 0.39

(1) All applicable share and per-share amounts reflect retroactive effects of the three-for-two common stock split in the form of a stock dividend that was effective May 20, 2011.

(2) Potentially dilutive shares issuable pursuant to our 2007 offering of convertible senior notes were not included in the computation of diluted net income per share because to do so would have been anti-dilutive for the years ended December 31, 2011, and 2010.

21. Condensed Financial Information of Registrant

Following are our parent company only condensed balance sheets as of December 31, 2011 and 2010, and our condensed statements of income and condensed statements of cash flows for each of the three years in the period ended December 31, 2011.

Condensed Balance Sheets

	December 31,	
	2011	2010
	(Amounts in thousands, except per-share data)	
ASSETS		
Current assets:		
Cash and cash equivalents	$ 14,650	$ 57,020

Cash and cash equivalents at end of year	$ 14,650	$ 57,020	$ 26,040

Notes to Condensed Financial Information of Registrant

Note A — Basis of Presentation

Molina Healthcare, Inc. (Registrant) was incorporated on July 24, 2002. Prior to that date, Molina Healthcare of California (formerly known as Molina Medical Centers) operated as a California health plan and as the parent company for Molina Healthcare of Utah, Inc. and Molina Healthcare of Michigan, Inc. In June 2003, the employees and operations of the corporate entity were transferred from Molina Healthcare of California to the Registrant.

The Registrant's investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries since the date of acquisition. The parent company-only financial statements should be read in conjunction with the consolidated financial statements and accompanying notes.

Note B — Transactions with Subsidiaries

The Registrant provides certain centralized medical and administrative services to its subsidiaries pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems and human resources services. Fees are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the subsidiaries' ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate. Charges in 2011, 2010, and 2009 for these services totaled $307.9 million, $238.5 million, and $218.6 million, respectively, which are included in operating revenue.

The Registrant and its subsidiaries are included in the consolidated federal and state income tax returns filed by the Registrant. Income taxes are allocated to each subsidiary in accordance with an intercompany tax allocation agreement. The agreement allocates income taxes in an amount generally equivalent to the amount which would be expensed by the subsidiary if it filed a separate tax return. Net operating loss benefits are paid to the subsidiary by the Registrant to the extent such losses are utilized in the consolidated tax returns.

Note C — Capital Contribution and Dividends

During 2011, 2010, and 2009, the Registrant received dividends from its subsidiaries totaling $76.6 million, $81.3 million, and $76.7 million, respectively. Such amounts have been recorded as a reduction to the investments in the respective subsidiaries.

During 2011, 2010, and 2009, the Registrant made capital contributions to certain subsidiaries totaling $58.4 million, $10.5 million, and $54.7 million, respectively, primarily to comply with minimum net worth requirements and to fund contract acquisitions. Such amounts have been recorded as an increase in investment in the respective subsidiaries.

Note D — Related Party Transactions

The Registrant has an equity investment in a medical service provider that provides certain vision services to its members. The Registrant accounts for this investment under the equity method of accounting because the Registrant has an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of December 31, 2010 and 2009, the Registrant's carrying amount for this investment totaled $3.9 million and $3.8 million, respectively. For the years ended December 31, 2011, 2010, and 2009, the Registrant paid $24.3 million, $22.0 million, and $21.8 million, respectively, for medical service fees to this provider.

The Registrant is a party to a fee-for-service agreement with Pacific Hospital of Long Beach ("Pacific Hospital"). Until October 2010, Pacific Hospital was owned by Abrazos Healthcare, Inc., the shares of which are held as community property by the husband of Dr. Martha Bernadett, the sister of Dr. J. Mario Molina, our Chief Executive Officer, and John Molina, our Chief Financial Officer. Amounts paid to Pacific Hospital under the terms of this fee-for-service agreement were $0.7 million, $1.0 million, and $0.7 million, for the years ended December 31, 2011, 2010, and 2009, respectively. As of October 2010, Pacific Hospital was no longer owned by Abrazos Healthcare, Inc. or any other related party to the Company.

22. Subsequent Events

Missouri Health Plan

On February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that we were not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal. As a result, our existing contract with the state will expire without renewal on June 30, 2012.

Molina Healthcare Insurance Company

Effective February 17, 2012, we sold our wholly owned insurance subsidiary, Molina Healthcare Insurance Company. To be recorded in the first quarter of 2012, the transaction will result in the elimination of both the noncurrent receivable and liability for ceded life and annuity contracts, each amounting to approximately $23.4 million as of December 31, 2011. Additionally, a gain of approximately $2 million is expected to be recorded upon closing of the transaction.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosures***

None.

Item 9A. ***Controls and Procedures***

Disclosure Controls and Procedures: Our management is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934 (the "Exchange Act"). Our internal control over financial reporting is designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements. We maintain controls and procedures designed to ensure that we are able to collect the information we are required to disclose in the reports we file with the Securities and Exchange Commission, and to process, summarize and disclose this information within the time periods specified in the rules of the Securities and Exchange Commission.

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has conducted an evaluation of the design and operation of our "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e)) under the Exchange Act. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective as of the end of the period covered by this report to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Changes in Internal Controls: There were no changes in our internal control over financial reporting that occurred during the quarter ended December 31, 2011, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting: Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States. However, all internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and reporting.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2011. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework.*

Based on our assessment, management believes that the Company maintained effective internal control over financial reporting as of December 31, 2011, based on those criteria.

The effectiveness of the Company's internal control over financial reporting has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report appearing on page 110 of this Annual Report on Form 10-K, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2011.

Item 9B. ***Other Information***

None.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited Molina Healthcare, Inc.'s (the "Company's") internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Molina Healthcare, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Molina Healthcare, Inc. as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2011 and our report dated February 29, 2012 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

Los Angeles, California
February 29, 2012

PART III

Item 10. *Directors, Executive Officers, and Corporate Governance*

Pursuant to General Instruction G(3) to Form 10-K and Instruction 3 to Item 401(b) of Regulation S-K, information regarding our executive officers is provided in Item 1 of Part I of this Annual Report on Form 10-K under the caption "Executive Officers of the Registrant," and will also appear in our definitive proxy statement for our 2012 Annual Meeting of Stockholders. The remaining information required by Items 401, 405, 406 and 407(c)(3), (d)(4) and (d)(5) of Regulation S-K will be included under the headings "Election of Directors," "Corporate Governance," and "Section 16(a) Beneficial Ownership Reporting Compliance" in our definitive proxy statement for our 2012 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

Item 11. *Executive Compensation*

The information required by Items 402, 407(e)(4), and (e)(5) of Regulation S-K will be included under the headings "Executive Compensation" and "Compensation Committee Interlocks and Insider Participation" in our definitive proxy statement for our 2012 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

The information required by this item regarding our equity compensation plans is set forth in Part II, Item 5 of this report and incorporated herein by reference. The remaining information required by Item 403 of Regulation S-K will be included under the heading "Security Ownership of Certain Beneficial Owners and Management" in our definitive proxy statement for our 2012 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

Item 13. *Certain Relationships and Related Transactions, and Director Independence*

The information required by Items 404 and 407(a) of Regulation S-K will be included under the headings "Certain Relationships and Transactions" and "Corporate Governance" in our definitive proxy statement for our 2012 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

Item 14. *Principal Accountant Fees and Services*

The information required by Item 9(e) of Schedule 14A will be included under the heading "Independent Registered Public Accounting Firm" in our definitive proxy statement for our 2012 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

PART IV

Item 15. ***Exhibits and Financial Statement Schedules***

(a) The consolidated financial statements and exhibits listed below are filed as part of this report.

(1) The Company's consolidated financial statements, the notes thereto and the report of the Independent Registered Public Accounting Firm are on pages 64 through 108 of this Annual Report on Form 10-K and are incorporated by reference.

Report of Independent Registered Public Accounting Firm

Consolidated Balance Sheets — At December 31, 2011 and 2010

TERM LOAN AGREEMENT

This TERM LOAN AGREEMENT, dated as of December 1, 2011 (the "Agreement"), is entered into by and among MOLINA CENTER LLC, a Delaware limited liability company ("Borrower"), EAST WEST BANK, a California banking corporation, as Administrative Agent (" Administrative Agent") and EAST WEST BANK, a California banking corporation, BANK OF CHINA, LOS ANGELES BRANCH, a federally chartered branch of Bank of China Limited, a joint stock company incorporated in the People's Republic of China with limited liability, CITY NATIONAL BANK, a national banking association, UNION BANK, N.A., a national banking association, and THE BANK OF EAST ASIA (U.S.A.) N.A., a national banking association, as Lenders (collectively, together with their assignees and successors permitted hereunder, " Lenders," and each a "Lender").

Administrative Agent, Lenders, and Borrower desire to enter into an agreement setting forth the terms and conditions under which Borrower may obtain from Lenders a term loan to finance its acquisition of certain real property in the City of Long Beach, California, improved with two office towers commonly known as the "Arco Towers."

In consideration of the foregoing and the mutual covenants and agreements herein contained, the parties hereto covenant and agree as follows:

ARTICLE 1
DEFINITIONS AND ACCOUNTING TERMS

1.1 Defined Terms. As used herein, the following terms shall have the meanings set forth below:

"Adjusted LIBOR Rate" means, with respect to any Interest Period, an interest rate per annum (rounded upwards, if necessary, to the next 1/16 of 1%) equal to (a) the LIBOR Rate for such Interest Period multiplied by (b) the Statutory Reserve Rate.

"Administrative Agent Advances " means advances which the Administrative Agent makes, from time to time, on behalf of Lenders, to pay any costs, fees and expenses as described herein or to pay costs reasonably deemed necessary by Administrative Agent in order to preserve or protect the Collateral or any portion thereof (including costs of property taxes, insurance premiums, completion of construction, operation, management, improvements, maintenance, repair, sale and disposition of any Foreclosed Real Property).

"Administrative Agent's Office" means Administrative Agent's address as set forth on the signature pages to this Agreement, or such other address as Administrative Agent hereafter may designate by written notice to Borrower.

"Advance" means a disbursement of principal of the Loan.

"Affected Lender" has the meaning set forth for that term in Section 2.14.

"Affiliate" means, as to any Person, any other Person which directly or indirectly controls, or is under common control with, or is controlled by, such Person. As used in this definition, "control" (and the correlative terms, "controlled by" and "under common control with") shall mean possession, directly or indirectly, of power to direct or cause the direction of management or policies (whether through ownership of securities or partnership or other membership or ownership interests, by contract or otherwise).

"Agreement" means this Term Loan Agreement, either as originally executed or as it may from time to time be supplemented, modified, amended, restated or extended.

"Applicable Margin" means 3.25%.

"Borrower" means Molina Center, LLC, a Delaware limited liability company.

"Business Day" means any Monday, Tuesday, Wednesday, Thursday or Friday, other than a day on which banks are authorized or required to be closed in California.

"Calculation Period" means the six (6) month period ending on the last day of the last month prior to the month in which a calculation of Debt Coverage is being made pursuant to Section 5.7(a).

"Capital Expenditure" means any expenditure by a Person for or related to fixed assets or purchased intangibles that is treated as a capital expenditure under GAAP, including any amount that is required to be treated as an asset subject to a Capital Lease Obligation. The amount of Capital Expenditures in respect of fixed assets purchased or constructed by a Person in any fiscal period shall be net of (a) any net sales proceeds received during such fiscal period by such Person for fixed assets sold by such Person and (b) any casualty insurance proceeds received during such fiscal period by such Person for casualties to fixed assets and applied to the repair or replacement thereof.

"Capital Lease Obligations" means all monetary obligations of a Person under any leasing or similar arrangement that, in accordance with GAAP, is classified as a capital lease.

"Cash" means, when used in connection with any Person, all monetary and non-monetary items owned by that Person that are treated as cash in accordance with GAAP.

"Cash Equivalents" means, when used in connection with any Person, such Person's Investments in:

(a) Government Securities, in each case due within one year after the date of the making of such an Investment;

(b) readily marketable direct obligations of any State of the United States of America or any political subdivision of any such State or any public agency or instrumentality thereof given on the date of such Investment a credit rating of at least Aa by Moody's Investors Service, Inc. or AA by Standard & Poor's Corporation, in each case due within one year after the date of the making of such an Investment;

(c) certificates of deposit issued by, bank deposits in, eurodollar deposits through, bankers' acceptances of, and reverse repurchase agreements covering Government Securities executed by, Lender or any other bank, savings and loan or savings bank doing business in and incorporated under the Laws of the United States of America or any State thereof and having on the date of such Investment combined capital, surplus and undivided profits of at least $250,000,000, in each case due within one year after the date of the making of such an Investment;

(d) certificates of deposit issued by, bank deposits in, eurodollar deposits through, bankers' acceptances of, and reverse repurchase agreements covering Government Securities executed by, any branch or office located in the United States of America of a bank incorporated under the Laws of any jurisdiction outside the United States of America having on the date of such Investment combined capital, surplus and undivided profits of at least $500,000,000, in each case due within one year after the date of the making of such an Investment; and

(e) readily marketable commercial paper of corporations doing business in and incorporated under the Laws of the United States of America or any State thereof given on the date of such Investment the highest credit rating by Moody's Investors Service, Inc. and Standard & Poor's Corporation, in each case due within 270 days after the date of the making of such an Investment.

"Change in Control" means an event or series of events by which:

(a) Borrower ceases to be wholly owned by Parent; or

(b) Parent ceases to control the management and day-to-day operations of Borrower.

"Closing Date" means the date upon which the conditions precedent set forth in Section 7.1 are fulfilled or waived by Lenders and the Loan are initially funded.

"Code" means the Internal Revenue Code of 1986, as amended or replaced and as in effect from time to time.

"Collateral" means, collectively, all of the collateral subject to the Liens, or intended to be subject to the Liens, created by the Collateral Documents, whether or not perfected.

"Collateral Documents" means, collectively, the Deed of Trust, this Agreement and any other security agreement, assignment, deed of trust, mortgage or similar instrument now or hereafter executed by any Loan Party to secure the Obligations.

"Commitment" means, as to any Lender, the amount set forth for that Lender in the Schedule of Commitments.

"Compliance Certificate" means a certificate in the form of Exhibit A.

"Contingent Obligation" means, as to any Person, any (a) direct or indirect guarantee of Indebtedness of, or other obligation performable by, any other Person, including any endorsement (other than for collection or deposit in the ordinary course of business), co-making or sale with recourse of the obligations of any other Person or (b) contractual assurance (not arising solely by operation of Law) given to an obligee with respect to the performance of an obligation by, or the financial condition of, any other Person, whether direct, indirect or contingent, including any purchase or repurchase agreement covering such obligation or any collateral security therefor, any agreement to provide funds (by means of loans, capital contributions or otherwise) to such other Person, any agreement to support the solvency or level of any balance sheet item to such other Person, or any other arrangement of whatever nature having the effect of assuring or holding harmless any obligee against loss with respect to any obligation of such other Person including without limitation any "keep-well", "take-or-pay" or "through put" agreement or arrangement. As of each date of determination, the amount of any Contingent Obligation shall be deemed to be an amount equal to the stated or determinable amount of the related primary obligation (unless the Contingent Obligation is limited by its terms to a lesser amount, in which case to the extent of such amount) or, if not stated or determinable, the maximum reasonably anticipated liability in respect thereof as determined by such Person in good faith.

"Contractual Obligation" means, as to any Person, any provision of any outstanding security issued by that Person or of any material agreement, instrument or undertaking to which that Person is a party or by which it or any of its Property is bound.

"DCR Collateral Account" means a deposit account which may be established in the name of Borrower and maintained with East West Bank under the circumstances described in Section 5.7(a).

"Debt Coverage Ratio" means the ratio of (a) Net Operating Income for the Calculation Period to (b) the sum (without duplication) of (i) Interest Charges during the Calculation Period plus (ii) principal payments on all Indebtedness that are required to be made during the Calculation Period; provided, that there shall be excluded from clauses (b) (i) and (b)(ii) all Interest Charges and scheduled principal payments on Indebtedness as to which the lenders' rights to receive payment are expressly subordinated to the right of the Lenders to receive payments of Debt Service and other payments on the Loan.

"Debt Service" means the actual principal and interest payable under the Loan during the applicable Calculation Period.

"Debtor Relief Laws" means the Bankruptcy Code of the United States of America, as amended from time to time, and all other applicable liquidation, conservatorship, bankruptcy, moratorium, rearrangement, receivership, insolvency, reorganization, or similar debtor relief Laws from time to time in effect and affecting the rights of creditors generally.

"Deed of Trust" means the Deed of Trust, Assignment of Rents and Fixture Filing of even date herewith executed by Borrower, as Trustor, in favor of Administrative Agent, for the benefit of the Secured Parties, as beneficiary, encumbering the Real Property, either as originally executed or as the same may from time to time be supplemented, modified, amended, renewed, extended or supplanted.

"Default" means any condition or event that, with the giving of any applicable notice or passage of time specified in Section 8.1, or both, would constitute an Event of Default.

"Default Rate" means the interest rate set forth in Section 2.5.

"Defaulting Lender" means a Lender that fails to pay its Pro Rata Share of a an Advance within three (3) Business Days after notice from Administrative Agent, until such Lender cures such failure as permitted in this Agreement.

"Designated Deposit Account" means deposit account number 8003018341 in the name of Borrower and maintained with East West Bank.

"Dollars" or "$" means United States dollars.

"East West Bank" means East West Bank, a California banking corporation.

"Environmental Indemnity" means the Environmental Indemnity of even date herewith by Borrower in favor of Lender, setting forth certain indemnification obligations relating to Hazardous Materials (as defined below), either as originally executed or as it may from time to time be supplemented, modified, amended, restated or extended.

"ERISA" means the Employee Retirement Income Security Act of 1974, and any regulations issued pursuant thereto, as amended or replaced and as in effect from time to time.

"ERISA Affiliate" means any Person (whether or not incorporated) that is required to be aggregated with a Borrower pursuant to Section 414 of the Code.

"Eurodollar Principal" means any principal of the Loan as to which interest is accruing at the Eurodollar Rate or at a Default Rate calculated with reference to the Eurodollar Rate.

"Eurodollar Rate" means, with respect to an Interest Period, a per annum rate of interest equal to the greater of (a) Adjusted LIBOR Rate for such Interest Period plus the Applicable Margin, or (b) 4.25%.

"Event of Default" has the meaning specified in Section 8.1.

"Fiscal Quarter" means the fiscal quarter of Borrower consisting of a three-month fiscal period ending on each March 31, June 30, September 30, and December 31.

"Fiscal Year" means the fiscal year of Borrower consisting of a twelve-month fiscal period ending on each December 31.

"GAAP" means generally accepted accounting principles in the United States set forth in the opinions and pronouncements of the Accounting Principles Board and the American Institute of Certified Public Accountants and statements and pronouncements of the Financial Accounting Standards Board or such other principles as may be approved by a significant segment of the accounting profession in the United States, that are applicable to the circumstances as of the date of determination, consistently applied. The term " consistently applied," as used in connection therewith, means that the accounting principles applied are consistent in all material respects to those applied at prior dates or for prior periods.

"Government Securities" means readily marketable direct full faith and credit obligations of the United States of America or obligations unconditionally guaranteed by the full faith and credit of the United States of America.

"Governmental Agency" means (a) any international, foreign, federal, state, county or municipal government, or political subdivision thereof, (b) any governmental or quasi-governmental agency, authority, board, bureau, commission, department, instrumentality or public body, (c) any court, administrative tribunal or public utility, or (d) any arbitration tribunal or other non-governmental authority to whose jurisdiction a Person has consented.

"Hazardous Materials" has the meaning set forth for that term in the Environmental Indemnity.

"Hazardous Materials Laws" has the meaning set forth for that term in the Environmental Indemnity.

"Indebtedness" means, as to any Person (without duplication), (a) indebtedness of such Person for borrowed money or for the deferred purchase price of Property (excluding trade and other accounts payable in the ordinary course of business in accordance with ordinary trade terms), including any Contingent Obligation for any such indebtedness, (b) indebtedness of such Person of the nature described in the foregoing clause (a) that is non-recourse to the credit of such Person but is secured by assets of such Person, to the extent of the fair market value of such assets as determined in good faith by such Person, (c) Capital Lease Obligations of such Person, (d) indebtedness of such Person arising under bankers' acceptance facilities or under facilities for the discount of accounts receivable of such Person, (e) any direct or contingent obligations of such Person under letters of credit issued for the account of such Person, and (f) any net obligations of such Person under written agreements with one or more financial institutions providing for "swap", "cap", "collar" or other interest rate protection with respect to any of the foregoing indebtedness. In no event shall the obligations of any Person in connection with foreign exchange contracts constitute Indebtedness.

"Indemnitee" has the meaning specified in Section 10.9.

"Intangible Assets" means assets that are considered intangible assets under GAAP, including customer lists, goodwill, computer software, copyrights, trade names, trademarks, patents, franchises, licenses, unamortized deferred charges, unamortized debt discount and capitalized research and development costs.

"Interest Charges" means, for any period, with respect to Borrower, the sum of (a) all interest paid or payable (without duplication) for such period by Borrower in connection with any of its funded Indebtedness or in connection with the deferred purchase price of assets,

in each case to the extent treated as "interest expense" in accordance with GAAP and (b) the portion of rent paid or payable (without duplication) for such fiscal period by Borrower under Capital Lease Obligations that should be treated as interest in accordance with Financial Accounting Standards Board Statement No. 13.

"Interest Period" means the period commencing on the day of each calendar month and ending on the last day of such calendar month.

"Investment" means, when used in connection with any Person, any investment by or of that Person, whether by means of purchase or other acquisition of capital stock or other Securities of any other Person or by means of loan, advance, capital contribution, guaranty or other debt or equity participation or interest, or otherwise, in any other Person, including any membership, partnership and joint venture interests of such Person in any other Person. The amount of any Investment shall be the amount actually invested, without adjustment for increases or decreases in the value of such Investment.

"Laws" means, collectively, all international, foreign, federal, state and local statutes, treaties, rules, guidelines, regulations, ordinances, codes and administrative or judicial precedents or authorities, including the interpretation or administration thereof by any Governmental Agency charged with the enforcement, interpretation or administration thereof, and all applicable administrative orders, directed duties, requests, licenses, authorizations and permits of, and agreements with, any Governmental Agency, in each case whether or not having the force of law.

"Lender" has the meaning specified in the preamble hereto.

"Lender's Office" means Lender's address as set forth on the signature pages to this Agreement, or such other address as Lender hereafter may designate by written notice to Borrower.

"LIBOR Rate" means, for any Interest Period, a rate of interest per annum equal to the rate that appears in the "Money Rates" section of the Wall Street Journal as the London interbank offered rate for deposits in US Dollars, for a period of one month, two Business Days prior to the commencement of such Interest Period. If such interest rate shall cease to be available from the Wall Street Journal, the LIBOR Rate shall be determined from such financial reporting service as Administrative Agent shall reasonably determine and use with respect to its other loan facilities on which interest is determined based on the London interbank offered rate. If a London interbank offered rate for deposits in US Dollars for a period of one month becomes unavailable, Administrative Agent shall designate a substitute index that is as closely comparable to the London interbank offered rate for deposits in US Dollars for a period of one month as is reasonably practicable, and shall give notice of such substitution to Borrower and the Lenders.

"Lien" means any mortgage, pledge, hypothecation, assignment, deposit arrangement, encumbrance, lien (statutory or other), charge, or preference, priority or other security interest or preferential arrangement in the nature of a security interest of any kind or nature whatsoever (including any conditional sale or other title retention agreement, any easement, right of way or other encumbrance on title to real property, and any financing lease having substantially the same economic effect as any of the foregoing).

"Loan" means the credit committed to be advanced by Lenders to Borrower, subject to the terms and conditions of this Agreement

"Loan Documents" means, collectively, this Agreement, the other Collateral Documents, the Notes, the Parent Guaranty, and any other agreements of any type or nature heretofore or hereafter executed and delivered by Borrower or any of their Affiliates to Administrative Agent in any way relating to or in furtherance of this Agreement (other than Swap Contracts), in each case either as originally executed or as the same may from time to time be supplemented, modified, amended, restated, extended or supplanted.

"Loan Party" means each of Borrower and Parent.

"Loan-to-Value Ratio" means the total committed amount of the Loan divided by the appraised "As-Is" value of the Property. The appraised "As-Is" value of the Property shall be based upon an appraisal prepared by a third-party appraiser acceptable to, and engaged directly by, Administrative Agent. The appraisal shall be satisfactory to the Required Lenders in all respects, and the value of the Property, as determined on the basis of such appraisal, shall be as reviewed, adjusted and approved by the Required Lenders.

"Material Adverse Effect" means any set of circumstances or events which (a) is material and adverse to the condition (financial or otherwise) or business operations of the Loan Parties taken as a whole, (b) materially impairs the ability of any Loan Party to perform its Obligations, (c) has a material, adverse effect on the Lien of any Loan Document or (d) materially impairs the ability of Administrative Agent or any of the Lenders to enforce a material right or remedy as provided in the Loan Documents.

"Maturity Date" means November 30, 2018; provided, however, that if such date is not a Business Day, the Maturity Date shall be the next following Business Day.

"Multiemployer Plan" means any employee benefit plan of the type described in Section 4001(a)(3) of ERISA to which any Borrower or any of its ERISA Affiliates contributes or is obligated to contribute.

"Negative Pledge" means a Contractual Obligation that contains a covenant binding on Borrower that prohibits Liens on any of such entity's Property, other than (a) any such covenant contained in a Contractual Obligation granting or relating to a particular Lien which affects only the Property that is the subject of such Lien and (b) any such covenant that does not apply to Liens securing the Obligations, and (c) customary permitted junior Liens to be agreed upon by Borrower and Lender.

"Net Operating Income" means, for any period, the difference between Operating Expenses and Operating Revenue.

"Notes" and "Notes" have the meanings specified in Section 2.1.

"Obligations" means all present and future obligations of every kind or nature of Borrower or any other Loan Party at any time and from time to time owed to (i) Administrative Agent or Lenders or any one or more of them under any one or more of the Loan Documents, or (ii) any Swap Counterparty in connection with any Swap Transaction, in each case whether due or to become due, matured or unmatured, liquidated or unliquidated, or contingent or noncontingent, including obligations of performance as well as obligations of payment, and including interest that accrues after the commencement of any proceeding under any Debtor Relief Law by or against Borrower or any Affiliate of Borrower.

"Operating Expenses" means, with respect to any period of time, the total of all expenses actually paid or payable during such period, of whatever kind relating to the ownership, operation, maintenance or management of the Property, including (without duplication) Interest Charges and principal payments on all Indebtedness (including, without limitation, Capital Lease Obligations) other than Debt Service, costs of utilities, costs of ordinary repairs and maintenance, insurance premiums, ground rents (if any), license fees, Taxes (including payroll and related taxes with respect to employees of Borrower, but excluding income taxes), advertising expenses, management fees actually paid under any management agreement, operational equipment or other lease payments as reasonably approved by Administrative Agent, but specifically excluding depreciation and amortization, income taxes, Debt Service, any item of expense that would otherwise be covered by the provisions hereof but which is paid by any tenant under such tenant's Lease or other agreement provided such reimbursement by tenant is not included in the calculation of Operating Revenue. Operating Expenses shall be subject to appropriate seasonal and other adjustments in Lender's reasonable discretion.

"Operating Revenue" means, with respect to any period of time, all revenue actually received from the ownership and operation of the Property from whatever source during such period (including rents from any affiliate of Borrower or Parent leasing space in the Property but otherwise excluding any source affiliated with Borrower or Parent), including rents, utility charges, escalations, service fees or charges, license fees, parking fees, and other required pass-throughs, but excluding proceeds of sales of furniture, fixtures and equipment (except to the extent such sale proceeds offset amounts included in Operating Expenses for costs of acquiring furniture, fixtures and equipment), condemnation awards, insurance proceeds (other than business interruption or other loss of income insurance), unforfeited security deposits, utility and other similar deposits, and non-recurring or extraordinary income, including lease termination payments; provided, however, lease termination payments shall be included in Operating Revenue (i) if and to the extent held in reserve to offset amounts included in Operating Expenses consisting of leasing commissions or tenant improvements, and (ii) if delivered to Lender and held in reserve by Lender, as rents received with respect to the terminated lease amortized over the remaining term of such terminated lease and applied to Operating Expenses for the applicable Calculation Period. No credit to Operating Revenue shall be given with respect to free rent periods, rent concessions and rent credits. Operating Revenue shall be subject to appropriate and reasonable seasonal and other adjustments by Administrative Agent.

"Opinion of Counsel" means the favorable written legal opinion of Boutin Jones Inc., counsel to Borrower and Parent, together with copies of all factual certificates and legal opinions upon which such counsel has relied.

"Pacific Time" means the prevailing time in Los Angeles, California.

"Parent" means Molina Healthcare, Inc., a Delaware corporation.

"Parent Credit Facility" means that certain Credit Agreement executed by US Bank National Association as Administrative Agent, Lead Arranger and Sole Book Runner, by City National Bank and Union Bank, N.A., as Co-Syndication Agents, and by U.S. Bank National Association, City National Bank, Union Bank, N.A., BMO Harris Bank, N.A., East West Bank, BOKF, NA dba Bank of Albuquerque, Santa Barbara Bank & Trust, Land Bank of Taiwan, Los Angeles Branch and Hua Nan Commercial Bank Ltd., Los Angeles Branch, as lenders and Parent as borrower, dated as of September 9, 2011, as amended from time to time.

"Parent Guaranty" means the Guaranty of even date herewith by Parent in favor of Lender, either as originally executed or as it may from time to time be supplemented, modified, amended, restated or extended.

"PBGC" means the Pension Benefit Guaranty Corporation or any successor thereof established under ERISA.

"Pension Plan" means any "employee pension benefit plan" (as such term is defined in Section 3(2) of ERISA), other than a Multiemployer Plan, which is subject to Title IV of ERISA and is maintained by any Borrower or to which any Borrower contributes or has an obligation to contribute.

"Permit" means any permit, approval, authorization, license, accreditation, certification, provider or supplier number, registration, certificate of authority, certificate of need, certificate of reimbursement, variance, qualification, filing or consent required under applicable Laws.

"Permitted Encumbrances" means:

(a) inchoate Liens incident to construction or maintenance of Property, or Liens incident to construction or maintenance of Property, now or hereafter filed of record for which adequate accounting reserves have been set aside (or deposits made pursuant to applicable Laws) and which are being contested in good faith by appropriate proceedings and have not proceeded to judgment; provided that, by reason of nonpayment of the obligations secured by such Liens, no such Property is subject to a material impending risk of loss or forfeiture, as reasonably determined by Administrative Agent;

(b) Liens for taxes and assessments on Property which are not yet past due, or Liens for taxes and assessments on Property for which adequate reserves have been set aside and are being contested in good faith by appropriate proceedings and have not proceeded to judgment; provided that, by reason of nonpayment of the obligations secured by such Liens, no such Property is subject to a material impending risk of loss or forfeiture, as reasonably determined by Administrative Agent;

(c) defects and irregularities in title to any Property which in the aggregate do not materially impair the fair market value or use of the Property for the purposes for which it is or may reasonably be expected to be held;

(d) easements, exceptions, reservations, or other agreements that: (i) exist on the date hereof and are described in the ALTA lender's title insurance policy issued by the Title Company in connection with this Agreement; (ii) are granted by Borrower after the date hereof for the purpose of pipelines, conduits, cables, wire communication lines, power lines and substations, streets, trails, walkways, drainage, irrigation, water, and sewerage purposes, dikes, canals, ditches, the removal of oil, gas, coal, or other minerals, and other like purposes affecting Property which in the aggregate do not materially burden or impair the fair market value or use of such Property for the purposes for which it is or may reasonably be expected to be held; or (iii) are granted by Borrower after the date hereof for the purpose of facilitating the joint or common use of Property in or adjacent to a shopping center or similar project affecting Property which in the aggregate do not materially burden or impair the fair market value or use of such Property for the purposes for which it is or may reasonably be expected to be held;

(e) rights reserved to or vested in any Governmental Agency to control or regulate, or obligations or duties to any Governmental Agency with respect to, the use of any Property;

(f) rights reserved to or vested in any Governmental Agency to control or regulate, or obligations or duties to any Governmental Agency with respect to, any right, power, franchise, grant, license, or permit;

(g) present or future zoning laws and ordinances or other laws and ordinances restricting the occupancy, use, or enjoyment of Property;

(h) statutory Liens, other than those described in clauses (a) or (b) above, arising in the ordinary course of business with respect to obligations which are not delinquent or are being contested in good faith; provided that, if delinquent, adequate reserves have been set aside with respect thereto and, by reason of nonpayment, no Property is subject to a material impending risk of loss or forfeiture;

(i) covenants, conditions, and restrictions affecting the use of Property that: (i) exist on the date hereof and are described in the ALTA lender's title insurance policy issued by the Title Company in connection with this Agreement; or (ii) arise after the date hereof and in the aggregate do not materially impair the fair market value or use of the Property for the purposes for which it is or may reasonably be expected to be held;

(j) rights of tenants under leases and rental agreements covering Property entered into in the ordinary course of business of the Person owning such Property;

(k) Liens consisting of pledges or deposits to secure obligations under workers' compensation laws or similar legislation, including Liens of judgments thereunder which are not currently dischargeable;

(l) Liens consisting of pledges or deposits of Property to secure performance in connection with operating leases made in the ordinary course of business; provided that the aggregate value of all such pledges and deposits in connection with any such lease does not at any time exceed 20% of the annual fixed rentals payable under such lease;

(m) Liens consisting of deposits of Property to secure statutory obligations of Borrower or any Subsidiary of Borrower in the ordinary course of its business;

(n) Liens consisting of deposits of Property to secure (or in lieu of) surety, appeal or customs bonds; and

(o) Liens created by or resulting from any litigation or legal proceeding in the ordinary course of business which is currently being contested in good faith by appropriate proceedings; provided that, adequate reserves have been set aside and no material Property is subject to a material impending risk of loss or forfeiture.

"Person" means any entity, whether an individual, trustee, corporation, general partnership, limited liability company, limited partnership, joint stock company, trust, estate, unincorporated organization, business association, tribe, firm, joint venture, Governmental Agency, or otherwise.

"Property" means any interest in any kind of property or asset, whether real, personal or mixed, or tangible or intangible, including any leasehold interest or fixtures.

"Pro Rata Share" means, with respect to each Lender, a fraction in which that Lender's Commitment is the numerator and the Total Commitment is the denominator.

"Real Property" means, collectively, the real property described in the Deed of Trust.

"Regulation T" means Regulation T, as at any time amended, of the Board of Governors of the Federal Reserve System, or any other regulation in substance substituted therefor.

"Regulation U" means Regulation U, as at any time amended, of the Board of Governors of the Federal Reserve System, or any other regulation in substance substituted therefor.

"Regulation X" means Regulation X, as at any time amended, of the Board of Governors of the Federal Reserve System, or any other regulation in substance substituted therefor.

"Replacement Reserve Account" means deposit account number 8003018317 in the name of Borrower and maintained with East West Bank.

"Required Lenders" means, as of any date of determination, either (a) East West Bank and other Lenders who, together with East West Bank, hold more than 50% of the aggregate Commitments of Lenders (other than Commitments held by Defaulting Lenders), or (b) all of the Lenders (other than Defaulting Lenders) other than East West Bank.

"Requirement of Law" means, as to any Person, the certificate of organization, articles or certificate of incorporation and bylaws, the partnership agreement and any related certificate of partnership, or other organizational or governing documents of such Person, and any Law, or judgment, award, decree, writ or determination of a Governmental Agency, in each case applicable to or binding upon such Person or any of its Property or to which such Person or any of its Property is subject.

"Responsible Officer" means chief executive officer, president, chief financial officer, treasurer, assistant treasurer or controller of the Person designated and, solely for purposes of the delivery of incumbency certificates pursuant to Section 7.1, the secretary or any assistant secretary of the Person designated. Any document delivered hereunder that is signed by a Responsible Officer of a Loan Party shall be conclusively presumed to have been authorized by all necessary corporate, partnership or other action on the part of such Loan Party and such Responsible Officer shall be conclusively presumed to have acted on behalf of such Loan Party.

"Schedule of Commitments" means the Schedule of Commitments of all of the Lenders; the initial Schedule of Commitments is attached hereto as Schedule 1.1(b)**,** and the Schedule of Commitments shall be adjusted whenever a Lender withdraws or is added.

"Secured Parties" means, collectively, the Administrative Agent (for the benefit of the Lenders and the Swap Counterparties) and the Swap Counterparties.

"Statutory Reserve Rate" means a fraction (expressed as a decimal), the numerator of which is the number one and the denominator of which is the number one minus the aggregate of the maximum reserve percentages (including any marginal, special, emergency or supplemental reserves) expressed as a decimal established by the Board of Governors of the Federal Reserve System with respect to the Adjusted LIBOR Rate, for eurocurrency funding (currently referred to as "Eurocurrency Liabilities" in Regulation D of the Board of Governors of the Federal Reserve System). Such reserve percentages shall include those imposed pursuant to such Regulation D. Eurodollar Loans shall be deemed to constitute eurocurrency fundings and to be subject to such reserve requirements without benefit of or credit for proration, exemptions or offsets that may be available from time to time to any Lender under such Regulation D or any comparable regulation. The Statutory Reserve Rate shall be adjusted automatically on and as of the effective date of any change in any reserve percentage.

"Subsidiary" of a Person means a corporation, partnership, joint venture, limited liability company or other business entity of which a majority of the shares of securities or other interests having ordinary voting power for the election of directors or other governing body (other than securities or interests having such power only by reason of the happening of a contingency) are at the time beneficially owned, or the management of which is otherwise controlled, directly, or indirectly through one or more intermediaries, or both, by such Person.

"Swap Contract" means any agreement, whether or not in writing, relating to any Swap Transaction, including, unless the context otherwise clearly requires, any form of master agreement (the "Master Agreement") published by the International Swaps and Derivatives Association, Inc., or any other master agreement, entered into prior to the date hereof or any time after the date hereof, between Swap Counterparty and Borrower (or its Affiliate), together with any related schedule and confirmation, as amended, supplemented, superseded or replaced from time to time.

"Swap Counterparty" means any Lender, or an Affiliate of Administrative Agent, in its capacity as counterparty under any Swap Contract; provided that if any Lender that is a counterparty to a Swap Contract shall cease to be a Lender, such entity (or its Affiliate, as the case may be) shall nevertheless remain a Swap Party for so long as it is a counterparty under such Swap Contract.

"Swap Transaction" means any transaction that is a rate swap, basis swap, forward rate transaction, commodity swap, commodity option, equity or equity index swap or option, bond option, note or bill option, interest rate option, forward foreign exchange transaction, cap transaction, collar transaction, floor transaction, currency swap transaction, cross-currency rate swap transaction, swap option, currency option, credit swap or default transaction, T-lock, or any other similar transaction (including any option to enter into the foregoing) or any combination of the foregoing, entered into prior to the date hereof or anytime after the date hereof between Swap Counterparty and Borrower (or its Affiliate) so long as a writing, such as a Swap Contract, evidences the parties' intent that Borrower's obligations arising under such transaction shall be secured by the Deed of Trust or are obligations of Borrower under a Swap Transaction hereunder.

"Taxes" means any and all present and future taxes, levies, imposts, duties, fees, deductions, withholdings or charges of a similar nature imposed or assessed by any Authority or taxing authority thereof, together with any interest thereon and any penalties with respect thereto.

"Title Company" means First American Title Insurance Company.

"Total Commitment" means the aggregate amount of credit that Borrower may obtain, at any one time under this Agreement, which amount shall not exceed $48,600,000,000.

"UCC" means the California Uniform Commercial Code, as amended from time to time.

1.2 Use of Defined Terms. Any defined term used in the plural shall refer to all members of the relevant class, and any defined term used in the singular shall refer to any one or more of the members of the relevant class.

1.3 Accounting Terms. All accounting terms not specifically defined in this Agreement shall be construed in conformity with, and all financial data required to be submitted by this Agreement shall be prepared in conformity with, GAAP applied on a consistent basis, except as otherwise specifically prescribed herein. In the event that GAAP changes during the term of this Agreement such that the financial covenants contained in ARTICLE 5 would then be calculated in a different manner or with different components, (a) Borrower and Lender agree to amend this Agreement in such respects as are necessary to conform those covenants as criteria for evaluating Borrower' financial condition to substantially the same criteria as were effective

prior to such change in GAAP and (b) Borrower shall be deemed to be in compliance with the financial covenants contained in ARTICLE 5 during the 60-day period following any such change in GAAP if and to the extent that Borrower would have been in compliance therewith under GAAP as in effect immediately prior to such change.

1.4 Rounding. Any financial ratios required to be maintained by Borrower pursuant to this Agreement shall be calculated by dividing the appropriate component by the other component, carrying the result to one place more than the number of places by which such ratio is expressed in this Agreement and rounding the result up or down to the nearest number (with a round-up if there is no nearest number) to the number of places by which such ratio is expressed in this Agreement.

1.5 Exhibits and Schedules. All Exhibits and Schedules to this Agreement, either as originally existing or as the same may from time to time be supplemented, modified or amended, are incorporated herein by this reference. A matter disclosed on any Schedule shall be deemed disclosed on all Schedules.

1.6 Miscellaneous Terms. The term "or" is disjunctive; the term "and" is conjunctive. The term "shall" is mandatory; the term "may" is permissive. Masculine terms also apply to females; feminine terms also apply to males. The term "including" is by way of example and not limitation. The words "herein," "hereto," "hereof" and "hereunder" and words of similar import when used in any Loan Document shall refer to such Loan Document as a whole and not to any particular provision thereof. Article, Section, Exhibit and Schedule references are to the Loan Document in which such reference appears. The term "documents" includes any and all instruments, documents, agreements, certificates, notices, reports, financial statements and other writings, however evidenced, whether in physical or electronic form. In the computation of periods of time from a specified date to a later specified date, the word "from" means "from and including"; the words "to" and "until" each mean "to but excluding"; and the word "through" means "to and including."

ARTICLE 2
CREDIT FACILITY

2.1 Amount and Terms of Loan. Subject to the terms and conditions set forth in this Agreement, each Lender shall advance to Borrower, within one (1) Business Day after satisfaction of the conditions in Section 7.1, its Pro Rata Share of Advances of principal of the Loan and shall advance to Administrative Agent, within two Business Days after demand therefor by Administrative Agent, its Pro Rata Share of Administrative Agent Advances. The total amount of Advances of principal of the Loan shall not exceed $48,600,000. The principal of the Loan shall be disbursed to Borrower by the Lenders as follows:

(a) $48,300,000 will be disbursed to Borrower in a single Advance on the Closing Date; and

(b) $300,000 will be disbursed into the Replacement Reserve Account on the Closing Date. Borrower shall have the right to withdraw funds from the Replacement Reserve Account monthly, within five (5) Business Days days after delivery by Borrower to Administrative Agent of a requisition therefor, together with evidence reasonably satisfactory to Administrative Agent that Borrower has incurred costs during the previous calendar month in connection with performance of the deferred maintenance items listed on the property inspection report prepared by Marx Okubo Associates, Inc., and dated October 14, 2011 that are at least equal to the amount requisitioned .

If all or any portion of the Loan is prepaid or repaid at any time, it may not be reborrowed. The obligation of Borrower to repay the Loan, and interest accrued thereon, shall be evidenced by the Promissory Notes of even date herewith made by Borrower to the order of each Lender (collectively, the " Notes," and each a "Note"). The liabilities and obligations of each Lender hereunder shall be several and not joint, and neither Administrative Agent nor any Lender shall be responsible for the performance by any other Lender of its obligations hereunder.

2.2 Interest. Subject to the provisions of Section 2.5, the outstanding principal amount of the Loan shall bear interest, computed on the basis of a year of 360 days and the actual number of days elapsed, as follows:

(a) from the date of closing of the Loan through December 31, 2011, at the rate of 4.25% per annum; and

(b) for each Interest Period commencing with the Interest Period that commences on January 1, 2012, at the Eurodollar Rate applicable to such Interest Period.

2.3 Amortization of Loan. Borrower shall repay principal and interest on the Loan on the first day of each month (commencing January 1, 2012 and continuing through November 1, 2018) in an aggregate monthly amount as follows:

(a) The payment due in January, 2012 shall be $264,966.49;

(b) The payment due on the first day of each subsequent month shall be the payment that would be required in such month in order to fully amortize the principal of the Loan that is outstanding immediately following receipt and application of the payment for the immediately preceding month in equal monthly combined payments of principal and interest, with interest at the Eurodollar Rate applicable as of the first day of the immediately preceding month, over the portion of a 25-year period commencing January 1, 2012 that remains as of the first day of the immediately preceding month; and

(c) The entire unpaid balance of the Loan shall be paid in full by Borrower on the Maturity Date.

Administrative Agent will deliver to Borrower during each month a payment invoice stating the Eurodollar Rate in effect for such month, the balance of principal outstanding and the payment required pursuant to Section 2.3(b) on the first day of the next month.

Prior to the occurrence of an Event of Default, each such payment shall be applied first to accrued interest and then to principal. Notwithstanding anything to the contrary contained herein, the Loan may be prepaid from time to time in accordance with Section 2.3. Any prepayments hereunder will be in addition to any scheduled payments and shall be applied in inverse order of maturity.

2.4 Prepayments.

(a) In the event of the payment of any Eurodollar Principal other than on the last day of an Interest Period applicable thereto (including as a result of a Default), Borrower shall compensate Lender for the loss, cost and expense attributable to such payment. Such loss, cost or expense to Lender shall be deemed to include an amount determined by Lender to be the excess, if any, of (i) the amount of interest which would have accrued on such Eurodollar Principal had such payment not occurred, at the Adjusted LIBOR Rate that would have been applicable to such Eurodollar Loan, for the period from the date of such event to the last day of the then current Interest Period therefor (or, in the case of a failure to borrow, convert or continue, for the period that would have been the Interest Period for such Eurodollar Principal), over (ii) the amount of interest which would accrue on such Eurodollar Principal for such period at the interest rate which Lender would bid were it to bid, at the commencement of such period, for dollar deposits of a comparable amount and period from other banks in the eurodollar market. A certificate of Lender setting forth any amount or amounts that such Lender is entitled to receive pursuant to this Section and the basis for such calculation shall be delivered to Borrower and shall be conclusive absent manifest error. Borrower shall pay Lender the amount shown as due on any such certificate within ten (10) Business Days after receipt thereof. Nothing contained herein shall affect any breakage costs or premiums due under any Swap Agreement.

(b) Upon prepayment of the balance of the Loan at any time and for any reason other than at the end of an Interest Period, Borrower shall be obligated to pay the applicable amounts provided for in Section 2.4, whether such prepayment is made or occurs (i) as the result of a voluntary acceptance by Lender of a prepayment tendered by Borrower; (ii) by acceleration as a result of a Default by Borrower; (iii) in connection with any reinstatement of the Loan under any foreclosure proceedings or in connection with the purchase of the property at a foreclosure sale; or (iv) in connection with any right of redemption exercised by Borrower or any other party having the right to redeem or prevent any foreclosure of the Deed of Trust.

(c) Prepayments shall not relieve Borrower of its obligations to continue to make payments under the payment schedule. Rather, prepayments shall reduce the principal balance due on the Loan and may result in Borrower's making fewer payments with respect thereto. Borrower agrees not to send Lenders payments marked "paid in full", "without recourse", or similar language. If Borrower send such a payment, any Lender may accept it without losing any of that Lender's rights under this Agreement, and Borrower shall remain obligated to pay any further amounts owing to that Lender.

2.5 Default Rate. Upon the occurrence and during the continuance of any Event of Default, the outstanding principal amount of the Loan shall, at the option of Lender, thereafter bear interest, payable by Borrower in the manner and at the times provided in this Agreement and the Notes, at a rate per annum which is 5.00% per annum higher than the otherwise applicable rate, to the fullest extent permitted by applicable Laws (the " Default Rate").

2.6 Loan Fee. On the Closing Date, Borrower shall pay to Administrative Agent a loan fee in the amount of $486,000. Such loan fee shall be paid to Administrative Agent at Administrative Agent's Office, and shall be distributed among the Lenders as of the Closing Date in accordance with their respective Pro Rata Shares.

2.7 Agency Fee. On the Closing Date, Borrower shall pay to Administrative Agent an agency fee pursuant to a separate letter agreement between Borrower and Administrative Agent.

2.8 Non-Business Days. If any payment to be made by Borrower or any other Loan Party under any Loan Document shall come due on a day other than a Business Day, payment shall instead be considered due on the next succeeding Business Day and the extension of time shall be reflected in computing interest.

2.9 Manner and Treatment of Payments. All payments to be made by Borrower shall be made without condition or deduction for any counterclaim, defense, recoupment or setoff. Except as otherwise expressly provided herein, each payment hereunder or on the Notes or under any other Loan Document shall be made to Administrative Agent at Administrative Agent's Office in immediately available funds not later than 11:00 a.m., Pacific Time, on the day of payment specified herein (which must be a Business Day). All payments received after 11:00 a.m., Pacific Time, on any particular Business Day, shall be deemed received on the next succeeding Business Day, and such extension of time shall be reflected in computing interest or fees, as the case may be. All payments shall be made in lawful money of the United States of America.

2.10 Authorization to Debit Account. Borrower authorizes Administrative Agent to debit the Designated Deposit Account to effectuate payment of amounts due and payable to Administrative Agent and the Lenders under this Agreement. Any resulting overdraft in the Designated Deposit Account shall be payable on the next following Business Day.

2.11 Funding Source. Nothing in this Agreement shall be deemed to obligate any Lender to obtain the funds for the Loan in any particular place or manner or to constitute a representation by such Lender that it has obtained or will obtain the funds for the Loan in any particular place or manner.

2.12 [Intentionally Deleted].

2.13 Collateral. The Loan, together with all other Obligations, shall be secured by the Liens created by the Collateral Documents.

2.14 Increased Loan Costs. If any Lender shall have determined that the introduction of any applicable Law, rule, regulation or guideline regarding capital adequacy, or any change therein or any change in the interpretation or administration thereof by any central bank or other Governmental Agency charged with the interpretation or administration thereof, or compliance by such Lender or any corporation controlling such Lender, with any request, guidelines or directive regarding capital adequacy (whether or not having the force of Law) of any such central bank or other authority, affects or would affect the amount of capital required or expected to be maintained by such Lender or any corporation controlling such Lender and (taking into consideration such Lender's or such corporation's policies with respect to capital adequacy), determines that the amount of such capital is increased as a consequence of its obligations under this Agreement, then, within five (5) Business Days after delivery to Borrower of a statement setting forth the amount for which Borrower is responsible hereunder, and the basis of calculation of such amount, Borrower shall pay to such Lender (an " Affected Lender") such amounts sufficient to compensate such Lender for such increase. If an Affected Lender requires payment by Borrower of any amount pursuant to this Section 2.14, Borrower shall be obligated to pay such amount, but shall have the right, exercisable at any time within ninety (90) days after its payment of such amount, to pay off the entire portion of the Loan held by such Affected Lender. Borrower shall not be obligated to pay any premium or penalty, but shall be obligated to pay any amounts that are payable pursuant to Section 2.4, and pursuant to any Swap Contract, in connection with such payoff. Any payoff made pursuant to this Section 2.14 shall be distributed solely to the Affected Lender, and not to other Lenders, by Administrative Agent.

2.15 Swap Contracts. Borrower shall have the right to enter into a Swap Contract with respect to the Loan with any one or more of the Lenders, or with Affiliates of any one or more of the Lenders, provided that Administrative Agent gives its prior written consent to such Swap Contract, which consent shall not be unreasonably withheld. Borrower shall not enter into any Swap Contract or Swap Transaction with any Swap Counterparty that is not a Lender, or an Affiliate of a Lender. No Swap Contract with respect to the Loan shall have a term that extends beyond the Maturity Date.

ARTICLE 3
REPRESENTATIONS AND WARRANTIES

Borrower represents and warrants to Administrative Agent and each Lender that:

3.1 Existence and Qualification; Power; Compliance with Laws . Borrower is duly formed, validly existing and in good standing under the Laws of Delaware. Parent is duly formed, validly existing and in good standing under the Laws of Delaware. Each of Borrower and Parent is duly qualified or registered to transact business, and is in good standing, in California and each other jurisdiction in which the conduct of its business or the ownership or leasing of its Properties makes such qualification or registration necessary. Each of Borrower and Parent has all requisite power and authority to conduct its business, to own and lease its Property, to execute and deliver each Loan Document to which it is a party, and to perform the Obligations to be performed by it. As of the Closing Date, the chief executive offices of each of Borrower and Parent are located at the respective addresses set forth for notices in the signature pages to this Agreement. Borrower (a) is in compliance with all Laws and other legal requirements applicable to its business, (b) has obtained from each applicable Governmental Agency all authorizations, consents, approvals, orders, licenses and permits that are necessary for the transaction of its businesses, (c) has accomplished with each applicable Governmental Agency all filings, registrations and qualifications that are necessary for the transaction of its businesses, or (d) obtained from each applicable Governmental Agency exemptions from any of the items described in the foregoing clauses (b) and (c), as necessary for the transaction of its businesses.

3.2 Authority; Compliance with Other Agreements and Instruments and Government Regulations . The execution, delivery and performance by each Loan Party of the Loan Documents to which it is a party have been duly authorized by all necessary corporate action, and do not:

(a) require any consent or approval not heretofore obtained of any equity holder, security holder or creditor of such Loan Party;

(b) violate or conflict with any provision of such Loan Party's limited liability company agreement, charter, partnership agreement, articles of incorporation or bylaws, as applicable;

(c) result in or require the creation or imposition of any Lien (other than pursuant to the Collateral Documents) upon or with respect to any Property now owned or leased or hereafter acquired by such Loan Party;

(d) violate any Requirement of Law applicable to such Loan Party;

(e) constitute a "transfer of an interest" or an "obligation incurred" that is avoidable by a trustee under Section 548 of the Bankruptcy Code of 1978, as amended, or constitute a "fraudulent conveyance," "fraudulent obligation" or "fraudulent transfer" within the meanings of the Uniform Fraudulent Conveyances Act or Uniform Fraudulent Transfer Act, as enacted in any applicable jurisdiction; and

(f) result in a breach of or default under, or would, with the giving of notice or the lapse of time or both, constitute a breach of or default under, or cause or permit the acceleration of any obligation owed under, any indenture or loan or credit agreement or any other Contractual Obligation to which such Loan Party is a party or by which such Loan Party or any of its Property is bound or affected.

(g) Neither Borrower nor Parent is in material violation of, or material default under, any Requirement of Law, Contractual Obligation, or any indenture, loan or credit agreement.

3.3 No Governmental Approvals Required. Except as set forth in Schedule 3.3, no authorization, consent, approval, order, license or permit from, or filing, registration or qualification with, any Governmental Agency is required to authorize or permit under applicable Laws the execution, delivery and performance by each Loan Party of the Loan Documents to which it is a party.

3.4 Operation of Property. Borrower has obtained all material Permits from each Governmental Agency and other Person, and made all required or appropriate filings, that are necessary for Borrower to own its assets, to carry on its business (without interruption or restriction), and to execute, deliver and perform the Loan Documents to which it is a party. Borrower has not been notified by any Governmental Agency or other Person during the immediately preceding 24-month period that such Governmental Agency or Person has rescinded, imposed any limitation or restriction upon, or not renewed, or intends to rescind, impose any limitation or restriction upon or not renew, any such Permit.

3.5 [Intentionally Deleted]

3.6 [Intentionally Deleted]

3.7 Title to Property. As of the Closing, Borrower will have good and valid title to all the Property (other than assets which are the subject of a Capital Lease Obligation) free and clear of all Liens, other than Permitted Encumbrances.

3.8 Intangible Assets. Borrower owns, or possesses the right to use to the extent necessary in its business, all trademarks, trade names, copyrights, patents, patent rights, computer software, licenses and other Intangible Assets that are used in the conduct of its business as now operated and which are material to the condition (financial or otherwise), business or operations of Borrower, and no such Intangible Asset, to the best knowledge of Borrower, conflicts with the valid trademark, trade name, copyright, patent, patent right or Intangible Asset of any other Person to the extent that such conflict constitutes a Material Adverse Effect.

3.9 Litigation. Except for (a) any matter fully covered (subject to applicable deductibles and retentions) by insurance and with respect to which the insurance carrier has not denied coverage, nor issued any denial of claim, nor any other statement that the claim is in excess of coverage, and (b) any matter, or series of related matters, not fully covered by insurance (subject to applicable deductibles and retentions) involving a claim against Borrower or Parent which is, in the reasonable opinion of Borrower's or Parent's legal counsel, in an

amount less than $100,000, as of the Closing Date, there are no actions, suits, proceedings or investigations pending as to which Borrower has been served or has received notice or, to the best knowledge of Borrower, threatened against or affecting Borrower or Parent or their respective properties before any Governmental Agency. As of the Closing Date, there is no reasonable basis for any action, suit, proceeding or investigation against or affecting Borrower or Parent or any of their respective properties before any Governmental Agency which would constitute a Material Adverse Effect.

3.10 Binding Obligations. Each of the Loan Documents to which the Loan Parties are parties, when executed and delivered by such Loan Parties, will constitute the legal, valid and binding obligation of such Loan Parties, enforceable against such Loan Parties in accordance with its terms, except as enforcement may be limited by Debtor Relief Laws or equitable principles relating to the granting of specific performance and other equitable remedies as a matter of judicial discretion.

3.11 No Default. No event has occurred and is continuing that is a Default or an Event of Default.

3.12 ERISA. Neither Borrower nor Parent maintains a Pension Plan.

3.13 Regulations T, U and X; Investment Company Act. No part of the proceeds of the Loan will be used to purchase or carry, or to extend credit to others for the purpose of purchasing or carrying, any "margin stock" (as such term is defined in Regulations U and X) or will otherwise be used in violation of Regulations T, U and X. None of the Loan Parties are engaged principally, or as one of their important activities, in the business of extending credit for the purpose of purchasing or carrying any such "margin stock." None of the Loan Parties are required to be registered as an "investment company" under the Investment Company Act of 1940.

3.14 Disclosure. No written statement made by any Loan Party to Administrative Agent in connection with this Agreement, or in connection with the Loan, contains any untrue statement of a material fact or omits a material fact necessary in order to make the statement made not misleading in light of all the circumstances existing at the date the statement was made.

3.15 Tax Liability. The Loan Parties have filed all tax returns which are required to be filed, and have paid, or made provision for the payment of, all taxes with respect to the periods, Property or transactions covered by said returns, or pursuant to any assessment received by the Loan Parties, except such taxes, if any, as are being contested in good faith by appropriate proceedings and as to which adequate reserves have been established and maintained.

3.16 [Intentionally Deleted].

3.17 Hazardous Materials. Borrower has not at any time disposed of, discharged, released or threatened the release of any Hazardous Materials on, from or under the Real Property in violation of any Hazardous Materials Law. To the best knowledge of Borrower, no condition exists that violates any Hazardous Material Law affecting the Real Property, except as described in Schedule 3.17. No portion of the Real Property is or has been utilized by any Loan Party as a site for the manufacture of any Hazardous Materials. To the extent that any Hazardous

Materials are used, generated or stored by any Loan Party or any of its Subsidiaries on the Real Property, or transported to or from the Real Property by any Loan Party or any of its Subsidiaries, such use, generation, storage and transportation are in compliance with all Hazardous Materials Laws.

3.18 Regulatory and Legal Compliance. Borrower is in compliance in all material respects with all applicable Laws. Borrower has not received any notice from any Governmental Agency or any other Person of any alleged violation or noncompliance with any such Laws.

ARTICLE 4
AFFIRMATIVE COVENANTS
(OTHER THAN INFORMATION AND
REPORTING REQUIREMENTS)

So long as the Loan remains unpaid, or any other Obligation remains unpaid or unperformed, Borrower shall, unless Administrative Agent otherwise consents:

4.1 Payment of Taxes and Other Potential Liens. Pay and discharge promptly all taxes, assessments and governmental charges or levies imposed upon Borrower or its Property or any part thereof and upon its respective income or profits or any part thereof, except that Borrower shall not be required to pay or cause to be paid any tax, assessment, charge or levy that is not yet past due, or is being contested in good faith by appropriate proceedings so long as Borrower has established and maintains adequate reserves for the payment of the same.

4.2 Preservation of Existence. Preserve and maintain its existence as a California limited liability company and all material authorizations, rights, franchises, privileges, consents, approvals, orders, licenses, permits, or registrations from any Governmental Agency that are necessary for the transaction of its business and qualify and remain qualified to transact business in each jurisdiction in which such qualification is necessary in view of its business or the ownership or leasing of its Property.

4.3 Single Purpose Entity. At all times be a limited liability company that: (a) is formed or organized solely for the purpose of holding a direct ownership interest in the Collateral; (b) does not engage in any business other than the ownership, management and operation of the Collateral; (c) does not have any assets other than its interest in the Collateral; (d) does not have any Indebtedness other than that expressly permitted by this Agreement; (e) maintains books and records, and keeps accounts, separate and distinct from the books and records and accounts of any other Person; (f) is subject to all of the limitations on powers set forth in the organizational documents of Borrower in effect on the date of this Agreement; (g) holds itself out as being a Person and a legal entity separate and distinct from any other Person; (h) does not make any loans or advances to any other Person; and (i) maintains adequate capital for the normal obligations reasonably foreseeable in a business of its size and character.

4.4 Maintenance of Properties. Maintain, preserve and protect all of its Property in good order and condition, subject to wear and tear in the ordinary course of business, and not permit any waste of its property, except that (a) the failure to maintain, preserve and protect a particular item of Property that is at the end of its useful life or that is not of significant value, either intrinsically or to the operations of Borrower, shall not constitute a violation of this covenant and (b) the failure to repair damage to any portion of its Property resulting from a casualty that generates payment of insurance proceeds, which insurance proceeds are not permitted by Administrative Agent to be applied to payment of costs of repair to such portion of such Property pursuant to Section 2.12 of the Deed of Trust, shall not constitute a violation of this covenant so long as Borrower restores the remaining portion of such Property to a safe and operational condition.

4.5 Maintenance of Insurance. Maintain liability, casualty and other insurance as required by Section 2.11 of the Deed of Trust.

4.6 Compliance With Laws. Comply in all material respects with all Requirements of Laws, except that the Loan Parties and their Subsidiaries need not comply with a Requirement of Law then being contested by any of them in good faith by appropriate proceeding.

4.7 Inspection Rights. Upon reasonable notice, at any time during regular business hours and as often as reasonably requested (but not so as to materially interfere with the business of Borrower or any of their Subsidiaries) permit Administrative Agent, or any authorized employee or representative thereof, to examine, audit and make copies and abstracts from the records and books of account of Borrower, to visit and inspect the Real Property, and to discuss the affairs, finances and accounts of Borrower with any of their officers, key employees or accountants.

4.8 Keeping of Records and Books of Account. Keep adequate records and books of account reflecting all financial transactions in conformity with GAAP and in material conformity with all applicable requirements of any Governmental Agency having regulatory jurisdiction over the Borrower.

4.9 Compliance With Agreements. Promptly and fully comply with all Contractual Obligations under all material agreements, indentures, leases or instruments to which Borrower is a party.

4.10 Use of Proceeds. Use the proceeds of the Loan to finance Borrower's purchase of the Real Property.

4.11 Hazardous Materials Laws. Keep and maintain the Real Property and each portion thereof in compliance in all material respects with all Hazardous Materials Laws and promptly advise Administrative Agent in writing of (a) any and all enforcement, cleanup, removal or other governmental or regulatory actions instituted, completed or threatened in writing pursuant to any applicable Hazardous Materials Laws, (b) any and all claims made or threatened in writing by any third party against Borrower or the Real Property relating to damage, contribution, cost recovery, compensation, loss or injury resulting from any Hazardous Materials and (c) discovery by a Responsible Officer of Borrower of any occurrence or condition on any real property adjoining or in the vicinity of the Real Property that could reasonably be expected to cause the Real Property or any part thereof to be subject to any restrictions on the ownership, occupancy, transferability or use of the Real Property under any Hazardous Materials Laws.

4.12 Replacement Reserve Account.

(a) Deposit at least the following amounts in Cash into the Replacement Reserve Account on or before the first day of each calendar month, commencing January 1, 2012:

(1) From January 1, 2012 through and including January 1, 2015, $100,000;

(2) From February 1, 2015 through the Maturity Date, an amount equal to $0.20 per square foot of floor area in the Improvements.

Provided, that Borrower shall have no obligation to make any deposit into the Replacement Reserve Account at any time when the balance therein is equal to or greater than $2,000,000, and Borrower shall have the right to withdraw (and Administrative Agent shall consent to the withdrawal) any amount in the Replacement Reserve Account that is in excess of $2,000,000.

(b) Apply funds from the Replacement Reserve Account only as follows:

(1) The $300,000 in Loan proceeds deposited into the Replacement Reserve Account pursuant to Section 2.1(b) shall be applied by Borrower, on or before December 1, 2012, to payment of costs of performance of the deferred maintenance items listed on the property inspection report prepared by Marx Okubo Associates, Inc., and dated October 14, 2011;

(2) Funds deposited into the Replacement Reserve Account by Borrower pursuant to Section 4.12(a) shall be applied as follows:

(A) First, for payment of costs of repair of the building heating, ventilation and air conditioning system; and

(B) Second, for payment of costs of the replacement of the building plaza deck;

(3) After completion of repair of the building heating, ventilation and air conditioning system and the replacement of the building plaza deck, for payment of costs of such other replacement, repair and maintenance of the buildings, fixtures, equipment and other capital assets on the Real Property as Borrower shall elect to conduct.

The Replacement Reserve Account shall be a "blocked" deposit account with Administrative Agent, from which no amounts may be withdrawn without the consent of Administrative Agent, and shall be subject to a security interest, securing performance of the Obligations pursuant to a pledge and security agreement in form and content satisfactory to Administrative Agent.

4.13 Bank Account. Maintain its operating bank accounts with Administrative Agent.

4.14 Estoppel Certificates.

(a) Deliver to Administrative Agent, within 30 days after request therefor by Administrative Agent, a written statement in form and content reasonably approved by Administrative Agent, confirming the outstanding balance of principal of the Loan, whether, to the best knowledge of Borrower, a Default or Event of Default exists under this Agreement and, if so, what actions are being taken to cure the same.

(b) Exercise reasonable best efforts to cause tenants of the Real Property to deliver to Administrative Agent, within 30 days after request therefor by Administrative Agent, a written statement in form and content reasonably approved by Administrative Agent, confirming the operative terms of their leases and whether any default or potential default exists thereunder.

4.15 Performance and Funding of Deferred Maintenance .

(a) Complete the work of repair of the the heating, ventilation and air conditioning systems of the buildings on the Real Property (the " HVAC Work") and replacement of the plaza deck on the Real Property (the " Plaza Deck Replacement") before December 1, 2014.

(b) Within 90 days after the date of funding of the first Advance of principal of the Loan, deliver to Administrative Agent (i) at least three bids from licensed contractors reasonably approved by Administrative Agent for entry into guaranteed maximum price contracts under which such contractors will perform the HVAC Work, and (ii) at least three bids from licensed contractors reasonably approved by Administrative Agent for entry into guaranteed maximum price contracts under which such contractors will perform the Plaza Deck Replacement. If the aggregate cost of the HVAC Work and the Plaza Deck Replacement, pursuant to such bids, will exceed $3,600,000, Borrower shall deposit into the Replacement Reserve Account, on or before the first day of each calendar month commencing with the fourth month after the month in which the first Advance of principal of the Loan is funded, an amount equal to one-thirty-sixth of the excess over $3,600,000.

ARTICLE 5
NEGATIVE COVENANTS

So long as the Loan remains unpaid, or any other Obligation remains unpaid or unperformed, Borrower shall not, unless Administrative Agent otherwise consents:

5.1 Investments. Make or suffer to exist any Investment, other than:

(a) Investments in existence on the Closing Date and disclosed on Schedule 5.1;

(b) Investments consisting of Cash Equivalents;

(c) Investments consisting of the extension of credit to customers or suppliers of the Loan Parties in the ordinary course of business and any Investments received in satisfaction or partial satisfaction thereof; and

(d) Investments representing all or a portion of the sales price of Property sold or services provided to another Person.

5.2 ERISA. At any time, permit any Pension Plan to: (a) engage in any non-exempt "prohibited transaction" (as defined in Section 4975 of the Code); (b) fail to comply with ERISA or any other applicable Laws; (c) incur any material "accumulated funding deficiency" (as defined in Section 302 of ERISA); or (d) terminate in any manner.

5.3 Change in Nature of Business. Conduct any business other than ownership and operation of the Real Property, or own any Property other than the Real Property and the other Collateral.

5.4 Liens; Negative Pledges; Sales and Leasebacks. Create, incur, assume or suffer to exist any Lien or Negative Pledge of any nature upon or with respect to any of its Property or Collateral or agree to grant a Negative Pledge for the benefit of any other party other than Administrative Agent, or engage in any sale and leaseback transaction with respect to any of its respective Property or Collateral, whether now owned or hereafter acquired, except:

(a) Liens and Negative Pledges under the Loan Documents; and

(b) Permitted Encumbrances.

5.5 Indebtedness and Contingent Obligations. Create, incur, assume or suffer to exist any Indebtedness, or any Contingent Obligation in an aggregate amount in excess of $1,000,000, except:

(a) Indebtedness and Contingent Obligations under the Loan Documents;

(b) Indebtedness under Swap Contracts entered into with Swap Counterparties; provided that no Swap Contract entered into with respect to the Loan shall have a scheduled termination date later than the Maturity Date;

(c) Indebtedness and Contingent Obligations owed by Borrower to Parent, so long as (i) no Event of Default exists or would result from such proposed Indebtedness or Contingent Obligation or from the application of the proceeds thereof; (ii) all such Indebtedness and Contingent Obligations shall be unsecured and subordinated in right of payment to the payment in full of the Obligations, and (iii) any such Indebtedness and Contingent Obligations has been approved in advance, in writing, by Administrative Agent, which approval shall not be unreasonably withheld; and

(d) Indebtedness consisting of Capital Lease Obligations, or otherwise incurred to finance the purchase or construction of capital assets (which shall be deemed to exist if the Indebtedness is incurred at or within 90 days before or after the purchase or construction of the capital asset), or to refinance any such Indebtedness.

5.6 Transactions with Affiliates. Enter into any transaction of any kind (including, without limitation, the extension of any credit or the incurrence of any indebtedness, the making or receipt of any distribution, the purchase, sale, lease or exchange of any property, or the payment of any fees) with any Affiliate of Borrower without the prior written consent of Lender; provided, however, Borrower may, without the prior consent of Lender, do the following: (i) distribute excess Cash to Parent; (ii) borrow money from Parent to the extent permitted pursuant to Section 5.5, above; (iii) obtain capital infusions from Parent; (iv) enter into leases for vacant space in the Property, on no less than then-current market terms.

5.7 Financial Covenants.

(a) Debt Coverage Ratio. Permit the Debt Coverage Ratio, as of the last day of each June and December to be less than 1.30:1, unless Borrower shall, within fifteen (15) days after receipt of demand therefor at any time in which the Debt Coverage Ratio is less than 1.30:1, deposit into the DCR Collateral Account Cash in an amount equal to twice the difference between Borrower's annualized Net Operating Income for the most recent Calculation Period and the amount of annual Net Operating Income that would have been needed in order to generate a Debt Coverage Ratio of 1.30:1 for such Calculation Period. The DCR Collateral Account shall be a "blocked" deposit account with Administrative Agent," from which no amounts may be withdrawn without the consent of the Administrative Agent (which consent shall only be given with approval from the Required Lenders), and shall be subject to a security interest, securing performance of the Obligations pursuant to a pledge and security agreement in form and content satisfactory to Administrative Agent. If, with respect to any later Calculation Period, the amount required to be deposited into such account is less than the amount in such account, Administrative Agent shall permit Borrower to withdraw the excess Cash from the DCR Collateral Account.

(b) Loan-to-Value Ratio. If, at any time during the term of the Loan, the Loan-to-Value Ratio is greater than seventy percent (70%), Borrower shall, within fifteen (15) days after receipt of demand therefor from Administrative Agent (which demand shall be made upon direction from the Required Lenders), make a payment in reduction of principal of the Loan in an amount sufficient to cause the Loan-to-Value Ratio to be sixty percent (60%); provided, however, that Administrative Agent and Lenders shall have the right to require a payment in reduction of principal pursuant to this Section 5.7(b) only once during the term of the Loan.

5.8 Leasing. Enter into any lease, license or other agreement under which any Person is granted any right to occupy any portion of the Real Property (a) which is not negotiated at arm's length (other than leases, licenses and other agreements with Affiliates of Parent, which shall not be at arm's length) and which does not provide for rent and other terms that are reasonably consistent with those terms that prevail, at the time of entry into such lease, license or other agreement, in the market for similar office space, and (b) without furnishing a copy of the lease, license or other agreement to Administrative Agent prior to execution thereof. Failure by Administrative Agent to give notice to Borrower that Administrative Agent believes that a proposed lease, license or agreement is not in compliance with this Section 5.8 within five (5) Business Days after Administrative Agent's receipt of the copy thereof furnished by Borrower shall be deemed a waiver by Administrative Agent to object to such lease, license or agreement.

5.9 Partition; Zoning. Without the prior written consent of the Required Lenders, seek to partition or subdivide the Real Property or alter the zoning or land use classification thereof.

ARTICLE 6
INFORMATION AND REPORTING REQUIREMENTS

6.1 Financial and Business Information. So long as the Loan remains unpaid, or any other Obligation remains unpaid or unperformed, Borrower shall, unless the Required Lenders otherwise consent, deliver to Administrative Agent at Borrower' sole expense:

(a) with respect to the Fiscal Year ended December 31, 2011, as soon as available and without unreasonable delay, and with respect to each Fiscal Year ending thereafter, as soon as available but in any event within 120 days after the end of such Fiscal Year:

(1) the balance sheet as at the end of such Fiscal Year and related statements of income, operations and cash flows of Borrower for such Fiscal Year, setting forth in each case in comparative form the figures for the previous Fiscal Year, all in reasonable detail, prepared using a methodology that may not conform to GAAP but fairly presents the financial condition of Borrower as of the dates and for the periods indicated, in conformity with Borrower's usual and customary practices consistently applied throughout the periods covered, accompanied by a certificate signed by the chief executive officer, chief financial officer, treasurer or controller of Borrower to the effect that such statements are true and correct in all material respects; and

(2) the consolidated and consolidating balance sheet of Parent and its Subsidiaries, as at the end of such Fiscal Year, and the related consolidated and consolidating statements of income, operations and cash flows of Parent and its Subsidiaries for such Fiscal Year, setting forth in comparative form the figures for the previous Fiscal Year and showing changes in shareholders' equity for such Fiscal Year, audited by Ernst & Young or another firm of certified public accountants reasonably approved by Administrative Agent.

(b) with respect to the Fiscal Quarter ended March 31, 2012, as soon as available and without unreasonable delay, and with respect to each Fiscal Quarter ending thereafter (other than the fourth Fiscal Quarter of any Fiscal Year), as soon as available but in any event within 45 days after the end of such Fiscal Quarter:

(1) the balance sheet of Borrower as at the end of such Fiscal Quarter and the related statements of income, operations and cash flows of Borrower for such Fiscal Quarter, all in reasonable detail, prepared using a methodology that may not conform to GAAP but fairly presents the financial condition of Borrower as of the dates and for the periods indicated, in conformity with Borrower's usual and customary practices consistently applied throughout the periods covered, accompanied by a certificate signed by the chief executive officer, chief financial officer, treasurer or controller of Borrower to the effect that such statements are true and correct in all material respects;

(2) the consolidated and consolidating balance sheets of Parent and its Subsidiaries, as at the end of such Fiscal Quarter, the related consolidated and consolidating statements of income or operations of Parent and its Subsidiaries for such Fiscal Quarter and for the portion of the Fiscal Year then ended, and the related consolidated and consolidating statements of changes in shareholders' equity and cash flows for the portion of the Fiscal Year then ended, in each case setting forth in comparative form, the figures for the corresponding Fiscal Quarter of the previous Fiscal Year and the corresponding portion of the previous Fiscal Year, all in reasonable detail, accompanied by a certificate signed by the chief executive officer, chief financial officer, treasurer or controller of each Loan Party to the effect that such statements were prepared in accordance with GAAP and are fairly stated in all material respects.

(c) within 45 days after each June 30 and December 31, an operating statement for the Real Property for the six months ended with such date, in form and level of detail reasonably acceptable to Administrative Agent;

(d) within 10 days after the end of each calendar month, (i) a rent roll for the Real Property stating the name of each tenant in occupancy, the suite number(s) occupied by such tenant, the date of such tenant's lease, the rent and CAM charges payable by such tenant, the amount of any prepaid rents or security deposits held with respect to such tenant, the amounts of any delinquencies in payment by such tenant, and a description of any disputes or defaults in connection with such tenant's lease or occupancy, and (ii) a statement of leasing activity with respect to all unoccupied space, in form and level of detail reasonably acceptable to Administrative Agent;

(e) promptly upon the request of Administrative Agent, copies of any detailed audit reports or recommendations submitted to Borrower or to Parent by independent accountants in connection with the accounts or books of Borrower or Parent or Parent's Subsidiaries or any audit thereof;

(f) as soon as practicable, and in any event within five (5) Business Days after a Responsible Officer of Borrower becomes aware of the existence of any condition or event which constitutes a Default, written notice specifying the nature and period of existence thereof and specifying what action the Borrower is taking or proposes to take with respect thereto;

(g) promptly upon a Responsible Officer of Borrower becoming aware that (i) any Person has commenced a legal proceeding with respect to a claim against Borrower that is $100,000 or more in excess of the amount thereof that is fully covered by insurance (subject to deductibles permitted hereunder) or (ii) any Person has commenced a legal proceeding with respect to a claim against Borrower under a contract with respect to a claim in excess of $100,000 or which otherwise may reasonably be expected to result in a Material Adverse Effect, a written notice describing the pertinent facts relating thereto and what action Borrower is taking or proposes to take with respect thereto;

(h) proof of payment of all taxes, including taxes on Real Property, upon the request of Administrative Agent;

(i) within ten (10) days after filing, but in any event within nine months after the end of each Fiscal Year (commencing with the Fiscal Year ended July 31, 2010), copies of each Borrower's and Parent's state and federal income tax returns, together with all schedules for the tax period ended in such Fiscal Year;

(j) any event, occurrence or condition that has had, or is reasonably likely to have, a Material Adverse Effect upon Borrower or Parent; and

(k) such other data and information regarding the Borrower's or Parent's Subsidiaries and their businesses as from time to time may be reasonably requested by Administrative Agent.

6.2 Compliance Certificates. So long as the Loan remains unpaid, or any other Obligation remains unpaid or unperformed, Borrower shall, unless Administrative Agent otherwise consents, deliver to Administrative Agent, at Borrower' sole expense, concurrently with the financial statements required pursuant to Sections 6.1(a) and 6.1(b), a duly completed Compliance Certificate signed by the chief executive officer, chief financial officer, treasurer or controller of the manager of Borrower.

ARTICLE 7
CONDITIONS

7.1 Conditions Precedent to Closing. The obligation of Lenders to make the Loan or to take, fulfill or perform any other action under this Agreement is subject to the following conditions precedent:

(a) Administrative Agent shall have received all of the following, each of which shall be originals unless otherwise specified, each properly executed by a Responsible Officer of each Loan Party that is party thereto, each dated as of the Closing Date and each in form and substance satisfactory to Administrative Agent and its legal counsel (unless otherwise specified or, in the case of the date of any of the following, unless Administrative Agent otherwise agrees or directs):

(i) this Agreement;

(ii) the Notes;

(iii) the Parent Guaranty;

(iv) the Deed of Trust in a form acceptable for recordation in the Official Records of Los Angeles County, California;

(v) proper financing statements in form appropriate for filing under the Uniform Commercial Code of all applicable jurisdictions, covering such portion of the Collateral (including fixtures) as Administrative Agent may deem necessary or desirable in order to perfect any Liens created under the Collateral Documents;

(vi) confirmation of the first priority of the UCC-1 financing statement that perfects Administrative Agent's security interest in personal property;

(vii) assurance from the Title Company that it is committed to issue its ALTA lender's title insurance policy insuring the validity and priority of the Lien of the Deed of Trust, subject only to such exceptions as may be acceptable to Lender, in the amount of $48,600,000, and with such endorsements as to coverage (other than a survey endorsement) and reinsurance commitments as Administrative Agent may require;

(viii) the Environmental Indemnity;

(ix) a subordination and nondisturbance agreement executed by Parent, covering all leases of space in the Real Property to Parent;

(x) estoppel certificates received by Borrower in accordance with the terms of the purchase and sale agreement pursuant to which Borrower acquired the Real Property;

(xi) the Opinion of Counsel;

(xii) such documentation as Administrative Agent may reasonably require to establish the due organization, valid existence and good standing of each Loan Party, its qualification to engage in business in each jurisdiction in which it is engaged in business or required to be so qualified, its authority to execute, deliver and perform any Loan Documents to which it is a party, and the identity, authority and capacity of each Responsible Officer thereof authorized to act on its behalf, including certified copies of charter documents and amendments thereto, bylaws and operating agreements and amendments thereto, certificates of good standing or qualification to engage in business, tax clearance certificates, certificates of corporate resolutions, incumbency certificates, certificates of Responsible Officers, and the like;

(xiii) evidence that all actions necessary or, in the opinion of Administrative Agent, desirable to perfect and protect the Liens of the Collateral Documents have been taken;

(xiv) if Administrative Agent requires, an environmental questionnaire prepared and certified by Borrower and an environmental survey of the Real Property prepared by an environmental consultant satisfactory to Administrative Agent;

(xv) evidence of the casualty, liability and other insurance coverage as required under this Agreement and Section 2.11 of the Deed of Trust; and

(xvi) such other assurances, certificates, documents, consents or opinions as Lender may reasonably require.

(b) Borrower shall have paid the loan fee pursuant to Section 2.6, the agency fee pursuant to Section 2.7, and the reasonable costs and expenses of Lender in connection with the negotiation, preparation, execution and delivery of the Loan Documents pursuant to Section 10.3.

(c) Unless waived by Lender, Borrower shall have paid all fees, charges and disbursements of counsel to Lender (directly to such counsel if requested by Lender) to the extent invoiced prior to or on the Closing Date, plus such additional amounts of such fees, charges and disbursements as shall constitute its reasonable estimate of such fees, charges and disbursements incurred or to be incurred by it through the closing proceedings; provided that such estimate shall not thereafter preclude a final settling of accounts between Borrower and Lender.

(d) Borrower shall have deposited Cash in an amount not less than $300,000 into the Replacement Reserve.

(e) The representations and warranties of Borrower contained in ARTICLE 3 shall be true and correct.

(f) No circumstance or event shall have occurred that constitutes a Material Adverse Effect as of the Closing Date.

(g) Borrower and any other Loan Parties shall be in compliance with all the terms and provisions of the Loan Documents, and no Default or Event of Default shall have occurred and be continuing.

ARTICLE 8

EVENTS OF DEFAULT AND REMEDIES UPON EVENT OF DEFAULT

8.1 Events of Default. The existence or occurrence of any one or more of the following events, whatever the reason therefor and under any circumstances whatsoever, shall constitute an "Event of Default":

(a) Borrower fails to pay any principal or interest on the Loan, or any portion thereof,

(1) in the case of a scheduled monthly payment under Section 2.3(b), on or before the later to occur of (A) the date that is ten (10) days after the same becomes due, or (B) the date that is two (2) Business Days after the date of Borrower's receipt of the monthly invoice required to be delivered by Administrative Agent pursuant to Section 2.3; or

(2) in the case of any payment of principal or interest on the Loan, or any portion thereof, other than a scheduled monthly payment under Section 2.3(b), on or before the date that is ten (10) days after the same becomes due; or

(b) Borrower fails to pay any fees or other amounts payable under this Agreement or the other Loan Documents, or any portion thereof, within the period specified in the applicable Loan Document or absent a specified period, within ten (10) days after demand therefor; or

(c) Borrower fails to perform or observe any of the covenants contained in Sections 4.2, 5.3, 5.7 or ARTICLE 6; or

(d) Borrower or Parent fails to perform or observe any other covenant or agreement (not specified in clauses (a) through (c) above) contained in any Loan Document on its part to be performed or observed and does not cure such failure for a period of ten (10) Business Days after notice from Administrative Agent of such failure; provided, if such failure is susceptible of cure but cannot reasonably be cured within such ten day period, Borrower or Parent fails to promptly commence to cure such failure and do not effect a cure within thirty (30) Business Days after such notice from Administrative Agent; or

(e) Any representation or warranty made in any Loan Document, or in any certificate delivered pursuant to any Loan Document, proves to have been incorrect in any material respect when made or reaffirmed; or

(f) Borrower or Parent (i) fails to pay the principal, or any principal installment, of any present or future Indebtedness, or any guaranty of present or future Indebtedness, on its part to be paid, when due (or within any stated grace period), whether at the stated maturity, upon acceleration, by reason of required prepayment or otherwise or (ii) fails to perform or observe any other term, covenant or agreement on its part to be performed or observed, or suffers any event of default to occur, in connection

with any present or future Indebtedness, or of any guaranty of present or future Indebtedness, if as a result of such failure or sufferance any holder or holders thereof (or a lender or trustee on its or their behalf) has the right to declare such Indebtedness due before the date on which it otherwise would become due or the right to require Borrower or Parent to redeem or purchase, or offer to redeem or purchase, all or any portion of such Indebtedness; or

(g) Any Loan Document, at any time after its execution and delivery and for any reason other than the agreement or action of Administrative Agent or the Lenders or satisfaction in full of all the Obligations, ceases to be in full force and effect or is declared by a court of competent jurisdiction to be null and void, invalid or unenforceable as to any material right or remedy on the part of Administrative Agent or Lenders (other than with respect to Article 9, to which this subsection (g) shall not be applicable); or any Collateral Document ceases to create a valid and effective Lien in any portion of the Collateral; or Borrower or Parent denies in writing that it has any or further liability or obligation under any Loan Document to which it is a party, or purports to revoke, terminate or rescind same; or

(h) A final judgment against Borrower or Parent is entered for the payment of money in excess of $100,000 (not covered by insurance or for which an insurer has reserved its rights) and, absent procurement of a stay of execution, such judgment remains unsatisfied for 30 calendar days after the date of entry of judgment, or in any event later than five days prior to the date of any proposed sale thereunder; or any writ or warrant of attachment or execution or similar process is issued or levied against all or any material part of the property of Borrower or Parent and is not released, vacated or fully bonded within 30 calendar days after its issue or levy; or

(i) Borrower or Parent institutes or consents to the institution of any proceeding under a Debtor Relief Law relating to it or to all or any material part of its Property, or is unable or admits in writing its inability to pay its debts as they mature, or makes an assignment for the benefit of creditors; or applies for or consents to the appointment of any receiver, trustee, custodian, conservator, liquidator, rehabilitator or similar officer for it or for all or any material part of its Property; or any receiver, trustee, custodian, conservator, liquidator, rehabilitator or similar officer is appointed without the application or consent of that Person and the appointment continues undischarged or unstayed for 30 calendar days; or any proceeding under a Debtor Relief Law relating to any such Person or to all or any part of its Property is instituted without the consent of that Person and continues undismissed or unstayed for 30 calendar days; or

(j) The occurrence of an Event of Default (as such term is or may hereafter be specifically defined in any other Loan Document) under any other Loan Document; or

(k) Any Pension Plan maintained by Parent is finally determined by the PBGC to have an “accumulated funding deficiency” as that term is defined in Section 302 of ERISA in excess of an amount equal to 5% of the consolidated total assets of such Borrower as of the most recently ended Fiscal Quarter; or

(l) The occurrence of any Change in Control with respect to Borrower; or

(m) The occurrence of any set of events or circumstances that constitute a Material Adverse Effect; provided, as to any such set of events or circumstances not described as an Event of Default under the preceding subparagraphs (a) through (l), Borrower shall have the right to notice and opportunity to cure such Material Adverse Effect in accordance with subparagraph (d) above; or

(n) The occurrence of an event of default (after expiration of applicable notice and cure periods without cure) under the Parent Credit Facility.

8.2 Remedies Upon Event of Default. If any Event of Default occurs and is continuing, Administrative Agent may (and shall, upon direction from the Required Lenders) take any or all of the following actions, without notice to (except as expressly provided for in any Loan Document) or demand upon Borrower, which are hereby expressly waived by each Borrower:

(a) Take possession of the Real Property in person or through a court-appointed receiver, and do anything required, necessary or advisable in Lender's sole discretion to fulfill the obligations of Borrower hereunder. Without restricting the generality of the foregoing, Borrower hereby appoints Administrative Agent as Borrower' lawful attorney-in-fact with full power of substitution in the premises to perform any of the following actions:

(i) without inquiring into and without respect to the validity thereof, pay, settle or compromise all existing bills and claims which may be Liens, or avoid such bills and claims becoming Liens, against the Real Property or any portion thereof;

(ii) prosecute and defend actions or proceedings in connection with the Real Property; and

(iii) do any and every act that Borrower might do on their own behalf with respect to the Real Property, it being expressly agreed that this power of attorney shall be a power coupled with an interest and cannot be revoked;

(b) Declare the unpaid principal amount of the Loan, all interest accrued and unpaid thereon, and all other amounts owing or payable hereunder or under any other Loan Document to be immediately due and payable, without presentment, demand, protest or other notice of any kind, all of which are hereby expressly waived by Borrower;

(c) Otherwise enforce any and all Liens and security interests created pursuant to the Collateral Documents (including, without limitation, foreclosure of the Deed of Trust by judicial action, implementation of the power of sale granted pursuant to the Deed of Trust), implement action of the assignment of rents made pursuant to the Deed of Trust and realization upon the security interests granted to Lender pursuant to the Deed of Trust and this Agreement;

(d) Suspend or terminate all obligations of Lender and all rights of Borrower and any other Loan Parties under the Loan Documents, except that Lender may waive the Event of Default, which waiver or determination shall apply equally to, and shall be binding upon, Lender;

(e) Proceed in accordance with applicable Laws to protect, exercise and enforce the rights and remedies of Lender under the Loan Documents against Borrower and any other Loan Party and such other rights and remedies as are provided by Law or equity;

provided, however, that upon the occurrence of any Event of Default described in Section 8.1(i), all obligations of Lenders and all rights of Borrower and any other Loan Parties under the Loan Documents shall automatically be terminated (except that Administrative Agent may waive the Event of Default, which waiver or determination shall apply equally to, and shall be binding upon, all Lenders), and all interest and other amounts as aforesaid shall automatically become due and payable without further act of Lender.

Borrower acknowledges and agrees that this Section does not limit the right of any Administrative Agent to (i) exercise self-help remedies such as but not limited to, set off against any account in which Administrative Agent holds a security interest as collateral security for the Obligations, (ii) initiate judicial or non-judicial foreclosure against any real or personal property Collateral, (iii) exercise any judicial or power of sale rights, or (iv) act in a court of Law to obtain an interim remedy such as, but not limited to, injunctive relief, writ of possession or appointment of a receiver, or additional or supplementary remedies.

8.3 Application of Funds. The order and manner in which Administrative Agent's rights and remedies are to be exercised shall be determined by Administrative Agent (subject to Article 9) in its sole discretion, and all payments received by Administrative Agent shall be applied first to the costs and expenses of Administrative Agent (including reasonable attorneys' fees and disbursements and the reasonably allocated costs of attorneys employed by Administrative Agent), second, to the payment of accrued and unpaid interest due under any Loan Documents to and including the date of such application, and third, to the payment of all other Obligations. No application by Administrative Agent of partial payments received from or on behalf of Borrower will cure any Event of Default, or prevent acceleration, or continued acceleration, of amounts payable under the Loan Documents or Swap Contracts, or prevent the exercise, or continued exercise, of rights or remedies of Administrative Agent, Lenders or Swap Counterparties hereunder or thereunder or at Law or in equity, except as required under applicable Laws.

ARTICLE 9

APPOINTMENT AND AUTHORIZATION OF ADMINISTRATIVE AGENT.

9.1 Authorization of Administrative Agent. Each Lender hereby irrevocably (subject to Section 9.11) appoints, designates and authorizes Administrative Agent to take such action on its behalf under the provisions of this Agreement and each other Loan Document and to exercise such powers and perform such duties as are expressly delegated to it by the terms of this Agreement and any other Loan Document, together with such powers as are reasonably incidental thereto. Notwithstanding any provision to the contrary contained elsewhere herein or in any other Loan Document, Administrative Agent shall not have any duties or responsibilities except those expressly set forth herein, nor shall Administrative Agent have or be deemed to have any fiduciary relationship with any Lender. No implied covenants, functions, responsibilities, duties, obligations or liabilities shall be read into this Agreement or any other Loan Document shall otherwise exist against Administrative Agent. Without limiting the generality of the foregoing sentence, the use of the term " agent" herein and in the other Loan Documents with reference to Administrative Agent is not intended to connote any fiduciary or other implied (or express) obligations arising under agency doctrine of any applicable law. Instead, such term is used merely as a matter of market custom, and is intended to create or reflect only an administrative relationship between independent contracting parties.

9.2 No Waiver by Lender. No individual Lender or group of Lenders shall have any right to amend or waive, or consent to the departure of any party from any provision of any Loan Document, or secure or enforce the obligations of Borrower or any other party pursuant to the Loan Documents or otherwise. All such rights, on behalf of Administrative Agent or any Lender or Lenders, shall be held and exercised solely by and at the option of Administrative Agent for the pro rata benefit of Lenders. Such rights, however, are subject to the rights of a Lender or Lenders, as expressly set forth in this Agreement and to approve matters or direct Administrative Agent to take or refrain from taking action as set forth in this Agreement. Except as expressly otherwise provided in this Agreement and the other Loan Documents, Administrative Agent shall have and may use its reasonable discretion with respect to exercising or refraining from exercising any discretionary rights or taking or refraining from taking any actions which Administrative Agent is expressly entitled to exercise or take under this Agreement, the Notes, the Deed of Trust, the Parent Guaranty or the other Loan Documents, including (i) the determination if and to what extent matters or items subject to Administrative Agent's satisfaction are acceptable or otherwise within its discretion, (ii) the making of Administrative Agent Advances, and (iii) the exercise of remedies pursuant to this Agreement any other Loan Document and any action so taken or not taken shall be deemed consented to by Lenders.

9.3 Receivership or Insolvency. In case of the pendency of any receivership, insolvency, liquidation, bankruptcy, reorganization, arrangement, adjustment, composition or other judicial proceeding relative to Borrower or Parent, no individual Lender or group of Lenders shall have the right, and Administrative Agent (irrespective of whether the principal of the loan shall then be due and payable as herein expressed or by declaration or otherwise and irrespective of whether Administrative Agent shall have made any demand on Borrower) shall be exclusively entitled and empowered on behalf of itself and Lenders, by intervention in such proceeding or otherwise:

(a) to file and prove a claim for the whole amount of the principal and interest owing and unpaid in respect of the Loan and all other obligations that are owing and unpaid and to file such other documents as may be necessary or advisable in order to have the claims of Lenders and Administrative Agent (including any claim for the reasonable compensation, expenses, disbursements and advances of Lenders and Administrative Agent and their respective agents and counsel and all other amounts due Lenders and Administrative Agent); and

(b) to collect and receive any monies or other property payable or deliverable on any such claims and to distribute the same in accordance with the terms of this Agreement;

and any custodian, receiver, assignee, trustee, liquidator, sequestrator or other similar official in any such judicial proceeding is hereby authorized by each Lender to make such payments to Administrative Agent and, in the event that Administrative Agent shall consent to the making of such payments directly to Lenders, to pay to Administrative Agent any amount due for the reasonable compensation, expenses, disbursements and advances of Administrative Agent and its agents and counsel in accordance with the terms of this Agreement.

Nothing contained herein shall be deemed to authorize Administrative Agent to authorize or consent to or accept or adopt on behalf of any Lender any plan of reorganization, arrangement, adjustment or composition affecting the Indebtedness or the rights of Lenders except as approved by the Required Lenders or to authorize Administrative Agent to vote in respect of the claims of Lenders except as approved by the Required Lenders in any such proceeding.

9.4 Delegation of Duties. Administrative Agent may execute any of its duties under this Agreement, the Notes, the Deed of Trust, the Parent Guaranty or any other Loan Document by or through agents, employees or attorneys-in-fact and shall be entitled to advice of counsel and other consultant experts concerning all matters pertaining to such duties. Administrative Agent shall not be responsible for the negligence or misconduct of any agent or attorney-in-fact that it selects with reasonable care.

9.5 Liability of Administrative Agent. No Agent-Related Persons shall (i) be liable to any Lender for any action taken or omitted to be taken by any of them under or in connection with this Agreement, the Notes, the Deed of Trust, the Parent Guaranty or any other Loan Document or the transactions contemplated hereby (except for its own gross negligence or willful misconduct), or (ii) be responsible in any manner to any Lender for any recital, statement, representation or warranty made by Borrower or any subsidiary or Affiliate of Borrower, or any officer thereof, contained in this Agreement, the Notes, the Deed of Trust, the Parent Guaranty or any other Loan Document, or in any certificate, report, statement or other document referred to or provided for in, or received by Administrative Agent under or in connection with, this Agreement, the Notes, the Deed of Trust, the Parent Guaranty or any other Loan Document, or the validity, effectiveness, genuineness, enforceability or sufficiency of this Agreement, the Notes, the Deed of Trust, the Parent Guaranty or any other Loan Document, or for any failure of Borrower or any other party to any Loan Document to perform its obligations hereunder or thereunder. No Agent-Related Person shall be under any obligation to any Lender to ascertain or to inquire as to the observance or performance of any of the agreements contained in, or conditions of, this Agreement or any other Loan Document, or to inspect the properties, books or records of Borrower, Parent or any of their Affiliates.

9.6 Reliance by Administrative Agent. Administrative Agent shall be entitled to rely, and shall be fully protected in relying, upon any writing, resolution, notice, consent, certificate, affidavit, letter, telegram, facsimile, telex or telephone message, statement or other document or conversation believed by it to be genuine and correct and to have been signed, sent or made by the proper person or persons, and upon advice and statements of legal counsel (including counsel to any party to the Loan Documents), independent accountants and other experts selected by Administrative Agent with reasonable care. Administrative Agent shall be fully justified in failing or refusing to take any action under this Agreement, the Notes, the Deed of Trust, the Parent Guaranty or any other Loan Document unless it shall first receive such advice or concurrence of the Required Lenders or all Lenders if required hereunder as it deems appropriate and, if it so requests, it shall first be indemnified to its satisfaction by Lenders against any and all liability and expense which may be incurred by it by reason of taking or continuing to take any such action. Administrative Agent shall in all cases be fully protected in acting, or in refraining from acting, under this Agreement, the Notes, the Deed of Trust, the Parent Guaranty or any other Loan Document in accordance with a request or consent of the Required Lenders or such greater number of Lenders as may be expressly required hereby in any instance, and such request and any action taken or failure to act pursuant thereto shall be binding upon all Lenders. In the absence of written instructions from the Required Lenders or such greater number of Lenders, as expressly required hereunder, Administrative Agent may take or not take any action, at its discretion, unless this Agreement specifically requires the consent of the Required Lenders or such greater number of Lenders.

9.7 Notice of Default. Administrative Agent shall not be deemed to have knowledge or notice of the occurrence of any Event of Default, unless Administrative Agent shall have gained actual knowledge in its capacity as a Lender or shall have received written notice from a Lender or from Borrower referring to this Agreement, describing such Event of Default. Administrative Agent will notify Lenders promptly of its receipt of any such notice. Administrative Agent shall take such action with respect to such Event of Default as may be requested by the Required Lenders in accordance with Article 8; provided, however, that unless and until Administrative Agent has received any such request, Administrative Agent may (but shall not be obligated to) take such action, or refrain from taking such action, with respect to such Event of Default as it shall deem advisable or in the best interest of Lenders.

9.8 Credit Decision; Disclosure of Information by Administrative Agent.

(a) Each Lender acknowledges that no Agent-Related Person has made any representation or warranty to it, and that no act by Administrative Agent hereafter taken, including any consent to and acceptance of any assignment or review of the affairs of Borrower, and/or Parent, shall be deemed to constitute any representation or warranty by any Agent-Related Person to Lenders or any of them as to any matter. Each Lender represents to Administrative Agent that it has, independently and without reliance upon any Agent-Related Person and based on such documents and information as it has deemed appropriate, made its own appraisal of and investigation into the business, prospects, operations, property, financial and other condition and creditworthiness of

Borrower and Parent, and all applicable bank or other regulatory laws relating to the transactions contemplated hereby, and made its own decision to enter into this Agreement and to extend credit to Borrower hereunder. Each Lender also represents that it will, independently and without reliance upon any Agent-Related Person and based on such documents and information as it shall deem appropriate at the time, continue to make its own credit analysis, appraisals and decisions in taking or not taking action under this Agreement, the Notes, the Deed of Trust, the Parent Guaranty and the other Loan Documents, and to make inquiries of Administrative Agent as it deems necessary to inform itself as to the business, prospects, operations, property, financial and other condition and creditworthiness of Borrower and Parent. Notwithstanding the foregoing, no individual Lender shall have the right to require that Borrower or Parent provide to such Lender independent access to the Real Property or independent delivery to such Lender of notices, reports, documents or information not specifically required of Borrower under Article 6 of this Agreement.

(b) Administrative Agent upon its receipt shall provide each Lender such notices, reports and other documents expressly required to be furnished by Borrower or Parent to Administrative Agent. Administrative Agent shall also provide each Lender and/or make available for each Lender's inspection during reasonable business hours and at the Lender's expense, upon the Lender's written request therefor: (i) copies of the Loan Documents; (ii) such information as is then in Administrative Agent's possession in respect of the current status of principal and interest payments and accruals in respect of the Loan; (iii) copies of all current financial statements in respect of Borrower or Parent or other person liable for payment or performance by Borrower of any obligations under the Loan Documents, then in Administrative Agent's possession with respect to the Loan; and (iv) other current factual information then in Administrative Agent's possession with respect to the Loan and bearing on the continuing creditworthiness of Borrower or any Parent, or any of their respective Affiliates; provided, that Administrative Agent shall not be obligated to provide any Lender with any information in violation of law or any contractual restrictions on the disclosure thereof (provided such contractual restrictions shall not apply to distributing to a Lender factual and financial information expressly required to be provided herein). Except as set forth above, Administrative Agent shall not have any duty or responsibility to provide Lenders or any of them with any credit or other information concerning the business, prospects, operations, property, financial and other condition or creditworthiness of Borrower or Parent or any of their respective Affiliates which may come into the possession of any of Agent-Related Persons.

9.9 Indemnification of Administrative Agent. Whether or not the transactions contemplated hereby are consummated, Lenders hereby jointly and severally indemnify upon demand each Agent-Related Person (to the extent not reimbursed by or on behalf of Borrower and without limiting the obligation of Borrower to do so if required by applicable provisions of the Loan Documents), and hold harmless each Agent-Related Person from and against any and all indemnified liabilities incurred by it; provided, however, that no Lender shall be liable for the payment to any Agent-Related Person of any portion of such indemnified liabilities to the extent determined in a final, non-appealable judgment by a court of competent jurisdiction to have resulted from such Agent-Related Person's own gross negligence or willful misconduct; provided, further, that no action taken in accordance with the directions of the Required Lenders

shall be deemed to constitute gross negligence or willful misconduct for purposes of this Section 9.9. Without limitation of the foregoing, to the extent that Administrative Agent is not reimbursed by or on behalf of Borrower, each Lender shall reimburse Administrative Agent upon demand for its Pro Rata Share of any costs or out-of-pocket expenses (including attorneys' fees) incurred by Administrative Agent in the performance of its duties under this Agreement. The undertaking in this Section 9.9 shall survive the payment of all Indebtedness hereunder and the resignation or replacement of Administrative Agent.

9.10 Administrative Agent in Individual Capacity. Administrative Agent, in its individual capacity, and its Affiliates may make loans to, issue letters of credit for the account of, accept deposits from, acquire equity interests in and generally engage in any kind of banking, trust, financial advisory, underwriting or other business with any party to the Loan Documents and their respective Affiliates as though Administrative Agent were not Administrative Agent hereunder and without notice to or consent of Lenders. Lenders acknowledge that Borrower and East West Bank or its Affiliate have entered or may enter into Swap Contracts. A portion of the Loan may be funded to honor Borrower's payment obligations under the terms of such Swap Contracts, and Lenders shall have no right to share in any portion of such payments except to the extent of their rights as Swap Counterparties. Lenders acknowledge that, pursuant to such activities, East West Bank or its Affiliates may receive information regarding any party to the Loan Documents or their respective Affiliates (including information that may be subject to confidentiality obligations in favor of such parties or such parties' Affiliates) and acknowledge that Administrative Agent shall be under no obligation to provide such information to them. With respect to its Pro Rata Share of the Loan, East West Bank shall have the same rights and powers under this Agreement as any other Lenders and may exercise such rights and powers as though it were not Administrative Agent or party to Swap Contracts, and the terms "**Lender**" and "**Lenders**" include East West Bank in its individual capacity.

9.11 Successor Administrative Agent. Administrative Agent may, and at the request of the Required Lenders as a result of Administrative Agent's gross negligence or willful misconduct or default in performing its duties under this Agreement shall, resign as Administrative Agent upon 30 days' notice to Lenders. If Administrative Agent resigns under this Agreement, the Required Lenders shall appoint from among Lenders a successor administrative agent for Lenders, which successor administrative agent shall be consented to by Borrower at all times other than during the existence of an Event of Default (which consent of Borrower shall not be unreasonably withheld or delayed). If no successor administrative agent is appointed prior to the effective date of the resignation of Administrative Agent, Administrative Agent may, after consulting with Lenders and Borrower, appoint a successor administrative agent from among Lenders. Upon the acceptance of its appointment as successor administrative agent hereunder, such successor administrative agent shall succeed to all the rights, powers and duties of the retiring Administrative Agent and the term "Administrative Agent" shall mean such successor administrative agent, and the retiring Administrative Agent's appointment, powers and duties as Administrative Agent shall be terminated. After any retiring Administrative Agent's resignation hereunder as Administrative Agent, the provisions of this Section 9.12 and other applicable Sections of this Agreement shall inure to its benefit as to any actions taken or omitted to be taken by it while it was Administrative Agent under this Agreement. If no successor administrative agent has accepted appointment as Administrative Agent by the date which is thirty (30) days following a retiring Administrative Agent's notice of resignation, the retiring Administrative Agent's resignation shall nevertheless thereupon become effective and Lenders shall perform all of the duties of Administrative Agent hereunder until such time, if any, as the Required Lenders appoint a successor agent as provided for above.

9.12 Releases, Acquisition and Transfers of Collateral.

(a) Lenders hereby irrevocably authorize Administrative Agent to transfer or release any lien on, or after foreclosure or other acquisition of title by Administrative Agent on behalf of the Lenders to transfer or sell, any Collateral (A) upon the termination of the Commitments and payment and satisfaction in full of all Obligations, (B) in connection with a release, transfer or sale of a lien or property if such transfer or release is conditioned upon receipt by Administrative Agent of the payment required pursuant to Section 4.2(c), and (C) after foreclosure or other acquisition of title to any Foreclosed Real Property, (i) for a purchase price of not less than 80% of the value indicated in the most recent appraisal of such Foreclosed Real Property obtained by Administrative Agent made in accordance with regulations governing Administrative Agent, or (ii if approved by the Required Lenders.

(b) If an Event of Default has occurred hereunder, Administrative Agent may take title to any of the Collateral to which it is entitled as a result of exercise of its remedies under the Deed of Trust and applicable law, in its name and in its capacity as administrative agent, for the benefit of all Lenders according to their Pro Rata Shares.

(c) Administrative Agent may take title to Foreclosed Real Property in its name and in its capacity as administrative agent or in the name of an Affiliate of Administrative Agent, but for the benefit of all Lenders according to their Pro Rata Shares. Administrative Agent and all Lenders hereby expressly waive and relinquish any right of partition with respect to the Foreclosed Real Property so acquired. After Foreclosed Real Property is acquired, Administrative Agent shall appoint and retain one or more persons (individually and collectively, the "Property Manager") experienced in the management, leasing, sale and/or disposition of similar properties; provided, however, that Administrative Agent shall not appoint or retain any Affiliate of Administrative Agent as the Property Manager unless the terms of such appointment or retention are approved in writing by the Required Lenders. After consulting with the Property Manager, Administrative Agent shall prepare a written plan for completion of construction (if required), operation, management, improvement, maintenance, repair, sale and disposition of the Foreclosed Real Property and a budget for the aforesaid, which may include a reasonable management fee payable to Administrative Agent (the "Business Plan"). Administrative Agent will deliver the Business Plan not later than the sixtieth (60th) day after the on the date of the foreclosure sale or recordation of the deed in lieu of foreclosure (the " Acquisition Date") to each Lender with a written request for approval of the Business Plan. If the Business Plan is approved by the Required Lenders, Administrative Agent and the Property Manager shall adhere to the Business Plan until a different Business Plan is approved by the Required Lenders. Administrative Agent may propose an amendment to the Business Plan as it deems appropriate, which shall also be subject to Required Lender approval. If the Business Plan (as may be amended) proposed by Administrative Agent is not approved by the Required Lenders, or if

sixty (60) days have elapsed following the Acquisition Date without a Business Plan being proposed by Administrative Agent, any Lender may propose an alternative Business Plan, which Administrative Agent shall submit to all Lenders for approval by the Required Lenders. If an alternative Business Plan is approved by the Required Lenders, Administrative Agent may appoint one of the approving Lenders to implement the alternative Business Plan. Notwithstanding any other provision of this Agreement, unless in violation of an approved Business Plan or otherwise in an emergency situation, Administrative Agent shall have the right but not the obligation to take any action in connection with the Collateral (including those with respect to property taxes, insurance premiums, completion of construction, operation, management, improvement, maintenance, repair, sale and disposition), or any portion thereof.

(d) Upon request by Administrative Agent or Borrower at any time, Lenders will confirm in writing Administrative Agent's authority to sell, transfer or release any such liens of particular types or items of Collateral or Foreclosed Real Property pursuant to this Section 9.12; provided, however, that (i) Administrative Agent shall not be required to execute any document necessary to evidence such release, transfer or sale on terms that, in Administrative Agent's opinion, would expose Administrative Agent to liability or create any obligation or entail any consequence other than the transfer, release or sale without recourse, representation or warranty, and (ii) such transfer, release or sale shall not in any manner discharge, affect or impair the obligations of Borrower other than those expressly being released.

(e) Except as provided in Section 2.14 and except as otherwise provided below with respect to Defaulting Lenders, aggregate principal and interest payments, payments for indemnified liabilities, proceeds of foreclosure or sale of the Foreclosed Real Property, and net operating income from the collateral during any period it is owned by Administrative Agent on behalf of Lenders ("Payments") shall be apportioned among the Lenders in accordance with their Pro Rata Shares and payments of any fees (other than fees designated for Administrative Agent's separate account) shall, as applicable, be apportioned among the Lenders in accordance with their Pro Rata Shares. Notwithstanding anything to the contrary in this Agreement, all Payments that would otherwise be due and payable to Defaulting Lenders shall instead be paid to and specially apportioned among the Administrative Agent and Lenders other than Defaulting Lenders in accordance with their Pro Rata Shares. Such special apportionment shall be in the proportion that any amounts required to be paid by Lenders pursuant to this Agreement which are not paid by Defaulting Lenders and are paid by Administrative Agent or any Lender other than a Defaulting Lender bears to the total amount not paid by such Defaulting Lender. Such special apportionment shall be made until Administrative Agent and Lenders have been paid in full for all of the amounts they advanced in place of the Defaulting Lender. All Payments shall be remitted to Administrative Agent and all such Payments not constituting payment of specific fees, and all proceeds of the Collateral received by Administrative Agent, shall be applied first, to pay any fees, indemnities, costs, expenses and reimbursements then due to Administrative Agent from Borrower; second, to pay any fees, costs, expenses and reimbursements then due to Lenders from Borrower; third, to pay, pro rata, interest and late charges due in respect of the Obligations and Administrative Agent Advances; fourth, to pay or prepay, pro rata,

principal of the Obligations and Administrative Agent Advances; fifth, to pay any indebtedness of Borrower under Swap Contracts; and last, to Borrower, if required by law, or Lenders in accordance with their Pro Rata Shares at the termination of the Total Commitment.

9.13 Benefit. The terms and conditions of this Article 9 are inserted for the sole benefit of Administrative Agent and Lenders, and to the extent provided in this Section 9.13, for the benefit of Borrower. Except for those provisions described in this Section 9.13 which benefit Borrower, the terms and conditions of Article 9 may be waived by Administrative Agent and Lenders in whole or in part, with or without terms or conditions, without prejudicing Administrative Agent's or Lenders' rights to later assert them in whole or in part. Notwithstanding the foregoing or anything else in this Agreement to the contrary, Sections 9.1, 9.2, 9.3, 9.14 and 9.15 of this Article 9 are also for the benefit of Borrower, and may not be waived in whole or in part by Administrative Agent or any Lender or Lenders, or amended, without the prior written consent of Borrower.

9.14 No Obligation by Borrower; Right of Reliance. Borrower shall have no obligations under this Article 9, express or implied, and no duty of investigation or inquiry as to the performance or non-performance by Administrative Agent or any Lender of its obligations under this Article 9 or Section 10.2, or any other provision of this Agreement pursuant to which Administrative Agent may not act without the consent or approval of any one or more Lenders.

9.15 Right of Reliance on Administrative Agent. Borrower and Parent shall have the right to rely upon the written directions, authorizations, consents, approvals, waivers and decisions (collectively, "Directions") of the Administrative Agent in all matters pertaining to the Loan Documents and performance thereunder, without more and without investigation or inquiry as to the authority of Administrative Agent to so act and notwithstanding any actual knowledge on the part of Borrower or Parent to the contrary.

9.16 Timing of Payments by Administrative Agent. Administrative Agent shall exercise its reasonable best efforts to pay to each Lender its Pro Rata Share of any principal or interest paid by Borrower (except for payments under Section 2.14, which shall be paid only to the Affected Lender) within one (1) Business Day after Administrative Agent's receipt of payment thereof from Borrower, and shall in any event make each such payment within three (3) Business Days after Administrative Agent's receipt of payment thereof from Borrower.

9.17 Records of Advances and Payments. Each Lender shall use its best efforts to keep a record of the Loan made by it and payments received by it with respect to its Note, and such record shall be presumptive evidence of the amounts owing. Notwithstanding the foregoing sentence, no Lender shall be liable to any Loan Party for any failure to keep such a record, and no such failure shall affect the amount of the Obligations hereunder.

9.18 Required Lenders' Direction of Appraisal. Administrative Agent shall cause the Property to be appraised and shall invoke the provisions of Section 5.7(b) if it is directed to do so by the Required Lenders.

ARTICLE 10
MISCELLANEOUS

10.1 Cumulative Remedies; No Waiver. The rights, powers, privileges and remedies of Administrative Agent and the Lenders provided herein or in the Notes, the Deed of Trust, the Parent Guaranty or any other Loan Document are cumulative and not exclusive of any right, power, privilege or remedy provided by Law or equity. No failure or delay on the part of Administrative Agent or any Lender in exercising any right, power, privilege or remedy may be, or may be deemed to be, a waiver thereof; nor may any single or partial exercise of any right, power, privilege or remedy preclude any other or further exercise of the same or any other right, power, privilege or remedy.

10.2 Amendments; Consents. Administrative Agent and Lenders shall be entitled to amend (whether pursuant to a separate intercreditor agreement or otherwise) any of the terms, conditions or agreements set forth in Article 9 or as to any other matter in this Agreement or any other Loan Document respecting payments to Administrative Agent or Lenders as among themselves or the required number of Lenders to approve or disapprove any matter or to take or refrain from taking any action, without the consent of Borrower or any other person or entity or the execution by Borrower or any other person or entity of any such amendment or intercreditor agreement. Subject to the foregoing, Administrative Agent may amend or waive any provision of this Agreement, or any other Loan Document, or consent to any departure by any party to the Loan Documents therefrom with the prior written consent of the Required Lenders and Borrower or the applicable party to the Loan Documents, as the case may be, and each such waiver or consent shall be effective only in the specific instance and for the specific purpose for which given; provided further, however, no such amendment, waiver or consent shall, without the consent of all Lenders (other than Defaulting Lenders):

(a) extend or increase the Commitment of any Lender without the written consent of such Lender (it being understood that a waiver of an Event of Default shall not constitute an extension or increase in any Lender's Commitment);

(b) postpone any date fixed by this Agreement, the Notes or any other Loan Document for any payment or mandatory prepayment of principal, interest, fees or other amounts due to Lenders (or any of them) hereunder or under the Notes or any other Loan Document, without the written consent of each Lender directly affected thereby;

(c) reduce the principal of, or the rate of interest specified herein on, any portion of the Loan, or any fees or other amounts payable under this Agreement, the Notes or any other Loan Document, without the written consent of each Lender directly affected thereby; provided;

(d) change the definition of "Pro Rata Share" or "Required Lenders" or any other provision hereof specifying the number or percentage of Lenders required to amend, waive or otherwise modify any rights hereunder or make any determination or grant any consent hereunder, without the written consent of each Lender;

(e) amend this Section 10.2 without the written consent of each Lender;

(f) release the liability of Borrower or any existing Parent without the written consent of each Lender;

(g) permit the sale, transfer, pledge, mortgage or assignment of any Collateral or any direct or indirect interest in Borrower, except as expressly permitted under the Loan Documents as in effect on the Closing Date, without the written consent of each Lender;

(h) transfer or release any lien on, or after foreclosure or other acquisition of title by Administrative Agent on behalf of Lenders transfer or sell, any Collateral, except as provided in Section 9.12 as in effect on the Closing Date without the written consent of each Lender; or

(i) amend the Guaranty, or release Parent from any of its obligations thereunder;

and, provided, further, that no amendment, waiver or consent shall, unless in writing and signed by Administrative Agent in addition to the Lenders required above, affect the rights or duties of Administrative Agent under this Agreement, the Notes or any other Loan Document. Notwithstanding anything to the contrary herein, no Defaulting Lender shall have any right to approve or disapprove any amendment, waiver or consent hereunder, except that the Commitment of such Lender may not be increased without the consent of such Lender. The granting or withholding of the consents required pursuant to this Section 10.2 shall be within the sole discretion of the applicable Lenders.

10.3 Costs, Expenses and Taxes. Borrower shall pay on demand the reasonable costs and expenses of Administrative Agent in connection with the negotiation, preparation, execution and delivery of the Loan Documents, and of Administrative Agent in connection with the administration, amendment, waiver, refinancing, restructuring, reorganization (including a bankruptcy reorganization) and enforcement or attempted enforcement of the Loan Documents, and any matter related thereto, including, without limitation, filing fees, recording fees, title insurance fees, appraisal fees, search fees and other out-of-pocket expenses and the reasonable fees and out-of-pocket expenses of any legal counsel (including the allocated fees and all disbursements and other expenses of any internal legal counsel), independent public accountants and other outside experts retained by Administrative Agent, and including, without limitation, any costs, expenses or fees incurred or suffered by Administrative Agent in connection with or during the course of any bankruptcy or insolvency proceedings of Borrower; provided that Administrative Agent shall, in connection with any such amendment, waiver, refinancing, restructuring, reorganization, enforcement or attempted enforcement of the Loan Documents use commercially reasonable efforts to avoid duplicative efforts by legal counsel on behalf of Administrative Agent. Borrower shall pay any and all documentary and other taxes (other than income or gross receipts taxes generally applicable to banks) and all costs, expenses, fees and charges payable or determined to be payable in connection with the filing or recording of this Agreement, any other Loan Document or any other instrument or writing to be delivered hereunder or thereunder, or in connection with any transaction pursuant hereto or thereto, and

shall reimburse, hold harmless and indemnify Administrative Agent from and against any and all loss, liability or legal or other expense with respect to or resulting from any delay in paying or failure to pay any tax, cost, expense, fee or charge or that any of them may suffer or incur by reason of the failure of Borrower or Parent to perform any of its Obligations. Any amount payable to Administrative Agent under this Section 10.3 shall bear interest at the Default Rate from the fifth (5th) Business Day following a demand for payment specifying the costs demanded in reasonable detail. Notwithstanding anything in this Section 10.3 to the contrary, Borrower and Parent shall not be liable or responsible for costs or fees incurred by Administrative Agent or any Lender in connection with the syndication of the Loan, the negotiation or enforcement of Article 9 or any other agreement by or between the Lenders or the Administrative Agent, or any dispute by or between Administrative Agent or any Lenders with respect to their respective rights or obligations as between each other.

10.4 Survival of Representations and Warranties. All representations and warranties contained herein or in any other Loan Document, or in any certificate or other writing delivered by or on behalf of any one or more of the Loan Parties, will survive the making of the Loan hereunder and the execution and delivery of the Notes, and have been or will be relied upon by Lender, notwithstanding any investigation made by Administrative Agent or on its behalf.

10.5 Notices. Except as otherwise expressly provided in the Loan Documents, all notices, requests, demands, directions and other communications provided for hereunder or under any other Loan Document must be in writing and must be mailed, delivered or sent by overnight courier to the appropriate party at the address set forth on the signature pages of this Agreement or other applicable Loan Document or, as to any party to any Loan Document, at any other address as may be designated by it in a written notice sent to all other parties to such Loan Document in accordance with this Section 10.5. Except as otherwise expressly provided in any Loan Document, if any notice, request, demand, direction or other communication required or permitted by any Loan Document is given by mail it will be effective on the earlier of receipt or the third Business Day after deposit in the United States mail with first class or airmail postage prepaid; or if given by personal delivery, when actually delivered.

10.6 Execution of Loan Documents. Unless Lender otherwise specifies with respect to any Loan Document, this Agreement and any other Loan Document may be executed in any number of counterparts and any party hereto or thereto may execute any counterpart; as to each Loan Document, all of such executed counterparts, when taken together will be deemed to be the same instrument. The execution of this Agreement or any other Loan Document by any party hereto or thereto will not become effective until counterparts hereof or thereof, as the case may be, have been executed by all the parties hereto or thereto.

10.7 Binding Effect; Assignment.

(a) This Agreement and the other Loan Documents shall be binding upon and shall inure to the benefit of the parties hereto and thereto and their respective successors and assigns, subject to the other restrictions contained in this Section 10.7.

(b) Borrower may not assign its rights hereunder or thereunder or any interest herein or therein without the prior written consent of Administrative Agent. Any assignment by Borrower without the prior written consent of Administrative Agent shall be void; provided that no Person other than Administrative Agent and the Lenders shall have any rights under this sentence.

(c) No Lender shall have the right to assign all or a portion of its rights or delegate any of its obligations under the Loan Documents without the express prior written consent of Administrative Agent, which consent may be granted or withheld by Administrative Agent in its sole, but reasonable, discretion. In connection with exercise of its discretion, Administrative Agent shall have the right to consider the number of Lenders and the size of the Pro Rata Shares that would result from a proposed assignment, as well as the financial strength and sophistication of the proposed assignee. In any event, the proposed assignee must be a commercial bank that is either (i) organized under the laws of the United States of America or any state thereof, or (ii) organized under the laws of any other nation provided that such bank has a branch or agency located within the United States of America. If and to the extent a Lender receives the consent of Administrative Agent to make such an assignment, Borrower shall execute new Notes to reflect the changed Pro Rata Shares of the affected Lenders, and the assigning Lender and the assignee shall execute such documents to evidence the assignment as Administrative Agent shall reasonably require, including an assumption by the assignee of the obligations of the assigning Lender with respect to the portion of the Pro Rata Share of the Total Commitment and outstanding Advances and Administrative Agent Advances, a relinquishment of rights of the assigning Lender with respect to such portion of the Pro Rata Share of the Total Commitment and outstanding Advances and Administrative Agent Advances and a confirmation of the Pro Rata Shares of the assigning Lender and the assignee. Promptly following satisfaction of the foregoing conditions, Administrative Agent shall give notice to Borrower and all of the Lenders of the effectiveness of the assignment and of the revised Pro Rata Shares of the Lenders. Borrower shall not be obligated to pay or reimburse Administrative Agent or any Lender (including any assigning Lender or assignee Lender) for any costs incurred in connection with any assignment or prospective assignment by a Lender.

10.8 Lien on Deposits and Property in Possession of Administrative Agent . The only accounts maintained by Borrower with Administrative Agent which shall be subject to a security agreement in favor of Administrative Agent shall be the DCR Collateral Account and the Replacement Reserve Account. If an Event of Default has occurred and is continuing, Administrative Agent may, to the extent permitted by applicable Laws, exercise its rights under Article 9 of the Uniform Commercial Code and other applicable Laws and apply any funds in those accounts against the Obligations.

10.9 Indemnity by Borrower. Borrower agrees to indemnify, save and hold harmless Administrative Agent and each Lender and their respective directors, officers, agents, attorneys and employees, successors and assigns (each, an " Indemnitee," and collectively, the "Indemnitees") from and against: (a) any and all claims, demands, actions or causes of action that are asserted against any Indemnitee by any Person that relates to the Collateral, or the ownership or operation thereof by Borrower, (b) any and all claims, demands, actions or causes of action if the claim, demand, action or cause of action arises out of or relates to the Loan, the use or contemplated use of proceeds of the Loan, the relationship of Borrower and Lenders under

this Agreement or any transaction contemplated by this Agreement, in each instance other than with respect to Article 9 or the relationship by and between the Lenders and the Administrative Agent;, (c) any administrative or investigative proceeding by any Governmental Agency arising out of or related to a claim, demand, action or cause of action described in clauses (a) or (b) above other than related to Article 9 or the relationship by and between the Lenders and the Administrative Agent; and (d) any and all liabilities, losses, costs or expenses (including attorneys' fees and disbursements and other professional services) that any Indemnitee suffers or incurs as a result of the assertion of any foregoing claim, demand, action or cause of action; provided that no Indemnitee shall be entitled to indemnification for any loss caused by its own gross negligence or willful misconduct as finally determined in a non appealable decision by a court of competent jurisdiction. If any claim, demand, action or cause of action is asserted against any Indemnitee, such Indemnitee shall reasonably, promptly notify Borrower, but the failure to so promptly notify Borrower shall not affect Borrower' obligations under this Section. Any Indemnitee that proposes to settle or compromise any claim or proceeding for which Borrower may be liable for payment of indemnity hereunder shall give Borrower written notice of the terms of such proposed settlement or compromise reasonably in advance of settling or compromising such claim or proceeding and shall obtain Borrower' prior consent, which consent shall not unreasonably be withheld. Each Indemnitee is authorized to employ counsel in enforcing its rights hereunder and in defending any claim, demand, action or cause of action covered by this Section 10.9; provided that each Indemnitee shall endeavor, but shall not be obligated, in connection with any matter covered by this Section 10.9 which also involves other Indemnitees, to use reasonable efforts to avoid unnecessary duplication of effort by counsel for all Indemnitees. Any obligation or liability of Borrower to any Indemnitee under this Section 10.9 shall survive the expiration or termination of this Agreement and the repayment of all Loans and the payment and performance of all other Obligations owed to Lender. Notwithstanding anything in this Section 10.9 to the contrary, the foregoing obligations on the part of Borrower shall not apply to any claim, cause of action or dispute arising out of or related to the syndication of the Loan, the matters set forth in Article 9 of this Agreement, or the relationship by or between the Administrative Agent and any one or more Lenders, or any of them.

10.10 Nonliability of Administrative Agent and Lenders . Borrower acknowledges and agrees that:

(a) Any inspections of any Property of Borrower made by or through Administrative Agent or any Lender is for purposes of administration of the Loan Documents only and Borrower are not entitled to rely upon the same;

(b) By accepting or approving anything required to be observed, performed, fulfilled or given to Administrative Agent or any Lender pursuant to the Loan Documents, neither Administrative Agent nor any Lender shall be deemed to have warranted or represented the sufficiency, legality, effectiveness or legal effect of the same, or of any term, provision or condition thereof, and such acceptance or approval thereof shall not constitute a warranty or representation to anyone with respect thereto by Administrative Agent or any Lender;

(c) The relationship between Borrower and Administrative Agent or any Lender is, and shall at all times remain, solely that of a Borrower and Lender; neither Administrative Agent nor any Lender shall under any circumstance be construed to be partners or joint venturers of Borrower or Borrower's Affiliates; neither Administrative Agent nor any Lender shall under any circumstance be deemed to be in a relationship of confidence or trust or a fiduciary relationship with Borrower or Borrower's Affiliates, or to owe any fiduciary duty to Borrower or Borrower's Affiliates; neither Administrative Agent nor any Lender undertakes or assumes any responsibility or duty to Borrower or Borrower's Affiliates to select, review, inspect, supervise, pass judgment upon or inform Borrower or Borrower's Affiliates of any matter in connection with their Property or the operations of Borrower or Borrower's Affiliates; Borrower and Borrower's Affiliates shall rely entirely upon their own judgment with respect to such matters; and any review, inspection, supervision, exercise of judgment or supply of information undertaken or assumed by Administrative Agent or any Lender in connection with such matters is solely for the protection of Administrative Agent or such Lender and neither Borrower nor any other Person is entitled to rely thereon; and

(d) No Indemnitee shall be responsible or liable to any Person for any loss, damage, liability or claim of any kind relating to injury or death to Persons or damage to Property or other loss, damage, liability or claim caused by the actions, inaction or negligence of Borrower or its Affiliates and Borrower hereby indemnifies and holds each Indemnitee harmless from any such loss, damage, liability or claim. In no event shall any Indemnitee be responsible for any punitive, exemplary, consequential or special damages.

10.11 No Third Parties Benefited. This Agreement is made for the purpose of defining and setting forth certain obligations, rights and duties of Borrower, Administrative Agent and the Lenders in connection with the Loan, and is made for the sole benefit of Borrower, Administrative Agent and the Lenders, and their respective permitted successors and assigns. Except as provided in Sections 10.7 and 10.9, no other Person shall have any rights of any nature hereunder or by reason hereof.

10.12 Further Assurances. Borrower shall, at its sole expense and without expense to Administrative Agent or any Lender, do, execute and deliver such further acts and documents as Lender from time to time reasonably requires for the assuring and confirming unto Administrative Agent and the Lenders the rights hereby created or intended now or hereafter so to be, or for carrying out the intention or facilitating the performance of the terms of any Loan Document.

10.13 Integration. This Agreement, together with the other Loan Documents, comprises the complete and integrated agreement of the parties on the subject matter hereof and supersedes all prior agreements, written or oral, on the subject matter hereof. In the event of any conflict between the provisions of this Agreement and those of any other Loan Document, the provisions of this Agreement shall control and govern; provided that the inclusion of supplemental rights or remedies in favor of Administrative Agent or any Lender in any other Loan Document shall not be deemed a conflict with this Agreement. Each Loan Document was drafted with the joint participation of the respective parties thereto and shall be construed neither against nor in favor of any party, but rather in accordance with the fair meaning thereof.

10.14 Governing Law. This agreement and the other loan documents shall be governed by, and construed in accordance with, the law of the State of California.

10.15 Severability of Provisions. Any provision in any Loan Document that is held to be inoperative, unenforceable or invalid as to any party or in any jurisdiction shall, as to that party or jurisdiction, be inoperative, unenforceable or invalid without affecting the remaining provisions or the operation, enforceability or validity of that provision as to any other party or in any other jurisdiction, and to this end the provisions of all Loan Documents are declared to be severable.

10.16 Headings. Article and Section headings in this Agreement and the other Loan Documents are included for convenience of reference only and are not part of this Agreement or the other Loan Documents for any other purpose.

10.17 Time of the Essence. Time is of the essence of the Loan Documents.

10.18 JURY TRIAL WAIVER. EACH PARTY HERETO HEREBY IRREVOCABLY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN ANY LEGAL PROCEEDING DIRECTLY OR INDIRECTLY ARISING OUT OF OR RELATING TO THIS AGREEMENT OR ANY OTHER LOAN DOCUMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY (WHETHER BASED ON CONTRACT, TORT OR ANY OTHER THEORY). EACH PARTY HERETO (A) CERTIFIES THAT NO REPRESENTATIVE, AGENT OR ATTORNEY OF ANY OTHER PERSON HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PERSON WOULD NOT, IN THE EVENT OF LITIGATION, SEEK TO ENFORCE THE FOREGOING WAIVER AND (B) ACKNOWLEDGES THAT IT AND THE OTHER PARTIES HERETO HAVE BEEN INDUCED TO ENTER INTO THIS AGREEMENT AND THE OTHER LOAN DOCUMENTS BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION.

10.19 Purported Oral Amendments. BORROWER AND LENDER EXPRESSLY ACKNOWLEDGE THAT THIS AGREEMENT AND THE OTHER LOAN DOCUMENTS MAY ONLY BE AMENDED OR MODIFIED, OR THE PROVISIONS HEREOF OR THEREOF WAIVED OR SUPPLEMENTED, BY AN INSTRUMENT IN WRITING THAT COMPLIES WITH SECTION 10.2. EACH BORROWER AGREES THAT IT WILL NOT RELY ON ANY COURSE OF DEALING, COURSE OF PERFORMANCE, OR ORAL OR WRITTEN STATEMENTS BY ANY REPRESENTATIVE OF LENDER THAT DOES NOT COMPLY WITHSECTION 10.2 TO EFFECT AN AMENDMENT, MODIFICATION, WAIVER OR SUPPLEMENT TO THIS AGREEMENT OF THE OTHER LOAN DOCUMENTS.

10.20 USA PATRIOT Act Notice. Each Lender hereby notifies Borrower that pursuant to the requirements of the USA PATRIOT Act (Title III of Pub. L. 107-56 (signed into law October 26, 2001)) (the "Act"), such Lender is required to obtain, verify and record information that identifies Borrower, which information includes the name and address of Borrower and other information that will allow such Lender to identify Borrower in accordance with the Act.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed as of the date first above written.

EXHIBIT A

COMPLIANCE CERTIFICATE

See attached.

FORM OF COMPLIANCE CERTIFICATE

To: The Lenders Party to the
Term Loan Agreement Described Below

This Compliance Certificate is furnished pursuant to that certain Term Loan Agreement dated as of December 1, 2011 (as amended, modified, renewed or extended from time to time, the "Agreement") among Molina Center LLC (the "Borrower"), the lenders from time to time party thereto (the "Lenders") and East West Bank, as Administrative Agent for the Lenders. Unless otherwise defined herein, capitalized terms used in this Compliance Certificate have the meanings ascribed thereto in the Agreement.

THE UNDERSIGNED HEREBY CERTIFIES THAT:

1. I am the duly *select one* [elected]/[appointed] *select one* [chief executive officer]/[chief financial officer]/[treasurer]/[controller] of the manager of the Borrower;

2. I have reviewed the terms of the Agreement and I have made, or have caused to be made under my supervision, a detailed review of the transactions and conditions of the Borrower and its Subsidiaries during the accounting period covered by the attached financial statements;

3. The examinations described in paragraph 2 did not disclose, and I have no knowledge of, the existence of any condition or event which constitutes a Default or Event of Default during or at the end of the accounting period covered by the attached financial statements or as of the date of this Compliance Certificate, except as follows(*if none, write "NONE;" otherwise describe in detail, the nature of the condition or event, the period during which it has existed and the action which the Borrower has taken, is taking, or proposes to take with respect to each such condition or event*):

_____

_____

_____

4. Schedule I attached hereto sets forth financial data and computations evidencing the Borrower's compliance with the covenant contained in Section 5.7(a) of the Agreement, all of which data and computations are true, complete and correct;

5. Schedule II attached hereto sets forth the various reports and deliveries which are required at this time under the Agreement and the other Loan Documents and the status of compliance.

The foregoing certifications, together with the computations set forth in Schedule I hereto and the financial statements delivered with this Certificate in support hereof, are made and delivered this day of , 20 .

Schedule 3.17

Known Violations of Hazardous Materials Law

In a letter dated October 24, 2011, 200 Oceangate, LLC (the former owner of the Real Property), received Waste Discharge Requirements and a National Pollutant Discharge Elimination System (NPDES) permit (the "NPDES Permit") from the California Regional Water Quality Control Board, Los Angeles Region (the "CRWQCB"), governing the discharge of seepage groundwater from the subbasement parking structure located on the premises of the Real Property. Reasonable Potential Analysis (RPA) of water quality data submitted to the CRWQCB indicated concentrations for arsenic and nickel at the cusp of their respective screening levels. As a result, the CRWQCB determined that effluent limitations for these parameters are not appropriate, but that long term monitoring for these parameters are necessary to ensure that the concentrations for these parameters remain insignificant. The Borrower intends to monitor the water quality of the groundwater discharge in accordance with the monitoring and reporting requirements set forth in the NPDES Permit.

None

Exhibit 10.19

GUARANTY

This GUARANTY is made as of December 1, 2011, by MOLINA HEALTHCARE, INC., a Delaware corporation (" Guarantor"), in favor of EAST WEST BANK, a California banking corporation, in its capacity as administrative agent (in such capacity, " Administrative Agent") for itself and the other "Lenders," as such term is defined below.

RECITALS

A. Pursuant to the terms of the Term Loan Agreement dated as of even date herewith (as amended, extended, renewed, supplemented or otherwise modified from time to time, the "Term Loan Agreement") by and among Molina Center LLC, a Delaware limited liability company (" Borrower"), Administrative Agent, East West Bank, Bank of China, Los Angeles Branch, City National Bank, Union Bank, N.A. and The Bank of East Asia (USA) N.A. and their assignees and successors from time to time as "Lenders" thereunder (collectively, " Lenders," and each, a "Lender"), Lenders have agreed to make a term loan to Borrower in the aggregate principal amount of up to Forty Eight Million Six Hundred Thousand Dollars ($48,600,000) (the " Loan"). Capitalized terms used but not otherwise defined in this Guaranty shall have the meanings ascribed to such terms in the Term Loan Agreement.

B. The obligations of Borrower for repayment of the Loan are evidenced by Promissory Notes dated as of even date herewith (as amended, extended, renewed, replaced, split, supplemented or otherwise modified from time to time, the " Notes") made by Borrower to the order of each of the Lenders, in the aggregate principal amount of the Loan. The obligations of Borrower under the Term Loan Agreement and the Notes are secured by the Deed of Trust, Security Agreement, Assignment of Rents and Fixture Filing (as amended, extended, renewed, supplemented or otherwise modified from time to time, the " Deed of Trust") executed by Borrower as trustor, naming First American Title Insurance Company as trustee and Administrative Agent as beneficiary, encumbering the "Property" (as described in the Deed of Trust), and by other collateral security.

C. The Term Loan Agreement, the Notes, the Deed of Trust and all other agreements and documents evidencing or securing Borrower's obligations in connection with the Lenders' issuance of the Loan are referred to in this Guaranty as the " Loan Documents".

D. Guarantor's execution and delivery of this Guaranty is a condition precedent to Lenders' issuance of the Loan. Guarantor has an interest in Borrower and will directly benefit from Lenders' extension of the Loan to Borrower and is therefore willing to enter into this Guaranty to induce Lenders to extend the Loan.

AGREEMENT

1. Guaranty.

(a) Guarantor unconditionally and irrevocably guarantees the full and prompt payment of all obligations, principal, interest, fees, costs and other sums owed under the Loan Documents at the times and according to the terms expressed in the Loan Documents, including any interest, late charges, default interest, fees and costs (including reasonable attorneys' fees)

that would have accrued under the Loan Documents but for the commencement of a case under Title 11 of the United States Code or any successor statute (the "Bankruptcy Code"). Notwithstanding anything else to the contrary contained in this Guaranty, the maximum principal amount of the Notes for which the Guarantor shall be liable under this Guaranty shall in no event exceed Twenty Million Dollars ($20,000,000) (the " Cap").

(b) Guarantor's liability under this Guaranty is a guaranty of payment and performance and not a guaranty of collection.

2. Changes Do Not Affect Liability . Guarantor agrees that Administrative Agent, on behalf of the Lenders, may without notice to Guarantor and without limiting Guarantor's liability under, or affecting the enforceability of, this Guaranty:

(a) grant extensions of time, renewals or other indulgences and modifications to Borrower or any other party under the Loan Documents;

(b) change the rate of interest or rate or amount of fees under the Term Loan Agreement or any other Loan Document;

(c) change, amend or modify the Loan Documents;

(d) authorize the sale, exchange, release or subordination of any security or collateral in which Administrative Agent or the Lenders has an interest, or fails to create, perfect or maintain the priority of any security interest in any such collateral;

(e) take additional security for any obligation evidenced by the Loan Documents;

(f) discharge or release any party or parties liable under the Loan Documents;

(g) accept or make compositions or other arrangements or file or refrain from filing a claim in any bankruptcy proceeding of Borrower, any other guarantor, any pledgor of collateral for any person's obligations to any Lender or any other person related to the Loan Documents;

(h) make other or additional credit available to Borrower in such amounts and at such times as Administrative Agent may determine;

(i) credit payments in such manner and order of priority to principal, interest or other obligations as Administrative Agent may determine; and

(j) otherwise deal with Borrower, any other guarantor, any pledgor of collateral for any person's obligations to any Lender or any other person related to the Loan Documents as Administrative Agent may determine in its discretion.

3. Additional Waivers.

(a) Guarantor waives all benefits and defenses it may have under California Civil Code Section 2809 and agrees that Guarantor's liability may be larger in amount and more burdensome than that of Borrower. Guarantor's liability under this Guaranty shall continue until all sums due under the Loan Documents have been paid in full and shall not be limited or affected in any way by any impairment or any diminution or loss of value of any security or collateral for the obligations under the Loan Documents, from whatever cause, including, without limitation, Administrative Agent's or Lenders' failure to perfect a security interest in any such security or collateral or any disability or other defense of Borrower, any other guarantor, any pledgor of collateral for any person's obligations to Administrative Agent or any Lender or any other person related to the Loan Documents.

(b) Guarantor agrees that its liability under, and the enforceability of, this Guaranty are absolute and are not contingent upon the genuineness, validity or enforceability of any of the Loan Documents or the availability of any defense to Borrower, any other guarantor or surety, any pledgor of collateral for any person's obligations to Administrative Agent or any Lender or any other person related to the obligations under the Loan Documents. Guarantor waives all benefits and defenses it may have under California Civil Code Section 2810 and agrees that Guarantor shall be liable even if Borrower, any other guarantor, any pledgor of collateral for any person's obligations to Administrative Agent or any Lender or any other person related to the obligations outstanding under the Loan Documents had no liability at the time of execution of any Loan Documents or later ceases to be liable.

(c) Guarantor waives its rights under California Civil Code Section 2815 and agrees that by doing so Guarantor does not have any right to revoke this Guaranty until all obligations under the Loan Documents have been fully satisfied.

(d) Guarantor waives its rights under California Civil Code Section 2819 and agrees that by doing so Guarantor's liability and the enforceability of this Guaranty shall continue even if Administrative Agent or any Lender alters any obligations under the Loan Documents in any respect.

(e) Guarantor waives its rights under California Civil Code Section 2839 and agrees that by doing so (i) its obligations under this Guaranty shall not be deemed satisfied by a mere offer of payment by Borrower or any other person of the principal obligations under the Loan Documents and (ii) Guarantor's liability under and the enforceability of this Guaranty shall continue until all obligations under the Loan Documents have been fully satisfied.

(f) Guarantor waives all benefits and defenses it may have under California Civil Code Sections 2787 to 2855, inclusive, including, without limitation, the right to require Administrative Agent or any Lender to (i) proceed against Borrower, any other guarantor or surety, any pledgor of collateral for any person's obligations to Administrative Agent or any Lender or any other person related to the obligations outstanding under the Loan Documents, (ii) proceed against or exhaust any other security or collateral Administrative Agent may hold, or (iii) pursue any other right or remedy for Guarantor's benefit, and agrees that Administrative Agent and the Lenders may foreclose against all or a part of the Property or any other security

Administrative Agent or the Lenders may hold without taking any action against Borrower, any other guarantor or surety, any pledgor of collateral for any person's obligations to Administrative Agent or any Lender or any other person related to the obligations outstanding under the Loan Documents, and without proceeding against or exhausting any security or collateral Administrative Agent or any Lender holds.

(g) Guarantor waives its rights under California Civil Code Sections 2899 and 3433 and agrees that by doing so that neither Administrative Agent nor any Lender has an obligation regarding the order in which it exercises its remedies against the Property or any other collateral security encumbered pursuant to any of the Loan Documents.

(h) Guarantor waives diligence and all demands, protests, presentments and notices of every kind or nature, including notices of protest, dishonor, nonpayment, acceptance of this Guaranty and creation, renewal, extension, modification or accrual of any of the obligations under the Loan Documents. Guarantor also waives the right to plead all statutes of limitation as a defense to Guarantor's liability under, or the enforceability of, this Guaranty.

(i) Guarantor waives any rights or benefits it may have by reason of California Code of Civil Procedure Section 580a which could limit the amount which Administrative Agent and the Lenders could recover in a foreclosure of the Property to the difference between the amount owing under the Loan Documents and the fair value of the Property or other real property sold at a nonjudicial foreclosure sale or sales of any other real property held by Administrative Agent or any Lender as security for the obligations under the Loan Documents.

(j) Guarantor waives all rights and defenses arising out of an election of remedies by Administrative Agent or any Lender, even though that election of remedies, such as a nonjudicial foreclosure of the Property or any other real property given to secure the obligations under the Loan Documents, may destroy Guarantor's rights of subrogation and reimbursement against Borrower by the operation of Section 580d of the California Code of Civil Procedure or otherwise.

4. Guarantor Informed of Borrower's Condition. Guarantor acknowledges that it has had an opportunity to review the Loan Documents, the value of the security for the obligations under the Loan Documents, and Borrower's financial condition and ability to repay the obligations owing under the Loan Documents. Guarantor agrees to keep itself fully informed of all aspects of Borrower's financial condition and the performance of Borrower's obligations to Administrative Agent, on behalf of the Lenders and that neither Administrative Agent nor any of the Lenders has any duty to disclose to Guarantor any information pertaining to Borrower or any security for the obligations owing under the Loan Documents.

5. Subrogation, Reimbursement and Contribution Rights. Guarantor agrees that its rights of subrogation and reimbursement against Borrower, its right of subrogation against any other collateral or security for the obligations owing under the Loan Documents or the pledgor of such collateral or security and its right of contribution from any guarantor of the obligations owing under the Loan Documents shall be subordinate to Administrative Agent's and the Lenders' rights against Borrower, in such collateral or security, against any such pledgor and

against any such guarantor. Guarantor shall have no such rights of subrogation, reimbursement or contribution until all amounts due under the Loan Documents have been paid in full and Administrative Agent, on behalf of the Lenders, has released, transferred or disposed of all of its rights in any collateral or security. Guarantor waives its rights under California Civil Code Sections 2847, 2848 and 2849 to the extent inconsistent with the foregoing.

6. Confirmation of Waivers; Borrower's Obligations are Secured by Real Property .

(a) Guarantor is aware that it is waiving all rights and defenses that it may have because Borrower's obligations are secured by real property. This means, among other things:

(i) Administrative Agent or Lenders may collect from Guarantor without first foreclosing on the Property or any other real or personal property collateral for Borrower's obligations pledged by Borrower or any other person; and

(ii) if Administrative Agent or Lenders foreclose on the Property:

(A) the amount of Borrower's obligations outstanding may be reduced only by the price for which the Property is sold at the foreclosure sale, even if the Property is worth more than the sale price; and

(B) Administrative Agent or Lenders may collect from Guarantor even if Administrative Agent, by foreclosing on the Property, has destroyed any right Guarantor may have to collect from Borrower.

(b) These are unconditional and irrevocable waivers of any rights and defenses Guarantor may have because Borrower's debt is secured by real property. These rights and defenses include, but are not limited to, any rights or defenses based upon Section 580a, 580b, 580d or 726 of the California Code of Civil Procedure.

7. Guaranty Continues if Payments Are Avoided or Recovered from Administrative Agent or Lenders . If all or any portion of the obligations guaranteed under this Guaranty are paid or performed, Guarantor's obligations under this Guaranty shall continue and remain in full force and effect if all or any part of such payment or performance is avoided or recovered directly or indirectly from Administrative Agent or Lenders as a preference, fraudulent transfer or otherwise, irrespective of (a) any notice of revocation given by Guarantor prior to such avoidance or recovery, and (b) payment in full of the obligations under the Loan Documents.

8. Subordination. Any rights of Guarantor, whether now existing or later arising, to receive payment on account of any indebtedness (including interest) owed to it by Borrower or any subsequent owner of the Property, or to withdraw capital invested by it in Borrower, or to receive distributions from Borrower, shall at all times be subordinate as to lien and time of payment and in all other respects to the full and prior repayment to Administrative Agent and the Lenders of the obligations owing under the Loan Documents. Guarantor shall not be entitled to enforce or receive payment of any sums hereby subordinated until all obligations owing under the Loan Documents have been fully satisfied and any such sums received in violation of this

Guaranty shall be received by Guarantor in trust for Administrative Agent, on behalf of Lenders, except for distributions of provided, however, that Guarantor may receive distributions of excess Cash from Borrower as permitted pursuant to Section 5.6 of the Term Loan Agreement.

9. Representations and Warranties. Guarantor makes the following representations and warranties to Administrative Agent and Lenders:

(a) This Guaranty has been duly executed and delivered and is the legal, valid and binding obligation of Guarantor, enforceable against Guarantor in accordance with its terms.

(b) Guarantor's execution and delivery of, and its performance of its obligations under, this Guaranty do not and will not conflict with any (i) contractual or legal restriction or obligation, or (ii) court or regulatory order, binding on or affecting Guarantor.

(c) There is no pending or, to the actual knowledge of Guarantor, threatened action, proceeding or investigation before any court, governmental agency or arbitrator against or affecting Guarantor, the Property, any of the Collateral, or any of Guarantor's other assets which, if decided adversely to Guarantor, would materially and adversely affect the financial condition of Guarantor or of any of Guarantor's assets, or would materially and adversely affect the present or future ability of Guarantor to perform its obligations under the Guaranty.

(d) Guarantor is not insolvent nor will it be rendered insolvent by the transactions contemplated by the Loan Documents. After giving effect to the transactions contemplated by the Loan Documents, Guarantor will not be left with an unreasonably small amount of capital with which to engage in its business or undertakings, nor will Guarantor have intended to incur, or believe that it has incurred, debts beyond its ability to pay such debts as they mature.

(e) Except as disclosed to Administrative Agent in writing, the financial statements and all financial data delivered to Administrative Agent relating to Guarantor are true, correct and complete in all material respects. Such financial statements fairly present the financial position of Guarantor as of the dates indicated. No material adverse change has occurred in Guarantor's financial position since the date of such financial statements, and Guarantor has not incurred any indebtedness since the date of any such statements.

(f) Guarantor has filed all required federal, state and local tax returns. Guarantor has paid all federal, state and local taxes prior to delinquency (including any interest and penalties) other than taxes being promptly and actively contested in good faith and by appropriate proceedings.

(g) Guarantor is in material compliance with all laws, regulations and court orders applicable to it and its business.

(h) All of the representations and warranties made by Borrower with respect to "Parent" in the Term Loan Agreement are hereby incorporated herein as representations and warranties of Guarantor to Administrative Agent and the Lenders, with the same effect as though the same were fully stated herein.

(i) None of Guarantor's representations or warranties contained in this Guaranty, the Term Loan Agreement or any other document, certificate or written statement furnished to Administrative Agent and Lenders on behalf of Guarantor contains any untrue statement of a material fact or omits to state a material fact necessary in order to make the statements contained in this Guaranty or in such other document, certificate or written statement (when taken in their entirety) not misleading. There is no fact known to Guarantor which materially or adversely affects the business, operations, assets or condition (financial or otherwise) of Guarantor which has not been disclosed in this Guaranty or in another written statement delivered to Administrative Agent by Borrower or Guarantor.

10. Covenants.

(a) Guarantor shall deliver the following information to Administrative Agent in form and substance reasonably satisfactory to Administrative Agent:

(i) as soon as available, but in any event within 45 days after the end of each Fiscal Quarter (commencing with the Fiscal Quarter ended December 31, 2011), the financial statements required by Section 6.1(b) of the Term Loan Agreement as of the end of such Fiscal Quarter;

(ii) as soon as filed, but in any event within 120 days after the end of each Fiscal Year (commencing with the Fiscal Year ended December 31, 2011), the financial required by Section 6.1(a) of the Term Loan Agreement as of the end of such Fiscal Year; and

(iii) all other information, reports and notices relating to Guarantor that Administrative Agent shall reasonably request.

(b) Guarantor shall comply with all requirements applicable to Guarantor under the Term Loan Agreement, including, without limitation, Articles 4, 5 and 6 of the Term Loan Agreement.

11. Borrower. As used in this Guaranty, "Borrower" shall include any successor to Borrower with respect to the Loan Documents and any estate created by the commencement of a case under the Bankruptcy Code or any other insolvency, bankruptcy, reorganization or liquidation proceeding, or by any trustee under the Bankruptcy Code, liquidator, sequestrator or receiver of Borrower or Borrower's property or similar person duly appointed pursuant to any law generally governing any insolvency, bankruptcy, reorganization, liquidation, receivership or like proceeding.

12. Opportunity to Review. Guarantor acknowledges that it has had the opportunity to review the matters discussed and contemplated by the Loan Documents, including the remedies Administrative Agent or Lenders may pursue against Borrower in the event of a default under the Loan Documents, the value of the security or collateral for the obligations owing under the Loan Documents and Borrower's financial condition and ability to perform under the Loan Documents to which Borrower is a party. Guarantor has had the opportunity to review this Guaranty with its counsel.

13. Miscellaneous.

(a) Notices. Any notice, demand or request required under this Guaranty shall be given in writing at the addresses set forth below by personal service; telecopy; overnight courier; or registered or certified, first class mail, return receipt requested.

If to Guarantor:

Molina Healthcare, Inc.
300 University Avenue, Suite 100
Sacramento, CA 95825
Attention: Joseph W. White, Chief Accounting Officer
Facsimile: (562) 437-7235
Telephone: (916) 646-9193 x 111566

With a copy to:

Molina Healthcare, Inc.
300 University Avenue, Suite 100
Sacramento, CA 95825
Attention: Jeff Barlow
General Counsel
Facsimile: (916) 646-4572
Telephone: (916) 646-9193 x 114633

If to Administrative Agent:

East West Bank
135 N. Los Robles Ave., Suite 600
Pasadena, CA 91101

First Vice President
Facsimile: (626) 817-8899
Telephone: (626) 768-6718

With a copy to:

East West Bank
Loan Servicing Department
9300 Flair Drive, 6th Floor
El Monte, California 91731
Attention: _____
Facsimile: _____
Telephone: _____

Such addresses may be changed by notice to the other parties given in the same manner as required above. Any notice, demand or request shall be deemed received as follows: (i) if sent by personal service, at the time such personal service is effected; (ii) if sent by telecopy, upon the sender's receipt of a confirmation report indicating receipt by the recipient's telecopier; (iii) if sent by overnight courier, on the business day immediately following deposit with the overnight courier; and (iv) if sent by mail, three business days following deposit in the mail.

(b) Governing Law. All questions with respect to the construction of this Guaranty and the rights and liabilities of the parties to this Guaranty shall be governed by the laws of the State of California.

(c) Binding on Successors. This Guaranty shall inure to the benefit of, and shall be binding upon, the successors and assigns of each of the parties to this Guaranty. Administrative Agent or Lenders may assign this Guaranty with one or more of the Loan Documents, without in any way affecting Guarantor's liability under it or them.

(d) Attorneys' Fees.

(i) Guarantor shall reimburse Administrative Agent and Lenders for all reasonable attorneys' fees, costs and expenses, incurred by Administrative Agent and Lenders in connection with the enforcement of Administrative Agent and Lenders' rights under this Guaranty and each of the other Loan Documents, including, without limitation, reasonable attorneys' fees, costs and expenses for trial, appellate proceedings, out-of-court negotiations, workouts and settlements or for enforcement of rights under any state of federal statute, including, without limitation, reasonable attorneys' fees, costs and expenses incurred to protect Administrative Agent and Lenders' security and attorneys' fees, costs and expenses incurred in bankruptcy and insolvency proceedings such as (but not limited to) seeking relief from stay in a bankruptcy proceeding. The term "expenses" means any expenses incurred by Administrative Agent or Lenders in connection with any of the out-of-court, or state, federal or bankruptcy proceedings referred to above, including, without limitation, the fees and expenses of any appraisers, consultants and expert witnesses retained or consulted by Administrative Agent or Lenders in connection with any such proceeding.

(ii) Administrative Agent and Lenders shall also be entitled to its and their attorneys' fees, costs and expenses incurred in any post-judgment proceedings to collect and enforce the judgment. This provision is separate and several and shall survive the merger of this Guaranty into any judgment on this Guaranty.

(iii) Notwithstanding anything in this Section 13(d) to the contrary, Guarantor shall not be liable or responsible for costs or fees incurred by Administrative Agent or any Lender in connection with the syndication of the Loan, the negotiation or enforcement of Article 9 of the Term Loan Agreement or any other agreement by or between the Lenders or the Administrative Agent, or any dispute by or between Administrative Agent or any Lenders with respect to their respective rights or obligations as between each other.

(e) Counterparts. This Guaranty may be executed in any number of original counterparts, each of which shall be deemed an original, but all of which when taken together shall constitute one instrument. The original signature page of any counterpart may be detached from such counterpart and attached to any other counterpart identical to such counterpart (except having additional signature pages executed by other parties to this Guaranty) without impairing the legal effect of any such signature(s).

(f) Entire Agreement. This Guaranty constitutes the entire agreement and understanding between the parties in respect of the subject matter of this Guaranty and supersedes all prior agreements and understandings with respect to such subject matter, whether oral or written.

(g) Waivers. Waiver by Administrative Agent or Lenders of any term, covenant or condition under this Guaranty or the Loan Documents, or of any default by Guarantor under this Guaranty or the Loan Documents, or any failure by Administrative Agent or Lenders to insist upon strict performance by Guarantor of any term, covenant or condition contained in this Guaranty or the Loan Documents, shall be effective or binding on Administrative Agent and Lenders only if made in writing by Administrative Agent; no such waiver shall be implied from any omission by Administrative Agent or Lenders to take action with respect to any such term, covenant, condition or default. No express written waiver by Administrative Agent of any term, covenant, condition or default shall affect any other term, covenant, condition or default or cover any other time period than the application of any such term, covenant or condition to the matter as to which a waiver has been given or the default or time period specified in such express waiver. This Guaranty may be amended only by an instrument in writing signed by the parties to this Guaranty.

(h) Severability. If any part of this Guaranty is declared invalid for any reason, such shall not affect the validity of the rest of the Guaranty. The other parts of this Guaranty shall remain in effect as if this Guaranty had been executed without the invalid part. The parties declare that they intend and desire that the remaining parts of this Guaranty continue to be effective without any part or parts that have been declared invalid.

14. WAIVER OF TRIAL BY JURY. TO THE EXTENT PERMITTED BY LAW, EACH OF ADMINISTRATIVE AGENT AND GUARANTOR WAIVES TRIAL BY JURY WITH RESPECT TO ANY ACTION, CLAIM, SUIT OR PROCEEDING IN RESPECT OF OR ARISING OUT OF THIS GUARANTY OR THE OTHER LOAN DOCUMENTS OR THE CONDUCT OF THE RELATIONSHIP AMONG ADMINISTRATIVE AGENT, LENDERS AND GUARANTOR. EACH PARTY HAS OBTAINED THE ADVICE OF THEIR RESPECTIVE LEGAL COUNSEL BEFORE SIGNING THIS GUARANTY AND ACKNOWLEDGE THAT THEY VOLUNTARILY AGREED TO THIS WAIVER OF THEIR RIGHT TO TRIAL BY JURY WITH FULL KNOWLEDGE OF ITS SIGNIFICANCE AND LEGAL CONSEQUENCE.

15. Right to Deal with Administrative Agent. Guarantor shall have the same rights as are provided to Borrower pursuant to Sections 9.13, 9.14 and 9.15 of the Term Loan Agreement.

[Signature page follows]

IN WITNESS WHEREOF, Guarantor has caused this Guaranty to be duly executed as of the date first written above.

GUARANTOR:

MOLINA HEALTHCARE, INC.,
a Delaware corporation

By: /s/ John C. Molina
John C. Molina
Chief Financial Officer

Exhibit 10.20

ENVIRONMENTAL INDEMNITY

This ENVIRONMENTAL INDEMNITY (this "Indemnity") is entered into as of December 1, 2011, by MOLINA CENTER LLC, a Delaware limited liability company ("Borrower") and MOLINA HEALTHCARE, INC. ("Guarantor"; collectively, jointly and severally with Borrower, "Indemnitor"), for the benefit of EAST WEST BANK, a California banking corporation, in its capacity as administrative agent (in such capacity, " Administrative Agent") for itself, Bank of China, Los Angeles Branch, City National Bank, Union Bank, N.A. and The Bank of East Asia (USA) N.A. and their assignees and successors from time to time as "Lenders" under the Term Loan Agreement defined below (collectively, "Lenders," and each, a "Lender"), Lenders and each of Administrative Agent's and Lenders' successors, assigns and participants, parents, subsidiaries and affiliated corporations, and its and their respective directors, officers, agents, attorneys and employees (each individually, an " Indemnitee" and collectively, "Indemnitees").

RECITALS

A. Pursuant to the terms of the Term Loan Agreement dated as of even date herewith (as amended, extended, renewed, supplemented or otherwise modified from time to time, the "Term Loan Agreement") by and among Administrative Agent, Lenders and Borrower, Lenders have agreed to make a term loan to Borrower in the principal amount of up to Forty Eight Million Six Hundred Thousand Dollars ($48,600,000) (the " Loan"). Capitalized terms used but not otherwise defined in this Indemnity shall have the meanings ascribed to such terms in the Term Loan Agreement. The obligations of Borrower for repayment of the Loan are evidenced by the Promissory Note dated as of even date herewith (as amended, extended, renewed, replaced, split, supplemented or otherwise modified from time to time, the "Note") made by Borrower to the order of Administrative Agent, on behalf of Lenders, in the principal amount of the Loan.

B. Borrower's obligations to Administrative Agent and Lenders under the Term Loan Agreement are secured by the Deed of Trust, Security Agreement, Assignment of Rents and Fixture Filing dated as of even date herewith (as amended, extended, renewed, supplemented or otherwise modified from time to time, the "Deed of Trust") executed by Borrower, as trustor, naming First American Title Insurance Company as trustee and Administrative Agent as beneficiary, and by other collateral security. The Deed of Trust encumbers the "Property" (as described in the Deed of Trust). The obligations of Indemnitor under this Indemnity are not secured by the Deed of Trust.

C. Indemnitor's execution of this Indemnity is a condition precedent to Lenders' issuance of the Loan. Indemnitor is willing to execute this Indemnity because of the benefits Lenders' issuance of the Loan will confer on Borrower and Guarantor.

AGREEMENT

1. Indemnity. Indemnitor shall be solely responsible for, and shall indemnify and hold harmless each Indemnitee from and against, any loss, damage, cost, expense, claim or liability directly or indirectly arising out of or attributable to the use; generation; storage; release;

threatened release, discharge or disposal; or presence of "Hazardous Materials" (as defined below) on or about the Property, including, without limitation: (a) all foreseeable consequential damages incurred by any Indemnitee; (b) the costs of any required or necessary repair, cleanup or detoxification of the Property and the preparation and implementation of any closure, remedial or other required plans; and (c) all reasonable costs and expenses incurred by any Indemnitee in connection with clauses (a) and (b), including, without limitation, reasonable attorneys' fees.

For purposes of this Indemnity, the following terms shall have the following definitions:

"Hazardous Materials" means (i) any chemical, compound, material, mixture or substance that is now or hereafter defined or listed in, or otherwise classified pursuant to, any "Hazardous Materials Law" (as defined below) as a "hazardous substance", "hazardous material", "hazardous waste", "extremely hazardous waste", "acutely hazardous waste", "radioactive waste", "infectious waste", "biohazardous waste", "toxic substance", "pollutant", "toxic pollutant", "contaminant" as well as any formulation not mentioned herein intended to define, list, or classify substances by reason of deleterious properties such as ignitability, corrosivity, reactivity, carcinogenicity, toxicity, reproductive toxicity "EP toxicity," or "TCLP toxicity"; (ii) petroleum, natural gas, natural gas liquids, liquified natural gas, synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas) and ash produced by a resource recovery facility utilizing a municipal solid waste stream, and drilling fluids, produced waters and other wastes associated with the exploration, development or production of crude oil, natural gas, or geothermal resources; (iii) "hazardous substance" as defined in Section 25281(f) of the California Health and Safety Code; (iv) "waste" as defined in Section 13050(d) of the California Water Code (v) asbestos in any form; (vi) urea formaldehyde foam insulation; (vii) transformers or other equipment which contain dielectric fluid containing levels of polychlorinated biphenyls (PCBs) in excess of fifty (50) parts per million; (viii) radon; and (ix) any other chemical, material, or substance that, because of its quantity, concentration, or physical or chemical characteristics, exposure to which is limited or regulated for health and safety reasons by any governmental authority, or which poses a significant present or potential hazard to human health and safety or to the environment if released into the workplace or the environment.

"Hazardous Materials Laws" means all present and future federal, state and local laws, ordinances, regulations, permits, guidance documents, policies, decrees, orders and any other requirements, whether statutory, regulatory or contractual, of governmental authorities relating to health, safety, the environment or the use, handling, disposal or transportation of any Hazardous Materials (including, without limitation, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, the Resource Conservation Recovery Act, the Clean Water Act, the Clean Air Act, and the applicable provisions of the California Health and Safety Code and the California Water Code, as each such statute may from time to time be amended, and the rules, regulations, and guidance documents promulgated pursuant to any such statute).

Notwithstanding the foregoing, Indemnitor shall have no liability under this Indemnity for the release of any Hazardous Material on the Property by any Indemnitee or any such release occurring after foreclosure, a deed in lieu of foreclosure or the possession of the Property by a receiver.

2. Indemnity Procedure.

(a) If any Indemnitee notifies Indemnitor of any claim or notice of the commencement of any action, administrative or legal proceeding or investigation as to which Indemnitor's obligation to indemnify under Section 1 above applies, Indemnitor shall assume on behalf of such Indemnitee, and conduct with due diligence and in good faith, the investigation and defense of, and the response to, such claim, action, proceeding or investigation, with counsel reasonably satisfactory to the Indemnitee; provided, however, that such Indemnitee shall have the right to be represented by advisory counsel of its own selection and at its own expense; and provided, further, that if any such claim, action, proceeding, or investigation involves both Indemnitor and an Indemnitee, and such Indemnitee shall have reasonably concluded that there may be legal defenses available to it which are different from, additional to, or inconsistent with those available to Indemnitor, then the Indemnitee shall have the right to select separate counsel to participate in the investigation and defense of and response to such claim, action, proceeding or investigation on its own behalf at Indemnitor's expense.

(b) If any claim, action, proceeding, or investigation arises as to which Indemnitor's duty to indemnify under this Indemnity applies, and Indemnitor fails to assume promptly (and in any event within ten days after being notified of the claim, action, proceeding, or investigation) the defense of an Indemnitee, then such Indemnitee may contest and settle the claim, action, proceeding, or investigation at Indemnitor's expense using counsel selected by such Indemnitee; provided, however, that after any such failure by Indemnitor no such contest need be made by such Indemnitee and settlement or full payment of any claim may be made by such Indemnitee without Indemnitor's consent and without releasing Indemnitor from any obligations to such Indemnitee under this Indemnity.

3. Damages Unrelated to Credit. This Indemnity is given solely to protect Administrative Agent, Lenders and the other Indemnitees against claims, losses, damages, costs, expenses, claims and liabilities, and not as additional security for, or as a means of payment of, Indemnitor's obligations under the Term Loan Agreement or any other obligation secured by the Deed of Trust. The obligations of Indemnitor under this Indemnity are independent of, and shall not be measured or affected by (a) any amounts at any time owing under the Term Loan Agreement or secured by the Deed of Trust, (b) the sufficiency or insufficiency of any collateral (including, without limitation, the Property) given to Administrative Agent or Lenders to secure the performance of the Term Loan Agreement, the Note or any obligation in favor of Administrative Agent, on behalf of Lenders, (c) the consideration given by Administrative Agent, Lenders or any other party in order to acquire the Property, (d) the modification, expiration or termination of the Deed of Trust or any other document or instrument securing or otherwise relating to the obligations owing under the Term Loan Agreement, or (e) the payment in full of all obligations owing under the Term Loan Agreement, the Note or any obligation in favor of Administrative Agent or Lenders (including, without limitation, by amounts paid or credit bid at a foreclosure sale or by discharge in connection with a deed in lieu of foreclosure). Indemnitor's obligations under this Indemnity are not secured, whether by the Deed of Trust or otherwise.

4. Survival of Sale by Borrower. Except as otherwise provided in this Indemnity, Indemnitor's obligations under this Indemnity shall survive the sale or other transfer of the Property by Borrower. The rights of each Indemnitee under this Indemnity shall be in addition to any other rights and remedies of such Indemnitee against Indemnitor under any other document or instrument executed by Indemnitor, or at law or in equity (including, without limitation, any right of reimbursement or contribution pursuant to CERCLA), and shall not in any way be deemed a waiver of any of such rights.

5. Subrogation. If Indemnitor fails to indemnify the Indemnitees as provided in this Indemnity, the Indemnitees shall be subrogated to any rights Indemnitor may have against third parties relating to the matters covered by this Indemnity.

6. Payment of Costs. Indemnitor shall pay, upon demand, all costs and expenses (including, without limitation, reasonable attorneys fees) incurred by any Indemnitee in the enforcement of this Indemnity or the collection of any amounts due under this Indemnity.

7. Successors and Assigns. This Indemnity shall be binding upon Indemnitor, its successors and assigns, and shall inure to the benefit of and shall be enforceable by each Indemnitee, its successors, and assigns (including, without limitation, any entity to which a Lender assigns or sells all or any portion of its interest in the Note, and any successor to Administrative Agent under the Term Loan Agreement).

8. Notices. Any notice, demand or request required under this Indemnity shall be given in the manner required in the Deed of Trust.

9. Separate Actions. Multiple actions may be brought and judgments obtained under this Indemnity. A separate and new right of action arises each time that a claim or liability arises under this Indemnity.

10. Governing Law. This Indemnity shall be governed and construed in accordance with the laws of the State of California.

11. Severability. All provisions contained in this Indemnity are severable and the invalidity or unenforceability of any provision shall not affect or impair the validity or enforceability of the remaining provisions of this Indemnity.

12. Entire Agreement. This Indemnity constitutes the entire agreement and supersedes all prior agreements and understandings, both written and oral, between the parties with respect to the subject matter contained in this Indemnity.

PURCHASE AGREEMENT

BETWEEN

200 OCEANGATE, LLC, A DELAWARE LIMITED LIABILITY COMPANY

AND

MOLINA CENTER LLC, A DELAWARE LIMITED LIABILITY COMPANY

OCTOBER 11, 2011

TABLE OF CONTENTS

LIST OF EXHIBITS

PURCHASE AGREEMENT

200 & 300 OCEANGATE, LONG BEACH, CALIFORNIA

THIS AGREEMENT is entered into as of the 11th day of October, 2011 ("**Contract Date**"), by and between 200 OCEANGATE, LLC, a Delaware limited liability company ("**Seller**"), and MOLINA CENTER LLC, a Delaware limited liability company (" **Buyer**").

RECITALS

Seller owns and is offering for sale the land and improvements commonly known as 200 & 300 Oceangate, Long Beach, California, and more completely described below. Buyer has offered to buy the property, and the parties are entering into this Agreement to set forth the terms and conditions of the sale to Buyer.

NOW, THEREFORE, in consideration of the foregoing and the agreements set forth below, the parties hereto agree as follows:

1. Agreement of Sale.

1.1 Seller hereby agrees to sell to Buyer and Buyer hereby agrees to purchase from Seller that certain real property (the " **Land**") with street address of 200 & 300 Oceangate, Long Beach, California, and more particularly described in attached Exhibit A, together with Seller's right, title and interest in the following, which together with the Land, shall be termed the " **Property**" herein:

(a) the approximately 461,263 square foot office project located at 200 & 300 Oceangate, Long Beach, California and all fixtures and other improvements located upon the Land (collectively, the "**Improvements**");

(b) all easements, rights of way, privileges, licenses, appurtenances and other rights and benefits of Seller belonging to or in any way related to the Land, and the Improvements, including water rights, mineral rights, air rights and development rights, if any (together with the Land and Improvements, the "**Real Property**");

(c) all fixtures, furnishings, equipment and other tangible personal property owned by Seller that are used for the operation of the Property and that are located on the Property or that are used exclusively for the operation of the Property (the " **Personal Property**");

(d) the Leases and Service Contracts (as such terms are hereinafter defined) and all security deposits held by Seller with respect to the Leases;

(e) to the extent assignable, all certificate(s) of occupancy, building or equipment permits, consents, authorizations, variances, waivers, licenses, permits, certificates and approvals from any governmental or quasi-governmental authority necessary for the use of the Land or the Improvements (collectively, the "**Approvals**");

(f) all transferable or assignable warranties (the "**Warranties**") relating to the ownership, development, use and operation of the Land and Improvements;

(g) to the extent assignable, all of Seller's interest in all structural, soil, seismic, geologic, engineering and other reports and studies, all operating manuals for all systems, equipment and operating components of the Property, all marketing materials that are distributed or shown to potential tenants in the marketing of the Property for lease, photos and depictions, all architectural drawings, plans and specifications relating to all or any portion of the Real Property, and all intellectual property rights to the Property, including, without limitation, trade names, trademarks, service marks, logos or other source and business identifiers, trademark registrations and applications for registration used at or relating to the Real Property and any written agreement granting to Seller any right to use any trademark or trademark registration at or in connection with the Real Property (the " **Intangible Property**").

2. Purchase Price. The purchase price for the Property is Eighty-Three Million Dollars ($83,000,000.00) (" **Purchase Price**") and shall be paid in cash by Buyer at the Closing (as defined in Section 10.1 below).

3. Non-Refundable Payment and Deposit

3.1 Non-Refundable Payment. On the Contract Date, as consideration for Seller's agreement to enter into this Agreement and grant Buyer the right to conduct due diligence and terminate this Agreement on and subject to the terms of Section 7, and as a condition precedent to the effectiveness of this Agreement, Buyer shall deliver directly to Seller, by personal check, cash or wire transfer funds in the amount of One Hundred and No/100 ths Dollars ($100) (the "**Non-Refundable Payment**"). The Non-Refundable Payment shall be fully earned and retained by Seller immediately upon receipt and, notwithstanding any provisions of this Agreement to the contrary, the Non-Refundable Payment shall not be returned to Buyer in any circumstance.

3.2 Deposit; Liquidated Damages.

(a) Initial Deposit. Within one (1) business day after the Contract Date, Buyer shall deposit in an escrow (the " **Escrow**") established for the within contemplated transaction with First American Title Insurance Company, National Commercial Services, 1850 Mt. Diablo Blvd., Suite 300, Walnut Creek, California, 94596, Attention: Kitty Schlesinger, Order No. NCS-453433-CC (the " **Title Company**"), the sum of Five Hundred Thousand Dollars ($500,000) (the "**Initial Deposit**"), with instructions to the Title Company to hold the Initial Deposit in the Escrow in an interest-bearing account, with interest accruing for the benefit of Buyer. In the event the sale of the Property is consummated, the Initial Deposit and all interest earned thereon shall be applied towards the Purchase Price. If Buyer elects to terminate this Agreement pursuant to its terms or fails to notify Seller in writing that the Property is acceptable, as provided in Section 7, prior to the end of the Due Diligence Period (as defined in Section 7), the Initial Deposit and all interest thereon shall be returned to Buyer, and the parties shall be released from all further obligations and liability under this Agreement, except for those obligations that survive the termination of this Agreement.

(b) Additional Deposit. Concurrently with, and subject to, the delivery of the Approval Notice to Buyer as provided in Section 7, Buyer shall deposit in the Escrow the additional sum of Two Million and No/100ths Dollars ($2,000,000) (the " **Additional Deposit**" and together with the Initial Deposit, the "**Deposit**"), with instructions to the Title Company to hold such Additional Deposit in the Escrow, in an interest bearing account, with interest accruing for the benefit of Buyer. In the event the sale of the Property to Buyer is consummated, the Deposit and all interest earned thereon shall be applied towards the Purchase Price.

(c) Non-Refundable Deposit. Upon the delivery by Buyer to Seller of the Approval Notice, the Deposit shall be non-refundable to Buyer except in the following events, upon the occurrence of which the Deposit and all interest thereon shall be returned to Buyer: (i) the Closing fails to occur due to a material default by Seller under this Agreement; (ii) the Closing fails to occur as a result of a failure of a condition to Closing in favor of Buyer, but only if such failure occurs other than as a result of a material default by Buyer under this Agreement; or (iii) the terms of this Agreement expressly provide for the return of the Deposit to Buyer. On the Closing Date, the Deposit and all interest earned thereon shall be applied to the Purchase Price.

(d) **Liquidated Damages. If this Agreement does not terminate pursuant to Section 7, but Buyer fails to consummate this transaction on the scheduled Closing Date (as defined in Section 10.1) due to default by Buyer and any such default continues for five (5) business days after written notice from Seller to Buyer, which written notice shall detail such default, Seller shall be entitled to the Deposit, and all interest thereon, as liquidated damages. The parties have acknowledged and agreed that Seller's damages, in the event of a default by Buyer, would be extremely difficult or impracticable to determine. Therefore, by placing their initials below, the parties acknowledge that the Deposit, and all interest thereon, has been agreed upon, after negotiation, as the parties' reasonable estimate of Seller's damages. Notwithstanding the foregoing, in no event shall Seller's ability to recover from Buyer any loss, cost, damage or expense pursuant to any indemnification or other provision of this Agreement that survives the Closing be deemed limited in any respect by this provision or by Seller's receipt of the Deposit.** The parties agree that the Deposit is not intended as a forfeiture or penalty within the meaning of California Civil Code Sections 3275 or 3369 but shall be treated as liquidated damages pursuant to California Civil Code Sections 1671, 1676 and 1677.

/s/ Jeanne R Myerson, President	/s/ John C. Molina, CFO
Seller	Buyer

This Section 3.2 is not intended to limit Seller's remedies under Sections 6, 17.7 or 17.8.

4. Documents to be Delivered to Buyer.

4.1 Due Diligence Deliveries. Seller has provided Buyer with, and Buyer acknowledges receipt of, copies of the materials and documents identified in Exhibit B attached hereto.

4.2 Title Report. Seller has also provided to Buyer, and Buyer acknowledges receipt of that certain title commitment for the Property prepared under Order No. NCS-453433-CC, dated September 9, 2011, together with a copy of each document referred to therein (collectively, the " **Preliminary Title Report**").

4.3 Property Documents. Buyer shall have the right, at Buyer's sole cost and expense and with at least one (1) business day prior notice, to review Seller's real property transaction files (excluding any privileged or confidential information and excluding any valuation and appraisal information), lease files, plans and specification files, and other files relating to the Property and its ownership, operation, management and maintenance during regular business hours, which files are located in the management office at the Property.

4.4 Leases. Seller shall deliver to Buyer copies of the existing leases, license agreements and rental agreements covering any portion of the Property, any guarantees thereof, and all amendments, modifications and supplements thereto as listed on Exhibit C hereto (each a "**Lease**" and collectively, the "**Leases**").

4.5 Tenant Estoppels.

(a) Seller shall deliver to Buyer an estoppel certificate (a " **Tenant Estoppel**"), in the form of attached Exhibit D or, if the applicable Lease provides for a different form of estoppel in the form specified in the applicable Lease, dated no earlier than thirty (30) days prior to Closing, from as many of the tenants of the Property (the "**Tenants**") from whom Seller is able to obtain such Tenant Estoppels through the exercise of Seller's diligent, good faith efforts. Seller shall, at least ten (10) days prior to the expiration of the Due Diligence Period and prior to delivery to the Tenants for execution, deliver completed forms of Tenant Estoppels to Buyer for Buyer's review and approval, provided that Seller shall not be obligated to deliver the form of Tenant Estoppel for any of the following Tenants (collectively, the "**Government Tenants**"): (A) the State of California acting by and through the Director of the Department of General Services; and (B) the United States of America, Department of Veterans Affairs. Buyer may disapprove a Tenant Estoppel only if (i) it is not in the form of Exhibit D or, if the applicable Lease provides for a different form or content of estoppel in the form or content specified in the applicable Lease, the form or content provided by the applicable Lease, or (ii) if the information set forth in the Tenant Estoppel is not consistent with the terms set forth in the applicable Lease. If Buyer has not responded as to such approval within three (3) business days of receipt of a Tenant Estoppel, Buyer shall be deemed to have approved the Tenant Estoppel in question for delivery to Tenant. Seller shall deliver completed Tenant Estoppels to Buyer as they are received by Seller. Notwithstanding the foregoing, Seller shall not be obligated to prepare or seek Tenant Estoppels with respect to the following Leases, as amended and assigned to date: (1) License Agreement, dated November 30, 2000, by and between Pacific Towers Associates

and Captivate Network, Inc.; (2) Antenna Site License Agreement, dated as of November 30, 2006, by and between Seller and Direct America Satellite Services; (3) Telecommunications License Agreement, dated July 13, 2005, by and between Seller and Rocket Internetworking, Inc.; (4) Telecommunications Access and License Agreement, dated December 21, 2009, by and between Seller and TCG Los Angeles, Inc.; (5) License Agreement, dated December 21, 2000, by and between XO Communications, Inc., and Pacific Towers Associates; and (6) UPS Drop Box Agreement, dated February 2, 2010, by and between United Parcel Service, Inc., and Seller.

(b) Estoppel Thresholds. Buyer shall have a right to terminate this Agreement upon written notice prior to the Closing Date and receive a refund of the Deposit and all interest thereon as its sole remedy if Seller fails to deliver to Buyer at least three (3) days prior to the Closing Date, Tenant Estoppels from (i) the State of California acting by and through the Director of the Department of General Services, which is the contracting party under five (5) separate Leases – State Lands Commission (two Leases), California Coastal Commission, and Department of Industrial Relations (two Leases), confirming that such Leases are in effect, that the Tenant has no default claims against Seller, that the term of the Lease is consistent with the term reflected in the Lease, and that the base monthly rent payable is consistent with the base monthly rent shown in the Lease, (ii) the United States of America, Department of Veterans Affairs confirming that the Lease is in full force and effect, the date to which the rent and other charges have been paid in advance, if any; and whether any notice of default has been issued, and (iii) each of (1) AECOM Technology Corp., (2) Pacific Maritime Association, (3) Long Beach Publishing Company, Inc., and Medianews Group, Inc., (4) J. Perez Associates, Inc., and (5) Crowell Weedon & Co. (collectively, the "**Major Non-Government Tenants in Occupancy**") in the form approved or deemed approved by Buyer pursuant to Section 4.5(a) above. Buyer acknowledges and agrees that if the Major Non-Government Tenants in Occupancy delete or modify one or both of sections 20 and 21 of the form Tenant Estoppel attached as Exhibit D, such deletion(s) or modification(s) shall not constitute a change in the form approved or deemed approved by Buyer. As used in this Agreement, the term " **Major Non-Government Tenants**" shall mean the Major Non-Governmental Tenants in Occupancy.

4.6 Service Contracts. Seller has delivered to Buyer, and Buyer acknowledges receipt of, copies of the service, maintenance, management and other contracts and agreements related to the operation and management of the Property, excluding the property management agreement which will not be assigned at Closing, all of which are listed on the attached Exhibit E (the "**Service Contracts**"). If Buyer delivers the Approval Notice, Buyer shall be deemed to have agreed to assume at Closing all of the Service Contracts.

4.7 Survey. Seller shall deliver a copy of Seller's existing survey to Buyer (the " **Survey**"). Buyer may, at its sole cost and expense, cause the Survey to be updated and recertified as deemed necessary and appropriate by Buyer.

4.8 Discharge Permit. So long as this Agreement remains in effect, Seller shall endeavor, at its sole cost and expense, to obtain a discharge permit from an applicable regulatory authority (a "**Discharge Permit**") with respect to the operation of the water collection and discharge system at the Property (the "**Discharge System**"). Seller confirms that it has retained and shall continue to retain, at its sole cost and expense, Kennedy/Jenks Consultants to oversee

the necessary water quality testing, produce the reports and collect the data required in connection with obtaining a Discharge Permit (the " **Water Testing**"). Seller shall promptly provide, or cause to be promptly provided, to Buyer (on an ongoing basis for so long as this Agreement remains in effect) copies of all reports, studies and data obtained and/or generated by Seller's consultants with respect to any Discharge Permit, the Discharge System and/or the Water Testing and any applications or other materials submitted to, and any written correspondence with, any applicable regulatory authority with respect to a Discharge Permit, the Discharge System and/or the Water Testing. If a Discharge Permit is issued prior to Closing, from and after the issuance of such Discharge Permit and continuing until Closing, Seller shall perform all sampling, analysis and data collection as and when required under such Discharge Permit, and disclose the same promptly to Buyer. Buyer shall have the right, from time to time during the Due Diligence Period, to collect samples of water discharged via the Discharge System ("**Samples**"), and to perform water quality testing and analysis on such Samples, at Buyer's cost; provided, however: (i) Buyer shall not (without Seller's prior consent) collect Samples more often than once per calendar week (except that Buyer shall be allowed to collect a high tide sample followed by a low tide sample, or vice-versa, as long as such sampling collection is completed within a 24 hour period); (ii) Buyer's right to collect Samples shall cease upon Buyer's receipt of written notice from Seller confirming that a Discharge Permit covering the operation of the Discharge System has been formally issued and is currently effective; (iii) Samples shall be collected using sampling protocols acceptable to Seller (in Seller's commercially reasonable discretion); (iv) testing and analysis performed on any Samples shall be performed by laboratories (and in accordance with protocols) acceptable to Seller (in Seller's commercially reasonable discretion); and (v) access to the Property in connection with the collection of Samples shall be subject to the requirements of Section 6.

5. Title.

5.1 Title Commitment. Buyer shall be responsible for obtaining, no later than the end of the Due Diligence Period, a commitment from the Title Company to issue at Closing a policy of title insurance in a form acceptable to Buyer, which is not conditioned on the performance by any party or third party of any actions other than the express obligations of the parties under this Agreement (the " **Commitment**"). Seller will provide, at Closing, an affidavit to the Title Company in the form attached hereto as Exhibit J. Buyer shall deliver the Commitment to Seller together with a letter from Buyer to Seller stating that the exceptions to title reflected in the Commitment are approved by Buyer. If Buyer does not provide Seller with the Commitment and such letter prior to the expiration of the Due Diligence Period, the title reflected in the Preliminary Title Report (or any updated title report) shall be deemed unacceptable and disapproved, this Agreement shall terminate and the Deposit, together with all interest thereon, shall be returned to Buyer. Seller shall have no duty to cure, and Buyer shall not be entitled to any offset or credit against the Purchase Price due to, any defect in the title to the Property or any condition or aspect of the Property, to which Buyer may object, except as may be agreed by Seller in writing, in its sole and absolute discretion; provided, however, that Seller shall remove, bond over, or obtain a title endorsement for any liens (" **Seller Liens**") that affect the Property and that are not liens for taxes or assessments accruing on or after the Closing and that are not created by, or the result of actions of, Buyer, Molina or any of their respective affiliates, agents, employees or contractors. Any cure that Seller has so agreed to perform or is obligated to

perform shall become a condition precedent to Closing in favor of Buyer and shall be cured by the Closing Date. For purposes of this Section 5.1, a "cure" of a title exception means the elimination of such exception from title and shall not include the bonding of, or endorsement over unless such bonding is in an amount and on terms required by the Title Company for elimination of such exception from the Title Policy (as defined in Section 5.3) as reasonably determined by Buyer. If such cure is not accomplished by the Closing Date, Buyer, as its sole and exclusive remedy, may either terminate this Agreement, in which case the Deposit shall be returned to Buyer, or waive such objection and complete the Closing subject to such exception, provided that if Seller refuses to remove a Seller Lien at Closing, Buyer shall have the right to instruct the Title Company, as escrow agent, to apply a portion of the Purchase Price sufficient to discharge such Seller Lien at Closing.

5.2 Permitted Exceptions. The following shall constitute the "**Permitted Exceptions**": (a) the Title Company's standard exceptions; (b) all exceptions that are shown on the Commitment; (c) all of the Leases; and (d) all exceptions that arise after the expiration of the Due Diligence Period and prior to the Closing that are not Seller Liens and that are approved by Buyer, in writing, in its sole and absolute discretion, or are caused by Buyer or Molina, their agents, employees, contractors or representatives or result from any new survey of the Real Property or any update of any existing survey.

5.3 Title Policy. Evidence of title shall be the issuance by the Title Company at Closing of a policy of title insurance in the form of the Commitment, subject only to the Permitted Exceptions ("**Title Policy**"). Seller shall be responsible for the cost of a CLTA standard coverage policy of title insurance in the amount of the Purchase Price; Buyer shall be responsible for the incremental cost of an ALTA extended coverage policy of title insurance, the cost of any endorsements to the Title Policy and for providing any necessary surveys (other than the Survey) to the Title Company.

5.4 No Recording. Neither this Agreement nor any memorandum of this Agreement shall be recorded by, or on behalf of, Buyer in the Official Records of the County of Los Angeles. If Buyer violates the terms of this Section 5.4 by recording or attempting to record this Agreement or a memorandum thereof, such act shall not operate to bind or cloud the title to the Property, shall constitute a material breach and default by Buyer under this Agreement, and shall entitle Seller to terminate this Agreement by written notice to Buyer, which termination notice may be recorded against the Property.

6. Access.

6.1 Provided that Buyer has complied with the insurance requirements in Section 6.3 and gives Seller at least one (1) business day's prior notice (oral or written), Seller shall allow Buyer and authorized representatives of Buyer reasonable access, at reasonable times, to the Property for the purposes of satisfying Buyer with respect to the Property. In performing its examinations and inspections of the Property, Buyer shall use reasonable efforts to minimize any interference with Seller's and the Tenants' use and occupancy of the Property. Seller shall have the right at all times to have a representative of Seller accompany any of Buyer or Buyer's employees, agents, contractors, consultants, officers, directors, representatives, managers or

members (collectively, "**Buyer's Agents**") while such persons are on the Property. Buyer may conduct interviews with the Tenants, provided Buyer has given Seller no less than two (2) business days notice prior to any such interview, and provided further that Seller shall have the right to be present at all such interviews. Buyer's breach of this Section 6.1 (and all subsections) shall constitute a material breach and default by Buyer of this Agreement. All investigations and inspections shall be performed in compliance with this Section 6 and all local, state and federal laws, rules and regulations, including, without limitation, any and all permits required thereunder, which permits shall be obtained by and at the sole cost of Buyer.

(a) Buyer shall not conduct or allow any physically intrusive or destructive testing of, on or under the Property, without Seller's prior written consent, which consent may be withheld at Seller's sole and absolute discretion; provided, however, Buyer may, subject to its damage and repair obligations in this Section 6.1 and 6.2, inspect the Property for asbestos-related materials. Buyer shall provide Seller with two (2) days written notice prior to the commencement of any physically intrusive or destructive testing, accompanied by a detailed work plan describing the nature, scope, location and purpose of the proposed work. Buyer acknowledges and agrees that Seller's review of Buyer's work plan is solely for the purpose of protecting Seller's interests, and shall not be deemed to create any liability of any kind on the part of Seller in connection with such review that, for example, the work plan is adequate or appropriate for any purpose or complies with applicable legal requirements. All work and investigations shall be performed in compliance with all local, state and federal laws, rules and regulations, including, without limitation, any and all permits required thereunder, all of which shall be at the sole cost and expense of Buyer.

(b) During the performance of Buyer's investigations, Buyer shall promptly remove and properly dispose of all samples, substances and materials extracted from or generated by Buyer at the Property and, upon the completion of its investigations, shall return the Property to its original condition, including the removal of all equipment and materials used or generated during its investigations. Buyer shall name itself as the generator on any waste manifests required to dispose of said materials and shall obtain its own waste generator identification number with respect thereto. If Buyer fails to perform or cause such restoration, and such failure shall continue for two (2) days after Buyer receives written notice from Seller demanding the cure thereof, Seller may perform or cause to be performed such restoration work, and Buyer shall reimburse Seller for all the costs and expenses thereof within two (2) days after receipt of bills therefor from Seller.

6.2 Notwithstanding anything in this Agreement to the contrary, any entry upon, inspection, or investigation of the Property by Buyer or Buyer's Agents shall be performed at the sole risk and expense of Buyer, and Buyer shall be solely and absolutely responsible for the acts or omissions of any of Buyer's Agents. Furthermore, Buyer shall protect, indemnify, defend and hold Seller, and its successors, assigns, and affiliates harmless from and against any and all losses, damages (whether general, punitive or otherwise), liabilities, claims, causes of action, judgments, costs and legal or other expenses (including, but not limited to, attorneys' fees and costs) (collectively, "**Access Claims**") suffered or incurred by any or all of such indemnified parties to the extent resulting from any act or omission of Buyer or Buyer's Agents in connection with: (i) Buyer's inspection or investigations of the Property; (ii) Buyer's entry upon the

Property; (iii) any activities, studies or investigations conducted at, to, or on the Property by Buyer or Buyer's Agents; or (iv) the presence by Buyer or Buyer's Agents at or on the Property. If at any time prior to Closing, Buyer or Buyer's Agents cause any damage to the Property, Buyer shall, at its sole expense, immediately restore the Property to the same condition as existed immediately prior to the occurrence of such damage as determined by Seller in Seller's reasonable discretion. Buyer's obligations under this Section 6.2 shall survive the termination of this Agreement or the Closing, as the case may be, notwithstanding any other provisions herein to the contrary, and shall not be limited by the terms of Section 3. Buyer shall, at all times, keep the Property free and clear of any mechanics', materialmen's or design professional's claims or liens arising out of or relating to its investigations of the Property. The foregoing provisions of this Section 6.2 shall not apply to, and Buyer shall have no liability for, or obligation to protect, indemnify, defend or hold Seller (or any other person or party) harmless from or against any of the following: (i) the discovery by Buyer or any of Buyer's Agents of any Hazardous Material on, under or affecting the Property, except to the extent that Buyer and Buyer's Agents exacerbate such condition in any material respect; (ii) the discovery by Buyer or Buyer's Agents of adverse physical, environmental, economic, neighborhood or other conditions at, on, in, under, around or affecting the Property, except to the extent that Buyer and Buyer's Agents exacerbate such condition in any material respect; or (iii) events, occurrences or conditions resulting from the acts or omissions of Seller or Seller's agents or representatives, except to the extent Buyer and Buyer's Agents exacerbate such events, occurrences or condition in any material respect. Notwithstanding anything in this Section 6.2 to the contrary, Buyer shall have no duty or obligation to identify or repair any condition in, on or affecting the Property that Buyer or Buyer's Agents discover or of which they are aware that may or could be unsafe or dangerous unless and to the extent such unsafe or dangerous condition was caused by the Buyer or Buyer's Agents.

6.3 Buyer shall maintain in full force and effect during the term of this Agreement, the public liability insurance covering Buyer and its activities at the Property on the terms and with the coverages described in the ACORD Certificate of Liability Insurance attached hereto as Exhibit K, naming Seller as an additional insured under all such liability insurance.

7. Due Diligence Period. Buyer shall have until 5:00 p.m., California time, on the date that is thirty (30) days after the Contract Date ("Due Diligence Period") to inspect and investigate the Property, including roof, plumbing, soils, electrical, sprinkler, water, sewer, mechanical, engineering, heating, ventilation and air conditioning and life safety systems, structural integrity of the Improvements, measurement of the square footage of the Land and Improvements, legal status and requirements pertaining to the Property (including applicable building codes, zoning, environmental, public health and fire safety laws), hazardous substance inspections including preparation of an environmental assessment, suitability of the Property for Buyer's purposes and all other matters of significance to Buyer. Buyer agrees to keep the results of such testing and inspections confidential, except to the extent that disclosure is required by law (in which case Buyer will notify Seller in writing prior to making any such disclosure), which confidentiality obligations shall survive the termination of this Agreement. Buyer shall order and pay for all costs and expenses with respect to such inspections and investigations. If, in Buyer's sole and absolute discretion, Buyer desires to proceed with its acquisition of the Property, Buyer shall deliver written notice to Seller (the " **Approval Notice**"), prior to the expiration of the Due

Diligence Period, stating that it approves the Property, in which case the parties shall proceed to complete the Closing (subject to the terms and conditions of this Agreement). If Buyer fails to deliver the Approval Notice prior to the expiration of the Due Diligence Period or if such Approval Notice seeks to modify any of the terms or provisions of this Agreement, Buyer will be deemed to have disapproved the Property and to have exercised its right to terminate this Agreement pursuant to this Section 7, in which case this Agreement shall automatically terminate as of the expiration of the Due Diligence Period and the Initial Deposit, together with all interest earned thereon, shall be returned to Buyer. Further, if Buyer fails to deposit the full Additional Deposit in Escrow prior to the expiration of the Due Diligence Period, regardless of whether Buyer has delivered the Approval Notice, Buyer will be deemed to have disapproved the Property and to have exercised its right to terminate this Agreement pursuant to this Section 7, in which case this Agreement shall automatically terminate as of the expiration of the Due Diligence Period and the Initial Deposit, together with all interest earned thereon, shall be returned to Buyer. Notwithstanding anything in this Agreement to the contrary, Buyer may elect, at any time prior to the expiration of the Due Diligence Period, for any reason or no reason, to terminate this Agreement, upon which termination the Deposit and all interest earned thereon shall be refunded to Buyer and the parties shall have no further obligation to each other excepts for those obligations which expressly survive such termination.

8. Acceptance of Property "As Is". ACKNOWLEDGING BUYER'S OPPORTUNITY TO INSPECT AND INVESTIGATE THE PROPERTY AS PROVIDED IN THIS AGREEMENT, BUYER AGREES TO TAKE THE PROPERTY "AS IS" WITH ALL FAULTS AND CONDITIONS THEREON, SUBJECT ONLY TO THE EXPRESS REPRESENTATIONS, WARRANTIES AND COVENANTS OF SELLER SET FORTH IN THIS AGREEMENT OR THE OTHER AGREEMENTS ENTERED INTO BETWEEN BUYER AND SELLER AS OF THE CLOSING DATE. ANY INFORMATION, REPORTS, STATEMENTS, DOCUMENTS OR RECORDS ("**DISCLOSURES**") PROVIDED OR MADE TO BUYER OR ITS CONSTITUENTS BY SELLER, ITS AGENTS, REPRESENTATIVES OR EMPLOYEES CONCERNING THE PROPERTY SHALL NOT CONSTITUTE REPRESENTATIONS OR WARRANTIES. BUYER SHALL NOT RELY ON SUCH DISCLOSURES BUT, RATHER, BUYER SHALL RELY SOLELY ON ITS OWN INSPECTION OF THE PROPERTY AND THE EXPRESS REPRESENTATIONS, WARRANTIES AND COVENANTS OF SELLER IN THIS AGREEMENT. ACCORDINGLY, BUYER'S DELIVERY OF THE APPROVAL NOTICE PURSUANT TO THE PROVISIONS OF SECTION 7 (DUE DILIGENCE PERIOD) ABOVE, SHALL CONSTITUTE BUYER'S ACKNOWLEDGMENT AND AGREEMENT TO THE FOLLOWING: (i) BUYER HAS REVIEWED, EVALUATED AND VERIFIED THE DISCLOSURES AND DOCUMENTS AND HAS CONDUCTED ALL INSPECTIONS, INVESTIGATIONS, TESTS, ANALYSES, APPRAISALS AND EVALUATIONS OF THE PROPERTY (INCLUDING FOR TOXIC OR HAZARDOUS MATERIALS, SUBSTANCES OR WASTES (DEFINED AND REGULATED AS SUCH PURSUANT TO SECTIONS 25316 AND 25501 OF THE CALIFORNIA HEALTH & SAFETY CODE, THE RESOURCE CONSERVATION AND RECOVERY ACT, THE COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY ACT OF 1980, AS AMENDED ("**CERCLA**") OR ANY SIMILAR LAWS AND ALL REGULATIONS PROMULGATED THEREUNDER)) AS BUYER CONSIDERS NECESSARY OR APPROPRIATE TO SATISFY ITSELF FULLY WITH RESPECT TO THE CONDITION AND ACCEPTABILITY OF THE PROPERTY (ALL

OF SUCH INSPECTIONS, INVESTIGATIONS AND REPORTS BEING HEREIN COLLECTIVELY CALLED THE "**INVESTIGATIONS**"); (ii) SELLER HAS PERMITTED BUYER ACCESS TO THE PROPERTY AND HAS DELIVERED TO, OR MADE AVAILABLE TO, BUYER ALL OF THE MATERIALS REFERENCED IN SECTION 4 (INCLUDING THE DOCUMENTS AND MATERIALS IDENTIFIED ON EXHIBIT B) (COLLECTIVELY, THE "**DOCUMENTS**"); AND (iii) BUYER HAS COMPLETED ITS DUE DILIGENCE WITH RESPECT TO THE PROPERTY AND THE DOCUMENTS TO ITS SATISFACTION, IS THOROUGHLY FAMILIAR WITH THE PHYSICAL CONDITION OF THE PROPERTY, AND SUBJECT ONLY TO THE EXPRESS REPRESENTATIONS, WARRANTIES AND COVENANTS OF SELLER IN THIS AGREEMENT OR THE OTHER AGREEMENTS ENTERED INTO BETWEEN BUYER AND SELLER AS OF THE CLOSING DATE, IS ACQUIRING THE PROPERTY BASED EXCLUSIVELY UPON ITS OWN INVESTIGATIONS AND INSPECTIONS OF THE PROPERTY AND THE DOCUMENTS.

FURTHER, BUYER'S DELIVERY OF THE APPROVAL NOTICE PURSUANT TO THE PROVISIONS OF SECTION 7 (DUE DILIGENCE PERIOD) ABOVE, SHALL CONSTITUTE BUYER'S ACKNOWLEDGMENT AND AGREEMENT TO THE PROVISIONS OF THIS SECTION 8 AND THAT, REGARDLESS OF THE CONTENT OF ANY OF THE DOCUMENTS OR ANY STATEMENTS THAT SELLER, ITS AGENTS, EMPLOYEES, OFFICERS, CONTRACTORS, PARTNERS OR MEMBERS MAY HAVE MADE TO BUYER, ITS AGENTS, EMPLOYEES, OFFICERS, CONTRACTORS, PARTNERS OR MEMBERS PRIOR TO OR DURING THE DUE DILIGENCE PERIOD, OTHER THAN THE EXPRESS REPRESENTATIONS, WARRANTIES AND COVENANTS OF SELLER IN THIS AGREEMENT AND THE OTHER AGREEMENTS ENTERED INTO BY AND BETWEEN BUYER AND SELLER AS OF THE CLOSING DATE, SELLER HAS NOT MADE, DOES NOT MAKE AND SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, WARRANTIES, PROMISES, COVENANTS, AGREEMENTS OR GUARANTIES OF ANY KIND OR CHARACTER WHATSOEVER, WHETHER EXPRESS OR IMPLIED, ORAL OR WRITTEN, PAST, PRESENT OR FUTURE, OF, AS TO, CONCERNING OR WITH RESPECT TO: (1) THE NATURE, QUALITY OR CONDITION OF THE PROPERTY, INCLUDING, WITHOUT LIMITATION, THE WATER, SOIL AND GEOLOGY; (2) THE INCOME TO BE DERIVED FROM THE PROPERTY; (3) THE SUITABILITY OF THE PROPERTY FOR ANY AND ALL ACTIVITIES AND USES THAT BUYER MAY CONDUCT THEREON; (4) THE COMPLIANCE OF OR BY THE PROPERTY OR ITS OPERATION WITH ANY LAWS, RULES, ORDINANCES OR REGULATIONS OF ANY APPLICABLE GOVERNMENTAL AUTHORITY OR BODY; (5) THE HABITABILITY, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PROPERTY; OR (6) ANY OTHER MATTER WITH RESPECT TO THE PROPERTY. BUYER SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS REGARDING TERMITES OR WASTES, AS DEFINED BY THE U.S. ENVIRONMENTAL PROTECTION AGENCY REGULATIONS AT 40 C.F.R., OR ANY HAZARDOUS SUBSTANCE, AS DEFINED BY CERCLA AND REGULATIONS PROMULGATED THEREUNDER.

EXCEPT WITH RESPECT TO HAZARDOUS MATERIALS THAT WERE DISCHARGED, RELEASED OR DISPOSED BY SELLER OR ITS MEMBERS, MANAGERS, PARTNERS, DIRECTORS, OFFICERS, SHAREHOLDERS, TRUSTEES, BENEFICIARIES, AGENTS, EMPLOYEES AND REPRESENTATIVES IN VIOLATION OF APPLICABLE ENVIRONMENTAL LAWS AS OF THE DATE OF SUCH DISCHARGE, DISPOSAL OR RELEASE, BUYER, ITS SUCCESSORS AND ASSIGNS, HEREBY WAIVE, RELEASE AND AGREE NOT TO MAKE ANY CLAIM OR BRING ANY COST RECOVERY ACTION OR CLAIM FOR CONTRIBUTION OR OTHER ACTION OR CLAIM AGAINST SELLER (COLLECTIVELY OR INDIVIDUALLY) OR ITS RELATED ENTITIES, AND ITS AND THEIR MEMBERS, MANAGERS, PARTNERS, DIRECTORS, OFFICERS, SHAREHOLDERS, TRUSTEES, BENEFICIARIES, AGENTS, EMPLOYEES, REPRESENTATIVES, SUCCESSORS, HEIRS AND ASSIGNS (COLLECTIVELY, "SELLER AND ITS AFFILIATES") BASED ON, (x) ANY FEDERAL, STATE, OR LOCAL ENVIRONMENTAL OR HEALTH AND SAFETY LAW OR REGULATION, INCLUDING CERCLA OR ANY STATE EQUIVALENT, OR ANY SIMILAR LAW NOW EXISTING OR HEREAFTER ENACTED; (y) ANY DISCHARGE, DISPOSAL, RELEASE, OR ESCAPE OF ANY CHEMICAL, OR ANY MATERIAL WHATSOEVER, ON, AT, TO, OR FROM THE PROPERTY; OR (z) ANY CONDITIONS WHATSOEVER ON, IN, UNDER, OR IN THE VICINITY OF THE PROPERTY. EXCEPT WITH RESPECT TO ANY CLAIMS ARISING OUT OF ANY BREACH OF COVENANTS, REPRESENTATIONS OR WARRANTIES EXPRESSLY SET FORTH IN THIS AGREEMENT OR THE DOCUMENTS EXECUTED IN CONNECTION WITH THIS AGREEMENT, BUYER, ON BEHALF OF ITSELF AND ITS PARTNERS, MEMBERS, MANAGERS, DIRECTORS, OFFICERS, SHAREHOLDERS, TRUSTEES, BENEFICIARIES, AGENTS, EMPLOYEES, REPRESENTATIVES, SUCCESSORS, HEIRS AND ASSIGNS HEREBY RELEASES, SELLER AND ITS AFFILIATES, FROM ANY AND ALL CLAIMS OF ANY KIND WHATSOEVER, KNOWN OR UNKNOWN, WITH RESPECT TO ANY ASPECT OF THE PROPERTY, INCLUDING THE FOREGOING MATTERS, AND SPECIFICALLY WAIVES WITH RESPECT TO ALL SUCH MATTERS THE PROVISIONS OF CALIFORNIA CIVIL CODE SECTION 1542, AND ANY COMPARABLE LAW APPLICABLE IN THE STATE WHERE THE PROPERTY IS LOCATED, REGARDING THE MATTERS COVERED BY A GENERAL RELEASE, WHICH PROVIDES AS FOLLOWS:

> "A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR."

BUYER AND SELLER REPRESENT AND ACKNOWLEDGE THAT THIS SECTION 8 WAS EXPLICITLY NEGOTIATED AND BARGAINED FOR AS A MATERIAL PART OF BUYER'S CONSIDERATION BEING PAID. Terms appearing in this Section 8 in all capital letters that have been defined elsewhere in this Agreement shall have the meanings set forth in such definitions.

9. Conditions to Closing.

9.1 Buyer's Conditions to Closing. Buyer's obligation to purchase the Property is conditioned upon the satisfaction of each of the following conditions each of which is for the exclusive benefit of Buyer. Buyer may, at any time or times before the Closing, waive one or more of the following conditions, but only in writing and any such waiver will not affect its rights and remedies with respect to the remaining conditions:

(a) Buyer shall have received the requisite Tenant Estoppels as and when required under Section 4.5(b). If Buyer has not received the requisite Tenant Estoppels at least six (6) business days prior to the Closing Date, Buyer shall have the one-time right to extend the Closing Date by an additional two (2) business days by delivering written notice of Buyer's exercise of such right to Seller no later than the date five (5) business days prior to the Closing Date. If Buyer timely exercises such right, the Closing Date shall be extended by two (2) business days.

(b) The Rent Roll and Delinquency Report (as defined in Sections 11.1(h) and 11.1(i) below) shall have been updated to a date not earlier than three (3) business days prior to the Closing Date, and such updated Rent Roll and Delinquency Report shall not identify any material adverse change (with a change being deemed to be material and adverse only if the change would expose Buyer to damages or a loss of income in excess of Thirty-Five Thousand and No/100ths Dollars ($35,000)) in the aggregate as to all Leases with the Government Tenants and Major Non-Governmental Tenants as compared to the status of such Leases as shown on the Rent Roll and Delinquency Report delivered to Buyer two (2) business days prior to the expiration of the Due Diligence Period pursuant to Sections 11.1(h) and 11.1(i) below;

(c) No Government Tenant or Major Non-Government Tenant shall have notified Seller or Buyer of any material adverse change in its Tenant Estoppel (with a change being deemed to be material and adverse only if the change would expose Buyer to damages or a loss of income in excess of Thirty-Five Thousand and No/100ths Dollars ($35,000) in the aggregate as to all such Tenant Estoppels); no proceedings under any federal or state bankruptcy or insolvency laws have been commenced by or against any of the Major Non-Government Tenants that have not been terminated; no general assignment for the benefit of creditors has been made by any of the Major Non-Government Tenants; and no trustee or receiver of any of the Major Non-Government Tenants' property has been appointed;

(d) Seller's performance of all its obligations hereunder;

(e) The truth, completeness and accuracy, in all material respects, of each representation and warranty made by Seller as of the Contract Date and the Closing; and

(f) The issuance at Closing of the Title Policy.

9.2 Seller's Conditions. Seller's obligation to sell the Property is conditioned upon the satisfaction of each of the following conditions, each of which is for the exclusive benefit of Seller. Seller may, at any time before the Closing, waive one or more of the following conditions, but only in writing and any such waiver will not affect its rights and remedies with respect to the remaining conditions:

(a) The performance by Buyer of all its obligations hereunder; and

(b) The truth, completeness and accuracy, in all material respects, of each representation and warranty made by Buyer as of the Contract Date and the Closing.

9.3 Seller Default. If, at the Closing, (i) Seller is in default of any of its obligations hereunder, or (ii) any of Seller's representations or warranties set forth in Section 11.1 are untrue, inaccurate or incorrect when given, in any material respect, or (iii) the Closing otherwise fails to occur by reason of Seller's failure or refusal to perform its obligations hereunder in a prompt and timely manner, and any such circumstance described in any of clauses (i), (ii) or (iii) continues for five (5) business days after written notice from Buyer to Seller, which written notice shall detail such default, untruth or failure, as applicable, then Buyer shall have the right, to elect, as its sole and exclusive remedy, to (a) terminate this Agreement by written notice to Seller, promptly after which (A) the Deposit and all interest earned thereon shall be returned to Buyer, and (B) Seller shall pay to Buyer any title, escrow, legal and inspection fees incurred by Buyer and any other expenses incurred by Buyer in connection with its review of the Property, and the negotiation, documentation and performance of this Agreement (including, without limitation, the fees and expenses of environmental and engineering consultants, legal and accounting fees and expenses, and other out-of-pocket third party charges related to the transactions contemplated by this Agreement and their consummation), subject to a cap of $125,000 (collectively, "**Buyer's Costs**"), in which case, the parties shall have no further rights or obligations hereunder except for obligations which expressly survive the termination of this Agreement, or (b) waive the condition and proceed to Closing, or (c) seek specific performance of this Agreement by Seller. As a condition precedent to Buyer exercising any right it may have to bring an action for specific performance hereunder, Buyer must commence such an action within ninety (90) days after the occurrence of Seller's default. Buyer agrees that its failure to timely commence such an action for specific performance within such ninety (90) day period shall be deemed a waiver by it of its right to commence an action for specific performance as well as a waiver by it of any right it may have to file or record a notice of *lis pendens* or notice of pendency of action or similar notice against any portion of the Property. Notwithstanding the foregoing, if by Seller's affirmative acts the remedy of specific performance has been rendered unavailable to Buyer, Buyer shall have and may assert against Seller as a result of Seller's default under this Agreement, any and all rights available at law and in equity, without imposition of the limitations in this Agreement on Buyer's rights, remedies or damages.

10. Closing.

10.1 Closing Date. The consummation of the purchase and sale of the Property (the "**Closing**") shall be held at the offices of the Title Company (or at such other location as the parties may agree) on the later to occur of: (i) the date that is twenty-one (21) days after Buyer's delivery of the Approval Notice; and (ii) the date that is ten (10) business days following the date upon which both Buyer and Seller have received written notice confirming that a Discharge Permit covering the operation of the Discharge System has been formally issued and is currently

effective (the "**Closing Date**"), which may be extended in accordance with the terms of Sections 9.1(a), this Section 10.1 and Section 11.2, but in any event shall not be later than January 13, 2012 (the "**Outside Closing Date**"). Buyer acknowledges that Seller is required to defease the existing securitized loan that is currently secured by a deed of trust on the Property (the "**Existing Loan**") in order to deliver title to the Property free and clear of the lien of such deed of trust (the "**Existing Deed of Trust**"). In connection with such defeasance, Buyer agrees to cooperate in good faith with all usual and customary requirements imposed by the master loan servicer, bond trustee and ratings agency for such defeasance transaction so long as Buyer is not required to incur any additional liability or expense in so doing. The parties acknowledge that, in light of the defeasance, the Grant Deed (as defined below) will be recorded, and the Seller's proceeds will be disbursed, one day after the Closing Date. Seller may extend the Closing Date by up to three (3) business days to accommodate such defeasance. Seller shall be solely responsible for any and all costs, fees and expenses in connection with such defeasance, and any yield maintenance or other premiums or payments required in connection with such defeasance. The defeasance of the Existing Loan shall not be a condition to Seller's obligation to close the Escrow.

10.2 Seller's Deposits Into Escrow. Seller shall deposit the following documents and items into escrow at least one (1) business day prior to the Closing Date:

(a) a duly executed and acknowledged grant deed conveying the Property and Improvements to Buyer in the form of the attached Exhibit F, together with a separate transfer tax affidavit (the "**Grant Deed**");

(b) a duly executed bill of sale and general assignment, in the form of the attached Exhibit G (the "**Assignment**"), transferring the Personal Property, Leases, Service Contracts, Approvals, Warranties and Intangible Property to Buyer;

(c) an affidavit in the form of the attached Exhibit H stating that Seller is not a "foreign person" under IRC Section 1445(f)(3);

(d) tenant notice letters for all tenants at the Property informing them of the sale of the Property and assignment of the Leases to Buyer, in the form of attached Exhibit I;

(e) a duly executed affidavit in the form required by the California Franchise Tax Board certifying that no withholding of any amount of the Purchase Price is required in connection with the Closing;

(f) Seller's share of the closing costs as described in Section 10.5 below or instructions to Title Company to deduct same from the Purchase Price;

(g) an owner's title affidavit in the form of the attached Exhibit J;

(h) the Rent Roll, updated to a date no earlier than three (3) business days prior to the Closing Date, certified by Seller as true and correct;

(i) A certification that all of the representations and warranties set forth in Section 11.1 remain true, complete and accurate, except to the extent of any exceptions to such representations and warranties identified in such certification; and

(j) such other documents as may reasonably be required to complete the Closing.

10.3 Seller's Deliveries to Buyer Outside of Escrow. Seller shall deliver to Buyer at the Property (except as otherwise provided below) on or before the Closing Date, all of the following:

(a) originals, to the extent in Seller's possession or control, or copies of the Leases and the Service Contracts, which copies are certified by Seller as true and correct;

(b) the original Estoppel Certificates, duly executed by the Tenants, which shall be delivered to Buyer's counsel, James Moore of Boutin Jones Inc.;

(c) all keys and security codes to the Property;

(d) electronic or hard copies of all Documents; and

(e) originals or copies of all Lease files and Property files, including all records, instruments and correspondence related to maintenance and repair, the Tenants, the Leases, construction and alteration of the Improvements (base building and tenant improvements), and operation of the Property, to the extent such files are located at the Real Property.

10.4 Buyer's Deposits into Escrow. Buyer shall deposit the following into escrow at least one (1) business day prior to the Closing Date:

(a) the balance of the Purchase Price in immediately available funds;

(b) Buyer's share of the closing costs as described in Section 10.5. below;

(c) two original duly executed counterparts of the Assignment; and

(d) such other documents as may reasonably be required to complete the Closing.

10.5 Adjustment and Proration. All accounts receivable and all accounts payable shall be prorated between Buyer and Seller as of 12:01 a.m. on the Closing Date, on the basis of a 365-day year, with Seller entitled to all accounts receivable and responsible for all accounts payable with respect to the period prior to such date and time, and with Buyer entitled to all accounts receivable and responsible for all accounts payable with respect to the period from and after such date and time. Prior to Closing, Seller shall prepare for review, comment and agreement by Buyer a proration statement for the Property, and each party shall be credited or charged at the Closing, in accordance with the following:

(a) Accounts Receivable. Seller shall account to Buyer for any Rents actually collected by Seller for the month in which the Closing occurs, and Buyer shall be credited for its pro rata share applicable to the period from and after the Closing Date. For purposes of this Agreement, the term " **Rents**" means and includes Fixed Rents and Additional Rents; "**Fixed Rents**" means the periodic fixed rent payable by a Tenant under its Lease; and "**Additional Rents**" means all amounts, other than Fixed Rents, due from any Tenant under any Lease, including without limitation, percentage rents, escalation charges for real estate taxes, parking charges, marketing fund charges, reimbursement of operating expenses or common area expenses, maintenance escalation rents or charges, cost of living increases or other charges of a similar nature, if any, and any additional charges and expenses payable under any Lease.

(b) Accounts Payable. For purposes of this Agreement, the term "**Expenses**" means all operating expenses normal to the operation and maintenance of the Property, including without limitation real property taxes and assessments, current installments of any improvement bonds or assessments which are a lien on the Property or which are pending and may become a lien on the Property, water, sewer and utility charges, amounts payable under any Service Contract for any period in which the Closing occurs, permits, licenses and inspection fees. Expenses shall not include expenses which are of a capital nature.

(i) Prepaid Expenses. To the extent Expenses have been paid prior to the Closing Date for any part of the period on or after the Closing Date, Seller shall account to Buyer for such prepaid Expenses, and Seller shall be credited for the amount of such prepaid expenses applicable to the period after the Closing Date.

(ii) Unpaid Expenses. To the extent Expenses relating to the period prior to the Closing Date are unpaid as of the Closing Date but are ascertainable, Buyer shall be credited for Seller's pro rata share of such Expenses for the period prior to the Closing Date.

(iii) Service Contracts. Payments due under any Service Contracts shall be prorated as of the Closing Date, and Buyer shall be liable for all payments accruing thereunder after the Closing. Seller shall be responsible for all payments under all contracts and agreements not assumed by Buyer

(c) Property Taxes. Seller shall be responsible for all real and personal property ad valorem taxes and special assessments applicable to the period prior to the Closing Date; Buyer shall be responsible for all real and personal property ad valorem taxes and special assessments applicable to the period from and after the Closing Date. With respect to any property tax appeal or reassessment filed by Seller for the current tax year or tax years (or portions thereof) prior to the Closing, Seller shall be entitled to the full amount of any refund or rebate resulting therefrom applicable to the period before the Closing Date, except to the extent such amounts are payable to, or otherwise accrue to the benefit of, the Tenants pursuant to the Leases, which amounts Seller shall promptly refund to such Tenants.

(d) Utility Charges. All utility (including electricity, gas, water, sewer and telephone) charges will be prorated to the Closing Date as Expenses. All refundable utility security deposits, if any, will be retained by Seller.

(e) Government Tenants. Buyer acknowledges that the Government Tenants pay Rents in arrears. Accordingly, Seller shall receive a credit at Closing for the Rents that accrue under the Leases of the Government Tenants in the month that Closing occurs, to the extent any rents accrue under such Leases.

(f) Molina Rents and Reimbursements. If, as of the Closing Date, Seller is due any amounts from Molina under its Lease that are ascertainable, Seller shall receive a credit at Closing for such amounts. Likewise, if any amounts are due and owing from Seller to Molina at Closing, Seller shall pay such amounts to Molina at or before Closing. Any amounts that are due and owing from Seller to Molina after Closing shall be paid by Seller to Molina as and when such amounts come due, after deduction for all amounts then due and owing to Seller by Molina or Buyer.

(g) Post-Closing. If the amount of any proration cannot be determined at the Closing, the adjustments will be made between the parties as soon after Closing as possible, as follows:

(i) Non-delinquent Rents. If after the Closing either Buyer or Seller collects any non-delinquent Rents applicable to the month in which the Closing occurred (or if Seller collects any Rents applicable to any month following the month in which the Closing occurred), such Rents shall be prorated as of the Closing Date and paid to the party entitled thereto not later than five (5) business days following receipt, except to the extent such party received a credit at Closing for such Rents.

(ii) Delinquent Rents for Month in which the Closing Occurred. If after the Closing Date either Buyer or Seller receives from any Tenant Rents that were delinquent as of the Closing Date and that relate to the rental period in which the Closing occurred, then such Rents shall be applied in the following order of priority: First, to reimburse Buyer for all out-of-pocket third-party collection costs actually incurred by Buyer in collecting such Rents; second, to satisfy such Tenant's Rent obligations relating to the period after the Closing Date; and third, to satisfy such delinquent Rent obligations relating to the period prior to the Closing Date. Buyer agrees to use commercially reasonable efforts to collect any such delinquent rents but Buyer has no obligation to institute any collection action or otherwise incur any material cost in connection therewith. Seller shall have no right to pursue or continue the collection of such delinquent Rents from any Tenant in occupancy as of the Closing Date, but Seller shall have the right to continue to prosecute any collection proceedings that were initiated prior to the Closing against any tenant no longer in occupancy as of the Closing Date. Notwithstanding the foregoing, if Molina owes any Rents for any period prior to Closing for which Seller did not receive a credit at Closing, Buyer shall pay all Rents received from Molina to Seller until such Rents owed to Seller have been paid in full.

(iii) Expenses. With respect to any invoice received by Buyer or Seller after the Closing Date for Expenses that relate to the period in which the Closing occurred, the party receiving such invoice shall give the other party written notice of such invoice, and the other party shall have thirty days to review and approve the accuracy of any such invoice. If the parties agree that the Invoice is accurate and should be paid, the parties shall compute each party's pro rata share, and deliver a check for that amount in favor of the vendor.

(h) Survival of Obligations. The obligations of Seller and Buyer under this Section 10.5 shall survive the Closing.

10.6 Items Not to be Prorated. There shall be no prorations or adjustments of any kind with respect to:

(a) Insurance Premiums. Insurance Premiums shall not be prorated. Seller will terminate its coverages as of the Closing Date, and Buyer shall be responsible for obtaining its own coverages as of the Closing Date.

(b) Delinquent Fixed Rents for Full Months Prior to the Month in which the Closing Occurred . Delinquent Fixed Rents with respect to Tenants under the Leases applicable to months prior to the calendar month in which the Closing occurred shall remain the property of Seller, and Buyer shall have no claim thereto whether collected by Seller or Buyer, before or after the Closing, and no responsibility of any kind with respect thereto except as specifically set forth herein. Seller shall not take or continue to take collection measures from or after the Closing. Buyer agrees to use commercially reasonable efforts to collect any delinquent Fixed Rents owed Seller, but Buyer has no obligation to institute any collection action or otherwise incur any material costs in connection therewith. Except with respect to the Rents collected from Molina, Fixed Rents collected from Tenants after the Closing Date shall be applied in the following order of priority: First, to reimburse Buyer for all out-of-pocket third-party collection costs actually incurred by Buyer in collecting such Rents; second, to satisfy such Tenant's Rent obligations relating to the period after the Closing Date; and third, to satisfy such delinquent Rent obligations relating to periods prior to the Closing Date. In the event that Buyer collects any such delinquent Fixed Rents, Buyer shall apply such Fixed Rents as contemplated above and shall promptly pay over to Seller any amounts properly owed to Seller.

(c) Additional Rents Relating to Full or Partial Months Prior to the Closing Date . If Additional Rents relating to full or partial months prior to the Closing Date are not finally adjusted between Seller and any Tenant until after the Closing Date, then any refund to which any Tenant may be entitled shall be the obligation of Seller, and any additional amounts due from the Tenant for such period shall be the property of Seller. Buyer shall have no obligation with respect to any such refund due to any Tenant and no claim to any such amounts due from any Tenant, except that Buyer shall promptly pay to Seller any such delinquent Additional Rent amounts as it actually collects. If Seller receives any refund of expenses paid prior to the Closing and relating to a period prior to the Closing, and such expenses were reimbursed in whole or in part by any Tenant, Seller shall refund to each Tenant its share of any such refund. Buyer agrees to use commercially reasonable efforts to collect any such Additional Rents but Buyer has no obligation to institute any collection action or otherwise incur any material cost in connection therewith.

(d) Security Deposits. Seller shall deliver to Buyer (or credit to Buyer at Closing) all prepaid rents, security deposits, letters of credit and other collateral actually held by Seller or any of its affiliates or successors in interest under any of the Leases, to the extent not applied by Seller prior to the Closing Date to the extent permitted under the Leases. From and after the Contract Date, Seller shall not apply any security deposits without the Buyer's prior written consent.

(e) Survival. The terms of Section 10.6 shall survive the Closing.

10.7 Closing Costs. The Closing costs for this transaction shall be paid as follows:

(a) Seller shall pay (i) any brokerage fees to the Selling Broker as required under Section 17.8 below; (ii) one-half of all transfer and sales taxes (including documentary transfer taxes); (iii) all costs, expenses and fees related to the defeasance of the Existing Loan; (iv) the cost of the Title Policy, up to but not to exceed an amount equal to the cost of owner's standard CLTA coverage title insurance in the amount of the Purchase Price; (v) one-half of the escrow fees; and (vi) all other costs and expenses allocated to Seller pursuant to this Agreement.

(b) Buyer shall pay (i) any brokerage fees to the Buying Broker as required under Section 17.8 below; (ii) one half of all transfer and sales taxes (including documentary transfer taxes); (iii) the increased cost of the Title Policy associated with ALTA extended coverage and endorsements requested by Buyer (except for "gap" coverage); (iv) all recording fees (other than in connection with any documents recorded in connection with the defeasance of the Existing Loan); (v) one-half of the escrow fees; and (vi) all other costs and expenses allocated to Buyer pursuant to this Agreement.

(c) All other costs shall be paid in accordance with customary practices in the County of Los Angeles.

10.8 Closing. Pursuant to Section 10.1 above, Title Company shall close the escrow for this transaction when it is in a position to issue the Title Policy and has received from Seller and Buyer the items required of each in Sections 10.2 and 10.4 above. Title Company shall close escrow by doing the following:

(a) Recording the Grant Deed in the Official Records of the County of Los Angeles;

(b) Delivering to Buyer the Title Policy, the original documents and items listed in Section 10.2 above, and a closing statement for the escrow consistent with this Agreement and signed by Buyer and Seller (the "**Closing Statement**"), and any refund due Buyer; and

(c) Delivering to Seller the amount due Seller as shown on the Closing Statement, the original documents listed in Section 10.4 above, and a signed original of Seller's Closing Statement.

10.9 Possession. Seller shall deliver possession of the Property to Buyer on the Closing Date, subject to the rights of the Tenants under the Leases.

11. Representations and Warranties.

11.1 Representations and Warranties of Seller. Seller hereby makes the following representations and warranties to Buyer, which representations and warranties shall survive the Closing, and all of which (i) are material and are being relied upon by Buyer, and (ii) are true, complete and accurate as of the date hereof.

(a) Organization. Seller is a limited liability company, duly organized, validly existing and in good standing under the laws of the State of Delaware, and qualified to do business, and in good standing, in the State of California.

(b) Authorization. This Agreement has been duly authorized, executed, and delivered by Seller; the obligations of Seller under this Agreement are legal, valid, and binding obligations of Seller; and this Agreement does not, and at the time of Closing will not, (i) violate or conflict with the organizational documents of Seller or any member of Seller acting on Seller's behalf, (ii) violate or conflict with any judgment, decree, or order of any court applicable to or affecting Seller, (iii) breach the provisions of, or constitute a default under, any contract, agreement, instrument, or obligation to which Seller is a party or by which Seller is bound, or (iv) violate or conflict with any law, ordinance, or governmental regulation or permit applicable to Seller. All documents that are executed by Seller and that are delivered to Buyer at the Closing will be, at the time of Closing, duly authorized, executed, and delivered by Seller; the obligations of Seller under such documents will be, at the time of Closing, legal, valid, and binding obligations of Seller; and such documents will not, at the time of Closing, (i) violate or conflict with the organizational documents of Seller or any member of Seller acting on Seller's behalf, (ii) violate or conflict with any judgment, decree, or order of any court applicable to or affecting Seller, (iii) breach the provisions of, or constitute a default under, any contract, agreement, instrument, or obligation to which Seller is a party or by which Seller is bound, or (iv) violate or conflict with any law, ordinance, or governmental regulation or permit applicable to Seller.

(c) Bankruptcy. No proceedings under any federal or state bankruptcy or insolvency laws have been commenced by or against Seller which have not been terminated; no general assignment for the benefit of creditors has been made by Seller; and no trustee or receiver of Seller's property has been appointed.

(d) Not a Foreign Person. Seller is not a foreign person within the meaning of section 1445(f)(3) of the Internal Revenue Code of 1986. Seller has read and understands the provisions of sections 18662 and 18668 of the California Revenue and Tax Code (the " **Act**") and has a "permanent place of business" within California within the meaning of the Act and the regulations and guidelines of the California Franchise Tax Board promulgated from time to time pursuant thereto.

(e) Litigation. Except as disclosed in writing to Buyer, no litigation or proceeding is pending or, to Seller's knowledge, threatened that affects the Property or Seller's ability to consummate the transactions contemplated by this Agreement.

(f) Violations. Except as disclosed in writing to Buyer, Seller has not received any written notice of any violation by the Property of any applicable rule, regulation, ordinance or government directive from any administrative or governmental authority that has not been cured.

(g) Leases; Landlord Defaults. There are no leases, rental agreements, license agreements or occupancy rights affecting the Property other than those listed on Exhibit C and any matters of record. Seller has not received any written notice of a default by Seller from any Tenant under any of the Leases that has not been cured, other than as set forth in the Tenant Estoppels.

(h) Rent Roll. Exhibit C contains a complete and correct list of all existing Leases, setting forth with respect to each Lease, the following minimum information (the "**Rent Roll**"): the name of the Tenant, the number of the room or suite occupied by the Tenant, the square footage of the space, the commencement and expiration dates, the amount of the monthly base rent payment, the current monthly additional rent payment for the Tenant share of Real Property expenses and taxes, the amount of any security deposit or prepaid rent, and the amount and due date of any payments due Tenants in the future as reimbursement for costs of tenant improvements. Seller shall deliver an updated Rent Roll to Buyer two (2) business days prior to the expiration of the Due Diligence Period, which shall be accurate as of the date set forth on the updated Rent Roll (which date shall not be more than three (3) business days prior to the date the updated Rent Roll is delivered to Buyer). Seller shall deliver a further updated Rent Roll to Buyer two (2) business days prior to the Closing Date, which shall be accurate as of the date set forth on the updated Rent Roll (which date shall not be more than three (3) business days prior to the Closing Date).

(i) Delinquency Report. With the exception of delinquencies in the payment of rents which are set forth on the Rent Roll, Seller has not delivered written notice to any Tenant of any default in the payment of rent under its Lease that has not been cured. Exhibit C contains a true and correct report (the "**Delinquency Report**") showing the name of each Tenant as to which a delinquency currently exists as to the payment of Rents and specifying the amount of each such delinquency, and the period of time during which each such delinquency has been outstanding. Seller shall deliver an updated Delinquency Report to Buyer two (2) business days prior to the expiration of the Due Diligence Period, which shall be accurate as of the date set forth on the updated Delinquency Report (which date shall not be more than three (3) business days prior to the date the updated Delinquency Report is delivered to Buyer). Seller shall deliver a further updated Delinquency Report to Buyer two (2) business days prior to the Closing Date, which shall be accurate as of the date set forth on the updated Delinquency Report (which date shall not be more than three (3) business days prior to the Closing Date).

(j) Leases. The Documents contain a true, correct and complete copy of each Lease. Each such Lease constitutes the entire agreement between Seller and each other party thereto. As of the Closing Date, no rents due under, or any other interest in, any of the Leases will be assigned to any party other than Buyer, or otherwise pledged or encumbered in any way.

(k) Tenant Improvements; Lease Costs. Except as set forth in Exhibit C, all of the improvements to be constructed by Seller under each of the Leases, have been fully completed and paid for. Except as set forth in Exhibit C, Seller has paid, in full, any leasing commissions, except for future contingent obligations set forth in the Rent Roll.

(l) Service Contracts. Exhibit E contains a true and complete list of all Service Contracts. The Documents include true and complete copies of all Service Contracts. To Seller's knowledge, there have been no material defaults by any Party to a Service Contract which have not been cured. To Seller's knowledge, Seller is not in breach or default under any Service Contract which has not been cured. The Service Contracts constitute the entire agreement between Seller and the other parties to the Service Contracts.

(m) Insurance. Exhibit L correctly identifies the policies of casualty and liability insurance currently in effect with respect to the Property. All premiums for such insurance have been paid in full. Seller has not received any notice or request from any insurance company or Board of Fire Underwriters (or organization exercising functions similar thereto) canceling or threatening to cancel any of said policies or denying or disputing coverage thereunder.

(n) Commission Agreements. Except as expressly set forth in the Leases or on Exhibit C, there are no lease brokerage agreements, leasing commission agreements or other agreements providing for payments of any amounts for leasing activities or procuring tenants with respect to the Property, other than such commissions as may be due on future lease renewals, expansions or extensions.

(o) Environmental Releases. To Seller's knowledge, no Hazardous Materials have been discharged, released or disposed of by Seller or its members, managers, partners, directors, officers, shareholders, trustees, beneficiaries, agents, employees and representatives in violation of applicable Environmental Laws as of the date of such discharge, disposal or release As used herein, the term "Hazardous Materials" means without regard to amount and/or concentration any hazardous or toxic substance, material or waste wherever located expressly including but not limited to petroleum and petroleum derived compounds, which is included within the definition of any hazardous or toxic material, substance or waste in any federal, state or local statutes, laws, ordinances or regulations applicable to the Property, as well as any soils, ground or surface waters, wetlands or other environmental media which may be contaminated by such Hazardous Material, including the following: (a) those substances defined as a hazardous substance, hazardous waste, hazardous material, toxic substance, solid waste, pollutant or contaminant under any Environmental Law, as defined below; (b) those substances listed in the United States Department of Transportation Table [49 CFR § 172.101], or by the Environmental Protection Agency, or any successor agency, as hazardous substances [40 CFR Part 302]; (c) other substances, materials, and wastes that are regulated or classified as hazardous or toxic under federal, state or local laws or regulations applicable to the Property; and (d) any material, waste, or substance that is a petroleum or refined petroleum product or byproduct, asbestos, or any rock, including serpentine rock, which contains or might contain asbestos, chlorinated solvents, biologic waste, polychlorinated biphenyl, designated as a hazardous substance pursuant to 33 USCS §1321 or listed pursuant to 33 USCS §1317, a flammable explosive, or a radioactive

material. As used herein, the term "Environmental Law" means all federal, state, local or municipal laws, rules, orders, regulations, statutes, ordinances, codes, decrees or requirements of any government authority applicable to the Property and regulating, relating to, or imposing liability or standards of conduct concerning any Hazardous Material, or pertaining to environmental conditions on or under the Property described in this Agreement, as now in effect, including, without limitation, the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) [42 USCS §§9601 et seq.]; the Resource Conservation and Recovery Act of 1976 (RCRA) [42 USCS §§6901 et seq.]; the Clean Water Act, also known as the Federal Water Pollution Control Act (FWPCA) [33 USCS §§1251 et seq.]; the Toxic Substances Control Act (TSCA) [15 USCS §§2601 et seq.]; the Hazardous Materials Transportation Act (HMTA) [49 USCS §§1801 et seq.]; the Insecticide, Fungicide, Rodenticide Act (7 USCS §§136 et seq.]; the Superfund Amendments and Reauthorization Act [42 USCS §§6901 et seq.]; the Clean Air Act [42 USCS §§7401 et seq.]; the Safe Drinking Water Act [42 USCS §§300f et seq.]; the Solid Waste Disposal Act [42 USCS §§6901 et seq.]; the Surface Mining Control and Reclamation Act [30 USCS §§1201 et seq.]; the Emergency Planning and Community Right to Know Act [42 USCS §§11001 et seq.]; the Occupational Safety and Health Act [29 USCS §§655 and 657]; the California Underground Storage of Hazardous Materials Act [Health and Safety Code §§25280 et seq.]; the California Hazardous Materials Account Act [Health and Safety Code §§25100 et seq.]; the California Safe Drinking Water and Toxic Enforcement Act [Health and Safety Code §§24249.5 et seq.]; the Porter-Cologne Water Quality Act [Water Code §§13000 et seq.], together with any amendments of or regulations promulgated under the statutes cited above, and any other federal, state or local law, statute, ordinance or regulation applicable to the Property now in effect that pertains to the regulation or protection of the environment, including ambient air, soil, soil vapor, groundwater, surface water, or land use.

For purposes of the representations and warranties given by Seller in this Agreement, the phrase "to Seller's knowledge" or other terms regarding the knowledge of Seller, shall mean the actual, current knowledge of Kennard P. Perry and Cory Kristoff, excluding constructive or imputed knowledge or duty of inquiry, existing as of the Contract Date and the Closing. In no event shall there be any personal liability on the part of any of the foregoing individuals on account of any breach of any representation or warranty of Seller herein.

11.2 Material Changes; Survival. Two (2) business days prior to the expiration of the Due Diligence Period, Seller shall deliver to Buyer a certification that all of the representations and warranties set forth in Section 11.1 remain true, complete and accurate, except to the extent of any exceptions to such representations and warranties identified in such certification. Further, if, prior to the Closing, Seller becomes aware of any fact or circumstance that would materially change a representation or warranty of Seller in this Agreement, then Seller shall promptly, and in all events at least five (5) business days prior to the Closing Date (which date shall be extended if necessary to give Buyer five business days to review such material change), give written notice of such changed fact or circumstance to Buyer. If, prior to Closing, upon Seller's notice or otherwise, Buyer becomes aware of the material untruth or inaccuracy of, or facts or circumstances that would change materially, any representation or warranty of Seller in this Agreement that was true when made by Seller, then Buyer shall have the option of: (i) waiving such breach of representation or warranty or material adverse change and completing its purchase of the Property pursuant to this Agreement; (ii) reaching agreement with Seller to

adjust the terms of this Agreement to compensate Buyer for such change; or (iii) terminating this Agreement and receiving the return of the Deposit as Buyer's sole remedy prior to Closing. All of Seller's representations and warranties shall survive the Closing; provided, however, that Seller's representations and warranties set forth in Sections 11.1(d) through 11.1(i) shall survive the Closing only with respect to written claims alleging a specific breach of one or more of those representations and warranties received by Seller prior to the first anniversary of the Closing Date. Buyer shall not be entitled to any right or remedy for any inaccuracy in or breach of any representation, warranty or covenant under this Agreement or any conveyance document unless the amount of damages, in the aggregate, proximately caused by all such breaches or inaccuracies exceeds Fifty Thousand and No/100ths Dollars ($50,000). If Buyer's aggregate damages exceed Fifty Thousand and No/100ths Dollars ($50,000), Buyer shall be entitled to recover the entire first Fifty Thousand and No/100ths Dollars ($50,000) of damages suffered by Buyer. Notwithstanding anything to the contrary in this Agreement the aggregate liability of Seller under this Agreement to Buyer for any and all actions or claims by Buyer with respect to these representations and warranties that survive the Closing shall be limited to One Million Five Hundred Thousand Dollars ($1,500,000).

11.3 Representations and Warranties of Buyer. Buyer hereby makes the following representations and warranties to Seller, which representations and warranties shall survive the Closing and all of which (i) are material and are being relied upon by Seller, (ii) are true, complete and accurate in all respects as of the date hereof and shall be true, complete and accurate as of the Closing Date, and (iii) shall survive the Closing:

(a) Organization. Buyer is a limited liability company, duly organized, validly existing and in good standing under the laws of the State of Delaware, and is qualified to do business, and is in good standing, in the State of California.

(b) Authorization. This Agreement has been duly authorized, executed, and delivered by Buyer; the obligations of Buyer under this Agreement are legal, valid, and binding obligations of Buyer; and this Agreement does not, and at the time of Closing will not, (i) violate or conflict with the organizational documents of Buyer or any member of Buyer acting on Buyer's behalf, (ii) violate or conflict with any judgment, decree, or order of any court applicable to or affecting Buyer, (iii) breach the provisions of, or constitute a default under, any contract, agreement, instrument, or obligation to which Buyer is a party or by which Buyer is bound, or (iv) violate or conflict with any law, ordinance, or governmental regulation or permit applicable to Buyer. All documents that are delivered to Seller at the Closing will be, at the time of Closing, duly authorized, executed, and delivered by Buyer; the obligations of Buyer under such documents will be, at the time of Closing, legal, valid, and binding obligations of Buyer; and such documents will not, at the time of Closing, (i) violate or conflict with the organizational documents of Buyer or any member of Buyer acting on Buyer's behalf, (ii) violate or conflict with any judgment, decree, or order of any court applicable to or affecting Buyer, (iii) breach the provisions of, or constitute a default under, any contract, agreement, instrument, or obligation to which Buyer is a party or by which Buyer is bound, or (iv) violate or conflict with any law, ordinance, or governmental regulation or permit applicable to Buyer.

(c) Bankruptcy. No proceedings under any federal or state bankruptcy or insolvency laws have been commenced by or against Buyer which have not been terminated; no general assignment for the benefit of creditors has been made by Buyer; and no trustee or receiver of Buyer's property has been appointed.

12. Risk of Loss; Insurance Proceeds; Condemnation.

12.1 Damage or Destruction. In the event of damage or destruction of the Improvements that occurs prior to the Closing Date that (i) would require the expenditure of an amount less than one percent (1%) of the Purchase Price to repair, and (ii) does not permit any Government Tenant or Major Non-Government Tenant to terminate its Lease (each of the foregoing events, a "**Material Damage Event**"), Buyer and Seller shall consummate this Agreement, and Seller shall (a) assign to Buyer at Closing all rights to insurance proceeds on account of such damage or destruction, including any insurance proceeds previously received by Seller with respect to such damage or destruction, and (b) pay to Buyer the amount of the deductible or retention applicable to such damage or destruction under the insurance policy. In the event such damage or destruction results in or causes a Material Damage Event, Buyer or Seller may elect to terminate this Agreement by written notice to the other within ten (10) days after the Material Damage Event. If neither party elects to terminate this Agreement, Seller shall assign the insurance proceeds and pay the applicable deductible or retention to Buyer at Closing and Seller shall have no further responsibility to Buyer for such damage or destruction. If either party elects to terminate this Agreement, the Deposit and all interest thereon shall be refunded to Buyer and the parties shall no further obligation to each other except for those obligations which expressly survive the termination of this Agreement.

12.2 Eminent Domain. If, prior to the Closing, a taking by eminent domain of all or any portion of the Land or Improvements is pending, and such taking would (i) materially and adversely interfere with the use of the Property for its current permitted uses, (ii) materially and adversely affect ingress, egress or parking for the Property or any Tenant's access to its space, (iii) would permit the termination of any Lease by any Government Tenant or Major Non-Government Tenant, or (iv) has a value exceeding one percent (1%) of the Purchase Price (each a "**Material Taking**"), Buyer or Seller shall have the right, by delivering written notice to the other within ten (10) days after Seller delivers written notice to Buyer of such pending taking, to terminate this Agreement, in which event the Deposit and all interest thereon shall be returned to Buyer. If neither party elects to terminate this Agreement or if the taking would not result in or cause a Material Taking, then this Agreement shall remain in effect, and Seller shall assign to Buyer at Closing its rights to the compensation and damages due Seller on account of such taking (and will not settle any proceedings relating to such taking without Buyer's prior written consent) and Seller shall have no further responsibility to Buyer for such taking. Seller shall promptly (and in any event prior to the Closing) notify Buyer of any condemnation affecting the Property.

The provisions of this Section 12 shall supersede the provisions of any applicable laws with respect to the subject matter of this Section 12.

13. Assignment. Buyer may not, at any time, assign this Agreement or Buyer's rights or obligations under this Agreement, either directly or indirectly, without the prior written consent of Seller, which Seller may withhold in its sole and absolute discretion. Subject to the foregoing, this Agreement shall be binding upon, inure to the benefit of, and be enforceable by the parties hereto and their respective heirs, devisees, executors, administrators, legal representatives, successors and assigns. In connection with any approved assignment, the assignee shall assume the assignor's obligations hereunder, but assignor shall nevertheless remain liable therefor.

14. Seller's Covenants During Contract Period. Between Seller's execution of this Agreement and the Closing, or earlier termination of this Agreement as permitted hereunder, Seller shall (i) maintain the Property in good order, condition and repair, reasonable wear and tear excepted; (ii) not make any material physical changes to the Improvements; (iii) continue to manage the Property in the manner in which it is being managed; (iv) not enter into any contracts or agreements affecting the Property unless such contracts can be completed or terminated prior to the Closing or Buyer, in its sole discretion, agrees to assume such contract or agreement as of the Closing Date, in which case such contracts shall be included within the term " **Service Contracts**"; (v) not enter into any lease, amendment of lease or other agreement pertaining to the Property, or permit any tenant of the Property to enter into any sublease or assignment of lease, except as provided in Section 14.1; (vi) after the end of the Due Diligence Period, not offer the Property for sale publicly or otherwise solicit, make, pursue, negotiate or accept offers for the sale of the Property to or from any party; (viii) maintain the insurance described on Exhibit L in full force and effect, except as otherwise approved by Buyer; and (ix) not dispose of or encumber the Property or any part thereof, except for dispositions of personal property in the ordinary course of business. From and after the Contract Date, Seller shall provide Buyer with regular written updates as to the status of any leasing activity at the Property.

14.1 New Leases and Lease Amendments; Lease Expenses.

(a) If Seller desires to enter into any new lease affecting the Property (each a " **New Lease**") or any termination, amendment, modification, expansion or renewal of any existing Lease (each, a " **Lease Amendment**"), after the Contract Date but prior to Closing, Seller shall provide Buyer with a copy of the proposed New Lease or Lease Amendment and a copy of the landlord's anticipated improvement costs, tenant improvement allowances, brokerage commissions and out-of-pocket costs and expenses in connection with the New Lease or Lease Amendment for Buyer's review and approval, which approval shall not be unreasonably withheld; provided, however, Buyer shall not have the right to disapprove any New Lease or Lease Amendment prior to the expiration of the Due Diligence Period. Buyer shall advise Seller, in writing, whether Buyer approves or reasonably disapproves such proposed New Lease or Lease Amendment within three (3) business days after Buyer's receipt of the proposed New Lease or Lease Amendment; provided, however, if Buyer fails to notify Seller within such three (3) business day period, Buyer shall be deemed to have approved the proposed transaction. If after the expiration of the Due Diligence Period, Buyer reasonably disapproves of the proposed New Lease or Lease Amendment, Seller shall not enter into such New Lease or Lease Amendment. If Buyer unreasonably disapproves of the proposed New Lease or Lease Amendment, Seller shall have the full right, power and authority to execute such New Lease or Lease Amendment so long as Seller delivers to Buyer at least three (3) business days' prior written notice of such execution; provided, however, that after receipt of such notice, Buyer shall have the right to terminate this Agreement, upon written notice delivered to Seller within three

(3) business days after receipt of Seller's notice of execution of such New Lease or Lease Amendment. If Buyer timely exercises such termination right, this Agreement shall terminate and the Deposit and all interest thereon shall be returned to Buyer. In all other events, this Agreement shall remain in full force and effect. Notwithstanding the foregoing, Seller acknowledges that it shall not enter into any extension or expansion of the AECOM Technology Corp. Lease during the term of this Agreement without Buyer's approval, which may be withheld at Buyer's sole discretion.

(b) New Lease Expenses. If the Closing occurs, Buyer shall assume and be responsible for (and to the extent previously paid by Seller, reimburse Seller on the Closing Date for) a pro rata portion of any and all improvement costs, tenant improvement allowances, brokerage commissions and out-of-pocket costs and expenses actually paid or incurred by Seller (collectively the " **New Lease Expenses**") arising out of or in connection with those New Leases and Lease Amendments entered into by Seller after the Contract Date pursuant to the foregoing provisions of this Section 14.1; such pro rata portion shall equal the product of (i) the New Lease Expenses multiplied by (ii) a fraction, the numerator of which is the number of months of the lease term of the New Lease (or the number of months of the term of any exercised extension period provided by any Lease Amendment, as applicable) remaining as of the Closing Date, and the denominator of which is the total number of months of such lease term (or exercised extension period, as applicable). Seller shall be responsible for the remaining pro rata portion of the New Lease Expenses. All New Leases and Lease Amendments entered into by Seller pursuant to this Section 14.1 shall be part of the Leases, shall be deemed included on Exhibit C and shall be assumed by Buyer upon Closing.

(c) Existing Lease Expenses. Seller shall be responsible for the cost of tenant improvement work, scheduled rent-free periods and leasing commissions required to be paid under or with respect to all Leases (and amendments thereto) entered into prior to the Contract Date and the cost of tenant improvement work, leasing commissions required to be paid under or with respect to Leases with Government Tenants and the scheduled rent-free periods set forth in the Leases with Government Tenants (collectively, "**Existing Lease Expenses**"), and if Seller fails to deliver Buyer evidence reasonably acceptable to Buyer confirming that such Existing Lease Expenses have been paid prior to the expiration of the Due Diligence Period, Seller shall give Buyer a credit therefore at Closing which shall be calculated as follows: Buyer and Seller shall attempt to agree on the amount of the credit for such Existing Lease Expenses during the Due Diligence Period, which amount shall equal 100% of the anticipated post-Closing Existing Lease Expenses (" **Closing Leasing Credit**"). If Seller and Buyer can agree on the Closing Leasing Credit on or before the expiration of the Due Diligence Period, such amount shall be credited against the Purchase Price due from Buyer at Closing. If Seller and Buyer cannot agree on the Closing Leasing Credit at least five (5) business days prior to the expiration of the Due Diligence Period, then at least three (3) business days prior to the expiration of the Due Diligence Period, Seller shall give Buyer written notice of the amount of the Closing Leasing Credit that Seller is willing to offer. If Buyer timely delivers the Approval Notice, Buyer shall be deemed to have accepted Seller's proposed Closing Leasing Credit and Buyer will proceed with the acquisition of the Property under the terms of this Agreement. Except as otherwise agreed to by Seller and Buyer, the Closing Leasing Credit shall constitute Seller's sole and only obligations with respect to the Existing Lease Expenses, and as of the Closing Date Buyer shall

assume all such obligations (as to leasing commissions only, up to the amount set forth for leasing commissions in the Closing Lease Credit) and indemnify and hold Seller harmless with respect thereto (as to leasing commissions only, up to the amount set forth for leasing commissions in the Closing Lease Credit).

15. ARBITRATION OF DISPUTES. IN THE EVENT OF ANY DISPUTE BETWEEN THE PARTIES ARISING UNDER OR RELATED TO THIS AGREEMENT, SUCH DISPUTE, SHALL BE RESOLVED BY BINDING ARBITRATION BEFORE A SINGLE ARBITRATOR. SUCH ARBITRATION MAY BE INITIATED BY EITHER PARTY BY DELIVERING WRITTEN NOTICE OF INTENT TO ARBITRATE TO THE OTHER PARTY AND TO THE SAN FRANCISCO OFFICE OF THE AMERICAN ARBITRATION ASSOCIATION ("**AAA**"), WHICH NOTICE SHALL DESCRIBE THE DISPUTE AND THE PARTY'S PROPOSAL FOR RESOLVING THE DISPUTE IN DETAIL. WITHIN THIRTY (30) DAYS AFTER DELIVERY OF SUCH NOTICE EACH PARTY SHALL PROVIDE ALL RELEVANT DOCUMENTS AND MATERIALS THAT PERTAIN TO THE DISPUTE. THE PARTIES SHALL FIRST ENDEAVOR TO AGREE ON THE ARBITRATOR, BUT IF THEY ARE UNABLE TO DO SO WITHIN TEN (10) DAYS AFTER THE ARBITRATION HAS BEEN INITIATED, THE ARBITRATOR SHALL BE SELECTED, WITHIN THIRTY (30) DAYS AFTER THE ARBITRATION WAS INITIATED, USING THE AAA PROCEDURES. THE ARBITRATOR SHALL BE A RETIRED SUPERIOR COURT JUDGE OR A LICENSED, PRACTICING ATTORNEY WHO IS SUBSTANTIALLY FAMILIAR WITH THE REAL ESTATE LAW, CUSTOM, PRACTICE, OR PROCEDURE, IN THE AREA IN WHICH THE PROPERTY IS LOCATED, PERTINENT TO THE DISPUTE BEING ARBITRATED, IN EITHER CASE WITH NOT LESS THAN TWENTY (20) YEARS CONTINUOUS EXPERIENCE AS A JUDGE AND/OR REAL ESTATE PRACTITIONER. IN ESTABLISHING WHETHER AN ARBITRATOR IS ABLE TO SERVE, THE PARTIES SHALL ADVISE HIM OR HER OF THE NAMES OF ALL PARTIES AND THEIR AFFILIATES AND PRINCIPAL OFFICERS AND OWNERS, AND CONFIRM THAT THERE IS NO CONFLICT OF INTEREST, WHICH FOR PURPOSES HEREOF SHALL MEAN NO BUSINESS OR PERSONAL CONNECTIONS WITH THE ARBITRATOR, OR HIS OR HER FIRM, WITH ANY OF SUCH PARTIES EITHER CURRENTLY OR AT ANY TIME DURING THE IMMEDIATELY PRECEDING THREE (3) YEARS. THE ARBITRATION SHALL BE CONDUCTED PURSUANT TO THE AAA'S COMMERCIAL ARBITRATION RULES, AS MODIFIED BY THIS SECTION 15, OR BY SUCH OTHER ORGANIZATION AND RULES AS THE PARTIES MAY MUTUALLY AGREE UPON. IF AAA IS NOT AVAILABLE AND THE PARTIES CANNOT AGREE ON AN ALTERNATE CHOICE, THE PROVISIONS OF CALIFORNIA CODE OF CIVIL PROCEDURE SECTION 1280 ET. SEQ. SHALL APPLY. ALL ARBITRATION PROCEEDINGS SHALL BE CONFIDENTIAL, AND NEITHER PARTY NOR THE ARBITRATOR MAY DISCLOSE THE CONTENT OR RESULTS OF ANY ARBITRATION HEREUNDER WITHOUT THE WRITTEN CONSENT OF BOTH PARTIES. THE ARBITRATOR SHALL FOLLOW THE LAW (INCLUDING APPLICABLE STATUTES OF LIMITATIONS) AND ALL RULES OF EVIDENCE UNLESS THE PARTIES STIPULATE TO THE CONTRARY. ANY PROVISIONAL REMEDY (INCLUDING PRELIMINARY OR PERMANENT INJUNCTIONS AND WRITS OF ATTACHMENT AND POSSESSION) WHICH WOULD BE AVAILABLE FROM A COURT OF LAW OR EQUITY SHALL BE AVAILABLE FROM

THE ARBITRATOR PENDING COMPLETION OF THE ARBITRATION. THE BENEFITED PARTY OF SUCH PROVISIONAL REMEDY SHALL BE ENTITLED TO ENFORCE SUCH REMEDY IN COURT IMMEDIATELY, EVEN THOUGH A FINAL ARBITRATION AWARD HAS NOT YET BEEN RENDERED. WITHIN THIRTY (30) DAYS AFTER HIS OR HER APPOINTMENT, THE ARBITRATOR SHALL HEAR AND DECIDE THE DISPUTE SUBMITTED TO ARBITRATION HEREUNDER AND SHALL PROMPTLY PREPARE A WRITTEN DECISION ON THE MERITS OF THE MATTERS IN DISPUTE, WHICH DECISION SHALL STATE THE FACTS AND LAW RELIED UPON AND THE REASONS FOR THE ARBITRATOR'S DECISION. THE ARBITRATOR MAY, AT HIS OR HER DISCRETION, ELECT WHETHER TO MEET WITH THE PARTIES AND WHETHER TO CONDUCT A HEARING ATTENDED BY ALL PARTIES; PROVIDED, HOWEVER, THAT FOR DISPUTES INVOLVING $50,000.00 OR MORE, THE ARBITRATOR SHALL CONDUCT A HEARING. DISCOVERY SHALL BE ALLOWED IN ACCORDANCE WITH CALIFORNIA CODE OF CIVIL PROCEDURE 1283.05. THE ARBITRATOR SHALL HAVE COMPLETE DISCRETION TO RESOLVE DISCOVERY DISPUTES, TO ORDER THE PRODUCTION OF DOCUMENTS AND PRESENTATION OF WITNESSES AND TO LIMIT SUCH DISCOVERY, INCLUDING THE NUMBER AND SCOPE OF DEPOSITIONS THAT MAY BE TAKEN BY THE PARTIES. PRIOR TO ISSUING HIS OR HER FINAL WRITTEN DECISION, THE ARBITRATOR SHALL INFORM THE PARTIES, IN WRITING, OF THE ARBITRATOR'S EXPECTED DECISION ON THE MATTER AND THE REASONS THEREFORE AND GIVE THE PARTIES FIVE (5) BUSINESS DAYS TO SUBMIT ADDITIONAL ARGUMENTS OR INFORMATION, IN WRITING, TO THE ARBITRATOR AND THE OTHER PARTIES. THE AWARD OR DECISION OF THE ARBITRATOR, WHICH MAY INCLUDE AN ORDER OF SPECIFIC PERFORMANCE, SHALL BE FINAL AND BINDING ON ALL PARTIES AND ENFORCEABLE IN ANY COURT OF COMPETENT JURISDICTION; PROVIDED, HOWEVER, THAT THE AWARD MAY BE VACATED OR CORRECTED FOR ANY OF THE REASONS PERMITTED UNDER AND PURSUANT TO CALIFORNIA CODE OF CIVIL PROCEDURE SECTIONS 1286.2 OR 1286.6. THE ARBITRATOR SHALL HAVE NO AUTHORITY TO MODIFY ANY OF THE TERMS OF THIS AGREEMENT. THE FEES AND EXPENSES OF THE ARBITRATOR AND THE COSTS AND ATTORNEYS' FEES OF THE PREVAILING PARTY SHALL BE PAID BY THE PARTY WHO IS NOT THE PREVAILING PARTY, AS DEFINED IN SECTION 17.7 (ATTORNEYS' FEES) AND DETERMINED BY THE ARBITRATOR IN ITS DECISION.

NOTICE: BY INITIALING IN THE SPACE BELOW YOU ARE AGREEING TO HAVE ANY DISPUTE ARISING OUT OF THE MATTERS INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION DECIDED BY NEUTRAL ARBITRATION AS PROVIDED BY CALIFORNIA LAW AND YOU ARE GIVING UP ANY RIGHTS YOU MIGHT POSSESS TO HAVE THE DISPUTE LITIGATED IN A COURT OR JURY TRIAL. BY INITIALING IN THE SPACE BELOW YOU ARE GIVING UP YOUR JUDICIAL RIGHTS TO DISCOVERY AND APPEAL, UNLESS THOSE RIGHTS ARE SPECIFICALLY INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION. IF YOU REFUSE TO SUBMIT TO ARBITRATION AFTER AGREEING TO THIS PROVISION, YOU MAY BE COMPELLED TO ARBITRATE UNDER THE AUTHORITY OF THE CALIFORNIA CODE OF CIVIL PROCEDURE. YOUR AGREEMENT TO THIS ARBITRATION PROVISION IS VOLUNTARY.

WE HAVE READ AND UNDERSTAND THE FOREGOING AND AGREE TO SUBMIT DISPUTES ARISING OUT OF THE MATTERS INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION TO NEUTRAL ARBITRATION

/s/ Jeanne R Myerson, President	/s/ John C. Molina, CFO
Seller	Buyer

16. Indemnification. Each party hereby agrees to indemnify, defend, protect and hold harmless the other party from and against any and all claims, demands, liabilities, costs and damages, including without limitation, reasonable attorneys' fees (collectively, "**Claims**") suffered by the other party and resulting from or arising out of all third-party tort claims and similar claims of the type that would typically be insured under a Commercial General Liability Insurance Policy which are based on actions, facts or circumstances existing or occurring during the indemnifying party's ownership of the Property, excluding any Claims related to hazardous substances. In addition to the foregoing, Seller agrees to indemnify, defend, protect and hold harmless Buyer from and against any and all enforcement actions and all fines imposed and/or pursued by: (i) the State Water Resources Control Board, California Regional Water Quality Control Board, the United States Environmental Protection Agency, the County of Los Angeles, the City of Long Beach and/or any other governmental or quasi governmental agency or instrumentality; and/or (ii) any third party, resulting from or arising out of alleged or actual violations of federal, state or local laws, statutes, ordinances or regulations applicable to the collection and/or discharge of water from or through the Discharge System that occurred prior to the Closing. Notwithstanding the foregoing, in no event shall this Section 16 require Seller to be responsible for the costs of installing, operating and/or maintaining a water treatment system at the Property, regardless of whether such a system is determined to be necessary by the applicable regulatory authorities as a result of any pre-Closing violation by Seller. The provisions of this Section 16 shall survive the Closing and conveyance of the Property to Buyer for a period of three (3) years from the date of Closing.

17. Miscellaneous.

17.1 Notice. All notices and any other communications permitted or required under this Agreement must be in writing and will be effective (i) immediately upon delivery in person or by facsimile, provided delivery is made during regular business hours or receipt is acknowledged by a person reasonably believed by the delivering party to be employed by the recipient and that for all facsimiles, good and complete transmission is confirmed by the sending facsimile machine and a copy of the notice is concurrently mailed pursuant to clause (iii) below; or (ii) upon the actual delivery as evidenced by executed receipt of the recipient if delivered by a nationally recognized delivery service for overnight delivery, provided delivery is made during regular business hours or receipt is acknowledged by a person reasonably believed by the delivering party to be employed by the recipient; or (iii) or the date shown on the return receipt if delivered by the United States Postal Service, certified mail, return receipt requested, postage prepaid and with the return receipt returned to the sender marked as delivered, undeliverable or

rejected. In the case of any notices sent pursuant to clauses (ii) or (iii) above, the sender shall also send a copy of such notice by email, which email shall be sent no later than 6:00 p.m. (Pacific Time) on the date such notice is deposited with the delivery service or United States Postal Service. The inability to deliver because of a changed address of which no notice was given, or rejection or other refusal to accept any notice, shall be deemed to be the receipt of the notice as of the first date of such inability to deliver or rejection or refusal to accept. Any notice to be given by any party hereto may be given by the counsel for such party. All notices must be properly addressed and delivered to the parties at the addresses set forth below, or at such other addresses as either party may subsequently designate by written notice given in the manner provided in this Section 17.1:

17.2 Headings. The headings used herein are for purposes of convenience only and should not be used in construing the provisions hereof.

17.3 Covenant of Further Assurances. The parties hereby agree to execute and deliver such other documents and instruments (including, without limitation, additional escrow instructions in conformity with this Agreement), and to take such other actions, whether before or after Closing, as may reasonably be required and which may be necessary to consummate this transaction and to otherwise effectuate the agreements of the parties hereto; provided that such additional documents, instruments, or actions shall not impose upon the parties any obligations, duties, liabilities or responsibilities which are not expressly provided for in this Agreement.

17.4 Entire Agreement. This document, together with that certain Agreement Regarding Diligence Reports dated January 7, 2011, by and between Buyer and Seller (the "**Diligence Agreement**"), and that certain Notice and Acknowledgement by and between Seller and Molina relating to KPMG and dated January 10, 2011 (the "**KPMG Acknowledgement**"), together represent the final, entire and complete agreement between the parties with respect to the subject matter hereof and supersedes all other prior or contemporaneous agreements, communications or representations, whether oral or written, express or implied, including any letters of intent, including that certain Confidentiality Agreement 200 & 300 Oceangate by and between Molina and Seller. The parties acknowledge and agree that they may not and are not relying on any representation, promise, inducement, or other statement, whether oral or written and by whomever made, that is not contained expressly in this Agreement, the Diligence Agreement or the KPMG Acknowledgement. This Agreement may only be modified by a written instrument signed by representatives authorized to bind both parties. Oral modifications are unenforceable.

17.5 Partial Invalidity. If any term, covenant or condition of this Agreement or its application to any person or circumstances shall be held to be illegal, invalid or unenforceable, the remainder of this Agreement or the application of such term or provisions to other persons or

circumstances shall not be affected, and each term hereof shall be legal, valid and enforceable to the fullest extent permitted by law, unless an essential purpose of this Agreement would be defeated by the loss of the illegal, unenforceable, or invalid provision. In the event of such partial invalidity, the parties shall seek in good faith to agree on replacing any such legally invalid provisions with valid provisions which, in effect, will, from an economic viewpoint, most nearly and fairly approach the effect of the invalid provision and the intent of the parties in entering into this Agreement.

17.6 No Waiver. No consent or waiver by either party to or of any breach or non-performance of any representation, condition, covenant or warranty shall be enforceable unless in a writing signed by the party entitled to enforce performance, and such signed consent or waiver shall not be construed as a consent to or waiver of any other breach or non-performance of the same or any other representation, condition, covenant, or warranty.

17.7 Attorneys' Fees. In the event of any arbitration or litigation between the parties, whether based on contract, tort or other cause of action or involving bankruptcy or similar proceedings, in any way related to this Agreement, the non-prevailing party shall pay to the prevailing party all reasonable attorneys' fees and costs and expenses of any type, without restriction by statute, court rule or otherwise, incurred by the prevailing party in connection with any action or proceeding (including arbitration proceedings, any appeals and the enforcement of any judgment or award), whether or not the dispute is litigated or prosecuted to final judgment. The "prevailing party" shall be determined based upon an assessment of which party's major arguments or positions taken in the action or proceeding could fairly be said to have prevailed (whether by compromise, settlement, abandonment by the other party of its claim or defense, final decision, after any appeals, or otherwise) over the other party's major arguments or positions on major disputed issues.

17.8 Brokers and Finders. Neither party has had any contact or dealings regarding the Property, through any licensed real estate broker or other persons who can claim a right to a commission or finder's fee in connection with this transaction, except for CB Richard Ellis, Inc., representing Seller (the " **Selling Broker**") and McKinney Advisory Group, Inc., representing Buyer (the " **Buying Broker**"). The parties agree that Seller shall pay a brokerage commission to Selling Broker, pursuant to its separate agreement with the Selling Broker. The parties agree that Buyer shall pay any amount owing to Buying Broker pursuant to its separate agreement with the Buying Broker. In the event that any other party claims a commission or finder's fee in this transaction, the party through whom the party makes its claim shall be responsible for said commission or fee and shall indemnify the other against all costs and expenses (including reasonable attorneys' fees) incurred in defending against the same. This indemnification obligation shall survive the Closing or termination of this Agreement.

17.9 Time of the Essence. Time is of the essence of this Agreement.

17.10 Governing Law; Forum. This Agreement is entered into and shall be governed by and construed in accordance with the laws of the State of California (without giving effect to its choice of law principles).

17.11 Interpretation. All parties have been represented by counsel in the preparation and negotiation of this Agreement, and this Agreement shall be construed according to the fair meaning of its language. The rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be employed in interpreting this Agreement. Unless the context clearly requires otherwise, (i) the plural and singular numbers shall each be deemed to include the other; (ii) the masculine, feminine, and neuter genders shall each be deemed to include the others; (iii) "shall," "will," or "agrees" are mandatory, and "may" is permissive; (iv) "or" is not exclusive; (v) "includes" and "including" are not limiting, absent express language to the contrary; (vi) "days" means calendar days unless specifically provided otherwise; and (vii) "business day" means any day other than Saturday, Sunday, or any day that is an "optional bank holiday" under Section 7.1 of the California Civil Code, whether or not any particular bank is open for business on such optional bank holiday.

17.12 IRS Form 1099-S Designation. In order to comply with information reporting requirements of Section 6045(e) of the Internal Revenue Code of 1986, as amended, and the Treasury Regulations thereunder, the parties agree (i) to execute an IRS Form 1099-S Designation Agreement to designate the Title Company (the "**Designee**") as the party who shall be responsible for reporting the contemplated sale of the Property to the Internal Revenue Service (the " **IRS**") on IRS Form 1099-S; and (ii) to provide the Designee with the information necessary to complete Form 1099-S.

17.13 Third Party Beneficiaries. This Agreement has been made solely for the benefit of the parties hereto and their respective successors and permitted assigns, and nothing in this Agreement is intended to, or shall, confer upon any other person any benefits, rights or remedies under or by reason of this Agreement.

17.14 Compliance With Laws. Each party shall comply with all applicable laws, rules, regulations, orders, consents and permits in the performance of all of their obligations under this Agreement.

17.15 Counterparts. This Agreement may be signed in any number of counterparts with the same effect as if the signatures to each counterpart were upon a single instrument, and is intended to be binding when all parties have delivered their signatures to the other parties. Signatures may be delivered by facsimile transmission or by e-mail in a portable document format (*pdf*). All counterparts shall be deemed an original of this Agreement.

17.16 Exhibits. All Recitals and Exhibits referred to in this Agreement are incorporated herein by reference and shall be deemed part of this Agreement.

17.17 Authority. The individuals executing this Agreement on behalf of Seller and Buyer individually represent and warrant that he or she has been authorized to do so and has the power to bind the party for whom they are signing.

17.18 Exchange Transaction. Buyer agrees upon the request of Seller to cooperate with Seller in closing all or part of this transaction as an exchange pursuant to Internal Revenue Code Section 1031, provided that:

(a) Buyer shall incur no additional expense or liability in connection therewith and shall not be required to make any representations or warranties, incur any personal liabilities or hold title to any property other than the Property;

(b) Seller shall indemnify, protect, defend and hold Buyer harmless from any claims, liabilities, demands, causes of action, judgments, expenses, costs and attorneys' fees in connection with such exchange or which result from Buyer's compliance with this paragraph, which obligation shall survive the Closing or termination of this Agreement; and

(c) The Closing is not extended or delayed by the exchange and the completion of the exchange is not a condition to Seller's obligation to close the Escrow.

17.19 Confidentiality. Buyer and Seller shall each maintain as confidential any and all material or information about the other, the terms of this Agreement, and the Property, and shall not disclose such information to any third party, except, in the case of Buyer, to Buyer's investment bankers, lender or prospective lenders, insurance and reinsurance firms, accountants, attorneys, environmental and other consultants, as may be reasonably required for the consummation of this transaction, as required by law or in connection with any arbitration or litigation between the parties, and except, in the case of Seller, to Seller's existing lender, attorneys, accountants and other professional consultants, as may be reasonably required for the consummation of this transaction, as required by law or in connection with any arbitration or litigation between the parties. Neither party shall issue a press release or other public statement about this Agreement or the transactions contemplated by this Agreement without the other party's prior written consent, unless such release or statement is required by law. Seller acknowledges that Buyer's ultimate parent is a publicly traded company and that Buyer is, therefore, subject to laws and regulations regarding the disclosure and dissemination of business information. Buyer acknowledges that in the event this Agreement terminates for any reason, Seller has the right and the obligation to disclose to subsequent purchasers of the Property the price and material terms of this Agreement, and Buyer agrees that such disclosure is a permitted disclosure under this Section 17.19.

[*Signatures on following page*]

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Contract Date.

SELLER:

200 OCEANGATE, LLC,
a Delaware limited liability company

By: 200 Oceangate, Inc.,
a Delaware corporation
its Manager

By: /s/ Jeanne R. Myerson
Jeanne R. Myerson
President

BUYER:

MOLINA CENTER LLC,
a Delaware limited liability company

By: Molina Healthcare, Inc., a Delaware corporation

By: /s/ John C. Molina
Name: John C. Molina
Title: Chief Financial Officer

EXHIBIT D

FORM OF TENANT ESTOPPEL

TO: MOLINA CENTER, LLC [Lender]

Re: Suite , , (the "**Premises**")

This estoppel certificate is delivered by the undersigned ("**Tenant**") to MOLINA CENTER LLC, a Delaware limited liability company ("**Buyer**") in connection with its contemplated purchase of certain real property commonly known as 200 & 300 Oceangate, Long Beach, California (the "**Property**") from 200 Oceangate, LLC, a Delaware limited liability company ("**Landlord**") and to ("**Lender**") in connection with its making of a loan to Buyer to finance Buyer's purchase of the Property, which loan will be secured by a deed of trust (the "**Deed of Trust**") on the Property. Tenant hereby certifies the following information on which Buyer may rely in connection with its purchase of the Property, Lender may rely in connection with its making a loan secured by the Property, and Landlord may rely in connection with its sale of the Property to Buyer:

1. The undersigned is the tenant in possession of the Premises under a written lease with Landlord, dated , , **[as amended by]**, which lease **[as amended]** (the "**Lease**") is in full force and effect and each provision of which is binding on Tenant in accordance with its terms. The Lease has not been modified or amended in writing or orally or by course of conduct, except as specifically set forth above, and contains the entire understanding and agreement between Tenant and Landlord concerning the Premises. A true, complete and accurate copy of the Lease is attached hereto as Exhibit A.

2. The Premises consist of approximately **[net rentable]** or **[gross]** square feet of **[office] [retail]** space.

3. The term of the Lease commenced on and terminates on .

4. Current monthly base rent under the Lease is . **[Percentage rent of is due [annually or quarterly]]**. Base rent has been paid through the period ending . The Lease provides for the monthly rent to increase as follows: . As of the date hereof, Tenant has no existing right to free rent, partial rent, rent rebate, credit for improvements, rent abatement, or other rental concessions or any right to payments from Landlord to Tenant except as follows: .

5. The Lease requires Tenant to pay its pro rata share of increases in real estate taxes and operating expenses for the Property and appurtenant property over the **[base year real estate taxes and operating expenses of $]** or **[expense stop of $]**. Tenant's pro rata share of increases in common area operating expenses is

. For the calendar year , Tenant is obligated to pay monthly estimated amounts for real estate tax and operating expense increases of $, and has paid such estimates through the period ending . Tenant is owed no refund of real estate taxes or operating expense payments made for prior calendar years.

6. Tenant has no option to extend or to renew the term of the Lease, except as follows: .

7. The Lease contains no right of first refusal or offer to lease additional space, option to expand, option to terminate the Lease, or right of first refusal or offer or option to purchase the Property or any interest therein, except as follows: .

8. The actual cash amount of the security deposit currently held by Landlord is $. Landlord holds no other funds or deposits of cash or property for Tenant's account.

9. Tenant is not, and to the best of Tenant's knowledge Landlord is not, in default under any provision of the Lease nor has any event occurred which with the passage of time or giving of notice, or both, would constitute a default on the part of Tenant or Landlord, both parties having fully performed the obligations required to be performed by each party thereunder through the date hereof. Tenant asserts no claim of default against Landlord or any other person or offset or defense against the payment of rent or other charges payable by Tenant or the performance of any other obligations by Tenant under the Lease.

10. The Premises have been delivered to Tenant in accordance with the terms of the Lease, Tenant has accepted the Premises, and Landlord has fully completed all construction and improvements to the Premises required to be completed by Landlord under the Lease. Landlord has fulfilled all obligations to finance or provide an allowance or reimbursement for improvements to the Premises.

11. The Lease entitles Tenant to the **[non-exclusive]** or **[exclusive]** use of parking spaces at the Property.

12. Tenant has not assigned its rights under the Lease or sublet any portion of the Premises, or entered into any licenses or other agreements permitting occupancy of any portion of the Premises by any person or company other than Tenant. Tenant is in occupancy of the Premises.

13. Tenant has not (i) made a general assignment for the benefit of creditors, (ii) filed any voluntary petition in bankruptcy or suffered the filing of an involuntary petition by Tenant's creditors, (iii) suffered the appointment of a receiver to take possession of all or substantially all of Tenant's assets, (iv) suffered the attachment or other judicial seizure of all, or substantially all, of Tenant's assets or (v) admitted in writing its inability to pay its debts as they come due and no such proceeding is contemplated by Tenant or pending.

14. All insurance required of Tenant under the Lease has been obtained by Tenant and all premiums have been paid.

15. Tenant has not assigned, hypothecated, granted a security interest or pledged its interest in the Lease to any person or entity.

16. Tenant's current address for Notices is:

_____

_____

_____

17. Since taking possession of the Premises, Tenant has not received any written notice that the Premises or Tenant's use of the Premises violates any applicable law, regulation, ordinance or directive of any governmental authority or agency or insurance company, which violation has not been cured.

18. Since taking possession of the Premises, Tenant has not stored, generated, manufactured, refined, treated, transported, disposed or in any way used materials which are considered hazardous substances or wastes under applicable environmental laws and regulations (including, without limitation, petroleum or petroleum by-products) at the Premises or on any other part of the Property, except for de minimus quantities incidental to the cleaning or operation of Tenant's business.

19. Tenant is not identified on the list of specially designated nationals and blocked persons subject to financial sanctions that is maintained by the U.S. Treasury Department, Office of Foreign Assets Control (http://www.treas.gov/offices/enforcement/ofac/sdn/t11sdn.pdf) and any other similar list maintained by the Office of Foreign Assets Control pursuant to any authorizing United States law, regulation or Executive Order of the President of the United States ("OFAC List") nor is Tenant subject to trade embargo or economic sanctions pursuant to any authorizing United States law, regulation or Executive Order of the President of the United States.

20. Tenant understands that a condition of the Loan may require Lender's consent to any future amendment, waiver, expansion or renewal (except for expansion or renewal rights currently permitted to Tenant by the express terms of the Lease), and no modification, waiver, expansion or renewal made without Lender's written consent will be enforceable.

21. Tenant understands that a condition of the Loan may prohibit Landlord from accepting Tenant's rent more than 30 days prior to its due date, and no payment of rent by Tenant more than 30 days in advance will be binding on Lender.

Tenant agrees for a period of thirty (30) days from the date hereof to notify Landlord, Buyer and Lender in writing of any changes to the statements made by Tenant in this certificate promptly upon Tenant's learning of each such change.

The statements made herein shall be binding upon us, our successors and assigns, and shall inure to your benefit and the benefit of your successors and assigns. The officers executing this letter have been duly empowered to do so on behalf of the undersigned.

BILL OF SALE AND GENERAL ASSIGNMENT

THIS BILL OF SALE AND GENERAL ASSIGNMENT ("**Assignment**") is executed as of the day of , 20 , by 200 OCEANGATE, LLC, a Delaware limited liability company ("**Seller**") in favor of MOLINA CENTER LLC, a Delaware limited liability company (" **Buyer**").

RECITALS

A. Reference is made to certain real property and the improvements thereon commonly known as 200 & 300 Oceangate, Long Beach, California, which real property is more thoroughly described in attached Schedule I (the " **Property**"). Concurrently herewith, Seller is selling to Buyer and Buyer is purchasing from Seller all of Seller's interest in the Property pursuant to that certain Purchase Agreement dated as of , 2011, between Seller and Buyer, providing for the sale of the Property (the "**Purchase Agreement**"). Initially capitalized terms used herein but not otherwise defined herein shall have the meanings given them in the Purchase Agreement; and

B. In connection with the sale of the Property to Buyer, Seller desires to assign and transfer to Buyer all of Seller's interest in the Leases, Service Contracts, Personal Property, Approvals and Warranties.

IN CONSIDERATION OF THE FOREGOING, and for other good and valuable consideration, Seller agrees as follows:

1. Seller hereby grants, conveys, assigns and transfers to Buyer all of Seller's rights, title and interest in the leases referenced on Schedule II hereto and the service, utility, management, maintenance and other contracts or agreements listed on Schedule III hereto.

2. Concurrently herewith, Seller has assigned and delivered to Buyer the security deposits listed on Schedule II hereto.

3. Subject to the terms of the Purchase Agreement, including the representations, warranties and covenants by Seller therein and the waivers, releases and covenants by Buyer therein, Buyer hereby assumes all of Seller's obligations under the leases referenced on Schedule II hereto, acknowledges receipt of all of the security deposits listed on Schedule II hereto, and assumes all of Seller's obligations under the service, utility, management, maintenance and other contracts or agreements listed on Schedule III hereto.

4. Seller hereby grants, transfers and conveys to Buyer all of Seller's interest in:

(a) all personal property described on Schedule IV hereto; and

(b) all transferable or assignable certificate(s) of occupancy, building or equipment permits, consents, authorizations, variances, waivers, licenses, permits, certificates and approvals from any governmental or quasi-governmental authority with respect to the Land or the Improvements, and all transferable or assignable warranties, representations, guaranties, and miscellaneous rights relating to the ownership, development, use and operation of the Land and Improvements.

5. Buyer acknowledges and agrees that the Leases, Service Contracts, Personal Property, Approvals and Warranties assigned, transferred and conveyed hereby are being assigned, transferred, and conveyed "AS IS, WHERE IS" subject to, and in accordance with, the terms of Section 8 of the Purchase Agreement.

6. Any disputes under this Assignment shall be arbitrated in accordance with the provisions of Section 15 of the Purchase Agreement. In the event of any arbitration or litigation between the parties, whether based on contract, tort or other cause of action or involving bankruptcy or similar proceedings, in any way related to this Agreement, the non-prevailing party shall pay to the prevailing party all reasonable attorneys' fees and costs and expenses of any type, without restriction by statute, court rule or otherwise, incurred by the prevailing party in connection with any action or proceeding (including arbitration proceedings, any appeals and the enforcement of any judgment or award), whether or not the dispute is litigated or prosecuted to final judgment. The "prevailing party" shall be determined based upon an assessment of which party's major arguments or positions taken in the action or proceeding could fairly be said to have prevailed (whether by compromise, settlement, abandonment by the other party of its claim or defense, final decision, after any appeals, or otherwise) over the other party's major arguments or positions on major disputed issues.

7. The terms of this Assignment shall bind and inure to the benefit of the parties hereto and their respective heirs, legal representatives, successors and assigns.

8. The parties agree to execute such other documents and perform such other acts as may be necessary or desirable to carry out the purposes of this Assignment. This Assignment may be signed in any number of counterparts with the same effect as if the signatures to each counterpart were upon a single instrument. All counterparts shall be deemed an original of this Assignment.

IN WITNESS WHEREOF, the parties have executed this Assignment as of the date and year first above written.

FIRPTA AFFIDAVIT

Section 1445 of the Internal Revenue Code provides that a buyer of a U.S. real property interest must withhold tax if the seller is a foreign person. To inform MOLINA CENTER LLC, a Delaware limited liability company (the "**Buyer**"), that withholding tax is not required upon the disposition of a U.S. real property interest by 200 OCEANGATE, LLC, a Delaware limited liability company (the "**Seller**"), the undersigned hereby certifies the following on behalf of Seller:

1. Seller is not a foreign corporation, foreign partnership, foreign trust or foreign estate (as those terms are defined in the Internal Revenue Code and Income Tax Regulations);

2. Seller's U.S. employer identification number is ; and

3. Seller's office address is: 220 Montgomery Street, 20th Floor
San Francisco, CA 94104

4. I, understand that this certification may be disclosed to the Internal Revenue Service by the Buyer and that any false statement I have made here could be punished by fine, imprisonment or both.

Under penalties of perjury, I declare that I have examined this certification and to the best of my knowledge and belief it is true, correct and complete, and I further declare that I have authority to sign this document on behalf of Seller.

EXHIBIT J

FORM OF OWNER'S AFFIDAVIT

OWNER'S AFFIDAVIT

The undersigned first being duly sworn, deposes and says:

1. That they are the owner of the certain real property in the State of California, described in your Commitment for Title Insurance or Preliminary Title Report No.

2. That the land is improved by a:

   ( ) Office Building

   ( ) Commercial Building

   ( ) Industrial Building

   ( ) Other:

3. First American Title Insurance Company (referred to as "First American") has been requested to issue a form of policy of title insurance showing as an exception to title in Schedule B therein all existing leases affecting the real property referred to above and described in the Commitment/Preliminary Title Report issued in connection with this transaction.

   In addition to any other requirements it may have, First American has requested that the undersigned provide it with a certified list of all of the lessees under existing leases.

   Therefore, in response to such request made by First American, the undersigned hereby declares that, to its knowledge, the rent roll attached hereto as Exhibit A, represents all of the lessees under all subsisting leases affecting the subject property.

   The undersigned also declares that to its knowledge, no leases contain provisions for either options to purchase or the rights of first refusal to purchase, or both, other than: the lease with Molina Healthcare, Inc.

4. That there have been no repairs, work of improvements or materials furnished to the premises by or on behalf of Grantor within 90 days, except:

   (Insert Info. or Specify "NONE", as applicable.)

   That the work of improvement, if any:

   ( ) Started on ( ) Was completed on

   ( ) Will be completed on

5. That there are no unpaid bills for labor or material because of any improvements made by or on behalf of Grantor to the above premises, except:

(Insert Info. or Specify "NONE", as applicable.)

6. That the undersigned has not received any supplemental tax bill which is unpaid.

7. That this Affidavit is given for the purpose of inducing First American Title Insurance Company and its Agents, Offices and Subsidiaries to issue its Policy(ies) of Title Insurance which may provide coverage as to the items mentioned above and that the statements made herein are true and correct to my/our own knowledge.

8. The undersigned acknowledge that they have read the foregoing and fully understand the legal aspects of any misrepresentation and/or untrue statements made herein and indemnify and hold harmless First American Title Insurance against liability occasioned by reason of reliance upon the statements made herein.

9. Grantor has not and will not, for the period commencing on the business day prior to close of escrow, at 7:30 a.m. through the recording of the Deed transferring title to the Property to the Grantee (such period is called the "Gap Period"), encumber, cause any defect to appear in the title to the Property or make any conveyance of all or any part of the Property except for the documents executed in favor of, or at the request of Grantee. Grantor agrees to hold harmless and indemnify First American Title Insurance Company ("Title Company") against all reasonable costs, expenses and attorneys' fees suffered or incurred by Title Company as a result of the failure of Grantor, upon receipt of written notice from the Title Company, to promptly remove, bond or otherwise dispose of any such encumbrance, defect or conveyance that may arise or be filed against the Property as a result of any act or omission of the Grantor during the Gap Period.

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

Exhibit 10.22

FIRST AMENDMENT TO PURCHASE AGREEMENT

THIS FIRST AMENDMENT TO PURCHASE AGREEMENT ("First Amendment"), dated November 10, 2011, and is made by and between 200 OCEANGATE, LLC, a Delaware limited liability company ("Seller"), and MOLINA CENTER LLC, a Delaware limited liability company (" Buyer").

Recitals

A. Seller and Buyer entered into that certain Purchase Agreement dated October 11, 2011 (the " Purchase Agreement"), whereby, upon the terms and conditions set forth therein, Seller agreed to sell and Buyer agreed to buy the Property and those associated rights and interest described in the Purchase Agreement.

B. On October 24, 2011, the California Regional Water Quality Control Board (Los Angeles Region) (" Water Board") issued a General NPDES Permit in connection with the operation of the Discharge System at the Property, a copy of which is attached hereto as Exhibit A (the "Permit").

C. Seller and Buyer now desire to amend the Purchase Agreement as set forth below.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound, the parties hereto agree that the Purchase Agreement is hereby amended as follows:

1. Additional Buyer Closing Conditions. In addition to the conditions to Closing for the benefit of Buyer set forth elsewhere in the Purchase Agreement, Buyer's obligation to purchase the Property is conditioned upon the satisfaction of each of the following conditions, each of which is for the exclusive benefit of Buyer. Buyer may, at any time or times before the Closing, waive one or more of the following conditions, but only in writing and any such waiver will not affect its rights and remedies with respect to any remaining conditions:

(i) The Permit shall be in full force and effect, shall be in the form attached hereto as Exhibit A (without modification or amendment), and Seller shall be in full compliance with the terms of the Permit.

(ii) Seller shall have submitted to the California Regional Water Quality Control Board—Los Angeles Region an NPDES Permit Transfer Form (Form No. R4-WRS #1) with respect to the Permit in the form attached as Exhibit B. If the California Regional Water Quality Control Board—Los Angeles Region (or its staff) requests any additional submissions with respect to such Permit Transfer Form prior to Closing, Seller shall provide such additional submissions.

(iii) All effluent sampling required to be performed prior to the date of Closing, pursuant to the Water Board's monitoring and reporting program prescribed by the Permit, shall have been collected and analyzed, and all such data shall have been delivered to Buyer for Buyer's review not less than three (3) business days prior to the Closing.

(iv) Discharge System effluent sampling data and analysis disclosed to Buyer after Buyer's delivery of the Approval Notice shall: (A) confirm that the effluent discharge is in full compliance with the terms and conditions of the Permit; and (B) be acceptable to Buyer in Buyer's commercially reasonable discretion.

(v) Neither the Water Board nor any other governmental or quasi-governmental agency or instrumentality shall have given any indication (either oral or written) to Seller or its consultants that: (A) the imposition of treatment and/or improvement requirements is being considered in connection with or in any way related to the operation of the Discharge System; and/or (B) any amendment, modification or revision to the Permit is being considered. If Seller or its consultants receive any indication (either oral or written) of the matters contemplated in (A) and/or (B) above, such information shall be immediately disclosed to Buyer in writing.

(vi) No claim, administrative action, enforcement action, order, or demand shall have been filed, threatened or initiated in any way related to the operation of the Discharge System, and there shall have been no challenge or threatened challenge to the Permit terms and/or conditions.

(vii) The installation of the flow meter and related improvements (collectively, "Flow Meter") necessary to comply with the Permit's continuous total waste flow monitoring requirement shall have been completed in accordance with applicable laws at Seller's expense, the Flow Meter shall be fully operational and in good working order and condition, and the Flow Meter shall be acceptable to Buyer in Buyer's commercially reasonable discretion. Buyer hereby acknowledges that installation of an Endress+Hauser Prosonic Flow Clamp On 91W Ultrasonic Flow Measuring System is acceptable. If this condition is not satisfied on or before the Closing Date, the Closing Date shall be extended until the date three (3) business days after the date this condition is satisfied or waived, provided that the Closing Date shall not be extended beyond the Outside Closing Date. If this condition has not been satisfied and Buyer elects to waive this condition, Buyer shall receive a credit at Closing in an amount equal to the cost that Seller would have otherwise incurred in connection with the installation or completion of the installation of the Flow Meter and the fact that the Flow Meter has not been installed shall not constitute a failure of the condition set forth in Section 1(i) above. If Buyer desires to so waive such condition, it shall do so not less than three (3) business days prior to the then scheduled Closing Date.

(viii) The United States of America, Department of Veterans Affairs (the "VA") shall not have given any indication (either oral or written) to Seller or its employees that the VA is not prepared to approve the assignment to Buyer of the VA's lease affecting the Property. Any demand of concessions by the VA shall be deemed to be an indication that the VA is not prepared to approve the assignment to Buyer of the VA's lease. If Seller or its employees receive any indication (either oral or written) that the VA is not prepared to approve the assignment to Buyer of the VA's lease, such information shall be immediately disclosed to Buyer in writing.

2. Closing Leasing Credit. No Closing Leasing Credit shall be due Buyer at Closing.

3. Purchase Price Reduction. Section 2 of the Purchase Agreement is amended and restated in its entirety as follows:

2. Purchase Price. The purchase price for the Property is Eighty-One Million Dollars ($81,000,000.00) (" **Purchase Price**") and shall be paid in cash by Buyer at the Closing (as defined in Section 10.1 below).

4. Notice Address for Seller. The notice address for Seller in section 17.1 of the Purchase Agreement is hereby deleted in its entirety, and replaced with the following:

Seller:	200 Oceangate, LLC c/o The Swig Company, LLC 220 Montgomery Street, 20th Floor San Francisco, CA 94104 Attn: Kennard P. Perry Telephone: (415) 291-1140 Facsimile: (415) 291-1101 Email: kperry@swigco.com
with copy to:	Farella Braun + Martel LLP 235 Montgomery Street San Francisco, CA 94104 Attn: Anthony D. Ratner Telephone: (415) 954-4448 Facsimile: (415) 954-4480 Email: tratner@fbm.com

5. Post-Closing Document Delivery. Following the Closing, Seller shall, at Buyer's request, coordinate and cooperate with Buyer in connect with the delivery and transfer to Buyer of all Documents (including, without limitation, electronic data, files and documents). This provision is in addition to, and not intended to limit, the delivery obligations of Seller in section 10.3 of the Purchase Agreement. The obligations set forth in this provision sale survive the Closing.

6. Miscellaneous. This First Amendment may be executed in counterparts, including facsimile counterparts or scanned and emailed counterparts, each of which shall be deemed an original, and all of which taken together shall constitute one and the same instrument. Capitalized terms used in this First Amendment shall have the meanings set forth in the Purchase Agreement, except as otherwise defined herein. Except as specifically set forth herein, the Purchase Agreement shall be unmodified, and shall remain in full force and effect.

[SIGNATURES ON FOLLOWING PAGE]

IN WITNESS WHEREOF, the parties have executed this First Amendment as of the date first listed above.

CERTIFIED MAIL
RETURN RECEIPT REQUESTED
7000 0860 0006 4858 9272

Dear Mr. Perry:

COVERAGE UNDER GENERAL NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM AND WASTE DISCHARGE REQUIREMENTS—200 OCEANGATE LLC., ARCO CENTER, 300 OCEANGATE BLVD., LONG BEACH, CALIFORNIA (NPDES NO. CAG994004, CI–9766)

We have completed our review of your application for a permit to discharge groundwater under the National Pollutant Discharge Elimination System (NPDES).

Based on the information provided, the proposed discharge of groundwater from the above-referenced facility meets the conditions to be regulated under Order No. R4-2008-0032, *General National Pollutant Discharge Elimination System and Waste Discharge Requirements for Discharges of Groundwater from Construction and Project Dewatering to Surface Waters in Coastal Watersheds of Los Angeles and Ventura Counties*, adopted by this Board on June 5, 2008.

Enclosed are your Waste Discharge Requirements, which also serve as your NPDES permit, consisting of Order No. R4-2008-0032 and Monitoring and Reporting Program No. CI-9761. The discharge limitations in Part V.1.Table 1 of Order No. R4-2008-0032 for the specific constituents listed on the Table with the enclosed Fact Sheet are applicable to your discharge. The groundwater discharge flows into the Pacific Ocean. Therefore, discharge limitations in Attachment B of the Order No. R4-2008-0032 are not applicable to your discharge. Prior to starting discharge, a representative sample of the effluent shall be obtained and analyzed to determine compliance with the discharge limitations.

The Monitoring and Reporting Program requires you to implement the monitoring program on the effective date of coverage under this permit. All monitoring reports should be sent to the Regional Board, ATTN: Information Technology Unit. When submitting monitoring or technical reports to the Regional Board per these requirements, please include a reference to "Compliance File No. CI-9766 and NPDES No. CAG994004", which will assure that the reports are directed to the appropriate file and staff. Also, please do not combine other reports with your monitoring reports. Submit each type of report as a separate document.

To avoid paying future annual fees, please submit written request for termination of your enrollment under the general permit in a separate letter, when your project has been completed and the permit is no longer needed.

We are sending a copy of Order No. R4-2008-0032 only to the applicant. For those on the mailing list, please refer to the Board Order sent to you previously or download a copy of the Order from our website at *http://www.waterboards.ca.gov/losangeles/board_decisions.*

If you have any questions, please contact Namiraj Jain at (213) 620-6003.

Sincerely,

Samuel Unger
Executive Officer

PROJECT DESCRIPTION:

200 Oceangate LLC (Discharger) proposes to discharge seepage groundwater from the subbasement parking structure located at the above referenced facility. Groundwater dewatering is necessary to protect the integrity of the building structure from rising groundwater. Reasonable Potential Analysis (RPA) of water quality data submitted indicated concentrations for arsenic and nickel at the cusp of their respective screening levels. Therefore, effluent limitations for these parameters are not appropriate. However, long term monitoring for these parameters are necessary to ensure that the concentrations for these parameters remain insignificant. The site location map is shown in Figure 1.

VOLUME AND DESCRIPTION OF DISCHARGE:

Up to 50,000 gallons per day (gpd) of groundwater will be discharged from the project to the nearby storm drain system at Discharge Point M-001(Latitude: 33°45'56.9"Longitude:118° 11'59.9"). The discharge flows into the Pacific Ocean, waters of United States.

APPLICABLE EFFLUENT LIMITATIONS

Based on the information provided in the NPDES Application Supplemental Requirements, the following constituents listed in the Table below have been determined to show reasonable potential to exist in the discharge. The discharge flows to Pacific Ocean therefore the discharge limitations in Attachment B of Order No. R4-2008-0032 are not applicable to your discharge.

This Table lists the specific constituents and effluent limitations applicable to the discharge.

Constituents	Units	Discharge Limitations	
		Daily Maximum	Monthly Average
Total Suspended Solids	mg/L	150	50
Turbidity	NTU	150	50
BOD_5 20°C	mg/L	30	20
Oil and Grease	mg/L	15	10
Settleable Solids	ml/L	0.3	0.1
Sulfides	mg/L	1.0	---
Phenols	mg/L	1.0	---
Residual Chlorine	mg/L	0.1	---
Methylene Blue Active Substances (MBAS)	mg/L	0.5	---

FREQUENCY OF DISCHARGE:

The discharge of groundwater will be intermittent and last for life of the project.

REUSE OF WATER:

In the vicinity of the project site there are no other feasible reuse options, therefore the groundwater will be discharged to the storm drain in compliance with the requirements of the attached Order.

Date: October 24, 2011

TABLE OF CONTENTS

ATTACHMENT E - Monitoring and Reporting Program (MRP)

LIST OF TABLES

Attachment E – Monitoring and Reporting Program (MRP)

The Code of Federal Regulations section 122.48 requires that all NPDES permits specify monitoring and reporting requirements. Water Code Sections 13267 and 13383 also authorize the Regional Water Quality Control Board (Regional Water Board) to require technical and monitoring reports. This MRP establishes monitoring and reporting requirements, which implement the federal and California regulations.

I. GENERAL MONITORING PROVISIONS

A. An effluent sampling station shall be established for Discharge Point M-001 and shall be located where representative samples of that effluent can be obtained. Provisions shall be made to enable visual inspections before discharge. In the event of presence of oil sheen, debris, and/or other objectionable materials or odors, discharge shall not commence until compliance with the requirements is demonstrated. All visual observations shall be included in the monitoring report.

B. This Regional Board shall be notified in writing of any change in the sampling stations once established or in the methods for determining the quantities of pollutants in the individual waste streams.

C. Effluent samples shall be taken downstream of any addition to treatment works and prior to mixing with the receiving waters.

D. Pollutants shall be analyzed using the analytical methods described in 40 CFR §§136.3, 136.4, and 136.5 (revised March 12, 2007); or, where no methods are specified for a given pollutant, by methods approved by this Regional Water Board or the State Water Board.

E. Laboratories analyzing effluent samples and receiving water samples shall be certified by the California Department of Public Health Environmental Laboratory Accreditation Program (ELAP) or approved by the Executive Officer and must include QA/QC data in their reports. A copy of the laboratory certification shall be provided each time a new certification and/or renewal of the certification is obtained from ELAP.

F. For any analyses performed for which no procedure is specified in the USEPA guidelines or in the MRP, the constituent or parameter analyzed and the method or procedure used must be specified in the monitoring report.

G. Each monitoring report must affirm in writing that "all analyses were conducted at a laboratory certified for such analyses by the Department of Public Health or approved by the Executive Officer and in accordance with current USEPA guideline procedures or as specified in this Monitoring and Reporting Program".

H. The monitoring reports shall specify the analytical method used, the MDL, and the ML for each pollutant. For the purpose of reporting compliance with numerical limitations, performance goals, and receiving water limitations, analytical data shall be reported by one of the following methods, as appropriate:

1. An actual numerical value for sample results greater than or equal to the ML; or

2. "DNQ" if results are greater than or equal to the laboratory's MDL but less than the ML; or,

3. "ND" for sample results less than the laboratory's MDL with the MDL indicated for the analytical method used.

Analytical data reported as "less than" for the purpose of reporting compliance with permit limitations shall be the same or lower than the permit limit(s) established for the given parameter.

Current MLs (Attachment G) are those published by the State Water Resources Control Board in the *Policy for the Implementation of Toxics Standards for Inland Surface Waters, Enclosed Bays, and Estuaries of California*, March 2, 2000.

I. Where possible, the MLs employed for effluent analyses shall be lower than the permit limitations established for a given parameter. If the ML value is not below the effluent limitation, then the lowest ML value and its associated analytical method shall be selected for compliance purposes. At least once a year, the Discharger shall submit a list of the analytical methods employed for each test and associated laboratory QA/QC procedures.

The Regional Water Board, in consultation with the State Water Board Quality Assurance Program, shall establish a ML that is not contained in Attachment G to be included in the Discharger's permit in any of the following situations:

1. When the pollutant under consideration is not included in Attachment G;

2. When the Discharger and Regional Water Board agree to include in the permit a test method that is more sensitive than that specified in 40 CFR Part 136 (revised March 12, 2007);

3. When the Discharger agrees to use an ML that is lower than that listed in Attachment G;

4. When the Discharger demonstrates that the calibration standard matrix is sufficiently different from that used to establish the ML in Attachment G, and proposes an appropriate ML for their matrix; or,

5. When the Discharger uses a method whose quantification practices are not consistent with the definition of an ML. Examples of such methods are the USEPA-approved method 1613 for dioxins and furans, method 1624 for volatile organic substances, and method 1625 for semi-volatile organic substances. In such cases, the Discharger, the Regional Water Board, and the State Water Board shall agree on a lowest quantifiable limit and that limit will substitute for the ML for reporting and compliance determination purposes.

g

J. Water/wastewater samples must be analyzed within allowable holding time limits as specified in 40 CFR §136.3. All QA/QC items must be run on the same dates the samples were actually analyzed, and the results shall be reported in the Regional Water Board format, when it becomes available, and submitted with the laboratory reports. Proper chain of custody procedures must be followed, and a copy of the chain of custody shall be submitted with the report.

K. All analyses shall be accompanied by the chain of custody, including but not limited to date and time of sampling, sample identification, and name of person who performed sampling, date of analysis, name of person who performed analysis, QA/QC data, method detection limits, analytical methods, copy of laboratory certification, and a perjury statement executed by the person responsible for the laboratory.

L. The Discharger shall calibrate and perform maintenance procedures on all monitoring instruments and to insure accuracy of measurements, or shall insure that both equipment activities will be conducted.

M. The analytical laboratory shall have an acceptable written quality assurance (QA) plan for laboratory analyses. The annual monitoring report shall also summarize the QA activities for the previous year. Duplicate chemical analyses must be conducted on a minimum of ten percent (10%) of the samples, or at least one sample per sampling period, whichever is greater. A similar frequency shall be maintained for analyzing spiked samples.

N. When requested by the Regional Water Board or USEPA, the Discharger will participate in the NPDES discharge monitoring report QA performance study. The Discharger must have a success rate equal to or greater than 80%.

O. For parameters that both monthly average and daily maximum limitations are specified and the monitoring frequency is less than four times a month, the following shall apply. If an analytical result is greater than the monthly average limitation, the Discharger shall collect four additional samples at approximately equal intervals during the month, until compliance with the monthly average limitation has been demonstrated. All five analytical results shall be reported in the monitoring report for that month, or 45 days after results for the additional samples were received, whichever is later. In the event of noncompliance with a monthly average effluent limitation, the sampling frequency for that constituent shall be increased to weekly and shall continue at this level until compliance with the monthly average effluent limitation has been demonstrated. The Discharger shall provide for the approval of the Executive Officer a program to ensure future compliance with the monthly average limitation.

P. In the event wastes are transported to a different disposal site during the report period, the following shall be reported in the monitoring report:

1. Types of wastes and quantity of each type;

2. Name and address for each hauler of wastes (or method of transport if other than by hauling); and

3. Location of the final point(s) of disposal for each type of waste.

If no wastes are transported off-site during the reporting period, a statement to that effect shall be submitted.

Q. Each monitoring report shall state whether or not there was any change in the discharge as described in the Order during the reporting period.

All monitoring reports shall include the discharge limitations in the Order, tabulated analytical data, the chain of custody form, and the laboratory report (including but not limited to date and time of sampling, date of analyses, method of analysis and detection limits).

R. Sample collection requirements (as appropriate)

1. Daily samples shall be collected each day.
2. Weekly samples shall be collected on a representative day of each week.
3. Monthly samples shall be collected on a representative day of each month.
4. Quarterly samples shall be collected in February, May, August, and November.
5. Semi-annual samples shall be collected in May and November.
6. Annual samples shall be collected in November.

S. Before commencing a new discharge, a representative sample of the effluent shall be collected and analyzed for toxicity and for all the constituents listed in Fact Sheet, and the test results must meet all applicable limitations of Order No. R4-2008-0032.

II. MONITORING LOCATIONS

The Discharger shall establish the following monitoring locations to demonstrate compliance with the effluent limitations, discharge specifications, and other requirements in this Order:

Table 1. Monitoring Location

Discharge Point Name	Monitoring Location Name	Monitoring Location Description
Discharge Point 1	M-001	Wastewater effluent before contact with the receiving water and/or dilution by any other water or waste.
Discharge Point 2	M-002	If more than one discharge point is authorized under the General Permit, compliance monitoring locations shall be named M-002, M-003, etc. and shall be located so as to allow collection of wastewater effluent before contact with receiving water and/or dilution by any other water or waste.

III. EFFLUENT MONITORING REQUIREMENTS

A. The Discharger shall monitor the effluent at Discharge Point M-001 as follows.

Table 2. Monitoring Constituents

Constituent	Unit	Type of Sample	Minimum Frequency of Analysis
Total Waste Flow	gal/day	totalizer	continuously[1]
pH	pH unit	grab	monthly
Temperature	°F	grab	monthly
Total Suspended Solids	mg/L	grab	monthly
Turbidity	NTU	grab	monthly
BOD_5 20°C	mg/L	grab	monthly
Oil and Grease	mg/L	grab	monthly
Settleable Solids	ml/L	grab	monthly
Sulfides	mg/L	grab	monthly
Phenols	mg/L	grab	monthly
Total Residual Chlorine	mg/L	grab	monthly
Methylene Blue Active Substances (MBAS)	mg/L	grab	monthly
Arsenic	µg/L	grab	monthly[2]
Nickel	µg/L	grab	monthly[2]
Acute Toxicity	% survival	grab	annually

1 Record the monthly total flow and report the calculated daily average flow and monthly flow in the quarterly and annual reports, as appropriate.

2 Monthly for four quarters. If concentrations remain below significant levels, the monitoring frequency will be reduced to quarterly or could be eliminated with the approval of the Executive Officer of this Regional Board.

IV. WHOLE EFFLUENT TOXICITY TESTING REQUIREMENTS

A. Definition of Toxicity

Acute Toxicity

The MRP requires an annual test for acute toxicity which measures primarily lethal effects that occur over a 96-hour period. Acute toxicity shall be measured in percent survival measured in undiluted (100%) effluent.

B. Acute Toxicity Effluent Monitoring Program

1. The Discharger shall conduct acute toxicity tests on effluent grab samples by methods specified in 40 CFR Part 136 which cites USEPA's *Methods for Measuring the Acute Toxicity of Effluents and Receiving Waters to Freshwater and Marine Organisms*, Fifth Edition, October 2002, USEPA, Office of Water, Washington D.C. (EPA/821-R-02-012) or a more recent edition to ensure compliance in 100 % effluent.

2. The fathead minnow, *Pimephales promelas*, shall be used as the test species for fresh water discharges and the topsmelt, *Atherinops affinis*, shall be used as the test species for brackish effluent. The method for topsmelt is found in USEPA's *Short-term Method for Estimating the Chronic Toxicity of Effluents and Receiving Waters to West Coast Marine and Estuarine Organisms*, First Edition, August 1995 (EPA/600/R-95/136), or a more recent edition.

3. In lieu of conducting the standard acute toxicity testing with the fathead minnow, the Discharger may elect to report the results or endpoint from the first 48 hours of the chronic toxicity test as the results of the acute toxicity test.

4. Accelerated Toxicity Monitoring: If the results of the toxicity test yield a survival of less than 90%, then the frequency of analyses shall increase to monthly until at least three test results have been obtained and full compliance with effluent limitations has been demonstrated, after which the frequency of analyses shall revert to annually. Results of toxicity tests shall be included in the first monitoring report following sampling.

5. Effluent samples shall be collected after all treatment processes and before discharge to the receiving water.

C. Reporting

1. The Discharger shall submit a full report of the toxicity test results, including any accelerated testing conducted during the month as required by this permit. Test results shall be reported as % survival for acute toxicity test results with the self monitoring reports (SMR) for the month in which the test is conducted.

2. If an initial investigation indicates the source of toxicity and accelerated testing is unnecessary, then those results also shall be submitted with the SMR for the period in which the investigation occurred.

   a. The full report shall be submitted on or before the end of the month in which the SMR is submitted.

   b. The full report shall consist of (1) the results; (2) the dates of sample collection and initiation of each toxicity test; (3) the acute toxicity average limit.

3. Test results for toxicity tests also shall be reported according to the appropriate manual chapter on Report Preparation and shall be attached to the SMR. Routine reporting shall include, at a minimum, as applicable, for each test:

   a. Sample date(s);

   b. Test initiation date;

   c. Test species;

   d. End point values for each dilution (e.g., number of young, growth rate, percent survival);

   e. Any applicable charts; and,

   f. Available water quality measurements for each test (e.g., pH, D.O., temperature, conductivity, hardness, salinity, ammonia).

4. The Discharger shall provide a compliance summary, which includes a summary table of toxicity data from all samples collected during that year.

   The Discharger shall notify by telephone or electronically, this Regional Water Board of any toxicity exceedance of the limit or trigger within 24 hours of receipt of the results followed by a written report within 14 calendar days of receipt of the results. The verbal or electronic notification shall include the exceedance and the plan the Discharger has taken or will take to investigate and correct the cause(s) of toxicity. It may also include a status report on any actions required by the permit, with a schedule for actions not yet completed. If no actions have been taken, the reasons shall be given.

V. LAND DISCHARGE MONITORING REQUIREMENTS

Not Applicable.

VI. RECLAMATION MONITORING REQUIREMENTS

Not Applicable.

VII. RECEIVING WATER MONITORING REQUIREMENTS – SURFACE WATER AND GROUNDWATER

Not Applicable.

VIII. OTHER MONITORING REQUIREMENTS

Not Applicable.

IX. REPORTING REQUIREMENTS

A. General Monitoring and Reporting Requirements

1. The Discharger shall comply with all Standard Provisions (Attachment D) related to monitoring, reporting, and recordkeeping.

2. If there is no discharge during any reporting period, the report shall so state.

3. Each monitoring report shall contain a separate section titled "Summary of Non-Compliance" which discusses the compliance record and corrective actions taken or planned that may be needed to bring the discharge into full compliance with waste discharge requirements. This section shall clearly list all non-compliance with waste discharge requirements, as well as all excursions of effluent limitations.

4. The Discharger shall inform the Regional Water Board well in advance of any proposed construction activity that could potentially affect compliance with applicable requirements.

B. Self Monitoring Reports (SMRs)

1. At any time during the term of this permit, the State or Regional Water Board may notify the Discharger to electronically submit Self-Monitoring Reports (SMRs) using the State Water Board's California Integrated Water Quality System (CIWQS) Program Web site (http://www.waterboards.ca.gov/ciwqs/index.html). Until such notification is given, the Discharger shall submit hard copy SMRs. The CIWQS Web site will provide additional directions for SMR submittal in the event there will be service interruption for electronic submittal.

2. The Discharger shall report in the SMR the results for all monitoring specified in this MRP. The Discharger shall submit SMRs including the results of all required monitoring using USEPA-approved test methods or other test methods specified in this Order. If the Discharger monitors any pollutant more frequently than required by this Order, the results of this monitoring shall be included in the calculations and reporting of the data submitted in the SMR.

3. Monitoring periods and reporting for all required monitoring shall be completed according to the following schedule:

Table 3. Monitoring Periods and Reporting Schedule

Sampling Frequency	Monitoring Period Begins On	Monitoring Period	SMR Due Date
Continuous	October 24, 2011	All	Submit with quarterly SMR
Weekly	Sunday following permit effective date or on permit effective date if on a Sunday	Sunday through Saturday	Submit with quarterly SMR
Monthly	First day of calendar month following permit effective date or on permit effective date if that date is first day of the month	1st day of calendar month through last day of calendar month	Submit with quarterly SMR
Quarterly	Closest of January 1, April 1, July 1, or October 1	January 1 through March 31. April 1 through June 30. July 1 through September 30. October 1 through December 31	45 days from the end of the monitoring period
Annually	January 1	January 1 through December 31	45 days from the end of the monitoring period

4. Reporting Protocols. The Discharger shall report with each sample result the applicable Reporting Level (RL) and the current Method Detection Limit (MDL), as determined by the procedure in Part 136.

   The Discharger shall report the results of analytical determinations for the presence of chemical constituents in a sample using the following reporting protocols:

   a. Sample results greater than or equal to the RL shall be reported as measured by the laboratory (i.e., the measured chemical concentration in the sample).

   b. Sample results less than the RL, but greater than or equal to the laboratory's MDL, shall be reported as "Detected, but Not Quantified," or DNQ. The estimated chemical concentration of the sample shall also be reported.

      For the purposes of data collection, the laboratory shall write the estimated chemical concentration next to DNQ as well as the words "Estimated Concentration" (may be shortened to "Est. Conc."). The laboratory may, if such information is available, include numerical estimates of the data quality for the reported result. Numerical estimates of data quality may be percent accuracy (± a percentage of the reported value), numerical ranges (low to high), or any other means considered appropriate by the laboratory.

c. Sample results less than the laboratory's MDL shall be reported as "Not Detected," or ND.

d. Dischargers are to instruct laboratories to establish calibration standards so that the ML value (or its equivalent if there is differential treatment of samples relative to calibration standards) is the lowest calibration standard. At no time is the Discharger to use analytical data derived from *extrapolation* beyond the lowest point of the calibration curve.

5. The Discharger shall submit SMRs in accordance with the following requirements:

a. The Discharger shall arrange all reported data in a tabular format. The data shall be summarized to clearly illustrate whether the facility is operating in compliance with interim and/or final effluent limitations. The Discharger is not required to duplicate the submittal of data that is entered in a tabular format within CIWQS. When electronic submittal of data is required and CIWQS does not provide for entry into a tabular format within the system, the Discharger shall electronically submit the data in a tabular format as an attachment.

b. The Discharger shall attach a cover letter to the SMR. The information contained in the cover letter shall clearly identify violations of the WDRs; discuss corrective actions taken or planned; and the proposed time schedule for corrective actions. Identified violations must include a description of the requirement that was violated and a description of the violation.

c. SMRs must be submitted to the Regional Water Board, signed and certified as required by the Standard Provisions (Attachment D), to the address listed below:

C. Notification

1. The Discharger shall notify the Executive Officer in writing prior to discharge of any chemical that may be toxic to aquatic life. Such notification shall include:

a. Name and general composition of the chemical,

b. Frequency of use,

c. Quantities to be used,

d. Proposed discharge concentrations, and,

e. EPA registration number, if applicable.

No discharge of such chemical shall be made prior to obtaining the Executive Officer's approval.

2. The Discharger shall notify the Regional Board via telephone and/or fax within 24 hours of noticing an exceedance above the effluent limits in Order No. R4-2009-0068. The Discharger shall provide to the Regional Board within 14 days of observing the exceedance a detailed statement of the actions undertaken or proposed that will bring the discharge into full compliance with the requirements and submit a timetable for correction.

D. Monitoring Frequencies Adjustment

Monitoring frequencies may be adjusted by the Executive Officer to a less frequent basis if the Discharger requests same and the request is backed by statistical trends of monitoring data submitted.

E. Discharge Monitoring Reports (DMRS)

1. At any time during the term of this permit, the State or Regional Water Board may notify the Discharger to electronically submit SMRs that will satisfy federal requirements for submittal of Discharge Monitoring Reports (DMRs). Until such notification is given, the Discharger shall submit SMRs in accordance with the requirements described below.

2. SMRs must be signed and certified as required by the standard provisions (Attachment D). The Discharge shall submit the original SMR to the address listed below:

NPDES PERMIT TRANSFER REQUEST FORM

NPDES Permit No. _____ CI No. _____

Facility Location: _____
Street Address City Zip

I hereby request the transfer of the above-referenced NPDES permit, including the transfer of responsibility, coverage, and liability for such permit, in accordance with the following:

TRANSFER FROM:

_____
Facility Name

_____
Owner

_____
Operator

TRANSFER TO:

_____
New Facility Name

_____
New Owner

_____
New Operator

TRANSFER EFFECTIVE DATE: _____

_____ _____
Signature of Former Owner/Authorized Representative Title

_____ _____
Name of Former Owner/Authorized Representative Date

I understand that I am responsible for compliance with the above-referenced NPDES permit. I certify that:

1. I have reviewed the NPDES permit;
2. The facility construction and nature/amount of discharges from the facility have not substantially changed: and
3. I will notify the Board of any material change in the facility and/or of the discharge, or any future change in the facility owner or operator.

_____ _____
Signature of New Owner/Authorized Representative Company name, if appropriate

SECOND AMENDMENT TO PURCHASE AGREEMENT

THIS SECOND AMENDMENT TO PURCHASE AGREEMENT ("Second Amendment"), dated November 30, 2011, and is made by and between 200 OCEANGATE, LLC, a Delaware limited liability company ("Seller"), and MOLINA CENTER LLC, a Delaware limited liability company ("Buyer").

Recitals

A. Seller and Buyer entered into that certain Purchase Agreement dated October 11, 2011, as amended by that certain First Amendment to Purchase Agreement dated November 10, 2011 (the "First Amendment"), and as further amended by that certain Closing Date extension notice dated November 22, 2011 (collectively, the "Purchase Agreement"), whereby, upon the terms and conditions set forth therein, Seller agreed to sell and Buyer agreed to buy the Property and those associated rights and interest described in the Purchase Agreement.

B. Seller and Buyer now desire to amend the Purchase Agreement as set forth below.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound, the parties hereto agree that the Purchase Agreement is hereby amended as follows:

1. Closing Date. The first full sentence of section 10.1 of the Purchase Agreement is amended and restated in its entirety as follows:

"The consummation of the purchase and sale of the Property (the " **Closing**") shall be held at the offices of the Title Company (or at such other location as the parties may agree) on December 7, 2011 (the "**Closing Date**"), which may be extended in accordance with the terms of this Section 10.1, Section 11.2, and Section 1(vii) of the First Amendment, but in any event shall not be later than January 13, 2012 (the " **Outside Closing Date**")."

2. Miscellaneous. This Second Amendment may be executed in counterparts, including facsimile counterparts or scanned and emailed counterparts, each of which shall be deemed an original, and all of which taken together shall constitute one and the same instrument. Capitalized terms used in this Second Amendment shall have the meanings set forth in the Purchase Agreement, except as otherwise defined herein. Except as specifically set forth herein, the Purchase Agreement shall be unmodified, and shall remain in full force and effect.

[SIGNATURES ON FOLLOWING PAGE]

IN WITNESS WHEREOF, the parties have executed this Second Amendment as of the date first listed above.

SELLER: 200 OCEANGATE, LLC, a Delaware limited liability company

EXHIBIT 31.1

SECTION 302 CERTIFICATION

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed this annual report on Form 10-K for the fiscal year ended December 31, 2011, of Molina Healthcare, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

/s/ JOSEPH M. MOLINA

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
September 30, 2011

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. As of September 30, 2011, these health plans served approximately 1.7 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

Our Molina Medicaid Solutions segment, which we acquired during the second quarter of 2010, provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award our contract for a replacement Medicaid Management Information System, or MMIS, to another firm. Our revenue under the Louisiana MMIS contract from May 1, 2010, the date we acquired Molina Medicaid Solutions, through December 31, 2010, was approximately $32 million. For the nine months ended September 30, 2011, our revenue under the Louisiana MMIS contract was approximately $36 million. Until the replacement MMIS is designed, developed, and implemented, we will continue to perform under the existing MMIS contract, a period which we expect to last at least two years.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc. and all majority owned subsidiaries. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated in consolidation. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2011. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2010. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2010 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2010 audited financial statements.

Adjustments and Reclassifications

We have adjusted all applicable share and per-share amounts to reflect the retroactive effects of the three-for-two stock split in the form of a stock dividend that was effective May 20, 2011.

We have reclassified certain amounts in the 2010 consolidated statement of cash flows to conform to the 2011 presentation.

2. Significant Accounting Policies

Recognition of Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of three elements of service. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. The second element, following completion of the DDI element, is the operation of the MMIS under a business process outsourcing, or BPO, arrangement. While providing BPO services, we also provide the state with the third contracted element — training and IT support and hosting services (training and support).

Because they include these three elements of service, our Molina Medicaid Solutions contracts are multiple-element arrangements. The following discussion applies to our contracts with multiple elements entered into prior to January 1, 2011, before our prospective adoption of *Accounting Standards Update, or ASU, No. 2009-13, Revenue Recognition (Accounting Standards Codification, or ASC, Topic 605) — Multiple-Deliverable Revenue Arrangements*.

For those contracts entered into prior to January 1, 2011, we have no vendor specific objective evidence, or VSOE, of fair value for any of the individual elements in these contracts, and at no point in the contract will we have VSOE for the undelivered elements in the contract. We lack VSOE of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of products and services, which vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our newer contracts (commercial off-the-shelf technology solutions).

The absence of VSOE within the context of a multiple element arrangement prior to January 1, 2011 requires us to delay recognition of any revenue for an MMIS contract until completion of the DDI phase of the contract. As a general principle, revenue recognition will therefore commence at the completion of the DDI phase, and all revenue will be recognized over the period that BPO services and training and support services are provided. Consistent with the deferral of revenue, recognition of all direct costs (such as direct labor, hardware, and software) associated with the DDI phase of our contracts is deferred until the commencement of revenue recognition. Deferred costs are recognized on a straight-line basis over the period of revenue recognition.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any revenue at risk (whether DDI, BPO services, or training and support services) until the contingency has been removed. When we defer revenue recognition we also defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with the revenue deferred. Such deferred contract costs are recognized on a straight-line basis over the period of revenue recognition.

However, direct costs in excess of the estimated future net revenues associated with a contract may not be deferred. In circumstances where estimated direct costs over the life of a contract exceed estimated future net revenues of that contract, the excess of direct costs over revenue is expensed as a period cost.

In Idaho, revenue recognition is expected to begin during the second half of 2012. Consistent with the deferral of revenue, we have deferred recognition of a portion of the direct contract costs associated with that revenue. Deferred contract costs, if any, deferred through the date revenue recognition begins will be recognized simultaneously with revenue. As noted above, direct costs in excess of the estimated future net revenues associated with a contract may not be deferred. For the three and nine months ended September 30, 2011, we recorded $2.5 million and $9.5 million, respectively, of direct contract costs associated with our Idaho contract. We were not able to defer these direct contract costs because estimated future net revenues as of each measurement date did not exceed estimated future direct costs of the contract. We currently expect the Idaho contract to perform financially at a break even basis through its initial term. So long as we continue to defer revenue recognition under the contract, we will also continue to defer direct costs associated with the agreement. If our break-even assumptions were to change, we may not be able to continue to defer direct contract costs.

We began to recognize revenue and the related deferred costs associated with our Maine contract in September 2010.

Molina Medicaid Solutions' deferred revenue was $53.1 million at September 30, 2011, and $10.9 million at December 31, 2010, and unamortized deferred contract costs were $52.8 million at September 30, 2011, and $28.4 million at December 31, 2010.

For all new or materially modified revenue arrangements with multiple elements entered into on or after January 1, 2011, we apply the guidance contained in ASU No. 2009-13. For these arrangements, we allocate total arrangement consideration to the elements of the arrangement, which are expected to be DDI, BPO, and training and support services, because this is consistent with the current elements included in our Molina Medicaid Solutions contracts. The arrangement allocation is performed using the relative selling-price method. When determining the selling price of each element, VSOE should first be used, if available. Since VSOE is unavailable under our contracts, we will attempt to use third-party evidence, or TPE, of vendors selling similar services to similarly situated customers on a standalone basis, if available. If TPE is not available, we use our best estimate of the selling price for each element.

We then evaluate whether, at each stage in the life cycle of the contract, we are able to recognize revenue associated with that element. To the extent that our revenue arrangements have provisions that allow our state customers to refuse acceptance of services performed, we are still required to defer revenue recognition until such state customers accept our performance. Once this acceptance is achieved, we immediately recognize the revenue associated with any delivered elements, which differs from our current practice for arrangements entered into prior to January 1, 2011, where the revenue associated with delivered elements is recognized over the final service element of the arrangement because VSOE for the other elements does not exist. As such, we expect that the adoption of ASU No. 2009-13 will result in an overall acceleration of revenue recognition with respect to any multiple-element arrangements entered into on or after January 1, 2011. We have entered into no new or materially modified revenue arrangements with multiple elements since January 1, 2011.

Premium Deficiency Reserve

We assess the profitability of each contract by state for providing medical care services to our members and identify any contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared to anticipated medical care costs, including the cost of processing claims. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. In the first quarter of 2011, our Wisconsin health plan recorded a premium deficiency reserve in the amount of $3.35 million to medical claims and benefits payable. As of September 30, 2011, the reserve balance was zero.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $10.9 million, and $11.0 million as of September 30, 2011 and December 31, 2010, respectively. Approximately $8.4 million of the unrecognized tax benefits recorded at September 30, 2011, relate to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $7.6 million as of September 30, 2011. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $8.8 million due to the expiration of statute of limitations and the resolution to the state refund claim described above.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of September 30, 2011, and December 31, 2010, we had accrued $61,000 and $82,000, respectively, for the payment of interest and penalties.

Recent Accounting Pronouncements

Revenue Recognition. In late 2009, the Financial Accounting Standards Board, or FASB, issued the following accounting guidance relating to revenue recognition. Effective for interim and annual reporting beginning on or after December 15, 2010, we adopted this guidance in full effective January 1, 2011.

- *ASU No. 2009-13, Revenue Recognition (ASC Topic 605) — Multiple-Deliverable Revenue Arrangements*, a consensus of the FASB Emerging Issues Task Force. This guidance modifies previous requirements by requiring the use of the "best estimate of selling price" in the absence of vendor-specific objective evidence ("VSOE") or verifiable objective evidence ("VOE") (now referred to as "TPE" or third-party evidence) for determining the selling price of a deliverable. A vendor is now required to use its best estimate of the selling price when more objective evidence of the selling price cannot be determined. By providing an alternative for determining the selling price of deliverables, this guidance allows companies to allocate arrangement consideration in multiple deliverable arrangements in a manner that better reflects the transaction's economics. In addition, the residual method of allocating arrangement consideration is no longer permitted under this new guidance. We have adopted this guidance effective January 1, 2011, and will apply it on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Because we did not enter into any new or materially modified agreements with multiple elements and fixed payments in the nine months ended September 30, 2011 that would have been impacted by this guidance, the adoption did not have a material impact on the timing or pattern of revenue recognition.

  For the year ended December 31, 2010, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

Goodwill Impairment Testing. The FASB issued the following guidance which modifies goodwill impairment testing.

- *ASU No. 2011-08, Intangibles—Goodwill and Other (ASC Topic 350) — Testing Goodwill for Impairment,* a consensus of the FASB Emerging Issues Task Force. This guidance allows an entity the option to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. Under that option, an entity would no longer be required to calculate the fair value of a reporting unit unless the entity determines, based on the qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. We do not expect the adoption of this guidance to impact our consolidated financial position, results of operations or cash flows. This guidance is effective for interim and annual goodwill impairment tests performed for fiscal years beginning after December 15, 2011.

- *ASU No. 2010-28, Intangibles—Goodwill and Other (ASC Topic 350) — When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts,* a consensus of the FASB Emerging Issues Task Force. This guidance modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The adoption of this guidance did not impact our consolidated financial position, results of operations or cash flows. Effective for interim and annual reporting beginning on or after December 15, 2010, we adopted this guidance in full effective January 1, 2011.

Presentation of Financial Statements. In June 2011, the FASB and International Accounting Standards Board, or IASB, issued the following guidance which modifies how other comprehensive income, or OCI, is reported under U.S. Generally Accepted Accounting Principles, or GAAP, and International Financial Reporting Standards, or IFRS. This guidance is effective for interim and annual reporting beginning on or after December 15, 2011.

- *ASU No. 2011-05, Comprehensive Income (ASC Topic 220) — Presentation of Comprehensive Income,* a consensus of the FASB Emerging Issues Task Force. This guidance eliminates the option to present components of OCI as part of the statement of changes to stockholders' equity. All filers are required to present all non-owner changes in stockholders' equity in a single statement of comprehensive income or in two separate but consecutive statements. We do not expect the adoption of this guidance to impact our consolidated financial position, results of operations or cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, or AICPA, and the Securities and Exchange Commission, or SEC, did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
	(In thousands)			
Shares outstanding at the beginning of the period	46,062	38,717	45,463	38,410
Weighted-average number of shares repurchased	(235)	—	(160)	—
Weighted-average number of shares issued	7	3,460	390	1,357
Denominator for basic earnings per share	45,834	42,177	45,693	39,767
Dilutive effect of employee stock options and stock grants (1)	462	369	641	436
Denominator for diluted earnings per share (2)	46,296	42,546	46,334	40,203

(1) Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three months ended September 30, 2011, and 2010, there were approximately 316,000 and 708,000 antidilutive weighted options, respectively. For the nine months ended September 30, 2011, and 2010, there were approximately 126,000 and 738,000 antidilutive weighted options, respectively. Restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. For the three months ended September 30, 2011 and 2010, there were approximately 57,000 and 9,000 antidilutive weighted restricted shares, respectively. For the nine months ended September 30, 2011 there were no antidilutive restricted shares. For the nine months ended September 30, 2010, there were approximately 9,000 antidilutive restricted shares.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the three month and nine month periods ended September 30, 2011 and 2010.

4. Share-Based Compensation

At September 30, 2011, we had employee equity incentives outstanding under three plans: (1) the 2011 Equity Incentive Plan; (2) the 2002 Equity Incentive Plan; and (3) the 2000 Omnibus Stock and Incentive Plan (from which equity incentives are no longer awarded). On March 1, 2011, our chief executive officer, chief financial officer, and chief operating officer were awarded 150,000 shares, 112,500 shares, and 27,000 shares, respectively, of restricted stock with performance and service conditions. Each of the grants shall vest on March 1, 2012, provided that: (i) the Company's total operating revenue for 2011 is equal to or greater than $3.7 billion, and (ii) the respective officer continues to be employed by the Company as of March 1, 2012. In the event both vesting conditions are not achieved, the equity compensation awards shall lapse. As of September 30, 2011, we expect these awards to vest in full.

Charged to general and administrative expenses, total stock-based compensation expense was as follows for the three month and nine month periods ended September 30, 2011 and 2010:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
	(In thousands)			
Restricted stock awards	$ 4,004	$ 2,367	$ 11,742	$ 6,113
Stock options (including shares issued under our employee stock purchase plan)	345	393	981	1,155
Total stock-based compensation expense	$ 4,349	$ 2,760	$ 12,723	$ 7,268

As of September 30, 2011, there was $17.7 million of total unrecognized compensation expense related to unvested restricted stock awards, which we expect to recognize over a remaining weighted-average period of two years. As of September 30, 2011, there was no remaining unrecognized compensation expense related to unvested stock options.

Unvested restricted stock and restricted stock activity for the nine months ended September 30, 2011 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2010	1,253,624	$ 15.55
Granted	759,300	23.52
Vested	(483,735)	17.39
Forfeited	(69,531)	15.44
Unvested balance as of September 30, 2011	1,459,658	19.09

The total fair value of restricted shares granted during the nine months ended September 30, 2011 and 2010 was $17.9 million and $11.9 million, respectively. The total fair value of restricted shares vested during the nine months ended September 30, 2011 and 2010 was $11.5 million and $6.1 million, respectively.

Stock option activity for the nine months ended September 30, 2011 is summarized below:

	Shares	Weighted Average Grant Date Fair Value	Average Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Stock options outstanding as of December 31, 2010	770,421	$ 20.39		
Exercised	(185,672)	19.23		
Forfeited	(21,700)	21.45		
Stock options outstanding as of September 30, 2011	563,049	20.74	$ 204	4.2
Stock options exercisable and expected to vest as of September 30, 2011	562,965	20.74	$ 204	4.2
Exercisable as of September 30, 2011	560,799	20.73	$ 204	4.2

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For a comprehensive discussion of fair value measurements with regard to our current and non-current investments, see below.

The carrying amount of the convertible senior notes was $168.1 million and $164.0 million as of September 30, 2011, and December 31, 2010, respectively. Based on quoted market prices, the fair value of the convertible senior notes was approximately $179.2 million and $188.4 million as of September 30, 2011, and December 31, 2010, respectively.

To prioritize the inputs we use in measuring fair value, we apply a three-tier fair value hierarchy as follows:

- *Level 1 — Observable inputs such as quoted prices in active markets:* Our Level 1 securities consist of government-sponsored enterprise securities (GSEs) and U.S. treasury notes. Level 1 securities are classified as current investments in the accompanying consolidated balance sheets. These securities are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

- *Level 2 — Inputs other than quoted prices in active markets that are either directly or indirectly observable:* Our Level 2 securities consist of corporate debt securities, municipal securities, and certificates of deposit, and are classified as current investments in the accompanying consolidated balance sheets. Our investments in securities classified as Level 2 are traded frequently though not necessarily daily. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

- *Level 3 — Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions:* We hold investments in auction rate securities which are designated as available-for-sale, and are reported at fair value of $18.1 million (par value of $21.3 million) as of September 30, 2011. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government. We continued to earn interest on substantially all of these auction rate securities as of September 30, 2011. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008. As such, quoted prices in active markets were not readily available during the majority of 2008, 2009, and 2010, and continued to be unavailable as of September 30, 2011. To estimate the fair value of these securities, we used pricing models that included factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. The estimated values of these securities were also compared, when possible, to valuation data with respect to similar securities held by other parties. We concluded that these estimates, given the lack of market available pricing, provided a reasonable basis for determining the fair value of the auction rate securities as of September 30, 2011. For our investments in auction rate securities, we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost.

As a result of changes in the fair value of auction rate securities designated as available-for-sale, we recorded pretax unrealized gains of $0.9 million and pretax unrealized losses of $0.5 million to accumulated other comprehensive income (loss) for the nine months ended September 30, 2011, and 2010, respectively. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income (loss). If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

Until July 2, 2010, we held certain auction rate securities (designated as trading securities) with an investment securities firm. In 2008, we entered into a rights agreement with this firm that (1) allowed us to exercise rights (the "Rights") to sell the eligible auction rate securities at par value to this firm between June 30, 2010 and July 2, 2012, and (2) gave the investment securities firm the right to purchase the auction rate securities from us any time after the agreement date as long as we received the par value. On June 30, 2010, and July 1, 2010, all of the eligible auction rate securities remaining at that time were settled at par value. During 2010, the aggregate auction rate securities (designated as trading securities) settled amounted to $40.9 million par value (fair value $36.7 million). Substantially all of the difference between par value and fair value on these securities was recovered through the rights agreement. For the nine months ended September 30, 2010, we recorded pretax gains of $4.2 million on the auction rate securities underlying the Rights.

We accounted for the Rights as a freestanding financial instrument and, until July 2, 2010, recorded the value of the Rights under the fair value option. For the nine months ended September 30, 2010, we recorded pretax losses of $3.8 million on the Rights, attributable to the decline in the fair value of the Rights. When the remaining eligible auction rate securities were sold at par value on July 1, 2010, the value of the Rights was zero.

Our assets measured at fair value on a recurring basis at September 30, 2011, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 215,875	$ —	$ 215,875	$ —
Government-sponsored enterprise securities (GSEs)	45,224	45,224	—	—
Municipal securities	36,088	—	36,088	—
U.S. treasury notes	24,454	24,454	—	—
Certificates of deposit	3,261	—	3,261	—
Auction rate securities	18,112	—	—	18,112
	$ 343,014	$ 69,678	$ 255,224	$ 18,112

In prior periods we reported our investments in corporate debt securities, municipal securities and certificates of deposit in Level 1. Upon re-evaluation of the inputs used to measure fair value within the fair value hierarchy, we have determined that these investments should be reported in Level 2, and have reclassified the tabular disclosure accordingly.

The following table presents our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3)
	(In thousands)
Balance at December 31, 2010	$ 20,449
Total gains (realized or unrealized):	
Included in other comprehensive income	913
Settlements	(3,250)
Balance at September 30, 2011	$ 18,112
The amount of total gains for the period included in other comprehensive income attributable to the change in unrealized gains relating to assets still held at September 30, 2011	$ 913

In 2010, we recorded a $2.8 million liability for contingent consideration related to the acquisition of our Wisconsin health plan. In the first quarter of 2011, we determined that there was no liability for contingent consideration relating to the acquisition. The liability for contingent consideration related to this acquisition was measured at fair value on a recurring basis using significant unobservable inputs (Level 3). The following table presents a roll forward of this liability for 2011:

	(Level 3)
	(In thousands)
Balance at December 31, 2010	$ (2,800)
Total gains included in earnings	2,800
Balance at September 30, 2011	$ —

6. Investments

The following tables summarize our investments as of the dates indicated:

	September 30, 2011			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 219,955	$ 98	$ 4,178	$ 215,875
GSEs	45,338	44	158	45,224
Municipal securities (including non-current auction rate securities)	57,477	165	3,442	54,200
U.S. treasury notes	24,323	136	5	24,454
Certificates of deposit	3,261	—	—	3,261
	$ 350,354	$ 443	$ 7,783	$ 343,014

	December 31, 2010			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 179,124	$ 193	$ 1,388	$ 177,929
GSEs	59,790	293	370	59,713
Municipal securities (including non-current auction rate securities)	55,247	78	4,313	51,012
U.S. treasury notes	23,864	114	60	23,918
Certificates of deposit	3,252	—	—	3,252
	$ 321,277	$ 678	$ 6,131	$ 315,824

The contractual maturities of our investments as of September 30, 2011 are summarized below:

	Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 159,060	$ 156,445
Due one year through five years	170,494	168,888
Due after ten years	20,800	17,681
	$ 350,354	$ 343,014

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales and maturities of available-for-sale securities were $105.0 million and $52.0 million for the three months ended September 30, 2011, and 2010, respectively. Total proceeds from sales and maturities of available-for-sale securities were $226.4 million and $143.3 million for the nine months ended September 30, 2011, and 2010, respectively. Net realized investment gains for the three months ended September 30, 2011, and 2010 were $153,000 and $21,000 respectively. Net realized investment gains for the nine months ended September 30, 2011, and 2010 were $331,000 and $81,000 respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our municipal securities, we have determined that unrealized gains and losses at September 30, 2011, and December 31, 2010, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

Approximately 33% of our investment in municipal securities consists of auction rate securities. As described in Note 5, "Fair Value Measurements," the unrealized losses on these investments were caused primarily by the illiquidity in the auction markets. Because the decline in market value is not due to the credit quality of the issuers, and because we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost, we do not consider the auction rate securities that are designated as available-for-sale to be other-than-temporarily impaired at September 30, 2011.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of September 30, 2011.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Corporate debt securities	$ 169,582	$ 3,625	$ 17,720	$ 553	$ 187,302	$ 4,178
GSEs	18,522	78	1,167	80	19,689	158
Municipal securities	22,731	188	21,055	3,254	43,786	3,442
U.S. treasury notes	4,705	5	—	—	4,705	5
	$ 215,540	$ 3,896	$ 39,942	$ 3,887	$ 255,482	$ 7,783

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2010.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Corporate debt securities	$ 103,225	$ 1,060	$ 10,490	$ 328	$ 113,715	$ 1,388
GSEs	13,014	71	7,539	299	20,553	370
Municipal securities	18,884	117	25,271	4,196	44,155	4,313
U.S. treasury notes	5,480	40	6,806	20	12,286	60
	$ 140,603	$ 1,288	$ 50,106	$ 4,843	$ 190,709	$ 6,131

7. Receivables

Health Plans segment receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustment. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable were as follows:

	September 30, 2011	December 31, 2010
	(In thousands)	
Health Plans segment:		
California	$ 31,742	$ 46,482
Michigan	11,265	13,596
Missouri	24,025	22,841
New Mexico	9,722	18,310
Ohio	27,901	21,622
Washington	11,766	14,486
Wisconsin	7,777	5,437
Others	7,029	5,187
Total Health Plans segment	131,227	147,961
Molina Medicaid Solutions segment	48,812	20,229
	$ 180,039	$ 168,190

During the second quarter of 2011, we settled certain claims we had made against the state of Utah regarding the savings share provision of our contract in effect from 2003 through June of 2009. Additionally, we recognized a liability for certain overpayments received from the state for the period 2003 through 2009. As a result of these developments, we recognized $6.9 million in premium revenue without any corresponding charge to expense during the second quarter of 2011.

8. Restricted Investments

Pursuant to the regulations governing our Health Plan subsidiaries, we maintain statutory deposits and deposits required by state Medicaid authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of certain capitated providers. The following table presents the balances of restricted investments by health plan, and for our insurance company:

	September 30, 2011	December 31, 2010
	(In thousands)	
California	$ 372	$ 372
Florida	8,196	4,508
Insurance Company	4,672	4,689
Michigan	1,000	1,000
Missouri	505	508
New Mexico	15,902	15,881
Ohio	9,077	9,066
Texas	3,500	3,501
Utah	2,799	1,279
Washington	151	151
Wisconsin	—	260
Other	4,320	885
	$ 50,494	$ 42,100

The contractual maturities of our held-to-maturity restricted investments as of September 30, 2011 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 45,281	$ 45,292
Due one year through five years	5,213	5,266
	$ 50,494	$ 50,558

9. Long-Term Debt

Credit Facility

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility (the "Credit Facility") with various lenders and U.S. Bank National Association, as LC Issuer, Swing Line Lender, and Administrative Agent. The Credit Facility will be used for general corporate purposes.

The Credit Facility has a term of five years under which all amounts outstanding will be due and payable on September 9, 2016. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $195 million. As of September 30, 2011 there was no outstanding principal balance under the Credit Facility. However, as of September 30, 2011, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, which reduces the amount available under the Credit Facility.

Borrowings under the Credit Facility will bear interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility. The initial commitment fee shall be set at 0.35% until our delivery of its financials for the quarter ended September 30, 2011. The applicable margins range between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan).

The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 as of the end of each fiscal quarter and a fixed charge coverage ratio of not less than 1.75 to 1.00. At September 30, 2011, we were in compliance with all financial covenants under the Credit Facility.

In the event of a default, including cross-defaults relating to specified other debt in excess of $20 million, the lenders may terminate the commitments under the Credit Facility and declare the amounts outstanding, including all accrued interest and unpaid fees, payable immediately. In addition, the lenders may enforce any and all rights and remedies created under the Credit Facility or applicable law.

In connection with our entrance into the Credit Facility, on September 9, 2011, we terminated our existing credit agreement with Bank of America, dated March 9, 2005, as amended to date, which had provided us with a $150 million revolving credit facility. As of September 30, 2011 and December 31, 2010, there was no outstanding principal balance under this credit agreement.

Convertible Senior Notes

As of September 30, 2011, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

The proceeds from the issuance of the Notes have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of September 30, 2011, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 36 months. The Notes' if-converted value did not exceed their principal amount as of September 30, 2011. At September 30, 2011, the equity component of the Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	As of September 30, 2011	As of December 31, 2010
	(In thousands)	
Details of the liability component:		
Principal amount	$ 187,000	$ 187,000
Unamortized discount	(18,891)	(22,986)
Net carrying amount	$ 168,109	$ 164,014

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
	(In thousands)			
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate of 3.75%	$ 1,753	$ 1,753	$ 5,259	$ 5,259
Amortization of the discount on the liability component	1,384	1,291	4,095	3,800
Total interest cost recognized	$ 3,137	$ 3,044	$ 9,354	$ 9,059

10. Stockholders' Equity

Securities Repurchase Program. Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see Note 9, "Long-Term Debt"). The repurchase program will be funded with working capital or the Company's credit facility, and repurchases may be made from time to time on the open market or through privately negotiated transactions. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time.

On July 27, 2011, our board of directors approved a stock repurchase program of up to $7 million to be used to purchase shares of our common stock under a Rule 10b5-1 trading plan. Under this program, we purchased approximately 400,000 shares of our common stock for $7 million (average cost of approximately $17.47 per share) during August 2011. These purchases did not materially impact diluted earnings per share for the three months or nine months ended September 30, 2011. Subsequently, we retired the $7.0 million of treasury shares purchased, which reduced additional paid-in capital as of September 30, 2011.

Stock Split. On April 27, 2011, we announced that our board of directors authorized a 3-for-2 stock split of our common stock to be effected in the form of a stock dividend of one share of our stock for every two shares outstanding. The dividend was distributed on May 20, 2011.

Stock Plans. In connection with the plans described in Note 4, "Share-Based Compensation," we issued approximately 627,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the nine months ended September 30, 2011. Stock plan activity resulted in a $15.6 million increase to additional paid-in capital for the same period.

11. Segment Reporting

Our reportable segments are consistent with how we manage the business and view the markets we serve. In the second quarter of 2010, we added a segment to our internal financial reporting structure as a result of the acquisition of Molina Medicaid Solutions. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

Molina Medicaid Solutions was acquired on May 1, 2010; therefore, the nine months ended September 30, 2010 include only five months of operating results for this segment. Operating segment revenues and profitability for the three months and nine months ended September 30, 2011 and 2010 were as follows:

	Health Plans	Molina Medicaid Solutions	Total
		(In thousands)	
Three months ended September 30, 2011			
Premium revenue	$ 1,138,230	$ —	$ 1,138,230

As of December 31, 2010	$ 1,333,599	$ 175,615	$ 1,509,214

12. Commitments and Contingencies

Legal

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. These actions, when finally concluded and determined, are not likely, in our opinion, to have a material adverse effect on our business, consolidated financial position, cash flows, or results of operations.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $456.2 million at September 30, 2011, and $397.8 million at December 31, 2010.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of September 30, 2011, our health plans had aggregate statutory capital and surplus of approximately $463.1 million compared with the required minimum aggregate statutory capital and surplus of approximately $273.9 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2011. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

13. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of September 30, 2011, and December 31, 2010, our carrying amount for this investment amounted to $3.9 million, and $3.8 million, respectively. For the three months ended September 30, 2011 and 2010, we paid $5.0 million, and $6.0 million, respectively, for medical service fees to this provider. For the nine months ended September 30, 2011 and 2010, we paid $16.8 million, and $15.7 million, respectively, for medical service fees to this provider.

14. Subsequent Events

Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see Note 9, “Long-Term Debt”). The repurchase program will be funded with working capital or the Company’s credit facility, and repurchases may be made from time to time on the open market or through privately negotiated transactions. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time.

Item 2. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbour provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbour provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- significant budget pressures on state governments which cause them to lower rates unexpectedly or to rescind expected rates increases, or their failure to maintain existing benefit packages or membership eligibility thresholds or criteria;
- uncertainties regarding the impact of the Patient Protection and Affordable Care Act, including its possible repeal, judicial overturning of the individual insurance mandate or Medicaid expansion, the effect of various implementing regulations, and uncertainties regarding the impact of other federal or state health care and insurance reform measures;
- management of our medical costs, including costs associated with unexpectedly severe or widespread illnesses such as influenza, and rates of utilization that are consistent with our expectations;
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states (including in Washington, Ohio, and Missouri), and our ability to grow our revenues consistent with our expectations;
- the accurate estimation of incurred but not reported medical costs across our health plans;
- risks associated with the continued growth in new Medicaid and Medicare enrollees;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including the California rate cut expected to be retroactive to July 1, 2011, and Medicaid pharmaceutical rebates;
- the continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- the timing of receipt and recognition of revenue and the amortization of expense under the state contracts of Molina Medicaid Solutions in Maine and Idaho;

- reductions to revenue, additional administrative costs and the potential payment of additional amounts to providers and/or the state by Molina Medicaid Solutions as a result of MMIS implementation issues in Maine and/or Idaho;
- government audits and reviews, including the audit of our Medicare plans by the Centers for Medicare and Medicaid Services, or CMS;
- changes with respect to our provider contracts and the loss of providers;
- the establishment, interpretation, and implementation of a federal or state medical cost expenditure floor as a percentage of the premiums we receive, administrative cost and profit ceilings, and profit sharing arrangements;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures;
- the successful integration of our acquisitions;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation, arbitration, or administrative proceedings, and the costs associated therewith;
- restrictions and covenants in our credit facility;
- the relatively small number of states in which we operate health plans;
- the availability of financing to fund and capitalize our acquisitions and start-up activities and to meet our liquidity needs and the costs and fees associated therewith;
- a state's failure to renew its federal Medicaid waiver;
- an inadvertent unauthorized disclosure of protected health information by us or our business associates;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- changes in general economic conditions, including unemployment rates.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2010, as updated in Part II, Item 1A—Risk Factors, in our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2011 and in Part II, Item 1A—Risk Factors, of this report for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2010.

Adjustments

We have adjusted all applicable share and per-share amounts to reflect the retroactive effects of the three-for-two stock split in the form of a stock dividend that was effective May 20, 2011.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. Our business comprises our Health Plans segment, consisting of licensed health maintenance organizations serving Medicaid populations in ten states, and our Molina Medicaid Solutions segment, which provides design, development, implementation, and business process outsourcing solutions to Medicaid agencies in an additional five states. We also have a direct delivery business that currently consists of primary care community clinics in California and Washington; additionally, we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

We report our financial performance based on the following two reportable segments: Health Plans; and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. This segment served approximately 1.7 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals as of September 30, 2011. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

On May 1, 2010, we acquired a health information management business which we now operate under the name, *Molina Medicaid Solutions*SM. Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the nine months ended September 30, 2011, we received approximately 94% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with the Centers for Medicare and Medicaid Services, or CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the nine months ended September 30, 2011, we received approximately 6% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children's Health Insurance Program, or CHIP, members are generally among our lowest, with rates as low as approximately $75 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the Temporary Assistance for Needy Families, or TANF, Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $110 in California to $250 in Missouri. Among our Medicaid Aged, Blind or Disabled, or ABD, membership, PMPM premiums range from approximately $325 in Utah to $1,000 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, inpatient, behavioral health and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums, at approximately $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	September 30, 2011	June 30, 2011	December 31, 2010	September 30, 2010
Total Ending Membership by Health Plan:				
California	350,000	348,000	344,000	349,000
Florida	67,000	66,000	61,000	57,000
Michigan	217,000	220,000	227,000	225,000
Missouri	78,000	80,000	81,000	79,000
New Mexico	89,000	89,000	91,000	91,000
Ohio	256,000	245,000	245,000	241,000
Texas	148,000	129,000	94,000	96,000
Utah	82,000	82,000	79,000	78,000
Washington	350,000	345,000	355,000	353,000
Wisconsin (1)	41,000	41,000	36,000	28,000
Total	1,678,000	1,645,000	1,613,000	1,597,000
Total Ending Membership by State for our Medicare Advantage Plans (1):				
California	6,500	6,000	4,900	4,300
Florida	700	600	500	500
Michigan	7,600	7,100	6,300	5,700
New Mexico	800	700	600	600
Ohio	100	200	—	—
Texas	600	600	700	600
Utah	7,400	7,000	8,900	8,600
Washington	4,500	4,000	2,600	2,300
Total	28,200	26,200	24,500	22,600
Total Ending Membership by State for our Aged, Blind or Disabled Population:				
California	23,700	17,000	13,900	13,500
Florida	10,400	10,300	10,000	9,500
Michigan	31,600	31,600	31,700	31,400
New Mexico	5,600	5,600	5,700	5,700
Ohio	29,900	28,700	28,200	27,900
Texas	61,800	52,000	19,000	18,900
Utah	8,300	8,300	8,000	7,900
Washington	4,700	4,400	4,000	3,700
Wisconsin (1)	1,700	1,700	1,700	1,700
Total	177,700	159,600	122,200	120,200

(1) We acquired the Wisconsin health plan on September 1, 2010. As of September 30, 2011, the Wisconsin health plan had approximately 2,200 Medicare Advantage members covered under a reinsurance contract with a third party; these members are not included in the membership tables herein.

Molina Medicaid Solutions Segment

Molina Medicaid Solutions' MMIS contracts extend over a number of years, and cover the life of the MMIS from inception through at least the first five years of its operation. The contracts are subject to extension by the exercise of an option, and also by renewal of the base contract. The contracts have a life cycle beginning with the design, development, and implementation of the MMIS and continuing through the operation of the system. Payment during the design, development, and implementation phase of the contract, or the DDI phase, is generally based upon the attainment of specific milestones in systems development as agreed upon ahead of time by the parties. Payment during the operations phase typically takes the form of either a flat monthly fee or payment for specific measures of capacity or activity, such as the number of claims processed, or the number of Medicaid beneficiaries served by the MMIS. Contracts may also call for the adjustment of amounts paid if certain activity measures exceed or fall below certain thresholds. In some circumstances, revenue recognition may be delayed for long periods while we await formal customer acceptance of our products and/or services. In those circumstances, recognition of a portion of our costs may be deferred.

Under our contracts in Louisiana, New Jersey, and West Virginia, we provide primarily business process outsourcing and technology outsourcing services, because the development of the MMIS solution has been completed. Under these contracts, we recognize outsourcing service revenue as earned. In Maine we completed the DDI phase of our contract effective September 1, 2010 and are recognizing DDI revenue on a straight line basis over the remaining term of the contract. In Idaho, we expect to complete the DDI phase of our contract in 2011. We began revenue and cost recognition for our Maine contract in September 2010, and expect to begin revenue and cost recognition for our Idaho contract in the second half of 2012.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service* — Expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.
- *Capitation* — Expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- *Pharmacy* — Expenses for all drug, injectible, and immunization costs paid through our pharmacy benefit manager.
- *Other* — Expenses for medically related administrative costs of approximately $76.3 million, and $61.9 million, for the nine months ended September 30, 2011 and 2010, respectively, including certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Policies" below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our contracts in Idaho, Louisiana, Maine, New Jersey, West Virginia, and Florida. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period. We began to recognize deferred contract costs for our Maine contract in September 2010, at the same time we began to recognize revenue associated with that contract. In Idaho, we expect to begin recognition of deferred contract costs in the second half of 2012, in a manner consistent with our anticipated recognition of revenue.

Third Quarter Performance Summary

The following table and narrative briefly summarizes our financial and operating performance for the three and nine months ended September 30, 2011. Comparable metrics for the third quarter of 2010 are also shown. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are computed as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
	(Dollar amounts in thousands, except per share data)			
Earnings per diluted share	$ 0.41	$ 0.38	$ 1.16	$ 0.93
Premium revenue	$ 1,138,230	$ 1,005,115	$ 3,348,438	$ 2,947,020
Service revenue	$ 37,728	$ 32,271	$ 111,290	$ 53,325
Operating income	$ 33,566	$ 29,953	$ 96,276	$ 71,569
Net income	$ 18,950	$ 16,173	$ 53,778	$ 37,342
Total ending membership	1,678,000	1,597,000	1,678,000	1,597,000
Premium revenue	96.7%	96.7%	96.7%	98.1%
Service revenue	3.2	3.1	3.2	1.8
Investment income	0.1	0.2	0.1	0.1
Total revenue	100.0%	100.0%	100.0%	100.0%
Medical care ratio	84.3%	84.2%	84.3%	85.1%
General and administrative expense ratio	8.5%	8.5%	8.4%	8.2%
Premium tax ratio	3.2%	3.5%	3.3%	3.5%
Operating income	2.9%	2.9%	2.8%	2.4%
Net income	1.6%	1.6%	1.6%	1.2%
Effective tax rate	35.1%	36.2%	36.4%	37.3%

Compared with the third quarter of 2010, our third quarter of 2011 was marked by improved performance of our Health Plans segment due to a 13% increase in premium revenue, partially offset by a decrease in the profitability of our Molina Medicaid Solutions segment. Earnings per share in the third quarter of 2011 were up 8% over the third quarter of 2010, operating income was up 12%, and membership on a member-month basis grew by 8%. Our larger and more established health plans performed the strongest in the quarter, with each of Michigan, Ohio, and Utah having lower medical care ratios compared with the third quarter of 2010. Medicare enrollment exceeded 28,000 members at September 30, 2011, and Medicare premium revenue for the quarter was $101.5 million compared with $70.7 million in the third quarter of 2010.

Improved performance of our health plans segment, partially offset by a decrease in the profitability of our Molina Medicaid Solution segment, also led to improved performance for the nine months ended September 30, 2011 compared with the nine months ended September 30, 2010. Earnings per share in the nine months ended September 30, 2011 were up 25% over the comparable period in 2010, premium revenues were up 14%, operating income was up 35%, and membership on a member-month basis grew by 10%. Medicare premium revenue for the nine months ended September 30, 2011 was $282.3 million compared with $188.6 million for the nine months ended September 30, 2010.

In October 2011, our Missouri health plan received a “Commendable” rating from the National Committee for Quality Assurance, or NCQA. Nine of our ten health plans have now been accredited by NCQA, and our Wisconsin health plan will be seeking accreditation in the future.

Our Florida, Texas and Wisconsin health plans continue to face challenges. We have undertaken a number of measures—focused on both utilization and unit cost reductions—to improve the profitability of these health plans. All three health plans reported lower medical care ratios in the third quarter of 2011 than in the second quarter of 2011; and Florida and Wisconsin reported lower medical care ratios in the third quarter of 2011 than in the third quarter of 2010. The medical care ratio of the California health plan declined sequentially, as a result of an estimated 6% rate reduction that will be retroactive to July 1, 2011. The amount reserved for the estimated rate reduction was approximately $7.5 million.

We remain concerned about state budget deficits, which are not expected to improve during the remainder of 2011. Accordingly, the rate environment for our health plans remains uncertain, and we have received several rate reductions effective to date in 2011, including a blended 6% reduction in California retroactive to July 1, 2011, a 2.5% reduction in New Mexico effective July 1, 2011, a 2% reduction in Utah effective July 1, 2011, and a 2% rate reduction in Texas effective September 1, 2011. For the remainder of 2011, we anticipate a 1% reduction in California effective October 1, 2011. However, we have also received notifications of rate increases, including a 5% blended rate increase at our Missouri health plan effective July 1, 2011, a 7.5% rate increase at our Florida plan effective September 1, 2011, and a 1% rate increase at our Michigan plan effective October 1, 2011.

With respect to our Molina Medicaid Solutions business, our system stabilization efforts in Idaho and Maine are taking longer and are more costly than we had anticipated. However, our profit margins in our fiscal agent contracts in New Jersey, Louisiana, and West Virginia remain stable, and we believe that the profitability of the Molina Medicaid Solutions segment will improve as system development and stabilization costs in Idaho and Maine decline.

The state of Idaho has sent their formal request for system certification to CMS, and we anticipate certification review late in 2011 or early 2012, with formal certification in the second half of 2012. The certification process for our MMIS in Maine is also currently underway.

Results of Operations

Three Months Ended September 30, 2011 Compared with the Three Months Ended September 30, 2010

Health Plans Segment

Premium Revenue

In the three months ended September 30, 2011, compared with the three months ended September 30, 2010, premium revenue grew 13% due to a membership increase of approximately 8% (on a member-month basis), and PMPM revenue increase of approximately 5%. Medicare premium revenue was $101.5 million for the three months ended September 30, 2011, compared with $70.7 million for the three months ended September 30, 2010. In addition to the $7.5 million reduction to revenue in the third quarter of 2011 for the estimated premium reduction in California, we reduced revenue by $5.9 million in the third quarter of 2011 due to a minimum medical cost floor in New Mexico and a profit cap in Texas. In the third quarter of 2010 we reduced certain accruals for these items, resulting in an increase to revenue of $2.9 million.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended September 30,					
	2011			2010		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$ 698,995	$ 140.55	72.9%	$ 601,836	$ 130.60	71.1%
Capitation	129,315	26.00	13.5	136,425	29.61	16.1
Pharmacy	89,191	17.93	9.3	76,049	16.50	9.0
Other	41,657	8.39	4.3	31,627	6.87	3.8
Total	$ 959,158	$ 192.87	100.0%	$ 845,937	$ 183.58	100.0%

The ratio of medical care costs to premium revenue (the medical care ratio, or MCR) was essentially flat, increasing to 84.3% in the three months ended September 30, 2011, compared with 84.2% for the three months ended September 30, 2010. Total medical care costs increased approximately 5% PMPM.

- Fee-for-service and capitation costs combined increased approximately 4%. Excluding the disproportionate impact of the Texas health plan, where we have experienced high utilization and unit costs for both physician and outpatient services (which include personal care services), fee-for-service costs were flat PMPM.
- Capitation costs decreased approximately 12% PMPM, primarily due to the transition of members in Michigan and Washington into fee-for-service networks.
- Fee-for-service costs increased approximately 8% PMPM, partially due to the transition of members from capitated provider networks into fee-for-service networks.
- Pharmacy costs increased approximately 9% PMPM.
- Hospital utilization decreased approximately 7%.

The medical care ratio of the California health plan increased to 88.8% in the three months ended September 30, 2011, from 80.3% in the three months ended September 30, 2010. The California health plan reduced premium revenue by approximately $7.5 million in the third quarter of 2011 for premium reductions estimated to be retroactive to July 1, 2011. The California Department of Health Care Services has indicated that it will reduce certain provider payments by approximately 10% retroactive to July 1, 2011. We believe that this reduction to provider payments will translate into a premium reduction of approximately 6% for the California health plan. At September 30, 2011 the California health plan had not recorded any potential recovery of provider payments related to this estimated premium reduction. Also in the third quarter of 2011, the California health plan added approximately 7,000 new ABD members with an average premium revenue of approximately $450 PMPM.

The medical care ratio of the Florida health plan decreased to 89.2% in the three months ended September 30, 2011, from 97.2% in the three months ended September 30, 2010, primarily due to initiatives implemented to reduce pharmacy and behavioral health costs. The Florida health plan received a premium rate increase of approximately 7.5% effective September 1, 2011.

The medical care ratio of the Michigan health plan decreased to 82.0% in the three months ended September 30, 2011, from 85.7% in the three months ended September 30, 2010, primarily due to improved Medicare performance and lower capitation and physician/outpatient costs combined. The Michigan health plan received a premium rate increase of approximately 1% effective October 1, 2011.

The medical care ratio of the Missouri health plan decreased to 78.1% in the three months ended September 30, 2011, from 86.7% in the three months ended September 30, 2010. Medical costs were flat compared to the prior period, while the health plan received a premium rate increase of approximately 5% effective July 1, 2011.

The medical care ratio of the New Mexico health plan increased to 84.2% in the three months ended September 30, 2011, from 83.5% in the three months ended September 30, 2010. The New Mexico health plan received a premium rate reduction of approximately 2.5% effective July 1, 2011. Premium revenues were further reduced due to a 1% increase in the minimum contractual amount the plan is required to spend on medical costs effective July 1, 2011. As a result of a minimum medical cost floor in our contract with the state of New Mexico, we reduced premium revenue by $4.4 million in the third quarter of 2011. In the third quarter of 2010, we reduced the accrual for the minimum medical cost floor, resulting in the recognition of an additional $2.8 million of revenue.

The medical care ratio of the Ohio health plan decreased to 78.4% in the three months ended September 30, 2011, from 81.2% in the three months ended September 30, 2010, due to an increase in Medicaid premium PMPM of approximately 4.5% effective January 1, 2011, while fee for service costs have increased by only 2.0%.

The medical care ratio of the Texas health plan increased to 93.7% in the three months ended September 30, 2011, from 89.5% in the three months ended September 30, 2010. Effective September 1, 2011, the Texas health plan added approximately 8,000 ABD members and 3,000 TANF members in the Jefferson service area, and effective September 1, 2010, we added approximately 54,000 members state-wide who are covered under the Children's Health Insurance Program, or CHIP. Costs associated with ABD contracts, particularly in the Dallas-Fort Worth region, are running substantially higher than in our other markets, due to both high utilization and high unit costs. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Texas health plan. The medical care ratio of the Texas health plan fell from 95.0% in the second quarter of 2011 to 93.7% in the third quarter of 2011. Profitability of the CHIP line of business was proportionally higher in Texas, leading to a $1.5 million reduction of revenue as a result of a profit cap in our contract with the state of Texas. That profit cap is applied on a product by product basis. In the third quarter of 2010, we reduced the accrual for the profit cap, resulting in the recognition of an additional $0.1 million of revenue. The Texas health plan received a premium rate reduction of approximately 2% effective September 1, 2011.

The medical care ratio of the Utah health plan decreased to 79.3% in the three months ended September 30, 2011, from 84.9% in the three months ended September 30, 2010, primarily due to a reduction in inpatient utilization and a shift in member mix. The Utah health plan received a premium rate reduction of approximately 2% effective July 1, 2011.

The medical care ratio of the Washington health plan increased to 82.8% in the three months ended September 30, 2011, from 79.4% in the three months ended September 30, 2010. Higher fee-for-service and pharmacy costs more than offset lower capitation costs. The Washington health plan received a premium rate reduction of approximately 1% effective October 1, 2011.

The medical care ratio of the Wisconsin health plan (acquired September 1, 2010) was 79.1% in the three months ended September 30, 2011. The Wisconsin health plan recorded a premium deficiency reserve of $3.35 million in the first quarter of 2011. Based on improvements in the health plan's earnings forecast through the end of the contract period, this reserve was relieved during the second and third quarters. Absent the premium deficiency reduction, the Wisconsin plan's medical care ratio would have been approximately 88.1% in the three months ended September 30, 2011. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Wisconsin health plan.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended September 30, 2011						
	Member Months(1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	1,049	$ 144,888	$ 138.11	$ 128,596	$ 122.58	88.8%	$ 1,114
Florida	199	51,569	258.96	46,009	231.04	89.2	(17)
Michigan	656	165,636	252.46	135,899	207.13	82.0	9,644
Missouri	234	58,196	248.80	45,428	194.22	78.1	—
New Mexico	267	79,644	297.82	67,043	250.70	84.2	2,084
Ohio	745	232,616	312.55	182,363	245.02	78.4	18,072
Texas	414	105,577	255.25	98,954	239.24	93.7	1,613
Utah	243	69,763	286.47	55,293	227.05	79.3	—
Washington	1,043	211,131	202.49	174,912	167.76	82.8	3,776
Wisconsin(2)	123	17,269	139.95	13,656	110.67	79.1	—
Other(3)	—	1,941	—	11,005	—	—	88
	4,973	$1,138,230	$ 228.88	$ 959,158	$ 192.87	84.3%	$ 36,374

	Three Months Ended September 30, 2010						
	Member Months(1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	1,046	$ 128,350	$ 122.75	$ 103,002	$ 98.51	80.3%	$ 1,888
Florida	169	43,485	256.25	42,258	249.02	97.2	(14)
Michigan	675	156,609	232.05	134,238	198.90	85.7	9,655
Missouri	236	52,952	224.63	45,930	194.84	86.7	—
New Mexico	274	93,602	341.38	78,121	284.92	83.5	2,170
Ohio	715	210,651	294.55	171,051	239.18	81.2	16,734
Texas	180	48,188	267.95	43,129	239.82	89.5	861
Utah	234	67,566	289.28	57,381	245.67	84.9	—
Washington	1,051	195,578	186.03	155,307	147.73	79.4	3,622
Wisconsin(2)	28	6,310	224.18	6,154	218.65	97.5	—
Other(3)	—	1,824	—	9,366	—	—	121
	4,608	$1,005,115	$ 218.12	$ 845,937	$ 183.58	84.2%	$ 35,037

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) We acquired the Wisconsin health plan on September 1, 2010.

(3) "Other" medical care costs also include medically related administrative costs at the parent company.

Days in Medical Claims and Benefits Payable

The days in medical claims and benefits payable were as follows:

(Dollars in thousands)	Sept. 30, 2011	June 30, 2011	Dec. 31, 2010	Sept. 30, 2010
Days in claims payable — fee-for-service only	39 days	39 days	42 days	42 days
Number of claims in inventory at end of period	132,200	121,900	143,600	110,200
Billed charges of claims in inventory at end of period (dollars in thousands)	$ 187,000	$ 205,800	$ 218,900	$ 158,900

Molina Medicaid Solutions Segment

Molina Medicaid Solutions was acquired on May 1, 2010. Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended September 30,	
	2011	2010
	(In thousands)	
Service revenue before amortization	$ 39,273	$ 34,926
Amortization recorded as reduction of service revenue	(1,545)	(2,655)
Service revenue	37,728	32,271
Cost of service revenue	34,584	27,605
General and administrative costs	2,069	2,195
Amortization of customer relationship intangibles recorded as amortization	1,282	1,314
Operating (loss) income	$ (207)	$ 1,157

We are currently deferring recognition of all revenue as well as all direct costs (to the extent that such costs are estimated to be recoverable) in Idaho until the Medicaid Management Information System, or MMIS, in that state receives certification from the Centers for Medicare and Medicaid Services, or CMS. Cost of service revenue includes $2.5 million of direct costs associated with the Idaho contract that would otherwise have been recorded as deferred contract costs. We were not able to defer these direct contract costs because estimated future net revenues as of each measurement date did not exceed estimated future direct costs of the contract. We currently expect the Idaho contract to perform financially at a break even basis through its initial term. So long as we continue to defer revenue recognition under the contract, we will also continue to defer direct costs associated with the agreement. If our break-even assumptions were to change, we may not be able to continue to defer direct contract costs.

Financial results remain strong under our Louisiana, New Jersey, and West Virginia MMIS contracts. Based upon our cost experience, we believe that the contract pricing agreed to by our predecessor under the Idaho and Maine MMIS contracts was inappropriately low. However, we believe that the profitability of the Molina Medicaid Solutions segment will improve as system development and stabilization costs in those two states decline.

Consolidated Expenses

General and Administrative Expenses

General and administrative, or G&A, expenses, were $99.6 million, or 8.5% of total revenue, for the three months ended September 30, 2011, compared with $88.7 million, or 8.5% of total revenue, for the three months ended September 30, 2010.

Premium Tax Expenses

Premium tax expense decreased to 3.2% of premium revenue in the three months ended September 30, 2011, from 3.5% in the three months ended September 30, 2010, due to a shift in revenue to states with comparatively low premium tax rates.

Interest Expense

Interest expense decreased to $4.4 million for the three months ended September 30, 2011, from $4.6 million for the three months ended September 30, 2010. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $1.4 million and $1.3 million for the three months ended September 30, 2011, and 2010, respectively.

Income Taxes

Income tax expense is recorded at an effective rate of 35.1% for the three months ended September 30, 2011 compared with 36.2% for the three months ended September 30, 2010. The lower rate in 2011 is primarily due to differences in the amount of discrete tax benefits recorded during the respective periods.

Nine Months Ended September 30, 2011 Compared with the Nine Months Ended September 30, 2010

Health Plans Segment

Premium Revenue

In the nine months ended September 30, 2011, compared with the nine months ended September 30, 2010, premium revenue grew 14% due to a membership increase of approximately 10% (on a member-month basis), and PMPM revenue increase of approximately 4%. Medicare premium revenue was $282.3 million for the nine months ended September 30, 2011, compared with $188.6 million for the nine months ended September 30, 2010. Reductions to revenue due to a minimum medical cost floor in New Mexico and a profit cap in Texas amounted to $12.2 million for the nine months ended September 30, 2011. For the nine months ended September 30, 2010 we reduced certain accruals for these items, resulting in an increase to revenue of $0.1 million.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Nine Months Ended September 30,					
	2011			2010		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$2,050,430	$ 138.40	72.7%	$1,763,675	$ 130.55	70.3%
Capitation	383,955	25.92	13.6	410,321	30.37	16.4
Pharmacy	268,637	18.13	9.5	241,290	17.86	9.6
Other	119,027	8.03	4.2	93,080	6.89	3.7
Total	$2,822,049	$ 190.48	100.0%	$2,508,366	$ 185.67	100.0%

The medical care ratio decreased to 84.3% in the nine months ended September 30, 2011, compared with 85.1% for the nine months ended September 30, 2010. Total medical care costs increased less than 3% PMPM.

- Pharmacy costs (adjusted for the state's retention of the pharmacy benefit in Ohio effective February 1, 2010) increased approximately 6% PMPM.
- Capitation costs decreased approximately 15% PMPM, primarily due to the transition of members in Michigan and Washington into fee-for-service networks.
- Fee-for-service costs increased approximately 6% PMPM, partially due to the transition of members from capitated provider networks into fee-for-service networks.
- Fee-for-service and capitation costs combined increased approximately 2% PMPM.
- Hospital utilization decreased approximately 7%.

The medical care ratio of the California health plan increased to 85.9% in the nine months ended September 30, 2011, from 84.0% in the nine months ended September 30, 2010. As noted above in "Three Months Ended September 30, 2011 Compared with the Three Months Ended September 30, 2010," the California health plan reduced premium revenue by approximately $7.5 million in the third quarter of 2011 for premium reductions estimated to be retroactive to July 1, 2011.

The medical care ratio of the Florida health plan increased to 94.2% in the nine months ended September 30, 2011, from 93.6% in the nine months ended September 30, 2010, primarily due to higher fee-for-service and capitation costs, which more than offset lower pharmacy and behavioral health costs. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Florida health plan. As noted above in "Three Months Ended September 30, 2011 Compared with the Three Months Ended September 30, 2010," profitability of the Florida health plan improved significantly in the third quarter of 2011.

The medical care ratio of the Michigan health plan decreased to 80.6% in the nine months ended September 30, 2011, from 84.4% in the nine months ended September 30, 2010, primarily due to improved Medicare performance, lower inpatient facility costs, and lower capitation and physician/outpatient costs combined.

The medical care ratio of the Missouri health plan increased to 87.1% in the nine months ended September 30, 2011, from 86.5% in the nine months ended September 30, 2010. The Missouri health plan received a premium rate increase of approximately 5% effective July 1, 2011. As noted above in "Three Months Ended September 30, 2011 Compared with the Three Months Ended September 30, 2010," profitability of the Missouri health plan improved significantly in the third quarter of 2011.

The medical care ratio of the New Mexico health plan increased to 83.5% in the nine months ended September 30, 2011, from 80.2% in the nine months ended September 30, 2010. The New Mexico health plan received a premium rate reduction of approximately 2.5% effective July 1, 2011. Additionally premium revenues were reduced due to a 1% increase in the minimum contractual amount the plan is required to spend on medical costs effective July 1, 2011. As a result of a minimum medical cost floor in our contract with the state of New Mexico, we reduced premium revenue by $10.9 million in the nine months ended September 30, 2011. The minimum medical cost floor had no impact on premium revenue in the nine months ended September 30, 2010.

The medical care ratio of the Ohio health plan decreased to 76.9% in the nine months ended September 30, 2011, from 80.7% in the nine months ended September 30, 2010, due to an increase in Medicaid premium PMPM of approximately 4.5% effective January 1, 2011, and modestly lower fee-for-service costs.

The medical care ratio of the Texas health plan increased to 93.4% in the nine months ended September 30, 2011, from 87.6% in the nine months ended September 30, 2010. Effective February 1, 2011, we added approximately 30,000 ABD members in the Dallas-Fort Worth area and effective September 1, 2011, we added approximately 8,000 ABD members and 3,000 TANF members in the Jefferson Service area, and effective September 1, 2010, we added approximately 54,000 members state-wide who are covered under CHIP. Costs associated with our ABD contracts, particularly in the Dallas-Fort Worth region, are running substantially higher than in our other markets, due to both high utilization and high unit costs. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Texas health plan. As a result of a profit cap in our contract with the state of Texas, we reduced premium revenue by $1.3 million in the nine months ended September 30, 2011. In the nine months ended September 30, 2010, we reduced the accrual for the profit cap, resulting in the recognition of an additional $0.1 million of revenue.

The medical care ratio of the Utah health plan decreased to 77.9% in the nine months ended September 30, 2011, from 94.1% in the nine months ended September 30, 2010, primarily due to reduced fee-for-service outpatient and physician costs and an increase in Medicaid premium PMPM of approximately 7% effective July 1, 2010. Lower fee-for-service costs were the result of both lower unit costs and lower utilization. During the second quarter of 2011 we settled certain claims with the state regarding the savings share provision of our contract in effect from 2003 through June of 2009. We settled for the contract years 2006 through 2009 and recognized $6.9 million in premium revenue without any corresponding charge to expense. The Utah health plan received a premium rate reduction of approximately 2% effective July 1, 2011.

The medical care ratio of the Washington health plan increased to 84.7% in the nine months ended September 30, 2011, from 84.2% in the nine months ended September 30, 2010. Higher fee-for-service and pharmacy costs more than offset lower capitation costs.

The medical care ratio of the Wisconsin health plan (acquired September 1, 2010) was 92.1% in the nine months ended September 30, 2011. The state of Wisconsin reduced capitation rates by 11% on January 1, 2011. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Wisconsin health plan.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Nine Months Ended September 30, 2011						
	Member Months(1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	3,133	$ 418,961	$ 133.71	$ 359,844	$ 114.84	85.9%	$ 4,937

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) We acquired the Wisconsin health plan on September 1, 2010.

(3) "Other" medical care costs also include medically related administrative costs of the parent company.

Molina Medicaid Solutions Segment

Molina Medicaid Solutions was acquired on May 1, 2010; therefore, the nine months ended September 30, 2010 include only five months of operating results for this segment. Performance of the Molina Medicaid Solutions segment was as follows:

	Nine Months Ended September 30, 2011	Five Months Ended September 30, 2010
	(In thousands)	
Service revenue before amortization	$ 116,567	$ 57,571
Amortization recorded as reduction of service revenue	(5,277)	(4,246)
Service revenue	111,290	53,325
Cost of service revenue	105,020	41,859
General and administrative costs	6,421	3,161
Amortization of customer relationship intangibles recorded as amortization	3,846	2,143
Operating (loss) income	$ (3,997)	$ 6,162

Cost of service revenue for the nine months ended September 30, 2011 includes $9.5 million of direct costs associated with the Idaho contract that would otherwise have been recorded as deferred contract costs, for the same reasons discussed above, in "Three Months Ended September 30, 2011 Compared with the Three Months Ended September 30, 2010."

Consolidated Expenses and Other

General and Administrative Expenses

General and administrative expenses were $291.0 million, or 8.4% of total revenue, for the nine months ended September 30, 2011, compared with $245.6 million, or 8.2% of total revenue, for the nine months ended September 30, 2010.

Premium Tax Expense

Premium tax expense decreased to 3.3% of premium revenue, in the nine months ended September 30, 2011, from 3.5% in the nine months ended September 30, 2010, due to a shift in revenue to states with comparatively low premium tax rates.

Interest Expense

Interest expense decreased to $11.7 million for the nine months ended September 30, 2011, from $12.1 million for the nine months ended September 30, 2010. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $4.1 million and $3.8 million for the nine months ended September 30, 2011 and 2010, respectively.

Income Taxes

Income tax expense is recorded at an effective rate of 36.4% for the nine months ended September 30, 2011, compared with 37.3% for the nine months ended September 30, 2010. The lower rate in 2011 is primarily due to discrete tax benefits recognized for statute closures and prior year tax return to provision reconciliations. Excluding the discrete tax benefits, the effective tax rate for the nine months ended September 30, 2011 was 37.3%.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and Amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service Revenue;" and
- Depreciation is recorded within the heading "Cost of Service Revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Three Months Ended September 30,			
	2011		2010	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation	$ 8,234	0.7%	$ 6,840	0.6%
Amortization of intangible assets	5,196	0.4	5,114	0.5
Depreciation and amortization reported as such in the consolidated statements of income	13,430	1.1	11,954	1.1
Amortization recorded as reduction of service revenue	1,545	0.1	2,655	0.3
Depreciation recorded as cost of service revenue	2,837	0.2	1,964	0.2
Total	$ 17,812	1.4%	$ 16,573	1.6%

	Nine Months Ended September 30,			
	2011		2010	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation	$ 22,859	0.7%	$ 19,963	0.7%
Amortization of intangible assets	15,728	0.5	13,271	0.4
Depreciation and amortization reported as such in the consolidated statements of income	38,587	1.2	33,234	1.1
Amortization recorded as reduction of service revenue	5,277	0.1	4,246	0.1
Depreciation recorded as cost of service revenue	8,550	0.2	3,005	0.1
Total	$ 52,414	1.5%	$ 40,485	1.3%

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue and investment income. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of September 30, 2011, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income decreased to $3.8 million for the nine months ended September 30, 2011, compared with $4.9 million for the nine months ended September 30, 2010. Our annualized portfolio yield for the nine months ended September 30, 2011 was 0.6% compared with 0.8% for the nine months ended September 30, 2010.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash provided by operating activities for the nine months ended September 30, 2011 was $155.2 million compared with $9.5 million for the nine months ended September 30, 2010, an increase of $145.7 million. Deferred revenue, which was a source of operating cash amounting to $42.6 million in 2011, was a use of operating cash amounting to $64.3 million in 2010.

Cash provided by financing activities decreased due to $111.2 million net proceeds from our common stock offering in the third quarter of 2010, with no comparable activity in the current year.

Reconciliation of Non-GAAP [1] to GAAP Financial Measures

EBITDA [2]

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
	(In thousands)			
Net income	$ 18,950	$ 16,173	$ 53,778	$ 37,342
Add back:				
Depreciation and amortization reported in the consolidated statements of cash flows	17,812	16,573	52,414	40,485
Interest expense	4,380	4,600	11,666	12,056
Provision for income taxes	10,236	9,180	30,832	22,171
EBITDA	$ 51,378	$ 46,526	$ 148,690	$ 112,054

(1) GAAP stands for U.S. generally accepted accounting principles.

(2) EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities, nor should EBITDA be considered in isolation from these GAAP measures of operating performance. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At September 30, 2011, the parent company — Molina Healthcare, Inc. — held cash and investments of approximately $54.3 million, compared with approximately $65.1 million of cash and investments at December 31, 2010. This decline was primarily due to capital contributions and /or advances to our Florida, Texas, and Wisconsin health plans in the first quarter of 2011.

On a consolidated basis, at September 30, 2011, we had working capital of $430.2 million compared with $392.4 million at December 31, 2010. At September 30, 2011 we had cash and investments of $881.0 million, compared with $813.8 million of cash and investments at December 31, 2010.

On October 11, 2011, Molina Center LLC, our wholly owned subsidiary, entered into a purchase agreement to acquire the approximately 460,000 square foot office project located at 200 and 300 Oceangate, Long Beach, California. The purchase price under the agreement is $83 million, to be paid in cash at closing. The transaction is contingent upon the satisfactory completion of our due diligence review and other customary closing conditions. Any closing is expected to occur during December 2011 or the first quarter of 2012.

Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014 (see discussion of “Convertible Senior Notes” below). The repurchase program will be funded with working capital or draws under our credit facility (see discussion of “Credit Facility” below).

On July 27, 2011, our board of directors approved a stock repurchase program of up to $7 million to be used to purchase shares of our common stock under a Rule 10b5-1 trading plan. Under this program, we purchased approximately 400,000 shares of our common stock for $7 million (average cost of approximately $17.47 per share) during August 2011. These purchases did not materially impact diluted earnings per share for the three months or nine months ended September 30, 2011. Subsequently, we retired the $7.0 million of treasury shares purchased, which reduced additional paid-in capital as of September 30, 2011.

We believe that our cash resources, Credit Facility, and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Credit Facility

On September 9, 2011, we entered into a credit agreement for a $170 million revolving credit facility (the “Credit Facility”) with various lenders and U.S. Bank National Association, as LC Issuer, Swing Line Lender, and Administrative Agent. The Credit Facility will be used for general corporate purposes.

The Credit Facility has a term of five years under which all amounts outstanding will be due and payable on September 9, 2016. Subject to obtaining commitments from existing or new lenders and satisfaction of other specified conditions, we may increase the Credit Facility to up to $195 million. As of September 30, 2011 there was no outstanding principal balance under the Credit Facility. However, as of September 30, 2011, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, which reduces the amount available under the Credit Facility.

Borrowings under the Credit Facility will bear interest based, at our election, on the base rate plus an applicable margin or the Eurodollar rate. The base rate is, for any day, a rate of interest per annum equal to the highest of (i) the prime rate of interest announced from time to time by U.S. Bank or its parent, (ii) the sum of the federal funds rate for such day plus 0.50% per annum and (iii) the Eurodollar rate (without giving effect to the applicable margin) for a one month interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1.00%. The Eurodollar rate is a reserve adjusted rate at which Eurodollar deposits are offered in the interbank Eurodollar market plus an applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee of 0.25% to 0.50% (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Credit Facility. The initial commitment fee shall be set at 0.35% until our delivery of its financials for the quarter ended September 30, 2011. The applicable margins range between 0.75% to 1.75% for base rate loans and 1.75% to 2.75% for Eurodollar loans, in each case, based upon our leverage ratio.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets, with the exception of certain of our real estate assets, and by a pledge of the capital stock or membership interests of our operating subsidiaries and health plans (with the exception of the California health plan).

The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, and investments. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 as of the end of each fiscal quarter and a fixed charge coverage ratio of not less than 1.75 to 1.00. At September 30, 2011, we were in compliance with all financial covenants under the Credit Facility.

In the event of a default, including cross-defaults relating to specified other debt in excess of $20 million, the lenders may terminate the commitments under the Credit Facility and declare the amounts outstanding, including all accrued interest and unpaid fees, payable immediately. In addition, the lenders may enforce any and all rights and remedies created under the Credit Facility or applicable law.

In connection with our entrance into the Credit Facility, on September 9, 2011, we terminated our existing credit agreement with Bank of America, dated March 9, 2005, as amended to date, which had provided us with a $150 million revolving credit facility. As of September 30, 2011 and December 31, 2010, there was no outstanding principal balance under this credit agreement.

Shelf Registration Statement

Under a shelf registration statement on Form S-3 that was filed with the Securities and Exchange Commission in December 2008, we have up to $182.5 million available for the issuance of our securities, including common stock, warrants, or debt securities, that may be publicly offered from time to time at prices and terms to be determined at the time of the offering.

Convertible Senior Notes

As of September 30, 2011, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per $1,000 principal amount of the Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $456.2 million at September 30, 2011, and $397.8 million at December 31, 2010.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of September 30, 2011, our health plans had aggregate statutory capital and surplus of approximately $463.1 million compared with the required minimum aggregate statutory capital and surplus of approximately $273.9 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2011. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Contractual Obligations

In our Annual Report on Form 10-K for the year ended December 31, 2010, we reported on our contractual obligations as of that date. There have been no material changes to our contractual obligations since that report.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- The determination of the amount of revenue to be recognized under certain contracts that place revenue at risk dependent upon the achievement of certain quality or administrative measurements, or the expenditure of certain percentages of revenue on defined expenses, or requirements that we return a certain portion of our profits to state governments;
- The deferral of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and;
- The determination of medical claims and benefits payable.

Revenue Recognition — Health Plans Segment

Certain components of premium revenue are subject to accounting estimates, and are therefore subject to retroactive revision. Chief among these are:

- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health:* A portion of premium revenue paid to our Florida health plan by the state of Florida may be refunded to the state if certain minimum amounts are not spent on defined behavioral health care costs. At September 30, 2011, we had not recorded any liability under the terms of this contract provision. If the state of Florida disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of this provision, including revisions to the definitions of premium revenue or behavioral health care costs, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our Florida health plan.

- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* A portion of premium revenue paid to our New Mexico health plan by the state of New Mexico may be refunded to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). Effective July 1, 2008, our New Mexico health plan entered into a new four-year contract that, in addition to retaining the medical cost floor, added certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At September 30, 2011, we had recorded a liability of $16.5 million under the terms of these contract provisions. If the state of New Mexico disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of these provisions, including revisions to the definitions of premium revenue, medical care costs, administrative costs or profit, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our New Mexico health plan.

- *New Mexico Health Plan At-Risk Premium Revenue:* Under our contract with the state of New Mexico, up to 0.75% of our New Mexico health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality of care and administrative measures dictated by the state. For the state fiscal year ended June 30, 2011, our New Mexico health plan has received $2.6 million in at-risk revenue for state fiscal year 2011. We have recognized $1.9 million of that amount as revenue, and recorded a liability of approximately $0.7 million as of September 30, 2011, for the remainder. For the state fiscal year ended June 30, 2012 we have received $0.6 million in at-risk revenue. We have recognized $0.4 million as revenue, and have recorded a liability of $0.2 million for the remainder. If the state of New Mexico disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required.

- *Ohio Health Plan At-Risk Premium Revenue:* Under our contract with the state of Ohio, up to 1% of our Ohio health plan's revenue may be refundable to the state if certain performance measures are not met. Effective February 1, 2010 through June 30, 2011, an additional 0.25% of the Ohio health plan's revenue became refundable if certain pharmacy specific performance measures were not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. For the state fiscal year ended June 30, 2011, our Ohio health plan received $10.3 million in at-risk revenue. We have recognized $8.6 million of that amount as revenue, and recorded a liability of approximately $1.7 million for the remainder. To date for the state fiscal year ended June 30, 2012, we have received $2.7 million in at-risk revenue, of which $2.3 million has been recognized as revenue, and $0.4 million was recorded as a liability as of September 30, 2011. If the state of Ohio disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required. For example, during the third quarter of 2010, we reversed the recognition of approximately $3.3 million of at-risk revenue, of which $1.9 million and $1.4 million were initially recognized in 2010, and 2009, respectively.

- *Utah Health Plan Premium Revenue:* Our Utah health plan was entitled to receive additional premium revenue from the state of Utah as an incentive payment for saving the state of Utah money in relation to fee-for-service Medicaid during the period 2003 through August 31, 2009.

  During the second quarter of 2011 we settled all claims related to state contract years 2006 through 2009 and received payments amounting to $13.6 million in settlement of this matter. The state in turn has made demands upon us amounting to $9.6 million to recover alleged over payment of premium revenue to us for the period 2003 through 2009. We are disputing many of those claims and as of September 30, 2011 have recorded a liability of approximately $4.6 million in connection with the premium revenue overpayments.

- *Texas Health Plan Profit Sharing:* Under our contract with the state of Texas there is a profit-sharing agreement, where we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. The rebates, if any, are calculated separately for the TANF/CHIP and ABD products. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As of September 30, 2011, we had an aggregate liability of approximately $1.3 million accrued pursuant to our profit-sharing agreement with the state of Texas for the 2011 and 2012 contract years (ending August 31st of each year). Because the final settlement calculations include a claims run-out period of nearly one year, an adjustment to the amounts owed may be required.

- *Texas Health Plan At-Risk Premium Revenue:* Under our contract with the state of Texas, up to 1% of our Texas health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality-of-care measures established by the state. The time period for the assessment of these performance measures previously followed the state's fiscal year, but effective January 1, 2011, it follows the calendar year. The state of Texas has notified us that it has discontinued the program for the 2011 calendar year.

- *Wisconsin Health Plan incentive revenue*: Under our contract with the state of Wisconsin, a portion of the capitation premiums are withheld by the state and placed into an incentive pool. The amounts withheld are 3.25% of revenue in the southeast region of the state for the Badger Care program and 1% for the remaining membership in the state. If certain performance measures are met, the plan may be eligible to receive these additional funds as an incentive payment. As of September 30, 2011 we have determined that there is persuasive evidence that at least a portion of these funds have been earned and a receivable $0.4 million is established accordingly.

- *Medicare Premium Revenue:* Based on member encounter data that we submit to CMS, our Medicare revenue is subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. That analysis is similar to the process for the adjustment of member risk scores, but is further complicated by member pharmacy cost sharing provisions attached to the Medicare pharmacy benefit that do not apply to the services measured by the member risk adjustment process. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns, we have recorded a liability of approximately $1.2 million related to the potential recoupment of Medicare premium revenue at September 30, 2011. To the extent that the premium revenue ultimately received from CMS differs from recorded amounts, we will adjust reported Medicare revenue.

Recognition of Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of three elements of service. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. The second element, following completion of the DDI element, is the operation of the MMIS under a business process outsourcing, or BPO, arrangement. While providing BPO services, we also provide the state with the third contracted element — training and IT support and hosting services (training and support).

Because they include these three elements of service, our Molina Medicaid Solutions contracts are multiple-element arrangements. The following discussion applies to our contracts with multiple elements entered into prior to January 1, 2011, before our prospective adoption of *Accounting Standards Update, or ASU, No. 2009-13, Revenue Recognition (Accounting Standards Codification, or ASC, Topic 605) — Multiple-Deliverable Revenue Arrangements*.

For those contracts entered into prior to January 1, 2011, we have no vendor specific objective evidence, or VSOE, of fair value for any of the individual elements in these contracts, and at no point in the contract will we have VSOE for the undelivered elements in the contract. We lack VSOE of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of products and services, which vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our newer contracts (commercial off-the-shelf technology solutions).

The absence of VSOE within the context of a multiple element arrangement prior to January 1, 2011 requires us to delay recognition of any revenue for an MMIS contract until completion of the DDI phase of the contract. As a general principle, revenue recognition will therefore commence at the completion of the DDI phase, and all revenue will be recognized over the period that BPO services and training and support services are provided. Consistent with the deferral of revenue, recognition of all direct costs (such as direct labor, hardware, and software) associated with the DDI phase of our contracts is deferred until the commencement of revenue recognition. Deferred costs are recognized on a straight-line basis over the period of revenue recognition.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any revenue at risk (whether DDI, BPO services, or training and support services) until the contingency has been removed. When we defer revenue recognition we also defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with the revenue deferred. Such deferred contract costs are recognized on a straight-line basis over the period of revenue recognition.

However, direct costs in excess of the estimated future net revenues associated with a contract may not be deferred. In circumstances where estimated direct costs over the life of a contract exceed estimated future net revenues of that contract, the excess of direct costs over revenue is expensed as a period cost.

In Idaho, revenue recognition is expected to begin during the second half of 2012. Consistent with the deferral of revenue, we have deferred recognition of a portion of the direct contract costs associated with that revenue. Deferred contract costs, if any, deferred through the date revenue recognition begins will be recognized simultaneously with revenue. As noted above, direct costs in excess of the estimated future net revenues associated with a contract may not be deferred. For the three and nine months ended September 30, 2011, we recorded $2.5 million and $9.5 million, respectively, of direct contract costs associated with our Idaho contract. We were not able to defer these direct contract costs because estimated future net revenues as of each measurement date did not exceed estimated future direct costs of the contract. We currently expect the Idaho contract to perform financially at a break even basis through its initial term. So long as we continue to defer revenue recognition under the contract, we will also continue to defer direct costs associated with the agreement. If our break-even assumptions were to change, we may not be able to continue to defer direct contract costs.

We began to recognize revenue and the related deferred costs associated with our Maine contract in September 2010.

Molina Medicaid Solutions' deferred revenue was $53.1 million at September 30, 2011, and $10.9 million at December 31, 2010, and unamortized deferred contract costs were $52.8 million at September 30, 2011, and $28.4 million at December 31, 2010.

For all new or materially modified revenue arrangements with multiple elements entered into on or after January 1, 2011, we apply the guidance contained in ASU No. 2009-13. For these arrangements, we allocate total arrangement consideration to the elements of the arrangement, which are expected to be DDI, BPO, and training and support services, because this is consistent with the current elements included in our Molina Medicaid Solutions contracts. The arrangement allocation is performed using the relative selling-price method. When determining the selling price of each element, VSOE should first be used, if available. Since VSOE is unavailable under our contracts, we will attempt to use third-party evidence, or TPE, of vendors selling similar services to similarly situated customers on a standalone basis, if available. If TPE is not available, we use our best estimate of the selling price for each element.

We then evaluate whether, at each stage in the life cycle of the contract, we are able to recognize revenue associated with that element. To the extent that our revenue arrangements have provisions that allow our state customers to refuse acceptance of services performed, we are still required to defer revenue recognition until such state customers accept our performance. Once this acceptance is achieved, we immediately recognize the revenue associated with any delivered elements, which differs from our current practice for arrangements entered into prior to January 1, 2011, where the revenue associated with delivered elements is recognized over the final service element of the arrangement because VSOE for the other elements does not exist. As such, we expect that the adoption of ASU No. 2009-13 will result in an overall acceleration of revenue recognition with respect to any multiple-element arrangements entered into on or after January 1, 2011. We have entered into no new or materially modified revenue arrangements with multiple elements since January 1, 2011.

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	Sept. 30, 2011	Dec. 31, 2010	Sept. 30, 2010
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 283,160	$ 275,259	$ 271,285
Capitation payable	49,259	49,598	53,410
Pharmacy	16,615	14,649	14,663
Other	12,021	14,850	13,982
	$ 361,055	$ 354,356	$ 353,340

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are “Incurred But Not Paid,” or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $283.2 million of our total medical claims and benefits payable of $361.1 million as of September 30, 2011. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider’s monthly capitation payment), our IBNP liability at September 30, 2011, was $276.9 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of September 30, 2011 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding September 30, 2011, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ 113,904
(4%)	75,936
(2%)	37,968
2%	(37,968)
4%	(75,936)
6%	(113,904)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of September 30, 2011 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ (61,288)
(4%)	(40,859)
(2%)	(20,429)
2%	20,429
4%	40,859
6%	61,288

The following per-share amounts are based on a combined federal and state statutory tax rate of 37.5%, and 46.3 million diluted shares outstanding for the nine months ended September 30, 2011. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at September 30, 2011, net income for the nine months ended September 30, 2011 would increase or decrease by approximately $11.9 million, or $0.26 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at September 30, 2011, net income for the three months ended September 30, 2011 would increase or decrease by approximately $6.4 million, or $0.14 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $59.3 million, or $1.28 per diluted share, and $31.9 million, or $0.69 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $11.9 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations and regions such as the ABD population in the Dallas-Fort Worth area, changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2010, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 15.7%.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2010 and through September 30, 2011 were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

We recognized a benefit from prior period claims development in the amount of $49.5 million for the nine months ended September 30, 2011 (see table below). This amount represents our estimate as of September 30, 2011 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2010 exceeded the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2010 was due primarily to the following factors:

- We overestimated the impact of an increase in pending high dollar claims at our Ohio health plan.
- We underestimated the lower cost associated with changes to provider fee schedules (primarily for outpatient facility costs) in New Mexico effective November 1, 2010.

The following developments partially offset the overestimation of our claims liability at December 31, 2010:

- In Missouri, delays in claims processing late in the fourth quarter of 2010 led us to underestimate the size of our claims liability at December 31, 2010.
- We underestimated the costs associated with our assumption of risk for a new population in Texas (rural CHIP members) effective September 1, 2010.

We recognized a benefit from prior period claims development in the amount of $49.4 million for the year ended December 31, 2010 (see table below). This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2009. The overestimation of claims liability at December 31, 2009 was the result of the following factors:

- In New Mexico, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- In California, we underestimated the extent to which various network restructuring, provider contracting, and medical management initiatives had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

In estimating our claims liability at September 30, 2011, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- The assumption of risk for new populations by our Texas health plan; Dallas-Fort Worth area ABD members effective February 1, 2011; Jefferson service area members effective September 30, 2011.
- The transition of certain members by our Washington and Michigan health plans from full-risk capitated provider arrangements to fee-for-service providers effective December 31, 2010. This change had the effect of transferring back to the Company risk that had previously been assumed by capitated medical providers.
- A substantial decline in Medicaid claims inventory at our Ohio health plan and for our overall Medicare membership.
- A substantial increase in Medicaid claims inventory in Missouri and New Mexico.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2010 and through September 30, 2011, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The negative amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Nine Months Ended		Six Months Ended	Three Months Ended	Year Ended
	Sept. 30, 2011	Sept. 30, 2010	June 30, 2011	March 31, 2011	Dec. 31, 2010
	(Dollars in thousands, except per-member amounts)

Number of claims received during the period	12,864,800	10,701,900	8,715,200	4,342,200	14,554,800
Billed charges of claims received during the period	$ 10,573,900	$ 8,615,500	$ 6,963,300	$ 3,386,600	$ 11,686,100

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 3. ***Quantitative and Qualitative Disclosures About Market Risk***

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the *"Exchange Act "*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: During the fiscal quarter ended June 30, 2011, we completed the implementation of a new enterprise resource planning, or ERP, software system. This system is used in the preparation of, among other things, our financial statements and required reports. There has been no change in our internal control over financial reporting during the fiscal quarter ended September 30, 2011 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. ***Legal Proceedings***

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly-funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. Based upon the evaluation of information currently available, we believe that these actions, when finally concluded and determined, are not likely to have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Item 1A. ***Risk Factors***

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, the following risk factors were identified by the Company during the third quarter of 2011 and is a supplement to the risk factors identified in Part I, Item 1A — Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2010, as updated in Part II, Item 1A — Risk Factors in our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2011. The risk factors described herein and in our Annual Report on Form 10-K, as updated by our quarterly report on Form 10-Q for the quarterly period ended June 30, 2011, are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, or results of operations.

Restrictions and covenants in our credit facility may limit our ability to make certain acquisitions or reduce our liquidity and capital resources.

On September 9, 2011, we terminated our credit agreement with Bank of America which had provided us with a $150 million revolving credit facility and entered into a credit agreement for a $170 million revolving credit facility with various lenders and U.S. Bank National Association. The credit facility imposes numerous restrictions and covenants, including, but not limited to, prescribed consolidated leverage and fixed charge coverage ratios, net worth requirements, and acquisition and disposition limitations that restrict our financial and operating flexibility, including our ability to make certain acquisitions above specified values and declare dividends and other distributions without lender approval. Our ability to comply with these covenants may be affected by events beyond our control. As a result of the restrictions and covenants imposed under our credit facility, our growth strategy may be negatively impacted by our inability to react to market conditions, finance our operations, engage in strategic acquisitions or disposals, act with complete flexibility, or to use our credit facility in the manner intended. In addition, our credit facility matures in September 2016. If we are in default at a time when funds under the credit facility are required to finance an acquisition, or if a proposed acquisition does not satisfy the pro forma financial requirements under our credit facility, or if we are unable to renew or refinance our credit facility prior to its maturity, and if the default is not cured or waived, we may be unable to use the credit facility in the manner intended, and our operations, liquidity, and capital resources could be materially adversely affected.

In the event the expected reduction in the rates paid to our California health plan is not finally implemented, is not made effective retroactive to July 1, 2011, or is otherwise modified, our results of operations may be affected.

California Assembly Bill 97, or AB 97, is legislation that was signed by Governor Jerry Brown on March 24, 2011. Among other things, AB 97 proposes to effect a 10% reduction in Medi-Cal provider rates. The California Department of Health Care Services has indicated that the 10% rate reduction will be effective retroactive to July 1, 2011. The Company believes that this reduction in provider payments, if effected, will translate into a premium reduction of approximately 6% for the California health plan. Because of the expected reduction in its rates effective July 1, 2011, the California health plan reduced its recognized premium revenue by approximately $7.5 million in the third quarter of 2011. However, at September 30, 2011, the California health plan had not recorded any potential recovery of provider payments related to this estimated premium reduction.

The proposed rate reduction was submitted for approval to CMS, and CMS had requested additional information from the state in support of the rate cut. On October 27, 2011, CMS indicated its general approval of the rate cut. However, the immediate effect of that approval is unclear, and it is anticipated that litigation will be commenced by providers or others to enjoin the implementation of the rate cut.

If the proposed rate cut is not finally implemented, if it is not made retroactive to July 1, 2011, or if it is otherwise modified from its current form, the results of our California health plan could be affected. In addition, recoveries from providers related to any final implemented rate cut could also affect the results of our California health plan.

Item 2. ***Unregistered Sales of Equity Securities and Use of Proceeds***

Issuer Purchases of Equity Securities

On July 27, 2011, our board of directors approved a stock repurchase program of up to $7 million to be used to purchase shares of our common stock under a Rule 10b5-1 trading plan. Under this program, we purchased approximately 400,000 shares of our common stock for $7 million (average cost of approximately $17.47 per share) during August 2011. This repurchase program was funded with working capital.

Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014. The repurchase program will be funded with working capital or the Company's credit facility, and repurchases may be made from time to time on the open market or through privately negotiated transactions. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time. No repurchases have been made by the Company pursuant to this repurchase plan during the quarter ended September 30, 2011.

Purchases of common stock made by or on behalf of the Company during the quarter ended September 30, 2011, including shares withheld by the Company to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (b)(c)	Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Plans or Programs (b)(c)(d)
July 1 — July 31	1,361(e)	$ 27.77	—	$ 7,000,000
August 1 — August 31	402,800(e)	$ 17.50	399,900	$ —
September 1 — September 30	644(e)	$ 18.79	—	$ —
Total	404,805(e)	$ 17.53	399,900	

(a) During the three months ended September 30, 2011, we did not repurchase any shares of our common stock outside of our publicly announced stock repurchase program except 4,905 shares of common stock withheld to settle our employees' income tax obligations.

(b) On July 27, 2011, our board of directors approved a stock repurchase program of up to $7 million to be used to purchase shares of our common stock under a Rule 10b5-1 trading plan. Our repurchases under this program were completed in August 2011.

(c) Effective as of October 26, 2011, our board of directors has authorized the repurchase of $75 million in aggregate of either our common stock or our convertible senior notes due 2014. The repurchase program extends through October 25, 2012, but the Company reserves the right to suspend or discontinue the program at any time. No repurchases have been made by the Company pursuant to this repurchase plan during the quarter ended September 30, 2011.

(d) As the repurchase plan effective October 26, 2011 was not in effect during the quarter ended September 30, 2011, this column does not include the maximum value of shares that may be purchased pursuant to this plan.

(e) Includes shares withheld by the Company to satisfy our employees' income tax withholdings.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended September 30, 2011 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Increase in restricted investments	(8,230)	(4,754)
Change in other noncurrent assets and liabilities	2,190	757
Net cash used in investing activities	(118,777)	(139,430)
Financing activities:		
Amount borrowed under credit facility	—	105,000
Credit facility fees paid	—	(1,671)
Proceeds from employee stock plans	5,640	1,543
Excess tax benefits from employee stock compensation	1,566	179
Net cash provided by financing activities	7,206	105,051
Net increase (decrease) in cash and cash equivalents	3,327	(8,516)
Cash and cash equivalents at beginning of period	455,886	469,501
Cash and cash equivalents at end of period	$ 459,213	$ 460,985

See accompanying notes.

MOLINA HEALTHCARE, INC.

CONSOLIDATED STATEMENTS OF CASH FLOWS — (continued)

	Six Months Ended June 30,	
	2011	**2010**
	(Amounts in thousands) (Unaudited)	
Supplemental cash flow information:		
Cash paid during the period for:		
Income taxes	$ 30,863	$ 6,604
Interest	$ 4,385	$ 6,222
Schedule of non-cash investing and financing activities:		
Retirement of common stock used for stock-based compensation	$ 3,714	$ 1,673
Details of business combinations:		
Increase in fair value of assets acquired	$ (256)	$ (143,983)
(Decrease) increase in fair value of liabilities assumed	(1,045)	11,832
Decrease in payable to seller	(1,952)	(2,249)
Net cash paid in business combinations	$ (3,253)	$ (134,400)

See accompanying notes.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
June 30, 2011

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. As of June 30, 2011, these health plans served approximately 1.6 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

Our Molina Medicaid Solutions segment, which we acquired during the second quarter of 2010, provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement Medicaid Management Information System, or MMIS, to another firm. We have submitted a protest in connection with this notice, and in response the state has issued a stay of the intent to award and all contract negotiations have ceased. Our revenue under the Louisiana MMIS contract from May 1, 2010, the date we acquired Molina Medicaid Solutions, through December 31, 2010, was approximately $32 million. For the six months ended June 30, 2011, our revenue under the Louisiana MMIS contract was approximately $24 million. Until the replacement MMIS is designed, developed, and implemented by the vendor that ultimately enters into a contract with the state, we will continue to perform under the existing MMIS contract, a period which we expect to last at least two years.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc. and all majority owned subsidiaries. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated in consolidation. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2011. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2010. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2010 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2010 audited financial statements.

Adjustments and Reclassifications

We have adjusted all applicable share and per-share amounts to reflect the retroactive effects of the three-for-two stock split in the form of a stock dividend that was effective May 20, 2011.

We have reclassified certain amounts in the 2010 consolidated statement of cash flows to conform to the 2011 presentation.

2. Significant Accounting Policies

Recognition of Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of three elements of service. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. The second element, following completion of the DDI element, is the operation of the MMIS under a business process outsourcing, or BPO, arrangement. While providing BPO services, we also provide the state with the third contracted element — training and IT support and hosting services (training and support).

Because they include these three elements of service, our Molina Medicaid Solutions contracts are multiple-element arrangements. The following discussion applies to our contracts with multiple elements entered into prior to January 1, 2011, before our prospective adoption of *Accounting Standards Update, or ASU, No. 2009-13, Revenue Recognition (Accounting Standards Codification, or ASC, Topic 605) — Multiple-Deliverable Revenue Arrangements*.

For those contracts entered into prior to January 1, 2011, we have no vendor specific objective evidence, or VSOE, of fair value for any of the individual elements in these contracts, and at no point in the contract will we have VSOE for the undelivered elements in the contract. We lack VSOE of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of products and services, which vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our newer contracts (commercial off-the-shelf technology solutions).

The absence of VSOE within the context of a multiple element arrangement requires us to delay recognition of any revenue for an MMIS contract until completion of the DDI phase of the contract. As a general principle, revenue recognition will therefore commence at the completion of the DDI phase, and all revenue will be recognized over the period that BPO services and training and support services are provided. Consistent with the deferral of revenue, recognition of all direct costs (such as direct labor, hardware, and software) associated with the DDI phase of our contracts is deferred until the commencement of revenue recognition. Deferred costs are recognized on a straight-line basis over the period of revenue recognition.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any revenue at risk (whether DDI, BPO services, or training and support services) until the contingency has been removed. When we defer revenue recognition we also defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with the revenue deferred. Such deferred contract costs are recognized on a straight-line basis over the period of revenue recognition.

However, direct costs in excess of the estimated future net revenues associated with a contract may not be deferred. In circumstances where estimated direct costs over the life of a contract exceed estimated future net revenues of that contract, the excess of direct costs over revenue is expensed as a period cost. As noted below, we were unable to defer $7.0 million of direct contract costs associated with our Idaho contract during the second quarter of 2011 because estimated direct costs over the life of the contract exceed estimated future net revenues.

We began to recognize revenue and the related deferred costs associated with our Maine contract in September 2010.

In Idaho, revenue recognition is expected to begin during the second half of 2012. Consistent with the deferral of revenue, we have deferred recognition of the direct contract costs associated with that revenue. Deferred contract costs, if any, deferred through the date revenue recognition begins will be recognized simultaneously with revenue.

In late April of 2011, Idaho Department of Health and Welfare indicated that it wished to remit to us an amount approximately $5 to $6 million less than the amount of our invoices for the operation of the MMIS in that state for the period June 1, 2010 through December 31, 2010. The Department claimed at that time that we were not in compliance with certain contractual requirements during the period June 1, 2010 through December 31, 2010. We do not believe the basis of the proposed reduction was contractually sound. In June 2011, we reached tentative agreement with the Department regarding the determination of our monthly operating revenue in Idaho. As a result of the tentative agreement, we estimate that revenue from operations in Idaho will be reduced by approximately $3 million for the period June 1, 2010 through June 30, 2011, and by an additional $1 million for the period July 1, 2011 through December 31, 2011. We do not believe that the tentative agreement will result in any reduction to amounts previously expected to be received for operations subsequent to December 31, 2011. As noted above, all revenue associated with our Idaho MMIS contract is currently being deferred.

In assessing the recoverability of the deferred contract costs associated with the Idaho contract at June 30, 2011, we determined that our current estimate of expenses over the life of the Idaho MMIS contract exceeded our current estimate of net revenues to be derived from that contract by approximately $7.0 million. Accordingly, we expensed through cost of service revenue $7.0 million of direct costs associated with the Idaho contract that otherwise would have been recorded as deferred contract costs. The reduction in revenue discussed above, as well as higher expected costs over the term of the contract, have lowered the net amount that we expect to realize under the contract, requiring us to write down deferred contract costs. We currently expect the contract to perform financially at a break-even basis through its initial term. So long as we continue to defer revenue recognition under the contract, we will also continue to defer direct costs associated with the agreement, unless our analysis indicates that the contract is performing at less than break even.

Molina Medicaid Solutions' deferred revenue totalled $38.6 million at June 30, 2011, and $10.9 million at December 31, 2010, and unamortized deferred contract costs were $42.6 million at June 30, 2011, and $28.4 million at December 31, 2010.

For all new or materially modified revenue arrangements with multiple elements entered into on or after January 1, 2011, which we expect will consist of contracts entered into by our Molina Medicaid Solutions segment, we apply the guidance contained in ASU No. 2009-13. For these arrangements, we allocate total arrangement consideration to the elements of the arrangement, which are expected to be DDI, BPO, and training and support, because this is consistent with the current elements included in our Molina Medicaid Solutions contracts. The arrangement allocation is performed using the relative selling-price method. When determining the selling price of each element, we first attempt to use VSOE if available. If VSOE is not available, we attempt to use third-party evidence, or TPE, of vendors selling similar services to similarly situated customers on a standalone basis, if available. If neither VSOE nor TPE are available, we use our best estimate of the selling price for each element.

We then evaluate whether, at each stage in the life cycle of the contract, we are able to recognize revenue associated with that element. To the extent that our revenue arrangements have provisions that allow our state customers to refuse acceptance of services performed, we are still required to defer revenue recognition until such state customers accept our performance. Once this acceptance is achieved, we immediately recognize the revenue associated with any delivered elements which differs from our current practice for arrangements entered into prior to January 1, 2011, where the revenue associated with delivered elements is recognized over the final service element of the arrangement because VSOE for the other elements does not exist. As such, we expect that the adoption of ASU No. 2009-13 will result in an overall acceleration of revenue recognition with respect to any multiple-element arrangements entered into on or after January 1, 2011. We have entered into no new or materially modified revenue arrangements with multiple elements since January 1, 2011.

Premium Deficiency Reserve

We assess the profitability of each contract by state for providing medical care services to our members and identify any contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared to anticipated medical care costs, including the cost of processing claims. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. In the first quarter of 2011, our Wisconsin health plan recorded a premium deficiency reserve in the amount of $3.35 million to medical claims and benefits payable. As of June 30, 2011, the reserve balance was $1.6 million.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $11.0 million as of June 30, 2011 and December 31, 2010. Approximately $8.4 million of the unrecognized tax benefits recorded at June 30, 2011, relate to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $7.8 million as of June 30, 2011. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $8.9 million due to the expiration of statute of limitations and the resolution to the state refund claim described above.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of June 30, 2011, and December 31, 2010, we had accrued $95,000 and $82,000, respectively, for the payment of interest and penalties.

Recent Accounting Pronouncements

Revenue Recognition. In late 2009, the Financial Accounting Standards Board, or FASB, issued the following accounting guidance relating to revenue recognition. Effective for interim and annual reporting beginning on or after December 15, 2010, we adopted this guidance in full effective January 1, 2011.

- *ASU No. 2009-13, Revenue Recognition (ASC Topic 605) — Multiple-Deliverable Revenue Arrangements*, a consensus of the FASB Emerging Issues Task Force. This guidance modifies previous requirements by requiring the use of the "best estimate of selling price" in the absence of vendor-specific objective evidence ("VSOE") or verifiable objective evidence ("VOE") (now referred to as "TPE" or third-party evidence) for determining the selling price of a deliverable. A vendor is now required to use its best estimate of the selling price when more objective evidence of the selling price cannot be determined. By providing an alternative for determining the selling price of deliverables, this guidance allows companies to allocate arrangement consideration in multiple deliverable arrangements in a manner that better reflects the transaction's economics. In addition, the residual method of allocating arrangement consideration is no longer permitted under this new guidance. We have adopted this guidance effective January 1, 2011, and will apply it on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Because we did not enter into any new or materially modified agreements with multiple elements and fixed payments in the six months ended June 30, 2011 that would have been impacted by this guidance, the adoption did not have a material impact on the timing or pattern of revenue recognition.

For the year ended December 31, 2010, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

Goodwill Impairment Testing. In December 2010, the FASB issued the following guidance which modifies goodwill impairment testing. Effective for interim and annual reporting beginning on or after December 15, 2010, we adopted this guidance in full effective January 1, 2011.

- *ASU No. 2010-28, Intangibles—Goodwill and Other (ASC Topic 350) — When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts,* a consensus of the FASB Emerging Issues Task Force. This guidance modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The adoption of this guidance did not impact our consolidated financial position, results of operations or cash flows.

Presentation of Financial Statements. In June 2011, the FASB and International Accounting Standards Board, or IASB, issued the following guidance which modifies how other comprehensive income, or OCI, is reported under U.S. Generally Accepted Accounting Principles, or GAAP, and International Financial Reporting Standards, or IFRS. This guidance is effective for interim and annual reporting beginning on or after December 15, 2011.

- *ASU No. 2011-05, Comprehensive Income (ASC Topic 220) — Presentation of Comprehensive Income,* a consensus of the FASB Emerging Issues Task Force. This guidance eliminates the option to present components of OCI as part of the statement of changes to stockholders' equity. All filers are required to present all non-owner changes in stockholders' equity in a single statement of comprehensive income or in two separate but consecutive statements. We do not expect the adoption of this guidance to impact our consolidated financial position, results of operations or cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, or AICPA, and the Securities and Exchange Commission, or SEC, did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
	(In thousands)			
Shares outstanding at the beginning of the period	45,828	38,592	45,463	38,410
Weighted-average number of shares issued	69	19	280	131
Denominator for basic earnings per share	45,897	38,611	45,743	38,541
Dilutive effect of employee stock options and stock grants (1)	574	315	649	388
Denominator for diluted earnings per share (2)	46,471	38,926	46,392	38,929

(1) Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three months ended June 30, 2011, and 2010, there were approximately 81,200 and 724,500 antidilutive weighted options, respectively. For the six months ended June 30, 2011, and 2010, there were approximately 122,100 and 745,500 antidilutive weighted options, respectively. Restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. There were no antidilutive weighted restricted shares for the three months and six months ended June 30, 2011. For the three months and six months ended June 30, 2010, there were approximately 1,500, and 13,500 antidilutive weighted restricted shares, respectively.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the three month and six month periods ended June 30, 2011 and 2010.

4. Share-Based Compensation

At June 30, 2011, we had employee equity incentives outstanding under two plans: (1) the 2002 Equity Incentive Plan; and (2) the 2000 Omnibus Stock and Incentive Plan (from which equity incentives are no longer awarded). On March 1, 2011, our chief executive officer, chief financial officer, and chief operating officer were awarded 150,000 shares, 112,500 shares, and 27,000 shares, respectively, of restricted stock with performance and service conditions. Each of the grants shall vest on March 1, 2012, provided that: (i) the Company's total operating revenue for 2011 is equal to or greater than $3.7 billion, and (ii) the respective officer continues to be employed by the Company as of March 1, 2012. In the event both vesting conditions are not achieved, the equity compensation awards shall lapse. As of June 30, 2011, we expect these awards to vest in full.

Charged to general and administrative expenses, total stock-based compensation expense was as follows for the three month and six month periods ended June 30, 2011 and 2010:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
	(in thousands)			
Restricted stock awards	$ 3,932	$ 2,106	$ 7,738	$ 3,745
Stock options (including shares issued under our employee stock purchase plan)	378	265	636	763
Total stock-based compensation expense	$ 4,310	$ 2,371	$ 8,374	$ 4,508

As of June 30, 2011, there was $22.0 million of total unrecognized compensation expense related to unvested restricted stock awards, which we expect to recognize over a remaining weighted-average period of 2.2 years. As of June 30, 2011, there was no remaining unrecognized compensation expense related to unvested stock options.

Unvested restricted stock and restricted stock activity for the six months ended June 30, 2011 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2010	1,253,624	$ 15.55
Granted	754,800	23.53
Vested	(450,324)	16.88
Forfeited	(53,029)	15.22
Unvested balance as of June 30, 2011	1,505,071	19.16

The total fair value of restricted shares granted during the six months ended June 30, 2011 and 2010 was $17.7 million and $11.2 million, respectively. The total fair value of restricted shares vested during the six months ended June 30, 2011 and 2010 was $10.9 million and $4.6 million, respectively.

Stock option activity for the six months ended June 30, 2011 is summarized below:

	Shares	Weighted Average Grant Date Fair Value	Average Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Stock options outstanding as of December 31, 2010	770,421	$ 20.39		
Exercised	(185,672)	19.23		
Forfeited	(8,275)	22.29		
Stock options outstanding as of June 30, 2011	576,474	20.75	$ 3,839	4.4
Stock options exercisable and expected to vest as of June 30, 2011	576,369	20.75	$ 3,838	4.3
Exercisable as of June 30, 2011	570,849	20.72	$ 3,817	4.4

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For a comprehensive discussion of fair value measurements with regard to our current and non-current investments, see below.

The carrying amount of the convertible senior notes was $166.7 million and $164.0 million as of June 30, 2011, and December 31, 2010, respectively. Based on quoted market prices, the fair value of the convertible senior notes was approximately $215.8 million and $188.4 million as of June 30, 2011, and December 31, 2010, respectively.

To prioritize the inputs we use in measuring fair value, we apply a three-tier fair value hierarchy. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of June 30, 2011, we held certain assets that are required to be measured at fair value on a recurring basis. These included current investments in investment-grade debt securities that are designated as available-for-sale, and are reported at fair value based on market prices that are readily available (Level 1). See Note 6, “Investments,” for further information regarding fair value.

We also held investments in auction rate securities which are designated as available-for-sale, and are reported at fair value of $19.0 million (par value of $22.4 million) as of June 30, 2011.

Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government. We continued to earn interest on substantially all of these auction rate securities as of June 30, 2011. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008. As such, quoted prices in active markets were not readily available during the majority of 2008, 2009, and 2010, and continued to be unavailable as of June 30, 2011. To estimate the fair value of these securities, we used pricing models that included factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. The estimated values of these securities were also compared, when possible, to valuation data with respect to similar securities held by other parties. We concluded that these estimates, given the lack of market available pricing, provided a reasonable basis for determining the fair value of the auction rate securities as of June 30, 2011. For our investments in auction rate securities, we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost.

As a result of changes in the fair value of auction rate securities designated as available-for-sale, we recorded pretax unrealized gains of $0.7 million and pretax unrealized losses of $0.2 million to accumulated other comprehensive income (loss) for the six months ended June 30, 2011, and 2010, respectively. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income (loss). If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

Until July 2, 2010, we held certain auction rate securities (designated as trading securities) with an investment securities firm. In 2008, we entered into a rights agreement with this firm that (1) allowed us to exercise rights (the "Rights") to sell the eligible auction rate securities at par value to this firm between June 30, 2010 and July 2, 2012, and (2) gave the investment securities firm the right to purchase the auction rate securities from us any time after the agreement date as long as we received the par value. On June 30, 2010, and July 1, 2010, all of the eligible auction rate securities remaining at that time were settled at par value. During 2010, the aggregate auction rate securities (designated as trading securities) settled amounted to $40.9 million par value (fair value $36.7 million). Substantially all of the difference between par value and fair value on these securities was recovered through the rights agreement. For the six months ended 2010, we recorded pretax gains of $2.9 million on the auction rate securities underlying the Rights.

We accounted for the Rights as a freestanding financial instrument and, until July 2, 2010, recorded the value of the Rights under the fair value option. For the six months ended 2010, we recorded pretax losses of $2.6 million on the Rights, attributable to the decline in the fair value of the Rights. When the remaining eligible auction rate securities were sold at par value on July 1, 2010, the value of the Rights was zero.

Our assets measured at fair value on a recurring basis at June 30, 2011, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 243,277	$ 243,277	$ —	$ —
Government-sponsored enterprise securities (GSEs)	36,797	36,797	—	—
Municipal securities	41,028	41,028	—	—
U.S. treasury notes	32,240	32,240	—	—
Certificates of deposit	3,258	3,258	—	—
Auction rate securities	18,958	—	—	18,958
	$ 375,558	$ 356,600	$ —	$ 18,958

The following table presents our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3)
	(In thousands)
Balance at December 31, 2010	$ 20,449
Total gains (realized or unrealized):	
Included in other comprehensive income	659
Settlements	(2,150)
Balance at June 30, 2011	$ 18,958
The amount of total gains for the period included in other comprehensive income attributable to the change in unrealized gains relating to assets still held at June 30, 2011	$ 659

In 2010, we recorded a $2.8 million liability for contingent consideration related to the acquisition of our Wisconsin health plan. In the first quarter of 2011, we determined that there was no liability for contingent consideration relating to the acquisition. The liability for contingent consideration related to this acquisition was measured at fair value on a recurring basis using significant unobservable inputs (Level 3). The following table presents a roll forward of this liability for 2011:

	(Level 3) (In thousands)
Balance at December 31, 2010	$ (2,800)
Total gains included in earnings	2,800
Balance at June 30, 2011	$ —

6. Investments

The following tables summarize our investments as of the dates indicated:

	June 30, 2011			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 246,215	$ 230	$ 3,168	$ 243,277
GSEs	36,917	50	170	36,797
Municipal securities (including non-current auction rate securities)	63,772	70	3,856	59,986
U.S. treasury notes	32,132	119	11	32,240
Certificates of deposit	3,258	—	—	3,258
	$ 382,294	$ 469	$ 7,205	$ 375,558

	December 31, 2010			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 179,124	$ 193	$ 1,388	$ 177,929
GSEs	59,790	293	370	59,713
Municipal securities (including non-current auction rate securities)	55,247	78	4,313	51,012
U.S. treasury notes	23,864	114	60	23,918
Certificates of deposit	3,252	—	—	3,252
	$ 321,277	$ 678	$ 6,131	$ 315,824

The contractual maturities of our investments as of June 30, 2011 are summarized below:

	Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 190,202	$ 188,005
Due one year through five years	170,192	169,025
Due after ten years	21,900	18,528
	$ 382,294	$ 375,558

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales and maturities of available-for-sale securities were $60.1 million and $42.8 million for the three months ended June 30, 2011, and 2010, respectively. Total proceeds from sales and maturities of available-for-sale securities were $121.4 million and $91.3 million for the six months ended June 30, 2011, and 2010, respectively. Net realized investment gains for the three months ended June 30, 2011, and 2010 were $21,000 and $43,000 respectively. Net realized investment gains for the six months ended June 30, 2011, and 2010 were $178,000 and $57,000 respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our municipal securities, we have determined that unrealized gains and losses at June 30, 2011, and December 31, 2010, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

Approximately 32% of our investment in municipal securities consists of auction rate securities. As described in Note 5, “Fair Value Measurements,” the unrealized losses on these investments were caused primarily by the illiquidity in the auction markets. Because the decline in market value is not due to the credit quality of the issuers, and because we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost, we do not consider the auction rate securities that are designated as available-for-sale to be other-than-temporarily impaired at June 30, 2011.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of June 30, 2011.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Corporate debt securities	$ 159,261	$ 2,881	$ 12,715	$ 287	$ 171,976	$ 3,168
GSEs	14,745	102	2,034	68	16,779	170
Municipal securities	28,335	270	24,199	3,585	52,534	3,855
U.S. treasury notes	1,155	1	2,059	11	3,214	12
	$ 203,496	$ 3,254	$ 41,007	$ 3,951	$ 244,503	$ 7,205

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2010.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Corporate debt securities	$ 103,225	$ 1,060	$ 10,490	$ 328	$ 113,715	$ 1,388
GSEs	13,014	71	7,539	299	20,553	370
Municipal securities	18,884	117	25,271	4,196	44,155	4,313
U.S. treasury notes	5,480	40	6,806	20	12,286	60
	$ 140,603	$ 1,288	$ 50,106	$ 4,843	$ 190,709	$ 6,131

7. Receivables

Health Plans segment receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustment. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable were as follows:

	June 30, 2011	December 31, 2010
	(In thousands)	
Health Plans segment:		
California	$ 30,501	$ 46,482
Michigan	14,974	13,596
Missouri	23,848	22,841
New Mexico	9,629	18,310
Ohio	19,511	21,622
Utah	5,634	1,589
Washington	12,371	14,486
Wisconsin	8,511	5,437
Others	3,796	3,598
Total Health Plans segment	128,775	147,961
Molina Medicaid Solutions segment	43,899	20,229
	$ 172,674	$ 168,190

During the second quarter of 2011, we settled certain claims we had made against the state of Utah regarding the savings share provision of our contract in effect from 2003 through June of 2009. Additionally, we recognized a liability for certain overpayments received from the state for the period 2003 through 2009. As a result of these developments, we recognized $6.9 million in premium revenue without any corresponding charge to expense during the second quarter of 2011.

8. Restricted Investments

Pursuant to the regulations governing our Health Plan subsidiaries, we maintain statutory deposits and deposits required by state Medicaid authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of capitated providers. The following table presents the balances of restricted investments by health plan, and for our insurance company:

	June 30, 2011	December 31, 2010
	(In thousands)	
California	$ 372	$ 372
Florida	8,044	4,508
Insurance Company	4,680	4,689
Michigan	1,000	1,000
Missouri	506	508
New Mexico	15,894	15,881
Ohio	9,076	9,066
Texas	3,500	3,501
Utah	2,787	1,279
Washington	151	151
Wisconsin	—	260
Other	4,320	885
	$ 50,330	$ 42,100

The contractual maturities of our held-to-maturity restricted investments as of June 30, 2011 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 46,732	$ 46,756
Due one year through five years	3,598	3,642
	$ 50,330	$ 50,398

9. Long-Term Debt

Credit Facility

We are a party to an Amended and Restated Credit Agreement, dated as of March 9, 2005, as amended by the first amendment on October 5, 2005, the second amendment on November 6, 2006, the third amendment on May 25, 2008, the fourth amendment on April 29, 2010, and the fifth amendment on April 29, 2010, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility") for a revolving credit line of $150 million that matures in May 2012. The Credit Facility is intended to be used for general corporate purposes. As of June 30, 2011, and December 31, 2010, there was no outstanding principal balance under the Credit Facility. However, as of June 30, 2011, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho.

To the extent that in the future we incur any obligations under the Credit Facility, such obligations will be secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At June 30, 2011, we were in compliance with all financial covenants in the Credit Facility.

The commitment fee on the total unused commitments of the lenders under the Credit Facility is 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans is 200 basis points at every level of the pricing grid. Thus, the applicable margins under the Credit Facility range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. The Credit Facility carves out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of the convertible senior notes, although the $187.0 million indebtedness is included in the calculation of our consolidated leverage ratio. The fixed charge coverage ratio under the Credit Facility is required to be no less than 3.00x.

The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.50 to 1.0 for the first and second quarters of 2010 and through August 14, 2010 (on a pro forma basis). Effective as of August 15, 2010, the maximum consolidated leverage ratio under the Credit Facility reverted back to 2.75 to 1.0.

Convertible Senior Notes

As of June 30, 2011, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

The proceeds from the issuance of the Notes have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of June 30, 2011, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 39 months. The Notes' if-converted value did not exceed their principal amount as of June 30, 2011. At June 30, 2011, the equity component of the Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	As of June 30, 2011	As of December 31, 2010
	(In thousands)	
Details of the liability component:		
Principal amount	$ 187,000	$ 187,000
Unamortized discount	(20,275)	(22,986)
Net carrying amount	$ 166,725	$ 164,014

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
	(in thousands)			
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate of 3.75%	$ 1,753	$ 1,753	$ 3,506	$ 3,506
Amortization of the discount on the liability component	1,371	1,266	2,711	2,509
Total interest cost recognized	$ 3,124	$ 3,019	$ 6,217	$ 6,015

10. Stockholders' Equity

On April 27, 2011, we announced that our board of directors authorized a 3-for-2 stock split of our common stock to be effected in the form of a stock dividend of one share of our stock for every two shares outstanding. The dividend was distributed on May 20, 2011.

In connection with the plans described in Note 4, "Share-Based Compensation," we issued approximately 599,000 shares of common stock, net of shares retired to settle employees' income tax obligations, for the six months ended June 30, 2011. For the six months ended June 30, 2011, the $11.4 million increase in additional paid-in capital was primarily generated by employee stock plan transactions.

11. Segment Reporting

Our reportable segments are consistent with how we manage the business and view the markets we serve. In the second quarter of 2010, we added a segment to our internal financial reporting structure as a result of the acquisition of Molina Medicaid Solutions. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

Molina Medicaid Solutions was acquired on May 1, 2010; therefore, the three months and six months ended June 30, 2011 include only two months of operating results for this segment. Operating segment revenues and profitability for the three months and six months ended June 30, 2011 and 2010 were as follows:

	Health Plans	Molina Medicaid Solutions	Total
		(In thousands)	
Three months ended June 30, 2011			
Premium revenue	$ 1,128,770	$ —	$ 1,128,770

As of December 31, 2010	$ 1,333,599	$ 175,615	$ 1,509,214

12. Commitments and Contingencies

Legal

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. These actions, when finally concluded and determined, are not likely, in our opinion, to have a material adverse effect on our business, consolidated financial position, cash flows, or results of operations.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $438.5 million at June 30, 2011, and $397.8 million at December 31, 2010.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of June 30, 2011, our health plans had aggregate statutory capital and surplus of approximately $448.0 million compared with the required minimum aggregate statutory capital and surplus of approximately $273.6 million. All of our health plans were in compliance with the minimum capital requirements at June 30, 2011. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

13. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of both June 30, 2011, and December 31, 2010, our carrying amount for this investment totaled $4.4 million. For the three months ended June 30, 2011 and 2010, we paid $6.6 million, and $5.3 million, respectively, for medical service fees to this provider. For the six months ended June 30, 2011 and 2010, we paid $11.9 million, and $9.7 million, respectively, for medical service fees to this provider.

Item 2. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. We use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- uncertainties regarding the impact of the Patient Protection and Affordable Care Act, including its possible repeal, judicial overturning of the individual insurance mandate, the effect of various implementing regulations, and uncertainties regarding the likely impact of other federal or state health care and insurance reform measures;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations;
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, and our ability to grow our revenues consistent with our expectations;
- the accurate estimation of incurred but not reported medical costs across our health plans;
- risks associated with the continued growth in new Medicaid and Medicare enrollees;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates;
- the continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- the timing of receipt and recognition of revenue and the amortization of expense under the state contracts of Molina Medicaid Solutions in Maine and Idaho;
- additional administrative costs and the potential payment of additional amounts to providers and/or the state by Molina Medicaid Solutions as a result of MMIS implementation issues in Idaho;
- government audits and reviews, including the audit of our Medicare plans by CMS;
- changes with respect to our provider contracts and the loss of providers;

- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive, and the interpretation and implementation of medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation or arbitration matters;
- restrictions and covenants in our credit facility;
- the relatively small number of states in which we operate health plans;
- the availability of financing to fund and capitalize our acquisitions and start-up activities and to meet our liquidity needs;
- a state's failure to renew its federal Medicaid waiver;
- an inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments; and
- changes in general economic conditions, including unemployment rates.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2010, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2010.

Adjustments

We have adjusted all applicable share and per-share amounts to reflect the retroactive effects of the three-for-two stock split in the form of a stock dividend that was effective May 20, 2011.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. Our business comprises our Health Plans segment, consisting of licensed health maintenance organizations serving Medicaid populations in ten states, and our Molina Medicaid Solutions segment, which provides design, development, implementation, and business process outsourcing solutions to Medicaid agencies in an additional five states. We also have a direct delivery business that currently consists of 14 primary care community clinics in California and two primary care community clinics in Washington; additionally, we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

We report our financial performance based on the following two reportable segments: Health Plans; and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. These health plans served approximately 1.6 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals as of June 30, 2011. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

On May 1, 2010, we acquired a health information management business which we now operate under the name, *Molina Medicaid Solutions*SM. Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the six months ended June 30, 2011, we received approximately 94% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with the Centers for Medicare and Medicaid Services, or CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the six months ended June 30, 2011, we received approximately 6% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children's Health Insurance Program, or CHIP, members are generally among our lowest, with rates as low as approximately $75 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the Temporary Assistance for Needy Families, or TANF, Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $100 in California to $240 in Missouri. Among our Medicaid Aged, Blind or Disabled, or ABD, membership, PMPM premiums range from approximately $320 in Utah to $1,000 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, inpatient and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums, at nearly $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	June 30, 2011	March 31, 2011	December 31, 2010	June 30, 2010
Total Ending Membership by Health Plan:				
California	348,000	347,000	344,000	348,000
Florida	66,000	66,000	61,000	54,000
Michigan	220,000	225,000	227,000	226,000
Missouri	80,000	82,000	81,000	78,000
New Mexico	89,000	90,000	91,000	93,000
Ohio	245,000	248,000	245,000	234,000
Texas	129,000	128,000	94,000	42,000
Utah	82,000	80,000	79,000	77,000
Washington	345,000	341,000	355,000	346,000
Wisconsin (1)	41,000	40,000	36,000	—
Total	1,645,000	1,647,000	1,613,000	1,498,000

	June 30, 2011	March 31, 2011	December 31, 2010	June 30, 2010
Total Ending Membership by State for our Medicare Advantage Plans (1):				
California	6,000	5,300	4,900	3,600
Florida	600	600	500	500
Michigan	7,100	6,700	6,300	5,000
New Mexico	700	700	600	600
Ohio	200	400	—	—
Texas	600	600	700	600
Utah	7,000	6,700	8,900	8,100
Washington	4,000	3,300	2,600	1,900
Total	26,200	24,300	24,500	20,300
Total Ending Membership by State for our Aged, Blind or Disabled Population:				
California	17,000	14,100	13,900	13,600
Florida	10,300	10,300	10,000	9,300
Michigan	31,600	32,000	31,700	31,600
New Mexico	5,600	5,600	5,700	5,800
Ohio	28,700	28,200	28,200	27,400
Texas	52,000	51,200	19,000	18,500
Utah	8,300	8,200	8,000	7,600
Washington	4,400	4,300	4,000	3,700
Wisconsin (1)	1,700	1,700	1,700	—
Total	159,600	155,600	122,200	117,500

(1) We acquired the Wisconsin health plan on September 1, 2010. As of June 30, 2011, the Wisconsin health plan had approximately 2,300 Medicare Advantage members covered under a reinsurance contract with a third party; these members are not included in the membership tables herein.

Molina Medicaid Solutions Segment

Molina Medicaid Solutions' MMIS contracts extend over a number of years, and cover the life of the MMIS from inception through at least the first five years of its operation. The contracts are subject to extension by the exercise of an option, and also by renewal of the base contract. The contracts have a life cycle beginning with the design, development, and implementation of the MMIS and continuing through the operation of the system. Payment during the design, development, and implementation phase of the contract, or the DDI phase, is generally based upon the attainment of specific milestones in systems development as agreed upon ahead of time by the parties. Payment during the operations phase typically takes the form of either a flat monthly fee or payment for specific measures of capacity or activity, such as the number of claims processed, or the number of Medicaid beneficiaries served by the MMIS. Contracts may also call for the adjustment of amounts paid if certain activity measures exceed or fall below certain thresholds. In some circumstances, revenue recognition may be delayed for long periods while we await formal customer acceptance of our products and/or services. In those circumstances, recognition of a portion of our costs may be deferred.

Under our contracts in Louisiana, New Jersey, and West Virginia, we provide primarily business process outsourcing and technology outsourcing services, because the development of the MMIS solution has been completed. Under these contracts, we recognize outsourcing service revenue on a straight-line basis over the remaining term of the contract. In Maine we completed the DDI phase of our contract effective September 1, 2010. In Idaho, we expect to complete the DDI phase of our contract during 2011. We began revenue and cost recognition for our Maine contract in September 2010, and expect to begin revenue and cost recognition for our Idaho contract in the second half of 2012.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service* — Expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.
- *Capitation* — Expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- *Pharmacy* — Expenses for all drug, injectible, and immunization costs paid through our pharmacy benefit manager.
- *Other* — Expenses for medically related administrative costs of approximately $49.6 million, and $41.0 million, for the six months ended June 30, 2011 and 2010, respectively, including certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Policies" below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our contracts in Louisiana, Maine, New Jersey, West Virginia, and Florida, as well as certain selling, general and administrative expenses. Additionally, certain indirect costs incurred under our contracts in Maine (prior to exiting the DDI phase of that contract in September 2010) and Idaho are also expensed to cost of service revenue.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period. We began to recognize deferred costs for our Maine contract in September 2010, at the same time we began to recognize revenue associated with that contract. In Idaho, we expect to begin recognition of deferred contract costs in the second half of 2012, in a manner consistent with our anticipated recognition of revenue.

Second Quarter Performance Summary

The following table and narrative briefly summarizes our financial and operating performance for the three and six months ended June 30, 2011. Comparable metrics for the second quarter of 2010 are also shown. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are computed as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
	(Dollar amounts in thousands, except per share data)			
Earnings per diluted share	$ 0.38	$ 0.27	$ 0.75	$ 0.54
Premium revenue	$ 1,128,770	$ 976,685	$ 2,210,208	$ 1,941,905
Service revenue	$ 36,888	$ 21,054	$ 73,562	$ 21,054
Operating income	$ 31,410	$ 21,178	$ 62,710	$ 41,616
Net income	$ 17,440	$ 10,579	$ 34,828	$ 21,169
Total ending membership	1,645,000	1,498,000	1,645,000	1,498,000
Premium revenue	96.7%	97.7%	96.7%	98.8%
Service revenue	3.2	2.1	3.2	1.1
Investment income	0.1	0.2	0.1	0.1
Total revenue	100.0%	100.0%	100.0%	100.0%
Medical care ratio	84.1%	86.0%	84.3%	85.6%
General and administrative expense ratio	8.3%	7.8%	8.4%	8.0%
Premium tax ratio	3.3%	3.6%	3.4%	3.6%
Operating income	2.7%	2.1%	2.7%	2.1%
Net income	1.5%	1.1%	1.5%	1.1%
Effective tax rate	37.1%	38.1%	37.2%	38.0%

Compared with the second quarter of 2010, our second quarter of 2011 was marked by strong membership growth, increased PMPM revenue, and lower medical costs. Earnings per share in the second quarter of 2011 were up 41%, over the second quarter of 2010, premium revenues were up 16%, operating income was up 48%, and aggregate membership grew by 10%. Meanwhile, the aggregate medical care ratio of our health plans declined by 190 basis points. Our larger and more established health plans performed the strongest in the quarter, with each of California, Michigan, Ohio, Utah, and Washington having lower medical care ratios compared with the second quarter of 2010. Our Florida and Wisconsin health plans continue to face challenges, and our Texas health plan also experienced an increase in its medical care ratio in the second quarter. We have undertaken a number of measures—focused on both utilization and unit cost reductions—to improve the profitability of our Florida, Wisconsin, and Texas health plans. Our previous experiences in entering new states and in serving new populations —where we were able over time to reduce initially high medical care ratios—gives us confidence that we have the ability to improve the performance of our Florida, Wisconsin, and Texas health plans.

Medicare enrollment exceeded 26,000 members at June 30, 2011, and Medicare premium revenue for the quarter was $95.5 million compared with $67.6 million in the second quarter of 2010. With respect to our Molina Medicaid Solutions business, our system stabilization efforts in Idaho and Maine are taking longer and are more costly than we had anticipated. However, our profit margins in our fiscal agent contracts in New Jersey, Louisiana, and West Virginia remain stable, and we believe that the profitability of the Molina Medicaid Solutions segment will improve as system development and stabilization costs in Idaho and Maine decline.

We remain concerned about state budget deficits, which are not expected to improve during the remainder of 2011. Accordingly, the rate environment for our health plans remains uncertain, and in some instances we expect rate reductions during the second half of 2011, including a 2.5% reduction in New Mexico effective July 1, 2011, a 2% reduction in Utah effective July 1, 2011, and a modest rate reduction in Texas expected to be effective September 1, 2011. We also believe that the state of California intends to implement a rate reduction in the second half of 2011. However, our Missouri health plan has received notification that it will receive a blended rate increase of approximately 5% effective July 1, 2011.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intends to award the contract for a replacement MMIS to another firm. We have submitted a protest in connection with this notice, and in response the state has issued a stay of the intent to award and all contract negotiations have ceased. Our revenue under the Louisiana MMIS contract from May 1, 2010, the date we acquired Molina Medicaid Solutions, through December 31, 2010, was approximately $32 million. For the six months ended June 30, 2011, our revenue under the Louisiana MMIS contract was $24 million. Until the replacement MMIS is designed, developed, and implemented by the vendor that ultimately enters into a contract with the state, we will continue to perform under the existing MMIS contract, a period which we expect to last at least two years.

Results of Operations

Three Months Ended June 30, 2011 Compared with the Three Months Ended June 30, 2010

Health Plans Segment

Premium Revenue

In the three months ended June 30, 2011 compared with the three months ended June 30, 2010, premium revenue grew 16% due to membership and PMPM revenue increases of approximately 10% and 5%, respectively. Medicare premium revenue was $95.5 million for the three months ended June 30, 2011, compared with $67.6 million for the three months ended June 30, 2010.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended June 30,					
	2011			2010		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 695,551	$ 140.80	73.2%	$ 594,960	$ 132.95	70.9%
Capitation	125,958	25.50	13.2	136,764	30.56	16.3
Pharmacy	87,870	17.79	9.4	75,170	16.80	8.9
Other	39,980	8.09	4.2	32,719	7.31	3.9
Total	$ 949,359	$ 192.18	100.0%	$ 839,613	$ 187.62	100.0%

The ratio of medical care costs to premium revenue (the medical care ratio, or MCR) decreased to 84.1% in the three months ended June 30, 2011, compared with 86.0% for the three months ended June 30, 2010. Total medical care costs increased less than 3% PMPM, and less than 2% PMPM excluding the Texas health plan.

- Pharmacy costs increased approximately 6% PMPM.
- Capitation costs decreased approximately 17% PMPM, primarily due to the transition of members in Michigan and Washington into fee-for-service networks.
- Fee-for-service costs increased approximately 6% PMPM, partially due to the transition of members from capitated provider networks into fee-for-service networks.
- Fee-for-service and capitation costs combined increased less than 2% PMPM.
- Hospital utilization decreased approximately 8%.

The medical care ratio of the California health plan decreased to 84.5% in the three months ended June 30, 2011, from 85.1% in the three months ended June 30, 2010, as higher premium revenue PMPM more than offset increased pharmacy and fee-for-service costs. The California health plan added approximately 2,800 new Aged, Blind or Disabled, or ABD, members in June 2011 with an average premium revenue PMPM of approximately $450. We believe that the state of California intends to implement a rate reduction in the second half of 2011.

The medical care ratio of the Florida health plan increased to 97.0% in the three months ended June 30, 2011, from 94.4% in the three months ended June 30, 2010, primarily due to higher fee-for-service and capitation costs, which more than offset lower pharmacy costs. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Florida health plan.

The medical care ratio of the Michigan health plan decreased to 78.7% in the three months ended June 30, 2011, from 86.6% in the three months ended June 30, 2010, due to lower fee-for-service and capitation costs. Revenue at the Michigan health plan was reduced by approximately $5.5 million during the second quarter of 2010 due to retroactive rate reductions implemented by the state. Absent those reductions, the Michigan health plan's medical care ratio would have been approximately 83.7% for the three months ended June 30, 2010.

The medical care ratio of the Missouri health plan increased to 90.2% in the three months ended June 30, 2011, from 89.5% in the three months ended June 30, 2010, due to higher fee-for-service costs. The Missouri health plan received a premium rate increase of approximately 5% effective July 1, 2011.

The medical care ratio of the New Mexico health plan increased to 83.7% in the three months ended June 30, 2011, from 79.6% in the three months ended June 30, 2010, as lower fee-for-service costs failed to offset the impact of rate reductions. Additionally, premium revenues were reduced due to an increase—in the second half of 2010—in the minimum contractual amount the plan is required to spend on medical costs. The New Mexico health plan received a premium rate reduction of approximately 2.5% effective July 1, 2011.

The medical care ratio of the Ohio health plan decreased to 77.6% in the three months ended June 30, 2011, from 82.0% in the three months ended June 30, 2010, due to an increase in Medicaid premium PMPM of approximately 4.5% effective January 1, 2011 and modestly lower fee-for-service costs.

The medical care ratio of the Texas health plan increased to 95.0% in the three months ended June 30, 2011, from 90.0% in the three months ended June 30, 2010. Effective February 1, 2011, we added approximately 30,000 ABD Medicaid members in the Dallas-Fort Worth area, and effective September 1, 2010, we added approximately 54,000 members state-wide who are covered under the Children's Health Insurance Program, or CHIP. Costs associated with our ABD contracts, particularly in the Dallas-Fort Worth region, are running substantially higher than in our other markets, due to both high utilization and high unit costs. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Texas health plan. We believe that the state of Texas intends to implement a modest rate reduction effective September 1, 2011.

The medical care ratio of the Utah health plan decreased to 75.4% in the three months ended June 30, 2011, from 93.9% in the three months ended June 30, 2010, primarily due to reduced fee-for-service costs and an increase in Medicaid premium PMPM of approximately 7% effective July 1, 2010. Lower fee-for-service costs were the result of both lower unit costs and lower utilization. During the second quarter of 2011 we settled certain claims we had made against the state regarding the savings share provision of our contract in effect from 2003 through June of 2009. Additionally, we recognized a liability for certain overpayments received from the state for the period 2003 through 2009. As a result of these developments, we recognized $6.9 million in premium revenue without any corresponding charge to expense during the second quarter of 2011. The Utah health plan received a premium rate reduction of approximately 2% effective July 1, 2011.

The medical care ratio of the Washington health plan increased to 84.8% in the three months ended June 30, 2011, from 83.1% in the three months ended June 30, 2010. Higher fee-for-service and pharmacy costs more than offset lower capitation costs.

The medical care ratio of the Wisconsin health plan (acquired September 1, 2010) was 80.8% in the three months ended June 30, 2011. The Wisconsin health plan recorded a premium deficiency reserve of $3.35 million in the first quarter of 2011. That premium deficiency reserve was reduced by $1.8 million in the second quarter. Absent the premium deficiency reserve reduction, the Wisconsin plan's MCR would have been approximately 91% in the three months ended June 30, 2011. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Wisconsin health plan.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended June 30, 2011						
	Member Months(1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	1,043	$ 139,097	$ 133.35	$ 117,511	$ 112.66	84.5%	$ 1,921
Florida	197	49,770	252.78	48,294	245.29	97.0	34
Michigan	668	165,575	247.74	130,325	195.00	78.7	9,728
Missouri	243	56,625	232.80	51,100	210.08	90.2	—
New Mexico	270	81,973	304.29	68,579	254.57	83.7	2,423
Ohio	736	230,874	313.36	179,102	243.09	77.6	17,782

Utah	230	64,934	281.44	60,975	264.28	93.9	—
Washington	1,022	186,204	182.23	154,792	151.49	83.1	3,394
Wisconsin(2)	—	—	—	—	—	—	—
Other(3)	—	2,875	—	10,005	—	—	43
	4,475	$976,685	$ 218.25	$ 839,613	$ 187.62	86.0%	$ 34,995

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) We acquired the Wisconsin health plan on September 1, 2010.

(3) "Other" medical care costs also include medically related administrative costs at the parent company.

Days in Medical Claims and Benefits Payable

The days in medical claims and benefits payable were as follows:

(Dollars in thousands)	June 30, 2011	March 31, 2011	Dec. 31, 2010	June 30, 2010
Days in claims payable — fee-for-service only	39 days	41 days	42 days	44 days
Number of claims in inventory at end of period	121,900	185,300	143,600	106,700
Billed charges of claims in inventory at end of period (dollars in thousands)	$ 205,800	$ 250,600	$ 218,900	$ 147,500

Molina Medicaid Solutions Segment

Molina Medicaid Solutions was acquired on May 1, 2010; therefore, the three months ended June 30, 2010 include only two months of operating results for this segment. Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended June 30, 2011	Two Months Ended June 30, 2010
	(In thousands)	
Service revenue before amortization	$ 38,434	$ 22,645
Less: amortization recorded as reduction of service revenue	(1,546)	(1,591)
Service revenue	36,888	21,054
Cost of service revenue	39,215	14,254
General and administrative costs	1,875	966
Amortization of customer relationship intangibles recorded as amortization	1,282	829
Operating (loss) income	$ (5,484)	$ 5,005

In late April of 2011, Idaho Department of Health and Welfare indicated that it wished to remit to us an amount approximately $5 to $6 million less than the amount of our invoices for the operation of the MMIS in that state for the period June 1, 2010 through December 31, 2010. The Department claimed at that time that we were not in compliance with certain contractual requirements during the period June 1, 2010 through December 31, 2010. We do not believe the basis of the proposed reduction was contractually sound. In June 2011, we reached tentative agreement with the Department regarding the determination of our monthly operating revenue in Idaho. As a result of the tentative agreement, we estimate that revenue from operations in Idaho will be reduced by approximately $3 million for the period June 1, 2010 through June 30, 2011, and by an additional $1 million for the period July 1, 2011 through December 31, 2011. We do not believe that the tentative agreement will result in any reduction to amounts previously expected to be received for operations subsequent to December 31, 2011.

We are currently deferring recognition of all revenue as well as all direct costs (to the extent that such costs are estimated to be recoverable) in Idaho until the MMIS in that state receives certification from the Centers for Medicare and Medicaid Services. Cost of service revenue for the second quarter of 2011 includes $7.0 million of direct costs associated with the Idaho contract that would otherwise have had been recorded as deferred contract costs. In assessing the recoverability of the deferred contract costs associated with the Idaho contract at June 30, 2011, we determined that these costs should be expensed as a period cost. The reduction in anticipated revenue discussed above, as well as higher expected costs over the term of the contract, have lowered the net amount that we expect to realize under the contract, requiring us to write down deferred contract costs.

Financial results remain strong under our Louisiana, New Jersey, and West Virginia MMIS contracts. Based upon our cost experience, we believe that the contract pricing agreed to by our predecessor under the Idaho and Maine MMIS contracts was inappropriately low. However, we believe that the profitability of the Molina Medicaid Solutions segment will improve as system development and stabilization costs in those two states decline.

A substantial milestone for the Idaho contract was reached in early July 2011, when we received notice from the Idaho Department of Health and Welfare that the exit of our MMIS from “pilot operations” and “user acceptance testing” had been approved, and that we may now invoice the state for certain payments associated with that approval.

Consolidated Expenses

General and Administrative Expenses

General and administrative, or G&A, expenses, were $96.9 million, or 8.3% of total revenue, for the three months ended June 30, 2011 compared with $78.1 million, or 7.8% of total revenue, for the three months ended June 30, 2010.

Premium Tax Expenses

Premium tax expense decreased to 3.3% of premium revenue, in the three months ended June 30, 2011, from 3.6% in the three months ended June 30, 2010, due to a shift in revenue to states with comparatively low premium tax rates.

Interest Expense

Interest expense decreased to $3.7 million for the three months ended June 30, 2011, from $4.1 million for the three months ended June 30, 2010. Interest expense includes non-cash interest expense relating to our convertible senior notes, which totalled $1.4 million and $1.3 million for the three months ended June 30, 2011, and 2010, respectively.

Income Taxes

Income tax expense is recorded at an effective rate of 37.1% for the three months ended June 30, 2011 compared with 38.1% for the three months ended June 30, 2010. The lower rate in 2011 is primarily due to lower state income taxes.

Six Months Ended June 30, 2011 Compared with the Six Months Ended June 30, 2010

Health Plans Segment

Premium Revenue

Premium revenue grew 14% in the six months ended June 30, 2011, compared with the six months ended June 30, 2010, due to membership and PMPM revenue increases of 10% and 3%, respectively. Medicare premium revenue was $180.8 million for the six months ended June 30, 2011, compared with $117.9 million for the six months ended June 30, 2010.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Six Months Ended June 30,					
	2011			2010		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$1,351,435	$ 137.31	72.5%	$1,161,839	$ 130.52	69.9%
Capitation	254,640	25.87	13.7	273,896	30.77	16.5
Pharmacy	179,446	18.23	9.6	165,241	18.56	9.9
Other	77,370	7.86	4.2	61,453	6.90	3.7
Total	$1,862,891	$ 189.27	100.0%	$1,662,429	$ 186.75	100.0%

The medical care ratio decreased to 84.3% in the six months ended June 30, 2011, compared with 85.6% for the six months ended June 30, 2010. Total medical care costs increased less than 2% PMPM.

- Pharmacy costs (adjusted for the state's retention of the pharmacy benefit in Ohio effective February 1, 2010) increased approximately 5% PMPM.
- Capitation costs decreased approximately 16% PMPM, primarily due to the transition of members in Michigan and Washington into fee-for-service networks.
- Fee-for-service costs increased approximately 5% PMPM, partially due to the transition of members from capitated provider networks into fee-for-service networks.
- Fee-for-service and capitation costs combined increased approximately 1% PMPM.
- Hospital utilization decreased approximately 7%.

The medical care ratio of the California health plan decreased to 84.4% in the six months ended June 30, 2011, from 86.0% in the six months ended June 30, 2010, as higher premium revenue PMPM more than offset higher pharmacy and fee-for-service costs. We believe that the state of California intends to implement a rate reduction in the second half of 2011.

The medical care ratio of the Florida health plan increased to 96.8% in the six months ended June 30, 2011, from 91.7% in the six months ended June 30, 2010, primarily due to higher fee-for-service and capitation costs, which more than offset lower pharmacy costs. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Florida health plan.

The medical care ratio of the Michigan health plan decreased to 79.9% in the six months ended June 30, 2011, from 83.7% in the six months ended June 30, 2010 as lower pharmacy and capitation costs more than offset increased fee-for-service costs. As discussed above, the medical care ratio for the Michigan health plan was increased in the first half of 2011 by retroactive rate reductions implemented by the state. The total impact of those reductions was to decrease premium revenue by $8.7 million in the first half of 2010. Absent those reductions, the Michigan health plan's medical ratio would have been approximately 81.4% for the six months ended June 30, 2010.

The medical care ratio of the Missouri health plan increased to 91.9% in the six months ended June 30, 2011, from 86.5% in the six months ended June 30, 2010, due to higher fee-for-service costs. As noted above, the Missouri health plan received a premium rate increase of approximately 5% effective July 1, 2011.

The medical care ratio of the New Mexico health plan increased to 83.2% in the six months ended June 30, 2011, from 78.5% in the six months ended June 30, 2010, as lower fee-for-service costs failed to offset the impact of rate reductions. Additionally, premium revenues were reduced due to an increase—in the second half of 2010—in the minimum contractual amount the plan is required to spend on medical costs. The New Mexico health plan received a premium rate reduction of approximately 2.5% effective July 1, 2011.

The medical care ratio of the Ohio health plan decreased to 76.1% in the six months ended June 30, 2011, from 80.5% in the six months ended June 30, 2010, due to an increase in Medicaid premium PMPM of approximately 4.5% effective January 1, 2011 and modestly lower fee-for-service costs.

The medical care ratio of the Texas health plan increased to 93.3% in the six months ended June 30, 2011, from 86.4% in the six months ended June 30, 2010. Effective February 1, 2011, we added approximately 30,000 ABD Medicaid members in the Dallas-Fort Worth area, and effective September 1, 2010, we added approximately 54,000 members state-wide who are covered under CHIP. Costs associated with our ABD contracts, particularly in the Dallas-Fort Worth region, are running substantially higher than in our other markets, due to both high utilization and high unit costs. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Texas health plan. We believe that the state of Texas intends to implement a modest rate reduction effective September 1, 2011.

The medical care ratio of the Utah health plan decreased to 77.2% in the six months ended June 30, 2011, from 99.2% in the six months ended June 30, 2010, primarily due to reduced fee-for-service outpatient and physician costs and an increase in Medicaid premium PMPM of approximately 7% effective July 1, 2010. Lower fee-for-service costs were the result of both lower unit costs and lower utilization. During the second quarter we settled certain claims with the state regarding the savings share provision of our contract in effect from 2003 through June of 2009. We settled for the contract years 2006 through 2009 and recognized $6.9 million in premium revenue without any corresponding charge to expense. The Utah health plan received a premium rate reduction of approximately 2% effective July 1, 2011.

The medical care ratio of the Washington health plan decreased to 85.7% in the six months ended June 30, 2011, from 86.7% in the six months ended June 30, 2010. Lower capitation costs more than offset higher fee-for-service and higher pharmacy costs.

The medical care ratio of the Wisconsin health plan (acquired September 1, 2010) was 98.7% in the six months ended June 30, 2011. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Wisconsin health plan.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Six Months Ended June 30, 2011						
	Member Months(1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	2,084	$ 274,073	$ 131.49	$ 231,248	$ 110.95	84.4%	$ 3,823
Florida	389	98,992	254.68	95,863	246.63	96.8	51
Michigan	1,346	330,335	245.38	264,053	196.15	79.9	19,575
Missouri	488	111,792	229.05	102,707	210.44	91.9	—
New Mexico	541	166,579	308.12	138,616	256.40	83.2	4,388
Ohio	1,473	461,213	313.02	350,853	238.12	76.1	35,557

Wisconsin(2)	—	—	—	—	—	—	—
Other(3)	—	4,854	—	17,667	—	—	64
	8,902	$1,941,905	$ 218.15	$1,662,429	$ 186.75	85.6%	$ 69,541

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) We acquired the Wisconsin health plan on September 1, 2010.

(3) "Other" medical care costs also include medically related administrative costs of the parent company.

Molina Medicaid Solutions Segment

Molina Medicaid Solutions was acquired on May 1, 2010; therefore, the six months ended June 30, 2010 include only two months of operating results for this segment. Performance of the Molina Medicaid Solutions segment was as follows:

	Six Months Ended June 30, 2011	Two Months Ended June 30, 2010
	(In thousands)	
Service revenue before amortization	$ 77,294	$ 22,645
Amortization recorded as reduction of service revenue	(3,732)	(1,591)
Service revenue	73,562	21,054
Cost of service revenue	70,436	14,254
General and administrative costs	4,352	966
Amortization of customer relationship intangibles recorded as amortization	2,564	829
Operating (loss) income	$ (3,790)	$ 5,005

Consolidated Expenses and Other

General and Administrative Expenses

General and administrative expenses were $191.4 million, or 8.4% of total revenue, for the six months ended June 30, 2011 compared with $157.0 million, or 8.0% of total revenue, for the six months ended June 30, 2010.

Premium Tax Expense

Premium tax expense decreased to 3.4% of premium revenue, in the six months ended June 30, 2011, from 3.6% in the six months ended June 30, 2010, due to a shift in revenue to states with comparatively low premium tax rates.

Interest Expense

Interest expense decreased to $7.3 million for the six months ended June 30, 2011, from $7.5 million for the six months ended June 30, 2010. Interest expense includes non-cash interest expense relating to our convertible senior notes, which totalled $2.7 million, and $2.5 million for the six months ended June 30, 2011 and 2010, respectively.

Income Taxes

Income tax expense is recorded at an effective rate of 37.2% for the six months ended June 30, 2011 compared with 38.0% for the six months ended June 30, 2010. The lower rate in 2011 is primarily due to lower state income taxes.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and Amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service Revenue;" and
- Depreciation is recorded within the heading "Cost of Service Revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Three Months Ended June 30,			
	2011		2010	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation	$ 7,225	0.6%	$ 6,711	0.7%
Amortization of intangible assets	5,265	0.5	4,508	0.4
Depreciation and amortization reported as such in the consolidated statements of income	12,490	1.1	11,219	1.1
Amortization recorded as reduction of service revenue	1,546	0.1	1,591	0.2
Depreciation recorded as cost of service revenue	2,472	0.2	1,041	0.1
Total	$ 16,508	1.4%	$ 13,851	1.4%

	Six Months Ended June 30,			
	2011		2010	
	Amount	% of Total Revenue	Amount	% of Total Revenue

Amortization of intangible assets	10,532	0.5	8,157	0.4
Depreciation and amortization reported as such in the consolidated statements of income	25,157	1.1	21,280	1.1
Amortization recorded as reduction of service revenue	3,732	0.2	1,591	0.1
Depreciation recorded as cost of service revenue	5,713	0.2	1,041	—
Total	$ 34,602	1.5%	$ 23,912	1.2%

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue and investment income. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of June 30, 2011, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income decreased to $3.0 million for the six months ended June 30, 2011, compared with $3.1 million for the six months ended June 30, 2010. Our annualized portfolio yield for the six months ended June 30, 2011 was 0.7% compared with 0.9% for the six months ended June 30, 2010.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash provided by operating activities for the six months ended June 30, 2011 was $114.9 million compared with $25.9 million for the six months ended June 30, 2010, an increase of $89.0 million. Deferred revenue, which was a source of operating cash totalling $69.5 million in 2011, was a use of operating cash totalling $82.7 million in 2010.

Cash provided by financing activities decreased due to $105 million borrowed under our credit facility in the second quarter of 2010 in connection with our acquisition of Molina Medicaid Solutions, with no comparable activity in the current year.

Reconciliation of Non-GAAP (1) to GAAP Financial Measures

EBITDA (2)

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
	(In thousands)			
Operating income	$ 31,410	$ 21,178	$ 62,710	$ 41,616
Add back:				
Depreciation and amortization reported in the consolidated statements of cash flows	16,508	13,851	34,602	23,912
EBITDA	$ 47,918	$ 35,029	$ 97,312	$ 65,528

(1) GAAP stands for U.S. generally accepted accounting principles.

(2) We calculate EBITDA consistently on a quarterly and annual basis by adding back depreciation and amortization to operating income. Operating income includes investment income. EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities, nor should EBITDA be considered in isolation from these GAAP measures of operating performance. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At June 30, 2011, the parent company — Molina Healthcare, Inc. — held cash and investments of approximately $49.6 million, compared with approximately $65.1 million of cash and investments at December 31, 2010. This decline was primarily due to capital contributions and /or advances to our Florida, Texas, and Wisconsin health plans in the first quarter of 2011.

On a consolidated basis, at June 30, 2011, we had working capital of $419.3 million compared with $392.4 million at December 31, 2010. At June 30, 2011 we had cash and investments of $885.1 million, compared with $813.8 million of cash and investments at December 31, 2010.

We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Credit Facility

We are a party to an Amended and Restated Credit Agreement, dated as of March 9, 2005, as amended by the first amendment on October 5, 2005, the second amendment on November 6, 2006, the third amendment on May 25, 2008, the fourth amendment on April 29, 2010, and the fifth amendment on April 29, 2010, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility") for a revolving credit line of $150 million that matures in May 2012. The Credit Facility is intended to be used for general corporate purposes. As of June 30, 2011, and December 31, 2010, there was no outstanding principal balance under the Credit Facility. However, as of June 30, 2011, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho.

To the extent that in the future we incur any obligations under the Credit Facility, such obligations will be secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At June 30, 2011, we were in compliance with all financial covenants in the Credit Facility.

The commitment fee on the total unused commitments of the lenders under the Credit Facility is 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans is 200 basis points at every level of the pricing grid. Thus, the applicable margins under the Credit Facility range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. The Credit Facility carves out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of the convertible senior notes, although the $187.0 million indebtedness is included in the calculation of our consolidated leverage ratio. The fixed charge coverage ratio under the Credit Facility is required to be no less than 3.00x.

The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.50 to 1.0 for the first and second quarters of 2010 and through August 14, 2010 (on a pro forma basis). Effective as of August 15, 2010, the maximum consolidated leverage ratio under the Credit Facility reverted back to 2.75 to 1.0.

Shelf Registration Statement

Under a shelf registration statement on Form S-3 that was filed with the Securities and Exchange Commission in December 2008, we have up to $182.5 million available for the issuance of our securities, including common stock, warrants, or debt securities, that may be publicly offered from time to time at prices and terms to be determined at the time of the offering.

Convertible Senior Notes

As of June 30, 2011, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per $1,000 principal amount of the Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Regulatory Capital and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $438.5 million at June 30, 2011, and $397.8 million at December 31, 2010.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of June 30, 2011, our health plans had aggregate statutory capital and surplus of approximately $448.0 million compared with the required minimum aggregate statutory capital and surplus of approximately $273.6 million. All of our health plans were in compliance with the minimum capital requirements at June 30, 2011. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Contractual Obligations

In our Annual Report on Form 10-K for the year ended December 31, 2010, we reported on our contractual obligations as of that date. There have been no material changes to our contractual obligations since that report.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- The determination of the amount of revenue to be recognized under certain contracts that place revenue at risk dependent upon the achievement of certain quality or administrative measurements, or the expenditure of certain percentages of revenue on defined expenses, or requirements that we return a certain portion of our profits to state governments;
- The deferral of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and
- The determination of medical claims and benefits payable.

Revenue Recognition — Health Plans Segment

Certain components of premium revenue are subject to accounting estimates, and are therefore subject to retroactive revision. Chief among these are:

- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health:* A portion of premium revenue paid to our Florida health plan by the state of Florida may be refunded to the state if certain minimum amounts are not spent on defined behavioral health care costs. At June 30, 2011, we had not recorded any liability under the terms of this contract provision. If the state of Florida disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of this provision, including revisions to the definitions of premium revenue or behavioral health care costs, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our Florida health plan.
- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* A portion of premium revenue paid to our New Mexico health plan by the state of New Mexico may be refunded to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). Effective July 1, 2008, our New Mexico health plan entered into a new four-year contract that, in addition to retaining the medical cost floor, added certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At June 30, 2011, we had recorded a liability of $12.1 million under the terms of these contract provisions. If the state of New Mexico disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of these provisions, including revisions to the definitions of premium revenue, medical care costs, administrative costs or profit, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our New Mexico health plan.
- *New Mexico Health Plan At-Risk Premium Revenue:* Under our contract with the state of New Mexico, up to 1% of our New Mexico health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality of care and administrative measures dictated by the state. For the twelve months ended through the end of the state fiscal year on June 30, 2011, our New Mexico health plan has received $2.6 million in at-risk revenue for state fiscal year 2011. We have recognized $1.9 million of that amount as revenue, and recorded a liability of approximately $0.7 million as of June 30, 2011, for the remainder. If the state of New Mexico disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required.

- *Ohio Health Plan At-Risk Premium Revenue:* Under our contract with the state of Ohio, up to 1% of our Ohio health plan's revenue may be refundable to the state if certain performance measures are not met. Effective February 1, 2010, an additional 0.25% of the Ohio health plan's revenue became refundable if certain pharmacy specific performance measures were not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. For the twelve months ended through the end of the state fiscal year on June 30, 2011, our Ohio health plan has received $10.3 million in at-risk revenue for state fiscal year 2011. We have recognized $8.6 million of that amount as revenue, and recorded a liability of approximately $1.7 million as of June 30, 2011, for the remainder. If the state of Ohio disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required. For example, during the third quarter of 2010, we reversed the recognition of approximately $3.3 million of at-risk revenue, of which $1.9 million and $1.4 million were initially recognized in 2010, and 2009, respectively.

- *Utah Health Plan Premium Revenue:* Our Utah health plan was entitled to receive additional premium revenue from the state of Utah as an incentive payment for saving the state of Utah money in relation to fee-for-service Medicaid during the period 2003 through August 31, 2009.

  During the second quarter of 2011 we settled all claims related to state contract years 2006 through 2009 and received payments totalling $13.6 million in settlement of this matter. The state in turn has made demands upon us totalling $9.6 million to recover alleged over payment of premium revenue to us for the period 2003 through 2009. We are disputing many of those claims and have recorded a liability of approximately $6.7 million in connection with the premium revenue overpayments. We recognized approximately $6.9 million of revenue in connection with this matter during the second of quarter of 2011, without any corresponding increase to expense.

- *Texas Health Plan Profit Sharing:* Under our contract with the state of Texas there is a profit-sharing agreement, where we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As of June 30, 2011, we had an aggregate liability of approximately $0.1 million accrued pursuant to our profit-sharing agreement with the state of Texas for the 2010 and 2011 contract years (ending August 31st of each year). Because the final settlement calculations include a claims run-out period of nearly one year, an adjustment to the amounts owed may be required.

- *Texas Health Plan At-Risk Premium Revenue:* Under our contract with the state of Texas, up to 1% of our Texas health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality-of-care measures established by the state. The time period for the assessment of these performance measures previously followed the state's fiscal year, but effective January 1, 2011, it follows the calendar year. For the six months ended June 30, 2011, our Texas health plan has received $1.2 million in at-risk revenue for calendar year 2011. We have recognized $0.6 million of that amount as revenue, and recorded a liability of approximately $0.6 million as of June 30, 2011, for the remainder. If the state of Texas disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required.

- *Medicare Premium Revenue:* Based on member encounter data that we submit to CMS, our Medicare revenue is subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. That analysis is similar to the process for the adjustment of member risk scores, but is further complicated by member pharmacy cost sharing provisions attached to the Medicare pharmacy benefit that do not apply to the services measured by the member risk adjustment process. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns, there is no liability related to the potential recoupment of Medicare premium revenue at June 30, 2011. To the extent that the premium revenue ultimately received from CMS differs from recorded amounts, we will adjust reported Medicare revenue.

Recognition of Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of three elements of service. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. The second element, following completion of the DDI element, is the operation of the MMIS under a business process outsourcing, or BPO, arrangement. While providing BPO services, we also provide the state with the third contracted element — training and IT support and hosting services (training and support).

Because they include these three elements of service, our Molina Medicaid Solutions contracts are multiple-element arrangements. The following discussion applies to our contracts with multiple elements entered into prior to January 1, 2011, before our prospective adoption of *ASU No. 2009-13, Revenue Recognition (ASC Topic 605) — Multiple-Deliverable Revenue Arrangements*.

For those contracts entered into prior to January 1, 2011, we have no vendor specific objective evidence, or VSOE, of fair value for any of the individual elements in these contracts, and at no point in the contract will we have VSOE for the undelivered elements in the contract. We lack VSOE of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of products and services, which vary significantly between contracts; and

- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our newer contracts (commercial off-the-shelf technology solutions).

The absence of VSOE within the context of a multiple element arrangement requires us to delay recognition of any revenue for an MMIS contract until completion of the DDI phase of the contract. As a general principle, revenue recognition will therefore commence at the completion of the DDI phase, and all revenue will be recognized over the period that BPO services and training and support services are provided. Consistent with the deferral of revenue, recognition of all direct costs (such as direct labor, hardware, and software) associated with the DDI phase of our contracts is deferred until the commencement of revenue recognition. Deferred costs are recognized on a straight-line basis over the period of revenue recognition.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any revenue at risk (whether DDI, BPO services, or training and support services) until the contingency has been removed. When we defer revenue recognition we also defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with the revenue deferred. Such deferred contract costs are recognized on a straight-line basis over the period of revenue recognition.

However, direct costs in excess of the estimated future net revenues associated with a contract may not be deferred. In circumstances where estimated direct costs over the life of a contract exceed estimated future net revenues of that contract, the excess of direct costs over revenue is expensed as a period cost. As noted below, we were unable to defer $7.0 million of direct contract costs associated with our Idaho contract during the second quarter of 2011 because estimated direct costs over the life of the contract exceed estimated future net revenues.

We began to recognize revenue and the related deferred costs associated with our Maine contract in September 2010.

In Idaho, revenue recognition is expected to begin during the second half of 2012. Consistent with the deferral of revenue, we have deferred recognition of the direct contract costs associated with that revenue. Deferred contract costs, if any, deferred through the date revenue recognition begins will be recognized simultaneously with revenue.

In late April of 2011, Idaho Department of Health and Welfare indicated that it wished to remit to us an amount approximately $5 to $6 million less than the amount of our invoices for the operation of the MMIS in that state for the period June 1, 2010 through December 31, 2010. The Department claimed at that time that we were not in compliance with certain contractual requirements during the period June 1, 2010 through December 31, 2010. We do not believe the basis of the proposed reduction was contractually sound. In June 2011, we reached tentative agreement with the Department regarding the determination of our monthly operating revenue in Idaho. As a result of the tentative agreement, we estimate that revenue from operations in Idaho will be reduced by approximately $3 million for the period June 1, 2010 through June 30, 2011, and by an additional $1 million for the period July 1, 2011 through December 31, 2011. We do not believe that the tentative agreement will result in any reduction to amounts previously expected to be received for operations subsequent to December 31, 2011. As noted above, all revenue associated with our Idaho MMIS contract is currently being deferred.

In assessing the recoverability of the deferred contract costs associated with the Idaho contract at June 30, 2011, we determined that our current estimate of expenses over the life of the Idaho MMIS contract exceeded our current estimate of net revenues to be derived from that contract by approximately $7.0 million. Accordingly, we expensed through cost of service revenue $7.0 million of direct costs associated with the Idaho contract that otherwise would have been recorded as deferred contract costs. The reduction in revenue discussed above, as well as higher expected costs over the term of the contract, have lowered the net amount that we expect to realize under the contract, requiring us to write down deferred contract costs. We currently expect the contract to perform financially at a break even basis through its initial term. So long as we continue to defer revenue recognition under the contract, we will also continue to defer direct costs associated with the agreement, unless our analysis indicates that the contract is performing at less than break even.

Molina Medicaid Solutions' deferred revenue totalled $38.6 million at June 30, 2011, and $10.9 million at December 31, 2010, and unamortized deferred contract costs were $42.6 million at June 30, 2011, and $28.4 million at December 31, 2010.

For all new or materially modified revenue arrangements with multiple elements entered into on or after January 1, 2011, which we expect will consist of contracts entered into by our Molina Medicaid Solutions segment, we apply the guidance contained in ASU No. 2009-13. For these arrangements, we allocate total arrangement consideration to the elements of the arrangement, which are expected to be DDI, BPO, and training and support, because this is consistent with the current elements included in our Molina Medicaid Solutions contracts. The arrangement allocation is performed using the relative selling-price method. When determining the selling price of each element, we first attempt to use VSOE if available. If VSOE is not available, we attempt to use third-party evidence, or TPE, of vendors selling similar services to similarly situated customers on a standalone basis, if available. If neither VSOE nor TPE are available, we use our best estimate of the selling price for each element.

We then evaluate whether, at each stage in the life cycle of the contract, we are able to recognize revenue associated with that element. To the extent that our revenue arrangements have provisions that allow our state customers to refuse acceptance of services performed, we are still required to defer revenue recognition until such state customers accept our performance. Once this acceptance is achieved, we immediately recognize the revenue associated with any delivered elements which differs from our current practice for arrangements entered into prior to January 1, 2011, where the revenue associated with delivered elements is recognized over the final service element of the arrangement because VSOE for the other elements does not exist. As such, we expect that the adoption of ASU No. 2009-13 will result in an overall acceleration of revenue recognition with respect to any multiple-element arrangements entered into on or after January 1, 2011. We have entered into no new or materially modified revenue arrangements with multiple elements since January 1, 2011.

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	June 30, 2011	Dec. 31, 2010	June 30, 2010
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 270,558	$ 275,259	$ 268,652
Capitation payable	43,131	49,598	49,101
Pharmacy	15,094	14,649	13,385
Other	12,830	14,850	12,662
	$ 341,613	$ 354,356	$ 343,800

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are “Incurred But Not Paid,” or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $270.6 million of our total medical claims and benefits payable of $341.6 million as of June 30, 2011. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider’s monthly capitation payment), our IBNP liability at June 30, 2011, was $264.1 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of June 30, 2011 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding June 30, 2011, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ 106,455
(4%)	70,970
(2%)	35,485
2%	(35,485)
4%	(70,970)
6%	(106,455)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of June 30, 2011 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	Increase (Decrease) in Medical Claims and Benefits Payable
(6%)	$ (60,630)
(4%)	(40,420)
(2%)	(20,210)
2%	20,210
4%	40,420
6%	60,630

The following per-share amounts are based on a combined federal and state statutory tax rate of 37.5%, and 46.4 million diluted shares outstanding for the six months ended June 30, 2011. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at June 30, 2011, net income for the six months ended June 30, 2011 would increase or decrease by approximately $11.1 million, or $0.24 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at June 30, 2011, net income for the three months ended June 30, 2011 would increase or decrease by approximately $6.3 million, or $0.14 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $55.4 million, or $1.20 per diluted share, and $31.6 million, or $0.68 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $11.1 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2010, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 15.7%.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2010 and through June 30, 2011 were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

We recognized a benefit from prior period claims development in the amount of $45.4 million for the six months ended June 30, 2011 (see table below). This amount represents our estimate as of June 30, 2011 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2010 exceeded the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2010 was due primarily to the following factors:

- We overestimated the impact of an increase in pending high dollar claims at our Ohio health plan.
- We underestimated the lower cost associated with changes to provider fee schedules (primarily for outpatient facility costs) in New Mexico effective November 1, 2010.

The following developments partially offset the overestimation of our claims liability at December 31, 2010:

- In Missouri, delays in claims processing late in the fourth quarter of 2010 led us to underestimate the size of our claims liability at December 31, 2010.
- We underestimated the costs associated with our assumption of risk for a new population in Texas (rural CHIP members) effective September 1, 2010.

We recognized a benefit from prior period claims development in the amount of $49.4 million for the year ended December 31, 2010 (see table below). This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2009. The overestimation of claims liability at December 31, 2009 was the result of the following factors:

- In New Mexico, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- In California, we underestimated the extent to which various network restructuring, provider contracting, and medical management initiatives had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

In estimating our claims liability at June 30, 2011, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- The assumption of risk for a new population by our Texas health plan (Dallas-Fort Worth area ABD members) effective February 1, 2011.
- The transition of certain members by our Washington and Michigan health plans from full-risk capitated provider arrangements to fee-for-service providers effective December 31, 2010. This change had the effect of transferring back to the Company risk that had previously been assumed by capitated medical providers.
- A substantial decline in claims inventory at our Michigan, Missouri, and Texas health plans.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2010 and through June 30, 2011, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The negative amounts displayed for "*Components of medical care costs related to:* Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Six Months Ended		Three Months Ended	Year Ended
	June 30, 2011	June 30, 2010	March 31, 2011	December 31, 2010
	(Dollars in thousands, except per-member amounts)

Billed charges of claims received during the period	$ 6,963,300	$ 5,605,400	$ 3,386,600	$ 11,686,100

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 3. ***Quantitative and Qualitative Disclosures About Market Risk.***

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: During the fiscal quarter ended June 30, 2011, we completed the implementation of a new enterprise resource planning, or ERP, software system. This system is used in the preparation of, among other things, our financial statements and required reports. Other than the ERP implementation, there has been no change in our internal control over financial reporting during the fiscal quarter ended June 30, 2011 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. ***Legal Proceedings***

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly-funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. Based upon the evaluation of information currently available, we believe that these actions, when finally concluded and determined, are not likely to have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Item 1A. ***Risk Factors***

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. The following risk factor was identified by the Company during the second quarter of 2011 and is a supplement to the risk factors identified in Part I, Item 1A — Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2010 as filed with the SEC on March 8, 2011. The risk factor described herein and in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, or results of operations.

An impairment charge with respect to our recorded goodwill or indefinite-lived intangible assets could have a material impact on our financial results.

We conduct formal impairment tests on material long-lived assets, such as goodwill and indefinite-lived intangible assets, and intangible assets, net, at least annually; additionally, we continually evaluate whether events or changes in business conditions suggest potential impairment of such assets. Our judgments regarding the existence of impairment indicators are based on legal factors, market conditions, and operational performance. For example, our health plan subsidiaries have generally been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that these contracts will continue to be renewed. The non-renewal of such a contract would be an indicator of impairment.

As of June 30, 2011, the balance of goodwill and indefinite-lived intangible assets was $212.5 million. Goodwill and indefinite-lived assets are not amortized, but are subject to impairment tests on an annual basis or more frequently if indicators of impairment exist. As of June 30, 2011, the balance of intangible assets, net, was $91.2 million. Intangible assets are amortized generally on a straight-line basis over their estimated useful lives. The determination of the value of goodwill and indefinite-lived intangible assets, and intangible assets, net, requires us to make estimates and assumptions about estimated asset lives, future business trends, and growth. Such evaluation is significantly impacted by estimates and assumptions of future revenues, costs and expenses, and other factors.

If an event or events occur that would cause us to revise our estimates and assumptions used in analyzing the value of our goodwill and indefinite-lived intangible assets, and intangible assets, net, such revision could result in a non-cash impairment charge that could have a material impact on our financial results.

Item 6. Exhibits

Exhibit No.	Title
31.1	Certification of Chief Executive Officer pursuant to Rules 13a-14(a)/15d-14(a) under the Securities Exchange Act of 1934, as amended.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended June 30, 2011 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Adjustments to reconcile net income to net cash provided by operating activities:		
Depreciation and amortization	18,094	10,061
Deferred income taxes	1,619	3,094
Stock-based compensation	4,064	2,136
Non-cash interest on convertible senior notes	1,340	1,243
Amortization of premium/discount on investments	1,644	259
Amortization of deferred financing costs	503	344
Unrealized gain on trading securities	—	(540)
Loss on rights agreement	—	493
Tax deficiency from employee stock compensation	(264)	(353)
Changes in operating assets and liabilities:		
Receivables	(2,168)	8,054
Prepaid expenses and other current assets	(8,142)	(668)
Medical claims and benefits payable	(2,974)	11,657
Accounts payable and accrued liabilities	(25,796)	15,134
Deferred revenue	84,172	(90,664)
Income taxes	(5,430)	2,935
Net cash provided by (used in) operating activities	84,050	(26,225)
Investing activities:		
Purchases of equipment	(14,941)	(5,976)
Purchases of investments	(104,984)	(49,439)
Sales and maturities of investments	61,275	52,967
Net cash paid in business combinations	(3,253)	(2,430)
Increase in deferred contract costs	(9,635)	—
Increase in restricted investments	(7,207)	(656)
Change in other noncurrent assets and liabilities	(937)	426
Net cash used in investing activities	(79,682)	(5,108)
Financing activities:		
Proceeds from employee stock plans	2,462	—
Excess tax benefits from employee stock compensation	1,076	113
Net cash provided by financing activities	3,538	113
Net increase (decrease) in cash and cash equivalents	7,906	(31,220)
Cash and cash equivalents at beginning of period	455,886	469,501
Cash and cash equivalents at end of period	$ 463,792	$ 438,281
Supplemental cash flow information:		
Cash paid during the period for:		
Income taxes	$ 14,068	$ 91
Interest	$ 269	$ 142
Schedule of non-cash investing and financing activities:		
Retirement of common stock used for stock-based compensation	$ 3,161	$ 1,526
Details of business combinations adjustments:		
Increase in fair value of assets acquired	$ (256)	$ —
Decrease in fair value of liabilities assumed	(1,045)	—
Decrease in payable to sellers	(1,952)	(2,430)
Net cash paid in business combinations	$ (3,253)	$ (2,430)

See accompanying notes.

MOLINA HEALTHCARE, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
March 31, 2011

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. As of March 31, 2011, these health plans served approximately 1.6 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

Our Molina Medicaid Solutions segment, which we acquired during the second quarter of 2010, provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc. and all majority owned subsidiaries. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated in consolidation. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2011. Financial information related to subsidiaries acquired during any year is included only for the period subsequent to their acquisition.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2010. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2010 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2010 audited financial statements.

Reclassifications

We have reclassified certain amounts in the 2010 consolidated statement of cash flows to conform to the 2011 presentation.

2. Significant Accounting Policies

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $11.0 million as of March 31, 2011, and $11.0 million as of December 31, 2010. Approximately $8.4 million of the unrecognized tax benefits recorded at March 31, 2011, relate to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $7.8 million as of March 31, 2011. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities will decrease by approximately $0.5 million due to the expiration of statute of limitations.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of March 31, 2011, and December 31, 2010, we had accrued $88,000 and $82,000, respectively, for the payment of interest and penalties.

Deferral of Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of three elements of service. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. The second element, following completion of the DDI element, is the operation of the MMIS under a business process outsourcing, or BPO, arrangement. While providing BPO services, we also provide the state with the third contracted element — training and IT support and hosting services (training and support).

Because they include these three elements of service, our Molina Medicaid Solutions contracts are multiple-element arrangements. The following discussion applies to our contracts with multiple elements entered into prior to January 1, 2011, before our prospective adoption of *ASU No. 2009-13, Revenue Recognition (ASC Topic 605) — Multiple-Deliverable Revenue Arrangements*. *See* discussion below on page 9.

For those contracts entered into prior to January 1, 2011, we have no vendor specific objective evidence, or VSOE, of fair value for any of the individual elements in these contracts, and at no point in the contract will we have VSOE for the undelivered elements in the contract. We lack VSOE of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of products and services, which vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our newer contracts (commercial off-the-shelf technology solutions).

The absence of VSOE within the context of a multiple element arrangement requires us to delay recognition of any revenue for an MMIS contract until completion of the DDI phase of the contract. As a general principle, revenue recognition will therefore commence at the completion of the DDI phase, and all revenue will be recognized over the period that BPO services and training and support services are provided. Consistent with the deferral of revenue, recognition of all direct costs (such as direct labor, hardware, and software) associated with the DDI phase of our contracts is deferred until the commencement of revenue recognition. Deferred costs are recognized on a straight-line basis over the period of revenue recognition.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any revenue at risk (whether DDI, BPO services, or training and support services) until the contingency has been removed. In these circumstances, we would also defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with the contract (whether DDI, BPO services, or training and support services) on which revenue recognition is being deferred. Such deferred contract costs are recognized on a straight-line basis over the period of revenue recognition.

For all new or materially modified revenue arrangements with multiple elements entered into on or after January 1, 2011, which we expect will consist of contracts entered into by our Molina Medicaid Solutions segment, we will apply the guidance contained in ASU No. 2009-13. For these arrangements, we will allocate total arrangement consideration to the elements of the arrangement, which are expected to be DDI, BPO, and training and support, because this is consistent with the current elements included in our Molina Medicaid Solutions contracts. The arrangement allocation will be performed using the relative selling-price method. When determining the selling price of each element, we will first attempt to use VSOE if available. If VSOE is not available, we will attempt to use third-party evidence, or TPE, of vendors selling similar services to similarly situated customers on a standalone basis, if available. If neither VSOE nor TPE are available, we will use our best estimate of the selling price for each element.

We will then evaluate whether, at each stage in the life cycle of the contract, we are able to recognize revenue associated with that element. To the extent that our revenue arrangements have provisions that allow our state customers to refuse acceptance of services performed, we will still be required to defer revenue recognition until such state customers accept our performance. Once this acceptance is achieved, we will immediately recognize the revenue associated with any delivered elements which differs from our current practice for arrangements entered into prior to January 1, 2011, where the revenue associated with delivered elements is recognized over the final service element of the arrangement because VSOE for the other elements does not exist. As such, we expect that the adoption of ASU No. 2009-13 will result in an overall acceleration of revenue recognition with respect to any multiple-element arrangements entered into on or after January 1, 2011.

We began to recognize revenue and the related deferred costs associated with our Maine contract in September 2010. In Idaho, we expect to begin recognition of deferred contact costs in 2012, in a manner consistent with our anticipated recognition of revenue. Molina Medicaid Solutions' deferred revenue totaled $36.1 million at March 31, 2011, and $10.9 million at December 31, 2010, and unamortized deferred contract costs were $37.9 million at March 31, 2011, and $28.4 million at December 31, 2010.

Recent Accounting Pronouncements

Revenue Recognition. In late 2009, the Financial Accounting Standards Board, or FASB, issued the following accounting guidance relating to revenue recognition. Effective for interim and annual reporting beginning on or after December 15, 2010, we adopted this guidance in full effective January 1, 2011.

- *ASU No. 2009-13, Revenue Recognition (ASC Topic 605) — Multiple-Deliverable Revenue Arrangements*, a consensus of the FASB Emerging Issues Task Force. This guidance modifies previous requirements by requiring the use of the "best estimate of selling price" in the absence of vendor-specific objective evidence ("VSOE") or verifiable objective evidence ("VOE") (now referred to as "TPE" or third-party evidence) for determining the selling price of a deliverable. A vendor is now required to use its best estimate of the selling price when more objective evidence of the selling price cannot be determined. By providing an alternative for determining the selling price of deliverables, this guidance allows companies to allocate arrangement consideration in multiple deliverable arrangements in a manner that better reflects the transaction's economics. In addition, the residual method of allocating arrangement consideration is no longer permitted under this new guidance. We have adopted this guidance effective January 1, 2011, and will apply it on a prospective basis for all new or materially modified revenue arrangements with multiple deliverables entered into on or after January 1, 2011. Because we did not enter into any new or materially modified agreements with multiple elements and fixed payments in the first quarter of 2011 that would have been impacted by this guidance, the adoption did not have a material impact on the timing or pattern of revenue recognition.

  For the year ended December 31, 2010, there would have been no change in revenue recognized relating to multiple-element arrangements if we had adopted this guidance retrospectively for contracts entered into prior to January 1, 2011.

Goodwill Impairment Testing. In December 2010, the FASB issued the following guidance which modifies goodwill impairment testing. Effective for interim and annual reporting beginning on or after December 15, 2010, we adopted this guidance in full effective January 1, 2011.

- *ASU No. 2010-28, Intangibles—Goodwill and Other (Topic 350) — When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts,* a consensus of the FASB Emerging Issues Task Force. This guidance modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The adoption of this guidance did not impact our consolidated financial position, results of operations or cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, or AICPA, and the Securities and Exchange Commission, or SEC, did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	Three Months Ended March 31,	
	2011	2010
	(in thousands)	
Shares outstanding at the beginning of the period	30,309	25,607
Weighted-average number of shares issued	83	39
Denominator for basic earnings per share	30,392	25,646
Dilutive effect of employee stock options and stock grants (1)	446	191
Denominator for diluted earnings per share (2)	30,838	25,837

(1) Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three months ended March 31, 2011, and 2010, there were approximately 92,000 and 613,000 anti-dilutive weighted options, respectively. Restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. For the three months ended March 31, 2011, and 2010, there were approximately 75,000, and 15,000 anti-dilutive weighted restricted shares, respectively.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the quarters ended March 31, 2011 and 2010.

4. Share-Based Compensation

At March 31, 2011, we had employee equity incentives outstanding under two plans: (1) the 2002 Equity Incentive Plan; and (2) the 2000 Omnibus Stock and Incentive Plan (from which equity incentives are no longer awarded). On March 1, 2011, our chief executive officer, chief financial officer, and chief operating officer were awarded 100,000 shares, 75,000 shares, and 18,000 shares, respectively, of restricted stock with performance and service conditions. Each of the grants shall vest on March 1, 2012, provided that: (i) the Company's total operating revenue for 2011 is equal to or greater than $3.7 billion, and (ii) the respective officer continues to be employed by the Company as of March 1, 2012. In the event both vesting conditions are not achieved, the equity compensation awards shall lapse. As of March 31, 2011, we expect these awards to vest in full.

Charged to general and administrative expenses, total stock-based compensation expense for the three months ended March 31, 2011 and 2010 was as follows:

	Three Months Ended March 31,	
	2011	2010
	(in thousands)	
Restricted stock awards	$ 3,806	$ 1,638
Stock options (including shares issued under our employee stock purchase plan)	258	498
Total stock-based compensation expense	$ 4,064	$ 2,136

As of March 31, 2011, there was $22.8 million of total unrecognized compensation expense related to unvested restricted stock awards, which we expect to recognize over a remaining weighted-average period of 2.5 years. As of March 31, 2011, there was a nominal amount of unrecognized compensation expense related to unvested stock options, which we expect to recognize in 2011.

Unvested restricted stock and restricted stock activity for the three months ended March 31, 2011 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2010	835,749	$ 23.32
Granted	455,000	34.50
Vested	(244,321)	24.13
Forfeited	(45,687)	25.79
Unvested balance as of March 31, 2011	1,000,741	28.09

The total grant date fair value of restricted shares granted during the three months ended March 31, 2011 and 2010 was $15.6 million and $9.4 million, respectively. The total fair value of restricted shares vested during the three months ended March 31, 2011 and 2010 was $8.6 million and $4.2 million, respectively. Stock option activity during the three months ended March 31, 2011 is summarized below:

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (in Thousands)	Weighted Average Remaining Contractual Term (Years)
Stock options outstanding as of December 31, 2010	513,614	$ 30.59		
Exercised	(83,931)	28.29		
Forfeited	(7,267)	32.51		
Stock options outstanding as of March 31, 2011	422,416	31.02	$ 3,995	4.5
Stock options exercisable and expected to vest as of March 31, 2011	422,118	31.01	$ 3,994	4.5
Exercisable as of March 31, 2011	417,616	30.97	$ 3,973	4.5

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For a comprehensive discussion of fair value measurements with regard to our current and non-current investments, see below.

The carrying amount of the convertible senior notes was $165.4 million and $164.0 million as of March 31, 2011, and December 31, 2010, respectively. Based on quoted market prices, the fair value of the convertible senior notes was approximately $213.1 million and $188.4 million as of March 31, 2011, and December 31, 2010, respectively.

To prioritize the inputs we use in measuring fair value, we apply a three-tier fair value hierarchy. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of March 31, 2011, we held certain assets that are required to be measured at fair value on a recurring basis. These included current investments in investment-grade debt securities that are designated as available-for-sale, and are reported at fair value based on market prices that are readily available (Level 1). See Note 6, “Investments,” for further information regarding fair value.

We also held investments in auction rate securities which are designated as available-for-sale, and are reported at fair value of $20.2 million (par value of $24.0 million) as of March 31, 2011.

Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government. We continued to earn interest on substantially all of these auction rate securities as of March 31, 2011. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008. As such, quoted prices in active markets were not readily available during the majority of 2008, 2009, and 2010, and continued to be unavailable as of March 31, 2011. To estimate the fair value of these securities, we used pricing models that included factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. The estimated values of these securities were also compared, when possible, to valuation data with respect to similar securities held by other parties. We concluded that these estimates, given the lack of market available pricing, provided a reasonable basis for determining the fair value of the auction rate securities as of March 31, 2011. For our investments in auction rate securities, we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost.

As a result of the increase in fair value of auction rate securities designated as available-for-sale, we recorded pretax unrealized gains of $0.3 million and $0.2 million to accumulated other comprehensive income (loss) for the three months ended March 31, 2011, and 2010, respectively. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income (loss). If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

Until July 2, 2010, we held certain auction rate securities (designated as trading securities) with an investment securities firm. In 2008, we entered into a rights agreement with this firm that (1) allowed us to exercise rights (the "Rights") to sell the eligible auction rate securities at par value to this firm between June 30, 2010 and July 2, 2012, and (2) gave the investment securities firm the right to purchase the auction rate securities from us any time after the agreement date as long as we received the par value. On June 30, 2010, and July 1, 2010, all of the eligible auction rate securities remaining at that time were settled at par value. During 2010, the aggregate auction rate securities (designated as trading securities) settled amounted to $40.9 million par value (fair value $36.7 million). Substantially all of the difference between par value and fair value on these securities was recovered through the rights agreement. For the three months ended March 31, 2010, we recorded pretax gains of $0.5 million on the auction rate securities underlying the Rights.

We accounted for the Rights as a freestanding financial instrument and, until July 2, 2010, recorded the value of the Rights under the fair value option. For the three months ended March 31, 2010, we recorded pretax losses of $0.5 million on the Rights, attributable to the decline in the fair value of the Rights. When the remaining eligible auction rate securities were sold at par value on July 1, 2010, the value of the Rights was zero.

Our assets measured at fair value on a recurring basis at March 31, 2011, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 224,985	$ 224,985	$ —	$ —
Government-sponsored enterprise securities	39,372	39,372	—	—
Municipal securities	37,906	37,906	—	—
U.S. treasury notes	31,996	31,996	—	—
Certificates of deposit	3,255	3,255	—	—
Auction rate securities (available-for-sale)	20,187	—	—	20,187
	$ 357,701	$ 337,514	$ —	$ 20,187

The following table presents our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3)
	(In thousands)
Balance at December 31, 2010	$ 20,449
Total gains (realized or unrealized):	
Included in other comprehensive income	288
Settlements	(550)
Balance at March 31, 2011	$ 20,187
The amount of total gains for the period included in other comprehensive income attributable to the change in unrealized gains relating to assets still held at March 31, 2011	$ 288

In 2010, we recorded a $2.8 million liability for contingent consideration related to the acquisition of our Wisconsin health plan. As of March 31, 2011, we have determined that there is no liability for contingent consideration relating to the acquisition. The liability for contingent consideration related to this acquisition was measured at fair value on a recurring basis using significant unobservable inputs (Level 3). The following table presents a roll forward of this liability for 2011:

	(Level 3) (In thousands)
Balance at December 31, 2010	$ (2,800)
Total gains included in earnings	2,800
Balance at March 31, 2011	$ —

6. Investments

The following tables summarize our investments as of the dates indicated:

	March 31, 2011			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 227,099	$ 176	$ 2,290	$ 224,985
Government-sponsored enterprise securities (GSEs)	39,668	75	371	39,372
Municipal securities (including non-current auction rate securities)	62,293	66	4,266	58,093
U.S. treasury notes	31,982	102	88	31,996
Certificates of deposit	3,255	—	—	3,255
	$ 364,297	$ 419	$ 7,015	$ 357,701

	December 31, 2010			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 179,124	$ 193	$ 1,388	$ 177,929
GSEs	59,790	293	370	59,713
Municipal securities (including non-current auction rate securities)	55,247	78	4,313	51,012
U.S. treasury notes	23,864	114	60	23,918
Certificates of deposit	3,252	—	—	3,252
	$ 321,277	$ 678	$ 6,131	$ 315,824

The contractual maturities of our investments as of March 31, 2011 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 194,237	$ 192,592
Due one year through five years	146,330	145,064
Due after five years through ten years	230	286
Due after ten years	23,500	19,759
	$ 364,297	$ 357,701

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales and maturities of available-for-sale securities were $61.3 million and $48.5 million for the three months ended March 31, 2011 and 2010, respectively. Net realized investment gains for the three months ended March 31, 2011, and 2010 were $157,000 and $14,000, respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our municipal securities, we have determined that unrealized gains and losses at March 31, 2011, and December 31, 2010, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

Approximately 35% of our investment in municipal securities consists of auction rate securities. As described in Note 5, "Fair Value Measurements," the unrealized losses on these investments were caused primarily by the illiquidity in the auction markets. Because the decline in market value is not due to the credit quality of the issuers, and because we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost, we do not consider the auction rate securities that are designated as available-for-sale to be other-than-temporarily impaired at March 31, 2011.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of March 31, 2011.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Corporate debt securities	$ 143,883	$ 1,962	$ 11,248	$ 328	$ 155,131	$ 2,290
GSEs	9,974	104	6,331	267	16,305	371
Municipal securities	25,274	330	24,765	3,936	50,039	4,266
U.S. treasury notes	17,455	66	5,722	22	23,177	88
	$ 196,586	$ 2,462	$ 48,066	$ 4,553	$ 244,652	$ 7,015

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2010.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)

U.S. treasury notes	5,480	40	6,806	20	12,286	60
	$ 140,603	$ 1,288	$ 50,106	$ 4,843	$ 190,709	$ 6,131

7. Receivables

Health Plans segment receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustment. Because all of our receivables are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable were as follows:

	March 31, 2011	December 31, 2010
	(In thousands)	
Heath Plans segment:		
California	$ 40,141	$ 46,482
Michigan	12,465	13,596
Missouri	22,623	22,841
New Mexico	10,382	18,310
Ohio	20,904	21,622
Washington	10,315	14,486
Wisconsin	6,639	5,437
Others	6,200	5,187
Total Health Plans segment	129,669	147,961
Molina Medicaid Solutions segment	40,749	20,229
	$ 170,418	$ 168,190

Our Utah health plan may be entitled to receive additional premium revenue from the state of Utah as an incentive payment for saving the state of Utah money in relation to fee-for-service Medicaid during the period 2003 through August 31, 2009. The final resolution of this matter, and the amount that may be realized by the Utah health plan, is currently uncertain and contingent upon future events. When additional information is known or agreement is reached with the state, we will recognize the resulting amount of revenue, if any, in our consolidated financial statements. No receivables for this matter have been established at March 31, 2011.

In late April of 2011, the Idaho Department of Administration delivered a letter to Molina Medicaid Solutions indicating that it wished to remit to Molina an amount approximately $5 to $6 million less than the amount of Molina's invoices for its operation of the MMIS in that state for the period June 1, 2010 through December 31, 2010. We do not believe that the basis for the reduced payment amount is contractually sound, and have not adjusted our financial statements to reflect the requested reduction. We are currently deferring recognition of all revenue as well as all direct costs (which constitute the majority of our costs) in Idaho until the MMIS in that state receives certification from the Centers for Medicare and Medicaid Services, or CMS, which we expect to occur in 2012. Any adjustments, if necessary, to the amount of our receivable from the state of Idaho will be made as more information becomes available.

8. Restricted Investments

Pursuant to the regulations governing our health plans, we maintain statutory deposits and deposits required by state Medicaid authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of capitated providers. The following table presents the balances of restricted investments by health plan, and for our insurance company:

	March 31, 2011	December 31, 2010
	(In thousands)	
California	$ 372	$ 372
Florida	7,981	4,508
Insurance Company	4,682	4,689
Michigan	1,000	1,000
Missouri	507	508
New Mexico	15,888	15,881
Ohio	9,069	9,066
Texas	3,501	3,501
Utah	2,791	1,279
Washington	151	151
Wisconsin	260	260
Other	3,105	885
	$ 49,307	$ 42,100

The contractual maturities of our held-to-maturity restricted investments as of March 31, 2011 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 46,432	$ 46,462
Due one year through five years	2,750	2,743
Due after five years through ten years	125	155
	$ 49,307	$ 49,360

9. Long-Term Debt

Credit Facility

We are a party to an Amended and Restated Credit Agreement, dated as of March 9, 2005, as amended by the first amendment on October 5, 2005, the second amendment on November 6, 2006, the third amendment on May 25, 2008, the fourth amendment on April 29, 2010, and the fifth amendment on April 29, 2010, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility") for a revolving credit line of $150 million that matures in May 2012. The Credit Facility is intended to be used for general corporate purposes. As of March 31, 2011, and December 31, 2010, there was no outstanding principal balance under the Credit Facility. However, as of March 31, 2011, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the contract of MMS with the states of Maine and Idaho.

To the extent that in the future we incur any obligations under the Credit Facility, such obligations will be secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At March 31, 2011, we were in compliance with all financial covenants in the Credit Facility.

The commitment fee on the total unused commitments of the lenders under the Credit Facility is 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans is 200 basis points at every level of the pricing grid. Thus, the applicable margins under the Credit Facility range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. The Credit Facility carves out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of the convertible senior notes, although the $187.0 million indebtedness is included in the calculation of our consolidated leverage ratio. The fixed charge coverage ratio under the Credit Facility is required to be no less than 3.00x.

The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.50 to 1.0 for the first and second quarters of 2010 and through August 14, 2010 (on a pro forma basis). Effective as of August 15, 2010, the maximum consolidated leverage ratio under the Credit Facility reverted back to 2.75 to 1.0.

Convertible Senior Notes

As of March 31, 2011, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 21.3067 shares of our common stock per $1,000 principal amount of the Notes. This represents an initial conversion price of approximately $46.93 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

The proceeds from the issuance of such convertible debt instruments have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of March 31, 2011, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 42 months. The Notes' if-converted value did not exceed their principal amount as of March 31, 2011. At March 31, 2011, the equity component of the Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	As of March 31, 2011	As of December 31, 2010
	(in thousands)	
Details of the liability component:		
Principal amount	$ 187,000	$ 187,000
Unamortized discount	(21,646)	(22,986)
Net carrying amount	$ 165,354	$ 164,014

	Three Months Ended March 31,	
	2011	2010
	(in thousands)	
Interest cost recognized for the period relating to the:		
Contractual interest coupon rate of 3.75%	$ 1,753	$ 1,753
Amortization of the discount on the liability component	1,340	1,243
Total interest cost recognized	$ 3,093	$ 2,996

10. Stockholders' Equity

In connection with the plans described in Note 4, "Share-Based Compensation," we issued approximately 243,000 shares of common stock, net of shares retired to settle employees' income taxes, for the three months ended March 31, 2011. For the three months ended March 31, 2011, the $4.2 million increase to additional paid-in capital was generated by employee stock plans transactions.

11. Segment Reporting

Our reportable segments are consistent with how we manage the business and view the markets we serve. In the second quarter of 2010, we added a segment to our internal financial reporting structure as a result of the acquisition of Molina Medicaid Solutions. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

Operating segment revenues and profitability for the three months ended March 31, 2011 and 2010 were as follows:

	Health Plans	Molina Medicaid Solutions	Total
		(In thousands)	
Three months ended March 31, 2011			
Premium revenue	$ 1,081,438	$ —	$ 1,081,438
Service revenue	—	36,674	36,674
Investment income	1,594	—	1,594
Total revenue	$ 1,083,032	$ 36,674	$ 1,119,706
Operating income	$ 29,606	$ 1,694	$ 31,300
Three months ended March 31, 2010			
Premium revenue	$ 965,220	$ —	$ 965,220
Service revenue	—	—	—
Investment income	1,521	—	1,521
Total revenue	$ 966,741	$ —	$ 966,741
Operating income	$ 20,438	$ —	$ 20,438

Reconciliation to Income before Income Taxes

	Three Months Ended March 31,	
	2011	2010
	(In thousands)	
Segment operating income	$ 31,300	$ 20,438
Interest expense	(3,603)	(3,357)
Income before income taxes	$ 27,697	$ 17,081

Segment Assets

	Health Plans	Molina Medicaid Solutions	Total
		(In thousands)	
As of March 31, 2011	$ 1,383,447	$ 199,707	$ 1,583,154
As of December 31, 2010	$ 1,333,599	$ 175,615	$ 1,509,214

12. Commitments and Contingencies

Legal

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. These actions, when finally concluded and determined, are not likely, in our opinion, to have a material adverse effect on our business, consolidated financial position, cash flows, or results of operations.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our principal operations are conducted through our health plan subsidiaries operating in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. Our health plans are subject to state regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $432.4 million at March 31, 2011, and $397.8 million at December 31, 2010. The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of March 31, 2011, our health plans had aggregate statutory capital and surplus of approximately $441.6 million compared with the required minimum aggregate statutory capital and surplus of approximately $274.1 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2011. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

13. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of both March 31, 2011 and December 31, 2010, our carrying amount for this investment totaled $4.4 million. For the three months ended March 31, 2011 and 2010, we paid $5.4 million and $4.4 million, respectively, for medical service fees to this provider.

14. Subsequent Event

On April 27, 2011, we announced that our board of directors authorized a 3-for-2 stock split of our common stock to be effected in the form of a stock dividend of one share of our stock for every two shares outstanding. The distribution of the dividend will be made on May 20, 2011.

Item 2. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. We use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- uncertainties regarding the impact of the Patient Protection and Affordable Care Act, including its possible repeal, judicial overturning of the individual insurance mandate, the effect of various implementing regulations, and uncertainties regarding the likely impact of other federal or state health care and insurance reform measures;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations;
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, and our ability to grow our revenues consistent with our expectations;
- the accurate estimation of incurred but not reported medical costs across our health plans;
- risks associated with the continued growth in new Medicaid and Medicare enrollees;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates;
- the continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- the timing of receipt and recognition of revenue and the amortization of expense under the state contracts of Molina Medicaid Solutions in Maine and Idaho;
- additional administrative costs and the potential payment of additional amounts to providers and/or the state by Molina Medicaid Solutions as a result of MMIS implementation issues in Idaho;
- government audits and reviews, including the audit of our Medicare plans by CMS;
- changes with respect to our provider contracts and the loss of providers;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive, and the interpretation and implementation of medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation or arbitration matters;
- restrictions and covenants in our credit facility;

- the relatively small number of states in which we operate health plans;
- the availability of financing to fund and capitalize our acquisitions and start-up activities and to meet our liquidity needs;
- a state's failure to renew its federal Medicaid waiver;
- an inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments; and
- changes in general economic conditions, including unemployment rates.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2010, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurances that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2010.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. Our business comprises our Health Plans segment, consisting of licensed health maintenance organizations serving Medicaid populations in ten states, and our Molina Medicaid Solutions segment, which provides design, development, implementation, and business process outsourcing solutions to Medicaid agencies in an additional five states. We also have a direct delivery business that currently consists of 16 primary care community clinics in California and two primary care community clinics in Washington; additionally, we manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. These health plans served approximately 1.6 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals as of March 31, 2011. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

On May 1, 2010, we acquired a health information management business which we now operate under the name, *Molina Medicaid Solutions*SM. Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program.

We report our financial performance based on the following two reportable segments: Health Plans; and Molina Medicaid Solutions.

First Quarter Performance Summary

The following table and narrative briefly summarizes our financial and operating performance for the three months ended March 31, 2011. Comparable metrics for the first quarter of 2010 are also shown. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are computed as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended March 31,	
	2011	2010
	(Dollar amounts in thousands, except per-share data)	
Earnings per diluted share	$ 0.56	$ 0.41
Premium revenue	$ 1,081,438	$ 965,220
Service revenue	$ 36,674	$ —
Operating income	$ 31,300	$ 20,438
Net income	$ 17,388	$ 10,590
Total ending membership	1,647,000	1,482,000
Premium revenue	96.6%	99.8%
Service revenue	3.3	—
Investment income	0.1	0.2
Total revenue	100.0%	100.0%
Medical care ratio	84.5%	85.3%
General and administrative expense ratio	8.4%	8.2%
Premium tax ratio	3.4%	3.6%
Operating income	2.8%	2.1%
Net income	1.6%	1.1%
Effective tax rate	37.2%	38.0%

Our first quarter of 2011 was marked by strong membership growth, flat PMPM revenue, and lower medical costs. Compared with the first quarter of 2010, earnings per share in the first quarter of 2011 were up 37%, premium revenues were up 12%, operating income was up 53%, and aggregate membership grew by 11%. Meanwhile, the aggregate medical care ratio of our health plans declined by 80 basis points. Our larger and more established health plans performed the strongest in the quarter, with each of California, Ohio, Utah, and Washington having lower medical care ratios compared with the first quarter of 2010. Our Florida and Wisconsin health plans continue to face challenges, which we are working to address. Medicare enrollment exceeded 24,000 members at March 31, 2011, and Medicare premium revenue for the quarter was $85.4 million compared with $50.3 million in the first quarter of 2010. With respect to our Molina Medicaid Solutions business, our system stabilization efforts in Idaho and Maine are taking longer and are more costly than we had anticipated. However, our profit margins in our fiscal agent contracts in New Jersey, Louisiana, and West Virginia remain stable.

We remain concerned about state budget deficits, which are not expected to improve during the remainder of 2011. Accordingly, the rate environment for our health plans remains uncertain. However, our Missouri health plan has received notification that it will receive a blended rate increase of approximately 5% effective July 1, 2011. On May 5, 2011, we learned that our responsive bid in Arizona in connection with the re-procurement of the ALTCS program (Acute + Long Term Care Services) was not successful. The Company is in the process of reviewing and evaluating the bid scores and may file a protest as warranted. We continue to await the results of Molina Medicaid Solutions' responsive bid in Louisiana to retain its MMIS contract in that state.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the three months ended March 31, 2011, we received approximately 94% of our premium revenue as a fixed per-member per-month, or PMPM, amount, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with the Centers for Medicare and Medicaid Services, or CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the three months ended March 31, 2011, we received approximately 6% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children's Health Insurance Program, or CHIP, members are generally among our lowest, with rates as low as approximately $75 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the Temporary Assistance for Needy Families, or TANF, Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $100 in California to $230 in Missouri. Among our Medicaid Aged, Blind or Disabled, or ABD, membership, PMPM premiums range from approximately $320 in Utah to $1,000 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care

contract (most often pharmacy and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums, at nearly $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	March 31, 2011	December 31, 2010	March 31, 2010
Total Ending Membership by Health Plan:			
California	347,000	344,000	353,000
Florida	66,000	61,000	52,000
Michigan	225,000	227,000	226,000
Missouri	82,000	81,000	78,000
New Mexico	90,000	91,000	92,000
Ohio	248,000	245,000	228,000
Texas	128,000	94,000	40,000
Utah	80,000	79,000	75,000
Washington	341,000	355,000	338,000
Wisconsin(1)	40,000	36,000	—
Total	1,647,000	1,613,000	1,482,000
Total Ending Membership by State for our Medicare Advantage Plans(1):			
California	5,300	4,900	2,700
Florida	600	500	300
Michigan	6,700	6,300	4,200
New Mexico	700	600	600
Ohio	400	—	—
Texas	600	700	500
Utah	6,700	8,900	7,100
Washington	3,300	2,600	1,600
Total	24,300	24,500	17,000
Total Ending Membership by State for our Aged, Blind or Disabled Population:			
California	14,100	13,900	13,400
Florida	10,300	10,000	8,900
Michigan	32,000	31,700	32,700
New Mexico	5,600	5,700	5,800
Ohio	28,200	28,200	26,700
Texas	51,200	19,000	18,100
Utah	8,200	8,000	7,900
Washington	4,300	4,000	3,500
Wisconsin(1)	1,700	1,700	—
Total	155,600	122,200	117,000

(1) We acquired the Wisconsin health plan on September 1, 2010. As of March 31, 2011, the Wisconsin health plan had approximately 2,400 Medicare Advantage members that are ceded 100% under a reinsurance contract with a third party; these members are not included in the membership tables herein.

Molina Medicaid Solutions Segment

Molina Medicaid Solutions' MMIS contracts extend over a number of years, and cover the life of the MMIS from inception through at least the first five years of its operation. The contracts are subject to extension by the exercise of an option, and also by renewal of the base contract. The contracts have a life cycle beginning with the design, development, and implementation of the MMIS and continuing through the operation of the system. Payment during the design, development, and implementation phase of the contract, or the DDI phase, is generally based upon the attainment of specific milestones in systems development as agreed upon ahead of time by the parties. Payment during the operations phase typically takes the form of either a flat monthly fee or payment for specific measures of capacity or activity, such as the number of claims processed, or the number of Medicaid beneficiaries served by the MMIS. Contracts may also call for the adjustment of amounts paid if certain activity measures exceed or fall below certain thresholds. In some circumstances, revenue recognition may be delayed for long periods while we await formal customer acceptance of our products and/or services. In those circumstances, recognition of a portion of our costs may also be deferred.

Under our contracts in Louisiana, New Jersey, and West Virginia, we provide primarily business process outsourcing and technology outsourcing services, because the development of the MMIS solution has been completed. Under these contracts, we recognize outsourcing service revenue on a straight-line basis over the remaining term of the contract. In Maine, we completed the DDI phase of our contract effective September 1, 2010. In Idaho, we expect to complete the DDI phase of our contract during 2011. We began revenue and cost recognition for our Maine contract in September 2010, and expect to begin revenue and cost recognition for our Idaho contract in 2012.

Additionally, Molina Medicaid Solutions provides pharmacy rebate administration services under a contract with the state of Florida.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service* — Expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.
- *Capitation* — Expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- *Pharmacy* — Expenses for all drug, injectible, and immunization costs paid primarily through our pharmacy benefit manager.
- *Other* — Expenses for medically related administrative costs of approximately $24.4 million, and $19.6 million, for the three months ended March 31, 2011, and 2010, respectively, including certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See “Critical Accounting Policies” below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our contracts in Louisiana, Maine, New Jersey, West Virginia, and Florida, as well as certain selling, general and administrative expenses. Additionally, certain indirect costs incurred under our contracts in Maine (prior to exiting the DDI phase of that contract in September, 2010) and Idaho are also expensed to cost of services.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period. We began to recognize deferred costs for our Maine contract in September 2010, at the same time we began to recognize revenue associated with that contract. In Idaho, we expect to begin recognition of deferred contact costs in 2012, in a manner consistent with our anticipated recognition of revenue.

Results of Operations

Three Months Ended March 31, 2011 Compared with the Three Months Ended March 31, 2010

Health Plans Segment

Premium Revenue

Premium revenue grew 12% in the three months ended March 31, 2011 compared with the three months ended March 31, 2010, due to a membership increase of 11%. Consolidated premium revenue increased by approximately 1% on a PMPM basis. Medicare enrollment exceeded 24,000 members at March 31, 2011, and Medicare premium revenue was $85.4 million for the three months ended March 31, 2011, compared with $50.3 million for the three months ended March 31, 2010.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended March 31,					
	2011			2010		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$ 655,884	$ 133.78	71.8%	$ 566,879	$ 128.06	68.9%
Capitation	128,682	26.25	14.1	137,132	30.98	16.7
Pharmacy	91,576	18.68	10.0	90,071	20.35	10.9
Other	37,390	7.63	4.1	28,734	6.48	3.5
Total	$ 913,532	$ 186.34	100.0%	$ 822,816	$ 185.87	100.0%

The medical care ratio decreased to 84.5% in the three months ended March 31, 2011, compared with 85.3% for the three months ended March 31, 2010. Total medical care costs increased less than 1% PMPM, while medical care costs for our Medicaid membership decreased by approximately 2% PMPM.

- Pharmacy costs (adjusted for the state's retention of the pharmacy benefit in Ohio effective February 1, 2010) increased approximately 5% PMPM.
- Capitation costs decreased approximately 15% PMPM, primarily due to the transition of members in Michigan and Washington into fee-for-service networks.
- Fee-for-service costs increased approximately 4% PMPM, partially due to the transition of members from capitated provider networks into fee-for-service networks. Fee-for-service and capitation costs combined increased less than 1% PMPM.
- Hospital admissions per thousand members per year decreased approximately 7%.
- Pharmacy utilization was essentially flat, with the increase in costs being driven by higher costs per prescription.

The medical care ratio of the California health plan decreased to 84.3% in the three months ended March 31, 2011, from 86.8% in the three months ended March 31, 2010, as higher premium revenue PMPM more than offset an increase of approximately 27% in pharmacy costs and an increase of approximately 5% in fee-for-service costs.

The medical care ratio of the Florida health plan increased to 96.6% in the three months ended March 31, 2011, from 88.7% in the three months ended March 31, 2010, primarily due to higher fee-for-service and capitation costs, which more than offset lower pharmacy costs. We have undertaken a number of measures — focused on both utilization and unit cost reductions — to improve the profitability of the Florida health plan. The Florida health plan's medical care ratio decreased from 100.2% in the fourth quarter of 2010.

The medical care ratio of the Michigan health plan increased to 81.2% in the three months ended March 31, 2011, from 80.8% in the three months ended March 31, 2010, as higher physician and outpatient facility fee-for-service costs and higher pharmacy costs more than offset lower capitation costs.

The medical care ratio of the Missouri health plan increased to 93.6% in the three months ended March 31, 2011, from 83.5% in the three months ended March 31, 2010, due to higher fee-for-service costs.

The medical care ratio of the New Mexico health plan increased to 82.8% in the three months ended March 31, 2011, from 77.4% in the three months ended March 31, 2010, as lower fee-for-service costs failed to offset the impact of a premium rate decrease of approximately 8.5% PMPM.

The medical care ratio of the Ohio health plan decreased to 74.6% in the three months ended March 31, 2011, from 79.1% in the three months ended March 31, 2010, due to an increase in Medicaid premium PMPM of approximately 4.5% effective January 1, 2011, and flat fee-for-service costs.

The medical care ratio of the Texas health plan increased to 91.1% in the three months ended March 31, 2011, from 82.5% in the three months ended March 31, 2010. Effective February 1, 2011, we added approximately 30,000 ABD Medicaid members in the Dallas-Fort Worth area, and effective September 1, 2010, we added approximately 54,000 members state-wide who are covered under CHIP.

The medical care ratio of the Utah health plan decreased to 79.3% in the three months ended March 31, 2011, from 105.0% in the three months ended March 31, 2010, primarily due to reduced fee-for-service costs in the outpatient facility and physician categories and an increase in Medicaid premium PMPM of approximately 7% effective July 1, 2010. Lower fee-for-service costs were the result of both lower unit costs and lower utilization.

The medical care ratio of the Washington health plan decreased to 86.6% in the first quarter of 2011 from 90.3% in the three months ended March 31, 2010. Lower capitation costs more than offset higher fee-for-service and higher pharmacy costs. Pharmacy costs for the Washington health plan's Medicaid members grew approximately 22% PMPM.

The medical care ratio of the Wisconsin health plan (acquired September 1, 2010) was 118.1% in the three months ended March 31, 2011. The Wisconsin health plan recorded a premium deficiency reserve of $3.35 million in the first quarter of 2011. Absent that premium deficiency reserve, the Wisconsin health plan's medical care ratio would have been approximately 98% for the three months ended March 31, 2011.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended March 31, 2011						
	Member Months(1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	1,041	$ 134,976	$ 129.63	$ 113,737	$ 109.24	84.3%	$ 1,902
Florida	192	49,222	256.63	47,568	248.01	96.6	17

New Mexico	280	95,598	341.02	74,015	264.03	77.4	2,004
Ohio	673	218,363	324.35	172,625	256.41	79.1	17,005
Texas	121	39,200	324.08	32,331	267.29	82.5	681
Utah	221	58,540	265.51	61,460	278.76	105.0	—
Washington	1,007	181,054	179.84	163,510	162.42	90.3	3,262
Wisconsin(2)	—	—	—	—	—	—	—
Other(3)	—	1,979	—	7,662	—	—	21
	4,427	$965,220	$ 218.04	$ 822,816	$ 185.87	85.3%	$ 34,546

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) We acquired the Wisconsin health plan on September 1, 2010.

(3) "Other" medical care costs also include medically related administrative costs at the parent company.

Days in Medical Claims and Benefits Payable

The days in medical claims and benefits payable were as follows:

	March 31, 2011	Dec. 31, 2010	March 31, 2010
Days in claims payable — fee-for-service only	41 days	42 days	44 days
Number of claims in inventory at end of period	185,300	143,600	153,700
Billed charges of claims in inventory at end of period (in thousands)	$ 250,600	$ 218,900	$ 194,000

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment for the three months ended March 31, 2011 was as follows:

	(In thousands)
Service revenue before amortization	$ 38,860
Less: amortization of contract backlog recorded as contra-service revenue	(2,186)
Service revenue	36,674
Cost of service revenue	31,221
General and administrative costs	2,477
Amortization of customer relationship intangibles recorded as amortization	1,282
Operating income	$ 1,694

Consolidated Expenses

General and Administrative Expenses

General and administrative, or G&A, expenses, were $94.4 million, or 8.4% of total revenue, for the three months ended March 31, 2011 compared with $78.9 million, or 8.2% of total revenue, for the three months ended March 31, 2010.

Premium Tax Expense

Premium tax expense decreased to 3.4% of premium revenue in the three months ended March 31, 2011 from 3.6% in the three months ended March 31, 2010.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and Amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service Revenue;" and
- Depreciation is recorded within the heading "Cost of Service Revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue, and reconciles that amount to the consolidated statements of cash flows.

	Three Months Ended March 31,			
	2011		2010	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(In thousands)			
Depreciation	$ 7,401	0.7%	$ 6,412	0.7%
Amortization of intangible assets	5,266	0.4	3,649	0.3
Depreciation and amortization reported in the consolidated statements of income	12,667	1.1	10,061	1.0
Amortization recorded as reduction of service revenue	2,186	0.2	—	—
Depreciation recorded as cost of service revenue	3,241	0.3	—	—
Depreciation and amortization reported in the consolidated statements of cash flows	$ 18,094	1.6%	$ 10,061	1.0%

Interest Expense

Interest expense increased to $3.6 million for the three months ended March 31, 2011, from $3.4 million for the three months ended March 31, 2010. Interest expense includes non-cash interest expense relating to our convertible senior notes, which totaled $1.3 million and $1.2 million for the three months ended March 31, 2011, and 2010, respectively.

Income Taxes

Income tax expense was recorded at an effective rate of 37.2% for the three months ended March 31, 2011 compared with 38.0% for the three months ended March 31, 2010. The lower rate in 2011 was primarily due to lower state income taxes.

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue and investment income. Such cash flows are our primary source of liquidity. Thus, any future decline in our premium revenue or our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of March 31, 2011, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income increased slightly to $1.6 million for the three months ended March 31, 2011, compared with $1.5 million for the three months ended March 31, 2010.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect to incur significant losses due to a sudden change in market interest rates. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our unregulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash provided by operating activities for the three months ended March 31, 2011 was $84.1 million compared with $26.2 million used in operating activities for the three months ended March 31, 2010, an increase of $110.3 million. The change is primarily attributable to the advance premium payment made in March 2011 by the state of Ohio to our Ohio health plan in the amount of $72.7 million. Deferred revenue, which was a use of operating cash totaling $90.7 million in three months ended March 31, 2010, was a source of operating cash totaling $84.2 million in the three months ended March 31, 2011. The change in deferred revenue was offset by changes in other current assets and liabilities.

Reconciliation of Non-GAAP(1) to GAAP Financial Measures

EBITDA(2)

	Three Months Ended March 31,	
	2011	2010
	(In thousands)	
Operating income	$ 31,300	$ 20,438
Add back:		
Depreciation and amortization reported in the consolidated statements of cash flows	18,094	10,061
EBITDA	$ 49,394	$ 30,499

(1) GAAP stands for U.S. generally accepted accounting principles.

(2) We calculate EBITDA consistently on a quarterly and annual basis by adding back depreciation and amortization to operating income. Operating income includes investment income. EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities, nor should EBITDA be considered in isolation from these GAAP measures of operating performance. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At March 31, 2011, the parent company — Molina Healthcare, Inc. — held cash and investments of approximately $25.6 million, compared with approximately $65.1 million of cash and investments at December 31, 2010. This decline was primarily due to capital contributions and/or advances to our Florida, Texas, and Wisconsin health plans in the first quarter of 2011.

On a consolidated basis, at March 31, 2011, we had working capital of $399.6 million compared with $392.4 million at December 31, 2010. At March 31, 2011, we had cash and investments of $870.8 million, compared with approximately $813.8 million of cash and investments at December 31, 2010.

We believe that our cash and credit resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Credit Facility

We are a party to an Amended and Restated Credit Agreement, dated as of March 9, 2005, as amended by the first amendment on October 5, 2005, the second amendment on November 6, 2006, the third amendment on May 25, 2008, the fourth amendment on April 29, 2010, and the fifth amendment on April 29, 2010, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility") for a revolving credit line of $150 million that matures in May 2012. The Credit Facility is intended to be used for general corporate purposes. As of March 31, 2011, and December 31, 2010, there was no outstanding principal debt balance under the Credit Facility. However, as of March 31, 2011, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the contract of MMS with the states of Maine and Idaho.

To the extent that in the future we incur any obligations under the Credit Facility, such obligations will be secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At March 31, 2011, we were in compliance with all financial covenants in the Credit Facility.

The commitment fee on the total unused commitments of the lenders under the Credit Facility is 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans is 200 basis points at every level of the pricing grid. Thus, the applicable margins under the Credit Facility range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. The Credit Facility carves out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of the convertible senior notes, although the $187.0 million indebtedness is included in the calculation of our consolidated leverage ratio. The fixed charge coverage ratio under the Credit Facility is required to be no less than 3.00x.

The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.50 to 1.0 for the first and second quarters of 2010 and through August 14, 2010 (on a pro forma basis). Effective as of August 15, 2010, the maximum consolidated leverage ratio under the Credit Facility reverted back to 2.75 to 1.0.

Shelf Registration Statement

In December 2008, we filed a shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the issuance of up to $300 million of our securities, including common stock, warrants, or debt securities, and up to 250,000 shares of outstanding common stock that may be sold from time to time by the Molina Siblings Trust as a selling stockholder. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering. As a result of the offering described below, we may now offer up to $182.5 million of our securities from time to time under the shelf registration statement.

In August 2010, we sold 4,350,000 shares of common stock covered by this registration statement. The public offering price for this sale was $25.65 per share, net of the underwriting discount. Our proceeds from the sales totaled approximately $111.1 million, net of the issuance costs. We used the proceeds from these sales to repay the Credit Facility and for general corporate purposes. Also in August 2010, the Molina Siblings Trust, as a selling stockholder, sold 250,000 shares of outstanding common stock covered by this registration statement.

Convertible Senior Notes

As of March 31, 2011, $187.0 million in aggregate principal amount of our 3.75% Convertible Senior Notes due 2014 (the "Notes") remain outstanding. The Notes rank equally in right of payment with our existing and future senior indebtedness. The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 21.3067 shares of our common stock per $1,000 principal amount of the Notes. This represents an initial conversion price of approximately $46.93 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Regulatory Capital and Dividend Restrictions

Our principal operations are conducted through our health plan subsidiaries operating in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. The health plans are subject to state laws that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and may restrict the timing, payment, and amount of dividends and other distributions that may be paid to Molina Healthcare, Inc. as the sole stockholder of each of our health plans. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries, after intercompany eliminations, which may not be transferable to us in the form of loans, advances, or cash dividends totaled $432.4 million at March 31, 2011, and $397.8 million at December 31, 2010.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if adopted by a particular state, set minimum capitalization requirements for health plans and other insurance entities bearing risk for health care coverage. The requirements take the form of risk-based capital, or RBC, rules. These rules, which vary slightly from state to state, have been adopted in Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. California and Florida have not adopted RBC rules and have not given notice of any intention to do so. The RBC rules, if adopted by California and Florida, may increase the minimum capital required by those states.

At March 31, 2011, our health plans had aggregate statutory capital and surplus of approximately $441.6 million, compared to the required minimum aggregate statutory capital and surplus of approximately $274.1 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2011. We have the ability and commitment to provide additional working capital to each of our health plans when necessary to ensure that capital and surplus continue to meet regulatory requirements. Barring any change in regulatory requirements, we believe that we will continue to be in compliance with these requirements through 2011.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- The determination of the amount of revenue to be recognized under certain contracts that place revenue at risk dependent upon the achievement of certain quality or administrative measurements, or the expenditure of certain percentages of revenue on defined expenses, or requirements that we return a certain portion of our profits to state governments;
- The deferral of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and
- The determination of medical claims and benefits payable.

Revenue Recognition — Health Plans Segment

Certain components of premium revenue of our Health Plans segment are subject to accounting estimates, and are therefore subject to retroactive revision. Chief among these are:

- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health:* A portion of premium revenue paid to our Florida health plan by the state of Florida may be refunded to the state if certain minimum amounts are not spent on defined behavioral health care costs. At March 31, 2011, we had not recorded any liability under the terms of this contract provision. If the state of Florida disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of this provision, including revisions to the definitions of premium revenue or behavioral health care costs, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our Florida health plan.

- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* A portion of premium revenue paid to our New Mexico health plan by the state of New Mexico may be refunded to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). Our contract is for a three-year period, and the medical cost floor is based on premiums and medical care costs over the entire contract period. Effective July 1, 2008, our New Mexico health plan entered into a new three year contract that, in addition to retaining the medical cost floor, added certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At March 31, 2011, we had recorded a liability of $7.0 million under the terms of these contract provisions. If the state of New Mexico disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of these provisions, including revisions to the definitions of premium revenue, medical care costs, administrative costs or profit, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our New Mexico health plan.

- *New Mexico Health Plan At-Risk Premium Revenue:* Under our contract with the state of New Mexico, up to 1% of our New Mexico health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality of care and administrative measures dictated by the state. For the state fiscal year ending June 30, 2011 (the only contract year currently open for determination of at-risk premium revenue), our New Mexico health plan has received $1.9 million in at-risk revenue as of March 31, 2011. To date, we have recognized $0.9 million of that amount as revenue, and recorded a liability of approximately $1.0 million as of March 31, 2011, for the remainder. If the state of New Mexico disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required.

- *Ohio Health Plan At-Risk Premium Revenue:* Under our contract with the state of Ohio, up to 1% of our Ohio health plan's revenue may be refundable to the state if certain performance measures are not met. Effective February 1, 2010 an additional 0.25% of the Ohio health plan's revenue became refundable if certain pharmacy specific performance measures were not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. The state of Ohio's fiscal year ends June 30, and open contract years typically include the current state fiscal year and the immediately preceding state fiscal year (two state fiscal years in total). For the two open state fiscal years ending June 30, 2011, our Ohio health plan has received $8.5 million in at-risk revenue as of March 31, 2011. To date, we have recognized $4.7 million of that amount as revenue and recorded a liability of approximately $3.8 million as of March 31, 2011, for the remainder. If the state of Ohio disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required. For example, during the third quarter of 2010, we reversed the recognition of approximately $3.3 million of at-risk revenue of which $1.9 million and $1.4 million were initially recognized in 2010, and 2009, respectively.

- *Utah Health Plan Premium Revenue:* Our Utah health plan may be entitled to receive additional premium revenue from the state of Utah as an incentive payment for saving the state of Utah money in relation to fee-for-service Medicaid during the period 2003 through August 31, 2009. In prior years, we estimated amounts we believed were recoverable under our savings sharing agreement with the state of Utah based on available information and our interpretation of our contract with the state. The state may not agree with our interpretation or our application of the contract language, and it may also not agree with the manner in which we have processed and analyzed our member claims and encounter records. Thus, the ultimate amount of savings sharing revenue that we realize from prior years may be subject to negotiation with the state. During 2007, as a result of an ongoing disagreement with the state of Utah, we wrote off the entire receivable, totaling $4.7 million.

Our Utah health plan continues to assert its claim to the amounts believed to be due under the savings share agreement. On April 19, 2011, the Director of the Utah Department of Health issued a Final Agency Order in an administrative proceeding initiated by our Utah health plan relating to the proper interpretation of the savings sharing language in the parties' state fiscal year 2006 contract. Pursuant to that Order, the Department adopted the administrative law judge's finding that the Utah health plan's interpretation of the contract was correct and that the savings sharing amount due to the Utah health plan should be calculated under the health plan's interpretation. The parties are in the process of calculating the net amounts due to the health plan for fiscal year 2006 and for all other years covered by the savings sharing language.

The final resolution of this matter, and the amount that may be realized by the Utah health plan, is currently uncertain and contingent upon future events. When additional information is known or agreement is reached with the state regarding the appropriate savings sharing payment amount, we will recognize that amount of savings sharing revenue, if any, in our financial statements. No receivables for saving sharing revenue have been established at March 31, 2011.

- *Texas Health Plan Profit Sharing:* Under our contract with the state of Texas there is a profit-sharing agreement, where we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As of March 31, 2011, we had an aggregate liability of approximately $0.1 million accrued pursuant to our profit-sharing agreement with the state of Texas for the 2010 and 2011 contract years (ending August 31st of each year). Because the final settlement calculations include a claims run-out period of nearly one year, an adjustment to the amounts owed may be required.

- *Texas Health Plan At-Risk Premium Revenue:* Under our contract with the state of Texas, up to 1% of our Texas health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality-of-care measures established by the state. The time period for the assessment of these performance measures had previously followed the state's fiscal year, but effective January 1, 2011, it follows the calendar year. As of March 31, 2011, our Texas health plan has received $0.6 million in at-risk revenue, none of which has been recognized as revenue as of March 31, 2011. If the state of Texas disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required.

- *Medicare Premium Revenue:* Based on member encounter data that we submit to CMS, our Medicare revenue is subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. That analysis is similar to the process for the adjustment of member risk scores, but is further complicated by member pharmacy cost sharing provisions attached to the Medicare pharmacy benefit that do not apply to the services measured by the member risk adjustment process. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns, there is no liability related to the potential recoupment of Medicare premium revenue at March 31, 2011. To the extent that the premium revenue ultimately received from CMS differs from recorded amounts, we will adjust reported Medicare revenue.

Deferral of Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of three elements of service. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. The second element, following completion of the DDI element, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services, we also provide the state with the third contracted element — training and IT support and hosting services (training and support).

Because they include these three elements of service, our Molina Medicaid Solutions contracts are multiple-element arrangements. The following discussion applies to our contracts with multiple elements entered into prior to January 1, 2011, before our prospective adoption of *ASU No. 2009-13, Revenue Recognition (ASC Topic 605) — Multiple-Deliverable Revenue Arrangements*.

For those contracts entered into prior to January 1, 2011, we have no vendor specific objective evidence, or VSOE, of fair value for any of the individual elements in these contracts, and at no point in the contract will we have VSOE for the undelivered elements in the contract. We lack VSOE of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of products and services, which vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our newer contracts (commercial off-the-shelf technology solutions).

The absence of VSOE within the context of a multiple element arrangement requires us to delay recognition of any revenue for an MMIS contract until completion of the DDI phase of the contract. Although the length of the DDI phase for any MMIS contract can vary considerably, the DDI phase typically takes about two years to complete. As a general principle, revenue recognition will therefore commence at the completion of the DDI phase, and all revenue will be recognized over the period that BPO services and training and support services are provided. Consistent with the deferral of revenue, recognition of all direct costs (such as direct labor, hardware, and software) associated with the DDI phase of our contracts is deferred until the commencement of revenue recognition. Deferred costs are recognized on a straight-line basis over the period of revenue recognition.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any revenue at risk (whether DDI, BPO services, or training and support services) until the contingency had been removed. In these circumstances, we would also defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with the contract (whether DDI, BPO services, or training and support services) on which revenue recognition is being deferred. Such deferred contract costs are recognized on a straight-line basis over the period of revenue recognition.

For all new or materially modified revenue arrangements with multiple elements entered into on or after January 1, 2011, which we expect will consist of contracts entered into by our Molina Medicaid Solutions segment, we will apply the guidance contained in ASU No. 2009-13. For these arrangements, we will allocate total arrangement consideration to the elements of the arrangement, which are expected to be DDI, BPO, and training and support, because this is consistent with the current elements included in our Molina Medicaid Solutions contracts. The arrangement allocation will be performed using the relative selling-price method. When determining the selling price of each element, we will first attempt to use VSOE if available. If VSOE is not available, we will attempt to use third-party evidence, or TPE, of vendors selling similar services to similarly situated customers on a standalone basis, if available. If neither VSOE nor TPE are available, we will use our best estimate of the selling price for each element.

We will then evaluate whether, at each stage in the life cycle of the contract, we are able to recognize revenue associated with that element. To the extent that our revenue arrangements have provisions that allow our state customers to refuse acceptance of services performed, we will still be required to defer revenue recognition until such state customers accept our performance. Once this acceptance is achieved, we will immediately recognize the revenue associated with any delivered elements which differs from our current practice for arrangements entered into prior to January 1, 2011, where the revenue associated with delivered elements is recognized over the final service element of the arrangement because VSOE for the other elements does not exist. As such, we expect that the adoption of ASU No. 2009-13 will result in an overall acceleration of revenue recognition with respect to any multiple-element arrangements entered into on or after January 1, 2011.

We began to recognize revenue and related deferred costs associated with our Maine contract in September 2010. In Idaho, we expect to begin recognition of deferred contact costs in 2012, in a manner consistent with our anticipated recognition of revenue. Molina Medicaid Solutions' deferred revenue totaled $36.1 million at March 31, 2011, and $10.9 million at December 31, 2010, and unamortized deferred contract costs were $37.9 million at March 31, 2011, and $28.4 million at December 31, 2010.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the long-lived asset is written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the long-lived asset to zero, any remaining deferred contract costs are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets and deferred contract costs exceed the fair value of those assets.

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	March 31, 2011	Dec. 31, 2010
	(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 273,378	$ 275,259
Capitation payable	43,738	49,598
Pharmacy	16,953	14,649
Other	17,313	14,850
	$ 351,382	$ 354,356

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $273.4 million of our total medical claims and benefits payable of $351.4 million as of March 31, 2011. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider's monthly capitation payment), our IBNP liability at March 31, 2011, was $267.4 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of March 31, 2011 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding March 31, 2011 by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 83,261
(4)%	55,507
(2)%	27,754
2%	(27,754)
4%	(55,507)
6%	(83,261)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of March 31, 2011 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (67,651)
(4)%	(45,101)
(2)%	(22,550)
2%	22,550
4%	45,101
6%	67,651

The following per-share amounts are based on a combined federal and state statutory tax rate of 37.5%, and 30.8 million diluted shares outstanding for the three months ended March 31, 2011. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at March 31, 2011, net income for the three months ended March 31, 2011 would increase or decrease by approximately $8.7 million, or $0.28 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at March 31, 2011, net income for the three months ended March 31, 2011 would increase or decrease by approximately $7.0 million, or $0.23 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $43.4 million, or $1.41 per diluted share, and $35.2 million, or $1.14 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $8.7 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the

provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2010, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 15.7%.

As shown in greater detail in the table below, the amounts ultimately paid out on our prior period liabilities in fiscal years 2010 and through March 31, 2011, were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

We recognized a benefit from prior period claims development in the amount of $44.4 million for the three months ended March 31, 2011 (see table below). This amount represents our estimate as of March 31, 2011 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2010 exceeded the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2010 was due primarily to the following factors:

- We overestimated the impact of an increase in pending high dollar claims at our Ohio health plan.
- We underestimated the lower cost associated with changes to provider fee schedules (primarily for outpatient facility costs) in New Mexico effective November 1, 2010.

The following developments partially offset the overestimation of our claims liability at December 31, 2010:

- In Missouri, delays in claims processing late in the fourth quarter of 2010 led us to underestimate the size of our claims liability at December 31, 2010.
- We underestimated the costs associated with our assumption of risk for a new population in Texas (rural CHIP members) effective September 1, 2010.

We recognized a benefit from prior period claims development in the amount of $38.5 million, and $49.4 million for the three months ended March 31, 2010, and the year ended December 31, 2010, respectively (see table below). This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2009. The overestimation of claims liability at December 31, 2009 was the result of the following factors:

- In New Mexico, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- In California, we underestimated the extent to which various network restructuring, provider contracting, and medical management initiatives had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

In estimating our claims liability at March 31, 2011, we adjusted our base calculation to take account of the following factors that we believe are reasonably likely to change our final claims liability amount:

- The assumption of risk for a new population by our Texas health plan (Dallas-Fort Worth area ABD members) effective February 1, 2011.
- The transition of certain members by our Washington and Michigan health plans from full-risk capitated provider arrangements to fee-for-service providers effective December 31, 2010. This change had the effect of transferring back to the Company risk that had previously been assumed by capitated medical providers.
- A substantial decline in claims inventory at our Florida and New Mexico health plans.
- A substantial increase in claims inventory at our Michigan, Missouri, and Texas health plans.
- Our liability for an unknown number of maternity related claims that were mistakenly paid on our behalf by the state of Michigan.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the underestimation or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2010 and through March 31, 2011, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both periods, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The negative amounts displayed for "*Components of medical care costs related to:* Prior years" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Three Months Ended March 31,		Year Ended
	2011	2010	Dec. 31, 2010
	(Dollars in thousands, except per-member amounts)		
Balances at beginning of year	$ 354,356	$ 315,316	$ 315,316
Balance of acquired subsidiary	—	—	3,228
Components of medical care costs related to:			
Current year	957,909	861,271	3,420,235
Prior years	(44,377)	(38,455)	(49,378)
Total medical care costs	913,532	822,816	3,370,857
Payments for medical care costs related to:			
Current year	646,428	581,389	3,085,388
Prior years	270,078	230,970	249,657
Total paid	916,506	812,359	3,335,045
Balances at end of year	$ 351,382	$ 325,773	$ 354,356
Benefit from prior years as a percentage of:			
Balance at beginning of year	12.5%	12.1%	15.7%
Premium revenue	4.1%	4.0%	1.2%
Medical care costs	4.9%	4.7%	1.5%
Claims Data:			
Days in claims payable, fee for service only	41	44	42
Number of members at end of period	1,647,000	1,482,000	1,613,000
Fee-for-service claims processing and inventory information:			
Number of claims in inventory at end of period	185,300	153,700	143,600
Billed charges of claims in inventory at end of period	$ 250,600	$ 194,000	$ 218,900
Claims in inventory per member at end of period	0.11	0.10	0.09
Billed charges of claims in inventory per member at end of period	$ 152.16	$ 130.90	$ 135.71
Number of claims received during the period	4,342,200	3,493,300	14,554,800
Billed charges of claims received during the period	$ 3,386,600	$ 2,760,500	$ 11,686,100

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures, and programs that we have not yet identified.

Item 3. ***Quantitative and Qualitative Disclosures About Market Risk.***

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Funds Prime Series — Institutional Class, and the PFM Funds Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years or less and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the three months ended March 31, 2011 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. ***Legal Proceedings***

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly-funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. Based upon the evaluation of information currently available, we believe that these actions, when finally concluded and determined, are not likely to have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Item 1A. ***Risk Factors***

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. There has been no material change to the risk factors identified in Part 1, Item 1A — Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2010 as filed with the SEC on March 8, 2011.

Item 6. ***Exhibits***

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended March 31, 2011 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Form 10-K

PART I

Item 1: *Business*

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. Our business focuses exclusively on government-sponsored health care programs, and includes our Health Plans segment, our Molina Medicaid Solutions℠ segment, and our smaller direct delivery line of business. Our Health Plans segment consists of licensed health maintenance organizations serving Medicaid populations in ten states. Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to Medicaid agencies in an additional five states. Our direct delivery line of business consists of 16 primary care community clinics in California and two primary care community clinics in Washington, and we also manage three county-owned primary care community clinics under a contract with Fairfax County, Virginia. Dr. C. David Molina founded our company in 1980 as a provider organization serving the Medicaid population in Southern California. Today we remain a provider-focused company led by his son, Dr. J. Mario Molina.

Our Health Plans segment operates Medicaid managed care plans in the states of California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin that serve a total of approximately 1.6 million members. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our Health Plans segment derives its revenue principally in the form of premiums paid under Medicaid contracts with the states in which our health plans operate. While the health plans receive fixed per-member per-month, or PMPM, premium payments from the states, the health plans are at risk for the medical costs associated with their members' health care. Our Health Plans segment operates in a highly regulated environment, with stringent minimum capitalization requirements which limit the ability of our health plan subsidiaries to pay dividends to us.

Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS, a core information technology tool used to support the administration of state Medicaid and other health care entitlement programs. Our Molina Medicaid Solutions segment currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program. We added the Molina Medicaid Solutions segment to our business in May 2010 to expand our product offerings to include support of state Medicaid agency administrative needs; to reduce the variability in our earnings resulting from fluctuations in medical care costs; to improve our operating profit margin percentages; and to improve our cash flow by adding a business for which there are no restrictions on dividend payments.

From a strategic perspective, we believe our two business segments and our direct delivery business line allow us to participate in an expanding sector of the economy and continue our mission of serving low-income families and individuals eligible for government-sponsored health care programs. Operationally, our two business segments share a common systems platform, which allows for economies of scale and common experience in meeting the needs of state Medicaid programs. We also believe that we have opportunities to market to state Medicaid agencies various cost containment and quality practices used by our health plans, such as care management and care coordination, for incorporation into their own fee-for-service Medicaid programs.

Our principal executive offices are located at 200 Oceangate, Suite 100, Long Beach, California 90802, and our telephone number is (562) 435-3666. Our website is *www.molinahealthcare.com.*

Information contained on our website or linked to our website is not incorporated by reference into, or as part of, this annual report. Unless the context otherwise requires, references to "Molina Healthcare," the "Company," "we," "our," and "us" herein refer to Molina Healthcare, Inc. and its subsidiaries. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to these reports, are available free of charge on our website, *www.molinahealthcare.com*, as soon as reasonably practicable after such reports are electronically filed with or furnished to the Securities and Exchange Commission, or SEC. Information regarding our officers and directors, and copies of our Code of Business Conduct and Ethics, Corporate Governance Guidelines, and our Audit, Compensation, Corporate Governance and Nominating Committee, and Compliance Committee Charters, are also available on our website. Such information is also available in print upon the request

of any stockholder to our Investor Relations department at the address of our executive offices set forth above. In accordance with New York Stock Exchange, or NYSE, rules, on June 2, 2010, we filed the annual certification by our Chief Executive Officer certifying that he was unaware of any violation by us of the NYSE's corporate governance listing standards at the time of the certification.

Molina Healthcare, the Molina Healthcare logo, Molina Medicaid Solutions℠, motherhood matters!℠, breathe with ease!℠, and Healthy Living with Diabetes℠ are registered servicemarks of Molina Healthcare, Inc.

Our Industry

The Medicaid and CHIP Programs. The Medicaid program is a federal entitlement program administered by the states. Medicaid provides health care and long-term care services and support to low-income Americans. Subject to federal rules, states have significant flexibility to structure their own programs in terms of eligibility, benefits, delivery of services, and provider payments. Medicaid is funded jointly by the states and the federal government. The federal government guarantees matching funds to states for qualifying Medicaid expenditures based on each state's federal medical assistance percentage, or FMAP. A state's FMAP is calculated annually and varies inversely with average personal income in the state. The average FMAP across all states prior to FY 2009 was 57 percent, but ranged from a federally established FMAP floor at 50 percent to as high as 76 percent. With the passage of the American Recovery and Reinvestment Act, or ARRA, stimulus package in 2009, FMAP rates for all states increased by a minimum of 6.2 percentage points between October 1, 2009 and December 31, 2010, plus an additional increase adjusted quarterly based on the state's unemployment rate. Congress has extended through June 2011 the increased FMAP, but at a reduced rate from the previous ARRA enhancement.

The most common state-administered Medicaid program is the Temporary Assistance for Needy Families program, or TANF (often pronounced "TAN-if"). Another common state-administered Medicaid program is for the aged, blind or disabled, or ABD, Medicaid members. In addition, the Children's Health Insurance Program, or CHIP, is a joint federal and state matching program that provides health care coverage to children whose families earn too much to qualify for Medicaid coverage. States have the option of administering CHIP through their Medicaid programs.

As a result of recently enacted health care reform legislation, the Patient Protection and Affordable Care Act, the Medicaid and CHIP population is expected to grow from approximately 60 million people today to approximately 82 million people by 2019. Over that same period, total Medicaid and CHIP expenditures are expected to grow from approximately $427 billion to approximately $896 billion.

Each state establishes its own eligibility standards, benefit packages, payment rates, and program administration within broad federal statutory and regulatory guidelines. Every state Medicaid program must balance many potentially competing demands, including the need for quality care, adequate provider access, and cost-effectiveness. In an effort to improve quality and provide more uniform and more cost-effective care, many states have implemented Medicaid managed care programs. These programs seek to improve access to coordinated health care services, including preventive care, and to control health care costs. Under Medicaid managed care programs, a health plan receives capitation payments from the state. The health plan, in turn, arranges for the provision of health care services by contracting with a network of medical providers. The health plan implements care management and care coordination programs that seek to improve both care access and care quality, while controlling costs more effectively.

While many states have embraced Medicaid managed care programs, others continue to operate traditional fee-for-service programs to serve all or part of their Medicaid populations. Under fee-for-service Medicaid programs, health care services are made available to beneficiaries as they seek that care, without the benefit of a coordinated effort to maintain and improve their health. As a consequence, treatment is often postponed until medical conditions become more severe, leading to higher costs and more unfavorable outcomes. Additionally, providers paid on a fee-for-service basis are compensated based upon services they perform, rather than health outcomes, and therefore lack incentives to coordinate preventive care, monitor utilization, and control costs.

Because Medicaid is a state-administered program, every state must have mechanisms, policies, and procedures in place to perform a large number of crucial functions, including the determination of eligibility and the reimbursement of medical providers for services provided. This requirement exists regardless of whether a state has adopted a fee-for-service or a managed care delivery model. MMIS are used by states to support these administrative activities. The federal government typically reimburses the states for 90% of the costs incurred in the

design, development, and implementation of an MMIS and for 50% of the costs incurred in operating an MMIS. Although a small number of states build and operate their own MMIS, a far more typical practice is for states to sub-contract the design, development, implementation, and operation of their MMIS to private parties. Through our Molina Medicaid Solutions segment, we now actively participate in this market.

In certain instances, states have elected to provide medical benefits to individuals and families who are not served by Medicaid. In New Mexico and Washington, our health plan segment participates in programs that are administered in a manner similar to Medicaid and CHIP, but without federal matching funds.

Medicare Advantage Plans. During 2010, each of our health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, and Washington operated Medicare Advantage plans, each of which included a mandatory Part D prescription drug benefit. Our Medicare Advantage special needs plans, or SNPs, operate under the trade name, Molina Medicare Options Plus, and serve those beneficiaries who are dually eligible for both Medicare and Medicaid, such as low-income seniors and people with disabilities. Our Medicare Advantage Prescription Drug plans, or MA-PDs, operate under the trade name, Molina Medicare Options. Although our MA-PD benefit plans do not exclusively enroll dual eligible beneficiaries, the plans' benefit structure is designed to appeal to lower income beneficiaries. We believe offering these Medicare plans is consistent with our historical mission of serving low-income and medically underserved families and individuals. None of our health plans operate a Medicare Advantage private fee-for-service plan. Total enrollment in our Medicare Advantage plans at December 31, 2010 was approximately 24,500 members. Our 2010 premium revenues from Medicare across all health plans represented approximately 6.6% of our total premium revenues.

Overall, approximately 82% of our members are TANF, 9% are CHIP, 8% are ABD, and 1% are Medicare.

Our Strengths

We focus on serving low-income families and individuals who receive health care benefits through government-sponsored programs within a managed care model. Additionally, we support state Medicaid agencies by providing them with comprehensive solutions to their MMIS development and operating needs. Our approach to our business is based on the following strengths:

Comprehensive Medicaid Services. We offer a complete suite of Medicaid services, ranging from quality care, disease management, and cost management through our Health Plans segment, to state-level MMIS administration through our Molina Medicaid Solutions segment, to the direct delivery of health care services at our clinics. We have the ability to draw upon our experience and expertise in each of these areas to enhance the quality of the services we offer in the others.

Flexible Service Delivery Systems. Our health plan care delivery systems are diverse and readily adaptable to different markets and changing conditions. We arrange health care services with a variety of providers, including independent physicians and medical groups, hospitals, ancillary providers, and our own clinics. Our systems support multiple types of contract models. Our provider networks are well-suited, based on medical specialty, member proximity, and cultural sensitivity, to provide services to our members. Our Molina Medicaid Solutions platform is based upon commercial off-the-shelf technology, or COTS. As a result, we believe that our Molina Medicaid Solutions platform has the flexibility to meet a wide variety of state Medicaid administrative needs in a timely and cost-effective manner.

Proven Expansion and Acquisition Capability. We have successfully replicated the business model of our health plan segment through the acquisition of health plans, the start-up development of new operations, and the transition of members from other health plans. The successful acquisition of our New Mexico, Missouri, and Wisconsin health plans demonstrated our ability to expand into new states. The establishment of our health plans in Utah, Ohio, Texas, and Florida reflects our ability to replicate our business model on a start-up basis in new states, while contract acquisitions in California, Michigan, and Washington have demonstrated our ability to expand our operations within states in which we were already operating.

Administrative Efficiency. We have centralized and standardized various functions and practices to increase administrative efficiency. The steps we have taken include centralizing claims processing and information services onto a single platform. We have standardized medical management programs, pharmacy benefits management contracts, and health education programs. In addition, we have designed our administrative and operational infrastructure to be scalable for cost-effective expansion into new and existing markets.

Recognition for Quality of Care. The National Committee for Quality Assurance, or NCQA, has accredited eight of our ten Medicaid managed care plans. Our Missouri health plan is currently seeking NCQA accreditation, and our recently acquired Wisconsin plan will be seeking NCQA accreditation in the future. We believe that these objective measures of the quality of the services that we provide will become increasingly important to state Medicaid agencies.

Experience and Expertise. Since the founding of our Company in 1980 to serve the Medicaid population in Southern California through a small network of primary care clinics, we have increased our membership to 1.6 million members, expanded our Health Plans segment to ten states, and added our Molina Medicaid Solutions segment. Our experience over the last 30 years has allowed us to develop strong relationships with the constituents we serve, establish significant expertise as a government contractor, and develop sophisticated disease management, care coordination and health education programs that address the particular health care needs of our members. We also benefit from a thorough understanding of the cultural and linguistic needs of Medicaid populations.

Our Strategy

Our objective is to provide a comprehensive suite of Medicaid-related services to meet the health care needs of low-income families and individuals and the state Medicaid agencies that serve them. To achieve our objective, we intend to:

Continue to expand within existing markets. We plan to continue our growth in existing markets by expanding our service areas and provider networks, increasing awareness of the Molina brand name, extending our services to new populations (including the aged, blind, or disabled), maintaining positive provider relationships, and integrating members from other health plans.

Continue to enter new strategic markets. We plan to continue to enter new markets through both acquisitions and by building our own start-up operations. For example, on September 1, 2010, we acquired for approximately $15.5 million Abri Health Plan, a provider of Medicaid managed care services in Wisconsin. We intend to focus our expansion in markets with competitive provider communities, supportive regulatory environments, significant size and, where practicable, mandated Medicaid managed care enrollment.

Continue to provide quality cost-effective care. We plan to use our strong provider networks and the knowledge gained through the operation of our clinics to further develop and utilize effective medical management and other coordinated programs that address the distinct needs of our members and improve the quality and cost-effectiveness of their care.

Leverage operational efficiencies. We intend to leverage the operational efficiencies created by our centralized administrative infrastructure and flexible information systems to earn higher margins on future revenues. We believe our administrative infrastructure has significant expansion capacity, allowing us to integrate new members from expansion within existing markets and enter new markets at lower incremental cost.

Deliver administrative value to state Medicaid agencies. As Medicaid expenditures increase, we believe that an increasing number of states will demand comprehensive solutions that improve both quality and cost-effectiveness. We intend to use our MMIS solution to provide state Medicaid agencies with a flexible and robust solution to their administrative needs. For example, we can apply analytics to improve the functionality of care management processes. We believe that we can help strengthen these tools in ways that translate into both better care and cost containment. We believe that our MMIS platform, together with our extensive experience in health care management and health plan operations, enables us to offer state Medicaid agencies a comprehensive suite of Medicaid-related solutions that meets their needs for quality and for the cost-effective operation of their Medicaid programs.

Open additional primary care clinics. During 2010, we became more diversified and more efficient by expanding our involvement in the direct delivery of primary care. The community clinic model offers an integrated approach that helps us improve both the quality and cost-effectiveness of the care our members receive. In 2010 we opened two clinics in Washington so that we can serve our members' needs for primary and behavioral health services in one place. We also expanded the capacity of our existing clinics in California in anticipation of increases in the numbers of ABD members in our plans. Approximately 20% of our California health plan's membership is now being served by the health plan's 16 primary care clinics. The growth and aging of the population of the United States foreshadows an increasing shortage of physicians over the next 15 years. Health care reform is expected to

worsen this shortage. We believe the shortage will be felt most acutely among already underserved populations, such as the low income families and individuals we serve. We therefore intend to expand on the direct delivery component of our business by developing additional community care clinics at certain of our health plans during 2011. While we have no plans to become an organization that fully integrates primary care delivery with our health plans, by leveraging this capability selectively we can improve access for our plan members in areas that are most underserved by primary care providers.

Pursue opportunities presented by ICD-10 conversion requirements. Over the next three years, health insurance plans are required to upgrade their systems for diagnosis, medical procedure coding, and claims processing under the tenth revisions of the International Statistical Classification of Diseases, or ICD-10. The United States Department of Health and Human Services will require payers and providers to transition to ICD-10 by October 2013. For many smaller health plans with less than one million members, the costs of making the necessary systems upgrades will be substantial. For companies like ours, the benefits of scale in this environment will be significant. We believe we will be positioned to reduce the cost per member for compliance with ICD-10. At the same time, the new requirements will create revenue opportunities for Molina Medicaid Solutions.

Prepare for health care reform. In preparation for the large scale changes associated with federal health care reform, we have organized a dedicated business unit to address issues of strategy, policy, reform readiness, and implementation. Health care reform opportunities include an estimated 16 million more members eligible for Medicaid by 2019, 30 million more individuals covered by health insurance exchanges, and increasing demand for long-term care and behavioral health services. In the next three years, we anticipate that many states will be offering new Medicaid RFP expansions in order to avoid disruptions in 2014 in connection with the full implementation of health care reform. For instance, several states are currently evaluating transitioning their ABD populations into managed care. Pursuant to a Section 1115 waiver expansion in California, we will be enrolling new ABD members in California by year end 2011.

Medicaid Contracts

With the exception of our Missouri health plan, which does not serve ABD or Medicare members, and our Wisconsin health plan, which does not serve Medicare members, all of our health plans serve TANF, CHIP, ABD, and Medicare members. For its Medicare members, each health plan enters into a one-year annually renewable contract with the Centers for Medicare and Medicaid Services, or CMS. For its other members, each health plan enters into a contract with the state's Medicaid agency. The contractual relationship with the state is generally for a period of one- to two-years and renewable on an annual or biannual basis at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause upon 30 days to nine months prior written notice. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

Our contracts with the state determine the type and scope of health care services that we arrange for our members. Generally, our contracts require us to arrange for preventive care, office visits, inpatient and outpatient hospital and medical services, and pharmacy benefits. The contracts also detail the requirements for operating in the Medicaid sector, including provisions relating to: eligibility; enrollment and disenrollment processes; covered benefits; eligible providers; subcontractors; record-keeping and record retention; periodic financial and informational reporting; quality assurance; marketing; financial standards; timeliness of claims payments; health education, wellness and prevention programs; safeguarding of member information; fraud and abuse detection and reporting; grievance procedures; and organization and administrative systems. A health plan's compliance with these requirements is subject to monitoring by state regulators. A health plan is subject to periodic comprehensive quality assurance evaluation by a third-party reviewing organization and generally by the insurance department of the jurisdiction that licenses the health plan. Most health plans must also submit quarterly and annual statutory financial statements and utilization reports, as well as many other reports in accordance with individual state requirements.

We are usually paid a negotiated PMPM amount, with the PMPM amount varying from contract to contract. Generally, that amount is higher in states where we are required to offer more extensive health benefits. We are also

paid an additional amount for each newborn delivery from the Medicaid programs in all of our state health plans, except with respect to our New Mexico health plan.

Provider Networks

We arrange health care services for our members through contracts with providers that include independent physicians and groups, hospitals, ancillary providers, and our own clinics. Our network of providers includes primary care physicians, specialists and hospitals. Our strategy is to contract with providers in those geographic areas and medical specialties necessary to meet the needs of our members. We also strive to ensure that our providers have the appropriate cultural and linguistic experience and skills.

Physicians. We contract with both primary care physicians and specialists, many of whom are organized into medical groups or independent practice associations, or IPAs. Primary care physicians provide office-based primary care services. Primary care physicians may be paid under capitation or fee-for-service contracts and may receive additional compensation by providing certain preventive services. Our specialists care for patients for a specific episode or condition, usually upon referral from a primary care physician, and are usually compensated on a fee-for-service basis. When we contract with groups of physicians on a capitated basis, we monitor their solvency.

Hospitals. We generally contract with hospitals that have significant experience dealing with the medical needs of the Medicaid population. We reimburse hospitals under a variety of payment methods, including fee-for-service, per diems, diagnostic-related groups, or DRGs, capitation, and case rates.

Primary Care Clinics. Our California health plan operates 16 company-owned primary care clinics in California staffed by our physicians, physician assistants, and nurse practitioners. These clinics are located in neighborhoods where our members live, and provide us a first-hand opportunity to understand the special needs of our members. The clinics assist us in developing and implementing community education, disease management, and other programs. The clinics also give us direct clinic management experience that enables us to better understand the needs of our contracted providers. In addition, we have a non-licensed subsidiary in Virginia which manages three health care clinics for Fairfax County, and our Washington health plan operates two Company-owned primary care clinics.

Medical Management

Our experience in medical management extends back to our roots as a provider organization. Primary care physicians are the focal point of the delivery of health care to our members, providing routine and preventive care, coordinating referrals to specialists, and assessing the need for hospital care. This model has proven to be an effective method for coordinating medical care for our members. The underlying challenge we face is to coordinate health care so that our members receive timely and appropriate care from the right provider at the appropriate cost. In support of this goal, and to ensure medical management consistency among our various state health plans, we continuously refine and upgrade our medical management efforts at both the corporate and subsidiary levels.

We seek to ensure quality care for our members on a cost-effective basis through the use of certain key medical management and cost control tools. These tools include utilization management, case and health management, and provider network and contract management.

Utilization Management. We continuously review utilization patterns with the intent to optimize quality of care and ensure that only appropriate services are rendered in the most cost-effective manner. Utilization management, along with our other tools of medical management and cost control, is supported by a centralized corporate medical informatics function which utilizes third-party software and data warehousing tools to convert data into actionable information. We use a predictive modeling capability that supports a proactive case and health management approach both for us and our affiliated physicians.

Case and Health Management. We seek to encourage quality, cost-effective care through a variety of case and health management programs, including disease management programs, educational programs, and pharmacy management programs.

Disease Management Programs. We develop specialized disease management programs that address the particular health care needs of our members. *motherhood matters!*sm is a comprehensive program designed to improve pregnancy outcomes and enhance member satisfaction. *breathe with ease!*sm is a multi-disciplinary disease management program that provides health education resources and case management services to assist physicians caring for asthmatic members between the ages of three and fifteen. *Healthy Living with Diabetes*sm is a diabetes

disease management program. *"Heart Health Living"* is a cardiovascular disease management program for members who have suffered from congestive heart failure, angina, heart attack, or high blood pressure.

Educational Programs. Educational programs are an important aspect of our approach to health care delivery. These programs are designed to increase awareness of various diseases, conditions, and methods of prevention in a manner that supports our providers while meeting the unique needs of our members. For example, we provide our members with information to guide them through various episodes of care. This information, which is available in several languages, is designed to educate parents on the use of primary care physicians, emergency rooms, and nurse call centers.

Pharmacy Management Programs. Our pharmacy management programs focus on physician education regarding appropriate medication utilization and encouraging the use of generic medications. Our pharmacists and medical directors work with our pharmacy benefits manager to maintain a formulary that promotes both improved patient care and generic drug use. We employ full-time pharmacists and pharmacy technicians who work with physicians to educate them on the uses of specific drugs, the implementation of best practices, and the importance of cost-effective care.

Provider Network and Contract Management. The quality, depth, and scope of our provider network are essential if we are to ensure quality, cost-effective care for our members. In partnering with quality, cost-effective providers, we utilize clinical and financial information derived by our medical informatics function, as well as the experience we have gained in serving Medicaid members to gain insight into the needs of both our members and our providers. As we grow in size, we seek to strengthen our ties with high-quality, cost-effective providers by offering them greater patient volume.

Plan Administration and Operations

Management Information Systems. All of our health plan information technology and systems operate on a single platform. This approach avoids the costs associated with maintaining multiple systems, improves productivity, and enables medical directors to compare costs, identify trends, and exchange best practices among our plans. Our single platform also facilitates our compliance with current and future regulatory requirements.

The software we use is based on client-server technology and is scalable. We believe the software is flexible, easy to use, and allows us to accommodate anticipated enrollment growth and new contracts. The open architecture of the system gives us the ability to transfer data from other systems without the need to write a significant amount of computer code, thereby facilitating the integration of new plans and acquisitions.

We have designed our corporate website with a focus on ease of use and visual appeal. Our website has a secure ePortal which allows providers, members, and trading partners to access individualized data. The ePortal allows the following self-services:

- *Provider Self Services.* Providers have the ability to access information regarding their members and claims. Key functionalities include Check Member Eligibility, View Claim, and View/Submit Authorizations.
- *Member Self Services.* Members can access information regarding their personal data, and can perform the following key functionalities: View Benefits, Request New ID Card, Print Temporary ID Card, and Request Change of Address/PCP.
- *File Exchange Services.* Various trading partners — such as service partners, providers, vendors, management companies, and individual IPAs — are able to exchange data files (such as those that may be required by the Health Insurance Portability and Accountability Act of 1996, or HIPAA, or any other proprietary format) with us using the file exchange functionality.

Best Practices. We continuously seek to promote best practices. Our approach to quality is broad, encompassing traditional medical management and the improvement of our internal operations. We have staff assigned full-time to the development and implementation of a uniform, efficient, and quality-based medical care delivery model for our health plans. These employees coordinate and implement Company-wide programs and strategic initiatives such as preparation of the Healthcare Effectiveness Data and Information Set, or HEDIS, and accreditation by the NCQA. We use measures established by the NCQA in credentialing the physicians in our network. We routinely use peer review to assess the quality of care rendered by providers. Eight of our ten health plans are accredited by the NCQA.

Claims Processing. All of our health plans operate on a single managed care platform for claims processing (the QNXT 3.4 system), with the exception of our newly acquired Wisconsin plan which we expect will be migrated to the Molina standard platform in January 2012.

Centralized Management Services. We provide certain centralized medical and administrative services to our health plans pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems, and human resources services. Fees for such services are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the health plan's ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate.

Compliance. Our health plans have established high standards of ethical conduct. Our compliance programs are modeled after the compliance guidance statements published by the Office of the Inspector General of the U.S. Department of Health and Human Services. Our uniform approach to compliance makes it easier for our health plans to share information and practices and reduces the potential for compliance errors and any associated liability.

Disaster Recovery. We have established a disaster recovery and business resumption plan, with back-up operating sites, to be deployed in the case of a major disruptive event.

Competition

We operate in a highly competitive environment. The Medicaid managed care industry is fragmented, and the competitive landscape is subject to ongoing changes as a result of business consolidations and new strategic alliances. We compete with a large number of national, regional, and local Medicaid service providers, principally on the basis of size, location, and quality of provider network, quality of service, and reputation. Competition can vary considerably from state to state. Below is a general description of our principal competitors for state contracts, members, and providers:

- *Multi-Product Managed Care Organizations* — National and regional managed care organizations that have Medicaid members in addition to numerous commercial health plan and Medicare members.
- *Medicaid HMOs* — National and regional managed care organizations that focus principally on providing health care services to Medicaid beneficiaries, many of which operate in only one city or state.
- *Prepaid Health Plans* — Health plans that provide less comprehensive services on an at-risk basis or that provide benefit packages on a non-risk basis.
- *Primary Care Case Management Programs* — Programs established by the states through contracts with primary care providers to provide primary care services to Medicaid beneficiaries, as well as to provide limited oversight of other services.

We will continue to face varying levels of competition. Health care reform proposals may cause organizations to enter or exit the market for government sponsored health programs. However, the licensing requirements and bidding and contracting procedures in some states may present partial barriers to entry into our industry.

We compete for government contracts, renewals of those government contracts, members, and providers. State agencies consider many factors in awarding contracts to health plans. Among such factors are the health plan's provider network, medical management, degree of member satisfaction, timeliness of claims payment, and financial resources. Potential members typically choose a health plan based on a specific provider being a part of the network, the quality of care and services available, accessibility of services, and reputation or name recognition of the health plan. We believe factors that providers consider in deciding whether to contract with a health plan include potential member volume, payment methods, timeliness and accuracy of claims payment, and administrative service capabilities.

Molina Medicaid Solutions competes with large MMIS vendors, such as HP Enterprise Services (formerly known as EDS), ACS (owned by Xerox Corporation), Computer Services Corporation, or CSC, and CNSI.

Regulation

Our health plans are highly regulated by both state and federal government agencies. Regulation of managed care products and health care services varies from jurisdiction to jurisdiction, and changes in applicable laws and rules can occur frequently. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and

rules. Such agencies have become increasingly active in recent years in their review and scrutiny of health insurers and managed care organization, including those operating in the Medicaid and Medicare programs.

To operate a health plan in a given state, we must apply for and obtain a certificate of authority or license from that state. Our operating health plans are licensed to operate as health maintenance organizations, or HMOs, in each of California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. In those states we are regulated by the agency with responsibility for the oversight of HMOs which, in most cases, is the state department of insurance. In California, however, the agency with responsibility for the oversight of HMOs is the Department of Managed Health Care. Licensing requirements are the same for us as they are for health plans serving commercial or Medicare members. We must demonstrate that our provider network is adequate, that our quality and utilization management processes comply with state requirements, and that we have adequate procedures in place for responding to member and provider complaints and grievances. We must also demonstrate that we can meet requirements for the timely processing of provider claims, and that we can collect and analyze the information needed to manage our quality improvement activities. In addition, we must prove that we have the financial resources necessary to pay our anticipated medical care expenses and the infrastructure needed to account for our costs.

Our health plans are required to file quarterly and annual reports of their operating results with the appropriate state regulatory agencies. These reports are accessible for public viewing. Each health plan undergoes periodic examinations and reviews by the state in which it operates. The health plans generally must obtain approval from the state before declaring dividends in excess of certain thresholds. Each health plan must maintain its net worth at an amount determined by statute or regulation. The minimum statutory net worth requirements differ by state, and are generally based on statutory minimum risk-based capital, or RBC, requirements. The RBC requirements are based on guidelines established by the National Association of Insurance Commissioners, or NAIC, and are administered by the states. Our Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin health plans are subject to RBC requirements. Any acquisition of another plan's members or its state contracts must also be approved by the state, and our ability to invest in certain financial securities may be prescribed by statute.

In addition, we are also regulated by each state's department of health services or the equivalent agency charged with oversight of Medicaid and CHIP. These agencies typically require demonstration of the same capabilities mentioned above and perform periodic audits of performance, usually annually.

Medicaid. Medicaid was established in 1965 under the U.S. Social Security Act to provide medical assistance to the poor. Although both the federal and state governments jointly fund it, Medicaid is a state-operated and state-implemented program. Our contracts with the state Medicaid programs impose various requirements on us in addition to those imposed by applicable federal and state laws and regulations. Within broad guidelines established by the federal government, each state:

- establishes its own member eligibility standards;
- determines the type, amount, duration, and scope of services;
- sets the rate of payment for health care services; and
- administers its own program.

We obtain our Medicaid contracts in different ways. Some states award contracts to any applicant demonstrating that it meets the state's requirements. Other states engage in a competitive bidding process. In all cases, we must demonstrate to the satisfaction of the state Medicaid program that we are able to meet the state's operational and financial requirements. These requirements are in addition to those required for a license and are targeted to the specific needs of the Medicaid population. For example:

- We must measure provider access and availability in terms of the time needed to reach the doctor's office using public transportation;
- Our quality improvement programs must emphasize member education and outreach and include measures designed to promote utilization of preventive services;
- We must have linkages with schools, city or county health departments, and other community-based providers of health care, to demonstrate our ability to coordinate all of the sources from which our members may receive care;
- We must be able to meet the needs of the disabled and others with special needs;

- Our providers and member service representatives must be able to communicate with members who do not speak English or who are deaf; and
- Our member handbook, newsletters, and other communications must be written at the prescribed reading level, and must be available in languages other than English.

In addition, we must demonstrate that we have the systems required to process enrollment information, to report on care and services provided, and to process claims for payment in a timely fashion. We must also have the financial resources needed to protect the state, our providers, and our members against the insolvency of one of our health plans.

Medicare. Medicare is a federal program that provides eligible persons age 65 and over and some disabled persons a variety of hospital, medical insurance, and prescription drug benefits. Medicare is funded by Congress, and administered by the Centers for Medicare and Medicaid Services, or CMS. Medicare beneficiaries have the option to enroll in a Medicare Advantage plan. Under Medicare Advantage, managed care plans contract with CMS to provide benefits that are comparable to original Medicare in exchange for a fixed PMPM premium payment that varies based on the county in which a member resides, the demographics of the member, and the member's health condition.

The Medicare Prescription Drug, Improvement and Modernization Act of 2003, or MMA, made numerous changes to the Medicare program, including expanding the Medicare program to include a prescription drug benefit. Since 2006, Medicare beneficiaries have had the option of selecting a new prescription drug benefit from an existing Medicare Advantage plan. The drug benefit, available to beneficiaries for a monthly premium, is subject to certain cost sharing depending upon the specific benefit design of the selected plan. Plans are not required to offer the same benefits, but are required to provide coverage that is at least actuarially equivalent to the standard drug coverage delineated in the MMA.

On July 15, 2008, the Medicare Improvements for Patients and Providers Act, or MIPPA, became law and, in September 2008, CMS promulgated implementing regulations. MIPPA impacts a broad range of Medicare activities and impacts all types of Medicare managed care plans. MIPPA and subsequent CMS guidance place prohibitions and limitations on certain sales and marketing activities of Medicare Advantage plans. Among other things, Medicare Advantage plans are not permitted to make unsolicited outbound calls to potential members or engage in other forms of unsolicited contact, establish appointments without documented consent from potential members, or conduct sales events in certain provider-based settings. MIPPA also establishes certain restrictions on agent and broker compensation.

HIPAA. In 1996, Congress enacted the Health Insurance Portability and Accountability Act, or HIPAA. All health plans are subject to HIPAA, including ours. HIPAA generally requires health plans to:

- Establish the capability to receive and transmit electronically certain administrative health care transactions, like claims payments, in a standardized format,
- Afford privacy to patient health information, and
- Protect the privacy of patient health information through physical and electronic security measures.

The Patient Protection and Affordable Care Act of 2010, or ACA, created additional tools for fraud prevention, including increased oversight of providers and suppliers participating or enrolling in Medicaid, CHIP, and Medicare. Those enhancements included mandatory licensure for all providers, and site visits, fingerprinting, and criminal background checks for higher risk providers. On September 23, 2010, CMS issued proposed regulations designed to implement these requirements. It is not clear at this time the degree to which managed care providers would have to comply with these new requirements, many of which resemble procedures that we already have in place.

The Health Information Technology for Economic and Clinical Health Act ("HITECH Act"), a part of the ARRA, modified certain provisions of HIPAA by, among other things, extending the privacy and security provisions to business associates, mandating new regulations around electronic medical records, expanding enforcement mechanisms, allowing the state Attorneys General to bring enforcement actions, and increasing penalties for violations. The U.S. Department of Health and Human Services, as required by the HITECH Act, has issued interim final rules that set forth the breach notification obligations applicable to covered entities and their business associates (the "HHS Breach Notification Rule"). The various requirements of the HITECH Act and the HHS Breach Notification Rule have different compliance dates, some of which have passed and some of which will occur in the future. With respect to those requirements whose compliance dates have passed, we believe that we are

in compliance with these provisions. With respect to those requirements whose compliance dates are in the future, we are reviewing our current practices and identifying those which may be impacted by upcoming regulations. It is our intention to implement these new requirements on or before the applicable compliance dates.

Fraud and Abuse Laws. Our operations are subject to various state and federal health care laws commonly referred to as "fraud and abuse" laws. Fraud and abuse prohibitions encompass a wide range of activities, including kickbacks for referral of members, billing for unnecessary medical services, improper marketing, and violations of patient privacy rights. These fraud and abuse laws include the federal False Claims Act which prohibits the knowing filing of a false claim or the knowing use of false statements to obtain payment from the federal government. Many states have false claim act statutes that closely resemble the federal False Claims Act. If an entity is determined to have violated the federal False Claims Act, it must pay three times the actual damages sustained by the government, plus mandatory civil penalties up to fifty thousand dollars for each separate false claim. Suits filed under the Federal False Claims Act, known as *"qui tam"* actions, can be brought by any individual on behalf of the government and such individuals (known as "relators" or, more commonly, as "whistleblowers") may share in any amounts paid by the entity to the government in fines or settlement. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines or be excluded from the Medicaid, Medicare or other state or Federal health care programs as a result of an investigation arising out of such action. In addition, the Deficit Reduction Action of 2005 ("DRA") encourages states to enact state-versions of the federal False Claims Act that establish liability to the state for false and fraudulent Medicaid claims and that provide for, among other things, claims to be filed by *qui tam* relators.

Companies involved in public health care programs such as Medicaid are often the subject of fraud and abuse investigations. The regulations and contractual requirements applicable to participants in these public sector programs are complex and subject to change. Violations of certain fraud and abuse laws applicable to us could result in civil monetary penalties, criminal fines and imprisonment, and/or exclusion from participation in Medicaid, Medicare, other federal health care programs and federally funded state health programs.

Federal and state governments have made investigating and prosecuting health care fraud and abuse a priority. Although we believe that our compliance efforts are adequate, we will continue to devote significant resources to support our compliance efforts.

Employees

As of December 31, 2010, we had approximately 4,200 employees. Our employee base is multicultural and reflects the diverse Medicaid and Medicare membership we serve. We believe we have good relations with our employees. None of our employees is represented by a union.

Executive Officers of the Registrant

J. Mario Molina, M.D., 52, has served as President and Chief Executive Officer since succeeding his father and company founder, Dr. C. David Molina, in 1996. He has also served as Chairman of the Board since 1996. Prior to that, he served as Medical Director from 1991 through 1994 and was Vice President responsible for provider contracting and relations, member services, marketing and quality assurance from 1994 to 1996. He earned an M.D. from the University of Southern California and performed his medical internship and residency at the Johns Hopkins Hospital. Dr. Molina is the brother of John C. Molina.

John C. Molina, J.D., 46, has served in the role of Chief Financial Officer since 1995. He also has served as a director since 1994. Mr. Molina has been employed by us for over 30 years in a variety of positions. Mr. Molina is a past president of the California Association of Primary Care Case Management Plans. He was recently named to the Los Angeles branch of the Federal Reserve Bank of San Francisco's board of directors. He earned a Juris Doctorate from the University of Southern California School of Law. Mr. Molina is the brother of J. Mario Molina, M.D.

Terry P. Bayer, 60, has served as our Chief Operating Officer since November 2005. She had formerly served as our Executive Vice President, Health Plan Operations since January 2005. Ms. Bayer has 26 years of health care management experience, including staff model clinic administration, provider contracting, managed care operations, disease management, and home care. Prior to joining us, her professional experience included regional responsibility at FHP, Inc. and multi-state responsibility as Regional Vice-President at Maxicare; Partners National Health Plan, a joint venture of Aetna Life Insurance Company and Voluntary Hospital Association (VHA); and Lincoln National. She has also served as Executive Vice President of Managed Care at Matria Healthcare, President

and Chief Operating Officer of Praxis Clinical Services, and as Western Division President of AccentCare. She holds a Juris Doctorate from Stanford University, a Master's degree in Public Health from the University of California, Berkeley, and a Bachelor's degree in Communications from Northwestern University.

Joseph W. White, 52, has served as our Chief Accounting Officer since 2003. In his role as Chief Accounting Officer, Mr. White is responsible for oversight of the Company's accounting, reporting, forecasting, budgeting, actuarial, procurement, treasury and facilities functions. Mr. White has 25 years of financial management experience in the health care industry. Prior to joining the Company in 2003, Mr. White worked for Maxicare Health Plans, Inc. from 1987 through 2002. Mr. White holds a Master's degree in Business Administration and a Bachelor's degree in Commerce from the University of Virginia. Mr. White is a Certified Public Accountant.

James W. Howatt, 64, served as our Chief Medical Officer from May 2007 to February 2011. Effective February 17, 2011, Dr. Howatt was reassigned to the position of medical director of MMS. As medical director of MMS, Dr. Howatt will serve as the clinical leader for existing and future MMS product offerings, and will direct efforts to incorporate care coordination solutions into the government health care programs served by MMS. Prior to joining Molina Healthcare in February 2006, Dr. Howatt was Western Regional Medical Director for Humana. Dr. Howatt received B.S. and M.D. degrees from the University of California, San Francisco, and also holds a Master of Business Administration degree with an emphasis in Health Management from the University of Phoenix.

Item 1A: ***Risk Factors***

RISK FACTORS

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

This annual report on Form 10-K and the documents we incorporate by reference in this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Other than statements of historical fact, all statements that we include in this report and in the documents we incorporate by reference may be deemed to be forward-looking statements for purposes of the Securities Act and the Exchange Act. Such forward-looking statements may be identified by words such as "anticipates," "believes," "could," "estimates," "expects," "guidance," "intends," "may," "outlook," "plans," "projects," "seeks," "will," or similar words or expressions.

Investing in our securities involves a high degree of risk. Before making an investment decision, you should carefully read and consider the following risk factors, as well as the other information we include or incorporate by reference in this report and the information in the other reports we file with the SEC. Such risk factors should be considered not only with regard to the information contained in this annual report, but also with regard to the information and statements in the other periodic or current reports we file with the SEC, as well as our press releases, presentations to securities analysts or investors, or other communications made by or with the approval of one of our executive officers. No assurance can be given that we will actually achieve the results contemplated or disclosed in our forward-looking statements. Such statements may turn out to be wrong due to the inherent uncertainties associated with future events. Accordingly, you should not place undue reliance on our forward-looking statements, which reflect management's analyses, judgments, beliefs, or expectations only as of the date they are made.

If any of the events described in the following risk factors actually occur, our business, results of operations, financial condition, cash flows, or prospects could be materially adversely affected. The risks and uncertainties described below are those that we currently believe may materially affect us. Additional risks and uncertainties not currently known to us or that we currently deem immaterial may also affect our business and operations. As such, you should not consider this list to be a complete statement of all potential risks or uncertainties. Except to the extent otherwise required by federal securities laws, we do not undertake to address or update forward-looking statements in future filings or communications regarding our business or operating results, and do not undertake to address how any of these factors may have caused results to differ from discussions or information contained in previous filings or communications.

Risks Related to Our Health Plans Business

State and federal budget deficits may result in Medicaid, CHIP, or Medicare funding cuts which could reduce our revenues and profit margins.

Nearly all of our premium revenues come from the joint federal and state funding of the Medicaid and CHIP programs. Due to high unemployment levels, Medicaid enrollment levels and Medicaid costs are continuing to increase at the same time that state budgets are suffering from unprecedented deficits. In June 2010, 50.3 million members were enrolled in the Medicaid program throughout the nation, over three million more than in June 2009. Because governmental health care programs account for such a large portion of state budgets, efforts to contain overall government spending and to achieve a balanced budget often result in significant political pressure being directed at the funding for these health care programs. For fiscal year 2011, 46 states have reported budget gaps of a total of $130 billion as of December 2010, and that gap could reach an estimated $160 billion. Resolving the budget shortfalls is now particularly difficult since program reductions and one-time strategies to plug the gaps have already been used in most states. Headed into fiscal year 2012, states do not expect revenue collections to recover to a level sufficient to avoid additional budget cuts. Because Medicaid is one of the largest expenditures in every state budget, and one of the fastest-growing, it will likely be a prime target for cost-containment efforts. All of the states in which we currently operate our health plans are currently facing significant budgetary pressures. The mandate of health reform adding millions of individuals to Medicaid and CHIP will put further pressures on state Medicaid programs.

As part of ARRA, the federal government increased the amount of funding for federal Medicaid matching by approximately $87 billion for the period between October 1, 2008 and December 31, 2010. In August 2010, the President signed a bill extending the ARRA enhanced FMAP on a phased-down basis for two additional quarters through June 30, 2011. The unemployment adjustment remained in the extension, but the law phased down the across-the-board base increase of 6.2 percentage points to 3.2 percentage points from January 1, 2011 to March 31, 2011, and to 1.2 percentage points from April 1, 2011 to June 30, 2011. Almost every state legislature had enacted its 2011 budgets prior to enactment of the extension, and with the uncertainty about whether Congress would extend the enhanced FMAP, each state was forced to make an assumption about whether the higher FMAP would continue beyond December 2010. Even with fiscal relief provided by the extension of ARRA enhanced Medicaid matching rates and the fact that economists pegged June 2009 as the official "end" of the recession, state budgets remain under considerable stress in fiscal year 2011, and without exception state policy leaders expect the fiscal stress to extend into fiscal year 2012. Unemployment remains high, and state revenues remain depressed.

Since the start of the recession, all states have implemented programmatic changes of some kind, including provider rate cuts or freezes, benefit cuts and restrictions, provider taxes and assessments, utilization controls, fraud and abuse reduction strategies and numerous administrative cuts (travel bans, hiring freezes, furloughs and layoffs) to reduce Medicaid cost growth. 20 states reduced Medicaid benefits in fiscal year 2010, more than in any year in the past decade, and 14 states planned to reduce benefits in fiscal year 2011. With the expiration of the ARRA funds on June 30, 2011, states may have no choice but to further cut or revise health care programs, optional benefits, eligibility criteria and thresholds, or health plan rates. Such actions could materially reduce the funding under one or more of our state Medicaid contracts, thereby reducing our revenues and our health plan profit margins. We expect to obtain rate increases during our fiscal year 2011 from the states of California and Ohio, and for the rates at our other health plans (with the exception of our Wisconsin health plan where we expect an 11% rate cut) to remain unchanged during the year. In the event this expectation is undermined by state budget pressures and the rates of any of our health plans are reduced, our business, financial condition, cash flows, or results of operations could be adversely affected. In addition, the timing of payments we receive may be impacted by state budget shortfalls.

Moreover, some federal deficit reduction proposals would fundamentally change the structure and financing of the Medicaid program. Recently, various proposals have been advanced to reduce annual federal deficits and to slow the increase in the national debt. A number of these proposals include both tax increases and spending reductions in discretionary programs and mandatory programs, such as Social Security, Medicare, and Medicaid. Some of the proposals relating to Medicaid would fundamentally change the structure and financing of the program, with major implications for providers and beneficiaries. One such proposal would be to convert Medicaid into a block grant, capping federal Medicaid payments to each state at a specified dollar amount, and limiting the growth in that dollar amount each year. Based on analysis of previous proposals to cap Medicaid, these dollar caps and growth limits would have to be set below the levels at which Medicaid is now expected to grow based on enrollment and health care inflation to save money. In the event the Medicaid program is fundamentally restructured, our business could be adversely affected.

The recently enacted health care reform law and the implementation of that law could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

In March 2010, President Obama signed both the Patient Protection and Affordable Care Act and the Health Care and Education Affordability Reconciliation Act, commonly referred to together as the "ACA". This legislation enacts comprehensive changes to the U.S. health care system, components of which will be phased in at various stages over the next eight years. Among other things, by January 1, 2014, the Medicaid program will be expanded to provide eligibility to nearly all low-income people under age 65 with income below 133 percent of the federal poverty line. As a result, millions of low-income adults without children who currently cannot qualify for coverage, as well as many low-income parents and, in some instances, children now covered through CHIP, will be made eligible for Medicaid. In total, the Congressional Budget Office estimates that Medicaid and CHIP will cover an additional 16 million people by 2019. The legislation also imposes a franchise tax or premium excise tax of $8 billion starting in 2014, with increasing annual amounts thereafter. Such assessment may not be deductible for income tax purposes.

There are many parts of the legislation that will require further guidance in the form of regulations. Due to the breadth and complexity of the health reform legislation, the lack of implementing regulations and interpretive

guidance, and the phased-in nature of the implementation, the overall impact of the health reform legislation on our business over the coming years is difficult to predict and not yet fully known.

In addition, there have been a number of lawsuits filed that challenge all or part of the health care reform law. On January 31, 2011, a Florida District Court ruled that the entire health care reform law is unconstitutional. Other courts have ruled in favor of the law or have only struck down certain provisions of the law. These cases are under appeal and others are in process. We cannot predict the ultimate outcome of any of the litigation. Further, various Congressional leaders have indicated a desire to revisit some or all of the health care reform law during 2011. While the U.S House of Representatives voted to repeal the whole health care reform law, the U.S. Senate voted against such a repeal, and there have separately been a number of bills introduced that would repeal or change certain provisions of the law. Because of these challenges, we cannot predict whether any or all of the legislation will be implemented as enacted, overturned, repealed, or modified.

If we fail to effectively accommodate the growth in Medicaid enrollment anticipated under the health reform legislation, our business may be materially adversely affected. In addition, if the new insurance industry assessment is imposed as enacted, or if we are unable to obtain premium increases to offset the impact of the assessment or otherwise adjust our business model to address the assessment, our business, financial condition, cash flows, or results of operations could be materially adversely affected.

Our profitability depends on our ability to accurately predict and effectively manage our medical care costs.

Our profitability depends to a significant degree on our ability to accurately predict and effectively manage our medical care costs. Historically, our medical care cost ratio, meaning our medical care costs as a percentage of our premium revenue, has fluctuated substantially, and has also varied across our state health plans. Because the premium payments we receive are generally fixed in advance and we operate with a narrow profit margin, relatively small changes in our medical care cost ratio can create significant changes in our overall financial results. For example, if our overall medical care ratio for 2010 of 84.5% had been one percentage point higher, or 85.5%, our earnings for 2010 would have been approximately $1.14 per diluted share rather than our actual 2010 earnings of $1.98 per diluted share, a 42% reduction in our earnings.

Factors that may affect our medical care costs include the level of utilization of health care services, unexpected patterns in the annual flu season, increases in hospital costs, an increased incidence or acuity of high dollar claims related to catastrophic illnesses or medical conditions such as hemophilia for which we do not have adequate reinsurance coverage, increased maternity costs, payment rates that are not actuarially sound, changes in state eligibility certification methodologies, relatively low levels of hospital and specialty provider competition in certain geographic areas, increases in the cost of pharmaceutical products and services, changes in health care regulations and practices, epidemics, new medical technologies, and other various external factors. Many of these factors are beyond our control and could reduce our ability to accurately predict and effectively manage the costs of providing health care services. The inability to forecast and manage our medical care costs or to establish and maintain a satisfactory medical care cost ratio, either with respect to a particular state health plan or across the consolidated entity, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

A failure to accurately estimate incurred but not reported medical care costs may negatively impact our results of operations.

Because of the time lag between when medical services are actually rendered by our providers and when we receive, process, and pay a claim for those medical services, we must continually estimate our medical claims liability at particular points in time, and establish claims reserves related to such estimates. Our estimated reserves for such "incurred but not paid," or IBNP, medical care costs, are based on numerous assumptions. We estimate our medical claims liabilities using actuarial methods based on historical data adjusted for claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our ability to accurately estimate claims for our newer lines of business or populations, such as with respect to Medicare Advantage or aged,

blind, and disabled Medicaid members, is impacted by the more limited experience we have had with those populations. Finally, with regard to the new Medicaid and CHIP members we expect to enroll in 2011 through organic growth due primarily to the recession, certain new members may be disproportionately costly due to high utilization in their first several months of Medicaid or CHIP membership as a result of their previously having been uninsured and therefore not seeking or deferring medical treatment.

The IBNP estimation methods we use and the resulting reserves that we establish are reviewed and updated, and adjustments, if deemed necessary, are reflected in the current period. Given the numerous uncertainties inherent in such estimates, our actual claims liabilities for a particular quarter or other period could differ significantly from the amounts estimated and reserved for that quarter or period. Our actual claims liabilities have varied and will continue to vary from our estimates, particularly in times of significant changes in utilization, medical cost trends, and populations and markets served.

If our actual liability for claims payments is higher than estimated, our earnings per share in any particular quarter or annual period could be negatively affected. Our estimates of IBNP may be inadequate in the future, which would negatively affect our results of operations for the relevant time period. Furthermore, if we are unable to accurately estimate IBNP, our ability to take timely corrective actions may be limited, further exacerbating the extent of the negative impact on our results.

Another flu epidemic in 2011 or other kind of epidemic in one or more of the states in which we operate a health plan could significantly increase utilization rates and medical costs.

Our results during 2009 were significantly impacted by the widespread incidence of the H1N1 flu in the states in which we operate our health plans. The recurrence in 2011 of the H1N1 flu, another variant of the flu, or the outbreak and rapid spread of any other highly contagious and potentially virulent disease, could increase the utilization rates among our members, resulting in significantly increased outpatient, inpatient, emergency room, and pharmacy costs.

If the responsive bids of our health plans for new or renewed Medicaid contracts are not successful, or if our government contracts are terminated or are not renewed, our premium revenues could be materially reduced and our operating results could be negatively impacted.

Our government contracts may be subject to periodic competitive bidding. In such process, our health plans may face competition as other plans, many with greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. For instance, the state contract of our Washington health plan with respect to the Healthy Options program may be subject to competitive bidding during 2011 or 2012. In the event the responsive bids of our Washington health plan or those of other health plans are not successful, we will lose our Medicaid contract in the applicable state, and our premium revenues could be materially reduced as a result. Alternatively, even if our responsive bids are successful, the bids may be based upon assumptions regarding enrollment, utilization, medical costs, or other factors which could result in the Medicaid contract being less profitable than we had expected.

In addition, all of our contracts may be terminated for cause if we breach a material provision of the contract or violate relevant laws or regulations. Our contracts with the states are also subject to cancellation by the state in the event of the unavailability of state or federal funding. In some jurisdictions, such cancellation may be immediate and in other jurisdictions a notice period is required. Further, most of our contracts are terminable without cause.

Our government contracts generally run for periods of one year to three years, and may be successively extended by amendment for additional periods if the relevant state agency so elects. Our current contracts expire on various dates over the next several years. Although our health plans have generally been successful in obtaining the renewal and/or extension of their state contracts, there can be no guarantee that any of our state government contracts will be renewed or extended. If we are unable to renew, successfully re-bid, or compete for any of our government contracts, or if any of our contracts are terminated or renewed on less favorable terms, our business, financial condition, cash flows, or results of operations could be adversely affected.

There are numerous risks associated with the expansion of our Texas health plan's service area under the CHIP Rural Service Area Program, with our acquisition of Abri Health Plan in Wisconsin, and with our ABD expansion in California.

In September 2010, our Texas health plan began arranging health care services for approximately 64,000 low-income children and pregnant women in 174 predominantly rural counties through Texas' CHIP Rural Service Area Program. In addition, on September 1, 2010, we acquired Abri Health Plan, a Medicaid managed care organization based in Milwaukee, Wisconsin. As of December 31, 2010, Abri Health Plan served approximately 36,000 Medicaid members. During 2011, we will begin serving additional ABD members in Texas, and we expect to begin serving additional ABD members in California. There are numerous risks associated with a health plan's initial expansion into a new service area or the provision of medical services to a new population, including pent-up demand for medical services, elevated medical care costs, and our lack of actuarial experience in setting appropriate reserve levels. In the event the medical care costs of our Texas, Wisconsin, or California health plans are higher than anticipated, we are unable to lower the medical care ratio associated with these new populations, our reserve levels are inadequate, or our enrollment projections are overestimated, the negative results of our Texas, Wisconsin, or California health plan could adversely affect our business, financial condition, cash flows, or results of operations.

States may not adequately compensate us for the value of drug rebates that were previously earned by the Company but that are now collectible by the states.

ACA includes certain provisions that change the way drug rebates are handled for drug claims filled by Medicaid managed care plans. Retroactive to March 23, 2010, state Medicaid programs are now required to collect federal rebates on all Medicaid-covered outpatient drugs dispensed or administered to Medicaid managed care enrollees (excluding certain drugs that are already discounted), and pharmaceutical manufacturers are required to pay specified rebates directly to the state Medicaid programs for those claims. This has impacted the level of rebates received by managed care plans from the manufacturers for Medicaid managed care enrollees. Many manufacturers are in the process of or have completed renegotiating their rebate contracts with Medicaid managed care plans and pharmacy benefits managers to offset these new rebates paid directly to state Medicaid programs. As a result, the drug rebate amounts paid to managed care plans like ours will likely decline significantly in the future. There are provisions in the ACA that require rates paid to Medicaid managed care to be actuarially sound in regard to drug rebates. Although we will be pursuing rate increases with state agencies to make us whole for the rebate amounts lost, there can be no assurances that the premium increases we may receive, if any, will be adequate to offset the amount of the lost rebates. If such premium increases prove to be inadequate, our business, financial condition, cash flows, or results of operations could be adversely affected.

We derive our premium revenues from a relatively small number of state health plans.

We currently derive our premium revenues from 10 state health plans. If we were unable to continue to operate in any of those ten states, or if our current operations in any portion of the states we are in were significantly curtailed, our revenues could decrease materially. Our reliance on operations in a limited number of states could cause our revenue and profitability to change suddenly and unexpectedly, depending on an abrupt loss of membership, significant rate reductions, a loss of a material contract, legislative actions, changes in Medicaid eligibility methodologies, catastrophic claims, an epidemic or an unexpected increase in utilization, general economic conditions, and similar factors in those states. Our inability to continue to operate in any of the states in which we currently operate, or a significant change in the nature of our existing operations, could adversely affect our business, financial condition, cash flows, or results of operations.

There are performance and other risks associated with certain provisions in the state Medicaid contracts of our Florida, New Mexico, Ohio, and Texas health plans.

The state contracts of our New Mexico, Ohio, and Texas health plans contain provisions pertaining to at-risk premiums that require us to meet certain quality performance measures to earn all of our contract revenues in those states. In the event we are unsuccessful in achieving the stated performance measure, the health plan will be unable to recognize the revenue associated with that measure. Any failure of our health plan to satisfy one of these performance measure provisions could adversely affect our business, financial condition, cash flows, or results of operations.

In addition, the state contracts of our Florida, New Mexico, and Texas health plans contain provisions pertaining to medical cost floors, administrative cost and profit ceilings, and profit-sharing arrangements. These provisions are subject to interpretation and application by our health plans. In the event the applicable state government agency disagrees with our health plan's interpretation or application of the contract provisions at issue, the health plan could be required to adjust the amount of its obligations under these provisions and/or make a payment or payments to the state. Any interpretation or application of these provisions at variance with our health plan's interpretation or inconsistent with our revenue recognition accounting treatment could adversely affect our business, financial condition, cash flows, or results of operations.

Failure to attain profitability in any new start-up operations could negatively affect our results of operations.

Start-up costs associated with a new business can be substantial. For example, to obtain a certificate of authority to operate as a health maintenance organization in most jurisdictions, we must first establish a provider network, have infrastructure and required systems in place, and demonstrate our ability to obtain a state contract and process claims. Often, we are also required to contribute significant capital to fund mandated net worth requirements, performance bonds or escrows, or contingency guaranties. If we were unsuccessful in obtaining the certificate of authority, winning the bid to provide services, or attracting members in sufficient numbers to cover our costs, any new business of ours would fail. We also could be required by the state to continue to provide services for some period of time without sufficient revenue to cover our ongoing costs or to recover our significant start-up costs.

Even if we are successful in establishing a profitable health plan in a new state, increasing membership, revenues, and medical costs will trigger increased mandated net worth requirements which could substantially exceed the net income generated by the health plan. Rapid growth in an existing state will also create increased net worth requirements. In such circumstances, we may not be able to fund on a timely basis or at all the increased net worth requirements with our available cash resources. The expenses associated with starting up a health plan in a new state or expanding a health plan in an existing state could have an adverse impact on our business, financial condition, cash flows, or results of operations.

Receipt of inadequate or significantly delayed premiums could negatively affect our business, financial condition, cash flows, or results of operations.

Our premium revenues consist of fixed monthly payments per member, and supplemental payments for other services such as maternity deliveries. These premiums are fixed by contract, and we are obligated during the contract periods to provide health care services as established by the state governments. We use a large portion of our revenues to pay the costs of health care services delivered to our members. If premiums do not increase when expenses related to medical services rise, our medical margins will be compressed, and our earnings will be negatively affected. A state could increase hospital or other provider rates without making a commensurate increase in the rates paid to us, or could lower our rates without making a commensurate reduction in the rates paid to hospitals or other providers. In addition, if the actuarial assumptions made by a state in implementing a rate or benefit change are incorrect or are at variance with the particular utilization patterns of the members of one of our health plans, our medical margins could be reduced. Any of these rate adjustments in one or more of the states in which we operate could adversely affect our business, financial condition, cash flows, or results of operations.

Furthermore, a state undergoing a budget crisis may significantly delay the premiums paid to one of our health plans. During 2010, due to a prolonged budget impasse, some of the monthly premium payments made by the state of California to our California health plan were several months late. Any significant delay in the monthly payment of premiums to any of our health plans could have a material adverse affect on our business, financial condition, cash flows, or results of operations.

Difficulties in executing our acquisition strategy could adversely affect our business.

The acquisitions of other health plans and the assignment and assumption of Medicaid contract rights of other health plans have accounted for a significant amount of our growth over the last several years. Although we cannot predict with certainty our rate of growth as the result of acquisitions, we believe that additional acquisitions of all sizes will be important to our future growth strategy. Many of the other potential purchasers of these assets — particularly operators of large commercial health plans — have significantly greater financial resources than we do.

Also, many of the sellers may insist on selling assets that we do not want, such as commercial lines of business, or may insist on transferring their liabilities to us as part of the sale of their companies or assets. Even if we identify suitable targets, we may be unable to complete acquisitions on terms favorable to us or obtain the necessary financing for these acquisitions. Further, to the extent we complete an acquisition, we may be unable to realize the anticipated benefits from such acquisition because of operational factors or difficulty in integrating the acquisition with our existing business. This may include problems involving the integration of:

- additional employees who are not familiar with our operations or our corporate culture,
- new provider networks which may operate on terms different from our existing networks,
- additional members who may decide to transfer to other health care providers or health plans,
- disparate information, claims processing, and record-keeping systems,
- internal controls and accounting policies, including those which require the exercise of judgment and complex estimation processes, such as estimates of claims incurred but not reported, accounting for goodwill, intangible assets, stock-based compensation, and income tax matters, and
- new regulatory schemes, relationships, practices, and compliance requirements.

Also, we are generally required to obtain regulatory approval from one or more state agencies when making acquisitions of health plans. In the case of an acquisition of a business located in a state in which we do not already operate, we would be required to obtain the necessary licenses to operate in that state. In addition, although we may already operate in a state in which we acquire a new business, we would be required to obtain regulatory approval if, as a result of the acquisition, we will operate in an area of that state in which we did not operate previously. We may be unable to obtain the necessary governmental approvals or comply with these regulatory requirements in a timely manner, if at all. For all of the above reasons, we may not be able to consummate our proposed acquisitions as announced from time to time to sustain our pattern of growth or to realize benefits from completed acquisitions.

We face periodic routine and non-routine reviews, audits, and investigations by government agencies, and these reviews and audits could have adverse findings, which could negatively impact our business.

We are subject to various routine and non-routine governmental reviews, audits, and investigations. Violation of the laws, regulations, or contract provisions governing our operations, or changes in interpretations of those laws, could result in the imposition of civil or criminal penalties, the cancellation of our contracts to provide managed care services, the suspension or revocation of our licenses, the exclusion from participation in government sponsored health programs, or the revision and recoupment of past payments made based on audit findings. For example, from July 26 to July 30, 2010, the Center for Medicare and Medicaid Services, or CMS, conducted an on-site audit with respect to our Medicare Advantage and Prescription Drug Plan contracts in the compliance areas of prescription drug formulary administration, prescription drug coverage determinations and appeals, prescription drug grievances, enrollment and disenrollment, premium billing, and an evaluation of whether we had implemented an effective compliance program. On February 25, 2011, we received from CMS the audit and inspection report. The report provides that we will be given until April 26, 2011 to develop and implement a corrective action plan to correct the deficiencies noted in the report and to demonstrate to CMS that the underlying deficiencies have been corrected and are not likely to recur. If we are unable to correct the noted deficiencies, or become subject to material fines or other sanctions, whether as a result of this most recent CMS audit or otherwise, we might suffer a substantial reduction in profitability, and might also lose one or more of our government contracts and as a result lose significant numbers of members and amounts of revenue. In addition, government receivables are subject to government audit and negotiation, and government contracts are vulnerable to disagreements with the government. The final amounts we ultimately receive under government contracts may be different from the amounts we initially recognize in our financial statements.

We rely on the accuracy of eligibility lists provided by state governments. Inaccuracies in those lists would negatively affect our results of operations.

Premium payments to our health plan segment are based upon eligibility lists produced by state governments. From time to time, states require us to reimburse them for premiums paid to us based on an eligibility list that a state later discovers contains individuals who are not in fact eligible for a government sponsored program or are eligible for a different premium category or a different program. Alternatively, a state could fail to pay us for members for

whom we are entitled to payment. Our results of operations would be adversely affected as a result of such reimbursement to the state if we had made related payments to providers and were unable to recoup such payments from the providers.

We are subject to extensive fraud and abuse laws which may give rise to lawsuits and claims against us, the outcome of which may have a material adverse effect on our financial position, results of operations and cash flows.

Because we receive payments from federal and state governmental agencies, we are subject to various laws commonly referred to as "fraud and abuse" laws, including the federal False Claims Act, which permit agencies and enforcement authorities to institute suit against us for violations and, in some cases, to seek treble damages, penalties, and assessments. Liability under such federal and state statutes and regulations may arise if we know, or it is found that we should have known, that information we provide to form the basis for a claim for government payment is false or fraudulent, and some courts have permitted False Claims Act suits to proceed if the claimant was out of compliance with program requirements. *Qui tam* actions under federal and state law can be brought by any individual on behalf of the government. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines, or be excluded from the Medicare, Medicaid, or other state or federal health care programs as a result of an investigation arising out of such action. Many states, including states where we currently operate, have enacted parallel legislation. In the event we are subject to liability under a *qui tam* action, our business and operating results could be adversely affected.

Federal regulations require entities subject to HIPAA to update their transaction formats for electronic data exchange from current HIPAA 4010 requirement to the new HIPAA 5010 standards, which are not only burdensome and complex, but could adversely impact administrative expense and compliance.

A federal mandate known as HIPAA 5010 will require health plans to use new standards for conducting certain operational and administrative transactions electronically beginning in January 2012. These administrative transactions include: claims, remittance, eligibility and claims status requests and responses. The HIPAA 5010 upgrade was prompted by government and industry's shared goal of providing higher-quality, lower-cost health care and the need for a comprehensive electronic data exchange environment for the ICD-10 mandate to be implemented by October 2013. Upgrading to the new HIPAA 5010 standards should increase transaction uniformity, support pay for performance, and streamline reimbursement transactions. We, along with other health plans, face significant pressure to make sure that we have installed our software and tested it for compatibility with our business partners. Because HIPAA 5010 affects electronic transactions such as patient eligibility, claims filing, claims status, and remittance advice, we must proceed proactively to achieve full functionality of HIPAA 5010 transactions before the deadline. Otherwise we may face transaction rejections and subsequent payment delays, which could have a material adverse effect on our business, cash flows, and results of operations. As the deadline approaches, we continue to upgrade and test our claims management systems to accommodate HIPAA 5010 and prevent any operational disruptions.

Our business could be adversely impacted by adoption of the new ICD-10 standardized coding set for diagnoses.

The U.S. Department of Health and Human Services, or HHS, has released rules pursuant to HIPAA which mandate the use of standard formats in electronic health care transactions. HHS also has published rules requiring the use of standardized code sets and unique identifiers for providers. By October 2013, the federal government will require that health care organizations, including health insurers, upgrade to updated and expanded standardized code sets used for documenting health conditions. These new standardized code sets, known as ICD-10, will require substantial investments from health care organizations, including us. While use of the ICD-10 code sets will require significant administrative changes, we believe that the cost of compliance with these regulations has not had and is not expected to have a material adverse effect on our cash flows, financial position, or results of operations. However, these changes may result in errors and otherwise negatively impact our service levels, and we may experience complications related to supporting customers that are not fully compliant with the revised requirements as of the applicable compliance date. Furthermore, if physicians fail to provide, appropriate codes for services provided as a result of the new coding set, we may not be reimbursed, or adequately reimbursed, for such services.

If we are unable to deliver quality care, maintain good relations with the physicians, hospitals, and other providers with whom we contract, or if we are unable to enter into cost-effective contracts with such providers, our profitability could be adversely affected.

We contract with physicians, hospitals, and other providers as a means to ensure access to health care services for our members, to manage health care costs and utilization, and to better monitor the quality of care being delivered. We compete with other health plans to contract with these providers. We believe providers select plans in which they participate based on criteria including reimbursement rates, timeliness and accuracy of claims payment, potential to deliver new patient volume and/or retain existing patients, effectiveness of resolution of calls and complaints, and other factors. We cannot be sure that we will be able to successfully attract and retain providers to maintain a competitive network in the geographic areas we serve. In addition, in any particular market, providers could refuse to contract with us, demand higher payments, or take other actions which could result in higher health care costs, disruption to provider access for current members, a decline in our growth rate, or difficulty in meeting regulatory or accreditation requirements.

The Medicaid program generally pays doctors and hospitals at levels well below those of Medicare and private insurance. Large numbers of doctors, therefore, do not accept Medicaid patients. In the face of fiscal pressures, some states may reduce rates paid to providers, which may further discourage participation in the Medicaid program.

In some markets, certain providers, particularly hospitals, physician/hospital organizations, and some specialists, may have significant market positions or even monopolies. If these providers refuse to contract with us or utilize their market position to negotiate favorable contracts which are disadvantageous to us, our profitability in those areas could be adversely affected.

Some providers that render services to our members are not contracted with our plans. In those cases, there is no pre-established understanding between the provider and our plan about the amount of compensation that is due to the provider. In some states, the amount of compensation is defined by law or regulation, but in most instances it is either not defined or it is established by a standard that is not clearly translatable into dollar terms. In such instances, providers may believe they are underpaid for their services and may either litigate or arbitrate their dispute with our plan. The uncertainty of the amount to pay and the possibility of subsequent adjustment of the payment could adversely affect our business, financial position, cash flows, or results of operations.

The insolvency of a delegated provider could obligate us to pay their referral claims, which could have an adverse effect on our business, cash flows, or results of operations.

Circumstances may arise where providers to whom we have delegated risk, due to insolvency or other circumstances, are unable to pay claims they have incurred with third parties in connection with referral services provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so or we have already paid claims to a delegated provider and payments cannot be recouped if the delegated provider becomes insolvent. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability. In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These funds are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. However, there can be no assurances that these precautionary steps will fully protect us against the insolvency of a delegated provider. Liabilities incurred or losses suffered as a result of provider insolvency could have an adverse effect on our business, financial condition, cash flows, or results of operations.

Regulatory actions and negative publicity regarding Medicaid managed care and Medicare Advantage may lead to programmatic changes and intensified regulatory scrutiny and regulatory burdens.

Several of our health care competitors have recently been involved in governmental investigations and regulatory actions which have resulted in significant volatility in the price of their stock. In addition, there has been negative publicity and proposed programmatic changes regarding Medicare Advantage private fee-for-service plans, a part of the Medicare Advantage program in which the Company does not participate. These actions and the resulting negative publicity could become associated with or imputed to the Company, regardless of the Company's actual regulatory compliance or programmatic participation. Such an association, as well as any perception of a recurring pattern of abuse among the health plan participants in government programs and the diminished reputation of the managed care sector as a whole, could result in public distrust, political pressure for changes in the programs in which the Company does participate, intensified scrutiny by regulators, additional regulatory requirements and burdens, increased stock volatility due to speculative trading, and heightened barriers to new managed care markets and contracts, all of which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

If a state fails to renew its federal waiver application for mandated Medicaid enrollment into managed care or such application is denied, our membership in that state will likely decrease.

States may only mandate Medicaid enrollment into managed care under federal waivers or demonstrations. Waivers and programs under demonstrations are approved for two- to five-year periods and can be renewed on an ongoing basis if the state applies and the waiver request is approved or renewed by CMS. We have no control over this renewal process. If a state does not renew its mandated program or the federal government denies the state's application for renewal, our business would suffer as a result of a likely decrease in membership.

If state regulators do not approve payments of dividends and distributions by our subsidiaries, it may negatively affect our business strategy.

We are a corporate parent holding company and hold most of our assets at, and conduct most of our operations through, direct subsidiaries. As a holding company, our results of operations depend on the results of operations of our subsidiaries. Moreover, we are dependent on dividends or other intercompany transfers of funds from our subsidiaries to meet our debt service and other obligations. The ability of our subsidiaries to pay dividends or make other payments or advances to us will depend on their operating results and will be subject to applicable laws and restrictions contained in agreements governing the debt of such subsidiaries. In addition, our health plan subsidiaries are subject to laws and regulations that limit the amount of dividends and distributions that they can pay to us without prior approval of, or notification to, state regulators. In California, our health plan may dividend, without notice to or approval of the California Department of Managed Health Care, amounts by which its tangible net equity exceeds 130% of the tangible net equity requirement. Our other health plans must give thirty days' advance notice and the opportunity to disapprove "extraordinary" dividends to the respective state departments of insurance for amounts over the lesser of (a) ten percent of surplus or net worth at the prior year end or (b) the net income for the prior year. The discretion of the state regulators, if any, in approving or disapproving a dividend is not clearly defined. Health plans that declare non-extraordinary dividends must usually provide notice to the regulators ten or fifteen days in advance of the intended distribution date of the non-extraordinary dividend. The aggregate amounts our health plan subsidiaries could have paid us at December 31, 2010, 2009, and 2008 without approval of the regulatory authorities were approximately $18.8 million, $9.0 million, and $7.6 million, respectively. If the regulators were to deny or significantly restrict our subsidiaries' requests to pay dividends to us, the funds available to our company as a whole would be limited, which could harm our ability to implement our business strategy. For example, we could be hindered in our ability to make debt service payments under our credit facility and/or our convertible senior notes.

Unforeseen changes in pharmaceutical regulations or market conditions may impact our revenues and adversely affect our results of operations.

A significant category of our health care costs relate to pharmaceutical products and services. Evolving regulations and state and federal mandates regarding coverage may impact the ability of our health plans to continue to receive existing price discounts on pharmaceutical products for our members. Other factors affecting our pharmaceutical costs include, but are not limited to, the price of pharmaceuticals, geographic variation in utilization

of new and existing pharmaceuticals, and changes in discounts. The unpredictable nature of these factors may have an adverse effect on our business, financial condition, cash flows, or results of operations.

An unauthorized disclosure of sensitive or confidential member information could have an adverse effect on our business.

As part of our normal operations, we collect, process, and retain confidential member information. We are subject to various federal and state laws and rules regarding the use and disclosure of confidential member information, including HIPAA and the Gramm-Leach-Bliley Act. The Health Information Technology for Economic and Clinical Health Act provisions of the ARRA further expand the coverage of HIPAA by, among other things, extending the privacy and security provisions, mandating new regulations around electronic medical records, expanding enforcement mechanisms, allowing the state Attorneys General to bring enforcement actions, increasing penalties for violations, and requiring public disclosure of improper disclosures of health information of more than 500 individuals.

Under ARRA, civil penalties for HIPAA violations by covered entities are increased up to an annual maximum of $1.5 million for uncorrected violations based on willful neglect. In addition, imposition of these penalties is now more likely because ARRA strengthens enforcement. For example, commencing February 2010, HHS was required to conduct periodic audits to confirm compliance. Investigations of violations that indicate willful neglect, for which penalties are mandatory beginning in February 2011, are statutorily required. In addition, state attorneys general are authorized to bring civil actions seeking either injunctions or damages in response to violations of HIPAA privacy and security regulations that threaten the privacy of state residents. Initially monies collected will be transferred to a division of HHS for further enforcement, and within three years, a methodology will be adopted for distributing a percentage of those monies to affected individuals to fund enforcement and provide incentive for individuals to report violations. In addition, ARRA requires us to notify affected individuals, HHS, and in some cases the media when unsecured personal health information is subject to a security breach.

ARRA also contains a number of provisions that provide incentives for states to initiate certain programs related to health care and health care technology, such as electronic health records. While provisions such as these do not apply to us directly, states wishing to apply for grants under ARRA, or otherwise participating in such programs, may impose new health care technology requirements on us through our contracts with state Medicaid agencies. We are unable to predict what such requirements may entail or what their effect on our business may be.

We will continue to assess our compliance obligations as regulations under ARRA are promulgated and more guidance becomes available from HHS and other federal agencies. The new privacy and security requirements, however, may require substantial operational and systems changes, employee education and resources and there is no guarantee that we be able to implement them adequately or prior to their effective date. Given HIPAA's complexity and the anticipated new regulations, which may be subject to changing and perhaps conflicting interpretation, our ongoing ability to comply with all of the HIPAA requirements is uncertain, which may expose us to the criminal and increased civil penalties provided under ARRA and may require us to incur significant costs in order to seek to comply with its requirements.

Despite the security measures we have in place to ensure compliance with applicable laws and rules, our facilities and systems, and those of our third-party service providers, may be vulnerable to security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming and/or human errors or other similar events. Any security breach involving the misappropriation, loss or other unauthorized disclosure or use of confidential member information, whether by us or a third party, could subject us to civil and criminal penalties and have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Risks Related to the Operation of Our Molina Medicaid Solutions Business

MMIS operational problems in Idaho or Maine could result in reduced or withheld payments, damage assessments, increased administrative costs, or even contract termination, any of which could adversely affect our business, financial condition, cash flows, or results of operations.

From and after the MMIS operational or "go live" date of June 1, 2010 after which it began pilot operations, Molina Medicaid Solutions has experienced certain problems with the MMIS in Idaho. On October 5, 2010, Molina Medicaid Solutions received from the Idaho Department of Administration a notice to cure letter with respect to its

alleged non-compliance with certain provisions of the MMIS project agreements. Molina Medicaid Solutions and the Idaho Department of Health and Welfare ("DHW") have been working together to resolve the MMIS problems, and Molina Medicaid Solutions has developed a corrective action plan with respect to the identified problems and defects. Molina Medicaid Solutions believes it has ameliorated or corrected many of the identified problems, and that it will ultimately be successful in resolving all of the MMIS issues in Idaho. However, in the event Molina Medicaid Solutions is unsuccessful in correcting all of the identified problems, the Idaho Department of Administration may: (i) reduce or withhold its payments to Molina Medicaid Solutions, (ii) require Molina Medicaid Solutions to provide services at no additional cost to Idaho, (iii) require the payment of damages, or (iv) terminate its contract with Molina Medicaid Solutions. In addition, Molina Medicaid Solutions may incur much greater administrative costs than expected in correcting the MMIS problems, or in advancing interim payments to Idaho providers. For example, the consulting and outside service costs for Idaho following its go-live operational date have not declined from the pre-operational level as had been previously expected. Finally, Idaho DHW may not accept the MMIS developed and implemented by Molina Medicaid Solutions, or CMS may not certify such MMIS.

All of such risks are also applicable to the MMIS in Maine which became operational and began pilot operations as of September 1, 2010. The realization of any of the foregoing risks could adversely affect our business, financial condition, cash flows, or results of operations.

We may be unable to retain or renew the state government contracts of the Molina Medicaid Solutions segment on terms consistent with our expectations or at all.

Molina Medicaid Solutions currently has management contracts in only six states. If we are unable to continue to operate in any of those six states, or if our current operations in any of those six states were significantly curtailed, the revenues and cash flows of Molina Medicaid Solutions could decrease materially, and as a result our profitability would be negatively impacted.

If the responsive bids to RFPs of Molina Medicaid Solutions are not successful, including its responsive bid in Louisiana during 2011, our revenues could be materially reduced and our operating results could be negatively impacted.

The government contracts of Molina Medicaid Solutions may be subject to periodic competitive bidding. In such process, Molina Medicaid Solutions may face competition as other service providers, some with much greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. For instance, the state MMIS contract of Louisiana is currently subject to competitive bidding. Molina Medicaid Solutions also anticipates bidding in other states which have issued RFPs for procurement of a new MMIS. In the event the responsive bid in Louisiana is not successful, we will lose our fiscal agent contract in that state, and our revenues could be materially reduced as a result. In addition, in the event our responsive bids in other states are not successful, we will be unable to grow in a manner consistent with our projections. Even if our responsive bids are successful, the bids may be based upon assumptions or other factors which could result in the contract being less profitable than we had expected or had been the case prior to competitive re-bidding.

Because of the complexity and duration of the services and systems required to be delivered under the government contracts of Molina Medicaid Solutions, there are substantial risks associated with full performance under the contracts.

The state contracts of Molina Medicaid Solutions typically require significant investment in the early stages that is expected to be recovered through billings over the life of the contracts. These contracts involve the construction of new computer systems and communications networks and the development and deployment of complex technologies. Substantial performance risk exists under each contract. Some or all elements of service delivery under these contracts are dependent upon successful completion of the design, development, construction, and implementation phases. Any increased or unexpected costs or unanticipated delays in connection with the performance of these contracts, including delays caused by factors outside our control, could make these contracts less profitable or unprofitable, which could have an adverse effect on our overall business, financial condition, cash flows, or results of operations.

If we fail to comply with our state government contracts or government contracting regulations, our business may be adversely affected.

Molina Medicaid Solutions' contracts with state government customers may include unique and specialized performance requirements. In particular, contracts with state government customers are subject to various procurement regulations, contract provisions, and other requirements relating to their formation, administration, and performance. Any failure to comply with the specific provisions in our customer contracts or any violation of government contracting regulations could result in the imposition of various civil and criminal penalties, which may include termination of the contracts, forfeiture of profits, suspension of payments, imposition of fines, and suspension from future government contracting. Further, any negative publicity related to our state government contracts or any proceedings surrounding them may damage our business by affecting our ability to compete for new contracts. The termination of a state government contract, our suspension from government work, or any negative impact on our ability to compete for new contracts, could have an adverse effect on our business, financial condition, cash flows, or results of operations.

System security risks and systems integration issues that disrupt our internal operations or information technology services provided to customers could adversely affect our financial results or damage our reputation.

Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate our confidential information or that of third parties, create system disruptions or cause shutdowns. Computer programmers and hackers also may be able to develop and deploy viruses, worms, and other malicious software programs that attack our products or otherwise exploit any security vulnerabilities of our products. In addition, sophisticated hardware and operating system software and applications that we produce or procure from third parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the system. The costs to us to eliminate or alleviate security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and the efforts to address these problems could result in interruptions, delays, cessation of service, and loss of existing or potential government customers.

Molina Medicaid Solutions routinely processes, stores, and transmits large amounts of data for our clients, including sensitive and personally identifiable information. Breaches of our security measures could expose us, our customers, or the individuals affected to a risk of loss or misuse of this information, resulting in litigation and potential liability for us and damage to our brand and reputation. Accordingly, we could lose existing or potential government customers for outsourcing services or other information technology solutions or incur significant expenses in connection with our customers' system failures or any actual or perceived security vulnerabilities in our products. In addition, the cost and operational consequences of implementing further data protection measures could be significant.

Portions of our information technology infrastructure also may experience interruptions, delays, or cessations of service or produce errors in connection with systems integration or migration work that takes place from time to time. We may not be successful in implementing new systems and transitioning data, which could cause business disruptions and be more expensive, time consuming, disruptive, and resource-intensive. Such disruptions could adversely impact our ability to fulfill orders and interrupt other processes. Delayed sales, lower margins, or lost government customers resulting from these disruptions could adversely affect our financial results, reputation, and stock price.

In the course of providing services to customers, Molina Medicaid Solutions may inadvertently infringe on the intellectual property rights of others and be exposed to claims for damages.

The solutions we provide to our state government customers may inadvertently infringe on the intellectual property rights of third parties resulting in claims for damages against us. The expense and time of defending against these claims may have a material and adverse impact on our profitability. Additionally, the publicity we may receive as a result of infringing intellectual property rights may damage our reputation and adversely impact our ability to develop new MMIS business.

Inherent in the government contracting process are various risks which may materially and adversely affect our business and profitability.

We are subject to the risks inherent in the government contracting process. These risks include government audits of billable contract costs and reimbursable expenses and compliance with government reporting requirements. In the event we are found to be out of compliance with government contracting requirements, our reputation may be adversely impacted and our relationship with the government agencies we work with may be damaged, resulting in a material and adverse effect on our profitability.

Our performance on contracts, including those on which we have partnered with third parties, may be adversely affected if we or the third parties fail to deliver on commitments.

In some instances, our contracts require that we partner with other parties including software and hardware vendors to provide the complex solutions required by our state government customers. Our ability to deliver the solutions and provide the services required by our customers is dependent on our and our partners' ability to meet our customers' delivery schedules. If we or our partners fail to deliver services or products on time, our ability to complete the contract may be adversely affected, which may have a material and adverse impact on our revenue and profitability.

Risks Related to our General Business Operations

Restrictions and covenants in our credit facility may limit our ability to make certain acquisitions or reduce our liquidity and capital resources.

We have a $150 million senior secured credit facility that imposes numerous restrictions and covenants, including prescribed consolidated leverage and fixed charge coverage ratios, net worth requirements, and acquisition limitations that restrict our financial and operating flexibility, including our ability to make certain acquisitions above specified values and declare dividends without lender approval. As a result of the restrictions and covenants imposed under our credit facility, our growth strategy may be negatively impacted by our inability to act with complete flexibility, or our inability to use our credit facility in the manner intended. In addition, our credit facility matures in May 2012. If we are in default at a time when funds under the credit facility are required to finance an acquisition, or if a proposed acquisition does not satisfy the pro forma financial requirements under our credit facility, or if we are unable to renew or refinance our credit facility prior to its maturity, we may be unable to use the credit facility in the manner intended, and our operations, liquidity, and capital resources could be materially adversely affected.

Ineffective management of our growth may negatively affect our business, financial condition, or results of operations.

Depending on acquisitions and other opportunities, we expect to continue to grow our membership and to expand into other markets. In fiscal year 2006, we had total premium revenue of $2.0 billion. In fiscal year 2010, we had total premium revenue of $4.0 billion, an increase of 100% over a five-year span. Continued rapid growth could place a significant strain on our management and on other Company resources. Our ability to manage our growth may depend on our ability to strengthen our management team and attract, train, and retain skilled employees, and our ability to implement and improve operational, financial, and management information systems on a timely basis. If we are unable to manage our growth effectively, our business, financial condition, cash flows, and results of operations could be materially and adversely affected. In addition, due to the initial substantial costs related to acquisitions, rapid growth could adversely affect our short-term profitability and liquidity.

Any changes to the laws and regulations governing our business, or the interpretation and enforcement of those laws or regulations, could cause us to modify our operations and could negatively impact our operating results.

Our business is extensively regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect health plan members and providers rather than managed care organizations. The government agencies administering these laws and regulations have broad latitude in interpreting and applying them. These laws and regulations, along with the terms of our government contracts, regulate how we do business, what services we offer, and how we interact with

members and the public. For instance, some states mandate minimum medical expense levels as a percentage of premium revenues. These laws and regulations, and their interpretations, are subject to frequent change. The interpretation of certain contract provisions by our governmental regulators may also change. Changes in existing laws or regulations, or their interpretations, or the enactment of new laws or regulations, could reduce our profitability by imposing additional capital requirements, increasing our liability, increasing our administrative and other costs, increasing mandated benefits, forcing us to restructure our relationships with providers, or requiring us to implement additional or different programs and systems. Changes in the interpretation of our contracts could also reduce our profitability if we have detrimentally relied on a prior interpretation.

Our business depends on our information and medical management systems, and our inability to effectively integrate, manage, and keep secure our information and medical management systems, could disrupt our operations.

Our business is dependent on effective and secure information systems that assist us in, among other things, processing provider claims, monitoring utilization and other cost factors, supporting our medical management techniques, and providing data to our regulators. Our providers also depend upon our information systems for membership verifications, claims status, and other information. If we experience a reduction in the performance, reliability, or availability of our information and medical management systems, our operations, ability to pay claims, and ability to produce timely and accurate reports could be adversely affected. In addition, if the licensor or vendor of any software which is integral to our operations were to become insolvent or otherwise fail to support the software sufficiently, our operations could be negatively affected.

Our information systems and applications require continual maintenance, upgrading, and enhancement to meet our operational needs. Moreover, our acquisition activity requires transitions to or from, and the integration of, various information systems. If we experience difficulties with the transition to or from information systems or are unable to properly implement, maintain, upgrade or expand our system, we could suffer from, among other things, operational disruptions, loss of members, difficulty in attracting new members, regulatory problems, and increases in administrative expenses.

Our business requires the secure transmission of confidential information over public networks. Advances in computer capabilities, new discoveries in the field of cryptography, or other events or developments could result in compromises or breaches of our security systems and member data stored in our information systems. Anyone who circumvents our security measures could misappropriate our confidential information or cause interruptions in services or operations. The internet is a public network, and data is sent over this network from many sources. In the past, computer viruses or software programs that disable or impair computers have been distributed and have rapidly spread over the internet. Computer viruses could be introduced into our systems, or those of our providers or regulators, which could disrupt our operations, or make our systems inaccessible to our members, providers, or regulators. We may be required to expend significant capital and other resources to protect against the threat of security breaches or to alleviate problems caused by breaches. Because of the confidential health information we store and transmit, security breaches could expose us to a risk of regulatory action, litigation, possible liability and loss. Our security measures may be inadequate to prevent security breaches, and our business operations would be negatively impacted by cancellation of contracts and loss of members if security breaches are not prevented.

Because our corporate headquarters are located in Southern California, our business operations may be significantly disrupted as a result of a major earthquake.

Our corporate headquarters is located in Long Beach, California. In addition, the claims of our health plans are also processed in Long Beach. Southern California is exposed to a statistically greater risk of a major earthquake than most other parts of the United States. If a major earthquake were to strike the Los Angeles area, our corporate functions and claims processing could be significantly impaired for a substantial period of time. Although we have established a disaster recovery and business resumption plan with back-up operating sites to be deployed in the case of such a major disruptive event, there can be no assurances that the disaster recovery plan will be successful or that the business operations of all our health plans, including those that are remote from any such event, would not be substantially impacted by a major Southern California earthquake.

We face claims related to litigation which could result in substantial monetary damages.

We are subject to a variety of legal actions, including medical malpractice actions, provider disputes, employment related disputes, and breach of contract actions. In the event we incur liability materially in excess of the amount for which we have insurance coverage, our profitability would suffer. In addition, our providers involved in medical care decisions are exposed to the risk of medical malpractice claims. Providers at our 16 primary care clinics in California and two in Washington are employees of our health plans. As a direct employer of physicians and ancillary medical personnel and as an operator of primary care clinics, our plans are subject to liability for negligent acts, omissions, or injuries occurring at one of its clinics or caused by one of their employees. We maintain medical malpractice insurance for our clinics as we believe are reasonable in light of our experience to date. However, given the significant amount of some medical malpractice awards and settlements, this insurance may not be sufficient or available at a reasonable cost to protect us from damage awards or other liabilities. Even if any claims brought against us were unsuccessful or without merit, we would have to defend ourselves against such claims. The defense of any such actions may be time-consuming and costly, and may distract our management's attention. As a result, we may incur significant expenses and may be unable to effectively operate our business.

Furthermore, claimants often sue managed care organizations for improper denials of or delays in care, and in some instances improper authorizations of care. Claims of this nature could result in substantial damage awards against us and our providers that could exceed the limits of any applicable medical malpractice insurance coverage. Successful malpractice or tort claims asserted against us, our providers, or our employees could adversely affect our financial condition and profitability.

We cannot predict the outcome of any lawsuit with certainty. While we currently have insurance coverage for some of the potential liabilities relating to litigation, other such liabilities may not be covered by insurance, the insurers could dispute coverage, or the amount of insurance could be insufficient to cover the damages awarded. In addition, insurance coverage for all or certain types of liability may become unavailable or prohibitively expensive in the future or the deductible on any such insurance coverage could be set at a level which would result in us effectively self-insuring cases against us.

Although we establish reserves for litigation as we believe appropriate, we cannot assure you that our recorded reserves will be adequate to cover such costs. Therefore, the litigation to which we are subject could have a material adverse effect on our business, financial condition, cash flows, or results of operations, and could prompt us to change our operating procedures.

We are subject to competition which negatively impacts our ability to increase penetration in the markets we serve.

We operate in a highly competitive environment and in an industry that is subject to ongoing changes from business consolidations, new strategic alliances, and aggressive marketing practices by other managed care organizations. We compete for members principally on the basis of size, location, and quality of provider network, benefits supplied, quality of service, and reputation. A number of these competitive elements are partially dependent upon and can be positively affected by the financial resources available to a health plan. Many other organizations with which we compete, including large commercial plans, have substantially greater financial and other resources than we do. For these reasons, we may be unable to grow our membership, or may lose members to other health plans.

Failure to maintain effective internal controls over financial reporting could have a material adverse effect on our business, operating results, and stock price.

The Sarbanes-Oxley Act of 2002 requires, among other things, that we maintain effective internal control over financial reporting. In particular, we must perform system and process evaluation and testing of our internal controls over financial reporting to allow management to report on, and our independent registered public accounting firm to attest to, our internal controls over financial reporting as required by Section 404 of the Sarbanes-Oxley Act of 2002. Our future testing, or the subsequent testing by our independent registered public accounting firm, may reveal deficiencies in our internal controls over financial reporting that are deemed to be material weaknesses. Our compliance with Section 404 will continue to require that we incur substantial accounting expense and expend significant management time and effort. Moreover, if we are not able to continue to comply with the requirements of Section 404 in a timely manner, or if we or our independent registered public accounting firm identifies deficiencies

in our internal control over financial reporting that are deemed to be material weaknesses, the market price of our stock could decline and we could be subject to sanctions or investigations by the NYSE, SEC or other regulatory authorities, which would require additional financial and management resources.

Changes in accounting may affect our results of operations.

U.S. generally accepted accounting principles ("GAAP") and related implementation guidelines and interpretations can be highly complex and involve subjective judgments. Changes in these rules or their interpretation, or the adoption of new pronouncements could significantly affect our stated results of operations.

Our investments in auction rate securities are subject to risks that may cause losses and have a material adverse effect on our liquidity.

As of December 31, 2010, our investments in auction rate securities included amounts designated as available-for-sale securities amounted to $24.6 million par value (fair value of $20.4 million). As a result of the decrease in fair value of auction rate securities designated as available-for-sale, we recorded pretax unrealized losses of $0.2 million to accumulated other comprehensive loss for the fiscal year ended December 31, 2010. We deem the cumulative unrealized losses on these securities to be temporary and attribute the decline in value to liquidity issues, as a result of the failed auction market, rather than to credit issues. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive loss. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate. For our investments in auction rate securities, we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost. However, if we were to sell these investments before recovery of their cost, we would be required to record a charge to earnings for any accumulated losses, which would impact our earnings for the quarter in which such event occurred.

The value of our investments is influenced by varying economic and market conditions, and a decrease in value could have an adverse effect on our results of operations, liquidity, and financial condition.

Our investments consist solely of investment-grade debt securities. The unrestricted portion of this portfolio is designated as available-for-sale. Our non-current restricted investments are designated as held-to-maturity. Available-for-sale investments are carried at fair value, and the unrealized gains or losses are included in accumulated other comprehensive income or loss as a separate component of stockholders' equity, unless the decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such securities until their full cost can be recovered. For our available-for-sale investments and held-to-maturity investments, if a decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such security until its full cost can be recovered, the security is deemed to be other-than-temporarily impaired and it is written down to fair value and the loss is recorded as an expense.

In accordance with applicable accounting standards, we review our investment securities to determine if declines in fair value below cost are other-than-temporary. This review is subjective and requires a high degree of judgment. We conduct this review on a quarterly basis, using both quantitative and qualitative factors, to determine whether a decline in value is other-than-temporary. Such factors considered include the length of time and the extent to which market value has been less than cost, the financial condition and near term prospects of the issuer, recommendations of investment advisors and forecasts of economic, market or industry trends. This review process also entails an evaluation of our ability and intent to hold individual securities until they mature or full cost can be recovered.

The current economic environment and recent volatility of the securities markets increase the difficulty of assessing investment impairment and the same influences tend to increase the risk of potential impairment of these assets. Over time, the economic and market environment may provide additional insight regarding the fair value of certain securities, which could change our judgment regarding impairment. This could result in realized losses relating to other-than-temporary declines to be recorded as an expense. Given the current market conditions and the significant judgments involved, there is continuing risk that declines in fair value may occur and material other-than-temporary impairments may result in realized losses in future periods which could have an adverse effect on our business, financial condition, cash flows, or results of operations.

Unanticipated changes in our tax rates or exposure to additional income tax liabilities could affect our profitability.

We are subject to income taxes in the United States. Our effective tax rate could be adversely affected by changes in the mix of earnings in states with different statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in U.S. tax laws and regulations, and changes in our interpretations of tax laws, including pending tax law changes. In addition, we are subject to the routine examination of our income tax returns by the Internal Revenue Service and other local and state tax authorities. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our estimated income tax liabilities. Adverse outcomes from tax examinations, or the accounting reversal of any tax benefits or revenue previously recognized by us, could have an adverse effect on our provision for income taxes, estimated income tax liabilities, or results of operations.

We are dependent on our executive officers and other key employees.

Our operations are highly dependent on the efforts of our executive officers. The loss of their leadership, knowledge, and experience could negatively impact our operations. Replacing many of our executive officers might be difficult or take an extended period of time because a limited number of individuals in the managed care industry have the breadth and depth of skills and experience necessary to operate and expand successfully a business such as ours. Our success is also dependent on our ability to hire and retain qualified management, technical, and medical personnel. We may be unsuccessful in recruiting and retaining such personnel, which could negatively impact our operations.

Risks Related to Our Common Stock

Volatility of our stock price could adversely affect stockholders.

Since our initial public offering in July 2003, the sales price of our common stock has ranged from a low of $16.12 to a high of $53.23. A number of factors will continue to influence the market price of our common stock, including:

- state and federal budget pressures,
- changes in expectations as to our future financial performance or changes in financial estimates, if any, of public market analysts,
- announcements relating to our business or the business of our competitors,
- changes in government payment levels,
- adverse publicity regarding health maintenance organizations and other managed care organizations,
- government action regarding member eligibility,
- changes in state mandatory programs,
- conditions generally affecting the managed care industry or our provider networks,
- the success of our operating or acquisition strategy,
- the operating and stock price performance of other comparable companies in the health care industry,
- the termination of our Medicaid or CHIP contracts with state or county agencies, or subcontracts with other Medicaid managed care organizations that contract with such state or county agencies,
- regulatory or legislative change,
- general economic conditions, including unemployment rates, inflation, and interest rates, and
- the factors set forth under “Risk Factors” in this report.

Our stock may not trade at the same levels as the stock of other health care companies or the market in general. Also, if the trading market for our stock does not continue to develop, securities analysts may not maintain or initiate research coverage of our Company and our shares, and this could depress the market for our shares.

Members of the Molina family own a majority of our capital stock, decreasing the influence of other stockholders on stockholder decisions.

Members of the Molina family, either directly or as trustees or beneficiaries of Molina family trusts, in the aggregate own or are entitled to receive upon certain events approximately 55% of our capital stock. Our president

and chief executive officer, as well as our chief financial officer, are members of the Molina family, and they are also on our board of directors. Because of the amount of their shareholdings, Molina family members, if they were to act as a group with the trustees of their family trusts, have the ability to significantly influence all matters submitted to stockholders for approval, including the election and removal of directors, amendments to our charter, and any merger, consolidation, or sale of our Company. A significant concentration of share ownership can also adversely affect the trading price for our common stock because investors often discount the value of stock in companies that have controlling stockholders. Furthermore, the concentration of share ownership in the Molina family could delay or prevent a merger or consolidation, takeover, or other business combination that could be favorable to our stockholders. Finally, the interests and objectives of the Molina family may be different from those of our company or our other stockholders, and they may vote their common stock in a manner that is contrary to the vote of our other stockholders.

Future sales of our common stock or equity-linked securities in the public market could adversely affect the trading price of our common stock and our ability to raise funds in new stock offerings.

We may issue equity securities in the future, including securities that are convertible into or exchangeable for, or that represent the right to receive, common stock. Sales of a substantial number of shares of our common stock or other equity securities, including sales of shares in connection with any future acquisitions, could be substantially dilutive to our stockholders. These sales may have a harmful effect on prevailing market prices for our common stock and our ability to raise additional capital in the financial markets at a time and price favorable to us. Moreover, to the extent that we issue restricted stock units, stock appreciation rights, options, or warrants to purchase our common stock in the future and those stock appreciation rights, options, or warrants are exercised or as the restricted stock units vest, our stockholders may experience further dilution. Holders of our shares of common stock have no preemptive rights that entitle holders to purchase a pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our stockholders. Our certificate of incorporation provides that we have authority to issue 80,000,000 shares of common stock and 20,000,000 shares of preferred stock. As of December 31, 2010, 30,308,616 shares of common stock and no shares of preferred or other capital stock were issued and outstanding.

It may be difficult for a third party to acquire our Company, which could inhibit stockholders from realizing a premium on their stock price.

We are subject to the Delaware anti-takeover laws regulating corporate takeovers. These provisions may prohibit stockholders owning 15% or more of our outstanding voting stock from merging or combining with us. In addition, any change in control of our state health plans would require the approval of the applicable insurance regulator in each state in which we operate.

Our certificate of incorporation and bylaws also contain provisions that could have the effect of delaying, deferring, or preventing a change in control of our Company that stockholders may consider favorable or beneficial. These provisions could discourage proxy contests and make it more difficult for our stockholders to elect directors and take other corporate actions. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions include:

- a staggered board of directors, so that it would take three successive annual meetings to replace all directors,
- prohibition of stockholder action by written consent, and
- advance notice requirements for the submission by stockholders of nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting.

In addition, changes of control are often subject to state regulatory notification, and in some cases, prior approval.

We do not anticipate paying any cash dividends in the foreseeable future.

We have never declared or paid any cash dividends. While we have in the past and may again in the future use our available cash to repurchase our securities, we do not anticipate declaring or paying any cash dividends in the foreseeable future.

Item 1B: ***Unresolved Staff Comments***

None.

Item 2: ***Properties***

We lease a total of 67 facilities, including our corporate headquarters at 200 Oceangate in Long Beach, California. We own a 32,000 square-foot office building in Long Beach, California, our 26,000 square-foot data center in Albuquerque, New Mexico, and one of the community clinics in Pomona, California. We believe our current facilities are adequate to meet our operational needs for the foreseeable future.

Item 3: ***Legal Proceedings***

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. The outcome of such legal actions is inherently uncertain. Nevertheless, we believe that these actions, when finally concluded and determined, are not likely to have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 4: ***Reserved***

PART II

Item 5: *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

Our common stock is listed on the New York Stock Exchange under the trading symbol "MOH." As of

February 15, 2011, there were 115 holders of record of our common stock. The high and low sales prices of our common stock for specified periods are set forth below:

Date Range	High	Low
2010		
First Quarter	$ 26.39	$ 20.02
Second Quarter	$ 31.20	$ 25.00
Third Quarter	$ 31.80	$ 25.28
Fourth Quarter	$ 28.28	$ 24.65
2009		
First Quarter	$ 22.74	$ 16.22
Second Quarter	$ 25.75	$ 18.11
Third Quarter	$ 25.05	$ 19.36
Fourth Quarter	$ 23.49	$ 17.05

Dividends

We have never paid cash dividends on our common stock. We currently intend to retain any future earnings to fund our business, and we do not anticipate paying any cash dividends in the future.

Our ability to pay dividends is partially dependent on, among other things, our receipt of cash dividends from our regulated subsidiaries. The ability of our regulated subsidiaries to pay dividends to us is limited by the state departments of insurance in the states in which we operate or may operate, as well as requirements of the government-sponsored health programs in which we participate. Any future determination to pay dividends will be at the discretion of our Board and will depend upon, among other factors, our results of operations, financial condition, capital requirements and contractual restrictions. For more information regarding restrictions on the ability of our regulated subsidiaries to pay dividends to us, please see Item 7 — Management's Discussion and Analysis of Financial Condition and Results of Operations — Regulatory Capital and Dividends Restrictions.

Unregistered Issuances of Equity Securities

None.

Securities Authorized for Issuance Under Equity Compensation Plans (as of December 31, 2010)

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) (c)
Equity compensation plans approved by security holders	513,614(1)	$ 30.59	3,744,530(2)

(1) Options to purchase shares of our common stock issued under the 2000 Omnibus Stock and Incentive Plan and the 2002 Equity Incentive Plan. Further grants under the 2000 Omnibus Stock and Incentive Plan have been suspended.

(2) Includes only shares remaining available to issue under the 2002 Equity Incentive Plan (the "2002 Incentive Plan") and the 2002 Employee Stock Purchase Plan (the "ESPP"). The 2002 Incentive Plan initially allowed for the issuance of 1.6 million shares of common stock. Beginning January 1, 2004, shares available for issuance under the 2002 Incentive Plan automatically increase by the lesser of 400,000 shares or 2% of total outstanding capital stock on a fully diluted basis, unless the board of directors affirmatively acts to nullify the automatic increase. The 400,000 share increase on January 1, 2011 increased the total number of shares reserved for issuance under the 2002 Incentive Plan to 4,800,000 shares. The ESPP initially allowed for the issuance of 600,000 shares of common stock. Beginning December 31, 2003, and each year until the 2.2 million maximum aggregate number of shares reserved for issuance was reached on December 31, 2008, shares reserved for issuance under the ESPP automatically increased by 1% of total outstanding capital stock.

STOCK PERFORMANCE GRAPH

The following discussion shall not be deemed to be "soliciting material" or to be "filed" with the SEC nor shall this information be incorporated by reference into any future filing under the Securities Act or the Exchange Act, except to the extent that the Company specifically incorporates it by reference into a filing.

The following line graph compares the percentage change in the cumulative total return on our common stock against the cumulative total return of the Standard & Poor's Corporation Composite 500 Index (the "S&P 500") and a peer group index for the five-year period from December 31, 2005 to December 31, 2010. The graph assumes an initial investment of $100 in Molina Healthcare, Inc. common stock and in each of the indices.

The peer group index consists of Amerigroup Corporation (AGP), Centene Corporation (CNC), Coventry Health Care, Inc. (CVH), Health Net, Inc. (HNT), Humana, Inc. (HUM), UnitedHealth Group Incorporated (UNH), and WellPoint, Inc. (WLP).

	As of December 31,				
	2010(1)	2009	2008	2007(8)	2006(9)
Balance Sheet Data:					
Cash and cash equivalents	$ 455,886	$ 469,501	$ 387,162	$ 459,064	$ 403,650
Total assets	1,509,214	1,244,035	1,148,068	1,170,016	864,475
Long-term debt (including current maturities)	164,014	158,900	164,873	160,166	45,000
Total liabilities	790,157	701,297	616,306	655,640	444,309
Stockholders' equity	719,057	542,738	531,762	514,376	420,166

(1) Service revenue and cost of service revenue represent revenue and costs generated by our Molina Medicaid Solutions segment. Because we acquired this business on May 1, 2010, results for the year ended December 31, 2010 include eight months of results for this segment.

(2) Prior to 2010, general and administrative expenses have included premium tax expenses. Beginning in 2010, we have reported premium tax expenses on a separate line in the statements of income data. Prior periods have been reclassified to conform to this presentation.

(3) Effective January 1, 2008 through December 31, 2009, income tax expense included both the Michigan business income tax, or BIT, and Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, we have recorded the MGRT as a premium tax and not as an income tax. We will continue to record the BIT as an income tax. For the years ended December 31, 2009, and 2008, amounts for premium tax expense and income tax expense have been reclassified to conform to this presentation. The MGRT amounted to $6.2 million, $5.5 million, and $5.1 million for the years ended December 31, 2010, 2009, and 2008, respectively.

(4) Medical care ratio represents medical care costs as a percentage of premium revenue. The medical care ratio is a key operating indicator used to measure our performance in delivering efficient and cost effective health care services. Changes in the medical care ratio from period to period result from changes in Medicaid funding by the states, our ability to effectively manage costs, and changes in accounting estimates related to incurred but not reported claims. See *Management's Discussion and Analysis of Financial Condition and Results of Operations* for further discussion.

(5) General and administrative expense ratio represents such expenses as a percentage of total revenue.

(6) Premium tax ratio represents such expenses as a percentage of premium revenue.

(7) Number of members at end of period.

(8) The balance sheet and operating results of the Mercy CarePlus acquisition, relating to our Missouri health plan, have been included since November 1, 2007, the effective date of the acquisition.

(9) The balance sheet and operating results of the Cape Health Plan acquisition, relating to our Michigan health plan, have been included since May 15, 2006, the effective date of the acquisition.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

The following discussion of our financial condition and results of operations should be read in conjunction with the "Selected Financial Data" and the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report. This discussion contains forward-looking statements that involve known and unknown risks and uncertainties, including those set forth under Item 1A — Risk Factors, above.

Reclassifications

Effective January 1, 2010, we have recorded the Michigan modified gross receipts tax, or MGRT, as a premium tax and not as an income tax. Prior periods have been reclassified to conform to this presentation.

In prior periods, general and administrative, or G&A, expenses have included premium tax expenses. Beginning in 2010, we have reported premium tax expenses on a separate line in the accompanying consolidated statements of income. Prior periods have been reclassified to conform to this presentation.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. Our business comprises our Health Plans segment, consisting of licensed health maintenance organizations serving Medicaid populations in ten states, and our Molina Medicaid Solutions segment, which provides design, development, implementation, and business processing solutions to Medicaid agencies in an additional five states. Our direct delivery business currently consists of 16 primary care community clinics in California and two primary care community clinics in Washington, and we also manage three county-owned primary care clinics under a contract with Fairfax County, Virginia.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. These health plans served approximately 1.6 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals as of December 31, 2010. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Effective January 1, 2010, we terminated operations at our small Medicare health plan in Nevada.

On May 1, 2010, we acquired a health information management business which we now operate under the name, *Molina Medicaid Solutions*SM. Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program. We paid $131.3 million to acquire Molina Medicaid Solutions. The acquisition was funded with available cash of $26 million and $105 million drawn under our credit facility.

With the addition of Molina Medicaid Solutions, we have added a segment to our internal financial reporting structure in 2010. We now report our financial performance based on the following two reportable segments: (i) Health Plans; and (ii) Molina Medicaid Solutions.

Fiscal Year 2010 Overview and Highlights

During 2010, we experienced diversified revenue growth thanks to increased enrollment in our health plans, our successful entry into the Medicaid health information management business, and an acquisition that established us in a new state. Meanwhile, stronger medical management and disciplined cost control helped us realize improvements in our health plan medical margins. Many of these factors contributed to our Company's strong financial performance in 2010. For the year, our net income rose to $55.0 million, or $1.98 per diluted share, an increase of 78% over 2009. We earned premium revenues of $4.0 billion, up 9% over the previous year. Meanwhile, during a year when costs continued to rise for the health care industry, we achieved a medical care ratio of 84.5%, compared with a medical care ratio of 86.8% for fiscal year 2009.

During 2010, we continued to pursue the expansion of our Medicaid health plan business. In September 2010, we completed the $15.5 million acquisition of Abri Health Plan of Milwaukee, which served approximately 36,000 Medicaid beneficiaries as of December 31, 2010. We also expanded our growing presence in Texas, where we were already serving patients in the Houston, San Antonio, and Laredo service areas. In May 2010, we were awarded a contract to serve Medicaid managed care patients in the seven-county Dallas service area starting in February 2011. In September 2010, we won an additional contract to administer the CHIP program (including the CHIP Perinatal program) in 174 predominately rural counties across the state. As of December 31, 2010, we served approximately 63,000 children and pregnant women under this contract. The new contracts not only provide increased scale for leveraging our resources in Texas, they make Molina an increasingly important player in a state where the potential revenue opportunity will grow as new Medicaid beneficiaries qualify for coverage under health care reform.

In addition, during 2010 we expanded our operation of community-based primary care clinics — the business field in which Molina began over 30 years ago — so that we can serve the needs of our patients while also serving the states that pay for their health care.

Finally, on May 1, 2010, we acquired Molina Medicaid Solutions, an acquisition which has complemented our core business model of serving government programs, expanded our service offerings diversified our revenue base, and expanded our level of participation in the Medicaid program.

2010 Financial Performance Summary

The following table briefly summarizes our financial performance for the years ended December 31, 2010, 2009, and 2008. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are computed as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Year Ended December 31,		
	2010	2009	2008
	(Dollar amounts in thousands, except per-share data)		
Earnings per diluted share	$ 1.98	$ 1.19	$ 2.15
Premium revenue	$3,989,909	$3,660,207	$ 3,091,240
Service revenue	$ 89,809	$ —	$ —
Operating income	$ 105,001	$ 51,934	$ 107,555
Net income	$ 54,970	$ 30,868	$ 59,598

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. The majority of medical costs associated with premium revenues are risk-based costs — while the health plans receive fixed per-member per-month, or PMPM, premium payments from the states, the health plans are at risk for the costs of their members' health care. Our Health Plans segment operates

in a highly regulated environment with stringent capitalization requirements. These capitalization requirements, among other things, limit the health plans' ability to pay dividends to us without regulatory approval.

As of December 31, 2010, our health plans were located in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. Additionally, we operate three county-owned primary care clinics in Virginia.

Molina Medicaid Solutions Segment

Our Molina Medicaid Solutions segment provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. Among the principle differences between the Molina Medicaid Solutions segment and the Health Plans segment are:

- The Molina Medicaid Solutions segment, unlike the Health Plans segment, does not assume risk for medical costs. We believe that over time the Molina Medicaid Solutions segment will experience less volatility in profits than the Health Plans segment because the costs incurred for the provision of business process outsourcing services are less volatile than those incurred for the provision of medical care.
- Revenue earned by the Molina Medicaid Solutions segment will be much less than that earned by the Health Plans segment. The revenue earned by our Health Plans segment is intended to include the cost of the medical care actually provided to our health plan membership. Such costs typically amount to approximately 85% of the revenue of the health plans segment. The revenue received by the Molina Medicaid Solutions segment is intended only to pay for certain administrative costs (plus profit) of the Medicaid program — not the actual cost of services provided to Medicaid members.
- In general, we expect the operating profit margin percentage generated by the Molina Medicaid Solutions segment to be higher than the operating profit margin percentage generated by the Health Plans segment. While total profit is likely to be lower for the Molina Medicaid Solutions segment than for the Health Plans segment, the percentage of revenue that we retain as profit is likely to be higher for the Molina Medicaid Solutions segment.
- The capital requirements of the Molina Medicaid Solutions segment are — except in the case of new contract start-ups — considerably less than those of our Health Plans segment.
- Regulatory approval is not required for the Molina Medicaid Solutions segment to pay dividends to us.

While we believe that the acquisition of the Molina Medicaid Solutions segment diversifies our risk profile, we also believe that the two segments are complementary from strategic and operating perspectives. From a strategic perspective, both segments allow us to participate in an expanding sector of the economy while continuing our mission to serve low-income families and individuals eligible for government-sponsored health care programs. Operationally, the segments share a common systems platform — allowing for efficiencies of scale — and common experience in meeting the needs of state Medicaid programs. We also believe that we have opportunities to market various cost containment and quality practices used by our Health Plans segment (such as care management and care coordination programs) to state MMIS customers who wish to incorporate certain aspects of managed care programs into their own fee-for-service programs.

Composition of Revenue and Membership

Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the year ended December 31, 2010, we received approximately 94% of our premium revenue as a fixed PMPM amount, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with the Centers for Medicare and Medicaid Services, or CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the year ended December 31, 2010, we received approximately 6% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for CHIP members are generally among our lowest, with rates as low as approximately $75 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the TANF Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $100 in California to $230 in Missouri. Among our Medicaid ABD membership, PMPM premiums range from approximately $320 in Utah to $1,000 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare premiums are almost $1,100 PMPM, with Medicare revenue totaling $265.2 million, $135.9 million, and $95.1 million, for the years ended December 31, 2010, 2009, and 2008, respectively.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	As of December 31,		
	2010	2009	2008
Total Ending Membership by Health Plan:			
California	344,000	351,000	322,000
Florida	61,000	50,000	—
Michigan	227,000	223,000	206,000
Missouri	81,000	78,000	77,000
New Mexico	91,000	94,000	84,000
Ohio	245,000	216,000	176,000
Texas	94,000	40,000	31,000
Utah	79,000	69,000	61,000
Washington	355,000	334,000	299,000
Wisconsin(1)	36,000	—	—
Total	1,613,000	1,455,000	1,256,000
Total Ending Membership by State for our Medicare Advantage Plans(1):			
California	4,900	2,100	1,500
Florida	500	—	—
Michigan	6,300	3,300	1,700
New Mexico	600	400	300
Texas	700	500	400
Utah	8,900	4,000	2,400
Washington	2,600	1,300	1,000
Total	24,500	11,600	7,300
Total Ending Membership by State for our Aged, Blind or Disabled Population:			
California	13,900	13,900	12,700
Florida	10,000	8,800	—
Michigan	31,700	32,200	30,300
New Mexico	5,700	5,700	6,300
Ohio	28,200	22,600	19,000
Texas	19,000	17,600	16,200
Utah	8,000	7,500	7,300
Washington	4,000	3,200	3,000
Wisconsin(1)	1,700	—	—
Total	122,200	111,500	94,800

(1) We acquired the Wisconsin health plan on September 1, 2010. As of December 31, 2010, the Wisconsin health plan had approximately 3,000 Medicare Advantage members covered under a reinsurance contract with a third party; these members are not included in the membership tables herein.

Molina Medicaid Solutions Segment

Our Molina Medicaid Solutions segment provides technology solutions to state Medicaid programs that include system design, development, implementation, and technology outsourcing services. In addition, this segment offers business process outsourcing services such as claims processing, provider enrollment, pharmacy drug rebate services, recipient eligibility management, and pre-authorization services to state Medicaid agencies.

Molina Medicaid Solutions has contracts with five states to design, develop, implement, maintain, and operate Medicaid Management Information Systems (MMIS). These contracts extend over a number of years, and cover the life of the MMIS from inception through at least the first five years of its operation. The contracts are subject to extension by the exercise of an option, and also by renewal of the base contract. The contracts have a life cycle beginning with the design, development, and implementation of the MMIS and continuing through the operation of the system. Payment during the design, development, and implementation phase of the contract, or the DDI phase, is generally based upon the attainment of specific milestones in systems development as agreed upon ahead of time by the parties. Payment during the operations phase typically takes the form of either a flat monthly fee or payment for specific measures of capacity or activity, such as the number of claims processed, or the number of Medicaid beneficiaries served by the MMIS. Contracts may also call for the adjustment of amounts paid if certain activity measures exceed or fall below certain thresholds. In some circumstances, revenue recognition may be delayed for long periods while we await formal customer acceptance of our products and/or services. In those circumstances, recognition of a portion of our costs may also be deferred.

Under our contracts in Louisiana, New Jersey, and West Virginia, we provide primarily business process outsourcing and technology outsourcing services, because the development of the MMIS solution has been completed. Under these contracts, we recognize outsourcing service revenue on a straight-line basis over the remaining term of the contract. In Maine, we completed the DDI phase of our contract effective September 1, 2010. In Idaho, we expect to complete the DDI phase of our contract during 2011. We began revenue and cost recognition for our Maine contract in September 2010, and expect to begin revenue and cost recognition for our Idaho contract in 2011.

Additionally, Molina Medicaid Solutions provides pharmacy rebate administration services under a contract with the state of Florida.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service* — Physician providers paid on a fee-for-service basis are paid according to a fee schedule set by the state or by our contracts with the providers. We pay hospitals on a fee-for-service basis in a variety of ways, including by per diem amounts, by diagnostic-related groups, or DRGs, as a percentage of billed charges, and by case rates. We also pay a small portion of hospitals on a capitated basis. We also have stop-loss agreements with the hospitals with which we contract; under certain circumstances, we pay escalated charges in connection with these stop-loss agreements. Under all fee-for-service arrangements, we retain the financial responsibility for medical care provided. Expenses related to fee-for-service contracts are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit managers are included in fee-for-service costs.
- *Capitation* — Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation contracts, we typically pay a fixed PMPM payment to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated contracts, we remain liable for the provision of certain health care services. Certain of our capitated contracts also contain incentive programs based on service delivery, quality of care, utilization management,

and other criteria. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.

- *Pharmacy* — Pharmacy costs include all drug, injectibles, and immunization costs paid through our pharmacy benefit managers. As noted above, drugs and injectibles not paid through our pharmacy benefit manager are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.
- *Other* — Other medical care costs include medically related administrative costs, certain provider incentive costs, reinsurance costs, and other health care expense. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, disease management, 24-hour on-call nurses, and a portion of our information technology costs. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2010, 2009 and 2008, medically related administrative costs were approximately $85.5 million, $74.6 million and $75.9 million, respectively.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Policies" below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our contracts in Louisiana, Maine, New Jersey, West Virginia and Florida, as well as certain selling, general and administrative expenses. Additionally, certain indirect costs incurred under our contracts in Maine (prior to exiting the DDI phase of that contract in September, 2010) and Idaho are also expensed to cost of services.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period. We began to recognize deferred costs for our Maine contract in September 2010, at the same time we began to recognize revenue associated with that contract. In Idaho, we expect to begin recognition of deferred contact costs during 2011, in a manner consistent with our anticipated recognition of revenue.

Results of Operations

Year Ended December 31, 2010 Compared with the Year Ended December 31, 2009

Health Plans Segment

Premium Revenue

Premium revenue grew 9.0% in the year ended December 31, 2010, compared with the year ended December 31, 2009, due to a membership increase of 10.9%. On a PMPM basis, however, consolidated premium revenue decreased 2.1% because of declines in premium rates. The decrease in PMPM revenue was due to the transfer of the pharmacy benefit to the state fee-for-service programs in Ohio (effective February 1, 2010) and Missouri (effective October 1, 2009). Exclusive of the transfer of the pharmacy benefit in Ohio and Missouri, Medicaid premium revenue PMPM increased approximately 1.5% over the year ended December 31, 2009. Medicare enrollment exceeded 24,000 members at December 31, 2010, and Medicare premium revenue was $265.2 million for the year ended December 31, 2010, compared with $135.9 million for the year ended December 31, 2009.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Year Ended December 31,					
	2010			2009		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$2,360,858	$128.73	70.0%	$2,077,489	$126.14	65.4%
Capitation	555,487	30.29	16.5	558,538	33.91	17.6
Pharmacy	325,935	17.77	9.7	414,785	25.18	13.1
Other	128,577	7.01	3.8	125,424	7.62	3.9
Total	$3,370,857	$183.80	100.0%	$3,176,236	$192.85	100.0%

The medical care ratio decreased to 84.5% for the year ended December 31, 2010, compared with 86.8% for the year ended December 31, 2009.

The medical care ratio of the California health plan decreased to 83.5% for the year ended December 31, 2010, compared with 92.2% for the year ended December 31, 2009, primarily due to lower inpatient facility fee-for-service costs resulting from provider network restructuring and improved medical management.

The medical care ratio of the Florida health plan increased to 95.4% for the year ended December 31, 2010, from 93.8% for the year ended December 31, 2009, primarily due to higher capitation costs and higher fee-for-service costs in the outpatient and physician categories.

The medical care ratio of the Michigan health plan increased to 83.7% for the year ended December 31, 2010, from 81.5% for the year ended December 31, 2009, primarily due to higher inpatient facility fee-for-service costs.

The medical care ratio of the New Mexico health plan decreased to 80.6% for the year ended December 31, 2010, from 85.7% for the year ended December 31, 2009, primarily due to reduced fee-for-service costs which more than offset decreased premium revenue PMPM.

The medical care ratio of the Ohio health plan decreased to 79.1% for the year ended December 31, 2010, from 86.1% for the year ended December 31, 2009, primarily due to an increase in Medicaid premium PMPM of approximately 6% effective January 1, 2010 (exclusive of the reduction related to pharmacy benefits), partially offset by higher inpatient facility fee-for-service costs.

The medical care ratio of the Utah health plan decreased to 91.3% for the year ended December 31, 2010, from 91.8% for the year ended December 31, 2009, due to improved financial performance in the second half of 2010. That improved financial performance was the result of reduced fee-for-service costs in the second half of 2010 and an increase in Medicaid premium PMPM of approximately 7% effective July 1, 2010.

The medical care ratio of the Washington health plan decreased to 83.9% for the year ended December 31, 2010 from 84.5% for the year ended December 31, 2009, primarily due to reduced fee-for-service costs which more than offset decreased premium revenue PMPM. Premium revenue PMPM decreased for all of 2010 compared with 2009 because the rate increase of approximately 2.5% effective July 1, 2010 was not enough to offset decreases received during the second half of 2009.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Year Ended December 31, 2010						
	Member Months(1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	4,197	$ 506,871	$ 120.77	$ 423,021	$ 100.79	83.5%	$ 6,912
Florida	664	170,683	256.87	162,839	245.07	95.4	1
Michigan	2,708	630,134	232.66	527,596	194.80	83.7	39,187
Missouri	946	210,852	222.98	180,291	190.66	85.5	—
New Mexico	1,104	366,784	332.02	295,633	267.61	80.6	9,300

Other(3),(4)	—	12,774	—	37,957	—	—	57
	16,466	$3,660,207	$ 222.24	$3,176,236	$ 192.85	86.8%	$ 128,581

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) We acquired the Wisconsin health plan on September 1, 2010.

(3) "Other" medical care costs also include medically related administrative costs at the parent company.

(4) As of December 31, 2009, our Nevada health plan no longer served members. Premium revenue and medical care costs for the Nevada health plan have been included in "Other."

Days in Medical Claims and Benefits Payable

Beginning January 1, 2010, and for all prior periods presented, we are reporting days in medical claims and benefits payable relating to fee-for-service medical claims only. This computation includes only fee-for-service

medical care costs and related liabilities, and therefore calculates the extent of reserves for those liabilities that are most subject to estimation.

The days in medical claims and benefits payable amount previously reported included *all* medical care costs (fee-for-service, capitation, pharmacy, and administrative), and *all* medical claims liabilities, including those liabilities that are typically paid concurrently, or shortly after the costs are incurred, such as capitation costs and pharmacy costs. Medical claims liabilities in this calculation do not include accrued costs — such as salaries — associated with the administrative portion of medical costs. By including only fee-for-service medical costs and liabilities in this computation, our days in claims payable metric is more indicative of the size of our reserves for liabilities subject to a substantial degree of estimation. The days in medical claims and benefits payable, excluding our Wisconsin health plan which was acquired September 1, 2010, were as follows:

	December 31,		
	2010	2009	2008
Days in claims payable — fee-for-service only	42 days	44 days	51 days
Number of claims in inventory at end of period	143,600	93,100	87,300
Billed charges of claims in inventory at end of period (in thousands)	$218,900	$131,400	$115,400

Molina Medicaid Solutions Segment

Molina Medicaid Solutions contributed $2.6 million to operating income for the year ended December 31, 2010, but reported an operating loss of $3.6 million for the quarter ended December 31, 2010. The operating loss for the fourth quarter of 2010 was primarily the result of system stabilization costs incurred for two of Molina Medicaid Solutions' contracts.

Performance of the Molina Medicaid Solutions segment for the year ended December 31, 2010 was as follows:

	(In thousands)
Service revenue before amortization	$ 98,125
Less: amortization of contract backlog recorded as contra-service revenue	(8,316)
Service revenue	89,809
Cost of service revenue	78,647
General and administrative costs	5,135
Amortization of customer relationship intangibles recorded as amortization	3,418
Operating income	$ 2,609

Consolidated Expenses

General and Administrative Expenses

General and administrative, or G&A, expenses, were $346.0 million, or 8.5% of total revenue, for the year ended December 31, 2010 compared with $276.0 million, or 7.5% of total revenue, for the year ended December 31, 2009. The increase in the G&A ratio was the result of higher administrative expenses for the Health Plans segment, driven in part by the cost of our Medicare expansion, higher variable compensation expense as a result of substantially improved financial performance in 2010, employee severance and settlement costs, and costs relating to the acquisitions of Molina Medicaid Solutions and the Wisconsin health plan.

	Year Ended December 31,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(In thousands)			
Medicare-related administrative costs	$ 30,254	0.7%	$ 18,564	0.5%
Non Medicare-related administrative costs:				
Health Plans segment administrative payroll, including employee incentive compensation	239,146	5.9	204,432	5.6
Molina Medicaid Solutions segment administrative expenses	5,135	0.1	—	—
Employee severance and settlement costs	5,548	0.1	1,257	—
Molina Medicaid Solutions and Wisconsin plan acquisition costs	2,957	0.1	—	—
All other Health Plans segment administrative expense	62,953	1.6	51,774	1.4
	$345,993	8.5%	$276,027	7.5%

Premium Tax Expense

Premium tax expense relating to Health Plans segment premium revenue was 3.5% of revenue for both years ended December 31, 2010, and 2009.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different captions in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization in "Depreciation and Amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of service revenue; and
- Depreciation is recorded as cost of service revenue.

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue, and reconciles that amount to the consolidated statements of cash flows.

	Year Ended December 31,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(In thousands)			
Depreciation	$ 27,230	0.7%	$25,172	0.7%
Amortization of intangible assets	18,474	0.4	12,938	0.3
Depreciation and amortization reported in the consolidated statements of income	45,704	1.1	38,110	1.0
Amortization recorded as reduction of service revenue	8,316	0.2	—	—
Depreciation recorded as cost of service revenue	6,745	0.2	—	—
Depreciation and amortization reported in the consolidated statements of cash flows	$60,765	1.5%	$ 38,110	1.0%

Interest Expense

Interest expense increased to $15.5 million for the year ended December 31, 2010, from $13.8 million for the year ended December 31, 2009. We incurred higher interest expense relating to the $105 million draw on our credit facility (beginning May 1, 2010) to fund the acquisition of Molina Medicaid Solutions. Amounts borrowed to fund this acquisition were repaid in the third quarter using proceeds from our equity offering in the third quarter of 2010. Interest expense includes non-cash interest expense relating to our convertible senior notes, which totaled $5.1 million and $4.8 million for the years ended December 31, 2010, and 2009, respectively.

Income Taxes

Income tax expense was recorded at an effective rate of 38.6% for the year ended December 31, 2010 compared with 19.1% for the year ended December 31, 2009. The lower rate in 2009 was primarily due to discrete tax benefits recorded in 2009 as a result of settling tax examinations, and higher than previously estimated tax credits.

For the year ended December 31, 2009, amounts for premium tax expense and income tax expense have been reclassified to conform to the 2010 presentation of MGRT as a premium tax. The MGRT amounted to $6.2 million and $5.5 million for the years ended December 31, 2010, and 2009, respectively. There was no impact to net income for either period presented relating to this change.

Year Ended December 31, 2009 Compared with the Year Ended December 31, 2008

Health Plans Segment

Premium Revenue

Premium revenue grew approximately 18% in the year ended December 31, 2009 compared with the same period in 2008. During 2009, membership grew 16% overall, with Florida, California, Washington, and Ohio gaining the most members. Consolidated premium revenue increased 5.3% on a PMPM basis. Increased membership contributed 71% of the growth in premium revenue, and increases in PMPM revenue, as a result of both rate changes and shifts in member mix, contributed the remaining 29%.

We received PMPM premium reductions in 2009 that were in many cases correlated with reductions in the Medicaid fee schedule that also reduced our medical costs. However, PMPM premium reductions in Washington and Missouri in 2009 were not fully commensurate with changes in the Medicaid fee schedule in those states, and thus decreases in premiums were not matched by lower medical costs. In Washington, premium reductions not

linked to decreases in the Medicaid fee schedule lowered our medical margin by approximately $13 million in 2009. In Missouri, the transfer of the pharmacy benefit to the state fee-for-service program effective October 1, 2009 reduced our medical margin by approximately $1.2 million in 2009.

Medical care costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Year Ended December 31,					
	2009			2008		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$2,077,489	$ 126.14	65.4%	$1,709,806	$116.69	65.2%
Capitation	558,538	33.91	17.6	450,440	30.74	17.2
Pharmacy	414,785	25.18	13.1	356,184	24.31	13.6
Other	125,424	7.62	3.9	104,882	7.16	4.0
Total	$3,176,236	$192.85	100.0%	$2,621,312	$ 178.90	100.0%

Medical care costs, in the aggregate, increased 8% on a PMPM basis for the year ended December 31, 2009 compared with the same period in 2008. The medical care ratio was 86.8% for the year ended December 31, 2009, compared with 84.8% for the same period in 2008. Increased expenses were generally the result of higher utilization rather than higher unit costs (except in the case of outpatient costs, where both utilization and unit costs increased) and were most pronounced in connection with physician and outpatient emergency room facility services. Influenza-related illnesses and the costs associated with more recently enrolled members were key factors in the higher utilization. We estimate that the incremental costs associated with influenza-related illnesses were approximately $35 million, or $0.83 per diluted share, in the year ended December 31, 2009 compared with the year ended December 31, 2008.

Physician and outpatient costs exhibited the most significant unfavorable cost trend in the year ended December 31, 2009. Together, these costs increased approximately 13% on a PMPM basis compared with the same period in 2008. Consistent with our experience throughout 2009, emergency room utilization (up approximately 9%) and cost per visit (up approximately 8%) were the primary drivers of increased cost in the year ended December 31, 2009.

Inpatient costs were flat on a PMPM basis year-over-year despite increased utilization.

Pharmacy costs (including the benefit of rebates) increased 6% on a PMPM basis year-over-year, excluding the Missouri health plan, where the pharmacy benefit was transferred to the sate fee-for-service program effective October 1, 2009. Pharmacy utilization increased approximately 6% year-over-year, while unit costs (excluding rebates) were flat.

Capitated costs increased approximately 10% PMPM year-over-year, primarily as a result of rate increases received for members capitated on a percentage of premium basis at the New Mexico health plan, and the transition of members into capitated arrangements in California.

Health Plans Segment Operating Data

The following table summarizes premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Year Ended December 31, 2009						
	Member Months(1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	4,135	$ 481,717	$116.49	$ 443,892	$ 107.34	92.2%	$ 16,446

	14,646	$ 3,091,240	$ 210.97	$2,621,312	$ 178.90	84.8%	$ 100,165

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) The Florida health plan began enrolling members in December 2008.

(3) "Other" medical care costs also include medically related administrative costs at the parent company.

(4) As of December 31, 2009, our Nevada health plan no longer served members. Premium revenue and medical care costs for the Nevada health plan have been included in "Other."

General and administrative expenses

G&A expenses were 7.5% of revenue in the year ended December 31, 2009, compared with 8.0% for the year ended December 31, 2008. Year-over-year, premium revenue grew faster than administrative costs, causing administrative costs, as a percentage of revenue, to decrease. On a PMPM basis, G&A decreased to $16.76 in 2009, from $17.04 for the same period in 2008.

	Year Ended December 31,			
	2009		2008	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(In thousands)			
Medicare-related administrative costs	$ 18,857	0.5%	$ 18,451	0.6%
Non Medicare-related administrative costs:				
Administrative payroll, including employee incentive compensation	205,396	5.6	190,932	6.1
Florida health plan start up expenses	—	—	2,495	0.1
All other administrative expense	51,774	1.4	37,768	1.2
G&A expenses	$ 276,027	7.5%	$ 249,646	8.0%

Depreciation and Amortization

Depreciation and amortization expense increased $4.4 million for the year ended December 31, 2009 compared with 2008, primarily due to depreciation expense associated with investments in infrastructure. The following table presents the components of depreciation and amortization:

	Year Ended December 31,			
	2009		2008	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(In thousands)			
Depreciation	$ 25,172	0.7%	$ 20,718	0.7%
Amortization of intangible assets	12,938	0.3	12,970	0.4
Depreciation and amortization reported in the consolidated statements of cash flows	$ 38,110	1.0%	$ 33,688	1.1%

Gain on Retirement of Convertible Senior Notes

In February 2009, we purchased and retired $13.0 million face amount of our convertible senior notes. In connection with the purchase of the notes, we recorded a pretax gain of $1.5 million in 2009. There was no comparable transaction in 2008.

Interest Expense

Interest expense was $13.8 million for the year ended December 31, 2009, a slight increase over interest expense of $13.2 million for the year ended December 31, 2008. Interest expense includes non-cash interest expense relating to our convertible senior notes, which totaled $4.8 million, and $4.7 million for the years ended December 31, 2009, and 2008, respectively.

Income Taxes

Income taxes were recorded at an effective rate of 19.1% for the year ended December 31, 2009, compared with 36.8% in the prior year. The decrease in the effective tax rate was primarily due to discrete tax benefits recognized during the year relating to settling tax examinations, and higher than previously estimated California enterprise zone tax credits.

For the years ended December 31, 2009 and 2008, amounts for premium tax expense and income tax expense have been reclassified to conform to the presentation of MGRT as a premium tax. The MGRT amounted to $5.5 million and $5.1 million for the years ended December 31, 2009, and 2008, respectively. There was no impact to net income for either period presented relating to this change.

Acquisitions

Wisconsin Health Plan. On September 1, 2010, we acquired Abri Health Plan, a Medicaid managed care organization based in Milwaukee, Wisconsin. As of December 31, 2010, we expect the final purchase price for the acquisition to be approximately $15.5 million, subject to adjustments. As of December 31, 2010, we had paid $8.5 million of the total purchase price. In the first quarter of 2011 we will compute the final purchase price based on the plan's membership on that date.

Molina Medicaid Solutions. On May 1, 2010, we acquired a health information management business which we now operate under the name, *Molina Medicaid Solutions*SM as described in "Overview," above.

Florida Health Plan. On December 31, 2009, we acquired 100% of the voting equity interests in Florida NetPASS, LLC, or NetPASS. The final purchase price totaled $29.6 million.

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue and investment income. Such cash flows are our primary source of liquidity. Thus, any future decline in our premium revenue or our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of December 31, 2010, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income decreased to $6.3 million for the year ended December 31, 2010, compared with $9.1 million for year ended December 31, 2009. This decline was primarily due to lower interest rates in 2010. The annualized portfolio yields for the years ended December 31, 2010, 2009, and 2008, were 0.7%, 1.2%, and 3.0%, respectively.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect to incur significantly losses due to a sudden change in market interest rates. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash provided by operating activities for the year ended December 31, 2010 was $161.6 million compared with $155.4 million for the year ended December 31, 2009, an increase of $6.2 million. Deferred revenue, which was a use of operating cash totaling $41.9 million in 2010, was a source of operating cash totaling $88.2 million in 2009. In 2009, the state of Ohio typically paid premiums in advance of the month the premium was earned. In 2010, the state of Ohio delayed its premium payments to mid-month for the month premium is earned. Therefore, we did not receive advance payments for the Ohio health plan's premiums during 2010. The change in deferred revenue was offset by increases in net income, depreciation and amortization, and other current liabilities.

Cash used in investing activities increased significantly in 2010 compared with 2009, due chiefly to the acquisition of Molina Medicaid Solutions, which totaled $131.3 million.

Cash provided by financing activities increased due to funds generated by our equity offering in the third quarter of 2010, which totaled $111.1 million, net of issuance costs. Amounts borrowed under our credit facility to fund the acquisition of Molina Medicaid Solutions in the second quarter of 2010 were repaid in the third quarter using proceeds from the equity offering.

Reconciliation of Non-GAAP(1) to GAAP Financial Measures

EBITDA(2)

	Year Ended December 31,	
	2010	2009
	(In thousands)	
Operating income	$ 105,001	$51,934
Add back:		
Depreciation and amortization reported in the consolidated statements of cash flows	60,765	38,110
EBITDA	$165,766	$ 90,044

(1) GAAP stands for U.S. generally accepted accounting principles.

(2) We calculate EBITDA consistently on a quarterly and annual basis by adding back depreciation and amortization to operating income. Operating income includes investment income. EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities, nor should EBITDA be considered in isolation from these GAAP measures of operating performance. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At December 31, 2010, the parent company — Molina Healthcare, Inc. — held cash and investments of approximately $65.1 million, including $6.0 million in non-current auction rate securities, compared with $45.6 million of cash and investments at December 31, 2009.

On a consolidated basis, at December 31, 2010, we had working capital of $392.4 million compared with $321.2 million at December 31, 2009. At December 31, 2010 and December 31, 2009, cash and cash equivalents were $455.9 million and $469.5 million, respectively. At December 31, 2010, investments were $315.8 million, including $20.4 million in non-current auction rate securities, and at December 31, 2009, investments were $234.5 million, including $59.7 million in non-current auction rate securities.

Credit Facility

We are a party to an Amended and Restated Credit Agreement, dated as of March 9, 2005, as amended by the first amendment on October 5, 2005, the second amendment on November 6, 2006, the third amendment on May 25, 2008, the fourth amendment on April 29, 2010, and the fifth amendment on April 29, 2010, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility") for a revolving credit line of $150 million that matures in May 2012. The Credit Facility is intended to be used for general corporate purposes. We borrowed $105 million under the Credit Facility to acquire Molina Medicaid Solutions in the second quarter of 2010. During the third quarter of 2010, we repaid this amount using proceeds from our equity offering, described in Note 14 to the accompanying audited consolidated financial statements for the year ended December 31, 2010. As of December 31, 2010, and 2009, there was no outstanding principal debt balance under the Credit Facility. However, as of December 31, 2010, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the contract of MMS with the states of Maine and Idaho.

To the extent that in the future we incur any obligations under the Credit Facility, such obligations will be secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At December 31, 2010, we were in compliance with all financial covenants in the Credit Facility.

The commitment fee on the total unused commitments of the lenders under the Credit Facility is 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans is 200 basis points at every level of the pricing grid. Thus, the applicable margins under the Credit Facility range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. The Credit Facility carves out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of the convertible senior notes, although the $187.0 million indebtedness is included in the calculation of our consolidated leverage ratio. The fixed charge coverage ratio set forth pursuant to the Credit Facility was 2.75x (on a pro forma basis) at December 31, 2009, and 3.00x thereafter.

The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.25 to 1.0 for the fourth quarter of 2009 (on a pro forma basis), and to 3.50 to 1.0 for the first and second quarters of 2010, and through August 14, 2010. Effective as of August 15, 2010, the consolidated leverage ratio under the Credit Facility reverted back to 2.75 to 1.0. In connection with the lenders' approval of the fifth amendment, we paid an amendment fee of 25 basis points on the amount of each consenting lender's commitment. We also paid an incremental commitment fee of 12.5 basis points based on each lender's unfunded commitment during the period from the effective date of the fifth amendment through August 15, 2010.

Shelf Registration Statement

In December 2008, we filed a shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the issuance of up to $300 million of our securities, including common stock, warrants, or debt securities, and up to 250,000 shares of outstanding common stock that may be sold from time to time by the Molina Siblings Trust as a selling stockholder. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering. As a result of the offering described below, we may now offer up to $182.5 million of our securities from time to time under the shelf registration statement.

In August 2010, we sold 4,350,000 shares of common stock covered by this registration statement. The public offering price for this sale was $25.65 per share, net of the underwriting discount. Our proceeds from the sales totaled approximately $111.1 million, net of the issuance costs. We used the proceeds from these sales to repay the Credit Facility and for general corporate purposes. Also in August 2010, the Molina Siblings Trust, as a selling stockholder, sold 250,000 shares of outstanding common stock covered by this registration statement.

Securities Purchase Programs

Under securities purchase programs announced in 2009, we purchased and retired $13.0 million face amount of our convertible senior notes. Also during 2009, we purchased approximately 1,352,000 shares of our common stock for $28 million.

Convertible Senior Notes

In October 2007, we sold $200.0 million aggregate principal amount of 3.75% Convertible Senior Notes due 2014 (the "Notes"). During 2009, we purchased and retired $13.0 million face amount of the Notes. As of December 31, 2010, the remaining aggregate principal amount of the Notes was $187.0 million. The Notes rank equally in right of payment with our existing and future senior indebtedness.

The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 21.3067 shares of our common stock per $1,000 principal amount of the Notes. This represents an initial conversion price of approximately $46.93 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Regulatory Capital and Dividend Restrictions

Our principal operations are conducted through our health plan subsidiaries operating in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. The health plans are subject to state laws that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and may restrict the timing, payment, and amount of dividends and other distributions that may be paid to Molina Healthcare, Inc. as the sole stockholder of each of our health plans. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries, after intercompany eliminations, which may not be transferable to us in the form of loans, advances, or cash dividends totaled $397.8 million at December 31, 2010, and $368.7 million at December 31, 2009.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if adopted by a particular state, set minimum capitalization requirements for health plans and other insurance entities bearing risk for health care coverage. The requirements take the form of risk-based capital, or RBC, rules. These rules, which vary slightly from state to state, have been adopted in Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. California and Florida have not adopted RBC rules and have not given notice of any intention to do so. The RBC rules, if adopted by California and Florida, may increase the minimum capital required by those states.

At December 31, 2010, our health plans had aggregate statutory capital and surplus of approximately $416.6 million, compared to the required minimum aggregate statutory capital and surplus of approximately $278.0 million. All of our health plans were in compliance with the minimum capital requirements at December 31, 2010. We have the ability and commitment to provide additional working capital to each of our health plans when necessary to ensure that capital and surplus continue to meet regulatory requirements. Barring any change in regulatory requirements, we believe that we will continue to be in compliance with these requirements through 2011.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- The determination of the amount of revenue to be recognized under certain contracts that place revenue at risk dependent upon the achievement of certain quality or administrative measurements, or the expenditure of certain percentages of revenue on defined expenses, or requirements that we return a certain portion of our profits to state governments;

- The deferral of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and
- The determination of medical claims and benefits payable.

Revenue Recognition — Health Plans Segment

Certain components of premium revenue of our Health Plans segment are subject to accounting estimates, and are therefore subject to retroactive revision. Chief among these are:

- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health:* A portion of premium revenue paid to our Florida health plan by the state of Florida may be refunded to the state if certain minimum amounts are not spent on defined behavioral health care costs. At December 31, 2010, we had not recorded any liability under the terms of this contract provision. If the state of Florida disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of this provision, including revisions to the definitions of premium revenue or behavioral health care costs, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our Florida health plan.
- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* A portion of premium revenue paid to our New Mexico health plan by the state of New Mexico may be refunded to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). Our contract is for a three-year period, and the medical cost floor is based on premiums and medical care costs over the entire contract period. Effective July 1, 2008, our New Mexico health plan entered into a new three year contract that, in addition to retaining the medical cost floor, added certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At December 31, 2010, we had recorded a liability of $5.6 million under the terms of these contract provisions. If the state of New Mexico disagrees with our interpretation of the

existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of these provisions, including revisions to the definitions of premium revenue, medical care costs, administrative costs or profit, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our New Mexico health plan.

- *New Mexico Health Plan At-Risk Premium Revenue:* Under our contract with the state of New Mexico, up to 1% of our New Mexico health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality of care and administrative measures dictated by the state. The state of New Mexico's fiscal year ends June 30, and open contract years typically include the current state fiscal year and the immediately preceding state fiscal year (two state fiscal years in total). For the two open state fiscal years ending June 30, 2011, our New Mexico health plan has received $5.4 million in at-risk revenue as of December 31, 2010. To date, we have recognized $3.5 million of that amount as revenue, and recorded a liability of approximately $1.9 million as of December 31, 2010, for the remainder. If the state of New Mexico disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required.
- *Ohio Health Plan At-Risk Premium Revenue:* Under our contract with the state of Ohio, up to 1% of our Ohio health plan's revenue may be refundable to the state if certain performance measures are not met. Effective February 1, 2010 an additional 0.25% of the Ohio health plan's revenue became refundable if certain pharmacy specific performance measures were not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. The state of Ohio's fiscal year ends June 30, and open contract years typically include the current state fiscal year and the immediately preceding state fiscal year (two state fiscal years in total). For the two open state fiscal years ending June 30, 2011, our Ohio health plan has received $13.8 million in at-risk revenue as of December 31, 2010. To date, we have recognized $4.5 million of that amount as revenue and recorded a liability of approximately $9.3 million as of December 31, 2010, for the remainder. If the state of Ohio disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required. During the third quarter of 2010, we reversed the recognition of approximately $3.3 million of at-risk revenue previously recognized.
- *Utah Health Plan Premium Revenue:* Our Utah health plan may be entitled to receive additional premium revenue from the state of Utah as an incentive payment for saving the state of Utah money in relation to fee-for-service Medicaid. In prior years, we estimated amounts we believed were recoverable under our savings sharing agreement with the state of Utah based on available information and our interpretation of our contract with the state. The state may not agree with our interpretation or our application of the contract language, and it may also not agree with the manner in which we have processed and analyzed our member claims and encounter records. Thus, the ultimate amount of savings sharing revenue that we realize from prior years may be subject to negotiation with the state. During 2007, as a result of an ongoing disagreement with the state of Utah, we wrote off the entire receivable, totaling $4.7 million. Our Utah health plan continues to assert its claim to the amounts believed to be due under the savings share agreement. When additional information is known, or resolution is reached with the state regarding the appropriate savings sharing payment amount for prior years, we will adjust the amount of savings sharing revenue recorded in our financial statements as appropriate in light of such new information or agreement. No receivables for saving sharing revenue have been established at December 31, 2010.
- *Texas Health Plan Profit Sharing:* Under our contract with the state of Texas there is a profit-sharing agreement, where we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As of December 31, 2010, we had an aggregate liability of approximately $0.6 million accrued pursuant to our profit-sharing agreement with the state of Texas for the 2010 and 2011 contract years (ending August 31 of each year). We paid $2.6 million to the state under the terms of this profit sharing agreement during the year ended December 31, 2010, for the 2009 and 2010 contract years. Because the final settlement

calculations include a claims run-out period of nearly one year, the amounts recorded, based on our estimates, an adjustment to the amounts owed may be required.

- *Texas Health Plan At-Risk Premium Revenue:* Under our contract with the state of Texas, up to 1% of our Texas health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. The state of Texas's fiscal year ends August 31, and open contract years typically include the current state fiscal year and the immediately preceding state fiscal year (two state fiscal years in total). For the two open state fiscal years ending August 31, 2011, our Texas health plan has received $2.2 million in at-risk revenue, all of which has been recognized as revenue, as of December 31, 2010. If the state of Texas disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required.
- *Medicare Premium Revenue:* Based on member encounter data that we submit to CMS, our Medicare revenue is subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. That analysis is similar to the process for the adjustment of member risk scores, but is further complicated by member pharmacy cost sharing provisions attached to the Medicare pharmacy benefit that do not apply to the services measured by the member risk adjustment process. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns we have recorded a liability of approximately $1.2 million related to the potential recoupment of Medicare premium revenue at December 31, 2010. To the extent that the premium revenue ultimately received from CMS differs from recorded amounts, we will adjust reported Medicare revenue.

Deferral of Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of three elements of service. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. The second element, following completion of the DDI element, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services, we also provide the state with the third contracted element — training and IT support and hosting services (training and support).

Because they include these three elements of service, our Molina Medicaid Solution segment contracts are multiple-element arrangements. We have no vendor specific objective evidence, or VSOE, of fair value for any of the individual elements in these contracts, and at no point in the contract will we have VSOE for the undelivered elements in the contract. We lack VSOE of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of products and services. While all contracts support the system of record for state MMIS, the actual services and products we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

The absence of VSOE within the context of a multiple element arrangement requires us to delay recognition of any revenue for an MMIS contract until completion of the DDI phase of the contract. Although the length of the DDI phase for any MMIS contract can vary considerably, the DDI phase typically takes about two years to complete. As a general principle, revenue recognition will therefore commence at the completion of the DDI phase, and all

revenue will be recognized over the period that BPO services and training and IT support services are provided. Consistent with the deferral of revenue, recognition of all direct costs (such as direct labor, hardware, and software) associated with the DDI phase of our contracts is deferred until the commencement of revenue recognition. Deferred costs are recognized on a straight-line basis over the period of revenue recognition.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any revenue at risk (whether DDI, BPO services or training and IT support services) until the contingency had been removed. In these circumstances we would also defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with the contract (whether DDI, BPO services or training and IT support services) on which revenue recognition is being deferred. Such deferred contract costs are recognized on a straight-line basis over the period of revenue recognition.

We began to recognize revenue (and related deferred costs) associated with our Maine contract in September 2010. In Idaho, we expect to begin recognition of deferred contact costs during 2011, in a manner consistent with our anticipated recognition of revenue. Unamortized deferred contract costs relating to the Molina Medicaid Solutions segment at December 31, 2010 were $28.4 million.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	December 31,		
	2010	2009	2008
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$275,259	$246,508	$236,492
Capitation payable	49,598	39,995	28,111
Pharmacy	14,649	20,609	18,837
Other	14,850	8,204	9,002
	$ 354,356	$315,316	$292,442

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are “Incurred But Not Paid,” or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately

pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $275.3 million of our total medical claims and benefits payable of $354.4 million as of December 31, 2010. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider's monthly capitation payment), our IBNP liability at December 31, 2010 was $268.3 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended per member per month (PMPM) cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of December 31, 2010 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding December 31, 2010, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 80,667
(4)%	53,778
(2)%	26,889
2%	(26,889)
4%	(53,778)
6%	(80,667)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of December 31, 2010 that would have resulted had we altered our trend factors by the

percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (64,958)
(4)%	(43,305)
(2)%	(21,653)
2%	21,653
4%	43,305
6%	64,958

The following per-share amounts are based on a combined federal and state statutory tax rate of 37%, and 27.8 million diluted shares outstanding for the year ended December, 2010. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at December 31, 2010, net income for the year ended December 31, 2010 would increase or decrease by approximately $8.5 million, or $0.31 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at December 31, 2010, net income for the year ended December 31, 2010 would increase or decrease by approximately $6.8 million, or $0.25 per diluted share, net of tax. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $42.4 million, or $1.53 per diluted share, and $34.1 million, or $1.23 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $8.5 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously

reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2010, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 15.7%.

As shown in greater detail in the table below, the amounts ultimately paid out on our prior period liabilities in fiscal years 2009 and 2010 were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

For the year ended December 31, 2010, we recognized a benefit from prior period claims development in the amount of $49.4 million (see table below). This amount represents our estimate as of December 31, 2010 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2009 exceeded the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2009 was due primarily to the following factors:

- In New Mexico, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- In California, we underestimated the extent to which various network restructuring, provider contracting and medical management initiatives had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

We recognized a benefit from prior period claims development in the amount of $51.6 million in the year ended December 31, 2009 (see table below). This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2008. The overestimation of claims liability at December 31, 2008 was the result of the following factors:

- In New Mexico, we overestimated at December 31, 2008 the ultimate amounts we would need to pay to resolve certain high dollar provider claims.
- In Ohio, we underestimated the degree to which certain operational initiatives had reduced our medical costs in the last few months of 2008.
- In Washington, we overestimated the impact that certain adverse utilization trends would have on our liability at December 31, 2008.
- In California, we underestimated utilization trends at the end of 2008, leading to an underestimation of our liability at December 31, 2008. Additionally, we underestimated the impact that certain delays in the receipt

of paper claims would have on our liability, leading to a further underestimation of our liability at December 31, 2008.

In estimating our claims liability at December 31, 2010, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- The rapid growth of membership in our Medicare line of business between December 31, 2009 and December 31, 2010.
- Our assumption of risk for new populations in Texas (rural CHIP members) and Wisconsin (Medicaid members) effective September 1, 2010.
- An increase in claims inventory at our Florida, Michigan, New Mexico, Ohio and Texas health plans between September 30, 2010 and December 31, 2010.
- A decrease in claims inventory at our Utah health plan between September 30, 2010 and December 31, 2010.
- The transition of claims processing for our Missouri health plan from a third party service provider to our internal claims processing platform effective April 1, 2010.
- Changes to the Medicaid fee schedule in Utah effective July 1, 2010.
- Changes to provider reimbursement rates (primarily for outpatient facility costs) in New Mexico effective November 1, 2010.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2009 and 2010, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The negative amounts displayed for "*Components of medical care costs related to:* Prior years" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year Ended December 31,	
	2010	2009
	(Dollars in thousands, except per-member amounts)	
Balances at beginning of year	$ 315,316	$ 292,442
Balance of acquired subsidiary	3,228	—
Components of medical care costs related to:		
Current year	3,420,235	3,227,794
Prior years	(49,378)	(51,558)
Total medical care costs	3,370,857	3,176,236
Payments for medical care costs related to:		
Current year	3,085,388	2,920,015
Prior years	249,657	233,347
Total paid	3,335,045	3,153,362
Balances at end of year	$ 354,356	$ 315,316
Benefit from prior years as a percentage of:		
Balance at beginning of year	15.7%	17.6%
Premium revenue	1.2%	1.4%
Medical care costs	1.5%	1.6%
Claims Data(1):		
Days in claims payable, fee for service only	42	44
Number of members at end of period	1,613,000	1,455,000
Fee-for-service claims processing and inventory information:		
Number of claims in inventory at end of period	143,600	93,100
Billed charges of claims in inventory at end of period	$ 218,900	$ 131,400
Claims in inventory per member at end of period	0.09	0.06
Billed charges of claims in inventory per member at end of period	$ 135.71	$ 90.31
Number of claims received during the period	14,554,800	12,930,100
Billed charges of claims received during the period	$ 11,686,100	$ 9,769,000

(1) "Claims Data" does not include our Wisconsin health plan acquired September 1, 2010.

Commitments and Contingencies

We lease office space and equipment under various operating leases. As of December 31, 2010, our lease obligations for the next five years and thereafter were as follows: $28.0 million in 2011, $23.8 million in 2012, $20.3 million in 2013, $17.4 million in 2014, $13.7 million in 2015, and an aggregate of $30.6 million thereafter.

We are not an obligor to or guarantor of any indebtedness of any other party. We are not a party to off-balance sheet financing arrangements except for operating leases which are disclosed in Note 18 to the accompanying audited consolidated financial statements for the year ended December 31, 2010.

Contractual Obligations

In the table below, we present our contractual obligations as of December 31, 2010. Some of the amounts we have included in this table are based on management's estimates and assumptions about these obligations, including their duration, the possibility of renewal, anticipated actions by third parties, and other factors. Because these estimates and assumptions are necessarily subjective, the contractual obligations we will actually pay in future periods may vary from those reflected in the table. Amounts are in thousands.

	Total	2011	2012-2013	2014-2015	2016 and Beyond
Medical claims and benefits payable	$354,356	$354,356	$ —	$ —	$ —
Principal amount of long-term debt(1)	187,000	—	—	187,000	—
Operating leases	133,806	28,004	44,143	31,037	30,622
Interest on long-term debt	26,297	7,012	14,025	5,260	—
Purchase commitments	28,557	13,401	14,828	328	—
Total contractual obligations	$ 730,016	$ 402,773	$72,996	$223,625	$ 30,622

(1) Represents the principal amount due on our 3.75% Convertible Senior Notes due 2014.

As of December 31, 2010, we have recorded approximately $11.0 million of unrecognized tax benefits. The above table does not contain this amount because we cannot reasonably estimate when or if such amount may be settled. See Note 13 to the accompanying audited consolidated financial statements for the year ended December 31, 2010 for further information.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

Quantitative and Qualitative Disclosures About Market Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Funds Prime Series — Institutional Class, and the PFM Funds Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our health plan subsidiaries operate.

Inflation

Although the general rate of inflation has remained relatively stable and health care cost inflation has stabilized in recent years, the national health care cost inflation rate still exceeds the general inflation rate. We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. While we currently believe our strategies will mitigate health care cost inflation, competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

MOLINA HEALTHCARE, INC.

Item 8. ***Financial Statements and Supplementary Data***

INDEX TO FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited the accompanying consolidated balance sheets of Molina Healthcare, Inc. (the Company) as of December 31, 2010 and 2009, and the related consolidated statements of income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2010. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Molina Healthcare, Inc. at December 31, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Molina Healthcare, Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 8, 2011 expressed an unqualified opinion thereon.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program.

Our Health Plans segment comprises health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. These health plans served approximately 1.6 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals as of December 31, 2010. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Effective January 1, 2010, we terminated operations at our small Medicare health plan in Nevada.

Our Molina Medicaid Solutions, which we acquired during 2010, segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

Consolidation and Presentation

The consolidated financial statements include the accounts of Molina Healthcare, Inc. and all majority owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation. Financial information related to subsidiaries acquired during any year is included only for the period subsequent to their acquisition. Our operating results for the year ended December 31, 2010, include the results of the following businesses acquired during 2010:

- *Molina Medicaid Solutions.* On May 1, 2010, we acquired a health information management business which now operates under the name, *Molina Medicaid Solutions*SM. See Note 4, "Business Combinations," for more information relating to this acquisition.
- *Wisconsin Health Plan.* On September 1, 2010, we acquired Abri Health Plan, a Medicaid managed care organization based in Milwaukee, Wisconsin. See Note 4, "Business Combinations," for more information relating to this acquisition.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Principal areas requiring the use of estimates include:

- The determination of revenue to be recognized by our Health Plans segment under certain contracts that place revenue at risk dependent upon the achievement of certain quality or administrative measurements, or the expenditure of certain percentages of revenue on defined expenses, or requirements that we return a certain portion of our profits to state governments;
- The determination of medical claims and benefits payable of our Health Plans segment;
- The determination of allowances for uncollectible accounts;
- The valuation of certain investments;
- Settlements under risk or savings sharing programs;

- The assessment of deferred contract costs, deferred revenue, long-lived and intangible assets, and goodwill for impairment;
- The determination of professional and general liability claims, and reserves for potential absorption of claims unpaid by insolvent providers;
- The determination of reserves for the outcome of litigation;
- The determination of valuation allowances for deferred tax assets; and
- The determination of unrecognized tax benefits.

Reclassifications

Effective January 1, 2010, we have recorded the Michigan modified gross receipts tax as a premium tax and not as an income tax. For the years ended December 31, 2009, and 2008, amounts for premium tax expense and income tax expense have been reclassified to conform to this presentation. See Note 2, "Significant Accounting Policies."

In prior periods, general and administrative expenses have included premium tax expenses. Beginning in 2010, we have reported premium tax expenses on a separate line in the accompanying consolidated statements of income. Prior periods have been reclassified to conform to this presentation.

We have reclassified certain other prior year balance sheet amounts to conform to the 2010 presentation.

2. Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that are both readily convertible into known amounts of cash and have a maturity of three months or less on the date of purchase.

Investments

Our investments are principally held in debt securities, which are grouped into two separate categories for accounting and reporting purposes: available-for-sale securities, and held-to-maturity securities. Available-for-sale securities are recorded at fair value and unrealized gains and losses, if any, are recorded in stockholders' equity as other comprehensive income, net of applicable income taxes. Held-to-maturity securities are recorded at amortized cost, which approximates fair value, and unrealized holding gains or losses are not generally recognized. Realized gains and losses and unrealized losses judged to be other than temporary with respect to available-for-sale and held-to-maturity securities are included in the determination of net income.

The cost of securities sold is determined using the specific-identification method, on an amortized cost basis. Fair values of securities are generally based on quoted prices in active markets.

Our investment policy requires that all of our investments have final maturities of five years or less (excluding auction rate and variable rate securities where interest rates may be periodically reset), and that the average maturity be two years or less. Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. Declines in interest rates over time will reduce our investment income.

In general, our available-for-sale securities are classified as current assets without regard to the securities' contractual maturity dates because they may be readily liquidated. Our auction rate securities are classified as non-current assets. For comprehensive discussions of the fair value and classification of our current and non-current investments, including auction rate securities, see Note 5, "Fair Value Measurements," and Note 6, "Investments" and Note 10, "Restricted Investments."

Receivables

Receivables consist primarily of amounts due from the various states in which we operate, and are subject to potential retroactive adjustment. Because such receivables are readily determinable and our creditors are primarily state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. See Note 7, "Receivables." Additionally, we cede 100% of the financial responsibility for Medicare members covered by our Wisconsin health plan to third a party health reinsurer. In connection with the arrangement, as of December 31, 2010, we have recorded a receivable from the third party reinsurer of $5.0 million along with a corresponding current liability of $5.0 million.

Property and Equipment

Property and equipment are stated at historical cost. Replacements and major improvements are capitalized, and repairs and maintenance are charged to expense as incurred. Furniture and equipment are generally depreciated using the straight-line method over estimated useful lives ranging from three to seven years. Software developed for internal use is capitalized. Software is generally amortized over its estimated useful life of three years. Leasehold improvements are amortized over the term of the lease, or over their useful lives from five to 10 years, whichever is shorter. Buildings are depreciated over their estimated useful lives of 31.5 years. See Note 8, "Property and Equipment."

As discussed below, the costs associated with certain of our Molina Medicaid Solutions segment equipment and software, which may be ultimately transferred to our clients under fixed-price contracts, are capitalized and recorded as deferred contract costs. Such costs are amortized on a straight-line basis over the shorter of the useful life or the contract period.

Deferral of Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of three elements of service. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. The second element, following completion of the DDI element, is the operation of the MMIS under a business process outsourcing, or BPO, arrangement. While providing BPO services, we also provide the state with the third contracted element — training and IT support and hosting services (training and support).

Because they include these three elements of service, our Molina Medicaid Solution segment contracts are multiple-element arrangements. We have no vendor specific objective evidence, or VSOE, of fair value for any of the individual elements in these contracts, and at no point in the contract will we have VSOE for the undelivered elements in the contract. We lack VSOE of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of products and services. While all contracts support the system of record for state MMIS, the actual services and products we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

The absence of VSOE within the context of a multiple element arrangement requires us to delay recognition of any revenue for an MMIS contract until completion of the DDI phase of the contract. As a general principle, revenue recognition will therefore commence at the completion of the DDI phase, and all revenue will be recognized over the period that BPO services and training and IT support services are provided. Consistent with the deferral of revenue, recognition of all direct costs (such as direct labor, hardware, and software) associated with the DDI phase

of our contracts is deferred until the commencement of revenue recognition. Deferred costs are recognized on a straight-line basis over the period of revenue recognition.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any revenue at risk (whether DDI, BPO services or training and IT support services) until the contingency had been removed. In these circumstances we would also defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with the contract (whether DDI, BPO services or training and IT support services) on which revenue recognition is being deferred. Such deferred contract costs are recognized on a straight-line basis over the period of revenue recognition.

We began to recognize revenue (and related deferred costs) associated with our Maine contract in September 2010. In Idaho, we expect to begin recognition of deferred contact costs during 2011, in a manner consistent with our anticipated recognition of revenue. Unamortized deferred contract costs relating to the Molina Medicaid Solutions segment at December 31, 2010 were $28.4 million.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Goodwill and Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of net assets acquired. Identifiable intangible assets (consisting principally of purchased contract rights and provider contracts) are amortized on a straight-line basis over the expected period to be benefited (generally between one and 15 years). See Note 9, “Goodwill and Intangible Assets.”

Goodwill and indefinite-lived assets are not amortized, but are subject to impairment tests on an annual basis or more frequently if indicators of impairment exist. We use a discounted cash flow methodology to assess the fair values of our reporting units. If the carrying values of our reporting units exceed the fair values, we perform a hypothetical purchase price allocation. Impairment is measured by comparing the goodwill and indefinite-lived asset balance derived from the hypothetical purchase price allocation to the carrying value of the goodwill and indefinite-lived asset balance. Based on the results of our impairment testing, no adjustments were required for the years ended December 31, 2010, 2009 and 2008.

Identifiable intangible assets associated with Molina Medicaid Solutions are classified as either contract backlog or customer relationships.

The contract backlog intangible asset comprises all contractual cash flows anticipated to be received during the remaining contracted period for each specific contract relating to work that was performed prior to the acquisition. The contract backlog intangible has been developed on a contract-by-contract basis. The amortization of that portion of the contract backlog intangible associated with contracts for which revenue recognition has not yet commenced is deferred until revenue recognition has begun. Because each acquired contract constitutes a single revenue stream, amortization of the contract backlog intangible is recorded to contra-service revenue so that amortization is matched to any revenues associated with contract performance that occurred prior to the acquisition date. The contract backlog intangible asset is amortized on a straight-line basis for each specific contract over periods generally ranging from one to six years.

The customer relationship intangible asset comprises all contractual cash flows that are anticipated to be received during the option periods of each specific contract as well as anticipated renewals of those contracts. The customer relationship intangible is amortized on a straight-line basis for each specific contract over periods generally ranging from four to nine years.

The determination of the value of identifiable intangible assets requires us to make estimates and assumptions about estimated asset lives, future business trends, and growth. In addition to annual impairment testing, we continually evaluate whether events and circumstances have occurred that indicate the balance of identifiable intangible assets may not be recoverable. In evaluating impairment, we compare the estimated fair value of the intangible asset to its underlying book value. Such evaluation is significantly impacted by estimates and assumptions of future revenues, costs and expenses, and other factors. If an event occurs that would cause us to revise our estimates and assumptions used in analyzing the value of our identifiable intangible assets, such revision could result in a non-cash impairment charge that could have a material impact on our financial results.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different captions in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization in "Depreciation and Amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of service revenue; and
- Depreciation is recorded as cost of service revenue.

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue, and reconciles that amount to the consolidated statements of cash flows.

	Year Ended December 31,		
	2010	2009	2008
		(In thousands)	
Depreciation	$ 27,230	$25,172	$ 20,718
Amortization of intangible assets	18,474	12,938	12,970
Depreciation and amortization reported in our consolidated statements of income	45,704	38,110	33,688
Amortization recorded as reduction of service revenue	8,316	—	—
Depreciation recorded as cost of service revenue	6,745	—	—
Depreciation and amortization reported in our consolidated statements of cash flows	$60,765	$ 38,110	$ 33,688

Long-Lived Asset Impairment

Situations may arise where the carrying value of a long-lived asset may exceed the undiscounted expected cash flows associated with that asset. In such circumstances, the asset is deemed to be impaired. We review material long-lived assets for impairment when events or changes in business conditions suggest potential impairment. For example, our health plan subsidiaries have generally been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that

these contracts will continue to be renewed. Impaired assets are written down to fair value. We have determined that no long-lived assets were impaired in the years ended December 31, 2010, 2009, and 2008.

Restricted Investments

Restricted investments, which consist of certificates of deposit and treasury securities, are designated as held-to-maturity and are carried at amortized cost, which approximates market value. The use of these funds is limited to specific purposes as required by each state, or as protection against the insolvency of capitated providers. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. See Note 10, "Restricted Investments."

Receivable/Liability for Ceded Life and Annuity Contracts

We report a 100% ceded reinsurance arrangement for life insurance policies written and held by our wholly owned insurance subsidiary, Molina Healthcare Insurance Company, by recording a non-current receivable from the reinsurer with a corresponding non-current liability for ceded life and annuity contracts.

Other Assets

Significant items included in other assets include deferred financing costs associated with our convertible senior notes and with our credit facility, certain investments held in connection with our employee deferred compensation program, and an investment in a vision services provider (see Note 17, "Related Party Transactions"). The deferred financing costs are being amortized on a straight-line basis over the seven-year term of the convertible senior notes and the five year term of the credit facility.

Delegated Provider Insolvency

Circumstances may arise where providers to whom we have delegated risk, due to insolvency or other circumstances, are unable to pay claims they have incurred with third parties in connection with referral services (including hospital inpatient services) provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability.

In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These reserves are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. Additionally, we have recorded liabilities for estimated losses arising from provider instability or insolvency in excess of provider funds on deposit with us. Such liabilities were not material at December 31, 2010, or December 31, 2009.

Premium Revenue

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. For the year ended December 31, 2010 we received approximately 94% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our contracts with state Medicaid agencies, Medicare and other managed care organizations for which we operate as a subcontractor. These

premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

The following table summarizes premium revenue by health plan for the periods indicated:

	Year Ended December 31,		
	2010	2009	2008
		(In thousands)	
California	$ 506,871	$ 481,717	$ 417,027
Florida(1)	170,683	102,232	—
Michigan	630,134	557,421	509,782
Missouri	210,852	230,222	225,280
New Mexico	366,784	404,026	348,576
Ohio	860,324	803,521	602,826
Texas	188,716	134,860	110,178
Utah	258,076	207,297	155,991
Washington	758,849	726,137	709,943
Wisconsin(2)	30,033	—	—
Other	8,587	12,774	11,637
	$3,989,909	$3,660,207	$ 3,091,240

(1) The Florida health plan began enrolling members in December 2008.

(2) We acquired the Wisconsin health plan on September 1, 2010.

For the year ended December 31, 2010, we received approximately 6% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

Certain components of premium revenue are subject to accounting estimates, and therefore are subject to retroactive revision. The most significant of these estimates involve:

- The recognition of premium revenue at our Florida, New Mexico, and Texas health plans, where we are subject to a number of requirements, that, among other things, require us to expend a minimum amount of revenue on certain defined medical costs, expend a maximum amount of revenue on certain defined administrative costs, and share our profits (as defined) above a certain percentage of revenue with the state;
- The recognition of premium revenue due to the achievement of certain performance measures (generally linked to quality of care and administrative efficiency) included in our contracts with the states of New Mexico, Ohio, and Texas;
- The recognition of premium revenue due to the achievement of certain medical cost savings (as measured against state fee-for-service costs) under our contract with the state of Utah; and
- The amount of Medicare premium revenue that we recognize, which may be retroactively adjusted to reflect the acuity of care required by our members.

Medical Care Costs

Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service:* Physician providers paid on a fee-for-service basis are paid according to a fee schedule set by the state or by our contracts with these providers. Most hospitals are paid on a fee-for-service basis in a

variety of ways, including per diem amounts, diagnostic-related groups or DRGs, percent of billed charges, and case rates. As discussed below, we also pay a small portion of hospitals on a capitated basis. We also have stop-loss agreements with the hospitals with which we contract. Under all fee-for-service arrangements, we retain the financial responsibility for medical care provided. Expenses related to fee-for-service contracts are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit managers are included in fee-for-service costs.

- *Capitation:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation contracts, we typically pay a fixed per-member per-month, or PMPM, payment to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated contracts, we remain liable for the provision of certain health care services. Certain of our capitated contracts also contain incentive programs based on service delivery, quality of care, utilization management, and other criteria. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.
- *Pharmacy:* Pharmacy costs include all drug, injectibles, and immunization costs paid through our pharmacy benefit managers. As noted above, drugs and injectibles not paid through our pharmacy benefit managers are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.
- *Other:* Other medical care costs include medically related administrative costs, certain provider incentive costs, reinsurance cost, and other health care expense. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, disease management, 24-hour on-call nurses, and a portion of our information technology costs. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2010, 2009, and 2008, medically related administrative costs were approximately $85.5 million, $74.6 million, and $75.9 million, respectively.

The following table provides the details of our consolidated medical care costs for the periods indicated (dollars in thousands, except PMPM amounts):

	Year Ended December 31,								
	2010			2009			2008		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for- service	$2,360,858	$128.73	70.0%	$2,077,489	$126.14	65.4%	$1,709,806	$116.69	65.2%
Capitation	555,487	30.29	16.5	558,538	33.91	17.6	450,440	30.74	17.2
Pharmacy	325,935	17.77	9.7	414,785	25.18	13.1	356,184	24.31	13.6
Other	128,577	7.01	3.8	125,424	7.62	3.9	104,882	7.16	4.0
Total	$3,370,857	$183.80	100.0%	$3,176,236	$192.85	100.0%	$2,621,312	$178.90	100.0%

Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been

paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP claims reserve, as reported in our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates. See Note 11, "Medical Claims and Benefits Payable."

We report reinsurance premiums as medical care costs, while related reinsurance recoveries are reported as deductions from medical care costs. We limit our risk of catastrophic losses by maintaining high deductible reinsurance coverage. We do not consider this coverage to be material because the cost is not significant and the likelihood that coverage will apply is low.

Taxes Based on Premiums

Our California, Florida, Michigan, New Mexico, Ohio, Texas and Washington health plans are assessed a tax based on premium revenue collected. We report these taxes on a gross basis, included in premium tax expense.

Premium Deficiency Reserves on Loss Contracts

We assess the profitability of our contracts for providing medical care services to our members and identify those contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared to anticipated medical care costs, including the cost of processing claims. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. No such accrual was recorded as of December 31, 2010, or 2009.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers. For further discussion and disclosure, see Note 13, "Income Taxes."

Through December 31, 2009, income tax expense included both the Michigan business income tax, or BIT, and Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, we have recorded the MGRT as a premium tax and not as an income tax, and prior years have been reclassified to conform to this presentation. We will continue to record the BIT as an income tax. The MGRT amounted to $6.2 million, $5.5 million and $5.1 million for the years ended December 31, 2010, 2009, and 2008 respectively.

Generally, the MGRT is a 0.976% tax (statutory rate of 0.8% plus 21.99% surtax) on modified gross receipts, which for most taxpayers is defined as receipts less purchases from other firms. Managed care organizations, however, are not currently allowed to deduct payments to providers in determining modified gross receipts. As a result, the MGRT is 0.976% of our Michigan plan's receipts and does not vary with levels of pretax income or margins. We believe that presentation of the MGRT as a premium tax produces financial statements that are more useful to the reader.

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Funds Prime Series — Institutional Class, and the PFM Funds Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. As of December 31, 2010, and 2009, our investments with PFM totaled $327 million and $296 million, respectively. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our health plan subsidiaries operate.

Risks and Uncertainties

Our profitability depends in large part on our ability to accurately predict and effectively manage medical care costs. We continually review our medical costs in light of our underlying claims experience and revised actuarial data. However, several factors could adversely affect medical care costs. These factors, which include changes in health care practices, inflation, new technologies, major epidemics, natural disasters, and malpractice litigation, are beyond our control and may have an adverse effect on our ability to accurately predict and effectively control medical care costs. Costs in excess of those anticipated could have a material adverse effect on our financial condition, results of operations, or cash flows.

At December 31, 2010, we operated health plans in 10 states, primarily as a direct contractor with the states, and in Los Angeles County, California, as a subcontractor to another health plan holding a direct contract with the state. We are therefore dependent upon a small number of contracts to support our revenue. The loss of any one of those contracts could have a material adverse effect on our financial position, results of operations, or cash flows. Our ability to arrange for the provision of medical services to our members is dependent upon our ability to develop and maintain adequate provider networks. Our inability to develop or maintain such networks might, in certain circumstances, have a material adverse effect on our financial position, results of operations, or cash flows.

Recent Accounting Pronouncements

Revenue Recognition. In late 2009, the Financial Accounting Standards Board, or FASB, issued the following new accounting guidance which is first applicable for our January 1, 2011 reporting:

- *ASU No. 2009-14, Software (ASC Topic 985) — Certain Revenue Arrangements That Include Software Elements*, a consensus of the FASB Emerging Issues Task Force. This guidance modifies the scope of ASC Subtopic 985-605 — *Software-Revenue Recognition* to exclude from its requirements (a) non-software components of tangible products and (b) software components of tangible products that are sold, licensed or leased with tangible products when the software components and non-software components of the tangible product function together to deliver the tangible product's essential functionality. We do not expect the update to impact our consolidated financial position, results of operations or cash flows.

- *ASU No. 2009-13, Revenue Recognition (ASC Topic 605) — Multiple-Deliverable Revenue Arrangements*, a consensus of the FASB Emerging Issues Task Force. This guidance modifies previous requirements by allowing the use of the "best estimate of selling price" in the absence of vendor-specific objective evidence ("VSOE") or verifiable objective evidence ("VOE") (now referred to as "TPE" or third-party evidence) for determining the selling price of a deliverable. A vendor is now required to use its best estimate of the selling price when more objective evidence of the selling price cannot be determined. In addition, the residual method of allocating arrangement consideration is no longer permitted. As of December 31, 2010, we do not expect the update to impact our consolidated financial position, results of operations or cash flows; however, the future impact of the update will be dependent on future contracts and modifications to existing contracts.

Fair Value Measurements. In January 2010, the FASB issued the following guidance which expanded the required disclosures about fair value measurements. Effective for interim and annual reporting beginning after December 15, 2009, with one new disclosure effective beginning after December 15, 2010, we adopted this guidance in full during the interim period ended March 31, 2010.

- *ASU No. 2010-6, Fair Value Measurements and Disclosures (Topic 820) — Improving Disclosures about Fair Value Measurements*. This guidance requires (a) separate disclosure of the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements along with the reasons for such transfers, (b) information about purchases, sales, issuances and settlements to be presented separately in the reconciliation for Level 3 fair value measurements, (c) fair value measurement disclosures for each class of assets and liabilities and (d) disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements for fair value measurements that fall in either Level 2 or Level 3. The adoption of this guidance did not impact our consolidated financial position, results of operations or cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the AICPA, and the SEC did not, or are not believed by management to have a material impact on our present or future consolidated financial statements.

3. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	Year Ended December 31,		
	2010	2009	2008
		(In thousands)	
Shares outstanding at the beginning of the year	25,607	26,725	28,444
Weighted-average number of shares:			
Issued under equity offering	1,671	—	—
Purchased	—	(988)	(871)
Issued under employee stock plans	171	106	103
Denominator for basic earnings per share	27,449	25,843	27,676
Dilutive effect of employee stock options and stock grants(1)	305	141	96
Denominator for diluted earnings per share(2)	27,754	25,984	27,772

(1) Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the years ended December 31, 2010, 2009 and 2008, there were approximately 478,000, 620,000, and 532,000 anti-dilutive weighted options, respectively. Restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the

periods presented. For the years ended December 31, 2010, 2009 and 2008, anti-dilutive weighted restricted shares were insignificant.

(2) Potentially dilutive shares issuable pursuant to our 2007 offering of convertible senior notes were not included in the computation of diluted net income per share because to do so would have been anti-dilutive for the years ended December 31, 2010, 2009 and 2008.

4. Business Combinations

Wisconsin Health Plan

On September 1, 2010, Molina acquired 100% of the voting equity interests in Avatar Partners, LLC, which is the sole shareholder of Abri Health Plan, Inc. ("Abri"), a Medicaid managed care organization based in Milwaukee, Wisconsin. This acquisition is consistent with our stated strategy to enter markets with competitive provider communities, supportive regulatory environments, significant size and, where practicable, mandated Medicaid managed care enrollment.

We expect the final purchase price for the Abri acquisition to be approximately $15.5 million, subject to adjustments. As of December 31, 2010, we had paid $8.5 million of the total purchase price. We expect to finalize the amount due to the sellers based on the final membership reconciliation in the first quarter of 2011. Additionally, $2.8 million of the purchase price represents contingent consideration based on the plan's minimum surplus requirements as of February 1, 2011, which will also be computed in the first quarter of 2011. Any adjustments to the estimated amount of contingent consideration will be recorded to operations in the first quarter of 2011. Following the final membership reconciliation, 10% of the final purchase price for the membership acquired will be deposited to an escrow account payable at the later of 12 months or the resolution of all unresolved claims. We incurred approximately $0.5 million in acquisition costs relating to this acquisition in 2010, recorded to general and administrative expenses.

In connection with this acquisition, we recorded $5.5 million in goodwill, which is not deductible for tax purposes, and $3.4 million in various definite-lived identifiable intangible assets, with a weighted average useful life of 6.4 years. Accumulated amortization totaled approximately $0.4 million as of December 31, 2010, which reflects amortization recorded since the acquisition date. We expect to record amortization relating to this acquisition in future years as follows— 2011: $0.9 million, 2012: $0.4 million, 2013: $0.3 million, 2014: $0.3 million, and 2015: $0.2 million.

Molina Medicaid Solutions

On May 1, 2010, we acquired a health information management business that was previously an operating unit of Unisys Corporation. This business now operates under the name *Molina Medicaid Solutions*SM, or Molina Medicaid Solutions. Molina Medicaid Solutions provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems (MMIS). MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program. As a result of this acquisition, we are diversifying our core health plan business, and we believe that the use of a common claims processing platform across our health plans and our new MMIS business will enable us to achieve synergies in the operations of both.

We paid $131.3 million to acquire Molina Medicaid Solutions. The acquisition was funded with available cash of $26 million and $105 million drawn under our credit facility. In connection with the closing, both the fourth amendment and the fifth amendment to our credit facility became effective (see Note 12, "Long-Term Debt"). We incurred approximately $2.5 million in acquisition costs relating to this acquisition in 2010, recorded to general and administrative expenses. Additionally, effective on the acquisition date, we entered into a transition services

agreement with Unisys Corporation. Under this agreement, Unisys is providing Molina Medicaid Solutions various systems and infrastructure support services until April 30, 2011. During 2010, we recorded approximately $4.7 million to cost of service revenue relating to this agreement.

Recording of assets acquired and liabilities assumed: The transaction has been accounted for using the acquisition method of accounting which requires, among other things, that most assets acquired and liabilities assumed be recognized at their fair values as of the acquisition date.

The following table summarizes the acquisition-date fair values of the assets acquired and liabilities assumed:

	(In thousands)
Assets	
Accounts receivable	$ 17,128
Other current assets	3,901
Equipment and other long-term assets	783
Identifiable intangible assets	48,150
Goodwill	72,367
	142,329
Less: liabilities	
Accounts payable and accrued liabilities	11,079
Net assets acquired	$ 131,250

A single estimate of fair value results from a complex series of judgments about future events and uncertainties and relies heavily on estimates and assumptions. Results that differ from the estimates and judgments used to determine the estimated fair value assigned to each class of assets acquired and liabilities assumed, as well as asset lives, can materially impact our results of operations.

Accounts receivable: Accounts receivable are stated at fair value, based on the gross contractual amounts receivable. We have collected substantially all of the accounts receivable as of the acquisition date.

Identifiable intangible assets: The following table is a summary of the fair value estimates of the identifiable intangible assets and their weighted-average useful lives:

	Estimated Fair Value (In thousands)	Weighted Average Useful Life (Years)
Customer relationships	$ 24,550	5.3
Contract backlog	23,600	2.4
	$ 48,150	

Accumulated amortization totaled approximately $11.7 million as of December 31, 2010, which reflects total amortization recorded since the acquisition date. For identifiable intangible assets recorded as of December 31, 2010, we expect to record amortization in future years as follows — 2011: $13.2 million, 2012: $7.6 million, 2013: $7.6 million, 2014: $5.6 million, and 2015: $0.8 million.

Goodwill: Goodwill in the amount of $72.4 million was recognized for this acquisition, all of which is expected to be deductible for tax purposes. The total goodwill amount was calculated as the excess of the consideration transferred over the net assets recognized and represents the future economic benefits arising from

other assets acquired that could not be individually identified and separately recognized. The goodwill recorded as part of the acquisition of Molina Medicaid Solutions includes:

- Expected synergies and other benefits that we believe will result from combining the operations of Molina Medicaid Solutions with the operations of Molina;
- Any intangible assets that do not qualify for separate recognition such as the assembled workforce; and
- The value of the going-concern element of Molina Medicaid Solutions' existing businesses (the higher rate of return on the assembled collection of net assets versus acquiring all of the net assets separately).

Accounts payable and accrued liabilities: Accounts payable and accrued liabilities include $1.3 million payable to the seller of Molina Medicaid Solutions, which represented a working capital adjustment provided in the purchase agreement. This working capital adjustment was paid to the seller in August 2010. The working capital adjustment provided that the net working capital, or current assets minus current liabilities, on Molina Medicaid Solutions' opening balance sheet would equal $10 million. To the extent the final net working capital conveyed by the seller exceeded $10 million, the amount would be payable back to the seller; conversely, to the extent that net working capital conveyed by the seller was less than $10 million, the shortage would be a receivable from the seller. Thus, the $1.3 million amount described above represented the amount payable to the seller for net working capital in excess of $10 million on the opening balance sheet.

Pro-forma impact of the acquisition: The unaudited pro-forma results presented below include the effects of the acquisition as if it had been consummated as of January 1, 2010, 2009 and 2008. The pro-forma results include the amortization associated with the acquired intangible assets and interest expense associated with debt used to fund the acquisition. To better reflect the combined operating results, material non-recurring charges directly attributable to the transaction have been excluded. In addition, the pro-forma results do not include any anticipated synergies or other expected benefits of the acquisition. Accordingly, the unaudited pro forma financial information below is not necessarily indicative of either future results of operations or results that might have been achieved had the acquisition been consummated as of January 1, 2010, January 1, 2009, or January 1, 2008.

	Year Ended December 31,		
	2010	2009	2008
Revenue	$4,124,058	$3,767,888	$3,202,581
Net income	$ 57,800	$ 26,192	$ 54,228
Diluted earnings per share	$ 2.08	$ 1.01	$ 1.95

Florida Health Plan

On December 31, 2009, we acquired 100% of the voting equity interests in Florida NetPASS, LLC, or NetPASS. The final purchase price for this acquisition totaled $29.6 million. As of the final membership reconciliation in the second quarter of 2010, we transitioned approximately 49,600 members from NetPASS to our Florida health plan, and have recorded $18.0 million in goodwill, and $11.6 million in intangible assets relating to these members.

On April 15, 2010, the former owners of NetPASS filed suit in federal court stating that we had not paid $12 million of the purchase price that was owed and based on a formula in the purchase agreement. Because the purchase agreement contained an arbitration clause, the Florida health plan filed a demand for arbitration seeking a declaration that the full purchase price had been paid and the purchase agreement had been fulfilled. The former owners of NetPASS filed a counter-demand for an additional $10 million and seeking a declaration regarding the anti-competition clause in the purchase agreement. The parties have exchanged documents and will start to take depositions. Arbitration is scheduled to commence June 10, 2011. We continue to believe that their claims do not have any merit and that we will prevail in this action.

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For a comprehensive discussion of fair value measurements with regard to our current and non-current investments, see below.

As described in Note 12, "Long-Term Debt," the carrying amount of the convertible senior notes was $164.0 million, and $158.9 million as of December 31, 2010, and 2009, respectively. Based on quoted market prices, the fair value of our convertible senior notes issued in October 2007 was approximately $188.4 million, and $160.8 million as of December 31, 2010, and 2009, respectively.

To prioritize the inputs we use in measuring fair value, we apply a three-tier fair value hierarchy. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of December 31, 2010, we held certain assets that are required to be measured at fair value on a recurring basis. These included investments as follows:

Balance Sheet Classification	
Current assets:	
Investments	Investment-grade debt securities; designated as available-for-sale; reported at fair value based on market prices that are readily available (Level 1). See Note 6, "Investments," for further information regarding fair value.
Non-current assets:	
Investments	Auction rate securities; designated as available-for-sale; reported at fair value based on discounted cash flow analysis or other type of valuation model (Level 3).

As of December 31, 2010, $24.6 million par value (fair value of $20.4 million) of our investments consisted of auction rate securities, all of which were collateralized by student loan portfolios guaranteed by the U.S. government. We continued to earn interest on substantially all of these auction rate securities as of December 31, 2010. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008. As such, quoted prices in active markets were not readily available during the majority of 2008, 2009, and continued to be unavailable as of December 31, 2010. To estimate the fair value of these securities, we used pricing models that included factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. The estimated values of these securities were also compared, when possible, to valuation data with respect to similar securities held by other parties. We concluded that these estimates, given the lack of market available pricing, provided a reasonable basis for determining fair value of the auction rate securities as of December 31, 2010. For our investments in auction rate securities, we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost.

As of December 31, 2010, all of our auction rate securities were designated as available-for-sale securities. As a result of the decrease in fair value of auction rate securities designated as available-for-sale, we recorded pretax unrealized losses of $0.2 million to accumulated other comprehensive loss for the year ended December 31, 2010. We have deemed these unrealized losses to be temporary and attribute the decline in value to liquidity issues, as a result of the failed auction market, rather than to credit issues. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to

accumulated other comprehensive loss. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

Until July 2, 2010, we held certain auction rate securities (designated as trading securities) with an investment securities firm. In the fourth quarter of 2008, we entered into a rights agreement with this firm that (1) allowed us to exercise rights (the "Rights") to sell the eligible auction rate securities at par value to this firm between June 30, 2010 and July 2, 2012, and (2) gave the investment securities firm the right to purchase the auction rate securities from us any time after the agreement date as long as we received the par value. On June 30, 2010, and July 1, 2010, all of the eligible auction rate securities remaining at that time were settled at par value.

During 2010, the aggregate auction rate securities (designated as trading securities) settled amounted to $40.9 par value (fair value $36.7 million). For the years ended December 31, 2010, 2009, and 2008, we recorded pretax gains (losses) of $4.2 million, $3.4 million, and ($0.4) million, respectively, on the auction rate securities underlying the Rights.

We accounted for the Rights as a freestanding financial instrument and, until July 2, 2010, recorded the value of the Rights under the fair value option. When the remaining eligible auction rate securities were sold at par value on July 1, 2010, the value of the Rights was zero. For the years ended December 31, 2010, 2009, and 2008, we recorded pretax (losses) gains of ($3.8) million, ($3.1) million and $6.9 million, respectively, on the Rights.

Our assets measured at fair value on a recurring basis at December 31, 2010, were as follows:

	Fair Value Measurements at Reporting Date Using			
	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$177,929	$177,929	$ —	$ —
Government-sponsored enterprise securities	59,713	59,713	—	—
Municipal securities	30,563	30,563	—	—
U.S. treasury notes	23,918	23,918	—	—
Certificates of deposit	3,252	3,252	—	—
Auction rate securities (available-for-sale)	20,449	—	—	20,449
	$ 315,824	$295,375	$ —	$20,449

The following table presents our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3)
	(In thousands)
Balance at December 31, 2009	$ 63,494
Total gains (realized or unrealized):	
Included in earnings:	
Gain on auction rate securities designated as trading securities	4,170
Loss on change in fair value of Rights	(3,807)
Included in other comprehensive income	(208)
Settlements	(43,200)
Balance at December 31, 2010	$ 20,449
The amount of total losses for the period included in other comprehensive income attributable to the change in unrealized gains relating to assets still held at December 31, 2010	$ (208)

As described in Note 4, "Business Combinations," we have recorded a $2.8 million liability for contingent consideration related to the acquisition of our Wisconsin health plan. We have estimated the fair value of this liability based on our expectations regarding the Wisconsin health plan's statutory net worth as of January 31, 2011 as well as the Wisconsin health plan's minimum required statutory net worth as of that date. The liability for contingent consideration related to this acquisition was measured at fair value on a recurring basis using significant unobservable inputs (Level 3). The following table presents a roll forward of this liability for 2010:

	(Level 3) (In thousands)
Balance at December 31, 2009	$ —
Addition through acquisition — 2010	2,800
Balance at December 31, 2010	$ 2,800

6. Investments

The following tables summarize our investments as of the dates indicated:

	December 31, 2010			
	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Corporate debt securities	$179,124	$ 193	$ 1,388	$177,929
Government-sponsored enterprise securities (GSEs)	59,790	293	370	59,713
Municipal securities (including non-current auction rate securities)	55,247	78	4,313	51,012
U.S. treasury notes	23,864	114	60	23,918
Certificates of deposit	3,252	—	—	3,252
	$321,277	$678	$6,131	$ 315,824

	December 31, 2009			
	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Corporate debt securities	$ 32,543	$ 206	$ 185	$ 32,564
GSEs	89,451	504	281	89,674
Municipal securities (including non-current auction rate securities)	82,009	3,120	4,154	80,975
U.S. treasury notes	28,052	92	84	28,060
Certificates of deposit	3,258	—	—	3,258
	$235,313	$3,922	$ 4,704	$234,531

The contractual maturities of our investments as of December 31, 2010 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$168,948	$167,856
Due one year through five years	127,549	127,144
Due after five years through ten years	930	990
Due after ten years	23,850	19,834
	$ 321,277	$ 315,824

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales of available-for-sale securities were $124.5 million, $60.3 million, and $55.3 million for the years ended December 31, 2010, 2009 and 2008, respectively. Net realized investment gains for the years ended December 31, 2010, 2009 and 2008 were $110,000, $267,000, and $342,000 respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our municipal securities, we have determined that unrealized gains and losses at December 31, 2010 and 2009 are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we do not intend to sell these securities prior to maturity, we are unlikely to experience gains or losses. In the unlikely event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

Approximately 40% of our investment in municipal securities consists of auction rate securities. As described in Note 5, “Fair Value Measurements,” the unrealized losses on these investments were caused primarily by the illiquidity in the auction markets. Because the decline in market value is not due to the credit quality of the issuers, and because we do not intend to sell, nor is it more likely than not that we will be required to sell these investments before recovery of their cost, we do not consider the auction rate securities that are designated as available-for-sale to be other-than-temporarily impaired at December 31, 2010.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months and those that have been in a loss position for 12 months or more as of December 31, 2010.

	In a Continuous Loss Position for Less than 12 Months as of December 31, 2010		In a Continuous Loss Position for 12 Months or More as of December 31, 2010		Total as of December 31, 2010	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
			(In thousands)			
Corporate debt securities	$ 103,225	$ 1,060	$ 10,490	$ 328	$ 113,715	$ 1,388
GSEs	13,014	71	7,539	299	20,553	370
Municipal securities	18,884	117	25,271	4,196	44,155	4,313
U.S. treasury notes	5,480	40	6,806	20	12,286	60
	$ 140,603	$ 1,288	$ 50,106	$ 4,843	$ 190,709	$ 6,131

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2009. At December 31, 2009, we previously reported only those available-for-sale investments in an unrealized loss position for at least two consecutive months. To conform to the current year presentation, we have

included all available-for-sale investments in an unrealized loss position at December 31, 2009. This presentation change increased the total amount of unrealized losses reported in the following table by $113,000 at December 31, 2009. The accompanying increase to the estimated fair value of the underlying investments amounted to $42.9 million at December 31, 2009.

	In a Continuous Loss Position for Less than 12 Months as of December 31, 2009		In a Continuous Loss Position for 12 Months or More as of December 31, 2009		Total as of December 31, 2009	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
			(In thousands)			
Corporate debt securities	$ 13,513	149	$ 1,203	$ 36	$ 14,716	$ 185
GSEs	30,460	187	7,297	94	37,757	281
Municipal securities	12,460	78	24,031	3,902	36,491	3,980
U.S. treasury notes	21,824	84	—	—	21,824	84
	$ 78,257	$ 498	$ 32,531	$ 4,032	$ 110,788	$ 4,530

7. Receivables

Health Plans segment receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustment. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable were as follows:

	December 31,	
	2010	2009
	(In thousands)	
Health Plans Segment:		
California	$ 46,482	$ 34,289
Michigan	13,596	14,977
Missouri	22,841	19,670
New Mexico	18,310	11,919
Ohio	21,622	37,004
Utah	1,589	6,107
Washington	14,486	9,910
Wisconsin	5,437	—
Other	3,598	2,778
Total Health Plans	147,961	136,654
Molina Medicaid Solutions Segment	20,229	—
	$168,190	$136,654

8. Property and Equipment

A summary of property and equipment is as follows:

	December 31,	
	2010	2009
	(In thousands)	
Land	$ 3,524	$ 3,524
Building and improvements	49,735	41,476
Furniture and equipment	60,074	54,898
Capitalized computer software costs	90,003	66,526
	203,336	166,424
Less: accumulated depreciation and amortization on building and improvements, furniture and equipment	(54,341)	(50,911)
Less: accumulated amortization for capitalized computer software costs	(48,458)	(37,342)
	(102,799)	(88,253)
Property and equipment, net	$ 100,537	$ 78,171

Depreciation expense recognized for building and improvements, and furniture and equipment was $13.9 million, $11.0 million, and $9.0 million for the years ended December 31, 2010, 2009 and 2008, respectively. Amortization expense recognized for capitalized computer software costs was $20.1 million, $14.2 million, and $11.7 million for the years ended December 31, 2010, 2009, and 2008, respectively.

9. Goodwill and Intangible Assets

Other intangible assets are amortized over their useful lives ranging from one to 15 years. The weighted average amortization period for contract rights and licenses is approximately 11 years, for customer relationships is approximately 5 years, for backlog is approximately 2 years, and for provider networks is approximately 10 years. Based on the balances of our identifiable intangible assets as of December 31, 2010, we estimate that our intangible asset amortization will be $27.5 million in 2011, $19.0 million in 2012, $15.8 million in 2013, $12.8 million in 2014, and $7.0 million in 2015. The following table provides the details of identified intangible assets, by major class, for the periods indicated:

	Cost	Accumulated Amortization	Net Balance
		(In thousands)	
Intangible assets:			
Contract rights and licenses (Health Plans segment)	$ 120,920	$ 64,201	$ 56,719
Customer relationships (Molina Medicaid Solutions segment)	24,550	3,418	21,132
Backlog (Molina Medicaid Solutions segment)	23,600	8,316	15,284
Provider networks (Health Plans segment)	18,622	6,257	12,365
Balance at December 31, 2010	$187,692	$ 82,192	$105,500
Intangible assets:			
Contract rights and licenses	$ 119,101	$ 51,246	$ 67,855
Provider networks	17,146	4,155	12,991
Balance at December 31, 2009	$ 136,247	$ 55,401	$ 80,846

The changes in the carrying amount of goodwill and indefinite-lived intangible assets were as follows (in thousands):

Balance as of December 31, 2009	$ 133,408
Goodwill recorded for acquisition of Molina Medicaid Solutions on May 1, 2010	72,367
Goodwill recorded for acquisition of the Wisconsin health plan on September 1, 2010	5,474
Goodwill adjustment related to the 2009 acquisition of the Florida health plan	979
Balance at December 31, 2010	$212,228

10. Restricted Investments

Pursuant to the regulations governing our health plan subsidiaries, we maintain statutory deposits and deposits required by state Medicaid authorities. Additionally, we maintain restricted investments as protection against the insolvency of capitated providers. The following table presents the carrying value of restricted investments by health plan, and by our insurance company:

	December 31,	
	2010	2009
	(In thousands)	
California	$ 372	$ 368
Florida	4,508	2,052
Insurance Company	4,689	4,686
Michigan	1,000	1,000
Missouri	508	503
New Mexico	15,881	15,497
Ohio	9,066	9,036
Texas	3,501	1,515
Utah	1,279	578
Washington	151	151
Wisconsin	260	—
Other	885	888
	$ 42,100	$ 36,274

The contractual maturities of our held-to-maturity restricted investments as of December 31, 2010 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 40,757	$ 40,792
Due one year through five years	1,218	1,216
Due after five years through ten years	125	158
	$ 42,100	$ 42,166

11. Medical Claims and Benefits Payable

The following table presents the components of the change in our medical claims and benefits payable for the years ended December 31, 2010 and 2009. The negative amounts displayed for "*Components of medical care costs related to: Prior years*" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year Ended December 31,	
	2010	2009
	(Dollars in thousands, except per-member amounts)	
Balances at beginning of year	$ 315,316	$ 292,442
Balance of acquired subsidiary	3,228	—
Components of medical care costs related to:		
Current year	3,420,235	3,227,794
Prior years	(49,378)	(51,558)
Total medical care costs	3,370,857	3,176,236
Payments for medical care costs related to:		
Current year	3,085,388	2,920,015
Prior years	249,657	233,347
Total paid	3,335,045	3,153,362
Balances at end of year	$ 354,356	$ 315,316
Benefit from prior years as a percentage of:		
Balance at beginning of year	15.7%	17.6%
Premium revenue	1.2%	1.4%
Total medical care costs	1.5%	1.6%

For the year ended December 31, 2010, we recognized a benefit from prior period claims development in the amount of $49.4 million. This amount represents our estimate as of December 31, 2010 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2009 exceeded the amount that will ultimately be paid out in satisfaction of that liability. The overestimation of claims liability at December 31, 2009 was the result of the following factors:

- In New Mexico, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- In California, we underestimated the extent to which various network restructuring, provider contracting and medical management initiatives had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

For the year ended December 31, 2009, we recognized a benefit from prior period claims development in the amount of $51.6 million. This amount represented our estimate as of December 31, 2009 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2008 exceeded the amount that was ultimately be paid out in satisfaction of that liability. The overestimation of the claims liability at our Michigan, New Mexico, Ohio, and Washington health plans was principally the cause of the recognition of a benefit from prior period claims development. This was partially offset by the underestimation of our claims liability at December 31, 2008 at our California health plan.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or over-estimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. In 2010 and 2009 the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations as the amount of benefit recognized in each your was roughly consistent with that recognized in the previous year.

12. Long-Term Debt

Credit Facility

We are a party to an Amended and Restated Credit Agreement, dated as of March 9, 2005, as amended by the first amendment on October 5, 2005, the second amendment on November 6, 2006, the third amendment on May 25, 2008, the fourth amendment on April 29, 2010, and the fifth amendment on April 29, 2010, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility") for a revolving credit line of $150 million that matures in May 2012. The Credit Facility is intended to be used for general corporate purposes. As described below and in Note 4, "Business Combinations," we borrowed $105 million under the Credit Facility to acquire Molina Medicaid Solutions in the second quarter of 2010. During the third quarter of 2010, we repaid this amount using proceeds from our equity offering, described in Note 14, "Stockholders' Equity." As of December 31, 2010, and 2009, there was no outstanding principal balance under the Credit Facility. However, as of December 31, 2010, our lenders had issued two letters of credit in the aggregate principal amount of $10.3 million in connection with the contract of MMS with the states of Maine and Idaho.

To the extent that in the future we incur any obligations under the Credit Facility, such obligations will be secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At December 31, 2010, we were in compliance with all financial covenants in the Credit Facility.

The commitment fee on the total unused commitments of the lenders under the Credit Facility is 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans is 200 basis points at every level of the pricing grid. Thus, the applicable margins under the Credit Facility range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. The Credit Facility carves out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of the convertible senior notes, although the $187.0 million indebtedness is included in the calculation of our consolidated leverage ratio. The fixed charge coverage ratio set forth pursuant to the Credit Facility was 2.75x (on a pro forma basis) at December 31, 2009, and 3.00x thereafter.

The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.25 to 1.00 for the fourth quarter of 2009 (on a pro forma basis), and to 3.50 to 1.00 for the first and second quarters of 2010, and through August 14, 2010. Effective as of August 15, 2010, the consolidated leverage ratio under the Credit Facility reverted back to 2.75 to 1.00. In connection with the lenders' approval of the fifth amendment, we paid an amendment fee of 25 basis points on the amount of each consenting lender's commitment. We also paid an incremental commitment fee of 12.5 basis points based on each lender's unfunded commitment during the period from the effective date of the fifth amendment through August 15, 2010.

Convertible Senior Notes

In October 2007, we sold $200.0 million aggregate principal amount of 3.75% Convertible Senior Notes due 2014 (the "Notes"). The sale of the Notes resulted in net proceeds totaling $193.4 million. During 2009, we purchased and retired $13.0 million face amount of the Notes, so the remaining aggregate principal amount totaled $187.0 million as of December 31, 2010 (see further discussion below regarding the purchase program). The Notes rank equally in right of payment with our existing and future senior indebtedness.

The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 21.3067 shares of our common stock per one thousand dollar principal amount of the Notes. This represents an initial conversion price of approximately $46.93 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, the conversion rate will increase in certain circumstances. Prior to July 2014, holders may convert their Notes only under the following circumstances:

- During any fiscal quarter after our fiscal quarter ending December 31, 2007, if the closing sale price per share of our common stock, for each of at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, is greater than or equal to 120% of the conversion price per share of our common stock;
- During the five business day period immediately following any five consecutive trading day period in which the trading price per one thousand dollar principal amount of the Notes for each trading day of such period was less than 98% of the product of the closing price per share of our common stock on such day and the conversion rate in effect on such day; or
- Upon the occurrence of specified corporate transactions or other specified events.

On or after July 1, 2014, holders may convert their Notes at any time prior to the close of business on the scheduled trading day immediately preceding the stated maturity date regardless of whether any of the foregoing conditions is satisfied.

We will deliver cash and shares of our common stock, if any, upon conversion of each $1,000 principal amount of Notes, as follows:

- An amount in cash (the "principal return") equal to the sum of, for each of the 20 Volume-Weighted Average Price (VWAP) trading days during the conversion period, the lesser of the daily conversion value for such VWAP trading day and fifty dollars (representing 1/20th of one thousand dollars); and
- A number of shares based upon, for each of the 20 VWAP trading days during the conversion period, any excess of the daily conversion value above fifty dollars.

The proceeds from the issuance of the Notes have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of December 31, 2010, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 45 months. The Notes' if-converted value did not exceed their principal amount as of December 31, 2010. At December 31, 2010, the equity component of the Notes, net of the

impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	December 31,	
	2010	2009
	(In thousands)	
Details of the liability component:		
Principal amount	$ 187,000	$ 187,000
Unamortized discount	(22,986)	(28,100)
Net carrying amount	$ 164,014	$ 158,900

	Years Ended December 31,		
	2010	2009	2008
		(In thousands)	
Interest cost recognized for the period relating to the:			
Contractual interest coupon rate of 3.75%	$ 7,012	$ 7,076	$ 7,500
Amortization of the discount on the liability component	5,114	4,782	4,707
Total interest cost recognized	$12,126	$11,858	$12,207

Securities Purchase Program. Under the $25 million securities purchase program announced in January 2009, we purchased and retired $13.0 million face amount of the Notes during the first quarter of 2009. We purchased the Notes at an average price of $74.25 per $100 principal amount, for a total of $9.8 million, including accrued interest. The gain recognized during 2009 on the purchase of the Notes was $1.5 million.

In March 2009, our board of directors authorized the purchase of up to an additional $25 million in aggregate of either our common stock or the Notes. The purchase program was funded with working capital, and common stock purchases were made from time to time on the open market or through privately negotiated transactions during 2009. The purchase program extended through December 31, 2009. See the details regarding the common stock purchases at Note 14, “Stockholders’ Equity.”

13. Income Taxes

The provision for income taxes consisted of the following:

	Year Ended December 31,		
	2010	2009	2008
		(In thousands)	
Current:			
Federal	$36,395	$ 9,421	$32,972
State	2,144	(1,558)	1,866
Total current	38,539	7,863	34,838
Deferred:			
Federal	(4,717)	1,924	378
State	700	(2,498)	(490)
Total deferred	(4,017)	(574)	(112)
Total provision for income taxes	$ 34,522	$ 7,289	$ 34,726

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

A reconciliation of the effective income tax rate to the statutory federal income tax rate is as follows:

	Year Ended December 31,		
	2010	2009	2008
		(In thousands)	
Taxes on income at statutory federal tax rate (35)%	$ 31,323	$13,355	$ 33,014
State income taxes, net of federal benefit	1,849	(2,637)	894
(Benefit) liability for unrecognized tax benefits	(57)	(3,315)	450
Other	1,407	(114)	368
Reported income tax expense	$34,522	$ 7,289	$34,726

Through December 31, 2009, the Company's income tax expense included both the Michigan business income tax, or BIT, and the Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, the Company has recorded the MGRT as a premium tax and not as an income tax. The Company will continue to record the BIT as an income tax. For the years ended December 31, 2009 and December 31, 2008, premium tax expense and income tax expense have been reclassified to conform to this presentation.

Our effective tax rate is based on expected income, statutory tax rates, and tax planning opportunities available to us in the various jurisdictions in which we operate. Significant management estimates and judgments are required in determining our effective tax rate. We are routinely under audit by federal, state, or local authorities regarding the timing and amount of deductions, nexus of income among various tax jurisdictions, and compliance with federal, state, and local tax laws. We have pursued various strategies to reduce our federal, state and local taxes. As a result, we have reduced our state income tax expense due to California enterprise zone credits.

During 2010, 2009, and 2008, tax-related deficiencies on share-based compensation were $673,000, $718,000, and $292,000, respectively. Such amounts were recorded as adjustments to income taxes payable with a corresponding decrease to additional paid-in capital.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Deferred tax assets and liabilities are classified as current or non-current according to the classification of the related asset or liability. Significant components of our deferred tax assets and liabilities as of December 31, 2010 and 2009 were as follows:

	December 31,	
	2010	2009
	(In thousands)	
Accrued expenses	$ 12,618	$ 2,494
Reserve liabilities	877	285
State taxes	(120)	1,151
Other accrued medical costs	2,126	1,628
Net operating losses	27	27
Unrealized (gains) losses	(254)	(408)
Unearned premiums	3,517	6,554
Prepaid expenses	(3,006)	(2,894)
Other, net	(69)	(80)
Deferred tax asset, net of valuation allowance — current	15,716	8,757
Accrued expenses	791	(281)
Reserve liabilities	3,071	2,501
State taxes	1,960	—
Other accrued medical costs	(358)	(866)
Net operating losses	1,362	237
Unrealized losses	1,559	1,480
Unearned premiums	(135)	(264)
Depreciation and amortization	(20,110)	(10,415)
Deferred compensation	6,829	6,817
Debt basis	(9,673)	(11,555)
Other, net	(337)	(160)
Valuation allowance	(1,194)	—
Deferred tax liability, net of valuation allowance — long term	(16,235)	(12,506)
Net deferred income tax liability	$ (519)	$ (3,749)

At December 31, 2010, we had federal and state net operating loss carryforwards of $475,000 and $28 million, respectively. The federal net operating loss begins expiring in 2018, and state net operating losses begin expiring in 2015. The utilization of the net operating losses is subject to certain limitations under federal law.

At December 31, 2010, we had California enterprise zone tax credit carryovers of $3 million which do not expire.

We evaluate the need for a valuation allowance taking into consideration the ability to carry back and carry forward tax credits and losses, available tax planning strategies and future income, including reversal of temporary differences. We have determined that as of December 31, 2010, $1.2 million of deferred tax assets did not satisfy the recognition criteria due to uncertainty regarding the realization of some of our state tax operating loss carryforwards. We increased our valuation allowance from zero at December 31, 2009 to $1.2 million as of December 31, 2010.

We recognize tax benefits only if the tax position is more likely than not to be sustained. We are subject to income taxes in the U.S. and numerous state jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. These

reserves are established when we believe that certain positions might be challenged despite our belief that our tax return positions are fully supportable. We adjust these reserves in light of changing facts and circumstances, such as the outcome of tax audits. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate.

The roll forward of our unrecognized tax benefits is as follows:

	Year Ended December 31,		
	2010	2009	2008
		(In thousands)	
Gross unrecognized tax benefits at beginning of period	$ (4,128)	$(11,676)	$ (10,278)
Increases in tax positions for prior years	(6,891)	(3,748)	(3,310)
Decreases in tax positions for prior years	—	6,804	2,682
Increases in tax positions for current year	—	—	(2,061)
Decreases in tax positions for current year	—	—	892
Settlements	—	4,355	—
Lapse in statute of limitations	57	137	399
Gross unrecognized tax benefits at end of period	$(10,962)	$ (4,128)	$(11,676)

As of December 31, 2010, we had $11.0 million of unrecognized tax benefits of which $7.8 million, if fully recognized, would affect our effective tax rate. We anticipate a decrease of $499,000 to our liability for unrecognized tax benefits within the next twelve-month period due to normal expiration of tax statutes.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of December 31, 2010, December 31, 2009, and December 31, 2008, we had accrued $82,000, $75,000 and $1.4 million, respectively, for the payment of interest and penalties.

We may be subject to examination by the Internal Revenue Service ("IRS") for calendar years 2007 through 2010. We are under examination, or may be subject to examination, in certain state and local jurisdictions, with the major jurisdictions being California, Missouri, and Michigan, for the years 2004 through 2010. Our subsidiary, HCLB, entered into a closing agreement with the IRS in December 2009 that successfully concluded with certainty the IRS examination of HCLB for the year ended May 2006.

14. Stockholders' Equity

In August 2010, we commenced an underwritten public offering of 4,000,000 shares of our common stock, conducted pursuant to an effective registration statement filed with the Securities and Exchange Commission on December 8, 2008. In connection with the offering, we granted the underwriters an overallotment option to purchase up to 350,000 shares, and the single selling stockholder, the Molina Siblings Trust, granted the underwriters an option to purchase up to 250,000 shares. The overallotment option was subsequently exercised in August 2010. Our chief financial officer, John Molina, is the trustee of the Molina Siblings Trust, with sole voting and investment power. Dr. J. Mario Molina, our president and chief executive officer and the brother of John Molina, is a beneficiary of the Molina Siblings Trust, as is John Molina and each of his other three siblings.

We issued 4,350,000 shares in connection with the offering, including the overallotment option. Net of the issuance costs, proceeds from the offering totaled $111.1 million, or approximately $25.55 per share, resulting in an increase to additional paid-in capital. We used the net proceeds of the offering to repay the outstanding indebtedness under the Credit Facility and for general corporate purposes. We did not receive any proceeds from the sale of shares by the selling stockholder.

In connection with the plans described in Note 16, "Stock Plans," we issued approximately 352,000 shares and 234,000 shares of common stock, net of shares retired to settle employees' income taxes, for the years ended

December 31, 2010 and 2009, respectively. This resulted in increases to additional paid-in capital of $10.6 million, and $7.8 million, both net of deferred taxes, as of December 31, 2010, and December 31, 2009, respectively.

Under the purchase program described in Note 12, "Long-Term Debt," we purchased approximately 1.4 million shares of our common stock for $27.7 million (average cost of approximately $20.49 per share) during 2009. These purchases increased diluted earnings per share for the year ended December 31, 2009 by $0.04. In 2009, we retired the $27.7 million of treasury shares purchased in 2009, and we also retired $20.4 million of treasury shares that were purchased prior to 2009 ($48.1 million in aggregate), which reduced additional paid-in capital.

15. Employee Benefits

We sponsor a defined contribution 401(k) plan that covers substantially all full-time salaried and hourly employees of our company and its subsidiaries. Eligible employees are permitted to contribute up to the maximum amount allowed by law. We match up to the first 4% of compensation contributed by employees. Expense recognized in connection with our contributions to the 401(k) plan totaled $5.9 million, $4.7 million and $3.9 million in the years ended December 31, 2010, 2009, and 2008, respectively.

We also have a nonqualified deferred compensation plan for certain key employees. Under this plan, eligible participants may defer up to 100% of their base salary and 100% of their bonus to provide tax-deferred growth for retirement. The funds deferred are invested in corporate-owned life insurance, under a rabbi trust.

16. Stock Plans

In 2002, we adopted the 2002 Equity Incentive Plan (the "2002 Plan"), which provides for the award of stock options, restricted stock, performance shares, and stock bonuses to the company's officers, employees, directors, consultants, advisors, and other service providers. The 2002 Plan initially allowed for the issuance of 1.6 million shares of common stock. Beginning January 1, 2004, shares eligible for issuance automatically increase by the lesser of 400,000 shares or 2% of total outstanding capital stock on a fully diluted basis, unless the board of directors affirmatively acts to nullify the automatic increase. There were 4.4 million shares reserved for issuance under the 2002 Plan as of January 1, 2010.

Restricted stock awards are granted with a fair value equal to the market price of our common stock on the date of grant, and generally vest in equal annual installments over periods up to four years from the date of grant. Stock option awards have an exercise price equal to the fair market value of our common stock on the date of grant, generally vest in equal annual installments over periods up to four years from the date of grant, and have a maximum term of ten years from the date of grant.

Under our 2002 Employee Stock Purchase Plan (the "ESPP"), eligible employees may purchase common shares at 85% of the lower of the fair market value of our common stock on either the first or last trading day of each six-month offering period. Each participant is limited to a maximum purchase of $25,000 (as measured by the fair value of the stock acquired) per year through payroll deductions. Under the ESPP, we issued 109,800 and 120,300 shares of our common stock during the years ended December 31, 2010 and 2009, respectively. Beginning January 1, 2004, and each year until the 2.2 million maximum aggregate number of shares reserved for issuance was reached on December 31, 2008, shares available for issuance under the ESPP automatically increased by 1% of total outstanding capital stock. The aggregate number of unissued common shares available for future grants under the 2002 Plan and the ESPP combined was 3.7 million as of December 31, 2010, and 3.8 million as of December 31, 2009.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The following table illustrates the components of our stock-based compensation expense that are reported in general and administrative expenses in the consolidated statements of income:

	Year Ended December 31,					
	2010		2009		2008	
	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Pretax Charges	Pretax Charges	Net-of-Tax Amount
Restricted stock awards	$ 8,007	$ 5,044	$5,789	$3,589	$5,171	$ 3,206
Stock options (including expense relating to our ESPP)	1,524	960	1,696	1,052	2,640	1,637
Total	$9,531	$ 6,004	$ 7,485	$ 4,641	$7,811	$ 4,843

For both restricted stock and stock option awards, the expense is recognized over the vesting period, generally straight-line over four years. As of December 31, 2010, there was $12.5 million of unrecognized compensation cost related to unvested restricted stock awards, which we expect to recognize over a weighted-average period of 2.5 years. This unrecognized compensation cost assumes an estimated forfeiture rate of 7.8% as of December 31, 2010. Also as of December 31, 2009, there was $0.2 million of unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 0.3 years.

The total fair value of restricted shares vested during the years ended December 31, 2010, 2009, and 2008 was $6.4 million, $3.2 million, and $2.5 million, respectively. Unvested restricted stock activity for the year ended December 31, 2010 was as follows:

	Shares	Weighted-Average Grant Date Fair Value
Unvested balance as of December 31, 2009	687,630	$ 24.64
Granted	554,475	$ 22.95
Vested	(271,381)	$ 25.95
Forfeited	(134,975)	$ 23.26
Unvested balance as of December 31, 2010	835,749	$ 23.32

The total intrinsic value of stock options exercised during the year ended December 31, 2010 was $0.3 million. No stock options were exercised during the year ended December 31, 2009; the total intrinsic value of stock options exercised during the year ended December 31, 2008 was nominal. Stock option activity for the year ended December 31, 2010 was as follows:

	Number of Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (000s)
Outstanding at December 31, 2009	650,739	$ 30.25		
Exercised	(64,662)	$ 24.16		
Forfeited	(72,463)	$ 33.24		
Outstanding at December 31, 2010	513,614	$ 30.59	4.9	$ 528
Exercisable and expected to vest at December 31, 2010	512,381	$ 30.59	4.9	$ 528
Exercisable at December 31, 2010	468,564	$ 30.47	4.7	$ 528

The following is a summary of information about stock options outstanding and exercisable at December 31, 2010:

	Options Outstanding			Options Exercisable	
Range of Exercise Prices	Number Outstanding	Weighted-Average Remaining Contractual Life (Years)	Weighted-Average Exercise Price	Number Exercisable	Weighted-Average Exercise Price
$16.98 - $28.66	243,889	4.1	$ 26.13	243,889	$ 28.66
$29.17 - $32.58	174,950	6.0	$ 31.33	135,200	$ 31.23
$33.56 - $44.29	94,775	4.7	$ 40.71	89,475	$ 39.73
	513,614			468,564	

17. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of December 31, 2010, and 2009, our carrying amount for this investment totaled $4.4 million, and $4.1 million, respectively. For the years ended December 31, 2010, 2009 and 2008, we paid $22.0 million, $21.8 million, and $15.4 million, respectively, for medical service fees to this provider.

We are a party to a fee-for-service agreement with Pacific Hospital of Long Beach ("Pacific Hospital"). Until October 2010, Pacific Hospital was owned by Abrazos Healthcare, Inc., the shares of which are held as community property by the husband of Dr. Martha Bernadett, the sister of Dr. J. Mario Molina, our Chief Executive Officer, and John Molina, our Chief Financial Officer. Amounts paid to Pacific Hospital under the terms of this fee-for-service agreement were $1.0 million, $0.7 million, and $0.2 million, for the years ended December 31, 2010, 2009 and 2008, respectively. As of October 2010, Pacific Hospital is no longer owned by Abrazos Healthcare, Inc. or any other related party to the Company.

18. Commitments and Contingencies

Leases

We lease office space, clinics, equipment, and automobiles under agreements that expire at various dates through 2018. Future minimum lease payments by year and in the aggregate under all non-cancelable operating leases consist of the following approximate amounts:

Year ending December 31,	(In thousands)
2011	$ 28,004
2012	23,794
2013	20,349
2014	17,366
2015	13,671
Thereafter	30,622
Total minimum lease payments	$ 133,806

Rental expense related to these leases amounted to $25.1 million, $20.8 million, and $17.5 million for the years ended December 31, 2010, 2009, and 2008, respectively.

Employment Agreements

In 2002 we entered into employment agreements with our Chief Executive Officer and Chief Financial Officer, which have been amended and restated as of December 31, 2009. These employment agreements had initial terms of one to three years and are subject to automatic one-year extensions thereafter. Should the executives be terminated without cause or resign for good reason before a change of control, as defined, we will pay one year's base salary and termination bonus, as defined, in addition to full vesting of 401(k) employer contributions and stock-based awards, and a cash sum equal in value to health and welfare benefits provided for 18 months. If the executives are terminated for cause, no further payments are due under the contracts.

If termination occurs within two years following a change of control, the executives will receive two times their base salary and termination bonus, in addition to full vesting of 401(k) employer contributions and stock-based awards, and a cash sum equal in value to health and welfare benefits provided for three years.

Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. The outcome of such legal actions is inherently uncertain. Nevertheless, we believe that these actions, when finally concluded and determined, are not likely to have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Professional Liability Insurance

We carry medical professional liability insurance for health care services rendered through our clinics in California, Virginia and Washington. Claims-made coverage under the policies for California and Washington is $1.0 million per occurrence with an annual aggregate limit of $3.0 million for Washington, beginning in 2010, and for California, each of the years ended December 31, 2010, 2009 and 2008. Claims-made coverage under the Virginia policy is $2.0 million per occurrence with an annual aggregate limit of $6.0 million for each of the years ended December 31, 2010 and 2009, and beginning July 1, 2008. We also carry claims-made managed care errors and omissions professional liability insurance for our health plan operations. This insurance is subject to a coverage limit of $15.0 million per occurrence and $15.0 million in the aggregate for each policy year.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations may lead medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our principal operations are conducted through our health plan subsidiaries operating in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington and Wisconsin. Our health plans are subject to state regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances or cash dividends was $397.8 million at December 31, 2010, and $368.7 million at December 31, 2009. The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of December 31, 2010, our health plans had aggregate statutory capital and surplus of approximately $416.6 million compared with the required minimum aggregate statutory capital and surplus of approximately $278.0 million. All of our HMOs were in compliance with the minimum capital requirements at December 31, 2010. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

19. Segment Reporting

Our reportable segments are consistent with how we manage the business and view the markets we serve. In the second quarter of 2010, we added a segment to our internal financial reporting structure as a result of the acquisition of Molina Medicaid Solutions described in Note 4, “Business Combinations.” We now report our financial performance based on the following two reportable segments — Health Plans and Molina Medicaid Solutions. The Health Plans segment represents our former single-segment health plan operations. The Molina Medicaid Solutions segment represents the operations of our new MMIS solutions business.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, “Significant Accounting Policies.” The cost of services shared

20. Quarterly Results of Operations (Unaudited)

The following is a summary of the quarterly results of operations for the years ended December 31, 2010 and 2009.

	For The Quarter Ended			
	March 31, 2010	June 30, 2010	September 30, 2010	December 31, 2010
	(In thousands)			
Premium revenue	$965,220	$976,685	$ 1,005,115	$ 1,042,889
Service revenue	—	21,054	32,271	36,484
Operating income	20,438	21,178	29,953	33,432
Income before income taxes	17,081	17,079	25,353	29,979
Net income	10,590	10,579	16,173	17,628
Net income per share(1):				
Basic	$ 0.41	$ 0.41	$ 0.58	$ 0.58
Diluted	$ 0.41	$ 0.41	$ 0.57	$ 0.58

	For The Quarter Ended			
	March 31, 2009	June 30, 2009	September 30, 2009	December 31, 2009
	(In thousands)			
Premium revenue	$857,484	$925,507	$ 914,805	$ 962,411
Service revenue	—	—	—	—
Operating income (loss)(2)	23,161	19,488	15,089	(5,804)
Income (loss) before income taxes(2)	19,746	16,265	11,810	(9,664)
Net income (loss)	12,211	14,565	8,564	(4,472)
Net income (loss) per share(1),(3):				
Basic	$ 0.46	$ 0.56	$ 0.34	$ (0.18)
Diluted	$ 0.46	$ 0.56	$ 0.33	$ (0.18)

(1) Potentially dilutive shares issuable pursuant to our 2007 offering of convertible senior notes were not included in the computation of diluted net income per share because to do so would have been anti-dilutive for the years ended December 31, 2010 and 2009.

(2) Effective January 1, 2010, the Company has recorded the Michigan gross receipts tax as a premium tax and not as an income tax. For each of the quarters in the year ended December 31, 2009, premium tax expense and income tax expense have been reclassified to conform to this presentation.

(3) For the quarter ended December 31, 2009, no potentially dilutive options or unvested stock awards were included in the computation of our diluted loss per share because to do so would have been anti-dilutive for that period.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Notes to Condensed Financial Information of Registrant

Note A — Basis of Presentation

Molina Healthcare, Inc. (Registrant) was incorporated on July 24, 2002. Prior to that date, Molina Healthcare of California (formerly known as Molina Medical Centers) operated as a California health plan and as the parent company for Molina Healthcare of Utah, Inc. and Molina Healthcare of Michigan, Inc. In June 2003, the employees and operations of the corporate entity were transferred from Molina Healthcare of California to the Registrant.

The Registrant's investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries since the date of acquisition. The parent company-only financial statements should be read in conjunction with the consolidated financial statements and accompanying notes.

Note B — Transactions with Subsidiaries

The Registrant provides certain centralized medical and administrative services to its subsidiaries pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems and human resources services. Fees are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the subsidiaries' ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate. Charges in 2010, 2009, and 2008 for these services totaled $238.5 million, $218.6 million, and $190.4 million, respectively, which are included in operating revenue.

The Registrant and its subsidiaries are included in the consolidated federal and state income tax returns filed by the Registrant. Income taxes are allocated to each subsidiary in accordance with an intercompany tax allocation agreement. The agreement allocates income taxes in an amount generally equivalent to the amount which would be expensed by the subsidiary if it filed a separate tax return. Net operating loss benefits are paid to the subsidiary by the Registrant to the extent such losses are utilized in the consolidated tax returns.

Note C — Capital Contribution and Dividends

During 2010, 2009, and 2008, the Registrant received dividends from its subsidiaries totaling $81.3 million, $76.7 million, and $91.5 million, respectively. Such amounts have been recorded as a reduction to the investments in the respective subsidiaries.

During 2010, 2009, and 2008, the Registrant made capital contributions to certain subsidiaries totaling $10.5 million, $54.7 million, and $48.6 million, respectively, primarily to comply with minimum net worth requirements and to fund contract acquisitions. Such amounts have been recorded as an increase in investment in the respective subsidiaries.

Note D — Related Party Transactions

The Registrant has an equity investment in a medical service provider that provides certain vision services to its members. The Registrant accounts for this investment under the equity method of accounting because the Registrant has an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of December 31, 2010 and 2009, the Registrant's carrying amount for this investment totaled $4.4 million and $4.1 million, respectively. For the years ended December 31, 2010, 2009 and 2008, the Registrant paid $22.0 million, $21.8 million, and $15.4 million, respectively, for medical service fees to this provider.

The Registrant is a party to a fee-for-service agreement with Pacific Hospital of Long Beach ("Pacific Hospital"). Until October 2010, Pacific Hospital was owned by Abrazos Healthcare, Inc., the shares of which are held as community property by the husband of Dr. Martha Bernadett, the sister of Dr. J. Mario Molina, our Chief Executive Officer, and John Molina, our Chief Financial Officer. Amounts paid to Pacific Hospital under the terms of this fee-for-service agreement were $1.0 million, $0.7 million, and $0.2 million, for the years ended December 31, 2010, 2009 and 2008, respectively. As of October 2010, Pacific Hospital is no longer owned by Abrazos Healthcare, Inc. or any other related party to the Company.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosures***

None.

Item 9A. ***Controls and Procedures***

Disclosure Controls and Procedures: Our management is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934 (the "Exchange Act"). Our internal control over financial reporting is designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements. We maintain controls and procedures designed to ensure that we are able to collect the information we are required to disclose in the reports we file with the Securities and Exchange Commission, and to process, summarize and disclose this information within the time periods specified in the rules of the Securities and Exchange Commission.

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has conducted an evaluation of the design and operation of our "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e)) under the Exchange Act. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective as of the end of the period covered by this report to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Changes in Internal Controls: There were no changes in our internal control over financial reporting during the three months ended December 31, 2010 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Management's Report on Internal Control over Financial Reporting: Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States. However, all internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and reporting.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2010. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework.*

Our management's evaluation did not include an assessment of the effectiveness of internal control over financial reporting at Molina Medicaid Solutions, which was acquired on May 1, 2010. The assets and net assets of Molina Medicaid Solutions at December 31, 2010 were approximately $175.6 million and $133.1 million, respectively. Total revenue and net income of Molina Medicaid Solutions included in our consolidated results of operations for the year ended December 31, 2010 were approximately $89.8 million and $1.8 million, respectively. Our management has not had sufficient time to make an assessment of this subsidiary's internal control over financial reporting.

Based on our assessment, management believes that the Company maintained effective internal control over financial reporting as of December 31, 2010, based on those criteria.

The effectiveness of the Company's internal control over financial reporting has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report appearing on page 115 of this Annual Report on Form 10-K, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2010.

Item 9B. ***Other Information***

None.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited Molina Healthcare, Inc.'s (the "Company's") internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Molina Medicaid Solutions (acquired May 1, 2010), which is included in the 2010 consolidated financial statements of Molina Healthcare, Inc. and constituted $175.6 million and $133.1 million of total and net assets, respectively, as of December 31, 2010, and $89.8 million and $1.8 million of revenues and net income, respectively, for the year then ended. Our audit of internal control over financial reporting of Molina Healthcare, Inc. also did not include an evaluation of the internal control over financial reporting of Molina Medicaid Solutions.

In our opinion, Molina Healthcare, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Molina Healthcare, Inc. as of December 31, 2010 and 2009, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2010 and our report dated March 8, 2011 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

Los Angeles, California
March 8, 2011

PART III

Item 10. *Directors, Executive Officers, and Corporate Governance*

(a) Directors of the Registrant

Information concerning our directors will appear in our Proxy Statement for our 2011 Annual Meeting of Stockholders under "Proposal No. 1 — Election of Three Class III Directors." This portion of the Proxy Statement is incorporated herein by reference.

(b) Executive Officers of the Registrant

Pursuant to General Instruction G(3) to Form 10-K and Instruction 3 to Item 401(b) of Regulation S-K, information regarding our executive officers is provided in Part I of this Annual Report on Form 10-K under the caption "Executive Officers of the Registrant," and will also appear in our Proxy Statement for our 2011 Annual Meeting of Stockholders. Such portion of the Proxy Statement is incorporated herein by reference.

(c) Corporate Governance

Information concerning certain corporate governance matters will appear in our Proxy Statement for our 2011 Annual Meeting of Stockholders under "Corporate Governance," "Corporate Governance and Nominating Committee," "Corporate Governance Guidelines," and "Code of Business Conduct and Ethics." These portions of our Proxy Statement are incorporated herein by reference.

(d) Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires our executive officers and directors, and persons who own more than 10% of a registered class of our equity securities, to file reports of ownership and changes in ownership with the SEC, and to furnish us with copies of the forms. Purchases and sales of our equity securities by such persons are published on our website at www.molinahealthcare.com. Based on our review of the copies of such reports, on our involvement in assisting our reporting persons with such filings, and on written representations from our reporting persons, we believe that, during 2010, each of our executive officers, directors, and greater than ten percent stockholders complied with all such filing requirements on a timely basis.

Item 11. *Executive Compensation*

The information which will appear in our Proxy Statement for our 2011 Annual Meeting under the captions "Compensation Committee Interlocks," "Non-Employee Director Compensation," and "Compensation Discussion and Analysis," is incorporated herein by reference. The information which will appear in our Proxy Statement under the caption "Compensation Committee Report" is not incorporated herein by reference.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

Information concerning the security ownership of certain beneficial owners and management will appear in our Proxy Statement for our 2011 Annual Meeting of Stockholders under "Information About Stock Ownership." This portion of the Proxy Statement is incorporated herein by reference. The information required by this item regarding our equity compensation plans is set forth in Part II, Item 5 of this report and incorporated herein by reference.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence***

Information concerning certain relationships and related transactions will appear in our Proxy Statement for our 2011 Annual Meeting of Stockholders under "Related Party Transactions." Information concerning director independence will appear in our Proxy Statement under "Director Independence." These portions of our Proxy Statement are incorporated herein by reference.

Item 14. ***Principal Accountant Fees and Services***

Information concerning principal accountant fees and services will appear in our Proxy Statement for our 2011 Annual Meeting of Stockholders under "Disclosure of Auditor Fees." This portion of our Proxy Statement is incorporated herein by reference.

PART IV

Item 15. *Exhibits and Financial Statement Schedules*

(a) The consolidated financial statements and exhibits listed below are filed as part of this report.

(1) The Company's consolidated financial statements, the notes thereto and the report of the Independent Registered Public Accounting Firm are on pages 67 through 113 of this Annual Report on Form 10-K and are incorporated by reference.

Report of Independent Registered Public Accounting Firm
Consolidated Balance Sheets — At December 31, 2010 and 2009
Consolidated Statements of Income — Years ended December 31, 2010, 2009, and 2008
Consolidated Statements of Stockholders' Equity — Years ended December 31, 2010, 2009, and 2008
Consolidated Statements of Cash Flows — Years ended December 31, 2010, 2009, and 2008
Notes to Consolidated Financial Statements

(2) Financial Statement Schedules

None of the schedules apply, or the information required is included in the Notes to the Consolidated Financial Statements.

(3) Exhibits

Reference is made to the accompanying Index to Exhibits.

The following exhibits, which are furnished with this annual report or incorporated herein by reference, are filed as part of this annual report.

The agreements included or incorporated by reference as exhibits to this Annual Report on Form 10-K contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties were made solely for the benefit of the other parties to the applicable agreement and (i) were not intended to be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate; (ii) may have been qualified in such agreement by disclosures that were made to the other party in connection with the negotiation of the applicable agreement; (iii) may apply contract standards of "materiality" that are different from "materiality" under the applicable securities laws; and (iv) were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement. The Company acknowledges that, notwithstanding the inclusion of the foregoing cautionary statements, it is responsible for considering whether additional specific disclosures of material information regarding material contractual provisions are required to make the statements in this Annual Report on Form 10-K not misleading.

PURCHASE AGREEMENT

BETWEEN

200 OCEANGATE, LLC, A DELAWARE LIMITED LIABILITY COMPANY

AND

MOLINA CENTER LLC, A DELAWARE LIMITED LIABILITY COMPANY

NOVEMBER 30, 2010

TABLE OF CONTENTS

LIST OF EXHIBITS

PURCHASE AGREEMENT

200 & 300 OCEANGATE, LONG BEACH, CALIFORNIA

THIS AGREEMENT is entered into as of the 30th day of November, 2010 ("**Contract Date**"), by and between 200 OCEANGATE, LLC, a Delaware limited liability company ("**Seller**"), and MOLINA CENTER LLC, a Delaware limited liability company (" **Buyer**").

RECITALS

Seller owns and is offering for sale the land and improvements commonly known as 200 & 300 Oceangate, Long Beach, California, and more completely described below. Buyer has offered to buy the property, and the parties are entering into this Agreement to set forth the terms and conditions of the sale to Buyer.

NOW, THEREFORE, in consideration of the foregoing and the agreements set forth below, the parties hereto agree as follows:

1. Agreement of Sale.

1.1 Seller hereby agrees to sell to Buyer and Buyer hereby agrees to purchase from Seller that certain real property (the " **Land**") with street address of 200 & 300 Oceangate, Long Beach, California, and more particularly described in attached Exhibit A, together with Seller's right, title and interest in the following, which together with the Land, shall be termed the " **Property**" herein:

(a) the approximately 461,263 square foot office project located at 200 & 300 Oceangate, Long Beach, California and all fixtures and other improvements located upon the Land (collectively, the "**Improvements**");

(b) all easements, rights of way, privileges, licenses, appurtenances and other rights and benefits of Seller belonging to or in any way related to the Land, and the Improvements, including water rights, mineral rights, air rights and development rights, if any (together with the Land and Improvements, the "**Real Property**");

(c) all fixtures, furnishings, equipment and other tangible personal property owned by Seller that are used for the operation of the Property and that are located on the Property or that are used exclusively for the operation of the Property (the " **Personal Property**");

(d) the Leases and Service Contracts (as such terms are hereinafter defined) and all security deposits held by Seller with respect to the Leases;

(e) to the extent assignable, all certificate(s) of occupancy, building or equipment permits, consents, authorizations, variances, waivers, licenses, permits, certificates

and approvals from any governmental or quasi-governmental authority necessary for the use of the Land or the Improvements (collectively, the " **Approvals**");

(f) all transferable or assignable warranties (the "**Warranties**") relating to the ownership, development, use and operation of the Land and Improvements;

(g) to the extent assignable, all of Seller's interest in all structural, soil, seismic, geologic, engineering and other reports and studies, all operating manuals for all systems, equipment and operating components of the Property, all marketing materials that are distributed or shown to potential tenants in the marketing of the Property for lease, photos and depictions, all architectural drawings, plans and specifications relating to all or any portion of the Real Property, and all intellectual property rights to the Property, including, without limitation, trade names, trademarks, service marks, logos or other source and business identifiers, trademark registrations and applications for registration used at or relating to the Real Property and any written agreement granting to Seller any right to use any trademark or trademark registration at or in connection with the Real Property (the " **Intangible Property**").

2. Purchase Price. The purchase price for the Property is Eighty-Three Million Dollars ($83,000,000.00) (" **Purchase Price**") and shall be paid in cash by Buyer at the Closing (as defined in Section 10.1 below).

3. Non-Refundable Payment and Deposit

3.1 Non-Refundable Payment. On the Contract Date, as consideration for Seller's agreement to enter into this Agreement and grant Buyer the right to conduct due diligence and terminate this Agreement on and subject to the terms of Section 7, and as a condition precedent to the effectiveness of this Agreement, Buyer shall deliver directly to Seller, by personal check, cash or wire transfer funds in the amount of One Hundred and No/100 ths Dollars ($100) (the "**Non-Refundable Payment**"). The Non-Refundable Payment shall be fully earned and retained by Seller immediately upon receipt and, notwithstanding any provisions of this Agreement to the contrary, the Non-Refundable Payment shall not be returned to Buyer in any circumstance.

3.2 Deposit; Liquidated Damages.

(a) Initial Deposit. Within one (1) business day after the Contract Date, Buyer shall deposit in an escrow (the " **Escrow**") established for the within contemplated transaction with First American Title Insurance Company, National Commercial Services, 1850 Mt. Diablo Blvd., Suite 300, Walnut Creek, California, 94596, Attention: Kitty Schlesinger, Order No. NCS-453433-CC (the "**Title Company**"), the sum of Five Hundred Thousand Dollars ($500,000) (the "**Initial Deposit**"), with instructions to the Title Company to hold the Initial Deposit in the Escrow in an interest-bearing account, with interest accruing for the benefit of Buyer. In the event the sale of the Property is consummated, the Initial Deposit and all interest earned thereon shall be applied towards the Purchase Price. If Buyer elects to terminate this Agreement pursuant to its terms or fails to notify Seller in writing that the Property is acceptable, as provided in Section 7, prior to the end of the Due Diligence Period (as defined in Section 7), the Initial Deposit and all interest thereon shall be returned to Buyer, and the parties shall be

released from all further obligations and liability under this Agreement, except for those obligations that survive the termination of this Agreement.

(b) Additional Deposit. Concurrently with, and subject to, the delivery of the Approval Notice to Buyer as provided in Section 7, Buyer shall deposit in the Escrow the additional sum of Two Million and No/100ths Dollars ($2,000,000) (the **"Additional Deposit"** and together with the Initial Deposit, the "**Deposit**"), with instructions to the Title Company to hold such Additional Deposit in the Escrow, in an interest bearing account, with interest accruing for the benefit of Buyer. In the event the sale of the Property to Buyer is consummated, the Deposit and all interest earned thereon shall be applied towards the Purchase Price.

(c) Non-Refundable Deposit. Upon the delivery by Buyer to Seller of the Approval Notice, the Deposit shall be non-refundable to Buyer except in the following events, upon the occurrence of which the Deposit and all interest thereon shall be returned to Buyer: (i) the Closing fails to occur due to a material default by Seller under this Agreement; (ii) the Closing fails to occur as a result of a failure of a condition to Closing in favor of Buyer, but only if such failure occurs other than as a result of a material default by Buyer under this Agreement; or (iii) the terms of this Agreement expressly provide for the return of the Deposit to Buyer. On the Closing Date, the Deposit and all interest earned thereon shall be applied to the Purchase Price.

(d) **Liquidated Damages. If this Agreement does not terminate pursuant to Section 7, but Buyer fails to consummate this transaction on the scheduled Closing Date (as defined in Section 10.1) due to default by Buyer and any such default continues for five (5) business days after written notice from Seller to Buyer, which written notice shall detail such default, Seller shall be entitled to the Deposit, and all interest thereon, as liquidated damages. The parties have acknowledged and agreed that Seller's damages, in the event of a default by Buyer, would be extremely difficult or impracticable to determine. Therefore, by placing their initials below, the parties acknowledge that the Deposit, and all interest thereon, has been agreed upon, after negotiation, as the parties' reasonable estimate of Seller's damages. Notwithstanding the foregoing, in no event shall Seller's ability to recover from Buyer any loss, cost, damage or expense pursuant to any indemnification or other provision of this Agreement that survives the Closing be deemed limited in any respect by this provision or by Seller's receipt of the Deposit.** The parties agree that the Deposit is not intended as a forfeiture or penalty within the meaning of California Civil Code Sections 3275 or 3369 but shall be treated as liquidated damages pursuant to California Civil Code Sections 1671, 1676 and 1677.

Seller _____ Buyer _____

This Section 3.2 is not intended to limit Seller's remedies under Sections 6, 18.6 or 18.7.

4. Documents to be Delivered to Buyer.

4.1 Due Diligence Deliveries. Seller has provided Buyer with, and Buyer acknowledges receipt of, copies of the materials and documents identified in Exhibit B attached hereto.

4.2 Title Report. Seller has also provided to Buyer, and Buyer acknowledges receipt of that certain preliminary title report for the Property prepared under Order No. NCS-453433-CC, together with a copy of each document referred to therein (collectively, the " **Preliminary Title Report**").

4.3 Property Documents. Buyer shall have the right, at Buyer's sole cost and expense and with at least one (1) business day prior notice, to review Seller's real property transaction files (excluding any privileged or confidential information and excluding any valuation and appraisal information), lease files, plans and specification files, and other files relating to the Property and its ownership, operation, management and maintenance during regular business hours, which files are located in the management office at the Property.

4.4 Leases. Seller shall deliver to Buyer copies of the existing leases, license agreements and rental agreements covering any portion of the Property, any guarantees thereof, and all amendments, modifications and supplements thereto as listed on Exhibit C hereto (each a "**Lease**" and collectively, the "**Leases**").

4.5 Tenant Estoppels.

(a) Seller shall deliver to Buyer an estoppel certificate (a " **Tenant Estoppel**"), in the form of attached Exhibit D or, if the applicable Lease provides for a different form of estoppel in the form specified in the applicable Lease, dated no earlier than thirty (30) days prior to Closing, from as many of the tenants of the Property (the "**Tenants**") from whom Seller is able to obtain such Tenant Estoppels through the exercise of Seller's diligent, good faith efforts. Seller shall, at least ten (10) days prior to the expiration of the Due Diligence Period and prior to delivery to the Tenants for execution, deliver completed forms of Tenant Estoppels to Buyer for Buyer's review and approval, provided that Seller shall not be obligated to deliver the form of Tenant Estoppel for any of the following Tenants (collectively, the "**Government Tenants**"): (A) the State of California acting by and through the Director of the Department of General Services; and (B) the United States of America, Department of Veterans Affairs. Buyer may disapprove a Tenant Estoppel only if (i) it is not in the form of Exhibit D or, if the applicable Lease provides for a different form or content of estoppel in the form or content specified in the applicable Lease, the form or content provided by the applicable Lease, or (ii) if the information set forth in the Tenant Estoppel is not consistent with the terms set forth in the applicable Lease. If Buyer has not responded as to such approval within three (3) business days of receipt of a Tenant Estoppel, Buyer shall be deemed to have approved the Tenant Estoppel in question for delivery to Tenant. Seller shall deliver completed Tenant Estoppels to Buyer as they are received by Seller. Notwithstanding the foregoing, Seller shall not be obligated to prepare or seek Tenant Estoppels with respect to the following Leases, as amended and assigned to date: (1) License Agreement, dated November 30, 2000, by and between Pacific Towers Associates and Captivate Network, Inc.; (2) Antenna Site License Agreement, dated as of November 30, 2006, by and between Seller and Direct America Satellite Services; (3) Telecommunications

License Agreement, dated July 13, 2005, by and between Seller and Rocket Internetworking, Inc.; (4) Telecommunications Access and License Agreement, dated December 21, 2009, by and between Seller and TCG Los Angeles, Inc.; (5) License Agreement, dated December 21, 2000, by and between XO Communications, Inc., and Pacific Towers Associates; and (6) UPS Drop Box Agreement, dated February 2, 2010, by and between United Parcel Service, Inc., and Seller.

(b) Estoppel Thresholds. Buyer shall have a right to terminate this Agreement upon written notice prior to the Closing Date and receive a refund of the Deposit and all interest thereon as its sole remedy if Seller fails to deliver to Buyer at least three (3) days prior to the Closing Date, Tenant Estoppels from (i) the State of California acting by and through the Director of the Department of General Services, which is the contracting party under five (5) separate Leases – State Lands Commission (two Leases), California Coastal Commission, and Department of Industrial Relations (two Leases), confirming that such Leases are in effect, that the Tenant has no default claims against Seller, that the term of the Lease is consistent with the term reflected in the Lease, and that the base monthly rent payable is consistent with the base monthly rent shown in the Lease, (ii) the United States of America, Department of Veterans Affairs confirming that the Lease is in full force and effect, the date to which the rent and other charges have been paid in advance, if any; and whether any notice of default has been issued, (iii) each of (1) AECOM Technology Corp., (2) Pacific Maritime Association, (3) Long Beach Publishing Company, Inc., and Medianews Group, Inc., and (4) J. Perez Associates, Inc. (collectively, the "**Major Non-Government Tenants in Occupancy**") in the form approved or deemed approved by Buyer pursuant to Section 4.5(a) above, and (iv) an estoppel from Crowell Weedon & Co. certifying that its Lease has not been modified or amended in writing or orally or by course of conduct, and contains the entire understanding and agreement with Seller concerning the premises under the Lease. Buyer acknowledges and agrees that if the Major Non-Government Tenants in Occupancy delete or modify one or both of sections 20 and 21 of the form Tenant Estoppel attached as Exhibit D, such deletion(s) or modification(s) shall not constitute a change in the form approved or deemed approved by Buyer. As used in this Agreement, the term "**Major Non-Government Tenants**" shall mean the Major Non-Governmental Tenants in Occupancy and Crowelll Weedon & Co.

4.6 Service Contracts. Seller has delivered to Buyer, and Buyer acknowledges receipt of, copies of the service, maintenance, management and other contracts and agreements related to the operation and management of the Property, excluding the property management agreement which will not be assigned at Closing, all of which are listed on the attached Exhibit E (the "**Service Contracts**"). If Buyer delivers the Approval Notice, Buyer shall be deemed to have agreed to assume at Closing all of the Service Contracts.

4.7 Survey. Seller shall deliver a copy of Seller's existing survey to Buyer (the " **Survey**"). Buyer may, at its sole cost and expense, cause the Survey to be updated and recertified as deemed necessary and appropriate by Buyer.

5. Title.

5.1 Title Commitment. Buyer shall be responsible for obtaining, no later than the end of the Due Diligence Period, a commitment from the Title Company to issue at Closing a policy

of title insurance in a form acceptable to Buyer, which is not conditioned on the performance by any party or third party of any actions other than the express obligations of the parties under this Agreement (the "**Commitment**"). Seller will provide, at Closing, an affidavit to the Title Company in the form attached hereto as Exhibit J. Buyer shall deliver the Commitment to Seller together with a letter from Buyer to Seller stating that the exceptions to title reflected in the Commitment are approved by Buyer. If Buyer does not provide Seller with the Commitment and such letter prior to the expiration of the Due Diligence Period, the title reflected in the Preliminary Title Report (or any updated title report) shall be deemed unacceptable and disapproved, this Agreement shall terminate and the Deposit, together with all interest thereon, shall be returned to Buyer. Seller shall have no duty to cure, and Buyer shall not be entitled to any offset or credit against the Purchase Price due to, any defect in the title to the Property or any condition or aspect of the Property, to which Buyer may object, except as may be agreed by Seller in writing, in its sole and absolute discretion; provided, however, that Seller shall remove, bond over, or obtain a title endorsement for any liens ("**Seller Liens**") that affect the Property and that are not liens for taxes or assessments accruing on or after the Closing and that are not created by, or the result of actions of, Buyer, Molina or any of their respective affiliates, agents, employees or contractors. Any cure that Seller has so agreed to perform or is obligated to perform shall become a condition precedent to Closing in favor of Buyer and shall be cured by the Closing Date. For purposes of this Section 5.1, a "cure" of a title exception means the elimination of such exception from title and shall not include the bonding of, or endorsement over unless such bonding is in an amount and on terms required by the Title Company for elimination of such exception from the Title Policy (as defined in Section 5.3) as reasonably determined by Buyer. If such cure is not accomplished by the Closing Date, Buyer, as its sole and exclusive remedy, may either terminate this Agreement, in which case the Deposit shall be returned to Buyer, or waive such objection and complete the Closing subject to such exception, provided that if Seller refuses to remove a Seller Lien at Closing, Buyer shall have the right to instruct the Title Company, as escrow agent, to apply a portion of the Purchase Price sufficient to discharge such Seller Lien at Closing.

5.2 Permitted Exceptions. The following shall constitute the "**Permitted Exceptions**": (a) the Title Company's standard exceptions; (b) all exceptions that are shown on the Commitment; (c) all of the Leases; and (d) all exceptions that arise after the expiration of the Due Diligence Period and prior to the Closing that are not Seller Liens and that are approved by Buyer, in writing, in its sole and absolute discretion, or are caused by Buyer or Molina, their agents, employees, contractors or representatives or result from any new survey of the Real Property or any update of any existing survey.

5.3 Title Policy. Evidence of title shall be the issuance by the Title Company at Closing of a policy of title insurance in the form of the Commitment, subject only to the Permitted Exceptions ("**Title Policy**"). Seller shall be responsible for the cost of a CLTA standard coverage policy of title insurance in the amount of the Purchase Price; Buyer shall be responsible for the incremental cost of an ALTA extended coverage policy of title insurance, the cost of any endorsements to the Title Policy and for providing any necessary surveys (other than the Survey) to the Title Company.

5.4 No Recording. Neither this Agreement nor any memorandum of this Agreement shall be recorded by, or on behalf of, Buyer in the Official Records of the County of Los Angeles. If Buyer violates the terms of this Section 5.4 by recording or attempting to record this Agreement or a memorandum thereof, such act shall not operate to bind or cloud the title to the Property, shall constitute a material breach and default by Buyer under this Agreement, and shall entitle Seller to terminate this Agreement by written notice to Buyer, which termination notice may be recorded against the Property.

6. Access.

6.1 Provided that Buyer has complied with the insurance requirements in Section 6.3 and gives Seller at least one (1) business day's prior notice (oral or written), Seller shall allow Buyer and authorized representatives of Buyer reasonable access, at reasonable times, to the Property for the purposes of satisfying Buyer with respect to the Property. In performing its examinations and inspections of the Property, Buyer shall use reasonable efforts to minimize any interference with Seller's and the Tenants' use and occupancy of the Property. Seller shall have the right at all times to have a representative of Seller accompany any of Buyer or Buyer's employees, agents, contractors, consultants, officers, directors, representatives, managers or members (collectively, **"Buyer's Agents"**) while such persons are on the Property. Buyer may conduct interviews with the Tenants, provided Buyer has given Seller no less than two (2) business days notice prior to any such interview, and provided further that Seller shall have the right to be present at all such interviews. Buyer's breach of this Section 6.1 (and all subsections) shall constitute a material breach and default by Buyer of this Agreement. All investigations and inspections shall be performed in compliance with this Section 6 and all local, state and federal laws, rules and regulations, including, without limitation, any and all permits required thereunder, which permits shall be obtained by and at the sole cost of Buyer.

(a) Buyer shall not conduct or allow any physically intrusive or destructive testing of, on or under the Property, without Seller's prior written consent, which consent may be withheld at Seller's sole and absolute discretion; provided, however, Buyer may, subject to its damage and repair obligations in this Section 6.1 and 6.2, inspect the Property for asbestos-related materials. Buyer shall provide Seller with two (2) days written notice prior to the commencement of any physically intrusive or destructive testing, accompanied by a detailed work plan describing the nature, scope, location and purpose of the proposed work. Buyer acknowledges and agrees that Seller's review of Buyer's work plan is solely for the purpose of protecting Seller's interests, and shall not be deemed to create any liability of any kind on the part of Seller in connection with such review that, for example, the work plan is adequate or appropriate for any purpose or complies with applicable legal requirements. All work and investigations shall be performed in compliance with all local, state and federal laws, rules and regulations, including, without limitation, any and all permits required thereunder, all of which shall be at the sole cost and expense of Buyer.

(b) During the performance of Buyer's investigations, Buyer shall promptly remove and properly dispose of all samples, substances and materials extracted from or generated by Buyer at the Property and, upon the completion of its investigations, shall return the Property to its original condition, including the removal of all equipment and materials used or

generated during its investigations. Buyer shall name itself as the generator on any waste manifests required to dispose of said materials and shall obtain its own waste generator identification number with respect thereto. If Buyer fails to perform or cause such restoration, and such failure shall continue for two (2) days after Buyer receives written notice from Seller demanding the cure thereof, Seller may perform or cause to be performed such restoration work, and Buyer shall reimburse Seller for all the costs and expenses thereof within two (2) days after receipt of bills therefor from Seller.

6.2 Notwithstanding anything in this Agreement to the contrary, any entry upon, inspection, or investigation of the Property by Buyer or Buyer's Agents shall be performed at the sole risk and expense of Buyer, and Buyer shall be solely and absolutely responsible for the acts or omissions of any of Buyer's Agents. Furthermore, Buyer shall protect, indemnify, defend and hold Seller, and its successors, assigns, and affiliates harmless from and against any and all losses, damages (whether general, punitive or otherwise), liabilities, claims, causes of action, judgments, costs and legal or other expenses (including, but not limited to, attorneys' fees and costs) (collectively, "**Access Claims**") suffered or incurred by any or all of such indemnified parties to the extent resulting from any act or omission of Buyer or Buyer's Agents in connection with: (i) Buyer's inspection or investigations of the Property; (ii) Buyer's entry upon the Property; (iii) any activities, studies or investigations conducted at, to, or on the Property by Buyer or Buyer's Agents; or (iv) the presence by Buyer or Buyer's Agents at or on the Property. If at any time prior to Closing, Buyer or Buyer's Agents cause any damage to the Property, Buyer shall, at its sole expense, immediately restore the Property to the same condition as existed immediately prior to the occurrence of such damage as determined by Seller in Seller's reasonable discretion. Buyer's obligations under this Section 6.2 shall survive the termination of this Agreement or the Closing, as the case may be, notwithstanding any other provisions herein to the contrary, and shall not be limited by the terms of Section 3. Buyer shall, at all times, keep the Property free and clear of any mechanics', materialmen's or design professional's claims or liens arising out of or relating to its investigations of the Property. The foregoing provisions of this Section 6.2 shall not apply to, and Buyer shall have no liability for, or obligation to protect, indemnify, defend or hold Seller (or any other person or party) harmless from or against any of the following: (i) the discovery by Buyer or any of Buyer's Agents of any Hazardous Material on, under or affecting the Property, except to the extent that Buyer and Buyer's Agents exacerbate such condition in any material respect; (ii) the discovery by Buyer or Buyer's Agents of adverse physical, environmental, economic, neighborhood or other conditions at, on, in, under, around or affecting the Property, except to the extent that Buyer and Buyer's Agents exacerbate such condition in any material respect; or (iii) events, occurrences or conditions resulting from the acts or omissions of Seller or Seller's agents or representatives, except to the extent Buyer and Buyer's Agents exacerbate such events, occurrences or condition in any material respect. Notwithstanding anything in this Section 6.2 to the contrary, Buyer shall have no duty or obligation to identify or repair any condition in, on or affecting the Property that Buyer or Buyer's Agents discover or of which they are aware that may or could be unsafe or dangerous unless and to the extent such unsafe or dangerous condition was caused by the Buyer or Buyer's Agents.

6.3 Buyer shall maintain in full force and effect during the term of this Agreement, the public liability insurance covering Buyer and its activities at the Property on the terms and

with the coverages described in the ACORD Certificate of Liability Insurance attached hereto as Exhibit K, naming Seller as an additional insured under all such liability insurance.

7. Due Diligence Period. Buyer shall have until December 30, 2010, ("Due Diligence Period") to inspect and investigate the Property, including roof, plumbing, soils, electrical, sprinkler, water, sewer, mechanical, engineering, heating, ventilation and air conditioning and life safety systems, structural integrity of the Improvements, measurement of the square footage of the Land and Improvements, legal status and requirements pertaining to the Property (including applicable building codes, zoning, environmental, public health and fire safety laws), hazardous substance inspections including preparation of an environmental assessment, suitability of the Property for Buyer's purposes and all other matters of significance to Buyer. Buyer agrees to keep the results of such testing and inspections confidential, except to the extent that disclosure is required by law (in which case Buyer will notify Seller in writing prior to making any such disclosure). Buyer shall order and pay for all costs and expenses with respect to such inspections and investigations. If, in Buyer's sole and absolute discretion, Buyer desires to proceed with its acquisition of the Property, Buyer shall deliver written notice to Seller (the " **Approval Notice**"), prior to the expiration of the Due Diligence Period, stating that it approves the Property, in which case the parties shall proceed to complete the Closing (subject to the terms and conditions of this Agreement). If Buyer fails to deliver the Approval Notice prior to the expiration of the Due Diligence Period or if such Approval Notice seeks to modify any of the terms or provisions of this Agreement, Buyer will be deemed to have disapproved the Property and to have exercised its right to terminate this Agreement pursuant to this Section 7, in which case this Agreement shall automatically terminate as of the expiration of the Due Diligence Period and the Initial Deposit, together with all interest earned thereon, shall be returned to Buyer. Further, if Buyer fails to deposit the full Additional Deposit in Escrow prior to the expiration of the Due Diligence Period, regardless of whether Buyer has delivered the Approval Notice, Buyer will be deemed to have disapproved the Property and to have exercised its right to terminate this Agreement pursuant to this Section 7, in which case this Agreement shall automatically terminate as of the expiration of the Due Diligence Period and the Initial Deposit, together with all interest earned thereon, shall be returned to Buyer. Notwithstanding anything in this Agreement to the contrary, Buyer may elect, at any time prior to the expiration of the Due Diligence Period, for any reason or no reason, to terminate this Agreement, upon which termination the Deposit and all interest earned thereon shall be refunded to Buyer and the parties shall have no further obligation to each other excepts for those obligations which expressly survive such termination.

8. Acceptance of Property "As Is". ACKNOWLEDGING BUYER'S OPPORTUNITY TO INSPECT AND INVESTIGATE THE PROPERTY AS PROVIDED IN THIS AGREEMENT, BUYER AGREES TO TAKE THE PROPERTY "AS IS" WITH ALL FAULTS AND CONDITIONS THEREON, SUBJECT ONLY TO THE EXPRESS REPRESENTATIONS, WARRANTIES AND COVENANTS OF SELLER SET FORTH IN THIS AGREEMENT OR THE OTHER AGREEMENTS ENTERED INTO BETWEEN BUYER AND SELLER AS OF THE CLOSING DATE. ANY INFORMATION, REPORTS, STATEMENTS, DOCUMENTS OR RECORDS ("**DISCLOSURES**") PROVIDED OR MADE TO BUYER OR ITS CONSTITUENTS BY SELLER, ITS AGENTS, REPRESENTATIVES OR EMPLOYEES CONCERNING THE PROPERTY SHALL NOT CONSTITUTE REPRESENTATIONS OR

WARRANTIES. BUYER SHALL NOT RELY ON SUCH DISCLOSURES BUT, RATHER, BUYER SHALL RELY SOLELY ON ITS OWN INSPECTION OF THE PROPERTY AND THE EXPRESS REPRESENTATIONS, WARRANTIES AND COVENANTS OF SELLER IN THIS AGREEMENT. ACCORDINGLY, BUYER'S DELIVERY OF THE APPROVAL NOTICE PURSUANT TO THE PROVISIONS OF SECTION 7 (DUE DILIGENCE PERIOD) ABOVE, SHALL CONSTITUTE BUYER'S ACKNOWLEDGMENT AND AGREEMENT TO THE FOLLOWING: (i) BUYER HAS REVIEWED, EVALUATED AND VERIFIED THE DISCLOSURES AND DOCUMENTS AND HAS CONDUCTED ALL INSPECTIONS, INVESTIGATIONS, TESTS, ANALYSES, APPRAISALS AND EVALUATIONS OF THE PROPERTY (INCLUDING FOR TOXIC OR HAZARDOUS MATERIALS, SUBSTANCES OR WASTES (DEFINED AND REGULATED AS SUCH PURSUANT TO SECTIONS 25316 AND 25501 OF THE CALIFORNIA HEALTH & SAFETY CODE, THE RESOURCE CONSERVATION AND RECOVERY ACT, THE COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY ACT OF 1980, AS AMENDED (**"CERCLA"**) OR ANY SIMILAR LAWS AND ALL REGULATIONS PROMULGATED THEREUNDER)) AS BUYER CONSIDERS NECESSARY OR APPROPRIATE TO SATISFY ITSELF FULLY WITH RESPECT TO THE CONDITION AND ACCEPTABILITY OF THE PROPERTY (ALL OF SUCH INSPECTIONS, INVESTIGATIONS AND REPORTS BEING HEREIN COLLECTIVELY CALLED THE "**INVESTIGATIONS**"); (ii) SELLER HAS PERMITTED BUYER ACCESS TO THE PROPERTY AND HAS DELIVERED TO, OR MADE AVAILABLE TO, BUYER ALL OF THE MATERIALS REFERENCED IN SECTION 4 (INCLUDING THE DOCUMENTS AND MATERIALS IDENTIFIED ON EXHIBIT B) (COLLECTIVELY, THE "**DOCUMENTS**"); AND (iii) BUYER HAS COMPLETED ITS DUE DILIGENCE WITH RESPECT TO THE PROPERTY AND THE DOCUMENTS TO ITS SATISFACTION, IS THOROUGHLY FAMILIAR WITH THE PHYSICAL CONDITION OF THE PROPERTY, AND SUBJECT ONLY TO THE EXPRESS REPRESENTATIONS, WARRANTIES AND COVENANTS OF SELLER IN THIS AGREEMENT OR THE OTHER AGREEMENTS ENTERED INTO BETWEEN BUYER AND SELLER AS OF THE CLOSING DATE, IS ACQUIRING THE PROPERTY BASED EXCLUSIVELY UPON ITS OWN INVESTIGATIONS AND INSPECTIONS OF THE PROPERTY AND THE DOCUMENTS.

FURTHER, BUYER'S DELIVERY OF THE APPROVAL NOTICE PURSUANT TO THE PROVISIONS OF SECTION 7 (DUE DILIGENCE PERIOD) ABOVE, SHALL CONSTITUTE BUYER'S ACKNOWLEDGMENT AND AGREEMENT TO THE PROVISIONS OF THIS SECTION 8 AND THAT, REGARDLESS OF THE CONTENT OF ANY OF THE DOCUMENTS OR ANY STATEMENTS THAT SELLER, ITS AGENTS, EMPLOYEES, OFFICERS, CONTRACTORS, PARTNERS OR MEMBERS MAY HAVE MADE TO BUYER, ITS AGENTS, EMPLOYEES, OFFICERS, CONTRACTORS, PARTNERS OR MEMBERS PRIOR TO OR DURING THE DUE DILIGENCE PERIOD, OTHER THAN THE EXPRESS REPRESENTATIONS, WARRANTIES AND COVENANTS OF SELLER IN THIS AGREEMENT AND THE OTHER AGREEMENTS ENTERED INTO BY AND BETWEEN BUYER AND SELLER AS OF THE CLOSING DATE, SELLER HAS NOT MADE, DOES NOT MAKE AND SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, WARRANTIES, PROMISES, COVENANTS, AGREEMENTS OR GUARANTIES OF ANY KIND OR CHARACTER WHATSOEVER, WHETHER EXPRESS OR IMPLIED, ORAL OR WRITTEN, PAST, PRESENT OR FUTURE, OF, AS TO,

CONCERNING OR WITH RESPECT TO: (1) THE NATURE, QUALITY OR CONDITION OF THE PROPERTY, INCLUDING, WITHOUT LIMITATION, THE WATER, SOIL AND GEOLOGY; (2) THE INCOME TO BE DERIVED FROM THE PROPERTY; (3) THE SUITABILITY OF THE PROPERTY FOR ANY AND ALL ACTIVITIES AND USES THAT BUYER MAY CONDUCT THEREON; (4) THE COMPLIANCE OF OR BY THE PROPERTY OR ITS OPERATION WITH ANY LAWS, RULES, ORDINANCES OR REGULATIONS OF ANY APPLICABLE GOVERNMENTAL AUTHORITY OR BODY; (5) THE HABITABILITY, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PROPERTY; OR (6) ANY OTHER MATTER WITH RESPECT TO THE PROPERTY. BUYER SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS REGARDING TERMITES OR WASTES, AS DEFINED BY THE U.S. ENVIRONMENTAL PROTECTION AGENCY REGULATIONS AT 40 C.F.R., OR ANY HAZARDOUS SUBSTANCE, AS DEFINED BY CERCLA AND REGULATIONS PROMULGATED THEREUNDER.

EXCEPT WITH RESPECT TO HAZARDOUS MATERIALS THAT WERE DISCHARGED, RELEASED OR DISPOSED BY SELLER OR ITS MEMBERS, MANAGERS, PARTNERS, DIRECTORS, OFFICERS, SHAREHOLDERS, TRUSTEES, BENEFICIARIES, AGENTS, EMPLOYEES AND REPRESENTATIVES IN VIOLATION OF APPLICABLE ENVIRONMENTAL LAWS AS OF THE DATE OF SUCH DISCHARGE, DISPOSAL OR RELEASE, BUYER, ITS SUCCESSORS AND ASSIGNS, HEREBY WAIVE, RELEASE AND AGREE NOT TO MAKE ANY CLAIM OR BRING ANY COST RECOVERY ACTION OR CLAIM FOR CONTRIBUTION OR OTHER ACTION OR CLAIM AGAINST SELLER (COLLECTIVELY OR INDIVIDUALLY) OR ITS RELATED ENTITIES, AND ITS AND THEIR MEMBERS, MANAGERS, PARTNERS, DIRECTORS, OFFICERS, SHAREHOLDERS, TRUSTEES, BENEFICIARIES, AGENTS, EMPLOYEES, REPRESENTATIVES, SUCCESSORS, HEIRS AND ASSIGNS (COLLECTIVELY, '**SELLER AND ITS AFFILIATES**") BASED ON, (x) ANY FEDERAL, STATE, OR LOCAL ENVIRONMENTAL OR HEALTH AND SAFETY LAW OR REGULATION, INCLUDING CERCLA OR ANY STATE EQUIVALENT, OR ANY SIMILAR LAW NOW EXISTING OR HEREAFTER ENACTED; (y) ANY DISCHARGE, DISPOSAL, RELEASE, OR ESCAPE OF ANY CHEMICAL, OR ANY MATERIAL WHATSOEVER, ON, AT, TO, OR FROM THE PROPERTY; OR (z) ANY CONDITIONS WHATSOEVER ON, IN, UNDER, OR IN THE VICINITY OF THE PROPERTY. EXCEPT WITH RESPECT TO ANY CLAIMS ARISING OUT OF ANY BREACH OF COVENANTS, REPRESENTATIONS OR WARRANTIES EXPRESSLY SET FORTH IN THIS AGREEMENT OR THE DOCUMENTS EXECUTED IN CONNECTION WITH THIS AGREEMENT, BUYER, ON BEHALF OF ITSELF AND ITS PARTNERS, MEMBERS, MANAGERS, DIRECTORS, OFFICERS, SHAREHOLDERS, TRUSTEES, BENEFICIARIES, AGENTS, EMPLOYEES, REPRESENTATIVES, SUCCESSORS, HEIRS AND ASSIGNS HEREBY RELEASES, SELLER AND ITS AFFILIATES, FROM ANY AND ALL CLAIMS OF ANY KIND WHATSOEVER, KNOWN OR UNKNOWN, WITH RESPECT TO ANY ASPECT OF THE PROPERTY, INCLUDING THE FOREGOING MATTERS, AND SPECIFICALLY WAIVES WITH RESPECT TO ALL SUCH MATTERS THE PROVISIONS OF CALIFORNIA CIVIL CODE SECTION 1542, AND ANY COMPARABLE LAW APPLICABLE IN THE STATE WHERE THE PROPERTY IS LOCATED, REGARDING THE MATTERS COVERED BY A GENERAL RELEASE, WHICH PROVIDES AS FOLLOWS:

"A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR."

BUYER AND SELLER REPRESENT AND ACKNOWLEDGE THAT THIS SECTION 8 WAS EXPLICITLY NEGOTIATED AND BARGAINED FOR AS A MATERIAL PART OF BUYER'S CONSIDERATION BEING PAID. Terms appearing in this Section 8 in all capital letters that have been defined elsewhere in this Agreement shall have the meanings set forth in such definitions.

9. Conditions to Closing.

9.1 Buyer's Conditions to Closing. Buyer's obligation to purchase the Property is conditioned upon the satisfaction of each of the following conditions each of which is for the exclusive benefit of Buyer. Buyer may, at any time or times before the Closing, waive one or more of the following conditions, but only in writing and any such waiver will not affect its rights and remedies with respect to the remaining conditions:

(a) Buyer shall have received the requisite Tenant Estoppels as and when required under Section 4.5(b). If Buyer has not received the requisite Tenant Estoppels at least six (6) business days prior to the Closing Date, Buyer shall have the one-time right to extend the Closing Date by an additional two (2) business days by delivering written notice of Buyer's exercise of such right to Seller no later than the date five (5) business days prior to the Closing Date. If Buyer timely exercises such right, the Closing Date shall be extended by two (2) business days.

(b) The Rent Roll and Delinquency Report (as defined in Sections 11.1(h) and 11.1(i) below) shall have been updated to a date not earlier than three (3) business days prior to the Closing Date, and such updated Rent Roll and Delinquency Report shall not identify any material adverse change (with a change being deemed to be material and adverse only if the change would expose Buyer to damages or a loss of income in excess of Thirty-Five Thousand and No/100ths Dollars ($35,000)) in the aggregate as to all Leases with the Government Tenants and Major Non-Governmental Tenants as compared to the status of such Leases as shown on the Rent Roll and Delinquency Report delivered to Buyer two (2) business days prior to the expiration of the Due Diligence Period pursuant to Sections 11.1(h) and 11.1(i) below;

(c) No Government Tenant or Major Non-Government Tenant shall have notified Seller or Buyer of any material adverse change in its Tenant Estoppel (with a change being deemed to be material and adverse only if the change would expose Buyer to damages or a loss of income in excess of Thirty-Five Thousand and No/100ths Dollars ($35,000) in the aggregate as to all such Tenant Estoppels); no proceedings under any federal or state bankruptcy or insolvency laws have been commenced by or against any of the Major Non-Government Tenants that have not been terminated; no general assignment for the benefit of creditors has

been made by any of the Major Non-Government Tenants; and no trustee or receiver of any of the Major Non-Government Tenants' property has been appointed;

(d) Seller's performance of all its obligations hereunder;

(e) The truth, completeness and accuracy, in all material respects, of each representation and warranty made by Seller as of the Contract Date and the Closing; and

(f) The issuance at Closing of the Title Policy.

(g) Delivery of the fully executed amendments (the "**State Lease Amendments**") to each of the Leases with the State of California, acting by and through the Director of the Department of General Services, extending the term of such Leases, with such extension term commencing on the date the amendments are executed, for an additional eight (8) years (Buyer acknowledging that after the 53 rd month of such extension term the State will have an ongoing termination right exercisable with thirty (30) days notice).

9.2 Seller's Conditions. Seller's obligation to sell the Property is conditioned upon the satisfaction of each of the following conditions, each of which is for the exclusive benefit of Seller. Seller may, at any time before the Closing, waive one or more of the following conditions, but only in writing and any such waiver will not affect its rights and remedies with respect to the remaining conditions:

(a) The performance by Buyer of all its obligations hereunder; and

(b) The truth, completeness and accuracy, in all material respects, of each representation and warranty made by Buyer as of the Contract Date and the Closing.

9.3 Seller Default. If, at the Closing, (i) Seller is in default of any of its obligations hereunder, or (ii) any of Seller's representations or warranties set forth in Section 11.1 are untrue, inaccurate or incorrect when given, in any material respect, or (iii) the Closing otherwise fails to occur by reason of Seller's failure or refusal to perform its obligations hereunder in a prompt and timely manner, and any such circumstance described in any of clauses (i), (ii) or (iii) continues for five (5) business days after written notice from Buyer to Seller, which written notice shall detail such default, untruth or failure, as applicable, then Buyer shall have the right, to elect, as its sole and exclusive remedy, to (a) terminate this Agreement by written notice to Seller, promptly after which (A) the Deposit and all interest earned thereon shall be returned to Buyer, and (B) Seller shall pay to Buyer any title, escrow, legal and inspection fees incurred by Buyer and any other expenses incurred by Buyer in connection with its review of the Property, and the negotiation, documentation and performance of this Agreement (including, without limitation, the fees and expenses of environmental and engineering consultants, legal and accounting fees and expenses, and other out-of-pocket third party charges related to the transactions contemplated by this Agreement and their consummation), subject to a cap of $125,000 (collectively, "**Buyer's Costs**"), in which case, the parties shall have no further rights or obligations hereunder except for obligations which expressly survive the termination of this Agreement, or (b) waive the condition and proceed to Closing, or (c) seek specific performance

of this Agreement by Seller. As a condition precedent to Buyer exercising any right it may have to bring an action for specific performance hereunder, Buyer must commence such an action within ninety (90) days after the occurrence of Seller's default. Buyer agrees that its failure to timely commence such an action for specific performance within such ninety (90) day period shall be deemed a waiver by it of its right to commence an action for specific performance as well as a waiver by it of any right it may have to file or record a notice of *lis pendens* or notice of pendency of action or similar notice against any portion of the Property. Notwithstanding the foregoing, if by Seller's affirmative acts the remedy of specific performance has been rendered unavailable to Buyer, Buyer shall have and may assert against Seller as a result of Seller's default under this Agreement, any and all rights available at law and in equity, without imposition of the limitations in this Agreement on Buyer's rights, remedies or damages.

10. Closing.

10.1 Closing Date. The consummation of the purchase and sale of the Property (the "**Closing**") shall be held at the offices of the Title Company (or at such other location as the parties may agree) on January 19, 2011 (the "**Closing Date**"). Buyer acknowledges that Seller is required to defease the existing securitized loan that is currently secured by a deed of trust on the Property (the "**Existing Loan**") in order to deliver title to the Property free and clear of the lien of such deed of trust (the "**Existing Deed of Trust**"). In connection with such defeasance, Buyer agrees to cooperate in good faith with all usual and customary requirements imposed by the master loan servicer, bond trustee and ratings agency for such defeasance transaction so long as Buyer is not required to incur any additional liability or expense in so doing. The parties acknowledge that, in light of the defeasance, the Grant Deed (as defined below) will be recorded, and the Seller's proceeds will be disbursed, one day after the Closing Date. Seller may extend the Closing Date by up to three (3) business days to accommodate such defeasance. Seller shall be solely responsible for any and all costs, fees and expenses in connection with such defeasance, and any yield maintenance or other premiums or payments required in connection with such defeasance. The defeasance of the Existing Loan shall not be a condition to Seller's obligation to close the Escrow.

10.2 Seller's Deposits Into Escrow. Seller shall deposit the following documents and items into escrow at least one (1) business day prior to the Closing Date:

(a) a duly executed and acknowledged grant deed conveying the Property and Improvements to Buyer in the form of the attached Exhibit F, together with a separate transfer tax affidavit (the "**Grant Deed**");

(b) a duly executed bill of sale and general assignment, in the form of the attached Exhibit G (the "**Assignment**"), transferring the Personal Property, Leases, Service Contracts, Approvals, Warranties and Intangible Property to Buyer;

(c) an affidavit in the form of the attached Exhibit H stating that Seller is not a "foreign person" under IRC Section 1445(f)(3);

(d) tenant notice letters for all tenants at the Property informing them of the sale of the Property and assignment of the Leases to Buyer, in the form of attached Exhibit I;

(e) a duly executed affidavit in the form required by the California Franchise Tax Board certifying that no withholding of any amount of the Purchase Price is required in connection with the Closing;

(f) Seller's share of the closing costs as described in Section 10.5 below or instructions to Title Company to deduct same from the Purchase Price;

(g) an owner's title affidavit in the form of the attached Exhibit J;

(h) the Rent Roll, updated to a date no earlier than three (3) business days prior to the Closing Date, certified by Seller as true and correct;

(i) A certification that all of the representations and warranties set forth in Section 11.1 remain true, complete and accurate, except to the extent of any exceptions to such representations and warranties identified in such certification; and

(j) such other documents as may reasonably be required to complete the Closing.

10.3 Seller's Deliveries to Buyer Outside of Escrow. Seller shall deliver to Buyer at the Property (except as otherwise provided below) on or before the Closing Date, all of the following:

(a) originals, to the extent in Seller's possession or control, or copies of the Leases and the Service Contracts, which copies are certified by Seller as true and correct;

(b) the original Estoppel Certificates, duly executed by the Tenants, which shall be delivered to Buyer's counsel, James Moore of Boutin Jones Inc.;

(c) all keys and security codes to the Property;

(d) electronic or hard copies of all Documents; and

(e) originals or copies of all Lease files and Property files, including all records, instruments and correspondence related to maintenance and repair, the Tenants, the Leases, construction and alteration of the Improvements (base building and tenant improvements), and operation of the Property, to the extent such files are located at the Real Property.

10.4 Buyer's Deposits into Escrow. Buyer shall deposit the following into escrow at least one (1) business day prior to the Closing Date:

(a) the balance of the Purchase Price in immediately available funds;

(b) Buyer's share of the closing costs as described in Section 10.5. below;

(c) two original duly executed counterparts of the Assignment; and

(d) such other documents as may reasonably be required to complete the Closing.

10.5 Adjustment and Proration. All accounts receivable and all accounts payable shall be prorated between Buyer and Seller as of 12:01 a.m. on the Closing Date, on the basis of a 365-day year, with Seller entitled to all accounts receivable and responsible for all accounts payable with respect to the period prior to such date and time, and with Buyer entitled to all accounts receivable and responsible for all accounts payable with respect to the period from and after such date and time. Prior to Closing, Seller shall prepare for review, comment and agreement by Buyer a proration statement for the Property, and each party shall be credited or charged at the Closing, in accordance with the following:

(a) Accounts Receivable. Seller shall account to Buyer for any Rents actually collected by Seller for the month in which the Closing occurs, and Buyer shall be credited for its pro rata share applicable to the period from and after the Closing Date. For purposes of this Agreement, the term " **Rents**" means and includes Fixed Rents and Additional Rents; "**Fixed Rents**" means the periodic fixed rent payable by a Tenant under its Lease; and "**Additional Rents**" means all amounts, other than Fixed Rents, due from any Tenant under any Lease, including without limitation, percentage rents, escalation charges for real estate taxes, parking charges, marketing fund charges, reimbursement of operating expenses or common area expenses, maintenance escalation rents or charges, cost of living increases or other charges of a similar nature, if any, and any additional charges and expenses payable under any Lease.

(b) Accounts Payable. For purposes of this Agreement, the term "**Expenses**" means all operating expenses normal to the operation and maintenance of the Property, including without limitation real property taxes and assessments, current installments of any improvement bonds or assessments which are a lien on the Property or which are pending and may become a lien on the Property, water, sewer and utility charges, amounts payable under any Service Contract for any period in which the Closing occurs, permits, licenses and inspection fees. Expenses shall not include expenses which are of a capital nature.

(i) Prepaid Expenses. To the extent Expenses have been paid prior to the Closing Date for any part of the period on or after the Closing Date, Seller shall account to Buyer for such prepaid Expenses, and Seller shall be credited for the amount of such prepaid expenses applicable to the period after the Closing Date.

(ii) Unpaid Expenses. To the extent Expenses relating to the period prior to the Closing Date are unpaid as of the Closing Date but are ascertainable, Buyer shall be credited for Seller's pro rata share of such Expenses for the period prior to the Closing Date.

(iii) Service Contracts. Payments due under any Service Contracts shall be prorated as of the Closing Date, and Buyer shall be liable for all payments accruing

thereunder after the Closing. Seller shall be responsible for all payments under all contracts and agreements not assumed by Buyer

(c) Property Taxes. Seller shall be responsible for all real and personal property ad valorem taxes and special assessments applicable to the period prior to the Closing Date; Buyer shall be responsible for all real and personal property ad valorem taxes and special assessments applicable to the period from and after the Closing Date. With respect to any property tax appeal or reassessment filed by Seller for the current tax year or tax years (or portions thereof) prior to the Closing, Seller shall be entitled to the full amount of any refund or rebate resulting therefrom applicable to the period before the Closing Date, except to the extent such amounts are payable to, or otherwise accrue to the benefit of, the Tenants pursuant to the Leases, which amounts Seller shall promptly refund to such Tenants.

(d) Utility Charges. All utility (including electricity, gas, water, sewer and telephone) charges will be prorated to the Closing Date as Expenses. All refundable utility security deposits, if any, will be retained by Seller.

(e) Government Tenants. Buyer acknowledges that the Government Tenants pay Rents in arrears. Accordingly, Seller shall receive a credit at Closing for the Rents that accrue under the Leases of the Government Tenants in the month that Closing occurs, to the extent any rents accrue under such Leases.

(f) Molina Rents and Reimbursements. If, as of the Closing Date, Seller is due any amounts from Molina under its Lease that are ascertainable, Seller shall receive a credit at Closing for such amounts. Likewise, if any amounts are due and owing from Seller to Molina at Closing, Seller shall pay such amounts to Molina at or before Closing. Any amounts that are due and owing from Seller to Molina after Closing shall be paid by Seller to Molina as and when such amounts come due, after deduction for all amounts then due and owing to Seller by Molina or Buyer.

(g) Post-Closing. If the amount of any proration cannot be determined at the Closing, the adjustments will be made between the parties as soon after Closing as possible, as follows:

(i) Non-delinquent Rents. If after the Closing either Buyer or Seller collects any non-delinquent Rents applicable to the month in which the Closing occurred (or if Seller collects any Rents applicable to any month following the month in which the Closing occurred), such Rents shall be prorated as of the Closing Date and paid to the party entitled thereto not later than five (5) business days following receipt, except to the extent such party received a credit at Closing for such Rents.

(ii) Delinquent Rents for Month in which the Closing Occurred. If after the Closing Date either Buyer or Seller receives from any Tenant Rents that were delinquent as of the Closing Date and that relate to the rental period in which the Closing occurred, then such Rents shall be applied in the following order of priority: First, to reimburse Buyer for all out-of-pocket third-party collection costs actually incurred by Buyer in collecting

such Rents; second, to satisfy such Tenant's Rent obligations relating to the period after the Closing Date; and third, to satisfy such delinquent Rent obligations relating to the period prior to the Closing Date. Buyer agrees to use commercially reasonable efforts to collect any such delinquent rents but Buyer has no obligation to institute any collection action or otherwise incur any material cost in connection therewith. Seller shall have no right to pursue or continue the collection of such delinquent Rents from any Tenant in occupancy as of the Closing Date, but Seller shall have the right to continue to prosecute any collection proceedings that were initiated prior to the Closing against any tenant no longer in occupancy as of the Closing Date. Notwithstanding the foregoing, if Molina owes any Rents for any period prior to Closing for which Seller did not receive a credit at Closing, Buyer shall pay all Rents received from Molina to Seller until such Rents owed to Seller have been paid in full.

(iii) Expenses. With respect to any invoice received by Buyer or Seller after the Closing Date for Expenses that relate to the period in which the Closing occurred, the party receiving such invoice shall give the other party written notice of such invoice, and the other party shall have thirty days to review and approve the accuracy of any such invoice. If the parties agree that the Invoice is accurate and should be paid, the parties shall compute each party's pro rata share, and deliver a check for that amount in favor of the vendor.

(h) Survival of Obligations. The obligations of Seller and Buyer under this Section 10.5 shall survive the Closing.

10.6 Items Not to be Prorated. There shall be no prorations or adjustments of any kind with respect to:

(a) Insurance Premiums. Insurance Premiums shall not be prorated. Seller will terminate its coverages as of the Closing Date, and Buyer shall be responsible for obtaining its own coverages as of the Closing Date.

(b) Delinquent Fixed Rents for Full Months Prior to the Month in which the Closing Occurred . Delinquent Fixed Rents with respect to Tenants under the Leases applicable to months prior to the calendar month in which the Closing occurred shall remain the property of Seller, and Buyer shall have no claim thereto whether collected by Seller or Buyer, before or after the Closing, and no responsibility of any kind with respect thereto except as specifically set forth herein. Seller shall not take or continue to take collection measures from or after the Closing. Buyer agrees to use commercially reasonable efforts to collect any delinquent Fixed Rents owed Seller, but Buyer has no obligation to institute any collection action or otherwise incur any material costs in connection therewith. Except with respect to the Rents collected from Molina, Fixed Rents collected from Tenants after the Closing Date shall be applied in the following order of priority: First, to reimburse Buyer for all out-of-pocket third-party collection costs actually incurred by Buyer in collecting such Rents; second, to satisfy such Tenant's Rent obligations relating to the period after the Closing Date; and third, to satisfy such delinquent Rent obligations relating to periods prior to the Closing Date. In the event that Buyer collects any such delinquent Fixed Rents, Buyer shall apply such Fixed Rents as contemplated above and shall promptly pay over to Seller any amounts properly owed to Seller.

(c) Additional Rents Relating to Full or Partial Months Prior to the Closing Date . If Additional Rents relating to full or partial months prior to the Closing Date are not finally adjusted between Seller and any Tenant until after the Closing Date, then any refund to which any Tenant may be entitled shall be the obligation of Seller, and any additional amounts due from the Tenant for such period shall be the property of Seller. Buyer shall have no obligation with respect to any such refund due to any Tenant and no claim to any such amounts due from any Tenant, except that Buyer shall promptly pay to Seller any such delinquent Additional Rent amounts as it actually collects. If Seller receives any refund of expenses paid prior to the Closing and relating to a period prior to the Closing, and such expenses were reimbursed in whole or in part by any Tenant, Seller shall refund to each Tenant its share of any such refund. Buyer agrees to use commercially reasonable efforts to collect any such Additional Rents but Buyer has no obligation to institute any collection action or otherwise incur any material cost in connection therewith.

(d) Security Deposits. Seller shall deliver to Buyer (or credit to Buyer at Closing) all prepaid rents, security deposits, letters of credit and other collateral actually held by Seller or any of its affiliates or successors in interest under any of the Leases, to the extent not applied by Seller prior to the Closing Date to the extent permitted under the Leases. From and after the Contract Date, Seller shall not apply any security deposits without the Buyer's prior written consent.

(e) Survival. The terms of Section 10.6 shall survive the Closing.

10.7 Closing Costs. The Closing costs for this transaction shall be paid as follows:

(a) Seller shall pay (i) any brokerage fees to the Selling Broker as required under Section 18.7 below; (ii) one-half of all transfer and sales taxes (including documentary transfer taxes); (iii) all costs, expenses and fees related to the defeasance of the Existing Loan; (iv) the cost of the Title Policy, up to but not to exceed an amount equal to the cost of owner's standard CLTA coverage title insurance in the amount of the Purchase Price; (v) one-half of the escrow fees; and (vi) all other costs and expenses allocated to Seller pursuant to this Agreement.

(b) Buyer shall pay (i) any brokerage fees to the Buying Broker as required under Section 18.7 below; (ii) one half of all transfer and sales taxes (including documentary transfer taxes); (iii) the increased cost of the Title Policy associated with ALTA extended coverage and endorsements requested by Buyer (except for "gap" coverage); (iv) all recording fees (other than in connection with any documents recorded in connection with the defeasance of the Existing Loan); (v) one-half of the escrow fees; and (vi) all other costs and expenses allocated to Buyer pursuant to this Agreement.

(c) All other costs shall be paid in accordance with customary practices in the County of Los Angeles.

10.8 Closing. Pursuant to Section 10.1 above, Title Company shall close the escrow for this transaction when it is in a position to issue the Title Policy and has received from Seller

and Buyer the items required of each in Sections 10.2 and 10.4 above. Title Company shall close escrow by doing the following:

(a) Recording the Grant Deed in the Official Records of the County of Los Angeles;

(b) Delivering to Buyer the Title Policy, the original documents and items listed in Section 10.2 above, and a closing statement for the escrow consistent with this Agreement and signed by Buyer and Seller (the "**Closing Statement**"), and any refund due Buyer; and

(c) Delivering to Seller the amount due Seller as shown on the Closing Statement, the original documents listed in Section 10.4 above, and a signed original of Seller's Closing Statement.

10.9 Possession. Seller shall deliver possession of the Property to Buyer on the Closing Date, subject to the rights of the Tenants under the Leases.

11. Representations and Warranties.

11.1 Representations and Warranties of Seller. Seller hereby makes the following representations and warranties to Buyer, which representations and warranties shall survive the Closing, and all of which (i) are material and are being relied upon by Buyer, and (ii) are true, complete and accurate as of the date hereof.

(a) Organization. Seller is a limited liability company, duly organized, validly existing and in good standing under the laws of the State of Delaware, and qualified to do business, and in good standing, in the State of California.

(b) Authorization. This Agreement has been duly authorized, executed, and delivered by Seller; the obligations of Seller under this Agreement are legal, valid, and binding obligations of Seller; and this Agreement does not, and at the time of Closing will not, (i) violate or conflict with the organizational documents of Seller or any member of Seller acting on Seller's behalf, (ii) violate or conflict with any judgment, decree, or order of any court applicable to or affecting Seller, (iii) breach the provisions of, or constitute a default under, any contract, agreement, instrument, or obligation to which Seller is a party or by which Seller is bound, or (iv) violate or conflict with any law, ordinance, or governmental regulation or permit applicable to Seller. All documents that are executed by Seller and that are delivered to Buyer at the Closing will be, at the time of Closing, duly authorized, executed, and delivered by Seller; the obligations of Seller under such documents will be, at the time of Closing, legal, valid, and binding obligations of Seller; and such documents will not, at the time of Closing, (i) violate or conflict with the organizational documents of Seller or any member of Seller acting on Seller's behalf, (ii) violate or conflict with any judgment, decree, or order of any court applicable to or affecting Seller, (iii) breach the provisions of, or constitute a default under, any contract, agreement, instrument, or obligation to which Seller is a party or by which Seller is bound, or

(iv) violate or conflict with any law, ordinance, or governmental regulation or permit applicable to Seller.

(c) Bankruptcy. No proceedings under any federal or state bankruptcy or insolvency laws have been commenced by or against Seller which have not been terminated; no general assignment for the benefit of creditors has been made by Seller; and no trustee or receiver of Seller's property has been appointed.

(d) Not a Foreign Person. Seller is not a foreign person within the meaning of section 1445(f)(3) of the Internal Revenue Code of 1986. Seller has read and understands the provisions of sections 18662 and 18668 of the California Revenue and Tax Code (the " **Act**") and has a "permanent place of business" within California within the meaning of the Act and the regulations and guidelines of the California Franchise Tax Board promulgated from time to time pursuant thereto.

(e) Litigation. Except as disclosed in writing to Buyer, no litigation or proceeding is pending or, to Seller's knowledge, threatened that affects the Property or Seller's ability to consummate the transactions contemplated by this Agreement.

(f) Violations. Except as disclosed in writing to Buyer, Seller has not received any written notice of any violation by the Property of any applicable rule, regulation, ordinance or government directive from any administrative or governmental authority that has not been cured.

(g) Leases; Landlord Defaults. There are no leases, rental agreements, license agreements or occupancy rights affecting the Property other than those listed on Exhibit C and any matters of record. Seller has not received any written notice of a default by Seller from any Tenant under any of the Leases that has not been cured, other than as set forth in the Tenant Estoppels.

(h) Rent Roll. Exhibit C contains a complete and correct list of all existing Leases, setting forth with respect to each Lease, the following minimum information (the "**Rent Roll**"): the name of the Tenant, the number of the room or suite occupied by the Tenant, the square footage of the space, the commencement and expiration dates, the amount of the monthly base rent payment, the current monthly additional rent payment for the Tenant share of Real Property expenses and taxes, the amount of any security deposit or prepaid rent, and the amount and due date of any payments due Tenants in the future as reimbursement for costs of tenant improvements. Seller shall deliver an updated Rent Roll to Buyer two (2) business days prior to the expiration of the Due Diligence Period, which shall be accurate as of the date set forth on the updated Rent Roll (which date shall not be more than three (3) business days prior to the date the updated Rent Roll is delivered to Buyer). Seller shall deliver a further updated Rent Roll to Buyer three (3) business days prior to the Closing Date, which shall be accurate as of the date set forth on the updated Rent Roll (which date shall not be more than three (3) business days prior to the date the updated Rent Roll is delivered to Buyer).

(i) Delinquency Report. With the exception of delinquencies in the payment of rents which are set forth on the Rent Roll, Seller has not delivered written notice to any Tenant of any default in the payment of rent under its Lease that has not been cured. Exhibit C contains a true and correct report (the "**Delinquency Report**") showing the name of each Tenant as to which a delinquency currently exists as to the payment of Rents and specifying the amount of each such delinquency, and the period of time during which each such delinquency has been outstanding. Seller shall deliver an updated Delinquency Report to Buyer two (2) business days prior to the expiration of the Due Diligence Period, which shall be accurate as of the date set forth on the updated Delinquency Report (which date shall not be more than three (3) business days prior to the date the updated Delinquency Report is delivered to Buyer). Seller shall deliver a further updated Delinquency Report to Buyer three (3) business days prior to the Closing Date, which shall be accurate as of the date set forth on the updated Delinquency Report (which date shall not be more than three (3) business days prior to the date the updated Delinquency Report is delivered to Buyer).

(j) Leases. The Documents contain a true, correct and complete copy of each Lease. Each such Lease constitutes the entire agreement between Seller and each other party thereto. As of the Closing Date, no rents due under, or any other interest in, any of the Leases will be assigned to any party other than Buyer, or otherwise pledged or encumbered in any way.

(k) Tenant Improvements; Lease Costs. Except as set forth in Exhibit C, all of the improvements to be constructed by Seller under each of the Leases, have been fully completed and paid for. Except as set forth in Exhibit C, Seller has paid, in full, any leasing commissions, except for future contingent obligations set forth in the Rent Roll.

(l) Service Contracts. Exhibit E contains a true and complete list of all Service Contracts. The Documents include true and complete copies of all Service Contracts. To Seller's knowledge, there have been no material defaults by any Party to a Service Contract which have not been cured. To Seller's knowledge, Seller is not in breach or default under any Service Contract which has not been cured. The Service Contracts constitute the entire agreement between Seller and the other parties to the Service Contracts.

(m) Insurance. Exhibit L correctly identifies the policies of casualty and liability insurance currently in effect with respect to the Property. All premiums for such insurance have been paid in full. Seller has not received any notice or request from any insurance company or Board of Fire Underwriters (or organization exercising functions similar thereto) canceling or threatening to cancel any of said policies or denying or disputing coverage thereunder.

(n) Commission Agreements. Except as expressly set forth in the Leases or on Exhibit C, there are no lease brokerage agreements, leasing commission agreements or other agreements providing for payments of any amounts for leasing activities or procuring tenants with respect to the Property, other than such commissions as may be due on future lease renewals, expansions or extensions.

(o) Environmental Releases. To Seller's knowledge, no Hazardous Materials have been discharged, released or disposed of by Seller or its members, managers, partners, directors, officers, shareholders, trustees, beneficiaries, agents, employees and representatives in violation of applicable Environmental Laws as of the date of such discharge, disposal or release As used herein, the term "Hazardous Materials" means without regard to amount and/or concentration any hazardous or toxic substance, material or waste wherever located expressly including but not limited to petroleum and petroleum derived compounds, which is included within the definition of any hazardous or toxic material, substance or waste in any federal, state or local statutes, laws, ordinances or regulations applicable to the Property, as well as any soils, ground or surface waters, wetlands or other environmental media which may be contaminated by such Hazardous Material, including the following: (a) those substances defined as a hazardous substance, hazardous waste, hazardous material, toxic substance, solid waste, pollutant or contaminant under any Environmental Law, as defined below; (b) those substances listed in the United States Department of Transportation Table [49 CFR § 172.101], or by the Environmental Protection Agency, or any successor agency, as hazardous substances [40 CFR Part 302]; (c) other substances, materials, and wastes that are regulated or classified as hazardous or toxic under federal, state or local laws or regulations applicable to the Property; and (d) any material, waste, or substance that is a petroleum or refined petroleum product or byproduct, asbestos, or any rock, including serpentine rock, which contains or might contain asbestos, chlorinated solvents, biologic waste, polychlorinated biphenyl, designated as a hazardous substance pursuant to 33 USCS §1321 or listed pursuant to 33 USCS §1317, a flammable explosive, or a radioactive material. As used herein, the term "Environmental Law" means all federal, state, local or municipal laws, rules, orders, regulations, statutes, ordinances, codes, decrees or requirements of any government authority applicable to the Property and regulating, relating to, or imposing liability or standards of conduct concerning any Hazardous Material, or pertaining to environmental conditions on or under the Property described in this Agreement, as now in effect, including, without limitation, the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) [42 USCS §§9601 et seq.]; the Resource Conservation and Recovery Act of 1976 (RCRA) [42 USCS §§6901 et seq.]; the Clean Water Act, also known as the Federal Water Pollution Control Act (FWPCA) [33 USCS §§1251 et seq.]; the Toxic Substances Control Act (TSCA) [15 USCS §§2601 et seq.]; the Hazardous Materials Transportation Act (HMTA) [49 USCS §§1801 et seq.]; the Insecticide, Fungicide, Rodenticide Act (7 USCS §§136 et seq.]; the Superfund Amendments and Reauthorization Act [42 USCS §§6901 et seq.]; the Clean Air Act [42 USCS §§7401 et seq.]; the Safe Drinking Water Act [42 USCS §§300f et seq.]; the Solid Waste Disposal Act [42 USCS §§6901 et seq.]; the Surface Mining Control and Reclamation Act [30 USCS §§1201 et seq.]; the Emergency Planning and Community Right to Know Act [42 USCS §§11001 et seq.]; the Occupational Safety and Health Act [29 USCS §§655 and 657]; the California Underground Storage of Hazardous Materials Act [Health and Safety Code §§25280 et seq.]; the California Hazardous Materials Account Act [Health and Safety Code §§25100 et seq.]; the California Safe Drinking Water and Toxic Enforcement Act [Health and Safety Code §§24249.5 et seq.]; the Porter-Cologne Water Quality Act [Water Code §§13000 et seq.], together with any amendments of or regulations promulgated under the statutes cited above, and any other federal, state or local law, statute, ordinance or regulation applicable to the Property now in effect that pertains to the regulation or protection of the environment, including ambient air, soil, soil vapor, groundwater, surface water, or land use.

For purposes of the representations and warranties given by Seller in this Agreement, the phrase "to Seller's knowledge" or other terms regarding the knowledge of Seller, shall mean the actual, current knowledge of Kennard P. Perry and Cory Kristoff, excluding constructive or imputed knowledge or duty of inquiry, existing as of the Contract Date and the Closing. In no event shall there be any personal liability on the part of any of the foregoing individuals on account of any breach of any representation or warranty of Seller herein.

11.2 Material Changes; Survival. Two (2) business days prior to the expiration of the Due Diligence Period, Seller shall deliver to Buyer a certification that all of the representations and warranties set forth in Section 11.1 remain true, complete and accurate, except to the extent of any exceptions to such representations and warranties identified in such certification. Further, if, prior to the Closing, Seller becomes aware of any fact or circumstance that would materially change a representation or warranty of Seller in this Agreement, then Seller shall promptly, and in all events at least five (5) business days prior to the Closing Date (which date shall be extended if necessary to give Buyer five business days to review such material change), give written notice of such changed fact or circumstance to Buyer. If, prior to Closing, upon Seller's notice or otherwise, Buyer becomes aware of the material untruth or inaccuracy of, or facts or circumstances that would change materially, any representation or warranty of Seller in this Agreement that was true when made by Seller, then Buyer shall have the option of: (i) waiving such breach of representation or warranty or material adverse change and completing its purchase of the Property pursuant to this Agreement; (ii) reaching agreement with Seller to adjust the terms of this Agreement to compensate Buyer for such change; or (iii) terminating this Agreement and receiving the return of the Deposit as Buyer's sole remedy prior to Closing. All of Seller's representations and warranties shall survive the Closing; provided, however, that Seller's representations and warranties set forth in Sections 11.1(d) through 11.1(i) shall survive the Closing only with respect to written claims alleging a specific breach of one or more of those representations and warranties received by Seller prior to the first anniversary of the Closing Date. Buyer shall not be entitled to any right or remedy for any inaccuracy in or breach of any representation, warranty or covenant under this Agreement or any conveyance document unless the amount of damages, in the aggregate, proximately caused by all such breaches or inaccuracies exceeds Fifty Thousand and No/100ths Dollars ($50,000). If Buyer's aggregate damages exceed Fifty Thousand and No/100ths Dollars ($50,000), Buyer shall be entitled to recover the entire first Fifty Thousand and No/100ths Dollars ($50,000) of damages suffered by Buyer. Notwithstanding anything to the contrary in this Agreement the aggregate liability of Seller under this Agreement to Buyer for any and all actions or claims by Buyer with respect to these representations and warranties that survive the Closing shall be limited to One Million Five Hundred Thousand Dollars ($1,500,000).

11.3 Representations and Warranties of Buyer. Buyer hereby makes the following representations and warranties to Seller, which representations and warranties shall survive the Closing and all of which (i) are material and are being relied upon by Seller, (ii) are true, complete and accurate in all respects as of the date hereof and shall be true, complete and accurate as of the Closing Date, and (iii) shall survive the Closing:

(a) Organization. Buyer is a limited liability company, duly organized, validly existing and in good standing under the laws of the State of Delaware, and is qualified to do business, and is in good standing, in the State of California.

(b) Authorization. This Agreement has been duly authorized, executed, and delivered by Buyer; the obligations of Buyer under this Agreement are legal, valid, and binding obligations of Buyer; and this Agreement does not, and at the time of Closing will not, (i) violate or conflict with the organizational documents of Buyer or any member of Buyer acting on Buyer's behalf, (ii) violate or conflict with any judgment, decree, or order of any court applicable to or affecting Buyer, (iii) breach the provisions of, or constitute a default under, any contract, agreement, instrument, or obligation to which Buyer is a party or by which Buyer is bound, or (iv) violate or conflict with any law, ordinance, or governmental regulation or permit applicable to Buyer. All documents that are delivered to Seller at the Closing will be, at the time of Closing, duly authorized, executed, and delivered by Buyer; the obligations of Buyer under such documents will be, at the time of Closing, legal, valid, and binding obligations of Buyer; and such documents will not, at the time of Closing, (i) violate or conflict with the organizational documents of Buyer or any member of Buyer acting on Buyer's behalf, (ii) violate or conflict with any judgment, decree, or order of any court applicable to or affecting Buyer, (iii) breach the provisions of, or constitute a default under, any contract, agreement, instrument, or obligation to which Buyer is a party or by which Buyer is bound, or (iv) violate or conflict with any law, ordinance, or governmental regulation or permit applicable to Buyer.

(c) Bankruptcy. No proceedings under any federal or state bankruptcy or insolvency laws have been commenced by or against Buyer which have not been terminated; no general assignment for the benefit of creditors has been made by Buyer; and no trustee or receiver of Buyer's property has been appointed.

12. Risk of Loss; Insurance Proceeds; Condemnation.

12.1 Damage or Destruction. In the event of damage or destruction of the Improvements that occurs prior to the Closing Date that (i) would require the expenditure of an amount less than one percent (1%) of the Purchase Price to repair, and (ii) does not permit any Government Tenant or Major Non-Government Tenant to terminate its Lease (each of the foregoing events, a "**Material Damage Event**"), Buyer and Seller shall consummate this Agreement, and Seller shall (a) assign to Buyer at Closing all rights to insurance proceeds on account of such damage or destruction, including any insurance proceeds previously received by Seller with respect to such damage or destruction, and (b) pay to Buyer the amount of the deductible or retention applicable to such damage or destruction under the insurance policy. In the event such damage or destruction results in or causes a Material Damage Event, Buyer or Seller may elect to terminate this Agreement by written notice to the other within ten (10) days after the Material Damage Event. If neither party elects to terminate this Agreement, Seller shall assign the insurance proceeds and pay the applicable deductible or retention to Buyer at Closing and Seller shall have no further responsibility to Buyer for such damage or destruction. If either party elects to terminate this Agreement, the Deposit and all interest thereon shall be refunded to Buyer and the parties shall no further obligation to each other except for those obligations which expressly survive the termination of this Agreement.

12.2 Eminent Domain. If, prior to the Closing, a taking by eminent domain of all or any portion of the Land or Improvements is pending, and such taking would (i) materially and adversely interfere with the use of the Property for its current permitted uses, (ii) materially and adversely affect ingress, egress or parking for the Property or any Tenant's access to its space, (iii) would permit the termination of any Lease by any Government Tenant or Major Non-Government Tenant, or (iv) has a value exceeding one percent (1%) of the Purchase Price (each a " **Material Taking**"), Buyer or Seller shall have the right, by delivering written notice to the other within ten (10) days after Seller delivers written notice to Buyer of such pending taking, to terminate this Agreement, in which event the Deposit and all interest thereon shall be returned to Buyer. If neither party elects to terminate this Agreement or if the taking would not result in or cause a Material Taking, then this Agreement shall remain in effect, and Seller shall assign to Buyer at Closing its rights to the compensation and damages due Seller on account of such taking (and will not settle any proceedings relating to such taking without Buyer's prior written consent) and Seller shall have no further responsibility to Buyer for such taking. Seller shall promptly (and in any event prior to the Closing) notify Buyer of any condemnation affecting the Property.

The provisions of this Section 12 shall supersede the provisions of any applicable laws with respect to the subject matter of this Section 12.

13. Assignment. Buyer may not, at any time, assign this Agreement or Buyer's rights or obligations under this Agreement, either directly or indirectly, without the prior written consent of Seller, which Seller may withhold in its sole and absolute discretion. Subject to the foregoing, this Agreement shall be binding upon, inure to the benefit of, and be enforceable by the parties hereto and their respective heirs, devisees, executors, administrators, legal representatives, successors and assigns. In connection with any approved assignment, the assignee shall assume the assignor's obligations hereunder, but assignor shall nevertheless remain liable therefor.

14. Seller's Covenants During Contract Period. Between Seller's execution of this Agreement and the Closing, or earlier termination of this Agreement as permitted hereunder, Seller shall (i) maintain the Property in good order, condition and repair, reasonable wear and tear excepted; (ii) not make any material physical changes to the Improvements; (iii) continue to manage the Property in the manner in which it is being managed; (iv) not enter into any contracts or agreements affecting the Property unless such contracts can be completed or terminated prior to the Closing or Buyer, in its sole discretion, agrees to assume such contract or agreement as of the Closing Date, in which case such contracts shall be included within the term " **Service Contracts**"; (v) not enter into any lease, amendment of lease or other agreement pertaining to the Property, or permit any tenant of the Property to enter into any sublease or assignment of lease, except as provided in Section 14.1; (vi) after the end of the Due Diligence Period, not offer the Property for sale publicly or otherwise solicit, make, pursue, negotiate or accept offers for the sale of the Property to or from any party; (viii) maintain the insurance described on Exhibit L in full force and effect, except as otherwise approved by Buyer; and (ix) not dispose of or encumber the Property or any part thereof, except for dispositions of personal property in the ordinary course of business. From and after the Contract Date, Seller shall provide Buyer with regular written updates as to the status of any leasing activity at the Property.

14.1 New Leases and Lease Amendments; Lease Expenses .

(a) If Seller desires to enter into any new lease affecting the Property (each a " **New Lease**") or any termination, amendment, modification, expansion or renewal of any existing Lease (each, a "**Lease Amendment**"), after the Contract Date but prior to Closing, Seller shall provide Buyer with a copy of the proposed New Lease or Lease Amendment and a copy of the landlord's anticipated improvement costs, tenant improvement allowances, brokerage commissions and out-of-pocket costs and expenses in connection with the New Lease or Lease Amendment for Buyer's review and approval, which approval shall not be unreasonably withheld; provided, however, Buyer shall not have the right to disapprove any New Lease or Lease Amendment prior to the expiration of the Due Diligence Period. Buyer shall advise Seller, in writing, whether Buyer approves or reasonably disapproves such proposed New Lease or Lease Amendment within three (3) business days after Buyer's receipt of the proposed New Lease or Lease Amendment; provided, however, if Buyer fails to notify Seller within such three (3) business day period, Buyer shall be deemed to have approved the proposed transaction. If after the expiration of the Due Diligence Period, Buyer reasonably disapproves of the proposed New Lease or Lease Amendment, Seller shall not enter into such New Lease or Lease Amendment. If Buyer unreasonably disapproves of the proposed New Lease or Lease Amendment, Seller shall have the full right, power and authority to execute such New Lease or Lease Amendment so long as Seller delivers to Buyer at least three (3) business days' prior written notice of such execution; provided, however, that after receipt of such notice, Buyer shall have the right to terminate this Agreement, upon written notice delivered to Seller within three (3) business days after receipt of Seller's notice of execution of such New Lease or Lease Amendment. If Buyer timely exercises such termination right, this Agreement shall terminate and the Deposit and all interest thereon shall be returned to Buyer. In all other events, this Agreement shall remain in full force and effect. Notwithstanding the foregoing, Seller acknowledges that it shall not enter into any extension or expansion of the AECOM Technology Corp. Lease during the term of this Agreement without Buyer's approval, which may be withheld at Buyer's sole discretion.

(b) New Lease Expenses. If the Closing occurs, Buyer shall assume and be responsible for (and to the extent previously paid by Seller, reimburse Seller on the Closing Date for) a pro rata portion of any and all improvement costs, tenant improvement allowances, brokerage commissions and out-of-pocket costs and expenses actually paid or incurred by Seller (collectively the " **New Lease Expenses**") arising out of or in connection with those New Leases and Lease Amendments entered into by Seller pursuant to the foregoing provisions of this Section 14.1; such pro rata portion shall equal the product of (i) the New Lease Expenses multiplied by (ii) a fraction, the numerator of which is the number of months of the lease term of the New Lease (or the number of months of the term of any exercised extension period provided by any Lease Amendment, as applicable) remaining as of the Closing Date, and the denominator of which is the total number of months of such lease term (or exercised extension period, as applicable). Seller shall be responsible for the remaining pro rata portion of the New Lease Expenses. All New Leases and Lease Amendments entered into by Seller pursuant to this Section 14.1 shall be part of the Leases, shall be deemed included on Exhibit C and shall be assumed by Buyer upon Closing.

(c) Existing Lease Expenses. Seller shall be responsible for the cost of tenant improvement work and leasing commissions required to be paid under or with respect to all Leases (and amendments thereto) entered into prior to the Contract Date and the cost of tenant improvement work, leasing commissions required to be paid under or with respect to the State Lease Amendments and the scheduled rent-free periods set forth in the State Lease Amendments (collectively, "**Existing Lease Expenses**"), and if Seller fails to deliver Buyer evidence reasonably acceptable to Buyer confirming that such Existing Lease Expenses have been paid prior to the Approval Date, Seller shall give Buyer a credit therefore at Closing which shall be calculated as follows: Buyer and Seller shall attempt to agree on the amount of the credit for such Existing Lease Expenses during the Due Diligence Period, which amount shall equal 100% of the anticipated post-Closing Existing Lease Expenses ("**Closing Leasing Credit**"). If Seller and Buyer can agree on the Closing Leasing Credit on or before the Approval Date, such amount shall be credited against the Purchase Price due from Buyer at Closing. If Seller and Buyer cannot agree on the Closing Leasing Credit at least five (5) business days prior to the expiration of the Due Diligence Period, then at least three (3) business days prior to the expiration of the Due Diligence Period, Seller shall give Buyer written notice of the amount of the Closing Leasing Credit that Seller is willing to offer. If Buyer timely delivers the Approval Notice, Buyer shall be deemed to have accepted Seller's proposed Closing Leasing Credit and Buyer will proceed with the acquisition of the Property under the terms of this Agreement. Except as otherwise agreed to by Seller and Buyer, the Closing Leasing Credit shall constitute Seller's sole and only obligations with respect to the Existing Lease Expenses, and as of the Closing Date Buyer shall assume all such obligations (as to leasing commissions only, up to the amount set forth for leasing commissions in the Closing Lease Credit) and indemnify and hold Seller harmless with respect thereto (as to leasing commissions only, up to the amount set forth for leasing commissions in the Closing Lease Credit).

15. ARBITRATION OF DISPUTES. IN THE EVENT OF ANY DISPUTE BETWEEN THE PARTIES ARISING UNDER OR RELATED TO THIS AGREEMENT, SUCH DISPUTE, SHALL BE RESOLVED BY BINDING ARBITRATION BEFORE A SINGLE ARBITRATOR. SUCH ARBITRATION MAY BE INITIATED BY EITHER PARTY BY DELIVERING WRITTEN NOTICE OF INTENT TO ARBITRATE TO THE OTHER PARTY AND TO THE SAN FRANCISCO OFFICE OF THE AMERICAN ARBITRATION ASSOCIATION ("**AAA**"), WHICH NOTICE SHALL DESCRIBE THE DISPUTE AND THE PARTY'S PROPOSAL FOR RESOLVING THE DISPUTE IN DETAIL. WITHIN THIRTY (30) DAYS AFTER DELIVERY OF SUCH NOTICE EACH PARTY SHALL PROVIDE ALL RELEVANT DOCUMENTS AND MATERIALS THAT PERTAIN TO THE DISPUTE. THE PARTIES SHALL FIRST ENDEAVOR TO AGREE ON THE ARBITRATOR, BUT IF THEY ARE UNABLE TO DO SO WITHIN TEN (10) DAYS AFTER THE ARBITRATION HAS BEEN INITIATED, THE ARBITRATOR SHALL BE SELECTED, WITHIN THIRTY (30) DAYS AFTER THE ARBITRATION WAS INITIATED, USING THE AAA PROCEDURES. THE ARBITRATOR SHALL BE A RETIRED SUPERIOR COURT JUDGE OR A LICENSED, PRACTICING ATTORNEY WHO IS SUBSTANTIALLY FAMILIAR WITH THE REAL ESTATE LAW, CUSTOM, PRACTICE, OR PROCEDURE, IN THE AREA IN WHICH THE PROPERTY IS LOCATED, PERTINENT TO THE DISPUTE BEING ARBITRATED, IN EITHER CASE WITH NOT LESS THAN TWENTY (20) YEARS CONTINUOUS EXPERIENCE AS A JUDGE AND/OR REAL ESTATE PRACTITIONER. IN

ESTABLISHING WHETHER AN ARBITRATOR IS ABLE TO SERVE, THE PARTIES SHALL ADVISE HIM OR HER OF THE NAMES OF ALL PARTIES AND THEIR AFFILIATES AND PRINCIPAL OFFICERS AND OWNERS, AND CONFIRM THAT THERE IS NO CONFLICT OF INTEREST, WHICH FOR PURPOSES HEREOF SHALL MEAN NO BUSINESS OR PERSONAL CONNECTIONS WITH THE ARBITRATOR, OR HIS OR HER FIRM, WITH ANY OF SUCH PARTIES EITHER CURRENTLY OR AT ANY TIME DURING THE IMMEDIATELY PRECEDING THREE (3) YEARS. THE ARBITRATION SHALL BE CONDUCTED PURSUANT TO THE AAA'S COMMERCIAL ARBITRATION RULES, AS MODIFIED BY THIS SECTION 15, OR BY SUCH OTHER ORGANIZATION AND RULES AS THE PARTIES MAY MUTUALLY AGREE UPON. IF AAA IS NOT AVAILABLE AND THE PARTIES CANNOT AGREE ON AN ALTERNATE CHOICE, THE PROVISIONS OF CALIFORNIA CODE OF CIVIL PROCEDURE SECTION 1280 ET. SEQ. SHALL APPLY. ALL ARBITRATION PROCEEDINGS SHALL BE CONFIDENTIAL, AND NEITHER PARTY NOR THE ARBITRATOR MAY DISCLOSE THE CONTENT OR RESULTS OF ANY ARBITRATION HEREUNDER WITHOUT THE WRITTEN CONSENT OF BOTH PARTIES. THE ARBITRATOR SHALL FOLLOW THE LAW (INCLUDING APPLICABLE STATUTES OF LIMITATIONS) AND ALL RULES OF EVIDENCE UNLESS THE PARTIES STIPULATE TO THE CONTRARY. ANY PROVISIONAL REMEDY (INCLUDING PRELIMINARY OR PERMANENT INJUNCTIONS AND WRITS OF ATTACHMENT AND POSSESSION) WHICH WOULD BE AVAILABLE FROM A COURT OF LAW OR EQUITY SHALL BE AVAILABLE FROM THE ARBITRATOR PENDING COMPLETION OF THE ARBITRATION. THE BENEFITED PARTY OF SUCH PROVISIONAL REMEDY SHALL BE ENTITLED TO ENFORCE SUCH REMEDY IN COURT IMMEDIATELY, EVEN THOUGH A FINAL ARBITRATION AWARD HAS NOT YET BEEN RENDERED. WITHIN THIRTY (30) DAYS AFTER HIS OR HER APPOINTMENT, THE ARBITRATOR SHALL HEAR AND DECIDE THE DISPUTE SUBMITTED TO ARBITRATION HEREUNDER AND SHALL PROMPTLY PREPARE A WRITTEN DECISION ON THE MERITS OF THE MATTERS IN DISPUTE, WHICH DECISION SHALL STATE THE FACTS AND LAW RELIED UPON AND THE REASONS FOR THE ARBITRATOR'S DECISION. THE ARBITRATOR MAY, AT HIS OR HER DISCRETION, ELECT WHETHER TO MEET WITH THE PARTIES AND WHETHER TO CONDUCT A HEARING ATTENDED BY ALL PARTIES; PROVIDED, HOWEVER, THAT FOR DISPUTES INVOLVING $50,000.00 OR MORE, THE ARBITRATOR SHALL CONDUCT A HEARING. DISCOVERY SHALL BE ALLOWED IN ACCORDANCE WITH CALIFORNIA CODE OF CIVIL PROCEDURE 1283.05. THE ARBITRATOR SHALL HAVE COMPLETE DISCRETION TO RESOLVE DISCOVERY DISPUTES, TO ORDER THE PRODUCTION OF DOCUMENTS AND PRESENTATION OF WITNESSES AND TO LIMIT SUCH DISCOVERY, INCLUDING THE NUMBER AND SCOPE OF DEPOSITIONS THAT MAY BE TAKEN BY THE PARTIES. PRIOR TO ISSUING HIS OR HER FINAL WRITTEN DECISION, THE ARBITRATOR SHALL INFORM THE PARTIES, IN WRITING, OF THE ARBITRATOR'S EXPECTED DECISION ON THE MATTER AND THE REASONS THEREFORE AND GIVE THE PARTIES FIVE (5) BUSINESS DAYS TO SUBMIT ADDITIONAL ARGUMENTS OR INFORMATION, IN WRITING, TO THE ARBITRATOR AND THE OTHER PARTIES. THE AWARD OR DECISION OF THE ARBITRATOR, WHICH MAY INCLUDE AN ORDER OF SPECIFIC

PERFORMANCE, SHALL BE FINAL AND BINDING ON ALL PARTIES AND ENFORCEABLE IN ANY COURT OF COMPETENT JURISDICTION; PROVIDED, HOWEVER, THAT THE AWARD MAY BE VACATED OR CORRECTED FOR ANY OF THE REASONS PERMITTED UNDER AND PURSUANT TO CALIFORNIA CODE OF CIVIL PROCEDURE SECTIONS 1286.2 OR 1286.6. THE ARBITRATOR SHALL HAVE NO AUTHORITY TO MODIFY ANY OF THE TERMS OF THIS AGREEMENT. THE FEES AND EXPENSES OF THE ARBITRATOR AND THE COSTS AND ATTORNEYS' FEES OF THE PREVAILING PARTY SHALL BE PAID BY THE PARTY WHO IS NOT THE PREVAILING PARTY, AS DEFINED IN SECTION 18.6 (ATTORNEYS' FEES) AND DETERMINED BY THE ARBITRATOR IN ITS DECISION.

NOTICE: BY INITIALING IN THE SPACE BELOW YOU ARE AGREEING TO HAVE ANY DISPUTE ARISING OUT OF THE MATTERS INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION DECIDED BY NEUTRAL ARBITRATION AS PROVIDED BY CALIFORNIA LAW AND YOU ARE GIVING UP ANY RIGHTS YOU MIGHT POSSESS TO HAVE THE DISPUTE LITIGATED IN A COURT OR JURY TRIAL. BY INITIALING IN THE SPACE BELOW YOU ARE GIVING UP YOUR JUDICIAL RIGHTS TO DISCOVERY AND APPEAL, UNLESS THOSE RIGHTS ARE SPECIFICALLY INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION. IF YOU REFUSE TO SUBMIT TO ARBITRATION AFTER AGREEING TO THIS PROVISION, YOU MAY BE COMPELLED TO ARBITRATE UNDER THE AUTHORITY OF THE CALIFORNIA CODE OF CIVIL PROCEDURE. YOUR AGREEMENT TO THIS ARBITRATION PROVISION IS VOLUNTARY.

WE HAVE READ AND UNDERSTAND THE FOREGOING AND AGREE TO SUBMIT DISPUTES ARISING OUT OF THE MATTERS INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION TO NEUTRAL ARBITRATION

Seller	Buyer

16. Indemnification. Each party hereby agrees to indemnify, defend, protect and hold harmless the other party from and against any and all claims, demands, liabilities, costs and damages, including without limitation, reasonable attorneys' fees (collectively, "**Claims**") suffered by the other party and resulting from or arising out of all third-party tort claims and similar claims of the type that would typically be insured under a Commercial General Liability Insurance Policy which are based on actions, facts or circumstances existing or occurring during the indemnifying party's ownership of the Property, excluding any Claims related to hazardous substances. All of the indemnifications set forth in this Section 16 shall survive the Closing and conveyance of the Property to Buyer.

17. Miscellaneous.

18. Notice. All notices and any other communications permitted or required under this Agreement must be in writing and will be effective (i) immediately upon delivery in person or by facsimile, provided delivery is made during regular business hours or receipt is acknowledged by

a person reasonably believed by the delivering party to be employed by the recipient and that for all facsimiles, good and complete transmission is confirmed by the sending facsimile machine and a copy of the notice is concurrently mailed pursuant to clause (iii) below; or (ii) upon the actual delivery as evidenced by executed receipt of the recipient if delivered by a nationally recognized delivery service for overnight delivery, provided delivery is made during regular business hours or receipt is acknowledged by a person reasonably believed by the delivering party to be employed by the recipient; or (iii) or the date shown on the return receipt if delivered by the United States Postal Service, certified mail, return receipt requested, postage prepaid and with the return receipt returned to the sender marked as delivered, undeliverable or rejected. In the case of any notices sent pursuant to clauses (ii) or (iii) above, the sender shall also send a copy of such notice by email, which email shall be sent no later than 6:00 p.m. (Pacific Time) on the date such notice is deposited with the delivery service or United States Postal Service. The inability to deliver because of a changed address of which no notice was given, or rejection or other refusal to accept any notice, shall be deemed to be the receipt of the notice as of the first date of such inability to deliver or rejection or refusal to accept. Any notice to be given by any party hereto may be given by the counsel for such party. All notices must be properly addressed and delivered to the parties at the addresses set forth below, or at such other addresses as either party may subsequently designate by written notice given in the manner provided in this Section 18:

18.1 Headings. The headings used herein are for purposes of convenience only and should not be used in construing the provisions hereof.

18.2 Covenant of Further Assurances. The parties hereby agree to execute and deliver such other documents and instruments (including, without limitation, additional escrow instructions in conformity with this Agreement), and to take such other actions, whether before or after Closing, as may reasonably be required and which may be necessary to consummate this transaction and to otherwise effectuate the agreements of the parties hereto; provided that such additional documents, instruments, or actions shall not impose upon the parties any obligations, duties, liabilities or responsibilities which are not expressly provided for in this Agreement.

18.3 Entire Agreement. This document represents the final, entire and complete agreement between the parties with respect to the subject matter hereof and supersedes all other prior or contemporaneous agreements, communications or representations, whether oral or written, express or implied, including any letters of intent, including that certain Confidentiality Agreement 200 & 300 Oceangate by and between Molina and Seller. The parties acknowledge and agree that they may not and are not relying on any representation, promise, inducement, or other statement, whether oral or written and by whomever made, that is not contained expressly in this Agreement. This Agreement may only be modified by a written instrument signed by representatives authorized to bind both parties. Oral modifications are unenforceable.

18.4 Partial Invalidity. If any term, covenant or condition of this Agreement or its application to any person or circumstances shall be held to be illegal, invalid or unenforceable, the remainder of this Agreement or the application of such term or provisions to other persons or circumstances shall not be affected, and each term hereof shall be legal, valid and enforceable to the fullest extent permitted by law, unless an essential purpose of this Agreement would be defeated by the loss of the illegal, unenforceable, or invalid provision. In the event of such partial invalidity, the parties shall seek in good faith to agree on replacing any such legally invalid provisions with valid provisions which, in effect, will, from an economic viewpoint, most nearly and fairly approach the effect of the invalid provision and the intent of the parties in entering into this Agreement.

18.5 No Waiver. No consent or waiver by either party to or of any breach or non-performance of any representation, condition, covenant or warranty shall be enforceable unless in a writing signed by the party entitled to enforce performance, and such signed consent or waiver shall not be construed as a consent to or waiver of any other breach or non-performance of the same or any other representation, condition, covenant, or warranty.

18.6 Attorneys' Fees. In the event of any arbitration or litigation between the parties, whether based on contract, tort or other cause of action or involving bankruptcy or similar proceedings, in any way related to this Agreement, the non-prevailing party shall pay to the prevailing party all reasonable attorneys' fees and costs and expenses of any type, without restriction by statute, court rule or otherwise, incurred by the prevailing party in connection with any action or proceeding (including arbitration proceedings, any appeals and the enforcement of any judgment or award), whether or not the dispute is litigated or prosecuted to final judgment. The "prevailing party" shall be determined based upon an assessment of which party's major arguments or positions taken in the action or proceeding could fairly be said to have prevailed (whether by compromise, settlement, abandonment by the other party of its claim or defense, final decision, after any appeals, or otherwise) over the other party's major arguments or positions on major disputed issues.

18.7 Brokers and Finders. Neither party has had any contact or dealings regarding the Property, through any licensed real estate broker or other persons who can claim a right to a commission or finder's fee in connection with this transaction, except for CB Richard Ellis, Inc., representing Seller (the " **Selling Broker**") and McKinney Advisory Group, Inc., representing Buyer (the " **Buying Broker**"). The parties agree that Seller shall pay a brokerage commission to Selling Broker, pursuant to its separate agreement with the Selling Broker. The parties agree that Buyer shall pay any amount owing to Buying Broker pursuant to its separate agreement with the Buying Broker. In the event that any other party claims a commission or finder's fee in this transaction, the party through whom the party makes its claim shall be responsible for said commission or fee and shall indemnify the other against all costs and expenses (including reasonable attorneys' fees) incurred in defending against the same. This indemnification obligation shall survive the Closing or termination of this Agreement.

18.8 Time of the Essence. Time is of the essence of this Agreement.

18.9 Governing Law; Forum. This Agreement is entered into and shall be governed by and construed in accordance with the laws of the State of California (without giving effect to its choice of law principles).

18.10 Interpretation. All parties have been represented by counsel in the preparation and negotiation of this Agreement, and this Agreement shall be construed according to the fair meaning of its language. The rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be employed in interpreting this Agreement. Unless the context clearly requires otherwise, (i) the plural and singular numbers shall each be deemed to include the other; (ii) the masculine, feminine, and neuter genders shall each be deemed to include the others; (iii) "shall," "will," or "agrees" are mandatory, and "may" is permissive; (iv) "or" is not exclusive; (v) "includes" and "including" are not limiting, absent express language to the contrary; (vi) "days" means calendar days unless specifically provided otherwise; and (vii) "business day" means any day other than Saturday, Sunday, or any day that is an "optional bank holiday" under Section 7.1 of the California Civil Code, whether or not any particular bank is open for business on such optional bank holiday.

18.11 IRS Form 1099-S Designation. In order to comply with information reporting requirements of Section 6045(e) of the Internal Revenue Code of 1986, as amended, and the Treasury Regulations thereunder, the parties agree (i) to execute an IRS Form 1099-S Designation Agreement to designate the Title Company (the "**Designee**") as the party who shall be responsible for reporting the contemplated sale of the Property to the Internal Revenue Service (the " **IRS**") on IRS Form 1099-S; and (ii) to provide the Designee with the information necessary to complete Form 1099-S.

18.12 Third Party Beneficiaries. This Agreement has been made solely for the benefit of the parties hereto and their respective successors and permitted assigns, and nothing in this Agreement is intended to, or shall, confer upon any other person any benefits, rights or remedies under or by reason of this Agreement.

18.13 Compliance With Laws. Each party shall comply with all applicable laws, rules, regulations, orders, consents and permits in the performance of all of their obligations under this Agreement.

18.14 Counterparts. This Agreement may be signed in any number of counterparts with the same effect as if the signatures to each counterpart were upon a single instrument, and is intended to be binding when all parties have delivered their signatures to the other parties. Signatures may be delivered by facsimile transmission or by e-mail in a portable document format (*pdf*). All counterparts shall be deemed an original of this Agreement.

18.15 Exhibits. All Recitals and Exhibits referred to in this Agreement are incorporated herein by reference and shall be deemed part of this Agreement.

18.16 Authority. The individuals executing this Agreement on behalf of Seller and Buyer individually represent and warrant that he or she has been authorized to do so and has the power to bind the party for whom they are signing.

18.17 Exchange Transaction. Buyer agrees upon the request of Seller to cooperate with Seller in closing all or part of this transaction as an exchange pursuant to Internal Revenue Code Section 1031, provided that:

(a) Buyer shall incur no additional expense or liability in connection therewith and shall not be required to make any representations or warranties, incur any personal liabilities or hold title to any property other than the Property;

(b) Seller shall indemnify, protect, defend and hold Buyer harmless from any claims, liabilities, demands, causes of action, judgments, expenses, costs and attorneys' fees in connection with such exchange or which result from Buyer's compliance with this paragraph, which obligation shall survive the Closing or termination of this Agreement; and

(c) The Closing is not extended or delayed by the exchange and the completion of the exchange is not a condition to Seller's obligation to close the Escrow.

18.18 Confidentiality. Buyer and Seller shall each maintain as confidential any and all material or information about the other, the terms of this Agreement, and the Property, and shall not disclose such information to any third party, except, in the case of Buyer, to Buyer's investment bankers, lender or prospective lenders, insurance and reinsurance firms, accountants, attorneys, environmental and other consultants, as may be reasonably required for the consummation of this transaction, as required by law or in connection with any arbitration or litigation between the parties, and except, in the case of Seller, to Seller's existing lender, attorneys, accountants and other professional consultants, as may be reasonably required for the consummation of this transaction, as required by law or in connection with any arbitration or litigation between the parties. Neither party shall issue a press release or other public statement about this Agreement or the transactions contemplated by this Agreement without the other party's prior written consent, unless such release or statement is required by law. Seller acknowledges that Buyer's ultimate parent is a publicly traded company and that Buyer is, therefore, subject to laws and regulations regarding the disclosure and dissemination of business information. Buyer acknowledges that in the event this Agreement terminates for any reason, Seller has the right and the obligation to disclose to subsequent purchasers of the Property the price and material terms of this Agreement, and Buyer agrees that such disclosure is a permitted disclosure under this Section 18.18.

[*Signatures on following page*]

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Contract Date.

	Year Ended December 31,				
	2010	2009(1)	2008(1)	2007	2006
	(Dollars in thousands)				
Earnings:					
Income before income taxes	$ 89,492	$ 38,157	$ 94,324	$ 92,722	$ 73,458
Add fixed charges:					
Interest expense, including amortization of debt discount and exp	15,509	13,777	13,231	5,605	2,353
Estimated interest portion of rental expense	4,524	5,181	4,370	3,988	2,682
Total fixed charges	20,033	18,958	17,601	9,593	5,035
Total earnings available for fixed charges	$109,525	$57,115	$111,925	$102,315	$ 78,493
Fixed Charges from above	$ 20,033	$18,958	$ 17,601	$ 9,593	$ 5,035
Ratio of Earnings to Fixed Charges	5.6	3.0	6.4	10.7	15.6
Total rent expense	$ 25,134	$ 20,723	$ 17,481	$ 18,127	$12,193
Interest factor	18%	25%	25%	22%	22%
Interest component of rental expense	$ 4,524	$ 5,181	$ 4,370	$ 3,988	$ 2,682

(1) Effective January 1, 2008 through December 31, 2009, income tax expense included both the Michigan business income tax, or BIT, and Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, we have recorded the MGRT as a premium tax and not as an income tax. We will continue to record the BIT as an income tax. For the years ended December 31, 2009, and 2008, amounts for premium tax expense and income tax expense have been reclassified to conform to this presentation. The MGRT amounted to $6.2 million, $5.5 million, and $5.1 million for the years ended December 31, 2010, 2009, and 2008, respectively.

SECTION 302 CERTIFICATION

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed this annual report on Form 10-K for the fiscal year ended December 31, 2010 of Molina Healthcare, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
September 30, 2010

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program. Our licensed health plans in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin currently serve approximately 1.6 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are locally operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Effective January 1, 2010, we terminated operations at our small Medicare health plan in Nevada. Our subsidiary, Molina Medicaid Solutions, provides business processing and information technology administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On September 1, 2010, we acquired Abri Health Plan, a Medicaid managed care organization based in Milwaukee, Wisconsin. As of September 30, 2010, Abri Health Plan served approximately 28,000 Medicaid members. See Note 3, "Business Combinations," for more information relating to this acquisition.

On May 1, 2010, we acquired a health information management business which now operates under the name, *Molina Medicaid Solutions*SM. Molina Medicaid Solutions provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. See Note 3, "Business Combinations," for more information relating to this acquisition.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc. and all majority owned subsidiaries. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included. Except as described below under "Reclassifications," such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated in consolidation. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2010. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2009. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2009 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2009 audited financial statements.

Reclassifications

Effective January 1, 2010, we have recorded the Michigan modified gross receipts tax as a premium tax and not as an income tax. For the three month and nine month periods ended September 30, 2009, amounts for premium tax expense and income tax expense have been reclassified to conform to this presentation. See Note 2, "Significant Accounting Policies."

In prior periods, general and administrative expenses have included premium tax expenses. Beginning in the second quarter of 2010, we have reported premium tax expenses on a separate line in the accompanying consolidated statements of income. Prior periods have been reclassified to conform to this presentation.

2. Significant Accounting Policies

Molina Medicaid Solutions Segment Revenue Recognition and Deferred Contract Costs

As a result of our recent acquisition of Molina Medicaid Solutions, we report on the results of our operations using two business segments. The Molina Medicaid Solutions segment derives its revenue from service arrangements. This segment provides technology solutions to state Medicaid programs that include system development, system integration, and technology outsourcing services. In addition, this segment offers business process outsourcing to state Medicaid agencies that handle key administrative functions such as claims processing, provider enrollment, pharmacy drug rebate services, recipient eligibility management, and pre-authorization services. The following is an update of our accounting policies on revenue recognition, as included in our December 31, 2009 audited financial statements, which specifically addresses revenue recognition for service arrangements.

Under certain of the contracts we acquired, the development of the MMIS solution has already been completed. Under these contracts, we provide business process outsourcing and technology outsourcing services, and recognize outsourcing services revenue on a straight-line basis over the remaining term of the contract.

For fixed-price contracts where the system design and development phase was in process as of the acquisition date, we apply contract accounting because we will deliver significantly modified and customized MMIS software to the customer under the terms of the contract. Additionally, these contracts contain multiple deliverables; once the system design and development phase is complete, we provide technology outsourcing services and business process outsourcing. We do not have vendor specific objective evidence of the fair value of the technology outsourcing and business process outsourcing components of the contracts because we do not have history of offering these services on a stand-alone basis. As such, we account for these fixed-price service contracts as a single element.

Therefore, in general, we recognize contract revenues as a single element ratably over the performance period, or contract term, of the outsourcing services because these are the last elements to be delivered under the contract. Such contract terms typically range from five to 10 years. In those service arrangements where final acceptance of a system or solution by the customer is required, contract revenues and costs are deferred until all material acceptance criteria have been met. Performance will often extend over long periods, and our right to receive future payment depends on our future performance in accordance with the agreement. Revenues earned in excess of related billings are accrued, whereas billings in excess of revenues earned are deferred until the related services are provided.

Deferred contract costs include direct and incremental costs such as direct labor, hardware and software. We also defer and subsequently amortize certain transition costs related to activities that transition the contract from the design, development, and implementation phase to the operational, or business process outsourcing, phase. Deferred contract costs, including transition costs, are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period. Indirect costs associated with MMIS service contracts are generally expensed as incurred.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Property and Equipment

Property and equipment are stated at historical cost. Replacements and major improvements are capitalized, and repairs and maintenance are charged to expense as incurred. Furniture and equipment are generally depreciated using the straight-line method over estimated useful lives ranging from three to seven years. Software developed for internal use is capitalized. Software is generally amortized over its estimated useful life of three years. Leasehold improvements are amortized over the term of the lease, or over their useful lives from five to 10 years, whichever is shorter. Buildings are depreciated over their estimated useful lives of 31.5 years.

As discussed in "Molina Medicaid Solutions Segment Revenue Recognition and Deferred Contract Costs" above, the costs associated with certain equipment and software, which may be ultimately transferred to our clients under fixed-price contracts, are capitalized and recorded as deferred contract costs. Such costs are amortized on a straight-line basis over the performance period, consistent with the revenue recognition period.

Goodwill and Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of net assets acquired. Identifiable intangible assets (consisting principally of purchased contract rights and provider contracts) are amortized on a straight-line basis over the expected period to be benefited (generally between one and 15 years).

Goodwill and indefinite-lived assets are not amortized, but are subject to impairment tests on an annual basis or more frequently if indicators of impairment exist. We use a discounted cash flow methodology to assess the fair values of our reporting units. If the carrying values of our reporting units exceed the fair values, we perform a hypothetical purchase price allocation. Impairment is measured by comparing the goodwill derived from the hypothetical purchase price allocation to the carrying value of the goodwill and indefinite-lived asset balance.

Identifiable intangible assets associated with Molina Medicaid Solutions are classified as either contract backlog or customer relationships.

The contract backlog intangible asset comprises all contractual cash flows anticipated to be received during the remaining contracted period for each specific contract relating to work that was performed prior to the acquisition. The contract backlog intangible has been developed on a contract-by-contract basis. The amortization of that portion of the contract backlog intangible associated with contracts for which revenue recognition has not yet commenced is deferred until revenue recognition has begun. Because each acquired contract constitutes a single revenue element, amortization of the contract backlog intangible is recorded to contra-service revenue so that amortization is matched to any revenues associated with contract performance that occurred prior to the acquisition date. The contract backlog intangible asset is amortized on a straight-line basis for each specific contract over periods generally ranging from one to six years.

The customer relationship intangible asset comprises all contractual cash flows that are anticipated to be received during the option periods of each specific contract as well as anticipated renewals of those contracts. The customer relationship intangible is amortized on a straight-line basis for each specific contract over periods generally ranging from four to nine years.

The determination of the value of identifiable intangible assets requires us to make estimates and assumptions about estimated asset lives, future business trends, and growth. In addition to annual impairment testing, we continually evaluate whether events and circumstances have occurred that indicate the balance of identifiable intangible assets may not be recoverable. In evaluating impairment, we compare the estimated fair value of the intangible asset to its underlying book value. Such evaluation is significantly impacted by estimates and assumptions of future revenues, costs and expenses, and other factors. If an event occurs that would cause us to revise our estimates and assumptions used in analyzing the value of our identifiable intangible assets, such revision could result in a non-cash impairment charge that could have a material impact on our financial results.

Depreciation and Amortization

As noted above, the amortization of the contract backlog intangibles associated with the acquisition of Molina Medicaid Solutions is recorded as contra-service revenue, rather than as part of depreciation and amortization, to match revenues associated with contract performance that occurred prior to the acquisition date. Additionally, most of the depreciation associated with Molina Medicaid Solutions is recorded as cost of service revenue. The following table presents all depreciation and amortization recorded in our consolidated financial statements:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In thousands)			
Depreciation and amortization	$ 11,954	$ 9,832	$ 33,234	$ 28,468
Amortization recorded as contra-service revenue	2,655	—	4,246	—
Depreciation recorded as cost of service revenue	1,964	—	3,005	—
Depreciation and amortization reported in our consolidated statements of cash flows	$ 16,573	$ 9,832	$ 40,485	$ 28,468

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $11.0 million and $4.1 million at September 30, 2010, and December 31, 2009, respectively. Approximately $8.4 million of the unrecognized tax benefits recorded at September 30, 2010, relates to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $7.8 million and $3.4 million as of September 30, 2010 and December 31, 2009, respectively. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities will decrease by approximately $0.5 million due to the expiration of statute of limitations.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. Our accrual for the payment of interest relating to unrecognized tax benefits was $74,000 and $75,000 as of September 30, 2010 and December 31, 2009, respectively.

Through December 31, 2009, income tax expense included both the Michigan business income tax, or BIT, and Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, we have recorded the MGRT as a premium tax and not as an income tax. We will continue to record the BIT as an income tax. The MGRT amounted to $4.6 million and $3.4 million for the nine months ended September 30, 2010, and 2009, respectively.

Generally, the MGRT is a 0.976% tax (statutory rate of 0.8% plus 21.99% surtax) on modified gross receipts, which for most taxpayers is defined as receipts less purchases from other firms. Managed care organizations, however, are not currently allowed to deduct payments to providers in determining modified gross receipts. As a result, the MGRT is 0.976% of our Michigan plan's receipts and does not vary with levels of pretax income or margins. We believe that presentation of the MGRT as a premium tax produces financial statements that are more useful to the reader.

Recent Accounting Pronouncements

Revenue Recognition. In late 2009, the Financial Accounting Standards Board, or FASB, issued the following new accounting guidance which is first applicable for our January 1, 2011 reporting:

- ASU No. 2009-14, Software (ASC Topic 985) — *Certain Revenue Arrangements That Include Software Elements*, a consensus of the FASB Emerging Issues Task Force. This guidance modifies the scope of ASC Subtopic 985-605 — *Software-Revenue Recognition* to exclude from its requirements (a) non-software components of tangible products and (b) software components of tangible products that are sold, licensed or leased with tangible products when the software components and non-software components of the tangible product function together to deliver the tangible product's essential functionality. We do not expect the update to impact our consolidated financial position, results of operations or cash flows.

- ASU No. 2009-13, Revenue Recognition (ASC Topic 605) — *Multiple-Deliverable Revenue Arrangements*, a consensus of the FASB Emerging Issues Task Force. This guidance modifies previous requirements by allowing the use of the "best estimate of selling price" in the absence of vendor-specific objective evidence ("VSOE") or verifiable objective evidence ("VOE") (now referred to as "TPE" or third-party evidence) for determining the selling price of a deliverable. A vendor is now required to use its best estimate of the selling price when more objective evidence of the selling price cannot be determined. In addition, the residual method of allocating arrangement consideration is no longer permitted. We do not expect the update to impact our consolidated financial position, results of operations or cash flows.

Fair Value Measurements. In January 2010, the FASB issued the following guidance which expanded the required disclosures about fair value measurements. Effective for interim and annual reporting beginning after December 15, 2009, with one new disclosure effective after December 15, 2010, we adopted this guidance in full during the interim period ended March 31, 2010.

- ASU No. 2010-6, Fair Value Measurements and Disclosures (Topic 820) — *Improving Disclosures about Fair Value Measurements*. This guidance requires (a) separate disclosure of the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements along with the reasons for such transfers, (b) information about purchases, sales, issuances and settlements to be presented separately in the reconciliation for Level 3 fair value measurements, (c) fair value measurement disclosures for each class of assets and liabilities and (d) disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements for fair value measurements that fall in either Level 2 or Level 3. The adoption of this guidance did not impact our consolidated financial position, results of operations or cash flows.

3. Business Combinations

Wisconsin Health Plan

On September 1, 2010, Molina acquired 100% of the voting equity interests in Avatar Partners, LLC, which is the sole shareholder of Abri Health Plan, Inc. ("Abri"), a Medicaid managed care organization based in Milwaukee, Wisconsin. This acquisition is consistent with our stated strategy to enter markets with competitive provider communities, supportive regulatory environments, significant size and, where practicable, mandated Medicaid managed care enrollment.

We expect the final purchase price for the Abri acquisition to be approximately $16 million, subject to adjustments. As of September 30, 2010, we had paid $5 million of the total purchase price. There will be two subsequent measurement dates (November 1, 2010 and February 1, 2011) on which we will compute amounts due to the sellers based on the plan's membership on those dates. Following the final membership reconciliation on February 1, 2011, 10% of the final purchase price will be deposited to an escrow account payable at the later of 12 months or the resolution of all unresolved claims. In connection with this acquisition, we recorded $6.2 million in goodwill, and $3.9 million in various definite-lived identifiable intangible assets, with a weighted average useful life of 6.3 years. Accumulated amortization totaled approximately $135,000 as of September 30, 2010, which reflects amortization expense recorded since the acquisition date. We expect to record amortization relating to this acquisition in future years as follows— 2011: $1.1 million, 2012: $432,000, 2013: $396,000, 2014: $325,000, and 2015: $281,000.

Molina Medicaid Solutions

On May 1, 2010, we acquired a health information management business that was previously an operating unit of Unisys Corporation. This business now operates under the name *Molina Medicaid Solutions*SM, or Molina Medicaid Solutions. Molina Medicaid Solutions provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems (MMIS). MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program. As a result of this acquisition, we are diversifying our core health plan business, and we believe that the use of a common claims processing platform across our health plans and our new MMIS business will enable us to achieve synergies in the operations of both.

We paid $131.3 million to acquire Molina Medicaid Solutions. The acquisition was funded with available cash of $26 million and $105 million drawn under our credit facility. In connection with the closing, both the fourth amendment and the fifth amendment to our credit facility became effective (see Note 11, "Long-Term Debt").

Recording of assets acquired and liabilities assumed: The transaction has been accounted for using the acquisition method of accounting which requires, among other things, that most assets acquired and liabilities assumed be recognized at their fair values as of the acquisition date. Accounts receivable are based on gross contractual amounts receivable, substantially all of which we expect to collect because the creditors are state governments.

The following table summarizes the provisional acquisition-date fair values of the assets acquired and liabilities assumed:

	May 1, 2010 (In thousands)
Assets	
Accounts receivable	$ 17,128
Other current assets	3,884
Equipment and other long-term assets	783
Identifiable intangible assets	48,150
Goodwill	72,943
	142,888
Less: liabilities	
Accounts payable and accrued liabilities	11,153
Deferred tax liability	115
Other long-term liabilities	370
Net assets acquired	$ 131,250

The recorded amounts for assets and liabilities are provisional and subject to change. We will finalize the amounts recognized as we obtain the information necessary to complete the analyses, but by no later than December 31, 2010.

A single estimate of fair value results from a complex series of judgments about future events and uncertainties and relies heavily on estimates and assumptions. Results that differ from the estimates and judgments used to determine the estimated fair value assigned to each class of assets acquired and liabilities assumed, as well as asset lives, can materially impact our results of operations.

Accounts receivable: Accounts receivable are stated at fair value, based on the gross contractual amounts receivable. We expect to collect substantially all of the accounts receivable because the creditors are state governments.

Identifiable intangible assets: The following table is a summary of the fair value estimates of the identifiable intangible assets and their weighted-average useful lives:

	Estimated Fair Value (In thousands)	Weighted Average Useful Life (years)
Customer relationships	$ 24,550	5.2
Contract backlog	23,600	3.3
	$ 48,150	

Accumulated amortization totaled approximately $6.4 million as of September 30, 2010, which reflects total amortization recorded since the acquisition date. For identifiable intangible assets recorded as of September 30, 2010, we expect to record amortization in future years as follows — 2011: $11.2 million, 2012: $10.6 million, 2013: $7.1 million, 2014: $5.3 million, and 2015: $1.7 million.

Goodwill: Goodwill in the amount of $72.9 million was recognized for this acquisition, of which approximately $70.9 million is expected to be deductible for tax purposes. The total goodwill amount was calculated as the excess of the consideration transferred over the net assets recognized and represents the future economic benefits arising from other assets acquired that could not be individually identified and separately recognized. The goodwill recorded as part of the acquisition of Molina Medicaid Solutions includes:

- Expected synergies and other benefits that we believe will result from combining the operations of Molina Medicaid Solutions with the operations of Molina;
- Any intangible assets that do not qualify for separate recognition such as the assembled workforce; and
- The value of the going-concern element of Molina Medicaid Solutions' existing businesses (the higher rate of return on the assembled collection of net assets versus acquiring all of the net assets separately).

Accounts payable and accrued liabilities: Accounts payable and accrued liabilities include $1.3 million payable to the seller of Molina Medicaid Solutions, which represented a working capital adjustment provided in the purchase agreement. The working capital adjustment provided that the net working capital, or current assets minus current liabilities, on Molina Medicaid Solutions' opening balance sheet would equal $10 million. To the extent the final net working capital conveyed by the seller exceeded $10 million, the amount would be payable back to the seller; conversely, to the extent that net working capital conveyed by the seller was less than $10 million, the shortage would be a receivable from the seller. Thus, the $1.3 million amount described above represents the amount payable to the seller for net working capital in excess of $10 million on the opening balance sheet, and was paid to the seller in August 2010.

Pro-forma impact of the acquisition: The unaudited pro-forma results presented below include the effects of the acquisition as if it had been consummated as of January 1, 2010 and 2009. The pro-forma results include the amortization associated with the acquired intangible assets and interest expense associated with debt used to fund the acquisition. To better reflect the combined operating results, material non-recurring charges directly attributable to the transaction have been excluded. In addition, the pro-forma results do not include any anticipated synergies or other expected benefits of the acquisition. Accordingly, the unaudited pro forma financial information below is not necessarily indicative of either future results of operations or results that might have been achieved had the acquisition been consummated as of January 1, 2010 or January 1, 2009.

	Three Months Ended Sept. 30,	Nine Months Ended Sept. 30,	
	2009	2010	2009
Revenue	$ 942,846	$ 3,044,149	$ 2,781,356
Net income	$ 8,557	$ 40,645	$ 34,369
Diluted earnings per share	$ 0.33	$ 1.52	$ 1.32

4. Segment Reporting

Our reportable segments are consistent with how we manage the business and view the markets we serve. In the second quarter of 2010, we added a segment to our internal financial reporting structure as a result of the acquisition of Molina Medicaid Solutions described in Note 3, "Business Combinations."

We now report our financial performance based on the following two reportable segments — Health Plans and Molina Medicaid Solutions. The Health Plans segment represents our former single-segment health plan operations. The Molina Medicaid Solutions segment represents the operations of our new MMIS solutions business.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

Operating segment revenues and profitability for the three months and nine months ended September 30, 2010 and 2009 were as follows:

	Health Plans	Molina Medicaid Solutions	Total
		(In thousands)	
Three months ended September 30, 2010			
Premium revenue	$ 1,005,115	$ —	$ 1,005,115
Service revenue	—	32,271	32,271
Investment income	1,760	—	1,760
Total revenue	$ 1,006,875	$ 32,271	$ 1,039,146
Operating income	$ 28,796	$ 1,157	$ 29,953
Nine months ended September 30, 2010			
Premium revenue	$ 2,947,020	$ —	$ 2,947,020
Service revenue	—	53,325	53,325
Investment income	4,880	—	4,880
Total revenue	$ 2,951,900	$ 53,325	$ 3,005,225
Operating income	$ 65,407	$ 6,162	$ 71,569
Three months ended September 30, 2009			
Premium revenue	$ 914,805	$ —	$ 914,805
Service revenue	—	—	—
Investment income	1,707	—	1,707
Total revenue	$ 916,512	$ —	$ 916,512
Operating income	$ 15,089	$ —	$ 15,089
Nine months ended September 30, 2009			
Premium revenue	$ 2,697,796	$ —	$ 2,697,796
Service revenue	—	—	—
Investment income	7,336	—	7,336
Total revenue	$ 2,705,132	$ —	$ 2,705,132
Operating income	$ 57,738	$ —	$ 57,738

Reconciliation to Income before Income Taxes

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
		(In thousands)		
Segment operating income	$ 29,953	$ 15,089	$ 71,569	$ 57,738
Interest expense	(4,600)	(3,279)	(12,056)	(9,917)
Income before income taxes	$ 25,353	$ 11,810	$ 59,513	$ 47,821

Segment Assets

	Health Plans	Molina Medicaid Solutions	Total
		(In thousands)	
As of September 30, 2010	$ 1,261,967	$ 169,463	$ 1,431,430
As of December 31, 2009	$ 1,245,235	$ —	$ 1,245,235

5. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In thousands)			
Shares outstanding at the beginning of the period	25,811	25,529	25,607	26,725
Weighted-average number of shares issued	2,279	—	768	—
Weighted-average number of shares purchased	—	—	—	(865)
Weighted-average number of shares issued	28	10	136	84
Denominator for basic earnings per share	28,118	25,539	26,511	25,944
Dilutive effect of employee stock options and stock grants(1)	245	91	291	114
Denominator for diluted earnings per share(2)	28,363	25,630	26,802	26,058

(1) Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three months ended September 30, 2010, and 2009, there were approximately 472,000 and 618,000 antidilutive weighted options, respectively. For the nine months ended September 30, 2010, and 2009, there were approximately 492,000 and 622,000 antidilutive weighted options, respectively. Restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. For the three months ended September 30, 2010, and 2009, there were approximately 6,000, and 232,000 antidilutive weighted restricted shares, respectively. For the nine months ended September 30, 2010, and 2009, there were approximately 6,000, and 28,000 antidilutive weighted restricted shares, respectively.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the three month and nine month periods ended September 30, 2010 and 2009.

6. Share-Based Compensation

At September 30, 2010, we had employee equity incentives outstanding under two plans: (1) the 2002 Equity Incentive Plan; and (2) the 2000 Omnibus Stock and Incentive Plan (from which equity incentives are no longer awarded). Charged to general and administrative expenses, total stock-based compensation expense was as follows for the three month and nine month periods ended September 30, 2010 and 2009:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In thousands)			
Restricted stock awards	$ 2,367	$ 1,787	$ 6,113	$ 4,661
Stock options (including shares issued under our employee stock purchase plan)	393	485	1,155	1,069
Total stock-based compensation expense	$ 2,760	$ 2,272	$ 7,268	$ 5,730

As of September 30, 2010, there was $14.4 million of total unrecognized compensation expense related to unvested restricted stock awards, which we expect to recognize over a remaining weighted-average period of 2.7 years. Also as of September 30, 2010, there was $352,000 of unrecognized compensation expense related to unvested stock options, which we expect to recognize over a remaining weighted-average period of 0.6 years.

The total fair value of restricted shares granted during the nine months ended September 30, 2010 and 2009 was $11.9 million and $7.8 million, respectively. The total fair value of restricted shares vested during the nine months ended September 30, 2010 and 2009 was $6.1 million and $3.0 million, respectively. Restricted stock activity for the nine months ended September 30, 2010 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2009	687,630	$ 24.64
Granted	521,225	22.78
Vested	(257,781)	25.83
Forfeited	(87,875)	23.32
Unvested balance as of September 30, 2010	863,199	23.30

Stock option activity for the nine months ended September 30, 2010 is summarized below:

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (In thousands)	Weighted Average Remaining Contractual Term (Years)
Stock options outstanding as of December 31, 2009	650,739	$ 30.25		
Exercised	(29,702)	25.58		
Forfeited	(11,513)	32.39		
Stock options outstanding as of September 30, 2010	609,524	30.44	$ 583	4.4
Stock options exercisable and expected to vest as of September 30, 2010	606,816	30.43	$ 582	4.4
Exercisable as of September 30, 2010	559,974	30.29	$ 580	4.2

7. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For a comprehensive discussion of fair value measurements with regard to our current and non-current investments, see below.

Based on quoted market prices, the fair value of our convertible senior notes issued in October 2007 was $181.4 million at September 30, 2010, and $160.8 million at December 31, 2009. The carrying amount of the convertible senior notes was $162.7 million at September 30, 2010, and $158.9 million at December 31, 2009.

To prioritize the inputs we use in measuring fair value, we apply a three-tier fair value hierarchy. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of September 30, 2010, we held certain assets that are required to be measured at fair value on a recurring basis. These included investments as follows:

Balance Sheet Classification	Description
Current assets:	
Investments (see Note 8)	Investment grade debt securities; designated as available-for-sale; reported at fair value based on market prices that are readily available (Level 1).
Non-current assets:	
Investments (see Note 8)	Auction rate securities; designated as available-for-sale; reported at fair value based on discounted cash flow analysis or other type of valuation model (Level 3).

As of September 30, 2010, $24.7 million par value ($20.3 million fair value) of our investments consisted of auction rate securities, all of which were collateralized by student loan portfolios guaranteed by the U.S. government. We continued to earn interest on substantially all of these auction rate securities as of September 30, 2010. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008. As such, quoted prices in active markets were not readily available during the majority of 2008, all of 2009, and continued to be unavailable as of September 30, 2010. To estimate the fair value of these securities, we used pricing models that included factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. The estimated values of these securities were also compared, when possible, to valuation data with respect to similar securities held by other parties. We concluded that these estimates, given the lack of market available pricing, provided a reasonable basis for determining fair value of the auction rate securities as of September 30, 2010.

As of September 30, 2010, all of our auction rate securities were designated as available-for-sale securities. As a result of the decrease in fair value of auction rate securities designated as available-for-sale, we recorded pretax unrealized losses of $0.5 million to accumulated other comprehensive loss for the nine months ended September 30, 2010. We have deemed these unrealized losses to be temporary and attribute the decline in value to liquidity issues, as a result of the failed auction market, rather than to credit issues. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive loss. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

Until July 2, 2010, we held auction rate securities (designated as trading securities) with a certain investment securities firm. In the fourth quarter of 2008, we entered into a rights agreement with this firm that (1) allowed us to exercise rights (the "Rights") to sell the eligible auction rate securities at par value to this firm between June 30, 2010 and July 2, 2012, and (2) gave the investment securities firm the right to purchase the auction rate securities from us any time after the agreement date as long as we received the par value. The remaining eligible auction rate securities, totaling $15.9 million as of June 30, 2010, were sold at par value on July 1, 2010. For the nine months ended September 30, 2010 and 2009, we recorded pretax gains of $4.2 million and $3.5 million, respectively, on the auction rate securities underlying the Rights.

We accounted for the Rights as a freestanding financial instrument and, until July 2, 2010, recorded the value of the Rights under the fair value option. When the remaining eligible auction rate securities were sold at par value on July 1, 2010, the value of the Rights was zero. For the nine months ended September 30, 2010 and 2009, we recorded pretax losses of $3.8 million and $3.2 million, respectively, on the Rights.

Our assets measured at fair value on a recurring basis at September 30, 2010, were as follows:

	Fair Value Measurements at Reporting Date Using			
	Total	Level 1	Level 2	Level 3
	(In thousands)			
Government -sponsored enterprise securities	$ 70,787	$ 70,787	$ —	$ —
Municipal securities	23,644	23,644	—	—
Corporate debt securities	79,354	79,354	—	—
U.S. treasury notes	18,296	18,296	—	—
Certificates of deposit	3,277	3,277	—	—
Auction rate securities (available-for-sale)	20,294	—	—	20,294
Total assets measured at fair value	$ 215,652	$ 195,358	$ —	$ 20,294

The following table presents a roll-forward of the balance of our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3)
	(In thousands)
Balance at December 31, 2009	$ 63,494
Total gains (losses):	
Included in earnings:	
Auction rate securities designated as trading securities	4,170
Change in fair value of Rights	(3,807)
Included in other comprehensive income	(513)
Settlements	(43,050)
Balance at September 30, 2010	$ 20,294
The amount of total losses for the period included in other comprehensive loss attributable to the change in unrealized losses relating to assets still held at September 30, 2010	$ (513)

8. Investments

The following tables summarize our investments as of the dates indicated:

	September 30, 2010			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Government-sponsored enterprise securities	$ 70,687	$ 426	$ 326	$ 70,787
Municipal securities (including non-current auction rate securities)	48,293	144	4,499	43,938
Corporate debt securities	79,892	163	701	79,354
U.S. treasury notes	18,169	137	10	18,296
Certificates of deposit	3,277	—	—	3,277
	$ 220,318	$ 870	$ 5,536	$ 215,652

	December 31, 2009			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Government-sponsored enterprise securities	$ 89,451	$ 504	$ 281	$ 89,674
Municipal securities (including non-current auction rate securities)	82,009	3,120	4,154	80,975
Corporate debt securities	32,543	206	185	32,564
U.S. treasury notes	28,052	92	84	28,060
Certificates of deposit	3,258	—	—	3,258
	$ 235,313	$ 3,922	$ 4,704	$ 234,531

The contractual maturities of our investments as of September 30, 2010 are summarized below.

	Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 100,109	$ 99,474
Due one year through five years	94,779	95,071
Due after five years through ten years	1,430	1,421
Due after ten years	24,000	19,686
	$ 220,318	$ 215,652

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales of available-for-sale securities were $35.4 million and $66.9 million for the three months ended September 30, 2010, and 2009, respectively. Total proceeds from sales of available-for-sale securities were $101.3 million and $148.8 million for the nine months ended September 30, 2010, and 2009, respectively. Net realized investment gains for the three months and nine months ended September 30, 2010, and 2009 were not significant.

We monitor our investments for other-than-temporary impairment. For investments other than our municipal securities, we have determined that unrealized gains and losses at September 30, 2010, and December 31, 2009, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

Approximately half of our investment in municipal securities consists of auction rate securities. As described in Note 7, "Fair Value Measurements," the unrealized losses on these investments were caused primarily by the illiquidity in the auction markets. Because the decline in market value is not due to the credit quality of the issuers, and because we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost, we do not consider the auction rate securities that are designated as available-for-sale to be other-than-temporarily impaired at September 30, 2010.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of September 30, 2010.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Government-sponsored enterprise securities	$ 7,712	$ 17	$ 9,639	$ 309	$ 17,351	$ 326
Municipal securities	9,110	55	23,963	4,444	33,073	4,499
Corporate debt securities	45,090	331	12,350	370	57,440	701
U.S. treasury notes	8,558	10	—	—	8,558	10
	$ 70,470	$ 413	$ 45,952	$ 5,123	$ 116,422	$ 5,536

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2009. At December 31, 2009, we previously reported only those available-for-sale investments in an unrealized loss position for at least two consecutive months. To conform to the current year presentation, we have included all available-for-sale investments in an unrealized loss position at December 31, 2009. This presentation change increased the total amount of unrealized losses reported in the following table by $113,000 at December 31, 2009. The accompanying increase to the estimated fair value of the underlying investments amounted to $42.9 million at December 31, 2009.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Government-sponsored enterprise securities	$ 30,460	$ 187	$ 7,297	$ 94	$ 37,757	$ 281
Municipal securities	12,460	78	24,031	3,902	36,491	3,980
Corporate debt securities	13,513	149	1,203	36	14,716	185
U.S. treasury notes	21,824	84	—	—	21,824	84
	$ 78,257	$ 498	$ 32,531	$ 4,032	$ 110,788	$ 4,530

9. Receivables

Health Plans receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustment. Molina Medicaid Solutions' receivables consist primarily of MMIS development milestone billings to states. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable were as follows:

	Sept. 30, 2010	Dec. 31, 2009
	(In thousands)	
Health Plans:		
California	$ 96,797	$ 34,289
Michigan	14,285	14,977
Missouri	21,576	19,670
New Mexico	17,757	11,919
Ohio	23,142	37,004
Utah	5,220	6,107
Washington	14,281	9,910
Wisconsin	6,651	—
Others	3,424	2,778
	203,133	136,654
Molina Medicaid Solutions	22,414	—
Total receivables	$ 225,547	$ 136,654

10. Restricted Investments

Pursuant to the regulations governing our Health Plan subsidiaries, we maintain statutory deposits and deposits required by state Medicaid authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of capitated providers. The following table presents the balances of restricted investments by health plan, and by our insurance company:

	Sept. 30, 2010	Dec. 31, 2009
	(In thousands)	
California	$ 369	$ 368
Florida	4,466	2,052
Michigan	1,000	1,000
Missouri	500	503
New Mexico	18,873	15,497
Ohio	9,061	9,036
Texas	3,501	1,515
Utah	1,280	578
Washington	151	151
Wisconsin	260	—
Insurance company	4,689	4,686
Other	897	888
Total	$ 45,047	$ 36,274

The contractual maturities of our held-to-maturity restricted investments as of September 30, 2010 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 36,148	$ 36,155
Due one year through five years	8,774	8,815
Due after five years through ten years	125	164
	$ 45,047	$ 45,134

11. Long-Term Debt

Credit Facility

We are a party to an Amended and Restated Credit Agreement, dated as of March 9, 2005, as amended by the first amendment on October 5, 2005, the second amendment on November 6, 2006, the third amendment on May 25, 2008, the fourth amendment on November 2009, and the fifth amendment on March 15, 2010, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility") for a revolving credit line of $150 million that matures in May 2012. The Credit Facility is intended to be used for general corporate purposes. As described below and in Note 3, "Business Combinations," we borrowed $105 million under the Credit Facility to acquire Molina Medicaid Solutions in the second quarter of 2010. During the third quarter of 2010, we repaid this amount using proceeds from our equity offering, described in Note 12, "Stockholders' Equity." As of September 30, 2010, and December 31, 2009, there was no outstanding principal balance under the Credit Facility.

To the extent that in the future we incur any obligations under the Credit Facility, such obligations will be secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At September 30, 2010, we were in compliance with all financial covenants in the Credit Facility.

The commitment fee on the total unused commitments of the lenders under the Credit Facility is 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans is 200 basis points at every level of the pricing grid. Thus, the applicable margins under the Credit Facility range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. The Credit Facility carves out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of the convertible senior notes, although the $187.0 million indebtedness is included in the calculation of our consolidated leverage ratio. The fixed charge coverage ratio set forth pursuant to the Credit Facility was 2.75x (on a pro forma basis) at December 31, 2009, and 3.00x thereafter.

The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.25 to 1.0 for the fourth quarter of 2009 (on a pro forma basis), and to 3.50 to 1.0 for the first and second quarters of 2010, and through August 14, 2010. Effective as of August 15, 2010, the consolidated leverage ratio under the Credit Facility reverted back to 2.75 to 1.0. In connection with the lenders' approval of the fifth amendment, we paid an amendment fee of 25 basis points on the amount of each consenting lender's commitment. We also paid an incremental commitment fee of 12.5 basis points based on each lender's unfunded commitment during the period from the effective date of the fifth amendment through August 15, 2010.

Convertible Senior Notes

In October 2007, we sold $200.0 million aggregate principal amount of 3.75% Convertible Senior Notes due 2014 (the "Notes"). The sale of the Notes resulted in net proceeds totaling $193.4 million. During 2009, we purchased and retired $13.0 million face amount of the Notes, so the remaining aggregate principal amount totaled $187.0 million at September 30, 2010 and December 31, 2009. The Notes rank equally in right of payment with our existing and future senior indebtedness.

The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 21.3067 shares of our common stock per one thousand dollar principal amount of the Notes. This represents an initial conversion price of approximately $46.93 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances. Prior to July 2014, holders may convert their Notes only under the following circumstances:

- During any fiscal quarter after our fiscal quarter ended December 31, 2007, if the closing sale price per share of our common stock, for each of at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, is greater than or equal to 120% of the conversion price per share of our common stock;
- During the five business day period immediately following any five consecutive trading day period in which the trading price per one thousand dollar principal amount of the Notes for each trading day of such period was less than 98% of the product of the closing price per share of our common stock on such day and the conversion rate in effect on such day; or
- Upon the occurrence of specified corporate transactions or other specified events.

On or after July 1, 2014, holders may convert their Notes at any time prior to the close of business on the scheduled trading day immediately preceding the stated maturity date regardless of whether any of the foregoing conditions is satisfied.

We will deliver cash and shares of our common stock, if any, upon conversion of each $1,000 principal amount of Notes, as follows:

- An amount in cash (the "principal return") equal to the sum of, for each of the 20 Volume-Weighted Average Price (VWAP) trading days during the conversion period, the lesser of the daily conversion value for such VWAP trading day and fifty dollars (representing 1/20th of one thousand dollars); and
- A number of shares based upon, for each of the 20 VWAP trading days during the conversion period, any excess of the daily conversion value above fifty dollars.

The proceeds from the issuance of such convertible debt instruments have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of September 30, 2010, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 48 months. The Notes' if-converted value did not exceed their principal amount as of September 30, 2010. At September 30, 2010, the equity component of the Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	As of September 30, 2010	As of December 31, 2009
	(In thousands)	
Details of the liability component:		
Principal amount	$ 187,000	$ 187,000
Unamortized discount	(24,300)	(28,100)
Net carrying amount	$ 162,700	$ 158,900

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In thousands)			
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate of 3.75%	$ 1,753	$ 1,753	$ 5,259	$ 5,323
Amortization of the discount on the liability component	1,291	1,197	3,800	3,563
Total interest cost recognized	$ 3,044	$ 2,950	$ 9,059	$ 8,886

12. Stockholders' Equity

In August 2010, we commenced an underwritten public offering of 4,000,000 shares of our common stock, conducted pursuant to an effective registration statement filed with the Securities and Exchange Commission on December 8, 2008. In connection with the offering, we granted the underwriters an overallotment option to purchase up to 350,000 shares, and the single selling stockholder, the Molina Siblings Trust, granted the underwriters an option to purchase up to 250,000 shares. The overallotment option was subsequently exercised in August 2010. Our chief financial officer, John Molina, is the trustee of the Molina Siblings Trust, with sole voting and investment power. Dr. J. Mario Molina, our president and chief executive officer and the brother of John Molina, is a beneficiary of the Molina Siblings Trust, as is John Molina and each of his other three siblings.

We issued 4,350,000 shares in connection with the offering, including the overallotment option. Net of the underwriting discount, proceeds from the offering totaled $111.6 million, or $25.65 per share. We used the net proceeds of the offering to repay the outstanding indebtedness under the Credit Facility and for general corporate purposes. We did not receive any proceeds from the sale of shares by the selling stockholder.

13. Commitments and Contingencies

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. These actions, when finally concluded and determined, are not likely, in our opinion, to have a material adverse effect on our business, consolidated financial position, cash flows, or results of operations.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Contract Losses

Our MMIS service contracts with various states typically span several years. These contracts often involve the development and deployment of new computer systems and technologies. Substantial performance risk exists in each contract with these characteristics, and some or all elements of service delivery under these contracts are dependent upon successful completion of the design, development and implementation phase. On occasion, these contracts have experienced delays in their design, development and implementation phase, the achievement of certain milestones has been delayed, and costs in excess of those anticipated have been incurred. We continuously review and reassess our estimates of contract profitability. If our estimates indicate that a contract loss will occur, a loss accrual is recorded in the period it is first identified, if allowed by relevant accounting guidance. Circumstances that could potentially result in contract losses over the life of the contract include variances from expected costs to deliver our services, and other factors affecting revenues and costs. It is reasonably possible that deferred costs associated with one or more of these contracts could become impaired due to changes in estimates of future contract cash flows.

Regulatory Capital and Dividend Restrictions

The principal operations of our Health Plans segment are conducted through our health plan subsidiaries operating in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. Our health plans are subject to state regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances or cash dividends was $380.0 million at September 30, 2010, and $368.7 million at December 31, 2009. The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set new minimum capitalization requirements for insurance companies, HMOs and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Washington, Wisconsin, and Utah have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of September 30, 2010, our health plans had aggregate statutory capital and surplus of approximately $401.3 million compared with the required minimum aggregate statutory capital and surplus of approximately $258.7 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2010. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

14. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of September 30, 2010, and December 31, 2009, our carrying amount for this investment totaled $4.4 million, and $4.1 million, respectively. For the three months ended September 30, 2010 and 2009, we paid $6.0 million, and $4.5 million, respectively, for medical service fees to this provider. For the nine months ended September 30, 2010 and 2009, we paid $15.7 million, and $15.0 million, respectively, for medical service fees to this provider.

We are a party to a fee-for-service agreement with Pacific Hospital of Long Beach (“Pacific Hospital”). Pacific Hospital is owned by Abrazos Healthcare, Inc., the shares of which are held as community property by the husband of Dr. Martha Bernadett, the sister of Dr. J. Mario Molina, our Chief Executive Officer, and John Molina, our Chief Financial Officer. Amounts paid to Pacific Hospital under the terms of this fee-for-service agreement were $0.8 million, and $0.5 million for the nine months ended September 30, 2010 and 2009, respectively. We believe that the fee-for-service with Pacific Hospital is based on prevailing market rates for similar services.

Item 2. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. We use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- budgetary pressures on the federal and state governments and their resulting inability to fully fund Medicaid, Medicare, or CHIP, or to maintain current payment rates, benefit packages, or membership eligibility thresholds and criteria;
- uncertainties regarding the impact of the recently enacted Patient Protection and Affordable Care Act, including the funding provisions related to health plans, and uncertainties regarding the likely impact of other federal or state health care and insurance reform measures;
- management of our medical costs, including normal seasonal flu patterns and rates of utilization that are consistent with our expectations;
- the accurate estimation of incurred but not paid medical costs across our health plans;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including our ability to retain expected Medicaid pharmaceutical rebates;
- the continuation and renewal of the government contracts of our health plans and if renewed, the terms on which such contracts are renewed;
- our ability and the ability of our providers to maintain state accreditations to participate in certain state Medicaid programs;
- changes with respect to our provider contracts and the loss of providers;
- changes in services offered, number of our members, membership mix and membership demographics;
- performance of our principal vendors pursuant to our vendor contracts;
- the integration of Molina Medicaid Solutions, including its employees, systems, and operations;
- the retention and renewal of the Molina Medicaid Solutions' state government contracts on terms consistent with our expectations;
- the accuracy of our operating cost and capital outlay projections for Molina Medicaid Solutions;
- the timing of receipt and recognition of revenue and the amortization of expense under our various state contracts held by Molina Medicaid Solutions, including the state of Idaho's acceptance of the MMIS;
- additional administrative costs and the potential payment of damages amounts as a result of MMIS system issues in Idaho;
- the implementation of the expected 2% premium rate increase in California, retroactively effective October 1, 2010;
- the expansion of service in 174 rural counties by our Texas health plan under Texas' CHIP Rural Service Area Program;
- government audits and reviews, including the audit of our Medicare plans by CMS at the end of July 2010;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive;
- revenue recognition and the interpretation and implementation of medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements in state contracts in New Mexico, Florida, and Texas;
- the interpretation and implementation of at-risk premium rules in Ohio, New Mexico, and Texas that require us to meet certain performance measures in order to earn all of our contract revenue in those states;

- rate increases that do not adequately compensate us for the loss of drug rebates as a result of health reform;
- up-coding by providers or billing in a manner at material variance with historic patterns;
- approval by state regulators of dividends and distributions by our subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation or arbitration matters;
- restrictions and covenants in our credit facility;
- the success of our efforts to leverage our administrative costs to address the needs associated with increased enrollment;
- the relatively small number of states in which we operate health plans and the impact on the consolidated entity of adverse developments in any single health plan;
- the availability of financing to fund and capitalize our acquisitions and start-up activities and to meet our liquidity needs;
- a state's failure to renew its federal Medicaid waiver;
- an unauthorized disclosure of confidential member information;
- changes in laws regarding the transmission, security and privacy of protected health information and costs associated to comply with such changes;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes and assessments; and
- general economic conditions, including unemployment rates.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2009, and to Part II, Item 1A — Risk Factors, in our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2010, and June 30, 2010, and in this Quarterly Report, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurances that any results or events projected or contemplated by our forward-looking statements will in fact occur and we caution investors not to place undue reliance on these statements.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2009.

Reclassifications

Effective January 1, 2010, we have recorded the Michigan modified gross receipts tax, or MGRT, as a premium tax and not as an income tax. Prior periods have been reclassified to conform to this presentation.

In prior periods, general and administrative, or G&A, expenses have included premium tax expenses. Beginning in the second quarter of 2010, we have reported premium tax expenses on a separate line in the accompanying consolidated statements of income. Prior periods have been reclassified to conform to this presentation.

Overview

Molina Healthcare, Inc. is a multi-state managed care organization that arranges for the delivery of health care services to persons eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. We conduct our business primarily through licensed health plans in the states of California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. The health plans are locally operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

On May 1, 2010, we acquired a health information management business which we now operate under the name, *Molina Medicaid Solutions*SM. Molina Medicaid Solutions provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program. We paid $131.3 million to acquire Molina Medicaid Solutions. The acquisition was funded with available cash of $26 million and $105 million drawn under our credit facility.

With the addition of Molina Medicaid Solutions, we have added a segment to our internal financial reporting structure in 2010. We will now report our financial performance based on the following two reportable segments:

- Health Plans; and
- Molina Medicaid Solutions.

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. The majority of medical costs associated with premium revenues are risk-based costs — while the health plans receive fixed per member per month premium payments from the states, the health plans are at risk for the costs of their members' health care. Our Health Plans segment operates in a highly regulated environment with minimum capitalization requirements. These capitalization requirements, among other things, limit the health plans' ability to pay dividends to us without regulatory approval.

As of September 30, 2010, our health plans were located in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. Additionally, we operate three county-owned primary care clinics in Virginia.

Molina Medicaid Solutions Segment

Unlike the Health Plans segment, the Molina Medicaid Solutions segment is a service-based business that adds to our revenue stream without assuming additional medical cost risk. Additionally, the capital requirements of the Molina Medicaid Solutions segment are — except in the case of new contract start-ups — considerably less than those of our Health Plans segment. Regulatory approval is not required for the Molina Medicaid Solutions segment to pay dividends to us.

While we believe that the acquisition of the Molina Medicaid Solutions segment diversifies our risk profile, we also believe that the two segments are complementary from strategic and operating perspectives. From a strategic perspective, both segments allow us to participate in an expanding sector of the economy while continuing our mission to serve low-income families and individuals eligible for government-sponsored health care programs. Operationally, the segments share a common systems platform — allowing for efficiencies of scale — and common experience in meeting the needs of state Medicaid programs. We also believe that we have opportunities to market various cost containment and quality practices used by our Health Plans segment (such as care management and care coordination programs) to state MMIS customers who wish to incorporate certain aspects of managed care programs into their own fee-for-service programs.

The following table briefly summarizes our financial performance for the three month and nine month periods ended September 30, 2010 compared with the same periods in 2009. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio and the premium tax ratio are shown as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(Amounts in thousands, except per share data)			
Earnings per diluted share	$ 0.57	$ 0.33	$ 1.39	$ 1.36
Premium revenue	$ 1,005,115	$ 914,805	$ 2,947,020	$ 2,697,796
Service revenue	$ 32,271	$ —	$ 53,325	$ —
Operating income	$ 29,953	$ 15,089	$ 71,569	$ 57,738
Net income	$ 16,173	$ 8,564	$ 37,342	$ 35,340
Total ending membership	1,597	1,411	1,597	1,411
Premium revenue	96.7%	99.8%	98.1%	99.7%
Service revenue	3.1	—	1.8	—
Investment income	0.2	0.2	0.1	0.3

Net income	1.6%	0.9%	1.2%	1.3%
Effective tax rate	36.2%	27.5%	37.3%	26.1%

Composition of Revenue and Membership

Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the nine months ended September 30, 2010, we received approximately 94% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with the Centers for Medicare and Medicaid Services, or CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the nine months ended September 30, 2010, we received approximately 6% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in California (effective October 1, 2009), Michigan, Missouri, Ohio, Texas, Utah (effective September 1, 2009), Washington, and Wisconsin. Such payments are recognized as revenue in the month the birth occurs.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	Sept. 30, 2010	Dec. 31, 2009	Sept. 30, 2009
Total Ending Membership by Health Plan:			
California	349,000	351,000	355,000
Florida	57,000	50,000	43,000
Michigan	225,000	223,000	210,000
Missouri	79,000	78,000	78,000
New Mexico	91,000	94,000	90,000
Ohio	241,000	216,000	208,000
Texas	96,000	40,000	31,000
Utah	78,000	69,000	69,000
Washington	353,000	334,000	327,000
Wisconsin (1)	28,000	—	—
Total	1,597,000	1,455,000	1,411,000
Total Ending Membership by State for our Medicare Advantage Plans (1):			
California	4,300	2,100	1,900
Florida	500	—	—
Michigan	5,700	3,300	2,700
New Mexico	600	400	400
Texas	600	500	500
Utah	8,600	4,000	3,500
Washington	2,300	1,300	1,100
Total	22,600	11,600	10,100
Total Ending Membership by State for our Aged, Blind or Disabled Population:			
California	13,500	13,900	13,700
Florida	9,500	8,800	8,700
Michigan	31,400	32,200	30,200
New Mexico	5,700	5,700	5,700
Ohio	27,900	22,600	19,600
Texas	18,900	17,600	17,500
Utah	7,900	7,500	7,700
Washington	3,700	3,200	3,200
Wisconsin (1)	1,700	—	—
Total	120,200	111,500	106,300

(1) We acquired the Wisconsin health plan on September 1, 2010. As of September 30, 2010, the Wisconsin health plan had approximately 3,000 Medicare Advantage members covered under a reinsurance contract with a third party; these members are not included in the membership tables herein.

Molina Medicaid Solutions Segment

As a result of our recent acquisition of Molina Medicaid Solutions, a portion of our revenues is derived from service arrangements. This segment provides technology solutions to state Medicaid programs that include system design, development, implementation, and technology outsourcing services. In addition, this segment offer business process outsourcing to state Medicaid agencies that handle key administrative functions such as claims processing, provider enrollment, pharmacy drug rebate services, recipient eligibility management, and pre-authorization services. In general, we expect the operating profit margin percentage generated by the Molina Medicaid Solutions segment to be higher than the operating profit margin percentage generated by the Health Plans segment. See further discussion of our Molina Medicaid Solutions segment revenue recognition and deferred contract costs at “Critical Accounting Policies,” below.

Molina Medicaid Solutions has contracts with five states to design, develop, implement, maintain, and operate Medicaid Management Information Systems (MMIS). Additionally, Molina Medicaid Solutions provides pharmacy rebate administration services under a contract with the state of Florida.

These contracts extend over a number of years, and cover the life of the MMIS from inception though at least the first five years of its operation. The contracts are subject to extension by the exercise of an option, and also by renewal of the base contract. The contracts have a life cycle beginning with the design, development, and implementation of the MMIS and continuing through the operation of the system. Payment during the design, development, and implementation phase of the contract, or the DDI phase, is generally based upon the attainment of specific milestones in systems development as agreed upon ahead of time by the parties. Payment during the operations phase typically takes the form of either a flat monthly fee or payment for specific measures of capacity or activity, such as the number of claims processed, or the number of Medicaid beneficiaries served by the MMIS. Contracts may also call for the adjustment of amounts paid if certain activity measures exceed or fall below certain thresholds.

Under our contracts in Louisiana, New Jersey, West Virginia and Florida we provide primarily business process outsourcing and technology outsourcing services, because the development of the MMIS solution has been completed. Under these contracts, we recognize outsourcing service revenue on a straight-line basis over the remaining term of the contract. We began revenue and cost recognition for our Maine contract in September 2010, and expect to begin revenue and cost recognition for our Idaho contract in November 2010.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate costs incurred. Expenses related to medical care services are captured in the following four categories:

- Fee-for-service — expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.
- Capitation — expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- Pharmacy — expenses for all drug, injectible, and immunization costs paid primarily through our pharmacy benefit manager.
- Other — expenses for medically related administrative costs ($61.9 million and $54.9 million for the nine months ended September 30, 2010 and 2009, respectively), certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See “Critical Accounting Policies” below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our contracts in Louisiana, New Jersey, West Virginia and Florida, as well as certain selling, general and administrative expenses. We began revenue and cost recognition for our Maine contract in September 2010, and expect to begin revenue and cost recognition for our Idaho contract in November 2010. Additionally, certain indirect costs incurred under our contracts in Idaho and Maine are also expensed to cost of services.

Deferred contract costs, which primarily relate to our contracts in Idaho and Maine, include direct and incremental costs such as direct labor, hardware, and software. We also defer and subsequently amortize certain transition costs related to activities that transition the contract from the design, development, and implementation phase to the operational or business process outsourcing phase. Deferred contract costs, including transition costs, are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

Results of Operations

Three Months Ended September 30, 2010 Compared with the Three Months Ended September 30, 2009

Health Plans Segment

Premium Revenue

Premium revenue grew 10% in the third quarter of 2010 compared with the third quarter of 2009. The revenue increase was primarily due to a membership increase of 13% as of September 30, 2010 compared with membership as of September 30, 2009. Medicare enrollment exceeded 22,000 members at September 30, 2010, and Medicare premium revenue for the quarter was $70.7 million compared with $33.7 million in the third quarter of 2009.

On a per-member-per-month, or PMPM, basis, consolidated premium revenue was flat, because the impact of premium reductions tied to the elimination of the pharmacy benefit in Ohio and Missouri were offset by increased Medicare enrollment and higher Medicaid rates exclusive of the pharmacy cuts in Ohio and Missouri. Exclusive of the pharmacy cuts, premium revenue PMPM increased approximately 6.4%. Approximately one half of the percentage increase in PMPM revenue exclusive of the pharmacy cuts in Ohio and Missouri was due an increase in our Medicare enrollment as a percentage of total enrollment; the other half of the increase was due to higher Medicaid premium rates.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended September 30,					
	2010			2009		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 601,836	$ 130.60	71.1%	$ 515,164	$ 122.86	65.0%
Capitation	136,425	29.61	16.1	140,551	33.52	17.7
Pharmacy	76,049	16.50	9.0	104,274	24.87	13.2
Other	31,627	6.87	3.8	32,782	7.82	4.1
Total	$ 845,937	$ 183.58	100.0%	$ 792,771	$ 189.07	100.0%

The medical care ratio decreased to 84.2% for the three months ended September 30, 2010, compared with 86.7% for the three months ended September 30, 2009.

The medical care ratio of the California health plan decreased to 80.3% in the third quarter of 2010 from 92.3% in the third quarter of 2009, primarily due to provider network restructuring and improved medical management. Lower inpatient costs were the greatest contributor to the decrease in the California health plan's medical care ratio.

The medical care ratio of the Ohio health plan decreased to 81.2% in the third quarter of 2010 from 85.6% in the third quarter of 2009, primarily due to an increase in Medicaid premium PMPM of approximately 6% effective January 1, 2010.

The medical care ratio of the Utah health plan decreased to 84.9% in the third quarter of 2010 from 92.5% in the third quarter of 2009, primarily due to a decrease in provider rates and an increase in Medicaid premium PMPM of approximately 8% effective July 1, 2010.

The medical care ratio of the Washington health plan decreased to 79.4% in the third quarter of 2010 from 83.0% in the third quarter of 2009, primarily due to reduced fee for service costs in the inpatient, outpatient and physician categories, and an increase in Medicaid premium PMPM of approximately 2.5% effective July 1, 2010.

The medical care ratio of the Michigan health plan increased to 85.7% in the third quarter of 2010 from 81.2% in the third quarter of 2009, primarily due to higher fee-for-service costs for Medicaid members and a shift in member mix towards high medical care ratio Medicare members.

The medical care ratio of the Missouri health plan increased to 86.7% in the third quarter of 2010 from 82.3% in the third quarter of 2009, primarily due to higher inpatient fee-for-service costs and a slight decrease (approximately 1%) in premium revenue PMPM effective July 1, 2010.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio and premium taxes by health plan for the three months ended September 30, 2010 and September 30, 2009 (in thousands except PMPM amounts):

	Three Months Ended September 30, 2010						
	Member Months(1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	1,046	$ 128,350	$ 122.75	$ 103,002	$ 98.51	80.3%	$ 1,888
Florida	169	43,485	256.25	42,258	249.02	97.2	(14)
Michigan	675	156,609	232.05	134,238	198.90	85.7	9,655

Total	4,192	$ 914,805	$ 218.17	$ 792,771	$ 189.07	86.7%	$ 30,257

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) We acquired the Wisconsin health plan on September 1, 2010.

(3) "Other" medical care costs represent primarily medically related administrative costs at the parent company.

Days in Medical Claims and Benefits Payable

Beginning January 1, 2010, and for all prior periods presented, we are reporting days in medical claims and benefits payable relating to fee-for-service medical claims only. This new computation includes only fee-for-service medical care costs and related liabilities, and therefore calculates the extent of reserves for those liabilities that are most subject to estimation.

The days in medical claims and benefits payable amount previously reported included *all* medical care costs (fee-for-service, capitation, pharmacy, and administrative), and *all* medical claims liabilities, including those liabilities that are typically paid concurrently, or shortly after the costs are incurred, such as capitation costs and pharmacy costs. Medical claims liabilities in this calculation do not include accrued costs — such as salaries — associated with the administrative portion of medical costs. By including only fee-for-service medical costs and liabilities in this computation, our days in claims payable metric will be more indicative of the adequacy of our reserves for liabilities subject to a substantial degree of estimation. The days in medical claims and benefits payable, excluding our new Wisconsin health plan, were as follows:

	Sept. 30, 2010	June 30, 2010	Dec. 31, 2009	Sept. 30, 2009
Days in claims payable — fee-for-service only	42 days	44 days	44 days	44 days
Number of claims in inventory at end of period	110,200	106,700	93,100	107,700
Billed charges of claims in inventory at end of period (dollars in thousands)	$ 158,900	$ 147,500	$ 131,400	$ 145,500

Molina Medicaid Solutions Segment

Molina Medicaid Solutions contributed $1.2 million to operating income for the three months ended September 30, 2010, with an operating profit margin of approximately 4%. As we expected, the operating profit for this segment has declined as a result of the revenue and cost recognition that commenced in Maine as of its September 1, 2010 "go-live" operational date. In addition, and contrary to our expectations, the consulting and outside service costs for both Idaho and Maine following their respective go-live operational dates have not declined from their pre-operational levels. Performance of the Molina Medicaid Solutions segment for the three months ended September 30, 2010 was as follows:

	(In thousands)
Service revenue before amortization	$ 34,926
Amortization of contract backlog recorded as contra-service revenue	(2,655)
Service revenue	32,271
Cost of service revenue	27,605
General and administrative costs	2,195
Amortization of customer relationship intangibles recorded as amortization	1,314
Operating income	$ 1,157

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses, or G&A, were $88.7 million, or 8.5% of total revenue, for the third quarter of 2010 compared with $68.6 million, or 7.5% of total revenue, for the third quarter of 2009. Absent the $4.7 million of employee severance and settlement costs indicated below, general and administrative expense would have been 8.1% of total revenue for the third quarter of 2010. The increase in the G&A ratio was the result of higher administrative expenses for the Health Plan segment, driven in part by the cost of our Medicare expansion, employee severance costs of $4.7 million for the quarter, and the acquisition of Molina Medicaid Solutions.

	Three Months Ended September 30,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Medicare-related administrative costs	$ 6,511	0.6%	$ 4,288	0.5%
Non Medicare-related administrative costs:				
Molina Medicaid Solutions segment administrative costs	2,195	0.2	—	—
Employee severance and settlement costs	4,654	0.4	132	—
Health Plans segment administrative payroll, including employee incentive compensation	57,741	5.6	53,042	5.8
All other Health Plans segment administrative expense	17,559	1.7	11,101	1.2
	$ 88,660	8.5%	$ 68,563	7.5%

Premium Tax Expenses

Premium tax expense relating to Health Plans segment premium revenue increased to 3.5% of revenue for the three months ended September 30, 2010, from 3.3% for the three months ended September 30, 2009, primarily due to the imposition of a higher premium tax rate in Ohio effective October 1, 2009.

Depreciation and Amortization

Depreciation and amortization specifically identified as such in the consolidated statements of income increased $2.1 million in the three months ended September 30, 2010 compared with the three months ended September 30, 2009, primarily due to depreciation of investments in infrastructure and the amortization of certain purchased intangibles associated with the acquisition of Molina Medicaid Solutions. Beginning in the second quarter of 2010, the amortization of contract backlog intangibles associated with the acquisition of Molina Medicaid Solutions is recorded as contra-service revenue. Additionally, most of the depreciation associated with Molina Medicaid Solutions is recorded as cost of service revenue. The following table presents all depreciation and amortization recorded in the consolidated financial statements:

	Three Months Ended September 30,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation and amortization	$ 11,954	1.1%	$ 9,832	1.1%
Amortization recorded as contra-service revenue	2,655	0.3	—	—
Depreciation recorded as cost of service revenue	1,964	0.2	—	—
	$ 16,573	1.6%	$ 9,832	1.1%

Interest Expense

Interest expense increased to $4.6 million for the three months ended September 30, 2010, compared with $3.3 million for the three months ended September 30, 2009. We incurred higher interest expense relating to the $105 million draw on our credit facility (beginning May 1, 2010) to fund the acquisition of Molina Medicaid Solutions. Interest expense includes non-cash interest expense relating to our convertible senior notes, which totaled $1.3 million, and $1.2 million for the three months ended September 30, 2010 and 2009, respectively.

Income Taxes

Income tax expense was recorded at an effective rate of 36.2% for the three months ended September 30, 2010, compared with 27.5% for the three months ended September 30, 2009. The lower rate in 2009 was primarily due to discrete tax benefits of $1.0 million recorded in the third quarter of 2009 primarily related to higher than previously estimated tax credits and a reassessment of liabilities for unrecognized tax benefits.

Through December 31, 2009, our income tax expense included both the Michigan business income tax, or BIT, and the Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, we have recorded the MGRT as a premium tax and not as an income tax. We will continue to record the BIT as an income tax.

Generally, the MGRT is a 0.976% tax (statutory rate of 0.8% plus 21.99% surtax) on modified gross receipts, which for most taxpayers are defined as receipts less purchases from other firms. Managed care organizations, however, are not currently allowed to deduct payments to providers in determining modified gross receipts. As a result, the MGRT is 0.976% of the Michigan plan's receipts, and does not vary with levels of pretax income or margins. We believe that presentation of the MGRT as a premium tax produces financial statements that are more useful to the reader.

For the three months ended September 30, 2009, amounts for premium tax expense (included in general and administrative expenses) and income tax expense have been reclassified to conform to the presentation of MGRT as a premium tax. The MGRT amounted to $1.5 million and $1.2 million for the three months ended September 30, 2010, and 2009, respectively. There was no impact to net income for either period presented relating to this change.

Nine Months Ended September 30, 2010 Compared with the Nine Months Ended September 30, 2009

Health Plans Segment

Premium Revenue

Premium revenue grew 9% in the nine months ended September 30, 2010, compared with the same period in 2009. The revenue increase was primarily due to a membership increase of 13% as of September 30, 2010, compared with membership as of September 30, 2009. Medicare enrollment exceeded 22,000 members at September 30, 2010, and Medicare premium revenue for the first nine months of 2010 was $188.6 million compared with $95.9 million for the same period in 2009.

On a PMPM basis, however, consolidated premium revenue decreased 1.8% because of declines in premium rates. The impact of premium reductions tied to the elimination of the pharmacy benefit in Ohio and Missouri more than offset increased Medicare enrollment and higher Medicaid rates exclusive of the pharmacy cuts in Ohio and Missouri. Exclusive of the pharmacy cuts, premium revenue PMPM increased approximately 4.6%. Approximately one half of the percentage increase in PMPM revenue exclusive of the pharmacy cuts in Ohio and Missouri was due an increase in our Medicare enrollment as a percentage of total enrollment; the other half of the increase was due to higher Medicaid premium rates.

Medical Care Costs

The following table provides the details of our consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Nine Months Ended September 30,					
	2010			2009		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$1,763,675	$ 130.55	70.3%	$1,521,371	$ 125.24	65.2%
Capitation	410,321	30.37	16.4	413,351	34.03	17.7
Pharmacy	241,290	17.86	9.6	306,168	25.20	13.1
Other	93,080	6.89	3.7	92,975	7.65	4.0
Total	$2,508,366	$ 185.67	100.0%	$2,333,865	$ 192.12	100.0%

The medical care ratio decreased to 85.1% for the nine months ended September 30, 2010, compared with 86.5% for the nine months ended September 30, 2009.

The medical care ratio of the California health plan decreased to 84.0% for the nine months ended September 30, 2010, from 92.8% for the same period in 2009, primarily due to provider network restructuring and improved medical management. Lower inpatient costs were the greatest contributor to the decrease in the California health plan's medical care ratio.

The medical care ratio of the Ohio health plan decreased to 80.7% for the nine months ended September 30, 2010, from 85.5% for the same period in 2009, primarily due to an increase in Medicaid premium PMPM of approximately 6% effective January 1, 2010.

The medical care ratio of the Washington health plan increased to 84.2% for the nine months ended September 30, 2010, from 83.7% for the same period in 2009, primarily due to reduced premium rates implemented in the third quarter of 2009 that were only partially offset by the premium rate increase of approximately 2.5% that was received effective July 1, 2010.

The medical care ratio of the Michigan health plan increased to 84.4% for the nine months ended September 30, 2010, from 82.1% for the same period in 2009, primarily due to higher fee-for-service costs for Medicaid members and a shift in member mix towards high medical care ratio Medicare members.

The medical care ratio of the Missouri health plan increased to 86.5% for the nine months ended September 30, 2010, from 82.0% for the same period in 2009, primarily due to higher inpatient fee-for-service costs.

Health Plans Segment Operating Data

The following summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the nine months ended September 30, 2010 and September 30, 2009 (in thousands except PMPM amounts):

	Nine Months Ended September 30, 2010						
	Member Months(1)	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	3,158	$ 376,811	$ 119.32	$ 316,569	$ 100.24	84.0%	$ 5,153

Other(3)	—	10,003	—	27,683	—	—	55
Total	12,145	$2,697,796	$ 222.08	$2,333,865	$ 192.12	86.5%	$ 87,612

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) We acquired the Wisconsin health plan on September 1, 2010.

(3) "Other" medical care costs represent primarily medically related administrative costs at the parent company.

Molina Medicaid Solutions Segment

Molina Medicaid Solutions contributed $6.2 million to operating income from the date of its acquisition on May 1, 2010, through September 30, 2010, with an operating profit margin of approximately 12%. As we expected, the operating profit for this segment has declined as a result of the revenue and cost recognition that commenced in Maine as of its September 1, 2010 "go-live" operational date. In addition, and contrary to our expectations, the consulting and outside service costs for both Idaho and Maine following their respective go-live operational dates have not declined from their pre-operational levels. Performance of the Molina Medicaid Solutions segment for the five months ended September 30, 2010 was as follows:

	(In thousands)
Service revenue before amortization	$ 57,571
Amortization of contract backlog recorded as contra-service revenue	(4,246)
Service revenue	53,325
Cost of service revenue	41,859
General and administrative costs	3,161
Amortization of customer relationship intangibles recorded as amortization	2,143
Operating income	$ 6,162

Consolidated Expenses and Other

General and Administrative Expenses

General and administrative expenses were $245.6 million, or 8.2% of total revenue, for the nine months ended September 30, 2010, compared with $199.0 million, or 7.4% of total revenue, for the nine months ended September 30, 2009. The increase in the G&A ratio was the result of higher administrative expenses for the Health Plan segment, driven in part by the cost of Medicare expansion, employee severance and settlement costs of $5.2 million year to date, and the acquisitions of Molina Medicaid Solutions and the Wisconsin health plan.

	Nine Months Ended September 30,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Medicare-related administrative costs	$ 21,010	0.7%	$ 12,842	0.5%
Non Medicare-related administrative costs:				
Molina Medicaid Solutions segment administrative costs	3,161	0.1	—	—
Employee severance and settlement costs	5,152	0.2	538	—
Molina Medicaid Solutions and Wisconsin health plan acquisition costs	2,688	0.1	—	—
Health Plans segment administrative payroll, including employee incentive compensation	167,150	5.6	150,952	5.6
All other Health Plans segment administrative expense	46,458	1.5	34,649	1.3
	$ 245,619	8.2%	$ 198,981	7.4%

Premium Tax Expense

Premium tax expense relating to Health Plans segment premium revenue increased to 3.5% of revenue for the nine months ended September 30, 2010, from 3.2% for the nine months ended September 30, 2009, primarily due to the imposition of a higher premium tax rate in Ohio effective October 1, 2009.

Depreciation and Amortization

Depreciation and amortization specifically identified as such in the consolidated statements of income increased $4.8 million in the nine months ended September 30, 2010 compared with the nine months ended September 30, 2009, primarily due to depreciation of investments in infrastructure and the amortization of certain purchased intangibles associated with the acquisition of Molina Medicaid Solutions. Beginning in the second quarter of 2010, the amortization of acquired contracts associated with the acquisition of Molina Medicaid Solutions has been recorded as contra-service revenue. Additionally, most of the depreciation associated with the Molina Medicaid Solutions segment is recorded as cost of service revenue. The following table presents all depreciation and amortization recorded in the consolidated financial statements:

	Nine Months Ended September 30,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation and amortization	$ 33,234	1.1%	$ 28,468	1.1%
Amortization recorded as contra- service revenue	4,246	0.1	—	—
Depreciation recorded as cost of service revenue	3,005	0.1	—	—
Depreciation and amortization reported in the consolidated statements of cash flows	$ 40,485	1.3%	$ 28,468	1.1%

Gain on Retirement of Convertible Senior Notes

In February 2009, we purchased and retired $13.0 million face amount of our convertible senior notes. We purchased the notes at an average price of $74.25 per $100 principal amount, for a total of $9.7 million. Including accrued interest, our total payment was $9.8 million. In connection with the purchase of the Notes, we recorded a gain of $1.5 million ($0.04 per diluted share) in the first quarter of 2009.

Interest Expense

Interest expense increased to $12.1 million for the nine months ended September 30, 2010, from $9.9 million for the nine months ended September 30, 2009. We incurred higher interest expense relating to the $105 million draw on our credit facility (beginning May 1, 2010) to fund the acquisition of Molina Medicaid Solutions. Interest expense includes non-cash interest expense relating to our convertible senior notes, which totaled $3.8 million, and $3.6 million for the nine months ended September 30, 2010 and 2009, respectively.

Income Taxes

Income tax expense was recorded at an effective rate of 37.3% for the nine months ended September 30, 2010 compared with 26.1% for the nine months ended September 30, 2009. The lower rate in 2009 was primarily due to discrete tax benefits of $5.5 million recorded in the nine months ended September 30, 2009, as a result of settling tax examinations, a reassessment of the tax liability for unrecognized tax benefits, and higher than previously estimated tax credits.

For the nine months ended September 30, 2009, amounts for premium tax expense and income tax expense have been reclassified to conform to the presentation of MGRT as a premium tax. The MGRT amounted to $4.6 million and $3.4 million for the nine months ended September 30, 2010, and 2009, respectively. There was no impact to net income for either period presented relating to this change.

Acquisitions

On September 1, 2010, we acquired Abri Health Plan, a Medicaid managed care organization based in Milwaukee, Wisconsin. We expect the final purchase price for the acquisition to be approximately $16 million, subject to adjustments. As of September 30, 2010, we had paid $5 million of the total purchase price. There will be two subsequent measurement dates (November 1, 2010 and February 1, 2011) on which we will compute the payments based on the plan's membership on those dates.

On May 1, 2010, we acquired a health information management business which we now operate under the name, *Molina Medicaid Solutions*SM as described in "Overview," above.

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue and investment income. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of September 30, 2010, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income decreased to $4.9 million for the nine months ended September 30, 2010, compared with $7.3 million for the nine months ended September 30, 2009. This decline was primarily due to lower interest rates in 2010. Our annualized portfolio yield for the nine months ended September 30, 2010 was 0.8% compared with 1.4% for the nine months ended September 30, 2009.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash provided by operating activities for the nine months ended September 30, 2010 was $8.5 million compared with $130.3 million for the nine months ended September 30, 2009, a decrease of $121.8 million. Deferred revenue, which was a source of operating cash totaling $61 million in 2009, was a use of operating cash totaling $64 million in 2010. In 2009, the state of Ohio typically paid premiums in advance of the month the premium was earned. Beginning in January 2010, the state of Ohio has delayed its premium payments to mid-month for the month premium is earned. We do not anticipate any advance payments for the Ohio health plan's premiums during 2010. Cash provided by operating activities was further reduced in the third quarter of 2010 as a result of the delayed passage of the California state budget for 2010-2011. Accounts receivable at the California health plan increased $65 million between the June 30, 2010 and September 30, 2010.

Cash used in investing activities increased significantly in the first nine months of 2010 compared with the first nine months of 2009, due chiefly to the acquisition of Molina Medicaid Solutions, which totaled $131.3 million.

Cash provided by financing activities increased due to funds generated by our equity offering in the third quarter of 2010, which totaled $111.6 million, net of the underwriting discount. Amounts borrowed under our credit facility to fund the acquisition of Molina Medicaid Solutions in the second quarter of 2010 were repaid in the third quarter using proceeds from the equity offering.

Reconciliation of Non-GAAP (1) to GAAP Financial Measures

EBITDA (2)

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In thousands)			
Operating income	$ 29,953	$ 15,089	$ 71,569	$ 57,738
Add back:				
Depreciation and amortization expense	11,954	9,832	33,234	28,468
Amortization expense recorded as contra-service revenue	2,655	—	4,246	—
Depreciation expense recorded as cost of service revenue	1,964	—	3,005	—
EBITDA	$ 46,526	$ 24,921	$ 112,054	$ 86,206

(1) GAAP stands for U.S. generally accepted accounting principles.

(2) We calculate EBITDA consistently on a quarterly and annual basis by adding back depreciation and amortization expense to operating income. Operating income included interest income of $3.7 million and $6.6 million for the nine months ended September 30, 2010, and 2009, respectively. EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization expense, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities, nor should EBITDA be considered in isolation from these GAAP measures of operating performance. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At September 30, 2010, the parent company — Molina Healthcare, Inc. — held cash and investments of $49.6 million, including auction rate securities with a fair value of $5.9 million, compared with $45.6 million of cash and investments at December 31, 2009. On a consolidated basis, at September 30, 2010, we had working capital of $372.8 million compared with $321.2 million at December 31, 2009. At September 30, 2010 and December 31, 2009, cash and cash equivalents were $426.5 million and $469.5 million, respectively. At September 30, 2010, unrestricted investments were $215.7 million, including $20.3 million in non-current auction rate securities At December 31, 2009, unrestricted investments were $234.5 million, including $59.7 million in non-current auction rate securities.

We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Credit Facility

We are a party to an Amended and Restated Credit Agreement, dated as of March 9, 2005, as amended by the first amendment on October 5, 2005, the second amendment on November 6, 2006, the third amendment on May 25, 2008, the fourth amendment on November 2009 and the fifth amendment on March 15, 2010, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility") for a revolving credit line of $150 million that matures in May 2012. The Credit Facility is intended to be used for general corporate purposes. We borrowed $105 million under the Credit Facility to acquire Molina Medicaid Solutions in the second quarter of 2010. During the third quarter of 2010, we repaid this amount using proceeds from our equity offering, described below, under "Shelf Registration Statement." As of September 30, 2010, and December 31, 2009, there was no outstanding principal balance under the Credit Facility.

To the extent that in the future we incur any obligations under the Credit Facility, such obligations will be secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At September 30, 2010, we were in compliance with all financial covenants in the Credit Facility.

The commitment fee on the total unused commitments of the lenders under the Credit Facility is 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans is 200 basis points at every level of the pricing grid. Thus, the applicable margins under the Credit Facility range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. The Credit Facility carves out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of the convertible senior notes, although the $187.0 million indebtedness is included in the calculation of our consolidated leverage ratio. The fixed charge coverage ratio set forth pursuant to the Credit Facility was 2.75x (on a pro forma basis) at December 31, 2009, and 3.00x thereafter.

The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.25 to 1.0 for the fourth quarter of 2009 (on a pro forma basis), and to 3.50 to 1.0 for the first and second quarters of 2010, and through August 14, 2010. Effective as of August 15, 2010, the consolidated leverage ratio under the Credit Facility reverted back to 2.75 to 1.0. In connection with the lenders' approval of the fifth amendment, we paid an amendment fee of 25 basis points on the amount of each consenting lender's commitment. We also paid an incremental commitment fee of 12.5 basis points based on each lender's unfunded commitment during the period from the effective date of the fifth amendment through August 15, 2010.

Shelf Registration Statement

In December 2008, we filed a shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the issuance of up to $300 million of our securities, including common stock, warrants, or debt securities, and up to 250,000 shares of outstanding common stock that may be sold from time to time by the Molina Siblings Trust as a selling stockholder. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering. As a result of the offering described below, we may now offer up to $182.5 million of our securities from time to time under the shelf registration statement.

On August 13, 2010, we sold 4,000,000 shares of common stock covered by this registration statement, and on August 23, 2010, we sold 350,000 shares of common stock covered by this registration statement. The public offering price for this sale was $25.65 per share, net of the underwriting discount. Our proceeds from these sales totaled approximately $111.6 million, net of the underwriting discount. We used the proceeds from these sales to repay the Credit Facility and for general corporate purposes. Also on August 13, 2010, the Molina Siblings Trust, as a selling stockholder, sold 250,000 shares of outstanding common stock covered by this registration statement.

Long-Term Debt

Convertible Senior Notes

In October 2007, we sold $200.0 million aggregate principal amount of 3.75% Convertible Senior Notes due 2014 (the "Notes"). The sale of the Notes resulted in net proceeds totaling $193.4 million. During 2009, we purchased and retired $13.0 million face amount of the Notes, for a remaining aggregate principal amount of $187.0 million as of September 30, 2010, and December 31, 2009. The Notes rank equally in right of payment with our existing and future senior indebtedness.

The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 21.3067 shares of our common stock per $1,000 principal amount of the Notes. This represents an initial conversion price of approximately $46.93 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances. Prior to July 2014, holders may convert their Notes only under the following circumstances:

- During any fiscal quarter after our fiscal quarter ending December 31, 2007, if the closing sale price per share of our common stock, for each of at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, is greater than or equal to 120% of the conversion price per share of our common stock;

- During the five business day period immediately following any five consecutive trading day period in which the trading price per $1,000 principal amount of the Notes for each trading day of such period was less than 98% of the product of the closing price per share of our common stock on such day and the conversion rate in effect on such day; or

- Upon the occurrence of specified corporate transactions or other specified events.

On or after July 1, 2014, holders may convert their Notes at any time prior to the close of business on the scheduled trading day immediately preceding the stated maturity date regardless of whether any of the foregoing conditions is satisfied.

We will deliver cash and shares of our common stock, if any, upon conversion of each $1,000 principal amount of Notes, as follows:

- An amount in cash (the “principal return”) equal to the sum of, for each of the 20 Volume-Weighted Average Price, or VWAP, trading days during the conversion period, the lesser of the daily conversion value for such VWAP trading day and $50 (representing 1/20th of $1,000); and

- A number of shares based upon, for each of the 20 VWAP trading days during the conversion period, any excess of the daily conversion value above $50.

Regulatory Capital and Dividend Restrictions

The principal operations of our Health Plans segment are conducted through our health plan subsidiaries operating in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. The health plans are subject to state laws that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and may restrict the timing, payment, and amount of dividends and other distributions that may be paid to Molina Healthcare, Inc. as the sole stockholder of each of our health plans. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries, after intercompany eliminations, which may not be transferable to us in the form of loans, advances, or cash dividends totaled $380.0 million at September 30, 2010, and $368.7 million at December 31, 2009.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if adopted by a particular state, set minimum capitalization requirements for health plans and other insurance entities bearing risk for health care coverage. The requirements take the form of risk-based capital, or RBC, rules. These rules, which vary slightly from state to state, have been adopted in Michigan, Missouri, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin. California and Florida have not adopted RBC rules and have not given notice of any intention to do so. The RBC rules, if adopted by California and Florida, may increase the minimum capital required by those states.

At September 30, 2010, our health plans had aggregate statutory capital and surplus of approximately $401.3 million, compared with the required minimum aggregate statutory capital and surplus of approximately $258.7 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2010. We have the ability and commitment to provide additional working capital to each of our health plans when necessary to ensure that capital and surplus continue to meet regulatory requirements. Barring any change in regulatory requirements, we believe that we will continue to be in compliance with these requirements through 2010.

Contractual Obligations

In our Annual Report on Form 10-K for the year ended December 31, 2009, we reported on our contractual obligations as of that date. There have been no material changes to our contractual obligations since that report.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Principal areas requiring the use of estimates include those areas listed below. The most significant of these estimates is revenue recognition, the determination of deferred contract costs, and the determination of medical claims and benefits payable, which are discussed in further detail below:

- The recognition of revenue;
- The determination of deferred contract costs;
- The determination of medical claims and benefits payable;
- The determination of the amount of revenue to be recognized under certain contracts that place revenue at risk dependent upon either the achievement of certain quality or administrative measurements, or the expenditure of certain percentages of revenue on defined expenses;
- The determination of allowances for uncollectible accounts;
- The valuation of certain investments;
- Settlements under risk or savings sharing programs;
- The impairment of long-lived and intangible assets;
- The determination of professional and general liability claims, and reserves for potential absorption of claims unpaid by insolvent providers;
- The determination of reserves for the outcome of litigation;
- The determination of valuation allowances for deferred tax assets; and
- The determination of unrecognized tax benefits.

Revenue Recognition — Health Plans Segment

Certain components of premium revenue are subject to accounting estimates. Chief among these are:

- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health:* A portion of premium revenue paid to our Florida health plan by the state of Florida may be refunded to the state if certain minimum amounts are not spent on defined behavioral health care costs. At September 30, 2010, we had not recorded any liability under the terms of this contract provision. If the state of Florida disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of this provision, including revisions to the definitions of premium revenue or behavioral health care costs, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our Florida health plan.

- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* A portion of premium revenue paid to our New Mexico health plan by the state of New Mexico may be refunded to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). Our contract is for a three-year period, and the medical cost floor is based on premiums and medical care costs over the entire contract period. Effective July 1, 2008, our New Mexico health plan entered into a new three year contract that, in addition to retaining the medical cost floor, added certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At September 30, 2010, there was no liability recorded under the terms of these contract provisions. If the state of New Mexico disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of these provisions, including revisions to the definitions of premium revenue, medical care costs, administrative costs or profit, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our New Mexico health plan.

- *New Mexico Health Plan At-Risk Premium Revenue:* Under our contract with the state of New Mexico, up to 1% of our New Mexico health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality of care and administrative measures dictated by the state. The state of New Mexico's fiscal year ends June 30, and open contract years typically include up to the two preceding years. For the open state fiscal years ending June 30, 2011, our New Mexico health plan has received $4.6 million in at-risk revenue to date. To date, we have recognized $2.2 million of that amount as revenue, and recorded a liability of approximately $2.4 million as of September 30, 2010, for the remainder. If the state of New Mexico disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required.

- *Ohio Health Plan At-Risk Premium Revenue:* Under our contract with the state of Ohio, up to 1% of our Ohio health plan's revenue may be refundable to the state if certain performance measures are not met. Effective January 1, 2010 an additional 0.25% of the Ohio health plan's revenue became refundable if certain pharmacy specific performance measures were not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. The state of Ohio's fiscal year ends June 30, and open contract years typically include up to the two preceding years. For the open state fiscal years ending June 30, 2011, our Ohio health plan has received $11.2 million in at-risk revenue to date. To date, we have recognized $3.7 million of that amount as revenue and recorded a liability of approximately $7.5 million as of September 30, 2010, for the remainder. If the state of Ohio disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required. During the third quarter of 2010, we reversed the recognition of approximately $3.3 million of at-risk revenue previously recognized.

- *Utah Health Plan Premium Revenue:* Our Utah health plan may be entitled to receive additional premium revenue from the state of Utah as an incentive payment for saving the state of Utah money in relation to fee-for-service Medicaid. In prior years, we estimated amounts we believed were recoverable under our savings sharing agreement with the state of Utah based on available information and our interpretation of our contract with the state. The state may not agree with our interpretation or our application of the contract language, and it may also not agree with the manner in which we have processed and analyzed our member claims and encounter records. Thus, the ultimate amount of savings sharing revenue that we realize from prior years may be subject to negotiation with the state. During 2007, as a result of an ongoing disagreement with the state of Utah, we wrote off the entire receivable, totaling $4.7 million. Our Utah health plan continues to assert its claim to the amounts believed to be due under the savings share agreement. When additional information is known, or resolution is reached with the state regarding the appropriate savings sharing payment amount for prior years, we will adjust the amount of savings sharing revenue recorded in our financial statements as appropriate in light of such new information or agreement. No receivables for saving sharing revenue have been established at September 30, 2010 or December 31, 2009.

- *Texas Health Plan Profit Sharing:* Under our contract with the state of Texas there is a profit-sharing agreement, where we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As of September 30, 2010, we had an aggregate liability of approximately $0.6 million accrued pursuant to our profit-sharing agreement with the state of Texas for the 2009 and 2010 contract years (ending August 31 of each year). We paid $1.4 million to the state under the terms of this profit sharing agreement during the nine months ended September 30, 2010. Because the final settlement calculations include a claims run-out period of nearly one year, the amounts recorded, based on our estimates, may be adjusted. We believe that the ultimate settlement will not differ materially from our estimates.

- *Texas Health Plan At-Risk Premium Revenue:* Under our contract with the state of Texas, up to 1% of our Texas health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. The state of Texas's fiscal year ends August 31, and open contract years typically include up to the two preceding years. For the open state fiscal years ending August 31, 2011, our Texas health plan received $1.2 million in at-risk revenue, all of which has been recognized as revenue. If the state of Texas disagrees with our estimation of our compliance with the at-risk premium requirements, an adjustment to the amounts owed may be required.

- *Medicare Premium Revenue:* Based on member encounter data that we submit to CMS, our Medicare revenue is subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. That analysis is similar to the process for the adjustment of member risk scores, but is further complicated by member pharmacy cost sharing provisions attached to the Medicare pharmacy benefit that do not apply to the services measured by the member risk adjustment process. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. To the extent that the premium revenue ultimately received from CMS differs from recorded amounts, we will adjust reported Medicare revenue. Based on our knowledge of member health care utilization patterns we have recorded a liability of approximately $1.3 million related to the potential recoupment of Medicare premium revenue at September 30, 2010.

Revenue Recognition and Determination of Deferred Contract Costs — Molina Medicaid Solutions Segment

As a result of our recent acquisition of Molina Medicaid Solutions, a portion of our revenues is derived from service arrangements. For fixed-price contracts where the system design and development phase were in process as of the acquisition date, we apply contract accounting because we will deliver significantly modified and customized MMIS software to the customer under the terms of the contract. Additionally, these contracts contain multiple deliverables; once the system design and development phase is complete, we provide technology outsourcing services and business process outsourcing. We do not have vendor specific objective evidence of the fair value of the technology outsourcing and business process outsourcing components of the contracts because we do not have history of offering these services on a stand-alone basis. As such we account for these fixed-price service contracts as a single element.

Therefore, in general, we recognize contract revenues as a single element ratably over the performance period, or contract term, of the outsourcing services (operations phase) because these services are the last element to be delivered under the contract. The contract terms typically range from five to 10 years. In those service arrangements where final acceptance of a system or solution by the customer is required, contract revenues and costs are deferred until all material acceptance criteria have been met. Performance will often extend over long periods, and our right to receive future payment depends on our future performance in accordance with the agreement. Revenues earned in excess of related billings are accrued, whereas billings in excess of revenues earned are deferred until the related services are provided. Amortization of certain identifiable intangible assets, relating to contract backlog, is recorded to contra-service revenue, to match revenues associated with contract performance that occurred prior to the acquisition date.

Deferred contract costs include direct and incremental costs such as direct labor, hardware and software. We also defer and subsequently amortize certain transition costs related to activities that transition the contract from the design, development, and implementation phase to the operational, or business process outsourcing, phase. Deferred contract costs, including transition costs, are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period. Indirect costs associated with MMIS service contracts are generally expensed as incurred.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	Sept. 30, 2010	Dec. 31, 2009	Sept. 30, 2009
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 271,285	$ 246,508	$ 237,495
Capitation payable	53,410	39,995	39,361
Pharmacy	14,663	20,609	21,100
Other	15,782	9,404	5,158
	$ 355,140	$ 316,516	$ 303,114

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are “Incurred But Not Paid,” or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $271.3 million of our total medical claims and benefits payable of $355.1 million as of September 30, 2010. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider’s monthly capitation payment), our IBNP liability at September 30, 2010 was $263.8 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended per member per month (PMPM) cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of September 30, 2010 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding September 30, 2010, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 80,718
(4)%	53,812
(2)%	26,906
2%	(26,906)
4%	(53,812)
6%	(80,718)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of September 30, 2010 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (65,330)
(4)%	(43,553)
(2)%	(21,777)
2%	21,777
4%	43,553
6%	65,330

The following per-share amounts are based on a combined federal and state statutory tax rate of 38%, and 26.8 million diluted shares outstanding for the nine months ended September 30, 2010. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at September 30, 2010, net income for the three months ended September 30, 2010 would increase or decrease by approximately $8.3 million, or $0.31 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at September 30, 2010, net income for the three months ended September 30, 2010 would increase or decrease by approximately $6.8 million, or $0.25 per diluted share, net of tax. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $41.7 million, or $1.56 per diluted share, and $33.8 million, or $1.26 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $8.3 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which much of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2009, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 17.6%.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2009 and through September 30, 2010 were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

For the nine months ended September 30, 2010, we recognized a benefit from prior period claims development in the amount of $46.2 million, This amount represents our estimate as of September 30, 2010 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2009 exceeded the amount that will ultimately be paid out in satisfaction of that liability.

At March 31, 2010 and June 30, 2010 we had estimated the benefit from prior period claims development at $38.5 million and $43.0 million, respectively. Our estimate of the benefit from prior period claims development has increased during 2010 as we have paid claims and gained more insight into the amount that will ultimately be paid in settlement of our estimated liability at December 31, 2009. The overestimation of claims liability at December 31, 2009 was the result of the following factors:

- In New Mexico, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- In California, we underestimated the extent to which various network restructuring, provider contracting and medical management imitative had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

We recognized a benefit from prior period claims development in the amount of $48.0 million and $51.6 million for the nine months ended September 30, 2009, and the year ended December 31, 2009, respectively (see table below). This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2008. The overestimation of claims liability at December 31, 2008 was the result of the following factors:

- In New Mexico, we overestimated at December 31, 2008 the ultimate amounts we would need to pay to resolve certain high dollar provider claims.
- In Ohio, we underestimated the degree to which certain operational initiatives had reduced our medical costs in the last few months of 2008.
- In Washington, we overestimated the impact that certain adverse utilization trends would have on our liability at December 31, 2008.
- In California, we underestimated utilization trends at the end of 2008, leading to an underestimation of our liability at December 31, 2008. Additionally, we underestimated the impact that certain delays in the receipt of paper claims would have on our liability, leading to a further underestimation of our liability at December 31, 2008.

In estimating our claims liability at September 30, 2010, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- The rapid growth of membership in our Medicare line of business between December 31, 2009 and September 30, 2010.
- An increase in claims inventory at our Ohio health plan between June 30, 2010 and September 30, 2010.
- The transition of claims processing for our Missouri health plan from a third party service provider to our internal claims processing platform effective April l, 2010.
- Changes to the Medicaid fee schedule in Utah effective July 1, 2010.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. However, that benefit will affect current period earnings only to the extent that the replenishment of the reserve for adverse claims development (and the re-accrual of administrative costs for the settlement of those claims) is less than the benefit recognized from the prior period liability. In 2009 and through September 30, 2010, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

We seek to maintain a consistent claims reserving methodology across all periods. Accordingly, any prior period benefit from an un-utilized reserve for adverse claims development may be offset by the establishment of a new reserve in an approximately equal amount (relative to premium revenue, medical care costs, and medical claims and benefits payable) in the current period, and thus the impact on earnings for the current period may be minimal.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The negative amounts displayed for "*Components of medical care costs related to:* Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported. Claims information presented below does not include our new Wisconsin health plan.

	As of and for the				
	Nine Months Ended		Six Months Ended	Three Months Ended	Year Ended
	September 30, 2010	September 30, 2009	June 30, 2010	March 31, 2010	Dec. 31, 2009
Balances at beginning of period	$ 316,516	$ 292,442	$ 316,516	$ 316,516	$ 292,442
Components of medical care costs related to:					
Current period	2,554,579	2,381,903	1,705,411	861,271	3,227,794
Prior periods	(46,213)	(48,038)	(42,982)	(38,455)	(51,558)
Total medical care costs	2,508,366	2,333,865	1,662,429	822,816	3,176,236
Payments for medical care costs related to:					
Current period	2,219,296	2,089,417	1,389,307	581,389	2,919,240
Prior periods	250,446	233,776	244,038	230,970	232,922
Total paid	2,469,742	2,323,193	1,633,345	812,359	3,152,162
Balances at end of period	$ 355,140	$ 303,114	$ 345,600	$ 326,973	$ 316,516
Benefit from prior period as a percentage of:					
Balance at beginning of period	14.6%	16.4%	13.6%	12.1%	17.6%
Premium revenue	1.5%	1.8%	2.2%	4.0%	1.4%
Total medical care costs	1.8%	2.1%	2.6%	4.7%	1.6%
Days in claims payable, fee for service only	42	44	44	44	44
Number of members at end of period	1,597,000	1,411,000	1,498,000	1,482,000	1,455,000
Number of claims in inventory at end of period	110,200	107,700	106,700	153,700	93,100
Billed charges of claims in inventory at end of period	$ 158,900	$ 145,500	$ 147,500	$ 194,000	$ 131,400
Claims in inventory per member at end of period	0.07	0.08	0.07	0.10	0.06
Billed charges of claims in inventory per member at end of period	$ 99.50	$ 103.12	$ 98.46	$ 130.90	$ 90.31
Number of claims received during the period	10,701,900	9,427,400	7,066,100	3,493,300	12,930,100
Billed charges of claims received during the period	$ 8,615,500	$ 7,180,800	$ 5,605,400	$ 2,760,500	$ 9,769,000

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk.*

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years. Restricted investments are invested principally in certificates of deposit and treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our subsidiaries operate.

Item 4. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended September 30, 2010 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. ***Legal Proceedings***

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly-funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. These actions, when finally concluded and determined, are not likely, in our opinion, to have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Item 1A. ***Risk Factors***

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. The following risk factors were identified or re-evaluated by the Company during the third quarter and are a supplement to those risk factors discussed in Part I, Item 1A — Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2009, and to Part II, Item 1A — Risk Factors, in our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2010 and June 30, 2010. The risks described herein and in our Annual Report on Form 10-K and Quarterly Reports on Form 10-Q are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, or results of operations.

MMIS operational problems in Idaho or Maine could result in reduced or withheld payments, actual damage or liquidated damage assessments, increased administrative costs, or even contract termination, any of which could adversely affect our business, financial condition, cash flows, or results of operations.

From and after the MMIS operational or "go live" date of June 1, 2010, Molina Medicaid Solutions has experienced certain problems with the MMIS in Idaho. On October 5, 2010, Molina Medicaid Solutions received from the Idaho Department of Administration a notice to cure letter with respect to its alleged non-compliance with certain provisions of the MMIS project agreements. Molina Medicaid Solutions and the Idaho Department of Health and Welfare ("DHW") have been working together to resolve the MMIS problems, and Molina Medicaid Solutions has developed a corrective action plan with respect to the identified problems and defects. Molina Medicaid Solutions believes it has ameliorated or corrected many of the identified problems, and that it will ultimately be successful in resolving all of the MMIS issues in Idaho. However, in the event Molina Medicaid Solutions is unsuccessful in correcting all of the identified problems, the Idaho Department of Administration may: (i) reduce or withhold its payments to Molina Medicaid Solutions, (ii) require Molina Medicaid Solutions to provide services at no additional cost to Idaho, (iii) require the payment of actual damages or liquidated damages, or (iv) terminate its contract with Molina Medicaid Solutions. In addition, Molina Medicaid Solutions may incur much greater administrative costs than expected in correcting the MMIS problems, or in advancing interim payments to Idaho providers. For example, the consulting and outside service costs for Idaho following its go-live operational date have not declined from the pre-operational level as had been previously expected. Finally, Idaho DHW may not accept the MMIS developed and implemented by Molina Medicaid Solutions, or CMS may not certify such MMIS. All of such risks are also applicable to the MMIS in Maine which became operational as of September 1, 2010. The realization of any of the foregoing risks could adversely affect our business, financial condition, cash flows, or results of operations.

There are numerous risks associated with the expansion of our Texas health plan's service area under the CHIP Rural Service Area Program, and with our acquisition of Abri Health Plan in Wisconsin.

In September 2010, our Texas health plan began arranging health care services for approximately 64,000 low-income children and pregnant women in 174 predominantly rural counties through Texas' Children's Health Insurance Program (CHIP) and CHIP Perinatal Program. In addition, on September 1, 2010, we acquired Abri Health Plan, a Medicaid managed care organization based in Milwaukee, Wisconsin. As of September 30, 2010, Abri Health Plan served approximately 28,000 Medicaid members. There are numerous risks associated with a health plan's initial expansion into a new service area or the provision of medical services to a new population, including pent-up demand for medical services, elevated medical care costs, and our lack of actuarial experience in setting appropriate reserve levels. In the event the medical care costs of our Texas or Wisconsin health plans are higher than anticipated, we are unable to lower the medical care ratio associated with these new populations, or our reserve levels are inadequate, the negative results of our Texas or Wisconsin health plan could adversely affect our business, financial condition, cash flows, or results of operations.

There are numerous revenue recognition risks associated with certain provisions in the state Medicaid contracts of our New Mexico, Ohio, Florida, and Texas health plans.

The state contracts of our New Mexico, Florida, and Texas health plans contain provisions pertaining to medical cost floors, administrative cost and profit ceilings, and profit sharing arrangements. These provisions are subject to interpretation and application by our health plans. In the event the applicable state government agency disagrees with our health plan's interpretation or application of the contract provisions at issue, the health plan could be required to adjust the amount of its obligations under these provisions and/or make a payment or payments to the state. Any interpretation or application of these provisions at variance with our health plan's interpretation or inconsistent with our revenue recognition accounting treatment could adversely affect our business, financial condition, cash flows, or results of operations.

In addition, the state contracts of our Ohio, New Mexico, and Texas health plans contain provisions pertaining to at-risk premiums that require us to meet certain quality performance measures in order to earn all of our contract revenues in those states. In the event we are unsuccessful in achieving the stated performance measure, our health plan will be unable to recognize the revenue associated with that measure. Any failure of our health plan to satisfy one of these performance measure provisions, or the interpretation or application of these performance measure provisions at variance with our health plan's interpretation, could adversely affect our business, financial condition, cash flows, or results of operations.

There are risks associated with the expected rate increase of approximately 2% effective October 1, 2010 for our California health plan.

On October 8, 2010, the state of California approved a budget for its state fiscal year 2011 running from July 1, 2010 to June 30, 2011. Based on the amounts budgeted for Medi-Cal managed care plans, our California health plan has projected that it will receive a blended PMPM rate increase of approximately 2% effective as of October 1, 2010. The fiscal year 2010 guidance we issued on October 26, 2010 assumes a rate increase at our California health plan of 2% effective as of October 1, 2010. In the event our California health plan does not receive the expected 2% rate increase, or the increase does not become effective as of October 1, 2010, our fiscal year 2010 financial results could be less favorable than projected in our guidance.

We face periodic routine and non-routine reviews, audits, and investigations by government agencies, and these reviews and audits could have adverse findings, which could negatively impact our business.

We are subject to various routine and non-routine governmental reviews, audits, and investigations. Violation of the laws, regulations, or contract provisions governing our operations, or changes in interpretations of those laws, could result in the imposition of civil or criminal penalties, the cancellation of our contracts to provide managed care services, the suspension or revocation of our licenses, the exclusion from participation in government sponsored health programs, or the revision and recoupment of past payments made based on audit findings. For example, from July 26 to July 30, 2010, the Center for Medicare and Medicaid Services, or CMS, conducted an on-site audit with respect to our Medicare Advantage and Prescription Drug Plan contracts in the compliance areas of enrollment and disenrollment, premium billing, Part D formulary administration, Part D appeals, grievances and coverage determinations and compliance program. As of November 3, 2010, we have not been provided with any written notification of the results of the audit. If we become subject to material fines or if other sanctions or other corrective actions were imposed upon us, whether as a result of this most recent CMS audit or otherwise, we might suffer a substantial reduction in profitability, and might also lose one or more of our government contracts and as a result lose significant numbers of members and amounts of revenue. In addition, government receivables are subject to government audit and negotiation, and government contracts are vulnerable to disagreements with the government. The final amounts we ultimately receive under government contracts may be different from the amounts we initially recognize in our financial statements.

States may not adequately compensate us for the value of drug rebates that were previously earned by the Company but that are now collectible by the states.

The Patient Protection and Affordable Care Act includes certain provisions which change the way rebates for drugs are handled for Medicaid managed care plans. Retroactive to March 23, 2010, state Medicaid programs are now required to collect rebates on all Medicaid-covered outpatient drugs dispensed or administered to Medicaid managed care enrollees (excluding certain drugs that are already discounted), and drug companies will be required to pay specified rebates directly to the state Medicaid programs. This will likely impact the level of rebates received by managed care plans from the drug companies for Medicaid managed care enrollees. Many drug companies are in the process of renegotiating their rebate contracts with Medicaid managed care plans and pharmacy benefits managers. As a result, the drug rebate amounts paid to managed care plans like ours will likely decline significantly in the future. Although we will be pursuing rate increases with state agencies to make us whole for the rebate amounts lost, there can be no assurances that the premium increases we may receive, if any, will be adequate to offset the amount of the lost rebates. If such premium increases prove to be inadequate, our business, financial condition, cash flows, or results of operations could be adversely affected.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended September 30, 2010 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
June 30, 2010

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. is a multi-state managed care organization that arranges for the delivery of health care services to persons eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. We conduct our business primarily through licensed health plans in the states of California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, and Washington. The health plans are locally operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Effective January 1, 2010, we terminated operations at our small Medicare health plan in Nevada.

On May 1, 2010, we acquired a health information management business which now operates under the name, *Molina Medicaid Solutions*SM. Molina Medicaid Solutions provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program. See Note 3, "Business Purchase Transactions," for more information relating to this acquisition.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc. and all majority owned subsidiaries. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included. Except as described below, such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated in consolidation. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2010. Financial information related to subsidiaries acquired during any year is included only for the period subsequent to their acquisition.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2009. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2009 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2009 audited financial statements.

Reclassifications

Effective January 1, 2010, we have recorded the Michigan modified gross receipts tax as a premium tax and not as an income tax. For the three month and six month periods ended June 30, 2009, amounts for premium tax expense and income tax expense have been reclassified to conform to this presentation. See Note 2, "Significant Accounting Policies."

In prior periods, general and administrative expenses have included premium tax expenses. Beginning with the three month and six month periods ended June 30, 2010, we have reported premium tax expenses on a separate line in the accompanying consolidated statements of income. Prior periods have been reclassified to conform to this presentation.

2. Significant Accounting Policies

Molina Medicaid Solutions Segment Revenue Recognition and Deferred Contract Costs

As a result of our recent acquisition of Molina Medicaid Solutions, a portion of our revenues is derived from service arrangements. This segment provides technology solutions to state Medicaid programs that include system development, system integration, and technology outsourcing services. In addition, this segment offers business process outsourcing to state Medicaid agencies that handle key administrative functions such as claims processing, provider enrollment, pharmacy drug rebate services, recipient eligibility management, and pre-authorization services. The following is an update of our accounting policy, as included in our December 31, 2009 audited financial statements, which specifically addresses revenue recognition for service arrangements.

Under certain of the contracts we acquired, the development of the MMIS solution has already been completed. Under these contracts, we provide business process outsourcing and technology outsourcing services, and recognize outsourcing services revenue on a straight-line basis over the remaining term of the contract.

For fixed-price contracts where the system design and development phase were in process as of the acquisition date, we apply contract accounting because we will deliver significantly modified and customized MMIS software to the customer under the terms of the contract. Additionally, these contracts contain multiple deliverables; once the system design and development phase is complete, we provide technology outsourcing services and business process outsourcing. We do not have vendor specific objective evidence of the fair value of the technology outsourcing and business process outsourcing components of the contracts because we do not have enough history of offering these services on a stand-alone basis. As such we account for these fixed-price service contracts as a single element.

Therefore, in general, we recognize contract revenues as a single element ratably over the performance period, or contract term, of the outsourcing services because these are the last elements to be delivered under the contract. Such contract terms typically range from five to 10 years. In those service arrangements where final acceptance of a system or solution by the customer is required, contract revenues and costs are deferred until all acceptance criteria have been met. Performance will often extend over long periods, and our right to receive future payment depends on our future performance in accordance with the agreement. Revenues earned in excess of related billings are accrued, whereas billings in excess of revenues earned are deferred until the related services are provided.

Deferred contract costs include direct and incremental costs such as direct labor, hardware and software. We also defer and subsequently amortize certain transition costs related to activities that transition the contract from the design, development, and implementation phase to the operational, or business process outsourcing phase. Deferred contract costs, including transition costs, are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets. Indirect costs associated with MMIS service contracts are generally expensed as incurred.

Property and Equipment

Property and equipment are stated at historical cost. Replacements and major improvements are capitalized, and repairs and maintenance are charged to expense as incurred. Furniture and equipment are generally depreciated using the straight-line method over estimated useful lives ranging from three to seven years. Software developed for internal use is capitalized. Software is generally amortized over its estimated useful life of three years. Leasehold improvements are amortized over the term of the lease, or over their useful lives from five to 10 years, whichever is shorter. Buildings are depreciated over their estimated useful lives of 31.5 years.

As discussed in "Molina Medicaid Solutions Segment Revenue Recognition and Deferred Contract Costs" above, the costs associated with certain equipment and software, which may be ultimately sold to our clients under fixed-price contracts, are capitalized and recorded as deferred contract costs. Such costs will be amortized on a straight-line basis over the performance period, consistent with the revenue recognition period.

Goodwill and Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of net assets acquired. Identifiable intangible assets (consisting principally of purchased contract rights and provider contracts) are generally amortized on a straight-line basis over the expected period to be benefited (between one and 15 years).

Goodwill and indefinite-lived assets are not amortized, but are subject to impairment tests on an annual basis or, more frequently, if indicators of impairment exist. We used a discounted cash flow methodology to assess the fair values of our reporting units. If the carrying values of our reporting units exceed the fair values, we perform a hypothetical purchase price allocation. Impairment is measured by comparing the goodwill derived from the hypothetical purchase price allocation to the carrying value of the goodwill and indefinite-lived asset balance.

Identifiable intangible assets associated with Molina Medicaid Solutions are classified as either contract backlog or customer relationships.

The contract backlog intangible asset is comprised of all contractual cash flows anticipated to be received during the remaining contracted period for each specific contract. The contract backlog intangible has been developed on a contract-by-contract basis. The amortization of that portion of the contract backlog intangible associated with contracts for which revenue recognition has not yet commenced is deferred until revenue recognition has begun. As each acquired contract constitutes a single revenue element contract, amortization of the contract backlog intangible is recorded to contra-service revenue so that amortization is matched to any revenues associated with contract performance that occurred prior to the acquisition date. Amortization of the contract backlog intangible asset is recorded on a straight line basis for each specific contract over a period of one to six years.

The customer relationship intangible asset is comprised of all contractual cash flows that are anticipated to be received during the option periods of each specific contract as well as anticipated renewals of those contracts. Amortization of the customer relationship intangible is recorded to amortization expense on a straight-line basis for each specific contract over a period of four to eight years.

The determination of the value of identifiable intangible assets requires us to make estimates and assumptions about estimated asset lives, future business trends, and growth. In addition to annual impairment testing, we continually evaluate whether events and circumstances have occurred that indicate the balance of identifiable intangible assets may not be recoverable. In evaluating impairment, we compare the estimated fair value of the intangible asset to its underlying book value. Such evaluation is significantly impacted by estimates and assumptions of future revenues, costs and expenses, and other factors. If an event occurs that would cause us to revise our estimates and assumptions used in analyzing the value of our identifiable intangible assets, such revision could result in a non-cash impairment charge that could have a material impact on our financial results.

Depreciation and Amortization

Beginning in the second quarter of 2010, the amortization of a portion of the purchased intangibles associated with the acquisition of Molina Medicaid Solutions is recorded as contra-service revenue, rather than as part of depreciation and amortization expense, to match revenues associated with contract performance that occurred prior to the acquisition date. Additionally, most of the depreciation expense associated with Molina Medicaid Solutions is

recorded as cost of service revenue. The following table presents all depreciation and amortization expense recorded in our consolidated financial statements:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(In thousands)			
Depreciation and amortization	$ 11,219	$ 9,584	$21,280	$18,636
Amortization expense recorded as contra-service revenue	1,591	—	1,591	—
Depreciation expense recorded as cost of service revenue	1,041	—	1,041	—
Depreciation and amortization reported in our consolidated statements of cash flows	$ 13,851	$ 9,584	$23,912	$18,636

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $11.0 million and $4.1 million at June, 2010, and December 31, 2009, respectively. Approximately $8.4 million of the unrecognized tax benefits recorded at June 30, 2010, relates to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $7.9 million and $3.4 million as of June 30, 2010 and December 31, 2009, respectively. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities will decrease by approximately $0.4 million due to the expiration of statute of limitations.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. Our accrual for the payment of interest relating to unrecognized tax benefits was $88,000 and $75,000 as of June 30, 2010 and December 31, 2009, respectively.

Effective January 1, 2008 through December 31, 2009, income tax expense included both the Michigan business income tax, or BIT, and Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, we have recorded the MGRT as a premium tax and not as an income tax. We will continue to record the BIT as an income tax. The MGRT amounted to $3.1 million and $2.2 million for the six months ended June 30, 2010, and 2009, respectively.

Generally, the MGRT is a 0.976% tax (statutory rate of 0.8% plus 21.99% surtax) on modified gross receipts, which for most taxpayers is defined as receipts less purchases from other firms. Managed care organizations, however, are not currently allowed to deduct payments to providers in determining modified gross receipts. As a result, the MGRT is 0.976% of our Michigan plan's receipts and does not vary with levels of pretax income or margins. We believe that presentation of the MGRT as a premium tax produces financial statements that are more useful to the reader.

Recent Accounting Pronouncements

Revenue Recognition. In late 2009, the Financial Accounting Standards Board, or FASB, issued the following new accounting guidance which is first applicable for our January 1, 2011 reporting:

- ASU No. 2009-14, Software (ASC Topic 985) — *Certain Revenue Arrangements That Include Software Elements*, a consensus of the FASB Emerging Issues Task Force. This guidance modifies the scope of ASC Subtopic 985-605 — *Software-Revenue Recognition* to exclude from its requirements (a) non-software components of tangible products and (b) software components of tangible products that are sold, licensed or leased with tangible products when the software components and non-software components of the tangible product function together to deliver the tangible product's essential functionality. We do not expect the update to impact our consolidated financial position, results of operations or cash flows.
- ASU No. 2009-13, Revenue Recognition (ASC Topic 605) — *Multiple-Deliverable Revenue Arrangements*, a consensus of the FASB Emerging Issues Task Force. This guidance modifies previous requirements by allowing the use of the "best estimate of selling price" in the absence of vendor-specific objective evidence ("VSOE") or verifiable objective evidence ("VOE") (now referred to as "TPE" or third-party evidence) for determining the selling price of a deliverable. A vendor is now required to use its best estimate of the selling price when more objective evidence of the selling price cannot be determined. In addition, the residual method of allocating arrangement consideration is no longer permitted. We are currently evaluating the impact of this update to our consolidated financial position, results of operations and cash flows.

Fair Value Measurements. In January 2010, the FASB issued guidance which expanded the required disclosures about fair value measurements. In particular, this guidance requires (a) separate disclosure of the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements along with the reasons for such transfers, (b) information about purchases, sales, issuances and settlements to be presented separately in the reconciliation for Level 3 fair value measurements, (c) fair value measurement disclosures for each class of assets and liabilities and (d) disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements for fair value measurements that fall in either Level 2 or Level 3. Effective for interim and annual reporting beginning after December 15, 2009, with one new disclosure effective after December 15, 2010, we adopted this guidance in full during the interim period ended March 31, 2010. The adoption of this guidance did not impact our consolidated financial position, results of operations or cash flows.

3. Business Purchase Transactions

Molina Medicaid Solutions

On May 1, 2010, we acquired a health information management business that was previously an operating unit of Unisys Corporation. This business now operates under the name *Molina Medicaid Solutions*SM, or Molina Medicaid Solutions. Molina Medicaid Solutions provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems (MMIS). MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program. As a result of this acquisition, we are diversifying our core health plan business, and we believe that the use of a common claims processing platform across our health plans and our new MMIS business will enable us to achieve synergies in the operations of both.

We paid $131.3 million to acquire Molina Medicaid Solutions; the purchase price is subject to working capital adjustments. The acquisition was funded with available cash of $26 million and $105 million drawn under our credit facility. In connection with the closing, both the fourth amendment and the fifth amendment to our credit facility became effective (see Note 11, "Long-Term Debt").

Recording of assets acquired and liabilities assumed: The transaction has been accounted for using the acquisition method of accounting which requires, among other things, that most assets acquired and liabilities assumed be recognized at their fair values as of the acquisition date. Accounts receivable are based on gross

contractual amounts receivable, substantially all of which we expect to collect because the creditors are state governments.

The following table summarizes the provisional acquisition-date fair values of the assets acquired and liabilities assumed:

	May 1, 2010 (In thousands)
Assets	
Accounts receivable	$ 17,128
Other current assets	4,129
Equipment and other long-term assets	1,003
Identifiable intangible assets	49,460
Goodwill	71,362
	143,082
Less: liabilities	
Accounts payable and accrued liabilities	11,346
Deferred tax liability	115
Other long-term liabilities	371
Net assets acquired	$ 131,250

The recorded amounts for assets and liabilities are provisional and subject to change. We will finalize the amounts recognized as we obtain the information necessary to complete the analyses, but by no later than December 31, 2010. Among the items that may change are amounts for intangibles and deferred taxes pending finalization of valuation efforts and the purchase price consideration subject to working capital adjustments.

A single estimate of fair value results from a complex series of judgments about future events and uncertainties and relies heavily on estimates and assumptions. Results that differ from the estimates and judgments used to determine the estimated fair value assigned to each class of assets acquired and liabilities assumed, as well as asset lives, can materially impact our results of operations.

Accounts receivable: Accounts receivable are stated at fair value, based on the gross contractual amounts receivable. We expect to collect substantially all of the accounts receivable because the creditors are state governments.

Identifiable intangible assets: The following table is a summary of the fair value estimates of the identifiable intangible assets and their weighted-average useful lives:

	Estimated Fair Value	Estimated Useful Life	Weighted-Average Amortization Period
	(In thousands)	(In years)	
Customer relationships	$ 21,820	8.0	4.9
Contract backlog	27,640	4.0	3.7
	$ 49,460		

Goodwill: Goodwill in the amount of $71.4 million was recognized for this acquisition, of which approximately $70.9 million is expected to be deductible for tax purposes. The total goodwill amount was calculated as the excess of the consideration transferred over the net assets recognized and represents the future economic benefits

arising from other assets acquired that could not be individually identified and separately recognized. The goodwill recorded as part of the acquisition of Molina Medicaid Solutions includes:

- Expected synergies and other benefits that we believe will result from combining the operations of Medicaid Solutions with the operations of Molina;
- Any intangible assets that do not qualify for separate recognition such as the assembled workforce; and
- The value of the going-concern element of Molina Medicaid Solutions' existing businesses (the higher rate of return on the assembled collection of net assets versus acquiring all of the net assets separately).

Accounts payable and accrued liabilities: Accounts payable and accrued liabilities include $1.5 million payable to the seller of Molina Medicaid Solutions, which represents additional consideration for the acquisition based on a working capital adjustment provided in the purchase agreement. The working capital adjustment provides that the net working capital, or current assets minus current liabilities, on Molina Medicaid Solutions' opening balance sheet equals $10 million. To the extent the final net working capital conveyed by the seller exceeds $10 million, the amount is payable back to the seller; conversely, to the extent that net working capital conveyed by the seller is less than $10 million, the shortage is a receivable from the seller. Thus, the $1.5 million amount described above represents the amount payable to the seller for net working capital in excess of $10 million on the opening balance sheet. This amount may change based on final negotiations with the seller.

Pro-forma impact of the acquisition: The unaudited pro-forma results presented below include the effects of the acquisition as if it had been consummated as of January 1, 2010 and 2009. The pro-forma results include the amortization associated with an estimate for the acquired intangible assets and interest expense associated with debt used to fund the acquisition. To better reflect the combined operating results, material non-recurring charges directly attributable to the transaction have been excluded. In addition, the pro-forma results do not include any anticipated synergies or other expected benefits of the acquisition. Accordingly, the unaudited pro forma financial information below is not necessarily indicative of either future results of operations or results that might have been achieved had the acquisition been consummated as of January 1, 2010 or January 1, 2009.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(In thousands)			
Revenue	$1,009,500	$953,016	$2,005,814	$1,839,224
Net income	$ 11,725	$ 14,536	$ 25,011	$ 26,308
Diluted earnings per share	$ 0.45	$ 0.56	$ 0.96	$ 1.00

4. Segment Reporting

Our reportable segments are consistent with how we manage the business and view the markets we serve. In the second quarter of 2010, we added a segment to our internal financial reporting structure as a result of the acquisition of Molina Medicaid Solutions described in Note 3, "Business Purchase Transactions."

We will now report our financial performance based on the following two reportable segments — Health Plans and Molina Medicaid Solutions. The Health Plans segment represents our former single-segment health plan operations. The Molina Medicaid Solutions segment represents the operations of our new MMIS solutions business.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

Operating segment revenues and profitability for the three months and six months ended June 30, 2010 and 2009 were as follows:

	Health Plans	Molina Medicaid Solutions	Total
		(In thousands)	
Three months ended June 30, 2010			
Revenue from external customers:			
Premium revenue	$ 976,685	$ —	$ 976,685
Service revenue	—	21,054	21,054
Investment income	1,599	—	1,599
Total revenue	$ 978,284	$ 21,054	$ 999,338
Operating income	$ 16,173	$ 5,005	$ 21,178
Six months ended June 30, 2010			
Revenue from external customers:			
Premium revenue	$ 1,941,905	$ —	$ 1,941,905
Service revenue	—	21,054	21,054
Investment income	3,120	—	3,120
Total revenue	$ 1,945,025	$ 21,054	$ 1,966,079
Operating income	$ 36,611	$ 5,005	$ 41,616
Three months ended June 30, 2009			
Revenue from external customers:			
Premium revenue	$ 925,507	$ —	$ 925,507
Service revenue	—	—	—
Investment income	2,082	—	2,082
Total revenue	$ 927,589	$ —	$ 927,589
Operating income	$ 19,488	$ —	$ 19,488
Six months ended June 30, 2009			
Revenue from external customers:			
Premium revenue	$ 1,782,991	$ —	$ 1,782,991
Service revenue	—	—	—
Investment income	5,629	—	5,629
Total revenue	$ 1,788,620	$ —	$ 1,788,620
Operating income	$ 42,649	$ —	$ 42,649

Reconciliation to Income before Income Taxes

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(In thousands)			
Segment operating income	$21,178	$ 19,488	$41,616	$42,649
Interest expense	(4,099)	(3,223)	(7,456)	(6,638)
Income before income taxes	$17,079	$ 16,265	$34,160	$36,011

Segment Assets

	Health Plans	Molina Medicaid Solutions	Total
		(In thousands)	
As of June 30, 2010	$ 1,198,812	$162,592	$ 1,361,404
As of December 31, 2009	$ 1,044,938	$ —	$ 1,044,938

5. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
		(In thousands)		
Shares outstanding at the beginning of the period	25,728	25,991	25,607	26,725
Weighted-average number of shares repurchased	—	(205)	—	(618)
Weighted-average number of shares issued	13	2	87	50
Denominator for basic earnings per share	25,741	25,788	25,694	26,157
Dilutive effect of employee stock options and stock grants(1)	210	82	258	84
Denominator for diluted earnings per share(2)	25,951	25,870	25,952	26,241

(1) Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three months ended June 30, 2010, and 2009, there were approximately 483,000 and 623,000 antidilutive weighted options, respectively. For the six months ended June 30, 2010, and 2009, there were approximately 497,000 and 625,000 antidilutive weighted options, respectively. Restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. For the three months ended June 30, 2010, and 2009, there were approximately 1,000, and 292,000 antidilutive weighted restricted shares, respectively. For the six months ended June 30, 2010, and 2009, there were approximately 9,000, and 34,000 antidilutive weighted restricted shares, respectively.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the three month and six month periods ended June 30, 2010 and 2009.

6. Share-Based Compensation

At June 30, 2010, we had employee equity incentives outstanding under two plans: (1) the 2002 Equity Incentive Plan; and (2) the 2000 Omnibus Stock and Incentive Plan (from which equity incentives are no longer awarded). Charged to general and administrative expenses, total stock-based compensation expense was as follows for the three month and six month periods ended June 30, 2010 and 2009:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
		(In thousands)		
Restricted stock awards	$ 2,106	$ 1,822	$ 3,745	$ 2,874
Stock options (including shares issued under our employee stock purchase plan)	265	202	763	584
Total stock-based compensation expense	$ 2,371	$ 2,024	$ 4,508	$ 3,458

As of June 30, 2010, there was $17.3 million of total unrecognized compensation expense related to unvested restricted stock awards, which we expect to be recognized over a remaining weighted-average period of 2.9 years. Also as of June 30, 2010, there was $565,000 of unrecognized compensation expense related to unvested stock options, which we expect to recognize over a remaining weighted-average period of 0.8 years.

Unvested restricted stock and restricted stock activity for the six months ended June 30, 2010 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2009	687,630	$ 24.64
Granted	498,125	22.51
Vested	(205,313)	25.38
Forfeited	(44,725)	23.61
Unvested balance as of June 30, 2010	935,717	23.40

The total fair value of restricted shares granted during the six months ended June 30, 2010 and 2009 was $11.2 million and $7.6 million, respectively. The total fair value of restricted shares vested during the six months ended June 30, 2010 and 2009 was $4.6 million and $2.4 million, respectively. Stock option activity during the six months ended June 30, 2010 is summarized below:

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (In thousands)	Weighted Average Remaining Contractual Term (Years)
Stock options outstanding as of December 31, 2009	650,739	$ 30.25		
Exercised	(19,460)	23.96		
Forfeited	(4,513)	32.39		
Stock options outstanding as of June 30, 2010	626,766	$ 30.43	$ 863	5.3
Stock options exercisable and expected to vest as of June 30, 2010	622,510	$ 30.42	$ 863	5.3
Exercisable as of June 30, 2010	570,099	$ 30.26	$ 860	5.2

7. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For a comprehensive discussion of fair value measurements with regard to our current and non-current investments, see below.

Based on quoted market prices, the fair value of our convertible senior notes issued in October 2007 was $175.1 million at June 30, 2010, and $160.8 million at December 31, 2009. The carrying amount of the convertible senior notes was $161.4 million at June 30, 2010, and $158.9 million at December 31, 2009.

To prioritize the inputs we use in measuring fair value, we apply a three-tier fair value hierarchy. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of June 30, 2010, we held certain assets that are required to be measured at fair value on a recurring basis. These included investments as follows:

Balance Sheet Classification	Description
Current assets: Investments (see Note 8)	Investment grade debt securities; designated as available-for-sale; reported at fair value based on market prices that are readily available (Level 1).
Non-current assets: Investments (see Note 8)	Auction rate securities; designated as available-for-sale; reported at fair value based on discounted cash flow analysis or other type of valuation model (Level 3).
	Auction rate securities; designated as trading; reported at fair value based on discounted cash flow analysis or other type of valuation model (Level 3).
Other assets	Other assets include auction rate securities rights (the "Rights"); reported at fair value based on discounted cash flow analysis or other type of valuation model (Level 3).

As of June 30, 2010, $42.2 million par value (fair value of $36.7 million) of our investments consisted of auction rate securities, all of which were collateralized by student loan portfolios guaranteed by the U.S. government. We continued to earn interest on substantially all of these auction rate securities as of June 30, 2010. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008. As such, quoted prices in active markets were not readily available during the majority of 2008, all of 2009, and continued to be unavailable as of June 30, 2010. To estimate the fair value of these securities, we used pricing models that included factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. The estimated values of these securities were also compared, when possible, to valuation data with respect to similar securities held by other parties. We concluded that these estimates, given the lack of market available pricing, provided a reasonable basis for determining fair value of the auction rate securities as of June 30, 2010.

As of June 30, 2010, we held $15.9 million par value (fair value of $14.6 million) auction rate securities (designated as trading securities) with a certain investment securities firm. In the fourth quarter of 2008, we entered into a rights agreement with this firm that (1) allows us to exercise rights (the "Rights") to sell the eligible auction rate securities at par value to this firm between June 30, 2010 and July 2, 2012, and (2) gives the investment securities firm the right to purchase the auction rate securities from us any time after the agreement date as long as we receive the par value. On June 30, 2010, we began to exercise these Rights. The balance of the eligible auction rate securities, totaling $15.9 million as of June 30, 2010, was sold at par value on July 1, 2010 (see Note 14, "Subsequent Events").

We have accounted for the Rights as a freestanding financial instrument and have elected to record the value of the Rights under the fair value option. We recorded pretax losses on the Rights, attributable to the decline in the fair value of the Rights, totaling $2.6 million, and $3.3 million for the six months ended June 30, 2010, and 2009, respectively. To determine the fair value estimate of the Rights, we used a discounted cash-flow model based on the expectation that the auction rate securities will be put back to the investment securities firm at par on June 30, 2010, as permitted by the rights agreement. As of June 30, 2010, the recorded value of the Rights, totaling $1.3 million, equals the cumulative unrealized losses on the remaining auction rate securities underlying the Rights.

For the six months ended June 30, 2010 and 2009, we recorded pretax gains of $2.9 million and $3.6 million, respectively, on the auction rate securities underlying the Rights.

As of June 30, 2010, the remainder of our auction rate securities (designated as available-for-sale securities) amounted to $26.3 million par value (fair value of $22.2 million). As a result of the decrease in fair value of auction

rate securities designated as available-for-sale, we recorded pretax unrealized losses of $0.2 million to accumulated other comprehensive loss for the six months ended June 30, 2010. We have deemed these unrealized losses to be temporary and attribute the decline in value to liquidity issues, as a result of the failed auction market, rather than to credit issues. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive loss. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

Our assets measured at fair value on a recurring basis at June 30, 2010, were as follows:

	Fair Value Measurements at Reporting Date Using			
	Total	Level 1	Level 2	Level 3
		(In thousands)		
Investments	$175,212	$175,212	$ —	$ —
Auction rate securities (available-for-sale)	22,156	—	—	22,156
Auction rate securities (trading)	14,589	—	—	14,589
Auction rate securities rights	1,310	—	—	1,310
Total assets measured at fair value	$213,267	$175,212	$ —	$38,055

The following table presents a roll-forward of the balance of our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3)
	(In thousands)
Balance at December 31, 2009	$ 63,494
Total gains (unrealized):	
Included in earnings	363
Included in other comprehensive income	(202)
Settlements	(25,600)
Balance at June 30, 2010	$ 38,055
The amount of total losses for the period included in other comprehensive loss attributable to the change in unrealized losses relating to assets still held at June 30, 2010	$ (202)

8. Investments

The following tables summarize our investments as of the dates indicated:

	June 30, 2010			
		Gross Unrealized		Estimated Fair Value
	Cost	Gains	Losses	
		(In thousands)		
Government-sponsored enterprise securities	$ 83,695	$ 486	$ 228	$ 83,953
Municipal securities (including non-current auction rate securities)	64,045	1,265	4,216	61,094
Corporate debt securities	43,282	121	610	42,793
U.S. treasury notes	20,732	124	10	20,846
Certificates of deposit	3,271	—	—	3,271
	$215,025	$1,996	$5,064	$211,957

	December 31, 2009			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Government-sponsored enterprise securities	$ 89,451	$ 504	$ 281	$ 89,674
Municipal securities (including non-current auction rate securities)	82,009	3,120	4,154	80,975
Corporate debt securities	32,543	206	185	32,564
U.S. treasury notes	28,052	92	84	28,060
Certificates of deposit	3,258	—	—	3,258
	$235,313	$3,922	$4,704	$234,531

The contractual maturities of our investments as of June 30, 2010 are summarized below.

	Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 88,660	$ 88,305
Due one year through five years	86,232	86,378
Due after five years through ten years	1,430	1,411
Due after ten years	38,703	35,863
	$215,025	$211,957

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales of available-for-sale securities were $29.9 million and $46.5 million for the three months ended June 30, 2010, and 2009, respectively. Total proceeds from sales of available-for-sale securities were $65.9 million and $82.0 million for the six months ended June 30, 2010, and 2009, respectively. Net realized investment gains for the three months ended June 30, 2010, and 2009 were $43,000 and $36,000 respectively. Net realized investment gains for the six months ended June 30, 2010, and 2009 were $57,000 and $195,000 respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our municipal securities, we have determined that unrealized gains and losses at June 30, 2010, and December 31, 2009, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

Our investment in municipal securities consists primarily of auction rate securities. As described in Note 7, “Fair Value Measurements,” the unrealized losses on these investments were caused primarily by the illiquidity in the auction markets. Because the decline in market value is not due to the credit quality of the issuers, and because we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost, we do not consider the auction rate securities that are designated as available-for-sale to be other-than-temporarily impaired at June 30, 2010.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of June 30, 2010.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Government-sponsored enterprise securities	$ 6,008	$ 9	$ 8,468	$ 219	$14,476	$ 228
Municipal securities	15,049	110	23,287	4,106	38,336	4,216
Corporate debt securities	12,970	367	11,439	243	24,409	610
U.S. treasury notes	9,983	10	—	—	9,983	10
	$44,010	$ 496	$43,194	$ 4,568	$87,204	$ 5,064

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2009. At December 31, 2009, we previously reported only those available-for-sale investments in an unrealized loss position for at least two consecutive months. To conform to the current year presentation, we have included all available-for-sale investments in an unrealized loss position at December 31, 2009. This presentation change increased the total amount of unrealized losses reported in the following table by $113,000 at December 31, 2009. The accompanying increase to the estimated fair value of the underlying investments amounted to $42.9 million at December 31, 2009.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Government-sponsored enterprise securities	$30,460	$ 187	$ 7,297	$ 94	$ 37,757	$ 281
Municipal securities	12,460	78	24,031	3,902	36,491	3,980
Corporate debt securities	13,513	149	1,203	36	14,716	185
U.S. treasury notes	21,824	84	—	—	21,824	84
	$78,257	$ 498	$32,531	$ 4,032	$110,788	$ 4,530

9. Receivables

Health Plans receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustment. Molina Medicaid Solutions' receivables consist primarily of MMIS development milestone billings to states. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable were as follows:

	June 30, 2010	Dec. 31, 2009
	(In thousands)	
Health Plans:		
California	$ 32,196	$ 34,289
Michigan	19,017	14,977
Missouri	19,756	19,670
New Mexico	7,012	11,919
Ohio	24,157	37,004
Utah	4,691	6,107
Washington	16,373	9,910
Others	4,240	2,778
	127,442	136,654
Molina Medicaid Solutions	27,938	—
Total receivables	$155,380	$136,654

10. Restricted Investments

Pursuant to the regulations governing our Health Plan subsidiaries, we maintain statutory deposits and deposits required by state Medicaid authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of capitated providers. The following table presents the balances of restricted investments by health plan, and by our insurance company:

	June 30, 2010	Dec. 31, 2009
	(In thousands)	
California	$ 369	$ 368
Florida	3,454	2,052
Insurance company	4,714	4,686
Michigan	1,000	1,000
Missouri	501	503
New Mexico	16,116	15,497
Ohio	9,053	9,036
Texas	3,501	1,515
Utah	1,281	578
Washington	151	151
Other	888	888
Total	$41,028	$36,274

The contractual maturities of our held-to-maturity restricted investments as of June 30, 2010 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 31,209	$ 31,212
Due one year through five years	9,677	9,709
Due after five years through ten years	142	161
	$ 41,028	$ 41,082

11. Long-Term Debt

Credit Facility

In 2005, we entered into an Amended and Restated Credit Agreement, dated as of March 9, 2005, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility"). Effective May 2008, we entered into a third amendment of the Credit Facility that increased the size of the revolving line of credit from $180.0 million to $200.0 million, maturing in May 2012. The Credit Facility is intended to be used for general corporate purposes. Borrowings under the Credit Facility totaled $105.0 million at June 30, 2010.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At June 30, 2010, we were in compliance with all financial covenants in the Credit Facility.

Subject to the closing of the Molina Medicaid Solutions acquisition, in November 2009 we agreed to enter into a fourth amendment to the Credit Facility. The fourth amendment became effective upon the closing of the acquisition of Molina Medicaid Solutions on May 1, 2010. The fourth amendment was required because the $135 million purchase price for this acquisition exceeded the applicable deal size threshold under the terms of the Credit Facility. Pursuant to the fourth amendment, the lenders consented to our acquisition of Molina Medicaid Solutions.

Upon its effectiveness at the closing, the fourth amendment increased the commitment fee on the total unused commitments of the lenders under the facility to 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans was raised by 200 basis points at every level of the pricing grid. Thus, the applicable margins now range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. Until the delivery of a compliance certificate with respect to our financial statements for the second quarter of 2010, the applicable margin shall be fixed at 3.5% for LIBOR loans and 2.5% for base rate loans. In connection with the lenders' approval of the fourth amendment, a consent fee of 10 basis points was paid on the amount of each consenting lender's commitment. In addition, the fourth amendment carved out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of our convertible senior notes (although the $187.0 million indebtedness is still included in the calculation of our consolidated leverage ratio); increased the amount of surety bond obligations we may incur; increased our allowable capital expenditures; and reduced the fixed charge coverage ratio from 3.50x to 2.75x (on a pro forma basis) at December 31, 2009, and 3.00x thereafter.

On March 15, 2010, we agreed to enter into a fifth amendment to the Credit Facility. The fifth amendment also became effective upon the closing of the acquisition of Molina Medicaid Solutions. The fifth amendment was required because, after giving effect to the acquisition of Molina Medicaid Solutions on a pro forma basis, and inclusive of our fourth quarter 2009 EBITDA of only $5.9 million, our consolidated leverage ratio for the preceding four fiscal quarters exceeded the currently applicable ratio of 2.75 to 1.0. The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.25 to 1.0 for the fourth quarter of 2009 (on a pro

forma basis), and to 3.50 to 1.0 for the first, second, and third quarters of 2010, excluding the single date of September 30, 2010. On September 30, 2010, the maximum consolidated leverage ratio shall revert back to 2.75 to 1.0. However, if we have actually reduced our consolidated leverage ratio to no more than 2.75 to 1.0 on or before August 15, 2010, the consolidated leverage ratio under the Credit Facility will revert back to 2.75 to 1.0 on August 15, 2010. On the date that the consolidated leverage ratio reverts to 2.75 to 1.0 — whether August 15, 2010 or September 30, 2010 — the aggregate commitments of the lenders under the Credit Facility shall be reduced on a pro rata basis from $200 million to $150 million. In connection with the lenders' approval of the fifth amendment, we paid an amendment fee of 25 basis points on the amount of each consenting lender's commitment. We will also pay an incremental commitment fee of 12.5 basis points based on each lender's unfunded commitment during the period from the effective date of the fifth amendment through the date that the maximum consolidated leverage ratio is reduced to 2.75 to 1.0, plus a potential duration fee of 50 basis points payable on August 15, 2010 in the event that the consolidated leverage ratio has not been reduced to 2.75 to 1.0 by August 15, 2010. As of June 30, 2010, our consolidated leverage ratio was 2.9%, as computed per the terms of the Credit Facility.

Convertible Senior Notes

In October 2007, we sold $200.0 million aggregate principal amount of 3.75% Convertible Senior Notes due 2014 (the "Notes"). The sale of the Notes resulted in net proceeds totaling $193.4 million. During 2009, we purchased and retired $13.0 million face amount of the Notes, so the remaining aggregate principal amount totaled $187.0 million at June 30, 2010 and December 31, 2009. The Notes rank equally in right of payment with our existing and future senior indebtedness.

The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 21.3067 shares of our common stock per one thousand dollar principal amount of the Notes. This represents an initial conversion price of approximately $46.93 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances. Prior to July 2014, holders may convert their Notes only under the following circumstances:

- During any fiscal quarter after our fiscal quarter ended December 31, 2007, if the closing sale price per share of our common stock, for each of at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, is greater than or equal to 120% of the conversion price per share of our common stock;
- During the five business day period immediately following any five consecutive trading day period in which the trading price per one thousand dollar principal amount of the Notes for each trading day of such period was less than 98% of the product of the closing price per share of our common stock on such day and the conversion rate in effect on such day; or
- Upon the occurrence of specified corporate transactions or other specified events.

On or after July 1, 2014, holders may convert their Notes at any time prior to the close of business on the scheduled trading day immediately preceding the stated maturity date regardless of whether any of the foregoing conditions is satisfied.

We will deliver cash and shares of our common stock, if any, upon conversion of each $1,000 principal amount of Notes, as follows:

- An amount in cash (the "principal return") equal to the sum of, for each of the 20 Volume-Weighted Average Price (VWAP) trading days during the conversion period, the lesser of the daily conversion value for such VWAP trading day and fifty dollars (representing 1/20th of one thousand dollars); and
- A number of shares based upon, for each of the 20 VWAP trading days during the conversion period, any excess of the daily conversion value above fifty dollars.

The proceeds from the issuance of such convertible debt instruments have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate

credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of June 30, 2010, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 51 months. The Notes' if-converted value did not exceed their principal amount as of June 30, 2010. At June 30, 2010, the equity component of the Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	As of June 30, 2010	As of December 31, 2009
	(In thousands)	
Details of the liability component:		
Principal amount	$187,000	$ 187,000
Unamortized discount	(25,591)	(28,100)
Net carrying amount	$161,409	$ 158,900

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(In thousands)			
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate of 3.75%	$ 1,753	$ 1,753	$ 3,506	$ 3,570
Amortization of the discount on the liability component	1,266	1,172	2,509	2,366
Total interest cost recognized	$ 3,019	$ 2,925	$ 6,015	$ 5,936

12. Commitments and Contingencies

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. These actions, when finally concluded and determined, are not likely, in our opinion, to have a material adverse effect on our business, consolidated financial position, cash flows, or results of operations.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Contract Losses

Our MMIS service contracts with various states typically span several years. These contracts often involve the development and deployment of new computer systems and technologies. Substantial performance risk exists in

each contract with these characteristics, and some or all elements of service delivery under these contracts are dependent upon successful completion of the design, development and implementation phase. On occasion, these contracts have experienced delays in their design, development and implementation phase, the achievement of certain milestones has been delayed, and costs in excess of those anticipated have been incurred. We continuously review and reassess our estimates of contract profitability. If our estimates indicate that a contract loss will occur, a loss accrual is recorded in the period it is first identified, if allowed by relevant accounting guidance. Circumstances that could potentially result in contract losses over the life of the contract include variances from expected costs to deliver our services, and other factors affecting revenues and costs. It is reasonably possible that deferred costs associated with one or more of these contracts could become impaired due to changes in estimates of future contract cash flows.

Regulatory Capital and Dividend Restrictions

Our principal operations are conducted through our health plan subsidiaries operating in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, and Washington. Our health plans are subject to state regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances or cash dividends was $362.3 million at June 30, 2010, and $368.7 million at December 31, 2009. The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set new minimum capitalization requirements for insurance companies, HMOs and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Washington, and Utah have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of June 30, 2010, our health plans had aggregate statutory capital and surplus of approximately $376.2 million compared with the required minimum aggregate statutory capital and surplus of approximately $253.2 million. All of our health plans were in compliance with the minimum capital requirements at June 30, 2010. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

13. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of both June 30, 2010 and December 31, 2009, our carrying amount for this investment totaled $4.1 million. For the three months ended June 30, 2010 and 2009, we paid $5.3 million, and $5.7 million, respectively, for medical service fees to this provider. For the six months ended June 30, 2010 and 2009, we paid $9.7 million, and $10.4 million, respectively, for medical service fees to this provider.

We are a party to a fee-for-service agreement with Pacific Hospital of Long Beach (“Pacific Hospital”). Pacific Hospital is owned by Abrazos Healthcare, Inc., the shares of which are held as community property by the husband of Dr. Martha Bernadett, the sister of Dr. J. Mario Molina, our Chief Executive Officer, and John Molina, our Chief Financial Officer. Amounts paid to Pacific Hospital under the terms of this fee-for-service agreement were $0.5 million, and $0.3 million for the six months ended June 30, 2010 and 2009, respectively. We believe that the fee-for-service with Pacific Hospital is based on prevailing market rates for similar services.

14. Subsequent Events

Wisconsin Health Plan Acquisition

On July 12, 2010, we announced a definitive agreement to acquire Abri Health Plan, a provider of Medicaid managed care services to BadgerCare Plus and SSI Managed Care enrollees in Wisconsin. Abri Health Plan currently serves Medicaid beneficiaries in 23 counties in Wisconsin. In April 2010, Abri received a notice of intent to award a new contract to provide Medicaid managed care services to BadgerCare Plus enrollees in Wisconsin's southeast region (Kenosha, Milwaukee, Ozaukee, Racine, Washington, and Waukesha counties), to be implemented between September 1 and November 1, 2010.

The purchase price for the acquisition is expected to be approximately $16 million, subject to adjustments, and will be funded with available cash and/or the Credit Facility. Subject to regulatory approvals and the satisfaction of other closing conditions, the closing of the transaction is expected to occur by August 31, 2010.

Auction Rate Securities

In the fourth quarter of 2008, we entered into a rights agreement with an investment securities firm that (1) allowed us to exercise rights (the "Rights") to sell the eligible auction rate securities at par value to this firm between June 30, 2010 and July 2, 2012, and (2) gave the investment securities firm the right to purchase the auction rate securities from us any time after the agreement date as long as we received the par value. On June 30, 2010, we began to exercise the Rights, and completed sales of all of the eligible auction rate securities under the Rights agreement on July 1, 2010. By the close of business on July 1, 2010, we had sold all of our auction rate securities that were designated as trading securities as of June 30, 2010. At June 30, 2010, these securities had a par value of $15.9 million and a fair value of $14.6 million. We sold these securities at par value on July 1, 2010, while simultaneously extinguishing our auction rate securities rights (valued at $1.3 million as of June 30, 2010). The impact on net income of the sale of the action rate securities on July 1, 2010 was not significant.

Item 2. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. We use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- budgetary pressures on the federal and state governments and their resulting inability to fully fund Medicaid, Medicare, or CHIP, or to maintain current payment rates, benefit packages, or membership eligibility thresholds and criteria;
- uncertainties regarding the impact of the recently enacted Patient Protection and Affordable Care Act, including the funding provisions related to health plans, and uncertainties regarding the likely impact of other federal or state health care and insurance reform measures;
- management of our medical costs, including rates of utilization that are consistent with our expectations;
- the accurate estimation of incurred but not reported medical costs across our health plans;
- the continuation and renewal of the government contracts of our health plans;
- the integration of Molina Medicaid Solutions, including its employees, systems, and operations;
- the retention and renewal of the Molina Medicaid Solutions' state government contracts on terms consistent with our expectations;
- the accuracy of our operating cost and capital outlay projections for Molina Medicaid Solutions;
- the timing of receipt and recognition of revenue under our various state contracts held by Molina Medicaid Solutions, including any changes to the anticipated start date of operation at our Maine location;
- cost recovery efforts by the state of Michigan from Michigan health plans with respect to allegedly incorrect statewide rates and enrollment errors;
- governmental audits and reviews;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive;
- the required establishment of a premium deficiency reserve in any of the states in which we operate;
- up-coding by providers or billing in a manner at material variance with historic patterns;
- approval by state regulators of dividends and distributions by our subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;

- the favorable resolution of litigation or arbitration matters;
- restrictions and covenants in our credit facility;
- the success of our efforts to leverage our administrative costs to address the needs associated with increased enrollment;
- the relatively small number of states in which we operate health plans and the impact on the consolidated entity of adverse developments in any single health plan;
- the availability of financing to fund and capitalize our acquisitions and start-up activities and to meet our liquidity needs;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments;
- a state's failure to renew its federal Medicaid waiver;
- an unauthorized disclosure of confidential member information;
- changes generally affecting the managed care or Medicaid management information system industries; and
- general economic conditions, including unemployment rates.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2009, and to Part II, Item 1A — Risk Factors, in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2010, and in this Quarterly Report, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurances that any results or events projected or contemplated by our forward-looking statements will in fact occur and we caution investors not to place undue reliance on these statements.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2009.

Reclassifications

Effective January 1, 2010, we have recorded the Michigan modified gross receipts tax, or MGRT, as a premium tax and not as an income tax. Prior periods have been reclassified to conform to this presentation.

In prior periods, general and administrative, or G&A, expenses have included premium tax expenses. Beginning with the three month and six month periods ended June 30, 2010, we have reported premium tax expenses on a separate line in the accompanying consolidated statements of income. Prior periods have been reclassified to conform to this presentation.

Overview

Molina Healthcare, Inc. is a multi-state managed care organization that arranges for the delivery of health care services to persons eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. We conduct our business primarily through licensed health plans in the states of California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, and Washington. The health plans are locally operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO.

On May 1, 2010, we acquired a health information management business which we now operate under the name, *Molina Medicaid Solutions*SM. Molina Medicaid Solutions provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems, or MMIS. MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho,

Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program. We paid $131.3 million to acquire Molina Medicaid Solutions, subject to working capital adjustments which we expect to be insignificant. The acquisition was funded with available cash of $26 million and $105 million drawn under our credit facility.

With the addition of Molina Medicaid Solutions, we have added a segment to our internal financial reporting structure in 2010. We will now report our financial performance based on the following two reportable segments:

- Health Plans; and
- Molina Medicaid Solutions.

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. The majority of medical costs associated with premium revenues are risk-based costs — while the health plans receive fixed per member per month premium payments from the states, the health plans are at risk for the costs of their members' health care. Our Health Plans segment operates in a highly regulated environment with minimum capitalization requirements. These capitalization requirements, among other things, limit the health plans' ability to pay dividends to us without regulatory approval.

As of June 30, 2010, our health plans were located in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, and Washington. Additionally, we operate three county primary care clinics in Virginia. An overview of our health plans and their principal governmental program contracts with the relevant state health care agency is provided below:

State	Renewal Date	Contract Description or Covered Program
California	3-31-12	Subcontract with Health Net for services to Medi-Cal members under Health Net's Los Angeles County Two-Plan Model Medi-Cal contract with the California Department of Health Services (DHS).
California	12-31-12	Medi-Cal contract for Sacramento Geographic Managed Care Program with DHS.
California	3-31-11	Two Plan Model Medi-Cal contract for Riverside and San Bernardino Counties (Inland Empire) with DHS.
California	9-30-10	Medi-Cal contract for San Diego Geographic Managed Care Program with DHS.
California	9-30-10	Healthy Families contract (California's CHIP program) with California Managed Risk Medical Insurance Board (MRMIB).
Florida	8-31-12	Medicaid contract with the Florida Agency for Health Care Administration.
Michigan	9-30-12	Medicaid contract with state of Michigan.
Missouri	6-30-11	Medicaid contract with the Missouri Department of Social Services.
New Mexico	6-30-12	Salud! Medicaid Managed Care Program contract (including CHIP) with New Mexico Human Services Department (HSD).
Ohio	6-30-11	Medicaid contract with Ohio Department of Job and Family Services (ODJFS).
Texas	8-31-13	Medicaid contract with Texas Health and Human Services Commission (HHSC).
Utah	6-30-14	Medicaid contract with Utah Department of Health.
Utah	12-31-11	CHIP contract with Utah Department of Health.
Washington	12-31-10	Basic Health Plan and Basic Health Plus Programs contract with Washington State Health Care Authority (HCA).
Washington	6-30-11	Healthy Options Program (including Medicaid and CHIP) contract with state of Washington Department of Social and Health Services.

In addition to the foregoing, our health plans in California, Michigan, New Mexico, Ohio, Texas, Utah, and Washington have entered into a standardized form of contract with CMS with respect to their operation of a MA SNP, and our health plans in California, Michigan, New Mexico, Ohio, Texas, Utah, and Washington have also entered into a standardized form of contract with CMS with respect to their operations of a MA-PD plan. These contracts are renewed annually and were most recently renewed as of January 1, 2010.

Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the expiration of the contract. However, there can be no assurance that these contracts will continue to be renewed. In addition, in the event a state Medicaid agency issues a Request for Proposals, or RFP, in connection with a new Medicaid contract award, our incumbent health plan could potentially be unsuccessful and lose its contract to a competitive health plan bidder. We do not anticipate the issuance of any RFPs with respect to any of our health plan contracts in 2010.

The PMPM rates the states pay to our health plans change from time to time. We are expecting a blended PMPM rate increase at our Utah health plan of approximately 8% effective July 1, 2010; a blended PMPM rate decrease at our Texas health plan of approximately 1% effective September 1, 2010; and a blended PMPM rate increase at our California health plan of approximately 2% effective October 1, 2010. However, no assurances can be given that these expected rate adjustments will be obtained.

Molina Medicaid Solutions Segment

Unlike the Health Plans segment, the Molina Medicaid Solutions segment is a service-based business that adds to our revenue stream without assuming additional medical cost risk. Although revenue for the Health Plans segment far exceeded that of the Molina Medicaid Solutions segment for the three months ended June 30, 2010, operating income as a percent of revenue for the Molina Medicaid Solutions segment far exceeded that of the Health Plans segment for that period. For example, the Molina Medicaid Solutions segment reported revenue of $21.1 million and an operating profit of $5 million for the two months of its operations that were included in our results for the three months ended June 30, 2010, representing an operating profit margin percentage of 24%. Over the course of three months of operations included in that same reporting period, our Health Plans segment reported revenue of $976.7 million and an operating profit of $16.2 million, representing an operating profit margin percentage of 2%. Although we expect the operating profit margin percentage of our Molina Medicaid Solutions segment to decline as our Idaho and Maine contracts commence full operations, we nevertheless believe that the operating profit margin percentage of that segment will remain significantly greater than that of the Health Plans segment, albeit on a much lower revenue base. Additionally, the capital requirements of the Molina Medicaid Solutions segment are — except in the case of new contract start-ups — considerably less than those of our Health Plans segment. Regulatory approval is not required for the Molina Medicaid Solutions segment to pay dividends to us.

While we believe that the acquisition of the Molina Medicaid Solutions segment diversifies our risk profile, we also believe that the two segments are complementary from strategic and operating perspectives. From a strategic perspective, both segments allow us to participate in an expanding sector of the economy while continuing our mission to serve low-income families and individuals eligible for government-sponsored health care programs. Operationally, the segments share a common systems platform — allowing for efficiencies of scale — and common experience in meeting the needs of state Medicaid programs. We also believe that we have opportunities to market various cost containment and quality practices used by our Health Plans segment (such as care management and care coordination programs) to state MMIS customers who wish to incorporate certain aspects of managed care programs into their own fee-for-service programs.

The following table briefly summarizes our financial performance for the three month and six month periods ended June 30, 2010 compared with the same periods in 2009. All ratios, with the exception of the medical care

ratio, are shown as a percentage of total revenue. The medical care ratio is shown as a percentage of premium revenue because there is a direct relationship between the premium revenue earned and the cost of health care.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(Amounts in thousands, except per share data)			
Earnings per diluted share	$ 0.41	$ 0.56	$ 0.82	$ 1.02
Premium revenue	$ 976,685	$ 925,507	$ 1,941,905	$ 1,782,991
Service revenue	$ 21,054	$ —	$ 21,054	$ —
Operating income	$ 21,178	$ 19,488	$ 41,616	$ 42,649
Net income	$ 10,579	$ 14,565	$ 21,169	$ 26,776
Total ending membership	1,498	1,368	1,498	1,368
Premium revenue	97.7%	99.8%	98.8%	99.7%
Service revenue	2.1	—	1.1	—
Investment income	0.2	0.2	0.1	0.3
Total revenue	100.0%	100.0%	100.0%	100.0%
Medical care ratio	86.0%	86.8%	85.6%	86.4%
General and administrative expense ratio	7.8%	7.0%	8.0%	7.3%
Premium tax ratio	3.6%	3.3%	3.6%	3.2%
Operating income	2.1%	2.1%	2.1%	2.4%
Net income	1.1%	1.6%	1.1%	1.5%
Effective tax rate	38.1%	10.5%	38.0%	25.6%

Composition of Revenue and Membership

Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described in "Critical Accounting Policies" below, is not generally subject to significant accounting estimates. For the six months ended June 30, 2010, we received approximately 94% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with the Centers for Medicare and Medicaid Services, or CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the six months ended June 30, 2010, we received approximately 6% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in California (effective October 1, 2009), Michigan, Missouri, Ohio, Texas, Utah (effective September 1, 2009), and Washington. Such payments are recognized as revenue in the month the birth occurs.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	June 30, 2010	Dec. 31, 2009	June 30, 2009
Total Ending Membership by Health Plan:			
California	348,000	351,000	349,000
Florida	54,000	50,000	29,000
Michigan	226,000	223,000	207,000
Missouri	78,000	78,000	78,000
New Mexico	93,000	94,000	85,000
Ohio	234,000	216,000	203,000
Texas	42,000	40,000	30,000
Utah	77,000	69,000	64,000
Washington	346,000	334,000	323,000
Total	1,498,000	1,455,000	1,368,000
Total Ending Membership by State for our Medicare Advantage Plans:			
California	3,600	2,100	1,600
Florida	500	—	—
Michigan	5,000	3,300	2,100
New Mexico	600	400	400
Texas	600	500	400
Utah	8,100	4,000	3,100
Washington	1,900	1,300	1,000
Total	20,300	11,600	8,600
Total Ending Membership by State for our Aged, Blind or Disabled Population:			
California	13,600	13,900	13,100
Florida	9,300	8,800	6,000
Michigan	31,600	32,200	29,900
New Mexico	5,800	5,700	5,700
Ohio	27,400	22,600	19,700
Texas	18,500	17,600	17,000
Utah	7,600	7,500	7,600
Washington	3,700	3,200	3,000
Total	117,500	111,500	102,000

Molina Medicaid Solutions Segment

As a result of our recent acquisition of Molina Medicaid Solutions, a portion of our revenues is derived from service arrangements. This segment provides technology solutions to state Medicaid programs that include system design, development, implementation, and technology outsourcing services. In addition, this segment offer business process outsourcing to state Medicaid agencies that handle key administrative functions such as claims processing, provider enrollment, pharmacy drug rebate services, recipient eligibility management, and pre-authorization services. In general, we expect the operating profit margin percentage generated by the Molina Medicaid Solutions segment to be higher than the operating profit margin percentage generated by the Health Plans segment. See further discussion of our Molina Medicaid Solutions segment revenue recognition and deferred contract costs at "Critical Accounting Policies," below.

Molina Medicaid Solutions has contracts with five states to design, develop, implement, maintain, and operate Medicaid Management Information Systems (MMIS). Additionally, Molina Medicaid Solutions provides pharmacy rebate administration services under a contract with the state of Florida.

These contracts extend over a number of years, and cover the life of the MMIS from inception though at least the first five years of its operation. The contracts are subject to extension by the exercise of an option, and also by renewal of the base contract. The contracts have a life cycle beginning with the design, development, and implementation of the MMIS and continuing through the operation of the system. Payment during the design, development, and implementation phase of the contract, or the DDI phase, is generally based upon the attainment of specific milestones in systems development as agreed upon ahead of time by the parties. Payment during the operations phase typically takes the form of either a flat monthly fee or payment for specific measures of capacity or activity, such as the number of claims processed, or the number of Medicaid beneficiaries served by the MMIS. Contracts may also call for the adjustment of amounts paid if certain activity measures exceed or fall below certain thresholds.

Under our contracts in Louisiana, New Jersey, West Virginia and Florida we provide primarily business process outsourcing and technology outsourcing services, because the development of the MMIS solution has been completed. Under these contracts, we recognize outsourcing service revenue on a straight-line basis over the remaining term of the contract. We have not substantially completed the installation of the MMIS solutions in Idaho and Maine. Accordingly, we have deferred recognition and all revenue and the majority of the expenses incurred under those contracts.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate costs incurred. Expenses related to medical care services are captured in the following four categories:

- Fee-for-service — expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.
- Capitation — expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- Pharmacy — expenses for all drug, injectible, and immunization costs paid through our pharmacy benefit manager.
- Other — expenses for medically related administrative costs ($41.0 million and $35.8 million for the six months ended June 30, 2010 and 2009, respectively), certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See “Critical Accounting Policies” below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our contracts in Louisiana, New Jersey, West Virginia and Florida, as well as certain selling, general and administrative expenses. Additionally, certain indirect costs incurred under our contracts in Idaho and Maine are also expensed to cost of services.

Deferred contract costs, which primarily relate to our contracts in Idaho and Maine, include direct and incremental costs such as direct labor, hardware, and software. We also defer and subsequently amortize certain transition costs related to activities that transition the contract from the design, development, and implementation phase to the operational or business process outsourcing phase. Deferred contract costs, including transition costs, are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

Results of Operations

Three Months Ended June 30, 2010 Compared with the Three Months Ended June 30, 2009

Summary of Consolidated Operating Results

Operating results for the three months ended June 30, 2010, compared with the three months ended June 30, 2009, were most significantly impacted by the following:

- Increased premium revenue for the Health Plans segment due to higher enrollment, partially offset by lower revenue PMPM. Medicare enrollment exceeded 20,000 members at June 30, 2010, and Medicare premium revenue for the three months ended June 30, 2010, was $67.6 million compared with $35.2 million for the three months ended June 30, 2009.
- Lower PMPM medical costs for the Health Plan segment due to lower incidence of influenza-related illnesses in 2010, improved hospital utilization, the transfer of pharmacy costs back to the states of Ohio and Missouri, and the implementation of various contracting and medical management initiatives. Medical margin (defined as the difference between premium revenue and medical costs) increased by approximately $15 million for the three months ended June 30, 2010, compared with the three months ended June 30, 2009.
- Higher administrative and premium tax expenses for the Health Plan segment, driven in part by the cost of our Medicare expansion and the acquisition of the Molina Medicaid Solutions business.
- The acquisition of Molina Medicaid Solutions effective May 1, 2010. The Molina Medicaid Solutions segment contributed $5 million to operating income for the three months ended June 30, 2010.

Health Plans Segment

Summary of Health Plans Segment Operating Results

Operating income for the three months ended June 30, 2010 decreased $3.3 million compared with the three months ended June 30, 2009. Improved medical margins during the three months ended June 30, 2010 were more than offset by:

- $5.5 million in premium reductions retroactive to October 1, 2009 that were imposed by the state of Michigan;
- $1.7 million in acquisition costs related to the purchase of Molina Medicaid Solutions;
- $4.7 million in additional premium tax; and
- $10.4 million of additional administrative expense.

Premium Revenue

Premium revenue grew 5.5% in the three months ended June 30, 2010 compared with the three months ended June 30, 2009, due to a membership increase of nearly 10%. Premium revenue was reduced during the three months ended June 30, 2010 by $5.5 million due to rate reductions in Michigan that were retroactive to October 1, 2009. The related reduction to medical expense was only $0.5 million. On a PMPM basis consolidated premium revenue decreased 4.4% because of declines in premium rates at several of our health plans. The most significant declines in premium rates were in Ohio and Missouri, due to the transfer of pharmacy risk back to the states, and in Washington. Washington premiums PMPM were lower during the three months ended June 30, 2010, compared with the three months ended June 30, 2009, as result of reductions made to both Medicaid premiums and fee schedules during the third quarter of 2009.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended June 30,					
	2010			2009		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$594,960	$132.95	70.9%	$517,066	$127.59	64.4%
Capitation	136,764	30.56	16.3	154,386	38.10	19.2
Pharmacy	75,170	16.80	8.9	99,256	24.49	12.4
Other	32,719	7.31	3.9	32,498	8.02	4.0
Total	$839,613	$187.62	100.0%	$803,206	$198.20	100.0%

Medical care costs, in the aggregate, decreased 5.3% on a PMPM basis for the three months ended June 30, 2010 compared with the three months ended June 30, 2009, primarily due to the following:

- The transfer of pharmacy risk back to the states of Ohio and Missouri,
- A less severe flu season in 2010,
- Reductions in Medicaid fee schedules subsequent to June 30, 2009, and
- The implementation of various contracting and medical management initiatives.

Excluding pharmacy costs, medical care costs decreased 1.7% on a PMPM basis for the three months ended June 30, 2010 compared with the three months ended June 30, 2009. Medical care costs as a percentage of premium revenue (the medical care ratio) were 86.0% for the three months ended June 30, 2010 compared with 86.8% for the three months ended June 30, 2009.

Physician and outpatient costs increased 1.9% on a PMPM basis for the three months ended June 30, 2010, compared with the three months ended June 30, 2009. Although we continued to observe hospitals billing for more intensive levels of care for the quarter ended June 30, 2010, compared with the quarter ended June 30, 2009, emergency room costs PMPM were stable as both utilization and cost per visit remained essentially unchanged. We attribute stable emergency room costs to, among other things, a less severe flu season when compared with 2009; changes in provider contracts and fee schedules; and our efforts to reduce inappropriate utilization.

Inpatient facility costs increased 6.4% on a PMPM basis for the three months ended June 30, 2010, compared with the three months ended June 30, 2009. Both utilization and unit costs increased slightly compared with the three months ended June 30, 2009.

Pharmacy costs (including the benefit of rebates) decreased 31.4% on a PMPM basis for the three months ended June 30, 2010, including our Missouri and Ohio health plans. The pharmacy benefit was transferred to the state of Missouri effective October 1, 2009, and was transferred to the state of Ohio effective February 1, 2010. Excluding these health plans, pharmacy costs increased 5.8% on a PMPM basis compared with the three months ended June 30, 2009 as a result of increases in unit costs that more than offset decreases in utilization.

Capitated costs decreased 19.8% on a PMPM basis compared with three months ended June 30, 2009 as a result of the recognition, in the three months ended June 30, 2009, of $22 million in retroactive capitation expense at the New Mexico health plan that related to 2009 and 2008. The retroactive capitation expense at the New Mexico health plan was directly related to the receipt of $25.3 million in retroactive premium revenue in the second quarter of 2009. There was no corresponding retroactive adjustment in the three months ended June 30, 2010.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio and premium taxes by health plan for the three months ended June 30, 2010 and June 30, 2009 (dollar amounts in thousands except for PMPM amounts):

	Three Months Ended June 30, 2010						
	Member Months	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	1,050,000	$124,551	$118.57	$106,006	$100.92	85.1%	$ 1,637
Florida	160,000	41,462	260.32	39,134	245.70	94.4	6

(1) "Other" medical care costs represent primarily medically related administrative costs at the parent company.

Days in Medical Claims and Benefits Payable

Beginning January 1, 2010, and for all prior periods presented, we are reporting days in medical claims and benefits payable relating to fee-for-service medical claims only. This new computation includes only fee-for-service medical care costs and related liabilities, and therefore calculates the extent of reserves for those liabilities that are most subject to estimation risk.

The days in medical claims and benefits payable amount previously reported included *all* medical care costs (fee-for-service, capitation, pharmacy, and administrative), and *all* medical claims liabilities, including those liabilities that are typically paid concurrently, or shortly after the costs are incurred, such as capitation costs and pharmacy costs. Medical claims liabilities in this calculation do not include accrued costs — such as salaries — associated with the administrative portion of medical costs.

By including only fee-for-service medical costs and liabilities in this computation, our days in claims payable metric will be more indicative of the adequacy of our reserves for liabilities subject to a substantial degree of estimation. The days in medical claims and benefits payable computed under each method were as follows:

	June 30, 2010	March 31, 2010	Dec. 31, 2009	June 30, 2009
Days in claims payable — fee-for-service only	44 days	44 days	44 days	47 days
Days in claims payable — all medical costs	39 days	37 days	37 days	39 days
Number of claims in inventory at end of period	106,300	153,700	93,100	117,100
Billed charges of claims in inventory at end of period (dollars in thousands)	$146,600	$194,000	$131,400	$173,400

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment for the two months ended June 30, 2010 was as follows:

	(In thousands)
Service revenue	$ 22,645
Amortization of purchased intangibles recorded as contra-service revenue	(1,591)
Net service revenue	21,054
Cost of service revenue	14,254
General and administrative costs	966
Amortization of purchased intangibles recorded as amortization expense	829
Operating income	$ 5,005

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses, or G&A, were $78.1 million, or 7.8% of total revenue, for the three months ended June 30, 2010, compared with $65.0 million, or 7.0% of total revenue, for the for the three months ended June 30, 2009.

The increase in the G&A ratio was primarily due to higher administrative expenses for the Health Plans segment, which includes all corporate related administrative costs. Costs of the continuing build out of our Medicare administrative structure added $2.7 million to administrative costs when compared with the three months ended June 30, 2009. Acquisition expenses associated with the purchase of Molina Medicaid Solutions were $1.7 million during the three months ended June 30, 2010. Network and product expansions other than the Medicare line of business added $1.1 million to administrative expense during the three months ended June 30, 2010. All other Health Plans segment administrative costs increased $6.5 million during the three months ended June 30, 2010. The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment. A portion of the $6.5 million increase in other administrative costs recorded at the Health Plans segment supported the integration of Molina Medicaid Solutions into our consolidated operations. Stand- alone administrative expenses of the Molina Medicaid Solutions segment totaled approximately $1.0 million.

	Three Months Ended June 30,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Medicare-related administrative costs	$ 6,589	0.7%	$ 3,879	0.4%
Non Medicare-related administrative costs:				
Molina Medicaid Solutions segment administrative costs	966	0.1	—	—
Molina Medicaid Solutions acquisition costs	1,724	0.2	—	—
Health Plans segment administrative payroll, including employee incentive compensation	53,675	5.4	49,317	5.3
All other Health Plans segment administrative expense	15,125	1.4	11,815	1.3
G&A expenses	$78,079	7.8%	$65,011	7.0%

Premium Tax Expenses

Premium tax expense relating to Health Plans segment premium revenue increased to 3.6% of revenue for the three months ended June 30, 2010, from 3.3% for the three months ended June 30, 2009, primarily due to the imposition of a higher premium tax rate in Ohio effective October 1, 2009.

Depreciation and Amortization

Depreciation and amortization expense specifically identified as such in the consolidated statements of income increased $1.6 million in the three months ended June 30, 2010 compared with the three months ended June 30, 2009, primarily due to depreciation of investments in infrastructure and the amortization of certain purchased intangibles associated with the acquisition of Molina Medicaid Solutions. Beginning in the three months ended June 30, 2010, the amortization of a portion of the purchased intangibles associated with the acquisition of Molina Medicaid Solutions is recorded as contra-service revenue, rather than as part of depreciation and amortization expense. Additionally, most of the depreciation expense associated with Molina Medicaid Solutions is recorded as cost of service revenue. The following table presents all depreciation and amortization expense recorded in the consolidated financial statements:

	Three Months Ended June 30,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation and amortization	$11,219	1.1%	$9,584	1.0%
Amortization expense recorded as contra-service revenue	1,591	0.2	—	—
Depreciation expense recorded as cost of service revenue	1,041	0.1	—	—
Depreciation and amortization reported in the consolidated statements of cash flows	$13,851	1.4%	$9,584	1.0%

Interest Expense

Interest expense increased to $4.1 million for the three months ended June 30, 2010, compared with $3.2 million for the three months ended June 30, 2009. We incurred higher interest expense relating to the $105 million draw on our credit facility (beginning May 1, 2010) to fund the acquisition. Interest expense includes non-cash interest expense relating to our convertible senior notes, which totaled $1.3 million, and $1.2 million for the six months ended June 30, 2010 and 2009, respectively.

Income Taxes

Income tax expense was recorded at an effective rate of 38.1% for the three months ended June 30, 2010, compared with 10.5% in three months ended June 30, 2009. The lower rate in 2009 was primarily due to discrete tax benefits of $4.4 million recorded in the second quarter of 2009 as a result of settling tax examinations and the voluntary filing of certain accounting method changes.

Effective January 1, 2008 through December 31, 2009, our income tax expense included both the Michigan business income tax, or BIT, and the Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, we have recorded the MGRT as a premium tax and not as an income tax. We will continue to record the BIT as an income tax.

Generally, the MGRT is a 0.976% tax (statutory rate of 0.8% plus 21.99% surtax) on modified gross receipts, which for most taxpayers are defined as receipts less purchases from other firms. Managed care organizations, however, are not currently allowed to deduct payments to providers in determining modified gross receipts. As a result, the MGRT is 0.976% of the Michigan plan's receipts, and does not vary with levels of pretax income or margins. We believe that presentation of the MGRT as a premium tax produces financial statements that are more useful to the reader.

For the three months ended June 30, 2009, amounts for premium tax expense (included in general and administrative expenses) and income tax expense have been reclassified to conform to the presentation of MGRT as a premium tax. The MGRT amounted to $1.5 million and $1.2 million for the three months ended June 30, 2010, and 2009, respectively. There was no impact to net income for either period presented relating to this change.

Six Months Ended June 30, 2010 Compared with the Six Months Ended June 30, 2009

Summary of Consolidated Operating Results

Operating results for the six months ended June 30, 2010, compared with the six months ended June 30, 2009, were most significantly impacted by the following:

- Increased premium revenue due to higher enrollment, partially offset by lower revenue PMPM. Medicare enrollment exceeded 20,000 members at June 30, 2010, and Medicare premium revenue was $117.9 million and $62.2 million for the six months ended June 30, 2010, and 2009, respectively.
- Lower PMPM medical costs due to lower incidence of the influenza-related illnesses in 2010, improved hospital utilization, the transfer of pharmacy costs back to the states of Ohio and Missouri, and the implementation of various contracting and medical management initiatives.
- Higher administrative and premium tax expenses for the Health Plan segment, driven in part by the cost of our Medicare expansion and the acquisition of Molina Medicaid Solutions.
- A $1.5 million gain on the purchase of our convertible senior notes recognized in the first quarter of 2009, with no comparable event in the first quarter of 2010.
- The acquisition of Molina Medicaid Solutions effective May 1, 2010. The Molina Medicaid Solutions segment contributed $5.0 million to operating income for the six months ended June 30, 2010.

Health Plans Segment

Summary of Health Plans Segment Operating Results

Operating income for the six months ended June 30, 2010 decreased $6.0 million compared with the six months ended June 30, 2009. Improved medical margins during the six ended June 30, 2010 were more than offset by:

- $8.7 million in premium reductions retroactive to October 1, 2009 that were imposed by the state of Michigan;
- $1.7 million in acquisition costs related to the purchase of Molina Medicaid Solutions;

- $12.2 million in additional premium tax; and
- $23.3 million of additional administrative expense.

Premium Revenue

Premium revenue grew 8.9% in the six months ended June 30, 2010 compared with the six months ended June 30, 2009, due to a membership increase of nearly 10%. Premium revenue was reduced $8.7 million during the six months ended June 30, 2010 due to rate reductions in Michigan that were retroactive to October 1, 2009. The related reduction to medical expense was only $0.5 million. On a PMPM basis consolidated premium revenue decreased 2.7% because of declines in premium rates at several of our health plans. The most significant declines in premium rates were in Ohio and Missouri, due to the transfer of pharmacy risk back to the state, and in Washington. Washington premiums PMPM were lower during the six months ended June 30, 2010 compared with the six months ended June 30, 2009, as result of reductions made to both Medicaid premiums and fee schedules during the third quarter of 2009.

Medical Care Costs

The following table provides the details of our consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Six Months Ended June 30,					
	2010			2009		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$1,161,839	$130.52	69.9%	$1,006,207	$126.49	65.3%
Capitation	273,896	30.77	16.5	272,800	34.29	17.7
Pharmacy	165,241	18.56	9.9	201,894	25.38	13.1
Other	61,453	6.90	3.7	60,193	7.57	3.9
Total	$1,662,429	$186.75	100.0%	$1,541,094	$193.73	100.0%

Medical care costs, in the aggregate, decreased 3.6% on a PMPM basis for the six months ended June 30, 2010 compared with the six months ended June 30, 2009, primarily due to the following:

- The transfer of pharmacy risk back to the states of Ohio and Missouri,
- A less severe flu season in 2010,
- Reductions in Medicaid fee schedules subsequent to June 30, 2009, and
- The implementation of various contracting and medical management initiatives.

Excluding pharmacy costs, medical care costs were flat on a PMPM basis for the six months ended June 30, 2010 compared with the six months ended June 30, 2009. Medical care costs as a percentage of premium revenue were 85.6% for the six months ended June 30, 2010 compared with 86.4% for the six months ended June 30, 2009.

Physician and outpatient costs increased 2.6% on a PMPM basis for the six months ended June 30, 2010, compared with the six months ended June 30, 2009. Although we continued to observe hospitals billing for more intensive levels of care for the six months ended June 30, 2010, compared with the six months ended June 30, 2009, emergency room costs PMPM were stable as both utilization and cost per visit remained essentially unchanged. We attribute stable emergency room costs to, among other things, a less severe flu season when compared to 2009; changes in provider contracts and fee schedules; and our efforts to reduce inappropriate utilization.

Inpatient facility costs increased 2.5% on a PMPM basis for the six months ended June 30, 2010, compared with the six months ended June 30, 2009. Both utilization and unit costs increased slightly compared with the six months ended June 30, 2009.

Pharmacy costs (including the benefit of rebates) decreased 26.9% on a PMPM basis for the six months ended June 30, 2010, including our Missouri and Ohio health plans. The pharmacy benefit was transferred to the state of

Missouri effective October 1, 2009, and was transferred to the state of Ohio effective February 1, 2010. Excluding these health plans, pharmacy costs increased 3.7% on a PMPM basis compared with the six months ended June 30, 2009 as a result of flat utilization and a moderate increase in unit costs.

Capitated costs decreased 10.3% on a PMPM basis compared with six months ended June 30, 2009 as a result of the recognition, in the second quarter of 2009, of $22 million in retroactive capitation expense at the New Mexico health plan that related to 2009 and 2008. The retroactive capitation expense at the New Mexico health plan was directly related to the receipt of $25.3 million in retroactive premium revenue in the second quarter of 2009. There was no corresponding retroactive adjustment in the second quarter of 2010.

Health Plans Segment Operating Data

The following summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the six months ended June 30, 2010 and June 30, 2009 (dollars in thousands except PMPM amounts):

	Six Months Ended June 30, 2010						
	Member Months	Premium Revenue		Medical Care Costs		Medical Care Ratio	Premium Tax Expense
		Total	PMPM	Total	PMPM		
California	2,112,000	$ 248,461	$117.62	$ 213,567	$101.10	86.0%	$ 3,265

(1) "Other" medical care costs represent primarily medically related administrative costs at the parent company.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment for the two months ended June 30, 2010 was as follows:

	(In thousands)
Service revenue	$ 22,645
Amortization of purchased intangibles recorded as contra-service revenue	(1,591)
Net service revenue	21,054
Cost of service revenue	14,254
General and administrative costs	966
Amortization of purchased intangibles recorded as amortization expense	829
Operating income	$ 5,005

Consolidated Expenses and Other

General and Administrative Expenses

General and administrative expenses were $157.0 million, or 8.0% of total revenue, for the six months ended June 30, 2010, compared with $130.4 million, or 7.3% of total revenue, for the for the six months ended June 30, 2009.

The increase in the G&A ratio was primarily due to higher administrative expenses for the Health Plans segment, which includes all corporate related administrative costs. Costs of the continuing build out of the Medicare administrative structure added $5.7 million to administrative costs when compared with the six months ended June 30, 2009. Acquisition expenses associated with the acquisition of Molina Medicaid Solutions were $2.3 million during the six months ended June 30, 2010. Network and product expansions other than the Medicare line of business added $2.3 million to administrative expense during the six months ended June 30, 2010. Higher regulatory fees added $1.3 million to administrative expense during the six months ended June 30, 2010. All other Health Plans segment administrative costs increased by $14.0 million during the six months ended June 30, 2010. The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment. A portion of the $14.0 million increase in other administrative costs recorded at the Health Plans segment supported the integration of Molina Medicaid Solutions into our consolidated operations. Stand alone administrative expenses of the Molina Medicaid Solutions segment were approximately $1.0 million.

	Six Months Ended June 30,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Medicare-related administrative costs	$ 14,521	0.7%	$ 8,847	0.5%
Non Medicare-related administrative costs:				
Molina Medicaid Solutions segment administrative costs	966	0.1	—	—
Molina Medicaid Solutions acquisition costs	2,250	0.1	—	—
Health Plans segment administrative payroll, including employee incentive compensation	109,885	5.6	98,316	5.5
All other Health Plans segment administrative expense	29,337	1.5	23,255	1.3
G&A expenses	$156,959	8.0%	$130,418	7.3%

Premium Tax Expense

Premium tax expense relating to health plan premium revenue increased to 3.6% of revenue for the six months ended June 30, 2010, from 3.2% for the six months ended June 30, 2009, primarily due to the imposition of a higher premium tax rate in Ohio effective October 1, 2009.

Depreciation and Amortization

Depreciation and amortization expense specifically identified as such in the consolidated statements of income increased $2.6 million in the six months ended June 30, 2010 compared with the six months ended June 30, 2009, primarily due to depreciation of investments in infrastructure and the amortization of certain purchased intangibles associated with the acquisition of Molina Medicaid Solutions. Beginning in the second quarter of 2010, a portion of amortization expense has been recorded as contra-service revenue, rather than as part of depreciation and amortization expense. Additionally, most of the depreciation expense associated with the Molina Medicaid Solutions segment is recorded as cost of service revenue. The following table presents all depreciation and amortization expense recorded in the consolidated financial statements:

	Six Months Ended June 30,			
	2010		2009	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation and amortization	$21,280	1.1%	$18,636	1.0%
Amortization expense recorded as contra- service revenue	1,591	0.1	—	—
Depreciation expense recorded as cost of service revenue	1,041	—	—	—
Depreciation and amortization reported in the consolidated statements of cash flows	$23,912	1.2%	$18,636	1.0%

Gain on Retirement of Convertible Senior Notes

In February 2009, we purchased and retired $13.0 million face amount of our convertible senior notes. We purchased the notes at an average price of $74.25 per $100 principal amount, for a total of $9.7 million. Including accrued interest, our total payment was $9.8 million. In connection with the purchase of the Notes, we recorded a gain of $1.5 million ($0.04 per diluted share) in the first quarter of 2009.

Interest Expense

Interest expense increased to $7.5 million for the six months ended June 30, 2010, from $6.6 million for the six months ended June 30, 2009. We incurred higher interest expense relating to the $105 million draw on our credit facility (beginning May 1, 2010) to fund the acquisition. Interest expense includes non-cash interest expense relating to our convertible senior notes, which totaled $2.5 million, and $2.4 million for the six months ended June 30, 2010 and 2009, respectively.

Income Taxes

Income tax expense was recorded at an effective rate of 38.0% for the six months ended June 30, 2010 compared with 25.6% for the six months ended June 30, 2009. The lower rate in 2009 was primarily due to discrete tax benefits of $4.4 million recorded in the second quarter of 2009 as a result of settling tax examinations and the voluntary filing of certain accounting method changes.

Effective January 1, 2008 through December 31, 2009, our income tax expense included both the Michigan business income tax, or BIT, and the Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, we have recorded the MGRT as a premium tax and not as an income tax. We will continue to record the BIT as an income tax.

For the six months ended June 30, 2009, amounts for premium tax expense and income tax expense have been reclassified to conform to the presentation of MGRT as a premium tax. The MGRT amounted to $3.1 million and

$2.2 million for the six months ended June 30, 2010, and 2009, respectively. There was no impact to net income for either period presented relating to this change.

Acquisitions

In addition to the acquisition of Molina Medicaid Solutions, described in "Overview" above, on July 12, 2010, we announced a definitive agreement to acquire Abri Health Plan, a provider of Medicaid managed care services to BadgerCare Plus and SSI Managed Care enrollees in Wisconsin. Abri Health Plan currently serves Medicaid beneficiaries in 23 counties in Wisconsin. In April 2010, Abri received a notice of intent to award a new contract to provide Medicaid managed care services to BadgerCare Plus enrollees in Wisconsin's southeast region (Kenosha, Milwaukee, Ozaukee, Racine, Washington, and Waukesha counties), to be implemented between September 1 and November 1, 2010.

The purchase price for the acquisition is expected to be approximately $16 million, subject to adjustments, and will be funded with available cash and/or the Credit Facility. Subject to regulatory approvals and the satisfaction of other closing conditions, the closing of the transaction is expected to occur by August 31, 2010.

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue and investment income. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of June 30, 2010, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income decreased to $3.1 million for the six months ended June 30, 2010 compared with $5.6 million for the six months ended June 30, 2009. This decline was primarily due to lower interest rates in 2010. Our annualized portfolio yield for the six months ended June 30, 2010 was 0.8% compared with 1.6% for the six months ended June 30, 2009.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash provided by operating activities for the six months ended June 30, 2010, was $25.3 million, compared with $94.8 million for the six months ended June 30, 2009, a decrease of $69.5 million. This decrease was primarily

due to the timing of the Ohio health plan's receipt of premium payments from the state of Ohio. In 2009, the state of Ohio typically paid premiums in advance of the month the premium was earned. Beginning in January 2010, the state of Ohio has delayed its premium payments to mid-month for the month premium is earned. The Company does not anticipate any advance payments for the Ohio plan's premiums during 2010.

Cash used in investing activities was $137.3 million for the six months ended June 30, 2010, compared with $27.9 million for the six months ended June 30, 2009, due chiefly to the acquisition of Molina Medicaid Solutions, which totaled $131 million.

Cash provided by financing activities was $138.9 million for the six months ended June 30, 2010, compared with $36.3 million used in financing activities for the six months ended June 30, 2009. In the second quarter of 2010 we borrowed $105 million on our credit facility to fund the acquisition of Molina Medicaid Solutions (see "Capital Resources," below). The primary use of cash in the six months ended June 30, 2009 was under our securities purchase programs, where we purchased $27.7 million of our common stock, and $9.7 million of our convertible senior notes.

EBITDA (1)

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(In thousands)			
Operating income	$21,178	$ 19,488	$41,616	$42,649
Add back:				
Depreciation and amortization expense	11,219	9,584	21,280	18,636
Amortization expense recorded as contra-service revenue	1,591	—	1,591	—
Depreciation expense recorded as cost of service revenue	1,041	—	1,041	—
EBITDA	$35,029	$ 29,072	$65,528	$61,285

(1) We calculate EBITDA by adding back depreciation and amortization expense to operating income, including $1.6 million amortization expense recorded as contra-service revenue, and $1.0 million depreciation expense recorded as cost of service revenue for both the three months and six months ended June 30, 2010, respectively. Operating income included interest income of $2.5 million and $5.0 million for the six months ended June 30, 2010, and 2009, respectively. EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization expense, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to net income, operating income, operating margin, or cash provided by operating activities. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At June 30, 2010, the parent company — Molina Healthcare, Inc. — held cash and investments of approximately $47.4 million, including auction rate securities with a fair value of $7.6 million, compared with $45.6 million of cash and investments at December 31, 2009. On a consolidated basis, at June 30, 2010, we had working capital of $345.4 million compared with $321.2 million at December 31, 2009. At June 30, 2010 and December 31, 2009, cash and cash equivalents were $461.0 million and $469.5 million, respectively. At June 30, 2010, investments were $212.0 million, including $36.7 million in non-current auction rate securities, and at December 31, 2009, investments were $234.5 million, including $59.7 million in non-current auction rate securities.

In connection with the May 1, 2010 closing of our acquisition of Molina Medicaid Solutions, we used a draw on our credit facility, which previously had had no outstanding balance, to fund $105 million of the $131 million purchase price. The $26 million balance of the purchase price was funded with available cash.

We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Credit Facility

In 2005, we entered into an Amended and Restated Credit Agreement, dated as of March 9, 2005, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility"). Effective May 2008, we entered into a third amendment of the Credit Facility that increased the size of the revolving line of credit from $180.0 million to $200.0 million, maturing in May 2012. The Credit Facility is intended to be used for general corporate purposes.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At June 30, 2010, we were in compliance with all financial covenants in the Credit Facility.

Subject to the closing of the Molina Medicaid Solutions acquisition, in November 2009 we agreed to enter into a fourth amendment to the Credit Facility. The fourth amendment became effective upon the closing of the acquisition of Molina Medicaid Solutions. The fourth amendment was required because the $131 million purchase price for this acquisition exceeded the applicable deal size threshold under the terms of the Credit Facility. Pursuant to the fourth amendment, the lenders consented to our acquisition of Molina Medicaid Solutions.

Upon its effectiveness at the closing, the fourth amendment increased the commitment fee on the total unused commitments of the lenders under the facility to 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans was raised by 200 basis points at every level of the pricing grid. Thus, the applicable margins now range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. Until the delivery of a compliance certificate with respect to our financial statements for the second quarter of 2010, the applicable margin shall be fixed at 3.5% for LIBOR loans and 2.5% for base rate loans. In connection with the lenders' approval of the fourth amendment, a consent fee of 10 basis points was paid on the amount of each consenting lender's commitment. In addition, the fourth amendment carved out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of the convertible senior notes (although the $187.0 million indebtedness is still included in the calculation of our consolidated leverage ratio); increased the amount of surety bond obligations we may incur; increased our allowable capital expenditures; and reduced the fixed charge coverage ratio from 3.50x to 2.75x (on a pro forma basis) at December 31, 2009, and 3.00x thereafter.

On March 15, 2010, we agreed to enter into a fifth amendment to the Credit Facility. The fifth amendment also became effective upon the closing of the acquisition of Molina Medicaid Solutions. The fifth amendment was required because, after giving effect to the acquisition of Molina Medicaid Solutions on a pro forma basis, and inclusive of our fourth quarter 2009 EBITDA of only $5.9 million, our consolidated leverage ratio for the preceding four fiscal quarters exceeded the currently applicable ratio of 2.75 to 1.0. The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.25 to 1.0 for the fourth quarter of 2009 (on a pro forma basis), and to 3.50 to 1.0 for the first, second, and third quarters of 2010, excluding the single date of September 30, 2010. On September 30, 2010, the maximum consolidated leverage ratio shall revert back to 2.75 to 1.0. However, if we have actually reduced our consolidated leverage ratio to no more than 2.75 to 1.0 on or before August 15, 2010, the consolidated leverage ratio under the Credit Facility will revert back to 2.75 to 1.0 on August 15, 2010. On the date that the consolidated leverage ratio reverts to 2.75 to 1.0 — whether August 15, 2010 or September 30, 2010 — the aggregate commitments of the lenders under the Credit Facility shall be reduced on a

pro rata basis from $200 million to $150 million. In connection with the lenders' approval of the fifth amendment, we paid an amendment fee of 25 basis points on the amount of each consenting lender's commitment. We will also pay an incremental commitment fee of 12.5 basis points based on each lender's unfunded commitment during the period from the effective date of the fifth amendment through the date that the maximum consolidated leverage ratio is reduced to 2.75 to 1.0, plus a potential duration fee of 50 basis points payable on August 15, 2010 in the event that the consolidated leverage ratio has not been reduced to 2.75 to 1.0 by August 15, 2010. At June 30, 2010, our consolidated leverage ratio was 2.9%, as computed per the terms of the Credit Facility.

Shelf Registration Statement

In December 2008, we filed a shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the issuance of up to $300 million of our securities, including common stock, warrants, or debt securities, and up to 250,000 shares of outstanding common stock that may be sold from time to time by the Molina Siblings Trust as a selling stockholder. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

On August 4, 2010, we issued a press release announcing a proposed offering of 4,000,000 shares of common stock covered by this registration statement. We intend to use the proceeds from this offering to repay the Credit Facility and for general corporate purposes.

Long-Term Debt

Convertible Senior Notes

In October 2007, we sold $200.0 million aggregate principal amount of 3.75% Convertible Senior Notes due 2014 (the "Notes"). The sale of the Notes resulted in net proceeds totaling $193.4 million. During 2009, we purchased and retired $13.0 million face amount of the Notes, for a remaining aggregate principal amount of $187.0 million as of December 31, 2009. The Notes rank equally in right of payment with our existing and future senior indebtedness.

The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 21.3067 shares of our common stock per $1,000 principal amount of the Notes. This represents an initial conversion price of approximately $46.93 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances. Prior to July 2014, holders may convert their Notes only under the following circumstances:

- During any fiscal quarter after our fiscal quarter ending December 31, 2007, if the closing sale price per share of our common stock, for each of at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, is greater than or equal to 120% of the conversion price per share of our common stock;
- During the five business day period immediately following any five consecutive trading day period in which the trading price per $1,000 principal amount of the Notes for each trading day of such period was less than 98% of the product of the closing price per share of our common stock on such day and the conversion rate in effect on such day; or
- Upon the occurrence of specified corporate transactions or other specified events.

On or after July 1, 2014, holders may convert their Notes at any time prior to the close of business on the scheduled trading day immediately preceding the stated maturity date regardless of whether any of the foregoing conditions is satisfied.

We will deliver cash and shares of our common stock, if any, upon conversion of each $1,000 principal amount of Notes, as follows:

- An amount in cash (the "principal return") equal to the sum of, for each of the 20 Volume-Weighted Average Price, or VWAP, trading days during the conversion period, the lesser of the daily conversion value for such VWAP trading day and $50 (representing 1/20th of $1,000); and

- A number of shares based upon, for each of the 20 VWAP trading days during the conversion period, any excess of the daily conversion value above $50.

Regulatory Capital and Dividend Restrictions

Our principal operations are conducted through our health plan subsidiaries operating in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, and Washington. The health plans are subject to state laws that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and may restrict the timing, payment, and amount of dividends and other distributions that may be paid to Molina Healthcare, Inc. as the sole stockholder of each of our health plans. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries, after intercompany eliminations, which may not be transferable to us in the form of loans, advances, or cash dividends totaled $362.3 million at June 30, 2010, and $368.7 million at December 31, 2009.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if adopted by a particular state, set minimum capitalization requirements for health plans and other insurance entities bearing risk for health care coverage. The requirements take the form of risk-based capital, or RBC, rules. These rules, which vary slightly from state to state, have been adopted in Michigan, Missouri, New Mexico, Ohio, Texas, Utah, and Washington. California and Florida have not adopted RBC rules and have not given notice of any intention to do so. The RBC rules, if adopted by California and Florida, may increase the minimum capital required by those states.

At June 30, 2010, our health plans had aggregate statutory capital and surplus of approximately $376.2 million, compared with the required minimum aggregate statutory capital and surplus of approximately $253.2 million. All of our health plans were in compliance with the minimum capital requirements at June 30, 2010. We have the ability and commitment to provide additional working capital to each of our health plans when necessary to ensure that capital and surplus continue to meet regulatory requirements. Barring any change in regulatory requirements, we believe that we will continue to be in compliance with these requirements through 2010.

Contractual Obligations

In our Annual Report on Form 10-K for the year ended December 31, 2009, we reported on our contractual obligations as of that date. There have been no material changes to our contractual obligations since that report.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Principal areas requiring the use of estimates include those areas listed below. The most significant of these estimates is revenue recognition, the determination of deferred contract costs, and the determination of medical claims and benefits payable, which are discussed in further detail below:

- The recognition of revenue;
- The determination of deferred contract costs;
- The determination of medical claims and benefits payable;
- The determination of the amount of revenue to be recognized under certain contracts that place revenue at risk dependent upon either the achievement of certain quality or administrative measurements, or the expenditure of certain percentages of revenue on defined expenses;
- The determination of allowances for uncollectible accounts;
- The valuation of certain investments;
- Settlements under risk or savings sharing programs;
- The impairment of long-lived and intangible assets;

- The determination of professional and general liability claims, and reserves for potential absorption of claims unpaid by insolvent providers;
- The determination of reserves for the outcome of litigation;
- The determination of valuation allowances for deferred tax assets; and
- The determination of unrecognized tax benefits.

Revenue Recognition — Health Plans Segment

Certain components of premium revenue are subject to accounting estimates. Chief among these are:

- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health.* A portion of premium revenue paid to our Florida health plan by the state of Florida may be refunded to the state if certain minimum amounts are not spent on defined behavioral health care costs. At June 30, 2010, we had not recorded any liability under the terms of this contract provision. If the state of Florida disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of this provision, including revisions to the definitions of premium revenue or behavioral health care costs, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our Florida health plan.
- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* A portion of premium revenue paid to our New Mexico health plan by the state of New Mexico may be refunded to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). Our contract is for a three-year period, and the medical cost floor is based on premiums and medical care costs over the entire contract period. Effective July 1, 2008, our New Mexico health plan entered into a new three year contract that, in addition to retaining the medical cost floor, added certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At June 30, 2010, we had recorded a liability of approximately $2.8 million under the terms of these contract provisions. If the state of New Mexico disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of these provisions, including revisions to the definitions of premium revenue, medical care costs, administrative costs or profit, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our New Mexico health plan.
- *New Mexico Health Plan At-Risk Premium Revenue:* Under our contract with the state of New Mexico, up to 1% of our New Mexico health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality of care and administrative measures dictated by the state. For the twelve months ended through the end of the state fiscal year on June 30, 2010, our New Mexico health plan had received $3.7 million in at-risk revenue for state fiscal year 2010. We have recognized $1.8 million of that amount as revenue, and recorded a liability of approximately $1.9 million for the remainder.
- *Ohio Health Plan At-Risk Premium Revenue:* Under our contract with the state of Ohio, up to 1% of our Ohio health plan's revenue may be refundable to the state if certain performance measures are not met. Effective January 1, 2010 an additional 0.25% of the Ohio health plan's revenue became refundable if certain pharmacy specific performance measures were not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. For the twelve months ended through the end of the state fiscal year on June 30, 2010, our Ohio health plan had received $8.7 million in at-risk revenue for state fiscal year 2010. We have recognized $6.2 million of that amount as revenue and recorded a liability of approximately $2.5 million for the remainder at June 30, 2010.

- *Utah Health Plan Premium Revenue:* Our Utah health plan may be entitled to receive additional premium revenue from the state of Utah as an incentive payment for saving the state of Utah money in relation to fee-for-service Medicaid. In prior years, we estimated amounts we believed were recoverable under our savings sharing agreement with the state of Utah based on available information and our interpretation of our contract with the state. The state may not agree with our interpretation or our application of the contract language, and it may also not agree with the manner in which we have processed and analyzed our member claims and encounter records. Thus, the ultimate amount of savings sharing revenue that we realize from prior years may be subject to negotiation with the state. During 2007, as a result of an ongoing disagreement with the state of Utah, we wrote off the entire receivable, totaling $4.7 million. Our Utah health plan continues to assert its claim to the amounts believed to be due under the savings share agreement. When additional information is known, or resolution is reached with the state regarding the appropriate savings sharing payment amount for prior years, we will adjust the amount of savings sharing revenue recorded in our financial statements as appropriate in light of such new information or agreement. No receivables for saving sharing revenue have been established at June 30, 2010 or December 31, 2009.
- *Texas Health Plan Premium Revenue:* The contract entered into between our Texas health plan and the state of Texas includes a profit-sharing agreement, where we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As of June 30, 2010, we had an aggregate liability of approximately $2.1 million accrued pursuant to our profit-sharing agreement with the state of Texas for the 2009 and 2010 contract years (ending August 31 of each year). We made no payments to the state under the terms of this profit sharing agreement during the first half of 2010. Because the final settlement calculations include a claims run-out period of nearly one year, the amounts recorded, based on our estimates, may be adjusted. We believe that the ultimate settlement will not differ materially from our estimates.
- *Texas Health Plan At-Risk Premium Revenue:* Under our contract with the state of Texas, up to 1% of our Texas health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. For the twelve months ended through the end of the state fiscal year on June 30, 2010, our Texas health plan had received $1.1 million in at-risk revenue for state fiscal year 2010, which has all been recognized revenue.
- *Medicare Premium Revenue:* Based on member encounter data that we submit to CMS, our Medicare revenue is subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. That analysis is similar to the process for the adjustment of member risk scores, but is further complicated by member pharmacy cost sharing provisions attached to the Medicare pharmacy benefit that do not apply to the services measured by the member risk adjustment process. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. To the extent that the premium revenue ultimately received from CMS differs from recorded amounts, we will adjust reported Medicare revenue. Based upon our knowledge of member health care utilization patterns we have recorded a liability of approximately $1.5 million related to the potential recoupment of Medicare premium revenue at June 30, 2010.

Revenue Recognition and Determination of Deferred Contract Costs — Molina Medicaid Solutions Segment

As a result of our recent acquisition of Molina Medicaid Solutions, a portion of our revenues is derived from service arrangements. For fixed-price contracts where the system design and development phase were in process as of the acquisition date, we apply contract accounting because we will deliver significantly modified and customized MMIS software to the customer under the terms of the contract. Additionally, these contracts contain multiple

deliverables; once the system design and development phase is complete, we provide technology outsourcing services and business process outsourcing. We do not have vendor specific objective evidence of the fair value of the technology outsourcing and business process outsourcing components of the contracts because we do not have enough history of offering these services on a stand-alone basis. As such we account for these fixed-price service contracts as a single element.

In general, we recognize contract revenues as a single element ratably over the performance period, or contract term, of the outsourcing services (operations phase) because these services are the last element to be delivered under the contract. The contract terms typically range from five to 10 years. In those service arrangements where final acceptance of a system or solution by the customer is required, contract revenues and costs are deferred until all material acceptance criteria have been met and performance is substantially complete. Performance will often extend over long periods, and our right to receive future payment depends on our future performance in accordance with the agreement. Revenues earned in excess of related billings are accrued, whereas billings in excess of revenues earned are deferred until the related services are provided. Amortization of certain identifiable intangible assets, relating to contract backlog, is recorded to contra-service revenue, to match revenues associated with contract performance that occurred prior to the acquisition date.

Deferred contract costs include direct and incremental costs such as direct labor, hardware and software. We also defer and subsequently amortize certain transition costs related to activities that transition the contract from the design, development, and implementation phase to the operational, or business process outsourcing phase. Deferred contract costs, including transition costs, are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets. Indirect costs associated with MMIS service contracts are generally expensed as incurred.

Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	June 30, 2010	Dec. 31, 2009	June 30, 2009
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$268,652	$246,508	$244,987
Capitation payable	49,101	39,995	34,657
Pharmacy	13,385	20,609	22,367
Other	14,462	9,404	6,696
Total	$345,600	$316,516	$308,707

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $268.7 million of our total medical claims and benefits payable of $345.6 million as of June 30, 2010. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider's monthly capitation payment), our IBNP liability at June 30, 2010 was $261.6 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended per member per month (PMPM) cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of June 30, 2010 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding June 30, 2010, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 77,755
(4)%	51,837
(2)%	25,918
2%	(25,918)
4%	(51,837)
6%	(77,755)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of June 30, 2010 that would have resulted had we altered our trend factors by the percentages

indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (65,606)
(4)%	(43,738)
(2)%	(21,869)
2%	21,869
4%	43,738
6%	65,606

The following per-share amounts are based on a combined federal and state statutory tax rate of 38%, and 26.0 million diluted shares outstanding for the six months ended June 30, 2010. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at June 30, 2010, net income for the three months ended June 30, 2010 would increase or decrease by approximately $8.0 million, or $0.31 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at June 30, 2010, net income for the three months ended June 30, 2010 would increase or decrease by approximately $6.8 million, or $0.26 per diluted share, net of tax. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $40.2 million, or $1.55 per diluted share, and $33.9 million, or $1.31 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $8.0 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which much of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously

reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2009, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 17.6%.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2009 and through June 30, 2010 were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

For the three months and six months ended June 30, 2010, we recognized a benefit from prior period claims development in the amount of $38.5 million, and $43.0 million, respectively (see table below). This benefit was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2009. The overestimation of claims liability at December 31, 2009 was the result of the following factors:

- In New Mexico, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- In California, we underestimated the extent to which various network restructuring, provider contracting and medical management imitative had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

We recognized a benefit from prior period claims development in the amount of $46.4 million and $51.6 million for the six months ended June 30, 2009, and the year ended December 31, 2009, respectively (see table below). This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2008. The overestimation of claims liability at December 31, 2008 was the result of the following factors:

- In New Mexico, we overestimated at December 31, 2008 the ultimate amounts we would need to pay to resolve certain high dollar provider claims.
- In Ohio, we underestimated the degree to which certain operational initiatives had reduced our medical costs in the last few months of 2008.
- In Washington, we overestimated the impact that certain adverse utilization trends would have on our liability at December 31, 2008.
- In California, we underestimated utilization trends at the end of 2008, leading to an underestimation of our liability at December 31, 2008. Additionally, we underestimated the impact that certain delays in the receipt

of paper claims would have on our liability, leading to a further underestimation of our liability at December 31, 2008.

In estimating our claims liability at June 30, 2010, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- The rapid growth of membership in our Medicare line of business between December 31, 2009 and June 30, 2010.
- A decrease in claims inventory at our Ohio health plan between March 31, 2010 and June 30, 2010.
- The impact of reductions to the state Medicaid fee schedules in New Mexico effective December 1, 2009.
- The transition of claims processing for our Missouri health plan from a third party service provider to our internal claims processing platform effective April l, 2010.
- Provider contracting changes reducing outpatient facilities costs at our Utah health plan effective April 1, 2010.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. However, that benefit will affect current period earnings only to the extent that the replenishment of the reserve for adverse claims development (and the re-accrual of administrative costs for the settlement of those claims) is less than the benefit recognized from the prior period liability. In 2009 and through June 30, 2010, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

We seek to maintain a consistent claims reserving methodology across all periods. In 2009, the prior period benefit from an un-utilized reserve for adverse claims development was offset by the establishment of a new reserve in an approximately equal amount (relative to premium revenue, medical care costs, and medical claims and benefits payable) during the year, and thus the impact on earnings for the current period was minimal.

The following table presents the components of the change in our medical claims and benefits payable for the periods presented. The negative amounts displayed for "*Components of medical care costs related to: Prior years*" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period

exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	As of and for the			
	Six Months Ended		Three Months Ended	Year Ended
	June 30, 2010	June 30, 2009	March 31, 2010	Dec. 31, 2009

Claims in inventory per member at end of period	0.07	0.09	0.10	0.06
Billed charges of claims in inventory per member at end of period	$ 97.86	$ 126.75	$ 130.90	$ 90.31
Number of claims received during the period	7,029,600	6,287,300	3,493,300	12,930,100
Billed charges of claims received during the period	$ 5,580,400	$ 4,707,200	$ 2,760,500	$ 9,769,000

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 3. ***Quantitative and Qualitative Disclosures About Market Risk.***

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of ten years and an average duration of four years. Restricted investments are invested principally in certificates of deposit and treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our health plans operate.

Item 4. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the six months ended June 30, 2010 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. ***Legal Proceedings***

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly-funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. These actions, when finally concluded and determined, are not likely, in our opinion, to have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Item 1A. ***Risk Factors***

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. The following risk factors were identified or re-evaluated by the Company during the second quarter and are a supplement to those risk factors discussed in Part I, Item 1A — Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2009, and to Part II, Item 1A — Risk Factors, in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2010. The risks described herein and in our Annual Report on Form 10-K and Quarterly Report on Form 10-Q are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, or results of operations.

Continuing state budget pressures, as well as the scheduled expiration as of December 31, 2010 of the enhanced Medicaid federal medical assistance percentage paid to states under the American Recovery and Reinvestment Act of 2009 (ARRA), could result in premium rate decreases or the recoupment of previously paid amounts, either of which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Several of the states in which we operate our health plans continue to face severe budget shortfalls stemming from high unemployment, record declines in revenue, and increasing demand for public assistance programs such as Medicaid. These continuing budget pressures could result in states' unexpectedly and abruptly seeking to reduce the premium rates paid to our health plans, or even to their seeking to recoup premium amounts previously paid to our health plans, as has recently occurred with respect to our Michigan plan. Any such rate reductions or recoupment of previously paid premium amounts could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

In addition, the increase in the federal share of Medicaid funding provided to states under ARRA will expire as of December 31, 2010. The increased funds have helped states reduce their deficits and support their Medicaid programs. The scheduled expiration of the ARRA funds as of December 31, 2010 will create a financing cliff in the middle of many state fiscal years at a time when their budgets are already under severe financial strain. There have been several unsuccessful attempts in Congress to pass an extension of the increased federal share of Medicaid funding. As of August 3, 2010, Congress is once again considering an extension of Medicaid funding under ARRA. However, there can be no assurances that a Medicaid funding extension will be passed by Congress and signed into law, or, if passed, that it will be sufficient for states to maintain the same level of Medicaid funding as they had prior to December 31, 2010. In the event the increased federal share of Medicaid funding is not extended beyond December 31, 2010, the resulting budget pressure on the states in which we operate our health plans could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

We face periodic routine and non-routine reviews, audits, and investigations by government agencies, and these reviews and audits could have adverse findings, which could negatively impact our business.

We are subject to various routine and non-routine governmental reviews, audits, and investigations. Violation of the laws, regulations, or contract provisions governing our operations, or changes in interpretations of those laws, could result in the imposition of civil or criminal penalties, the cancellation of our contracts to provide managed care services, the suspension or revocation of our licenses, the exclusion from participation in government sponsored health programs, or the revision and recoupment of past payments made based on audit findings. For example, by letter dated July 7, 2010 from the Center for Medicare and Medicaid Services, or CMS, we were notified that we had been selected for an on-site audit with respect to certain specified Medicare Advantage and Prescription Drug Plan contracts in the compliance areas of enrollment and disenrollment, premium billing, Part D formulary administration, Part D appeals, grievances and coverage determinations and compliance program. The on-site audit was conducted from July 26 to July 30, 2010. We do not expect to receive written notification of the results of this audit until September 2010. If we become subject to material fines or if other sanctions or other corrective actions were imposed upon us, whether as a result of this most recent CMS audit or otherwise, we might suffer a substantial reduction in profitability, and might also lose one or more of our government contracts and as a result lose significant numbers of members and amounts of revenue. In addition, government receivables are subject

to government audit and negotiation, and government contracts are vulnerable to disagreements with the government. The final amounts we ultimately receive under government contracts may be different from the amounts we initially recognize in our financial statements.

We rely on the accuracy of eligibility lists provided by state governments. Inaccuracies in those lists would negatively affect our results of operations.

Premium payments to our health plan segment are based upon eligibility lists produced by state governments. From time to time, states require us to reimburse them for premiums paid to us based on an eligibility list that a state later discovers contains individuals who are not in fact eligible for a government sponsored program or are eligible for a different premium category or a different program. Alternatively, a state could fail to pay us for members for whom we are entitled to payment. Our results of operations would be adversely affected as a result of such reimbursement to the state if we had made related payments to providers and were unable to recoup such payments from the providers.

Receipt of inadequate or significantly delayed premiums could negatively affect our business, financial condition, cash flows, or results of operations.

Our premium revenues consist of fixed monthly payments per member, and supplemental payments for other services such as maternity deliveries. These premiums are fixed by contract, and we are obligated during the contract periods to provide health care services as established by the state governments. We use a large portion of our revenues to pay the costs of health care services delivered to our members. If premiums do not increase when expenses related to medical services rise, our medical margins will be compressed, and our earnings will be negatively affected. A state could increase hospital or other provider rates without making a commensurate increase in the rates paid to us, or could lower our rates without making a commensurate reduction in the rates paid to hospitals or other providers. In addition, if the actuarial assumptions made by a state in implementing a rate or benefit change are incorrect or are at variance with the particular utilization patterns of the members of one of our health plans, our medical margins could be reduced. Any of these rate adjustments in one or more of the states in which we operate could adversely affect our business, financial condition, cash flows, or results of operations.

Furthermore, a state undergoing a budget crisis may significantly delay the premiums paid to one of our health plans. During 2008, due to a prolonged budget impasse, some of the monthly premium payments made by the state of California to our California health plan were several months late. The state of California is once again in a budget impasse, and may be unable to make monthly premium payments to our California health plan if a budget is not passed by the end of the third quarter of 2010. Any significant delay in the monthly payment of premiums to any of our health plans could have a material adverse affect on our business, financial condition, cash flows, or results of operations.

Item 6. ***Exhibits***

Exhibit No.	Title
31.1	Certification of Chief Executive Officer pursuant to Rules 13a-14(a)/15d-14(a) under the Securities Exchange Act of 1934, as amended.
31.2	Certification of Chief Financial Officer pursuant to Rules 13a-14(a)/15d-14(a) under the Securities Exchange Act of 1934, as amended.
32.1	Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended June 30, 2010 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, John C. Molina, J.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended June 30, 2010 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
March 31, 2010

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. is a multi-state managed care organization that arranges for the delivery of healthcare services to persons eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. We conduct our business primarily through licensed health plans in the states of California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, and Washington. The health plans are locally operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Effective January 1, 2010, we terminated operations at our small Medicare health plan in Nevada.

Effective May 1, 2010, we closed on our acquisition of the Healthcare Information Management, or HIM, business of Unisys Corporation. See Note 13, "Subsequent Events."

Consolidation and Interim Financial Information

The condensed consolidated financial statements include the accounts of Molina Healthcare, Inc. and all majority owned subsidiaries. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included. Except as described below, such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated in consolidation. The condensed consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2010. Financial information related to subsidiaries acquired during any year is included only for the period subsequent to their acquisition.

The unaudited condensed consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2009. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2009 audited consolidated financial statements have been omitted. These unaudited condensed consolidated interim financial statements should be read in conjunction with our December 31, 2009 audited financial statements.

Reclassifications

We have reclassified certain prior year income statement amounts to conform to the 2010 presentation. Effective January 1, 2010, we have recorded the Michigan modified gross receipts tax as a premium tax and not as an income tax. For the three months ended March 31, 2009, amounts for premium tax expense (included in general and administrative expenses) and income tax expense have been reclassified to conform to this presentation. See Note 2, "Significant Accounting Policies."

2. Significant Accounting Policies

Investments

Our investments are principally held in debt securities, which are grouped into three separate categories for accounting and reporting purposes: available-for-sale securities, held-to-maturity securities, and trading securities. Available-for-sale securities are recorded at fair value and unrealized gains and losses, if any, are recorded in stockholders' equity as other comprehensive income, net of applicable income taxes. Held-to-maturity securities are recorded at amortized cost, which approximates fair value, and unrealized holding gains or losses are not generally recognized. Realized gains and losses and unrealized losses judged to be other than temporary with respect to available-for-sale and held-to-maturity securities are included in the determination of net income. Trading securities are recorded at fair value, and holding gains and losses are recognized in net income.

Except for restricted investments and certain student loan portfolios (the "auction rate securities"), our debt securities are designated as available-for-sale and are carried at fair value. The cost of securities sold is determined using the specific-identification method, on an amortized cost basis. Fair values of securities are generally based on quoted prices in active markets.

Our investment policy requires that all of our investments have final maturities of ten years or less (excluding auction rate and variable rate securities where interest rates may be periodically reset), and that the average maturity be four years or less. Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. Declines in interest rates over time will reduce our investment income.

In general, our available-for-sale securities are classified as current assets without regard to the securities' contractual maturity dates because they may be readily liquidated. During 2008, our auction rate securities were classified as non-current assets. During the fourth quarter of 2008, certain auction rate securities were designated as trading securities. For comprehensive discussions of the fair value and classification of our current and non-current investments, including auction rate securities, see Note 5, "Fair Value Measurements," and Note 6, "Investments."

Income Taxes

We record accruals for uncertain tax positions by applying a two-step process. First, we determine whether it is more likely than not that a tax position will be sustained upon examination. In the second step, a tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements.

Our accrual for unrecognized tax benefits was $4.1 million as of both March 31, 2010 and December 31, 2009. This accrual is included in "Other long-term liabilities" in the accompanying condensed consolidated balance sheets. Approximately $3.4 million of the $4.1 million in unrecognized tax benefits at March 31, 2010 would affect our effective tax rate, if recognized. We anticipate a decrease of $0.4 million to our liability for unrecognized tax benefits within the next twelve-month period.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. Our accrual for the payment of interest relating to unrecognized tax benefits was $75,000 as of March 31, 2010 and December 31, 2009.

Effective January 1, 2008 through December 31, 2009, income tax expense included both the Michigan business income tax, or BIT, and Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, we have recorded the MGRT as a premium tax (included in general and administrative expenses) and not as an income tax. We will continue to record the BIT as an income tax. The MGRT amounted to $1.5 million, and $1.0 million for the three months ended March 31, 2010, and 2009, respectively.

Generally, the MGRT is a 0.976% tax (statutory rate of 0.8% plus 21.99% surtax) on modified gross receipts, which for most taxpayers is defined as receipts less purchases from other firms. Managed care organizations, however, are not currently allowed to deduct payments to providers in determining modified gross receipts. As a result, the MGRT is 0.976% of our Michigan plan's receipts and does not vary with levels of pretax income or margins. We believe that presentation of the MGRT as a premium tax produces financial statements that are more useful to the reader.

Recent Accounting Pronouncements

Fair Value Measurements. In January 2010, the Financial Accounting Standards Board ("FASB") issued guidance which expanded the required disclosures about fair value measurements. In particular, this guidance requires (a) separate disclosure of the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements along with the reasons for such transfers, (b) information about purchases, sales, issuances and settlements to be presented separately in the reconciliation for Level 3 fair value measurements, (c) fair value measurement disclosures for each class of assets and liabilities and (d) disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements for fair value measurements that fall in either Level 2 or Level 3. Effective for interim and annual reporting beginning after December 15, 2009, with one new disclosure effective after December 15, 2010, we have adopted this guidance in full with respect to the interim period ended March 31, 2010. The adoption of this guidance did not impact our financial condition or results of operations.

3. Earnings per Share

The denominators for the computation of basic and diluted earnings per share were calculated as follows:

	Three Months Ended March 31,	
	2010	2009
	(in thousands)	
Shares outstanding at the beginning of the period	25,607	26,725
Weighted-average number of shares repurchased	—	(218)
Weighted-average number of shares issued	39	23
Denominator for basic earnings per share	25,646	26,530
Dilutive effect of employee stock options and stock grants (1)	191	31
Denominator for diluted earnings per share (2)	25,837	26,561

(1) Options to purchase common shares are included in the calculation of diluted earnings per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three months ended March 31, 2010, and 2009, there were approximately 613,000 and 626,000 antidilutive weighted options, respectively. Restricted shares are included in the calculation of diluted earnings per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. For the three months ended March 31, 2010, and 2009, there were approximately 15,000, and 330,000 antidilutive weighted restricted shares, respectively.

(2) Potentially dilutive shares issuable pursuant to our convertible senior notes were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the quarters ended March 31, 2010 and 2009.

4. Share-Based Compensation

At March 31, 2010, we had employee equity incentives outstanding under two plans: (1) the 2002 Equity Incentive Plan; and (2) the 2000 Omnibus Stock and Incentive Plan (from which equity incentives are no longer awarded). Charged to general and administrative expenses, total stock-based compensation expense for the three months ended March 31, 2010 and 2009 was as follows:

	Three Months Ended March 31,	
	2010	2009
	(in thousands)	
Restricted stock awards	$ 1,638	$ 1,052
Stock options (including shares issued under our employee stock purchase plan)	498	382
Total stock-based compensation expense	$ 2,136	$ 1,434

As of March 31, 2010, there was $19.5 million of total unrecognized compensation expense related to unvested restricted stock awards, which we expect to be recognized over a remaining weighted-average period of 3.1 years. Also as of March 31, 2010, there was $751,000 of unrecognized compensation expense related to unvested stock options, which we expect to recognize over a remaining weighted-average period of 1.1 years.

Unvested restricted stock and restricted stock activity for the three months ended March 31, 2010 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2009	687,630	$ 24.64
Granted	432,625	21.77
Vested	(191,426)	25.22
Forfeited	(3,950)	24.74
Unvested balance as of March 31, 2010	924,879	23.18

The total fair value of restricted shares granted during the three months ended March 31, 2010 and 2009 was $9.4 million and $6.8 million, respectively. The total fair value of restricted shares vested during the three months ended March 31, 2010 and 2009 was $4.2 million and $2.1 million, respectively. Stock option activity during the three months ended March 31, 2010 is summarized below:

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (in Thousands)	Weighted Average Remaining Contractual Term (Years)
Stock options outstanding as of December 31, 2009	650,739	$ 30.25		
Stock options outstanding as of March 31, 2010	650,739	$ 30.25	$ 379	5.6
Stock options exercisable and expected to vest as of March 31, 2010	644,579	$ 30.23	$ 379	5.6
Exercisable as of March 31, 2010	588,272	$ 30.04	$ 378	5.4

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, trade accounts payable, medical claims and benefits payable, long-term debt and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For a comprehensive discussion of fair value measurements with regard to our current and non-current investments, see below.

Based on quoted market prices, the fair value of our convertible senior notes issued in October 2007 was $172.8 million as of March 31, 2010, and $160.8 million as of December 31, 2009. The carrying amount of the convertible senior notes was $160.1 million, and $158.9 million as of March 31, 2010, and December 31, 2009, respectively.

To prioritize the inputs we use in measuring fair value, we apply a three-tier fair value hierarchy. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of March 31, 2010, we held certain assets that are required to be measured at fair value on a recurring basis. These included investments as follows:

Balance Sheet Classification	Description
Current assets:	
Investments (see Note 6)	Investment grade debt securities; designated as available-for-sale; reported at fair value based on market prices that are readily available (Level 1).
Non-current assets:	
Investments (see Note 6)	Auction rate securities; designated as available-for-sale; reported at fair value based on discounted cash flow analysis or other type of valuation model (Level 3).
	Auction rate securities; designated as trading; reported at fair value based on discounted cash flow analysis or other type of valuation model (Level 3).
Other assets	Other assets include auction rate securities rights (the “Rights”); reported at fair value based on discounted cash flow analysis or other type of valuation model (Level 3).

As of March 31, 2010, $62.9 million par value (fair value of $55.6 million) of our investments consisted of auction rate securities, all of which were collateralized by student loan portfolios guaranteed by the U.S. government. We continued to earn interest on substantially all of these auction rate securities as of March 31, 2010. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008. As such, quoted prices in active markets were not readily available during the majority of 2008, all of 2009, and continued to be unavailable as of March 31, 2010. To estimate the fair value of these securities, we used pricing models that included factors such as the collateral underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security would have a successful auction. The estimated values of these securities were also compared, when possible, to valuation data with respect to similar securities held by other parties. We concluded that these estimates, given the lack of market available pricing, provided a reasonable basis for determining fair value of the auction rate securities as of March 31, 2010.

As of March 31, 2010, we held $36.4 million par value (fair value of $32.8 million) auction rate securities (designated as trading securities) with a certain investment securities firm. In the fourth quarter of 2008, we entered into a rights agreement with this firm that (1) allows us to exercise rights (the "Rights") to sell the eligible auction rate securities at par value to this firm between June 30, 2010 and July 2, 2012, and (2) gives the investment securities firm the right to purchase the auction rate securities from us any time after the agreement date as long as we receive the par value.

We account for the Rights as a freestanding financial instrument and have elected to record the value of the Rights under the fair value option. We recorded pretax losses on the Rights, attributable to the decline in the fair value of the Rights, totaling $493,000 and $3.3 million for the three months ended March 31, 2010, and 2009, respectively. To determine the fair value estimate of the Rights, we use a discounted cash-flow model based on the expectation that the auction rate securities will be put back to the investment securities firm at par on June 30, 2010, as permitted by the rights agreement.

For the three months ended March 31, 2010 and 2009, we recorded pretax gains of $540,000 and $3.6 million, respectively, on the auction rate securities underlying the Rights. We expect that the future changes in the fair value of the Rights will continue to be substantially offset by the fair value movements in the underlying auction rate securities.

As of March 31, 2010, the remainder of our auction rate securities (designated as available-for-sale securities) amounted to $26.5 million par value (fair value of $22.8 million). As a result of the increase in fair value of auction rate securities designated as available-for-sale, we recorded pretax unrealized gains of $203,000 and $320,000 to accumulated other comprehensive loss for the three months ended March 31, 2010, and 2009, respectively. We have deemed these unrealized losses to be temporary and attribute the decline in value to liquidity issues, as a result of the failed auction market, rather than to credit issues. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive loss. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

Our assets measured at fair value on a recurring basis at March 31, 2010, were as follows:

	Fair Value Measurements at Reporting Date Using			
	Total	Level 1	Level 2	Level 3
	(In thousands)			
Investments	$ 175,911	$ 175,911	$ —	$ —
Auction rate securities (available-for-sale)	22,810	—	—	22,810
Auction rate securities (trading)	32,770	—	—	32,770
Auction rate securities rights	3,314	—	—	3,314
Total assets measured at fair value	$ 234,805	$ 175,911	$ —	$ 58,894

The following table presents a rollforward of the balance of our assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	(Level 3) (In thousands)
Balance at December 31, 2009	$ 63,494
Total gains (unrealized):	
Included in earnings	47
Included in other comprehensive income	203
Settlements	(4,850)
Balance at March 31, 2010	$ 58,894
The amount of total gains for the period included in other comprehensive loss attributable to the change in unrealized gains relating to assets still held at March 31, 2010	$ 203

6. Investments

The following tables summarize our investments as of the dates indicated:

	March 31, 2010			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Government-sponsored enterprise securities	$ 84,712	$ 471	$ 230	$ 84,953
Municipal securities (including non-current auction rate securities)	78,086	2,534	3,904	76,716
Corporate debt securities	39,145	176	231	39,090
U.S. treasury notes	27,405	90	27	27,468
Certificates of deposit	3,264	—	—	3,264
	$ 232,612	$ 3,271	$ 4,392	$ 231,491

	December 31, 2009			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Government-sponsored enterprise securities	$ 89,451	$ 504	$ 281	$ 89,674
Municipal securities (including non-current auction rate securities)	82,009	3,120	4,154	80,975
Corporate debt securities	32,543	206	185	32,564
U.S. treasury notes	28,052	92	84	28,060
Certificates of deposit	3,258	—	—	3,258
	$ 235,313	$ 3,922	$ 4,704	$ 234,531

The contractual maturities of our investments as of March 31, 2010 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 72,561	$ 72,448
Due one year through five years	102,559	102,943
Due after five years through ten years	1,430	1,403
Due after ten years	56,062	54,697
	$ 232,612	$ 231,491

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Total proceeds from sales of available-for-sale securities were $36.0 million and $35.5 million for the three months ended March 31, 2010, and 2009, respectively. Net realized investment gains for the three months ended March 31, 2010, and 2009 were $14,000 and $158,000 respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our municipal securities, we have determined that unrealized gains and losses at March 31, 2010, and December 31, 2009, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

Our investment in municipal securities consists primarily of auction rate securities. As described in Note 5, "Fair Value Measurements," the unrealized losses on these investments were caused primarily by the illiquidity in the auction markets. Because the decline in market value is not due to the credit quality of the issuers, and because we do not intend to sell, nor is it more likely than not that we will be required to sell, these investments before recovery of their cost, we do not consider the auction rate securities that are designated as available-for-sale to be other-than-temporarily impaired at March 31, 2010.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of March 31, 2010.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Government-sponsored enterprise securities	$ 23,646	$ 50	$ 10,331	$ 180	$ 33,977	$ 230
Municipal securities	10,700	47	24,101	3,698	34,801	3,745
Corporate debt securities	11,193	109	9,409	122	20,602	231
U.S. treasury notes	15,603	27	—	—	15,603	27
	$ 61,142	$ 233	$ 43,841	$ 4,000	$ 104,983	$ 4,233

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2009. At December 31, 2009, we previously reported only those available-for-sale investments in an unrealized loss position for at least two consecutive months. To conform to the current year presentation, we have included all available-for-sale investments in an unrealized loss position at December 31, 2009. This presentation change increased the total amount of unrealized losses reported in the following table by $113,000 at December 31, 2009. The accompanying increase to the estimated fair value of the underlying investments amounted to $42.9 million at December 31, 2009.

	In a Continuous Loss Position for Less than 12 Months		In a Continuous Loss Position for 12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(In thousands)					
Government-sponsored enterprise securities	$ 30,460	$ 187	$ 7,297	$ 94	$ 37,757	$ 281
Municipal securities	12,460	78	24,031	3,902	36,491	3,980
Corporate debt securities	13,513	149	1,203	36	14,716	185
U.S. treasury notes	21,824	84	—	—	21,824	84
	$ 78,257	$ 498	$ 32,531	$ 4,032	$ 110,788	$ 4,530

7. Receivables

Receivables consist primarily of amounts due from the various states in which we operate. All receivables are subject to potential retroactive adjustment. As the amounts of all receivables are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. Accounts receivable by health plan operating subsidiary were as follows:

	March 31, 2010	December 31, 2009
	(In thousands)	
California	$ 28,250	$ 34,289
Michigan	17,122	14,977
Missouri	21,082	19,670
New Mexico	12,389	11,919
Ohio	31,286	37,004
Utah	3,630	6,107
Washington	11,953	9,910
Others	2,888	2,778
Total receivables	$ 128,600	$ 136,654

8. Restricted Investments

Pursuant to the regulations governing our subsidiaries, we maintain statutory deposits and deposits required by state Medicaid authorities in certificates of deposit and U.S. treasury securities. Additionally, we maintain restricted investments as protection against the insolvency of capitated providers. The following table presents the balances of restricted investments by health plan, and by our insurance company:

	March 31, 2010	December 31, 2009
	(In thousands)	
California	$ 369	$ 368
Florida	2,053	2,052
Insurance company	4,729	4,686
Michigan	1,000	1,000
Missouri	502	503
New Mexico	16,108	15,497
Ohio	9,044	9,036
Texas	1,506	1,515
Utah	576	578
Washington	151	151
Other	892	888
Total	$ 36,930	$ 36,274

The contractual maturities of our held-to-maturity restricted investments as of March 31, 2010 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 31,151	$ 31,153
Due one year through five years	5,637	5,611
Due after five years through ten years	142	155
	$ 36,930	$ 36,919

9. Other Assets

Other assets include deferred financing costs associated with long-term debt, certain investments held in connection with our employee deferred compensation program, and an investment in a vision services provider (see Note 12, "Related Party Transactions"). The deferred financing costs are being amortized on a straight-line basis over the seven-year term of the convertible senior notes maturing in 2014.

10. Convertible Senior Notes

In October 2007, we sold $200.0 million aggregate principal amount of 3.75% Convertible Senior Notes due 2014 (the "Notes"). The sale of the Notes resulted in net proceeds totaling $193.4 million. During 2009, we purchased and retired $13.0 million face amount of the Notes, so the remaining aggregate principal amount totaled $187.0 million as of December 31, 2009. The Notes rank equally in right of payment with our existing and future senior indebtedness.

The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 21.3067 shares of our common stock per one thousand dollar principal amount of the Notes. This represents an initial conversion price of approximately $46.93 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances. Prior to July 2014, holders may convert their Notes only under the following circumstances:

- During any fiscal quarter after our fiscal quarter ended December 31, 2007, if the closing sale price per share of our common stock, for each of at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, is greater than or equal to 120% of the conversion price per share of our common stock;
- During the five business day period immediately following any five consecutive trading day period in which the trading price per one thousand dollar principal amount of the Notes for each trading day of such period was less than 98% of the product of the closing price per share of our common stock on such day and the conversion rate in effect on such day; or
- Upon the occurrence of specified corporate transactions or other specified events.

On or after July 1, 2014, holders may convert their Notes at any time prior to the close of business on the scheduled trading day immediately preceding the stated maturity date regardless of whether any of the foregoing conditions is satisfied.

We will deliver cash and shares of our common stock, if any, upon conversion of each $1,000 principal amount of Notes, as follows:

- An amount in cash (the "principal return") equal to the sum of, for each of the 20 Volume-Weighted Average Price (VWAP) trading days during the conversion period, the lesser of the daily conversion value for such VWAP trading day and fifty dollars (representing 1/20th of one thousand dollars); and
- A number of shares based upon, for each of the 20 VWAP trading days during the conversion period, any excess of the daily conversion value above fifty dollars.

The proceeds from the issuance of such convertible debt instruments have been allocated between a liability component and an equity component. We have determined that the effective interest rate of the Notes is 7.5%, principally based on the seven-year U.S. treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. The resulting debt discount is being amortized over the period the Notes are expected to be outstanding, as additional non-cash interest expense. As of March 31, 2010, we expect the Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 54 months. The Notes' if-converted value did not exceed their principal amount as of March 31, 2010. At March 31, 2010, the equity component of the Notes, net of the impact of deferred taxes, was $24.0 million. The following table provides the details of the liability amounts recorded:

	As of March 31, 2010	As of December 31, 2009
	(in thousands)	
Details of the liability component:		
Principal amount	$ 187,000	$ 187,000
Unamortized discount	(26,857)	(28,100)
Net carrying amount	$ 160,143	$ 158,900

	Three Months Ended March 31,	
	2010	2009
	(in thousands)	
Interest cost recognized for the period relating to the:		
Contractual interest coupon rate of 3.75%	$ 1,753	$ 1,817
Amortization of the discount on the liability component	1,243	1,194
Total interest cost recognized	$ 2,996	$ 3,011

11. Commitments and Contingencies

Legal

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly-funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. These actions, when finally concluded and determined, are not likely, in our opinion, to have a material adverse effect on our business, consolidated financial position, cash flows, or results of operations.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our principal operations are conducted through our health plan subsidiaries operating in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, and Washington. Our health plans are subject to state regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and restrict the timing, payment and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances or cash dividends was $356.3 million at March 31, 2010, and $368.7 million at December 31, 2009. The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set new minimum capitalization requirements for insurance companies, HMOs and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, Missouri, New Mexico, Ohio, Texas, Washington, and Utah have adopted these rules, which may vary from state to state. California and Florida have not yet adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of March 31, 2010, our health plans had aggregate statutory capital and surplus of approximately $367.0 million compared with the required minimum aggregate statutory capital and surplus of approximately $253.4 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2010. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

12. Related Party Transactions

We have an equity investment in a medical service provider that provides certain vision services to our members. We account for this investment under the equity method of accounting because we have an ownership interest in the investee that confers significant influence over operating and financial policies of the investee. As of both March 31, 2010 and December 31, 2009, our carrying amount for this investment totaled $4.1 million. For the three months ended March 31, 2010 and 2009, we paid $4.4 million, and $4.8 million, respectively, for medical service fees to this provider.

We are a party to a fee-for-service agreement with Pacific Hospital of Long Beach ("Pacific Hospital"). Pacific Hospital is owned by Abrazos Healthcare, Inc., the shares of which are held as community property by the husband of Dr. Martha Bernadett, the sister of Dr. J. Mario Molina, our Chief Executive Officer, and John Molina, our Chief Financial Officer. Amounts paid to Pacific Hospital under the terms of this fee-for-service agreement were $297,000, and $172,000 for the three months ended March 31, 2010 and 2009, respectively. We also had a capitation arrangement with Pacific Hospital, where we paid Pacific Hospital a fixed monthly fee per member. This contract was terminated by the parties effective August 31, 2009. Amounts paid to Pacific Hospital for capitated services totaled approximately $460,000 for the three months ended March 31, 2009. We believe that both arrangements with Pacific Hospital are based on prevailing market rates for similar services.

13. Subsequent Events

Effective May 1, 2010, we closed our acquisition of the HIM business of Unisys Corporation. HIM will operate as a subsidiary of Molina Healthcare under the name, *Molina Medicaid Solutions*SM. Molina Medicaid Solutions provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems (MMIS). MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, as well as a contract to provide drug rebate administration services for the Florida Medicaid program.

The consideration for the acquisition was $135 million, subject to working capital adjustments. The acquisition was funded with available cash of $30 million and $105 million drawn under our credit facility. In connection with the HIM closing, both the fourth amendment and fifth amendment to our credit facility became effective.

Based on our preliminary valuation, we acquired current assets of approximately $19 million, current liabilities of approximately $9 million, and goodwill and intangible assets of approximately $125 million.

Item 2. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. We use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- budgetary pressures on the federal and state governments and their resulting inability to fully fund Medicaid, Medicare, or CHIP, or to maintain current payment rates, benefit packages, or membership eligibility thresholds and criteria;
- uncertainties regarding the impact of the recently enacted Patient Protection and Affordable Care Act, including the funding provisions related to health plans, and uncertainties regarding the likely impact of other federal or state health care and insurance reform measures;
- management of our medical costs, including rates of utilization that are consistent with our expectations;
- the accurate estimation of incurred but not reported medical costs across our health plans;
- the continuation and renewal of the government contracts of our health plans;
- the integration of the HIM business of Molina Medicaid Solutions, including its employees, systems, and operations;
- the retention and renewal of the Molina Medicaid Solutions' state government contracts on terms consistent with our expectations;
- the accuracy of our operating cost and capital outlay projections for Molina Medicaid Solutions;
- the timing of receipt and recognition of revenue under our various state contracts held by Molina Medicaid Solutions, including any changes to the anticipated start dates of operation at our Maine and Idaho locations;
- cost recovery efforts by the state of Michigan from Michigan health plans with respect to allegedly incorrect statewide rates and enrollment errors;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive;
- the required establishment of a premium deficiency reserve in any of the states in which we operate;
- up-coding by providers or billing in a manner at material variance with historic patterns;
- approval by state regulators of dividends and distributions by our subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation or arbitration matters;
- restrictions and covenants in our credit facility;
- the success of our efforts to leverage our administrative costs to address the needs associated with increased enrollment;
- the relatively small number of states in which we operate health plans and the impact on the consolidated entity of adverse developments in any single health plan;
- the transition from a non-risk to a risk-based capitation contract by our Utah health plan;
- the availability of financing to fund and capitalize our acquisitions and start-up activities and to meet our liquidity needs;
- governmental audits and reviews;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments;
- a state's failure to renew its federal Medicaid waiver;
- an unauthorized disclosure of confidential member information;

- changes generally affecting the managed care industry; and
- general economic conditions, including unemployment rates.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2009, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurances that any results or events projected or contemplated by our forward-looking statements will in fact occur and we caution investors not to place undue reliance on these statements.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2009.

Reclassification

Effective January 1, 2010, we have recorded the Michigan modified gross receipts tax, or MGRT as a premium tax and not as an income tax. For the three months ended March 31, 2009, amounts for premium tax expense (included in general and administrative expenses) and income tax expense have been reclassified to conform to this presentation.

Overview

Our financial performance for the three months ended March 31, 2010 compared with our financial performance for the three months ended March 31, 2009 is briefly summarized as follows:

	Three Months Ended March 31,	
	2010	2009
	(Dollar amounts in thousands, except per share data)	
Earnings per diluted share	$ 0.41	$ 0.46
Premium revenue	$ 965,220	$ 857,484
Operating income	$ 20,438	$ 23,161
Net income	$ 10,590	$ 12,211
Medical care ratio	85.3%	86.1%
G&A expenses as a percentage of total revenue	11.7%	10.7%
Total ending membership	1,482,000	1,303,000

Revenue

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. For the three months ended March 31, 2010, we received approximately 94% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for Children's Health Insurance Program, or CHIP members are generally among our lowest, with rates as low as approximately $75 PMPM in California. Premium revenues for Medicaid members are generally higher. Among the Temporary Assistance for Needy Families, or TANF Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $100 in California to $235 in New Mexico. Among our Medicaid Aged, Blind or Disabled, or ABD membership, PMPM premiums range from approximately $320 in Utah to over $1,000 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare premiums are nearly $1,100 PMPM on average. Medicare revenue totaled $50.3 million and $27.1 million for the three months ended March 31, 2010 and 2009, respectively.

For the three months ended March 31, 2010, we received approximately 5% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in California (effective October 1, 2009), Michigan, Missouri, Ohio, Texas, Utah (effective September 1, 2009), and Washington. Such payments are recognized as revenue in the month the birth occurs.

Certain components of premium revenue are subject to accounting estimates. Chief among these are:

- *Florida Health Plan Medical Cost Floor (Minimum) for Behavioral Health.* A portion of premium revenue paid to our Florida health plan by the state of Florida may be refunded to the state if certain minimum amounts are not spent on defined behavioral health care costs. At March 31, 2010, we had not recorded any liability under the terms of this contract provision. If the state of Florida disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of this provision, including revisions to the definitions of premium revenue or behavioral health care costs, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our Florida health plan.

- *New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums):* A portion of premium revenue paid to our New Mexico health plan by the state of New Mexico may be refunded to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit (as defined) exceed certain amounts. Our contract with the state of New Mexico requires that we spend a minimum percentage of premium revenue on certain explicitly defined medical care costs (the medical cost floor). Our contract is for a three-year period, and the medical cost floor is based on premiums and medical care costs over the entire contract period. Effective July 1, 2008, our New Mexico health plan entered into a new three year contract that, in addition to retaining the medical cost floor, added certain limits on the amount our New Mexico health plan can: (a) expend on administrative costs; and (b) retain as profit. At March 31, 2010, we had not recorded any liability under the terms of these contract provisions. If the state of New Mexico disagrees with our interpretation of the existing contract terms, an adjustment to the amounts owed may be required. Any changes to the terms of these provisions, including revisions to the definitions of premium revenue, medical care costs, administrative costs or profit, the period of time over which performance is measured or the manner of its measurement, or the percentages used in the calculations, may affect the profitability of our New Mexico health plan.

- *New Mexico Health Plan At-Risk Premium Revenue:* Under our contract with the state of New Mexico, up to 1% of our New Mexico health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality of care and administrative measures dictated by the state. For the three months ended March 31, 2010, our New Mexico health plan had received $2.8 million in at-risk revenue for state fiscal year 2010. We have recognized $1.2 million of that amount as revenue, and recorded a liability of approximately $1.6 million for the remainder.

- *Ohio Health Plan At-Risk Premium Revenue:* Under our contract with the state of Ohio, up to 1% of our Ohio health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. For the three months ended March 31, 2010, our Ohio health plan had received $6.5 million in at-risk revenue for state fiscal year 2010. We have recognized $4.0 million of that amount as revenue and recorded a liability of approximately $2.6 million for the remainder at March 31, 2010.

- *Utah Health Plan Premium Revenue:* Our Utah health plan may be entitled to receive additional premium revenue from the state of Utah as an incentive payment for saving the state of Utah money in relation to fee-for-service Medicaid. In prior years, we estimated amounts we believed were recoverable under our savings sharing agreement with the state of Utah based on available information and our interpretation of our contract with the state. The state may not agree with our interpretation or our application of the contract language, and it may also not agree with the manner in which we have processed and analyzed our member claims and encounter records. Thus, the ultimate amount of savings sharing revenue that we realize from prior years may be subject to negotiation with the state. During 2007, as a result of an ongoing disagreement with the state of Utah, we wrote off the entire receivable, totaling $4.7 million. Our Utah health plan continues to assert its claim to the amounts believed to be due under the savings share agreement. When additional information is known, or resolution is reached with the state regarding the appropriate savings sharing payment amount for prior years, we will adjust the amount of savings sharing revenue recorded in our financial statements as appropriate in light of such new information or agreement. No receivables for saving sharing revenue have been established at March 31, 2010 or December 31, 2009.

- *Texas Health Plan Premium Revenue:* The contract entered into between our Texas health plan and the state of Texas includes a profit-sharing agreement, where we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As of March 31, 2010, we had an aggregate liability of approximately $3.7 million accrued pursuant to our profit-sharing agreement with the state of Texas for the 2009 and 2010 contract years (ending August 31 of each year). We made no payments to the state under the terms of this profit sharing agreement during the first quarter of 2010. Because the final settlement calculations include a claims run-out period of nearly one year, the amounts recorded, based on our estimates, may be adjusted. We believe that the ultimate settlement will not differ materially from our estimates.

- *Texas Health Plan At-Risk Premium Revenue:* Under our contract with the state of Texas, up to 1% of our Texas health plan's revenue may be refundable to the state if certain performance measures are not met. These performance measures are generally linked to various quality-of-care measures dictated by the state. For the three months ended March 31, 2010, our Texas health plan had received $0.9 million in at-risk revenue for state fiscal year 2010, which has all been recognized revenue.

- *Medicare Premium Revenue:* Based on member encounter data that we submit to CMS, our Medicare revenue is subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. That analysis is similar to the process for the adjustment of member risk scores, but is further complicated by member pharmacy cost sharing provisions attached to the Medicare pharmacy benefit that do not apply to the services measured by the member risk adjustment process. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. To the extent that the premium revenue ultimately received from CMS differs from recorded amounts, we will adjust reported Medicare revenue. Based upon our knowledge of member health care utilization patterns we have recorded a liability of approximately $0.6 million related to the potential recoupment of Medicare premium revenue at March 31, 2010.

Historically, membership growth has been the primary reason for our increasing revenues, although more recently our revenues have also grown due to the more care intensive benefits and related higher premiums associated with our ABD and Medicare members. We have increased our membership through both internal growth and acquisitions. The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	March 31, 2010	December 31, 2009	March 31, 2009
Total Ending Membership by Health Plan:			
California	353,000	351,000	327,000
Florida	52,000	50,000	17,000
Michigan	226,000	223,000	207,000
Missouri	78,000	78,000	77,000
New Mexico	92,000	94,000	83,000
Ohio	228,000	216,000	190,000
Texas	40,000	40,000	33,000
Utah	75,000	69,000	60,000
Washington	338,000	334,000	309,000
Total	1,482,000	1,455,000	1,303,000
Total Ending Membership by State for our Medicare Advantage Special Needs Plans:			
California	2,700	2,100	1,500
Florida	300	—	—
Michigan	4,200	3,300	2,000
New Mexico	600	400	400
Texas	500	500	400
Utah	7,100	4,000	2,800
Washington	1,600	1,300	1,000
Total	17,000	11,600	8,100
Total Ending Membership by State for our Aged, Blind or Disabled Population:			
California	13,400	13,900	12,600
Florida	8,900	8,800	4,200
Michigan	32,700	32,200	30,100
New Mexico	5,800	5,700	6,200
Ohio	26,700	22,600	19,700
Texas	18,100	17,600	16,700
Utah	7,900	7,500	7,500
Washington	3,500	3,200	3,000
Total	117,000	111,500	100,000

The following table provides details of member months (defined as the aggregation of each month's ending membership for the period) by health plan for the periods indicated:

	Three Months Ended March 31,		
Total Member Months by Health Plan:	**2010**	**2009**	**% of Increase**
California	1,062,000	980,000	8.4%
Florida	154,000	61,000	152.5
Michigan	675,000	620,000	8.9
Missouri	234,000	231,000	1.3
New Mexico	280,000	248,000	12.9
Ohio	673,000	560,000	20.2
Texas	121,000	98,000	23.5
Utah	221,000	184,000	20.1
Washington	1,007,000	919,000	9.6
Total	4,427,000	3,901,000	13.5%

Expenses

Our operating expenses include expenses related to the provision of medical care services and general and administrative, or G&A, expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service:* Physician providers paid on a fee-for-service basis are paid according to a fee schedule set by the state or by our contracts with these providers. We pay hospitals on a fee-for-service basis in a variety of ways, including per diem amounts, diagnostic-related groups, or DRGs, percentage of billed charges, and case rates. We also pay a small portion of hospitals on a capitated basis. We also have stop-loss agreements with the hospitals with which we contract; under certain circumstances, we pay escalated charges in connection with these stop-loss agreements. Under all fee-for-service arrangements, we retain the financial responsibility for medical care provided. Expenses related to fee-for-service contracts are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit managers are included in fee-for-service costs.

- *Capitation:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation contracts, we typically pay a fixed PMPM payment to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated contracts, we remain liable for the provision of certain health care services. Certain of our capitated contracts also contain incentive programs based on service delivery, quality of care, utilization management, and other criteria. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.

- *Pharmacy:* Pharmacy costs include all drug, injectibles, and immunization costs paid through our pharmacy benefit managers. As noted above, drugs and injectibles not paid through our pharmacy benefit managers are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.

- *Other:* Other medical care costs include medically related administrative costs, certain provider incentive costs, reinsurance cost, costs of operating our medical clinics, and other health care expense. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, disease management, 24-hour on-call nurses, and a portion of our information technology costs. Salary and benefit costs are a substantial portion of these expenses. For the three month periods ended March 31, 2010 and 2009, medically related administrative costs were approximately $19.6 million and $17.6 million, respectively.

The following table provides the details of our consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three months ended March 31,					
	2010			2009		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 566,879	$ 128.06	68.9%	$ 489,141	$ 125.35	66.3%
Capitation	137,132	30.98	16.7	118,414	30.34	16.1
Pharmacy	90,071	20.35	10.9	102,638	26.30	13.9
Other	28,734	6.48	3.5	27,695	7.10	3.7
Total	$ 822,816	$ 185.87	100.0%	$ 737,888	$ 189.09	100.0%

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See “Critical Accounting Policies” below for a comprehensive discussion of how we estimate such liabilities.

The following table provides the details of our medical claims and benefits payable as of the dates indicated (in thousands):

	March 31, 2010	Dec. 31, 2009	March 31, 2009
Fee-for-service claims incurred but not paid (IBNP)	$ 260,456	$ 246,508	$ 247,111
Capitation payable	42,461	39,995	31,815
Pharmacy	16,196	20,609	24,047
Other	7,860	9,404	8,654
Total	$ 326,973	$ 316,516	$ 311,627

G&A expenses largely consist of wage and benefit costs for our employees, premium taxes, and other administrative expenses. Some G&A services are provided locally, while others are delivered to our health plans from a centralized location. The primary centralized functions are claims processing, information systems, finance and accounting services, and legal and regulatory services. Locally provided functions include member services, plan administration, and provider relations. G&A expenses include premium taxes for each of our health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, and Washington.

Results of Operations

The following table sets forth selected operating ratios. All ratios with the exception of the medical care ratio are shown as a percentage of total revenue. The medical care ratio is shown as a percentage of premium revenue because there is a direct relationship between the premium revenue earned and the cost of health care.

	Three Months Ended March 31,	
	2010	2009
Premium revenue	99.8%	99.6%
Investment income	0.2	0.4
Total revenue	100.0%	100.0%
Medical care ratio	85.3%	86.1%
General and administrative expense ratio, excluding premium taxes	8.2%	7.6%
Premium taxes included in general and administrative expenses	3.5	3.1
Total general and administrative expense ratio	11.7%	10.7%
Operating income	2.1%	2.7%
Net income	1.1%	1.4%

The following table summarizes premium revenue, medical care costs, medical care ratio and premium taxes by health plan for the three months ended March 31, 2010 and March 31, 2009 (dollar amounts in thousands except for PMPM amounts):

	Three Months Ended March 31, 2010					
	Premium Revenue		Medical Care Costs		Medical	Premium Tax
	Total	PMPM	Total	PMPM	Care Ratio	Total
California	$ 123,910	$ 116.67	$ 107,561	$ 101.28	86.8%	$ 1,628
Florida	39,088	253.45	34,687	224.91	88.7	6
Michigan	155,345	230.13	125,449	185.85	80.8	9,939
Missouri	52,143	223.01	43,516	186.11	83.5	—
New Mexico	95,598	341.02	74,015	264.03	77.4	2,004
Ohio	218,363	324.35	172,625	256.41	79.1	17,005
Texas	39,200	324.08	32,331	267.29	82.5	681
Utah	58,540	265.51	61,460	278.76	105.0	—
Washington	181,054	179.84	163,510	162.42	90.3	3,262
Other (1)	1,979	—	7,662	—	—	21
Total	$ 965,220	$ 218.04	$ 822,816	$ 185.87	85.3%	$ 34,546

	Three Months Ended March 31, 2009					
	Premium Revenue		Medical Care Costs		Medical	Premium Tax
	Total	PMPM	Total	PMPM	Care Ratio	Total
California	$ 110,035	$ 112.29	$ 103,973	$ 106.10	94.5%	$ 3,316
Florida	19,691	323.89	17,768	292.25	90.2	—
Michigan	132,765	213.98	109,995	177.28	82.9	7,838
Missouri	58,707	254.00	46,974	203.24	80.0	—
New Mexico	81,818	329.68	72,021	290.20	88.0	2,093
Ohio	187,222	334.13	157,780	281.58	84.3	10,192
Texas	33,011	338.14	27,406	280.73	83.0	684

Total	$ 857,484	$ 219.73	$ 737,888	$ 189.09	86.1%	$ 27,055

(1) "Other" medical care costs represent primarily medically related administrative costs at the parent company.

Three Months Ended March 31, 2010 Compared with the Three Months Ended March 31, 2009

Operating results for the three months ended March 31, 2010, compared with the three months ended March 31, 2009, were most significantly impacted by the following:

- Increased premium revenue due to higher enrollment, partially offset by lower revenue PMPM.
- Lower PMPM medical costs due to lower incidence of the influenza-related illnesses in 2010, improved hospital utilization, the transfer of pharmacy costs back to the states of Ohio and Missouri, and various contracting and medical management initiatives implemented by the Company.
- Higher administrative costs incurred for premium taxes, insurance assessments, and the support of Medicare and other programs not linked to the Medicaid risk business.
- In the first quarter of 2009, we recognized a $1.5 million gain on the purchase of our convertible senior notes, with no comparable event in the first quarter of 2010.

Net Income

For the three months ended March 31, 2010, net income was $10.6 million, or $0.41 per diluted share, compared with $12.2 million, or $0.46 per diluted share, for the three months ended March 31, 2009.

Premium Revenue

Premium revenue grew 12.6% in the three months ended March 31, 2010 compared with the three months ended March 31, 2009, due to a membership increase of nearly 14%. On a PMPM basis, however, consolidated premium revenue decreased 0.8% because of declines in premium rates at several of our health plans. The most significant declines in premium rates were in Ohio and Missouri, due to the transfer of pharmacy risk back to the states, and in Washington.

Investment Income

Investment income decreased to $1.5 million for the three months ended March 31, 2010 compared with $3.5 million for the three months ended March 31, 2009. This decline was primarily due to lower interest rates in 2010. Our annualized portfolio yield for the three months ended March 31, 2010 was 0.8% compared with 1.9% for the three months ended March 31, 2009.

Medical Care Costs

Medical care costs, in the aggregate, decreased 1.7% on a PMPM basis for the three months ended March 31, 2010 compared with the three months ended March 31, 2009, primarily due to the following:

- A less severe flu season in 2010,
- The transfer of pharmacy risk back to the states of Ohio and Missouri,
- Reductions in Medicaid fee schedules subsequent to March 31, 2009, and
- Our implementation of various contracting and medical management initiatives.

Excluding pharmacy costs, medical care costs increased 1.7% on a PMPM basis for the three months ended March 31, 2010 compared with the three months ended March 31, 2009. Medical care costs as a percentage of premium revenue (the medical care ratio) were 85.3% for the three months ended March 31, 2010 compared with 86.1% for the three months ended March 31, 2009.

Physician and outpatient costs increased 3.4% on a PMPM basis for the three months ended March 31, 2010, compared with the three months ended March 31, 2009. Emergency room utilization increased approximately 6%, while emergency room cost per visit dropped approximately 2%. Despite the decrease in emergency room cost per visit, we continued to observe hospitals billing for more intensive levels of care for the three months ended March 31, 2010, compared with the three months ended March 31, 2009.

Inpatient facility costs were down 1.5% on a PMPM basis for the three months ended March 31, 2010, compared with the three months ended March 31, 2009. Both utilization and unit costs were relatively stable compared with the three months ended March 31, 2009.

Pharmacy costs (including the benefit of rebates) decreased nearly 23% on a PMPM basis for the three months ended March 31, 2010, including our Missouri and Ohio health plans. The pharmacy benefit was transferred to the state of Missouri effective October 1, 2009, and was transferred to the state of Ohio effective February 1, 2010. Excluding these health plans, pharmacy costs increased 1.5% on a PMPM basis compared with the three months ended March 31, 2009 as a result of slight increases in utilization and unit costs.

Capitated costs increased 2.1% on a PMPM basis compared with three months ended March 31, 2009 as a result of rate increases received for members capitated on a percentage of premium basis at the New Mexico health plan subsequent to the first quarter of 2009, and the transition of members into capitated arrangements at the California health plan throughout 2009.

Days in Medical Claims and Benefits Payable

Beginning January 1, 2010, and for all prior periods presented, we are reporting days in medical claims and benefits payable relating to fee-for-service medical claims only. This new computation includes only fee-for-service medical care costs and medical claims that are incurred but not paid (IBNP), and therefore calculates the extent of reserves for those liabilities that are most subject to estimation risk.

The days in medical claims and benefits payable amount previously reported included *all* medical care costs (fee-for-service, capitation, pharmacy, and administrative), and *all* medical claims liabilities, including those liabilities that are typically paid concurrently, or shortly after the costs are incurred, such as capitation costs and pharmacy costs. Medical claims liabilities in this calculation do not include accrued costs — such as salaries — associated with the administrative portion of medical costs.

By including only fee-for-service medical costs and liabilities in this computation, our days in claims payable metric will be more indicative of the adequacy of our reserves for liabilities subject to a substantial degree of estimation. The days in medical claims and benefits payable computed under each method were as follows:

	March 31, 2010	Dec. 31, 2009	March 31, 2009
Days in claims payable — fee-for-service only	44 days	44 days	51 days
Days in claims payable — all medical costs	37 days	37 days	42 days

General and Administrative Expenses

General and administrative expenses were $113.4 million, or 11.7% of total revenue, for the three months ended March 31, 2010, compared with $92.5 million, or 10.7% of total revenue, for the for the three months ended March 31, 2009. Included in G&A expenses were premium tax expenses totaling $34.5 million in 2010 and $27.1 million in 2009.

Core G&A expenses, which we define as G&A expenses less premium taxes, were 8.2% of revenue for the three months ended March 31, 2010, compared with 7.6% for the three months ended March 31, 2009. The increase in the core G&A ratio was primarily due to costs associated with insurance assessments and the support of Medicare and other programs not linked to the Medicaid risk business. On a PMPM basis, core G&A increased to $17.82 for the three months ended March 31, 2010 compared with $16.76 for the three months ended March 31, 2009. Net of the incremental cost of insurance assessments and the cost of supporting new programs, core G&A PMPM would have been unchanged compared with the three months ended March 31, 2009.

	Three Months Ended March 31,			
	2010		2009	
(dollar amounts in thousands)	Amount	% of Total Revenue	Amount	% of Total Revenue
Medicare-related administrative costs	$ 7,932	0.8%	$ 4,968	0.6%
Non Medicare-related administrative costs:				
Administrative payroll, including employee incentive compensation	56,210	5.8	49,000	5.7
All other administrative expense	14,738	1.6	11,439	1.3
Core G&A expenses	$ 78,880	8.2%	$ 65,407	7.6%

Premium Tax Expense

Premium tax expense increased to 3.5% of revenue for the three months ended March 31, 2010, from 3.1% for the three months ended March 31, 2009, primarily due to the imposition of a higher premium tax rate in Ohio effective October 1, 2009.

Depreciation and Amortization

Depreciation and amortization expense increased $1.0 million in the three months ended March 31, 2010 compared with the three months ended March 31, 2009, primarily due to depreciation relating to investments in infrastructure.

Gain on Retirement of Convertible Senior Notes

In February 2009, we purchased and retired $13.0 million face amount of our convertible senior notes. We purchased the notes at an average price of $74.25 per $100 principal amount, for a total of $9.7 million. Including accrued interest, our total payment was $9.8 million. In connection with the purchase of the Notes, we recorded a gain of $1.5 million ($0.04 per diluted share) in the three months ended March 31, 2009.

Interest Expense

Interest expense was $3.4 million for each of the three month periods ended March 31, 2010 and 2009. Interest expense for both periods presented includes non-cash interest expense relating to our convertible senior notes. The amounts recorded for this additional interest expense totaled approximately $1.2 million for each of the three month periods ended March 31, 2010 and 2009.

Income Taxes

Income tax expense was recorded at an effective rate of 38.0% for the three months ended March 31, 2010 compared with 38.2% in three months ended March 31, 2009. Effective January 1, 2008 through December 31, 2009, our income tax expense included both the Michigan business income tax, or BIT, and the Michigan modified gross receipts tax, or MGRT. Effective January 1, 2010, we have recorded the MGRT as a premium tax and not as an income tax. We will continue to record the BIT as an income tax. For the three months ended March 31, 2009, amounts for premium tax expense (included in general and administrative expenses) and income tax expense have been reclassified to conform to this presentation. The MGRT amounted to $1.5 million and $1.0 million for the three months ended March 31, 2010, and 2009, respectively. There was no impact to net income for either period presented relating to this change.

Generally, the MGRT is a 0.976% tax (statutory rate of 0.8% plus 21.99% surtax) on modified gross receipts, which for most taxpayers are defined as receipts less purchases from other firms. Managed care organizations, however, are not currently allowed to deduct payments to providers in determining modified gross receipts. As a result, the MGRT is 0.976% of the Michigan plan's receipts, and does not vary with levels of pretax income or margins. We believe that presentation of the MGRT as a premium tax produces financial statements that are more useful to the reader.

Liquidity and Capital Resources

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue and investment income. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of ten years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be four years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of March 31, 2010, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Cash flow from operations was $(26.5) million, primarily as a result of a $90.7 million decrease in deferred revenue from December 31, 2009. In 2009, the state of Ohio typically paid premiums in advance of the month the premium was earned. Beginning in January 2010, the state of Ohio has delayed its premium payments to mid-month for the month premium is earned. Therefore, only two monthly premium payments were received by the Ohio plan during the first quarter of 2010. We do not anticipate any advance payments for the Ohio plan's premiums during 2010.

Cash provided by financing activities was nominal for the three months ended March 31, 2010, compared with $24.6 million used in financing activities for the three months ended March 31, 2009. The primary use of cash in the three months ended March 31, 2009 was under our securities purchase programs, where we purchased $15.0 million of our common stock, and $9.7 million of our convertible senior notes.

EBITDA (1)

	Three Months Ended March 31,	
	2010	2009
	(In thousands)	
Operating income	$ 20,438	$ 23,161
Add back:		
Depreciation and amortization expense	10,061	9,052
EBITDA	$ 30,499	$ 32,213

(1) We calculate EBITDA by adding back depreciation and amortization expense to operating income. Operating income included interest income of $1.3 million and $2.9 million for the three months ended March 31, 2010, and 2009, respectively. EBITDA is not prepared in conformity with GAAP since it excludes depreciation and amortization expense, as well as interest expense, and the provision for income taxes. This non-GAAP financial measure should not be considered as an alternative to net income, operating income, operating margin, or cash provided by operating activities. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

Capital Resources

At March 31, 2010, the parent company — Molina Healthcare, Inc. — held cash and investments of approximately $79.7 million, including auction rate securities with a fair value of $14.9 million, compared with $45.6 million of cash and investments at December 31, 2009. On a consolidated basis, at March 31, 2010, we had working capital of $340.9 million compared with $321.2 million at December 31, 2009. At March 31, 2010 and December 31, 2009, cash and cash equivalents were $438.3 million and $469.5 million, respectively. At March 31, 2010, investments were $231.5 million, including $55.6 million in non-current auction rate securities, and at December 31, 2009, investments were $234.5 million, including $59.7 million in non-current auction rate securities.

In connection with the May 1, 2010 closing of your acquisition of the HIM business, we used a draw on our credit facility, which previously had had no outstanding balance, to fund $105 million of the $135 million purchase price of the HIM business. The $30 million balance of the purchase price was funded with available cash.

We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Credit Facility

In 2005, we entered into an Amended and Restated Credit Agreement, dated as of March 9, 2005, among Molina Healthcare Inc., certain lenders, and Bank of America N.A., as Administrative Agent (the "Credit Facility"). Effective May 2008, we entered into a third amendment of the Credit Facility that increased the size of the revolving line of credit from $180.0 million to $200.0 million, maturing in May 2012. The Credit Facility is intended to be used for general corporate purposes.

Our obligations under the Credit Facility are secured by a lien on substantially all of our assets and by a pledge of the capital stock of our health plan subsidiaries (with the exception of the California health plan). The Credit Facility includes usual and customary covenants for credit facilities of this type, including covenants limiting liens, mergers, asset sales, other fundamental changes, debt, acquisitions, dividends and other distributions, capital expenditures, investments, and a fixed charge coverage ratio. The Credit Facility also requires us to maintain a ratio of total consolidated debt to total consolidated EBITDA of not more than 2.75 to 1.00 at any time. At March 31, 2010, we were in compliance with all financial covenants in the Credit Facility.

Subject to the closing of the HIM acquisition, in November 2009 we agreed to enter into a fourth amendment to the Credit Facility. The fourth amendment would become effective upon the closing of the acquisition of the HIM business. The fourth amendment was required because the $135 million purchase price for the HIM business exceeded the applicable deal size threshold under the terms of the Credit Facility. Pursuant to the fourth amendment, the lenders consented to our acquisition of the HIM business.

Upon its effectiveness at the closing, the fourth amendment increased the commitment fee on the total unused commitments of the lenders under the facility to 50 basis points on all levels of the pricing grid, with the pricing grid referring to our ratio of consolidated funded debt to consolidated EBITDA. The pricing for LIBOR loans and base rate loans was raised by 200 basis points at every level of the pricing grid. Thus, the applicable margins now range between 2.75% and 3.75% for LIBOR loans, and between 1.75% and 2.75% for base rate loans. Until the delivery of a compliance certificate with respect to our financial statements for the second quarter of 2010, the applicable margin shall be fixed at 3.5% for LIBOR loans and 2.5% for base rate loans. In connection with the lenders' approval of the fourth amendment, a consent fee of 10 basis points was paid on the amount of each consenting lender's commitment. In addition, the fourth amendment carved out from our indebtedness and restricted payment covenants under the Credit Facility the $187.0 million current principal amount of the Notes (although the $187.0 million indebtedness is still included in the calculation of our consolidated leverage ratio); increased the amount of surety bond obligations we may incur; increased our allowable capital expenditures; and reduced the fixed charge coverage ratio from 3.50x to 2.75x (on a pro forma basis) at December 31, 2009, and 3.00x thereafter.

On March 15, 2010, we agreed to enter into a fifth amendment to the Credit Facility. The fifth amendment also would become effective upon the closing of the acquisition of the HIM business. The fifth amendment was required because, after giving effect to the acquisition of the HIM business on a pro forma basis, and inclusive of the Company's fourth quarter 2009 EBITDA of only $5.9 million, the Company's consolidated leverage ratio for the preceding four fiscal quarters exceeded the currently applicable ratio of 2.75 to 1.0. The fifth amendment increased the maximum consolidated leverage ratio under the Credit Facility to 3.25 to 1.0 for the fourth quarter of 2009 (on a pro forma basis), and to 3.50 to 1.0 for the first, second, and third quarters of 2010, excluding the single date of September 30, 2010. On September 30, 2010, the maximum consolidated leverage ratio shall revert back to 2.75 to 1.0. However, if the Company has actually reduced its consolidated leverage ratio to no more than 2.75 to 1.0 on or before August 15, 2010, the consolidated leverage ratio under the Credit Facility will revert back to 2.75 to 1.0 on August 15, 2010. On the date that the consolidated leverage ratio reverts to 2.75 to 1.0 — whether August 15, 2010 or September 30, 2010 — the aggregate commitments of the lenders under the Credit Facility shall be reduced on a pro rata basis from $200 million to $150 million. In connection with the lenders' approval of the fifth amendment, we paid an amendment fee of 25 basis points on the amount of each consenting lender's commitment. We will also pay an incremental commitment fee of 12.5 basis points based on each lender's unfunded commitment during the period from the effective date of the fifth amendment through the date that the maximum consolidated leverage ratio is reduced to 2.75 to 1.0, plus a potential duration fee of 50 basis points payable on August 15, 2010 in the event that the consolidated leverage ratio has not been reduced to 2.75 to 1.0 by August 15, 2010.

Shelf Registration Statement

In December 2008, we filed a shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the issuance of up to $300 million of our securities, including common stock, warrants, or debt securities, and up to 250,000 shares of outstanding common stock that may be sold from time to time by the Molina Siblings Trust as a selling stockholder. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Long-Term Debt

Convertible Senior Notes

In October 2007, we sold $200.0 million aggregate principal amount of 3.75% Convertible Senior Notes due 2014 (the "Notes"). The sale of the Notes resulted in net proceeds totaling $193.4 million. During 2009, we purchased and retired $13.0 million face amount of the Notes, for a remaining aggregate principal amount of $187.0 million as of December 31, 2009. The Notes rank equally in right of payment with our existing and future senior indebtedness.

The Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 21.3067 shares of our common stock per $1,000 principal amount of the Notes. This represents an initial conversion price of approximately $46.93 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances. Prior to July 2014, holders may convert their Notes only under the following circumstances:

- During any fiscal quarter after our fiscal quarter ending December 31, 2007, if the closing sale price per share of our common stock, for each of at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, is greater than or equal to 120% of the conversion price per share of our common stock;

- During the five business day period immediately following any five consecutive trading day period in which the trading price per $1,000 principal amount of the Notes for each trading day of such period was less than 98% of the product of the closing price per share of our common stock on such day and the conversion rate in effect on such day; or

- Upon the occurrence of specified corporate transactions or other specified events.

On or after July 1, 2014, holders may convert their Notes at any time prior to the close of business on the scheduled trading day immediately preceding the stated maturity date regardless of whether any of the foregoing conditions is satisfied.

We will deliver cash and shares of our common stock, if any, upon conversion of each $1,000 principal amount of Notes, as follows:

- An amount in cash (the "principal return") equal to the sum of, for each of the 20 Volume-Weighted Average Price, or VWAP, trading days during the conversion period, the lesser of the daily conversion value for such VWAP trading day and $50 (representing 1/20th of $1,000); and

- A number of shares based upon, for each of the 20 VWAP trading days during the conversion period, any excess of the daily conversion value above $50.

Regulatory Capital and Dividend Restrictions

Our principal operations are conducted through our health plan subsidiaries operating in California, Florida, Michigan, Missouri, New Mexico, Ohio, Texas, Utah, and Washington. The health plans are subject to state laws that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state, and may restrict the timing, payment, and amount of dividends and other distributions that may be paid to Molina Healthcare, Inc. as the sole stockholder of each of our health plans. To the extent the subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries, after intercompany eliminations, which may not be transferable to us in the form of loans, advances, or cash dividends totaled $356.3 million at March 31, 2010, and $368.7 million at December 31, 2009.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if adopted by a particular state, set minimum capitalization requirements for health plans and other insurance entities bearing risk for health care coverage. The requirements take the form of risk-based capital, or RBC, rules. These rules, which vary slightly from state to state, have been adopted in Michigan, Missouri, New Mexico, Ohio, Texas, Utah, and Washington. California and Florida have not adopted RBC rules and have not given notice of any intention to do so. The RBC rules, if adopted by California and Florida, may increase the minimum capital required by those states.

At March 31, 2010, our health plans had aggregate statutory capital and surplus of approximately $367.0 million, compared to the required minimum aggregate statutory capital and surplus of approximately $253.4 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2010. We have the ability and commitment to provide additional working capital to each of our health plans when necessary to ensure that capital and surplus continue to meet regulatory requirements. Barring any change in regulatory requirements, we believe that we will continue to be in compliance with these requirements through 2010.

Contractual Obligations

In our Annual Report on Form 10-K for the year ended December 31, 2009, we reported on our contractual obligations as of that date. There have been no material changes to our contractual obligations since that report.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Principal areas requiring the use of estimates include those areas listed below. The most significant of these estimates is the determination of medical claims and benefits payable, which is discussed in further detail below:

- The determination of medical claims and benefits payable;

- The determination of the amount of revenue to be recognized under certain contracts that place revenue at risk dependent upon either the achievement of certain quality or administrative measurements, or the expenditure of certain percentages of revenue on defined expenses;

- The determination of allowances for uncollectible accounts;
- The valuation of certain investments;
- Settlements under risk or savings sharing programs;
- The impairment of long-lived and intangible assets;
- The determination of professional and general liability claims, and reserves for potential absorption of claims unpaid by insolvent providers;
- The determination of reserves for the outcome of litigation;
- The determination of valuation allowances for deferred tax assets; and
- The determination of unrecognized tax benefits.

Medical Claims and Benefits Payable

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. Our estimated IBNP liability represented $260.5 million of our total medical claims and benefits payable of $327.0 million as of March 31, 2010. Excluding amounts related to our cost-plus Medicaid contract in Utah (which contract was replaced with a prepaid capitation contract effective September 1, 2009), and amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider's monthly capitation payment), our IBNP liability at March 31, 2010 was $251.8 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended per member per month (PMPM) cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of March 31, 2010 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding March 31, 2010, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 72,603
(4)%	48,402
(2)%	24,201
2%	(24,201)
4%	(48,402)
6%	(72,603)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of March 31, 2010 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (64,122)
(4)%	(42,748)
(2)%	(21,374)
2%	21,374
4%	42,748
6%	64,122

The following per-share amounts are based on a combined federal and state statutory tax rate of 38%, and 25.8 million diluted shares outstanding for the three months ended March 31, 2010. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at March 31, 2010, net income for the three months ended March 31, 2010 would increase or decrease by approximately $7.5 million, or $0.29 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at March 31, 2010, net income for the three months ended March 31, 2010 would increase or decrease by approximately $6.6 million, or $0.26 per diluted share, net of tax. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $37.5 million, or $1.45 per diluted share, and $33.1 million, or $1.28 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $7.5 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which much of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that base reserves have been adequately set, we believe that amounts ultimately paid out should generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. However, there can be no assurance that amounts ultimately paid out will not be higher or lower than this 8% to 10% range, as shown by our results for the year ended December 31, 2009, when the amounts ultimately paid out were less than the amount of the reserves we had established as of the beginning of that year by 17.6%.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2009 and through March 31, 2010 were less than what we had expected when we had established our reserves. While the specific reasons for the overestimation of our liabilities were different in each of the periods presented, in general the overestimations were tied to our assessment of specific circumstances at our individual health plans which were unique to those reporting periods.

For the three months ended March 31, 2010, we recognized a benefit from prior period claims development in the amount of $38.5 million (see table below). This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2009. The overestimation of claims liability at December 31, 2009 was the result of the following factors:

- In New Mexico, we underestimated the degree to which cuts to the Medicaid fees schedule would reduce our liability as of December 31, 2009.
- In California, we underestimated the extent to which various network restructuring, provider contracting and medical management imitative had reduced our medical care costs during the second half of 2009, thereby resulting in a lower liability at December 31, 2009.

We recognized a benefit from prior period claims development in the amount of $42.2 million and $51.6 million for the three months ended March 31, 2009, and the year ended December 31, 2009, respectively (see table below). This was primarily caused by the overestimation of our liability for claims and medical benefits payable at December 31, 2008. The overestimation of claims liability at December 31, 2008 was the result of the following factors:

- In New Mexico, we overestimated at December 31, 2008 the ultimate amounts we would need to pay to resolve certain high dollar provider claims.
- In Ohio, we underestimated the degree to which certain operational initiatives had reduced our medical costs in the last few months of 2008.
- In Washington, we overestimated the impact that certain adverse utilization trends would have on our liability at December 31, 2008.
- In California, we underestimated utilization trends at the end of 2008, leading to an underestimation of our liability at December 31, 2008. Additionally, we underestimated the impact that certain delays in the receipt of paper claims would have on our liability, leading to a further underestimation of our liability at December 31, 2008.

In estimating our claims liability at March 31, 2010, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- The rapid growth of membership in our Medicare line of business between December 31, 2009 and March 31, 2010.
- An increase in claims inventory at our Ohio, Florida and Utah health plans between December 31, 2009 and March 31, 2010.
- The impact of reductions to the state Medicaid fee schedules in New Mexico effective December 1, 2009 and in Utah (outpatient only) effective March 1, 2010.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. However, that benefit will affect current period earnings only to the extent that the replenishment of the reserve for adverse claims development (and the re-accrual of administrative costs for the settlement of those claims) is less than the benefit recognized from the prior period liability. In 2009 and through March 31, 2010, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the amount of benefit recognized in each year was roughly consistent with that recognized in the previous year.

We seek to maintain a consistent claims reserving methodology across all periods. In 2009, the prior period benefit from an un-utilized reserve for adverse claims development was offset by the establishment of a new reserve in an approximately equal amount (relative to premium revenue, medical care costs, and medical claims and benefits payable) during the year, and thus the impact on earnings for the current period was minimal.

The following table presents the components of the change in our medical claims and benefits payable for the three months ended March 31, 2010 and 2009, and for the year ended December 31, 2009. The negative amounts displayed for "*Components of medical care costs related to: Prior years*" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period exceeded the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	As of and for the three months ended March 31,		As of and for the year ended December 31,
	(Dollars in thousands, except per-member amounts)		
	2010	2009	2009
Balances at beginning of period	$ 316,516	$ 292,442	$ 292,442
Components of medical care costs related to:			
Current year	861,271	780,112	3,227,794
Prior years	(38,455)	(42,224)	(51,558)
Total medical care costs	822,816	737,888	3,176,236
Payments for medical care costs related to:			
Current year	581,389	510,075	2,919,240
Prior years	230,970	208,628	232,922
Total paid	812,359	718,703	3,152,162
Balances at end of period	$ 326,973	$ 311,627	$ 316,516
Benefit from prior period as a percentage of:			
Balance at beginning of period	12.1%	14.4%	17.6%
Premium revenue	4.0%	4.9%	1.4%
Total medical care costs	4.7%	5.7%	1.6%
Days in claims payable, fee for service only	44	51	44
Number of members at end of period	1,482,000	1,303,000	1,455,000
Fee-for-service claims processing and inventory information:			
Number of claims in inventory at end of period	153,700	158,900	93,100
Billed charges of claims in inventory at end of period	$ 194,000	$ 208,900	$ 131,400
Claims in inventory per member at end of period	0.10	0.12	0.06
Billed charges of claims in inventory per member at end of period	$ 130.90	$ 160.32	$ 90.31
Number of claims received during the period	3,493,300	3,051,600	12,930,100
Billed charges of claims received during the period	$ 2,760,500	$ 2,280,100	$ 9,769,000

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 3. ***Quantitative and Qualitative Disclosures About Market Risk.***

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of ten years and an average duration of four years. Restricted investments are invested principally in certificates of deposit and treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our health plans operate.

Item 4. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the three months ended March 31, 2010 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. ***Legal Proceedings***

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly-funded programs, and the repayment of previously billed and collected revenues.

We are involved in various legal actions in the normal course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. These actions, when finally concluded and determined, are not likely, in our opinion, to have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Item 1A. ***Risk Factors***

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. The following risk factors were identified or re-evaluated by the Company during the first quarter and are a supplement to those risk factors discussed in Part I, Item 1A — Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2009. The risks described herein and in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, or results of operations.

The recently enacted health care reform law and the implementation of that law could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

In March 2010, President Obama signed both the Patient Protection and Affordable Care Act and the Health Care and Education Affordability Reconciliation Act. This legislation enacts comprehensive changes to the U.S. health care system, components of which will be phased in at various stages over the next eight years. Among other things, by January 1, 2014, the Medicaid program will be expanded to provide eligibility to nearly all low-income people under age 65 with income below 133 percent of the federal poverty line. As a result, millions of low-income adults without children who currently cannot qualify for coverage, as well as many low-income parents and, in some instances, children now covered through CHIP, will be made eligible for Medicaid. In total, the Congressional Budget Office estimates that Medicaid and CHIP will cover an additional 16 million people by 2019. The legislation also imposes an annual insurance industry assessment of $8 billion starting in 2014, with increasing annual amounts thereafter. Such assessment may not be deductible for income tax purposes.

There are many parts of the legislation that will require further guidance in the form of regulations. Due to the breadth and complexity of the health reform legislation, the lack of implementing regulations and interpretive guidance, and the phased-in nature of the implementation, the overall impact of the health reform legislation on our business over the coming years is difficult to predict and not yet fully known.

If we fail to effectively accommodate the growth in Medicaid enrollment anticipated under the health reform legislation, our business may be materially adversely affected. In addition, if the new insurance industry assessment is imposed as enacted, or if we are unable to obtain premium increases to offset the impact of the assessment or otherwise adjust our business model to address the assessment, our business, financial condition, cash flows, or results of operations could be materially adversely affected.

The state of Michigan may seek to reduce the rates paid to our Michigan health plan in order to compensate for or recover amounts allegedly overpaid on a statewide basis to Michigan health plans.

The Michigan Department of Community Health, or MDCH, has identified approximately 7,000 individuals whom MDCH claims were incorrectly enrolled as dual eligible members, allegedly resulting in an overpayment to all health plans operating in the state. In addition, MDCH has claimed that TANF rates for Michigan state fiscal year 2010 have been overstated due to new program code changes. These statewide issues could result in MDCH's seeking to reduce the premium rates paid to our Michigan health plan, or even to recover a portion of premiums already paid to the health plan, thereby reducing the health plan's revenue for the remainder of 2010. Any reduction to Michigan premium rates or successful recovery of previously paid amounts could adversely affect our business, financial condition, cash flows, or results of operations.

The timing of both the receipt and the recognition of revenue under the contracts of Molina Medicaid Solutions with the states of Idaho and Maine is uncertain.

Molina Medicaid Solutions provides design, development, implementation, and business process outsourcing solutions to state governments for their Medicaid Management Information Systems. The systems being designed by Molina Medicaid Solutions for the states of Idaho and Maine have not yet become operative, or "gone live," including the actual processing of Medicaid claims by the systems. We expect that the Idaho system will begin live operations effective June 1, 2010, and that the Maine system will begin live operations effective August 1, 2010. The revenues to be received under the Idaho and Maine contracts, as well as the recognition of such revenues under applicable accounting principles, is contingent upon the applicable "go live" date. The projected "go live" dates for the Idaho and Maine systems may be delayed for reasons beyond our control. In the event either or both "go live" dates are delayed, our cash flows and results of operations could be adversely affected.

Item 6. ***Exhibits***

Exhibit No.	Title
31.1	Certification of Chief Executive Officer pursuant to Rules 13a-14(a)/15d-14(a) under the Securities Exchange Act of 1934, as amended.
31.2	Certification of Chief Financial Officer pursuant to Rules 13a-14(a)/15d-14(a) under the Securities Exchange Act of 1934, as amended.
32.1	Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

MOLINA HEALTHCARE, INC.
(Registrant)

Dated: May 10, 2010

/s/ JOSEPH M. MOLINA, M.D.
Joseph M. Molina, M.D.
Chairman of the Board, Chief Executive Officer and President (Principal Executive Officer)

Dated: May 10, 2010

/s/ JOHN C. MOLINA, J.D.
John C. Molina, J.D.
Chief Financial Officer and Treasurer (Principal Financial Officer)

32.2	Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended March 31, 2010 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

EXHIBIT 31.2

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, John C. Molina, J.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended March 31, 2010 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
