SCHEDULE 15
HR MATTERS AND KEY PERSONNEL

CONTENTS

1. **DEFINITIONS AND INTERPRETATION**

1.1 Capitalized terms used but not defined in this Schedule shall have the meanings given in Schedule 1 (Definitions and Interpretation) to the Agreement**.**

1.2 The following defined terms used in this Schedule shall have the meanings specified below:

(a)"Molina Disability" shall have the meaning set forth in Paragraph 4.1.

(b)"Molina Leave of Absence" shall have the meaning set forth in Paragraph 4.1.

(c)"Molina Net Credited Service" shall mean a Designated Employee's total years of service with Molina, commencing with his/her date of hire and ending on his/her last date of employment with Molina, as may be adjusted for any breaks in service.

(d)"Designated Molina Employees" shall mean the employees identified by Molina on Appendix A.

(e)"Service Provider Benefit Plans" shall have the meaning set forth in Paragraph 6.3.

(f)"Service Provider Employment Date" shall mean the date on which each Transitioned Employee begins his/her employment with Service Provider, which date shall be on the Effective Date, except for any employee who is on a Molina Leave of Absence or Molina Disability on the Effective Date, in which case employment with Service Provider shall begin on the first Business Day following his/her return to active service with Molina at the end of such Molina Leave of Absence or Molina Disability; provided that in special circumstances any other Transitioned Employee may begin his/her employment with Service Provider on such date after the Effective Date as Molina and Service Provider may mutually agree.

(g)"Transitioned Employee" shall mean a Designated Employee who timely accepts Service Provider's offer of employment and commences employment with Service Provider in accordance with Paragraph 5.

2. **GENERAL PROVISIONS**

2.1 This Schedule describes the responsibilities of Molina and the Service Provider in relation to personnel at and before the relevant Service Commencement Dates, during the Term and on the termination, partial termination or reduction of any Services**. Certain additional obligations in relation to personnel are set out in the Exit Plan.**

2.2 Unless explicitly mentioned otherwise, where in this Schedule or in the Exit Plan, Molina is given a right (and that right shall also be given to any Successor Supplier), Molina or the Successor Supplier shall be entitled to exercise that right**.**

2.3 Unless explicitly mentioned otherwise, where in this Schedule or in the Exit Plan, Molina has an obligation to fulfill, that obligation may be fulfilled by either Molina or a Successor Supplier**.**

2.4 An obligation of the Service Provider in this Schedule or in the Exit Plan shall be construed to mean that the Service Provider must perform that obligation itself and must ensure that each and every Subcontractor performs that obligation to the extent that it is relevant**.**

3. PRE-COMMENCEMENT DATE WORK-SHADOWING

3.1 At Service Provider's request, prior to the relevant Service Commencement Date, the Service Provider may assign an agreed number of its employees, to be agreed with Molina, to "work-shadow" Molina's employees in order to understand Molina's business operations and to facilitate such transfer of knowledge and skills as will assist the Service Provider in providing the Services, provided that the Service Provider shall ensure that its assigned employees do not interfere with, hinder or restrict Molina's business operations and that the assigned employees will comply with all Molina's policies and procedures (as disclosed to the Service Provider or its personnel) while on Molina's premises**. Any such assigned employees shall at all times remain employees of the Service Provider and will be subject to the management and directions of the Service Provider during the period of the assignment.**

4. DESIGNATED EMPLOYEE HIRING REQUIREMENTS

4.1 Subject to the terms and conditions set forth in this Schedule, Service Provider shall extend offers of employment to all Designated Employees on Appendix A, regardless of whether any such Designated Employee is on an approved leave of absence as determined under any of Molina's leave of absence policies ("Molina Leave of Absence") or receiving benefits from Molina's Short-Term Disability Benefit Plan ("Molina Disability")**.**

5. DESIGNATED EMPLOYEE TRANSITION PROCESS

5.1 The process by which the Designated Employees shall become Transitioned Employees is as follows:

(a)As agreed to between Molina and Service Provider, Service Provider shall provide all Designated Employees with a general introduction package that has been reviewed by Molina and that shall include information regarding non-individualized terms and conditions of Service Provider's offer of employment and information regarding Service Provider, its general management values, policies and practices and its performance standards and business conduct requirements. Thereafter, Molina shall provide Service Provider with access to the Designated Employees for group informational meetings at such dates, times and frequency as Molina, in its sole discretion, may determine to be appropriate. Prior to any such meetings, the Parties shall work together to agree upon guidelines for the meetings.

(b)[redacted].

(c)[redacted].

(d)[redacted].

(e)[redacted].

(f)[redacted].

(g) Each Designated Employee who timely accepts Service Provider's offer of employment shall become a Transitioned Employee and shall commence employment with Service Provider on the Effective Date, which shall be his/her Service Provider Employment Date; provided, however, that (i) any Designated Employee who is on a Molina Leave of Absence or Molina Disability shall commence employment with Service Provider immediately following returning to work; (ii) Service Provider shall not be required to employ any such Designated Employee who does not return to work within twelve (12) months of the Effective Date, and (iii) Service Provider will use commercially reasonable efforts to obtain the transfer any H1-B visa held by a Designated Employee to Service Provider's sponsorship.

(h) Service Provider shall immediately inform Molina when any Designated Employee declines an offer of employment.

6. EMPLOYMENT OF TRANSITIONED EMPLOYEES

6.1 Service Provider shall not terminate any Transitioned Employee during the first [redacted] of his/her employment with Service Provider; provided, however, that Service Provider may terminate the employment of any Transitioned Employee for Cause (as that term is defined in Service Provider's policies, practices and procedures; and provided, further, that all decisions regarding the termination of any Transitioned Employee shall be the sole responsibility of Service Provider**.**

6.2 For a period of no less than [redacted] following each Transitioned Employee's Service Provider Employment Date, such Transitioned Employee shall be]:

(a) [redacted];

(b) [redacted];

(c) assigned to perform job responsibilities with Service Provider that are substantially similar job responsibilities assigned to the Transitioned Employee at Molina immediately prior to the Effective Date, unless mutually agreed upon between the Transitioned Employee, Molina and Service Provider; and

(d) permitted to work at the same work location as with Molina immediately prior to the Effective Date (including working remotely if there is no Molina location nearby) during the time the Transferred Employee is assigned to the Molina account.

6.3 **[redacted]**:

(a) [redacted];

(b) [redacted]

(c) [redacted].

6.4 **[redacted].**

6.5 Without limiting the obligations in Paragraph 6.2, any Transitioned Employee whose employment is terminated by **Service Provider** in the first [redacted] of his/her employment

with Service Provider, not for cause, shall be paid severance by Service Provider that is the greater of the severance payment calculated under, (a) Molina's severance plan or policy and a formula providing for base salary payments of four months for AVPs and Directors, three months for Managers and Supervisors and two months for all other positions, and (b) the applicable Service Provider severance plan or policy maintained by Service Provider; provided, however, that no Transferred Employee whose employment is terminated by Service Provider shall receive severance from Service Provider unless and until Service Provider obtains from such Transferred Employee a general release that includes as a releasee any "Predecessor Employer," and that term is defined within the general release generically in a manner that would reasonably be construed to include Molina**.** Severance for any Transferred Employee whose employment is terminated after the first [redacted] for a reason that qualifies him or her for severance under a Service Provider severance plan or policy that shall be calculated by recognizing both the Transferred Employee's Molina Net Credited Service and his/her service with Service Provider.

7. KEY PERSONNEL

7.1 The Service Provider shall ensure that each Key Service Provider Position is occupied by suitably qualified Service Provider Personnel, which may include Transitioned Employees, in accordance with this Paragraph 7 during the entire term of the Agreement, unless the written consent of Molina is first obtained or the Parties agree that such Key Service Provider Position is no longer required for the provision of the Services. [1] The designation of any Key Service Provider Position in addition to those set forth in Appendix A shall require agreement of the Parties.

7.2 Each Key Person shall be dedicated on a fulltime basis to the provision of the Services for the period set forth in Appendix A**.**

7.3 If any present or former Key Person breaches his/her confidentiality obligations entered into pursuant to Paragraph 8.2 below, then the Service Provider shall take steps so as to prevent any future breach of such obligations, including reviewing the processes to protect confidentiality information and/or removing the Key Person from his/her position, if still so engaged**.**

7.4 Paragraph 7.3 and any confidentiality agreement entered into pursuant to Paragraph 8.2 are without prejudice to the Service Provider's obligations of confidentiality under the Agreement and at law**.**

7.5 Service Provider shall ensure that no Key Person is removed from his/her specified role in the performance of the Service Provider's obligations under the Agreement for the duration of his/her designation as a Key Person unless:

(a)he/she resigns as an employee of the Service Provider or any relevant Subcontractor; or

(b)he/she dies; or

---

[1] Note: Key Person designation already addressed in MSA and Schedule 1.

(c) he/she has become incapable of performing the essential functions of his/her position through illness or incapacity, or he/she is unavailable, due to family or medical leave or other leave which the Service Provider is legally obliged to provide, in each instance where such incapacity or unavailability lasts, or has been certified as being expected to last, for a consecutive period of more than 20 Business Days, and in such instance the removal shall be temporary, for the duration of the absence; or

(d) he/she has committed any act or omission with respect to which appropriate disciplinary action is to remove the Key Person from his/her specified role; or

(e) Molina requests a replacement pursuant to Paragraph 7.9; or

(f) the prior written consent of Molina is first obtained.

7.6 Before removing any Key Person in accordance with Paragraph 7.5 or appointing any person to a Key Service Provider Position, the Service Provider shall:

(a) notify Molina of the proposed removal or appointment;

(b) in the case of an appointment, provide Molina with a curriculum vitae of the proposed candidate and discuss the position with Molina and permit Molina, on request, to meet the proposed candidate; and

(c) to the extent that it is lawfully able to do so, provide Molina with such information as Molina requests in relation to the proposed removal or appointment.

7.7 No person shall be appointed to a Key Service Provider Position without Molina's prior written approval**.**

7.8 If a Key Person is to be replaced, the Service Provider shall ensure that a replacement who is acceptable to Molina is appointed as soon as practicable, that there is a handover period that is reasonable in the circumstances and that any adverse effects of the change of personnel on the performance of the Service Provider's obligations under the Agreement or on Molina's businesses are minimized**.** The Service Provider shall be responsible for all costs relating to such handover.

7.9 Molina may request that the Service Provider replace any Key Person if:

(a) the Key Person has become incapable of performing the essential functions of his/her position through illness or incapacity, or he/she is unavailable, due to family or medical leave or other leave which the Service Provider is legally obligated to provide, in each instance where such incapacity or unavailability lasts, or has been certified as being expected to last, for a consecutive period of more than 20 Business Days, and in such instance the replacement shall be temporary, for the duration of the absence; or

(b) the Key Person's performance or conduct is, in Molina's reasonable opinion, unsatisfactory or prejudicial to the working relationship between the Parties and the Services being provided, provided that:

(i) before making any such request Molina has consulted with the Service Provider, and the Service Provider and/or the Key Person did not remedy

any unsatisfactory performance and/or conduct within thirty (30) days after Molina's notice pursuant to this Paragraph 7.9(b); and

(ii) the proviso in this Paragraph 7.9 shall not apply if Molina has previously provided notice of any concerns relating to the Key Person in accordance with Paragraph 7.9(b)(i).

7.10 The Service Provider shall replace the Key Person as soon as reasonably practicable after conclusion of the processes set forth in Paragraph 7.9 and, in any event, no later than two (2) months after such notice, or within such longer period as is reasonably necessary as a result of circumstances which are beyond the reasonable control of the Service Provider**.** The replacement of a Key Person under this Paragraph 7.10 shall be carried out in accordance with the provisions of Paragraph 7.6 above.

7.11 If a Key Person is unavailable or unable to respond to the needs of his/her position for a significant period, and Molina so requests, the Service Provider shall promptly nominate an alternate. The alternate shall have all the authority of the relevant Key Person for so long as the Key Person remains unavailable or unable to respond, and Molina may require the replacement of the alternate in accordance with this Paragraph 7.

7.12 Molina may, by written notice to the Service Provider, request Service Provider to designate new or alternative Key Service Provider Positions, and such new or alternate Key Service Provider Positions will be agreed via the Change Control Process**.**

7.13 The Service Provider shall defend, indemnify, keep indemnified and hold harmless Molina and any Molina Company from any employment related liability arising from any withdrawal or removal of Key Personnel (including any associated termination of employment) pursuant to this Paragraph 7, except to the extent such liability results from any unlawful act or omission of Molina**.**

8. SERVICE PROVIDER PERSONNEL

8.1 The Service Provider shall ensure that Service Provider Personnel:

(a) have all the skills, experience, training, knowledge and linguistic fluency requisite to carry out the tasks allocated to them;

(b) are trained in connection with the provision of the Services in accordance with market standards and any particular and reasonable Molina requirements provided to the Service Provider;

(c) comply with any reasonable directions or decisions provided by Molina which are consistent with the Service Provider's obligations under the Agreement; and

(d) have the appropriate work authorizations in accordance with Applicable Law; and

(e) while performing the Services, comply with professional standards of behavior and with Molina's policies regarding personal and professional conduct, safety and security and any other policies and procedures as have from time to time been provided to the Service Provider or the relevant Subcontractor (including the Policies).

8.2 The Service Provider shall, subject to Applicable Law, ensure that the Service Provider Personnel:

(a) enter into, or have already entered into, a confidentiality agreement with the Service Provider obligating the Service Provider Personnel to comply with confidentiality obligations which cover the confidentiality obligations in the Agreement; and

(b) cooperate constructively with Molina or Molina personnel and third party personnel with whom they come into contact in the course of the provision of the Services.

8.3 If any of the Service Provider Personnel, in the reasonable opinion of Molina, do not at any time meet any of the requirements in Paragraphs 8.1 or 8.2, Molina shall so notify the Service Provider, and the Service Provider shall immediately review the matter and consult with Molina on its proposals to address Molina's concerns. Following this review and consultation and, in any event, within ten (10) Business Days after the notification is received, if Molina is not reasonably satisfied, Molina may require the Service Provider to, and the Service Provider shall, remove the relevant Service Provider Personnel from the performance of the Services. The requirement to remove such an individual shall not excuse the Service Provider from any obligation of the Service Provider contained in the Agreement.

8.4 In order to protect Molina's confidential and other proprietary information, the Key Service Provider Personnel shall not be assigned to or involved with the business or prospective business of any Molina Competitor while he/she is involved in the provision of the Services or for the twelve (12) months after his/her involvement with the Services ceases.

8.5 The Service Provider shall defend, indemnify, keep indemnified and hold harmless Molina from any employment related liability arising from any withdrawal or removal of Service Provider Personnel (including any associated termination of employment) pursuant to this Paragraph 8 except to the extent such liability results from any unlawful act or omission of Molina (including direction by Molina to act in an unlawful manner).

8.6 The Service Provider certifies that it is not named on the Specially Designated National ("**SDN**") list maintained by the US Office of Foreign Assets Control and shall ensure that none of the Service Provider Personnel:

(a) is named on the SDN list or on the United States Denied/Restricted Party List ("**DRPL**") maintained by the US Department of Commerce; or

(b) is considered a national of any country under US embargo or anti-terrorism export controls.

8.7 The Service Provider shall ensure that the Service Provider Personnel are appropriately vetted, including criminal and other background checks to the extent permitted by Applicable Law, and that no individual who does not meet the standards required by this Schedule or the Agreement is involved in the provision of the Services**.** Vetting shall be considered appropriate if they meet the Service Provider's and market standards for the role in question together with any specific requirements provided to the Service Provider in writing by Molina.

8.8 The Service Provider shall comply with all relevant employment, labor, immigration and work permit laws and regulations in respect of the Service Provider Personnel**.**

8.9 The Service Provider shall be and remain liable for all amounts due to or in respect of the Service Provider Personnel, including but not limited to salary and other emoluments, benefits, payroll taxes, and social security payments, subject to Molina's obligations in Paragraph 15**.**

8.10 Without limiting any other provisions of this Schedule, and if and to the extent applicable, Service Provider shall comply with United States Department of Labor regulations regarding:

(a)equal employment opportunity obligations of government contractors and subcontractors;

(b)employment by government contractors of Vietnam-era and disabled veterans;

(c)employment of disabled persons by government contractors and subcontractors;

(d)developing written affirmative action programs;

(e)certifying no segregated facilities;

(f)filing annual EEO-1 reports;

(g)utilizing minority-owned and female-owned business concerns; and

(h)any successor regulations thereto which are incorporated by reference herein.

9. STATUS, RESPONSIBILITY AND AUTHORIZATION

9.1 No Service Provider Personnel shall become employed by, or be deemed to be employed by any member of the Molina Group (before the termination, partial termination or reduction of the relevant Services) as a consequence of the provision of the Services (unless the Parties and the individual otherwise expressly agree in writing), and the Service Provider shall defend, indemnify, keep indemnified and hold harmless Molina and each Molina Company against all costs, losses and expenses arising out of or relating to any claim by any Service Provider Personnel that he/she has become an employee of Molina or any Molina Company or subcontractor of either, unless (a) he/she has become an employee of Molina or any Molina Company or subcontractor of either as a result of an offer of employment by Molina, a Molina Company or subcontractor of either, or (b) such liability results from any unlawful act or omission of Molina**.**

9.2 All Service Provider Personnel shall be deemed expressly authorized by the Service Provider to perform the Services, and all Key Persons shall be deemed expressly authorized by the Service Provider to communicate with Molina regarding the Services**.**

10. INCENTIVES

10.1 The Service Provider shall encourage and incentivize the Service Provider Personnel by appropriate means to maximize:

(a)the quality and efficiency (for the benefit of Molina) with which the Services are delivered; and

(b)Molina's satisfaction with the Services.

10.2 In relation to any incentive scheme or arrangement affecting one or more Key Persons, the Service Provider will give Molina an opportunity to provide input with respect to the performance targets of such Key Persons, and the Service Provider shall consider such input for such targets. The provisions of this Paragraph 10.2 are without prejudice to the generality of Paragraph 10.1 above.

11. EMPLOYEE RECORDS

11.1 The Service Provider shall maintain comprehensive, accurate and up-to-date employee records in relation to the Service Provider Personnel, including training records, roles performed and numbers of Service Provider Personnel and staff structure, which shall, subject to Applicable Laws, be available for inspection by Molina.

11.2 Without limiting Paragraph 11.1 above, the Service Provider shall maintain an up to date list of all Service Provider Personnel working on any Molina premises (for any length of time), listing, where relevant, immigration authorization and work permit status. This list will be provided to Molina within five (5) Business Days of any request.

12. CONTINUITY OF SERVICE PROVIDER PERSONNEL

12.1 The Service Provider shall make all reasonable efforts to maintain continuity in relation to Service Provider Personnel.

12.2 The Service Provider shall provide a quarterly report on the Service Provider Personnel turnover rate. If Molina notifies the Service Provider in writing that the turnover is not in line with Good Industry Practice, the Parties will meet to discuss the impact of the turnover rate on the provision of the Services, and the Service Provider shall, as soon as practicable or, in any event, within ten (10) Business Days, submit to Molina a proposal for reducing the turnover rate, to be discussed and agreed with Molina. Once agreed, the Service Provider will implement the proposal as soon as practicable.

13. ASSIGNMENT OF MOLINA STAFF

13.1 Any Molina employees will at all times remain employees of Molina and will be subject to the management and directions of Molina during the period of assignment.

13.2 Molina shall ensure that its assigned employees do not interfere with, hinder, restrict or prevent the Service Provider from meeting its obligations under the Agreement and that they comply with all Service Provider policies and procedures, as notified from time to time, while on Service Provider premises.

13.3 Prior to the expiry or termination of the Agreement, or the termination or partial termination of any Services (or where any such an event is reasonably likely to occur), the Service Provider will allow Molina or a Successor Supplier to assign an agreed number of their employees to the Service Provider in order to work-shadow the Service Provider Personnel to facilitate such transfer of knowledge and skills in relation to the Services as Molina shall consider to be necessary. Access by Successor Supplier personnel to Service Provider's premises or systems may be conditioned on the Successor Supplier executing a suitable confidentiality agreement.

14. **SERVICE PROVIDER ASSISTANCE**

14.1 At Molina's reasonable request, the Service Provider shall make available to Molina or a Successor Supplier for the continued support of the Services any Service Provider Personnel who do not transfer to Molina or a Successor Supplier for any reason, on a full or part time basis, as appropriate, for an agreed period following termination of the relevant part of the Services (or as otherwise required by Molina) in order to facilitate such transfer of knowledge and skills in relation to providing the Services to Molina's or a Successor Supplier's personnel, as shall be necessary to ensure, to Molina's satisfaction, uninterrupted continuity in the provision of the Services**. The Service Provider shall be entitled to charge for such continued support in accordance with the principles described in Schedule 8 (Termination Assistance and Exit).**

15. **LIABILITY AND INDEMNIFICATION**

15.1 Molina shall assume liability for all claims asserted by or on behalf of any Designated Employees arising out of their employment with Molina prior to their Service Provider Employment Date, including any termination of employment by Molina, and the Service Provider shall assume liability for all claims asserted by any Transitioned Employees arising out of their employment with or termination of employment from the Service Provider**.**

15.2 The Service Provider shall be fully responsible for and, unless prohibited by Applicable Law, shall defend, indemnify, keep indemnified and hold harmless Molina and each Molina Company against (a) all losses arising out of or relating to any claim or liability for any labor, employment or immigration related claim or any claim based on worker status brought against Molina or any Molina Company or any Molina subcontractor arising out of or in connection with any Service Provider Personnel, and (b) all costs, claims and liabilities arising out of or in relation to any of the foregoing (including costs and expenses, reasonable attorneys' fees and expenses), including with respect to any:

(a) alleged violation of federal, state, local, international or other laws or regulations or any common law protecting persons or members of a protected class or category, including without limitation laws or regulations prohibiting discrimination or harassment on the basis of a protected characteristic,

(b) alleged work-related injury, illness or death, except as may be covered by the Service Provider's workers' compensation plans,

(c) claim for payment of wages, or

(d) claim accrued employee pension or welfare benefits, except to the extent such claim arises in connection with a pension or benefit of a Transitioned Employee arising prior to the Service Provider Employment Date.

except to the extent such losses, costs, claims or liability results from any unlawful act or omission of Molina.

15.3 Molina shall indemnify and hold the Service Provider harmless, to the fullest extent permitted by applicable law, against any liability or expenses (including reasonable attorneys' fees and expenses) incurred or suffered by the Service Provider as a consequence of the Service Provider's being made a party or being threatened to be made a party to any action, suit or proceeding commenced by or on behalf of any Designated Employee arising out of or relating

to any act or omission by Molina or any employee or agent of Molina prior to the Effective Date with respect to any:

(a) alleged violation of federal, state, local, international or other laws or regulations or any common law protecting persons or members of a protected class or category, including without limitation laws or regulations prohibiting discrimination or harassment on the basis of a protected characteristic,

(b) alleged work-related injury, illness or death, except as may be covered by Molina's workers' compensation plan,

(c) claim for payment of wages, or

(d) claim for accrued employee pension or welfare benefit obligations;

except to the extent such losses, costs, claims or liability results from any unlawful act or omission of the Service Provider.

15.4 The provisions of this Paragraph 15 shall be in addition to any similar provisions contained in the Agreement and in other sections of this Schedule, and in the event of a conflict, the specific provision shall control over the general provision**.** The Parties shall follow the procedures set forth in the Agreement with respect to any claim for indemnification.

15.5 Each Party's indemnity obligations arising pursuant to this Paragraph 15 shall not be subject to, and shall not accrue against, any limitation of liability set out in the Agreement**.**

SCHEDULE 16

DEPENDENCIES

CONTENTS

1. DEFINITIONS

1.1 Capitalized terms used but not defined in this Schedule shall have the meanings given in Schedule 1 (*Definitions and Interpretation*) of this Agreement.

2. INTRODUCTION

2.1 This Schedule sets out the Molina Responsibilities and the date by which the Service Provider requires them to be completed.

Reference	Molina Responsibility	Due Date
DP1	Molina to provide access to all updated Inventories / CMDB / Asset Database (registers), Design Diagrams, Architecture Diagrams, Runbooks, Operating Manual, Operations policies and standards, Risk and Issues documents, Capacity Reporting methodology and reports, Vulnerability reports, CDC known error database, patching status reports, SLA/KRA/KPI Reporting, Quality check, 3rd Party contact information, 3rd Party contract details, required software tools and existing call / Service Desk ticket monitoring parameters that are required to perform the scope the services. IT inventories across Service Towers are aligned to the RU counts in the pricing sheet. Infosys would validate actual RU counts by the end of transition.	The start date for Transition as set out in the Detailed Transition Plan
DP2	Ensure that it has RTU (right to use) for the Service Provider to use the following Software in connection with the Service Provider's provision of the Services: Tools as set out in Appendix 6-D to Schedule 6.	45 days after the Effective Date
[redacted]	[redacted]	[redacted]
DP4	Molina's existing toll-free numbers will be leveraged for in-scope voice requirements (for general and VIP callers)	Final Go Live Date
[redacted]	[redacted]	[redacted]
DP6	Molina will provision required number of licenses for Service Provider Personnel, in a number subject to Molina's approval, to have access to ServiceNow (Access required - Fulfiller users, Planner Users, Worker User, Software Asset Management, Discovery), in each case as set out in the Detailed Transition Plan	The start date for Transition as set out in the Detailed Transition Plan
DP7	Molina will provide adequate seating facility to Service Provider Personnel onsite at Molina's office locations, in a number subject to Molina's approval, along with a Molina-imaged PC	Final Go Live Date
DP8	Molina will provide the applicable Service Provider Personnel, in a number subject to Molina's approval, access to the applicable Molina offices where such individual performs the Services	The start date for Transition as set out in the Detailed Transition Plan
[redacted]	[redacted]	[redacted]
[redacted]	[redacted]	[redacted]
[redacted]	[redacted]	[redacted]
[redacted]	[redacted]	[redacted]

DP13	• Molina will allow the use of collaboration tools like WebEx to conduct knowledge transfer sessions to transition team working from India delivery centers. All KT and some shadowing sessions will need to be recorded for later review. The recordings will be considered Molina property. • All backlog tickets carried forward from the current team into steady state will be excluded from SLA computation.	
DP14	Molina will assign technical resources to work with Infosys in order to set up remote connectivity with Infosys Bangalore/Chandigarh/Manila Offices.	One week before the start date for Transition as set out in the Detailed Transition Plan
DP15	• Molina to share the resource onboarding pre-requisite/process 10 business days before the start of the transition. • Molina to ensure Infosys designated resources are on-boarded in an expedited manner • Molina to provide VDI/Virtual Desktop/RSA/Remote Login capability to the On boarded resources • Infosys will provide complete list of resource names along with roles and location 10 days in advance to ensure proper onboarding during steady state • Infosys to ensure proper device availability for all resources offshore to meet Molina requirements as defined (Desktop, Laptops, Phones etc.,) before the resources are onboarded	The start date for Transition as set out in the Detailed Transition Plan
DP16	Approve draft transition plan, schedule and SME availability before the transition is commenced.	One week before the start date for Transition as set out in the Detailed Transition Plan

DP17	Share the details of the Molina SME's for each track and confirm the availability as per the KT Plan shared by Infosys. Infosys to share details of Infosys resources who will be participating in the KT sessions one day after contract signature	One week before the start date for Transition as set out in the Detailed Transition Plan
DP18	Molina to share details and ensure that there are adequate Underpinning Contracts/support arrangements with the OEM and Third party vendors (eg Microsoft, Oracle , IBM, ServiceNow, Cisco, etc) where there is an interdependency of services and deliverables.	During Transition Phase
DP19	Timely feedback (As per the transition plan) of Molina on the Infosys queries/deliverables/escalations during the overall Transition phase	During Transition Phase
DP20	Timely approvals during ARC/security council to bring in Infosys recommended tools IIMSS, ESM café and Cyber Gaze into Molina environment Molina will provide required infrastructure for installation of Infosys recommended tools (IIMSS, ESM café and Cyber Gaze) in Dev, QA and Production environment	The start date for Transition as set out in the Detailed Transition Plan
DP21	Provide access to Molina facilities, depots and logistic service providers	The start date for Transition as set out in the Detailed Transition Plan
DP22	Molina will ensure that every dispatch site is made accessible to the named and verified Infosys dispatch engineer along with a site contact	The start date for Transition as set out in the Detailed Transition Plan
DP23	During transition, Molina will be the single point of contact for any communication and will mediate on any issues or conflicts with any third party vendors.	During KT Phase
DP24	Third party contact information will be provided to Infosys team during KT phase. For e.g. WAN Link provider information, Third party asset disposal services etc	During KT Phase
DP25	All in-flight Infra projects will be assessed by Infosys as part of the transition and an approach for assisting in in-flights and taking over support as per the Statement of Work will mutually agree to by Infosys and Molina.	During KT Phase
[redacted]	[redacted]	[redacted]
DP27	Any other dependencies expressly set out in the Agreement as a responsibility of Molina e.g FRMor SOWs.	During Transition and Steady State

DP28	Molina will complete 50% of DR migration to Azure (based on # of VMs, storage and back-up) and the remaining work will be completed by Infosys.	Transition to steady state complete
DP29	• Infosys and Molina to provide organization holiday calendar before transition, to put the transition plan accordingly • Molina to provide vacation calendar/details of the Molina SMEs participating in KT sessions. The details to be provided before the transition commencement date, for transition planning	The start date for Transition as set out in the Detailed Transition Plan
DP30	Molina will assign SME(s) to provide requirements to build Business Service Assurance (BSA) use-cases during IIMSS implementation phase. The SME also will be responsible to get necessary approvals from Molina team (IT/Business) to enable IIMSS team build necessary interfaces, access to required tools and data. Molina will provide the priority of the applications that needs to be covered under BSA. Infosys IIMSS team will build BSA for 4 critical applications.	During steady state
DP31	Molina will provide OEM/third party support for End Of Life (EOL) hardware and software configuration items. This would be finalized during the Transition.	Transition to steady state complete

SCHEDULE 17

MUTUAL ASSISTANCE AND COOPERATION

CONTENTS

1. DEFINITIONS

Capitalized terms used but not defined in this Schedule shall have the meanings given in Schedule 1 (*Definitions and Interpretation*) to this Agreement.

2. INTRODUCTION

2.1 This Schedule deals with the interaction between the Service Provider and the Other Service Providers.

2.2 Nothing in this Schedule relieves the Service Provider of any of its obligations under this Agreement or any Project Work Order, or requires any Other Service Provider to perform any of the Service Provider's obligations under this Agreement or any Project Work Order.

2.3 The Service Provider shall enter into an Agreed Form Non-Disclosure Agreement with the Other Service Providers where requested to do so by Molina to facilitate the performance of its obligations under this Schedule.

3. MUTUAL ASSISTANCE

3.1 The Service Provider shall provide Molina and each Other Service Provider with reasonable cooperation and assistance as requested by each such party.

3.2 In particular, the Service Provider shall provide reasonable cooperation to each Other Service Provider in relation to the following matters (in each case, in so far as the matters set out below are relevant to the Services or any Deliverables, or to Systems, Software or services that relate to the Services or any Deliverables):

(a) change management and in particular any relevant change control process;

(b) problem management;

(c) service desk management;

(d) business continuity, technology refresh and disaster recovery planning;

(e) security of Molina Data, Applications and Systems (including Intellectual Property Rights);

(f) transfer and migration of Molina Data;

(g) data recovery and back–up procedures;

(h) operation and execution of production control and job schedules;

(i) database administration;

(j) configuration management;

(k) any handover processes;

(l) crisis management and escalation management;

(m) project management; and

(n) security of Service Provider Data and Systems (including Intellectual Property Rights therein).

3.3 In addition to the general obligations set out in paragraphs 3.1 and 3.2, the Service Provider shall:

(a) provide all the Other Service Providers with:

(i) the Service Provider's roles and accountabilities for its delivery of the Services, including organization charts, operating models and contact details, in particular to ensure that contact points and interfaces are understood;

(ii) reasonable knowledge transfer about Deliverables that have been developed by the Service Provider, and about the Services and the Systems supported or managed by the Service Provider under this Agreement, including difficulties and issues the Other Service Provider may encounter in working with those Deliverables, Services and Systems;

(iii) such information regarding the operating environment, system constraints and other operating parameters applicable to the Deliverables and the Services and the Systems supported or managed by the Service Provider under this Agreement as a service provider with reasonable technical skills and expertise would find reasonably necessary in order to perform its work; and

(iv) such information as is necessary to assist the Other Service Providers with interoperation of its services with the Deliverables and the Services and the Systems supported or managed by the Service Provider under this Agreement,

(b) provide cooperation, support, information and assistance to the Other Service Providers in a proactive, transparent and open way and in a spirit of trust and mutual confidence;

(c) where possible, work with the Other Service Providers to prepare, and then deliver services according to, a single, consolidated project plan incorporating all the milestones that the Service Provider and each Other Service Provider is required to achieve. If that is not possible, the Service Provider must at a minimum co-ordinate its project plans with those of the Other Service Providers to ensure that they are consistent, that dependencies between the Service Provider and the Other Service Providers are clearly identified and that milestones are aligned between project plans in order to ensure the optimal delivery of the Services and the Other Services to Molina;

(d) communicate appropriately and provide reasonable availability to communicate in order to reach mutual solutions where necessary;

(e) cooperate and assist with acceptance testing and any necessary quality assurance analysis;

(f) make itself available for a reasonable time after each Deliverable has Passed, to respond promptly to questions and problems raised by the Other Service Providers in connection with that Deliverable;

(g) cooperate with the Other Service Providers in identifying planned downtime, and cooperatively plan and communicate planned downtime so as to maximize benefit to Molina and minimize disruption to the services and to Molina's business;

(h) cooperate with the Other Service Providers to co-coordinate the scheduling and conducting of testing and the preparation of test scripts and test cases, and to review test results as applicable;

(i) where Incidents or Problems occur in relation to any Deliverable or any Services or any Systems supported or managed by the Service Provider under this Agreement, cooperate reasonably and in good faith with the Other Service Providers, to the extent that this is required, including:

(i) identifying what it would take to Resolve the Incident or Problem;

(ii) Resolving an Incident or fixing a Problem as expeditiously and cost effectively as possible and waiting until after the resolution of the relevant Incident or Problem to raise (or take any action in relation to) any dispute as to whether which Party or Other Service Provider is responsible, which Party or Other Service Provider should bear the cost of fixing the Incident or Problem or any associated legal issues;

(iii) providing prompt information where necessary; and

(iv) where Incidents or Problems occur that have multiple possible solutions (including Incidents or Problems that could be resolved through action by the Service Provider, whether alone or with the Other Service Providers), cooperate with Molina and/or the Other Service Providers to Resolve the Incident or Problem in the way that causes the least disruption and cost to Molina and complies with recognized industry standards and practices;

(j) promptly identify any inconsistencies, ambiguities or gaps between the Other Service Providers' respective accountabilities and responsibilities which impact (or may impact) upon the delivery of the services, and proactively engage the Other Service Providers to resolve any such inconsistencies, ambiguities or gaps;

(k) adopt standard processes to support end to end service delivery in collaboration with the Other Service Providers. Adoption of standard processes means that:

(i) the Service Provider shall actively participate in the design, development, introduction and operation of end to end service delivery processes, including by participation in multi-supplier governance meetings and working sessions as required; and

(ii) the Service Provider shall provide its own insight and experience as required to support end to end service delivery processes; and

(l) wherever possible, for a given concept adopt such standard terminology as is used already by Molina and the Other Service Providers and where no such standardized terminology exists, use recognized industry standard terminology wherever possible, in preference to terminology that describes the Service Provider's own products, services, tools and processes.

3.4 In addition to the obligations set out in paragraphs 3.1 to 3.3, the Service Provider shall, in relation to each AD Service Provider:

(a) in connection with each Project that relates to a project for the development of an Application:

(i) collaborate with the AD Service Provider in developing an estimate of the work required by the Service Provider to support a Project, based on input from Molina or the AD Service Provider and their requirements of the Service Provider; and

(ii) when reviewing Input Deliverables provided by the AD Service Provider, identify to both Molina and the AD Service Provider any issues that the Service Provider believes arise as a result of information obtained by reviewing the Input Deliverables;

(b) provide the AD Service Provider with reasonable information about the Systems supported or managed by the Service Provider under this Agreement in order to assist the AD Service Provider in developing Applications that will depend upon, be used in conjunction with or otherwise relate to those Systems; and

(c) proactively, and with cooperation and support from Molina in obtaining this information, in accordance with Good Industry Practice, obtain from the AD Service Provider all necessary information about the Applications being developed by the AD Service Provider and any related Third Party Software to be used in conjunction with the Deliverables or with the Applications being developed by the AD Service Provider, and use that information in the provision of the Services.

3.5 In addition to the obligations set out in paragraphs 3.1 to 3.3, the Service Provider shall, in relation to each AM Service Provider, provide such information about the Services and the Systems supported or managed by the Service Provider under this Agreement as the AM Service Provider may require in order to provide maintenance, management and/or operations services in relation to any Application that will depend upon, be used in conjunction with or otherwise relate to the Services or those Systems.

3.6 In addition to the obligations set out in paragraphs 3.1 to 3.3, the Service Provider shall, in relation to each Infrastructure Supplier:

(a) participate in any reasonable discussions requested by the other Infrastructure Supplier regarding the other Infrastructure Supplier's requirements;

(b) where necessary, provide reasonable assistance to the other Infrastructure Supplier in meeting its requirements; and

(c) ensure that the other Infrastructure Supplier is kept up-to-date with such information about the Deliverables and the Services and the Systems supported or managed by the Service Provider under this Agreement as is reasonably required by the Infrastructure Supplier.

3.7 If the Service Provider is not receiving the cooperation that it requires from any Other Service Provider and the lack of cooperation could impact on the Service Provider's ability to perform any of the Services, then the Service Provider shall promptly notify Molina. Molina shall procure

the mutual cooperation and assistance of the Other Service Provider as contemplated by this Agreement.

3.8 A dispute or uncertainty about the financial consequences of, or operational responsibility for an Incident or Problem does not entitle the Service Provider to delay the resolution of that Incident or Problem or to suspend or defer the performance of the Services or any Other Services.

3.9 The Service Provider shall provide to Molina, at Molina's request, information collected by the Service Provider or provided to the Service Provider about Molina's business, operations, Applications and Systems, as reasonably required by Molina, and Molina shall be entitled to share that information with each Other Service Provider for the purpose of that Other Service Provider providing services to the Molina Companies.

3.10 The Service Provider shall comply with the reasonable security and health and safety policies of each Other Service Provider if it is working on the site of that Other Service Provider.

3.11 Molina is responsible for informing the Service Provider of the identity of each Other Service Provider to whom the Service Provider is required to provide cooperation and assistance under this Schedule, including informing the Service Provider of the Applications for which each such AD Service Provider and AM Service Provider is responsible and the Systems for which each such Infrastructure Supplier is responsible.

4. OPERATIONAL LEVEL AGREEMENTS

4.1 In order to facilitate the smooth and effective delivery of services (including the Services) to Molina in a multi-vendor environment, Molina may require the Service Provider to enter into an operational level agreement ("Operational Level Agreement") with any Other Service Provider, as specified by Molina.

4.2 A change to any Operational Level Agreement and the re-allocation of responsibilities within any Operational Level Agreement shall be dealt with entirely between the Service Provider and the relevant Other Service Provider and shall not require an Agreement Change, in accordance with the provisions of this Agreement.

4.3 The principal purpose of each Operational Level Agreement shall be to clarify the relevant responsibilities, accountability, access and dependencies between the Service Provider and the relevant Other Service Provider in respect of services to be provided to Molina.

4.4 A copy of each Operational Level Agreement and each subsequent version thereof shall be published by the Service Provider on the Contract Management Portal promptly after it is signed.

SCHEDULE 18
MOLINA LOCATIONS

CONTENTS

1. **DEFINITIONS**

Capitalized terms used but not defined in this Schedule shall have the meanings given in Schedule 1 (*Definitions and Interpretation*) of this Agreement.

2. **INTRODUCTION**

This Schedule is divided into three sections and sets out the Molina Locations at which Molina operates and where the Service Provider shall provide the Services.

3. **MOLINA LOCATIONS SERVICE MATRIX**

The following table sets out the Molina Locations at which the Services shall be provided:

#	Address Suite	City	State	Postal Code	Type
1.	200 S. Main St	Corona	CA	92882	Office

SCHEDULE 19
AGREED FORM NON-DISCLOSURE AGREEMENT

Non-Disclosure Agreement

CONTENTS

THIS CONFIDENTIALITY AGREEMENT is made on [●]
BETWEEN:

(1) [●], a company registered in [●] (company number [●]), whose registered office is at [●] ("[●]"); and

(2) [●], a company registered in [●] (company number [●]), whose registered office is at [●] ("[●]").

Each of [●] and [●] is referred to in this Confidentiality Agreement as a "**Party**", and they are referred to collectively as the "**Parties**".

INTRODUCTION:

The Parties' mutual objective under this Confidentiality Agreement is to provide protection for confidential information ("**Information**") while maintaining their ability to conduct their respective business activities. Each Party agrees that the following terms apply when the disclosing Party (the "**Discloser**") discloses Information to the other, receiving Party (the "**Recipient**") which relates to or is acquired in consequence of either Party's engagement with ***[Molina Healthcare Entity]*** ("**Molina**") for [●].

For the avoidance of doubt the obligations under this Confidentiality Agreement will apply only with effect from the date of signature hereof.

THE PARTIES AGREE as follows:

1. DISCLOSURE

1.1 Information will be disclosed either:

a(in writing;

b(by delivery of items;

c(by initiation of access to Information, such as may be in a database; or

d(by oral or visual presentation.

1.2 Information should be marked with a restrictive legend of the Discloser. If Information is not marked with such legend or is disclosed orally, the Information will be identified as confidential at the time of disclosure. In any event, Information will be protected by this Confidentiality Agreement if by its nature it would reasonably be considered to be confidential even if it is not marked with a restrictive legend or identified as confidential at the time of disclosure.

2. **OBLIGATIONS**

2.1 The Recipient agrees to:

1(a) use the same care and discretion to avoid disclosure, publication or dissemination of the Discloser's Information as it uses with its own similar information that it does not wish to disclose, publish or disseminate; and

1(b) use the Discloser's Information solely for the purpose for which it was disclosed or otherwise for the benefit of the Discloser.

2.2 The Recipient may disclose Information to:

1(a) its employees who have a need to know, and employees of any legal entity that it controls, controls it, or with which it is under common control, who have a need to know. Control means to own or control, directly or indirectly, over 50% of voting shares;

1(b) employees of Molina who have a need to know and employees of any legal entity that Molina controls, controls Molina, or with which Molina is under common control, who have a need to know. Control means to own or control, directly or indirectly, over 50% of voting shares; and

1(c) any other party with the Discloser's prior written consent.

2.3 Before disclosure to other parties as described in Clause 2.2(c), the Recipient will have a written agreement with the party sufficient to require that party to treat Information in accordance with this Confidentiality Agreement.

2.4 The Recipient may disclose Information to the extent required by law. However, unless prohibited by law, the Recipient will give the Discloser prompt notice to allow the Discloser a reasonable opportunity to obtain a protective order.

2.5 Notwithstanding the Parties' obligations in this Clause 2, the Parties acknowledge that general ideas, concepts and know-how contained in the Discloser's Information may be retained in the unaided memories (meaning that part of the memory that cannot be controlled or influenced by a person) of the Recipient's employees who have had access to the Information in accordance with the terms of this Confidentiality Agreement. The Parties therefore agree that the Recipient shall not be in breach of this Confidentiality Agreement if the Recipient's employees who have had access to such Information use such retained general ideas, concepts and know-how in conducting the Recipient's business activities.

2.6 Nothing contained in Clause 2.5 gives the Recipient the right to disclose, publish or disseminate:

(a) the source of Information;

(b) any financial, statistical or personnel data of the Discloser; or

(c) the business plans of the Discloser.

Furthermore, neither Party shall use any ideas, concepts or know-how if such use involves the reproduction or reconstruction of any Information in such a form as may involve an infringement of the other Party's intellectual property rights.

3. CONFIDENTIALITY PERIOD

Information disclosed under this Confidentiality Agreement will be subject to this Confidentiality Agreement for ten (10) years following the initial date of disclosure.

4. EXCEPTIONS TO OBLIGATIONS

The Recipient may disclose, publish, disseminate and use Information that is:

(a) already in its possession without obligation of confidentiality;

(b) developed independently;

(c) obtained from a source other than the Discloser without obligation of confidentiality;

(d) publicly available when received, or subsequently becomes publicly available through no fault of the Recipient; or

(e) disclosed by the Discloser to another person without obligation of confidentiality.

5. DISCLAIMERS

5.1 The Discloser provides Information without warranties of any kind in favor of the Recipient.

5.2 The Discloser will not be liable to the Recipient for any damages arising out of the use of Information disclosed under this Confidentiality Agreement unless and except to the extent that such damages arise as a direct result of the Discloser providing information it did not have the right to provide.

5.3 Neither this Agreement nor any disclosure of Information made under it grants the Recipient any right or license under any trademark, copyright or patent now or subsequently owned or controlled by the Discloser.

6. GENERAL

6.1 This Agreement does not require either Party to disclose or to receive Information.

6.2 Neither Party may assign, or otherwise transfer, its rights or delegate its duties or obligations under this Confidentiality Agreement without prior written consent. Any attempt to do so is void.

6.3 The receipt of Information under this Confidentiality Agreement will not in any way limit the Recipient from:

(a) providing to others products or services which may be competitive with products or services of the Discloser;

(b) providing products or services to others who compete with the Discloser; or

(c) assigning its employees in any way it may choose.

6.4 The Recipient will comply with all applicable export and import laws and regulations provided that the Discloser has provided the applicable export control classification number so as to enable such compliance.

6.5 Only a written agreement signed by both Parties can modify this Confidentiality Agreement.

6.6 Either Party may terminate this Confidentiality Agreement by providing one month's written notice to the other. Any terms of this Confidentiality Agreement which by their nature extend beyond its termination remain in effect until fulfilled, and apply to respective successors and assignees.

7. ENTIRE AGREEMENT

This Confidentiality Agreement is the complete and exclusive agreement regarding the Parties' disclosures of Information, and replaces any prior oral or written communications between the Parties regarding these disclosures. By signing below for their respective enterprises, each Party agrees to the terms of this Confidentiality Agreement. Once signed, any reproduction of this Confidentiality Agreement made by reliable means (for example, photocopy or facsimile) is considered an original.

8. GOVERNING LAW AND JURISDICTION

This Confidentiality Agreement is governed by, construed in accordance with, and enforced under the substantive Law of the State of New York, without giving any effect to any contrary choice of law or conflict of law provision or rule (whether of the State of New York or any other jurisdiction). Any claim or action brought by a Party in connection with this Confidentiality Agreement, or any part hereof, will be brought in the appropriate federal or state court located in the State of New York, New York County, and the Parties irrevocably consent to the exclusive jurisdiction of such courts. The United Nations Convention on Contracts for the International Sale of Goods and New York conflict of law rules do not apply to this Agreement or its subject matter. In any action relating to this Confidentiality Agreement, each of the Parties irrevocably waives the right to trial by jury.

By signing below, both Parties agree to perform their obligations set out in this Confidentiality Agreement.

Technical Solution Document – Technical Solution Overview and Current Mode of Operations

1 CONTENTS

1 INTRODUCTION

1.1 Overview of the Technical Solution Document (TSD)

Overview:
The Technical Solution Document (TSD), is an artefact detailing the various elements of the technical solution detailed in the entire document.

1.2 Definitions

Following are the definition of the terminologies used this document:

Terminology	Definition
TSD	Technical Solution Document
RFP	Request for Proposal
IIMSS	Infosys Infrastructure Management Solution Suite
ESM Café	Enterprise Service Management Café
DR	Disaster Recovery
BCP	Business Continuity Plan
FTE	Full Time Employee
SLA	Service Level Agreement
CSL	Critical Service Level
KPI	Key Performance Indicator

Table 1. List of Terminologies

2 TECHNICAL SOLUTION OVERVIEW

2.1 Current Mode of Operations

2.1.1 Current Delivery Locations

Infosys understands that Molina office at Long Beach, CA is the primary delivery location, from where the infrastructure services are provided apart from the EUC services where skilled staff are stationed on those locations.

SOW	Service Delivery Location #1	Service Delivery Location #2
Service Desk	Long Beach, CA	Bothell, WA
End User Services	102 Locations across 22 states of US & Puerto Rico with dedicated and dispatch services	
Infrastructure Services	NOC – Long Beach, CA	
Security Services	Long Beach, CA	

Table 2. Delivery Locations

The Molina's platform engineering area is divided into seven capability areas. A combined internal and contractor workforce of approximately 317 FTEs, are catering to these capability areas.

There are two Main Datacenter New Mexico (NM) and Co-Lo (Digital Reality) in Texas. Where prior services as Primary DC and later as Cold DR DC with exceptions to Telephony/Call Center services (with capacity limitations).

2.1.3 Current Processes & Performance Standards

Current Processes

Process	Process Description
Business Continuity	This deals with the Business Continuity, in case, if there is any incident where normal business functions delivery is affected or at risk. The definition and policy with the handling procedure are understood and can be accommodated in the overall Infosys BCP solution.
Data Center SOPs	The supplied SOP's (201-211) are in general part of the best practices wherever Infosys deliver managed services operations. They largely deals with the material movement, DC access, Disk wipe procedure, DC walkthrough etc.
Enterprise Infrastructure Services Policies	As stated above, similarly for the infrastructure services policies are also part of the Infosys delivered managed services. We build upon the existing policies and keep the policies reviewed to ensure the adherence to the agreement shared with our customers.
HIPAA	Infosys is aware of the HIPAA requirement while working in the Health care sector. We understand the sensitivity of the health information and care that needs to be taken to ensure that they are only available for the authorized eyes only. Infosys agrees to abide by the terms set forth Molina's BAA.
Incident	The document provided gives quite good understanding of the Incident prioritization and thereafter Molina specific process to handle the designated Major Incident. Infosys may review this and mutually agree the changes so that it is best suitable for all stages of the engagement.
Service Management Policies	All the ITSM policies/Sourcing/SR/Security are not revised for more than 2 years. However, we believe these are derived out of the best practices and can be followed without review.
Additional Policies	We have gone through the additional policy documents shared namely, SOX, Document retention and destruction, VIP Support policy, Physical DC etc. are found to be in line with our understanding too. We will comply with these as well.

Table 10. Current Process

Current Performance Standards

We have analyzed the following documents such as Schedule 7 (Governance) and Appendix 6-A (Service Level Matrix) to understand the status of the Molina IT operations prior to the Effective Date. However, no service levels values, benchmarks were provided.

Infosys believes the Service levels and Governance both needs to be in place for progressive delivery of the performance standards. We are delighted to see that Molina review the service levels and performance against them on regular basis. It is also noted that the regular reports are reviewed and discussed by the respective governance group's viz., Operational Review Board, Multi-Supplier Operational Committee, IT Core Leadership Team and Executive Steering Committee. Moreover, the optimization also becomes the part of the discussion to ensure the continuous improvements are done over and above what is being reported and monitored.

Below are the Molina expected Infrastructure SLA's*:

Type	Service Level Name	Description / Overview
Critical Service Level (CSL)	Database Cluster Availability	Measures the percentage availability of Database Clusters (with redundancy within the site) in Data Centers
	Response Time (Priority 1)	Measures the percentage of incidents where the incident was responded to within the appropriate amount of time.
	Response Time (Priority 2)	Measures the percentage of incidents where the incident was responded to within the appropriate amount of time.
	Resolution Time (Priority 1)	Measures the percentage of incidents where the incident was resolved within the appropriate amount of time.
	Resolution Time (Priority 2)	Measures the percentage of incidents where the incident was resolved within the appropriate amount of time.
	Installation of Emergency Software or Patches	Percentage of Emergency Software or Patches for which the process was started immediately, and installed on Infrastructure within the designated timeframe.
	Network Infrastructure Availability	Measures the percentage availability of Production Network Infrastructure

Type	Service Level Name	Description / Overview
Key Performance Indicator (KPI)	Backup Storage Device Availability	Measures the percentage availability of the backup storage devices
	Stand-Alone Device Availability	Measures the aggregate availability of the in-scope stand-alone devices
	Communication Time	Measures the percentage of incidents where the incident was communicated with business impact and technical description of what is being investigated, to appropriate business partners and technical teams within the appropriate amount of time.
	Response Time (Priority 3)	Measures the percentage of incidents where the incident was responded to within the appropriate amount of time.
	Response Time (Priority 4)	Measures the percentage of incidents where the incident was responded to within the appropriate amount of time.
	Resolution Time (Priority 3)	Measures the percentage of incidents where the incident was resolved within the appropriate amount of time.
	Resolution Time (Priority 4)	Measures the percentage of incidents where the incident was resolved within the appropriate amount of time.
	Root Cause Analysis Time	Measures the percentage of Priority 1 and 2 incidents that receive a final root cause analysis within the designated timeframe. Pending responses from third party suppliers are acceptable
	Batch Job Commencement	Measures the percentage of batch jobs failures where the failure was responded to (following SOP guidelines) within the designated timeframe.
	Successful Completion of Backup and Recovery	Measures the percentage of successfully completed backup and recovery jobs.
	Infrastructure Capacity Provisioning	Measure of Capacity provisioning requests completed within the time allotted
	Installation of Approved Software or Patches	Percentage of Approved Software or Patches installed on Infrastructure within the time allotted (as per Molina patching and installation scheduling requirements)
	Contract Management	Measures the percentage of Contract Change Order, Invoices Correct and On-Time (calculated on number of lines).
	Reporting	Measures the Supplier's ability to deliver reports to Molina according to the planned and/or scheduled cadence
	Documentation	Completion of all scheduled documentation revisions and drafts as defined by Molina
	Security Review	Measures the performance of all security reviews within specified timeframes
	Capacity Reporting	Measures the number of CPU Capacity Events or Storage Capacity Events not reported within one business day.
	File Recovery / Restoration	Measure of restoration requests where the restore is initiated is that are completed with the allotted time
	Account Provisioning Error Rates	Percentage of Account Provisioning (including de-Provisioning) requests processed incorrectly to total number of requests by type
	Customer Satisfaction	Measures the percentage of Infrastructure stakeholders (as defined by Molina) who are satisfied with the Services (e.g., BAU, Continuous Improvement and Innovation).

Table 11. Current Performance Standards

*All SLA's are subject to due diligence

Infosys understands that Molina is already following these above mentioned service levels. However, Infosys would further like to understand the current adherence to these service levels achieved.

2.1.4.1 Purpose and Scope

The primary purpose of these tools is to support various technology areas, mentioned in the latest tools data provided in '20181029_Attachment D _Tools and Technology_updates.xlsx'

Infosys is expected to support all these tools and agrees for the same. However, the license(s) of these tools remains with Molina, and Infosys need to support Molina, with periodic license updates to avoid any license renewal issues, from the time perspective.

Also, Molina has a strong preference for non-proprietary, commercially available tools but open for discussion and inclusion of any such tools, if it brings transformational value and thereby helps optimize the operations further.

2.1.4.2 PE/Telecom/Network Security

Platform Engineering (PE)

PE is part of Molina's Infrastructure landscape construct, among the five core groups. The PE is further categorized into seven capability areas, namely:

- Solution Engineering
- Core Engineering
- IT Security and Identity Management
- Operations
- DB & Analytics Platform

- Quality Management
- Service and Relationship Management

The PE tools support, the following technology/process areas:

- Asset Management
- Collaboration
- Configuration Management
- Data Management
- Endpoint Management
- Hypervisor
- Operations Monitoring/Metrics
- QA
- Security – Access, Detection and Operations
- Service Management
- Storage and Backup
- Source Control Management

The details of the tools, as provided by Molina is already provided in the beginning of this section – Section 2.1.4

Telecom Tools

[redacted]

2.1.5 Current Challenges and Focus Areas (Please add other topics as appropriate)

2.1.5.1 Expansive and Highly Disparate Infrastructure Landscape

Based on our analysis of Molina's Infrastructure landscape, for the same work areas, multiple technologies, tools, multiple different versions of software(s) and hardware. [redacted].

The details around all these things have already been provided in various sections of this document.

2.1.5.2 Disaster Recovery/Business Continuity (DR/BC)

Infosys understands the following challenges and Infosys recommendations:

[redacted]

2.1.5.3 End-of-Life Devices Increasing Risk, Support Complexity, and Upkeep Costs

Infosys have performed analysis on the Molina infrastructure estate, as per the inventory provided, and following are the details by technology tracks where and how much devices have already reached end-of-life or reaching end of life by [redacted].

2.1.6 Other Information on Current State

Not applicable

2.2 Lift, Shift and Enhance for Core Infrastructure

2.2.1 Service Delivery Model, Processes, and Procedures

The graphic below visualized the governance committees which the Parties are to implement and participate in accordance with the Agreement, including Schedule 7 (*Governance*).

These governance models are defined in accordance to Molina's ask and agreed through 'Schedule 7' and 'Appendices 7-A and 7-B' documents related to Governance.

In addition to the robust governance structure, we also have a comprehensive delivery structure at multiple layers and with right SMEs and management coverage at onsite and offshore for seamless delivery of services.

This integrated managed services model is based on ITIL V3 framework, bringing in synergies between various teams, and **driving efficiencies, quality and productivity improvements and ownership of services**. While the teams will be organized by areas of expertise and core delivery, they will act as **one cohesive team for Molina Healthcare** acting in unison to deliver on time, on budget and on specifications.

The underlying core culture of the team will be to work in an entrepreneurial fashion that will support Molina's business requirements. **Integrated Service Delivery** model through its various levers will provide Molina Healthcare increased synergies and seamless operations across geographies, and portfolios that will ultimately lead to **superior service and reduced TCO**.

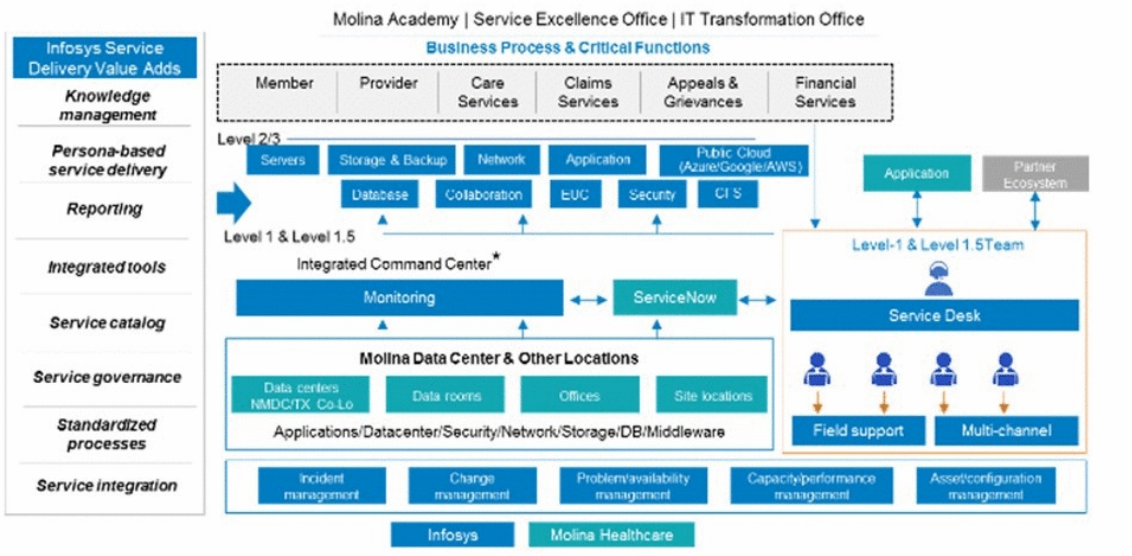

Figure 2.Steady State Integrated Service Delivery Model

Service Delivery Model for Infrastructure support to Molina Healthcare, is defined and aligned to the governance model given above, and caters to with the information required at all levels in the forms of reports and dashboards.

Below view, provide more details specific to infrastructure operations as part of the integrated service delivery model.

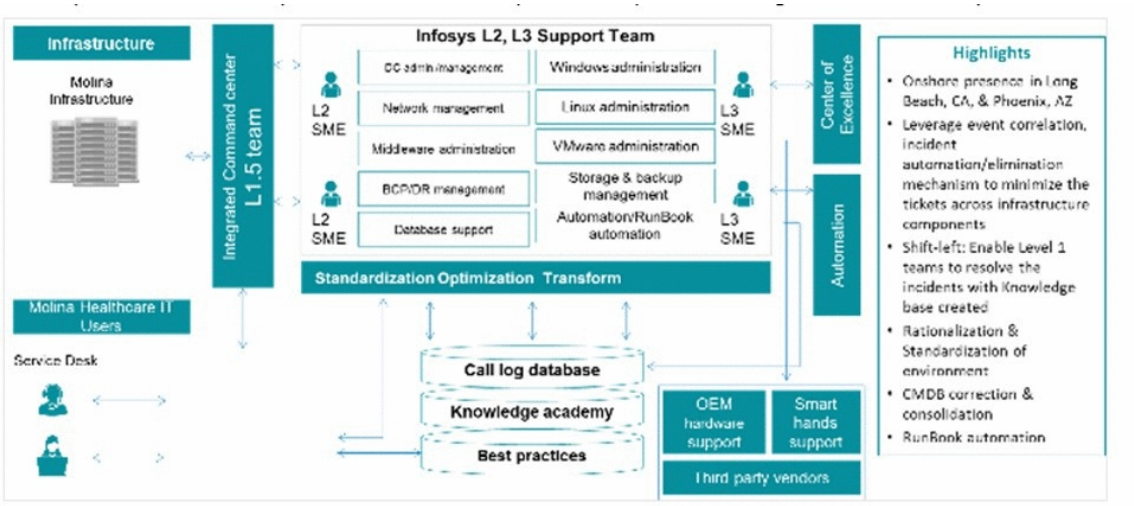

Figure 3.Infrastructure Operations

Following are the components of the proposed service model:

L1 - Global Service Desk:

Service Desk is the first point of contact for any IT support needs for Molina Healthcare round the clock - 24x7x365. Molina users can contact service desk via all current prevailing modes of communication viz., Web, Email, Phone etc. This layer provides an 'integrated' service for all IT needs, applications and infrastructure support.

Service Desk will be recording all the issues/requests coming to them in Molina's Service Now instance, and thus enables end users to track progress on their tickets directly in the ticketing tool.

L1.5 – Integrated Command Center Operations:

Command center will be completely responsible for monitoring the entire IT estate function that includes job scheduling, Monitoring, Managing. Additionally, playing the role of Major Incident Management Team. Command Center will also supplement the other IT operations team with performance and capacity management inputs.

This layer is entrusted with the responsibility of keeping a vigilant eye on Molina's infrastructure estate, leveraging existing monitoring tools like Splunk, SCOM, SolarWinds, etc. Infosys proposes to bring in Infosys Infrastructure Management Solution Suite (IIMSS), which would act as single pane of glass for this command center team, to monitor Molina's entire infrastructure estate, and take relevant actions for immediate resolution of tickets and alerts themselves or escalate to the L2/L3 teams to resolve any alert/issue that needs specific technical skills and detailed system knowledge.

Job management will also be a significant part of their day to day operations. Infosys will leverage existing Molina's job scheduling tool, Autosys for defining, scheduling and monitoring jobs on Unix/Windows systems. The job scheduling is done using Unix - Cron (or windows - AT) which is time based, it will fire the job based on the clock. We understand that all the batch sequences are already defined in Molina. Team will ensure the running of the jobs in order, thereafter ensure the completion and regular reporting. All the failures will be raised with the respective technical teams for further investigation. The standard actions will be part of the operating manual of the team to ensure the steps are taken before escalating further.

While Integrated Command Center will be based out of offshore and US locations, a part of the Security Operations Center (SOC) will also be based out of onsite/onshore location in USA. All the security logs data need to be located in the USA.

IIMSS is driven by the policy engine and inputs from estate monitoring tools to orchestrate, suppress, resolve and alert any incident proactively. It also offers best suggestions and course of actions by grouping the similar issues/incidents of past. IIMSS enables IT administrators, Infrastructure Operations team and other users of it to centrally manage the entire physical and virtual infrastructure, platforms and applications from a single interface.

Command Center team will be recording all such incidents in Molina's Service Now instance, and would be working round the clock – 24X7X365.

Figure 4.Integrated Command Center

Major Incident Manager (MIM) role **will be part of Command Center. MIM's are staffed 24 x 7 and will be deployed both at Onsite – Long Beach, CA and Offshore – India delivery locations Level 2 – Operations and Administration & Level 3 – Engineering, Optimization, and Design**

This layer is the core technical team comprising of L2 and L3 technical SMEs, who would resolve incident/service request for all ticket categories raised by Molina users or by Infosys Command Center team for alerts and issues.

Dedicated Level 2 operations team will have experienced technicians who will ensure day-to-day operation of the in-scope infrastructure components by responding to and resolving escalated incidents, executing change activities, performing proactive trend analysis, implementing routine changes and participating in transformational projects. This team will also be responsible for identifying, developing, and implementing scripts and knowledge base articles to enable the Command Center team to increase their first-pass resolution rate.

Dedicated Level 3 technical team for each tower will use their experience and expertise to design new solutions to solve Molina Healthcare's technical problems. They will provide technical leadership to projects within the environment and mentor their Level 2 counterparts.

Performance management and ongoing capacity planning/optimization will also be performed by this team. Finally, they will serve as a "backstop" for troubleshooting and problem resolution for the most complex issues.

Infrastructure team will comprise of Infosys technical support professionals both at onsite and offshore for the following technologies:

- Servers
- Storage and Backup
- Networks & Telephony
- Database
- Middleware
- Collaboration Services
- End User Computing and
- Infrastructure Security
- Tools
- Azure Cloud

L2/L3 teams will be using Molina's Service Now instances for working on the issues, and documenting the progress updates and resolution provided to the issue.

In addition, Infosys proposes a Core-Flex model at Level 2, where the core layer will be the staff deployed full time as per Molina's needs as elaborated in the proposal and flex layer is a readily deployable pool of trained Infosys staff that can be deployed anytime based on increase in demand from Molina Healthcare. The flex layer staff will be graduated from the proposed Molina academy, before being on-boarded.

Infosys will have hands and feet services for the Molina Datacenter locations. The Infosys hands and feet team will act in close collaboration with Infosys Global Service Desk (L1) team, and provide services, as shown in the Service Delivery Model above.

Delivery enablement functions

- **Service Delivery Office (SDO)**

The Infosys Service Delivery office will play the key role of working closely with the various Molina Healthcare managers and Infosys teams to understand their needs and define engagement structures that can deliver the most optimal value to Molina. The Service Delivery Office will be responsible for directing the overall engagement to align with business and IT goals associated with delivering services to Molina. The Service Delivery office will comprise of delivery managers and program managers who will play the oversight role and brings the necessary support needed for day-to-day execution teams.

- Service Level Management Office (SLMO)

Service Level Management office will monitor and implements process to measure various metrics governing the efficiency and efficacy of services provided. Service delivery and service level management office will be responsible for reporting health of service towers.

- **Service Excellence Office (SEO)**

As part of the integrated service delivery model, Infosys will set up a dedicated Service Excellence Office (SEO) for Molina, constituting dedicated team of experts with proven ITIL and infrastructure experience, interfacing with multiple service delivery groups within Infosys and other partners. The ultimate goal of the SEO is to provide operational excellence and drive continuous improvement, by focusing on the following areas:

- **Resolution Optimization**: Analyze incident data and identify candidate and to drive shift left of issue resolution on a continuous basis
- **Quality Oversight and Defect Management**: SEO focuses on reporting, analysis and action plans for service defects, such as miss-assigned incident records, incorrect diagnosis, and excessive resolution times resulting in reduced MTTR.
- **Service Management Optimization**: Variance and exception oriented reporting and analysis that helps to guide problem management efforts, as well as oversight of ticket coding accuracy and quality to maintain accurate information for data analysis and mining.
- **Cross Functional operational governance:** Drive process adoption and adherence across infrastructure towers by performing ongoing review of operational team's adherence to the cross functional service processes based on quality audits and process maturity results.
- **"Voice of the Customer":** A program designed around survey responses, and direct Molina feedback, to bring continual visibility and emphasis to the customer experience.
- **Industry Best-Practice Guidance:** Recommend industry best-practice standards and create a roadmap for implementation and/or achievement.
- **Multi-Dimensional Metric Methodology aligned with Molina's Business Goals:** Develop Value Map Control Plan, including a value map that establishes and rationalizes all measurements against a clearly stated Business Goal, and accompanying Critical Success Factors.
- **Molina Academy:**
- Infosys has devoted a special focus on Learning and Knowledge Management since its inception and has built an integrated approach to manage its knowledge capital. This structured KM approach focusing on improving the 'learnability' and continuous knowledge improvement will help improve the quality of the deliverables, meet and exceed Service Levels and enable Molina Healthcare stay ahead of the technology curve.

All Molina specific documents (policies, procedures, standards, configurations etc.,) that form the part of the onboarding documentation under Molina academy will be located within Molina networks and should reside at the locations (SharePoint, Shared Drives, etc.,) as per Molina policy. These documents will be reviewed and approved by Molina before they become part of Molina Academy.

While Molina Academy will store documents specific to Molina on Molina SharePoint, the Lex platform of Infosys will be accessible over Infosys and public internet as per Infosys current setup. Trainings on Lex are for upskilling and reskilling of the Infosys resources in technology, process and domain areas. These trainings are not Molina specific and do not contain Molina information.

- Other enablers of the delivery model:

One of the key differentiators of the operating model are the Infosys enabler teams that will be engaged on demand for any Molina Healthcare specific priority issues and Transformation initiatives.

Training & Certification: Infosys mandates every employee to undergo one domain, one technical and one process certification each year. There are several certifications created by Infosys Research team on infrastructure platforms, Azure, AWS, ITIL and ITSM processes, fund accounting, security lending and other financial services domain specific modules. This will ensure that the Infosys Molina Healthcare project team acquires skills across technologies, domains, and are able to scale up for any new requirements in the future.

Strategic Delivery Risk Management: Infosys will provide a delivery risk management professional to ensure early identification and management of risks across Molina Healthcare engagements through our proven Delivery Risk Management framework.

2.2.1.1 Service Delivery Process

Infosys understands that service delivery for Molina Healthcare engagement is key to success of the program, and is divided into following two aspects, for better understanding:

- Delivery model
- Key elements of service delivery process

Infosys will leverage Global Delivery Model (GDM) for Molina Healthcare engagement, with dedicated onsite, near-shore and offshore resources, focusing on infrastructure services that includes server administration and management, storage services (including remote storage services), network administration, database administration and management, end user services, infrastructure tools administration, infrastructure security services and aligned service management services.

Onsite service location will be Molina Healthcare office at Long Beach, California, near-shore location will be Infosys delivery center at Arizona and offshore delivery location will be Bengaluru/Chandigarh, India. Service Desk will operate from Infosys facilities at Manila, Philippines and Bengaluru, India.

Infosys Global Delivery Model will enable -

- Stricter compliance adherence for ‘qualified server environment’
- Infrastructure team integrated with Intelligent Command Center to provide effective support
- Standardized processes for Incident, Problem, and Change management processes
- Implement Infosys’s best practices from knowledge gained in executing similar projects
- Orchestration and automation bringing in operational improvements
- Infrastructure optimization recommendations and exercise reducing technical debt

Infosys, following the ITIL V3 guidelines will work towards delivering service(s) following a staged process, where certain activities may run in parallel as well.

Figure 5.Staged Service Delivery Process

Infosys Service Delivery Process will ensure following four critical elements of Service Delivery are always in play and help build more matured Service Delivery Ecosystem every day as the engagement runs with the baseline being set right from proposal stage (current stage) to day 1 of steady state.

Service Culture built on elements of leadership governance, direction and overall vision for this engagement. Here the governance mechanism, and the direction set during these governance sessions will play a critical role.

Employee Engagement of Infosys resources supporting Molina, where the resources have to undergo mandatory trainings from proposed Molina Academy before being on-boarded. Infosys resources will be trained for the technological changes, as appropriate during the engagement, relevant to the engagement. In addition, employees will be motivated through some fun-filled activities time to time, helping them enhance their team building and teamwork culture.

Service Quality, where Infosys in alignment to the proposed service delivery model will leverage strategies, service management processes and zero distance ideas, bringing in better quality of deliverables, adherence to agreed service levels with Molina and drive continuous service improvement process. This will help Molina realize their vision and objectives and serve as the firm foundation of partnership between Infosys and Molina Healthcare.

Enhanced End User Experience, where Infosys teams will work towards enhancing Molina end user experience, by understanding their issues, pain points for the services in scope, and will work towards providing the resolution/services for the same, in the best possible time and working towards adhering to the agreed service levels. Also, Infosys leadership will share the updates gained through joint governance sessions with Molina leadership time to time, and help design strategies for further improvement.

- **Major Incident Management Process:**

Major Incident Management is a critical part of service operations and Infosys is committed to ensure robust and proven process to handle major incidents, adhering to the agreed service levels, and addressing them with quality with minimal disruption to business and keeping relevant stakeholders informed through the resolution process.

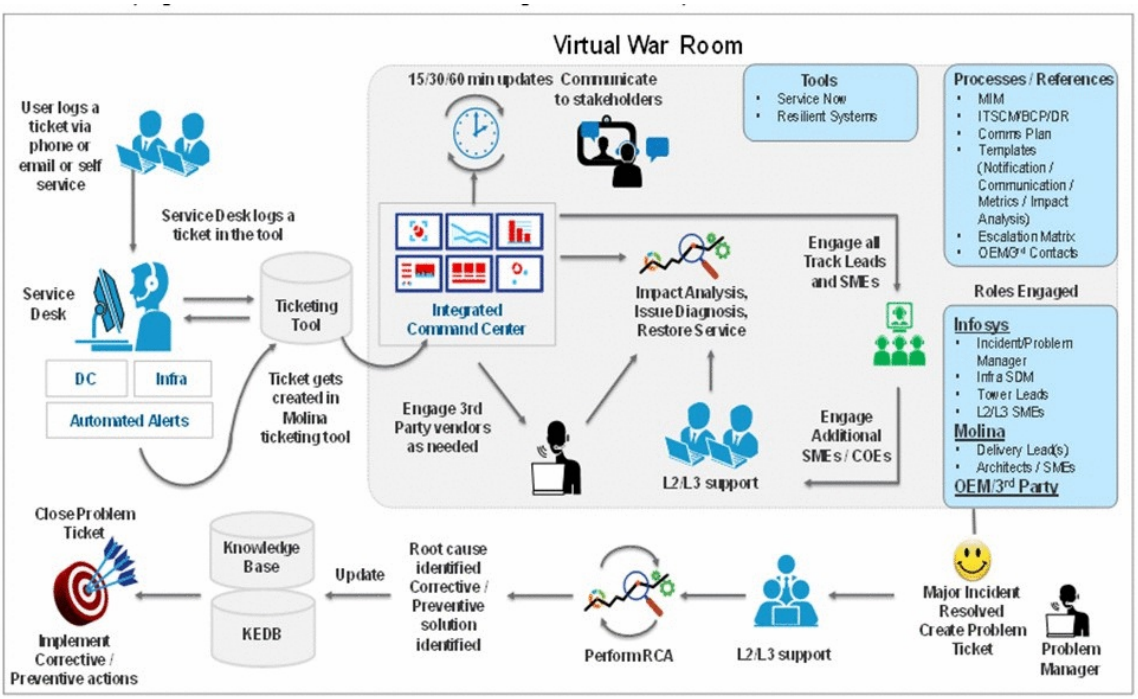

Figure 6.Major Incident Management Process

2.2.1.2 IMACD for Data Center Hardware

Infosys has extensive experience of providing IMACD services for data centers owned and managed by Infosys as well as owned by the client and managed by Infosys.

For IMACD services to Molina Data Centers, Infosys will have dedicated team in NMDC and Texas DC.

IMACD are of two types i.e. Hard IMACD and Soft IMACD. Hard IMACD services will be provided by local support resource (DC Partner or Infosys partner dispatch resource) whereas Infosys Remote Support Teams (Desk side/Service Desk /Infra) will resolve soft IMAC services remotely. Below is a typical checklist, which will be followed for equipment provisioning.

- Ensure availability of all equipment components and related peripherals with no visible sign of damage
- Assemble/Install hardware components and complete racking activities
- Attach all related components/peripherals and complete POST test
- Access equipment remotely via remote board (e.g. iLO, DRAC, etc) and start configuration
- Install and configure equipment as per its build plan/standard build process
- Test and confirm equipment accessibility and manageability
- Check and ensure all errors are clear. Perform a sanity check to ensure equipment has been built as per standard requirement
- Confirm equipment installations/readiness with the customer/stakeholder Teams
- Take sign-off from Stakeholders for equipment readiness
- Assist customer / stakeholder on equipment administration related requests (creating access, analyzing error logs, performance, etc.), Check and ensure no errors on the equipment.
- Take confirmation from stakeholder team on install completion and any test report

- Configure the equipment for its data backup and monitoring
- Make sure Equipment's are monitored as per requirement
- Take signoff from Stakeholders Team
- Update the Equipment Operations related documents and Update CMDB with equipment configuration details
- Handover equipment and all relevant documents to support team
- Ensure sign off and update stakeholders

Some common IMACD requests are as follows:

- Installation of New device
- Disposal of EOL or EOS devices
- Movement/change of device
- Installation of software's and applications which are not possible for remote installations

Infosys team will leverage the current technology, best practices to provide all in-scope services including IMACDs work through fully trained engineers. However, Infosys attention shall always be on reducing IMAC's by reducing dispatches and routing calls through / from Remote resolutions for a quick and permanent fix.

IMACD involves below activities:

- Develop and manage IMAC-D process, forms and checklist contained in the Operations Manual that will be used for each IMAC-D transaction
- Install, change or move devices upon request. Depending on the move, additional charges may apply
- Redeploy equipment when possible for efficient use according to the deployment criteria
- Preparation for disposal of any equipment that shall not be redeployed according to Molina policies.
- Maintain documentation for the delivery to include operational checklists for pre-installation, installation and post installation.

2.2.1.3 Hardware Break-Fix for Data Center Hardware

Following diagrams depicts how service recovery scenario due to 'server failure at datacenter (dispatch from OEM vendor assuming asset is under warranty)' would look like in an integrated manner:

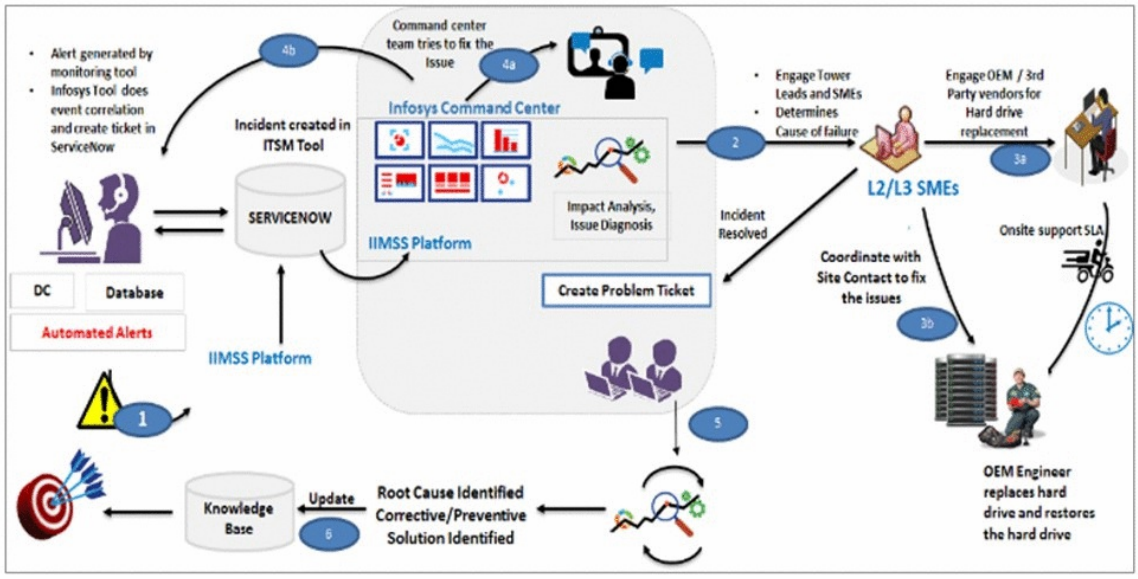

Figure 7.Service Recovery Process Example

The integrated command centre will be the central point for any pro-active incident resolution, which are identified from the monitoring systems. Command centre will cut across all our services for Molina. Command Centre team members will take the first attempts to resolve all pro-active incidents and will reach out / route the ticket to the respective L2/ L3 SME from applications and/or infrastructure teams for issues resolution (wherever necessary to be escalated).

In the scenario, once the root cause is identified as Asset part failure, the team will work with OEM / Third party vendor to replace the part if they are in warranty and extended support. In case the system is not in warranty, the team will try to bring the system up with spares and scavenge from the old systems.

2.2.1.4 Patch Management and Software Distribution

In order to ensure that the Molina environment is safeguard from known vulnerabilities, Infosys will ensure that appropriate patches received from various OEMs on the periodic basis are implemented following a thorough patch management process. Infosys will review existing patch management policy for datacenter infrastructure and end user devices and make the customization as per industry best practice.

The patch management process at a high level would remain the same for both the entities. However, the patch management for end user devices is described in the respective section (2.3.3.2). Infosys would further like to understand from Molina the frequency and prioritization of the patch assessment and implementation guidelines. Infosys will consider Molina patching policy as mandate and will follow the periodization matrix over the OEM default patch categorization.

The high-level patch management process is as follows:

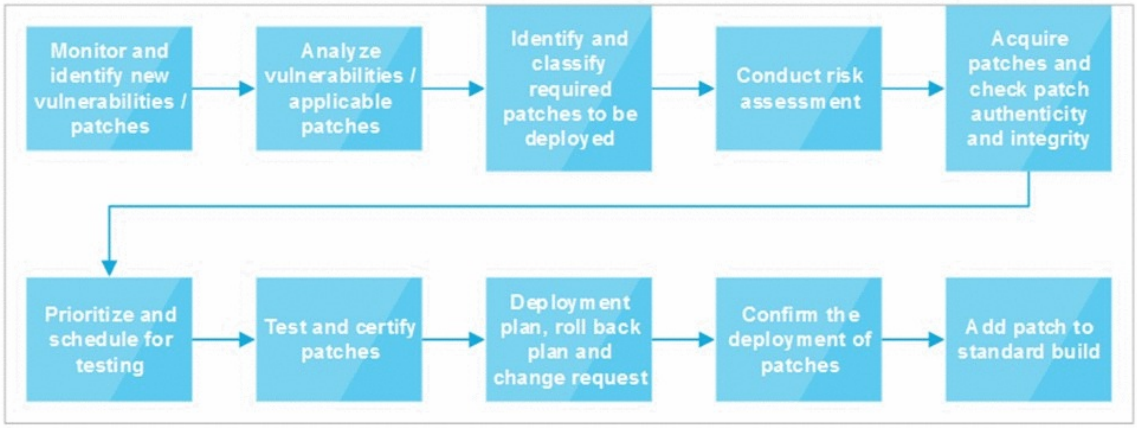

Figure 8.Patch Management Process

More details of the patch management process are as follows:

Vulnerability and patch identification and evaluation – In this stage, Infosys team will:

- Monitor and identify new vulnerabilities
- Analyze those identified vulnerabilities
- Identify and classify required patches
- Communicate patch requirements and
- Raise the patching request

Monitor and identify new vulnerabilities

- Infosys will monitor trusted sources for information on new vulnerabilities
- The patch update advisory will be checked on planned intervals for new patches

- Periodically (monthly) scan for the vulnerabilities
- Vulnerabilities are tracked and assessed for applicability to Molina's environment. As part of assurance, it will be validated if the vulnerabilities applicable to Molina are tracked and reported

[redacted]

[redacted]	[redacted]	[redacted]
[redacted]	[redacted]	[redacted]
	[redacted]	[redacted]
[redacted]	[redacted]	[redacted]
	[redacted]	[redacted]
	[redacted]	[redacted]
	[redacted]	[redacted]
	[redacted]	[redacted]
	[redacted]	[redacted]
[redacted]	[redacted]	[redacted]
	[redacted]	[redacted]
	[redacted]	[redacted]

Table 20. [redacted]

- Analyze vulnerabilities
  - Infosys team will analyse vulnerabilities related to Molina systems/third party software's
  - Classification of a patch will specify a severity rating (in a range from "Low" to 'Critical'), which in turn will give rise to a timescale for implementation
  - Each asset is categorized based on the criticality, specified by the respective stakeholder's/application owner. It will be used to prioritize the assets and deployment of patches based on the risk assessment
  - Classification of a patch will be determined from analysis of associated vulnerabilities; in particular, the assessed risk to the systems / third party software(s). A risk assessment will allow Infosys to assess the severity of a vulnerability/patch.
  - Following factors are considered while conducting the risk assessment:
    - High value or high exposure assets impacted: increased risk
    - Assets historically attacked are impacted: increased risk
    - Mitigating controls already in place, or soon to be in place for all affected assets: decreased risk
    - Low risk of exposure for impacted assets: decreased risk
  - Time frame for implementation - Patch deployment status is tracked and reported as part of monthly vulnerability and patch management report
    - Patching for critical internet facing applications will be done in 7 days of patch release by OEM
    - Critical Patches rated as Critical / High will be done within 30 days
    - Non Critical Patches rated as Medium / Low will be done within 90 days
- Communicate patch requirements / patch reports

Here Infosys team will communicate the requirements in the form of patching request to the different application teams, that may be Infosys application teams or from other service providers. This will help the respective teams to analyze on the patching details and other essential information beforehand.

- Patch testing

In this process, the Infosys patch management team will be testing the identified patch(es) in the testing environment, and publish success or failure report. Upon successful testing, the patch is confirmed, ready for deployment. This will be done, in accordance to the defined patch test plan, which would have – testing scope, testing schedule and detailed test scripts.

- Resolve test issues

This is an optional step, and invoked in case any issue(s) is/are encountered during patch testing activity.

- Define patch deployment and roll back plan

The final patch deployment plan is drafted and appended in the change request. It is further, discussed and approved for deployment in all environments. Also, as a precautionary step, and as a good practice, a roll back plan is produced and appended to the same change request, to be leveraged in case, the patching activity is to be abandoned and environments are to be kept in the original state.

- Deploy patch

Post approval of the change request, the patch is applied, first in the lower environments and further into the production environment.

- Patch reporting

Post conclusion of the above activity, a report is published to respective stakeholders and a communication is sent to all stakeholders, about the completion of the activity, following Molina's communication guidelines. Infosys will ensure periodic communication is done to all impacted Molina, Infosys and other service provider stakeholders about the activity time to time from the initiation of the patching activity, to deployment to completion of the activity.

Emergency Patch Management (Zero day patches):

At times, depending on the type and extent of vulnerability and need of the hour, Infosys will go for an exception process and will follow the emergency patch management process. This will be done when the OEMs advice for the same, or the internal vulnerability assessment advices for the same.

In the overall patching exercise, Infosys will like to understand Molina's policy and guidelines, as mentioned in the beginning, as well as would like to have their involvement so that informed decisions are jointly taken and executed.

Following the completion of the Transition, Service Provider will use commercially reasonable efforts to reduce the backlog of unapplied patches using available capacity of business as usual Service Provider Personnel. Molina and Service Provider may implement a chargeable Project to accelerate the application of patches and reduce the backlog. The risks associated with vulnerabilities created by the backlog of unapplied patches remains with Molina. Service Provider will be excused from its obligations to meet Service Levels to the extent impacted by backlog of unapplied patches.

[redacted]

2.2.1.5 End-Point Protection

In order to ensure, and apart from the regular patching process, as described in the above section 2.2.1.5, end point protection is another critical action item and area of activity to safeguard the Molina environment.

In order to ensure that Molina estate is secured from the end-point protection perspective, following activities are performed:

- All images will be updated with the latest Symantec SEP client version once the same is rolled out/deployed in the environment. Molina will provide list of other core infra (compute) end point protection agents to be included as part of compute images by Infosys.
- Updated client version is pushed to the endpoints/servers
- Infosys team will ensure that all the machines in the Molina Healthcare estate are updated with the latest AV updates
- Non-compliant Molina machines will be reported to track for appropriate actions, in order to make them compliant in the near future, thereby minimize the risk
- Endpoint testing will also be made part of the DR test exercise for the Molina environment

- License utilization will also be monitored
- As part of the daily health checks, anti-virus versions update will be checked and reported
- All external certificate renewals will be managed by Molina while Infosys will manage the installations and distribution.

2.2.2 Delivery Locations (Onshore, Nearshore, Offshore) and Associated Services

2.2.2.1 Service Delivery Location Details by Towers (Address, Photos, and Security Details)

Infosys shall perform the Services from the Approved Service Delivery Locations, in accordance with the Agreement.

Security at Infosys:

Infosys has very comprehensive security policies that covers all employees, contractors, facilities etc. We have a corporate security architecture group, which governs overall security infrastructure across all our Development centers. Following are Information Security Details at Infosys facilities across locations.

Infosys Information Security Policy framework is aligned and certified to ISO 27001:2013 Information Security Standard. The information security framework is supported by a set of supplementary policies, procedures & standards aimed at achieving the enterprise level information security objectives. The Information Security Policy provides an overview of the below areas, details of which are provided below:

- Policy Framework
- Awareness and people security
- Risk Management
- Third-Party Risk Management
- Business security
- Physical and environmental security
- Endpoint security
- Network security
- Infrastructure security
- Database security
- Platform security
- Application Security
- Cloud security
- Security Architecture
- Malware protection
- Data Protection
- Security Configuration
- Security Testing
- Emerging tech security
- System development
- Security monitoring

2.2.2.2 [redacted]

2.2.2.3 Alignment to Molina Contractual Requirements

Infosys is fully aligned to contractual requirements in Exhibit 2-A. The redlined document has been submitted complying with Molina contractual requirements as deemed applicable.

2.2.3 Staffing, Hours of Operation, and On-Demand Sourcing

2.2.3.1 Staffing Breakdown by Tower and Skillset Details

Infosys operating model will be enabled by an operations team based across 3 locations – Long Beach, CA (USA), Bengaluru/Chandigarh (India), Manila (Philippines), and Bengaluru (India) to help meet the coverage and resiliency requirements. This will ensure adequate service continuity for all the business operations with a cohesive workforce, making time zone differences transparent to business users.

Following will be the Skillsets, capabilities and experience of the resources working across various core infrastructure towers. Level of expertise and years of experience will vary based on the role played by the resources:

SOW	Skill set / Responsibilities
Process Management	• Requirements Gathering (for addition/modification/retirement of services) • Measurement and reporting • Change Management and Training • Continuous service improvement Activities • Maintenance of the data accuracy in the Service Catalog through rigorous change control • Collect process KPIs and Report to all stakeholders periodically • Communicate Service Catalog changes to all stakeholders • Conduct end user surveys and collect feedback to identify improvement areas • Communicate Service Catalog changes to all stakeholders • Coordinate service review meetings and document corrective actions • Understand areas of improvements, create service improvement plans, analyze the impact of implementing the improvement • Raise RFCs for the identified improvement areas • Educate and Train all the stakeholders on the improvements made to the Service Catalog • Improve Business users' awareness of the services being provided through Catalog • Regular Maturity Assessment of ITIL processes • Co-ordination & Management of Processes • Service Integration (Multi-Vendor Environment)
Middleware	• Creating new services • Configuration of http settings and monitoring on web server • Create & configure Domain\cluster • Configuring a Web Server to Serve Content • Server configuration parameters administration • Configuring Request Processing for a Web Server • Setting up environment variable • Higher End Administration tasks • Configure LDAP interfaces • Create & Configure Work Managers • Configuring Web Server Security • Software install/re-install, patching and zone build • Installing a proxy server and configuring it with tomcat • Implementation of clustering and load balancing • Performance management & tuning
Database	• Database backup/restore, maintenance plans – strategies and tools – Full/Diff/Incremental/log/archive-log backups - litespeed, RMAN etc. • Experience in access control, security in DB area • Database monitoring, issue identification and troubleshooting • Querying Databases – joins, procedures along with knowledge of system objects – functions, views etc. • High Availability – Mirroring, replication, Log shipping, Failover cluster, Always On – experience in set-up, maintenance and support • Experience in Performance monitoring and improvement techniques, tools etc. • Capacity/License management • Performance tuning using EWR reports Query tuning • Experience in DR • Incident management/ problem management / Change management

SOW	Skill set / Responsibilities
Compute	• Windows Server (2008/2012/2016) administration • Windows servers and Cluster patching • Linux/Unix administration • Linux/Windows servers patching and hardening • Shell scripting and automation • Troubleshooting Incident and problems with windows/unix servers • Active directory administration and Group policy administration • Performing various troubleshooting and maintenance operations in Windows Server environments • VM Servers build & rebuild deploying the New VM from the Template and Cloning an existing • Hypervisor (Vmware/Vsphere/Hyper-V/etc.) administration • Redhat/Microsoft certified • Vendor coordination for hardware issues
Storage	• Knowledge of storage architecture and administration • Provisioning/DE provisioning LUNs • NAS file share creation/administration • Configuration of NAS and SAN replication • Brocade/Cisco San switch administration / Server to Storage Zoning and De-zoning • Unix scripting/automation • Troubleshooting multi pathing/Performance issues • Migration between arrays • Upgrade and patching • Coordination with vendor for Hardware issues • License/Capacity management • Fabric upgrades • Configure and manage local and remote replication • Participation in DR drills • Backup and Restore architecture • Virtual and agent based backup concepts and technologies • Hands-on backup tools (EMC Networker, Symantec Net backup, IBM TSM) • Configuration and implementation of Backup server, Backup devices. • Administering backup and restore jobs. • Knowledge on reporting tool such as DPA • Scripting for automation • Troubleshooting backup failures • Upgrade software versions/agents • Vendor coordination for break fix

SOW	Skill set / Responsibilities
Network (Data & Voice)	• Understanding of LAN & WAN Technologies • Understanding of Switching protocols, STP / RSTP / VTP • Experience on Cisco Switches–2960, 3650, 3750 , 3850 , 4500, 6500, 9300 , 9400, 9500 • Experience on Meraki Switches – MS120, MS210, MS225, MS250, MS350, MS410, MS425 • Understanding of Meraki Dashboard management, Troubleshooting utilities • Experience on Nexus 2K / 5K / 7K / 9K • Understanding on technologies like – VPC / VDC / VSS / Layer 3 Switching • Routing protocols – OSPF / BGP / IGRP / EIGRP. • CCNA R&S / CCNP certified • Basic understanding of VoIP, VoIP protocols like SIP, MGCP, MEGACO, H323 etc. • Experience on Cisco IPT products – CUCM, UCCX , Unity , Arc , CME, SRST , Cisco IP phones • Basic understanding of DHCP / DNS / AD to support Cisco Voice services • Configuration like, hunt group / pickup group / extension mobility / shared line config / Bulk tool operations / Auto registration / Time based call routing • Call flow designing and scripting for UCCX • CCNA Collaboration / CCNP Collaboration certified

Table 21. Skillset vs Responsibility

2.2.3.2 [redacted]

Figure 9.[redacted]

[redacted]

2.2.3.3 Infra On-Demand Sourcing Model (By Tower)

Infosys understands demand for infrastructure will be dynamic and varies based on business needs. Infosys has experience in handling such requirements based on our exposure to large number of clients. Below are different options, which will be leveraged, based on the requirement type and duration of the need(s)

Sourcing for the infra towers will be done using below options, as applicable:

- In Stock/Spare Capacity
- Lease/Loan
- Public Cloud (Azure)
- Outright purchase/procure

The decision on the approach will be based on following considerations:

Strategic considerations	Operational considerations
▪ Time to Market ▪ Technology Roadmap ▪ Scalability & Availability considerations ▪ Duration	▪ Ease of use/adoptability ▪ Role/Functions alignment ▪ Power/space constraints

Table 22. On-demand Sourcing model

In this sourcing model, Infosys will be working with Molina procurement/sourcing team for any procurement taking into consideration following aspects:

• Analyze Spend • Procure to Pay • Manage Suppliers	• Manage Contracts • Track Pipeline • Source

2.2.4 Day 1 and Year 1 Transformation (e.g., Migration, Consolidation, Layout)

2.2.4.1 Detailed Explanation of Transformation as Relates to Infrastructure (by Tower/Area)

See Schedule 4 to the Agreement for matters relating to transformation.

2.2.5 Flex Models (e.g., Scale Up, Scale Down, Migrate)

2.2.5.1 Solution Deep Dive

Infosys plans to provide the support for Molina's Infrastructure in a Global Delivery Model composed of resources at two locations: Onsite at Molina's office in Long Beach and Infosys Offshore DC (Bengaluru / Chandigarh).

Infosys also will have a Service Excellence Office as part of our delivery model, which will oversee the excellence in delivery including Continuous Service Improvement, Automations, ITIL Process Excellence and Service Transformation Strategies. This team will work with Molina on demand planning, re-skilling of resources.

2.2.5.2 Resource Supporting this Model

The support operations team is segregated by the functions and level of services as below:

- **Integrated Command Center team**: Infosys proposes a dedicated team for Molina Healthcare to provide integrated proactive monitoring across all functional towers and this team will be enabled by "Command Center" console of Infosys' IIMSS platform. Alerts through various monitoring tools will be integrated into the event management tool with auto-ticketing into proposed ITSM Suite. This team will be based out of Bengaluru/Chandigarh office
- **L2 / L3 teams**: This will be a tower / area wise team for each technology area (server administration and management, storage services, network administration, database administration and management, end user services, infrastructure tools administration, infrastructure security services and aligned service management services). This team comprises of [redacted] of resources skilled in L2 work and [redacted] skilled in L3 work which will primarily focus on managing operational changes.
- Infosys, through its COEs along with the operational teams, will work with Molina's architecture team to define future roadmaps for Molina's infrastructure, plan for transformation projects, create projects / resource plans and work on approvals from Molina management along with their architecture group.
- **Flex Team**: In addition to the code team above, for any new projects or transformations, Infosys will ensure an on-time ramp-up using a tested demand management process. These resources will ramp-up for any agreed project / transformation and will be there until the project completion.

Below is a view of the ramp-up process:

[redacted]

Figure 10.Resourcing Model

2.2.5.3 Required Commitment, Restrictions, and Limitations

In this section, we assume Molina wants to understand the requirements / commitments, which Infosys expects from Molina for this model to work.

Below are the things we expect from Molina for this model:

- Provide a 90-day rolling window for any large ramp-up (e.g. [redacted] resources) needed for onboarding resources for new projects / transformations. Infosys will define a process for this capacity management and work with Molina to identify demands on time.
- For individual ramp-ups for any niche work, Infosys expects a lead-time of [redacted] weeks for onsite and [redacted] weeks for offshore resource onboarding and [redacted] weeks for niche skill based out of offshore.
- In any outcome-based project executed by Infosys, Infosys will take complete ownership of onboarding the resources with the right skills. For any staff augmentation resources onboarding, Molina can conduct interviews and Infosys will define the process for this with Molina

2.2.5.4 [redacted]

Figure 11.[redacted]

2.3 Lift, Shift and Enhance for End-User Services (EUS)

End user support services as a function will collaborate closely with the Integrated Service Desk to deliver best-in-class services. Infosys views end user support as a holistic function wherein success is based on driving incident resolution and it is driven by Customer Experience. There are two levels of remote resolution. This is a major enabler to reducing cost and increasing customer satisfaction. Only if an end-user issue cannot be resolved remotely and there is need for physical access to the devices, as in the case of hardware break-fix or hard IMAC, the ticket will be assigned to desk-side support team (dedicated or dispatch). From that point on the desk-side support team will be responsible for resolving the issue and updating the ticket status. Our focus is to keep Dispatch at a minimum and drive high resolution through a combination of Self-service, Service Desk and Dedicated team members and proactive monitoring. The service desk is still the custodian of the ticket till it has been closed.

End-User Services section covers the below tracks:

- IT Service Desk
- Deskside & Walk up Support
- Desktop Engineering
- End user device management & Remote support

Operation Solution Highlights

- Tailored Delivery Model - 24x7 Support English, Support delivered from Manila, Philippines and Bengaluru (India)
- Walk-up services with dedicated technicians based out of 9 premium locations including [redacted]. [redacted] of the user base will be supported through [redacted] dedicated FTEs through walk-up desks, [redacted] of the user base will be supported through dispatch.
- Persona based Service delivery with focus on enhancing customer satisfaction through industry best practices and proven methodologies
- Differentiated support to end users based on their personas identified through ESM Café
- Real time service level monitoring and reporting (Emilia)
- Improved accountability through end-to-end ownership of tickets thereby reducing total support costs through a single point of contact, FCR-focused service desk
- Shift-left (deskilling) to drive higher resolution at the service desk
- Continuous Improvement through six sigma and process improvement initiatives
- Effective problem management and RCA based approach to identify and eliminate recurring issues that drive ticket volumes
- Knowledge Management

End User Service enhancement themes

Infosys will be working towards enhancing the End-user computing user experience. Some of key themes Infosys will be implementing to enhance end-user experience is given below

- Enhanced Persona based delivery through ESM Café.
- Enhancing Process/ Agent Efficiencies
- Extreme Knowledge Management Improvisation
- Self-Heal & Automated problem resolution for service desk and End user computing tracks
- Trend and Performance Analysis to enhance operational efficiencies using Infosys tools Emilia and IIMSS
- Standardization of service support in desktop engineering and smart hands support.

[redacted]

Figure 15. [redacted]

[redacted]

Continuous Improvement initiatives:

Infosys envisions Molina's L1 Service Desk landscape to evolve from its current state to a best in class industry standard which has a Next Gen contact center architecture, provides converged service management, aligned to business services and is based on one platform. The initiatives which will drive this transformation are:

- **Reduction in number of end user contacts:**
  - Using tools such as chat bots to automate and eliminate simple, standard or repetitive application and infrastructure ticket categories.
  - Using Service Now service catalog based auto-routing to assign tickets directly to the correct L2/ L3 resolver groups without Service Desk intervention
  - Promote self-service through ChatBot and by creation of FAQs for frequently occurring easily resolvable issues and proving users access to clear and concise "How to" knowledge artifacts
  - Keep Customers Informed (KCI) on the ticket progress through proactive status alerts through their preferred channel to reduce the status update related contacts, duplicate tickets.

- **Enhanced process efficiency and agent performance:**
  - Reduced handle times and handoffs through efficiency improvement projects based on Six Sigma and Lean methodologies
  - Dedicated quality analysts supporting action planning for improved customer experience
  - Improve agent utilization by analyzing aux code usage and staffing pattern intervention
  - Ongoing training programs targeted at improving agent' soft skills and customer handling skills

- **Shift Left of resolution to Service Desk:**
  - Conduct top trend analysis to identify issues which the Service Desk can resolve on First Contact
  - Conduct resolution reviews with the Level 2 teams and other resolver groups to identify opportunities and train Service Desk on recurring complex issues
  - Increase knowledge base contribution through regular updates to the knowledge base with new artefacts

- **Trend and performance analysis:**
  - Trend and Root Cause Analysis to be performed for top call drivers and all high severity incidents and repetitive lower severity incidents; Statistical tools and methods like Pareto, Fishbone, etc. to be used
  - Six Sigma trained resource to perform Root Cause Analysis (RCA) on customer complaints and escalations, and deep dive analysis for key metrics
  - Perform deep dive analysis for key metric trends

- **Continuous SLAs improvements:**

Infosys will implement a continuous improvement process for systemically improving service level targets annually. At the start of each service year, Infosys and Molina will jointly review the SLA performance/ trends for the past year and agree upon any changes in SLA parameters and measures. The initial plan will be to bring current Molina service levels to Industry Standards.

2.3.1.2.2 End-to-End Ownership of Incidents

Service Desk will act as the Single Point of Contact, and will own the ticket resolution End-to-End irrespective of the resolver group to which the ticket is escalated; the Service Desk will follow up and close the ticket in the committed time frame.

- User creates a ticket for a request/incident that is received at L1 Service Desk
- L1 Service Desk determines involvement of other Resolver Group(s); these could be Infosys, Molina or other third party Vendors groups
- Same ticket is transferred to the correct Resolver Group
- L1 Service Desk continuously monitors SLA's and keeps Molina User updated on the request status; RCA is updated in knowledge database

- Ticket is closed by the resolver and notification goes to the Service Desk and Molina end user
- Service Desk confirms resolution with Molina End User and closes the ticket.

Described below is the Level 1 end to end ticket ownership model.

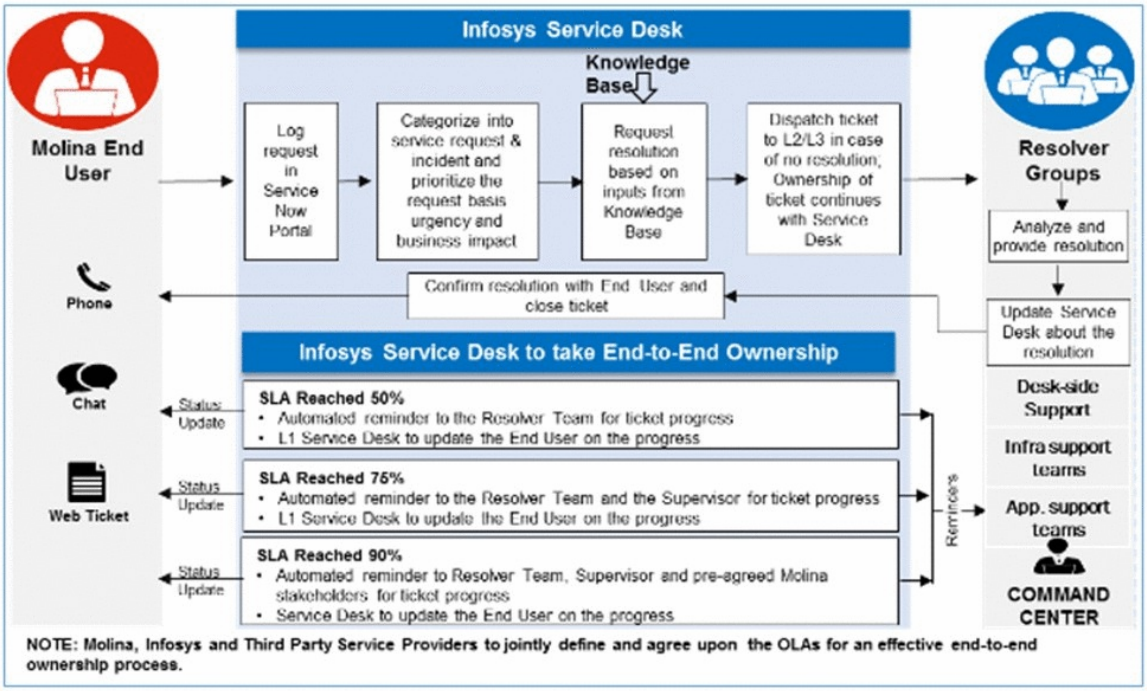

Figure 16. L1 End-to-end Ticket Flow

Apart from improving the resolution rate, ticket ownership will also drive enhanced end user satisfaction by keeping the users proactively informed regarding the status of their request/ ticket until closure.

2.3.1.2.3 Knowledge Management

We will implement a strong Knowledge Management process along with a comprehensive Knowledge Base for improved resolution at Service Desk.

- Have a knowledge management team comprising of Team Leads, SMEs, Quality Analysts and Service Desk Analysts who will take complete ownership of updating the knowledge articles
- Have a dedicated SME act as a Knowledge Manager who will be responsible for coordinating new entries or updates to current content to ensure the accuracy and quality of knowledge base entries, validate the knowledge relevance for retirement/archiving purposes and finally to publish and retire all reviewed knowledge entries
- Implement audit process for measuring effectiveness of the Knowledge Base to ensure accuracy and effectiveness
- Knowledge sharing sessions for all unique incidents and major issues
- Rewards and recognition for Service Desk team to contribute to knowledge base
- Implement a robust training program for the Service Desk Analyst to enable them to be effective and contribute towards continuous process improvement; training framework snapshot below:

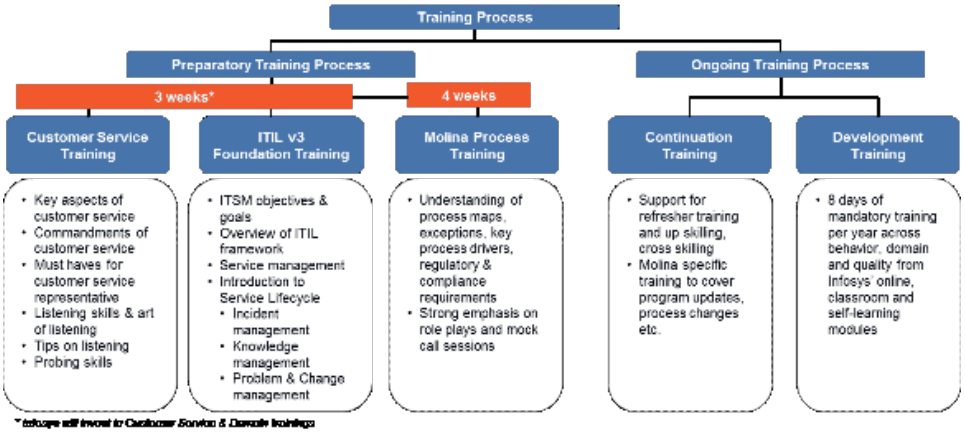

Figure 17. Training Process

The key areas to consider for efficient Knowledge Management include:

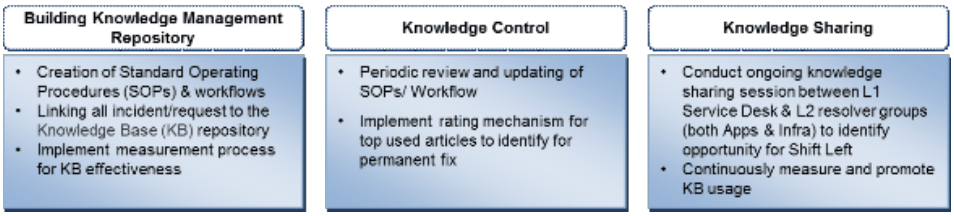

Figure 18.Key areas of Efficient KM

Infosys team will perform the following steps w.r.t Knowledge Management prior to go-live and then in an on-going manner.

- Knowledge Entry Review:
  - Accuracy and quality review which includes review of all published articles, articles currently in the Molina's Knowledge Database and all articles pending for retirement
  - This process also includes the review of archived/retired knowledge that can be used as baseline for knowledge entries

Process Owner: Infosys SMEs / Knowledge Manager

- Knowledge Entry Creation/Update Process
  - Identify gaps in Knowledge Base and create relevant knowledge articles; the knowledge articles will either be leveraged from Infosys existing centralized repository or created in coordination with Molina SME if it is client specific
  - Submit the content to Molina SMEs for review
  - Upon successful review, Infosys SME will create the knowledge article following the KM template and submit the entry to the knowledge manager for final review and feedback prior to publishing the knowledge entry

Process Owner: Infosys SMEs/ Knowledge Manager & Molina SMEs

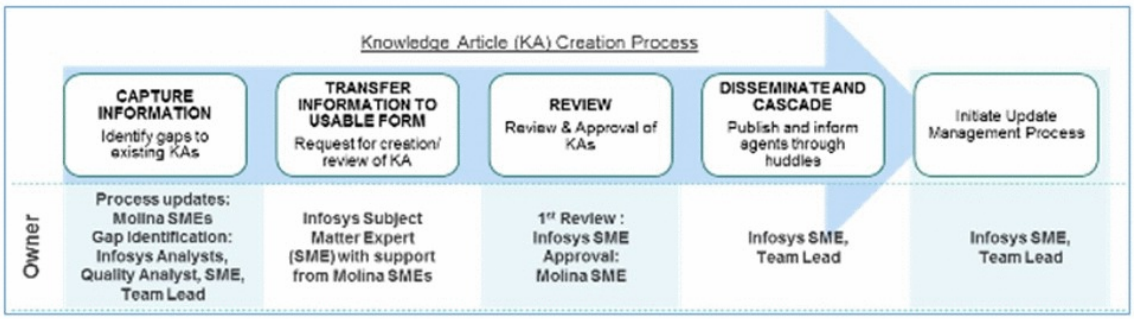

Figure 19. KA creation Process

- Knowledge Entry Publishing: Upon successful review of knowledge entries, the Knowledge Manager will publish the entry and will cascade the new update/new entry to the team. The Service Now Knowledge Management module provides workflow and approval process which can be switched on to enable quality checks before posting. The created article goes for review to Molina Knowledge Manager/ other leads for approvals though a defined workflow before the expiry in Service Now. Additional features like commenting, rating, tagging ensures that the knowledge is usable.

Process Owner: Infosys Knowledge Manager

- Knowledge Entry Retirement
  - Where it has been determined that the Knowledge Article can be retired, the Knowledge Management Team will archive the article from the Knowledge Management System and remove any links to the article from other Knowledge Articles
  - Team will publish the retirement of the Knowledge Article to all relevant stakeholders (details of Knowledge Articles retired from use are communicated via Monthly Reporting)
  - Knowledge entries will not contain an expiration date as the review and analysis of all knowledge entries will be done periodically; Identification of new processes will be the trigger of knowledge entry retirement

Process Owner: Infosys Knowledge Manager

We would require the following support from Molina to ensure the accuracy and effectiveness of the KB:

- Provide a Knowledge Manager who will validate and confirm the accuracy of the knowledge provided
- Review and provide inputs to update the knowledge article
- Make available to team, any updates/changes to the processes, new products and services added to the scope
- Communicate new offerings and changes to the scope to ensure readiness of the team to create and update the knowledge base

2.3.1.2.4 [redacted]

Figure 20. [redacted]

[redacted]

2.3.1.2.5 Escalation Management

A well-defined escalation procedure is must for seamless delivery of services. At the same time, care will be taken that each interaction needs to be maintained at the right levels of the organization hierarchy ensuring transparency to higher levels. Escalation matrix including timeframe for resolution will be jointly defined with Molina based on the governance structure. We will also work with Molina to facilitate transfer of Molina user(s) to appropriate Molina Supervisor or equivalent as applicable by incorporating the same into the escalation path.

A typical escalation path is illustrated in the table below:

Level	Unresolved Period
Team Manager	8 hours
Operations Manager	16 hours
Service Delivery Lead/ Client Partner	Over 48 hours

2.3.1.2.6 Monitoring and Reporting

We will utilize a combination of dedicated staffing such as Incident Manager, Real-Time/ MIS Analysts and tools such as Emilia for monitoring and reporting support.

Monitoring:

We will utilize Emilia, a robotic tool that mimics the role of both Incident Manager and RTA, and is responsible for managing the life cycle of all incidents and service request. It can be integrated with call center monitoring system and Service Now ITSM tool to monitor the critical environment for Service Desk.

The robot enables operations team to focus on their complex deliverables rather than queue and ticket monitoring/incident management tasks listed below. Its primary objective is to prevent incidents and service request to breach and minimize impact to business.

Real Time Analyst	Incident Management/Ticket Management
• Monitors Phone and Chat metric to ensure Service Levels are met • Reminds agents of callback to ensures alignment to user commitment; Alerts generated via callout, chat or desktop • It monitors real time status of agents such as agents on incorrect auxiliary code, long handle time, long after call work, agents about to go on break or lunch, etc., • It monitors calls and chat wait times • It monitors avail time and advises operations if they can go on team huddles, coaching, breaks • Runs and sends customized reports to operations for better governance • Quickly analyzes top call/chat drivers and inform operations	• Randomly assigns cases to available agent to avoid cherry picking and also alerts Team Leads of the assignment • Alerts operations if there are high priority tickets • Alerts operations of tickets about to breach (breach time can be customizable based on operations Service Levels and criteria) • Sends ticket reports to operations • Can implement Smart Ticket assignments • Can monitor alerts based on operations criteria

Table 23. Monitoring & Reporting

Reporting:

Infosys has the capability to report all aspects of operations. Besides standard Service Desk operations report related to staffed hours, quality scores, AHT, service levels, abandonment rate etc., we can provide customized reports as well, at a frequency as desired by Molina. The format and frequency of reports will be customized to Molina's requirements and will clearly depict a comparison of actual performance against the contracted service levels.

Infosys generates performance reports at three levels:

#	Level	Report Type
1	Agent Level	• Transaction Quality • AHT / Productivity • Escalations • Staffed Hours
2	Process Level	• Process quality • Average Speed of Answer (ASA) percentage • Abandoned Call Rate percentage • First Contact Resolution percentage • Same Day Resolution percentage • Ticket Resolution time percentage • At First Level resolution percentage • Mean Time to Resolve (MTTR) • Response Time (P1, P2, P3, P4) • Resolution Time (P1, P2, P3, P4) • Backlog (P1, P2, P3, P4) • Case Chase/ Follow-up/ Update (P1, P2, P3, P4) • Customer satisfaction score • Sentiment Analysis • Customer complaints • Production hours • Process AHT • Attrition • Capacity plans/ Seat utilization calibration
3	Organization Level	• Service levels • Hierarchical Escalation • Attrition Reports • C-SAT Reports

These reports are referenced during performance feedback sessions and will be utilized to map improvements and set targets.

2.3.1.2.7 Service Desk Channels

Infosys will support the all the technology channels (inbound, outbound) as provided in the Agreement (including each SoW and this document) to communicate with Molina users including phone calls, chats, web-based tickets. The service desk will use Molina's VDI for connecting to applications at Molina so that there is no data being moved.

2.3.1.2.10 Other Workflows

<Not Applicable>

2.3.1.3 IMACD for End-User Devices

Infosys's IMACD delivery model is categorized into two key stages for every IMACD request i.e. IMACD Pre-Execution and IMACD Execution. The pre-execution phase ensures sufficient checks and balances are in place to execute the IMACD, while the execution phase addresses user issues during the IMACD and ensures proper closure of the request.

Key activities performed as part of IMACDs will be:

- Provide and oversee, as appropriate, all installations, de-installations, cascades, moves, adds and Changes for all EUC Equipment, Software, and related Services at designated Customer Sites.
- Coordinate, plan, and schedule IMACDs with all affected IT functions (whether the function is included within the Services provided by Infosys, as a Customer-retained function, or a Third Party); and
- Coordinate all internal and external functions and activities to achieve high-quality execution of the IMACD, to meet Service Levels, and to minimize any operational interruption or disturbance to Molina

IMAC Pre-Execution

IMACD pre-execution will have the activities that will be done by Infosys to enable IMACD execution. The below are the key activities that will be performed by Infosys as part of IMACD Pre-Execution

- Document the IMACD process and get client approval
- Obtain list of Molina personnel authorized to approve these requests
- Work with authorized personnel to resolve any issues identified with the IMACD
- Co-ordinate with all third parties required to perform the IMACD and ensure availability
- Confirm that all hardware and software necessary to perform IMACD is available in the site

- Confirm the installation and de-installation procedures
- Test the device used for IMACD
- Co-ordinate with all stakeholders and schedule the IMACD.

IMAC Execution

- Infosys asset manager assigns a replacement device to the end user
- The pre-configured device with user specific image and core applications is checked, tested and will be provisioned from site stock room.
- If the site has no stock room (site having <10 users), the request for shipment of device from nearest site will be raised.
- The Device gets shipped to the user site.
- In case of sites with dedicated FTEs:
  - The dedicated support engineer will schedule a time with the user in order to perform the IMACD
- In case of dispatch sites:
  - Remote support team will work with user and schedule IMACD
  - Remote support team will arrange a dispatch engineer for the site on the same date or at best the next day based on user availability.
  - Dispatch engineer will travel to the site and perform IMACD

Following are the detailed activities that will be carried out during the IMACD execution. These are broken up across install, move, add and change.

Install

- Connecting a new system unit (e.g. notebook/desktop, network printer)
- Installing and connecting of directly attached peripheral devices that are a component of the standard configuration
- Testing of the system unit to verify the hardware and software functionality with a network connection, provided that the network infrastructure is available.
- Test additional hardware peripherals to verify proper functionality with the main system unit
- User briefing on new device
- Recovery of user data from one or more servers onto the new system within defined parameters
- Ship the old device back to OEM if required with Molina 3rd party contract.

Move

- Brief functional testing of the system.
- Removal of the system unit including directly attached peripheral devices.
- Packing (if necessary) of the equipment for dispatch/transportation from the user's current place of work to the user's destination place of work (within a location or between two locations).
- Unpacking (if necessary) and connecting the system unit and the directly attached peripheral devices.
- Taking back of packing materials and their conveyance within the Molina location to a place designated by Molina
- Testing of the system unit to verify the functionality of the hardware and software with a network connection, providing the network infrastructure is available.

Hardware Add

- Unpacking (if necessary) of new equipment
- Installation of an external device (external modem, hard disks, printers, scanners, monitors) and the associated device drivers.

Software Add

- Installation of an application or a software suite with integrated application (e.g. bespoke apps) from the approved supported software catalogue.
- Only software published to the user's SCCM profile shall be supported

Hardware Change

- Modification of an existing system unit by a hardware upgrade (adding of functionality) or hardware downgrade (removal of functionality), including the drivers, if necessary.
- Testing the system unit to ensure the functionality of the hardware and software and accessing of the network.

Software Change

- Modification of an existing software configuration according to the specified documents/work instructions, such as the creation of network icons.
- Testing the system unit to ensure the functionality of the hardware and software and accessing of the network.

Remove

- Removal of the system unit including the directly attached peripheral devices, packing and conveyance of these devices to a store specified by Molina with having the option of picking up /scrapping.
- Erasing of the data on the hard disk by predefined processes in the predetermined store.

Build

- Receive, inspect, and store inventory at central and regional warehouse
- Load, configure, and test standard software on to the workstation based on the standard “gold master” image via SCCM
- Configure network parameters, User ID and password settings, network printer defaults, and other similar base
- Add user specific software as specified
- Test completed workstations, laptops, or other devices included in the standard hardware list
- Apply asset tags and perform initial asset inventory scan (e.g. serial number capture) or enter configuration item (CI) information if required
- Manage, track, and report inventory status and completion status of systems in work to central Infosys asset register
- As required, repackage fully assembled hardware and bundled software using original packing materials or other available means), apply shipping labels, generate appropriate shipping documentation
- The build activity may be performed at the user desk or a designated space within the Molina premises, where services are being delivered.

Quality Control and Improvements:

Faults Analysis within the Team:

- Appearing problems and technician’s shortcomings are analyzed and corrected
- Fast feedback from the supervisor
- Information sharing within the whole team
- Corrective Actions Reports

Project IMACDs Additional Responsibilities

Infosys and Molina will continue to monitor the utilization of Deskside resources. If there is any project IMAC such as large deployments which are time bound and critical, and require additional effort for a short period of time then it will be classified as a Project IMAC. For locations where there is a dispatch support it will be priced based on actual effort spent completing the project task.

[redacted]

Figure 23. [redacted]

[redacted]

2.3.1.4 [redacted]

[redacted]

Figure 24. [redacted]

The effort for hardware break fix will be optimized by Infosys once transition to desktop as a Service model.

2.3.1.5 L1.5 (Smart Hands Support) /Remote “Hands & Feet”

The Field Services team will perform Smart Hands and Feet support for Incidents, service requests, change requests, installs, de-installs, moves, break-fix of equipment for server/ network equipment in remote locations.

Below is the broad list of activities that will be categorized as “Smart Hands” / “Remote Hands & Feet” in remote locations.

- Perform network and server equipment shut down and restarts. Rack and stack for servers, routers, switches and other IT equipment
- Un-racking of decommissioned IT equipment
- Configure remote management on servers, switches etc. as per the guidance from the remote infra L2 / L3 team
- Perform basic tasks like swapping out of a failed server disk / memory module etc. as per instructions from the remote infra team
- Coordinate with Infosys L3 team to troubleshoot various IT related issues
- Coordinate with remote team regarding any third party vendors related issues including replacements
- Liaison with local facility teams to coordinate access and other activities as instructed by Infosys L3 team.
- Liaison with users to understand issues and report back to Infosys L3 team
- Wireless Support – assist in testing and installation of Wireless Access Points
  - Documentation – recording of IT inventory & IT processes at local sites including updating layout diagrams, rack view of the datacentre etc. as requested.
- For Dispatch sites, we propose this to be a one-time activity during Knowledge Acquisition.

2.3.2 Deskside and Walkup Support (Exhibit 2-C)

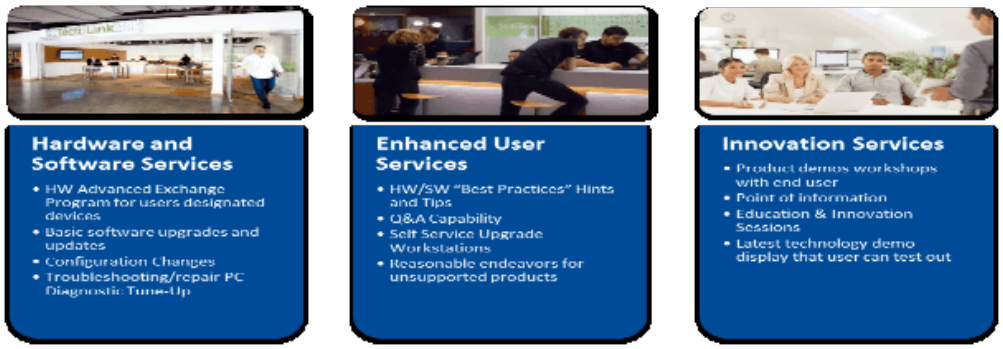
Continuous Improvements

- As shown in Figure below, Walk-Up services improves Molina employees' productivity and end user experience.



- As a result of the **continuous improvement** and the analysis of the operation of Walk-Up Service centers and new trends and technologies available in the near future. We would establish new products demos sessions, trainings on increasing Self-Service Services.

2.3.2.2 [redacted]

2.3.2.3 [redacted]

2.3.3 Desktop Engineering (Exhibit 2-C)

2.3.3.1 Solution

Infosys has vast experience in providing Desktop Engineering services for multiple enterprise customers across the globe. We will bring our Desktop engineering implementation and operation capabilities, lessons learnt, to cater Molina's benefit, with end to end service capabilities and ownership. Also we will analyze the scope during the DD/transition phase and enhance the service.

2.3.3.2 Patch Management and Software Distribution

Infosys as part of its services will provide Molina, support to End Users Software distribution, Software upgrades and updates through existing tool SCCM.

Desktop support team will provide support to Service desk for issues related to end user workstation issues. Using the Desktop engineering model, we will cater to services such as Software packaging, Software deployment, Software upgrades and updates

through SCCM which will help us to cater to the end user requests and maintain a stable operating environment which is secured and monitored effectively.

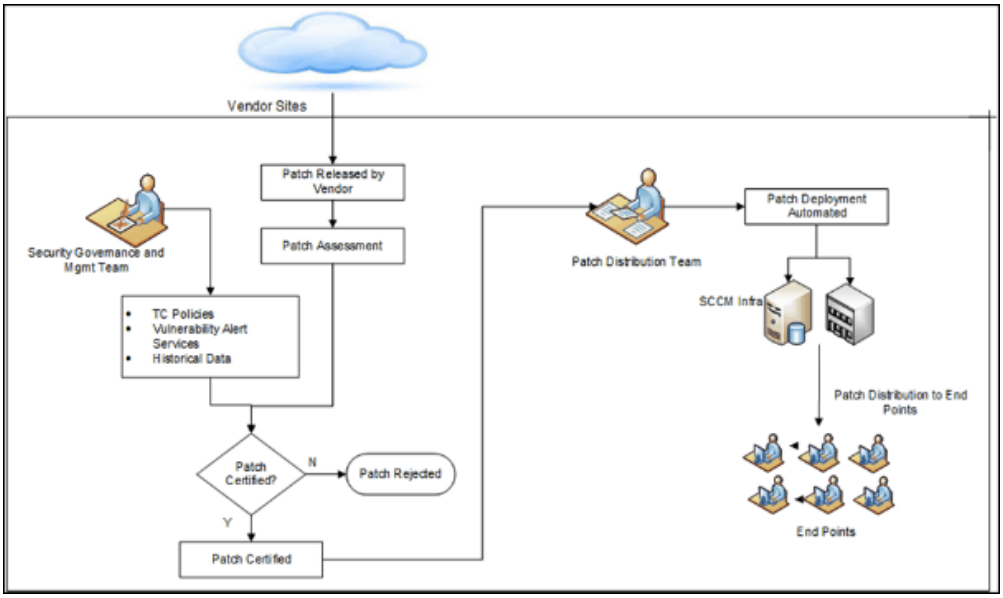
Patch Management

- Patch management service comprises of assessing threats and vulnerability, discovering new updates, Coordinate with Molina for patch qualification, Obtaining, testing and deploying required patches.

[redacted]

Figure 26. Patch Management Process

- We understand the significance of an effective patch management process as, in a network of hundreds of systems, all it takes is one machine to become compromised to open the door for multiple other machines to be compromised as well.
- Patch Management process not only plays a significant role in upholding enterprise security posture but is also treated as the solution for majority of security vulnerabilities. The key tenets of Infosys's Patch Management service are as follows:
  - Service Packs as a foundation of the patch strategy
  - Track the Product Lifecycle
  - Perform risk assessment using a Severity Rating System
  - Test updates before deployment
  - Patch prioritization and Scheduling



The Patches would be distributed using the existing SCCM in Molina environment. The team would take control of the end user equipment and distribute the patches as per scheduled releases. The OS and Application patches would be tested and then released for distribution by the security team. A periodic report will be generated for Molina capturing the total amount of Patches released and distributed in a stipulated times frame.

Key points to note are as follows:

- Patch Deployment will be done by Infosys.
- Identification of patches would be a joint function of the security teams at Molina and Infosys

- Patch Testing will be a collaborative process between Molina and Infosys.

Software Distribution

Infosys software distribution service apart from the distribution and deployment of the on-going patches and updates, Infosys will utilize Molina existing software distribution tool. Some of the Key activities include Deployment planning, deployment pilot test, deployment execution and coordination, monitoring and control.

Infosys will have a Software Distribution team for deployment and on-going patch and updates management utilizing Molina Automation's in SCCM tool. Key activities that we will perform as part of software distribution are.

- Establishing deployment plan for different user types
- Deployment process customization and coordination
- Software distribution to software repositories and clients
- Deployment pilot test
- Implementation of rollback plan

2.3.3.3 [redacted]

2.3.3.4 Desktop Management

Infosys will provide proactive management and testing of new hardware as part of an agreed roadmap of change with Molina.

- Molina and Infosys will review and evaluate new Hardware based on Molina's business requirements.
- Infosys will test the Hardware against the standard Molina Images before being introduced in to production
- Infosys will ensure that the changes to hardware models will be managed such that the hardware models are tested and qualified well before the current hardware reaches end of life or is not available for purchase.

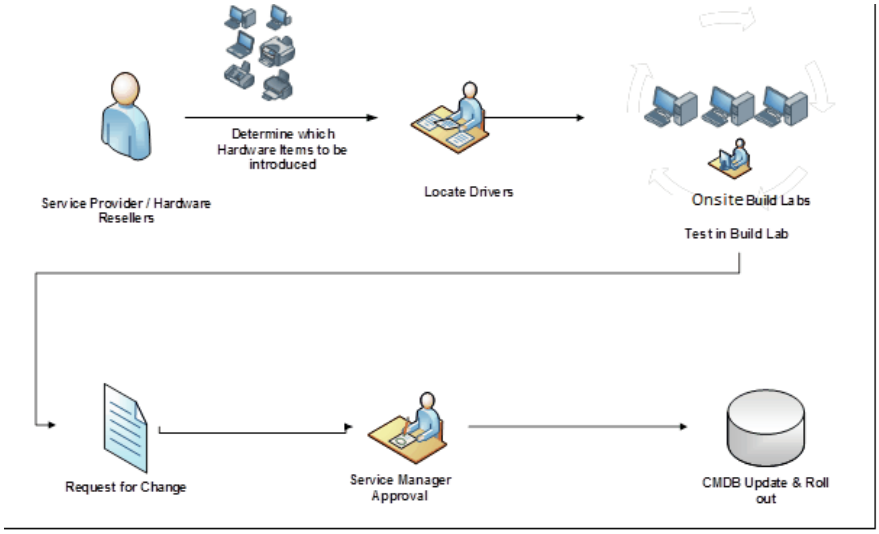


Figure 65.Desktop Management

2.3.3.5 Mobile Device Management

Infosys will support the existing MobileIron platform environment for the Enterprise mobile devices. Mobile Iron offers capabilities for mobile device management, mobile application management, mobile content management, secure access to cloud services and unified endpoint management.

Operate

- Provide support services for mobile devices which are in-scope.
- Provide lifecycle management services of mobile devices such as procurement to retirement

- Perform asset management services for mobile devices to the authorized users
- Perform CMDB updates and periodic reconciliation
- Perform patch management, device updates/fixes etc.
- Develop, maintain documentation and standard operating procedures
- Perform Install / uninstall / remote wipe etc. of applications and provide incident/ problem management services
- Conduct periodic audit to ensure adherence of Molina policies / procedures & compliance regulations.
- Provide support for mobile devices managed by other platforms if any, until all mobile devices are migrated to MobileIron.
- Report of audit, inventory & exceptions to Molina IT team on mutually agreed intervals

Continuous improvement

- Identify and propose integration methods for mobile applications
- Implement best practices for improved performance, problem isolation and troubleshooting
- Improve user experience
- Improve compliance of the devices and usage
- Perform stringent compliance management and identify / report security gaps
- Roll out new features and enhancement updates

2.3.4 End-User Device (EUD) Management and Remote Support Model (Exhibit 2-C)

Infosys will manage the Molina's IT assets throughout the life cycle from demand recognition and procurement to disposal using Molina's existing management processes and tools.

The Device Management Services includes the following Service Components:

- Device Lifecycle Management
- Asset Management

Device Lifecycle Management responsibilities

Infosys will:

- Use the Systems Management Toolset (SCCM) to install a Supported Image and core Software onto End Points as requested by Molina;
  - Perform End User state migration activities to ensure all data, Applications installed via the Software Distribution Service Component and locally stored preferences are transferred from one End Point to another;
  - Support the IMAC Service Component and Onsite Support Service Component as requested;
  - Perform quality assurance tests on all newly built or rebuilt End Points to ensure the following items are installed and operating as designed before the End Point is cleared for deployment:
    - All core Software as defined by Molina from time to time; and
    - All Software installed by the End User via the Software Distribution Service Component;
  - Provide Molina with reports detailing issues experienced/observed during the quality assurance steps outlined in this Service Component;
  - Record all issues experienced/observed during the quality assurance steps outlined in this Service Component to be able to provide such information to Molina on request;
  - Resolve any issues uncovered during quality assurance check before the End Point is cleared for deployment;
- Update the Asset Management Database (CMDB) for Tracking and Reporting Service Component;
- Configure End Points and update the CMBD with the unique identifier for the End Point and the date the End Point was built/rebuilt;
- Hand over the End Point to the Onsite Support team and update the CMBD with details about owner, status, detailed location amongst other specifically requested details from Molina;
- Being decommissioned:

- Ensure removal of the associated End Point AD Object from the Active Directory using the Active Directory Service Component;
- Ensure removal of the associated End Point AD Object from the Systems Management Tool using the Systems Management Toolset Service Component;
- Update the CMDB as described in the Tracking and Reporting Service Component;
- Engage Stock Management Service Components for Repair or Disposal if appropriate;
- Prepare End Point for redeployment and engage the Stock Management Service Component.

Asset Management responsibilities

Infosys will maintain a sufficient Stock of PC hardware and peripherals at Sites designated by Molina to meet the user demands through the End Point Provisioning, Re-provisioning and Decommissioning Service Component. Infosys will:

- Do Spares forecasting for the Break / Fix Services
- Manage Stock efficiently and only include Infosys supported/deployed End Points;
- Transfer Stock between any depots, Molina Facilities as necessary (leverage existing Molina shipment contract);
- Work with the Molina approved Hardware vendor(s) for fulfilment, warranty and non-warranty repair and disposal;
- Order equipment, receive equipment, check-in to inventory, apply Asset Tag, record model, type, serial number, date, status, and Stock location in the CMDB;
- Transfer to the Build Team and update the CMDB with new Molina locations and date moved as requested;
- Collect Hardware from Build Teams and update stock numbers when not in use; and
- Support the IMAC Service Component as requested.

Molina will own the Assets (Stocks, spares) and depots.

2.3.4.1 Remote Site Management

Infosys will leverage the existing BOMGAR tool of Molina to provide the remote support. Operational model for remote support is explained in section 1.1.2.

2.3.4.2 MDM, Cell Phone, and Hotspots Management

Solution summary

The key operational activities for devices are:

- Provide support services for mobile devices which are in-scope
- Provide lifecycle management services of mobile devices from procurement to retirement
- Perform asset management services for mobile devices to the authorized users
- Perform CMDB updates and periodic reconciliation
- Perform patch management, device updates/fixes etc.
- Develop, maintain documentation and standard operating procedures
- Perform Install / uninstall / remote wipe etc. of applications and provide incident/ problem management services
- Conduct periodic audit to ensure adherence of Molina policies / procedures & compliance
- Report of audit, inventory & exceptions to Molina IT team on a mutually agreed intervals
- Co-ordinate with 3rd party vendor / OEM for warranty replacements and/or disposal requirements

For Hotspots and bar code scanners: -

The operational activities include:

- Perform initial configuration of device and create device account in the Active Directory.
- Handle the needed certificates in rollout and updates processes.
- Resolve device errors and Authorized User issues including Incidents that need involvement of Third Parties (such as WLAN Access point provider). Re-build the device if it seems to be configured incorrectly.
- Handle communication with the external Hardware supplier.

2.3.6 Network Operations Center

2.3.6.1 NOC Support Model

Infosys will be leveraging the intelligent command center to act as Network Operations Center (**NOC**). Molina will be able to proactively identify and resolve incidents before business is impacted through proactive monitoring by our Integrated Command Center.

Infosys will set up an Integrated Command Center (ICC) that will centralize support using unified processes, tools and technologies. The ICC will be staffed 24x7 to facilitate intelligent and timely action to "***catch the yellows before they become reds***". The ICC team will play a pivotal role in critical incident management and will be responsible for SOP-based resolution thereby reducing the number of incidents escalated to L2. by [redacted]:

- Monitor all events and correlate events to give actionable conditions
- Prioritized based on business impact
- Verified and enriched with extra state information and diagnostics
- If application performance problem, triaged to determine probable cause area
- Fix using run-book or route to appropriate team / co-ordinate with vendors
- Own the event and critical incident management process
- Reporting service level metrics on regular basis leveraging IIMSS

Figure 33.Integrated Command Center/NOC

Infosys integrated command center/NOC team will be leveraging IIMSS to perform L1.5 support for all the infrastructure tracks. Following IIMSS features will be leveraged to enhance the IT services across Infrastructure tracks

- Single and unified management solution/portal to help users request, manage, monitor and govern the Hybrid IT resources while providing agility and ensuring adherence to enterprise policies and processes
- To integrate, automate, and manage all its on premise, cloud resources and third-party cloud service providers (private/public, IaaS/PaaS/SaaS) in a central location
- Streamlined and disciplined monitoring across a hybrid IT landscape with a centralized data source for monitoring
- A single point of integration of alerts/alarms received from various monitoring tools into MOM (Monitors of Monitor) & other integration touch points
- A single point of correlated alerting, notification and reporting data source mechanism

- Proactively and predictively identify and resolve issues before the occurrence of a major outage incident
- Visibility of alerts and current tickets that are either assigned, being triaged or resolved
- Comprehensive reporting & dashboard capabilities based on various team reporting requirements including management and business teams
- Data analytics and Machine learning algorithms for incidents/service request to identify the recurring patterns for automations

Service Management Layer

Infosys will be having a service management layer overarching the integrated command center and service desk. Service management layer will have dedicated incident, change and problem managers who will take end to ownership of MIM, Incident, change and problem management functions. Following are key objectives and activities which will be managed and monitored by up by Incident, change and Problem manager's

Incident Manager

Objectives:

- Resolving Incidents within Established Service Times.
- Restore normalcy as quickly as possible.
- Ensure Customer Satisfaction.

Key Activities:

- Logging of incidents in the service management tool
- Prioritization and categorization of the incident
- Solve on the call if possible, else escalate it to the 2nd level / 3rd level support
- Ownership throughout the life cycle of the incident
- Knowledge base updates
- Analyzing incident trends
- Defining/updating KPI's
- Assisting the Major Incident Management Team
- Implement Lean methodologies through automation of certain tasks (where ever possible) and improve business value

Problem Manager

Objective:

- To prevent problems and resulting incidents from happening
- To eliminate recurring incidents
- To minimize the impact of incidents that cannot be prevented

Key Activities:

- Identifying the recurring incidents and work on a permanent solution
- Updating ServiceNow Known Error database, so further incidents can be resolved much more quickly
- Assist the Major Incident Management Team
- Closely work with Incident, Change, Event, Capacity and Performance Management processes
- Risk Management by identifying the vulnerabilities and performing the preventive actions
- Proactive Problem management through Continuous service improvement

Change Manager

Objectives:

- Respond to the customer's changing business requirements while maximizing value and reducing incidents, disruption and re-work
- Respond to the business and IT requests for change
- Clear and comprehensive release plans that enable Molina to align their activities with these plans.
- Building, installing, testing and deploying a release on schedule

- Identify specific Patch installation process

Key Activities:

- Categorization and prioritization of a change
- Validating the information provided by the change requester with Configuration Management, Test plan, Implementation plan, back out plan
- Driving the Change management board meetings
- Business Impact analysis on the change
- Authorization and coordination during implementation of the change
- Documentation and instruct Configuration management to update the CMDB
- Release building
- Release testing
- Release planning
- Release deployment
- Release documentation control

2.4.2 Security Operations

Infosys engagement level controls with NIST Cybersecurity Framework

Infosys will follow NIST cyber security framework at an engagement level for supporting Molina's compliance mandates from outsourced managed services standpoint. Infosys internally is ISO27001 certified for all its delivery locations. From an engagement standpoint, Infosys will –

- Onboard and dedicated Information Security officer at offshore who will own –
- SOA and security controls documentation for Molina engagement
  - Work with Molina security team and align on the security controls, their design and operational aspects. These will be documented in the "Information Security HandBook_Molina Health Care".
  - Document a statement of applicability (SOA) to cross reference between controls, applicable services, processes, responsible parties, reporting and audit requirements, periodic assessment requirements.
- Security training for Infosys team engaged with Molina
  - Understand Molina requirements from security training for all resources who are going to work on the engagement.
  - Ensure that the training is undertaken by resources and records are maintained and updated in an on-going basis.
- Supporting Internal and external security audits for Molina-Infosys engagement
  - Create a calendar of internal and external audits, reviews, assessments by Infosys and Molina
  - Coordinate with internal and external stakeholders from Infosys and Molina perspective for such internal and external audits, reviews, assessments by Infosys and Molina
- Advisory and guidance to Infosys teams to meet Molina compliance requirements (SOA).
  - Provide continuous guidance to Infosys and Molina teams on meeting the stated and implicit needs for security control compliance requirements.
  - Addressing any gaps discovered as a part of any audit or assessment
- Report on KPIs
  - Align with Molina on reporting and KPI requirements
  - Ensure the committed reports and KPI reporting requirements are being adhered to and being met on a continuous basis.
- Infosys will explore with Molina on automating the security controls maintenance, change management and operational effectiveness by the usage of suitable eGRC tools.
- Infosys will create a statement of applicability of applicable controls – the SOA will be built by Infosys Information Security Officer and approved by Molina Security team. The applicable controls will be jointly arrived by referring to Molina security policy, compliance requirements, Infosys security policy and compliance requirements. The SOA will be a living document and will be updated as and when there is a change in the control design or implementation consideration. Future control requirement for Molina

- Infosys team engaged in this program will be responsible for ensuring that the security controls are designed, implemented, enhanced, supported. Each Infosys team will identify a security SPOC who be responsible for ensuring compliance to the SOA and associated compliance and reporting mandates

Identify Key Objectives for Monitoring like the ones mentioned below:

- Identify gaps in the tools setup
- Improvement in alert noise
- Improved Dashboards and Reporting structure

Infosys will perform below Transition Activities for App and Infra support:

- Request for the latest details (repository, Inventory, Application owner details) of all the Infra and applications which are being monitored
- Take hand over of AppDynamics and Infra monitoring tools hardware details, software licenses and credentials of the servers forming the environment
- Analyze their on boarding process, approval process to perform new enhancements
- Get details of all the different application agents that are currently instrumented? (Java, .Net, PHP, Node.js etc.)
- Analyse current monitoring tools integration with event management tool and identify pain areas
- Create new account on Monitoring tools and deactivate old ones
- Understand all the SOP's, KB articles and process related documents
- Get details of all out of the box functionalities currently used and customized functions deployed in the monitoring tools
- Analyse default health rules and figure out any gaps in current setup
- Get application owner details for application which are getting monitored

From the tools leveraged in Molina, Infosys would analyse cases for redundancy and overlap of tools & functionality. After getting detailed information on Tools landscape, we can propose various idea to optimize the tools set by consolidating redundant tools.

Figure 52. Sample Clarifications for tool rationalization

Tools Strategy During Cloud Migration Journey

Infosys understands that Molina will be embarking on the journey to migrate servers / applications to cloud in the upcoming years. This strategy will certainly have an impact on how the various monitoring and management tools would need to operate. Infosys will closely work with Molina architecture & security team in ensuring that appropriate strategies are defined to handle both the hybrid state of the environment with cloud & on premise existence and dedicated environments of only cloud or only on premise needs.

This strategy is anticipated to bring in the need for new tools to handle monitoring & management requirements in the cloud as well as the need for retiring / optimizing some of the existing tools. All changes related to Molina & Infosys tools will follow the defined release & change management processes including updating the necessary documentation of the tools.

2.5.2.2 Consolidation and optimization of existing tools

Solution Approach

- Rationalize current tools and extend the capability for tools optimization across businesses and eliminate redundant tools in consultation with Molina
- Deliver integrated and efficient operations to have robust tools and processes
- Optimized tools with applicable configuration and customization of monitoring solution to ensure long-term needs are fulfilled
- Integrate monitoring tools with IIMSS for event correlation

Figure 56. [redacted]

- The proposed Strategic Governance Layer has been conceptualized to ensure overall governance to the service management initiative. This layer will be jointly owned by Infosys and Molina to ensure proper communication and effective governance. The strategic layer also follows a three-layer strategy, comprising of a Steering Committee, a Management Layer & an Operations Layer.
- The Operation Service Integration Layer will pursue policy and process adoptions and adherence as well as drive standardization of processes across the board (including multiple vendors). This layer will focus on process operations as well as develop various reports of varying complexities. Multiple reports will be generated to target specific audiences to give an overall dynamic snapshot of the environment health. Continuous Improvement activities will be spearheaded by the Service Excellence Office across the board and will ensure that process maturity within the organization continues to improve at a steady pace.
- Tools & Orchestration Layer will ensure integration of existing tools utilized by Molina and its vendors are appropriately integrated into ServiceNow. This will ensure seamless flow of information and enhanced governance of the infrastructure.
- **Tools & IP**

ITSM process transformation solutions are intended to be built on the ServiceNow platform: Incident, Problem, Knowledge, SLM, Service Catalog, Change Management & CMDB, Reporting and Dashboard.

Persona Based Services: Persona information available to Service Desk agent to ask relevant questions while interacting with Molina business users.

CXO Dashboards and Reports

- Leadership Dashboards will help making quick decision and analyse the health of IT operations at one glance
- Operations Dashboards – This will be designed for the operations team to help in operational efficiency and prioritize their work easily
- Trend Reports – These reports will give a snapshot view of how the performance has been for an organization over a period of time
- Snapshot View – This will be designed for various operations team to provide a glimpse of current health of operations

- **Consulting Enablers**

  - SIAM Maturity Assessment Framework

  Our varied and diverse experience in the SIAM space has enabled us to conceptualize and implement a comprehensive SIAM Maturity Assessment Framework which will help Molina gauge its existing infrastructure maturity levels. This framework consists of an assessment tool which utilizes a rating mechanism based on a detailed questionnaire and the results/scores are benchmarked against our defined maturity levels. The questionnaire encompasses all conceivable process within the ITSM space and hence this detailed and in depth analysis will enable Molina to accurately identify the processes that need a maturity level up. This, in turn, helps Infosys and Molina to focus a concerted effort on the pain areas and improve corresponding maturity levels. Along with a scorecard, Infosys will also provide action items and a roadmap to help Molina improve maturity levels across the spectrum.

  - Infosys SIAM Readiness Framework

  Infosys will also perform a SIAM Readiness Framework to gauge the effort and the pace in which the SIAM framework can be deployed across Molina environment. The multi-phased SIAM implementation approach will help us deploy process improvements at a much faster pace and hence save valuable time for Molina.

  [redacted]

Figure 57. SIAM Readiness Framework

- **Process Aids**

Infosys "iPrise" is an Infosys' proprietary set of processes required for different streams in Infrastructure Services. It Draws out best practices from world known process frameworks such as ITIL, CMMI, COBIT, ISO 27001, PMBok, etc. It is a collection of accelerated process designs using ready to use designs from the process repository. This set is used as a baseline to customize and develop Processes for IT Infrastructure Management set-ups. "Infosys i-PRISE" enables organizations to save time & effort required for defining processes and provides easy access to industry best practices. It acts as a catalyst for process definition and implementation. It includes detailed levels of various parts of a process such as sub – processes, roles & responsibilities, requirements for tools, KPIs and Metrics, etc.

Key areas where iPrise can contribute are:

- Enhancing existing processes and implement new capabilities to ensure core capabilities are defined
- Setup of Service Excellence Office to provide the overarching governance during the process setup and ensure its improvement.
- Ensure ITSM processes are defined, integrated, implemented and sustained. This will result in achieving processes with high end maturity level
- Once the processes are rolled out, process maturity assessments, quality audits, trainings and governance will ensure the maturity is maintained and improved.
- Rapid deployment of ITSM processes thereby saving significant time

Infosys recognizes and acknowledge Molina's current ITSM maturity state at Level 2 .Infosys's unique processes, frameworks and accelerators can help in reducing the short-comings. We will leverage our experience and Service Management Maturity Framework to improve the maturity of the processes at Molina.

Integrated Performance Dashboards and Reporting

Infosys will maintain integrated IT Governance to build a seamless and service focused delivery structure. Based on our experience, we often notice that with dispersed data, IT Leadership often receives very different reports from each region, it's hard to get an end to end overview of the IT operation, or to perform data analysis resulting in what we often refer to as 'Water-Melon' Effect (Green from outside, red inside); where Individually each vendor or region might be performing well, but collectively business is not happy.

Infosys has handled multiple accounts with this scenario and helped our Customers overcome these challenges by having a robust and comprehensive multi-tier Governance structure.

Infosys' view on performance reporting focuses on enabling adequate visibility of performance of each Vendor/region/tower at various Organizational levels

- At Strategic layer, high level performance summary or a dashboard view on all Suppliers and a Management summary related reports are produced
- At Management Layer, the regular SLA reports as well as CSI reports are shared and discussed.
- At operational layer, multiple reports at various stages of each process are produced and verified

2.6.2 DR / BC for Supplier Services in-Scope of This Agreement

Infosys understands the criticality and relevance of DR and BCM for supplier services to ensure continuity of services to our clients / partners under any disaster scenario. Infosys can provide 100% confidence to Molina for continuation of services via its thorough DR/BCM corporate level framework, guidelines and teams.

Infosys has a detailed Business Continuity and Disaster Recovery plan called "Phoenix" at the Corporate Level, Location Level and each account Level. Redundancy has been built into all the essential infrastructure including office space, network connectivity, power, computing resources and personnel, and the same would be applicable for Molina engagement.

Infosys BCMS conforms to the requirements of ISO 22301. Infosys is certified for ISO 22301-certification standard effective February' 2013. The scope of the certification covers all Infosys India locations (including BPO locations).

The Business Continuity Management Plan is a comprehensive set of steps to be taken before, during, and after a disaster. The plan is documented, communicated and tested to ensure the continuity of business operations and availability of critical resources after disaster. This plan is made available at all of our Development Centers (DCs).

The BCMS Plans are driven systemically through the BCMS System, an in-house application for management of all the Business Continuity Plans and reviewed at least annually.

The BCMS system is used to develop the account level BCMS Plans and cover sections such as the account level BCMS team structure, Roles and responsibilities, Business Impact Analysis, Risk Assessment, recovery sites, Incident Management Workflow, Post Disaster Activities, Notification Directory, Tests and Exercises, Call Trees, Metrics to check on maturity tracking and compliance etc. This plan will be created for Molina as well and will go through an approval process before it gets baselined.

Tests and exercises are conducted at all three levels - Location, Function, Account. Once the Molina account level BCP gets created it will be tested as per the frequency updated in the test plan / agreed with Molina. Tests are conducted at least once a year by the Infosys Quality assurance team and BCM team.

These BCMS tests and exercises are planned to ensure the validation on the various BCMS strategies/controls in place. These are conducted to cover scenarios like unavailability of –

- IT Infrastructure
- Physical Infrastructure, and / or
- Human Resources

Any issues or deficiencies identified during these tests are captured as action item in an Infosys BCMS tracking tool and driven to closure with follow-ups and execution.

As in any other engagement, Molina account team will have few DRRs – Disaster Recovery Representatives on the floor, to take care of any disaster situation. These are resources from the project, and are trained by the Infosys BCMS team, on how to act during the disaster situation.

Degree of Assurance

- A minimum of **[redacted]** of the physical infrastructure is available as redundancy. Example – extra office space at Infosys DCs within the same city and / or another city
- A minimum of **[redacted]** of the IT infrastructure is available as redundancy. Example – Laptops, Desktops, VoiPs etc.

- Upon occurrence of a disaster affecting Infosys offshore facilities, Infosys will implement the plans and procedures stated to ensure business continuity

For Molina, it is envisaged that services will be delivered using a combination of resources at onsite and one or more of Infosys' development centers in India (Bengaluru and Chandigarh).

Following is the snapshot of the BCP/DR infrastructure for Molina is outlined below.

[redacted]

[redacted]	

2.6.2.1 Backup and Storage (Process, Data Residency)

Infosys will be accessing Molina infrastructure / tools / applications from offshore (Bengaluru / Chandigarh) through Molina VDI / Citrix connections. Infosys will not have any Molina data stored in any of the Infosys site and systems. Molina data will stay within Molina's Data Center and follow the agreed Molina DR/BCP. In case of any disaster at the Infosys service locations, Molina related data will not be affected since no data is stored within Infosys network / site.

2.6.2.2 Committed and On-Demand Equipment

From the current scope of work, Infosys understands the need to setup an Offshore ODC location, which will be setup in Bengaluru / Chandigarh for Molina. Following would be the committed equipment, to ensure steady execution of operations:

- Router – for network connectivity from Infosys ODC to Molina DC
- Laptops/Desktops – for all the on-boarded resources to carry out their work for Molina.
- VoiP Phones – for the resources to join direct meetings within the teams located globally, with the Molina stakeholders

2.6.2.3 Support Services

In order to ensure smooth and continuous operations and to meet any DR/BCP situation, Infosys has the following internal teams / sources to provide support services:

- Computers and Communication Department
- Quality Assurance Team
- Business Continuity Management team
- Infosys Development center facilities team
- Transport team

2.8.3.5.4 Reporting

Following table provides list of reports / KPIs we propose for effective IAM support.

#	Report Parameter / KPI	Description / Action Item
1	Availability	Ensure availability of IAM systems and provide weekly / monthly report for the same in addition to live availability status (live availability is dependent on available monitoring systems)
2	Incident Count / Service Requests vs. Status	Adhere to SLAs
3	Top 10 IAM Incident Categories vs. Volume	With process optimization or automation, show decrease in incident numbers in same category
4	SOX Reports	Convert Ad-hoc / manual report generation into automated report generation over time for SOX queries
5	Audit Reports	Convert manual audit report generation into automated report generation over time
6	Operations Reports	Automate report generation for operational efficiency such as for data discrepancy over time
7	Usage Reports	Provide reports on usage of identity and access management system, password reset, progress of access certification cycle, etc. and monitor performance of environment vs. available capacity
8	Privilege Usage Reports	Provide reports for privilege access usage through available tools (Bomgar PAM and available analytics system)
9	Weekly / Monthly Trend Reports	Provide weekly / monthly trends for incidents, problems, service requests, availability, usage, etc.
10	Dashboard	Provide dashboard summarizing no of active users, key activities, key automation activities, etc. in addition to weekly / monthly trends

2.8.3.5.5 Continuous improvement opportunities

Based on understanding of current state and overall application landscape at Molina, Infosys has identified key areas for improvement/ automation which will result into a streamlined end to end IAM solution.

2.8.3.5.5.1 IAM Manual Activities

As part of due diligence and transition phase, Infosys will work on listing complete inventory of manual activities related to Identity and Access Management support, and will work on automation of the ones resulting into higher number of incidents and service requests. Following table provides a brief list of manual activities which are generally encountered in a typical IAM program of similar scale.

#	Typical Manual Activities	Mitigation / Automation
1	Data Quality – discrepancies and inconsistency in data between source system, IDM system and target systems	Data quality analysis during implementation; Periodic data discrepancies reports and automated remediation of the same
2	Manual troubleshooting related to various access certifications	Log analytics; Automated troubleshooting; Verified process
3	System Management (including backup, storage, logs)	Automated operational management (such as automated log rotation, archival, purge)
4	Support to internal / external audit queries	Define requirement in alignment with audit teams; Enable solution for automated reporting of audit requirements
5	Incidents related to self-services including password reset	Provide self-services for account unlock, password expiry, etc.; Enable help desk / L1 support to resolve such incidents
6	Requests pending for approval	Enable delegated approvals using IDM system
7	Assign access in PAM system for local administrative rights or deployment rights for a short window	Automate on-demand privilege access management through process and technical optimizations

2.8.3.6.3 [redacted]

[redacted]

2.8.3.6.4 Reporting

Security Infrastructure tools support team will create daily/weekly/monthly reports and share the update with Molina team. The reports that will be shared with Molina are as follows:

Area	Frequency	Target Stakeholders	Report Example
Operational Reporting	Weekly	Infra leads, App Leads, SOC Manager/team, CSIRT team	▪ Total incidents, problem, change tickets, status of tickets (open/closed) ▪ Weekly trends ▪ Any open issues
Trend Reporting	Monthly	SOC Manager, IT Managers	▪ Administrative changes Trends ▪ Point solutions like AV, IPS, FW trends ▪ Traffic Trends (services, ports, users) ▪ SLAs
Incident and Service Status reporting	Daily, Weekly	SOC Manager	▪ Incidents by Priority ▪ Incident by Stages ▪ Incidents by Age ▪ Incident Trend by Priority ▪ SLA Compliance/breaches ▪ Average Incident response time by priority ▪ Ad-Hoc Report delivery
Compliance Reports	On-Demand	Compliance Auditors	▪ Access and Change Validation ▪ Administrative Activities

2.8.3.6.5 Continuous improvement opportunities

Security Infrastructure tools support will continuously be looking for improvement opportunities and provide Molina with transformation ideas well. Some of the typical opportunities for improvement in supported, existing tools.

2.8.3.7.4 Reporting

Following table provides list of reports:

#	Report Parameter / KPI	Description / Action Item
1	Application Scan Vulnerability Report	After each scan completion, Infosys team will provide a report to Application owner to fix the identified vulnerabilities
2	Weekly Report	Provide insights of total number of applications or assets scanned in a week, total vulnerabilities identified, fixed and closed
3	Weekly Infrastructure Vulnerability Scan Report	Will be shared with IT Ops or Assets owners for their remediation action
4	Monthly Infrastructure Vulnerability Scan Report	This report will provide insights of cumulative scan performance and the left over vulnerabilities to be fixed
5	Yearly Infrastructure Vulnerability Scan Report	Toward end of year, a complete scan will be conducted to find out if there are still vulnerabilities exist

2.8.3.7.5 Continuous improvement opportunities

During the Steady State, Infosys will assess the possibilities of identifying opportunities for improvement. Some of such improvement ideas are:

- Vulnerability management life-cycle process assessment and improvements
- Vulnerability backlog clearing initiative for CVSS 7+ vulnerabilities
- Reporting of vulnerabilities by asset and application criticality matrix
- Bring in secure SDLC as a part of application development and release process

2.8.3.8.4 Reporting

Following table provides list of reports:

#	Report Parameter / KPI	Description / Action Item
1	Weekly Report	Provides Total number of Incidents and Requests serviced by Infosys team
2	SLA Report	This report will bring the view of how Infosys is performing against agreed SLA in handling incidents

2.8.3.8.5 Transformation ideas/initiatives

During the course of Steady State, if there are automation opportunities or Data Center to Cloud migration opportunities or Major upgrade initiatives, Infosys will be partnering to deliver the transformational initiatives.

Schedule 23

BUSINESS CONTINUITY AND DISASTER RECOVERY

CONTENTS

1. **DEFINITIONS**

1.1 Capitalized terms used but not defined in this Schedule shall have the meanings given in Schedule 1 (Definitions and Interpretation) to this Agreement. In this Schedule:

"**BCP/DR Tests**" means the tests performed to assess the success of the BCP/DR Plan(s). The test includes:

(a) participation in the planning sessions leading up to a test;

(b) executing Recovery activities which are the responsibility of the Service Provider;

(c) supporting Recovery activities which are the responsibility of any Other Service Provider;

(d) participating in post-test debriefs and reviews; and

(e) contribution to and execution of follow up actions, as part of the Disaster Action Log;

"**Disaster Action Log**" means a document that records all the open and closed actions that were identified as part of a response to:

(a) a Disaster;

(b) an audit, Risk Assessment, review, Planned Exercise or BCP/DR Test;

"**Disaster Recovery Service**" means:

(c) producing, implementing, maintaining and testing the BCP/DR Plan(s);

(d) managing and completing the activities as documented in the BCP/DR Plan(s) in the event of a Disaster and including performing Disaster Recovery; and

(e) fulfilling any obligations, set out in this Schedule 23 *(Business Continuity and Disaster Recovery)*;

"**Exercise and Test Report**" means a report that contains the results of a review, Planned Exercise or BCP/DR Test, and includes full details of the results, activities performed and evaluates the performance against agreed objectives and Service Levels;

"**Planned Exercise**" means reviewing a BCP/DR Plan(s) to ensure their viability and effectiveness, and alignment of each other BCP/DR Plan(s);

"**Recover**" means to recover a backup from backup media in accordance with the Recovery Point Objective as specified in this Schedule 23 *(Business Continuity Management and Disaster Recovery)* and "**Recovery**" shall be construed accordingly;

"**Recovery Point Objective**" or "**RPO**" means the point in time to which the data is restored using the last back up as set out in Appendix 23A (*BCP/DR Plan Requirements*);

"**Recovery Time Objective**" or "**RTO**" means the period of time from the invocation of a Disaster to when the System should be Restored as set out in Appendix 23A (*BCP/DR Plan Requirements*);

"**Remedy Plan**" means a document that describes the activities and resources needed to remediate issues identified in the Disaster Action Log, which may include changes required to the BCP/DR Plan(s);

"**Restore**" means to restore Services and the impacted part of the Systems to normal operation in accordance with the Service Levels and "**Restoration**" shall be construed accordingly;

"**Risk Assessment**" means an assessment to ensure that the Approved Service Delivery Locations and those Services and Systems delivered from the Approved Service Delivery Locations comply with the Molina Policies, and includes:

(a) identifying whether the likelihood of a Disaster has changed;

(b) identifying new threats, vulnerabilities, issues experienced and opportunities for improvement in relation to the continuity capabilities of Services and Systems in those Approved Service Delivery Locations;

(c) ensuring new, obsolete or modified processes are analyzed and classified by criticality;

(d) ensuring mapping between the Services and Systems delivered from the Approved Service Delivery Locations remains correct and is appropriately reflected within the configuration management database; and

(e) providing updates to any risk assessments conducted by or on behalf of Molina in relation to the Approved Service Delivery Locations, Services, Systems, or business processes;

"**Risk Assessment Report**" means a report that summarizes the results of the Risk Assessment, and includes details of:

(a) criticality of the Services and Systems to Molina;

(b) single points of failure, including potential issues caused by centralization or a lack of physical separation and geographic spread;

(c) amount of physical spare capacity available;

(d) interdependencies, including dependencies on Other Service Providers; and

(e) recommendations for improvement and/or plans as required by the remediation of issues, risks and deficiencies section of this Schedule.

"**Service Provider Disaster Coordinator**" means the Service Provider person serving as the point of contact concerning Disaster Recovery in the event of a Disaster.

2. PRINCIPLES

2.1 This Schedule sets out the Service Provider's obligations in relation to the BCP/DR Plan(s) and Disaster Recovery Service.

2.2 The Service Provider shall develop and maintain its BCP/DR Plan(s) in accordance with paragraphs 3 and 3.17 respectively.

2.3 In meeting the requirements set out in this Schedule, the Service Provider shall:

(a) take appropriate actions to minimize interruption to Molina business activities during a Disaster;

(b) manage all aspects concerning the ability to continuously provide Services according to the Service Levels, Recovery Time Objectives and Recovery Point Objectives; and

(c) deliver the ability to manage the Recovery and Restoration of Services and Systems following a Disaster with minimum impact on Molina.

2.4 The Service Provider shall manage the Service Provider resources required to meet the requirements set out in this Schedule for all Approved Service Delivery Locations.

2.5 The Service Provider shall:

(a) have a documented BCP/DR Plan(s) for (i) Approved Service Delivery Locations, and (ii) designated Systems (i.e., Systems used by Service Provider to provide the Services); and

(b) each year during the Term, provide written confirmation to Molina that the Service Provider has a documented BCP/DR Plan.

2.6 The Service Provider shall store the latest, up-to-date version of the BCP/DR Plan(s), Service Provider briefings to Molina, if any, on the BCP/DR Plan(s), and supporting documents produced by the Service Provider under this Schedule on the Contract Management Portal.

2.7 During an outage or disaster, Service Levels will not apply unless the Disaster Recovery Plan specifies otherwise; provided, however, that the Service Levels shall apply in any event where the Disaster Recovery Plan was enacted in response to a breach of the Agreement by the Service Provider (as opposed to being enacted in response to a Force Majeure Event).

3. SERVICE PROVIDER'S BCP/DR PLAN

3.1 Molina shall provide the Service Provider a prioritized list for the Recovery and Restoration of the Services.

3.2 The Service Provider shall develop, implement and maintain the BCP/DR Plan(s).

3.3 The BCP/DR Plan(s) shall be developed for (i) Approved Service Delivery Locations, and (ii) designated Systems in accordance with this paragraph 3, unless otherwise agreed or directed by Molina.

3.4 Each BCP/DR Plan shall cover reasonably foreseeable events (together with any other events agreed with Molina) and consequences including loss of designated Systems, loss of Services, loss of Systems provided by a Subcontractor, and total or partial loss of any single building or group of buildings for each relevant Service and designated System.

3.5 Each BCP/DR Plan shall provide for the following in the event of a Disaster:

(a) ensuring the safety of Service Provider Personnel and Molina Personnel (if applicable);

(b) minimizing potential economic/business loss to both the Service Provider and Molina;

(c) reducing disruptions to Services and Systems;

(d) ensuring organizational stability and reducing reliance on certain key individuals;

(e) minimizing decision-making and providing an orderly Recovery;

(f) minimizing the Service Provider's legal liability by adhering to Applicable Law as set out in the Agreement; and

(g) seeking to protect the Services and Systems containing Molina Data.

3.6 The BCP/DR Plan shall include details of the following:

(a) the events that may trigger a Disaster;

(b) communication channels;

(c) the detailed activities required to be taken by the Service Provider in the event of a Disaster to Restore impacted Services and Systems;

(d) the sequence of the activities required to Restore Services and designated Systems;

(e) the dependencies the Service Provider has on Molina and Other Service Providers in order for the Service Provider to complete the activities to Recover and Restore impacted Services and Systems;

(f) details about the prioritization of Recovery and Restoration activities to be performed in relation to the designated Systems and Services;

(g) resources involved in each activity in the BCP/DR Plan;

(h) the testing activities that will be completed after each activity;

(i) potential Workarounds which may be deployed in the event of a Disaster to partially or fully Recover and Restore Services and designated Systems; and

(j) the activities to failback a Service or designated Systems to its state before a Disaster occurred.

3.7 Each BCP/DR Plan shall comply with all relevant Molina Policies, Applicable Law and Good Industry Practice and shall conform to ISO 27001, and cover all Key Personnel, resources, Services and actions required to manage the required Disaster Recovery processes and achieve the RPO and RTO set out in Appendix 23A (BCP/DR Plan Requirements). Service Provider will use commercially reasonable efforts to support RTO and RPO as architected in the current Systems. If changes to the architecture or investment in Capital is required to achieve the RTO / RPO requirements listed in Appendix 23A, Molina will be responsible to fund these changes to the underlying systems, but as long as the service provider identifies these requirements promptly following the first DR test with Molina.

3.8 The Service Provider shall work with Subcontractors to ensure the BCP/DR Plan can be supported by Subcontractors as required.

3.9 The Service Provider shall:

(a) submit a draft of the BCP/DR Plan(s) that meets all of the requirements set out in this Schedule 23 (*Business Continuity and Disaster Recovery*) to Molina within 180 days after the Service Commencement Date; and

(b) update the BCP/DR Plan(s) within 10 Business Days after receiving notification from Molina that an update to the BCP/DR Plan(s) is required following a Planned Exercise with the details of the updates required, and at the Service Providers cost continue to update the BCP/DR Plan(s) until Molina provides approval or the Parties escalate the matter to the relevant Governance Board in accordance with Schedule 7 (*Governance*).

3.10 The Service Provider shall cause the BCP/DR Plans developed and, as applicable, implemented by it pursuant to this Schedule 23 to account for and to be coordinated with the Molina BCP/DR plan set out in Appendix 23B.

3.11 Molina shall approve or reject the BCP/DR Plan(s) within ten (10) Business Days of receipt of the draft BCP/DR Plan from the Service Provider. If Molina rejects the BCP/DR Plan(s) then Molina shall provide reasoning for the rejection to the Service Provider. Where Molina rejects a BCP/DR Plan, the Service Provider shall make all required changes in accordance with paragraph 3.12(b).

3.12 The Service Provider shall:

(a) co-operate with all Other Service Provider(s) and Molina in the development of BCP/DR Plan(s); and

(b) provide input into Other Service Providers' business continuity and disaster recovery plan(s) as reasonably requested by Molina.

3.13 The Service Provider shall define and provide evidence to Molina on how the BCP/DR Plan(s) will be coordinated with Other Service Providers' business continuity and disaster recovery plans.

3.14 The Service Provider shall perform reviews, Planned Exercises and BCP/DR Tests of the BCP/DR Plan(s) in accordance with paragraph 5, and the Service Provider shall provide evidence to Molina, in the form of an Exercise and Test Report, that the reviews, Planned Exercises and BCP/DR Tests were completed as per the review, Planned Exercise and BCP/DR Test schedule in accordance with paragraph 5.4.

3.15 If a Disaster occurs that would trigger a BCP/DR Plan and, as a result, the Service Provider has to allocate scarce Resources between accounts, the Service Provider must treat Molina no less favorably than other similarly situated clients receiving similar services to the Services on a like–for–like basis.

3.16 The Service Provider shall record the BCP/DR Plan(s) in the Contract Management Portal to ensure the BCP/DR Plan(s) are continuously available to Molina. The Service Provider shall produce and maintain a report, on the Contract Management Portal, that includes:

(a) a list of the BCP/DR Plan(s) in scope for the Service Provider;

(b) the date of the last update for each BCP/DR Plan;

(c) the date of the next scheduled review, Planned Exercise and BCP/DR Test; and

(d) any missed activities or performance gaps.

3.17 The Service Provider shall continuously review the BCP/DR Plans and make necessary updates to reflect the status of the Services, Recovery strategies, technical solutions and related Recovery (subject to approval by Molina to any amendments).

4. RECOVERY TIME OBJECTIVES AND RECOVERY POINT OBJECTIVES

4.1 All of the Services and designated Systems shall be maintained or Restored in accordance with the Recovery Time Objectives set out in Appendix 23A (*BCP/DR Plan Requirements*) and each BCP/DR Plan.

4.2 All agreed data shall be backed-up, maintained and Recovered in accordance with the Recovery Point Objectives set out in Appendix 23A (*BCP/DR Plan Requirements*) and each BCP/DR Plan.

4.3 The Service Provider shall reasonably co-operate and work together with Other Service Providers and Molina in implementing the Recovery Time Objectives, Recovery Point Objectives in accordance with the BCP/DR Plans.

5. REVIEWS, EXERCISES AND TESTING

5.1 General principles

(a) The BCP/DR Plan(s) shall be reviewed, exercised and tested in accordance with this paragraph 5.

(b) Reviews, Planned Exercises and BCP/DR Tests will be scheduled with consideration of seasonal business cycles, the number of processing systems or platforms involved and the time required to perform the review, Planned Exercise or BCP/DR Test and shall only be performed if approved by Molina. The Service Provider shall take appropriate actions to avoid reviews, Planned Exercises and BCP/DR Tests having an impact on the delivery of Services, unless specifically approved by Molina.

(c) In each Contract Year a Planned Exercise or a BCP/DR Test, will be scheduled for each System which is eligible for Disaster Recovery Service.

(d) The Service Provider shall develop the Planned Exercise and BCP/DR Test schedule of the BCP/DR Plan(s), Molina shall review the Planned Exercise and BCP/DR Test schedule with the Service Provider, and Molina shall approve the Planned Exercise and BCP/DR Test schedule. The Service Providers shall execute the Planned Exercise and BCP/DR Test as specified in the Planned Exercise and BCP/DR Test schedule approved by Molina. The approved Planned Exercise and BCP/DR Test schedule will be available on the Contract Management Portal.

(e) For all Planned Exercises and BCP/DR Tests, a scenario and detailed list of objectives will be developed and agreed between Molina and the Service Provider prior to the Planned Exercise or BCP/DR Test commencing. The Parties shall agree:

(i) scenarios which represent realistic Recovery parameters to ensure all components of the BCP/DR Plan(s) can be demonstrated, e.g., simulation of Recovery from losing a data center, Recovery of a business critical application environment;

(ii) objectives written in such a way that success criteria are clearly defined and understood and so that overall performance can be measured against those objectives; and

(iii) reporting format and content.

(f) Unless otherwise specified, Molina shall provide the facilities, operations, networks and equipment necessary for the Planned Exercises and BCP/DR Tests of the BCP/DR Plans.

(g) The Service Provider shall continue to provide the Services and Systems with minimal interruption in accordance with the Service Levels during the performance of the Planned Exercises or BCP/DR Tests of the BCP/DR Plans.

5.2 BCP/DR Plan reviews

(a) The Service Provider shall formally review the BCP/DR Plan(s) once a year, by:

(i) performing a structured walk-through of the BCP/DR Plans' capabilities; and

(ii) reviewing the BCP/DR Plan(s) to identify any perceived gaps and provide recommendations and rationale for amendments to the BCP/DR Plan(s).

(b) Following such a review, the Service Provider shall update the BCP/DR Plan(s) as necessary to comply with the requirements of this Schedule 23 (*Business Continuity and Disaster Recovery*).

5.3 BCP/DR Plan Planned BCP/DR Test

(a) As set out in paragraph 5.1(c), the Service Provider shall perform a BCP/DR Test of the BCP/DR Plan(s) once a year.

(b) The BCP/DR Test shall:

(i) test that all purposes of the BCP/DR Plan(s) are being achieved;

(ii) test the state of readiness of the organization to respond to and cope with a Disaster;

(iii) determine whether backup Data and documentation stored off-site are adequate to support the resumption of business operations and failback to the state of business operations before a Disaster;

(iv) determine whether the activities and operating procedures are adequate to support the resumption of business operations and failback to the state of business operations before a Disaster;

(v) determine whether the BCP/DR Plan(s) have been properly maintained to reflect annual resumption, Recovery and Restoration needs and failback to the state of business operations before a Disaster;

(vi) consider and test for exposure to new risks;

(vii) test that Service Provider Personnel are adequately trained for Disaster Recovery;

(viii) consider lessons learned from the occurrence of an Incident and test these against the current processes;

(ix) test against changes in technology and/or processes;

(x) test against the introduction of or change to any Applicable Law, to the extent the Service Provider is responsible for complying with Applicable Law as set out in the Agreement, or Molina Policies, in each case to the extent Molina has communicated the change and the impact to the Service Provider.; and

(xi) consider any changes to any Service and Systems.

(c) The Service Provider shall conduct an additional Planned Exercise following:

(i) an Agreement Change that requires a change to the BCP/DR Plan(s) or requires a different manner of implementation, including different people to implement the BCP/DR Plan(s);

(ii) subject to the Change Control Process a re-organization of Molina;

(iii) a re-organization of the Service Provider;

(iv) a Disaster; or

(v) an Incident where the associated BCP/DR Plan(s) or associated Disaster Recovery capabilities fails to maintain Services at the required level or fails to meet RTOs or agreed Service Levels.

(d) The Service Provider shall manage and coordinate the BCP/DR Test of the BCP/DR Plan(s).

(e) Following such a BCP/DR Test, the Service Provider shall update the BCP/DR Plan(s) as necessary to enable the execution of all activities in compliance with the requirements of this Schedule.

5.4 BCP/DR Plan Exercise and Test Reporting

(a) Within ten (10) Business Days following the completion of each BCP/DR Plan review, Planned Exercise or BCP/DR Test, the Service Provider shall prepare and communicate the Exercise and Test Report.

(b) Each Exercise and Test Report shall be stored on the Contract Management Portal.

(c) Where the agreed test objectives and/or Service Levels are not met, the remediation of issues, risks and deficiencies section, paragraph 8, of this Schedule 23 (*Business Continuity Management and Disaster Recovery*) shall apply.

6. CONTINUITY RISK MANAGEMENT

6.1 The Service Provider shall conduct Risk Assessments at least once per year for each Service Provider Approved Service Delivery Location where there are Systems or from where the Service Provider delivers Services.

6.2 The Service Provider shall prepare a Risk Assessment Report in relation to each Risk Assessment within ten (10) Business Days of completing each Risk Assessment.

7. AUDIT

7.1 Without limiting Clause 38 (*Audit and Information Access*) of the Agreement, Molina reserves the right to audit, with reasonable prior written notice, the Service Provider's adherence to the BCP/DR Plan(s) at any time.

7.2 At a minimum, the Service Provider shall make available to Molina for audit purposes, the most recent approved version of the:

(a) Risk Assessment Report;

(b) BCP/DR Plan(s);

(c) Exercise and Test Reports; and

(d) Disaster Action Log.

8. REMEDIATION OF ISSUES, RISKS AND DEFICIENCIES

8.1 If:

(a) Molina invokes a BCP/DR Plan(s) and the Service Provider has not met its obligations in relation to the BCP/DR Plan; or

(b) a Planned Exercise or BCP/DR Test fails to achieve stated objectives; or

(c) an audit under paragraph 7 of this Schedule 23 (*Business Continuity and Disaster Recovery*) or Clause 38 (*Audit and Information Access*) of the Agreement or Risk Assessment related to an event under paragraph 6 identifies that the Service Provider has failed to achieve stated objectives, and such failure is due to the fault of the Service Provider,

the Service Provider shall produce and share with Molina a Remedy Plan within ten (10) Business Days of the failed result, to remedy any deficiencies or risks identified.

8.2 Molina shall approve or reject the Remedy Plan within ten (10) Business Days of receipt from the Service Provider. If Molina rejects the Remedy Plan, Molina shall provide reasons for the rejection.

8.3 Where Molina rejects the Remedy Plan, the Service Provider shall revise the Remedy Plan taking into consideration all Molina's comments and within five (5) Business Days of Molina's rejection, re-submit the revised Remedy Plan to Molina to obtain Molina's approval in accordance with paragraphs 8.2 and 8.3.

8.4 Where Molina does not approve or reject the Remedy Plan or Molina rejects a revised Remedy Plan, the Parties shall escalate the Remedy Plan (or revised Remedy Plan) to the relevant Governance Board in accordance with Schedule 7 (*Governance*).

8.5 Where Molina approves the Remedy Plan, the Service Provider shall rectify non-compliant areas as per Molina's approved Remedy Plan. Should the Service Provider remain non-

compliant sixty (60) Business Days after Remedy Plan activities were due to be completed then the Parties shall escalate the matter to the relevant Governance Board in accordance with Schedule 7 (*Governance*) and Molina may require an additional audit, Risk Assessment, review, Planned Exercise and/or BCP/DR Test (as applicable) at the Service Provider's expense, for every subsequent thirty (30) Business Day period until the matter is resolved in accordance with the Remedy Plan.

9. SERVICE PROVIDER DISASTER COORDINATOR

9.1 The Service Provider shall appoint a Service Provider Disaster Coordinator who shall:

(a) be available 24 x 7 and have suitable experience;

(b) be responsible for maintaining the BCP/DR Plan(s);

(c) conduct and coordinate testing and reviews of the BCP/DR Plan(s);

(d) manage and coordinate the execution of the BCP/DR Plan(s) in the event of a Disaster;

(e) ensure all Service Provider Personnel and Service Provider Subcontractors have awareness of the obligations within the BCP/DR Plan(s);

(f) liaise with the Service Provider Subcontractors as required; and

(g) liaise with Molina as required by Molina.

10. DECLARATION OF A DISASTER

10.1 If the Service Provider becomes aware of a Disaster, the Service Provider shall notify Molina immediately.

10.2 Upon Molina instructing the Service Provider to invoke the BCP/DR Plan, Service Provider shall commence the processes and activities outlined in this Schedule 23 (*Business Continuity and Disaster Recovery*), and specifically those processes and activities in paragraph 10.4 of this Schedule 23 (*Business Continuity and Disaster Recovery*), and the BCP/DR Plan(s), immediately.

10.3 The Service Provider's Disaster Coordinator shall co-operate with all Other Service Provider's disaster coordinators and Molina's disaster coordinator and Molina personnel as required during a Disaster.

10.4 In the event Molina declares a Disaster the Service Provider shall:

(a) invoke, and execute the activities set out within, the relevant BCP/DR Plan(s) which cover the Services and Systems affected by the Disaster;

(b) mobilize and activate the teams necessary to facilitate the resumption of time-sensitive business operations;

(c) work with Other Service Providers as needed to support end-to-end Recovery of technologies, services and applications to a functional state;

(d) continually assess and report Incident impact in accordance with the BCP/DR Plan(s), extent of damage and disruption to the Services and Molina's business operations;

(e) organize and manage any meetings with Molina and Other Service Providers as necessary to keep them informed of the activities being undertaken by the Service Provider and the status of the Services;

(f) attend and contribute to any meetings organized by Molina;

(g) if applicable, co-ordinate the relocation and/or migration of operations and support functions from temporary recovery facilities to repaired or new facilities;

(h) participate in any post Disaster Recovery debriefs; and

(i) contribute to and execute follow-up actions to the extent that they require the Service Provider's knowledge related to the affected Services and Systems.

11. RECORDS AND LOGS

11.1 The Service Provider Disaster Coordinator shall maintain the Disaster Action Log for actions related to the BCP/DR Plan(s) as a result of any of the following:

(a) a Disaster; and

(b) an audit, Risk Assessment, review, Planned Exercise or BCP/DR Test of the BCP/DR Plan(s).

11.2 The Service Provider shall maintain the latest version of the Disaster Action Log, in the Contract Management Portal.

11.3 The Disaster Action Log shall be used during Recovery and Restoration activities to ensure that all actions for a particular plan are carried out and for evaluation purposes after the Disaster, or an audit, Risk Assessment, review, Planned Exercise and/or BCP/DR Test, to ensure lessons learned are noted and future BCP/DR Plans are amended accordingly as required by paragraph 8.

11.4 At a minimum, the Disaster Action Log shall cover:

(a) all actions carried out and the start/end times for each;

(b) reasons for taking such action;

(c) any delegation of actions;

(d) remote escalations;

(e) dependencies on Molina or Service Provider; and

(f) any deviations from defined BCP/DR Plans and operating procedures and any Workarounds implemented.

12. MANAGEMENT AND TRAINING

12.1 The Service Provider shall nominate a duly authorized Service Provider Person (who may be the same person as the Service Provider Disaster Coordinator) to be primarily responsible for Disaster Recovery Services, and for ensuring the Service Provider's compliance with this Schedule.

12.2 The Service Provider shall ensure that a key group of Service Provider Personnel at each Service Provider Approved Service Delivery Location where there are Systems or from where the Services are provided, are trained in all aspects of the Disaster Recovery Services and the Service Provider shall maintain training records showing the training received by and the attendance of such Service Provider Personnel. Such training records shall be available for inspection by Molina at any time.

12.3 The Service Provider shall ensure all Approved Subcontractors and key Service Provider Personnel required to deliver any Disaster Recovery Services have sufficient capability to meet the requirements stated within this Schedule or within any plan required under this Schedule.

12.4 The Service Provider shall provide Service Provider Personnel with immediate access to all relevant operating procedures and documentation relating to the Disaster Recovery Services in the event of a Disaster or where required to meet the obligations set out in this Schedule.

12.5 The Service Provider shall ensure that Service Provider Personnel are aware of, understand and comply with the obligations set out in this Schedule.

12.6 The Service Provider shall maintain a list of key contacts and notification operating procedures for Molina, Service Provider Personnel and Subcontractor Personnel relating to the Disaster Recovery Services.

13. CONTACT LIST

13.1 Molina shall produce, maintain and record, on the Contract Management Portal, the Molina contact list, which includes the Molina contacts to be notified in an event of a Disaster.

13.2 The Service Provider shall produce, maintain and record, on the Contract Management Portal, the Service Provider Personnel contact list, which includes the Service Provider Personnel contacts to be contacted in the event of a Disaster being declared.

14. USE OF SUBCONTRACTORS

14.1 In the event the Service Provider engages a Subcontractor for the provisioning and delivery of Disaster Recovery Services (e.g., recovery facility, recovery/replacement hardware and/or

staffing resources), the Service Provider shall be responsible for the management, oversight and performance of those Subcontractors in accordance with Clause 63 (*Subcontracting*) of the Agreement.

14.2 Molina reserves the right to review and either approve or reject the use of Subcontractors supporting the delivery of Disaster Recovery Services in accordance with Clause 63 (*Subcontracting*) of the Agreement.

Distribution

The primary electronic copy of this plan is located on the Molina Healthcare, Inc. (MHI), disaster recovery (DR) SharePoint site:

http://mhi/sites/mit/eis/ServiceDelivery/MHI/DR%20Plans/MHI%20Overall%20DR%20Plan

A secondary electronic copy of this plan is stored on the RecoveryPlanner RPX site (login required):

https://rpx1-us.recoveryplanner.com/recoveryPlanner/

A hard copy is also retained at the DR Manager's desk:

Meeker Baker Building, 3rd Floor
650 Pine Avenue, Long Beach, CA

Document Classification: Molina Confidential

This document is confidential and proprietary to Molina Healthcare Corporation. It is not to be used, reproduced, or disclosed outside Molina Healthcare without the written consent of Molina Healthcare Corporation. The information in this document is furnished for use by Molina Healthcare support personnel in servicing customer equipment or by a customer under a license agreement with Molina Healthcare.

Refer to Information Services Policy and Procedure, *IS 72.00, Data Classification*, for additional information and required handling procedures.

Privacy Rules

The Health Insurance Portability and Accountability Act of 1996 (HIPAA – Public Law 104-191), the HIPAA Privacy Final Rule, and the American Recovery and Reinvestment Act (ARRA) of 2009 require that covered entities protect the privacy and security of individually identifiable health information.

Protected health information (PHI) includes demographic information and other health information and confidential information, whether verbal, written, or electronic, created, received, or maintained by Molina Healthcare about members and patients. It is health care data plus identifying information that would allow the data to tie the medical information to a particular person. PHI relates to the past, present, and future physical or mental health of any individual or recipient; the provision of health care to an individual; or the past, present, or future payment for the provision of health care to an individual. Claims data, prior authorization information, and attachments such as medical records and consent forms are all PHI.

Table of Contents

Table of Figures

1. Introduction

1.1 Objective

This Disaster Recovery Plan (DRP) is designed to provide immediate response and recovery procedures from major events that would result in the loss of critical processing capabilities at the Molina Healthcare, Inc., data center in Albuquerque, New Mexico. The DRP covers procedures which provide for a smooth transition of critical functions to an alternate location that facilitates the resumption of normal business operations.

The DRP is closely integrated with the business continuity plan (BCP), and provides for the recovery of information technology (IT) services that support the business processes covered in the BCP. Both the DRP and BCP are pursuant to Molina Information Services policy and procedure *IS-56.10 Contingency Planning*.

1.2 Scope

The DRP provides guidance and procedures to enable the timely recovery from unplanned crises and to facilitate an orderly transition of functions to the alternate location. This allows for smooth resumption of critical processing capabilities for Molina Healthcare, Inc., to restore services within the contractually required time period after a declared disaster.
This document serves as an overall IT DR plan. Detailed technical recovery procedures are also being developed for critical applications. These are essentially addenda to the overall DR plan. Refer to the list below for these procedural documents.

1.2.1 [redacted]

[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]

1.2.2 Application Tier

The Business Continuity Management (BCM) team conducted a business impact analysis (BIA) to identify critical business functions and gather information pertaining to the impact incurred by a disruption of these services. The BIA defined the tier classification as the period of time in which a business function needs to be restored. Four tier categories were specified.

[redacted]

IT systems support business processes, so this same tier stratification is used for IT systems. The recovery time objective (RTO) and recovery point objective (RPO) for a given application determine which tier classification it is assigned.

Recovery time objective is the duration of time within which a business process (or application) must be restored after a disaster or disruption in order to avoid unacceptable consequences associated with a break in business continuity.

Recovery point objective refers to the maximum allowable time frame between the last restorable data point and the time of disaster. Some of this data can be recovered by alternate means such as paper re-entry, batch re-runs, etc.

RTO and RPO vary according to the system and the business function it supports. Therefore, they may be found in the application-specific DR plan.

1.2.3 Application Recovery Priority

The order in which applications are restored is a function of their criticality and dependency relationships. Below is the recovery priority for applications with documented DR plans.

[redacted]

1.3 Plan Review

The IT DR Plan is a living document and therefore will be reviewed after any significant change to the infrastructure, processes, or related information, such as IT organizational structure. The DR plan will be reviewed at least annually.

1.4 DR Strategy

Core IT systems are located in Molina's primary data center in Albuquerque, New Mexico, and protected by a co-location/disaster recovery (DR) data center located in Richardson, Texas. Near real-time storage replication ensures that critical production data is available at the DR site. Production data backups are also copied to the DR site, providing a secondary data protection measure.

In the event of a disaster preventing application functionality at the primary data center, the Disaster Recovery Coordinator works with the IT infrastructure and application teams to coordinate the efforts needed to bring up the DR servers and connect them with the replicated data, according to the DR plan documentation. This documentation is available for on-site review upon request.

1.5 Testing Strategy

Having a DR Plan by itself does not prepare any business unit to cope with business interruption in an effective manner. The DR Plan must be tested regularly in order to ensure staff awareness and effectiveness in response to any business interruption. A scenario of the DR Plan is tested annually and the results documented. The DR Coordinator will coordinate the annual testing with other internal and external parties.

Any major change or modification to normal business procedures must be considered under DR and business continuity (BC) planning and its impact documented. In case there is substantial impact to the DR or BC Plan, the DR and the BC Plans must be appropriately updated and tested.

Refer to Appendix A for a summary of test results.

1.5.1 Test Date and Authorization

Disaster recovery testing is conducted at least once each calendar year to demonstrate Molina's ability to restore system functions at the DR data center. Tests are planned by the DR Coordinator to

take advantage of the regularly scheduled application maintenance window, where applicable. Testing may be internally conducted by IT, and may also involve business users.

Authorization to conduct DR tests is secured from the IT application owner in conjunction with the business. The Business Continuity Management team works with the business team to identify an agreeable date for the business, and the DR Coordinator then works with the IT application owner for confirmation. An email is solicited from the IT application owner granting approval. This approval is attached to the ticket submitted for the conduct of the test.

1.5.2 Test Location

Disaster recovery tests involve system administrators remotely accessing production systems in New Mexico and DR systems at the alternate site. Business users are also involved at their respective plan locations in their home states. Users may be accessing systems from their home or office, as individual circumstances warrant.

1.6 Definitions and Acronyms

1.6.1 Definitions

The following terms pertain to the DR plan.

Disaster, as defined for this document, is any unplanned major event or condition, whether environmental (e.g., fire, flood, tornado, earthquake, hurricane), mechanical (e.g., major equipment failure, sabotage, theft), loss of environmental systems (e.g., power, air conditioning), loss of telecommunications capability, or other damage to hardware, operating system, or physical plant, that results in a loss of major operations at the New Mexico data center, thereby preventing the normal scheduling and processing of business information. Acts of war are not covered in these procedures. For the purposes of this document, the disaster is assumed to be at the New Mexico Data Center in Albuquerque, New Mexico. Once a disaster has been declared, Molina Healthcare will work to restore services within the contractually required time period after the declaration of disaster.

Incident or **event** is a circumstance caused by any unexpected situation that disrupts the normal flow of critical operating processes or functions, thereby preventing and/or causing significant delay in the completion of scheduled activities or expected outcomes.

Incident Command System (ICS) – The Incident Command System (ICS) is a systematic tool used for the command, control, and coordination of emergency response operations of all types and complexities. ICS is a subcomponent of the National Incident Management System (NIMS), as released by the U.S. Department of Homeland Security in 2004. ICS is the overarching framework for managing incidents at Molina.

Incident Management Team (IMT) – The Incident Management Team is a group of operational leaders with the authority and ability to make decisions about controlling an incident on behalf of the organization.

Crisis Management Team (CMT) – The Crisis Management Team (CMT) is comprised of senior business leadership functioning as a planning and policy group. This team has the responsibility for the protection of the business, the staff, and the customers. It renders decisions about corporate policies, legalities and liabilities, ethical issues, brand image, approval of emergency funding, corporate communications, and interfacing with shareholders and the Board of Directors.

The **Disaster Recovery Team** (DRT) is assembled if a disaster occurs to manage IT disaster recovery (DR) activities. The composition of this team includes the infrastructure teams needed to recover IT systems at the secondary site.

The **Disaster Recovery Analyst**(s) (DRA) is (are) responsible for coordinating among the members of the DRT during recovery operations. The DRA is also responsible for periodic verification and updating of the DRP, as well as the coordination and oversight of DR tests.

The **Recovery Time Objective** (RTO) is the duration of time within which a business process must be restored after a disaster or disruption in order to avoid unacceptable consequences associated with a break in business continuity.

The **Recovery Point Objective** (RPO) refers to the maximum allowable time frame between the last restorable data point and the time of disaster. The RPO indicates the maximum amount of data loss that is permissible. Some of this data can be recovered by alternate means such as paper re-entry, batch re-runs, etc.

The **secondary** or **alternate site** is a data center providing usage on a system configuration that is compatible with that of the New Mexico Data Center, tailored to meet the requirements for disaster recovery.

Recovery procedures are documented actions necessary to respond to an incident and recover business operations to the alternate site.

Restoration procedures are documented actions necessary to restore processing and operations to the primary site where the disaster occurred.

1.6.2 List of Acronyms

Acronym	Description
ACS	Automatic Call Distribution
AT&T	American Telephone and Telegraph
BCP	Business Continuity Plan
BCM	Business Continuity Management
CIO	Chief Information Officer
CMT	Crisis Management Team
CTI	Computer Telephony Integration
DR	Disaster Recovery
DRA	Disaster Recovery Analyst
DRP	Disaster Recovery Plan
DRT	Disaster Recovery Team
EDI	Electronic Data Interchange
EMC	Company name or Electronic Media Claims
ESC	Electronic Submission of Claims or Error Status Codes

Acronym	Description
FAX	Facsimile; also known as the telephonic transmission of scanned-in hardcopy or printed materials
HIPAA	Health Insurance Portability and Accountability Act
HR	Human Resources
ICS	Incident Command System
IMT	Incident Management Team
IP	Internet Protocol
ISP	Internet Service Provider
IT	Information Technology
IVR	Interactive Voice Response
LAN	Local Area Network
MS	Microsoft
NAG	Network Access Gateway
NAS	Network Attached Storage
NOC	Network Operations Center
PC	Personal Computer
POS	Point of Sale or Place of Service or Point of Service
RPA	RecoverPoint Appliance
RPO	Recovery Point Objective
RRI	Recognition Research Inc., purchased by SunGard
RTO	Recovery Time Objective
SAN	Storage Area Network
SQL	Structured Query Language
TBD	To Be Determined
UAT	User Acceptance Testing
UPS	Uninterrupted Power Source
VAN	Value Added Network
VLAN	Virtual Local Area Network
VPN	Virtual Private Network
WAN	Wide Area Network

2. Data Center Overview

The business operations for Molina Healthcare, Inc., are supported by the New Mexico Data Center, and the Unitas Global Richardson Data Center.

2.1 New Mexico Data Center (DC01)

The Molina Healthcare Data Center (DC01) located in Albuquerque, New Mexico, is the primary production data center for all of Molina's IT infrastructure. DC01 is designed to support Molina's existing and future computing for all of the state health plans, Molina Medicaid Solutions, and internal Molina services.

At the 10,800 square foot New Mexico Data Center, Molina employs top-tier infrastructure components to ensure continued quality of service for our remote office locations. Telephony is provided by a Cisco infrastructure which provides VoIP, voicemail, call center functions, and instant messaging capabilities to users across the United States. WAN and Internet connectivity is provided on a Cisco-based network utilizing redundant 10 and 20 Mbps MPLS-based network connections to remote offices, direct OC-12 connections to the disaster recovery site and redundant 1 Gbps links to the Internet over multiple carriers. Partner network connectivity is provided via frame relay or MPLS and is segregated from Molina internal traffic via Cisco firewalls and Intrusion Detection Systems. Each rack is serviced by redundant feeds from separate UPS systems, with two power domains feeding racks to entirely separate utility or generator sources.

The New Mexico Data Center is protected by perimeter security features including video surveillance, alarms, and roaming security guards. Access to the building is available 24/7. Entrances to the building, the main computer room, and telecom service rooms are monitored by surveillance cameras and controlled by electronic badge access. Employees who have the required security access must utilize badges to gain access into the office space and other critical areas of the facility. All visitors are required to sign in and must be escorted at all times. Molina management reviews the authorized access list on a regular basis, and procedures are in place to modify the access list immediately if required.

The New Mexico Data Center is staffed by experienced Molina server engineering and network engineering personnel, and Critical Facilities Management team members. Figure 2-1 provides a visual representation of the DC01 floor plan.

Figure 2-1: [redacted]

2.2 Unitas Global Richardson Data Center (DC02)

Molina has contracted with Unitas Global for data center co-location services in the Unitas Global data center located in Richardson, Texas. The Unitas Global Richardson Data Center (DC02) is the disaster recovery data center for Molina's IT infrastructure and is designed to support Unitas Global Richardson's existing and future customer needs in a safe and secure environment. Molina's contract with Unitas Global Richardson includes the option for Remote Hands Services (technical services for physical, on-site support) at the data center for on-site coordination of hardware and support issues, with both Molina and subcontractors. Molina supports the infrastructure remotely for all platform areas, and sends personnel on-site when needed. Molina orchestrates the disaster recovery activities within the DC02 data center utilizing Molina staff, third party vendors, and assistance from Remote Hands Services, if needed.

At the 8,700 square foot Unitas Global Richardson Data Center (DC02), Molina employs top-tier infrastructure components to ensure continued quality of service for remote office locations. Telephony is provided by a Cisco infrastructure which provides VoIP, voicemail, call center functions and instant messaging capabilities to users across the United States. WAN and Internet connectivity are provided on a Cisco-based network utilizing redundant 1 Gbps WAN circuits to Molina's MPLS cloud, redundant 10 and 20 Mbps MPLS-based network connections to remote offices, dual 6 Gbps and 10 Gbps connections to the production site, and redundant 1 Gbps links to the Internet over multiple carriers. Partner network connectivity is provided via Frame-relay or MPLS and is segregated from Molina internal traffic via Cisco firewalls and Intrusion Detection Systems. Each rack is serviced by redundant feeds from separate UPS systems, with two power domains feeding racks to entirely separate utility or generator sources.

The Unitas Global Richardson Data Center (DC02) is protected by perimeter security features including video surveillance, alarms and roaming security guards. Entrances to the building, the main computer room and telecom service rooms are monitored by surveillance cameras and controlled by electronic badge access. All employees must badge into the office space and other critical areas of the facility to gain access. All visitors are required to sign in and must be escorted at all times. Unitas Global Richardson management reviews the authorized access list on a regular basis, and procedures are in place to modify the access list immediately if required.

Figure 2-2 provides a visual perspective of the DC02 data center environment floor space.

Figure 2-2: [redacted]

2.3 *Network Infrastructure*

The Molina corporate network provides network communications for these facilities. In case of a disaster at the New Mexico Data Center, data communications will be routed through the Unitas Global Richardson Data Center (Figures 2-3 and 2-4) to enable the recovery and continuation of business operations.

Figure 2-3: [redacted]

Figure 2-4: [redacted]

2.4 *Telephony Overview*

Molina uses several models of Cisco IP desk phones. Some other telephone types and models are also in use to a limited extent. The data behind the desk phone itself resides in both the primary data center and the DR data center. The network circuits carry both voice and data, and are protected by redundant circuits. If desk phones lose connectivity, the user's computer would lose access to the network as well because both use the same network lines.

Separate servers handle call control and call center functions. The servers are configured in geographically dispersed clusters, offering high availability with fully-automated failover between data centers.

Some call centers have undergone cross-training and perform call sharing, mutually supporting each other during normal operations. This also allows one site to take all calls for the other site in the event that the other site goes down.

The following diagram illustrates the Molina telephony architecture.

Figure 2-5: [redacted]

Figure 2-6: Telephony Acronyms

Acronym	Meaning
AW	Admin Workstation
CER	Cisco Emergency Responder
CTL	CenturyLink
CUBE	Cisco Unified Border Element
CUCM	Cisco Unified Communications Manager
CUIC	Cisco Unified Intelligence Center

Acronym	Meaning
CUSP	Cisco Unified SIP Proxy
CVP	Cisco Unified Customer Voice Portal
DID	Direct Inward Dialing
ELM	Enterprise License Manager
HDS	Historical Data Server
HSRP	Hot Standby Router Protocol
ICM	Intelligent Contact Management
MML	Man-Machine Language
MPLS	Multiprotocol Label Switching
MR-PG	Media Routing Peripheral Gateway
PG	Peripheral Gateway
PRI	Primary Rate Interface
PSTN	Public Switched Telephone Network
SIP	Session Initiation Protocol
TDM	Time-Division Multiplexing
TFN	Toll-Free Number
TFTP	Trivial File Transfer Protocol
TTS	Text-to-Speech
UCCE	Cisco Unified Contact Center Enterprise
UWF	Upstream Works for Finesse
VLAN	Virtual Local Area Network
VXML	VoiceXML
VZ	Verizon
XML	Extensible Markup Language

3. Data Handling and Protection

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) sets security standards for the protection of Electronic Protected Health Information (ePHI), which is commonly known as the Security Rule. All customer data is protected by a variety of methods including processes and policies that are defined into the way that ePHI is handled. Upon request, the full policies or procedures can be provided by Molina.

3.1 Data Backup

Data backups are performed on a server by server basis, so there are some variations based on what is requested. But daily and weekly backups are performed. Typically, a full backup is performed every weekend ("weekly" backup). An incremental backup is performed nightly ("daily" backup). The first weekly backup of the month is identified as the monthly backup.

Symantec NetBackup is currently the primary backup software tool in use. Each backup is retained on local disk storage at the primary data center for 35 days, and duplicated to identical storage at the DR site where it is also retained for 35 days. The "weekly" that occurs on the first weekend of the month is designated as the "monthly" backup. In addition to being duplicated to the DR site for 35 days, it is also duplicated to encrypted tape and sent off-site for secure storage.

The encrypted backup tapes are picked up for off-site secure storage by Iron Mountain. An Iron Mountain representative comes to the primary data center on Wednesdays to pick up tapes. The tapes are transported in secured containers. The individual signs in, validates the containers being picked up and signs them out. Bringing tapes back for restoration follows the same procedure. Retrieval of tapes may be expedited upon request. Backup tapes are retained for 10 years.

Test restores are randomly conducted to validate data integrity and the ability to restore from tapes. Application teams also frequently request restores of production data to non-production environments for development purposes, further validating the ability to successfully restore from tape.

Further information pertaining to backup and restore procedures:

[redacted]

Iron Mountain tape hand off procedures:

[redacted]

3.2 *Replication Process*

In addition to the NetBackup, EMC's RecoverPoint solution is also being used for critical production SQL Server databases to be able to do geographically dispersed replication of the databases online. EMC RecoverPoint provides a continuous remote replication technology that uses software to "split" application writes to send each write to the designated storage volumes and to RecoverPoint Appliances (RPAs) on the source side, which then sends the writes to remote RPAs. Replicated data is contained in a journal volume on the RPAs then written to target volumes on the remote site. All application data is maintained in a consistency group that retains write-order dependencies across all volumes in the consistency group. Repository volumes are used to retain configuration data and allow an RPA to assume replication for a failed RPA for high-availability purposes. RecoverPoint runs on an out-of-band RPA and combines continuous data-protection with broadband efficient technology allowing it to protect data remotely. This solution will limit the time frame for potential data loss.

3.3 *Microsoft Exchange Server*

Microsoft Outlook, part of the Microsoft Office suite, is the email and calendar software solution used across the Molina enterprise. Outlook leverages data on Microsoft Exchange Server. The Exchange Server environment is completely virtual. The primary Exchange virtual machines (VMs) are hosted in the New Mexico Data Center (DC01), and redundant servers are located in the Unitas Global Richardson Data Center (DC02). Employee mailboxes are hosted on Exchange mailbox databases in Database Availability Groups (DAGs), a multi-copy, high availability solution that spans across the two data centers. There are no Exchange servers at local sites.

Microsoft Exchange Server is highly resilient, and can be fully or partially failed over to DC02. It can be operated with any combination of components running in New Mexico or Texas. The mailbox servers are also protected by weekly full and daily differential backups. Molina Healthcare corporate IT services provides all backup and restoration functions.

4. Molina IT Organization

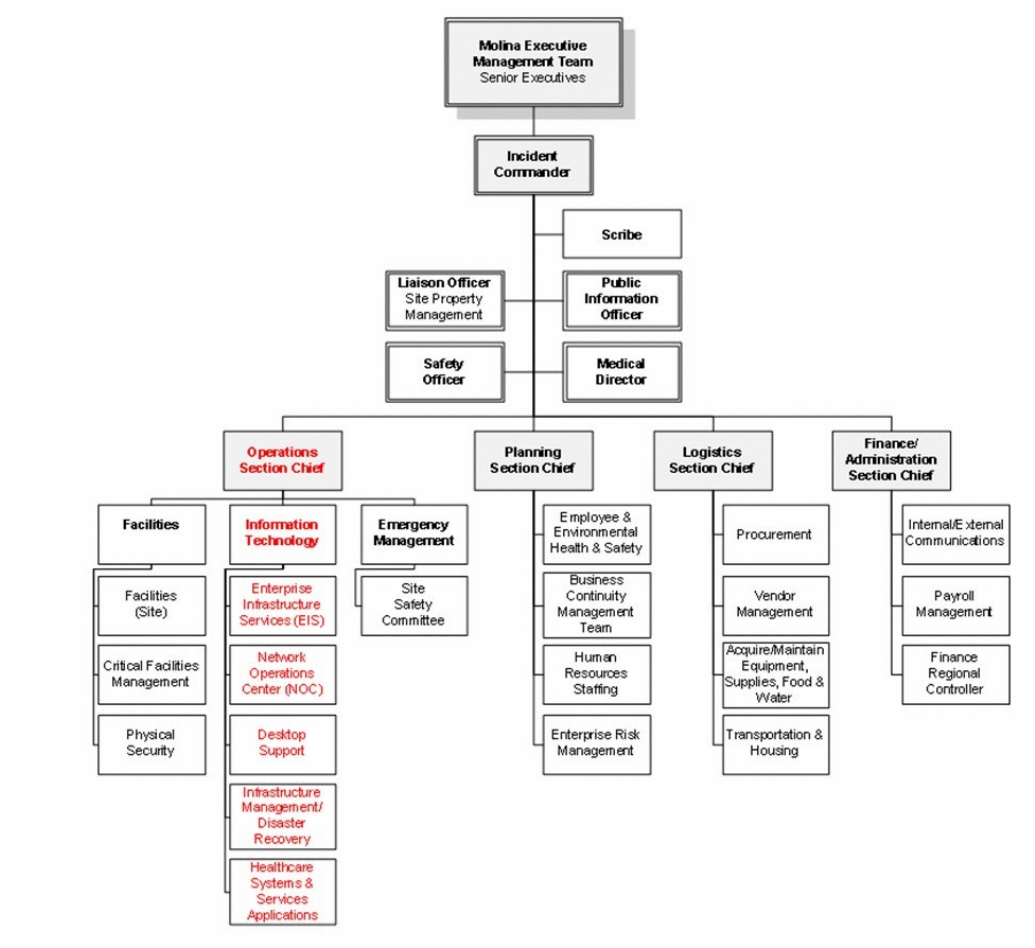
The below diagram represents the high-level functional organization of Molina's Enterprise Infrastructure Services (EIS) *as it pertains to disaster recovery*. The Disaster Recovery Team works with the Infrastructure as a Service (IaaS) and Platform as a Service (PaaS) Service Delivery and Service Operations groups for DR activities. DR testing and the invocation of the DR plan in an actual disaster situation primarily involve the Disaster Recovery Team working in concert with the IaaS and PaaS Service Operations teams.

Figure 4-1: [redacted]

5. DR Roles and Responsibilities

This section discusses the roles, responsibilities, and membership of the various teams involved in DR activities. Disaster recovery operations typically fall under the umbrella of the Incident Command System (ICS). The Disaster Recovery Team (DRT) is responsible for the recovery of IT systems in support of the Incident Management Team (IMT) and Business Continuity Team (BCT) recovering business functions.

Figure 5-1: IT Role in ICS Organization



5.1 Disaster Recovery Team (DRT)

5.1.1 DRT Responsibilities

Upon notification of a disaster, the Disaster Recovery Team (DRT) is responsible for all IT recovery efforts until completed. The overall role of the DRT is to analyze the damage to the primary data center and recommend the escalation to disaster status, if appropriate, in order to initiate the declaration process. The Disaster Recovery Analyst serves as a liaison between the EIS groups and coordinates IT recovery efforts. Responsibilities of the DRT and its members include the following:

- Contact the DR Coordinator to organize the movement of any and all materials and media required to the recovery location, including backup tapes, paper forms, and other hardware or software.
- Make the determination, depending on the extent of the damage, whether to begin the recovery effort at the affected facility or an alternate location.
- If the damage is extensive and restoration at the primary facility is not feasible, begin the process of moving to the alternate location.
- If necessary, coordinate logistics, including travel and lodging, for all employees involved in the recovery effort.
- Determine the status of the batch cycles, databases, backups, production deliverables, and the telecommunications network.
- Contact the DR Coordinator to determine the status of the DR environment needed for the recovery effort and assure appropriate priority is given to this validation.
- Implement the detailed recovery plan, including establishing priorities, as defined in the application disaster recovery documentation.
- The DRT will support recovery efforts throughout the recovery process. If recovery is at the alternate location, the DRT will also manage the transition to the alternate location.
- The DRT will support all restoration efforts at the operational sites and the New Mexico data center to move back from the alternate site once the disaster situation has passed.
- The DRT will also focus on the restoration of capabilities within the existing primary facility or determine the need for a new permanent facility location.

5.1.2 DRT Members

The membership of the DRT will vary depending upon the nature and extent of the disaster. Typical members include key staff drawn from within the Enterprise Infrastructure Services (EIS) organization, as shown below. If damage is localized, employees with specific expertise may also be included on the DRT.

- EIS Vice President
- EIS Associate Vice Presidents
- EIS Directors
- EIS Managers

- Disaster Recovery team

The IaaS Service Delivery and Service Operations groups each contain personnel with expertise in the traditional technology areas.

- Server Engineering
- Storage Engineering
- Backup and Restore Engineering
- Network Engineering
- Telephony Engineering
- Network Operations Center (NOC)
- Enterprise Service Desk

The PaaS Service Delivery and Service Operations groups each contain personnel with expertise in the following technology areas.

- Database Administration
- Business Automation Services
- Enterprise Monitoring Services

5.1.3 DRT Key Activities

The following outlines the key activities that take place after recognition of an incident or event and prior to a declaration of a disaster.

- Follow instructions when being notified of an incident or event.
- DRT will perform a business impact assessment of the IT infrastructure damage.
- Validate that the current version of the DR Plan is being referenced by all parties.
- Contact the HR manager for contact information if required.

The following outlines the key activities that take place during the initial 24 hours following the declaration of a disaster at the primary data center:

- NOC notifies DRT that a disaster has been declared.
- DRT arranges travel for DRT members and key personnel (if necessary).
- DRT and key personnel travel to the alternate site (if necessary).
- DRT begins redirecting network connections.
- DRT begins recovery of servers.
- DRT implements the recovery plan and verifies the application standup priority list.
- Key personnel set up operations units at the alternate site, as necessary.
- DRT conducts network verification to ensure performance at normal standards.
- DRT conducts system verification to ensure performance at normal standards.
- DRA notifies the DRT that systems are ready for production processing.

- Production operations resume at the alternate site.

5.2 Disaster Recovery Analyst (DRA)

The Disaster Recovery Analysts represent the leads at each site for both the recovery and restoration efforts, and serve as an overall lead.

5.2.1 DRA Responsibilities

The Disaster Recovery Analyst will coordinate all recovery and restoration activities at all sites through completion and provide updates to the DRT.

The DRA is responsible for the following activities:

- Coordinate and manage the DRAs for each site.
- Coordinate the failover of production to the alternate site.
- Assist with the recovery at the alternate site and the restoration of the operational facilities and the primary data center.
- Routinely report to the DRT the progress of restoration efforts, and communicate to any resources necessary for the successful restoration.
- Work with the DRT to coordinate the return of operations after a disaster to the recovered or new site when it is ready for production operations again.
- Assist with the recovery at the recovery site and the restoration of the permanent primary data center facility as necessary.
- Identify to the DRT the resources required for restoration of the permanent data center facility as necessary, including facility, hardware, software, personnel, and expendable supplies.
- Work with key members of the Molina Healthcare infrastructure and engineering teams to develop a detailed restoration plan for the restoration of the primary data center facility based on the findings of the DRT members.
- The DR Coordinator is responsible for supplying the DR Plan to all stakeholders, potential DRT members, and any other relevant parties upon the yearly update to this plan.

6. Communication Plan

The communication plan is the core portion of the Disaster Recovery and Business Continuity processes, as it serves to make sure that all of the parties are constantly updated on the status of the disaster and the recovery state. To do this Molina has some automated tools that help with the notification of a disaster, as well as with coordination of activities throughout the DR Lifecycle.

6.1 *Emergency Notification System*

Molina utilizes an automated notification system to send communication of events. The Molina Incident Notification System (MINS) is the vehicle to bring the DR teams together to start working on the recovery process. The system allows for the following:

- Creation of Users and Groups
- Multiple Notification Methods: Telephone, Email, SMS Text Message
- Managed Broadcasts
- Reporting: Broadcast, Ad Hoc

Messages may be broadcast to the entire company or designated groups, as appropriate. Notifications will typically be sent via email and telephone messages to staff participating in the disaster recovery procedures and other key stakeholders. The email or phone message will prompt the recipient to acknowledge receipt, which is then tracked. Emails from MINS will show the sender as Notifications@MolinaHealthcare.com.

6.2 *Status Emails*

Status emails may be sent as needed during the course of disaster recovery operations or testing. During testing, communications with the business users will be via MINS and initiated by the Business Continuity Management (BCM) team. The DR Coordinator will communicate with the infrastructure teams and the BCM team via email. The DR Coordinator will send status emails after milestone events, such as scheduled checkpoints, and at other times as required. Status emails will be sent more frequently if issues are encountered.

6.3 *Conference Bridges*

The Network Operations Center (NOC) will open a conference bridge upon disaster notification to serve as a focal communication outlet. During DR testing, two conference bridge lines will typically be opened for direct voice communications. The DR Coordinator and BCM team will each monitor one of the lines.

7. Disaster Identification and DR Plan Activation

Molina's DR plan addresses procedures for recovering from a disaster at the primary data center which renders one or more production applications unusable in the primary site.

Lower level system failures and localized system outages would be addressed through the normal production monitoring, notification, troubleshooting, and escalation procedures. As such, they would not normally warrant invocation of the DR plan. The DR plan would only be activated when a failure, whatever the cause, renders an application unusable in the primary data center. These failures may be procedurally categorized into two main types:

- A major disaster resulting in catastrophic damage to the primary data center.
- A technical issue that develops to the point where a decision is made to fail one or more applications over to the DR site.

A major disaster event at the primary data center would be quickly detected by Molina staff in New Mexico and/or the Network Operations Center (NOC) personnel who monitor systems 24 hours a day, seven days a week. The NOC would notify the Enterprise Service Desk and then follow the established troubleshooting, notification and escalation procedures to summon the appropriate on-call subject matter experts (SMEs). For complex issues, which certainly include a major disaster, the NOC would open a conference bridge to provide a central communication and collaboration venue. Damage assessment would be performed by the Critical Facilities Management team in New Mexico in conjunction with the IaaS Service Operations - Infrastructure staff located in New Mexico. Decisions would be made by senior management on how to meet the demands of the situation from within the framework of the Incident Command System (ICS). Data center recovery is beyond the scope of this document, but additional detail may be found in the primary data center Emergency Response Plan, available for on-site review upon request.

Since the probability of such a catastrophic event is very remote, a more realistic scenario would involve an issue that is detected and develops to the point where a decision is made to fail an application over to the DR site.

Detection of an incident or impending event affecting an application could be made by any number of Molina staff, but most likely, the NOC, the application support team, or a business user would be the first to identify it.

The ***Enterprise Service Desk*** is the single point of contact for reporting of all incidents. The initial response of any Molina employee or business user detecting an issue should be to call the Service Desk at [redacted]. The Service Desk technician will follow the established procedures to document, diagnose and remediate the issue.

If the Service Desk technician is unable to resolve the issue or determines that it is a Severity 1 incident and requires escalation, he or she will follow the prescribed procedures to notify the NOC [redacted].

If the NOC is the first to identify the issue, the NOC would also notify the Service Desk and proceed to follow the NOC's established triage, notification and escalation procedures, summoning the appropriate EIS and application on-call personnel. The NOC would open and maintain a bridge line for team collaboration.

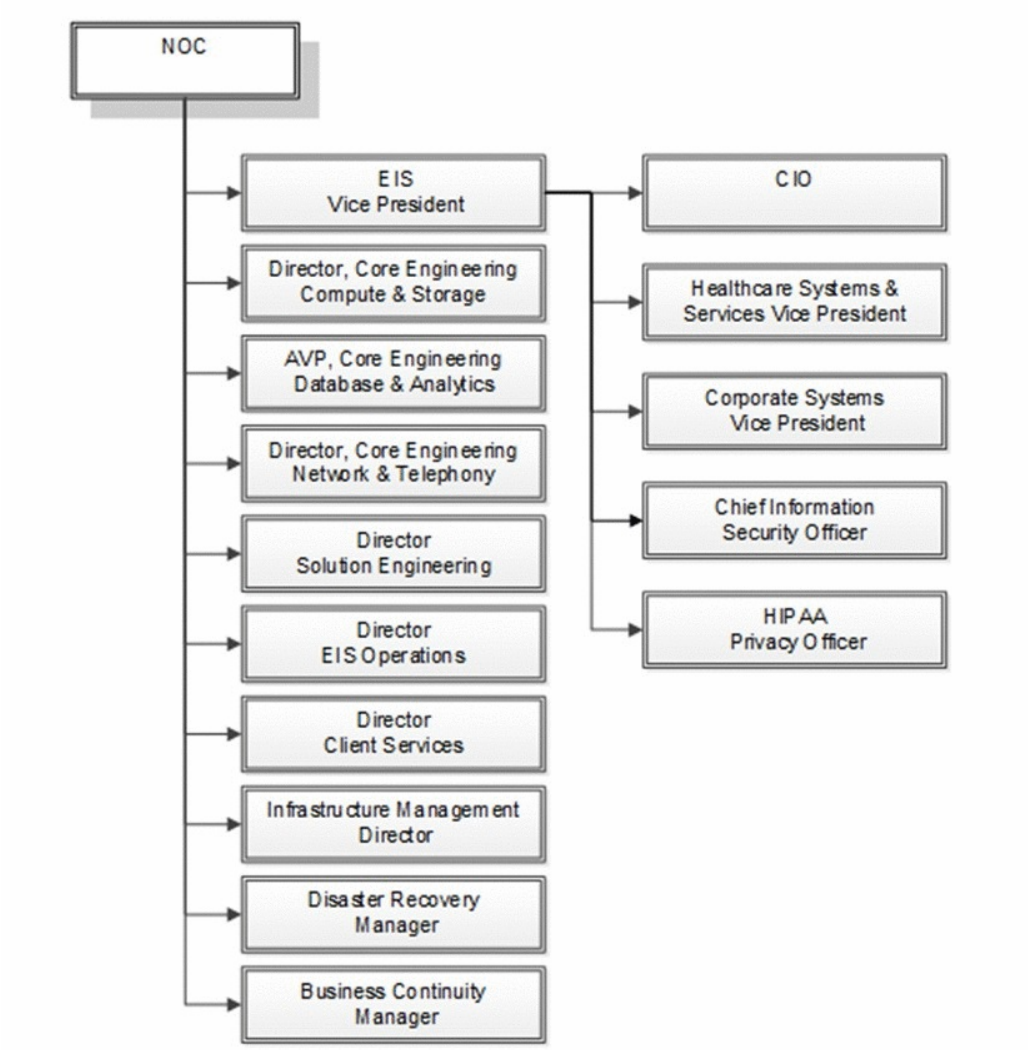
As part of the troubleshooting procedures, infrastructure and application management are notified and engaged. Management personnel would reach out to the business community as appropriate. The decision to fail over an application to the DR site is the outcome of collaboration between the infrastructure, application, and business teams. Failover execution does not necessarily involve the formal declaration of a disaster. Formal declaration of disaster can only be made by senior executive leadership.

7.1 [redacted]

[redacted] [1]

[1] two pages have been redacted in their entirety

Figure 7-1: Disaster Recovery Call Tree



Once the initial notification occurs, the Molina Network Operations Center (NOC) takes on the task of making sure that the DR communication flow is maintained, working with the DR Team.

Corporate Communications will work with the Public Relations department and site communications to address media, legislative and regulatory inquiries. The Public Relations department is the only group authorized to communicate with the media in cases of emergencies that impact the company.

7.2 Disaster Scenarios

The DR plan may be activated in the event of:

- A major disaster resulting in catastrophic damage to the primary data center.
- Damage or a technical issue of any type that renders an application unusable in the primary data center.

Recovery of the most critical systems should generally be achieved in [redacted]. Data loss could range from milliseconds for replicated data to [redacted] for systems restored from backup.

Transactions at the time of outage.

Data keyed in by a user (Molina employee or business user) that has not yet been backed up or replicated will be lost and will have to be re-entered per the department's manual procedures. Data replication is near real-time, however, there is a slight lag, so some data loss may occur. File transfers or batch processing in transit at the time of an outage may have to be re-sent.

Compromise of the integrity of production data.

If production data appears to have been lost, the replicated data in DR would be evaluated to determine if it were there. If it indeed was, the missing data would be restored to the production environment rather than failing over to the DR environment. For corruption of production data, the approach to restoration would be to restore from backup, not invoke the DR plan. Corrupt production data would be replicated to DR as corrupt data. If the backup is corrupt, it would be necessary to go to the latest clean backup copy.

Unscheduled system unavailability.

The most common reasons for unscheduled system unavailability would be a network outage or an application or hardware issue that would be handled by troubleshooting and resolving as a *production issue*, not invoking the DR plan. A production issue *could* possibly escalate into a major issue which could warrant executing the DR plan, as previously noted. Molina utilizes redundant network circuits from different vendors to mitigate the risk of a network outage. Failure of a vendor-managed circuit is outside of Molina's control.

Malicious acts

Molina's IT Security department has a Security Operations Center (SOC) that monitors systems for unusual activity around the clock. Processes and procedures are in place to prevent malicious acts and to remediate them when detected. The *Information Security Incident Response Plan* documents the steps to take for remediation. For *malicious acts* by internal workforce members, this includes engaging the individual's supervisor, and the Human Resources and HIPAA Program Management Office teams, in addition to the SOC's investigation. The individual will be closely monitored, and the user account will be disabled if necessary. Disciplinary measures, and possibly legal action, will be taken where appropriate. The workforce member's workload will be distributed among the other members of his or her team to ensure continuity of operations.

The SOC maintains constant vigilance for *malware* attacks. For suspected malware infections, the Computer Incident Response Team (CIRT) will investigate. For desktop or laptop computers, the infected device will be quarantined, a forensic analysis will be performed, and the computer will be reimaged. For servers, the infected server will also be quarantined, to include eviction from any cluster it may be a part of. Cluster resources will be distributed across the remaining nodes. If the scale of the malware intrusion warrants it, systems may be failed over to the DR site. In all malware incidents, the CIRT will conduct a thorough investigation.

7.3 Restoration to the Primary Site

Restoration mode is the return to normal operations of the actual production environment, either to the existing primary site or to a new facility. The procedures to restore operations to the primary data center are analogous to those followed to fail systems over to the DR site. Once the primary site is available, replication will be initiated from the DR site back to the primary site. Backup copies will also be sent to the primary site. At an agreed upon time, fail back procedures are executed. Restoration of the most critical systems should generally be accomplished in [redacted].

Appendix A: DR Test Results

Result details of the annual DR test are contained in a separate document.

SCHEDULE 24

CERTAIN SECURITY REQUIREMENTS

CONTENTS

1. DEFINITONS

Capitalized terms used but not defined in this Schedule shall have the meanings given in Schedule 1 (*Definitions and Interpretation*) to this Agreement.

2. INTRODUCTION

2.1 This Schedule sets out certain security requirements with which the Service Provider must comply in connection with the Services.

2.2 Nothing in this Schedule relieves the Service Provider of any of its obligations under this Agreement or any Project Work Order, or requires any Other Service Provider to perform any of the Service Provider's obligations under this Agreement or any Project Work Order, including not limiting the Service Provider's obligation to comply with Policies as set out in this Agreement. Nothing in this Schedule, including references to principles or to evaluations of circumstances and practices by the Service Provider, shall relieve the Service Provider from performing any of its other obligations in the Agreement (including as may be set out in the Policies).

3. INFORMATION SECURITY OBLIGATIONS

3.1 The Service Provider shall designate a Security Official to oversee and direct the Service Provider's information security program and ensure that the information security obligations contained herein are adhered to.

3.2 The Service Provider shall have implemented and documented reasonable and appropriate administrative, technical, and physical safeguards to protect Molina Data and In-Scope Personal Data against accidental or unlawful destruction, alteration, unauthorized or improper disclosure or access. The Service Provider shall monitor access to, use and disclosure of Molina Data and In-Scope Personal Data whether in physical or electronic form. The Service Provider shall regularly test and monitor the effectiveness of its safeguards, controls, systems and procedures. The Service Provider shall periodically identify reasonably foreseeable internal and external risks to the security, confidentiality, integrity, and availability of Molina Data and In-Scope Personal Data, and ensure that these risks are addressed. The Service Provider shall use secure user identification and authentication protocols, including, but not limited to unique user identification, use of appropriate access controls, and strict measures to protect identification and authentication processes.

3.3 Prior to allowing any employee or contractor to access, use, transmit, store, modify, or process any Molina Data and In-Scope Personal Data, the Service Provider shall (i) conduct an appropriate background investigation of the individual (and receive an acceptable response),

(ii) require the individual to execute an enforceable confidentiality agreement that has at least as stringent requirements regarding In-Scope Personal Data as this Schedule, and (iii) provide the individual with appropriate privacy and security training. The Service Provider shall also monitor its workers for compliance with the security program requirements. Upon request following the unauthorized access to, or use or modification of, any Molina Data and In-Scope Personal Data, the Service Provider shall provide to Molina a list of all individuals who have (or have had) relevant access to the applicable data.

3.4 If the access, use, transmission, storage or processing of Molina Data and In-Scope Personal Data involves the transmission of In-Scope Personal Data, the Service Provider shall have implemented appropriate supplementary measures to protect such In-Scope Personal Data against the specific risks presented by such activity, including, but not limited to, the transmission of Molina Data and In-Scope Personal Data only in an encrypted format in accordance with the U.S. Department of Health and Human Services' Guidance to Render Unsecured Protected Health Information Unusable, Unreadable, or Indecipherable to Unauthorized Individuals. If the In-Scope Personal Data is stored on systems with direct connections to wireless, insecure or public networks, the Service Provider shall encrypt all In-Scope Personal Data stored on such systems in accordance with the U.S. Department of Health and Human Services' Guidance to Render Unsecured Protected Health Information Unusable, Unreadable, or Indecipherable to Unauthorized Individuals and as further described in the Annual Security Plan.

3.5 The Service Provider shall cause all portable or mobile devices or media (including, without limitation, laptop computers, removable hard disks, USB or flash drives, personal digital assistants (PDAs) or mobile phones, DVDs, CDs or computer tapes) used in connection with the provision of the Services to be encrypted in accordance with the U.S. Department of Health and Human Services' Guidance to Render Unsecured Protected Health Information Unusable, Unreadable, or Indecipherable to Unauthorized Individuals. The Service Provider shall not store In-Scope Personal Data on any portable or mobile devices or media (including, without limitation, laptop computers, removable hard disks, USB or flash drives, personal digital assistants (PDAs) or mobile phones, DVDs, CDs or computer tapes) unless the In-Scope Personal Data is encrypted in accordance with the U.S. Department of Health and Human Services' Guidance to Render Unsecured Protected Health Information Unusable, Unreadable, or Indecipherable to Unauthorized Individuals.

3.6 Upon Molina's request, the Service Provider shall provide Molina with information about the Service Provider's information security program. The Service Provider shall also submit to a review of its security program by Molina or its designees, which shall be carried out by Molina (or by an independent inspection company designated by Molina). The Service Provider shall reasonably cooperate with any such review. In the event that the review under such a review reveals material gaps or weaknesses in the Service Provider's security program, Molina shall

notify the Service Provider promptly and shall be entitled to suspend transmission of Molina Data and In-Scope Personal Data to the Service Provider and suspend the portion of the Services involving the impacted Molina Data and In-Scope Personal Data until such gap or weakness is eliminated to Molina's satisfaction.

3.7 The Service Provider shall promptly and thoroughly investigate all allegations, suspicions, and potential and actual discoveries of unauthorized or improper access to, use, modification, disclosure or destruction (collectively, a "Security Incident") of the Molina Data and In-Scope Personal Data, especially those involving In-Scope Personal Data, under the control of the Service Provider or Subcontractors. The Service Provider shall notify Molina promptly of any Security Incident, including Security Breaches, but no later than the sooner of (a) the notification requirement set out in the applicable BAA and (b) twenty-four (24) hours after it is discovered. Molina's designated form of BAA is set forth in Attachment 24A.

3.8 When the Service Provider ceases to perform Services for Molina or upon termination of the applicable data retention period specified in the Agreement or by Applicable Law for Molina Data and In-Scope Personal Data required to be retained by the Service Provider after termination of the Services, the Service Provider shall either (i) return such Molina Data and In-Scope Personal Data (and all media containing copies thereof) to Molina, or, at Molina's request, (ii) purge, delete and destroy the applicable Molina Data and In-Scope Personal Data. Electronic media containing Molina Data and In-Scope Personal Data shall be disposed of by the Service Provider in a manner that renders such Molina Data and In-Scope Personal Data unrecoverable. Upon written request, the Service Provider shall provide Molina with a certificate executed by an officer of the Service Provider to certify its compliance with this provision. If required by Applicable Law or by the Agreement, the Service Provider may retain an archival copy of such Molina Data and In-Scope Personal Data as and for the period required by the Applicable Law or Agreement. Such archival copy shall not be used or disclosed for any purpose except for disclosures to Molina upon request or as required by Applicable Law. All other terms and conditions of this Schedule shall survive for so long as the Service Provider has not returned such archival copy to Molina or securely destroyed it in accordance with this Schedule.

3.9 The Service Provider shall comply with the requirements set forth in Attachment 24B in connection with the Services.

310 The Service Provider shall comply with the requirements set forth in Attachment 24C in connection with the Services.

3.11 Without prejudice to anything else contained in the Agreement or this Schedule, the Service Provider shall at all times comply with Molina's Security Policies, as set out in Schedule 14 (*Molina Policies*) and with NIST SP800-53, NY DFS Cybersecurity and HIPAA.

Attachment 24A

Business Associate Agreement

[Note: See following pages

BUSINESS ASSOCIATE AGREEMENT

This Business Associate Agreement (this "BAA"), effective Select Date (the "Effective Date"), is entered into by and between Infosys Ltd (the "Business Associate") and Molina Healthcare, Inc., its subsidiaries and affiliates (the "Company") (each a "Party" and collectively the "Parties").

WHEREAS, the Parties have engaged or intend to engage in one or more agreements (each, an "Agreement" and collectively, the "Agreements") which may require the use or disclosure of PHI in performance of services described in such Agreement or Agreements (the "Services") on behalf of the Company;

WHEREAS, the Parties are committed to complying with the Health Insurance Portability and Accountability Act of 1996 ("HIPAA") and the Health Information Technology for Economic and Clinical Health Act ("HITECH") and any regulations promulgated thereunder (collectively the "HIPAA Rules"); and

WHEREAS, this BAA, in conjunction with the HIPAA Rules, sets forth the terms and conditions pursuant to which protected health information (in any format) that is created, received, maintained, or transmitted by, the Business Associate from or on behalf of the Company, will be handled between the Business Associate and the Company and with third parties during the term of the Agreement(s) and after its termination.

NOW THEREFORE, the Parties agree as follows:

1. DEFINITIONS

Unless otherwise provided for in this BAA, terms used in this BAA shall have the same meanings as set forth in the HIPAA Rules including, but not limited to the following: "Availability," "Confidentiality," "Data Aggregation," "Designated Record Set," "Health Care Operations," "Integrity," "Minimum Necessary," "Notice of Privacy Practices," "Required By Law," "Secretary," and "Subcontractor." Specific definitions are as follows:

"Breach" shall have the same meaning as the term "breach" at 45 CFR 164.402.

"Business Associate" shall have the same meaning as the term "business associate" at 45 CFR 160.103 and in reference to the party to this BAA, shall mean the first party listed in the first paragraph of this BAA.

"Compliance Date" shall mean, in each case, the date by which compliance is required under the referenced provision of the HIPAA, the HITECH Act or the HIPAA Rules, as applicable; provided that, in any case for which that date occurs prior to the effective date of this BAA, the Compliance Date shall mean the effective date of this BAA.

"Electronic Protected Health Information" or "Electronic PHI" shall have the same meaning as the term "electronic protected health information" at 45 CFR 160.103.

"HIPAA Rules" shall mean the Privacy, Security, Breach Notification, and Enforcement Rules at 45 CFR Part 160 and Part 164.

"Protected Health Information" or "PHI" shall have the same meaning as the term "protected health information" at 45 CFR 160.103.

"Privacy Rule" means the Standards for Privacy of Individually Identifiable Health Information, set forth at 45 CFR Parts 160 and 164.

"Security Incident" shall have the same meaning as the term "security incident" at 45 CFR 164.304.

"Security Rule" means the Security Standards for the Protection of Electronic Protected Health Information, set forth at 45 CFR Parts 160 and 164.

"Services" shall mean, to the extent and only to the extent they involve the creation, use or disclosure of PHI, the services provided by the Business Associate to the Company under the Agreement(s), including those set forth in this BAA, as amended by written consent of the parties from time to time.

"Unsecured PHI" shall have the same meaning as the term "unsecured Protected Health Information" at 45 CFR 164.402.

2. GENERAL PROVISIONS

2.1 Effect. This BAA supersedes any prior business associate agreement between the Parties and those portions of any Agreement between the Parties that involve the disclosure of PHI by the Company to Business Associate. To the extent any conflict or inconsistency between this BAA and the terms and conditions of any Agreement exists, the terms of this BAA shall prevail.

2.2 Amendment. The Company may, without Business Associate's consent, amend this BAA to maintain consistency and/or compliance with any state or federal law, policy, directive, regulation, or government sponsored program requirement, upon forty-five (45) business days' notice to the Business Associate unless a shorter timeframe is necessary for compliance. The Company may otherwise materially amend this BAA only after forty-five (45) business days prior written notice to the Business Associate and only if mutually agreed to by the parties as evidenced by the amendment being executed by each party hereto. If the Parties fail to execute a mutually agreeable amendment within forty-five (45) days of the Business Associate's receipt of the Company's written notice to amend this BAA, the Company shall have the right to immediately terminate this BAA and any Agreement(s) between the Parties which may require the Business Associate's use or disclosure of PHI in performance of services described in such Agreement(s) on behalf of the Company.

3. SCOPE OF USE AND DISCLOSURE

3.1 The Business Associate may use or disclose PHI as required to provide Services and satisfy its obligations under the Agreement(s), if such use or disclosure of PHI would not violate the Privacy Rule.

3.2 The Business Associate may not use or further disclose PHI in a manner that would violate the Privacy Rule if done by the Company, except that the Business Associate may use or disclose PHI as necessary:

a. for the proper management and administration of the Business Associate as provided in Section 3.3; and

b. to provide Data Aggregation services relating to the Health Care Operations of the Company if required under the Agreement.

3.3 The Business Associate may use or disclose PHI for the proper management and administration of the Business Associate or to carry out the legal responsibilities of the Business Associate. Any disclosures of PHI under this section may be made only if:

a. the disclosures are required by law, or

b. the Business Associate obtains reasonable assurances from the person to whom the PHI is disclosed that the PHI will remain confidential and used or further disclosed only as required by law or for the purposes for which it was disclosed to the person, and the person notifies the Business Associate of any instances of which it is aware in which the confidentiality of the PHI has been breached.

3.4 The Business Associate shall not request, use or release more than the Minimum Necessary amount of PHI required to accomplish the purpose of the use or disclosure and shall comply with 42 U.S.C. § 17935(b) as of its Compliance Date. The Business Associate hereby acknowledges that all PHI created or received from, or on behalf of, the Company, is as between the parties, the sole property of the Company.

3.5 The Business Associate or its agents or Subcontractors shall not perform any work outside the United States of America that involves access to, use of, or disclosure of, PHI without the prior written consent of the Company in each instance.

4. OBLIGATIONS OF THE BUSINESS ASSOCIATE

The Business Associate shall:

4.1 Not use or disclose PHI other than permitted or required by this BAA or as Required by Law.

4.2 Establish and use appropriate safeguards to prevent the unauthorized use or disclosure of PHI.

4.3 Implement administrative, physical, and technical safeguards that reasonably and appropriately protect the Confidentiality, Integrity, and Availability of the Electronic PHI that it creates, receives, maintains, or transmits on behalf of the Company. The Business Associate shall, as of the Compliance Date, comply with the applicable standards at Subpart C of 45 CFR Part 164.

4.4 Promptly report to the Company any unauthorized use or disclosure of PHI, Breach of Unsecured PHI, or Security Incident, within no more than five (5) days, after Business Associate becomes aware of the unauthorized use or disclosure of PHI, Breach of Unsecured PHI or Security Incident. The Business Associate shall take all reasonable steps to mitigate any harmful effects of such unauthorized use or disclosure, Breach of Unsecured PHI, or Security Incident. The Business Associate shall indemnify the Company against any losses, damages, expenses or other liabilities including reasonable attorney's fees incurred as a result of the Business Associate's or its agent's or Subcontractor's unauthorized use or disclosure of PHI, Breach of Unsecured PHI, or Security Incident, including, but not limited to, the costs of notifying individuals affected by a Breach of Unsecured PHI. Indemnification is subject to an ability to demonstrate that no agency relationship exists between the parties.

4.5 The Business Associate shall, following discovery of a Breach of Unsecured PHI, notify the Company of such Breach as required at 45 CFR 164.410, without unreasonable delay, and in no event more than thirty (30) days after the discovery of the Breach. The notification by the Business Associate to the Company shall include: (1) the identification of each individual whose Unsecured PHI was accessed, acquired, used or disclosed during the Breach; and (2) any other available information that the Company is required to include in its notification to individuals affected by the Breach including, but not limited to, the following:

a. a brief description of what happened, including the date of the Breach and the date of the discovery of the Breach;

b. a description of the types of Unsecured PHI that were involved in the Breach; and

c. a brief description of what the Business Associate is doing to investigate the Breach, to mitigate harm to individuals, and to protect against any further Breaches.

4.6 In accordance with 45 CFR 164.502(e)(1)(ii) and 164.308(b)(2), if applicable, ensure that any Subcontractors or agents that create, receive, maintain, or transmit PHI on behalf of the Business Associate agree to the same restrictions, conditions, and requirements that apply to the Business Associate with respect to such information.

4.7 Within ten (10) days of receiving a request, make available PHI in a Designated Record Set to the Company as necessary to satisfy the Company's obligations under 45 CFR 164.524.

4.8 Within fifteen (15) days of receiving a request, make any amendment(s) to PHI in a Designated Record Set as directed or agreed to by the Company pursuant to 45 CFR 164.526.

4.9 Maintain and make available to the Company, within twenty (20) days of receiving a request, the information required to provide an accounting of disclosures to the individual as necessary to satisfy the Company's obligations under 45 CFR 164.528.

4.10 Make its internal practices, books and records relating to the use or disclosure of PHI received from or on behalf of the Company available to the Company or the U. S. Secretary of Health and Human Services for purposes of determining compliance with the HIPAA Rules.

4.11 To the extent the Business Associate conducts Standard Transaction(s) (as defined in the HIPAA Rules) on behalf of the Company, Business Associate shall comply with the HIPAA Rules, "Administrative Requirements," 45 C.F.R. Part 162, by the applicable compliance date(s) and shall not: (a) change the definition, data condition or use of a data element or segment in a standard; (b) add any data elements or segments to the maximum defined data set; (c) use any code or data elements that are either marked "not used" in the standard's implementation specification or are not in the standard's implementation specification(s); or (d) change the meaning or intent of the standard's implementation specifications. The Business Associate shall comply with any applicable certification and compliance requirements (and provide the Secretary with adequate documentation of such compliance) under subsection (h) of Title 42 U.S.C. Section 1320d-2.

4.12 To the extent the Business Associate is to carry out one or more of the Company's obligation(s) under Subpart E of 45 CFR Part 164, comply with the requirements of Subpart E that apply to the Company in the performance of such obligation(s).

5. MISCELLANEOUS

5.1 Indemnification. In addition to any indemnities set forth in the Agreement(s), each party will indemnify and defend the other party from and against any and all third party claims, losses, damages, expenses or other liabilities (including reasonable attorney's fees) incurred as a result of any breach by such party of any representation, warranty, covenant, agreement or other obligation expressly contained herein by such party, its employees, agents, Subcontractors or other representatives.

5.2 Interpretation. Any ambiguity in this BAA shall be interpreted to permit compliance with the HIPAA Rules.

5.3 No Third Party Beneficiaries. Nothing express or implied in this BAA is intended to confer, nor shall anything herein confer, upon any person other than the Parties and the respective successors or assigns of the Parties, any rights, remedies, obligations, or liabilities whatsoever.

5.4 Governing Law and Venue. This BAA shall be governed by California law notwithstanding any conflicts of law provisions to the contrary. The venue shall be Los Angeles, California.

5.5 Notices. Any notices to be given hereunder to a Party shall be made via certified U.S. Mail or express courier to such Party's address given below, and/or (other than for the delivery of fees) via facsimile to the facsimile telephone numbers listed below:

If to Business Associate, to:	**If to the Company, to:**
Infosys Ltd	Molina Healthcare, Inc.
2400 N Glenville Dr	200 Oceangate, Suite 100
Richardson, TX 75082	Long Beach, CA 90802
Attn: General Counsel	Attn: Privacy Official
Fax:	Fax: 562-499-0789

6. TERM AND TERMINATION OF BAA

6.1 Term. The Term of this BAA shall be effective as of the effective date set forth in the first paragraph of this BAA, and shall terminate on date that the last Agreement remaining in force between the parties is terminated or expires, or on the date the Company terminates for cause as authorized in paragraph 6.2 below, whichever is sooner.

6.2 Termination for Cause. Notwithstanding any other provision of this BAA or the Agreement(s), the Company may terminate this BAA and any or all Agreement(s) upon five (5) days written notice to Business Associate if the Business Associate has violated a material term of this BAA and fails to cure its breach within thirty (30) days after receiving written notice of the breach.

6.3 Obligations of Business Associate Upon Termination. Upon termination of this BAA for any reason, Business Associate shall return to the Company or, if agreed to by the Company, destroy all PHI received from the Company, or created, maintained, or received by Business Associate on behalf of the Company, that the Business Associate still maintains in any form. If PHI is destroyed, Business Associate agrees to provide the Company with certification of such destruction. Business Associate shall not retain any copies of PHI except as Required By Law. If return or destruction of all PHI, and all copies of PHI, received from the Company, or created, maintained, or received by Business Associate on behalf of the Company, is not feasible, Business Associate shall:

a. Continue to use appropriate safeguards and comply with Subpart C of 45 CFR Part 164 with respect to Electronic PHI to prevent use or disclosure of the PHI, other than as provided for in this Section 6, for as long as Business Associate retains the PHI; and

b. Not use or disclose the PHI retained by Business Associate other than for the purposes for which such PHI was retained and subject to the same conditions set forth in Section 3 above which applied prior to termination.

6.4 Survival. The obligations of Business Associate under this Section shall survive the termination of this BAA and remain in force as long as Business Associate stores or maintains PHI in any form or format (including archival data). Termination of the BAA shall not affect any of the provisions of this BAA that, by wording or nature, are intended to remain effective and to continue in operation.

Attachment 24B

Certain Information Security Requirements

[Note: See following pages]

1. Network Security.

Contractor agrees at all times to maintain network security that–at a minimum –includes: network firewall provisioning, intrusion and threat detection, and regular third party vulnerability assessments upon request of the Client (no more frequently than once every six months). Contractor agrees to maintain network security that conforms to generally recognized industry standards and best practices that Contractor shall apply to its own network (refer to “12. Industry Standards”).

2. Application Security.

Contractor agrees at all times to provide, maintain, and support its software and subsequent updates, upgrades, and bug fixes such that the software is, and remains, secure from those vulnerabilities in accordance with industry practices or standards.

3. Data Security.

Contractor agrees to preserve the confidentiality, integrity and accessibility of Client data with administrative, technical and physical measures that conform to generally recognized industry standards and best practices that Contractor then applies to its own processing environment (refer to “12. Industry Standards”). Maintenance of a secure processing environment includes but is not limited to the timely application of patches, fixes and updates to operating systems and applications as provided by Contractor or open source support.

4. Data Storage.

Contractor agrees that any and all Client data will be stored, processed, and maintained solely on designated target servers and that no Client data at any time will be processed on or transferred to any portable or laptop computing device or any portable storage medium, unless that device or storage medium is in use as part of the Contractor's designated backup and recovery processes and encrypted (refer to “6. Data Encryption”).

5. Data Transmission.

Contractor agrees that any and all electronic transmission or exchange of system and application data with Client and/or any other parties expressly designated by Client shall take place via secure means (using HTTPS or SFTP or equivalent) and, if applicable, solely in accordance with Federal Information Processing Standard Publication 140-2 (“FIPS PUB 140-2”) and Section 7 (Data Re-Use).

6. Data Encryption.

Contractor agrees to store all Client backup data as part of its designated backup and recovery processes in encrypted form, using a commercially supported encryption solution. Contractor further agrees that any and all Client data defined as personally identifiable information under current legislation or regulations stored on any portable or laptop computing device or any portable storage medium be likewise encrypted. Encryption solutions will be deployed with no

less than a 128-bit key for symmetric encryption, a 1024 (or larger) bit key length for asymmetric encryption, and FIPS PIB 140-2.

7. Data Re-Use.

Contractor agrees that any and all data exchanged shall be used expressly and solely for the purposes enumerated in the Current Agreement and this Addendum. Data shall not be distributed, repurposed or shared across other applications, environments, or business units of the Contractor. Contractor further agrees that no Client data of any kind shall be transmitted, exchanged or otherwise passed to other Contractors or interested parties except on a case-by-case basis as specifically agreed to in writing by the Client.

8. End of Agreement Data Handling.

Contractor agrees that upon termination of this Agreement and upon Client's written approval it shall erase, destroy, and render unrecoverable all Client data and certify in writing that these actions have been completed within thirty (30) days of the termination of this Agreement or within seven (7) days of the request of an agent of the Client, whichever shall come first. At a minimum, a "Clear" media sanitization is to be performed according to the standards enumerated by the National Institute of Standards and Technology ("NIST") Guidelines for Media Sanitization (SP800-88, Appendix A).

9. Security Breach Notification.

Contractor agrees to comply with all applicable laws that require the notification of Client, in the event of an unauthorized disclosure or breach of information or other events requiring notification. Client will then decide on further action including, but not limited to, notification to effected individuals or government entities. In the event of a breach of any of Contractor's security obligations, or other events requiring notification under applicable law, Contractor agrees to:

a. Notify the Client Chief Information Security Officer by telephone and email of such an event within twenty-four (24) hours of discovery;

b. Upon Client's prior written request, assume responsibility for informing all such individuals in accordance with applicable law; and

c. Indemnify, hold harmless and defend Client and its trustees, officers, and employees from and against any claims, damages, or other harm related to such event.

10. Right to Audit

The Client or a client-appointed audit firm ("Auditors") has the right to audit the Contractor and the Contractor's sub-contractors or affiliates that provide a service for the processing, transport or

storage of Client's data. Client will announce their intent to audit the Contractor by providing at a minimum of ten (10) business days' notice to the Contractor. This notice will go to the Contractor that this contract is executed with. A scope document along with a request for deliverables will be provided at the time of notification of an audit. If the documentation requested cannot be removed from the Contractor's premises, the Contractor will allow the Client or Auditors access to their site or share on the desktop screen in an audio-video conference. Where necessary, the Contractor will provide a personal site guide for the Client or Auditors while on site. If site visit is necessary, the Contractor will provide a private workspace on site with electrical and internet connectivity for data review, analysis and meetings. The Contractor will make necessary employees or contractors available for interviews in person or on the phone during the time frame of the audit.

In lieu of the Client or its appointed audit firm performing their own audit, if the Contractor has an external, independent audit firm that performs a certified SOC or HITRUST review, the Client has the right to review the controls tested as well as the results, and has the right to request additional controls to be added to the certified SOC or HITRUST review for testing the controls that have an impact on Client data. Audits will be at the Client's sole expense, except where the audit reveals material noncompliance with contract specifications, in which case the cost will be borne by the Contractor.

11. Contractor Warranty

Contractor (i) warrants that the services provided in this agreement will be in substantial conformity with the information provided in Contractor's response to the Client's Due Diligence/Security Assessment questionnaire and that Contractor's response to the Client's Due Diligence/Security Assessment questionnaire is accurate as of the date of such response; (ii) agrees to inform Client promptly of any material variation in operations from that reflected in the Contractor's response to the Client's Due Diligence/Security Assessment; and (iii) agrees that any material deficiency in operations from those as described in the Contractor's Response to the Client's Due Diligence/Security Assessment questionnaire will be deemed a material breach of this agreement.

12. Industry Standards

Generally recognized industry standards include but are not limited to the current standards and benchmarks set forth and maintained by the:

a. Center for Internet Security - http://www.cisecurity.org

b. Payment Card Industry/Data Security Standards ("PCI/DSS") - http://www.pcisecuritystandards.org/

c. National Institute for Standards and Technology (NIST 800-53) - http://csrc.nist.gov

d. Federal Information Security Management Act ("FISMA") - http://csrc.nist.gov

e. ISO/IEC 27000-series - http://www.iso27001security.com/

f. HIPAA and HITECH

g. Federal Risk and Authorization Management Program (“FedRamp”)

Attachment 24C

Certain Cybersecurity Requirements

[Note: See following pages]

1. Client is required by law to implement a Cybersecurity Program that, among other things:

A. protects the confidentiality, integrity, and availability of its Information Systems;

B. identifies and assesses internal and external cybersecurity risks that may threaten its Nonpublic Information stored on its Information Systems;

C. uses defensive infrastructure and implements policies and procedures to protect its Information Systems and Nonpublic Information from unauthorized access, use or malicious acts;

D. detects Cybersecurity Events;

E. responds to identified or detected Cybersecurity Events;

F. recovers and restores normal operations; and

G. fulfills applicable regulatory reporting obligations.

2. As part of its Cybersecurity Program, Client is also required by law to ensure the security of its Information Systems and Nonpublic Information accessible to or held by Third Party Service Providers ("TPSPs") such as Contractor. Therefore, TPSPs must have, and permit Client to audit via written request, the cybersecurity measures, safeguards and standards used by such TPSPs including, but not limited to, the policies, procedures and practices:

A. Delineating access controls, including Multi-Factor Authentication, to limit access to Client's Information Systems and Nonpublic Information accessible to or held by the TPSP;

B. Using encryption to protect Client's Nonpublic Information, in transit and at rest, accessible to or held by the TPSP;

C. Requiring notice to be provided to Client if a Cybersecurity Event threatens or affects Client's Information Systems or Nonpublic Information accessible to or held by the TPSP. Such notice must be provided to Client within seventy-two (72) hours from a determination that a Cybersecurity Event has occurred that is either of the following:

(i) Cybersecurity Events impacting Client of which notice is required to be provided to any government body, self-regulatory agency or any other supervisory body; or

(ii) Cybersecurity Events that have a reasonable likelihood of materially harming any material part of the normal operation(s) of Client; and

D. Ensuring the security of Client's Information Systems and Nonpublic Information accessible to or held by the TPSP.

Defined terms in this Attachment 24C:

"Affiliate" means any Person that controls, is controlled by or is under common control with another Person. For purposes of this subsection, control means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of stock of such Person or otherwise.

"Cybersecurity Program" means a program designed to protect the confidentiality, integrity and availability of the Covered Entity's Information Systems.

"Cybersecurity Event" means any act or attempt, successful or unsuccessful, to gain unauthorized access to, disrupt or misuse an Information System or information stored on such Information System.

"Multi-Factor Authentication" means authentication through verification of at least two of the following types of authentication factors: (1) Knowledge factors, such as a password; (2) Possession factors, such as a token or text message on a mobile phone; or (3) Inherence factors, such as a biometric characteristic.

"Nonpublic Information" means all electronic information that is not publicly available information and is:

(1) Business related information of Client the tampering with which, or unauthorized disclosure, access or use of which, would cause a material adverse impact to the business, operations or security of Client;

(2) Any information concerning an individual which because of name, number, personal mark, or other identifier can be used to identify such individual, in combination with any one or more of the following data elements: (i) social security number, (ii) drivers' license number or non-driver identification card number, (iii) account number, credit or debit card number, (iv) any security code, access code or password that would permit access to an individual's financial account; or (v) biometric records;

(3) Any information or data, except age or gender, in any form or medium created by or derived from a health care provider or an individual and that relates to (i) the past, present or future physical, mental or behavioral health or condition of any individual or a member of the individual's family, (ii) the provision of health care to any individual, or (iii) payment for the provision of health care to any individual.

"Information System" means a discrete set of electronic information resources organized for the collection, processing, maintenance, use, sharing, dissemination or disposition of electronic information, as well as any specialized system.

"Third Party Service Provider" ("TPSP") means an entity that (i) is not an affiliate of Client, (ii) provides services to Client, and (iii) maintains, processes or otherwise is permitted access to Nonpublic Information through its provision of services to Client.

All other provisions of the Agreement shall remain unchanged and in full force and effect.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Zubretsky, certify that:

1. I have reviewed the report on Form 10-K for the period ended December 31, 2018 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and to the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

EXHIBIT 31.2

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Thomas L. Tran, certify that:

1. I have reviewed the report on Form 10-K for the period ended December 31, 2018 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

September 30, 2018

1. Organization and Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality managed health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments, consisting of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

The Health Plans segment consists of health plans operating in 13 states and the Commonwealth of Puerto Rico. As of September 30, 2018, these health plans served approximately 4.0 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Affordable Care Act Marketplace (Marketplace) members, most of whom receive government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO).

Our health plans' state Medicaid contracts generally have terms of three to five years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Such contracts are subject to risk of loss in states that issue requests for proposal (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may not be renewed.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled (ABD); and regions or service areas.

The Molina Medicaid Solutions segment provides support to state government agencies' administration of their Medicaid programs, including business processing, information technology development and administrative services. The Other segment includes primarily our behavioral health and social services provider subsidiary (Pathways), and corporate amounts not allocated to other reportable segments.

Recent Developments – Health Plans Segment

New Mexico Health Plan. In our Annual Report on Form 10-K for 2017, we reported that we were notified by the New Mexico Medicaid agency that we had not been selected for a tentative award of a 2019 Medicaid contract. A hearing was held on our judicial protest on October 17, 2018, with a decision expected in the fourth quarter of 2018. Regardless of the court's decision on our protest, we would have further rights of appeal. We are continuing to manage the business in run-off until such time as a different outcome is determined. As of September 30, 2018, we served approximately 206,000 Medicaid members in New Mexico, which represented premium revenue of $891 million for the nine months ended September 30, 2018.

Puerto Rico Health Plan. In July 2018, our Puerto Rico health plan was selected by the Puerto Rico Health Insurance Administration to be one of the organizations to administer the Commonwealth's new Medicaid Managed Care contract. We expect to serve approximately 290,000 members under the new contract. The base contract runs for a period of three years with an optional one-year extension. As of September 30, 2018, we served approximately 320,000 Medicaid members in the East and Southwest regions of Puerto Rico, which represented premium revenue of $549 million for the nine months ended September 30, 2018.

Florida Health Plan. In June 2018, our Florida health plan was awarded comprehensive Medicaid Managed Care contracts by the Florida Agency for Health Care Administration (AHCA) in Regions 8 and 11 of the Florida Statewide Medicaid Managed Care Invitation to Negotiate. As of September 30, 2018, we served approximately 96,000 Medicaid members in those regions, which represented premium revenue of approximately $346 million for the nine months ended September 30, 2018. Services under the new contract are expected to begin on January 1, 2019. We will be serving both the Medicaid and long-term care populations in the two regions.

Washington Health Plan. In May 2018, our Washington health plan was selected by the Washington State Health Care Authority (HCA) to enter into a managed care contract for the eight remaining regions of the state's Apple Health Integrated Managed Care program, in addition to the two regions previously awarded to us. We were

selected by HCA for the following regions: Greater Columbia, King, North Sound, Pierce, and Spokane beginning January 1, 2019; and Salish, Thurston-Mason, and Great Rivers beginning January 1, 2020. As of September 30, 2018, we served approximately 738,000 Medicaid members in Washington, which represented premium revenue of $1,558 million for the nine months ended September 30, 2018.

Recent Developments – Molina Medicaid Solutions Segment

We closed on the sale of Molina Medicaid Solutions (MMS) to DXC Technology Company on September 30, 2018. The net cash selling price for the equity interests of MMS was $233 million, which we received on October 1, 2018. As a result of this transaction, we recognized a pretax gain, net of transaction costs, of $37 million. Refer to Note 11, "Segments," for further information.

Subsequent Event – Other Segment

On October 19, 2018, we sold our Pathways subsidiary to Pyramid Health Holdings, LLC for a nominal purchase price. We expect to record a loss on sale of subsidiary amounting to approximately $40 million, net of income tax benefits.

Presentation and Reclassification

We have reclassified certain amounts in the 2017 consolidated statement of cash flows to conform to the 2018 presentation, relating to the presentation of restricted cash and cash equivalents. The reclassification is a result of our adoption of Accounting Standards Update (ASU) 2016-18, *Restricted Cash* effective January 1, 2018. See Note 2, "Significant Accounting Policies," for further information, including the amount reclassified.

We have combined certain line items in the accompanying consolidated balance sheets. For all periods presented, we have combined the presentation of:

- Income taxes refundable with "Prepaid expenses and other current assets;"
- Income taxes payable with "Accounts payable and accrued liabilities;"
- Goodwill, and intangible assets, net to a single line; and
- Deferred contract costs with "Other assets."

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities (VIEs) in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such VIEs are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the nine months ended September 30, 2018 are not necessarily indicative of the results for the entire year ending December 31, 2018.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2017. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in our December 31, 2017 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our audited consolidated financial statements for the fiscal year ended December 31, 2017.

2. Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that are both readily convertible into known amounts of cash and have a maturity of three months or less on the date of purchase. The following table provides a reconciliation of cash, cash equivalents, and restricted cash and cash equivalents reported within the accompanying consolidated balance sheets that sum to the total of the same such amounts presented in the accompanying consolidated statements of cash flows. The restricted cash and cash equivalents presented below are included in non-current "Restricted investments" in the accompanying consolidated balance sheets.

	Nine Months Ended September 30,	
	2018	2017
	(In millions)	
Cash and cash equivalents	$ 2,814	$ 3,934
Restricted cash and cash equivalents	94	91
Total cash, cash equivalents, and restricted cash and cash equivalents presented in the statements of cash flows	$ 2,908	$ 4,025

Revenue Recognition

We adopted ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)* effective January 1, 2018, using the modified retrospective approach. The insurance contracts of our Health Plans segment, which segment constitutes the vast majority of our operations, are excluded from the scope of Topic 606 because the recognition of revenue under these contracts is dictated by other accounting standards governing insurance contracts. The cumulative effect of initially applying the guidance, relating entirely to our Molina Medicaid Solutions segment contracts, resulted in an immaterial impact to beginning retained earnings, as presented in the accompanying consolidated statement of stockholders' equity. Topic 606 was only applied to service contracts that were not completed as of December 31, 2017. Refer to "Other segment" below for further information.

Health Plans segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services, and premiums collected in advance are deferred. Certain components of premium revenue are subject to accounting estimates and fall into two broad categories discussed in further detail below: 1) "Contractual Provisions That May Adjust or Limit Revenue or Profit;" and 2) "Quality Incentives." Liabilities recorded for such provisions are included in "Amounts due government agencies" in the accompanying consolidated balance sheets.

1) Contractual Provisions That May Adjust or Limit Revenue or Profit:

Medicaid

- *Medical Cost Floors (Minimums), and Medical Cost Corridors:* Pursuant to certain contract provisions, a portion of our premium revenue may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $198 million and $135 million at September 30, 2018 and December 31, 2017, respectively. Approximately $144 million and $96 million of this liability accrued at September 30, 2018 and December 31, 2017, respectively, relates to our participation in Medicaid Expansion programs. Refer to Note 12, "Commitments and Contingencies," for further information regarding the California Medicaid Expansion program.

- *Retroactive Premium Adjustments:* State Medicaid programs periodically adjust premium rates on a retroactive basis. In these cases, we must adjust our premium revenue in the period in which we learn of the adjustment, rather than in the months of service to which the retroactive adjustment applies.

Medicare

- *Minimum MLR:* The Affordable Care Act (ACA) has established a minimum annual medical loss ratio (Minimum MLR) of 85% for Medicare. The medical loss ratio represents medical costs as a percentage of premium revenue. Federal regulations define what constitutes medical costs and premium revenue. If the Minimum MLR is not met, we may be required to pay rebates to the federal government. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of operations. The payable for the Medicare Minimum MLR was not significant at September 30, 2018 and December 31, 2017.

Marketplace

- *Risk adjustment:* Under this program, our health plans' composite risk scores are compared with the overall average risk score for the relevant state and market pool. Generally, our health plans will make a risk adjustment payment into the pool if their composite risk scores are below the average risk score, and will receive a risk adjustment payment from the pool if their composite risk scores are above the average risk score. We estimate our ultimate premium based on insurance policy year-to-date experience, and recognize estimated premiums relating to the risk adjustment program as an adjustment to premium

revenue in our consolidated statements of operations. As of September 30, 2018, and December 31, 2017, the Marketplace risk adjustment payable amounted to $390 million and $912 million, respectively.

- *Minimum MLR:* The ACA has established a Minimum MLR of 80% for the Marketplace. If the Minimum MLR is not met, we may be required to pay rebates to our Marketplace policyholders. The Marketplace risk adjustment program is taken into consideration when computing the Minimum MLR. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of operations. The payable for the Marketplace Minimum MLR was not significant at September 30, 2018 and December 31, 2017.

2) Quality Incentives:

At many of our health plans, revenue ranging from approximately 1% to 3% of certain health plan premiums is earned only if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the periods presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of September 30, 2018 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of September 30, 2018.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(Dollars in millions)			
Maximum available quality incentive premium - current period	$ 48	$ 36	$ 135	$ 113
Quality incentive premium revenue recognized in current period:				
Earned current period	$ 39	$ 24	$ 97	$ 72
Earned prior periods	9	3	32	9
Total	$ 48	$ 27	$ 129	81
Quality incentive premium revenue recognized as a percentage of total premium revenue	1.1%	0.6%	1.0%	0.6%

Other segment

Our Pathways subsidiary's revenue is all variable, and generally invoiced after services are rendered; customer payment follows invoicing. We concluded that there is no change to revenue recognition under Topic 606 for Pathways, and therefore no impact to retained earnings effective January 1, 2018. As discussed in Note 1, "Organization and Basis of Presentation," we sold Pathways on October 19, 2018.

Medical Care Costs - Marketplace Cost Share Reduction (CSR) Update

In the nine months ended September 30, 2018, we recognized a benefit of approximately $81 million in reduced medical expense related to 2017 dates of service, including $5 million in the third quarter of 2018, as a result of the federal government's confirmation that the reconciliation of 2017 Marketplace CSR subsidies would be performed on an annual basis. In the fourth quarter of 2017, we had assumed a nine-month reconciliation of this item pending confirmation of the time period to which the 2017 reconciliation would be applied.

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. Our portfolio managers must obtain our prior approval before selling investments where the loss position of those investments exceeds certain levels. Our investments consist primarily of investment-grade debt securities with a maximum maturity of 10 years and an average duration of three years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is generally limited because our payors consist principally of the governments of each state in which our health plan subsidiaries operate.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which generally differs from the U.S. federal statutory rate primarily because of state taxes, nondeductible expenses such as the Health Insurer Fee (HIF), certain compensation, and other general and administrative expenses. The effective tax rate was not impacted by HIF in 2017 given the 2017 HIF moratorium.

The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including projected pretax earnings, the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The Tax Cuts and Jobs Act (TCJA) was enacted on December 22, 2017. The TCJA, in part, reduced the U.S. federal statutory corporate income tax rate from 35% to 21% effective January 1, 2018. Accounting guidance allows filers a measurement period of one year from the enactment date to finalize the provisional valuation of deferred tax assets and liabilities. During the third quarter of 2018, we recognized approximately $4 million in adjustments to our provisional valuation of our deferred tax assets and liabilities recorded at December 31, 2017, and included these adjustments as a component of income tax expense from continuing operations, which decreased our effective tax rate by 150 basis points in the quarter. At September 30, 2018, we had not completed our accounting for the tax effects resulting from enactment of TCJA with respect to valuation of our deferred tax assets and liabilities. We will continue to refine our calculations as additional analysis is completed. In addition, our estimates may also be affected by expected future guidance on the tax law from the Internal Revenue Service and U.S. Treasury.

Recent Accounting Pronouncements Adopted

Revenue Recognition (Topic 606). See discussion above, in “Revenue Recognition.”

Comprehensive Income. In February 2018, the Financial Accounting Standards Board (FASB) issued ASU 2018-02, *Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*, which allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the TCJA. ASU 2018-02 is effective beginning January 1, 2019; we early adopted this ASU effective January 1, 2018. The effect of applying the guidance resulted in an immaterial impact to beginning retained earnings, as presented in the accompanying consolidated statement of stockholders’ equity.

Restricted Cash. In November 2016, the FASB issued ASU 2016-18, *Restricted Cash,* which requires us to include in our consolidated statements of cash flows the changes in the balances of cash, cash equivalents, restricted cash and restricted cash equivalents. We adopted ASU 2016-18 on January 1, 2018. We have applied the guidance retrospectively to all periods presented. Such retrospective adoption resulted in a $91 million reclassification of restricted cash and cash equivalents from “Investing activities,” to the beginning and ending balances of cash and cash equivalents in our consolidated statements of cash flows for the nine months ended September 30, 2017. There was no impact to our consolidated statements of operations, balance sheets, or stockholders’ equity. The reconciliation of cash and cash equivalents to cash, cash equivalents, and restricted cash and cash equivalents is presented at the beginning of this note.

Recent Accounting Pronouncements Not Yet Adopted

Software Licenses. In August 2018, the FASB issued ASU 2018-15, *Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract,* which aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. ASU 2018-15 is effective beginning January 1, 2020, and can be applied either retrospectively or prospectively to all implementation costs incurred after the date of adoption; early adoption is permitted. We are evaluating the effect of this guidance.

Callable Debt Securities. In March 2017, the FASB issued ASU 2017-08, *Premium Amortization on Purchased Callable Debt Securities*, which shortens the amortization period for certain callable debt securities held at a premium. Specifically, the amendments require the premium to be amortized to the earliest call date. ASU 2017-08 is effective beginning January 1, 2019, and must be adopted as a cumulative effect adjustment to retained earnings; early adoption is permitted. We are evaluating the effect of this guidance.

Credit Losses. In June 2016, the FASB issued ASU 2016-13, *Measurement of Credit Losses on Financial Instruments*. Rather than generally recognizing credit losses when it is probable that the loss has been incurred, the

revised guidance requires companies to recognize an allowance for credit losses for the difference between the amortized cost basis of a financial instrument and the amount of amortized cost that the company expects to collect over the instrument's contractual life. ASU 2016-13 is effective beginning January 1, 2020, and must be adopted as a cumulative effect adjustment to retained earnings; early adoption is permitted. We are evaluating the effect of this guidance.

Leases. In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842),* as modified by:

- ASU 2017-03, *Transition and Open Effective Date Information;*
- ASU 2018-01, *Leases (Topic 842): Land Easement Practical Expedient for Transition to Topic 842;*
- ASU 2018-10, *Codification Improvements to Topic 842, Leases; and*
- ASU 2018-11, *Leases (Topic 842): Targeted Improvements.*

Under Topic 842, an entity will be required to recognize assets and liabilities for the rights and obligations created by leases on the entity's balance sheet for both financing and operating leases. Topic 842 also requires new disclosures that depict the amount, timing, and uncertainty of cash flows pertaining to an entity's leases. We will adopt Topic 842 effective January 1, 2019, using the modified retrospective method. Under this method, we will recognize the cumulative effect of initially applying the standard as an adjustment to the opening balance of retained earnings on January 1, 2019. In addition, we have elected the transition option provided under ASU 2018-11, which allows entities to continue to apply the legacy guidance in Topic 840, *Leases*, including its disclosure requirements, in the comparative periods presented in the year of adoption.

Under Topic 842, we will record right-of-use assets and liabilities relating primarily to our long-term office operating leases. We have substantially completed the configuration of our lease database management system for the adoption of Topic 842. We do not currently expect the adoption of this guidance to have a material effect on our consolidated results of operations, financial condition or cash flows.

3. Net Income (Loss) per Share

The following table sets forth the calculation of basic and diluted net income (loss) per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(In millions, except net income per share)			
Numerator:				
Net income (loss)	$ 197	$ (97)	$ 506	$ (250)
Denominator:				
Shares outstanding at the beginning of the period	61.3	56.5	59.3	55.8
Weighted-average number of shares issued:				
Exchange of 1.625% Notes (1)	—	—	1.3	—
Stock-based compensation	—	—	0.2	0.4
Denominator for basic net income per share	61.3	56.5	60.8	56.2
Effect of dilutive securities:				
1.125% Warrants (1)	5.6	—	5.0	—
1.625% Notes (1)	0.6	—	0.5	—
Stock-based compensation	0.4	—	0.3	—
Denominator for diluted net income per share	67.9	56.5	66.6	56.2
Net income (loss) per share: (2)				
Basic	$ 3.22	$ (1.70)	$ 8.32	$ (4.44)
Diluted	$ 2.90	$ (1.70)	$ 7.60	$ (4.44)
Potentially dilutive common shares excluded from calculations:				
1.125% Warrants (1)	—	2.3	—	1.3
1.625% Notes (1)	—	0.6	—	0.3
Stock-based compensation	—	0.2	—	0.3

(1) For more information and definitions regarding the 1.625% Notes, refer to Note 7, “Debt.” For more information and definitions regarding the 1.125% Warrants, refer to Note 9, “Stockholders' Equity.” The dilutive effect of all potentially dilutive common shares is calculated using the treasury stock method. Certain potentially dilutive common shares issuable are not included in the computation of diluted net income (loss) per share because to do so would be anti-dilutive.

(2) Source data for calculations in thousands.

4. Fair Value Measurements

We consider the carrying amounts of cash, cash equivalents and other current assets and current liabilities (not including derivatives and the current portion of long-term debt) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to the three-tier fair value hierarchy. For a description of the methods and assumptions that we use to a) estimate the fair value; and b) determine the classification according to the fair value hierarchy for each financial instrument, see Note 4, “Fair Value Measurements,” in our 2017 Annual Report on Form 10-K.

Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability (see Note 8 “Derivatives,” for definitions and further information). These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of September 30, 2018, included the price of our common stock, the time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. The 1.125% Call Option derivative asset and the 1.125% Conversion Option

derivative liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of operations. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such derivative instruments is mitigated.

The net changes in fair value of Level 3 financial instruments were insignificant to our results of operations for the nine months ended September 30, 2018.

Our financial instruments measured at fair value on a recurring basis at September 30, 2018, were as follows:

	Total	Quoted Market Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(In millions)		
Corporate debt securities	$ 1,191	$ —	$ 1,191	$ —
U.S. treasury notes	221	221	—	—
Government-sponsored enterprise securities (GSEs)	170	170	—	—
Municipal securities	119	—	119	—
Asset-backed securities	92	—	92	—
Certificate of deposit	15	—	15	—
Other	4	—	4	—
Subtotal - current investments	1,812	391	1,421	—
1.125% Call Option derivative asset	843	—	—	843
Total assets	$ 2,655	$ 391	$ 1,421	$ 843
1.125% Conversion Option derivative liability	$ 843	$ —	$ —	$ 843
Total liabilities	$ 843	$ —	$ —	$ 843

Our financial instruments measured at fair value on a recurring basis at December 31, 2017, were as follows:

	Total	Quoted Market Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(In millions)		
Corporate debt securities	$ 1,588	$ —	$ 1,588	$ —

Total assets	$ 3,215	$ 709	$ 1,984	$ 522
1.125% Conversion Option derivative liability	$ 522	$ —	$ —	$ 522
Total liabilities	$ 522	$ —	$ —	$ 522

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted market prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

	September 30, 2018		December 31, 2017	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(In millions)			
5.375% Notes	$ 693	$ 711	$ 692	$ 730
1.125% Notes (1)	295	1,142	496	1,052
4.875% Notes	326	325	325	329
1.625% Notes (2)	—	—	157	220
Credit Facility (2)	—	—	300	300
	$ 1,314	$ 2,178	$ 1,970	$ 2,631

(1) The fair value of the 1.125% Conversion Option (the embedded cash conversion option), which is included in the fair value amounts presented above, amounted to $843 million and $522 million as of September 30, 2018, and December 31, 2017, respectively. See further discussion at Note 7, “Debt,” and Note 8, “Derivatives.”
(2) For more information on debt repayments in the nine months ended September 30, 2018, refer to Note 7, “Debt.”

5. Investments

Available-for-Sale Investments

We consider all of our investments classified as current assets to be available-for-sale. The following tables summarize our investments as of the dates indicated:

	September 30, 2018			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In millions)		
Corporate debt securities	$ 1,197	$ 1	$ 7	$ 1,191
U.S. treasury notes	222	—	1	221
GSEs	172	—	2	170
Municipal securities	121	—	2	119
Asset backed securities	93	—	1	92
Certificates of deposit	15	—	—	15
Other	4	—	—	4
	$ 1,824	$ 1	$ 13	$ 1,812

	December 31, 2017			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 1,591	$ 1	$ 4	$ 1,588
U.S. treasury notes	389	—	1	388
GSEs	255	—	2	253
Municipal securities	142	—	1	141
Asset-backed securities	117	—	—	117
Certificates of deposit	37	—	—	37
Subtotal - current investments	2,531	1	8	2,524
Corporate debt securities	101	—	—	101
U.S. treasury notes	68	—	—	68
Subtotal - current restricted investments	169	—	—	169
	$ 2,700	$ 1	$ 8	$ 2,693

The contractual maturities of our available-for-sale investments as of September 30, 2018 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 1,025	$ 1,023
Due after one year through five years	799	789
	$ 1,824	$ 1,812

As discussed further in Note 7, “Debt,” the 4.875% Notes’ indenture required us to hold a portion of the net proceeds from their issuance in a segregated account to be used to settle the conversion of the 1.625% Notes. Prior to September 30, 2018, this account was reported as a current asset, entitled “Restricted investments,” in the accompanying consolidated balance sheets. Because this account was used to settle the conversion of the 1.625% Notes in the third quarter of 2018, current restricted investments, as of September 30, 2018, was reduced to zero.

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the three and nine months ended September 30, 2018 and 2017 were insignificant.

We have determined that unrealized losses at September 30, 2018 and December 31, 2017, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the creditworthiness of the issuers. So long as we maintain the intent and ability to hold these securities to maturity, we are unlikely to experience losses. In the event that we dispose of these securities before maturity, we expect that realized losses, if any, will be insignificant.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of September 30, 2018:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 727	$ 4	460	$ 186	$ 3	127
U.S. Treasury notes	—	—	—	94	1	31
GSEs	—	—	—	127	2	68
Municipal securities	63	1	63	55	1	57
Asset backed securities	72	1	41	—	—	—
	$ 862	$ 6	564	$ 462	$ 7	283

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of December 31, 2017:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 1,297	$ 3	561	$ 94	$ 1	69
U.S. Treasury Notes	470	1	89	—	—	—
GSEs	173	1	69	95	1	47
Municipal securities	—	—	—	38	1	48
	$ 1,940	$ 5	719	$ 227	$ 3	164

Held-to-Maturity Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by government authorities primarily in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. The use of these funds is limited as required by regulations in the various states in which we operate, or as needed in the event of insolvency of capitated providers. Therefore, such investments are reported as non-current “Restricted investments” in the accompanying consolidated balance sheets. We have the ability to hold these restricted investments until maturity, and as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates.

Our held-to-maturity restricted investments are carried at amortized cost, which approximates fair value. Held-to-maturity restricted investments as of September 30, 2018, are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 111	$ 111
Due after one year through five years	7	7
	$ 118	$ 118

6. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated:

	September 30, 2018	December 31, 2017
	(In millions)	
Fee-for-service claims incurred but not paid (IBNP)	$ 1,609	$ 1,717
Pharmacy payable	121	112
Capitation payable	48	67
Other	264	296
	$ 2,042	$ 2,192

“Other” medical claims and benefits payable includes amounts payable to certain providers for which we act as an intermediary on behalf of various government agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of operations. Non-risk provider payables amounted to $158 million and $122 million as of September 30, 2018 and December 31, 2017, respectively.

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts presented for “Components of medical care costs related to: Prior periods” represent the amounts by which our original estimate of medical claims and benefits payable at the beginning of the

period were (more) less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Nine Months Ended September 30,	
	2018	2017
	(In millions)	
Medical claims and benefits payable, beginning balance	$ 2,192	$ 1,929
Components of medical care costs related to:		
Current period	11,589	12,813
Prior periods	(227)	9
Total medical care costs	11,362	12,822
Change in non-risk provider payables	60	172
Payments for medical care costs related to:		
Current period	9,866	10,944
Prior periods	1,706	1,501
Total paid	11,572	12,445
Medical claims and benefits payable, ending balance	$ 2,042	$ 2,478

The differences between our original estimates and the amounts ultimately paid out for the most part relate to IBNP. Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims deviation and the accrued cost of settling those claims. Because we establish the provision for adverse claims deviation and the accrued cost of settling claims on a consistent basis every quarter, the lower cost recognized in a subsequent period if such a provision proved unnecessary would be offset by the establishment of a similar provision during that same period.

Because the amount of our initial liability is an estimate, we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded.

Further, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate—we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We believe that the most significant uncertainties surrounding our IBNP estimates at September 30, 2018 are as follows:

- Across all of our health plans, the inventory of unpaid claims increased significantly during the first half of 2017, then decreased in the last half of 2017 and into 2018. Changes in claims inventories impact the timing between date of service and the date of claim payment, increasing the volatility of our liability estimates.
- In June 2018, our Puerto Rico health plan implemented state prescribed claim billing requirements to ensure more accurate claims submissions. The billing requirements were more stringent and caused a significant number of claim denials. Although we expect providers to ultimately submit updated claims with the required information, the impact of the new billing requirements creates more uncertainty in our liability estimates.
- At our Florida health plan, a new clinical service system was implemented in the first quarter of 2018. This system impacted the reporting of inpatient authorizations used in our development of claims liabilities, which makes our liability estimates subject to more than the usual amount of uncertainty.
- We recently implemented a new process for increased quality review of claims payments in 11 of our health plans. While we do not anticipate this new process will impact the percentage of claims paid within the timely turnaround requirements, we believe it will have a minor impact on the timing of some paid claims. For this reason, our liability estimates in these 11 health plans are subject to more than the usual amount of uncertainty.

We recognized favorable prior period claims development in the amount of $227 million for the nine months ended September 30, 2018. This amount represents our estimate as of September 30, 2018, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2017, was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe these differences were due primarily to the following factors:

- The impact of the provision for adverse claims deviation and the accrued cost of settling claims as discussed above. Because we re-establish the provision for adverse claims deviation and the accrued cost of settling claims on a consistent basis every quarter, the impact of this item to medical care costs in the nine months ended September 30, 2018, results was minimal.
- Across all of our health plans, the inventory of unpaid claims increased significantly during the first half of 2017, then decreased in the last half of 2017. In hindsight, the impact of the changes in claims processing timing reduced our liabilities more than we had anticipated.
- December 2017 data from The Centers for Disease Control and Prevention indicated widespread influenza activity in several states in which we operate health plans. The additional liabilities established in consideration of increased claims related to a more severe influenza season turned out to be higher than our actual experience.
- In establishing our liability at December 31, 2017, we anticipated an increase in the utilization of medical services by Marketplace members concerned about the future of their healthcare coverage as a result of uncertainties related to high premium increases and issuer exits. This induced demand did not materialize to the degree we expected.

7. Debt

As of September 30, 2018, contractual maturities of debt were as follows. All amounts represent the principal amounts of the debt instruments outstanding.

	Total	2019	2020	2021	2022	2023	Thereafter
				(In millions)			
5.375% Notes	$ 700	$ —	$ —	$ —	$ 700	$ —	$ —
4.875% Notes	330	—	—	—	—	—	330
1.125% Notes	314	—	314	—	—	—	—
	$ 1,344	$ —	$ 314	$ —	$ 700	$ —	$ 330

All of our debt is held at the parent, which is reported in the Other segment. The following table summarizes our outstanding debt obligations and their classification in the accompanying consolidated balance sheets:

	September 30, 2018	December 31, 2017
	(In millions)	
Current portion of long-term debt:		
1.125% Notes, net of unamortized discount of $18 at September 30, 2018, and $51 at December 31, 2017	$ 296	$ 499
1.625% Notes, net of unamortized discount of $3 at December 31, 2017	—	157
Lease financing obligations	1	1
Debt issuance costs	(1)	(4)
	296	653
Non-current portion of long-term debt:		
5.375% Notes	700	700
4.875% Notes	330	330
Credit Facility	—	300
Debt issuance costs	(11)	(12)
	1,019	1,318
Lease financing obligations	198	198
	$ 1,513	$ 2,169

Interest cost recognized relating to our convertible senior notes for the periods presented was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(In millions)			
Contractual interest at coupon rate	$ 1	$ 3	$ 5	$ 9
Amortization of the discount	5	8	18	24
	$ 6	$ 11	$ 23	$ 33

Credit Facility

In January 2017, we entered into an amended unsecured $500 million revolving credit facility (the Credit Facility). The Credit Facility has a term of five years and all amounts outstanding will be due and payable on January 31, 2022. In May 2018, we repaid the $300 million outstanding borrowings under the Credit Facility. As of September 30, 2018, no amounts were outstanding under the Credit Facility, and outstanding letters of credit amounting to $6 million reduced our borrowing capacity under the Credit Facility to $494 million.

Borrowings under our Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee. Certain of our wholly owned subsidiaries guarantee our obligations under the Credit Facility. The Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. As of September 30, 2018, we were in compliance with all financial and non-financial covenants under the Credit Facility and other long-term debt.

Bridge Credit Agreement

In January 2018, we entered into a bridge credit agreement with several banks, which was subsequently terminated in August 2018.

5.375% Notes due 2022

We have $700 million aggregate principal amount of senior notes (the 5.375% Notes) outstanding as of September 30, 2018, which are due November 15, 2022, unless earlier redeemed. Interest on the 5.375% Notes is payable semiannually in arrears on May 15 and November 15. Certain of our wholly owned subsidiaries guarantee our obligations under the 5.375% Notes; such guarantees mirror those of the Credit Facility. See Note 13,

"Supplemental Condensed Consolidating Financial Information," for more information on the guarantors. The 5.375% Notes contain customary non-financial covenants and change in control provisions.

4.875% Notes due 2025

We have $330 million aggregate principal amount of senior notes (the 4.875% Notes) outstanding as of September 30, 2018, which are due June 15, 2025, unless earlier redeemed. Interest on the 4.875% Notes is payable semiannually in arrears on June 15 and December 15. Certain of our wholly owned subsidiaries guarantee our obligations under the 4.875% Notes; such guarantees mirror those of the Credit Facility. The 4.875% Notes contain customary non-financial covenants and change of control provisions.

1.125% Cash Convertible Senior Notes due 2020

In the second and third quarters of 2018, we entered into privately negotiated note purchase agreements with certain holders of our outstanding 1.125% cash convertible senior notes due January 15, 2020 (the 1.125% Notes).

In the third quarter of 2018, we repaid $140 million aggregate principal amount of the 1.125% Notes, plus accrued interest, for a total cash payment of $483 million. The $343 million difference between the principal amount extinguished and our cash payment primarily represents the settlement of the 1.125% Notes' embedded cash conversion option feature at fair value (which is a derivative liability we refer to as the 1.125% Conversion Option).

In the second quarter of 2018, we repaid $96 million aggregate principal amount of the 1.125% Notes, plus accrued interest, for a total cash payment of $228 million. As noted above, the $132 million difference between the principal amount extinguished and our cash payment primarily represents the settlement of the embedded cash conversion option feature at fair value.

In the nine months ended September 30, 2018, we have recorded a loss on debt extinguishment of $15 million for the 1.125% Notes purchases, including $10 million in the third quarter of 2018, primarily relating to the acceleration of the debt discount. This loss is reported in "Other expenses (income), net" in the accompanying consolidated statements of operations. No common shares were issued in connection with these transactions.

In connection with the 1.125% Notes purchases, we also entered into privately negotiated termination agreements with each of the counterparties in the second and third quarters of 2018, to partially terminate the Call Spread Overlay, defined and further discussed in Notes 8, "Derivatives," and 9, "Stockholders' Equity." The net cash proceeds from the Call Spread Overlay partial termination transactions partially offset the cash paid to settle the 1.125% Notes.

Following the transactions described above, we have $314 million aggregate principal amount of the 1.125% Notes outstanding at September 30, 2018. Interest is payable semiannually in arrears on January 15 and July 15. The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. The initial conversion rate for the 1.125% Notes is 24.5277 shares of our common stock per $1,000 principal amount, or approximately $40.77 per share of our common stock. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture. We may not redeem the 1.125% Notes prior to the maturity date. The 1.125% Notes are convertible by the holders within one year of the current balance sheet date until they mature; therefore, they are reported in current portion of long-term debt.

Concurrent with the issuance of the 1.125% Notes, the 1.125% Conversion Option was separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the 1.125% Conversion Option fully settles or expires. This initial liability simultaneously reduced the carrying value of the 1.125% Notes' principal amount (effectively an original issuance discount), which is amortized to the principal amount through the recognition of non-cash interest expense over the expected life of the debt. The effective interest rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued is approximately 6%. As of September 30, 2018, the 1.125% Notes had a remaining amortization period of 1.3 years, and their 'if-converted' value exceeded their principal amount by approximately $626 million and $406 million as of September 30, 2018 and December 31, 2017, respectively.

1.625% Convertible Senior Notes due 2044

Conversion. On July 11, 2018, we announced notice of our election to redeem the remaining $64 million aggregate principal amount of the 1.625% convertible senior notes due 2044 (the 1.625% Notes) on August 20, 2018 (the Redemption Date), pursuant to the terms of the indenture. Also pursuant to the indenture, the 1.625% Notes were convertible until August 17, 2018, at a conversion rate of 17.2157 shares of our common stock per $1,000 principal amount equal to the settlement amount (as defined in the related indenture), or approximately $58.09 per share of our common stock.

Through August 17, 2018, we received conversion notices from substantially all of the remaining holders of the 1.625% Notes outstanding. Under the conversions, we paid cash for the remaining $64 million aggregate principal amount and delivered 0.6 million shares of our common stock to the converting holders on the settlement dates in September 2018.

Exchange. In March 2018, we entered into separate, privately negotiated, synthetic exchange agreements with certain holders of our outstanding 1.625% Notes, under which we exchanged $97 million aggregate principal amount and accrued interest for 1.8 million shares of our common stock. We recorded a loss on debt extinguishment, including transaction fees, of $10 million, primarily relating to the inducement premium paid to the bondholders, which is recorded in "Other expenses (income), net" in the accompanying consolidated statements of operations. We did not receive any proceeds from the transaction.

Cross-Default Provisions

The indentures governing the 4.875% Notes, the 5.375% Notes and the 1.125% Notes contain cross-default provisions that are triggered upon default by us or any of our subsidiaries on any indebtedness in excess of the amount specified in the applicable indenture.

8. Derivatives

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the accompanying consolidated balance sheets:

	Balance Sheet Location	September 30, 2018	December 31, 2017
		(In millions)	
Derivative asset:			
1.125% Call Option	Current assets: Derivative asset	$ 843	$ 522
Derivative liability:			
1.125% Conversion Option	Current liabilities: Derivative liability	$ 843	$ 522

Our derivative financial instruments do not qualify for hedge treatment; therefore, the change in fair value of these instruments is recognized immediately in our consolidated statements of operations, and reported in "Other expenses (income), net." Gains and losses for our derivative financial instruments are presented individually in the accompanying consolidated statements of cash flows, "Supplemental cash flow information."

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Notes in 2013, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments in excess of the principal amount of the 1.125% Notes due upon any conversion of such notes.

In the second and third quarters of 2018, in connection with the 1.125% Notes purchases (described in Note 7, "Debt"), we entered into privately negotiated termination agreements with each of the Counterparties to partially terminate the Call Spread Overlay, in notional amounts corresponding to the aggregate principal amount of the 1.125% Notes purchased. In the third quarter of 2018, this resulted in our receipt of $343 million for the settlement of the 1.125% Call Option (which is a derivative asset), and the payment of $306 million for the partial termination of the 1.125% Warrants, for an aggregate net cash receipt of $37 million from the Counterparties.

In the second quarter of 2018, this resulted in our receipt of $134 million for the settlement of the 1.125% Call Option, and the payment of $113 million for the partial termination of the 1.125% Warrants, for an aggregate net cash receipt of $21 million from the Counterparties.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 4, "Fair Value Measurements."

1.125% Conversion Option. The embedded cash conversion option within the 1.125% Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Conversion Option, refer to Note 4, "Fair Value Measurements."

As of September 30, 2018, the 1.125% Call Option and the 1.125% Conversion Option were classified as a current asset and current liability, respectively, because the 1.125% Notes may be converted within twelve months of September 30, 2018, as described in Note 7, "Debt."

9. Stockholders' Equity

1.625% Notes

Conversion. As described in Note 7, "Debt," we issued 0.6 million shares of our common stock in connection with the conversion of the 1.625% Notes in the third quarter of 2018.

Exchange. As described in Note 7, "Debt," we issued 1.8 million shares of our common stock in connection with the exchange of the 1.625% Notes in March 2018.

1.125% Warrants

In connection with the Call Spread Overlay transaction described in Note 8, "Derivatives," in 2013, we issued 13.5 million warrants with a strike price of $53.8475 per share. Under certain circumstances, beginning in April 2020, if the price of our common stock exceeds the strike price of the 1.125% Warrants, we will be obligated to issue shares of our common stock subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock exceeds the applicable strike price of the 1.125% Warrants. Refer to Note 3, "Net Income (Loss) per Share," for dilution information for the periods presented. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Following the transactions described below, 7.7 million of the 1.125% Warrants remain outstanding.

As described in Note 8, "Derivatives," in the second and third quarters of 2018, we entered into privately negotiated termination agreements with each of the Counterparties to partially terminate the Call Spread Overlay, in notional amounts corresponding to the aggregate principal amount of the 1.125% Notes purchased. In the third quarter of 2018, we paid $306 million to the Counterparties for the termination of 3.4 million of the 1.125% Warrants outstanding, which resulted in a reduction of additional paid-in-capital for the same amount.

In the second quarter of 2018, we paid $113 million to the Counterparties for the termination of 2.4 million of the 1.125% Warrants outstanding, which resulted in a reduction of additional paid-in capital for the same amount.

Share-Based Compensation

In connection with our equity incentive plans and employee stock purchase plan, approximately 281,000 shares of common stock vested or were purchased, net of shares used to settle employees' income tax obligations, during the nine months ended September 30, 2018.

Share-based compensation is generally recorded to "General and administrative expenses" in the accompanying consolidated statements of operations. Total share-based compensation expense for the three and nine months ended September 30, 2018, amounted to $7 million and $20 million, respectively. Total share-based compensation expense for the three months ended September 30, 2017, amounted to $3 million. Total share-based compensation expense for the nine months ended September 30, 2017, amounted to $38 million, of which $23 million was recorded to "Restructuring and separation costs" in the accompanying consolidated statements of operations.

As of September 30, 2018, there was $41 million of total unrecognized compensation expense related to unvested restricted stock awards (RSAs), performance stock awards (PSAs), and performance stock units (PSUs), which we expect to recognize over a remaining weighted-average period of 2.8 years, 0.4 years and 2.3 years, respectively. This unrecognized compensation cost assumes an estimated forfeiture rate of 12.1% for non-executive employees as of September 30, 2018.

Also as of September 30, 2018, there was $11 million of total unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 2.0 years. No stock options were granted or exercised in the nine months ended September 30, 2018.

Activity for RSAs, PSAs and PSUs, for the nine months ended September 30, 2018, is summarized below:

	Restricted Stock Awards	Performance Stock Awards	Performance Stock Units	Total	Weighted Average Grant Date Fair Value
Unvested balance, December 31, 2017	401,804	84,762	91,828	578,394	$ 58.35
Granted	353,618	—	212,926	566,544	73.85
Vested	(188,954)	(32,929)	—	(221,883)	57.87
Forfeited	(152,243)	(48,701)	(104,527)	(305,471)	63.67
Unvested balance, September 30, 2018	414,225	3,132	200,227	617,584	70.11

The aggregate fair values of RSAs, PSAs and PSUs granted and vested are presented in the following table:

	Nine Months Ended September 30,	
	2018	2017
	(In millions)	
Granted:		
Restricted stock awards	$ 26	$ 19
Performance stock units	16	16
	$ 42	$ 35
Vested:		
Restricted stock awards	$ 14	$ 21
Performance stock awards	3	15
Performance stock units	—	9
	$ 17	$ 45

10. Restructuring and Separation Costs

Restructuring and separation costs are reported by the same name in the accompanying consolidated statements of operations.

IT Restructuring

Following the 2017 Restructuring Plan noted below, our new executive team has focused on a margin recovery plan that includes identification and implementation of various profit improvement initiatives. To that end, we have begun to implement a plan to restructure our information technology department (the IT Restructuring) in the third quarter of 2018.

Expected Costs

In addition to $3 million incurred in the third quarter of 2018, we expect to incur approximately $6 million for the IT Restructuring in the fourth quarter of 2018. We expect such costs to consist primarily of one-time termination benefits and other costs in the Other segment. We will update the total estimated costs for the IT Restructuring in our 2018 Annual Report on Form 10-K.

Costs Incurred

We have incurred expenses under the IT Restructuring as follows:

	Three and Nine Months Ended September 30, 2018			
		Other Restructuring Costs		
	One-Time Termination Benefits	Consulting Fees	Contract Termination Costs	Total
		(In millions)		
Other	$ 2	$ 1	$ —	$ 3

Reconciliation of Liability

For those restructuring and separation costs that require cash settlement (one-time termination benefits and consulting fees), the following table presents a roll-forward of the accrued liability, which is reported in "Accounts payable and accrued liabilities" in the accompanying consolidated balance sheets.

	One-Time Termination Benefits	Other Restructuring Costs	Total
Accrued as of December 31, 2017	$ —	$ —	$ —
Charges	2	1	3
Cash payments	—	—	—
Accrued as of September 30, 2018	$ 2	$ 1	$ 3

2017 Restructuring Plan

Following a management-initiated, broad operational assessment in early 2017, our board of directors approved, and we committed to, a comprehensive restructuring and profitability improvement plan in June 2017 (the 2017 Restructuring Plan). Key activities under this plan to date have included:

- Streamlining of our organizational structure to eliminate redundant layers of management, consolidate regional support services, and other staff reductions to improve efficiency and the speed and quality of decision making;
- Re-design of core operating processes such as provider payment, utilization management, quality monitoring and improvement, and information technology, to achieve more effective and cost-efficient outcomes;
- Remediation of high-cost provider contracts and enhancement of high quality, cost-effective networks;
- Restructuring, including selective exits, of direct delivery operations; and
- Partnering with the lowest-cost, most effective vendors.

Costs Incurred

In our 2017 Annual Report on Form 10-K, we reported that we had incurred substantially all of the costs associated with the 2017 Restructuring Plan in 2017, amounting to $234 million. In the nine months ended September 30, 2018, we incurred an additional $35 million in such costs, primarily as a result of our further evaluation and write-off of a utilization and care management project terminated because of its inconsistency with the goals of the 2017 Restructuring Plan. We also recorded nominal amounts for one-time termination benefits, true-ups of certain lease contract termination costs, and consulting fees recorded in 2017. As of September 30, 2018, we had incurred $269 million in total costs under the 2017 Restructuring Plan. We expect to complete all activities under the 2017 Restructuring Plan in 2018, with the exception of the cash settlement of lease termination liabilities. We expect to continue to settle those liabilities through 2025, unless the leases are terminated sooner.

The following tables present the major types of such costs by segment. Current and long-lived assets include current and non-current capitalized project costs, and capitalized software determined to be unrecoverable.

	Three Months Ended September 30, 2018				
		Other Restructuring Costs			
	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)				
Health Plans	$ —	$ —	$ —	$ 2	$ 2
	$ —	$ —	$ —	$ 2	$ 2

	Nine Months Ended September 30, 2018				
		Other Restructuring Costs			
	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)				
Health Plans	$ —	$ (1)	$ —	$ 10	$ 9
Other	5	20	1	—	26
	$ 5	$ 19	$ 1	$ 10	$ 35

	Three Months Ended September 30, 2017					
			Other Restructuring Costs			
	Separation Costs - Former Executives	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)					
Health Plans	$ —	$ 27	$ 6	$ —	$ —	$ 33
Molina Medicaid Solutions	—	—	8	—	—	8
Other	—	23	35	16	3	77
	$ —	$ 50	$ 49	$ 16	$ 3	$ 118

	Nine Months Ended September 30, 2017					
			Other Restructuring Costs			
	Separation Costs - Former Executives	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)					
Health Plans	$ —	$ 27	$ 6	$ —	$ —	$ 33
Molina Medicaid Solutions	—	—	8	—	—	8
Other	35	23	35	24	3	120
	$ 35	$ 50	$ 49	$ 24	$ 3	$ 161

As of September 30, 2018, we had incurred cumulative restructuring costs under the 2017 Restructuring Plan as follows:

			Other Restructuring Costs			
	Separation Costs - Former Executives	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)					
Health Plans	$ —	$ 33	$ 15	$ —	$ 34	$ 82
Molina Medicaid Solutions	—	—	8	—	—	8
Other	36	39	57	45	2	179
	$ 36	$ 72	$ 80	$ 45	$ 36	$ 269

Reconciliation of Liability

For those restructuring and separation costs that require cash settlement (primarily separation costs, one-time termination benefits, consulting fees and contract termination costs), the following table presents a roll-forward of the accrued liability, which is reported in “Accounts payable and accrued liabilities” in the accompanying

consolidated balance sheets. The adjustments are due to true-ups of costs recorded in 2017.

	Separation Costs - Former Executives	One-Time Termination Benefits	Other Restructuring Costs	Total
		(In millions)		
Accrued as of December 31, 2017	$ 2	$ 11	$ 35	$ 48
Adjustments	—	(1)	10	9
Charges	—	6	2	8
Cash payments	(2)	(15)	(15)	(32)
Accrued as of September 30, 2018	$ —	$ 1	$ 32	$ 33

11. Segments

We have three reportable segments, consisting of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment. Our reportable segments are consistent with how we currently manage the business and view the markets we serve. Refer to Note 1, “Organization and Basis of Presentation,” for a discussion of our recent divestiture of Pathways.

Recent Developments – Molina Medicaid Solutions Segment

We closed on the sale of MMS to DXC Technology Company on September 30, 2018. The net cash selling price for the equity interests of MMS was $233 million, which we received on October 1, 2018. As a result of this transaction, we recognized a pretax gain, net of transaction costs, of $37 million.

Description of Earnings Measures for Reportable Segments

Margin is the appropriate earnings measure for our reportable segments, based on how our chief operating decision maker currently reviews results, assesses performance, and allocates resources.

Margin for our Health Plans segment is referred to as “Medical margin,” and for our Molina Medicaid Solutions and Other segments, as “Service margin.” Medical margin represents the amount earned by the Health Plans segment after medical care costs are deducted from premium revenue. The medical care ratio represents medical care costs as a percentage of premium revenue, and is one of the key metrics used to assess the performance of the Health Plans segment. Therefore, the underlying medical margin is the most important measure of earnings reviewed by the chief operating decision maker. The service margin is equal to service revenue minus cost of service revenue.

The following table presents total revenue by segment. Inter-segment revenue was insignificant for all periods presented.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(In millions)			
Total revenue:				
Health Plans	$ 4,565	$ 4,899	$ 13,826	$ 14,538
Molina Medicaid Solutions	53	47	152	140
Other	79	85	248	256
Consolidated	$ 4,697	$ 5,031	$ 14,226	$ 14,934

The following table reconciles margin by segment to consolidated income (loss) before income taxes:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(In millions)			
Margin:				
Health Plans	$ 547	$ 557	$ 1,812	$ 1,343
Molina Medicaid Solutions	14	5	26	13
Other	5	2	16	8
Total margin	566	564	1,854	1,364
Add: other operating revenues (1)	230	124	661	379
Add: gain on sale of subsidiary	37	—	37	—
Less: other operating expenses (2)	(538)	(769)	(1,693)	(2,029)
Operating income (loss)	295	(81)	859	(286)
Other expenses, net	36	32	116	10
Income (loss) before income taxes	$ 259	$ (113)	$ 743	$ (296)

(1) Other operating revenues include premium tax revenue, health insurer fees reimbursed, and investment income and other revenue.
(2) Other operating expenses include general and administrative expenses, premium tax expenses, health insurer fees, depreciation and amortization, restructuring and separation costs, and impairment losses.

12. Commitments and Contingencies

California Medicaid Expansion Risk Corridor

In October 2018, we entered into contract amendments with the California Department of Health Care Services that retroactively reinstated the Medicaid Expansion risk corridor requirement for the state fiscal year ended June 2017. This risk corridor mandates a minimum medical loss ratio (MLR) of 85% and a maximum MLR of 95%. The estimated impact of such requirement resulted in a reduction to 2016 and 2017 premium revenue totaling approximately $57 million, which we recognized in the quarter ended September 30, 2018.

Regulatory Capital Requirements and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations, and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based on current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $2,041 million at September 30, 2018, and $1,691 million at December 31, 2017. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company—Molina Healthcare, Inc.

As of September 30, 2018, our health plans had aggregate statutory capital and surplus of approximately $2,125 million compared with the estimated required minimum aggregate statutory capital and surplus of approximately $1,138 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2018. We have the ability, and have committed to provide, additional capital to each of our health plans as necessary to ensure compliance with statutory capital and surplus requirements.

Legal Proceedings

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly funded programs, and the repayment of previously collected revenues.

In the ordinary course of business we are involved in legal actions, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and reasonably estimable, but the outcome of legal actions is inherently uncertain and our estimates of such losses could change as a result of further developments of these matters. For certain pending matters, accruals have not been established because such matters have not progressed sufficiently through discovery or factual development to enable us to reasonably estimate a range of possible loss. An adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Steamfitters Local 449 Pension Plan v. Molina Healthcare, Inc., et al. On October 5, 2018, the Steamfitters Local 449 Pension Plan filed its first amended class action securities complaint in the Central District Court of California against the Company and its former executive officers, J. Mario Molina, John C. Molina, Terry P. Bayer, and Rick Hopfer, Case 2:18-cv-03579. The amended complaint purports to seek recovery on behalf of all persons or entities who purchased Molina common stock between October 31, 2014, and August 2, 2017, for alleged violations under Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, as amended, and Rule 10b-5 promulgated thereunder. The plaintiff alleges the defendants misled investors regarding the scalability of the Company's administrative infrastructure during the identified class period. The Company believes it has meritorious defenses to the alleged claims and intends to defend the matter vigorously.

States' Budgets

Nearly all of our premium revenues come from the joint federal and state funding of the Medicaid and Children's Health Insurance Program (CHIP) programs. The states and Commonwealth in which we operate our health plans regularly face significant budgetary pressures.

13. Supplemental Condensed Consolidating Financial Information

As discussed in Note 7, "Debt," we have outstanding $700 million aggregate principal amount of 5.375% Notes due November 15, 2022, unless earlier redeemed. At September 30, 2018, the 5.375% Notes were fully and unconditionally guaranteed by certain of our wholly owned subsidiaries on a joint and several basis, with exceptions considered customary for such guarantees.

For all periods presented, the following condensed consolidating financial statements present Molina Healthcare, Inc. (as "Parent Guarantor"), the subsidiary guarantors (as "Other Guarantors"), the subsidiary non-guarantors (as "Non-Guarantors") and "Eliminations", according to the guarantor structure as assessed as of and for the nine months ended September 30, 2018.

In connection with the divestiture of MMS described in Note 11, "Segments," MMS was released as an "Other Guarantor" effective September 30, 2018, and is reported in "Non-Guarantors" for all periods presented.

In connection with the sale of all of the membership interests of our wholly owned subsidiary Pathways Health and Community Support LLC (Pathways) described in Note 1, "Organization and Basis of Presentation," Pathways was released as an "Other Guarantor" effective October 19, 2018, leaving our wholly owned subsidiary Molina Pathways, LLC as the sole subsidiary guarantor as of that date.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (MD&A)

FORWARD-LOOKING STATEMENTS

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements included in this quarterly report, other than statements of historical fact, may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, or expected. Those known risks and uncertainties include, but are not limited to, the following:

- *the success of the Company's profit improvement and maintenance initiatives, including the timing and amounts of the benefits realized, and administrative and medical cost savings achieved;*
- *the numerous political and market-based uncertainties associated with the Affordable Care Act (the "ACA") or "Obamacare;"*
- *the market dynamics surrounding the ACA Marketplaces, including but not limited to uncertainties associated with risk adjustment requirements, the potential for disproportionate enrollment of higher acuity members, the discontinuation of premium tax credits, and the adequacy of agreed rates;*
- *subsequent adjustments to reported premium revenue based upon subsequent developments or new information, including changes to estimated amounts payable or receivable related to Marketplace risk adjustment;*
- *effective management of the Company's medical costs;*
- *the Company's ability to predict with a reasonable degree of accuracy utilization rates, including utilization rates associated with seasonal flu patterns or other newly emergent diseases;*
- *significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;*
- *the full reimbursement of the ACA health insurer fee, or HIF;*
- *the success of the Company's efforts to retain existing or awarded government contracts, including the success of any protest filings or defenses;*
- *the Company's ability to manage its operations, including maintaining and creating adequate internal systems and controls relating to authorizations, approvals, provider payments, and the overall success of its care management initiatives;*
- *the Company's ability to consummate and realize benefits from divestitures and acquisitions, including the recently consummated MMS and Pathways divestitures;*
- *the Company's receipt of adequate premium rates to support increasing pharmacy costs, including costs associated with specialty drugs and costs resulting from formulary changes that allow the option of higher-priced non-generic drugs;*
- *the Company's ability to operate profitably in an environment where the trend in premium rate increases lags behind the trend in increasing medical costs;*
- *the interpretation and implementation of federal or state medical cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit sharing arrangements, and risk adjustment provisions and requirements;*
- *the Company's estimates of amounts owed for such cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit-sharing arrangements, and risk adjustment provisions;*
- *the Medicaid expansion medical cost corridors in California, New Mexico, and Washington, and any other retroactive adjustment to revenue where methodologies and procedures are subject to interpretation or dependent upon information about the health status of participants other than Molina members;*

- *the interpretation and implementation of at-risk premium rules and state contract performance requirements regarding the achievement of certain quality measures, and the Company's ability to recognize revenue amounts associated therewith;*
- *cyber-attacks or other privacy or data security incidents resulting in an inadvertent unauthorized disclosure of protected health information;*
- *the success of the Company's health plan in Puerto Rico, including the resolution of the debt crisis and the effect of the PROMESA law, and the impact of any future significant weather events;*
- *the success and renewal of the Company's duals demonstration programs in California, Illinois, Michigan, Ohio, South Carolina, and Texas;*
- *the accurate estimation of incurred but not reported or paid medical costs across the Company's health plans;*
- *efforts by states to recoup previously paid and recognized premium amounts;*
- *complications, member confusion, or enrollment backlogs related to the annual renewal of Medicaid coverage;*
- *government audits and reviews, or potential investigations, and any fine, sanction, enrollment freeze, monitoring program, or premium recovery that may result therefrom;*
- *changes with respect to the Company's provider contracts and the loss of providers;*
- *approval by state regulators of dividends and distributions by the Company's health plan subsidiaries;*
- *changes in funding under the Company's contracts as a result of regulatory changes, programmatic adjustments, or other reforms;*
- *high dollar claims related to catastrophic illness;*
- *the favorable resolution of litigation, arbitration, or administrative proceedings, including litigation involving the ACA to which we ourselves are not a direct party;*
- *the relatively small number of states in which we operate health plans, including the greater scale and revenues of the Company's California, Ohio, Texas, and Washington health plans;*
- *the availability of adequate financing on acceptable terms to fund and capitalize the Company's expansion and growth, repay the Company's outstanding indebtedness at maturity and meet its liquidity needs, including the interest expense and other costs associated with such financing;*
- *the Company's failure to comply with the financial or other covenants in its credit agreement or the indentures governing its outstanding notes;*
- *the sufficiency of the Company's funds on hand to pay the amounts due upon conversion or maturity of its outstanding notes;*
- *the failure of a state in which we operate to renew its federal Medicaid waiver;*
- *changes generally affecting the managed care or Medicaid management information systems industries;*
- *increases in government surcharges, taxes, and assessments, including but not limited to the deductibility of certain compensation costs;*
- *newly emergent viruses or widespread epidemics, public catastrophes or terrorist attacks, and associated public alarm;*
- *the unexpected loss of the leadership of one or more of our senior executives; and*
- *increasing competition and consolidation in the Medicaid industry;*

Readers should refer to the section entitled "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2017 for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This Quarterly Report on Form 10-Q and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2017.

ABOUT MOLINA HEALTHCARE

OUR MISSION IS TO PROVIDE QUALITY HEALTHCARE TO PEOPLE RECEIVING GOVERNMENT ASSISTANCE.

Molina Healthcare, Inc. provides quality managed health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments,

consisting of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

OVERVIEW - FINANCIAL SUMMARY

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(In millions, except per-share amounts)			
Revenue:				
Premium revenue	$ 4,337	$ 4,777	$ 13,174	$ 14,165
Premium tax revenue	110	106	320	331
Health insurer fees reimbursed	83	—	248	—
Investment income and other revenue	37	18	93	48
Operating expenses:				
Medical care costs	3,790	4,220	11,362	12,822
General and administrative expenses	311	383	998	1,227
Premium tax expenses	110	106	320	331
Health insurer fees	87	—	261	—
Gain on sale of subsidiary	37	—	37	—
Operating income (loss)	295	(81)	859	(286)
Interest expense	26	32	91	85
Other expenses (income), net	10	—	25	(75)
Income tax expense (benefit)	62	(16)	237	(46)
Net income (loss)	197	(97)	506	(250)
Operating Statistics:				
Ending total membership	4.0	4.5	4.0	4.5
MCR [1]	87.4%	88.3 %	86.2%	90.5 %
G&A ratio [2]	6.6%	7.6 %	7.0%	8.2 %
Premium tax ratio [1]	2.5%	2.2 %	2.4%	2.3 %
Effective income tax rate	24.0%	14.6 %	31.9%	15.5 %
Net profit (loss) margin [2]	4.2%	(1.9)%	3.6%	(1.7)%
Net income (loss) per diluted share	$ 2.90	$ (1.70)	$ 7.60	$ (4.44)

(1) MCR represents medical care costs as a percentage of premium revenue; premium tax ratio represents premium tax expenses as a percentage of premium revenue plus premium tax revenue.
(2) Net profit margin represents net income as a percentage of total revenue. G&A ratio represents general and administrative expenses as a percentage of total revenue.

CONSOLIDATED RESULTS

See tables below, under "Summary of Significant Items," for details relating to significant non-run rate items, such as impairment losses, restructuring costs and material out of period adjustments to premiums or medical care costs.

NET INCOME AND OPERATING INCOME

Net income for the third quarter of 2018 amounted to $197 million, or $2.90 per diluted share, compared with a net loss of $97 million, or $1.70 per diluted share for the third quarter of 2017. Operating income for the third quarter of 2018 amounted to $295 million, compared with an operating loss of $81 million in the third quarter of 2017. The

year-over-year improvement is mainly driven by a decline in the medical care ratio (MCR). Additionally, results for the third quarter of 2017 reflect $247 million in impairment and restructuring charges, or $3.16 per diluted share.

Net income for the nine months ended September 30, 2018 was $506 million, or $7.60 per diluted share, compared with a net loss of $250 million, or $4.44 per diluted share for the nine months ended September 30, 2017. Operating income for the nine months ended September 30, 2018 amounted to $859 million, compared with an operating loss of $286 million for the nine months ended September 30, 2017. The year-over-year improvement is mainly driven by a decline in the MCR. Additionally, results for the nine months ended September 30, 2017 reflect $362 million in impairment and restructuring charges, or $4.69 per diluted share.

PREMIUM REVENUE

Premium revenue decreased $440 million in the third quarter of 2018, when compared with the third quarter of 2017. Member months declined 11%, partially offset by a per-member per-month (PMPM) revenue increase of 2%. Lower premium revenue was driven by a decrease in Marketplace membership, partially offset by Marketplace premium rate increases. In addition, we recognized a $57 million reduction in revenues for a retroactive California Medicaid Expansion risk corridor for the state's 2017 fiscal year in the third quarter of 2018.

Premium revenue decreased $991 million in the nine months ended September 30, 2018, when compared with the nine months ended September 30, 2017. Member months declined 13%, partially offset by a revenue PMPM increase of 6%, primarily relating to Marketplace membership as noted above.

PREMIUM TAX REVENUE AND EXPENSES

The premium tax ratio (premium tax expense as a percentage of premium revenue plus premium tax revenue) was 2.5% for the third quarter of 2018 compared with 2.2% for the third quarter of 2017; and 2.4% compared with 2.3% for the nine months ended September 30, 2018 and 2017, respectively. At our California health plan, the premium tax rate is based on the prior state fiscal year enrollment. Because the California health plan's enrollment and premium revenue have declined in 2018, premium taxes recognized in 2018 have driven a higher premium tax ratio in 2018.

INVESTMENT INCOME AND OTHER REVENUE

Investment income and other revenue increased to $37 million for the third quarter of 2018, compared with $18 million for the third quarter of 2017, and increased to $93 million for the nine months ended September 30, 2018, compared with $48 million for the nine months ended September 30, 2017. The current quarter and year-to-date increases were a result of two factors. First, investment income improved due to annualized portfolio yields, and, for the nine months ended September 30, 2018, we had higher average invested assets. In addition, other revenue increased in the third quarter and nine months ended September 30, 2018, due to administrative services fees earned in our Washington health plan following that state's decision to transition the management of Medicaid pharmacy benefits to an administrative services-based arrangement in 2018.

MEDICAL CARE RATIO (MCR)

Overall, the MCR decreased to 87.4% in the third quarter of 2018, from 88.3% in the third quarter of 2017. Excluding the retroactive California Medicaid Expansion risk corridor adjustment and a small benefit from the 2017 Marketplace cost sharing reduction (CSR), the MCR would have been 86.4% in the third quarter of 2018. Excluding the change in Marketplace premium deficiency reserve for 2017 dates of service, the MCR for the third quarter of 2017 would have been 89.0%. The improvement was mainly due to a decrease in the Medicaid and Marketplace MCRs, partially offset by an increase in the Medicare MCR.

Overall, the MCR improved to 86.2% for the nine months ended September 30, 2018, from 90.5% in the nine months ended September 30, 2017. Excluding adjustments for the retroactive California Medicaid Expansion risk corridor, and the combined benefit of the 2017 Marketplace risk adjustment and CSR reimbursement, the MCR for the nine months ended September 30, 2018 would have been 86.9%. Excluding the change in Marketplace premium deficiency reserve for 2017 dates of service, the MCR for the nine months ended September 30, 2017 would have been 90.2%. The improvement was due to a decrease in the MCRs across our Medicaid, Medicare and Marketplace plans.

GENERAL AND ADMINISTRATIVE (G&A) EXPENSES

The general and administrative (G&A) expense ratio decreased to 6.6% for the third quarter of 2018, from 7.6% for the third quarter of 2017, and decreased to 7.0% for the nine months ended September 30, 2018, from 8.2% for the

nine months ended September 30, 2017. This year-over-year improvement was primarily the result of continued G&A cost containment.

HEALTH INSURER FEES (HIF)

Health insurer fees amounted to $87 million and $261 million, and health insurer fees reimbursed amounted to $83 million and $248 million, in the third quarter of 2018 and the nine months ended September 30, 2018, respectively.

There were no HIF expensed or reimbursed in 2017 due to the HIF moratorium under the Consolidated Appropriations Act of 2016.

GAIN ON SALE OF SUBSIDIARY

We closed on the sale of Molina Medicaid Solutions (MMS) to DXC Technology Company on September 30, 2018. The net cash selling price for the equity interests of MMS was $233 million, which we received on October 1, 2018. As a result of this transaction, we recognized a pretax gain, net of transaction costs, of $37 million, or $0.42 per diluted share in the third quarter of 2018.

INTEREST EXPENSE

Interest expense was $26 million for the third quarter of 2018, compared with $32 million for the third quarter of 2017. Interest expense was $91 million for the nine months ended September 30, 2018, compared with $85 million for the nine months ended September 30, 2017. As further described below in “Liquidity,” year to date we have reduced the principal amount of outstanding debt by $697 million.

Interest expense includes non-cash interest expense relating primarily to the amortization of the discount on convertible senior notes, which amounted to $5 million and $8 million in the third quarter of 2018 and 2017, respectively and $18 million and $24 million in the nine months ended September 30, 2018 and 2017, respectively. See further discussion in Notes to Consolidated Financial Statements, Note 7, “Debt.”

OTHER EXPENSES (INCOME), NET

In the three and nine months ended September 30, 2018, we recorded other expenses of $10 million and $25 million, respectively, due to the loss on debt extinguishment resulting from our 1.125% Notes repayments and the 1.625% Notes exchange. These transactions are described further in Notes to Consolidated Financial Statements, Note 7, “Debt.” In early 2017, we received a $75 million fee in connection with a terminated Medicare acquisition.

INCOME TAXES

The provision for income taxes was recorded at an effective rate of 24.0% for the third quarter of 2018, compared with a benefit of 14.6% for the third quarter of 2017, and 31.9% for the nine months ended September 30, 2018, compared with a benefit of 15.5% for the nine months ended September 30, 2017. The effective tax rate for 2018 differs from 2017 as a result of the reduction in the federal statutory rate from 35% to 21% under the TCJA and higher non-deductible expenses in 2018, primarily related to the non-deductible HIF, as a percentage of pre-tax income (loss). The HIF was not applicable in 2017 due to the 2017 HIF moratorium.

SUMMARY OF SIGNIFICANT ITEMS

The tables below summarize the impact of certain items significant to our financial performance in the periods presented. The individual items presented below increase (decrease) income (loss) before income tax expense (benefit).

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2018	
	Amount	Per Diluted Share [1]	Amount	Per Diluted Share [1]
Retroactive California Medicaid Expansion risk corridor for the state fiscal year ended June 30, 2017	$ (57)	$ (0.65)	$ (57)	$ (0.67)
Marketplace risk adjustment, for 2017 dates of service	—	—	56	0.66
Marketplace CSR subsidies, for 2017 dates of service	5	0.06	81	0.95
Gain on sale of subsidiary	37	0.42	37	0.43
Restructuring costs [2]	(5)	(0.06)	(38)	(0.45)
Loss on debt extinguishment	(10)	(0.12)	(25)	(0.33)
	$ (30)	$ (0.35)	$ 54	$ 0.59

	Three Months Ended September 30, 2017		Nine Months Ended September 30, 2017	
	Amount	Per Diluted Share [1]	Amount	Per Diluted Share [1]
Restructuring costs [2]	$ (118)	$ (1.39)	$ (161)	$ (1.92)
Impairment losses [3]	(129)	(1.77)	(201)	(2.77)
Change in Marketplace premium deficiency reserve for 2017 service dates	30	0.33	(40)	(0.45)
Termination fee received for terminated Medicare acquisition	—	—	75	0.84
	$ (217)	$ (2.83)	$ (327)	$ (4.30)

(1) Except for certain items that are not deductible for tax purposes, per diluted share amounts are generally calculated at the statutory income tax rates of 22% for 2018, and 37% for 2017.
(2) For more information, refer to Notes to Consolidated Financial Statements, Note 10, “Restructuring and Separation Costs.”
(3) In the nine months ended September 30, 2017, we recorded non-cash impairment losses for goodwill and intangibles, primarily relating to our Pathways subsidiary.

REPORTABLE SEGMENTS

HOW WE ASSESS PERFORMANCE

We derive our revenues primarily from health insurance premiums, and our primary customers are state Medicaid agencies and the federal government.

One of the key metrics used to assess the performance of our most significant segment, the Health Plans segment, is the MCR, which represents medical care costs as a percentage of premium revenue. Therefore, the underlying margin, or the amount earned by the Health Plans segment after medical costs are deducted from premium revenue, is the most important measure of earnings reviewed by management.

Margin for our Health Plans segment is referred to as “Medical margin,” and for our Molina Medicaid Solutions and Other segments, as “Service margin.” The service margin is equal to service revenue minus cost of service revenue. Management’s discussion and analysis of the changes in the individual components of medical margin and service margin follows.

SEGMENT SUMMARY

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(In millions)			
Health Plans segment medical margin [1]	$ 547	$ 557	$ 1,812	$ 1,343
Molina Medicaid Solutions segment service margin [2]	14	5	26	13
Other segment service margin [2]	5	2	16	8
Total margin	$ 566	$ 564	$ 1,854	$ 1,364
Health Plans segment medical care ratio	87.4%	88.3%	86.2%	90.5%

(1) Represents premium revenue minus medical care costs.
(2) Represents service revenue minus cost of service revenue.

HEALTH PLANS

The Health Plans segment consists of health plans operating in 13 states and the Commonwealth of Puerto Rico. As of September 30, 2018, these health plans served approximately 4.0 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Marketplace members, most of whom receive government premium subsidies.

RECENT DEVELOPMENTS

Renewal of Medicaid Contracts

Year to date in 2018, we renewed Medicaid contracts in Washington, Florida and Puerto Rico as follows:

- In May 2018, our Washington health plan was selected by the Washington State Health Care Authority (HCA) to enter into a managed care contract for the eight remaining regions of the state's Apple Health Integrated Managed Care program, in addition to the two regions previously awarded to us. We were selected by HCA for the following regions: Greater Columbia, King, North Sound, Pierce, and Spokane beginning January 1, 2019; and Salish, Thurston-Mason, and Great Rivers beginning January 1, 2020. As of September 30, 2018, we served approximately 738,000 Medicaid members in Washington, which represented premium revenue of $1,558 million for the nine months ended September 30, 2018.

- In June 2018, our Florida health plan was awarded comprehensive Medicaid Managed Care contracts by the Florida Agency for Health Care Administration (AHCA) in Regions 8 and 11 of the Florida Statewide Medicaid Managed Care Invitation to Negotiate. As of September 30, 2018, we served approximately 96,000 Medicaid members in those regions, which represented premium revenue of approximately $346 million for the nine months ended September 30, 2018. Services under the new contract are expected to begin on January 1, 2019. We will be serving both the Medicaid and long-term care populations in the two regions.

- In July 2018, our Puerto Rico health plan was selected by the Puerto Rico Health Insurance Administration to be one of the organizations to administer the Commonwealth's new Medicaid Managed Care contract. We expect to serve approximately 290,000 members under the new contract. The base contract runs for a period of three years with an optional one-year extension. As of September 30, 2018, we served approximately 320,000 Medicaid members in the East and Southwest regions of Puerto Rico, which represented premium revenue of $549 million for the nine months ended September 30, 2018.

TRENDS AND UNCERTAINTIES

Upcoming Contract Reprocurements

The following table illustrates Health Plans segment Medicaid contracts scheduled for re-procurement in the near term. While we have been notified of the Medicaid regulators' intention to re-procure the contracts, the anticipated award dates and effective dates are management's current best estimates; such dates are subject to change. Premium revenue is stated in millions.

State Health Plan	Medicaid Program(s)	Membership as of September 30, 2018	Premium Revenue Nine Months Ended September 30, 2018	Anticipated Award Date	Anticipated Effective Date
Texas	ABD, MMP	99,000	$ 1,460	Q2 2019	6/1/2020
Texas	TANF, CHIP	124,000	236	Q3 2019	9/1/2020

New Mexico Health Plan Update. In our Annual Report on Form 10-K for 2017, we reported that we were notified by the New Mexico Medicaid agency that we had not been selected for a tentative award of a 2019 Medicaid contract. A hearing was held on our judicial protest on October 17, 2018, with a decision expected in the fourth quarter of 2018. Regardless of the court's decision on our protest, we would have further rights of appeal. We are continuing to manage the business in run-off until such time as a different outcome is determined. As of September 30, 2018, we served approximately 206,000 Medicaid members in New Mexico, which represented premium revenue of $891 million for the nine months ended September 30, 2018.

Medicare-Medicaid Plans (MMP) Update. The current authority for three of our MMP programs, in California, Illinois and Ohio, ends December 31, 2019. In July 2018, the Ohio Medicaid agency submitted a request to Centers for Medicare and Medicaid Services (CMS) for a three-year extension of its duals demonstration program, through December 31, 2022. We estimate annualized premium revenues of approximately $690 million in 2018 under our Ohio MMP program.

In June 2018, the California Medicaid agency submitted a request to CMS for a one-year extension of its duals demonstration program, through December 31, 2020. We estimate annualized premium revenues of approximately $180 million in 2018 under our California MMP program.

As of October 31, 2018, the Illinois Medicaid agency had not yet submitted an extension request to CMS for its duals demonstration program. We estimate annualized premium revenues of approximately $80 million in 2018 under our Illinois MMP program.

Pressures on Medicaid Funding

Currently, there are a number of different legislative proposals being considered, some of which would involve significantly reduced federal spending on the Medicaid program and constitute a fundamental change in the federal role in health care. These proposals include elements such as the following:

- Ending the entitlement nature of Medicaid by capping future increases in federal health spending for these programs, and shifting more of the risk for health costs in the future to states and consumers;
- Reversing the ACA's expansion of Medicaid that enables states to cover low-income childless adults;
- Changing Medicaid to a state block grant program, including potentially capping spending on a per-enrollee basis (a "per capita cap");
- Requiring Medicaid beneficiaries to work;
- Limiting the amount of lifetime benefits for Medicaid beneficiaries; and
- Numerous other potential changes and reforms.

ACA and the Marketplace

The future of the Affordable Care Act (ACA) and its underlying programs, including the Marketplace, are subject to substantial uncertainty. While we continue to monitor the current political and programmatic developments pertaining to the Marketplace, in 2018 we have taken various actions to improve our Marketplace operating performance. The action with the greatest impact to year-to-date results, effective January 1, 2018, was the significant increase to premium rates (averaging 58%).

We have entered into contracts to participate in nine Marketplace states, including the Utah and Wisconsin Marketplaces, effective January 2019.

MEMBERSHIP

The following tables set forth our Health Plans membership as of the dates indicated:

	September 30, 2018	December 31, 2017	September 30, 2017
Ending Membership by Program:			
Temporary Assistance for Needy Families (TANF) and Children's Health Insurance Program (CHIP)	2,436,000	2,457,000	2,451,000
Medicaid Expansion	664,000	668,000	662,000
Aged, Blind or Disabled (ABD)	415,000	412,000	411,000
Total Medicaid	3,515,000	3,537,000	3,524,000
Medicare-Medicaid Plan (MMP) – Integrated [1]	55,000	57,000	58,000
Medicare Special Needs Plans (Medicare)	45,000	44,000	44,000
Total Medicare	100,000	101,000	102,000
Total Medicaid and Medicare	3,615,000	3,638,000	3,626,000
Marketplace	384,000	815,000	877,000
	3,999,000	4,453,000	4,503,000
Ending Membership by Health Plan:			
California	623,000	746,000	751,000
Florida	395,000	625,000	641,000
Illinois	223,000	165,000	163,000
Michigan	394,000	398,000	399,000
New Mexico	234,000	253,000	256,000
Ohio	315,000	327,000	343,000
Puerto Rico	320,000	314,000	306,000
South Carolina	117,000	116,000	113,000
Texas	436,000	430,000	444,000
Washington	770,000	777,000	770,000
Other [2]	172,000	302,000	317,000
	3,999,000	4,453,000	4,503,000

(1) MMP members receive both Medicaid and Medicare coverage from Molina Healthcare.
(2) "Other" includes the Idaho, New York, Utah and Wisconsin health plans, which are not individually significant to our consolidated operating results.

Premiums by Program

The amount of the premiums paid to our health plans vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program on a PMPM basis, for the nine months ended September 30, 2018. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	PMPM Premiums		
	Low	High	Consolidated
TANF and CHIP	$ 120.00	$ 340.00	$ 190.00
Medicaid Expansion	300.00	510.00	360.00
ABD	520.00	1,530.00	1,030.00
MMP – Integrated	1,360.00	3,190.00	2,170.00
Medicare	600.00	1,270.00	1,170.00
Marketplace	250.00	650.00	380.00

FINANCIAL PERFORMANCE BY PROGRAM

The following tables summarize member months, premium revenue, medical care costs, MCR and medical margin by program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

	Three Months Ended September 30, 2018						
	Member Months [1]	Premium Revenue		Medical Care Costs		MCR [2]	Medical Margin
		Total	PMPM	Total	PMPM		
TANF and CHIP	7.4	$ 1,379	$ 187.03	$ 1,228	$ 166.41	89.0%	$ 151
Medicaid Expansion	2.0	671	333.11	640	317.62	95.3	31
ABD	1.2	1,322	1,054.92	1,186	946.38	89.7	136
Total Medicaid	10.6	3,372	316.86	3,054	286.86	90.5	318

	41.8	$ 14,165	$ 339.19	$ 12,822	$ 307.03	90.5%	$ 1,343

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) "MCR" represents medical costs as a percentage of premium revenue.

Medicaid

The Medicaid MCR decreased to 90.5% in the third quarter of 2018, from 91.8% in the third quarter of 2017, and decreased to 90.4% for the nine months ended September 30, 2018, from 92.4% for the nine months ended September 30, 2017. Excluding recognition of the $57 million retroactive California Medicaid Expansion risk corridor adjustment, the Medicaid MCR would have been 89.0% in the third quarter of 2018, and 89.9% for the nine months ended September 30, 2018. The decreases were mainly due to improved performance for ABD and TANF and CHIP, partially offset by a decline in performance for Medicaid Expansion.

TANF and CHIP. The MCR for TANF and CHIP improved to 89.0% in the third quarter of 2018, from 89.1% in the third quarter of 2017; and improved to 89.4% for the nine months ended September 30, 2018, from 92.2% for the nine months ended September 30, 2017. The year over year improvement was primarily due to improved performance at our Illinois, California and Texas health plans, partially offset by a decline in performance at our New Mexico health plan.

Medicaid Expansion. The MCR for Medicaid Expansion was 95.3% in the third quarter of 2018, up from 86.4% in the third quarter of 2017, and was 89.6% for the nine months ended September 30, 2018, up from 86.1% for the nine months ended September 30, 2017. Excluding recognition of the $57 million retroactive California Medicaid Expansion risk corridor adjustment, the Medicaid Expansion MCR would have been 87.9% in the third quarter of 2018, and 87.3% for the nine months ended September 30, 2018. These increases were primarily due to the premium reduction we received in California in July 2017. Medicaid Expansion has generally performed well because rate adequacy has trended favorably, and membership is concentrated in our higher performing health plans, particularly California, Michigan, and Washington.

ABD. The MCR for ABD improved to 89.7% in the third quarter of 2018, compared with 97.8% in the third quarter of 2017; and improved to 91.9% for the nine months ended September 30, 2018, from 96.4% for the nine months ended September 30, 2017. The year-over-year improvement can be attributed to a number of actions, including our management of high acuity members.

Medicare and MMP

The overall MCR for the combined Medicare programs increased to 87.3% in the third quarter of 2018, from 85.4% in the third quarter of 2017, but improved to 85.7% for the nine months ended September 30, 2018, from 87.8% for the nine months ended September 30, 2017. The MCR increase in the third quarter of 2018 is mainly due to certain premium transfers between the MMP and Medicaid programs that had no impact on consolidated results, and higher inpatient costs in our MMP program. The improvement for the nine months ended September 30, 2018 was partly driven by the recognition of additional MMP at-risk revenue for dates of service in 2016 and 2017, resulting from ultimate settlements with CMS that were higher than the original estimates recognized in those periods. The Medicare business also benefited from favorable medical care trends and improved medical management of inpatient utilization for this population. Accurate and complete risk score documentation and effective management of chronic and high acuity conditions are critical to the successful management of this program.

Marketplace

Lower Marketplace premium revenue was driven by a decrease in membership of over 50%, partially offset by premium rate increases. As previously disclosed, we increased premium rates and reduced our Marketplace presence effective January 1, 2018, as part of our overall program to improve profitability.

The MCR for the Marketplace program decreased to 64.1% in the third quarter of 2018, from 75.3% in the third quarter of 2017; and improved to 57.5% in the nine months ended September 30, 2018, from 84.1% for the nine months ended September 30, 2017. Excluding the benefit of the 2017 Marketplace cost sharing reduction (CSR) reimbursement recognized in 2018, the MCR for the third quarter of 2018 would have been 65.3%. Excluding the combined benefit of the 2017 Marketplace risk adjustment and CSR reimbursement recognized in 2018, the MCR for the nine months ended September 30, 2018 would have been 65.7%. Excluding the changes in Marketplace premium deficiency reserves for 2017 dates of service, the MCR for the third quarter of 2017 would have been 79.1%, and 82.4% for the nine months ended September 30, 2017. The year over year improvement is mainly due to the overall program to improve profitability, as discussed above.

FINANCIAL PERFORMANCE BY STATE

The following tables summarize member months, premium revenue, medical care costs, MCR, and medical margin by state health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

Health Plans Segment Financial Data — Medicaid and Medicare

	Three Months Ended September 30, 2018						
	Member Months	Premium Revenue		Medical Care Costs		MCR	Medical Margin
		Total	PMPM	Total	PMPM		
California	1.7	$ 435	$ 249.00	$ 446	$ 255.22	102.5%	$ (11)
Florida	1.0	388	363.16	362	339.33	93.4	26

MOLINA MEDICAID SOLUTIONS

We closed on the sale of MMS to DXC Technology Company on September 30, 2018.

FINANCIAL OVERVIEW

The Molina Medicaid Solutions segment service margin for the third quarter of 2018 and 2017 and for the nine months ended September 30, 2018 and 2017, was insignificant.

OTHER

The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

We sold our Pathways subsidiary on October 19, 2018. See further information in the Notes to Consolidated Financial Statements, Note 1. “Organization and Basis of Presentation.”

FINANCIAL OVERVIEW

The Other segment service margin for the third quarter of 2018 and 2017 and for the nine months ended September 30, 2018 and 2017, was insignificant.

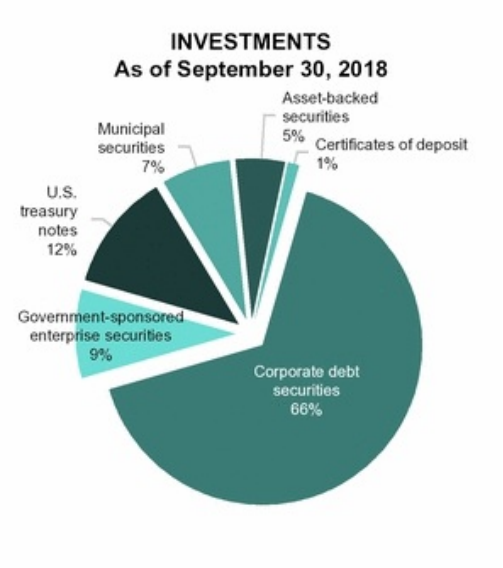
LIQUIDITY AND FINANCIAL CONDITION

INTRODUCTION

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

A majority of the assets held by our Health Plans segment regulated subsidiaries is in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board-approved investment policies that conform to applicable state laws and regulations.

Our investments are classified as current assets, except for our held-to-maturity restricted investments, which are classified as non-current assets, and which are not included in the totals below. Our held-to-maturity restricted investments are invested principally in certificates of deposit and U.S. treasury securities.



MARKET RISK

Our earnings and financial position are exposed to financial market risk relating to changes in interest rates, and the resulting impact on investment income and interest expense.

Substantially all of our investments and restricted investments are subject to interest rate risk and will decrease in value if market interest rates increase. Assuming a hypothetical and immediate 1% increase in market interest rates at September 30, 2018, the fair value of our fixed income investments would decrease by approximately $16 million. Declines in interest rates over time will reduce our investment income.

For further information on fair value measurements and our investment portfolio, please refer to Notes to Consolidated Financial Statements, Note 4, “Fair Value Measurements,” and Note 5, “Investments.”

Borrowings under our Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. As of September 30, 2018, no amounts were outstanding under the Credit Facility.

LIQUIDITY

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Nine Months Ended September 30,		
	2018	2017	Change
	(In millions)		
Net cash (used in) provided by operating activities	$ (191)	$ 957	$ (1,148)
Net cash provided by (used in) investing activities	821	(476)	1,297
Net cash (used in) provided by financing activities	(1,012)	632	(1,644)
Net (decrease) increase in cash, cash equivalents, and restricted cash and cash equivalents	$ (382)	$ 1,113	$ (1,495)

Operating Activities

We typically receive capitation payments monthly, in advance of payments for medical claims; however, state or federal payors may decide to adjust their payment schedules which could positively or negatively impact our reported cash flows from operating activities in any given period. State or federal payors may delay our premium payments, or they may prepay the following month’s premium payment.

Net cash used in operations for the nine months ended September 30, 2018, was $191 million, compared with $957 million of net cash provided for the nine months ended September 30, 2017. The year over year decline was mainly due to the following:

- The timing effect of premium receipts and other revenues negatively impacted our cash flows from operating activities by $687 million on a year-over-year comparative basis. This impact was mainly related to the timing of premiums received at our California, Florida, Ohio, and Washington health plans.
- The decline in medical claims and benefits payable, mainly resulting from reduced Marketplace membership in Florida, Utah, Washington and Wisconsin decreased cash flows from operations by $693 million.
- Settlements with government agencies decreased our cash flows by $633 million on a year-over-year comparative basis, primarily due to payments in the third quarter of 2018, including risk transfer payments associated with our Marketplace health plans.
- The declines discussed above were partially offset by favorable timing differences in the settlement of various operating expenses, including the health insurer fee (HIF). The HIF payable of $348 million was paid on October 1, 2018, after receiving certain related state reimbursements. These favorable timing differences benefited our cash flows by $308 million on a year-over-year comparative basis.

Investing Activities

Net cash provided by investing activities was $821 million for the nine months ended September 30, 2018, compared with $476 million of net cash used in investing activities for the nine months ended September 30, 2017. The year over year improvement is primarily due to higher proceeds from sales and maturities of investments, net of purchases, for the nine months ended September 30, 2018, largely driven by cash flow needs associated with our financing activities, as described below.

Financing Activities

Net cash used in financing activities was $1,012 million for the nine months ended September 30, 2018, compared with $632 million of net cash provided by financing activities for the nine months ended September 30, 2017. The year over year decline was mainly due to the following:

- $300 million repayment of the Credit Facility in 2018;

- $236 million partial principal repayment of the 1.125% Notes in 2018;
- $477 million cash paid for partial settlement of the 1.125% Conversion Option in 2018;
- $419 million cash paid for partial termination of the 1.125% Warrants in 2018;
- $64 million principal repayment of 1.625% Notes in 2018; and
- $625 million of proceeds from the sale of the 4.875% Notes and borrowings under the Credit Facility in 2017.

These uses of cash were partially offset by $477 million of cash received in the nine months ended September 30, 2018 for a partial settlement of the 1.125% Call Option.

FINANCIAL CONDITION

We believe that our cash resources, our borrowing capacity available under our Credit Facility as discussed further below in "Future Sources and Uses of Liquidity—Future Sources," and internally generated funds will be sufficient to support operations, regulatory requirements, debt repayment obligations and capital expenditures for at least the next 12 months.

On a consolidated basis, at September 30, 2018, our working capital was $2,088 million, compared with $1,954 million at December 31, 2017. At September 30, 2018, our cash and investments amounted to $4,746 million, compared with $6,000 million at December 31, 2017.

Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company—Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $505 million as of September 30, 2018, or $390 million when adjusted for the timing of the HIF payment and the proceeds received from the sale of MMS, both of which occurred on October 1, 2018. Parent company cash, cash equivalents and investments amounted to $696 million as of December 31, 2017. The decrease is mainly attributed to reductions in the principal amount of outstanding debt, partially offset by net cash paid to the parent company by our subsidiaries.

In the nine months ended September 30, 2018, the regulated health plan subsidiaries paid $258 million in dividends to the parent, and our unregulated subsidiaries paid $10 million in dividends to the parent. In the nine months ended September 30, 2018, the parent company contributed capital of $122 million to our regulated health plan subsidiaries to satisfy statutory net worth requirements.

Debt Ratings

Our 5.375% Notes are rated "BB-" by Standard & Poor's, and "B3" by Moody's Investor Service, Inc. A downgrade in our ratings could adversely affect our borrowing capacity and increase our borrowing costs.

Financial Covenants

Our Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. Such ratios, presented below, are computed as defined by the terms of the Credit Facility.

Credit Facility Financial Covenants	Required Per Agreement	As of September 30, 2018
Net leverage ratio	<4.0x	1.2x
Interest coverage ratio	>3.5x	10.8x

In addition, the indentures governing the 4.875% Notes, the 5.375% Notes and the 1.125% Notes contain cross-default provisions that are triggered upon default by us or any of our subsidiaries on any indebtedness in excess of the amount specified in the applicable indenture. As of September 30, 2018, we were in compliance with all covenants under the Credit Facility and the indentures governing our outstanding notes.

Capital Plan Progress

Year to date, we have reduced the principal amount of outstanding debt by $697 million.

In the third quarter of 2018, we repaid $140 million aggregate principal amount of our 1.125% Notes and entered into privately negotiated termination agreements to partially terminate the related 1.125% Call Option and 1.125% Warrants. In addition, we converted the remaining $64 million aggregate principal amount of our 1.625% Notes for

cash and 0.6 million shares of our common stock. Additionally, we terminated our bridge credit agreement in the third quarter of 2018.

In the second quarter of 2018, we repaid $300 million outstanding under our Credit Facility. In addition, we repaid $96 million aggregate principal amount of our 1.125% Notes, and entered into privately negotiated termination agreements to partially terminate the related 1.125% Call Option and 1.125% Warrants.

In the first quarter of 2018, we exchanged $97 million aggregate principal amount and accrued interest of our 1.625% Notes for 1.8 million shares of our common stock.

FUTURE SOURCES AND USES OF LIQUIDITY

Future Sources

Our Health Plans segment regulated subsidiaries generate significant cash flows from premium revenue, which we generally receive a short time before we pay for the related health care services. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity.

Dividends from Subsidiaries. When available and as permitted by applicable regulations, cash in excess of the capital needs of our regulated health plans is generally paid in the form of dividends to our unregulated parent company to be used for general corporate purposes. For more information on our regulatory capital requirements and dividend restrictions, refer to Notes to Consolidated Financial Statements, Note 12, “Commitments and Contingencies—Regulatory Capital Requirements and Dividend Restrictions.”

Borrowing Capacity and Debt Financing. We have available borrowing capacity of $494 million under our Credit Facility. See further discussion in the Notes to Consolidated Financial Statements, Note 7, “Debt.”

Sale of MMS. We closed on the sale of Molina Medicaid Solutions (MMS) to DXC Technology Company on September 30, 2018. The net cash selling price for the equity interests of MMS was $233 million, which we received on October 1, 2018.

Savings from Restructuring Plans. Our new executive team has focused on a margin recovery plan that includes identification and implementation of various profit improvement initiatives. To that end, we have begun to implement a plan to restructure our information technology department (the IT Restructuring) in the third quarter of 2018. As we further implement the IT Restructuring in the fourth quarter of 2018, we will report estimates of anticipated future savings in our 2018 Annual Report on Form 10-K.

Under the restructuring plan we implemented in 2017 (the 2017 Restructuring Plan), we have achieved savings in our Health Plans and Other segments of approximately $230 million since the plan’s inception through September 30, 2018. These savings have reduced both “General and administrative expenses” and “Medical care costs” reported in our consolidated statements of operations.

Further details of our restructuring plans, including costs associated with such plans, are described in the Notes to Consolidated Financial Statements, Note 10, “Restructuring and Separation Costs.”

Shelf Registration Statement. We have a shelf registration statement on file with the Securities and Exchange Commission to register an unlimited amount of any combination of debt or equity securities in one or more offerings. Specific information regarding the terms and securities being offered and the use of proceeds will be provided at the time of an offering.

Future Uses

Regulatory Capital Requirements and Dividend Restrictions. We have the ability, and have committed to provide, additional capital to each of our health plans as necessary to ensure compliance with statutory capital and surplus requirements.

1.125% Notes. Refer to the Notes to Consolidated Financial Statements, Note 7, “Debt,” for a detailed discussion of our convertible notes, including recent transactions. The principal amount of our 1.125% Notes is convertible into cash prior to its maturity date under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger, which is $53.00 per share. The 1.125% Notes met this trigger in the quarter ended September 30, 2018, and are convertible to cash through at least December 31, 2018. In addition, they are convertible by the holders within one year of the current balance sheet date until they mature; therefore, they are reported in current portion of long-term debt. If conversion requests are received, the settlement of the notes must be paid in cash pursuant to the terms of the relevant indentures. We have sufficient available cash, combined with borrowing capacity available under our Credit Facility, to fund conversions should they occur.

HIF. The HIF payable of $348 million was paid on October 1, 2018.

CONTRACTUAL OBLIGATIONS

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2017, was disclosed in our 2017 Annual Report on Form 10-K.

As of September 30, 2018, the principal amount of debt outstanding was $1,344 million, compared with $2,041 million reported at December 31, 2017. Refer to the Notes to Consolidated Financial Statements, Note 7, “Debt,” for a description of debt repayments in 2018.

As of December 31, 2017, we reported operating lease obligations of $262 million. Of this total, approximately $49 million related to the Molina Medicaid Solutions and Pathways subsidiaries. As noted in the Notes to Consolidated Financial Statements, Note 1, “Organization and Basis of Presentation,” these subsidiaries were recently sold; therefore, such lease obligations are no longer obligations of Molina Healthcare.

Other than these items, there were no significant changes to this previously filed information outside the ordinary course of business during the nine months ended September 30, 2018.

CRITICAL ACCOUNTING ESTIMATES

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Notes to Consolidated Financial Statements, Note 6, “Medical Claims and Benefits Payable,” for a table that presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements. Other than the discussion as noted above, there have been no significant changes during the nine months ended September 30, 2018, to our disclosure reported in “Critical Accounting Estimates” in our Annual Report on Form 10-K for the year ended December 31, 2017.

- *Health Plans segment contractual provisions that may adjust or limit revenue or profit*. For a discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies.”

- *Health Plans segment quality incentives*. For a discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies.”

- *Goodwill and intangible assets, net.* As result of the divestiture of MMS on September 30, 2018, the carrying amount of goodwill was reduced by $43 million; therefore, goodwill and intangible assets, net, represented approximately 2% of total assets and 12% of stockholders’ equity as of September 30, 2018, compared with 3% and 19%, respectively, at December 31, 2017. Other than the divestiture of MMS, there have been no significant changes during the nine months ended September 30, 2018, to our disclosure reported in “Critical Accounting Estimates” in our Annual Report on Form 10-K for the year ended December 31, 2017.

CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures. Our management, with the participation of our chief executive officer and our chief financial officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company’s “disclosure controls and procedures” (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)), are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC’s rules and forms.

Changes in Internal Control Over Financial Reporting. There has been no change in our internal control over financial reporting during the fiscal quarter ended September 30, 2018 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

LEGAL PROCEEDINGS

For information regarding legal proceedings, see Notes to Consolidated Financial Statements, Note 12, “Commitments and Contingencies.”

RISK FACTORS

Certain risks may have a material adverse effect on our business, financial condition, cash flows, results of operations, or stock price, and you should carefully consider them before making an investment decision with respect to our securities. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in “Risk Factors,” in our Annual Report on Form 10-K for the year ended December 31, 2017. The risk factors described in our 2017 Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, results of operations, or stock price.

UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

ISSUER PURCHASES OF EQUITY SECURITIES

Purchases of common stock made by us, or on our behalf during the quarter ended September 30, 2018, including shares withheld by us to satisfy our employees’ income tax obligations, are set forth below:

	Total Number of Shares Purchased [1]	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares Authorized to Be Purchased Under the Plans or Programs
July 1 - July 31	105	$ 97.94	—	$ —
August 1 - August 31	243	$ 134.01	—	$ —
September 1 - September 30	—	$ —	—	$ —
Total	348	$ 123.13	—	

(1) During the three months ended September 30, 2018, we withheld 348 shares of common stock under our 2011 Equity Incentive Plan to settle employee income tax obligations.

MEMBERSHIP INTERESTS PURCHASE AGREEMENT

This **MEMBERSHIP INTERESTS PURCHASE AGREEMENT** (this "Agreement"), dated as of October 19, 2018, is made and entered into by and between Pyramid Health Holdings, LLC, a Delaware limited liability company ("Purchaser"), and Molina Pathways, LLC, a Delaware limited liability company ("Seller"). Molina Healthcare, Inc., a Delaware corporation ("Parent"), is a party hereto for purposes of Sections 6.02(b), 6.08, 6.10, 6.11, 6.12, 6.13, 6.15, 6.16 and 6.18 and Articles 8 and 9.

RECITALS

WHEREAS, Seller owns beneficially and of record all of the issued and outstanding membership interests (the "Interests") of Pathways Health and Community Support LLC, a Delaware limited liability company (the "Company");

WHEREAS, Seller desires to sell to Purchaser, and Purchaser desires to purchase from Seller, all of the Interests upon the terms and subject to the conditions hereinafter set forth; and

WHEREAS, the parties hereto desire to enter into, or to cause their applicable Affiliates to enter into, the Transaction Documents, and to perform or cause such Affiliates to perform their obligations thereunder as further described herein.

AGREEMENT

NOW, THEREFORE, in consideration of the mutual covenants contained herein and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, and intending to be legally bound, the parties hereto agree as follows:

ARTICLE 1
CERTAIN DEFINITIONS

Section 1.01 Certain Definitions. As used in this Agreement, the following terms have the respective meanings set forth below.

"ACA" has the meaning ascribed thereto in Section 4.20(h).

"Accounts Receivable" means the accounts receivable of the Business in accordance with the Company Accounting Principles.

"Acquisition Proposal" means any offer, proposal or indication of interest (other than an offer, proposal or indication of interest by Purchaser or its Affiliates) contemplating or otherwise relating to any transaction or series of related transactions involving any:

(a) merger, consolidation, share exchange, business combination, issuance of securities, direct or indirect acquisition of securities, recapitalization, tender offer, exchange offer or other similar transaction (collectively, "Business Combinations") in which: (i) a Person or "group" (as defined in the Securities Exchange Act of 1934, as amended and the rules promulgated thereunder) of Persons directly or indirectly acquires beneficial or record ownership

of securities representing more than 15% of the outstanding shares of any class of voting securities of the Company; or (ii) the Company issues securities representing more than 15% of the outstanding shares of any class of voting securities of the Company to any Person or "group" of Persons other than Parent or an Affiliate thereof, in each case, other than any Business Combination in which a Person or "group" of Persons directly acquires beneficial or record ownership of securities of Parent;

(b) sale, lease, license, exchange, transfer, acquisition or disposition of any assets by the Company or its Subsidiaries that constitute or account for: (i) 15% or more of the consolidated net revenues of the Company and its Subsidiaries, consolidated net income of the Company and its Subsidiaries or consolidated book value of the Company and its Subsidiaries; or (ii) 15% or more of the fair market value of the assets of the Company and its Subsidiaries, in each case, other than (x) in the ordinary course of business, or (y) pursuant to the express terms of this Agreement; or

(c) liquidation or dissolution of the Company.

"Adjusted Balance Sheet" shall have the meaning specified in Section 2.05.

"Affiliate" of any Person, means any other Person that, directly or indirectly, through one (1) or more intermediaries, controls, or is controlled by, or is under common control with, such first Person. As used in this definition, the term "control," including the correlative terms "controlled by" and "under common control with," means the possession, directly or indirectly, of the power to direct or cause the direction of management or policies (whether through ownership of Equity Securities, by Contract or otherwise).

"Agreement" has the meaning ascribed thereto in the Preamble.

"Allocation Schedule" has the meaning ascribed thereto in Section 6.04(e).

"Assets" has the meaning ascribed thereto in Section 4.10(a).

"Balance Sheet" has the meaning ascribed thereto in Section 4.07(a).

"Business" means the business engaged in by the Company and its Subsidiaries as presently conducted.

"Business Day" means a day, other than a Saturday or Sunday or any other day on which commercial banking institutions in New York, New York are not open for the transaction of normal banking business.

"Closing" has the meaning ascribed thereto in Section 3.01.

"Closing Cash" means the cash and cash equivalents of the Company and its Subsidiaries as of the Closing Date, including any deposits in transit, less any outstanding checks, bank overdrafts, book overdrafts or other negative cash balances, calculated consistently with the Company Accounting Principles.

"Closing Date" has the meaning ascribed thereto in Section 3.01.

"Code" means the Internal Revenue Code of 1986, as amended, and the rules and regulations issued thereunder.

"Company" has the meaning ascribed thereto in the Recitals.

"Company Accounting Principles" has the meaning ascribed thereto in Section 4.07(a).

"Company Confidential Information" has the meaning ascribed thereto in Section 6.13(a).

"Company Disclosure Schedule" means the disclosure schedule and exhibits thereto that have been delivered to Purchaser concurrently with the execution and delivery of this Agreement.

"Confidentiality Agreement" means that certain Mutual Nondisclosure Agreement, dated May 3, 2018, by and between Parent and Atar Capital, LLC.

"Continuing Employees" has the meaning ascribed thereto in Section 6.05(a).

"Contract" means any written or oral agreement, contract, subcontract, lease, indenture, note, guaranty, option, warranty, purchase order, license, sublicense, insurance policy or legally binding arrangement, commitment, obligation or undertaking of any nature (and all amendments, modifications, restatements, or supplements thereto).

"Covered Entities" has the meaning ascribed thereto in Section 4.16(a).

"Data Room" has the meaning ascribed thereto in Section 9.04.

"Deductible" has the meaning ascribed thereto in Section 8.04(e).

"Dispute Accountant" means an independent accounting firm mutually selected by Purchaser and Seller.

"Employee Benefit Plan" means each (a) "employee benefit plan," as defined in Section 3(3) of ERISA and (b) incentive, profit-sharing, stock option, stock purchase, equity-based, employment, consulting, vacation or other leave, change of control, transaction, retention, severance, deferred compensation, medical, dental, vision, retiree medical, disability, flexible spending, cafeteria, retirement, fringe benefit or other compensation or benefit plan, policy, program or agreement, in each case established, sponsored, maintained or contributed by the Company or its Subsidiaries, or with respect to which the Company or any of its Subsidiaries has or may have any actual or contingent liability or obligation, in each case with respect to its current or former employees, directors and/or independent contractors.

"End Date" has the meaning ascribed thereto in Section 7.01(b).

"Environmental Laws" means all Laws relating to pollution or protection of the environment (including ambient air, surface water, groundwater, soils or subsurface strata), the preservation or reclamation of natural resources, the protection of human health as it relates to exposure to Hazardous Materials or the use, generation, management, handling, transport, treatment, presence, disposal, storage or release of Hazardous Materials.

"Equity Securities" means, if a Person is a corporation, shares of capital stock of such corporation and, if a Person is a form of entity other than a corporation, ownership interests in such form of entity, whether membership interests, partnership interests or otherwise, and in either case any options, warrants, or any other interests convertible into or exchangeable or exercisable for the purchase of any such shares or ownership interests.

"ERISA" means the Employee Retirement Income Security Act of 1974, as amended.

"ERISA Affiliate" of any entity means any trade or business that is, or at any relevant time was, together with such entity, treated as a "single employer" under Section 414(b), 414(c) or 414(m) of the Code and/or Section 4001(b)(1) of ERISA.

"Existing Performance Bonds" has the meaning ascribed thereto in Section 6.06.

"Federal Privacy Regulations" means the regulations contained in 45 C.F.R. §§ 160 and 164, as amended.

"Federal Security Regulations" means the regulations contained in 45 C.F.R. §§ 160 and 164, as amended.

"Federal Transaction Regulations" means the regulations contained in 45 C.F.R. §§ 160 and 162, as amended.

"Final Closing Cash" shall have the meaning specified in Section 2.03(b).

"Final Closing Cash Statement" shall have the meaning specified in Section 2.03(b).

"Financial Statements" has the meaning ascribed thereto in Section 4.07.

"Fraud" means (a) with respect to Seller, the actual fraud of Seller with respect to the representations and warranties made pursuant to Article 4 (as modified by the Company Disclosure Schedule), which involves a knowing and intentional misrepresentation of a fact material to the transactions contemplated by this Agreement, with the intent of deceiving Purchaser or its Affiliates and upon which Purchaser or such Affiliates has relied to its detriment (as opposed to any fraud claim based on constructive knowledge, negligent misrepresentation or a similar theory) under applicable tort laws and (b) with respect to Purchaser, the actual fraud of Purchaser with respect to the representations and warranties made pursuant to Article 5, which involves a knowing and intentional misrepresentation of a fact material to the transactions contemplated by this Agreement, with the intent of deceiving Seller or its Affiliates and upon which Seller or such Affiliates has relied to its detriment (as opposed to any fraud claim based on constructive knowledge, negligent misrepresentation or a similar theory) under applicable tort laws.

"Fraud Claims" has the meaning ascribed thereto in Section 4.27.

"Fundamental Purchaser Representations" means, collectively, the representations and warranties contained in Section 5.01 (Organization and Good Standing), Section 5.02 (Authority), clause (a) of Section 5.03 (No Conflicts), and Section 5.10 (Brokers).

"Fundamental Seller Representations" means, collectively, the representations and warranties contained in Section 4.01 (Organization and Good Standing), Section 4.02 (Authority), clause (a) of Section 4.03 (No Conflicts), Section 4.05 (Title to Interests), clauses (a) and (b) of Section 4.06 (Capitalization), and Section 4.25 (Brokers).

"GAAP" means generally accepted accounting principles as in effect in the United States on the date of this Agreement, applied in a manner consistent with the Company Accounting Principles.

"General Cap Amount" has the meaning ascribed thereto in Section 8.04(a).

"Governing Documents" means the legal document(s) by which any Person (other than an individual) establishes its legal existence or which govern its internal affairs, in each case, as amended to date. For example, the "Governing Documents" of a corporation are its articles or certificate of incorporation and by-laws, and the "Governing Documents" of a limited liability company are its articles of organization and its operating agreement or limited liability company agreement.

"Government Program" means any Federal Healthcare Program or any health care program or health care reimbursement or participation agreement between the Company or any of its Subsidiaries and any Governmental Authority or any contractor of such Governmental Authority.

"Governmental Authority" means any federal, state or local government, court, tribunal or arbitral body (whether private or governmental) of competent jurisdiction, administrative agency, commission or board, or other governmental, quasi-governmental authority (including self-regulatory organization) or regulatory authority or instrumentality of the United States or any other country or any other state, county, municipality or other governmental division of any country.

"Hazardous Materials" means any chemical, material, substance, waste, pollutant or contaminant (a) that is regulated, defined, listed or identified under any Environmental Law as a "hazardous waste," "hazardous substance" or "toxic substance" or (b) that is or contains petroleum or petroleum constituents or byproducts, toxic mold, biohazards, radioactive materials, asbestos-containing materials, urea formaldehyde foam insulation, polychlorinated biphenyl or radon gas.

"Health Plan" has the meaning ascribed thereto in Section 4.20(h).

"Healthcare Laws" means applicable Laws relating to or governing health care, insurance fraud or abuse or the licensure, certification, qualification or authority to provide healthcare items and services, including the following statutes: the Federal Anti-Kickback Statute (42

U.S.C. § 1320a-7b), the Stark Law (42 U.S.C. § 1395nn), the Federal False Claims Act (31 U.S.C. §§ 3729, et seq.), the Federal Civil Monetary Penalties Law (42 U.S.C. § 1320a-7a), the Federal Program Fraud Civil Remedies Act (31 U.S.C. § 3801 et seq.) and the Federal Health Care Fraud Law (18 U.S.C. § 1347); and the Health Insurance Portability and Accountability Act of 1996 (Pub. L. No. 104-191), as amended by the Health Information Technology for Economic and Clinical Health Act (Pub. L. No. 111-5) and their implementing regulations (collectively, "HIPAA").

"Indebtedness" means, with respect to the Company and each of its Subsidiaries, at any applicable date, (a) all obligations for borrowed money or extensions of credit of the Company or such Subsidiaries, (b) all obligations evidenced by bonds, debentures, notes or other similar instruments, commercial paper or debt securities of the Company or such Subsidiaries, (c) all obligations under interest rate or non-U.S. currency swaps, hedges, caps, collars, options, futures or similar instruments of the Company or such Subsidiaries for the purpose of managing interest rate and/or non-U.S. exchange rate, (d) all obligations of the Company or such Subsidiaries for the deferred purchase price of any property or services (other than trade accounts payable and accrued expenses reflected as accounts payable or accrued expenses in the Balance Sheet or incurred after the date thereof in the ordinary course of business), including earnouts, payments under non-compete agreements and seller notes owed by the Company or its Subsidiaries, (e) all obligations for borrowed money of the Company or such Subsidiaries secured by a Lien, (f) all obligations of the Company or such Subsidiaries under leases which are required to be, in accordance with GAAP, recorded as capital leases, and (g) all interest, principal, prepayment penalties, premiums, fees or expenses due or owing by the Company or such Subsidiaries in respect of any item listed in clauses (a) through (f) above.

"Indemnifying Party" has the meaning ascribed thereto in Section 8.01(a).

"Indemnity Notice" has the meaning ascribed thereto in Section 8.04(a).

"Insurance Policies" has the meaning ascribed thereto in Section 4.23.

"Intellectual Property" means all domestic and international intellectual property rights, whether registered or unregistered, including, without limitation (a) patents, applications for patents, patent disclosures and inventions, together with all reissues, continuations, continuations-in-part, revisions, divisional, extensions and re-examinations, (b) trade secrets and confidential, proprietary business and technical information, (c) copyright registrations, applications for copyright registrations and unregistered copyrights and works of authorship (including software), (d) trademarks and service marks, logos, business names, corporate names and trade names, together with all goodwill associated therewith and all registrations, applications for registration, and renewals for any of the foregoing, (e) trade secrets and other confidential information and know-how that derive economic value from not being generally known to, and not being readily available through lawful means by another Person, (f) Internet web site addresses, domain names and URLs and (g) any other proprietary or similar rights relating to any of the foregoing.

"Intercompany Accounts" means any intercompany accounts, balances, payables, receivables or indebtedness between Parent or any of its Subsidiaries (excluding the Company

and its Subsidiaries), on the one hand, and any of the Company or its Subsidiaries, on the other hand.

"Interests" has the meaning ascribed thereto in the Recitals.

"IRS" means the United States Internal Revenue Service.

"Laws" means all laws, statutes, acts, ordinances, rules, rules of common law, regulations, directives, legally binding policies or guidance, treaties, codes, rulings, Orders, certification standards, accreditation standards, Permits, decisions or other directives or requirements of any Governmental Authority.

"Lease" has the meaning ascribed thereto in Section 4.11(b).

"Leased Real Property" has the meaning ascribed thereto in Section 4.11(b).

"Liability" means any liability or obligation of any nature whatsoever, whether known or unknown, whether asserted or unasserted, whether absolute or contingent, whether accrued or unaccrued, whether liquidated or unliquidated, and whether due or to become due.

"Lien" means any mortgage, pledge, lien, charge, claim, equitable interest, option, proxy, pledge, right of first refusal or first offer, security interest, deed of trust, hypothecation, easement, encroachment, right of way, voting trust, voting agreement and any other encumbrance of any kind, including, without limitation, any restriction on voting, transfer, receipt of income, or exercise of any other attribute of ownership.

"Loss" means all damages, awards, losses, Liabilities, obligations, claims, payments, fines, penalties, interest, costs and expenses (including reasonable attorneys' fees, court costs and other reasonable professional fees and expenses and any amounts paid in settlement).

"Maple Star Colorado" means Maple Star Colorado, a non-profit corporation incorporated under the laws of the State of Colorado.

"Material Adverse Effect" means any event, change, circumstance, effect or other matter that has had or would reasonably be expected to have, with or without notice, lapse of time or both, (a) a material adverse effect on the business assets, properties, liabilities, condition (financial or otherwise), operating results or operations of the Company and its Subsidiaries, taken as a whole, or (b) the ability of Parent and the Seller to perform their respective obligations under this Agreement or to consummate the transactions contemplated by this Agreement; provided, that the impact of the following shall not be taken into account in determining whether there has been or would be a Material Adverse Effect: (a) changes in conditions in the industry in which the Company and its Subsidiaries operate; (b) changes in conditions in the United States or global economy, capital or financial markets generally, including, without limitation, changes in interest or exchange rates; (c) changes in legal, tax, accounting, regulatory, political or business conditions that, in each case, generally affect the industry in which the Company and its Subsidiaries participate; (d) acts of war, sabotage or terrorism (including any escalation or general worsening of any such acts of war, sabotage or terrorism) in the United States or any other country; (e) earthquakes, hurricanes, tsunamis, tornadoes, floods, mudslides, wild fires or

other natural disasters, weather conditions and other force majeure events in the United States or any other country; (f) any failure, in and of itself, by the Company or its Subsidiaries to meet any forecast, projection or estimate (it being understood that any material adverse effect giving rise to such failure may be taken into account in determining whether there has been a Material Adverse Effect); (g) acts by Parent, Seller, the Company or its Subsidiaries carried out at the express written request of Purchaser; (h) the taking of any action expressly required by the terms of this Agreement; or (i) the announcement, pendency or consummation of the transactions contemplated by this Agreement; except, with respect to clauses (a), (b), (c), (d), and (e), to the extent any such matter materially and disproportionately affects the Company and its Subsidiaries compared to other companies operating in the industries in which the Company and its Subsidiaries operate.

"Material Contracts" has the meaning ascribed thereto in Section 4.09(b).

"Membership Interest Assignment and Assumption Agreement" means the Membership Interest Assignment and Assumption Agreement, to be entered into as of the Closing Date, by and between Purchaser and Seller, substantially in the form attached hereto as Exhibit A.

"Mutual Release" means the Mutual Release, to be entered into as of the Closing Date, by and between Seller and the Company, substantially in the form attached hereto as Exhibit B.

"Order" means any judgment, award, decision, order, decree, writ, injunction, assessment, ruling, subpoena or verdict entered or issued by any Governmental Authority.

"Owned Real Property" has the meaning ascribed thereto in Section 4.11(a).

"Parent" has the meaning ascribed thereto in the Preamble.

"Parent Confidential Information" has the meaning ascribed thereto in Section 6.13(b).

"Per-Claim Basket" has the meaning ascribed thereto in Section 8.04(c).

"Permit" means any permit, license, franchise, qualification, certification, accreditation, approval, certificate, consent, provider number or other registration, authorization or exemption by or of a Governmental Authority.

"Permitted Liens" means (a) statutory mechanics', carriers', workmen's, repairmen's, vendors', suppliers', warehousemen's or other like or statutory Liens arising or incurred in the ordinary course of business for amounts not yet due or which are being contested in good faith by appropriate Proceedings; (b) Liens for Taxes, special assessments and other governmental or quasi-governmental charges that are not yet delinquent or that are being contested in good faith by appropriate Proceedings and for which adequate reserves have been made with respect thereto in accordance with GAAP; (c) with respect to Real Property, easements, covenants, conditions, restrictions, reservations, rights of way, encroachments and/or other similar matters or imperfections affecting or encumbering title to any Real Property; provided, that no such item described in this clause (c) individually or in the aggregate materially impairs the current use or occupancy of the Real Property subject thereto; (d) Liens incurred or deposits or pledges made in the ordinary course of business in connection with, or to secure payment of, workers'

compensation, unemployment insurance, old age pension programs mandated under applicable Laws or other social security regulations; (e) zoning, building and other land use entitlements, regulations or restrictions regulating the development, use or occupancy of Real Property; provided, that no such item described in this clause (e) materially impairs the current use or occupancy of the Real Property subject thereto; (f) the interests of, and Liens and encumbrances on the interests of, the lessors and sublessors of any Leased Real Property, and Liens and encumbrances on easements, licenses, rights of use, rights of access, rights of way and other non-fee estates, interests and/or rights in property arising from the provisions of such agreements or benefiting or created by any superior estate, right, or interest in such nonfee estates and (g) the Lien described on Section 1.01 of the Company Disclosure Schedule.

"Person" means an individual, sole proprietorship, partnership, corporation, limited liability company, joint stock company, unincorporated organization or association, trust, joint venture, association or other organization, whether or not a legal entity or a Governmental Authority.

"Pre-Closing Insurable Event" means any event or circumstance that occurred prior to the Closing and that was insurable under the Insurance Policies, but is not insured under the Insurance Policies because it was not properly reported to the applicable insurer prior to the Closing, and including without limitation, any and all related to general liability, workers compensation, property, umbrella liability and owned, hired, rented and/or other non-owned vehicles.

"Post-Closing Tax Period" means any Tax period beginning after the Closing Date and that portion of any Straddle Period beginning after the Closing Date.

"Pre-Closing Tax Period" means any Tax period ending on or prior to the Closing Date and that portion of any Straddle Period ending on (and including) the Closing Date.

"Proceeding" means any lawsuit, litigation, arbitration, mediation, action or other proceeding by or before any Governmental Authority.

"Proprietary Information" has the meaning ascribed thereto in Section 4.12(c).

"Protected Health Information" has the meaning ascribed thereto by HIPAA and the implementing rules found in 45 CFR § 160.103.

"Purchase Price" has the meaning ascribed thereto in Schedule 2.02.

"Purchaser" has the meaning ascribed thereto in the Preamble.

"Purchaser 401(k) Plan" has the meaning ascribed thereto in Section 6.05(a).

"Purchaser Indemnified Party" has the meaning ascribed thereto in Section 8.02.

"Real Property" means the Owned Real Property and the Leased Real Property.

"Reference Date" has the meaning ascribed thereto in Section 4.08.

"Related Person" has the meaning ascribed thereto in Section 4.27.

"Remedies Exception" means: (a) applicable bankruptcy, insolvency, reorganization, moratorium, fraudulent transfer and other Laws of general application, heretofore or hereafter enacted or in effect, affecting the rights and remedies of creditors generally; and (b) general principles of equity, including good faith and fair dealing, regardless of whether in a proceeding at equity or at Law.

"Representatives" means, with respect to a Person, the directors, officers, employees, agents, Affiliates and representatives of such Person.

"Restricted Names" has the meaning ascribed thereto in Section 6.10.

"Restricted Person" has the meaning ascribed thereto in Section 6.12(a).

"Retention Bonus Agreements" means those retention bonus letter agreements, dated December 29, 2017, by and between Seller, Parent and each of the Retention Bonus Holders.

"Retention Bonus Amounts" means the aggregate amounts payable to the Retention Bonus Holders under and pursuant to the Retention Bonus Agreements.

"Retention Bonus Holders" has the meaning ascribed thereto in Section 6.05(c).

"Section 336 Elections" has the meaning ascribed thereto in Section 6.04(e).

"Section 336 Forms" means all returns, documents, statements, and other forms that are required to be submitted to any federal, state, local or foreign Tax Authority in connection with a Section 336 Election (including, without limitation, any "statement of section 336 election" and IRS Form 8023, together with any schedules or attachments thereto, that are required pursuant to Treasury Regulations under Code Section 336(e), as applicable).

"Securities Act" means the Securities Act of 1933, as amended.

"Seller" has the meaning ascribed thereto in the Preamble.

"Seller 401(k) Plan" has the meaning ascribed thereto in Section 4.20(c).

"Seller Group" has the meaning ascribed thereto in Section 9.15.

"Seller Indemnified Party" has the meaning ascribed thereto in Section 8.03.

"Seller's Knowledge" means, when referring to the "knowledge" of Seller or the Company, or any similar phrase or qualification based on knowledge of Seller or the Company, the present, actual knowledge of any of Craig Bass, Allen Wolfenbarger and/or Bart Beattie, after reasonable inquiry of their direct reports.

"Solvent" means, with respect to any Person, that: (a) the assets of such Person, at a present fair saleable valuation, exceeds the sum of its debts (including contingent and unliquidated debts); (b) the present fair saleable value of the assets of such Person exceeds the

amount that will be required to pay such Person's probable Liability on its existing debts as they become absolute and matured; (c) such Person has adequate capital to carry on its business; and (d) such Person does not intend or believe it will incur debts beyond its ability to pay as such debts mature. In computing the amount of contingent or unliquidated Liabilities at any time, such Liabilities will be computed at the amount which, in light of all the facts and circumstances existing at such time, represents the amount that can reasonably be expected to become actual or matured Liabilities.

"Straddle Period" means any Tax period beginning on or prior to and ending after the Closing Date.

"Subsidiary" means, with respect to any Person, as of the date of any determination, any other Person as to which such Person owns, directly or indirectly, or otherwise controls, more than fifty percent (50%) of the voting shares or other similar interests or the sole general partner interest or managing member or similar interest. For purposes of this Agreement, "Subsidiary" shall include, Maple Star Colorado, College Community Services, a California nonprofit corporation, and Maple Star Oregon, Inc., an Oregon nonprofit corporation.

"Substitute Performance Bonds" has the meaning ascribed thereto in Section 6.06.

"Surviving Seller Representations" means, collectively, the Fundamental Seller Representations and the representations and warranties contained in Section 4.19 (Taxes).

"Target Closing Cash" shall have the meaning specified in Schedule 2.02.

"Tax" or "Taxes" means (a) any federal, state, local or foreign income, gross receipts, property, sales, use, license, franchise, employment, severance, stamp, occupation, windfall profits, environmental, customs duties, capital stock, profits, social security (or similar, including FICA), unemployment, sales, use, disability, real property, personal property, escheat, unclaimed property, registration, value added, estimated, payroll, premium, withholding, alternative or added minimum, ad valorem, transfer or excise tax, or any other tax of any kind or any fee or charge in the nature of (or similar to) taxes (including any of the foregoing), together with any interest or penalty or addition to tax, whether disputed or not and (b) any liability for the payment of any amounts of the type described in clause (a) as a result of being a member of an affiliated, consolidated, combined or unitary group, as a result of any tax sharing, tax allocation or tax indemnity agreement, arrangement or understanding, as a result of entity level taxes on entities which are disregarded entities or passthrough entities for federal income tax purposes or as a result of being liable for another Person's taxes as a transferee or successor, by Contract or otherwise.

"Tax Authority" shall mean any Governmental Authority, having or purporting to exercise jurisdiction with respect to any Tax.

"Tax Matter" has the meaning ascribed thereto in Section 6.04(j).

"Tax Purchase Price" has the meaning ascribed thereto in Section 6.04(d).

"Tax Refunds" has the meaning ascribed thereto in Section 6.04(c).

"Tax Return" means any return, report, declaration, claim for refund, information return or other document relating to Taxes, including any related or supporting schedule, statement or information thereto, any attachment thereto, and including any amendment thereof.

"Third Party Claim" has the meaning ascribed thereto in Section 8.04(b).

"Transaction Documents" means the Membership Interest Assignment and Assumption Agreement, the Mutual Release, the Transition Services Agreement and each other document to be executed by the parties hereto at the Closing.

"Transfer Taxes" has the meaning ascribed thereto in Section 6.03.

"Transition Services Agreement" means that certain Transition Services Agreement, to be entered into as of the Closing Date, by and between Parent and Purchaser, substantially in the form attached hereto as Exhibit C.

"Treasury Regulations" means the Treasury Regulations promulgated under the Code.

"United States" means the United States of America.

ARTICLE 2
PURCHASE AND SALE

Section 2.01 Purchase and Sale of the Interests. Upon the terms and subject to the conditions of this Agreement, at the Closing, Seller agrees to sell, convey, assign and transfer to Purchaser, and Purchaser agrees to purchase from Seller, all right, title and interest in and to the Interests, free and clear of all Liens (except for restrictions on transfer imposed by federal or state securities Laws).

Section 2.02 Purchase Price. Upon the terms and subject to the conditions of this Agreement, in consideration of the sale, conveyance, assignment and transfer of all right, title and interest in and to the Interests to Purchaser pursuant to Section 2.01 and the rights and benefits conferred herein, at the Closing, (a) Purchaser will pay or cause to be paid to Seller the Purchase Price in immediately available funds, and (b) Seller shall leave an estimated amount of Closing Cash equal to the Target Closing Cash on the Adjusted Balance Sheet.

Section 2.03 Cash Reconciliation.

(a) Final Closing Cash. By no later than October 26, 2018, Purchaser shall deliver to Seller a statement (the "Final Closing Cash Statement") of the amount of the Closing Cash (the "Final Closing Cash").

(b) Review by Seller; Dispute Resolution.

(i) Seller will be afforded a period of ten (10) Business Days to review the Final Closing Cash Statement and the calculation of the Final Closing Cash during which period Seller and its advisors shall have reasonable access, during normal business hours, to the relevant personnel and books and records of the Company and its Subsidiaries

related to the Final Closing Cash Statement and calculation of the Final Closing Cash. At or before the end of such ten (10) Business Day period, Seller will either accept the Final Closing Cash Statement and the calculation of the Final Closing Cash (in which case the calculation of the Final Closing Cash delivered by Purchaser above will be final, conclusive and binding on the parties), or notify Purchaser in writing that Seller disputes the Final Closing Cash Statement and the calculation of the Final Closing Cash. Within a further period of another five (5) Business Days, the parties will attempt to resolve in good faith any disputed items.

(ii) Failing such resolution, either Seller or Purchaser may refer the disputed items for resolution by the Dispute Accountant. The parties hereto shall direct the Dispute Accountant to deliver to Purchaser and Seller, within fifteen (15) days after reference of the matter, a written report setting forth its calculation of the Final Closing Cash, which shall be consistent with the terms of this Agreement and final, conclusive and binding upon the parties. The costs and expenses of the Dispute Accountant shall be allocated evenly between Purchaser and Seller.

(c) Adjustment Payment. After the Final Closing Cash Statement and the calculation of the Final Closing Cash become final, conclusive and binding upon the parties as provided above, then, within five (5) Business Days:

(i) If the Final Closing Cash is greater than the Target Closing Cash, then Purchaser will wire transfer to Seller the difference in immediately available funds.

(ii) If the Final Closing Cash is less than the Target Closing Cash, then Seller will wire transfer to Purchaser the difference in immediately available funds.

Section 2.04 Withholding. Purchaser or the Company, as applicable, shall be entitled to deduct and withhold, or cause to be deducted and withheld, from any amounts payable pursuant to this Agreement such amounts as are required to be deducted and withheld under the Code or any other applicable Law with respect to the making of such payment; provided, however, that (a) before making any such deduction or withholding, Purchaser or the Company, as applicable, shall give Seller notice of the intention to make such deduction or withholding (such notice, which shall include the authority, basis and method of calculation for the proposed deduction or withholding, shall be given at least a commercially reasonable period of time before such deduction or withholding), (b) Purchaser or the Company, as applicable, shall cooperate with Seller to the extent reasonable in efforts to obtain reduction of or relief from such deduction or withholding and (c) Purchaser or the Company, as applicable, shall timely remit to the appropriate Tax Authority any and all amounts so deducted or withheld and timely file all Tax Returns and provide to Seller such information statements and other documents required to be filed or provided under applicable Tax law. To the extent that amounts are so withheld and paid over or deposited with the relevant Tax Authority by Purchaser or the Company in accordance with the foregoing, such withheld amounts shall be treated for all purposes of this Agreement as having been paid to the Person in respect of whom such deduction and withholding was made. Notwithstanding the foregoing, no deduction or withholding under the Code shall be made from the consideration otherwise payable to Seller pursuant to this Agreement if Seller provides to

Purchaser at the Closing a complete IRS Form W-9 and a statement made in accordance with Treasury Regulations Section 1.1445-2(b).

Section 2.05 Adjusted Balance Sheet. Attached as Exhibit D is an unaudited consolidated balance sheet of the Company and its Subsidiaries as of September 30, 2018, as adjusted to give effect to (a) the distribution of Cash by the Company to Seller at or on the day prior to the Closing, and (b) the settlement or cancellation of Intercompany Accounts, deferred tax liabilities and deferred tax assets at Closing (the "Adjusted Balance Sheet").

ARTICLE 3
CLOSING

Section 3.01 Closing. Upon the terms and subject to the satisfaction or waiver of the conditions contained in this Agreement, the closing of the transactions contemplated hereby (the "Closing") shall be effected (a) by electronic mail and overnight courier service, or by physical exchange of documentation at the offices of Latham & Watkins LLP, located at 355 South Grand Avenue, Suite 100, Los Angeles, CA 90071, on October 19, 2018, or (b) at such other time and place as the parties hereto shall mutually agree. The date on which the Closing occurs is referred to as the "Closing Date".

Section 3.02 Delivery and Actions by Seller at Closing. At or prior to the Closing, Seller shall deliver, or shall cause to be delivered, to Purchaser:

(a) a certificate in form and substance reasonably satisfactory to Purchaser, dated as of the Closing Date and duly executed and delivered by Seller, certifying as to Seller's, Parent's and the Company's satisfaction of the conditions set forth in Sections 3.05(a) and 3.05(b).

(b) a completed IRS Form W-9 for Parent duly executed by Parent and accompanied by an affidavit dated as of the Closing Date from Parent, sworn under penalty of perjury and in form and substance required under the Treasury Regulations issued pursuant to Section 1445 of the Code stating that Parent is not a "foreign person" as defined in Section 1445 of the Code;

(c) written resignations in form and substance reasonably acceptable to Purchaser effective as of the Closing from each director of the Company and each of its Subsidiaries in their capacity as such;

(d) an executed signature page of Seller or its Affiliates, as the case may be, of each Transaction Document to which Seller or such Affiliates, as the case may be, is a party; and

(e) a certificate, dated as of the Closing Date, signed by the Secretary or other authorized officer of Seller, attesting and certifying to the completion of all necessary limited liability company action by Seller to execute and deliver this Agreement and the Transaction Documents to which it is a party and to consummate the transactions contemplated hereby and thereby, and including copies of all resolutions required in connection with this Agreement and the Transaction Documents.

Section 3.03 Delivery and Actions by Purchaser at Closing. At or prior to the Closing, Purchaser shall deliver, or shall cause to be delivered, to Seller:

(a) an executed signature page of Purchaser or its Affiliates, as the case may be, of each Transaction Document to which Purchaser or such Affiliates, as the case may be, is a party;

(b) the Purchase Price in accordance with Section 2.02; and

(c) a certificate, dated as of the Closing Date, signed by the Secretary or other authorized officer of Purchaser, attesting to the completion of all necessary limited liability company action by Purchaser to execute and deliver this Agreement and the Transaction Documents to which it is a party and to consummate the transactions contemplated hereby and thereby, and including all limited liability company resolutions required in connection with this Agreement and the Transaction Documents.

Section 3.04 Conditions to Obligations of Seller. The obligations of Seller under this Agreement to sell the Interests and to consummate the transactions contemplated hereby are subject to the satisfaction, on or prior to the Closing, of the following conditions, unless waived (to the extent such conditions can be waived) in writing by Seller:

(a) Accuracy of Representations and Warranties. Each of (i) the representations and warranties of Purchaser contained in Article 5 (other than the Fundamental Purchaser Representations) shall be true and correct in all material respects (without giving effect to any limitation as to materiality or material adverse effect set forth therein) on and as of the date of this Agreement and as of the Closing, as though made at and as of Closing (other than such representations and warranties expressly made as of an earlier date, which representations and warranties shall be true and correct as of such earlier date), except where the failure of such representations and warranties to be so true and correct, individually or in aggregate with other such failures, has had or would reasonably be expected to have a material adverse effect on Purchaser's ability to consummate the transactions contemplated hereby and (ii) the Fundamental Purchaser Representations shall be true and correct in all material respects on and as of the date of this Agreement and as of the Closing, as though made at and as of Closing.

(b) Performance of Obligations. Purchaser shall have performed or complied in all material respects with all agreements, obligations and covenants required to be performed by it under this Agreement on or as of the Closing Date.

(c) No Restraint. No provisions of any applicable Law or Order shall be in effect, and no Proceeding shall be pending or overtly threatened by or before any Governmental Authority, that would reasonably be expected to enjoin, prevent, restrain or delay consummation of any of the transactions contemplated hereby or by the Transaction Documents, declare unlawful any of the transactions contemplated hereby or by the Transaction Documents or cause any of the transactions contemplated hereby or by the Transaction Documents to be rescinded following consummation.

(d) Deliveries. Purchaser shall have delivered, or caused to be delivered, to Seller the funds, documents, certificates and other instruments required under Section 3.03.

Section 3.05 Conditions to Obligations of Purchaser. The obligations of Purchaser under this Agreement to purchase the Interests and to consummate the transactions contemplated

hereby are subject to the satisfaction, on or prior to the Closing, of the following conditions, unless waived (to the extent such conditions can be waived) in writing by Purchaser:

(a) Accuracy of Representations and Warranties. Each of (i) the representations and warranties of Seller contained in Article 4 (other than the Fundamental Seller Representations) shall be true and correct in all respects (without giving effect to any limitation as to materiality or Material Adverse Effect set forth therein) on and as of the date of this Agreement and as of the Closing, as though made at and as of Closing (other than such representations and warranties expressly made as of an earlier date, which representations and warranties shall be true and correct as of such earlier date), except where the failure of such representations and warranties to be so true and correct, individually or in the aggregate with any other such failures, have not had, and would not reasonably be expected to have, a Material Adverse Effect, and (ii) the Fundamental Seller Representations shall be true and correct in all material respects on and as of the date of this Agreement and as of the Closing, as though made at and as of Closing.

(b) Performance of Obligations. Each of Seller, Parent and the Company shall have performed or complied in all material respects with all agreements, obligations and covenants required to be performed by it under this Agreement on or as of the Closing Date.

(c) No Material Adverse Effect. From the date of this Agreement through the Closing Date, no event, occurrence, change, development, effect, condition, state of facts or circumstance shall have occurred or arisen that, individually or in combination with any other event, occurrence, change, development, effect, condition, state of facts or circumstance, has had or would reasonably be expected to have a Material Adverse Effect.

(d) No Restraint. No provisions of any applicable Law or Order shall be in effect, and no Proceeding shall be pending or overtly threatened by or before any Governmental Authority, that would reasonably be expected to enjoin, prevent, restrain or delay consummation of any of the transactions contemplated hereby or by the Transaction Documents, declare unlawful any of the transactions contemplated hereby or by the Transaction Documents or cause any of the transactions contemplated hereby or by the Transaction Documents to be rescinded following consummation.

(e) Deliveries. Seller shall have delivered, or caused to be delivered, to Purchaser the documents, certificates and other instruments required under Section 3.02.

ARTICLE 4
REPRESENTATIONS AND WARRANTIES OF SELLER

Subject to the qualifications set forth in the applicable sections or subsections of the Company Disclosure Schedule (it being understood and agreed that the disclosure of any item in the Company Disclosure Schedule shall be deemed to have been disclosed with respect to other representations or warranties in this Article 4 if the relevance of such disclosure to such other representations or warranties in this Article 4 is readily apparent on its face), Seller hereby represents and warrants to Purchaser as of the date hereof and as of the Closing as follows:

Section 4.01 Organization and Good Standing. Seller is a limited liability company, duly formed, validly existing and in good standing under the Laws of the State of Delaware. Each of the Company and its Subsidiaries is a corporation or limited liability company, duly organized, validly existing and in good standing under the Laws of its jurisdiction of organization, which jurisdiction is listed on Section 4.01 of the Company Disclosure Schedule, and has the requisite corporate or limited liability company power and authority to carry on its business as presently conducted and to own, lease and operate its properties. Each of the Company and its Subsidiaries is duly qualified to do business and is in good standing in each jurisdiction listed on Section 4.01 of the Company Disclosure Schedule, which are all of the jurisdictions in which the property owned, leased or operated by it or the nature of the business conducted by it makes such qualification and good standing necessary, except where the failure to be so qualified and in good standing has not had a Material Adverse Effect. The Company has made available to Purchaser correct and complete copies of the Governing Documents of the Company and each of its Subsidiaries. Section 4.01 of the Company Disclosure Schedule sets forth a true, complete and accurate list of all of the Company's Subsidiaries.

Section 4.02 Authority. Each of Seller and the Company has the requisite limited liability company power and authority to execute and deliver this Agreement and the Transaction Documents to which it is a party, to perform its obligations hereunder and thereunder and to consummate the transactions contemplated hereby and thereby. The execution, delivery and performance by Seller and the Company of this Agreement and the Transaction Documents to which it is party and the consummation of the transactions contemplated hereby and thereby have been duly authorized by all necessary limited liability company action on the part of Seller and the Company. Each of this Agreement and the Transaction Documents to which Seller or the Company is a party has been, or will be as of the Closing, duly executed and delivered by Seller or the Company, as applicable, and, assuming the due authorization, execution and delivery by the other parties hereto or thereto, constitutes or will constitute a legal, valid and binding obligation of Seller or the Company, as applicable, enforceable against Seller or the Company, as applicable, in accordance with its terms, subject to the Remedies Exception.

Section 4.03 No Conflicts. Assuming the consents, approvals, Orders and authorizations of, and registrations, declarations and filings with, and notices to, the Governmental Authorities and other Persons referenced on Section 4.04 of the Company Disclosure Schedule are obtained, given, and made at the time required under applicable Law or applicable Material Contract, neither the execution or delivery of this Agreement nor any Transaction Document by Seller or the Company, nor the consummation by Seller or the Company of the transactions contemplated hereby and thereby will: (a) conflict with, contravene or constitute a violation of (whether after the giving of notice, lapse of time or both) the Governing Documents of Seller, the Company or any of its Subsidiaries; (b) contravene, conflict with or constitute a material violation or breach of the terms or conditions of, or constitute (whether after the giving of notice, lapse of time or both) a material default under, any Material Contract; (c) contravene, conflict with or constitute a violation of (whether after the giving of notice, lapse of time or both) any Law or Order to which Seller, the Company or its Subsidiaries are subject in any material respect; or (d) result in the creation or imposition of any Lien (other than a Permitted Lien) upon any Interests or any Assets.

Section 4.04 Consents. No consent, approval, Order or authorization of, or registration, declaration or filing with, or notice to, any Governmental Authority or any other Person or under any Material Contract is required to be obtained or made by Seller, the Company or any of its Subsidiaries in connection with the authorization, execution, delivery and performance of this Agreement or any Transaction Document to which it is a party, as applicable, or in connection with the consummation of the transactions contemplated hereby and thereby, other than as set forth on Section 4.04 of the Company Disclosure Schedule.

Section 4.05 Title to Interests. Seller is the sole record and beneficial owner of the Interests free and clear of all Liens other than restrictions on transfer arising under applicable federal and state securities Laws.

Section 4.06 Capitalization.

(a) Section 4.06(a)(i) of the Company Disclosure Schedule sets forth (i) the number of authorized Equity Securities of the Company and each of its Subsidiaries, and (ii) a complete and correct list of the issued and outstanding Equity Securities of the Company and each of its Subsidiaries, including the name of the record and beneficial owner thereof and the number of Equity Securities held thereby. Except as set forth on Section 4.06(a)(i) of the Company Disclosure Schedule, neither the Company nor any of its Subsidiaries owns or otherwise holds, directly or indirectly, any Equity Securities in any Person. All of the outstanding Equity Securities of each of the Company's Subsidiaries are owned by the Company or another Subsidiary free and clear of all Liens (other than Liens arising under applicable securities Laws that are released no later than the Closing).

(b) All of the Equity Securities of the Company and each of its Subsidiaries have been duly authorized and validly issued, and are fully paid and non-assessable. All of the Interests are owned beneficially and of record by Seller and all of the Equity Securities of each Subsidiary of the Company are directly or indirectly owned beneficially and of record by the Company. There are no outstanding (i) Equity Securities or other securities of the Company or any of its Subsidiaries directly or indirectly convertible into or exchangeable for Equity Securities of the Company or any of its Subsidiaries; (ii) options, warrants, calls, subscriptions or other rights to directly or indirectly acquire from the Company or any of its Subsidiaries or other obligations of the Company or any of its Subsidiaries to issue, any Equity Securities of the Company or any of its Subsidiaries; or (iii) agreements to which Parent or any of its Subsidiaries (including the Company or any of its Subsidiaries) is a party containing profit participation or phantom equity features with respect to the Company or any of its Subsidiaries. There are no outstanding obligations (contingent or otherwise) of the Company or any of its Subsidiaries to repurchase, redeem or otherwise acquire or retire any of its Equity Securities or any warrants or option or other rights to acquire any Equity Securities of the Company or any of its Subsidiaries. There are no statutory or contractual equityholder preemptive or similar rights, rights of first refusal or registration rights with respect to the Equity Securities of the Company or any of its Subsidiaries. There are no agreements, commitments or understandings with respect to the voting or transfer of the Equity Securities or other securities of the Company or any of its Subsidiaries.

(c) Neither the Company nor any of its Subsidiaries has violated any applicable federal or state securities Laws or any preemptive or similar rights created by statute, organizational document or agreement in connection with the offer, sale or issuance of any of the Equity Securities of the Company or any of its Subsidiaries. There is no Liability for, or obligation with respect to, the payment of dividends, distributions or similar participation interests declared or accumulated but unpaid with respect to any Equity Securities of the Company or any of its Subsidiaries, and there are no restrictions of any kind which prevent the payment of the foregoing by the Company or any of its Subsidiaries.

Section 4.07 Financial Statements.

(a) Annexed to Section 4.07(a)(i) of the Company Disclosure Schedule are true, correct and complete copies of (i) the unaudited consolidated balance sheets of the Company and its Subsidiaries, as of December 31, 2017 and 2016 and the related unaudited consolidated statements of income for the years then ended and (ii) the unaudited consolidated balance sheet of the Company and its Subsidiaries, as of September 30, 2018 (the "Balance Sheet") and the related unaudited consolidated statement of income for the nine (9) months then ended (collectively, the "Financial Statements"). Except as set forth therein and except as set forth on Section 4.07(a) of the Company Disclosure Schedule, the Financial Statements (x) have been prepared in accordance with the accounting principles set forth on Schedule 4.07(a) (the "Company Accounting Principles") and consistent with past practices, except that the interim Financial Statements described in clause (ii) immediately above are subject to the absence of footnotes and to normal year-end adjustments (which will not be material individually or in the aggregate), (y) fairly present, in all material respects, the consolidated financial position and results of operations of the Company and its Subsidiaries in accordance with the Company Accounting Principles at the respective dates set forth therein and for the respective periods covered thereby, and (z) are consistent with the books and records of the Company and its Subsidiaries. Since December 31, 2017, there has been no change in any accounting principles, policies, methods or practices of the Company and its Subsidiaries except as set forth on Section 4.07(a)(ii) of the Company Disclosure Schedule.

(b) Neither the Company nor any of its Subsidiaries has any Liabilities required to be accrued on a balance sheet in accordance with GAAP, except (i) as and to the extent specifically accrued for or reserved against in the Balance Sheet, (ii) Liabilities which have arisen after the date of the Balance Sheet in the ordinary course of business consistent with past practice (none of which results from, arises out of, relates to, is in the nature of, or was caused by any breach of contract, breach of warranty, tort, infringement or violation of Law), (iii) executory obligations under Contracts (other than Liabilities relating to any breach, or any fact or circumstance that, with notice, lapse of time or both, would result in a breach, thereof by the Company or any of its Subsidiaries), (iv) Liabilities that would not reasonably be expected to be material to the Company and its Subsidiaries taken as a whole and (v) Liabilities specifically set forth on Section 4.07(b) of the Company Disclosure Schedule.

(c) Neither the Company nor any of its Subsidiaries is responsible for any of the obligations or Liabilities of Maple Star Colorado that are specified in detail on Section 4.07(c) of the Company Disclosure Schedule.

Section 4.08 Absence of Certain Developments. Except as set forth on Section 4.08 of the Company Disclosure Schedule, since December 31, 2017 (the "Reference Date") through the date of this Agreement, (a) the Company and its Subsidiaries have conducted their business in all material respects in the ordinary course of business consistent with past practice, (b) there has not been a Material Adverse Effect, and (c) none of Parent, Seller, the Company nor any of the Company's Subsidiaries has taken any action that, if taken after the date of this Agreement, would constitute a breach of any of the covenants set forth in Section 6.15.

Section 4.09 Material Contracts.

(a) Section 4.09(a) of the Company Disclosure Schedule sets forth, as of the date of this Agreement, a true, complete and accurate list (by reference to the applicable subsection hereof) of the following types of undischarged Contracts to which the Company or any of its Subsidiaries are bound or are a party (excluding any Employee Benefit Plan):

(i) indentures, credit agreements, security agreements, mortgages, guarantees, promissory notes and Contracts relating to or evidencing Indebtedness of the Company or any of its Subsidiaries;

(ii) each Contract that contains a covenant not to compete or a material exclusivity requirement or otherwise prohibits the Company or its Subsidiaries or any of their respective present or future Affiliates from competing with or engaging in any business activity anywhere in the world or soliciting for employment, hiring or employing any Person in any geographic location;

(iii) all partnership agreements, limited liability company agreements, joint venture agreements or similar Contracts;

(iv) each Contract relating to the acquisition or sale of a business (or all or substantially all of the assets thereof) by the Company or any of its Subsidiaries;

(v) each Contract involving the settlement of any Proceeding or threatened Proceeding involving payments by the Company or any of its Subsidiaries in excess of Three Hundred Thousand Dollars ($300,000);

(vi) except for indemnity Contracts (or other similar contracts) relating to the Existing Performance Bonds, any Contract the primary purpose of which is to provide for the indemnification of a third party by any of the Company and its Subsidiaries;

(vii) each Contract that contains a most favored nation or similar provision in favor of any counterparty or that obliges the Company to purchase or otherwise obtain any product or service exclusively from a single party;

(viii) each Contract involving or expected to involve payments of more than Three Hundred Thousand Dollars ($300,000), in the aggregate, in any calendar year to or by the Company or any of its Subsidiaries; and

(ix) each Contract not required to be disclosed pursuant to any of the other subsections of this Section 4.09(a) that provided for revenue (on a consolidated basis) to the Company and its Subsidiaries in excess of Three Hundred Thousand Dollars ($300,000) for the twelve (12) month period ended on the date hereof.

(b) Each Contract listed or required to be listed on Section 4.09(a) of the Company Disclosure Schedule (collectively, the "Material Contracts") is, in all material respects, in full force and effect, is valid, binding and enforceable in accordance with its terms, subject in each case to the Remedies Exception and any termination of such Material Contracts expressly provided under this Agreement or the Transaction Documents. Neither the Company or its Subsidiaries nor, to Seller's Knowledge, any other party to any Material Contract has materially violated or breached, or committed any material default under, nor, to Seller's Knowledge, has any event occurred within the last three (3) years which with the giving of notice or the passage of time or both would constitute a material breach or default by the Company or any of its Subsidiaries or any other party under any Material Contract. True, complete and accurate copies of the Material Contracts, together with all modifications and amendments thereto, previously have been delivered or made available to Purchaser, or, to the extent any of such Material Contracts are oral, Section 4.09(a) of the Company Disclosure Schedule contains a description of the material terms thereof. Neither Seller, the Company nor any of its Subsidiaries has, in the last three (3) years, received any written notice regarding any material violation or breach of, or material default under, any such Material Contract.

Section 4.10 Title to Assets; No Liens.

(a) Except as set forth on Section 4.10(a) of the Company Disclosure Schedule, each of the Company and its Subsidiaries has good and marketable title to, or a valid leasehold interest in or the right to use, all of the tangible assets and property used or held in and necessary for the conduct of the Business, as presently conducted (collectively, the "Assets"), free and clear of all Liens (except Permitted Liens). The Assets, together with the services to be provided pursuant to the Transition Services Agreement, the insurance policies of Parent or its Subsidiaries, the two (2) servers to be delivered by Seller to Purchaser pursuant to Section 6.10, the "Pathways" name and logo and the name "Pathways by Molina", are all of the assets and property that are necessary to enable the Business of the Company and its Subsidiaries to be conducted immediately after the Closing in the same manner as the Business of the Company and its Subsidiaries have been conducted since the Reference Date and in accordance with the terms of their Contracts.

(b) All material items of tangible personal property owned or leased by the Company or any its Subsidiaries are in good operating condition and repair, ordinary wear and tear excepted, and are suitable for the purposes for which they are presently being used.

Section 4.11 Real Property.

(a) Section 4.11(a)(i) of the Company Disclosure Schedule sets forth, as of the date of this Agreement, a complete list of the addresses of all real property owned in fee by the Company or any of its Subsidiaries as of the date of this Agreement (the "Owned Real Property"). With respect to each Owned Real Property: (i) either the Company or one (1) of its

Subsidiaries has good and insurable title in fee simple to each parcel of Owned Real Property, free and clear of all Liens except for Permitted Liens; (ii) there are no outstanding options, rights of first offer or rights of first refusal to purchase the Owned Real Property or any portion thereof or interest therein; and (iii) except as set forth on Section 4.11(f) of the Company Disclosure Schedule, no Person other than the Company or its Subsidiaries, as applicable, has any right to use, occupy or lease any of the Owned Real Property (other than any right pursuant to a Permitted Lien). Seller has made available to Purchaser copies of all material reports, surveys, plans, books, and records relating to the business of owning, operating, maintaining and/or managing the Owned Real Property, including, but not limited to, all accounting, financial, tax, sales, maintenance and similar records, each of which pertain to Owned Real Property, in each case to the extent in Seller's and/or its Affiliates' possession or control (the "Real Property Documents"). The Real Property Documents constitute all material documents which are in Seller's and its Affiliates' possession or control. For purposes of the preceding representation, "material documents" means one (1) or more documents which would put a reasonable person on notice that a material defective condition, violation of or termination of an easement or other material adverse impact on appurtenant rights, land use change, claim or potential claim, or other material problem with the ownership, use, operation or management of the Owned Real Property exists or is threatened and such material problem is reasonably estimated to cost One Hundred Thousand Dollars ($100,000.00) or more to repair or remediate or correct.

(b) Section 4.11(b) of the Company Disclosure Schedule sets forth, as of the date of this Agreement, a complete list of all leases of real property (such real property, the "Leased Real Property") to which the Company or any of its Subsidiaries is currently a party as a tenant or occupant (together with all amendments, extensions, and renewals with respect thereto, each a "Lease"). A true, correct and complete copy of each such written Lease (including all amendments and other modifications), as in the Company's possession, has been made available to Purchaser prior to the date hereof. With respect to each Leased Real Property, the Company's or its applicable Subsidiary's possession and quiet enjoyment under the applicable Lease has not been disturbed.

(c) The Real Property comprises all of the real property that is used by the Company or its Subsidiaries in the Business. No condemnation Proceeding or similar Proceeding is pending or, to Seller's Knowledge, threatened in writing with respect to any part or interest in any Owned Real Property or, to Seller's Knowledge, Leased Real Property. Except as set forth on Section 4.11(c) of the Company Disclosure Schedule, to Seller's Knowledge, all of the Real Property is in good operating condition and repair, subject only to ordinary wear and tear, and is sufficient for the operation of the Business as currently conducted. To Seller's Knowledge, there are no facts or conditions affecting the Real Property that would reasonably be expected to materially interfere with the current use and occupancy of such Real Property or the operation of the Business as currently conducted. To Seller's Knowledge, there are no material violations of any Laws, Permits or certificates of occupancy affecting any of the Real Property. During the last three (3) years, neither the Company nor any of its Subsidiaries has received any notice from any insurance company or board of fire underwriters of any defects or inadequacies that would reasonably be expected to materially adversely affect the insurability of any Real Property or requesting the performance of any material work or alteration with respect to any Real Property. To Seller's Knowledge, no event has occurred that would reasonably be expected to result in the termination or material impairment of presently available access from adjoining public or private

streets or ways or in the discontinuation of presently available sewer, water, electric, gas, telephone or other utilities or services for any Real Property. The Company and/or the Subsidiaries have all certificates of occupancy, licenses, and Permits as necessary for the lawful operation of the Real Property in the manner as currently operated.

(d) Each Lease is legal, valid and binding on the Company or its applicable Subsidiary and, to Seller's Knowledge, on the other parties thereto, and, to Seller's Knowledge, is in full force and effect, in accordance with its terms (subject to the Remedies Exception). The Leased Real Property is (i) used in a manner which is consistent and permitted by applicable zoning ordinances and other applicable Laws or regulations, (ii) is served by all water, sewer, electrical, telephone, drainage and other utilities required for normal operations of the business of the Company and its Subsidiaries, and (iii) is equipped with building systems which are adequate for the conduct of the business of the Company and its Subsidiaries as it presently is or has been conducted. During the last three (3) years, neither the Company nor any of its Affiliates has received written notice of any uncured violation of any Laws affecting any of the Leased Real Property, including any zoning regulation or ordinance (with respect to parking), building, fire, health or other Law. During the last three (3) years, neither the Company nor any of its Affiliates has received any written notice of any uncured violation of any declarations, restrictive covenants, or easements with respect to any Leased Real Property.

(e) The Company or its applicable Subsidiary has paid all rent and other amounts heretofore due and payable under each Lease (including any utility charges, common area maintenance charges, real property taxes or assessments payable by the Company or such Subsidiary under each Lease).

(f) Except as otherwise set forth in Section 4.11(f) of the Company Disclosure Schedule, neither the Company nor any of its Subsidiaries has leased, subleased, licensed or otherwise granted any Person the right to use or occupy the Real Property or any portion thereof.

(g) To Seller's Knowledge, no party is in breach or default under any Lease in any material respect and no event has occurred which, with notice or lapse of time, would constitute a breach or default under any Lease in any material respect.

Section 4.12 Intellectual Property.

(a) Section 4.12(a) of the Company Disclosure Schedule sets forth, as of the date of this Agreement, a true, complete and accurate list of the (i) patents and patent applications; (ii) trademark and service mark registrations and applications for registration thereof; (iii) copyright registrations and applications for registration thereof; and (iv) internet domain name registrations, in each case that are owned by the Company or any of its Subsidiaries, including for each item listed, as applicable, the owner, the jurisdiction, the application/serial number, the patent/registration number, the filing date, and the issuance/registration date. All such registrations and applications are valid and in full force and effect and the Company and its Subsidiaries have taken all reasonable actions required to maintain their validity and effectiveness.

(b) Except as set forth on Section 4.12(b) of the Company Disclosure Schedule, (i) there are no written and outstanding claims or allegations of infringement or unauthorized use of any third party Intellectual Property or technology that has been sent to the Company or any of its Subsidiaries, (ii) there have been no written and outstanding claims made against the Company or any of its Subsidiaries asserting the invalidity, misuse or unenforceability of any of the Intellectual Property owned by the Company or any of its Subsidiaries, (iii) during the three (3) years preceding the date of this Agreement, neither the Company nor any of its Subsidiaries has received any written notices of any infringement or misappropriation by, or conflict with, any third party with respect to any Intellectual Property (including any demand or request in writing that the Company or any of its Subsidiaries license any Intellectual Property rights from a third party in order to avoid infringement or misappropriation), (iv) during the three (3) years preceding the date of this Agreement, to Seller's Knowledge, the conduct of the Company's Business and that of its Subsidiaries have not materially infringed, misappropriated or conflicted with and does not materially infringe, misappropriate or conflict with any Intellectual Property rights of other Persons, (v) to Seller's Knowledge, the Company and all of its Subsidiaries has the right to use and license the Intellectual Property material to their Business, and (vi) to Seller's Knowledge, no third party is currently infringing, misappropriating, diluting or otherwise violating any Intellectual Property owned by the Company or any of its Subsidiaries that is material to the Business. To Seller's Knowledge, the transactions contemplated by this Agreement will not have an adverse effect on the Company's or any of its Subsidiaries right, title or interest in and to the Intellectual Property listed on Section 4.12(a) of the Company Disclosure Schedule and all of such Intellectual Property shall be owned or available for use by the Company and its Subsidiaries on identical terms and conditions immediately after the Closing.

(c) The Company and its Subsidiaries have taken all industry standard and commercially reasonable security measures (i) to safeguard and maintain the secrecy and confidentiality of the Intellectual Property owned by the Company and/or its Subsidiaries that comprises trade secrets or other confidential information that is material to the Business ("Proprietary Information") and, to Seller's Knowledge, there has not been any release, publication, disclosure or other dissemination of such Proprietary Information except as permitted under agreements between the Company (or any of its Subsidiaries) or third parties that contain confidentiality or non-disclosure provisions with respect to such Proprietary Information.

Section 4.13 Litigation. Except as set forth on Section 4.13 of the Company Disclosure Schedule, there is no material Proceeding pending, or to Seller's Knowledge, threatened against the Company or any of its Subsidiaries. Except as set forth on Section 4.13 of the Company Disclosure Schedule, there are no material Proceedings pending or threatened by the Company or any of its Subsidiaries that would reasonably be expected to result in a material Liability or obligation of the Company or any of its Subsidiaries. Neither the Company nor any of its Subsidiaries, nor any of their businesses or assets, is subject to any outstanding Order.

Section 4.14 Compliance with Laws.

(a) The Company and each of its Subsidiaries are, and have been during the last three (3) years, in compliance in all material respects with all Laws related to the conduct, ownership, use, occupancy or operation of its Business and the Assets.

(b) Except as set forth on Section 4.14(b)(i) of the Company Disclosure Schedule, neither the Company nor any of its Subsidiaries has received any written notice or other communication from a Governmental Authority during the last three (3) years or, to Seller's Knowledge, been subject to any audit or investigation by a Governmental Authority which alleges or asserts that the Company or any such Subsidiary has violated any Laws in any material respect. There is no material audit, claim, action, suit, investigation or administrative or other legal Proceeding pending or, to Seller's Knowledge, threatened against the Company or any of its Subsidiaries relating to the Company's or such Subsidiary's participation in any Government Program or private third party payment program. Except as forth on Section 4.14(b)(ii) of the Company Disclosure Schedule, during the last three (3) years, no single Government Program or single private third party payment program has requested or, to Seller's Knowledge, threatened any recoupment, refund or set-off from the Company or any of its Subsidiaries in excess of One Hundred Thousand Dollars ($100,000) in the aggregate other than in the ordinary course of business.

Section 4.15 Healthcare Matters.

(a) The Company and its Subsidiaries are, and have been during the last three (3) years, in compliance in all material respects with all Healthcare Laws. During the last three (3) years, neither the Company nor any of its Subsidiaries has received any written notice from any Governmental Authority regarding any actual or alleged violation in any material respect of, or failure to be in compliance in any material respect with, any Healthcare Laws.

(b) (i) The Company and each of its Subsidiaries possesses all material Permits required by applicable Healthcare Laws necessary for the operation of the Business; (ii) the Company and each of its Subsidiaries has been, during the last three (3) years, in compliance in all material respects with such Permits, and all of such Permits are valid and in full force and effect; (iii) there is no action or investigation by or before any Governmental Authority pending or, to Seller's Knowledge, threatened against the Company or any of its Subsidiaries to revoke, suspend, or otherwise materially restrict any such Permit; (iv) neither the Company nor any of its Subsidiaries has received, during the last three (3) years, any written notice from any Governmental Authority regarding any actual or alleged material violation of, or failure to be in compliance in all material respects with, any such Permit or any revocation, withdrawal, suspension, cancellation or termination of any such Permit; and (v) the Company and each of its Subsidiaries has filed all material reports (or corrected in or supplemented such reports by a subsequent filing) and maintained and retained all records required by applicable Healthcare Laws pertaining to all of its respective material Permits. The Permits are renewable by their terms or in the ordinary course of business consistent with past practice, without the need to comply with any special qualification procedures or to pay any material fines or penalties other than routine filing fees.

(c) None of the Company, any of the Company's Subsidiaries, or any of their respective directors, officers or managing employees has been during the last three (3) years or is currently suspended, excluded or debarred from contracting with any Governmental Authority or from participating in any Federal Health Care Program (as defined in 42 USC § 1320a-7b(f)) or, to Seller's Knowledge, is subject to an investigation or Proceeding by any Governmental Authority that has resulted in or would reasonably be expected to result in such suspension,

exclusion, or debarment; nor has the Company or any of its Subsidiaries or, to Seller's Knowledge, any of their respective directors, officers or managing employees, received written notice of any impending or potential exclusion or listing. Neither the Company nor any of its Subsidiaries has been, during the last three (3) years, subject to sanction pursuant to 15 U.S.C. § 41 et seq. or 42 U.S.C. § 1320a-7a or 1320a-8, or been charged with or convicted of a crime described at 42 U.S.C. § 1320a-7b, and no such sanction or Proceeding is pending or, to Seller's Knowledge, threatened.

(d) To Seller's Knowledge, none of the Company's or any of its Subsidiaries' respective professionals and personnel have, during the last three (3) years: (i) been excluded, suspended, debarred, or terminated from participation in any Government Program or prohibited from contracting with the federal government, (ii) been included on any federal or state exclusion list, including the Office of Inspector General's List of Excluded Individuals (LEIE), the System Award Management (SAM) excluded parties list, and any state Medicaid exclusion list, (iii) had a professional license or certification, Drug Enforcement Administration registration (as applicable), Government Program provider status, suspended, terminated, restricted or revoked, or (iv) had staff privileges at any health care facility suspended, restricted, terminated, or revoked for a reason relating to patient care.

(e) The Company has conducted all billing and collection practices in material compliance with all Healthcare Laws and the conditions for participation, contracts, rules, regulations, and requirements of all Government Programs in all material respects.

(f) There is no material Proceeding, investigation or survey pending or, to Seller's Knowledge, threatened by any third-party payor programs with respect to any program conducted by the Company or its Subsidiaries.

Section 4.16 HIPAA Matters.

(a) Each business, entity or component of any entity owned or controlled by the Company or any of its Subsidiaries that is a health plan, healthcare clearinghouse or healthcare provider, as such terms are defined in the Federal Privacy Regulations (collectively, the "Covered Entities") or is a Business Associate (as such term is defined in the Federal Privacy Regulations), is, and during the last three (3) years has been, in compliance in all material respects with the administrative simplification section of HIPAA, the Federal Privacy Regulations, the Federal Security Regulations, the Breach Notification Rule, the Federal Electronic Transaction Regulations, or applicable state privacy laws. Without limiting the generality of the foregoing, each of the Company and its Subsidiaries is, and during the last three (3) years has been, in compliance in all material respects with 45 C.F.R. § 164.308(a)(1)(ii)(A).

(b) Except to the extent listed on Section 4.16(b)of the Company Disclosure Schedule, neither Company nor any of its Subsidiaries has received during the last three (3) years any written notice or communication alleging any non-compliance, unauthorized use or disclosure, successful security incident or breach of Protected Health Information under HIPAA or any state law and has not notified any person or any Governmental Authority with respect to such incident or breach. The Company has not previously been and is not currently subject to

any audit, inquiry, proceeding, investigation or enforcement action by any Governmental Authority related to Protected Health Information.

(c) To Seller's Knowledge, there has been no material breach by a Business Associate of any Business Associate Agreement or any violation by a Business Associate of HIPAA, the Federal Transaction Regulations, the Federal Privacy Regulations, the Federal Security Regulations, or corresponding state Laws.

(d) Except as set forth on Section 4.16(d) of the Company Disclosure Schedule, neither the Company nor any of its Subsidiaries has experienced a Breach of Unsecured Protected Health Information as defined by HIPAA, for which Breach notification was required under HIPPA.

Section 4.17 Permits. The Company and its Subsidiaries hold and have at all times during the last three (3) years held, and are operating and have at all times during the last three (3) years been operating in compliance in all material respects with, all Permits necessary for the conduct, ownership, use, occupancy or operation of their Business and/or the Assets, including all Permits required pursuant to the Material Contracts. Section 4.17 of the Company Disclosure Schedule sets forth, as of the date of this Agreement, a correct and complete list of all such material Permits of the Company and its Subsidiaries and complete and correct copies thereof have been made available to Purchaser. Such material Permits are in full force and effect and have not been revoked, suspended, canceled or terminated.

Section 4.18 Environmental Matters. Each of the Company and its Subsidiaries have at all times been in material compliance with all applicable Environmental Law. Neither the Company nor any of its Subsidiaries has received, during the last three (3) years, any written notice of any material violation of, or material Liability under, any Environmental Laws. The Company and its Subsidiaries have all material Permits which are required to be held by them under applicable Environmental Laws for the operation of the Business and has made available to Purchaser true and complete copies of all such Permits. To Seller's Knowledge, there are no material Proceedings or investigations by any Governmental Authority pending or threatened against or affecting the Company or its Subsidiaries related to Environmental Laws. Neither the Company nor any of its Subsidiaries has treated, stored, disposed of, arranged for the disposal of, transported, handled, or released any Hazardous Materials in violation of or in a manner which would reasonably be expected to form the basis of material Liability under any applicable Environmental Laws. To Seller's Knowledge, other than as could not reasonably be expected to result in a material Liability of the Company or its Subsidiaries, there has been no release, spill, emission, dumping, injection, pouring, deposit, disposal, discharge, dispersal or leaching into or through the environment or within any building, structure, facility or fixture, of any Hazardous Materials, at, on or under the Owned Real Property or any other property currently or previously owned, leased or operated by the Company or its Subsidiaries. Neither the Company nor any of its Subsidiaries has entered into any consent decree or agreement or is subject to any Order imposing any material Liability or material requirement under any applicable Environmental Law. All environmental assessments, studies or compliance audits which contain material information relating to the Company or its Subsidiaries including, without limitation, with respect to its or their current or former operations, the Owned Real Property or any other property currently or previously owned, leased or operated by the Company or its Subsidiaries

and are in the possession of or, to Seller's Knowledge, were initiated by Seller or the Company, have been made available to Purchaser. Except for the representations and warranties contained in this Section 4.18 and Section 4.17, Seller makes no representations or warranties relating to Environmental Laws or Hazardous Materials.

Section 4.19 Employee Matters.

(a) No collective bargaining agreement or similar agreement with any labor union is currently in effect with respect to any employee of the Company or any of its Subsidiaries, and neither the Company nor any of its Subsidiaries is presently negotiating any collective bargaining agreement in respect of any employee of the Company or any of its Subsidiaries. No organizational effort is presently being made or, to Seller's Knowledge, threatened by or on behalf of any labor union with respect to employees of the Company or any of its Subsidiaries. No strike, lockout, shutdown, slowdown, picketing or unfair labor practice charge (whether or not resolved) has occurred at any time during the last three (3) years or is pending or threatened against the Company or any of its Subsidiaries.

(b) Except as set forth on Section 4.19(b) of the Company Disclosure Schedule, each of the Company and its Subsidiaries is and has been in compliance in all material respects with all Laws which relate to employment matters, employment practices and terms and conditions of employment, including without limitation wages, benefits, hours, overtime, discrimination, equal opportunity, harassment, immigration, disability, affirmative action, leaves of absence, rest periods, meal breaks, workers' compensation, unemployment insurance, occupational health and safety and the collection and payment of withholding and/or social contribution Taxes and similar Taxes, plant closings, mass layoffs and relocations. During the last three (3) years, (i) there has been no claim, arbitration, mediation, charge, or litigation against the Company or any of its Subsidiaries relating to any employment or labor matter, and (ii) there has been no audit, investigation, or examination of the Company or any of its Subsidiaries by any Governmental Authority regarding any employment or labor matter. Neither the Company nor any of its Subsidiaries is, and has ever been, a party to or otherwise bound by any judgment, citation, decree or Order by any Governmental Authority relating to employees or employment practices. Each of the Company and each of its Subsidiaries has timely paid in full to each current or former employee or, if not past due, adequately accrued in accordance with GAAP all wages, salaries, commissions, bonuses, benefits and other compensation due to or on behalf of such employees. Except as would not reasonably be expected to have a Material Adverse Effect, each of the Company and each of its Subsidiaries has during the last three (3) years properly classified in accordance with the requirements of all applicable Laws all of its service providers either as an "employee" or "independent contractor" and as exempt or non-exempt from overtime requirements and has made all appropriate filings in connection with services provided by, and compensation paid to, such service providers. Further, to Seller's Knowledge, no employee of the Company and its Subsidiaries is in any respect in violation of any term of any employment agreement, nondisclosure agreement, common law nondisclosure obligation, fiduciary duty, noncompetition agreement, restrictive covenant or similar obligation with or to the Company or any Subsidiary.

(c) During the ninety (90) days prior to the date of this Agreement, neither the Company nor any of its Subsidiaries has engaged in or effectuated any "plant closing" or

employee "mass layoff" (in each case, as defined in the Worker Adjustment Retraining and Notification Act of 1988, as amended, or any similar state or local statute, rule or regulation) affecting any site of employment or one (1) or more facilities or operating units within any site of employment or facility of the Company or any of its Subsidiaries.

Section 4.20 Employee Benefit Plans.

(a) Section 4.20(a) of the Company Disclosure Schedule lists, as of the date of this Agreement, all Employee Benefit Plans. With respect to each Employee Benefit Plan, the Company has made available to Purchaser correct, current and complete copies, as applicable, of (i) each written plan document (including any amendments thereto) and descriptions of all material terms of any such plan that is not in writing; (ii) the most recent summary plan description; (iii) any trust documents or funding arrangements relating thereto (including group insurance contracts); (iv) the three (3) most recent annual reports with accompanying schedules and attachments, filed with the IRS; (v) the nondiscrimination testing results for the last three (3) plan years; and (vi) material correspondence from any Governmental Authority with respect to any Employee Benefit Plan within the past three (3) years.

(b) Except as set forth on Section 4.20(b) of the Company Disclosure Schedule, with respect to each Employee Benefit Plan: (i) such Employee Benefit Plan has been operated and administered in compliance, in all material respects, with its terms and all applicable Law (including but not limited to ERISA and the Code); (ii) there are no pending or, to Seller's Knowledge, threatened claims against, by or on behalf of any Employee Benefit Plan (other than routine claims for benefits); (iii) no audits, inquiries, reviews, Proceedings, claims, or demands are pending with any Governmental Authority; (iv) all premiums, contributions, or other payments required to have been made by Law or under the terms of any Employee Benefit Plan or any contract or agreement relating thereto as of the Closing Date have been made (or, to the extent not yet due, properly accrued on the Balance Sheet in accordance with the terms of the Employee Benefit Plan and all applicable Laws); and (v) there have been no acts or omissions by the Company, any Subsidiary or any ERISA Affiliate that have given or would give rise to any material fines, penalties, Taxes or related charges under Sections 502(c), 502(i), 502(l), 502(m) or 4071 of ERISA or Section 511 or Chapter 43 of the Code, or under any other applicable Law, for which the Company, any Subsidiary or any ERISA Affiliate may be liable.

(c) Each Employee Benefit Plan that is intended to be qualified under Section 401(a) of the Code and in which any employee of the Company or any of its Subsidiaries participates (each, a "Seller 401(k) Plan") (i) has received a favorable determination or opinion letter or advisory letter from the IRS; (ii) has pending or has time remaining in which to file an application for such a determination from the IRS; or (iii) may rely upon a prototype opinion letter or a volume submitter advisory letter from the IRS. To Seller's Knowledge, no event has occurred that would reasonably be expected to cause the loss of such qualified status.

(d) Except as would not reasonably be expected to result in material liability to Seller or the Company, no non-exempt prohibited transaction (within the meaning of Section 406 of ERISA or Section 4975 of the Code) has occurred with respect to any Employee Benefit Plan.

(e) No Employee Benefit Plan is or was, and none of the Company, any of its Subsidiaries or any of their respective ERISA Affiliates contributes to, has within the preceding six (6) years contributed to, or has any obligation or Liability with respect to, (i) a "multiemployer plan" (within the meaning of Section 3(37) of ERISA); (ii) a pension plan subject to Title IV or Section 302 of ERISA or Section 412 of the Code; (iii) a "multiple employer plan" (within the meaning of Section 413(c) of the Code); or (iv) a "multiple employer welfare arrangement" (within the meaning of Section 3(40) of ERISA).

(f) Neither Seller, the Company nor any of its Subsidiaries is obligated under any Employee Benefit Plan or otherwise to provide medical or death benefits with respect to any current or former employee of the Company, any Subsidiary or their predecessors after termination of employment, except as required under Section 4980B of the Code or Part 6 of Title I of ERISA or other applicable law.

(g) Seller, the Company and their ERISA Affiliates have each complied in all material respects with the notice and continuation coverage requirements, and all other requirements, of Section 4980B of the Code and Parts 6 and 7 of Title I of ERISA, and the regulations thereunder.

(h) Seller, the Company and each Employee Benefit Plan that is a "group health plan" as defined in Section 733(a)(1) of ERISA (each, a "Health Plan") is and has at all times been in compliance, in all material respects, with the Patient Protection and Affordable Care Act, Pub. L. No. 111-148 ("ACA"), and to Seller's Knowledge no condition or circumstance exists, that would reasonably be expected to subject Seller, the Company or any Health Plan to penalties or excise taxes under Code Section 4980D or 4980H or any other provision of the ACA.

(i) Each Employee Benefit Plan that is a "nonqualified deferred compensation plan" (within the meaning of Section 409A(d)(1) of the Code) subject to Section 409A of the Code satisfies, in all material respects, in form and operation the requirements of Sections 409A(a)(2), 409A(a)(3) and 409A(a)(4) of the Code and the guidance thereunder (and has satisfied such requirements over the past three (3) years or, if later, for the entire period during which Section 409A of the Code has applied to such Employee Benefit Plan), and no additional material Tax under Section 409A(a)(1)(B) of the Code has been or would reasonably be expected to be incurred by a participant in any such Employee Benefit Plan.

(j) Neither the execution and delivery of this Agreement, nor the consummation of the transactions contemplated hereby, either alone or in combination with another event (whether contingent or otherwise) (i) will give rise to any "excess parachute payment" under Section 280G of the Code; or (ii) except as set forth on Section 4.20(j) of the Company Disclosure Schedule, (x) will accelerate the vesting, funding or time of payment of any compensation or other benefit due by the Company or any of its Subsidiaries to any employee, director or individual independent contractor of the Company or any of its Subsidiaries or (y) will increase the amount or value of any payment, compensation or benefit to any employee, director or individual independent contractor of the Company or any of its Subsidiaries.

(k) Except with respect to any Employee Benefit Plan listed on Section 4.20(a) of the Company Disclosure Schedule, there are no obligations of the Company or its Subsidiaries under

any deferred compensation arrangement or phantom stock arrangement or any "success fees" or bonuses, or severance payments or employee change of control payments payable or to be payable to employees of the Company or its Subsidiaries arising solely from or otherwise triggered solely by the closing of the transactions contemplated hereby (including the employer portion of employment Taxes imposed on the Company or its Subsidiaries with respect to such payments).

(l) Except as set forth on Section 4.20(l) of the Company Disclosure Schedule, there are no obligations of the Company or its Subsidiaries with respect to any Employee Benefit Plan that is subject to Title IV of ERISA and not funded in accordance with ERISA.

(m) Neither the Company nor its Subsidiaries is party to, nor is it otherwise obligated under, any contract, plan or arrangement that provides for a "gross-up," make-whole or similar payment in respect of any Taxes that may become payable under Section 409A or Section 4999 of the Code.

Section 4.21 Taxes.

Except as set forth on Section 4.21 of the Company Disclosure Schedule:

(a) Each of the Company and its Subsidiaries has duly and timely filed or caused to be timely filed with the appropriate Tax Authority all material Tax Returns required to be filed by, or with respect to, each such entity. All such Tax Returns are true, correct and complete in all material respects. All material Taxes due and owing by any of the Company or its Subsidiaries (whether or not shown on any Tax Return) have been timely paid in full. There are no Liens for material Taxes on any asset of any of the Company or any of its Subsidiaries, other than Permitted Liens. No written claim has ever been made by a Governmental Authority in which the Company or any of its Subsidiaries does not file Tax Returns that the Company or such Subsidiary, as applicable, is or may be subject to taxation by, or required to file Tax Returns in, such jurisdiction. Each of the Company and its Subsidiaries has timely withheld and paid to the appropriate Governmental Authority all material Taxes required to have been withheld and paid in connection with amounts owing to any employee, independent contractor, creditor, stockholder, limited liability company member, or other third party.

(b) No deficiencies for material Taxes with respect to the Company or its Subsidiaries have been claimed, proposed or assessed in writing by any Tax Authority, which deficiencies have not yet been finally settled. There are no audits, investigations, assessments, Proceedings, claims or other actions by a Tax Authority for or relating to any material Liability in respect of Taxes of the Company or its Subsidiaries in process, pending or threatened in writing.

(c) No extension or waiver of the statute of limitations in respect of any material Taxes is currently in effect, nor has any request been made in writing for any such extension or waiver.

(d) None of the Company or any of its Subsidiaries is a party to any Tax sharing, Tax allocation, Tax indemnity or similar agreement, other than customary commercial Contracts entered into in the ordinary course of business the primary purpose of which does not relate to the sharing, allocation or indemnification of any Tax.

(e) Except as set forth on Section 4.21(e) of the Company Disclosure Schedules, from and after January 1, 2014, none of the Company or any of its Subsidiaries (i) has been a member of an affiliated group of corporations within the meaning of Section 1504 of the Code or a member of or participant in any group or fiscal unity within the meaning of any similar provision of Law to which the Company or any of its Subsidiaries may be subject, other than the affiliated group of which Parent is the common parent or (ii) has any Liability for the Taxes of any Person (other than the Company or any of its Subsidiaries) under Treasury Regulations Section 1.1502-6 (or any similar provision of Law) as a transferee or successor, by Contract or otherwise.

(f) Neither the Company nor any of its Subsidiaries has participated in any "listed transaction" within the meaning of Treasury Regulations Section 1.6011-4.

(g) Neither the Company nor any of its Subsidiaries will be required to include any item of income in, or exclude any item of deduction from, taxable income for any taxable period (or portion thereof) beginning after the Closing Date as a result of any (i) change in method of accounting for a taxable period ending on or prior to the Closing Date; (ii) "closing agreement" as described in Section 7121 of the Code (or any corresponding or similar provision of state, local or non-U.S. income Tax law) executed on or prior to the Closing Date; (iii) intercompany transaction or excess loss account described in Treasury Regulations under Section 1502 of the Code (or any corresponding or similar provision of state, local or non-U.S. income Tax law); (iv) any use of an improper method of accounting for a taxable period ending on or prior to the Closing Date; (v) installment sale or open transaction disposition made on or prior to the Closing Date; (vi) prepaid amount or deferred revenue received on or prior to the Closing Date; (vii) election under Section 108(i) of the Code; or (viii) election under Section 965(h) of the Code (or any similar provision of any Legal Requirement) or otherwise pursuant to Section 965 of the Code.

(h) Within the past three (3) years, none of the Company or any of its Subsidiaries has distributed stock of another Person nor had its stock distributed by another Person in a transaction that was purported or intended to be governed in whole or in part by Sections 355 or 361 of the Code.

(i) Notwithstanding anything herein to the contrary, (i) no representations or warranties are made with respect to Taxes for any Post-Closing Tax Period and (ii) no representation or warranty is made by Seller, the Company or its Subsidiaries with respect to the existence, amount, usability or any other aspect of any Tax attributes of the Company and its Subsidiaries, including net operating losses, capital loss carryforwards, Tax credit carryforwards, asset bases or depreciation periods.

(j) Neither the Company nor any Subsidiary has (i) a permanent establishment or otherwise has an office or fixed place of business outside of the United States or (ii) a source of income in a jurisdiction other than the country in which it is organized. Each of the Company and each of its Subsidiaries has correctly classified those individuals performing services as common law employees, leased employees, independent contractors or agents of the Company outside of the United States.

Section 4.22 Intercompany Obligations. Except as set forth on Section 4.22(a) of the Company Disclosure Schedule or otherwise expressly permitted by this Agreement, (a) neither Parent nor any of its Subsidiaries (excluding the Company and its Subsidiaries) is a party to any Contract with the Company or any of its Subsidiaries and (b) since December 31, 2017, neither the Company nor any of its Subsidiaries has made any payment to or received any payment from Parent or any of its Subsidiaries (other than the Company or any of its Subsidiaries). Neither Parent nor any of its Subsidiaries (excluding the Company and its Subsidiaries) has any direct or indirect interest in (i) any customer, supplier or other business relationship of the Company or any of its Subsidiaries or (ii) any assets or property used by the Company or any of its Subsidiaries (including any Intellectual Property).

Section 4.23 Insurance Policies. Section 4.23 of the Company Disclosure Schedule sets forth, as of the date of this Agreement, a true, complete and accurate (a) list of all insurance policies to which the Company or any of its Subsidiaries is a party, including those which provide coverage to or for the benefit of or with respect to the Company or any of its Subsidiaries or any director, officer, employee, manager, independent contractor, consultant, leased employee or other service provider of the Company or any of its Subsidiaries in his or her capacity as such (the "Insurance Policies"), indicating in each case the type of coverage, name of the insured, the insurer, the expiration date of each policy and the amount of coverage, and (b) list of any and all claims that have been submitted under any of the Insurance Policies at any time during the last three (3) years (the "Claims History"). True, complete and accurate copies of all such Insurance Policies and the Claims History have been provided or made available to Purchaser. Each Insurance Policy is in full force and effect and shall remain in full force and effect in accordance with its terms and following the Closing as respects accidents, events, happenings, injuries, claims, conduct and occurrences relating to the businesses of the Company and its Subsidiaries prior to the Closing, is provided by a financially solvent carrier and has not been subject to any lapse in coverage. The Company and each of its Subsidiaries are current in all premiums or other payments due under the Insurance Policies and have otherwise complied in all material respects with all of their obligations under each Insurance Policy. The Company and each of its Subsidiaries have given timely notice to the insurer of all claims that may be insured thereby under any Insurance Policy. During the last three (3) years, neither the Company nor any of its Subsidiaries has been refused any insurance by, nor has coverage been limited by, any insurance carrier with which the Company or any of its Subsidiaries has carried insurance or any other insurance carrier to which the Company or any of its Subsidiaries has applied for insurance.

Section 4.24 Bank Accounts. Section 4.24 of the Company Disclosure Schedule is a true, complete and accurate list of each bank or financial institution in which the Company or any of its Subsidiaries has an account, safe deposit box or lockbox, or maintains a banking, custodial, trading or similar relationship, the number of each such account or box, and the names of all persons authorized to draw thereon or having signatory power or access thereto.

Section 4.25 Brokers. No Person is or will be entitled to a broker's, finder's, investment banker's, financial advisor's or similar fee from the Company or its Subsidiaries in connection with this Agreement or any of the transactions contemplated hereby.

Section 4.26 Accounts Receivable. All Accounts Receivable reflected on the Balance Sheet, and all Accounts Receivable of the Business acquired by the Company and its Subsidiaries or arising subsequent to September 30, 2018, but before the date hereof, (a) have been acquired or have arisen only in the ordinary course of business, and (b) to Seller's Knowledge, are collectible in the face value thereof using normal collection procedures (net of the reserve for doubtful accounts set forth in the Balance Sheet). The reserve for doubtful accounts contained in the Balance Sheet has been determined consistent with past practices of the Company and in conformity with the Company Accounting Principles. This Section 4.26 is not intended as a warranty of collectability of any Account Receivable reflected on the Balance Sheet or that Purchaser will realize any minimum amount from collection of the Accounts Receivable.

Section 4.27 Exclusivity of Representations. Except for the representations and warranties contained in Article 4 (as modified by the Company Disclosure Schedule) or Section 9.16, none of the Company, Parent, Seller or any other Person makes or has made any other representation or warranty, expressed or implied, at law or in equity, with respect to Parent, Seller, the Company, its Subsidiaries, the Interests or any of the Company's or its Subsidiaries' respective businesses, assets, liabilities, operations, prospects, or condition (financial or otherwise), and each of Parent and Seller disclaims any other representations or warranties, whether made by Parent, Seller, the Company, its Subsidiaries or any of their respective Affiliates, direct or indirect equityholders, officers, directors, employees, agents or Representatives (collectively, "Related Persons"), and no Related Person has any authority, express or implied, to make any representations, warranties or agreements not specifically set forth in this Agreement and subject to the limited remedies herein provided. Except for the representations and warranties contained in this Article 4 (as modified by the Company Disclosure Schedule) or in Section 9.16, each of Parent and Seller (directly and on behalf of all Related Persons) hereby disclaims all liability and responsibility for any representation, warranty, projection, forecast, statement, or information made, communicated, or furnished (whether orally or in writing, in any data room relating to the transactions contemplated hereby, in management presentations, functional "break-out" discussions, responses to questions or requests submitted by or on behalf of Purchaser or in any other form in consideration or investigation of the transactions contemplated hereby) to Purchaser or its Affiliates or Representatives (including any opinion, information, forecast, projection, or advice that may have been or may be provided to Purchaser or its Affiliates or Representatives by Parent, Seller, the Company or any Related Person). Except for the representations and warranties contained in this Article 4 (as modified by the Company Disclosure Schedule) or in Section 9.16, none of Parent, Seller, the Company or any Related Person has made or makes any representation or warranty to Purchaser or its Affiliates or Representatives regarding: (a) merchantability or fitness of any assets of the Company or its Subsidiaries for any particular purpose; (b) the nature or extent of any liabilities of the Company or its Subsidiaries; (c) the prospects of the business of the Company and its Subsidiaries; (d) the probable success or profitability of the Company or its Subsidiaries; or (e) the accuracy or completeness of any confidential information memoranda, documents, projections, material, statement, data, or other information (financial or otherwise) provided to Purchaser or its Affiliates or made available to Purchaser and its Representatives in any "data rooms," "virtual data rooms," management presentations or in any other form in expectation of, or in connection with, the transactions contemplated hereby, or in respect of any other matter or thing whatsoever. Notwithstanding anything herein or in any Transaction

Document to the contrary, (i) nothing in this Section 4.27 or any other provision of this Agreement or any Transaction Document shall limit or modify the representations and warranties set forth in this Article 4 or Section 9.16 or the right of Purchaser to rely thereon, and (ii) Purchaser retains all rights and remedies with respect to claims based on Fraud ("Fraud Claims").

ARTICLE 5
REPRESENTATIONS AND WARRANTIES OF PURCHASER

Purchaser hereby represents and warrants to Seller as of the date hereof and as of the Closing as follows:

Section 5.01 Organization and Good Standing. Purchaser is a limited liability company, duly organized, validly existing and in good standing under the Laws of the State of Delaware.

Section 5.02 Authority. Purchaser has the requisite limited liability company power and authority to execute and deliver this Agreement and the Transaction Documents to which it is a party, to perform its obligations hereunder and thereunder and to consummate the transactions contemplated hereby and thereby. The execution, delivery and performance by Purchaser of this Agreement and the Transaction Documents to which it is party and the consummation of the transactions contemplated hereby and thereby have been duly authorized by all necessary limited liability company action on the part of Purchaser. Each of this Agreement and the Transaction Documents to which Purchaser is a party has been, or will be as of the Closing, duly executed and delivered by Purchaser and, assuming the due authorization, execution and delivery by the other parties hereto or thereto, constitutes or will constitute a legal, valid and binding obligation of Purchaser, enforceable against Purchaser in accordance with its terms, subject to the Remedies Exception.

Section 5.03 No Conflict. Assuming the consents, approvals, Orders and authorizations of, and registrations, declarations and filings with, and notices to, the Governmental Authorities and other Persons referenced in Section 5.04 are obtained, given, and made at the time required under applicable Law, neither the execution or delivery of this Agreement nor any Transaction Document by Purchaser, nor the consummation by Purchaser of the transactions contemplated hereby or thereby will: (a) conflict with, contravene or constitute a violation of (whether after the giving of notice, lapse of time or both) the Governing Documents of Purchaser; (b) constitute a material default under, or an event which would (or would reasonably be expected to) result in, any right of notice, modification, acceleration, payment, suspension, withdrawal, cancellation or termination under, or release any party thereto from its obligations under, or otherwise materially affect the rights or benefits of Purchaser under, any material contract to which Purchaser is a party or material Permit; or (c) contravene, conflict with or constitute a violation of (whether after the giving of notice, lapse of time or both) any Law or Order to which Purchaser is subject in any material respect.

Section 5.04 Consents. No consent, approval, Order or authorization of, or registration, declaration or filing with, or notice to, any Governmental Authority or under any material contract to which Purchaser is a party is required to be obtained or made by Purchaser in

connection with the execution and delivery of this Agreement or any Transaction Document or in connection with the consummation of the transactions contemplated hereby and thereby, other than consents, notifications or filings which, if not obtained or made, would not reasonably be expected to prevent Purchaser from consummating the transactions contemplated by this Agreement.

Section 5.05 Litigation. There are no Proceedings pending or, to the knowledge of Purchaser, threatened against or affecting Purchaser, which would reasonably adversely affect the ability of Purchaser to consummate the transactions contemplated by this Agreement.

Section 5.06 Investment. Purchaser is purchasing the Interests for investment for its own account and not with a view to, or for sale in connection with, any distribution of the Interests in violation of federal and state securities Laws. Purchaser is an "accredited investor" as defined in Regulation D promulgated under the Securities Act and has sufficient knowledge and experience in financial and business matters so as to be capable of evaluating the merits and risks of its investment in the Interests and is capable of bearing the economic risks of such investment. Purchaser acknowledges that the Interests have not been registered under the Securities Act or any state or foreign securities Laws and that the Interests may not be sold, transferred, offered for sale, pledged, hypothecated or otherwise disposed of unless such sale, transfer, offer, pledge, hypothecation or other disposition is pursuant to the terms of an effective registration statement under the Securities Act and are registered under any applicable state or foreign securities Laws or pursuant to an exemption from registration under the Securities Act and any applicable state or foreign securities Laws.

Section 5.07 Solvency. Purchaser is not entering the transactions contemplated by this Agreement with actual intent to hinder, delay or defraud either present or future creditors. Assuming (a) the accuracy of the representations and warranties set forth in Article 4, (b) that any estimates or projections of the Company and its Subsidiaries provided to Purchaser have been prepared in good faith based upon assumptions that were and continue to be reasonable and (c) compliance by Seller of its obligations set forth herein and in the Transaction Documents immediately after giving effect to the transactions contemplated by this Agreement, each of Purchaser and its Subsidiaries will be Solvent.

Section 5.08 Brokers. No Person is or will be entitled to a broker's, finder's, investment banker's, financial advisor's or similar fee from Purchaser in connection with this Agreement or any of the transactions contemplated hereby.

Section 5.09 Acknowledgement. Except for the specific representations and warranties expressly made by Seller in Article 4 (as modified by the Company Disclosure Schedule) or by Parent in Section 9.16: (a) Purchaser acknowledges and agrees that (i) none of the Company, Seller, Parent or any other Person is making or has made any representation or warranty, expressed or implied, at law or in equity, in respect of the Company, its Subsidiaries, or any of the Company's or its Subsidiaries' respective businesses, assets, liabilities, operations, prospects, or condition (financial or otherwise), including with respect to merchantability or fitness for any particular purpose of any assets, the nature or extent of any liabilities, the prospects of the business of the Company and its Subsidiaries, the effectiveness or the success of any operations, or the accuracy or completeness of any confidential information memoranda,

documents, projections, material or other information (financial or otherwise) regarding the Company or any of its Subsidiaries furnished to Purchaser or its Representatives or made available to Purchaser and its Representatives in any "data rooms," "virtual data rooms," management presentations or in any other form in expectation of, or in connection with, the transactions contemplated hereby, or in respect of any other matter or thing whatsoever, and (ii) no Representative of Seller, Parent the Company, any of its Subsidiaries or any other Person has any authority, express or implied, to make any representations, warranties or agreements not specifically set forth in this Agreement and subject to the limited remedies herein provided; (b) Purchaser specifically disclaims that it is relying upon or has relied upon any such other representations or warranties that may have been made by any Person, and acknowledges and agrees that the Company, Seller, Parent and each of their Representatives have specifically disclaimed and do hereby specifically disclaim any such other representation or warranty made by any Person; (c) Purchaser specifically disclaims any obligation or duty by Seller, Parent, the Company or any other Person to make any disclosures of fact not required to be disclosed pursuant to the specific representations and warranties set forth in Article 4 or Section 9.16 (either as information expressly required to be provided by such representations of warranties or as qualifications to such representations and warranties required to make them accurate statements); and (d) Purchaser is acquiring the Company subject only to the specific representations and warranties set forth in Article 4 and Section 9.16. Notwithstanding anything expressed or implied herein or in any Transaction Document to the contrary, (i) nothing in this Section 5.09 or any other provision of this Agreement or any Transaction Document shall limit or modify the representations and warranties set forth in Article 4 and Section 9.16 of the Agreement or the right of Purchaser to rely thereon, and (ii) Purchaser retains all rights and remedies with respect to Fraud Claims.

ARTICLE 6
COVENANTS AND AGREEMENTS

Section 6.01 [Reserved].

Section 6.02 Post-Closing Access; Preservation of Records.

(a) From and after the Closing until the seventh (7^{th}) anniversary of the Closing Date, Purchaser will make or cause to be made available to Seller and its Representatives (i) at Seller's sole cost and expense, all books, records and documents (including, for purposes of this Section 6.02(a), Tax Returns) of the Company and its Subsidiaries, and (ii) access to the management team and all facilities of the Company, in each case to the extent relating to the conduct of the ongoing business and operations of the Company and its Subsidiaries, and (iii) any and all incident reports relating to claims that have been filed or could be filed under any of the Company's Insurance Policies, in each case upon reasonable written request, during regular business hours, as may be reasonably necessary for, among other things: (A) investigating, settling, preparing for the defense or prosecution of, defending or prosecuting any Proceeding by or before any court or other Governmental Authority; (B) preparing reports to Governmental Authorities; or (C) such other purposes for which access to such documents is believed in good faith by Seller to be reasonably necessary, including preparing and delivering any accounting or other statement provided for under this Agreement or otherwise, preparing Tax Returns or responding to or disputing any Tax inquiry, audit or assessment; provided, however, that such

access will not interfere with the normal operations of the Company and its Subsidiaries. Notwithstanding anything in this Agreement to the contrary, none of Purchaser, the Company or any of its Subsidiaries shall be under any obligation under this Section 6.02(a) to disclose to Seller or its Representatives (A) any information the disclosure of which is restricted by Law, (B) any information that would result in the disclosure of any trade secrets or competitively sensitive information, or (C) any information that would adversely affect the attorney-client privilege or other evidentiary privileges of the Company or any of its Subsidiaries or (D) any information related to or requested in connection with any dispute related to, or indemnification claim under, this Agreement or the Transaction Documents (in which event the provisions of Section 8.05 and/or the applicable rules of discovery will apply in lieu of this Section 6.02(a)); provided, however, that, in the case of foregoing clauses (A) or (C), Purchaser and Seller shall use commercially reasonable efforts to enter into common interest or other arrangements to allow for the disclosure of such information in compliance with this Section 6.02(a). For a period of seven (7) years after the Closing Date, Purchaser will use commercially reasonable efforts to cause the Company and its Subsidiaries to maintain and preserve all such Tax Returns, books, records and documents relating to the conduct of the business and operations of the Company and its Subsidiaries prior to the Closing Date, in each case, in the ordinary course consistent with the past practices of the Company and its Subsidiaries.

(b) From and after the Closing until the seventh (7^{th}) anniversary of the Closing Date, Seller and Parent will make or cause to be made available to Purchaser, its Affiliates and their respective Representatives (at Purchaser's sole cost and expense), all books, records and documents (including, for purposes of this Section 6.02(b), Tax Returns but only to the extent such Tax Returns relate to the Company and its Subsidiaries and are not the consolidated income Tax Returns of Seller, Parent or their Affiliates) of the Company and its Subsidiaries to the extent relating to the conduct of the business and operations of the Company and its Subsidiaries prior to the Closing Date solely upon reasonable written request, during regular business hours, as may be reasonably necessary for: (i) investigating, settling, preparing for the defense or prosecution of, defending or prosecuting any Proceeding by or before any court or other Governmental Authority; (ii) preparing reports to Governmental Authorities; or (iii) such other purposes for which access to such documents is believed in good faith by Purchaser to be reasonably necessary, including preparing and delivering any accounting or other statement provided for under this Agreement or otherwise, preparing Tax Returns or responding to or disputing any Tax inquiry, audit or assessment; provided, however, that (x) access to such books, records, and documents will not interfere with the normal operations of Seller or Parent and (y) Seller and Parent shall be entitled, in their respective sole discretion, to redact or otherwise withhold any such books, records, documents or other information that is not related solely to the business and operations of the Company and its Subsidiaries. Notwithstanding anything in this Agreement to the contrary, neither Seller nor Parent shall be under any obligation under this Section 6.02(b) to disclose to Purchaser or its Representatives (A) any information the disclosure of which is restricted by Law, (B) any information that would result in the disclosure of any trade secrets or competitively sensitive information, (C) any information that would adversely affect the attorney-client privilege or other evidentiary privileges of Purchaser or Parent or (D) any information related to or requested in connection with any dispute related to, or indemnification claim under, this Agreement or the Transaction Documents (in which event the provisions of Section 8.05 and/or the applicable rules of discovery will apply in lieu of this Section 6.02(b)); provided, however, that, in the case of foregoing clauses (A) or (C), Seller and Purchaser shall

use commercially reasonable efforts to enter into common interest or other arrangements to allow for the disclosure of such information in compliance with this Section 6.02(b). For a period of seven (7) years after the Closing Date, Seller and Parent will use commercially reasonable efforts to maintain and preserve all such Tax Returns, books, records and documents relating to the conduct of the business and operations of the Company and its Subsidiaries prior to the Closing Date, in each case, in the ordinary course consistent with the past practices of Seller and Parent.

Section 6.03 Transfer Taxes. All transfer, documentary, sales, use, stamp, registration and other such Taxes, and all conveyance fees, recording charges and other fees and charges (including any penalties and interest) incurred in connection with the consummation of the transactions contemplated by this Agreement ("Transfer Taxes") shall be split equally by Seller and Purchaser. Seller and Purchaser (and their respective Affiliates) shall reasonably cooperate in preparing and filing all Tax Returns relating to such Taxes, fees and charges.

Section 6.04 Tax Matters.

(a) Tax Periods Ending on or Prior to the Closing Date and Straddle Periods – Tax Returns.

(i) Seller shall prepare or cause to be prepared and file or cause to be filed all income Tax Returns of the Company and its Subsidiaries for all periods ending on or prior to the Closing Date that are required to be filed after the Closing Date and all income Tax Returns of the Company and its Subsidiaries for any Straddle Period, and the Company shall pay or cause to be paid all Taxes due with respect to such Tax Returns to the extent such Taxes relate to Pre-Closing Tax Periods. All such Tax Returns shall be prepared in a manner consistent with the past practice of the Company and its Subsidiaries; provided, that such Tax Returns shall, as applicable, reflect the Section 336 Elections and the allocation of the Tax Purchase Price as required pursuant to this Section 6.04. With respect to any income Tax Returns for a Straddle Period, Seller shall provide a copy of such Tax Return to Purchaser for its review at least ten (10) days prior to the due date (taking into account any extension) for the filing of such Tax Returns and shall make any changes reasonably requested by Purchaser.

(ii) Purchaser shall file all other Tax Returns, and shall pay or cause to be paid all Taxes due with respect to such Tax Returns and any Taxes related to the Post-Closing Tax Period of any Tax Returns relating to the Straddle Period prepared pursuant to clause (i) above. All Tax Returns relating to a Straddle Period shall be prepared in a manner consistent with the past practice of the Company and its Subsidiaries; provided, that such Tax Returns shall, as applicable, reflect the Section 336 Elections and the allocation of the Tax Purchase Price as required pursuant to this Section 6.04. Purchaser shall provide a copy of such Tax Returns to Seller for Seller's review at least ten (10) days prior to the due date (taking into account any extension) for the filing of such Tax Returns and shall make any changes reasonably requested by Purchaser.

(b) Limitation on Actions. Without the prior written consent of Seller, which consent shall not be unreasonably withheld, neither Purchaser nor any of its Affiliates (including after

Closing, the Company or its Subsidiaries) shall (i) make, revoke or amend any election relating to Taxes of the Company or its Subsidiaries with respect to or relating to a Pre-Closing Tax Period or Straddle Period, (ii) take any action outside the ordinary course of business on the Closing Date after the Closing that would result in any increased liability for Taxes for Seller or Parent, (iii) file, re-file or amend any Tax Return relating to any Pre-Closing Tax Period, (iv) waive or extend the statute of limitations relating to any Pre-Closing Tax Period or (v) make any voluntary disclosure, amnesty or similar filing in respect of Taxes relating to any Pre-Closing Tax Period.

(c) Tax Refunds. Any Tax refunds with respect to income Taxes that are received by Purchaser, the Company or its Subsidiaries and any amounts credited or applied against any income Tax (including any interest paid or credited by a Governmental Authority with respect thereto) to which Purchaser, the Company, or its Subsidiaries becomes entitled that relate to a Pre-Closing Tax Period ("Tax Refunds") shall be for the account of Seller, and Purchaser shall pay to Seller any such Tax Refund within ten (10) days after receipt or entitlement thereto.

(d) Section 336 Elections. Purchaser (and to the extent necessary, the Company) and Seller (and its Affiliates) jointly shall make timely and irrevocable elections under either Section 336 of the Code or Section 336(e) of the Code with respect to Purchaser's acquisition of the Company and the Subsidiaries listed on Schedule 6.04(d) and, if permissible, similar elections under any applicable state and local Tax laws (collectively, the "Section 336 Elections"). Purchaser and Seller shall not take any action that would cause the Section 336 Elections to be invalid, and shall take no position contrary thereto unless required pursuant to a determination as defined in Section 1313(a) of the Code or any similar provision of any state, foreign or local Law. Purchaser shall deliver to Seller all the Section 336 Forms properly completed in accordance with all applicable Laws no less than fifteen (15) days before the date such Section 336 Forms are required to be filed and Seller shall duly execute and timely file such forms. Seller and Purchaser agree that the Tax Purchase Price as defined in Section 6.04(e) for each applicable Subsidiary of the Company (plus other relevant items) will be allocated to the assets of such Subsidiary for which a Section 338 Election is made in accordance with Section 6.04(e). Seller and Purchaser shall file (and Purchaser shall cause the Company and its Subsidiaries to file and Seller shall cause its applicable Affiliates to file) all Tax Returns (including amended returns and claims for refund) and information reports in a manner consistent with such allocation.

(e) Allocation of Tax Purchase Price. Purchaser and Seller acknowledge that the purchase and sale of the Interests will be treated as a purchase and sale of the assets of the Company for federal and state income tax purposes. The Purchase Price and any liability or other amount included in the amount realized by Seller or cost basis to Purchaser with respect to the transactions contemplated by this Agreement (the "Tax Purchase Price") shall be allocated as set forth in the schedule described below (the "Allocation Schedule"). Within seventy-five (75) days following the Closing Date, Purchaser shall deliver to Seller the Purchaser's proposed Allocation Schedule with respect to the Company and each applicable Subsidiary of the Company that is eligible for a Section 336 Election or is treated as disregarded as a pass-through or disregarded entity for federal income tax purposes. The Allocation Schedule shall specify Purchaser's determination of how the Tax Purchase Price allocated to the Company and each applicable Subsidiary shall be allocated among each designated class of assets of such applicable

Subsidiary as defined in Treasury Regulation Section 1.338-6(b)(2) and/or in accordance with Treasury Regulation Section 1.1060-1 and applicable Law. Purchaser shall reflect any reasonable comments made by Seller within fifteen (15) days after the receipt of the draft Allocation Schedule. Seller and Purchaser shall work together in good faith to resolve any disputes regarding the Allocation Schedule. If the Purchaser and Seller are unable to agree on the Allocation Schedule within thirty (30) days after the delivery by Seller of its comments to the Allocation Schedule, then each of Purchaser and Seller may prepare its own Allocation Schedule in a manner each believes appropriate. Any adjustment to or redetermination of the Tax Purchase Price shall be made consistently with the Allocation Schedule and shall be taken into account by Purchaser and Seller in carrying out the provisions of this Section 6.04(e). The parties shall make consistent use of the allocation per the Allocation Schedule (to the extent the parties agree on the Allocation Schedule) for all Tax purposes and in all filings, declarations and reports with the IRS and other Tax Authorities in respect thereof except pursuant to a final determination (within the meaning of Section 1313(a) of the Code or corresponding provision of state, local or foreign Tax law). In any Proceeding involving a Tax Authority related to the determination of any Tax, neither Purchaser nor Seller shall contend or represent that such agreed upon allocation is not correct.

(f) Certain Elections. Seller shall not make an election pursuant to Treasury Regulation Section 1.1502-36(d)(6)(i)(A).

(g) Tax Contests. (a) Purchaser, the Company and its Subsidiaries, on the one hand, and Seller and its Affiliates, on the other hand, shall promptly notify each other upon receipt by such party of written notice of any inquiries, claims, assessments, audits or similar events with respect to Taxes relating to a Pre-Closing Tax Period (any such inquiry, claim, assessment, audit or similar event, a "Tax Matter"). Any failure to so notify the other party of any Tax Matter shall not relieve such other party of any liability with respect to such Tax Matters except to the extent such party was actually prejudiced as a result thereof.

(h) Seller shall have sole control of the conduct of all Tax Matters, including any settlement or compromise thereof, provided, however, that Seller shall keep Purchaser reasonably informed of the progress of any Tax Matter relating to a Straddle Period and shall consult with Purchaser in the settlement of any Tax Matter that would reasonably be expected to impact the Taxes of the Companies or its Subsidiaries in a Post-Closing Tax Period.

Section 6.05 Employee Matters.

(a) Effective as of the Closing and thereafter, Purchaser and its Affiliates shall recognize, or shall cause the Company or its Subsidiaries to recognize, each Continuing Employee's employment or service with the Company and its Subsidiaries (including any current or former Affiliate or any predecessor) prior to the Closing for purposes of determining eligibility for participation, vesting and entitlement of the Continuing Employee under all employee benefit plans maintained by the Company, its Subsidiaries, Purchaser or an Affiliate of Purchaser, including vacation plans or arrangements, 401(k) or other retirement plans and any severance or welfare plans (excluding equity compensation arrangements and benefit accrual under any defined benefit plan), except to the extent such recognition would result in a duplication of benefits. In addition, and without limiting the generality of the foregoing,

Purchaser shall (or shall cause one (1) of its Affiliates to) use commercially reasonable efforts to: (i) cause each Continuing Employee to be immediately eligible to participate, without any waiting time, in any and all such plans; (ii) cause any pre-existing conditions or limitations, eligibility waiting periods, actively at work requirements, evidence of insurability requirements or required physical examinations under any health or similar plan of the Company, its Subsidiaries, Purchaser or an Affiliate of Purchaser to be waived with respect to Continuing Employees and their eligible dependents, except to the extent that any waiting period, exclusions or requirements still applied to such Continuing Employee under the comparable Employee Benefit Plan in which such Continuing Employee participated immediately before the Closing; and (iii) credit each Continuing Employee with all deductible payments, co-payments and other out-of-pocket expenses incurred by such Continuing Employee and his or her covered dependents under the medical, dental, pharmaceutical or vision benefit plans of the Company or its Subsidiaries prior to the Closing during the plan year in which the Closing occurs for the purpose of determining the extent to which such Continuing Employee has satisfied the deductible, co-payments, or maximum out-of-pocket requirements applicable to such Continuing Employee and his or her covered dependents for such plan year under any medical, dental, pharmaceutical or vision benefit plan of the Company, its Subsidiaries, Purchaser or an Affiliate of Purchaser, as if such amounts had been paid in accordance with such plan.

(b) Effective as of the Closing Date, each employee of the Company or its Subsidiaries shall cease to be participating employees in the Seller 401(k) Plan, and each employee of the Company or its Subsidiaries who continues in employment with Purchaser or any of its Affiliates after the Closing Date (collectively, the "Continuing Employees") shall cease to participate in the Seller 401(k) Plan and, as soon as practicable after the Closing Date, Purchaser shall establish or designate a defined contribution retirement plan which is qualified or eligible for qualification under Section 401(a) of the Code (the "Purchaser 401(k) Plan"). Each Continuing Employee shall become eligible to participate, as soon as practicable after the Closing Date, in the Purchaser 401(k) Plan. Purchaser agrees that each Continuing Employee who receives an "eligible rollover distribution" (within the meaning of Section 402(c)(4) of the Code) from the Seller 401(k) Plan shall be eligible to rollover such distribution (including loans) to the Purchaser 401(k) Plan.

(c) At or following the Closing, Seller or an Affiliate of Seller shall pay to the Company, and the Company shall pay to each of the individuals listed on Section 6.05(c) of the Company Disclosure Schedule (the "Retention Bonus Holders"), the Retention Bonus Amounts in accordance with the terms and conditions set forth in the applicable Retention Bonus Agreement (including, without limitation, any requirement that the applicable Retention Bonus Holder timely execute and deliver, and not revoke, a release of claims against the Company, Seller and each of their respective Affiliates).

(d) Notwithstanding anything herein to the contrary, Purchaser and Seller acknowledge and agree that all provisions contained in this Section 6.05 are included for the sole benefit of Purchaser and the Company, and that nothing in this Agreement, whether express or implied, (i) shall be treated as an amendment or other modification of any Employee Benefit Plan; (ii) shall limit the right of Purchaser, the Company or any of their respective Affiliates to amend, terminate or otherwise modify any Employee Benefit Plan or other employee benefit plan, agreement or other arrangement following the Closing Date; or (iii) shall confer upon any

Person who is not a party to this Agreement (including any current or former director, officer, employee or independent contractor of the Company or any of its Subsidiaries, or any participant in any Employee Benefit Plan or other employee benefit plan, agreement or other arrangement (or any dependent or beneficiary thereof)), any right to continued or resumed employment or recall, any right to compensation or benefits, or any third-party beneficiary or other right of any kind or nature whatsoever.

Section 6.06 Performance Bonds. On the Closing Date, Purchaser shall obtain performance bonds or letters of credit on behalf of the Company and its Subsidiaries (collectively, the "Substitute Performance Bonds"), which Substitute Performance Bonds will be effective as of Closing, in full substitute for all performance bonds or letters of credit listed in Section 6.06 of the Company Disclosure Schedule (collectively, the "Existing Performance Bonds"), and Seller shall obtain the release of the Company from any and all obligations under any of the Existing Performance Bonds and related contractual obligations in connection therewith. In the event Purchaser does not obtain any Substitute Performance Bond by the Closing Date, Purchaser shall indemnify and hold the Seller Indemnified Parties harmless from and against any and all Losses based upon or arising from the related Existing Performance Bond to the extent the matter or occurrence giving rise to such Loss occurred after the Closing.

Section 6.07 Use of Names. Except as provided in Section 6.14, as soon as reasonably practicable (and in no event more than ninety (90) days) after the Closing, Purchaser shall cause the Company and each of its Subsidiaries to cease any and all usage of the names of Seller or its Affiliates in their respective businesses and to remove and cease to use all of the signage, logos, trademarks and service marks of Seller or such Affiliates. Purchaser shall cause the Company and each of its Subsidiaries not to use any business name that is confusingly similar with any trademarks, trade names, brand names, logos, slogans or domain names of Seller or its Affiliates.

Section 6.08 Termination of Intercompany Accounts. At or prior to the Closing, Parent and Seller shall cause all Intercompany Accounts to be, at Parent and Seller's option, settled and/or cancelled without any further Liability or any adverse Tax consequences to the Company or any of its Subsidiaries.

Section 6.09 Servers. At Closing, Seller shall make available to Purchaser for transportation the servers and related infrastructure dedicated to the Company and its Subsidiaries that are located at Seller or its Affiliates' facility in Albuquerque, New Mexico, and the co-location center used by Seller or its Affiliates in Richardson, Texas, and which shall not contain any Protected Health Information that is not related solely to the business of the Company and its Subsidiaries. Within ninety (90) days of Closing, Purchaser shall, at its cost, transport such servers and related infrastructure to a location of its choice.

Section 6.10 Restricted Names. Parent shall not, and shall cause its Subsidiaries not to, use, license or permit any third party to use, any name, slogan, logo or trademark which is the same as or confusingly similar to any of the names, trademarks or service marks included in the Intellectual Property owned or used by the Company and/or any Subsidiary ("Restricted Names"). Notwithstanding anything in this Agreement to the contrary, Purchaser agrees that Seller may continue to use the Restricted Names for the following purposes: (a) for reference to the historical relationship between Seller and its Affiliates, on the one hand, and the Company

and/or any Subsidiary, on the other hand, (b) for retention of any books, records or other materials for internal archival purposes only, and (c) for compliance with applicable Laws including in connection with any corporate filings and documents filed by Seller or any of its Affiliates with any Governmental Authority on or after the Closing Date.

Section 6.11 Payment of Certain Amounts. In the event Seller, Parent or any of their respective Affiliates shall receive any instruments of payment of any accounts receivable, notes receivable or other receivables of the Company and/or any of its Subsidiaries, such Person shall forthwith deliver such instruments to Purchaser, endorsed where necessary, without recourse, in favor of Purchaser.

Section 6.12 Non-Solicitation.

(a) In order to protect the value of the Company and its Subsidiaries, for a period of twenty four (24) months after the Closing, Parent shall not, and shall cause its Subsidiaries not to, without the prior written consent of Purchaser, directly or indirectly, solicit to employ or engage or actually employ any individual that served as an employee of the Company or any of its Subsidiaries at any time during the twelve (12) month period prior to the Closing Date, other than any of the individuals listed on Section 6.12 of the Company Disclosure Schedule (each, a "Restricted Person"); provided, that this Section 6.12(a) shall not be construed to prohibit Seller, Parent or any of Parent's Subsidiaries from (i) engaging in general solicitations for employees in the ordinary course of business, including placing general advertisements for employees in newspapers, periodicals or other media of general circulation, so long as such solicitations are not directed toward Restricted Persons, (ii) soliciting to employ employees, including Restricted Persons, through recruiting firms, placement agencies, and similar businesses so long as such recruiting firms, placement agencies, and similar businesses are not instructed by Seller, Parent or any of Parent's Subsidiaries to target Restricted Persons, or (iii) soliciting to employ or actually employing any Restricted Person more than six (6) months after such Restricted Person's employment or engagement with the Company or any of its Subsidiaries is terminated.

(b) Acknowledgements; Remedies. Each of Seller and Parent acknowledges and agrees that (i) the covenants and agreements set forth in this Section 6.12 were a material inducement to Purchaser to enter into this Agreement and to perform its obligations hereunder, (ii) Purchaser and its stakeholders would not obtain the benefit of the bargain set forth in this Agreement as specifically negotiated by the parties hereto if Seller, Parent or any of their respective Subsidiaries breached any provisions of this Section 6.12 (iii) the Purchase Price is sufficient consideration to make the covenants and agreements set forth herein enforceable, (iv) the length of time and scope of the covenants set forth in this Section 6.12 are reasonable given the benefits Seller and Parent will directly or indirectly receive hereunder, (v) each of Seller and Parent are familiar with all the non-solicitation provisions contained in this Section 6.12 and are fully aware of their respective obligations hereunder, and (vi) neither Seller nor Parent will challenge the reasonableness of the time, scope or other provisions of this Section 6.12 in any Proceeding, regardless of who initiates such Proceeding. Each of Seller and Parent further acknowledges and agrees that irreparable injury would result to Purchaser if Seller, Parent or any of their respective Subsidiaries breaches any of the terms of this Section 6.12, and that in the event of an actual or threatened breach by Seller, Parent or any of their respective Subsidiaries of any of the provisions contained in this Section 6.12, Purchaser may have no adequate remedy at

Law. Each of Seller and Parent accordingly agrees that in the event of any actual or threatened breach by Seller, Parent or any of their respective Subsidiaries of any of the provisions contained in this Section 6.12, Purchaser shall be entitled to seek injunctive and other equitable relief without (A) posting any bond or other security and (B) showing that monetary damages are an inadequate remedy. Nothing contained herein shall be construed as prohibiting Purchaser from pursuing any other remedies available to it for such breach or threatened breach, including the recovery of any damages that it is able to prove. Each of Seller and Parent shall cause its Subsidiaries to comply with this Section 6.12, and shall be liable for any breach by any of its Subsidiaries of this Section 6.12.

Section 6.13 Confidentiality.

(a) Except as otherwise provided herein or in the Transaction Documents, after the Closing Date, Parent shall, and shall cause its Subsidiaries to, keep secret and retain in confidence, and Parent shall not, and shall cause its Subsidiaries not to, use for the benefit of Parent or any of Parent's Subsidiaries, or others, all confidential or proprietary information exclusively relating to the Company or its Subsidiaries and that is not already generally available to the public, including, without limitation, trade secrets, pricing policies, marketing plans or strategies, business acquisition plans, and inventions and research projects, in each case, exclusively relating to the Company and its Subsidiaries (the "Company Confidential Information"). Notwithstanding, the foregoing, the Company Confidential Information shall not include information (i) that is or becomes generally available to the public other than as a result of a disclosure by Parent or any Subsidiary of Parent in breach of this Section 6.13(a), (ii) used or disclosed by Parent or any Subsidiary of Parent in connection with a bona fide dispute with Purchaser or its Affiliates, and (iii) lawfully acquired by Parent or any Subsidiary of Parent after the Closing from sources that were not known by Parent or any Subsidiary of Parent to be prohibited from disclosing such information by a legal, contractual or fiduciary obligation. If Parent or any Subsidiary of Parent is requested or required (by Law or stock exchange requirement or by oral question or request for information or documents in any legal proceeding, interrogatory, subpoena, civil investigative demand, or similar process) to disclose any Company Confidential Information, to the extent reasonably practicable, such Person shall notify Purchaser promptly of the request or requirement so that Purchaser may seek, at its sole cost and expense, an appropriate protective order or waive compliance with the provisions of this Section 6.13(a). If, in the absence of a protective order or the receipt of a waiver hereunder, Parent or any Subsidiary of Parent is, on the advice of counsel, compelled to disclose any Company Confidential Information to any tribunal or other Person, such Person may disclose the Company Confidential Information to the tribunal or other Person, provided that such disclosing Person shall use its commercially reasonable efforts to obtain, at the request and expense of Purchaser, an order or other assurance that confidential treatment shall be accorded to such portion of the Company Confidential Information required to be disclosed as Purchaser shall designate.

(b) Except as otherwise provided herein or in the Transaction Documents, after the Closing Date, Purchaser shall, and shall cause its Subsidiaries to, keep secret and retain in confidence, and Purchaser shall not, and shall cause its Subsidiaries not to, use for the benefit of Purchaser or any of its Subsidiaries, or others, all confidential or proprietary information exclusively relating to Parent or its Subsidiaries (other than the Company and its Subsidiaries) and that is not already generally available to the public, including, without limitation, trade

secrets, pricing policies, marketing plans or strategies, business acquisition plans, and inventions and research projects, in each case, exclusively relating to Parent and its Subsidiaries (other than the Company and its Subsidiaries) (the "Parent Confidential Information"). Notwithstanding, the foregoing, the Parent Confidential Information shall not include information (i) that is or becomes generally available to the public other than as a result of a disclosure by Purchaser or any of its Subsidiaries in breach of this Section 6.13(b), (ii) used or disclosed by Purchaser or its Subsidiaries in connection with a bona fide dispute with Seller or its Affiliates, and (iii) lawfully acquired by Purchaser or its Subsidiaries after the Closing from sources that were not known by Purchaser or such Subsidiaries to be prohibited from disclosing such information by a legal, contractual or fiduciary obligation. If Purchaser or any of its Subsidiaries is requested or required (by Law or stock exchange requirement or by oral question or request for information or documents in any legal proceeding, interrogatory, subpoena, civil investigative demand, or similar process) to disclose any Parent Confidential Information, to the extent reasonably practicable, such Person shall notify Parent promptly of the request or requirement so that Parent may seek, at its sole cost and expense, an appropriate protective order or waive compliance with the provisions of this Section 6.13(b). If, in the absence of a protective order or the receipt of a waiver hereunder, Purchaser or any of its Subsidiaries is, on the advice of counsel, compelled to disclose any Parent Confidential Information to any tribunal or other Person, such Person may disclose the Parent Confidential Information to the tribunal or other Person, provided that such disclosing Person shall use its commercially reasonable efforts to obtain, at the request and expense of Parent, an order or other assurance that confidential treatment shall be accorded to such portion of the Parent Confidential Information required to be disclosed as Parent shall designate.

Section 6.14 Regulatory Approvals; Consents; Notices; Filings.

(a) Each of Purchaser and Seller shall use its commercially reasonable efforts to (i) take, or cause to be taken, all appropriate action, and do, or cause to be done, all things necessary, proper or advisable under any applicable Law to consummate and make effective the transactions contemplated by this Agreement as promptly as reasonably practicable, (ii) obtain from Governmental Authorities any consents or Orders required to be obtained or made by Purchaser, Seller or any of their respective Affiliates in connection with the authorization, execution and delivery of this Agreement and the Transaction Documents and the consummation of the transactions contemplated hereby and thereby, (iii) provide the notices required to be made by Purchaser, Seller or any of their respective Affiliates under or with respect to any Laws in connection with the authorization, execution and delivery of this Agreement and the Transaction Documents and the consummation of the transactions contemplated hereby or thereby, and to pay any fees due of it in connection with such applications or filings, as promptly as is reasonably practicable, (iv) comply at the earliest practicable date with any request under or with respect to any Laws for additional information, documents or other materials received by Purchaser, Seller or any of their respective Affiliates from any Governmental Authority in connection with such applications or filings or the other transactions contemplated by this Agreement and (v) coordinate and cooperate with, and give due consideration to, all reasonable additions, deletions or changes suggested in connection with, making any filing under or with respect to any Laws. Each of Purchaser and Seller shall, and shall cause its respective Affiliates to, furnish to the other party all information reasonably necessary for any such filing to be made in connection with the transactions contemplated by this Agreement. Seller shall, or shall cause

the Company and its Subsidiaries to, give promptly such notice to third parties and use commercially reasonable efforts to obtain such third party consents as are required under Material Contracts or material Permits held by the Company or its Subsidiaries in connection with the transactions contemplated by this Agreement.

(b) For a period ending upon the earlier of (i) the ninety (90) day anniversary of the Closing, and (ii) the date on which all such notices have been filed and such consents have been obtained, Purchaser shall be permitted to use the "Molina" name solely as reasonably necessary in connection with Purchaser's efforts to file the notices and obtain the consents identified in Part I(a) (Pre-Closing Consents) and Part I(c) (Pre-Closing Notice) in Section 4.04 of the Company Disclosure Schedule, and Parent shall reasonably cooperate with Purchaser and its Subsidiaries in connection with making such filings and obtaining such consents.

(c) Notwithstanding anything to the contrary contained herein, (i) except for routine filing fees, nothing in this Agreement shall require Purchaser or Seller to expend money to a third party in exchange for any consent or approval, and (ii) any consent, approval, Order or authorization of, or registration, declaration or filing with, or notice to, any Governmental Authority or any other Person or under any Material Contract required to be obtained or made by Seller, the Company, any of its Subsidiaries or Purchaser in connection with the Closing, including, without limitation, those notices and consents set forth on Section 4.04 of the Company Disclosure Schedule, is at Purchaser's own risk, and none of Parent, Seller or their respective Affiliates shall be responsible for any Losses or any disruption to the operation of the Business resulting therefrom.

Section 6.15 Conduct of the Business.

(a) Except (x) as otherwise contemplated by this Agreement, (y) as consented to in writing by Purchaser (which consent shall not be unreasonably withheld, delayed or conditioned) or (z) as provided on Section 6.15 of the Company Disclosure Schedule, from and after the date hereof until the earlier of the Closing or the termination of this Agreement in accordance with its terms, Seller and Parent shall cause each of the Company and its Subsidiaries to (i) use commercially reasonable efforts to conduct the Business only in the ordinary course of business consistent with past practice, (ii) pay all Indebtedness, Taxes and other obligations when due, except for amounts subject to a bona fide dispute by the Company or its Subsidiaries, (iii) make purchases of goods and services required for the normal operation of the Business in the ordinary course of business consistent with past practice, (iv) pay for payables and other Liabilities in the ordinary course of business consistent with past practice, and (v) use commercially reasonable efforts to collect receivables in the ordinary course of business consistent with past practice.

(b) Without limiting the generality of Section 6.15(a), and except (i) as otherwise contemplated by this Agreement or the Transaction Documents, (ii) as otherwise required by Contract or applicable Law, (iii) as consented to by Purchaser (which consent shall not be unreasonably withheld, delayed or conditioned) or (iv) as provided on Section 6.15 of the Company Disclosure Schedule, from the date of this Agreement and until the earlier of the Closing or the termination of this Agreement in accordance with its terms, Seller and Parent shall cause the Company and each of its Subsidiaries not to:

(i) make any material change in any method of accounting or accounting practice, policy or procedure, other than as required by GAAP;

(ii) amend its Governing Documents;

(iii) (A) declare, set aside, make or pay any dividend or other distribution or payments (whether in cash, stock or property or any combination thereof) in respect of any of its Equity Securities (except for the distribution of cash referenced in the Adjusted Balance Sheet); or (B) redeem or otherwise acquire any of its Equity Securities, issue, sell or otherwise dispose any of its Equity Securities or grant any Person any right or option to acquire (including upon conversion, exchange, or exercise) any Equity Securities;

(iv) merge or consolidate with any business or any corporation, partnership, limited liability company, association or other business organization or division thereof, acquire all or substantially all of the assets of any Person or make any loans, advances or capital contributions to, or any investments in, any Persons;

(v) sell, lease, license or otherwise transfer any material assets or properties of the Company or any of its Subsidiaries, other than in the ordinary course of business consistent with past practice;

(vi) adopt a plan of complete or partial liquidation, dissolution, merger, consolidation, recapitalization or other reorganization, or taken any action for the appointment of a receiver, administrator, trustee or similar officer;

(vii) enter into, amend or terminate a Material Contract other than (A) in order to comply with applicable Law, (B) any termination at the expiration of its stated term, or (C) in the ordinary course of business consistent with past practice;

(viii) except as required by the terms of any Employee Benefit Plan in existence on the date of this Agreement, increase the compensation or benefits of any employee, director or individual independent contractor of the Company or any of its Subsidiaries (other than, in each case, in the ordinary course of business consistent with past practice);

(ix) enter into, adopt or amend, in any material respect, any Employee Benefit Plan in any manner except as required by applicable Law;

(x) authorize, or make any commitment with respect to, any capital expenditures that are, in the aggregate, in excess of Two Hundred Fifty Thousand Dollars ($250,000), or fail to make capital expenditures consistent with the budget set forth in Section 6.15(b)(x) of the Company Disclosure Schedule;

(xi) make any capital investment in, any loan to, or any acquisition of the securities or assets of, any Person or business;

(xii) (A) create, incur, assume, forgive, guarantee or modify any Indebtedness (other than draws under revolving lines of credit existing on the date hereof in the ordinary course of business consistent with past practice), (B) enter into any off-balance sheet

financing arrangement, or (C) make any loans or advances of money other than to employees of the Company or its Subsidiaries in the ordinary course of business consistent with past practice;

(xiii) settle any Proceeding involving payment by the Company or any of its Subsidiaries in an amount in excess of One Hundred Thousand Dollars ($100,000);

(xiv) transfer, assign, or grant any license or sublicense of any rights under or with respect to any Intellectual Property other than in the ordinary course of business consistent with past practice;

(xv) permit the lapse of any existing insurance policy relating to the Business or Assets;

(xvi) except for the settlement or cancellation of Intercompany Accounts as provided in Section 6.08, make any payment to (whether as a distribution, fee, expense reimbursement or otherwise) or on behalf of Parent or any of its Subsidiaries (other than the Company or any of its Subsidiaries);

(xvii) make any material Tax election, prepare any Tax Returns in a manner which is materially inconsistent with the past practices of the Company or such Subsidiary of the Company with respect to the treatment of items on such Tax Returns, incur any material Liability for Taxes other than in the ordinary course of business consistent with past practice, file an amended Tax Return, file a claim for refund of material Taxes of the Company or such Subsidiary of the Company outside of the ordinary course of business, make any voluntary disclosure regarding Taxes to any Governmental Authority, or settle any claim relating to Taxes; or

(xviii) enter into any agreement, understanding or commitment by the Company or any of its Subsidiaries to do any of the foregoing.

Section 6.16 Notification of Certain Matters. Each of Seller and Purchaser hereto shall promptly notify the other party hereto in writing upon the occurrence of any event that has caused: (a) any representation or warranty of the notifying party or its Affiliates contained in this Agreement to be untrue or inaccurate in any material respect as of the time made under this Agreement; or (b) any failure of the notifying party to comply with or satisfy any covenant or agreement to be complied with or satisfied by it under this Agreement, in each case, if such failure to be true or accurate or failure to comply has caused or would reasonably be expected to cause any condition to the obligations of the notified party to effect the transactions contemplated by this Agreement not to be satisfied.

Section 6.17 Access to Information; Confidentiality.

(a) From and after the date hereof until the earlier of the Closing or the termination of this Agreement in accordance with its terms, Seller, upon request, shall permit Purchaser and its Representatives to have reasonable access during normal business hours upon reasonable notice to the Company's and its Subsidiaries' facilities, the individual listed on Section 6.17 of the Company Disclosure Schedule and the business, financial, legal, tax, compensation and other data and information solely concerning the Company's and its

Subsidiaries' affairs and operations as Purchaser deems reasonably necessary or advisable; provided that (i) such access does not unreasonably interfere with normal operations or customer or employee relations of the Company and its Subsidiaries or Affiliates, (ii) access to such data and information may be provided by making such data and information available in the Data Room and (iii) such access shall be at Purchaser's sole cost and expense. All requests for such access shall be made to such Representatives of Seller as Seller shall designate. It is further agreed that neither Purchaser nor its Representatives shall (and Purchaser shall not permit any of its Representatives to) contact any of the employees, customers or other material business relations of the Company or its Subsidiaries in connection with the transactions contemplated by this Agreement, whether in person or by telephone, mail or other means of communication, without the specific prior authorization of Seller. Any such access shall be subject to the following additional limitations: (x) such access shall be subject to restrictions under applicable Law; and (y) such access shall not require disclosure of information that is a trade secret or competitively sensitive or subject to attorney-client or other evidentiary privilege.

(b) The parties acknowledge that an Affiliate of Purchaser and Parent have previously executed the Confidentiality Agreement, which Confidentiality Agreement shall continue to be in full force and effect in accordance with its terms, and Purchaser shall hold, and cause its Representatives to hold, any Evaluation Material (as defined in the Confidentiality Agreement) confidential in accordance with the terms of the Confidentiality Agreement. Effective upon the Closing, the Confidentiality Agreement shall terminate.

Section 6.18 Exclusivity. From and after the date hereof until the earlier of the Closing or the termination of this Agreement, neither Seller nor Parent shall (and Seller and Parent shall cause their respective Affiliates, officers, directors, managers, employees, attorneys, accountants, consultants, financial advisors, and other agents not to), directly or indirectly: (a) solicit, initiate or knowingly encourage (including by way of furnishing any information relating to the Company and its Subsidiaries), or knowingly induce or knowingly take any other action which would reasonably be expected to lead to the making, submission or announcement of, any proposal or inquiry that constitutes, or would reasonably be likely to lead to, an Acquisition Proposal; (b) other than informing Persons of the provisions contained in this Section 6.18, enter into, continue or participate in any discussions or any negotiations regarding any Acquisition Proposal or otherwise take any action to knowingly facilitate or knowingly induce any effort or attempt to make or implement an Acquisition Proposal; (c) approve, endorse, recommend or enter into any Acquisition Proposal or any letter of intent, memorandum of understanding or Contract contemplating an Acquisition Proposal or requiring the Company or Seller or Parent to abandon or terminate its obligations under this Agreement; or (d) agree, resolve or commit to do any of the foregoing. Seller and Parent agree to notify Purchaser within two (2) Business Days if any Person makes any proposal, offer, inquiry or contact with respect to an Acquisition Proposal and provide Purchaser with a description of the material terms and conditions thereof, including the identity of such Person. Seller and Parent shall immediately cease and cause to be terminated any existing discussions with any Person (other than Purchaser) concerning any proposal relating to an Acquisition Proposal. With respect to the Persons with whom discussions or negotiations have been terminated, Seller and Parent shall use their respective reasonable best efforts to obtain the return or destruction of, in accordance with the terms of any applicable confidentiality agreement, any confidential information previously furnished to any such Person by Seller or

Parent or any of their respective officers, directors, managers, employees, attorneys, accountants, consultants, financial advisors or other agents.

Section 6.19 Lease Guarantees. After the Closing, (a) Purchaser shall reasonably cooperate with Parent and Seller to cause Parent to be released from all obligations arising after the Closing under any guarantees entered into by Parent in connection with a Lease as soon as reasonably practicable after the Closing and (b) Purchaser shall indemnify and hold the Seller Indemnified Parties harmless from and against any and all Losses based upon or arising from any such guarantee to the extent the matter or occurrence giving rise to such Loss occurred after the Closing.

ARTICLE 7
TERMINATION

Section 7.01 Termination. This Agreement may be terminated and the transactions contemplated by this Agreement abandoned at any time prior to the Closing:

(a) by mutual written consent of Purchaser and Seller;

(b) by either Purchaser or Seller, if the Closing shall not have been consummated on or before October 19, 2018 (the "End Date"); provided, however, that the right to terminate this Agreement under this Section 7.01(b) shall not be available to any such party whose failure to fulfill any obligation under this Agreement has been the cause of, or resulted in, the failure of the Closing to occur on or prior to the End Date;

(c) by Purchaser, if at any time there is a breach of or inaccuracy in any representation or warranty set forth in Article 4 (and including specifically any of those contained in Section 4.08) or any failure to perform in any respect any covenant or agreement to be complied with or performed by Seller, Parent or the Company pursuant to the terms of this Agreement such that the conditions set forth in Sections 3.05(a) or 3.05(b) would not be satisfied (treating such time as if it were the Closing for purposes of this Section 7.01(c)), which breach, inaccuracy or failure to perform cannot be cured by the End Date or has not been cured within fifteen (15) days following the receipt by Seller of written notice thereof from Purchaser or any shorter period of time that remains between the date Purchaser delivers written notice of such breach and the End Date; provided, however, that Purchaser may not terminate this Agreement pursuant to this Section 7.01(c) if such inaccuracy or breach was primarily caused by the failure of Purchaser to perform in any material respect any of the covenants or agreements to be performed by it prior to the Closing; or

(d) by Seller, if at any time there is a breach of or inaccuracy in any representation or warranty set forth in Article 5 or any failure to perform in any respect any covenant or agreement to be complied with or performed by Purchaser pursuant to the terms of this Agreement such that the conditions set forth in Sections 3.04(a) or 3.04(b) would not be satisfied (treating such time as if it were the Closing for purposes of this Section 7.01(d)), which breach, inaccuracy or failure to perform cannot be cured by the End Date or has not been cured within fifteen (15) days following the receipt by Purchaser of written notice thereof from Seller or any shorter period of time that remains between the date Seller delivers written notice of such

breach and the End Date; provided, however, that Seller may not terminate this Agreement pursuant to this Section 7.01(d) if such inaccuracy or breach was primarily caused by the failure Seller, Parent, or the Company to perform in any material respect any of the covenants or agreements to be performed by it prior to the Closing; or

(e) by either Purchaser or Seller, if any Governmental Authority shall have issued a permanent injunction or other Order prohibiting the consummation of the transactions contemplated by this Agreement and such permanent injunction or other Order shall have become final and non-appealable.

Section 7.02 Effect of Termination. If this Agreement is terminated pursuant to Section 7.01 by a party hereto, written notice thereof shall be given by such party to the other party or parties, specifying the provision pursuant to which such termination is made and, upon delivery thereof, all rights, and obligations of the parties hereunder shall terminate and no party hereto shall have any Liability to the other party or parties, except for obligations of the parties hereto in Section 6.01 (Public Announcements), Section 7.02 (Effect of Termination) and Article 9 (Miscellaneous), and the Confidentiality Agreement, which shall survive the termination of this Agreement in accordance with their terms. Notwithstanding anything to the contrary contained in this Agreement or the Transaction Documents, termination of this Agreement pursuant to Section 7.01 shall not release any party hereto from any Liability for any willful breach by such party of the terms and provisions of this Agreement prior to such termination or limit or restrict the availability of specific performance or other injunctive relief to the extent that specific performance or such other relief is available to a party hereunder.

ARTICLE 8
SURVIVAL; INDEMNIFICATION

Section 8.01 Survival of Representations and Warranties.

(a) The representations and warranties contained in Section 9.16 and Articles 4 and 5 shall survive the Closing and shall terminate on January 19, 2020; provided, that the Surviving Seller Representations and the Fundamental Purchaser Representations shall survive the Closing until the expiration of the applicable statute of limitations. Any written claim for indemnification under Section 8.02(b), Section 8.02(c) or Section 8.03(b) may be given at any time prior to January 19, 2020, and, from and after such date, no claim for such indemnification may be made hereunder. Any written claim for indemnification under Section 8.02(d) may be given at any time prior to the date that all of the Proceedings subject to such indemnification have been resolved, and, from and after such date, no claim for such indemnification may be made hereunder. Notwithstanding the foregoing, if a written claim for indemnification is made hereunder prior to the end of the applicable survival period, such indemnification shall survive, solely in relation to such claim, until such claim is resolved. Any party providing indemnification pursuant to this Article 8 is referred to herein as an "Indemnifying Party" and any Person entitled to indemnification pursuant to Section 8.02 or Section 8.03 is referred to herein as an "Indemnified Party".

(b) It is the express intent of the parties to this Agreement that, to the extent the survival of the representations and warranties in this Agreement (and the associated right to bring

a claim for a breach of such representations and warranties) is shorter than the statute of limitations that would otherwise have been applicable to such representations or warranties, by contract, the applicable statute of limitations with respect to such representations or warranties (and the associated right to bring a claim for a breach of such representations and warranties) are hereby reduced so they end at the end of the applicable survival period specified in Section 8.01(a).

Section 8.02 Indemnification by Parent. Effective as of the Closing, Parent and Seller, jointly and severally, shall indemnify and hold Purchaser, its Affiliates (including, after the Closing, the Company and its Subsidiaries) and each of their respective Representatives (each such Person, a "Purchaser Indemnified Party") harmless from and against any and all Losses based upon or arising from:

(a) any breach of any representation or warranty made by Seller pursuant to Article 4 or by Parent pursuant to Section 9.16;

(b) any failure by Seller or Parent to perform any of its respective covenants or agreements contained herein (and including in particular those contained in Section 6.15);

(c) any Pre-Closing Insurable Event; and

(d) any Proceedings pending against the Company or any of its Subsidiaries as of the Closing, and including without limitation those matters described in Section 4.13, Section 4.14(b), Section 4.16(b) and Section 4.20(b) of the Company Disclosure Schedule.

Section 8.03 Indemnification by Purchaser. Effective as of the Closing, Purchaser shall indemnify and hold Seller, its Affiliates and each of their respective Representatives (each such Person, a "Seller Indemnified Party") harmless from and against any and all Losses based upon or arising from:

(a) any breach of any representation or warranty made by Purchaser pursuant to Article 5; and

(b) any failure by Purchaser to perform any of its covenants or agreements contained herein.

Section 8.04 Additional Provisions Regarding Indemnification and Insurance Obligations. Notwithstanding Section 8.02 and Section 8.03, the rights to indemnification pursuant to the provisions of Section 8.02 and Section 8.03 are subject to the following limitations:

(a) The maximum aggregate Liability of Parent and Seller to all Purchaser Indemnified Parties taken together for Losses for any claims for indemnification pursuant to Section 8.02 (other than Section 8.02(d)) shall be limited to an amount equal to Ten Million Dollars ($10,000,000) (collectively, the "General Cap Amount"). For purposes of clarification, in no event shall any Losses for which the Purchaser Indemnified Parties are indemnified pursuant to Section 8.02(d) count against the General Cap Amount.

(b) The maximum aggregate Liability of Purchaser to all Seller Indemnified Parties taken together for Losses for any claims for indemnification pursuant to Section 8.03 shall be limited to an amount equal to the General Cap Amount.

(c) Parent and Seller shall not be liable for Losses for any individual claim for indemnification pursuant to Section 8.02(a) (other than as a result of breaches of the Surviving Seller Representations) unless the amount of Losses for such claim for indemnification against Seller pursuant to Section 8.02(a) (other than as a result of breaches of the Surviving Seller Representation) shall exceed Fifty Thousand Dollars ($50,000) (the "Per-Claim Basket"), and then for such Losses from the first dollar. For purposes of the preceding sentence, multiple claims for indemnification based upon the same act, event, omission or set of facts shall be deemed a single individual claim.

(d) Purchaser shall not be liable for Losses for any individual claim for indemnification pursuant to Section 8.03(a) (other than as a result of a breach of a Fundamental Purchaser Representation) unless the amount of Losses for such claim for indemnification against Purchaser pursuant to Section 8.03(a) (other than as a result of a breach of a Fundamental Purchaser Representation) shall exceed the Per-Claim Basket, and then for such Losses from the first dollar. For purposes of the preceding sentence, multiple claims for indemnification based upon the same act, event, omission or set of facts shall be deemed a single individual claim.

(e) Parent and Seller shall not be liable for Losses for any claims for indemnification pursuant to Section 8.02(a) (other than as a result of breaches of the Surviving Seller Representations) unless the total of all Losses for claims for indemnification against Parent pursuant to Section 8.02(a) (other than as a result of a breach of a Surviving Seller Representation and Losses excluded under Section 8.04(c)) shall exceed Five Hundred Thousand Dollars ($500,000) in the aggregate (the "Deductible"), and then only for such Losses to the extent they exceed such amount.

(f) Purchaser shall not be liable for Losses for any claims for indemnification pursuant to Section 8.03(a) (other than as a result of breach of the Fundamental Purchaser Representations) unless the total of all Losses for claims for indemnification against Seller pursuant to Section 8.03(a) (other than as a result of a breach of a Fundamental Purchaser Representation and Losses excluded under Section 8.04(d)) shall exceed the Deductible, and then only for such Losses to the extent they exceed such amount.

(g) No Indemnifying Party shall be liable to an Indemnified Party hereunder for (i) any punitive damages, except where such damages are recovered by a third party from an Indemnified Party in connection with Losses indemnified hereunder or (ii) any lost profits, diminution of value, consequential damages, special damages, incidental damages, indirect damages, exemplary damages or other unforeseen damages, except where such damages are recovered by a third party from an Indemnified Party in connection with Losses indemnified hereunder. In no event shall any multiples or similar valuation methodology (whether based on "multiple of profits," "multiple of earnings," "multiple of cash flows" or similar terms) be used in calculating the amount of any Losses.

(h) No Indemnified Party shall be entitled to recover for a Loss under Section 8.02 or Section 8.03 to the extent that such Indemnified Party has recovered such Loss under (i) unaffiliated third-party insurance held by, or for the benefit of, such Indemnified Party, or (ii) the Insurance Policies. In the event that an Indemnified Party receives insurance proceeds from unaffiliated third-party insurance with respect to any matter for which it was previously indemnified pursuant to this Article 8, such Indemnified Party shall promptly remit such insurance proceeds to the Indemnifying Party. Each Indemnified Party covenants and agrees to use commercially reasonable efforts to seek recovery of any amounts available under (A) third-party insurance held by, or for the benefit of, such Indemnified Party and (B) any other insurance applicable to Indemnified losses, including, but without limitation, the Insurance Policies.

(i) For the avoidance of doubt, and notwithstanding any term or provision to the contrary, (i) effective as of the Closing, all insurance coverage owned or held by Parent or its Subsidiaries, including but without limitation the Insurance Policies, shall be cancelled and terminated in respect of all accidents, events, happenings, injuries, claims, conduct and occurrences relating to the Business commencing or taking place after the Closing, and (ii) this Agreement is not intended as an assignment or attempted assignment of any policy of insurance or as a contract of insurance and shall not be construed to waive any right or remedy of Parent or its Subsidiaries in respect of any insurance policy or any other contract or policy of insurance, except to the extent such assignment is permitted by the terms of such policy in accordance with applicable Law and Parent has agreed to such assignment. Notwithstanding the foregoing, this Agreement is intended as an assignment of insurance rights to Company and its Subsidiaries and each of their insured persons and entities and their successors-in-interest and respective permitted assignees under the Insurance Policies, and otherwise in respect of insurance applicable to any Losses indemnified hereunder, to the extent allowed by applicable Law and as necessary to fully establish their rights to obtain coverage under the such insurance as respects accidents, events, happenings, injuries, claims, conduct and occurrences relating to the Business prior to the Closing.

(j) Upon and after becoming aware of any event which is reasonably likely to give rise to Losses subject to indemnification hereunder, each Indemnified Party shall use commercially reasonable efforts to mitigate the Losses arising from such events, including incurring costs only to the minimum extent necessary to remedy the event which gives rise to Losses.

(k) Parent and Seller shall have no obligation under this Article 8 to indemnify any Purchaser Indemnified Party with respect to (i) any Loss that is a Liability to the extent reflected the calculation of the Purchase Price; or (ii) any Loss to the extent such Loss does not exceed the amount of any reserves for such Loss as reflected in the Balance Sheet.

(l) The amount of any recovery by the Indemnified Party pursuant to this Article 8 shall be reduced by any foreign, federal, state and/or local Tax benefits actually realized by such Indemnified Party.

(m) Notwithstanding anything to the contrary in this Agreement, no Purchaser Indemnified Party shall have any claim for indemnification (and no Purchaser Indemnified Party

shall be indemnified) for Loss under this Article 8 to the extent such Loss relates to Taxes attributable to a Post-Closing Tax Period.

(n) For Tax purposes, the parties agree to treat all payments made under this Article 8 as adjustments to the Purchase Price.

Section 8.05 Indemnification Procedures; Third Party Claims; Tax Claims.

(a) An Indemnified Party shall give the Indemnifying Party prompt written notice of any matter which an Indemnified Party has determined has given or would give rise to a right of indemnification under this Agreement (other than a Third Party Claim), within twenty (20) Business Days of such determination (an "Indemnity Notice"); provided, however, that the failure to give an Indemnity Notice shall not waive an Indemnified Party's right to indemnification, except to the extent the Indemnifying Party is prejudiced by the Indemnified Party's failure to give notice or such Indemnity Notice is given after the expiration of the applicable survival period.

(b) If any claim, demand or Proceeding is brought by a Person who is not a party to this Agreement or an Affiliate thereof (a "Third Party Claim") against an Indemnified Party, and if such party intends to seek indemnification with respect thereto pursuant to this Article 8, such Indemnified Party shall promptly, but in any event within twenty (20) Business Days after the Indemnified Party learns of the existence of the Third Party Claim, notify the Indemnifying Party in writing of the Third Party Claim; provided, however, that no delay on the part of the Indemnified Party in notifying the Indemnifying Party will relieve the Indemnifying Party from any obligation hereunder except to the extent the Indemnifying Party is prejudiced by the Indemnified Party's failure to give notice or such Indemnity Notice is given after the expiration of the applicable survival period. The Indemnified Party will deliver to the Indemnifying Party, promptly after the Indemnified Party's receipt thereof, copies of all documents relating to the Third Party Claim and notices and documents relating to the Third Party Claim received by the Indemnified Party.

(c) The Indemnifying Party will have the right to participate in or assume the defense of the Third Party Claim with counsel of its choice reasonably satisfactory to the Indemnified Party, so long as the Indemnifying Party delivers written notice to the Indemnified Party of its election to assume the defense of the Third Party Claim; provided, however, that Parent shall be deemed to have delivered such notice with respect to Proceedings indemnified under Section 8.02(d). Should the Indemnifying Party so elect to assume the defense of a Third Party Claim, the Indemnifying Party shall not be liable to the Indemnified Party for any legal or other expenses subsequently incurred by the Indemnified Party in connection with the defense thereof. If the Indemnifying Party is conducting the defense of the Third Party Claim in accordance with the provisions above, the Indemnified Party, at its sole cost and expense, may retain separate counsel, and participate in the defense of the Third Party Claim, it being understood that the Indemnifying Party will control such defense. To the extent the Indemnifying Party has not assumed the defense of such Third Party Claim pursuant to this Section 8.05(c), the Indemnified Party will (upon delivering written notice to such effect to the Indemnifying Party) have the right to undertake the defense of such Third Party Claim. Each party shall fully cooperate with the other party in such defense and make available to the party undertaking the defense of the Third

Party Claim employees, witnesses, pertinent records, materials and information in such party's possession or under such party's control relating to such Third Party Claim as may be requested by the party undertaking the defense of the Third Party Claim. If an Indemnified Party fails to comply with the immediately preceding sentence, such Indemnified Party's right to indemnification under this Article 8 shall be waived to the extent such failure prejudices the Indemnifying Party.

(d) Notwithstanding anything in this Section 8.05 to the contrary, neither the Indemnifying Party nor the Indemnified Party shall, without the written consent of the other party (which consent shall not be unreasonably delayed, withheld or conditioned), settle, compromise or discharge any Third-Party Claim or admit any Liability or permit a default or consent to entry of any judgment with respect to any Third Party Claim; provided that if the Indemnifying Party assumes the defense of any Third Party Claim, the Indemnifying Party shall be permitted to settle, compromise or discharge such Third Party Claim without the Indemnified Party's consent if such settlement, compromise or discharge (i) by its terms unconditionally releases the Indemnified Party from all Liability (other than an amount equal to the Deductible) in connection with such Third Party Claim, (ii) does not include an admission of wrongdoing or misconduct by the Indemnified Party, and (iii) does not impose any injunctive against the Indemnified Party.

(e) Notwithstanding anything in this Section 8.05 to the contrary, the foregoing provisions of Section 8.05 shall not apply to claims for indemnification for Losses pursuant to Section 8.02 solely with respect to breaches of the representations, warranties and covenants set forth in Section 4.19 (Taxes), Section 6.03 (Transfer Taxes) and Section 6.04 (Tax Matters). Parent shall have the sole right to control, defend and settle any audit, other administrative proceeding or inquiry or judicial proceeding involving the income Tax Return of Parent or its Subsidiaries. Except as otherwise provided in this Section 8.05(e), if a claim for Taxes is made against Purchaser by any Tax Authority and if Purchaser intends to seek indemnity with respect thereto under Section 8.02, Purchaser shall promptly furnish written notice to Parent of such claim. Parent shall have thirty (30) days after receipt of such notice to notify Purchaser of its intent to undertake, conduct, and control (through counsel of its own choosing and at its own expense) the settlement or defense thereof, and Purchaser and the Company and their respective Affiliates shall cooperate in connection therewith. If Purchaser or the Company fails to comply with the immediately preceding sentence, Purchaser and the Company's right to indemnification under this Article 8 shall be waived to the extent such failure prejudices the Parent. If within thirty (30) days after the receipt of Purchaser's notice of a claim of indemnity hereunder, Parent does not notify Purchaser that Parent elects (at its cost and expense) to undertake the defense thereof, or gives such notice and thereafter fails to contest such claim in good faith, Purchaser shall have the right to contest, settle, or compromise such claim and Purchaser shall not thereby waive any right to indemnification for such claim under this Agreement; provided, however, that neither Purchaser nor the Company shall pay or settle any such claim without the prior written consent of Parent, which consent shall not be unreasonably withheld. Nothing contained herein shall compel Parent or Seller to disclose any of its income Tax Returns to Purchaser or provide Purchaser the right to see or review such income Tax Returns.

Section 8.06 Exclusive Remedy. Subject to Section 9.10 and except for claims based on Fraud, notwithstanding anything to the contrary contained in this Agreement, the remedies

expressly set forth in this Article 8 shall be the sole and exclusive remedy for the parties hereto and the other Indemnified Parties for any breach of any representation, warranty, covenant or other provision contained in this Agreement or otherwise relating to the subject matter of this Agreement. In furtherance of the foregoing, each party hereto (on behalf of itself and the other Indemnified Parties) hereby waives, to the fullest extent permitted under Law, any and all rights, claims and causes of action for any breach of any representation, warranty, covenant, agreement or provision set forth herein or otherwise relating to the subject matter of this Agreement such party or other Indemnified Parties may have against the other party and each of its Affiliates and Representatives arising under or based upon any Law, except in the case of Fraud, pursuant to the express indemnification provisions set forth in this Article 8 or pursuant to the provisions of Section 9.10.

ARTICLE 9
MISCELLANEOUS

Section 9.01 Entire Agreement; Assignment. This Agreement, together with the Transaction Documents, contains the entire agreement of the parties hereto with respect to the subject matter hereof and the Confidentiality Agreement and supersedes all other prior agreements between such parties and their respective Representatives in respect of such subject matter. Neither this Agreement nor any rights or obligations hereunder may be assigned by any party hereto without the prior written consent of the other parties hereto. Notwithstanding the foregoing: (a) Seller may assign all of its rights and obligations hereunder to Parent without the consent of Purchaser; provided, that such assignment shall not relieve Seller of any of its obligations hereunder; and (b) Purchaser may, without the consent of Seller or Parent, assign (by operation of law or otherwise) or otherwise transfer its rights and obligations hereunder to any Affiliate of Purchaser; provided, that such assignment shall not relieve Purchaser of any of its obligations hereunder. Subject to the foregoing, this Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective heirs, successors, permitted assigns and legal representatives.

Section 9.02 Notices. All notices, consents, requests, instructions, approvals and other communications provided for in this Agreement shall be in writing and shall be deemed validly given upon personal delivery or one (1) Business Day after being sent by nationally recognized overnight courier service or on the date of transmission if sent by e-mail (subject to automated confirmation of receipt), at the following address or e-mail address, or at such other address or e-mail address as a party may designate to the other parties:

If to Purchaser:

Pyramid Health Holdings, LLC
c/o Atar Capital, LLC
1999 Avenue of the Stars, Suite 2810
Los Angeles, CA 90067
Attention: Cyrus Nikou
E-mail: cnikou@atarcapital.com

with a copy (which shall not constitute notice) to:

Dykema Gossett LLP
333 South Grand Avenue, Suite 2100
Los Angeles, CA 90071
Attn: Thomas M. Cleary
E-mail: tcleary@dykema.com

If to Seller:

Molina Pathways, LLC
200 Oceangate, Suite 100
Long Beach, CA 90802
Attn: Jeff Barlow and Burt Park
E-mail: jeffrey.barlow@molinahealthcare.com;
burt.park@molinahealthcare.com

with a copy (which shall not constitute notice) to:

Latham & Watkins LLP
355 South Grand Avenue, Suite 101
Los Angeles, CA 90071-1560
Attn: David A. Zaheer
E-mail: david.zaheer@lw.com

or to such other address as the Person to whom notice is given may have previously furnished to the other in writing in the manner set forth above.

Section 9.03 **Governing Law**. This Agreement, and all claims or causes of action (whether in contract or tort) that may be based upon, arise out of or relate to this Agreement, or the negotiation, execution or performance of this Agreement (including any claim or cause of action based upon, arising out of or related to any representation or warranty made in or in connection with this Agreement or as an inducement to enter into this Agreement), shall be governed by the internal Laws of the State of Delaware, without giving effect to any Law that would cause the Laws of any jurisdiction other than the State of Delaware to be applied.

Section 9.04 **Construction; Interpretation**. The name assigned to this Agreement and the article and section captions used herein are for convenience of reference only and shall not affect the interpretation or construction hereof. Whenever the context requires, the gender of all words used in this Agreement includes the masculine, feminine, and neuter. All references to Articles and Sections refer to articles and sections of this Agreement. The terms "herein", "hereunder", "hereof" and words of like import refer to this entire Agreement instead of just the provision in which they are found. Unless the context otherwise requires: (a) a reference to a document includes all amendments or supplements to, or replacements or novations of, that document; (b) the use of the term "including" means "including, without limitation"; (c) the word "or" shall be disjunctive but not be exclusive; (d) unless expressly provided otherwise, the measure of a period of one (1) month or year for purposes of this Agreement shall be that date of the following month or year corresponding to the starting date; provided, that if no corresponding date exists, the measure shall be that date of the following month or year

corresponding to the next day following the starting date (for example, one (1) month following February 18 is March 18, and one (1) month following March 31 is May 1); (e) a reference to an entity includes any successor entity, whether by way of merger, amalgamation, consolidation or other business combination; (f) reference to a word defined hereunder shall apply equally to both the singular and plural forms of the term defined; and (g) a reference to "$" or "dollars" means the lawful currency of the United States. The language used in this Agreement shall be deemed to be the language chosen by the parties hereto to express their mutual intent, and no rule of strict construction shall be applied against any party hereto. For purposes of Article 4, information shall be deemed to have been "made available" to Purchaser only if such information was posted to the electronic data room maintained by Cain Brothers & Company, LLC in connection with the transactions contemplated hereby (the "Data Room") in a manner accessible and reviewable by Purchaser at least one (1) Business Day prior to the date of this Agreement.

Section 9.05 Company Disclosure Schedule. Neither the specification of any dollar amount in the representations or warranties contained in this Agreement nor the inclusion of any specific item in the Company Disclosure Schedule hereto is intended to imply that such amounts, or higher or lower amounts of the items so included or other items, are or are not material or that such fact or matter would with any other fact or matter, individually or in the aggregate, have a Material Adverse Effect.

Section 9.06 Parties in Interest. This Agreement shall be binding upon and inure solely to the benefit of each party hereto and its successors and permitted assigns and nothing in this Agreement, express or implied, is intended to or shall confer upon any other Person any rights, benefits or remedies of any nature whatsoever under or by reason of this Agreement.

Section 9.07 Severability. If any term or other provision of this Agreement is invalid, illegal or unenforceable, all other provisions of this Agreement shall remain in full force and effect so long as the economic or legal substance of the transactions contemplated hereby is not affected in any manner materially adverse to any party hereto.

Section 9.08 Counterparts; Signatures. This Agreement may be executed in one (1) or more counterparts, each of which shall be deemed to be an original, but all of which shall constitute one (1) and the same agreement. Delivery of an executed counterpart of a signature page to this Agreement by scanned pages shall be effective as delivery of a manually executed counterpart to this Agreement.

Section 9.09 Jurisdiction; Venue; Waiver of Jury Trial. ANY LEGAL ACTION OR PROCEEDING WITH RESPECT TO THIS AGREEMENT (INCLUDING PURSUANT TO SECTION 9.10) SHALL BE BROUGHT IN THE COURT OF CHANCERY OF THE STATE OF DELAWARE AND ANY STATE APPELLATE COURT THEREFROM WITHIN THE STATE OF DELAWARE (OR, IF THE COURT OF CHANCERY OF THE STATE OF DELAWARE DECLINES TO ACCEPT JURISDICTION OVER A PARTICULAR MATTER, ANY FEDERAL COURT WITHIN THE STATE OF DELAWARE OR, IN THE EVENT FEDERAL COURT WITHIN THE STATE OF DELAWARE DECLINES TO ACCEPT JURISDICTION OVER A PARTICULAR MATTER, ANY STATE COURT WITHIN THE STATE OF DELAWARE). BY EXECUTION AND DELIVERY OF THIS AGREEMENT, EACH PARTY HEREBY ACCEPTS FOR ITSELF AND IN RESPECT OF ITS PROPERTY,

GENERALLY AND UNCONDITIONALLY, THE EXCLUSIVE JURISDICTION OF THE AFORESAID COURTS. EACH PARTY HERETO HEREBY IRREVOCABLY CONSENTS TO THE SERVICE OF PROCESS OUT OF ANY OF THE AFOREMENTIONED COURTS IN ANY ACTION OR PROCEEDING BY THE MAILING OF COPIES THEREOF TO SUCH PARTY BY REGISTERED OR CERTIFIED MAIL, POSTAGE PREPAID, RETURN RECEIPT REQUESTED, TO SUCH PARTY AT ITS ADDRESS SPECIFIED IN SECTION 9.02, OR BY ANY OTHER METHOD PERMITTED BY LAW. THE PARTIES HERETO HEREBY IRREVOCABLY WAIVE TRIAL BY JURY IN ANY LEGAL ACTION OR PROCEEDING OR COUNTERCLAIM (WHETHER BASED ON CONTRACT, TORT, STATUTE OR OTHERWISE) ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE TRANSACTIONS CONTEMPLATED HEREBY OR THE ACTIONS OF SUCH PARTY IN THE NEGOTIATION, ADMINISTRATION, PERFORMANCE AND ENFORCEMENT HEREOF, AND EACH OF THE PARTIES HEREBY IRREVOCABLY WAIVES ANY OBJECTION, INCLUDING, WITHOUT LIMITATION, ANY OBJECTION TO THE LAYING OF VENUE OR BASED ON THE GROUNDS OF FORUM NON CONVENIENS, WHICH IT MAY NOW OR HEREAFTER HAVE TO THE BRINGING OF ANY SUCH ACTION OR PROCEEDING IN SUCH RESPECTIVE JURISDICTIONS.

Section 9.10 Remedies. The parties hereto agree that irreparable damage could occur if any provision of this Agreement were not performed in accordance with the terms hereof and that such parties shall be entitled, without posting a bond or similar indemnity, to seek an injunction to prevent breaches of this Agreement, or specific performance of the terms and provisions hereof, in addition to any other remedy to which they are entitled at law or in equity.

Section 9.11 Further Assurances. In connection with this Agreement and the transactions contemplated hereby, each party hereto shall execute and deliver any additional documents and instruments and perform any additional acts that may be necessary or appropriate to effectuate and perform the provisions of this Agreement and such transactions.

Section 9.12 Failure or Indulgence Not Waiver. No failure or delay on the part of any party hereto in the exercise of any right hereunder shall impair such right or be construed to be a waiver of, or acquiescence in, any breach of any representation, warranty or agreement herein, nor shall any single or partial exercise of any such right preclude any other or further exercise thereof or any other right. All rights and remedies existing under this Agreement are cumulative to, and not exclusive of, any rights or remedies otherwise available.

Section 9.13 Amendments. This Agreement may not be amended, supplemented or otherwise modified except in a written instrument executed by Purchaser and Seller. No provision of this Agreement may be waived except in a written instrument executed by the party waiving such provision. Any written waiver shall be limited to those items specifically waived therein and shall not be deemed to waive any future breaches or violations or other non-specified breaches or violations unless, and to the extent, expressly set forth therein.

Section 9.14 Fees and Expenses. Except as otherwise expressly provided in this Agreement, all fees, charges and expenses incurred in connection with this Agreement and the transactions contemplated hereby shall be paid by the party incurring such fees, charges or expenses.

Section 9.15 Provision Respecting Legal Representation. Each of the parties to this Agreement hereby agrees, on its own behalf and on behalf of its Representatives, that Latham & Watkins LLP may serve as counsel to Seller and its Affiliates (individually and collectively, the "Seller Group"), on the one hand, and the Company or its Subsidiaries, on the other hand, in connection with the negotiation, preparation, execution and delivery of this Agreement, the Transaction Documents and the consummation of the transactions contemplated hereby or thereby, and that, following consummation of such transactions, Latham & Watkins LLP may serve as counsel to the Seller Group or any Representative of the Seller Group, in connection with any litigation, claim or obligation arising out of or relating to this Agreement, the Transaction Documents or the transactions contemplated hereby or thereby notwithstanding such prior representation of the Company or its Subsidiaries and each of the parties hereto hereby consents thereto and waives any conflict of interest arising therefrom, and each of such parties shall cause any Affiliate thereof to consent to waive any conflict of interest arising from such representation.

Section 9.16 Parent Representations. Parent hereby represents and warrants to Purchaser as of the date hereof and as of the Closing as follows:

(a) Parent is a corporation, duly formed, validly existing and in good standing under the Laws of the State of Delaware.

(b) Parent has the requisite corporate power and authority to execute and deliver this Agreement and the Transaction Documents to which it is a party, to perform its obligations hereunder and thereunder and to consummate the transactions contemplated hereby and thereby.

[Signature page follows.]

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed as of the day and year first above written.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Zubretsky, certify that:

1. I have reviewed the report on Form 10-Q for the period ended September 30, 2018 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and to the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

June 30, 2018

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality managed health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

The Health Plans segment consists of health plans operating in 13 states and the Commonwealth of Puerto Rico. As of June 30, 2018, these health plans served approximately 4.1 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Affordable Care Act Marketplace (Marketplace) members, most of whom receive government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO).

Our health plans' state Medicaid contracts generally have terms of three to five years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Such contracts are subject to risk of loss in states that issue requests for proposal (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may not be renewed.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled (ABD); and regions or service areas.

The Molina Medicaid Solutions segment provides support to state government agencies' administration of their Medicaid programs, including business processing, information technology development and administrative services. The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

Recent Developments – Health Plans Segment

Puerto Rico Health Plan. In July 2018, our Puerto Rico health plan was selected by the Puerto Rico Health Insurance Administration to be one of the organizations to administer the Commonwealth's new Medicaid Managed Care contract. Services under the new contract, currently expected to begin on November 1, 2018, would cover the entire island. The base contract runs for a period of three years with an optional one year extension. As of June 30, 2018, we served approximately 326,000 Medicaid members in the East and Southwest regions of Puerto Rico, which represented premium revenue of $370 million for the six months ended June 30, 2018.

Florida Health Plan. In June 2018, our Florida health plan was awarded comprehensive Medicaid Managed Care contracts by the Florida Agency for Health Care Administration (AHCA) in Regions 8 and 11 of the Florida Statewide Medicaid Managed Care Invitation to Negotiate. As of June 30, 2018, we served approximately 96,000 Medicaid members in those regions, which represented premium revenue of approximately $232 million for the six months ended June 30, 2018. Services under the new contract are expected to begin on January 1, 2019. We will be serving both the Medicaid and long-term care populations in the two regions.

Washington Health Plan. In May 2018, our Washington health plan was selected by the Washington State Health Care Authority (HCA) to enter into a managed care contract for the eight remaining regions of the state's Apple Health Integrated Managed Care program, in addition to the two regions previously awarded to us. We were selected by HCA for the following regions: Greater Columbia, King, North Sound, Pierce, and Spokane beginning January 1, 2019; and Salish, Thurston-Mason, and Great Rivers beginning January 1, 2020. As of June 30, 2018, we served approximately 742,000 Medicaid members in Washington, which represented premium revenue of $1,083 million for the six months ended June 30, 2018.

Recent Developments – Molina Medicaid Solutions Segment

In June 2018, we entered into a definitive agreement to sell Molina Medicaid Solutions (MMS) to DXC Technology Company. The divestiture, expected to close in the third quarter of 2018, is subject to the satisfaction of customary

closing conditions and the receipt of certain third party consents and regulatory approvals. Refer to Note 11, “Segments,” for further information.

Presentation and Reclassification

We have reclassified certain amounts in the 2017 consolidated statement of cash flows to conform to the 2018 presentation, relating to the presentation of restricted cash and cash equivalents. The reclassification is a result of our adoption of Accounting Standards Update (ASU) 2016-18, *Restricted Cash* effective January 1, 2018. See Note 2, “Significant Accounting Policies,” for further information, including the amount reclassified.

We have combined certain line items in the accompanying consolidated balance sheets. For all periods presented, we have combined the presentation of:

- Income taxes refundable with “Prepaid expenses and other current assets;”
- Income taxes payable with “Accounts payable and accrued liabilities;”
- Goodwill, and intangible assets, net to a single line; and
- Deferred contract costs with “Other assets.”

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities (VIEs) in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such VIEs are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the six months ended June 30, 2018 are not necessarily indicative of the results for the entire year ending December 31, 2018.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2017. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in our December 31, 2017 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our audited consolidated financial statements for the fiscal year ended December 31, 2017.

2. Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that are both readily convertible into known amounts of cash and have a maturity of three months or less on the date of purchase. The following table provides a reconciliation of cash, cash equivalents, and restricted cash and cash equivalents reported within the accompanying consolidated balance sheets that sum to the total of the same such amounts presented in the accompanying consolidated statements of cash flows. The restricted cash and cash equivalents presented below are included in non-current “Restricted investments” in the accompanying consolidated balance sheets.

	Six Months Ended June 30,	
	2018	2017
	(In millions)	
Cash and cash equivalents	$ 3,392	$ 2,979
Restricted cash and cash equivalents	98	92
Cash and cash equivalents reported in assets held for sale	9	—
Total cash, cash equivalents, and restricted cash and cash equivalents presented in the statements of cash flows	$ 3,499	$ 3,071

Revenue Recognition

We adopted ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)* effective January 1, 2018, using the modified retrospective approach. The insurance contracts of our Health Plans segment, which segment constitutes the vast majority of our operations, are excluded from the scope of Topic 606 because the recognition of revenue under these contracts is dictated by other accounting standards governing insurance contracts. The cumulative effect of initially applying the guidance, relating entirely to our Molina Medicaid Solutions segment contracts, resulted in an immaterial impact to beginning retained earnings, as presented in the accompanying consolidated statement of stockholders' equity. Topic 606 was only applied to service contracts that were not completed as of December 31, 2017. Refer to "Molina Medicaid Solutions segment" and "Other segment" below for further information.

Health Plans segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services, and premiums collected in advance are deferred. Certain components of premium revenue are subject to accounting estimates and fall into two broad categories discussed in further detail below: 1) "Contractual Provisions That May Adjust or Limit Revenue or Profit;" and 2) "Quality Incentives." Liabilities recorded for such provisions are included in "Amounts due government agencies" in the accompanying consolidated balance sheets.

1) Contractual Provisions That May Adjust or Limit Revenue or Profit:

Medicaid

- *Medical Cost Floors (Minimums), and Medical Cost Corridors:* A portion of our premium revenue may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $144 million and $135 million at June 30, 2018 and December 31, 2017, respectively. Approximately $97 million and $96 million of the liability accrued at June 30, 2018 and December 31, 2017, respectively, relates to our participation in Medicaid Expansion programs. Refer to Note 12, "Commitments and Contingencies," for further information regarding the California Medicaid Expansion program.

- *Retroactive Premium Adjustments:* State Medicaid programs periodically adjust premium rates on a retroactive basis. In these cases, we must adjust our premium revenue in the period in which we learn of the adjustment, rather than in the months of service to which the retroactive adjustment applies.

Medicare

- *Minimum MLR:* Federal regulations have established a minimum annual medical loss ratio (Minimum MLR) of 85% for Medicare. The medical loss ratio represents medical costs as a percentage of premium revenue. Federal regulations define what constitutes medical costs and premium revenue. If the Minimum MLR is not met, we may be required to pay rebates to the federal government. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of operations.

Marketplace

- *Risk adjustment:* Under this program, our health plans' composite risk scores are compared with the overall average risk score for the relevant state and market pool. Generally, our health plans will make a risk adjustment payment into the pool if their composite risk scores are below the average risk score, and will receive a risk adjustment payment from the pool if their composite risk scores are above the average risk score. We estimate our ultimate premium based on insurance policy year-to-date experience, and recognize estimated premiums relating to the risk adjustment program as an adjustment to premium revenue in our consolidated statements of operations. As of June 30, 2018, and December 31, 2017, the Marketplace risk adjustment payable amounted to $1,159 million and $912 million, respectively. Refer to Note 12, "Commitments and Contingencies," for further information regarding recent developments in the Marketplace risk adjustment program.

- *Minimum MLR:* The Affordable Care Act (ACA) has established a Minimum MLR of 80% for the Marketplace. If the Minimum MLR is not met, we may be required to pay rebates to our Marketplace policyholders. The Marketplace risk adjustment program is taken into consideration when computing the Minimum MLR. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of operations.

2) Quality Incentives:

At many of our health plans, revenue ranging from approximately 1% to 3% of certain health plan premiums is earned only if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the periods presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of June 30, 2018 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of June 30, 2018.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
	(Dollars in millions)			
Maximum available quality incentive premium - current period	$ 47	$ 39	$ 87	$ 77
Quality incentive premium revenue recognized in current period:				
Earned current period	$ 34	$ 29	$ 58	$ 48
Earned prior periods	12	1	23	6
Total	$ 46	$ 30	$ 81	54
Quality incentive premium revenue recognized as a percentage of total premium revenue	1.0%	0.6%	0.9%	0.6%

Molina Medicaid Solutions segment

MMS is under contract with Medicaid agencies in six states and the U.S. Virgin Islands. Our existing contracts have terms that currently extend to 2018 through 2025, before renewal options. As of June 30, 2018, the aggregate amount of service revenue relating to unsatisfied performance obligations amounted to approximately $638 million.

Business process outsourcing services are billed immediately following the end of the month in which such services are performed, with payment received soon thereafter. Payments for the design, development and implementation (DDI) of Medicaid management information systems milestones are received following our performance, and the customer's acceptance, of the milestone deliverable. However, recognition of DDI revenue is deferred until the system 'go-live' date, and is amortized over the initial contract hosting period.

Other segment

Our Pathways behavioral health subsidiary's revenue is all variable, and generally invoiced after services are rendered; customer payment follows invoicing. We have concluded that there is no change to revenue recognition under Topic 606 for our Pathways behavioral health subsidiary, and therefore no impact to retained earnings effective January 1, 2018.

The following table presents the opening and closing balances of receivables, deferred contract costs (contract assets), and deferred revenue (contract liabilities) from contracts with customers, by segment.

	June 30, 2018	December 31, 2017
	(In millions)	
Receivables:		
Molina Medicaid Solutions	$ 34	$ 30
Other	40	44
Deferred contract costs (contract assets) – Molina Medicaid Solutions	109	101
Deferred revenue (contract liabilities) – Molina Medicaid Solutions	39	49

Medical Care Costs - Marketplace Cost Share Reduction (CSR) Update

During the first half of 2018, we recognized a benefit of approximately $76 million in reduced medical expense related to 2017 dates of service as a result of the federal government's confirmation that the reconciliation of 2017 Marketplace CSR subsidies would be performed on an annual basis. In the fourth quarter of 2017, we had assumed

a nine-month reconciliation of this item pending confirmation of the time period to which the 2017 reconciliation would be applied.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which generally differs from the U.S. federal statutory rate primarily because of state taxes, nondeductible expenses such as the Health Insurer Fee (HIF), certain compensation, and other general and administrative expenses. The effective tax rate was not impacted by HIF in 2017 given the 2017 HIF moratorium.

The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including projected pretax earnings, the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The Tax Cuts and Jobs Act (TCJA) was enacted on December 22, 2017. The TCJA, in part, reduced the U.S. federal statutory corporate income tax rate from 35% to 21% effective January 1, 2018. Accounting guidance allows filers one year subsequent to the end of the tax year to finalize the valuation of deferred tax assets and liabilities. At June 30, 2018, we had not completed our accounting for the tax effects resulting from enactment of TCJA with respect to valuation of our deferred tax assets and liabilities. We will continue to make and refine our calculations as additional analysis is completed. In addition, our estimates may also be affected as we gain a more thorough understanding of the tax law based on expected future guidance from the Internal Revenue Service and U.S. Treasury.

Recent Accounting Pronouncements Adopted

Revenue Recognition (Topic 606). See discussion above, in “Revenue Recognition.”

Comprehensive Income. In February 2018, the Financial Accounting Standards Board (FASB) issued ASU 2018-02, *Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*, which allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the TCJA. ASU 2018-02 is effective beginning January 1, 2019; we early adopted this ASU effective January 1, 2018. The effect of applying the guidance resulted in an immaterial impact to beginning retained earnings, as presented in the accompanying consolidated statement of stockholders’ equity.

Restricted Cash. In November 2016, the FASB issued ASU 2016-18, *Restricted Cash,* which requires us to include in our consolidated statements of cash flows the changes in the balances of cash, cash equivalents, restricted cash and restricted cash equivalents. We adopted ASU 2016-18 on January 1, 2018. We have applied the guidance retrospectively to all periods presented. Such retrospective adoption resulted in a $92 million reclassification of restricted cash and cash equivalents from “Investing activities” to the beginning and ending balances of cash and cash equivalents in our consolidated statements of cash flows for the six months ended June 30, 2017. There was no impact to our consolidated statements of operations, balance sheets, or stockholders’ equity. The reconciliation of cash and cash equivalents to cash, cash equivalents and restricted cash and cash equivalents is presented at the beginning of this note.

Recent Accounting Pronouncements Not Yet Adopted

Credit Losses. In June 2016, the FASB issued ASU 2016-13, *Measurement of Credit Losses on Financial Instruments*. Rather than generally recognizing credit losses when it is probable that the loss has been incurred, the revised guidance requires companies to recognize an allowance for credit losses for the difference between the amortized cost basis of a financial instrument and the amount of amortized cost that the company expects to collect over the instrument’s contractual life. ASU 2016-13 is effective beginning January 1, 2020, and must be adopted as a cumulative effect adjustment to retained earnings; early adoption is permitted. We are evaluating the effect of this guidance.

Leases. In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842),* as modified by ASU 2017-03, *Transition and Open Effective Date Information* and ASU 2018-10, *Codification Improvements to Topic 842, Leases*. Under ASU 2016-02, an entity will be required to recognize assets and liabilities for the rights and obligations created by leases on the entity’s balance sheet for both financing and operating leases. For leases with a term of 12 months or less, an entity may elect to not recognize lease assets and lease liabilities and expense the lease over a straight-line basis for the term of the lease. ASU 2016-02 will require new disclosures that depict the amount, timing,

and uncertainty of cash flows pertaining to an entity's leases. ASU 2016-02 must be adopted using a modified retrospective approach for annual and interim periods beginning after December 15, 2018. Early adoption is permitted. Under this guidance, we will record right of use assets and liabilities relating primarily to our long-term office leases. We are currently updating the configuration of our lease database management system for the adoption of Topic 842; we do not currently expect the adoption of this guidance to have a material effect on our consolidated results of operations, financial condition or cash flows.

3. Net Income (Loss) per Share

The following table sets forth the calculation of basic and diluted net income (loss) per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
	(In millions, except net income per share)			
Numerator:				
Net income (loss)	$ 202	$ (230)	$ 309	$ (153)
Denominator:				
Shares outstanding at the beginning of the period	61	56	59	56
Weighted-average number of shares issued:				
1.625% Exchange (1)	—	—	2	—
Denominator for basic net income per share	61	56	61	56
Effect of dilutive securities:				
1.625% Convertible Notes (1)	1	—	—	—
1.125% Warrants (1)	5	—	5	—
Denominator for diluted net income per share	67	56	66	56
Net income (loss) per share: (2)				
Basic	$ 3.29	$ (4.10)	$ 5.10	$ (2.74)
Diluted	$ 3.02	$ (4.10)	$ 4.68	$ (2.74)
Potentially dilutive common shares excluded from calculations:				
1.125% Warrants (1)	—	2	—	1

(1) For more information and definitions regarding the 1.625% Exchange and the 1.625% Convertible Notes, refer to Note 7, "Debt." For more information regarding the 1.125% Warrants, refer to Note 9, "Stockholders' Equity." The dilutive effect of all potentially dilutive common shares is calculated using the treasury stock method. Certain potentially dilutive common shares issuable are not included in the computation of diluted net income (loss) per share because to do so would be anti-dilutive. For the three and six months ended June 30, 2017, the 1.125% Warrants were not included in diluted shares outstanding because to do so would have been anti-dilutive.

(2) Source data for calculations in thousands.

4. Fair Value Measurements

We consider the carrying amounts of cash, cash equivalents and other current assets and current liabilities (not including derivatives, the current portion of long-term debt, and certain accounts reported in assets and liabilities held for sale) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to the three-tier fair value hierarchy. For a description of the methods and assumptions that we use to a) estimate the fair value; and b) determine the classification according to the fair value hierarchy for each financial instrument, see Note 4, "Fair Value Measurements," in our 2017 Annual Report on Form 10-K.

Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of June 30, 2018, included the price of our common stock, the time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 8, "Derivatives," the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of operations. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such derivative instruments is mitigated.

The net changes in fair value of Level 3 financial instruments were insignificant to our results of operations for the six months ended June 30, 2018.

Our financial instruments measured at fair value on a recurring basis at June 30, 2018, were as follows:

	Total	Quoted Market Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(In millions)		
Corporate debt securities	$ 1,382	$ —	$ 1,382	$ —
U.S. treasury notes	330	330	—	—
Government-sponsored enterprise securities (GSEs)	207	207	—	—
Municipal securities	136	—	136	—
Asset-backed securities	99	—	99	—
Certificate of deposit	19	—	19	—
Other	3	—	3	—
Subtotal - current investments	2,176	537	1,639	—
Corporate debt securities	55	—	55	—
U.S. treasury notes	25	25	—	—
Subtotal - current restricted investments	80	25	55	—
1.125% Call Option derivative asset	657	—	—	657
Total assets	$ 2,913	$ 562	$ 1,694	$ 657
1.125% Conversion Option derivative liability	$ 657	$ —	$ —	$ 657
Total liabilities	$ 657	$ —	$ —	$ 657

Our financial instruments measured at fair value on a recurring basis at December 31, 2017, were as follows:

	Total	Quoted Market Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(In millions)		
Corporate debt securities	$ 1,588	$ —	$ 1,588	$ —
U.S. treasury notes	388	388	—	—
GSEs	253	253	—	—
Municipal securities	141	—	141	—
Asset-backed securities	117	—	117	—
Certificates of deposit	37	—	37	—
Subtotal - current investments	2,524	641	1,883	—
Corporate debt securities	101	—	101	—
U.S. treasury notes	68	68	—	—
Subtotal - current restricted investments	169	68	101	—
1.125% Call Option derivative asset	522	—	—	522
Total assets	$ 3,215	$ 709	$ 1,984	$ 522
1.125% Conversion Option derivative liability	$ 522	$ —	$ —	$ 522
Total liabilities	$ 522	$ —	$ —	$ 522

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted market prices for similar securities in active markets or quoted prices for identical securities in inactive markets. The carrying amount and estimated fair value of the amount due under our Credit Facility was classified as a Level 3 financial instrument, because certain inputs used to determine its fair value were not observable. The carrying amount of the amount due under the Credit Facility as of December 31, 2017, approximated its fair value because the Credit Facility's interest rate is a variable rate that approximates rates currently available to us.

	June 30, 2018		December 31, 2017	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
		(In millions)		
5.375% Notes	$ 693	$ 706	$ 692	$ 730
1.125% Convertible Notes [1]	420	1,099	496	1,052
4.875% Notes	326	320	325	329
1.625% Convertible Notes	63	107	157	220
Credit Facility	—	—	300	300
	$ 1,502	$ 2,232	$ 1,970	$ 2,631

(1) The fair value of the 1.125% Conversion Option (the embedded cash conversion option) amounted to $657 million and $522 million as of June 30, 2018, and December 31, 2017, respectively. See further discussion at Note 7, "Debt," and Note 8, "Derivatives."

5. Investments

Available-for-Sale Investments

We consider all of our investments classified as current assets (including restricted investments) to be available-for-sale. Our 4.875% Notes, as further discussed in Note 7, "Debt," contain a limitation on the use of proceeds which required us to deposit the net proceeds from their issuance into a segregated deposit account, a current asset reported as "Restricted investments" in the accompanying consolidated balance sheets. Such proceeds, while

restricted as to their use and held in a segregated deposit account, are available-for-sale based upon our contractual liquidity requirements.

The following tables summarize our investments as of the dates indicated:

	June 30, 2018			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 1,390	$ —	$ 8	$ 1,382
U.S. treasury notes	331	—	1	330
GSEs	209	—	2	207
Municipal securities	138	—	2	136
Asset backed securities	100	—	1	99
Certificates of deposit	19	—	—	19
Other	3	—	—	3
Subtotal - current investments	2,190	—	14	2,176
Corporate debt securities	55	—	—	55
U.S. treasury notes	25	—	—	25
Subtotal - current restricted investments	80	—	—	80
	$ 2,270	$ —	$ 14	$ 2,256

	December 31, 2017			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 1,591	$ 1	$ 4	$ 1,588
U.S. treasury notes	389	—	1	388
GSEs	255	—	2	253
Municipal securities	142	—	1	141
Asset-backed securities	117	—	—	117
Certificates of deposit	37	—	—	37
Subtotal - current investments	2,531	1	8	2,524
Corporate debt securities	101	—	—	101
U.S. treasury notes	68	—	—	68
Subtotal - current restricted investments	169	—	—	169
	$ 2,700	$ 1	$ 8	$ 2,693

The contractual maturities of our available-for-sale investments as of June 30, 2018 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 1,356	$ 1,354
Due after one year through five years	914	902
	$ 2,270	$ 2,256

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the three and six months ended June 30, 2018 and 2017 were insignificant.

We have determined that unrealized losses at June 30, 2018 and December 31, 2017, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the creditworthiness of the issuers. So long as we maintain the intent and ability to hold these securities to maturity, we are unlikely to experience losses. In the event that we dispose of these securities before maturity, we expect that realized losses, if any, will be insignificant.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of June 30, 2018:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 959	$ 7	535	$ 116	$ 1	72
U.S. Treasury notes	224	1	52	—	—	—
GSEs	—	—	—	113	2	56
Municipal securities	81	1	79	40	1	52
Asset backed securities	90	1	59	—	—	—
	$ 1,354	$ 10	725	$ 269	$ 4	180

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of December 31, 2017:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 1,297	$ 3	561	$ 94	$ 1	69
U.S. Treasury Notes	470	1	89	—	—	—
GSEs	173	1	69	95	1	47
Municipal securities	—	—	—	38	1	48
	$ 1,940	$ 5	719	$ 227	$ 3	164

Held-to-Maturity Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by government authorities primarily in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. The use of these funds is limited as required by regulations in the various states in which we operate, or as needed in the event of insolvency of capitated providers. Therefore, such investments are reported as non-current “Restricted investments” in the accompanying consolidated balance sheets. We have the ability to hold these restricted investments until maturity, and as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates.

Our held-to-maturity restricted investments are carried at amortized cost, which approximates fair value. Such investments amounted to $117 million at June 30, 2018, and mature in one year or less.

6. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated:

	June 30, 2018	December 31, 2017
	(In millions)	
Fee-for-service claims incurred but not paid (IBNP)	$ 1,510	$ 1,717
Pharmacy payable	116	112
Capitation payable	49	67
Other	245	296
	$ 1,920	$ 2,192

“Other” medical claims and benefits payable includes amounts payable to certain providers for which we act as an intermediary on behalf of various government agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of operations. Non-risk provider payables amounted to $158 million and $122 million as of June 30, 2018 and December 31, 2017, respectively.

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts presented for “Components of medical care costs related to: Prior periods” represent the amounts by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Six Months Ended June 30,	
	2018	2017
	(Dollars in millions)	
Medical claims and benefits payable, beginning balance	$ 2,192	$ 1,929
Components of medical care costs related to:		
Current period	7,794	8,633
Prior periods	(222)	(31)
Total medical care costs	7,572	8,602
Change in non-risk provider payables	56	(114)
Payments for medical care costs related to:		
Current period	6,248	6,883
Prior periods	1,652	1,457
Total paid	7,900	8,340
Medical claims and benefits payable, ending balance	$ 1,920	$ 2,077

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims deviation and the accrued cost of settling those claims. Because we establish the provision for adverse claims deviation and the accrued cost of settling claims on a consistent basis every quarter, the lower cost recognized in a subsequent period if such a provision proved unnecessary would be offset by the establishment of a similar provision during that subsequent period.

Because the amount of our initial liability is an estimate, we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate—we only know when the circumstances for any one or more factors are out of the ordinary.

The differences between our original estimates and the amounts ultimately paid out for the most part relate to IBNP. While many related factors working in conjunction with one another serve to determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We believe that the most significant uncertainties surrounding our IBNP estimates at June 30, 2018 are as follows:

- Across all of our health plans, the inventory of unpaid claims increased significantly during the first half of 2017, then decreased in the last half of 2017 and into 2018. Changes in claims inventories impact the timing between date of service and the date of claim payment, increasing the volatility of our liability estimates.
- In June 2018, our Puerto Rico health plan implemented state prescribed claim billing requirements to ensure more accurate claims submissions. The billing requirements were more stringent and caused a significant number of claim denials. Although we expect providers to ultimately submit updated claims with

the required information, the impact of the new billing requirements create more uncertainty in our liability estimates.

- At our Florida health plan, a new clinical service system was implemented in the first quarter of 2018. This system impacted the reporting of inpatient authorizations used in our development of claims liabilities, which makes our liability estimates subject to more than the usual amount of uncertainty.
- We recently implemented a new process for increased quality review of claims payments in nine of our health plans. While we do not anticipate this new process will impact the percentage of claims paid within the timely turnaround requirements, we believe it will have a minor impact on the timing of some paid claims. For this reason, our liability estimates in the nine health plans are subject to more than the usual amount of uncertainty.

We recognized favorable prior period claims development in the amount of $222 million for the six months ended June 30, 2018. This amount represents our estimate as of June 30, 2018, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2017, was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation was due primarily to the following factors:

- The impact of the provision for adverse claims deviation and the accrued cost of settling claims as discussed above. Because we re-establish the provision for adverse claims deviation and the accrued cost of settling claims on a consistent basis every quarter, the impact of this item on the first half of 2018 results was minimal.
- Across all of our health plans, the inventory of unpaid claims increased significantly during the first half of 2017, then decreased in the last half of 2017. In hindsight, the impact of the changes in claims processing timing reduced our liabilities more than we had anticipated.
- December 2017 data from The Centers for Disease Control and Prevention indicated widespread influenza activity in several states in which we operate health plans. The additional liabilities established in consideration of increased claims related to a more severe influenza season turned out to be higher than our actual experience.
- In establishing our liability at December 31, 2017, we anticipated an increase in the utilization of medical services by Marketplace members concerned about the future of their healthcare coverage as a result of uncertainties related to high premium increases and issuer exits. This induced demand did not materialize to the degree we expected.

7. Debt

All of our debt is held at the parent, which is reported in the Other segment. The following table summarizes our outstanding debt obligations and their classification in the accompanying consolidated balance sheets:

	June 30, 2018	December 31, 2017
	(In millions)	
Current portion of long-term debt:		
1.125% Convertible Notes, net of unamortized discount	$ 422	$ 499
1.625% Convertible Notes, net of unamortized discount	63	157
Lease financing obligations	1	1
Debt issuance costs	(2)	(4)
	484	653
Non-current portion of long-term debt:		
5.375% Notes	700	700
4.875% Notes	330	330
Credit Facility	—	300
Debt issuance costs	(11)	(12)
	1,019	1,318
Lease financing obligations	198	198
	$ 1,701	$ 2,169

Interest cost recognized relating to our convertible senior notes for the periods presented was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
	(In millions)			
Contractual interest at coupon rate	$ 2	$ 3	$ 4	$ 6
Amortization of the discount	6	8	13	16
	$ 8	$ 11	$ 17	$ 22

Credit Facility

In January 2017, we entered into an amended unsecured $500 million revolving credit facility (Credit Facility). The Credit Facility has a term of five years and all amounts outstanding will be due and payable on January 31, 2022. In May 2018, we repaid all outstanding borrowings under the Credit Facility. As of June 30, 2018, no amounts were outstanding under the Credit Facility, and outstanding letters of credit amounting to $6 million reduced our borrowing capacity under the Credit Facility to $494 million.

Borrowings under our Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee. The Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. As of June 30, 2018, we were in compliance with all financial and non-financial covenants under the Credit Facility and other long-term debt.

Bridge Credit Agreement

In January 2018, we entered into a bridge credit agreement (Bridge Credit Agreement) with several banks. Under the Bridge Credit Agreement, we may borrow up to $550 million to: (i) satisfy conversions of our 1.125% Convertible Notes; (ii) satisfy and/or refinance indebtedness incurred to satisfy conversion of the 1.125% Convertible Notes; (iii) repay or refinance our Credit Facility; and (iv) pay fees and expenses in connection with the foregoing. Subject to the satisfaction of certain conditions, the remaining amount of any borrowing may be used for general corporate purposes.

Borrowings under the Bridge Credit Agreement are reduced by the following:

- Any future debt and/or equity transactions including term loans, but excluding any Credit Facility drawing (excluding transactions with proceeds used for working capital purposes and acquisition financings up to $300 million); and
- On August 20, 2018 (the first put date for the 1.625% Convertible Notes), the Bridge Credit Agreement shall permanently be reduced by the greater of $150 million; and the principal amount of the 1.625% Convertible Notes that are exchanged into equity or otherwise defeased on or prior to that date.

The Bridge Credit Agreement matures on January 1, 2019 and, subject to the satisfaction of certain conditions, we may elect to extend twice the initial maturity date by a period of six months each. The amount available for borrowing under the Bridge Credit Agreement at June 30, 2018, was $550 million.

Borrowings under the Bridge Credit Agreement bear interest based, at our election, at a base rate or an adjusted LIBOR rate, plus in each case the applicable margin. Our wholly owned subsidiaries that guarantee our obligations under the indenture governing the 4.875% Notes, the 5.375% Notes, and the Credit Facility have jointly and severally guaranteed our obligations under the Bridge Credit Agreement.

The Bridge Credit Agreement contains usual and customary (a) affirmative covenants for credit facilities of this type which are substantially similar to those contained in the Credit Facility, (b) negative covenants consistent with those contained in the 4.875% Notes and (c) events of default for credit facilities of this type which are substantially similar to those contained in the 4.875% Notes.

4.875% Notes due 2025

We have outstanding $330 million aggregate principal amount of senior notes (4.875% Notes) due June 15, 2025, unless earlier redeemed. Interest on the 4.875% Notes is payable semiannually in arrears on June 15 and December 15. Guarantees under the 4.875% Notes mirror those of the Credit Facility. See Note 13, “Supplemental Condensed Consolidating Financial Information,” for more information on the guarantors. The 4.875% Notes contain customary non-financial covenants and change of control provisions.

The 4.875% Notes contain a limitation on the use of proceeds which required us to deposit a portion of the net proceeds from their issuance into a segregated deposit account. These funds may be used by us as follows:

- On or prior to August 20, 2018, to:
    - Redeem, repurchase, repay, tender for, or acquire for value all or any portion of our 1.625% Convertible Notes, defined and discussed further below, or to satisfy the cash portion of any consideration due upon any conversion of the 1.625% Convertible Notes and/or
    - Pay any interest due on all or any portion of the 4.875% Notes.
- On or after August 20, 2018, to repurchase all or any portion of the 1.625% Convertible Notes that we are obligated to repurchase; and
- Subsequent to August 20, 2018 (or such earlier date in the event that there are no longer any 1.625% Convertible Notes outstanding), in any other manner not otherwise prohibited in the indenture governing the 4.875% Notes.

The investments that constitute the segregated funds are current assets reported as “Restricted investments” in the accompanying consolidated balance sheets. As a result of the 1.625% Exchange described below, approximately $94 million of such investments were transferred to unrestricted current investments in the first quarter of 2018. As of June 30, 2018, the balance of current restricted investments was $80 million.

5.375% Notes due 2022

We have outstanding $700 million aggregate principal amount of senior notes (5.375% Notes) due November 15, 2022, unless earlier redeemed. Interest on the 5.375% Notes is payable semiannually in arrears on May 15 and November 15. Certain of our wholly owned subsidiaries guarantee our obligations under the 5.375% Notes. Such guarantees mirror those of the Credit Facility. See Note 13, “Supplemental Condensed Consolidating Financial Information,” for more information on the guarantors. The 5.375% Notes contain customary non-financial covenants and change in control provisions.

1.125% Cash Convertible Senior Notes due 2020

In June 2018, we entered into two separate, privately negotiated note purchase agreements with certain holders of our outstanding 1.125% cash convertible senior notes due January 15, 2020 (1.125% Convertible Notes). In these transactions, we repaid $96 million aggregate principal amount of the 1.125% Convertible Notes, plus accrued interest, for an aggregate cash payment of $228 million. The $132 million difference between the principal amount extinguished and our cash payment represents primarily the settlement of the fair value of the 1.125% Convertible Notes’ embedded cash conversion option feature (which is a derivative liability we refer to as the 1.125% Conversion Option). In addition, we recorded a loss on debt extinguishment of $5 million, primarily relating to the acceleration of the debt discount, which is recorded in “Other expenses (income), net” in the accompanying consolidated statements of operations. No common shares were issued in connection with these transactions.

Also in June 2018, in connection with the 1.125% Notes purchases, we entered into privately negotiated termination agreements with each of the counterparties to partially terminate the Call Spread Overlay, defined and further discussed in Notes 8, “Derivatives,” and 9, “Stockholders' Equity.”

Following the transactions described above, we have outstanding $454 million aggregate principal amount of 1.125% Convertible Notes. Interest is payable semiannually in arrears on January 15 and July 15.

The 1.125% Convertible Notes are convertible only into cash, and not into shares of our common stock or any other securities. The initial conversion rate for the 1.125% Convertible Notes is 24.5277 shares of our common stock per $1,000 principal amount, or approximately $40.77 per share of our common stock. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Convertible Notes, equal to the settlement amount, determined in the manner set forth in the indenture. We may not redeem the 1.125% Convertible Notes prior to the maturity date.

The stock price trigger for the 1.125% Convertible Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended June 30, 2018; therefore, they are convertible into cash and are reported in current portion of long-term debt as of June 30, 2018.

The 1.125% Conversion Option was separated from the 1.125% Convertible Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the 1.125% Conversion Option settles or expires. The effective interest rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued is approximately 6%. As of June 30,

2018, the 1.125% Convertible Notes had a remaining amortization period of 1.5 years. The 1.125% Convertible Notes' if-converted value exceeded their principal amount by approximately $503 million and $406 million as of June 30, 2018 and December 31, 2017, respectively.

1.625% Convertible Senior Notes due 2044

In March 2018, we entered into separate, privately negotiated, synthetic exchange agreements (1.625% Exchange) with certain holders of our outstanding 1.625% convertible senior notes due 2044 (1.625% Convertible Notes). In this transaction, we exchanged $97 million aggregate principal amount and accrued interest for 1.8 million shares of our common stock. We recorded a loss on debt extinguishment, including transaction fees, of $10 million for the transaction, primarily relating to the inducement premium paid to the bondholders, which is recorded in "Other expenses (income), net" in the accompanying consolidated statements of operations. We did not receive any proceeds from the 1.625% Exchange.

On July 11, 2018, we announced notice of our election to redeem the remaining $64 million aggregate principal amount of the 1.625% Convertible Notes on August 20, 2018 (the Redemption Date). Pursuant to the terms of the indenture, the 1.625% Convertible Notes will be redeemed for cash equal to 100% of the principal amount plus accrued and unpaid interest to, but excluding the Redemption Date (the Redemption Price).

Also pursuant to the indenture, the 1.625% Convertible Notes may be converted until August 17, 2018, at a conversion rate of 17.2157 shares of our common stock per $1,000 principal amount, or approximately $58.09 per share of our common stock. Upon conversion, we will pay cash for the principal and, if applicable, deliver shares of our common stock to the converting holders in an amount per $1,000 principal amount equal to the settlement amount (as defined in the related indenture). After August 17, 2018, holders will be entitled only to the Redemption Price.

Because the 1.625% Convertible Notes are convertible within 12 months, they are reported in current portion of long-term debt as of June 30, 2018.

From the issuance date in 2014, the expected life of the 1.625% Convertible Notes has been approximately four years, ending on the first date we may redeem the 1.625% Convertible Notes in August 2018. As of June 30, 2018, the 1.625% Convertible Notes had a remaining amortization period of 0.1 years. The effective interest rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued is approximately 5%. The outstanding 1.625% Convertible Notes' if-converted value exceeded their principal amount at June 30, 2018 and December 31, 2017 by approximately $39 million and $50 million, respectively. At June 30, 2018 and December 31, 2017, the equity component of the 1.625% Convertible Notes, including the impact of deferred taxes, was $5 million and $12 million, respectively.

Cross-Default Provisions

The indentures governing the 4.875% Notes, the 5.375% Notes, the 1.125% Convertible Notes and the 1.625% Convertible Notes contain cross-default provisions that are triggered upon default by us or any of our subsidiaries on any indebtedness in excess of the amount specified in the applicable indenture.

8. Derivatives

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the accompanying consolidated balance sheets:

	Balance Sheet Location	June 30, 2018	December 31, 2017
		(In millions)	
Derivative asset:			
1.125% Call Option	Current assets: Derivative asset	$ 657	$ 522
Derivative liability:			
1.125% Conversion Option	Current liabilities: Derivative liability	$ 657	$ 522

Our derivative financial instruments do not qualify for hedge treatment; therefore, the change in fair value of these instruments is recognized immediately in our consolidated statements of operations, and reported in "Other expenses (income), net." Gains and losses for our derivative financial instruments are presented individually in the accompanying consolidated statements of cash flows, "Supplemental cash flow information."

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Convertible Notes in 2013, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Convertible Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Convertible Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Convertible Notes), these transactions are intended to offset cash payments in excess of the principal amount of the 1.125% Convertible Notes due upon any conversion of such notes.

In June 2018, in connection with the 1.125% Convertible Notes purchases (described in Note 7, “Debt”), we entered into privately negotiated termination agreements with each of the Counterparties to partially terminate the Call Spread Overlay, in notional amounts corresponding to the aggregate principal amount of the 1.125% Convertible Notes purchased. This resulted in our receipt of $134 million for the settlement of the 1.125% Call Option (which is a derivative asset), and the payment of $113 million for the partial termination of the 1.125% Warrants, for an aggregate net cash receipt of $21 million from the Counterparties.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 4, “Fair Value Measurements.”

1.125% Conversion Option. The embedded cash conversion option within the 1.125% Convertible Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Conversion Option, refer to Note 4, “Fair Value Measurements.”

As of June 30, 2018, the 1.125% Call Option and the 1.125% Conversion Option were classified as a current asset and current liability, respectively, because the 1.125% Convertible Notes may be converted within twelve months of June 30, 2018, as described in Note 7, “Debt.”

9. Stockholders' Equity

1.625% Exchange

As described in Note 7, “Debt,” we issued 1.8 million shares of our common stock in connection with the 1.625% Exchange in March 2018.

1.125% Warrants

In connection with the Call Spread Overlay transaction described in Note 8, “Derivatives,” in 2013, we issued 13.5 million warrants with a strike price of $53.8475 per share. Under certain circumstances, beginning in April 2020, if the price of our common stock exceeds the strike price of the 1.125% Warrants, we will be obligated to issue shares of our common stock subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock exceeds the applicable strike price of the 1.125% Warrants. Refer to Note 3, “Net Income (Loss) per Share,” for dilution information for the periods presented. We will not receive any additional proceeds if the 1.125% Warrants are exercised.

As described in Note 8, “Derivatives,” in June 2018, we entered into privately negotiated termination agreements with each of the Counterparties to partially terminate the Call Spread Overlay, in notional amounts corresponding to the aggregate principal amount of the 1.125% Convertible Notes purchased. We paid $113 million to the Counterparties for the termination of 2.4 million of the 1.125% Warrants outstanding, which resulted in a reduction of additional paid-in capital for the same amount. Following this transaction, 11.1 million of the 1.125% Warrants remain outstanding.

Share-Based Compensation

In connection with our equity incentive plans and employee stock purchase plan, approximately 276,000 shares of common stock vested or were purchased, net of shares used to settle employees’ income tax obligations, during the six months ended June 30, 2018.

We record share-based compensation as “General and administrative expenses” in the accompanying consolidated statements of operations. As of June 30, 2018, there was $46 million of total unrecognized compensation expense

related to unvested restricted stock awards (RSAs), performance stock awards (PSAs), and performance stock units (PSUs), which we expect to recognize over a remaining weighted-average period of 3.1 years, 0.7 years and 2.6 years, respectively. This unrecognized compensation cost assumes an estimated forfeiture rate of 10.8% for non-executive employees as of June 30, 2018.

Also as of June 30, 2018, there was $12 million of total unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 2.3 years. No stock options were granted or exercised in the six months ended June 30, 2018.

Activity for RSAs, PSAs and PSUs, for the six months ended June 30, 2018, is summarized below:

	Restricted Stock Awards	Performance Stock Awards	Performance Stock Units	Total	Weighted Average Grant Date Fair Value
Unvested balance, December 31, 2017	401,804	84,762	91,828	578,394	$ 58.35
Granted	346,491	—	211,969	558,460	73.43
Vested	(183,595)	(32,929)	—	(216,524)	57.04
Forfeited	(124,690)	(48,701)	(101,320)	(274,711)	63.38
Unvested balance, June 30, 2018	440,010	3,132	202,477	645,619	69.69

The aggregate fair values of RSAs, PSAs and PSUs granted and vested are presented in the following table:

	Six Months Ended June 30,	
	2018	2017
	(In millions)	
Granted:		
Restricted stock awards	$ 25	$ 19
Performance stock units	16	16
	$ 41	$ 35
Vested:		
Restricted stock awards	$ 14	$ 20
Performance stock awards	3	15
Performance stock units	—	9
	$ 17	$ 44

10. Restructuring and Separation Costs

Following a management-initiated, broad operational assessment in early 2017, our board of directors approved, and we committed to, a comprehensive restructuring and profitability improvement plan in June 2017 (the 2017 Restructuring Plan). Key activities under this plan to date have included:

- Streamlining of our organizational structure to eliminate redundant layers of management, consolidate regional support services, and other staff reductions to improve efficiency and the speed and quality of decision making;
- Re-design of core operating processes such as provider payment, utilization management, quality monitoring and improvement, and information technology, to achieve more effective and cost-efficient outcomes;
- Remediation of high-cost provider contracts and enhancement of high quality, cost-effective networks;
- Restructuring, including selective exits, of direct delivery operations; and
- Partnering with the lowest-cost, most effective vendors.

Costs Incurred

In our 2017 Annual Report on Form 10-K, we reported that we had incurred substantially all of the costs associated with the 2017 Restructuring Plan in 2017, amounting to $234 million. In the first half of 2018, we incurred an

additional $33 million in such costs, primarily as a result of our further evaluation and write-off of a utilization and care management project terminated because of its inconsistency with the goals of the 2017 Restructuring Plan. We also recorded nominal amounts for one-time termination benefits, true-ups of certain lease contract termination costs, and consulting fees recorded in 2017. As of June 30, 2018, we had incurred $267 million in total costs under the 2017 Restructuring Plan; we expect to complete all activities under the 2017 Restructuring Plan in 2018, with the exception of the cash settlement of lease termination liabilities. We expect to continue to settle those liabilities through 2025, unless the leases are terminated sooner.

Restructuring and separation costs are reported by the same name in the accompanying consolidated statements of operations. The following tables present the major types of such costs by segment. Current and long-lived assets include current and non-current capitalized project costs, and capitalized software determined to be unrecoverable.

	Three Months Ended June 30, 2018				
		Other Restructuring Costs			
	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)				
Health Plans	$ (1)	$ —	$ —	$ 9	$ 8
	$ (1)	$ —	$ —	$ 9	$ 8

	Six Months Ended June 30, 2018				
		Other Restructuring Costs			
	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)				
Health Plans	$ —	$ (1)	$ —	$ 8	$ 7
Other	5	20	1	—	26
	$ 5	$ 19	$ 1	$ 8	$ 33

	Three Months and Six Months Ended June 30, 2017					
			Other Restructuring Costs			
	Separation Costs - Former Executives	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)					
Other	$ 35	$ —	$ —	$ 8	$ —	$ 43
	$ 35	$ —	$ —	$ 8	$ —	$ 43

As of June 30, 2018, we had incurred cumulative restructuring costs under the 2017 Restructuring Plan as follows:

			Other Restructuring Costs			
	Separation Costs - Former Executives	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)					
Health Plans	$ —	$ 33	$ 15	$ —	$ 32	$ 80
Molina Medicaid Solutions	—	—	8	—	—	8
Other	36	39	57	45	2	179
	$ 36	$ 72	$ 80	$ 45	$ 34	$ 267

Reconciliation of Liability

For those restructuring and separation costs that require cash settlement (primarily separation costs, one-time termination benefits, consulting fees and contract termination costs), the following table presents a roll-forward of

the accrued liability, which is reported in "Accounts payable and accrued liabilities" in the accompanying consolidated balance sheets. The adjustments are due to true-ups of costs recorded in 2017.

	Separation Costs - Former Executives	One-Time Termination Benefits	Other Restructuring Costs	Total
		(In millions)		
Accrued as of December 31, 2017	$ 2	$ 11	$ 35	$ 48
Adjustments	—	(1)	8	7
Charges	—	6	2	8
Cash payments	(2)	(15)	(13)	(30)
Accrued as of June 30, 2018	$ —	$ 1	$ 32	$ 33

11. Segments

We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment. Our reportable segments are consistent with how we currently manage the business and view the markets we serve.

Recent Developments – Molina Medicaid Solutions Segment

In late 2017, as part of the 2017 Restructuring Plan, management decided to pursue the divestiture of MMS.

In June 2018, we entered into a definitive agreement to sell Molina Medicaid Solutions (MMS) to DXC Technology Company. The divestiture, expected to close in the third quarter of 2018, is subject to the satisfaction of customary closing conditions and the receipt of certain third party consents and regulatory approvals. We expect the net cash selling price for the equity interests of MMS to approximate $220 million after certain adjustments.

As of June 30, 2018, Molina Medicaid Solutions' major classes of assets and liabilities were as follows:

	(In millions)
Cash and cash equivalents	$ 9
Receivables and prepaid expenses	41
Goodwill and property, equipment, and capitalized software, net	70
Deferred contract costs and other assets	110
Total assets held for sale	$ 230

Accounts payable and accrued and other liabilities	$ 27
Deferred revenue	39
Total liabilities held for sale	$ 66

Description of Earnings Measures for Reportable Segments

Gross margin is the appropriate earnings measure for our reportable segments, based on how our chief operating decision maker currently reviews results, assesses performance, and allocates resources.

Gross margin for our Health Plans segment is referred to as "Medical margin," and for our Molina Medicaid Solutions and Other segments, as "Service margin." Medical margin represents the amount earned by the Health Plans segment after medical care costs are deducted from premium revenue. The medical care ratio represents medical care costs as a percentage of premium revenue, and is one of the key metrics used to assess the performance of the Health Plans segment. Therefore, the underlying medical margin is the most important measure of earnings reviewed by the chief operating decision maker. The service margin is equal to service revenue minus cost of service revenue.

The following table presents total revenue by segment. Inter-segment revenue was insignificant for all periods presented.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
	(In millions)			
Total revenue:				
Health Plans	$ 4,752	$ 4,868	$ 9,261	$ 9,639
Molina Medicaid Solutions	48	47	99	93
Other	83	84	169	171
Consolidated	$ 4,883	$ 4,999	$ 9,529	$ 9,903

The following table reconciles gross margin by segment to consolidated income (loss) before income taxes:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
	(In millions)			
Gross margin:				
Health Plans	$ 664	$ 249	$ 1,265	$ 786
Molina Medicaid Solutions	4	4	12	8
Other	5	1	11	6
Total gross margin	673	254	1,288	800
Add: other operating revenues [1]	242	130	431	255
Less: other operating expenses [2]	(573)	(671)	(1,155)	(1,260)
Operating income (loss)	342	(287)	564	(205)
Other expenses (income), net	37	27	80	(22)
Income (loss) before income taxes	$ 305	$ (314)	$ 484	$ (183)

(1) Other operating revenues include premium tax revenue, health insurer fees reimbursed, and investment income and other revenue.

(2) Other operating expenses include general and administrative expenses, premium tax expenses, health insurer fees, depreciation and amortization, impairment losses, and restructuring and separation costs.

12. Commitments and Contingencies

Marketplace Risk Adjustment Program

On July 7, 2018, the Centers for Medicare and Medicaid Services (CMS) announced that a February 28, 2018 ruling in the U.S. District Court for the District of New Mexico prevents CMS from making further collections or payments under the risk adjustment program, including amounts for the 2017 benefit year, until the litigation is resolved. In light of a contrary decision by the U.S. District Court for the District of Massachusetts, the government moved the New Mexico district court to reconsider its decision, and CMS is currently awaiting the court's ruling. On July 30, 2018, CMS published in the Federal Register the final rule that reissues, with additional policy explanation, the risk adjustment methodology that CMS had previously established. Due to the reissuance of the rule, the risk adjustment program for the 2017 benefit year will proceed, with solely a one-month delay — from August 2018 to September 2018 — in collection settlement.

As reported in Note 2, "Significant Accounting Policies," our Marketplace risk adjustment payable amounted to $1,159 million as of June 30, 2018, and is reported in "Amounts due government agencies" in the accompanying consolidated balance sheets.

California Medicaid Expansion Risk Corridor

In the second quarter of 2018, California health plans participating in the Medicaid Expansion program received unofficial and unverified information that CMS did not approve premium rates for the state fiscal year ended June 30, 2017. It is our understanding that, as a condition of approving the rates, CMS may require the application of a risk corridor similar to the risk corridor that was in effect for periods prior to July 2016. The risk corridor for that prior period applied a minimum medical loss ratio (MLR) of 85% and a maximum MLR of 95%. It is our understanding that the state of California is currently evaluating what actions it will take, if any, with respect to the 2016-2017 rates

and risk corridor issue. The potential impact of retroactively reinstating a minimum MLR requirement, if effected, would be a reduction to premium revenue relating to 2016 and 2017. Such an adjustment for these prior periods, if effected, could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Regulatory Capital Requirements and Dividend Restrictions

Our health plans are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations, and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based on current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $2,008 million at June 30, 2018, and $1,691 million at December 31, 2017. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company—Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to approximately $350 million and $696 million as of June 30, 2018 and December 31, 2017, respectively.

As of June 30, 2018, our health plans had aggregate statutory capital and surplus of approximately $2,152 million compared with the required minimum aggregate statutory capital and surplus of approximately $1,180 million. All of our health plans were in compliance with the minimum capital requirements at June 30, 2018. We have the ability, and have committed to provide, additional capital to each of our health plans as necessary to ensure compliance with statutory capital and surplus requirements.

Legal Proceedings

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly funded programs, and the repayment of previously collected revenues.

In the ordinary course of business we are involved in legal actions, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and reasonably estimable, but the outcome of legal actions is inherently uncertain and our estimates of such losses could change as a result of further developments of these matters. For certain pending matters, accruals have not been established because such matters have not progressed sufficiently through discovery or factual development to enable us to reasonably estimate a range of possible loss. An adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Steamfitters Local 449 Pension Plan v. Molina Healthcare, Inc, et al. On April 27, 2018, the Steamfitters Local 449 Pension Plan filed a class action securities complaint in the Central District Court of California against the Company and its former executive officers, J. Mario Molina, John C. Molina, Terry P. Bayer, and Rick Hopfer, Case 2:18-cv-03579. The complaint purports to seek recovery on behalf of all persons or entities who purchased Molina common stock between October 31, 2014, and August 2, 2017, for alleged violations under Sections 10(b) and 20(a) of the Securities Exchange Act and Rule 10b-5 promulgated thereunder. The plaintiff alleges the defendants misled investors regarding the scalability of the Company's administrative infrastructure during the identified class period. The Company believes it has meritorious defenses to the alleged claims and intends to defend the matter vigorously.

States' Budgets

Nearly all of our premium revenues come from the joint federal and state funding of the Medicaid and Children's Health Insurance Program (CHIP) programs. The states and Commonwealth in which we operate our health plans regularly face significant budgetary pressures.

13. Supplemental Condensed Consolidating Financial Information

As discussed in Note 7, "Debt," we have outstanding $700 million aggregate principal amount of 5.375% Notes due November 15, 2022, unless earlier redeemed. The 5.375% Notes were registered in September 2016, and are fully

and unconditionally guaranteed by certain of our wholly owned subsidiaries on a joint and several basis, with exceptions considered customary for such guarantees.

For all periods presented, the following condensed consolidating financial statements present Molina Healthcare, Inc. (as "Parent Guarantor"), the subsidiary guarantors (as "Other Guarantors"), the subsidiary non-guarantors (as "Non-Guarantors") and "Eliminations", according to the guarantor structure as assessed as of and for the six months ended June 30, 2018.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (MD&A)

FORWARD-LOOKING STATEMENTS

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements included in this quarterly report, other than statements of historical fact, may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, or expected. Those known risks and uncertainties include, but are not limited to, the following:

- *the success of the Company's profit improvement and maintenance initiatives, including the timing and amounts of the benefits realized, and administrative and medical cost savings achieved;*
- *the numerous political and market-based uncertainties associated with the Affordable Care Act (the "ACA") or "Obamacare;"*
- *the market dynamics surrounding the ACA Marketplaces, including but not limited to uncertainties associated with risk adjustment requirements, the potential for disproportionate enrollment of higher acuity members, the discontinuation of premium tax credits, and the adequacy of agreed rates;*
- *subsequent adjustments to reported premium revenue based upon subsequent developments or new information, including changes to estimated amounts payable or receivable related to Marketplace risk adjustment;*
- *effective management of the Company's medical costs;*
- *the Company's ability to predict with a reasonable degree of accuracy utilization rates, including utilization rates associated with seasonal flu patterns or other newly emergent diseases;*
- *significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;*
- *the full reimbursement of the ACA health insurer fee, or HIF;*
- *the success of the Company's efforts to retain existing or awarded government contracts, including those in New Mexico and Texas, and those for Regions 8 and 11 in Florida, including the success of any protest filings or defenses;*
- *the Company's ability to manage its operations, including maintaining and creating adequate internal systems and controls relating to authorizations, approvals, provider payments, and the overall success of its care management initiatives;*
- *the Company's ability to consummate and realize benefits from divestitures and acquisitions, including the timely closing of the MMS divestiture;*
- *the Company's receipt of adequate premium rates to support increasing pharmacy costs, including costs associated with specialty drugs and costs resulting from formulary changes that allow the option of higher-priced non-generic drugs;*
- *the Company's ability to operate profitably in an environment where the trend in premium rate increases lags behind the trend in increasing medical costs;*
- *the interpretation and implementation of federal or state medical cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit sharing arrangements, and risk adjustment provisions and requirements;*
- *the Company's estimates of amounts owed for such cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit-sharing arrangements, and risk adjustment provisions;*

- *the Medicaid expansion medical cost corridors in California, New Mexico, and Washington, and any other retroactive adjustment to revenue where methodologies and procedures are subject to interpretation or dependent upon information about the health status of participants other than Molina members;*
- *the interpretation and implementation of at-risk premium rules and state contract performance requirements regarding the achievement of certain quality measures, and the Company's ability to recognize revenue amounts associated therewith;*
- *cyber-attacks or other privacy or data security incidents resulting in an inadvertent unauthorized disclosure of protected health information;*
- *the success of the Company's health plan in Puerto Rico, including the resolution of the debt crisis and the effect of the PROMESA law, and the impact of any future significant weather events;*
- *the success and renewal of the Company's duals demonstration programs in California, Illinois, Michigan, Ohio, South Carolina, and Texas;*
- *the accurate estimation of incurred but not reported or paid medical costs across the Company's health plans;*
- *efforts by states to recoup previously paid and recognized premium amounts;*
- *complications, member confusion, or enrollment backlogs related to the annual renewal of Medicaid coverage;*
- *government audits and reviews, or potential investigations, and any fine, sanction, enrollment freeze, monitoring program, or premium recovery that may result therefrom;*
- *changes with respect to the Company's provider contracts and the loss of providers;*
- *approval by state regulators of dividends and distributions by the Company's health plan subsidiaries;*
- *changes in funding under the Company's contracts as a result of regulatory changes, programmatic adjustments, or other reforms;*
- *high dollar claims related to catastrophic illness;*
- *the favorable resolution of litigation, arbitration, or administrative proceedings, including litigation involving the ACA to which we ourselves are not a direct party;*
- *the relatively small number of states in which we operate health plans, including the greater scale and revenues of the Company's California, Ohio, Texas, and Washington health plans;*
- *the availability of adequate financing on acceptable terms to fund and capitalize the Company's expansion and growth, repay the Company's outstanding indebtedness at maturity and meet its liquidity needs, including the interest expense and other costs associated with such financing;*
- *the Company's failure to comply with the financial or other covenants in its credit agreements or the indentures governing its outstanding notes;*
- *the sufficiency of the Company's funds on hand to pay the amounts due upon conversion or maturity of its outstanding notes;*
- *the failure of a state in which we operate to renew its federal Medicaid waiver;*
- *changes generally affecting the managed care or Medicaid management information systems industries;*
- *increases in government surcharges, taxes, and assessments, including but not limited to the deductibility of certain compensation costs;*
- *newly emergent viruses or widespread epidemics, public catastrophes or terrorist attacks, and associated public alarm;*
- *the unexpected loss of the leadership of one or more of our senior executives; and*
- *increasing competition and consolidation in the Medicaid industry;*

Readers should refer to the section entitled "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2017 for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This Quarterly Report on Form 10-Q and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2017.

ABOUT MOLINA HEALTHCARE

OUR MISSION IS TO PROVIDE QUALITY HEALTHCARE TO PEOPLE RECEIVING GOVERNMENT ASSISTANCE.

Molina Healthcare, Inc. provides quality managed health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

OVERVIEW

KEY PERFORMANCE INDICATORS

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
	(In millions, except per-share amounts)			
Ending total membership	4.1	4.7	4.1	4.7
Premium revenue	$ 4,514	$ 4,740	$ 8,837	$ 9,388
Health Plans segment medical margin (1)	$ 664	$ 249	$ 1,265	$ 786
Operating income (loss)	$ 342	$ (287)	$ 564	$ (205)
Net income (loss)	$ 202	$ (230)	$ 309	$ (153)
Net income (loss) per diluted share	$ 3.02	$ (4.10)	$ 4.68	$ (2.74)
Diluted weighted average shares outstanding	66.7	56.2	66.0	56.1
Adjusted net income (loss) per diluted share*	$ 3.08	$ (4.01)	$ 4.80	$ (2.55)
EBITDA*	$ 370	$ (243)	$ 616	$ (40)
Operating Statistics:				
MCR (2)	85.3%	94.8 %	85.7%	91.6 %
G&A ratio (3)	6.9%	8.1 %	7.2%	8.5 %
Premium tax ratio (2)	2.3%	2.4 %	2.3%	2.3 %
Effective income tax rate	33.8%	26.8 %	36.2%	16.0 %
Net profit (loss) margin (3)	4.1%	(4.6)%	3.2%	(1.5)%

(1) Medical margin is equal to premium revenue minus medical care costs.
(2) MCR represents medical care costs as a percentage of premium revenue; premium tax ratio represents premium tax expenses as a percentage of premium revenue plus premium tax revenue.
(3) G&A ratio represents general and administrative expenses as a percentage of total revenue. Net profit margin represents net income as a percentage of total revenue.

Non-GAAP Financial Measures

We use non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance to the performance of other public companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not as substitutes for or superior to, GAAP measures.

See further information regarding non-GAAP measures in the “Supplemental Information” section of this MD&A, including the reconciliations to U.S. GAAP. Non-GAAP financial measures referred to in this report are designated with an asterisk (*).

CONSOLIDATED RESULTS

Three Months Ended June 30, 2018 Compared with Three Months Ended June 30, 2017

Net income for the second quarter of 2018 was $202 million, compared with a net loss of $230 million for the second quarter of 2017. Net income per diluted share was $3.02 for the second quarter of 2018, compared with net loss per diluted share of $4.10 reported for the second quarter of 2017.

Premium revenue decreased approximately 5%, or $226 million, in the second quarter of 2018, when compared with the second quarter of 2017. Member months declined 14%, partially offset by a PMPM revenue increase of 9%. Lower premium revenue was driven by a decrease in Marketplace membership, partially offset by Marketplace premium rate increases.

Overall, the medical care ratio improved to 85.3%, from 94.8% in the second quarter of 2017. See further discussion below in “Financial Performance by Program.”

Medical margin increased 167% in the second quarter of 2018, compared with the second quarter of 2017.

The general and administrative (G&A) expense ratio decreased to 6.9%, from 8.1% in the second quarter of 2017. Excluding the impact of Marketplace broker commissions and exchange fees in both periods, the G&A ratio decreased to 6.2%, from 6.7% in the second quarter of 2017. This year-over-year improvement was primarily the result of our efforts to reduce G&A costs under the 2017 Restructuring Plan.

Six Months Ended June 30, 2018 Compared with Six Months Ended June 30, 2017

Net income for the six months ended June 30, 2018 was $309 million, compared with a net loss of $153 million for the six months ended June 30, 2017. Net income per diluted share was $4.68 in the six months ended June 30, 2018, compared with net loss per diluted share of $2.74 reported in the six months ended June 30, 2017.

Premium revenue decreased approximately 6%, or $551 million, in the six months ended June 30, 2018, when compared with the six months ended June 30, 2017. Member months declined 13%, partially offset by a revenue PMPM increase of 7%, primarily relating to Marketplace membership as noted above.

Overall, the medical care ratio improved to 85.7%, from 91.6% in the six months ended June 30, 2017. See further discussion below in “Financial Performance by Program.”

Medical margin increased 61% in the six months ended June 30, 2018, compared with the six months ended June 30, 2017.

Approximately $8 million ($0.10 per diluted share) and $33 million ($0.39 per diluted share) of restructuring costs were recognized in the second quarter and six months ended June 30, 2018, respectively. For more information, refer to Notes to Consolidated Financial Statements, Note 10, “Restructuring and Separation Costs.”

Approximately $5 million ($0.06 per diluted share) and $15 million ($0.21 per diluted share) loss on debt extinguishment was recognized in the second quarter and six months ended June 30, 2018, respectively. For more information, refer to Notes to Consolidated Financial Statements, Note 7, “Debt.”

As presented in the table below, in the second quarter and six months ended June 30, 2017, we recorded significant medical care costs relating to prior year dates of service in excess of historical expectations, and Marketplace-related premium deficiency reserves and changes in estimates for prior year dates of service. In addition, we recorded significant impairment losses and restructuring costs under the 2017 Restructuring Plan.

Renewal of Medicaid Contracts

Year to date in 2018, we renewed Medicaid contracts in Washington, Florida and Puerto Rico as follows:

- In May 2018, our Washington health plan was selected by the Washington State Health Care Authority (HCA) to enter into a managed care contract for the eight remaining regions of the state’s Apple Health Integrated Managed Care program, in addition to the two regions previously awarded to us. We were selected by HCA for the following regions: Greater Columbia, King, North Sound, Pierce, and Spokane beginning January 1, 2019; and Salish, Thurston-Mason, and Great Rivers beginning January 1, 2020. As of June 30, 2018, we served approximately 742,000 Medicaid members in Washington, which represented premium revenue of $1,083 million for the six months ended June 30, 2018.

- In June 2018, our Florida health plan was awarded comprehensive Medicaid Managed Care contracts by the Florida Agency for Health Care Administration (AHCA) in Regions 8 and 11 of the Florida Statewide Medicaid Managed Care Invitation to Negotiate. As of June 30, 2018, we served approximately 96,000 Medicaid members

in those regions, which represented premium revenue of approximately $232 million for the six months ended June 30, 2018. Services under the new contract are expected to begin on January 1, 2019. We will be serving both the Medicaid and long-term care populations in the two regions.

- In July 2018, our Puerto Rico health plan was selected by the Puerto Rico Health Insurance Administration to be one of the organizations to administer the Commonwealth's new Medicaid Managed Care contract. Services under the new contract, currently expected to begin on November 1, 2018, would cover the entire island. The base contract runs for a period of three years with an optional one year extension. As of June 30, 2018, we served approximately 326,000 Medicaid members in the East and Southwest regions of Puerto Rico, which represented premium revenue of $370 million for the six months ended June 30, 2018.

Capital Plan Progress

In the second quarter of 2018, we repaid $300 million outstanding under the revolving credit facility. In addition, we repaid $96 million aggregate principal amount of our 1.125% Notes, and entered into privately negotiated termination agreements to partially terminate the related 1.125% Call Option and 1.125% Warrants. In the first quarter of 2018, we exchanged $97 million aggregate principal amount and accrued interest of our 1.625% Convertible Notes for 1.8 million shares of our common stock. Year to date, we have reduced the principal amount of outstanding debt by $493 million.

Sale of Molina Medicaid Solutions Segment

In June 2018, we entered into a definitive agreement to sell Molina Medicaid Solutions (MMS) to DXC Technology Company. The divestiture, expected to close in the third quarter of 2018, is subject to the satisfaction of customary closing conditions and the receipt of certain third party consents and regulatory approvals. We expect the net cash selling price for the equity interests of Molina Medicaid Solutions to approximate $220 million after certain adjustments.

Summary of Significant Items

The tables below summarize the impact of certain items significant to our financial performance in the periods presented. The individual items presented below increase (decrease) income before income tax expense.

	Three Months Ended June 30, 2018		Six Months Ended June 30, 2018	
	Amount	Per Diluted Share [1]	Amount	Per Diluted Share [1]
	(In millions, except per diluted share amounts)			
Marketplace risk adjustment, for 2017 dates of service	$ 79	$ 0.92	$ 56	$ 0.66
Marketplace cost sharing reduction (CSR) subsidies, for 2017 dates of service	6	0.07	76	0.90
Restructuring costs	(8)	(0.10)	(33)	(0.39)
Loss on debt extinguishment	(5)	(0.06)	(15)	(0.21)
	$ 72	$ 0.83	$ 84	$ 0.96

	Three Months Ended June 30, 2017		Six Months Ended June 30, 2017	
	Amount	Per Diluted Share [1]	Amount	Per Diluted Share [1]
	(In millions, except per diluted share amounts)			
Impairment losses	$ (72)	$ (1.01)	$ (72)	$ (1.02)
Losses at behavioral health subsidiary exclusive of impairment	(8)	(0.09)	(12)	(0.14)
Medical care costs related to prior year dates of service that were in excess of historical expectations	(85)	(0.95)	(74)	(0.84)
Marketplace adjustments related to risk adjustment, CSR, and other items for 2016 dates of service	(44)	(0.49)	(47)	(0.53)
Marketplace premium deficiency reserve for 2017 dates of service	(78)	(0.87)	(70)	(0.79)
Restructuring and separation costs	(43)	(0.68)	(43)	(0.68)
Fee received for terminated acquisition	—	—	75	0.84
	$ (330)	$ (4.09)	$ (243)	$ (3.16)

(1) Except for certain items that are not deductible for tax purposes, per diluted share amounts are generally calculated at the statutory income tax rates of 22% for 2018, and 37% for 2017.

TRENDS AND UNCERTAINTIES

MEDICAID CONTRACT RE-PROCUREMENT

The following table illustrates Health Plans segment Medicaid contracts scheduled for re-procurement in the near term. While we have been notified of the Medicaid regulators' intention to re-procure the contracts, the anticipated award dates and effective dates are management's current best estimates; such dates are subject to change. Premium revenue is stated in millions.

State Health Plan	Medicaid Program(s)	Membership as of June 30, 2018	Premium Revenue Six Months Ended June 30, 2018	Anticipated Award Date	Anticipated Effective Date
Texas	ABD, MMP	99,000	$ 966	Q2 2019	6/1/2020
Texas	TANF, CHIP	127,000	159	Q1 2019	1/1/2020

New Mexico Health Plan Update. In our Annual Report on Form 10-K for 2017, we reported that we were notified by the New Mexico Medicaid agency that we had not been selected for a tentative award of a 2019 Medicaid contract. We filed a brief in support of our judicial protest on July 20, 2018, with proposed protest hearing dates set for September 2018, and a decision expected in or around October 2018. In the interim, a temporary stay allows us to participate in the readiness review process for the new contract award. We are continuing to manage the business in run-off until such time as a different outcome is determined.

Ohio Health Plan MMP Update. In July 2018, the Ohio Medicaid agency submitted a request to Centers for Medicare and Medicaid Services (CMS) for a three-year extension of the MyCare Ohio Duals Demonstration program, through December 31, 2022. The current authority for the program ends December 31, 2019. We estimate annualized premium revenues of approximately $680 million in 2018 under the Ohio MMP program.

PRESSURES ON MEDICAID FUNDING

Currently, there are a number of different legislative proposals being considered, some of which would involve significantly reduced federal spending on the Medicaid program and constitute a fundamental change in the federal role in health care. These proposals include elements such as the following:

- Ending the entitlement nature of Medicaid by capping future increases in federal health spending for these programs, and shifting more of the risk for health costs in the future to states and consumers;
- Reversing the ACA's expansion of Medicaid that enables states to cover low-income childless adults;
- Changing Medicaid to a state block grant program, including potentially capping spending on a per-enrollee

basis (a “per capita cap”);

- Requiring Medicaid beneficiaries to work;
- Limiting the amount of lifetime benefits for Medicaid beneficiaries; and
- Numerous other potential changes and reforms.

ACA AND THE MARKETPLACE

The future of the Affordable Care Act (ACA) and its underlying programs, including the Marketplace, are subject to substantial uncertainty. Effective January 1, 2018, we have:

- Exited the Utah and Wisconsin Marketplaces. We are currently evaluating the re-entry into these markets in 2019;
- Reduced the scope of our Washington state Marketplace participation;
- Increased premiums averaging 58%;
- Mitigated our exposure to uncertainties relating to cost share reduction (CSR) funding and reconciliation; and
- Adjusted broker commissions to market rates.

Effective January 2019, we have filed rates in nine Marketplace states, including the Utah and Wisconsin Marketplaces.

REPORTABLE SEGMENTS

HOW WE ASSESS PERFORMANCE

We derive our revenues primarily from health insurance premiums, and our primary customers are state Medicaid agencies and the federal government.

One of the key metrics used to assess the performance of our most significant segment, the Health Plans segment, is the medical care ratio (MCR). The MCR represents medical care costs as a percentage of premium revenue. Therefore, the underlying gross margin, or the amount earned by the Health Plans segment after medical costs are deducted from premium revenue, is the most important measure of earnings reviewed by management.

Gross margin for our Health Plans segment is referred to as “Medical margin,” and for our Molina Medicaid Solutions and Other segments, as “Service margin.” The service margin is equal to service revenue minus cost of service revenue. Management’s discussion and analysis of the changes in the individual components of medical margin and service margin follows.

SEGMENT SUMMARY

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
	(In millions)			
Health Plans segment medical margin [1]	$ 664	$ 249	$ 1,265	$ 786
Molina Medicaid Solutions segment service margin [2]	4	4	12	8
Other segment service margin [2]	5	1	11	6
	673	254	$ 1,288	$ 800
Health Plans segment medical care ratio	85.3%	94.8%	85.7%	91.6%

(1) Represents premium revenue minus medical care costs.
(2) Represents service revenue minus cost of service revenue.

HEALTH PLANS

The Health Plans segment consists of health plans operating in 13 states and the Commonwealth of Puerto Rico. As of June 30, 2018, these health plans served approximately 4.1 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Marketplace members, most of whom receive government premium subsidies.

BUSINESS OVERVIEW

Health Plans Membership

The following tables set forth our Health Plans membership as of the dates indicated:

	June 30, 2018	December 31, 2017	June 30, 2017
Ending Membership by Program:			
Temporary Assistance for Needy Families (TANF) and Children's Health Insurance Program (CHIP)	2,464,000	2,457,000	2,517,000
Medicaid Expansion	675,000	668,000	678,000
Aged, Blind or Disabled (ABD)	415,000	412,000	408,000
Total Medicaid	3,554,000	3,537,000	3,603,000
Medicare-Medicaid Plan (MMP) – Integrated [1]	55,000	57,000	54,000
Medicare Special Needs Plans (Medicare)	45,000	44,000	44,000
Total Medicare	100,000	101,000	98,000
Total Medicaid and Medicare	3,654,000	3,638,000	3,701,000
Marketplace	409,000	815,000	949,000
	4,063,000	4,453,000	4,650,000
Ending Membership by Health Plan:			
California	639,000	746,000	766,000
Florida	398,000	625,000	672,000
Illinois	219,000	165,000	163,000
Michigan	397,000	398,000	414,000
New Mexico	241,000	253,000	266,000
Ohio	320,000	327,000	351,000
Puerto Rico	326,000	314,000	322,000
South Carolina	114,000	116,000	112,000
Texas	450,000	430,000	465,000
Washington	776,000	777,000	788,000
Other [2]	183,000	302,000	331,000
	4,063,000	4,453,000	4,650,000

(1) MMP members receive both Medicaid and Medicare coverage from Molina Healthcare.
(2) "Other" includes the Idaho, New York, Utah and Wisconsin health plans, which are not individually significant to our consolidated operating results.

Premiums by Program

The amount of the premiums paid to our health plans vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program on a per member per month (PMPM) basis, for the six months ended June 30, 2018. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	PMPM Premiums		
	Low	High	Consolidated
TANF and CHIP	$ 120.00	$ 330.00	$ 190.00
Medicaid Expansion	320.00	500.00	370.00
ABD	530.00	1,510.00	1,020.00
MMP – Integrated	1,360.00	3,180.00	2,180.00
Medicare	690.00	1,300.00	1,180.00
Marketplace	250.00	650.00	370.00

FINANCIAL PERFORMANCE BY PROGRAM

The following tables summarize member months, premium revenue, medical care costs, medical care ratio and medical margin by program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

	Three Months Ended June 30, 2018						
	Member Months [1]	Premium Revenue		Medical Care Costs		MCR [2]	Medical Margin
		Total	PMPM	Total	PMPM		
TANF and CHIP	7.5	$ 1,393	$ 186.18	$ 1,205	$ 161.13	86.5%	$ 188
Medicaid Expansion	2.1	761	372.04	676	330.83	88.9	85
ABD	1.3	1,288	1,033.34	1,209	969.27	93.8	79
Total Medicaid	10.9	3,442	319.52	3,090	286.89	89.8	352
MMP	0.1	367	2,224.30	313	1,893.91	85.1	54
Medicare	0.2	157	1,168.40	133	989.33	84.7	24
Total Medicare	0.3	524	1,751.49	446	1,488.85	85.0	78
Total Medicaid and Medicare	11.2	3,966	358.23	3,536	319.37	89.2	430
Marketplace	1.2	548	440.93	314	253.04	57.4	234
	12.4	$ 4,514	$ 366.57	$ 3,850	$ 312.68	85.3%	$ 664

	Three Months Ended June 30, 2017						
	Member Months [1]	Premium Revenue		Medical Care Costs		MCR [2]	Medical Margin
		Total	PMPM	Total	PMPM		
TANF and CHIP	7.6	$ 1,391	$ 182.47	$ 1,315	$ 172.48	94.5%	$ 76
Medicaid Expansion	2.1	786	383.07	689	335.26	87.5	97

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) "MCR" represents medical costs as a percentage of premium revenue.

Overall

Medical care costs as a percent of premium revenue improved to 85.3% in the second quarter of 2018, from 94.8% in the second quarter of 2017. Excluding the Marketplace risk adjustments and cost sharing reduction (CSR) adjustments relating to prior year dates of service in both periods noted in the tables above in "Overview—Consolidated Results," the overall medical care ratio would have been 87.0% in the second quarter of 2018, and 93.9% in the second quarter of 2017.

Medical care costs as a percent of premium revenue improved to 85.7% in the six months ended June 30, 2018, from 91.6% in the six months ended June 30, 2017. Excluding the Marketplace risk adjustments and CSR adjustments relating to prior year dates of service in both periods, the overall medical care ratio would have been 87.1% in the six months ended June 30, 2018, and 91.2% in the six months ended June 30, 2017.

Medicaid

TANF and CHIP. The medical care ratio for TANF and CHIP improved to 86.5% in the second quarter of 2018, from 94.5% in the second quarter of 2017; and was 89.6% in the six months ended June 30, 2018, down from 93.8% in the six months ended June 30, 2017. The year over year improvement was primarily due to improved performance at our Illinois and Puerto Rico health plans.

Medicaid Expansion. The medical care ratio for Medicaid Expansion was 88.9% in the second quarter of 2018, up from 87.5% in the second quarter of 2017, and was 87.1% in the six months ended June 30, 2018, up from 85.9% in the six months ended June 30, 2017. These increases were primarily due to the premium reduction we received

in California in July 2017. Medicaid Expansion has generally performed well because rate adequacy has trended favorably, and membership is concentrated in our higher performing health plans, particularly California, Michigan, and Washington.

ABD. The medical care ratio for ABD improved to 93.8% in the second quarter of 2018, compared with 96.9% in the second quarter of 2017; and was 93.0% in the six months ended June 30, 2018, down from 95.7% in the six months ended June 30, 2017. The year over year improvement can be attributed to our continued advancement on key, high acuity management fundamentals.

Medicare and MMP

The medical care ratio for the combined Medicare programs improved to 85.0% in the second quarter of 2018, from 90.5% in the second quarter of 2017; and was 84.9% in the six months ended June 30, 2018, down from 89.1% in the six months ended June 30, 2017. This improvement was partly driven by the recognition of additional MMP at-risk revenue for dates of service in 2016 and 2017, because at-risk revenue is often recognized long after medical services have been provided. The Medicare business also benefited from favorable medical care trends and improved medical management of inpatient utilization for this population. Accurate and complete risk score documentation and effective management of chronic and high acuity conditions are critical to the successful management of this program for the rest of the year.

Marketplace

Lower Marketplace premium revenue was driven by a decrease in membership of over 50%, offset by premium rate increases. As previously disclosed, we increased premium rates and reduced our Marketplace presence effective January 1, 2018, as part of our overall program to improve profitability.

The medical care ratio for the Marketplace program decreased to 57.4% in the second quarter of 2018, from 101.9% in the second quarter of 2017; and was 54.4% in the six months ended June 30, 2018, down from 88.6% in the six months ended June 30, 2017.

Excluding the Marketplace risk adjustments and CSR adjustments relating to prior year dates of service in both periods, the Marketplace medical care ratio would have been 68.4% in the second quarter of 2018, compared with 96.3% in second quarter of 2017, and would have been 66.0% in the six months ended June 30, 2018, compared with 86.2% in the six months ended June 30, 2017.

FINANCIAL PERFORMANCE BY STATE

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by state health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

	28.1	$ 9,388	$ 333.68	$ 8,602	$ 305.74	91.6%	$ 786

(1) "Other" includes the Idaho, New York, Utah and Wisconsin health plans, which are not individually significant to our consolidated operating results.

MEDICAL CARE COSTS BY TYPE

The following table provides the details of consolidated medical care costs by category for the periods indicated (dollars in millions except PMPM amounts):

	Three Months Ended June 30,					
	2018			2017		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 2,861	$ 232.40	74.4%	$ 3,348	$ 238.04	74.5%
Pharmacy	567	46.05	14.7	650	46.23	14.5
Capitation	282	22.89	7.3	356	25.29	7.9
Other	140	11.34	3.6	137	9.73	3.1
	$ 3,850	$ 312.68	100.0%	$ 4,491	$ 319.29	100.0%

	Six Months Ended June 30,					
	2018			2017		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 5,606	$ 227.38	74.1%	$ 6,434	$ 228.68	74.8%
Pharmacy	1,150	46.66	15.2	1,266	45.00	14.7
Capitation	594	24.09	7.8	680	24.17	7.9
Other	222	8.98	2.9	222	7.89	2.6
	$ 7,572	$ 307.11	100.0%	$ 8,602	$ 305.74	100.0%

PREMIUM TAXES

The premium tax ratio (premium tax expense as a percentage of premium revenue plus premium tax revenue) was 2.3% in the second quarter of 2018 compared with 2.4% in the second quarter of 2017 and 2.3% in both the six months ended June 30, 2018 and 2017.

HEALTH INSURER FEES (HIF)

Health insurer fees reimbursed amounted to $104 million and $165 million, and health insurer fees amounted to $99 million and $174 million, in the second quarter of 2018 and the six months ended June 30, 2018, respectively. In the second quarter of 2018, we recognized revenue related to the reimbursement of Medicaid health insurer fees from New Mexico, New York, and Puerto Rico, because we received adequate documentation of the intent to reimburse such fees.

There were no HIF reimbursed or expensed in 2017 due to the HIF moratorium under the Consolidated Appropriations Act of 2016.

MOLINA MEDICAID SOLUTIONS

The Molina Medicaid Solutions segment provides support to state government agencies' administration of their Medicaid programs, including business processing, information technology development and administrative services.

In June 2018, we entered into a definitive agreement to sell Molina Medicaid Solutions (MMS) to DXC Technology Company. The divestiture, expected to close in the third quarter of 2018, is subject to the satisfaction of customary closing conditions and the receipt of certain third party consents and regulatory approvals.

FINANCIAL OVERVIEW

The Molina Medicaid Solutions segment service margin for the second quarter of 2018 and 2017 and for the six months ended June 30, 2018 and 2017, was insignificant.

OTHER

The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

FINANCIAL OVERVIEW

The Other segment service margin for the second quarter of 2018 and 2017 and for the six months ended June 30, 2018 and 2017, was insignificant.

OTHER CONSOLIDATED INFORMATION

GENERAL AND ADMINISTRATIVE EXPENSES

The G&A ratio decreased to 6.9% in the second quarter of 2018, compared with 8.1% in the second quarter of 2017. The G&A ratio decreased to 7.2% for the six months ended June 30, 2018, compared with 8.5% for the six months ended June 30, 2017. Refer to the discussion above, in "Consolidated Results."

IMPAIRMENT LOSSES

No impairment losses were recorded in the first half of 2018.

In the second quarter of 2017, we recorded $72 million in non-cash impairment losses for goodwill and intangibles, primarily relating to our Pathways subsidiary. In the course of developing the 2017 Restructuring Plan, we determined that future benefits to be derived from Pathways (including integration with our health plans) would be less than previously anticipated.

RESTRUCTURING AND SEPARATION COSTS

See Notes to Consolidated Financial Statements, Note 10, "Restructuring and Separation Costs."

INTEREST EXPENSE

Interest expense was $32 million for the second quarter of 2018, compared with $27 million for the second quarter of 2017. Interest expense was $65 million for the six months ended June 30, 2018, compared with $53 million for the six months ended June 30, 2017. As further described below in "Liquidity," year to date we have reduced the principal amount of outstanding debt by $493 million.

Interest expense includes non-cash interest expense relating primarily to the amortization of the discount on convertible senior notes, which amounted to $6 million and $8 million in the second quarter of 2018 and 2017, respectively and $13 million and $16 million in the six months ended June 30, 2018 and 2017, respectively. See further discussion in Notes to Consolidated Financial Statements, Note 7, "Debt."

OTHER EXPENSES (INCOME), NET

In the six months ended June 30, 2018, we recorded other expenses of $15 million due to the loss on debt extinguishment resulting from our 1.125% Convertible Notes repayments and the 1.625% Exchange. These transactions are described further in Notes to Consolidated Financial Statements, Note 7, "Debt." In February of 2017, we received a $75 million fee in connection with a terminated Medicare acquisition.

INCOME TAXES

The provision for income taxes was recorded at an effective rate of 33.8% for the second quarter of 2018, compared with a benefit of 26.8% for the second quarter of 2017, and 36.2% for the six months ended June 30, 2018, compared with a benefit of 16.0% for the six months ended June 30, 2017. The effective tax rate for 2018 differs from 2017 as a result of the reduction in the federal statutory rate from 35% to 21% under the TCJA, combined with higher non-deductible expenses in 2018 primarily related to the non-deductible HIF as a percentage of pre-tax income (loss). The HIF was not applicable in 2017 due to the 2017 HIF moratorium.

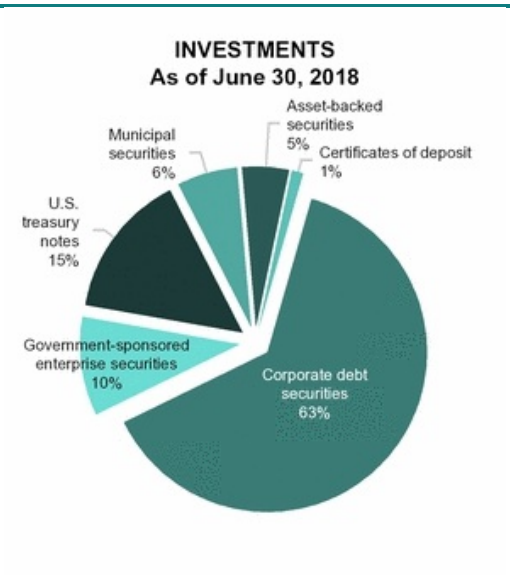
LIQUIDITY AND FINANCIAL CONDITION

INTRODUCTION

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

A majority of the assets held by our Health Plans segment regulated subsidiaries is in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board-approved investment policies that conform to applicable state laws and regulations.

Our investments are classified as current assets, except for our held-to-maturity restricted investments, which are classified as non-current assets, and which are not included in the totals below. Our held-to-maturity restricted investments are invested principally in certificates of deposit and U.S. treasury securities.



Investment income increased to $42 million for the six months ended June 30, 2018, compared with $22 million for the six months ended June 30, 2017, primarily due to increases in our average invested assets, and in our annualized portfolio yield.

MARKET RISK

Our earnings and financial position are exposed to financial market risk relating to changes in interest rates, and the resulting impact on investment income and interest expense.

Substantially all of our investments and restricted investments are subject to interest rate risk and will decrease in value if market interest rates increase. Assuming a hypothetical and immediate 1% increase in market interest rates at June 30, 2018, the fair value of our fixed income investments would decrease by approximately $19 million. Declines in interest rates over time will reduce our investment income.

For further information on fair value measurements and our investment portfolio, please refer to Notes to Consolidated Financial Statements, Note 4, “Fair Value Measurements,” and Note 5, “Investments.”

Borrowings under our Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. As of June 30, 2018, no amounts were outstanding under the Credit Facility.

LIQUIDITY

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Six Months Ended June 30,		
	2018	2017	Change
	(In millions)		
Net cash provided by operating activities	$ 314	$ 672	$ (358)
Net cash provided by (used in) investing activities	398	(846)	1,244
Net cash (used in) provided by financing activities	(503)	333	(836)
Net increase in cash, cash equivalents, and restricted cash and cash equivalents	$ 209	$ 159	$ 50

Operating Activities

Net cash provided by operating activities decreased $358 million in the six months ended June 30, 2018, compared with the six months ended June 30, 2017. Increased net income of $462 million was offset by the following:

Receivables and deferred revenue. The aggregate year-over-year change in receivables and deferred revenue reduced cash flows from operations by $293 million. Cash flows from operations in each period were impacted by the timing of premium receipts, including health insurer fees (HIF) to be reimbursed in 2018. In general, state or federal payors may delay our premium payments, which we record as a receivable, or they may prepay the following month's premium payment, which we record as deferred revenue. We typically receive capitation payments monthly; however, state or federal payors may decide to adjust their payment schedules which could positively or negatively impact our reported cash flows from operating activities in any given period. In 2018, the year-over-year effect of the timing of premiums received at our California, Florida, Ohio, and Washington health plans negatively impacted our cash flows from operating activities. In 2017, no receivables were recorded for the HIF due to the moratorium in that year.

Prepaid expenses and other current assets, and accounts payable and accrued liabilities. Each of these accounts increased significantly in the six months ended June 30, 2018, primarily due to amounts recorded in connection with the reinstatement of the HIF in 2018, with no comparable activity in 2017.

Medical claims and benefits payable. In the six months ended June 30, 2018, the change in medical claims and benefits payable decreased cash flows from operations by $415 million, primarily due to the decline in reserves resulting from reduced Marketplace membership in Florida, Utah, Washington and Wisconsin.

Amounts due government agencies. While amounts due government agencies increased $205 million in the six months ended June 30, 2018, this increase was less than the increase experienced in the six months ended June 30, 2017, resulting in a year over year reduction in cash flows from operations of $437 million. This decrease was primarily due to a decline in the amounts accrued for Marketplace CSR subsidies year over year.

Investing Activities

Investing activities were a source of cash of $398 million in the six months ended June 30, 2018, and a use of cash of $846 million in the six months ended June 30, 2017. This was primarily due to reduced purchases of investments and higher proceeds from sales and maturities of investments in the six months ended June 30, 2018, largely a result of the financing activities described below.

Financing Activities

Net cash used in financing activities increased $836 million in the six months ended June 30, 2018 compared with the six months ended June 30, 2017. The increase in cash used in the six months ended June 30, 2018 was due to the following:

- $300 million repayment the Credit Facility;
- $89 million repayment of the 1.125% Convertible Notes;
- $134 million cash paid for partial settlement of the 1.125% Conversion Option; and
- $113 million cash paid for partial termination of the 1.125% Warrants.

These uses of cash were partially offset by $134 million cash received for the settlement of a portion of the 1.125% Call Option. In the six months ended June 30, 2017, we received proceeds of $325 million from the sale of the 4.875% Notes.

FINANCIAL CONDITION

We believe that our cash resources, our borrowing capacity available under our Bridge Credit Agreement and Credit Facility as discussed further below in "Future Sources and Uses of Liquidity—Future Sources," and internally generated funds will be sufficient to support operations, regulatory requirements, debt repayment obligations and capital expenditures for at least the next 12 months.

On a consolidated basis, at June 30, 2018, our working capital was $2,207 million, compared with $1,954 million at December 31, 2017. At June 30, 2018, our cash and investments amounted to $5,767 million, compared with $6,000 million at December 31, 2017.

Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company—Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $350 million and $696 million as of June 30, 2018 and December 31, 2017, respectively.

Debt Ratings. Our 5.375% Notes are rated "BB-" by Standard & Poor's, and "B3" by Moody's Investor Service, Inc. A significant downgrade in our ratings could adversely affect our borrowing capacity and increase our borrowing costs.

Financial Covenants. Our Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. Such ratios, presented below, are computed as defined by the terms of the Credit Facility.

Credit Facility Financial Covenants	Required Per Agreement	As of June 30, 2018
Net leverage ratio	<4.0x	1.4x
Interest coverage ratio	>3.5x	9.7x

In addition, the indentures governing the 4.875% Notes, the 5.375% Notes, the 1.125% Convertible Notes and the 1.625% Convertible Notes contain cross-default provisions that are triggered upon default by us or any of our subsidiaries on any indebtedness in excess of the amount specified in the applicable indenture. Our Bridge Credit Agreement contains customary non-financial covenants. As of June 30, 2018, we were in compliance with all covenants under the Credit Facility, our Bridge Credit Agreement and the indentures governing our outstanding notes.

FUTURE SOURCES AND USES OF LIQUIDITY

Future Sources

Our Health Plans segment regulated subsidiaries generate significant cash flows from premium revenue, which we generally receive a short time before we pay for the related health care services. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity.

Dividends from Subsidiaries. When available and as permitted by applicable regulations, cash in excess of the capital needs of our regulated health plans is generally paid in the form of dividends to our unregulated parent company to be used for general corporate purposes. In the six months ended June 30, 2018, the regulated health plan subsidiaries paid $50 million in dividends to the parent, and the unregulated subsidiaries paid $10 million in dividends to the parent. In July 2018, the regulated health plan subsidiaries paid $60 million in dividends to the parent. For more information on our regulatory capital requirements and dividend restrictions, refer to Notes to Consolidated Financial Statements, Note 12, "Commitments and Contingencies—Regulatory Capital Requirements and Dividend Restrictions."

Borrowing Capacity and Debt Financing. We have available borrowing capacity of $550 million under our Bridge Credit Agreement (which amount is subject to the use of proceeds restrictions set forth in the Bridge Credit Agreement), and $494 million under our Credit Facility. In addition, we have adequate cash held in a restricted

account available to satisfy the redemption or conversion cash payments applicable to the $64 million principal balance outstanding under our 1.625% Convertible Notes, when they are redeemed or converted in the third quarter of 2018. See further discussion in the Notes to Consolidated Financial Statements, Note 7, “Debt.”

Sale of MMS. We expect the net cash selling price for the equity interests of MMS to approximate $220 million after certain adjustments. See further discussion in the Notes to Consolidated Financial Statements, Note 1, “Basis of Presentation.”

2017 Restructuring Plan. As previously disclosed, we estimate that the 2017 Restructuring Plan will reduce annualized run-rate expenses by approximately $300 million to $400 million when completed by the end of 2018. This estimate includes run-rate savings of approximately $10 million relating to actions taken in the first quarter of 2018. We expect the cost savings to reduce both “General and administrative expenses” and “Medical care costs” reported in our consolidated statements of operations. The following table illustrates our estimates of run-rate savings associated with the 2017 Restructuring Plan, which have not changed significantly since our estimate at December 31, 2017. Such savings will be offset, through the end of 2018, by the costs referred to in the Notes to Consolidated Financial Statements, Note 10, “Restructuring and Separation Costs.”

Estimated Savings Expected to be Realized by Reportable Segment	Health Plans	Other	Total
		(In millions)	
General and administrative expenses	$65	$92 to $152	$157 to $217
Medical care costs	$126 to $166	$17	$143 to $183
	$191 to $231	$109 to $169	$300 to $400

Shelf Registration Statement. We have a shelf registration statement on file with the Securities and Exchange Commission to register an unlimited amount of any combination of debt or equity securities in one or more offerings. Specific information regarding the terms and securities being offered and the use of proceeds will be provided at the time of an offering.

Future Uses

Regulatory Capital Requirements and Dividend Restrictions. In the six months ended June 30, 2018, the parent company contributed capital of $117 million to our regulated health plan subsidiaries to satisfy statutory net worth requirements.

Convertible Senior Notes. Refer to the Notes to Consolidated Financial Statements, Note 7, “Debt,” for a detailed discussion of our convertible senior notes, including recent transactions.

- 1.625% Convertible Notes. On July 11, 2018, we announced notice of our election to redeem the remaining $64 million aggregate principal amount of the 1.625% Convertible Notes on August 20, 2018 (the Redemption Date). Pursuant to the terms of the indenture, the 1.625% Convertible Notes will be redeemed for cash equal to 100% of the principal amount plus accrued and unpaid interest to, but excluding the Redemption Date (the Redemption Price).

  Also pursuant to the indenture, the 1.625% Convertible Notes may be converted until August 17, 2018, at a conversion rate of 17.2157 shares of our common stock per $1,000 principal amount, or approximately $58.09 per share of our common stock. Upon conversion, we will pay cash for the principal and, if applicable, deliver shares of our common stock to the converting holders in an amount per $1,000 principal amount equal to the settlement amount (as defined in the related indenture). After August 17, 2018, holders will be entitled only to the Redemption Price. As noted above, we have adequate cash held in a restricted account available to satisfy the redemption or conversion cash payments applicable to the $64 million principal balance outstanding under our 1.625% Convertible Notes, when they are redeemed or converted in the third quarter of 2018.
- 1.125% Convertible Notes. The principal amount of our 1.125% Convertible Notes is convertible into cash prior to its maturity date under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger. The stock price trigger for the 1.125% Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended June 30, 2018, and are convertible to cash through at least September 30, 2018. Because the 1.125% Convertible Notes may be converted into cash within 12 months, the $420 million carrying amount is reported in current portion of long-term debt as of June 30, 2018. If conversion requests are received, the settlement of the notes must be paid in cash pursuant to the terms of the relevant indentures. We have sufficient available cash, combined with borrowing capacity available under our Credit Facility and Bridge Credit Agreement, to fund conversions should they occur.

CONTRACTUAL OBLIGATIONS

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2017, was disclosed in our 2017 Annual Report on Form 10-K. Other than the financing transactions noted in the Notes to Consolidated Financial Statements, Note 7, “Debt,” there were no material changes to this previously filed information outside the ordinary course of business during the six months ended June 30, 2018.

CRITICAL ACCOUNTING ESTIMATES

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Notes to Consolidated Financial Statements, Note 6, “Medical Claims and Benefits Payable,” for a table that presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements. Other than the discussion as noted above, there have been no significant changes during the six months ended June 30, 2018, to our disclosure reported in “Critical Accounting Estimates” in our Annual Report on Form 10-K for the year ended December 31, 2017.

- *Health Plans segment contractual provisions that may adjust or limit revenue or profit*. For a discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies.”

- *Health Plans segment quality incentives*. For a discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies.”

- *Goodwill and intangible assets, net.* There have been no significant changes during the six months ended June 30, 2018, to our disclosure reported in “Critical Accounting Estimates” in our Annual Report on Form 10-K for the year ended December 31, 2017.

SUPPLEMENTAL INFORMATION

FINANCIAL MEASURES THAT SUPPLEMENT U.S. GAAP (NON-GAAP FINANCIAL MEASURES)

We use these non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance to the performance of other public companies in the health care industry.

EBITDA*

We believe that earnings before interest, taxes, depreciation and amortization (EBITDA*) is helpful in assessing our ability to meet the cash demands of our operating units.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
	(In millions)			
Net income (loss)	$ 202	$ (230)	$ 309	$ (153)
Adjustments:				
Depreciation, and amortization of intangible assets and capitalized software	33	44	67	90
Interest expense	32	27	65	53
Income tax expense (benefit)	103	(84)	175	(30)
EBITDA*	$ 370	$ (243)	$ 616	$ (40)

ADJUSTED NET INCOME (LOSS)* AND ADJUSTED NET INCOME (LOSS) PER SHARE*

We believe that adjusted net income (loss)* and adjusted net income (loss) per diluted share* are helpful in assessing our financial performance exclusive of the non-cash impact of the amortization of purchased intangibles. The following table reconciles net income (loss), which we believe to be the most comparable GAAP measure, to adjusted net income (loss)*.

	Three Months Ended June 30,				Six Months Ended June 30,			
	2018		2017		2018		2017	
	(In millions, except diluted per-share amounts)							
Net income (loss)	$ 202	$ 3.02	$ (230)	$ (4.10)	$ 309	$ 4.68	$ (153)	$ (2.74)
Adjustment:								
Amortization of intangible assets	5	0.08	8	0.14	10	0.16	17	0.30
Income tax effect [1]	(1)	(0.02)	(3)	(0.05)	(2)	(0.04)	(6)	(0.11)
Amortization of intangible assets, net of tax effect	4	0.06	5	0.09	8	0.12	11	0.19
Adjusted net income (loss)*	$ 206	$ 3.08	$ (225)	$ (4.01)	$ 317	$ 4.80	$ (142)	$ (2.55)

(1) Income tax effect of adjustments calculated at the blended federal and state statutory tax rates of 22% and 37% for 2018 and 2017, respectively.

CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures. Our management, with the participation of our chief executive officer and our chief financial officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control Over Financial Reporting. There has been no change in our internal control over financial reporting during the fiscal quarter ended June 30, 2018 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

LEGAL PROCEEDINGS

For information regarding legal proceedings, see Notes to Consolidated Financial Statements, Note 12, "Commitments and Contingencies."

RISK FACTORS

Certain risks may have a material adverse effect on our business, financial condition, cash flows, results of operations, or stock price, and you should carefully consider them before making an investment decision with respect to our securities. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2017. The risk factors described in our 2017 Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, results of operations, or stock price.

UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

ISSUER PURCHASES OF EQUITY SECURITIES

Purchases of common stock made by us, or on our behalf during the quarter ended June 30, 2018, including shares withheld by us to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased [1]	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares Authorized to Be Purchased Under the Plans or Programs
April 1 - April 30	2,528	$ 81.18	—	$ —
May 1 - May 31	—	$ —	—	$ —
June 1 - June 30	4,096	$ 85.46	—	$ —
Total	6,624	$ 83.83	—	

(1) During the three months ended June 30, 2018, we withheld 6,624 shares of common stock under our 2011 Equity Incentive Plan to settle employee income tax obligations.

INDEX TO EXHIBITS

Exhibit No.	Title	Method of Filing
2.1	Purchase and Sale Agreement, dated as of June 26, 2018, by and between Molina Healthcare, Inc. and DXC Technology Company*	Filed as Exhibit 2.1 to registrant's Form 8-K filed June 27, 2018.
3.1	Fifth Amended and Restated Bylaws of Molina Healthcare, Inc.	Filed as Exhibit 3.1 to registrant's Form 8-K filed May 7, 2018.
10.1	Offer Letter, dated May 4, 2018, by and between Molina Healthcare, Inc. and Thomas L. Tran.	Filed as Exhibit 10.1 to registrant's Form 8-K filed May 24, 2018.
10.2	Molina Healthcare, Inc. Amended and Restated Deferred Compensation Plan (2018)	Filed herewith.
31.1	Section 302 Certification of Chief Executive Officer	Filed herewith.
31.2	Section 302 Certification of Chief Financial Officer	Filed herewith.
32.1	Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.	Filed herewith.
32.2	Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.	Filed herewith.

MOLINA HEALTHCARE, INC.

AMENDED AND RESTATED

DEFERRED COMPENSATION PLAN (2018)

This Deferred Compensation Plan (the "Plan") is amended and restated effective for amounts earned and deferred on or after January 1, 2018 (the "Restatement"), by MOLINA HEALTHCARE, INC., a Delaware corporation (the "Company") with reference to the following:

A. The Company originally established a Deferred Compensation Plan for key employees, effective September 1, 1999 (the "Original Plan"). The Original Plan was amended on March 29, 2001.

B. As a result of the adoption of section 409A of the Internal Revenue Code of 1986 (the "Code"), the Original Plan was frozen effective at midnight on December 31, 2004.

C. This Plan was implemented effective January 1, 2005 to replace the Original Plan with a new plan that complies with the requirements of Code section 409A and the related Treasury Regulations (and other guidance from the Internal Revenue Service) thereunder (collectively, the "409A Requirements") and amended and restated as of October 1, 2013, and subsequently amended November 14, 2013, October 29, 2014, September 1, 2016, and November 7, 2017.

D. This Plan was established to provide key employees of the Company and its subsidiaries a tax deferred, capital accumulation program. The Plan is intended to provide benefits to a select group of management or highly compensated personnel in order to attract and retain the highest quality executives. The Company does not intend for this to be a qualified plan within the meaning of Sections 401(a) and 501(a) of the Code. This Plan is intended to be an unfunded plan for purposes of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Company contributions and voluntary compensation deferrals shall be held in a "Rabbi Trust," as that term is defined in Revenue Procedure 92-64, 1992-2 C.B. 422.

E. This Plan is hereby amended and restated to clarify certain provisions of the Plan.

NOW, THEREFORE, the Company hereby adopts this Plan on the following terms and conditions:

1. Definitions. Whenever used in this Plan, the following words and phrases shall have the meaning set forth below, unless a different meaning is expressly provided or plainly required by the context in which the words or phrases are used:

1.1. Beneficiary means a person designated by a Participant to receive Plan benefits in the event of the Participant's death.

1.2. Board means the Board of Directors of the Company and its successors.

1.3. Change in Control means, a Change in Ownership, a Change in the Effective Control, a Change in Assets or a termination of the Plan and distribution of compensation deferred hereunder within twelve (12) months after any of the foregoing events. For purposes of this Section, "Company" shall include (i) the company for which a Participant is performing services at the time of the Change in Control, (ii) the company liable for the payment of the deferred compensation (or all companies liable if more than one company is liable), or a company that is a majority shareholder of a company identified in

(i) or (ii), or any company in a chain of companies in which each company is a majority shareholder of another company in the chain, ending in a company identified in (i) or (ii). The events described in this section will not be considered to occur, with respect to an employee of a participating entity, if a participating entity is sold and the employee of the participating entity continues employment with Molina Healthcare, Inc., or any other participating entity which is considered as a single employer with Molina Healthcare, Inc. under Section 414(b) or (c) of the Code subsequent to such sale. The events described in this section have the following meanings:

a. Change in Ownership means the acquisition of stock by any one person or persons acting in concert (a "group") of the Company, that when added to the stock of the person or group constitutes more than 50% of the total fair market value or total voting power of the stock of the Company. The acquisition of additional stock by any person or group who are already considered to own more than 50% of the stock of the Company shall not constitute a change in ownership of the Company. An increase in the percentage of stock owned by any person or group, as result of a transaction in which the Company acquires its stock in exchange for property will be treated as an acquisition of stock for purposes of this section.

b. Change in the Effective Control means the occurrence of any of the following events, despite the fact that the Company has not undergone a Change in Ownership as described above:

    i. The acquisition by any person or group (or acquisition during the 12-month period ending on the date of the most recent acquisition by such person or persons) of ownership of stock of the Company possessing 35% or more of the total voting power of the stock, except if such acquisition is the result of a change in "record ownership" and not a change in "beneficial ownership;"

    ii. The replacement of a majority of the Company's board of directors during any 12-month period by directors whose appointment or election is not endorsed by a majority of the members of the Company's board of directors prior to the date of the appointment or election; or

    iii A transaction between the Company and another company resulting in a Change in Control.

    iv. Provided that this section shall not apply to the acquisition of additional control of the Company by any person or group, if that person or group is considered to effectively control the Company prior to the acquisition

c. Change in Assets means the acquisition by any person or group (or acquisition during the 12-month period ending on the date of the most recent acquisition by such person or persons) of assets from the Company, that have a total gross fair market value equal to, or more than, 40% of the total gross fair market value of all the assets of the Company immediately prior to such acquisition or acquisitions. A transfer of assets by the Company will not be treated as a Change in Assets if the assets are transferred to any of the following (determined immediately after the transfer):

    i. A shareholder of the Company (as determined, immediately before the asset transfer) in exchange for or with respect to its stock;

    ii. An entity, 50% or more of the total value or voting power of which is owned directly or indirectly by the Company;

iii. A person or group that owns, directly or indirectly, 50% or more of the total value or voting power of all the outstanding stock of the Company; or

iv. An entity, at least 50% of the total value or voting power of which is owned, directly or indirectly, by a person described in (iii).

For purposes of this subsection (c), the gross fair market value of assets is the value of the assets of the Company or the value of the assets being disposed of with regard to any liabilities associated with such assets. If assets are transferred to an entity that is controlled by the shareholders of the transferring company immediately after the transfer, there is no Change in Control.

1.4. Company means MOLINA HEALTHCARE, INC., a Delaware corporation.

1.5. Company Stock means shares of stock issued by the Company.

1.6. Disability or Disabled means with respect to a Participant (i) the inability to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than twelve (12) months, or (ii) the receipt of income replacement benefits for a period of not less than three (3) months under an accident and health plan covering employees of the Company or a Subsidiary, by reason of any medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than twelve (12) months.

1.7. The original Effective Date of this Plan means January 1, 2005. The Effective Date of this Restatement shall mean January 1, 2018.

1.8. Key Employee means an employee of the Company or a Subsidiary, who is (A) a member of a select group of management or highly compensated employees within the meaning of §2520.104-23 of the Department of Labor ERISA Regulations, (B) projected to receive Plan Year Compensation (base pay plus bonus), plus amounts deferred to any 401(k) plan, deferred compensation plan, or cafeteria plan maintained by the Company, of $200,000 or more and (C) designated by the Plan Committee as a Key Employee.

1.9. Participant means (A) a Key Employee who timely files a Written Election pursuant to Section 2.3, below, and (B) a former Employee who, at the time of his Separation from Service, death, or Disability, retains, or whose beneficiary retains, benefits earned under the Plan in accordance with its terms. A Participant is considered an Active Participant in the Plan (even if the Participant no longer satisfies the requirements of Section 1.8(B) but subject to the right of the Company's Chief Executive Officer to no longer designate such employee as a Key Employee) until the Participant separates from service under the terms of this Plan.

1.10. Plan means the Molina Healthcare, Inc. Amended and Restated Deferred Compensation Plan (2018) evidenced by this document and the Trust Agreement previously established in connection herewith.

1.11. Plan Committee means the individuals appointed by the Board from time to time to administer the Plan as provided herein.

1.12. Plan Year means the calendar year.

1.13. Plan Year Compensation means the total taxable income (other than Share Awards) paid to an Active Participant by the Company or a Subsidiary during any Plan Year, or portion thereof in which he is a Participant in this Plan, as reflected on a Key Employee's form W-2.

1.14. Separation from Service. A separation from service with the Company or a Subsidiary, provided such separation constitutes a “separation from service” under Treasury Regulation Section 1.409A-1(h).

1.15. Share Awards means shares of Company Stock which are awarded to a Participant as an employee by the Company or a Subsidiary.

1.16. Specified Employee means a "key employee" of the Company (taking into account the Subsidiaries), as defined in section 416(i) of the Code without regard to paragraph five (5) thereof.

1.17. Subsidiary means any entity in which the Company owns not less than 80% of the outstanding voting interests.

1.18. Trust Agreement means the grantor trust established in connection with this Plan between the Company as grantor and the Trustee.

1.19. Trustee means Union Bank of California and any successor institutional trustee named to succeed such Trustee under the terms of the Trust Agreement established in connection with this Plan.

1.20. Unforeseeable Financial Emergency means: (i) an illness or accident of the Participant or beneficiary, the Participant's or beneficiary's spouse, or the Participant's or beneficiary's dependent; (ii) the loss of the Participant's or beneficiary's property due to casualty; or (iii) other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the Participant or beneficiary. Determination of whether a Participant has incurred an Unforeseeable Financial Emergency shall be made by the Plan Committee, in accordance with the requirements of Section 409A of the Code and any guidance issued thereunder.

2. Participation.

2.1. Eligibility. An employee of the Company or a Subsidiary is eligible to participate in this Plan upon meeting the criteria for Key Employee specified in Section 1.8. Any Key Employee who was a Participant in the Original Plan and who continued in the employ of the Company or a Subsidiary on the effective date of the Restatement will continue to be a Participant in this Plan, subject to the right of the Company's Chief Executive Officer to no longer designate such employee as a Key Employee thereafter.

2.2. Entry Date. An employee of the Company or a Subsidiary who met the eligibility requirement specified in Section 2.1 as of the Effective Date of this Plan Restatement is a Participant in the Plan as of the Effective Date. Newly eligible employees of the Company or a Subsidiary who have met the enrollment requirements under Section 2.3 of the Plan shall commence participation in the Plan within thirty (30) days of their date of hire. An employee of the Company or a Subsidiary who meets the eligibility requirements specified in Section 2.1 but fails to meet the requirements in accordance with Section 2.3 within the period required, shall become a Participant in this Plan on the first day of the next Plan Year following submission of a Written Election form as specified in Section 2.3.

2.3. Written Election by Participant. As a condition to participation in the Plan, each newly eligible Employee shall complete, sign and return to the Plan Committee a Written Election within thirty (30) days after the date the Participant becomes eligible to participate in the Plan. Annual enrollment shall be in December each year for the following Plan Year. Each Participant shall submit a Written Election prior to the first day of the Plan Year in which he or she will be a Participant.

a. Such Written Election shall be made on the form presented to the Participant by the Plan Committee and shall set forth:

i. his election to participate in this Plan under the terms hereof;

ii. the amount of Plan Year Compensation the Participant has determined to defer under the Plan for the Plan Year, pursuant to Section 3.1 below;

iii. the investment vehicles into which the Participant desires to have his Account attributable to deferral of Plan Year Compensation invested, as provided in Section 3.5 below, and the percentage of such Account allocated to each elected investment vehicle;

iv. the date on which his benefit is to be distributed which is the earliest of: (a) the date specified for an In-Service Withdrawal; (b) an Unforeseeable Financial Emergency; (c) the later of (i) when he separates from service with the Company or a Subsidiary for any reason or (ii) a date subsequent to his termination of employment specified by the Participant;

v. the form in which his benefit is to be distributed upon an In-Service Withdrawal, Separation from Service, Disability or death.

b. A Participant must provide a separate Written Election for each subsequent Plan Year that specifies the percentage of the Plan Year Compensation that Participant has determined to defer for each such Plan Year. Such Written Election is only effective for the Plan Year for which the election is made and if no Written Election to defer Plan Year Compensation is executed in relation to a subsequent Plan Year, no Plan Year Compensation will be deferred for such subsequent Plan Year. Any election of the amount of Plan Year Compensation to defer for a given Plan Year shall be irrevocable on and after the first day of the Plan Year for which the election was made.

c. A Participant may change the investment vehicle(s) in which the Participant desires to have that portion of the Participant's Account attributable to Plan Year Compensation and investment income invested and the percentage of the Participant's Account allocated to each investment vehicle by completing and submitting any form or forms required by the Company. Changes in investment vehicle(s) will be made as of the applicable business day (or as soon as practicable thereafter) following the date that the change is requested.

d. Notwithstanding the foregoing, the Trustee shall, at the direction of the Plan Committee, have the duty and authority to invest the trust assets and funds in accordance with the terms of the Trust Agreement, and all rights associated with the trust assets shall be exercised by the Trustee as designated by the Plan Committee and shall in no event be exercisable by or be settled upon Participants or their Beneficiaries.

e. A Participant may change the date or form of distribution by submitting a new Written Election to the Company, provided that the following conditions are met:

i. That such election may not take effect until at least twelve (12) months after the date on which the election is made;

ii. In the case of an election related to a payment other than a payment on account of death, disability or the occurrence of a financial hardship, such payment must be deferred for a period of not less than five (5) years from the date such payment would have otherwise been made, and

iii. Any election related to a payment at a specified time or pursuant to a fixed schedule may not be made less than twelve (12) months prior to the date of the first scheduled payment.

iv. Such election may be made among the payment options set forth in Section 5.4.

2.4. Duration of Participation. Any Key Employee who has become a Participant at any time shall remain a Participant, even though he is no longer an Active Participant, until his entire benefit under the terms of the Plan has been paid to him (or to his Beneficiary in the event of his death), at which time he ceases to be a Participant.

2.5. Maintenance of Records. The annual Designation of Participants by the Plan Committee shall be maintained in the corporate minute book. The Written Elections by Participants shall be maintained in the corporate records with all other files pertaining to this Plan by the Plan Committee.

3. Contributions and Allocation.

3.1 Participant Contributions. A Participant may elect to defer a portion of (i) up to 75% of Plan Year Compensation constituting base pay and (ii) up to 100% of all other Plan Year Compensation eligible for deferral under this Plan (including bonus pay). For a Participant's initial Plan Year of participation, the minimum deferral percentage for base pay and bonus pay must be 3% for each such component. For succeeding years of participation, a Participant may not defer an amount less than the minimum percentage established from year to year by the Plan Committee. A written election must be submitted, pursuant to the terms of Section 2.3, specifying the percentage of Plan Year Compensation constituting base pay the Participant has chosen to defer. A separate written election must be submitted, pursuant to the terms of Section 2.3, specifying the percentage of all other Plan Year Compensation eligible for deferral under this Plan (including bonus pay) the Participant has chosen to defer. Once a Participant's contributions for a Plan Year reach the Participant's elected percentage, such Participant shall not be allowed to defer additional portions of such Participant's Plan Year Compensation for the remainder of the Plan Year. Any amounts in excess of the Participant's elected percentage inadvertently deferred shall be refunded to the Participant as soon as practicable.

3.2. Company Contributions. The Company may, subject to the sole discretion of its Board of Directors, make contributions for the Participants, reserving the right to discriminate among the Participants in the amount or percentage of contributions made in any Plan Year.

3.3. Allocation of Participant Contributions. All amounts which a Participant elects to defer under the terms of this Plan shall be allocated to his Account as of the last business day of each month. Each such Participant Deferral Account shall be credited with earnings as provided in Section 3.5 below.

3.4. Allocation of Company Contributions. Any amounts contributed by the Company on behalf of a Participant under Section 3.2 above shall be allocated to the Company Contribution Account of each Participant. Each such Company Contribution Account shall be credited with earnings as provided in Section 3.5 below.

3.5 Credited Earnings. The Account of each Participant (which includes such Participant's Participant Deferral Account established under Section 3.1 and such Participant's Company Contribution Account established under Section 3.2) shall be credited as of each applicable business day with the actual earnings on the investments allocated to the Participant's Account.

3.6. Funding. The assets of the Plan shall be held under the Trust Agreement (a "grantor trust") designated in Section 8. As such, the Plan is intended to be an unfunded plan for purposes of the requirements of ERISA and the Code.

Notwithstanding the provisions under the terms of the Plan that amounts contributed to this Plan, plus earnings thereon, shall be allocated to separate Accounts of Participants, all such amounts credited to such individual Accounts shall remain the general assets of the Company, and as such shall remain subject to the claims of the general creditors of the Company. This Plan and the related Trust Agreement do not create, nor does any employee, Participant or Beneficiary have, any right with respect to any specific assets of the Company or the Plan.

4. Vesting of Accounts. The Participant Deferral Accounts and the Company Contribution Account of each Participant shall be 100% vested in such Participant at all times.

5. Types of Benefits.

5.1. Separation from Service Benefit. A Participant's Separation from Service Benefit is the unpaid balance of his Accounts which equals the total of all contributions made by the Participant and the Company allocated to his Account and all earnings credited to his Account in accordance with the terms of the Plan and the Trust Agreement, less any distributions already paid.

5.2. Disability Benefit. If a Participant becomes Disabled as defined in Section 1.6 above, the Company will pay his Separation from Service Benefit, calculated under Section 5.1, in the applicable form elected by the Participant in his Written Election.

A Participant who believes he has suffered a Disability within the meaning of Section 1.6 shall make application to the Plan Committee, on a form prescribed by the Plan Committee, for a determination of whether he is Disabled under the terms of Section 1.6. The Participant shall make such written application to the Plan Committee on or after the date which is at least five (5) consecutive months following the date he first suffered the impairment under consideration. Any determination by the Plan Committee that a Disability exists under the provisions of Section 1.6 shall be effective only after the date the Disability has existed for six (6) consecutive months. All determinations made by the Plan Committee shall be final, and no Participant shall be considered Disabled for any purpose whatsoever under the provisions of this Plan if determined not to be Disabled by the Plan Committee under the procedures set forth in this Section.

The Plan Committee shall notify each Participant who has made application under this Section 5.2, in writing, of its determination within three (3) months of the date the Plan Committee receives the Participant's application hereunder. The Participant shall cooperate in providing any information to the Plan Committee which it requires in making its determination, including, but not limited to, access to the Participant's medical records, direct

contact with his physician, and physical examination by a physician selected by the Company. Any Participant who does not fully cooperate shall be deemed not Disabled by the Plan Committee and so notified.

5.3. Death Benefit.

a. If a Participant dies after a distribution has commenced or if the Company has not purchased a life insurance contract in connection with the Participant's Separation from Service Benefit, the Company will continue the payments of such distribution otherwise due to the Participant to his designated Beneficiary, in the applicable form elected by the Participant in his Written Election.

b. If a Participant dies while still employed by the Company or a Subsidiary and the Company has purchased a life insurance contract in connection with such Participant's Separation from Service Benefit, the Company will pay the Participant's designated Beneficiary the greatest of: (i) twice the Participant's base salary upon initial eligibility for the Plan; (ii) $500,000; or (iii) if the Participant was a Participant prior to January 1, 2018, the amount specified under the Plan prior to such date, in the applicable form elected by the Participant in his Written Election.

5.4. In-Service Withdrawal. A Participant may designate a year in the future for receipt of an In-Service Withdrawal with respect to the Participant's contribution for a given Plan Year. Such withdrawal may be paid while the Participant remains employed with the Company or a Subsidiary. Initial designations made with respect to the 2018 Plan Year in accordance with Section 2.3(a)(iv) (as may be subsequently modified under Section 2.3(b)) shall include Credited Earnings attributable to such Participant Contribution. The In-Service Withdrawal will be paid in a lump sum unless the Participant elects to receive substantially equal annual installments from two (2) to five (5) years, commencing no earlier than three (3) years after the Plan Year during which such Participant Contributions are made; provided, however, that a Participant may make a subsequent deferral election with respect to any initial In-Service Withdrawal election made under this Plan subject to the following requirements:

a. the Participant must deliver to the Company a written election not later than twelve (12) months prior to the date the payment is scheduled to be paid;

b. the payments that are subject to the election must be delayed at least five (5) years from the date the payments would have otherwise been made; and

c. the election will not take effect until at least twelve (12) months after the election is made.

5.5. Unforeseeable Financial Emergency Benefit. A Participant may request a portion of his Separation from Service Benefit as an Unforeseeable Financial Emergency Benefit at any time by providing the Plan Committee, to its satisfaction, with a written request, proof of an Unforeseeable Financial Emergency, and proof that all other financial resources have been explored and utilized to: (i) receive a partial or full payout from the Plan and/or (ii) suspend any deferrals required to be made by a Participant. The amount of an Unforeseeable Financial Emergency Benefit shall be limited to the lesser of the amount needed for the financial hardship or such Participant's Separation from Service Benefit. If a Participant receives a distribution as a result of an Unforeseeable Financial Emergency, such Participant may not participate in the Plan during the Plan Year following the year of the hardship distribution.

6. Distributions.

6.1. Form of Benefits. The Company shall pay benefits in the form associated with Type of Benefit elected by the Participant, and, to the extent a Type of Benefit may be distributed in various forms, the Company shall pay benefits in the form elected by the Participant. The forms of benefits associated with the Types of Benefits are the following:

a. Separation from Service Benefit, Disability Benefit, and Death Benefit shall be paid in (i) one lump sum; (ii) 5 yearly installments; (iii) 10 yearly installments; or (iv) 15 yearly installments;

b. In-Service Withdrawal shall be paid as provided in Section 5.4 above; and

c. Unforeseeable Financial Emergency Benefit shall be paid in one lump sum.

6.2. Commencement of Payments. The Company will pay, or begin to pay, the Types of Benefits under this Plan to the Participant in accordance with the following:

a. Separation from Service Benefit, Disability Benefit, and Death Benefit payments shall commence no later than sixty-five (65) days following the date on which the Participant retires, terminates service, becomes disabled, or dies;

b. In-Service Withdrawal payments shall commence on the date designated by the Participant on his Written Election pursuant to Section 2.3, provided that such payments are from Participant Contributions that have been in such Participant's Participant Deferral Account for at least two years;

c. Unforeseeable Financial Emergency Benefit payments shall commence no later than sixty-five (65) days after a request for an Unforeseeable Financial Emergency Benefit is approved by the Plan Committee.

6.3. Domestic Relations Order. In the event the Plan Committee receives a Domestic Relations Order from a potential Alternate Payee, the Plan Committee shall notify the Participant whose benefit is the subject of such order and provide him/her with information concerning the Plan's procedures for administering Qualified Domestic Relations Orders ("QDROs"). Unless and until the order is set aside, the following provisions shall apply:

a. The Plan Committee shall within a reasonable time determine whether the order is a QDRO and shall notify the Participant whose benefit is the subject of the order, of its determination. The Plan Committee may designate a representative to carry out its duties under this provision.

b. Nothing in this Section shall be deemed to allow payment under a QDRO to an Alternate Payee of any benefit which would violate Section 409A of the Code and the regulations thereunder.

c. QDRO definitions. For purposes of Section 6.3 the following definitions and rules shall apply:

i. Alternate Payee means any spouse, former spouse, child or other dependent of a Participant who is recognized by a QDRO as having a right to receive all, or a portion of, the benefits payable under this Plan with respect to the Participant.

ii. Domestic Relations Order means any judgment, decree, or order (including approval of a property settlement agreement) which:

(1) relates to the provision of child support, alimony payments, or marital property rights to a spouse, child, or other dependent of a Participant; and

(2) is made pursuant to a state domestic relations law (including a community property law).

iii. Qualified Domestic Relations Order means any Domestic Relations Order meeting the requirements for a Qualified Domestic Relations Order under Code section 414(p), which satisfies any additional criteria under policies established by the Plan Committee.

6.4 Limited Cashout. Notwithstanding any Written Election made by the Participant, if, upon the Participant's Separation from Service, such Participant's accrued benefit under the Plan (and any other deferred compensation plan required to be aggregated with this Plan) does not exceed the then-current limit under Section 402(g)(1)(B) of the Code, the Company shall immediately distribute such Participant's accrued benefit under the Plan in a single lump sum payment to the Participant (or the Beneficiary, if the Participant is deceased), provided that such distribution results in a termination and complete liquidation of such Participant's interest under the Plan (and any other deferred compensation plan required to be aggregated by this Plan).

Notwithstanding sections 6.2 and 7.3, distributions to a Specified Employee shall not commence earlier than six (6) months after the date such Specified Employee experiences a Separation from Service (or, if earlier, the date of death of the employee).

7. Amendment, Termination of Plan, Change in Control.

7.1. Amendment. The Company reserves the right to amend the Plan at any time by resolution of the Plan Committee. The Plan Committee will determine the effective date of any such amendment. The amendment may not deprive any Participant or Beneficiary of any portion of a benefit under the terms of this Plan at the time of the amendment.

7.2. Termination of Plan. The Company reserves the right to terminate the Plan under the following circumstances:

a. The Plan Committee may resolve to terminate the Plan provided that:

i. all arrangements of the same type (account balance plans, nonaccount balance plans, separation pay plans or other arrangements) are terminated with respect to all participants;

ii no payments other than those otherwise payable under the terms of the Plan absent a termination of the Plan are made within twelve (12) months of the termination of the arrangement;

iii. all payments are made within twenty-four (24) moths of the termination of the arrangement; and

iv. the Company does not adopt a new arrangement that would be aggregated with any terminated arrangement under the plan aggregation rules at any time for a period of five years following the date of termination of the arrangement.

b. The Plan Committee may terminate the Plan and make payments to the Participants at any time during the twelve (12) months following a change in control of the corporation;

c. A corporate dissolution taxed under Section 331, or with the approval of a bankruptcy court pursuant to 11 U.S.C. §503(b)(l)(A), provided that the amounts deferred under the Plan are included in the Participants' gross incomes by the latest of:

i. the calendar year in which the Plan termination occurs,

ii. the calendar year in which the amount is no longer subject to a substantial risk of forfeiture, or

iii. the first calendar year in which the payment is administratively practicable.

7.3. Change in Control. In the event of a Change in Control, the Company shall, as soon as possible, but in no event later than ten days after the Change in Control, notify the Trustee, and the Trustee or its agent shall immediately calculate the Separation from Service Benefit of each affected Participant and distribute such amounts to the Participant or Beneficiary in a lump sum as soon as administratively feasible after the Change in Control, but in no event later than the last day of the year in which the Change in Control occurs. If the Company fails to notify the Trustee as specified in this section, the Trustee may act upon notification of the "Change of Control" obtained in an alternate manner. The Trustee shall incur no liability to any person for any action taken pursuant to such notification and in conformity with the terms of the Plan.

8. Benefits Not Funded. Participants and Beneficiaries have the status of unsecured creditors of the Company, and the Plan constitutes a mere promise by the Company to make benefit payments in the future. A Participant's or Beneficiary's interest in the Plan is an unsecured claim against the general assets of the Company, and neither the Participant nor a Beneficiary has any right against the account until the Plan has distributed the benefit. All amounts credited to an account are the general assets of the Company and may be disposed of or used by the Company in such manner as it determines.

Notwithstanding the first paragraph of this Section 8, the Company will make deposits to a trust pursuant to a Trust Agreement, a copy of which is attached, as provided above. Such Trust Agreement created by the Company is intended to be a grantor trust, and any assets held by such trust to assist the Company in meeting its obligations under the Plan will conform to the terms of the model trust, as described in Revenue Procedure 92-64, 1992-2 C.B. 422, promulgated by the Internal Revenue Service. The Company will make a transfer of cash to the trust annually in the amount necessary to pay the deferred compensation required.

It is the intention of the parties that this Plan and the accompanying Trust Agreement shall constitute an unfunded arrangement maintained for the purpose of providing deferred compensation for a select group of management or highly compensated employees for purposes of Title I of ERISA.

9. Administration.

9.1. Plan Committee. The Plan shall be administered by the Plan Committee. The Plan Committee shall have full authority and power to administer and construe the Plan, subject to applicable requirements of law. Without limiting the generality of the foregoing, the Plan Committee shall have the powers indicated in the foregoing Sections of the Plan and the following additional powers and duties:

a. To make and enforce such rules and regulations as it deems necessary or proper for the administration of the Plan;

b. To interpret the Plan and to decide all questions concerning the Plan;

c. To determine the amount and the recipient of any payments to be made under the Plan;

d. To designate and value any investments deemed held in the Accounts; and

e. To make all other determinations and to take all other steps necessary or advisable for the administration of the Plan.

All decisions made by the Plan Committee pursuant to the provisions of the Plan shall be made in its sole discretion and shall be final; conclusive, and binding upon all parties.

9.2. Delegation of Duties. The Plan Committee may delegate such of its duties and may engage such experts and other persons as it deems appropriate in connection with administering the Plan. The Plan Committee shall be fully protected in any action taken, in good faith, in reliance upon any opinions or reports furnished them by any such experts or other persons.

9.3. Indemnification of Committee. The Company agrees to indemnify and to defend to the fullest extent permitted by law any person serving as a member of the Plan Committee, and each employee of the Company or any of its affiliates appointed by the Plan Committee to carry out duties under this Plan, against all liabilities, damages, costs and expenses (including attorneys' fees and amounts paid in settlement of any claims approved by the Company) occasioned by any act or omission to act in connection with the Plan, if such act or omission is in good faith.

9.4. Liability. To the extent permitted by law, neither the Plan Committee nor any other person shall incur any liability for any acts or for any failure to act except for liability arising out of such person's own willful misconduct or willful breach of the Plan.

9.5. Claims Review Procedure.

a. A claim for benefits may be filed, in writing, with the Plan Committee. A written disposition of a claim shall be furnished to the claimant within a reasonable time after the claim for benefits is filed. In the event a claim for benefits is denied, the Plan Committee shall provide the claimant with the reasons for denial.

b. A claimant whose claim for benefits was denied may file for a review of such denial, with the Plan Committee, no later than 60 days after he has received written notification of the denial.

c. The Plan Committee shall give a request for review a full and fair review. If the claim for benefits is denied upon completion of a full and fair review, notice of such denial shall be provided to the claimant within 60 days after the Plan Committee's receipt of such written claim for review. This 60-day period may be extended in the event of special circumstances. Such special circumstances shall be communicated to the claimant in writing within the 60-day period. If there is an extension, a decision shall be made as soon as possible, but not later than 120 days after receipt by the Plan Committee of such claim for review.

d. If benefits are provided or administered by an insurance company, insurance service, or other similar organization which is subject to regulation under the insurance laws of a state, the claims procedure relating to these benefits may provide for review. If so, that company, service, or organization will be the entity to which claims are addressed.

10. General Provisions

10.1. Designation of Beneficiary. Each Participant shall designate, in writing, prior to the date he first becomes a Participant in the Plan, one or more beneficiaries to receive his benefit under the provisions of Section 5.3. The Participant shall file the written designation with the Plan Committee. The Participant may revoke a previous beneficiary designation by filing a new written beneficiary designation with the Plan Committee.

In any event, if a Participant or Beneficiary who has designated another Beneficiary is divorced, all beneficiary designations executed prior to the effective date of the dissolution of marriage (or other decree or order entered under applicable state law) are automatically revoked under the terms of this Section 10.1. In such event, the Participant or Beneficiary may designate one or more Beneficiaries in accordance with the terms of this Section 10.1. If none is made following the effective date of the dissolution of the marriage, the individual's benefit shall pass under the laws of intestate succession and the terms of the next following paragraph.

If a Participant fails to file a valid designation of beneficiary with the Plan Committee under the provisions of this Section 10.1, or if a designated Beneficiary fails to survive to receive any or all payments due hereunder, then the death benefit payable under this Plan shall be payable to the Participant's (or the Beneficiary's) spouse; if no spouse survives, then to the Participant's (or Beneficiary's) children, with equal shares among living children and with the living descendants of a deceased child receiving equal portions of the deceased child's share; in the absence of spouse or descendants, to the Participant's (or Beneficiary's) parents; and in the absence of spouse, descendants or parents, to the Participant's (or Beneficiary's) brothers and sisters, with the living descendants of a deceased brother and those of a deceased sister receiving equal portions of the deceased brother's or sister's share; in the absence of any of the persons named herein, to the Participant's (or Beneficiary's) estate.

For purposes of this Section 10.1, the term "descendant" means all persons who are descended from the person referred to either by birth to or legal adoption by such person, and "child" or "children" includes adopted children.

10.2. Benefits Not Assignable. The rights of each Participant are not subject in any manner to anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment, or garnishment by creditors of the Participant or any Beneficiary. Neither the Participant nor Beneficiary may assign, transfer or pledge the benefits under this Plan. Any attempt to assign, transfer or pledge a Participant's benefits under this Plan is void.

10.3. Benefit. This Plan constitutes an agreement between the Company and each of the Participants which is binding upon and inures to the Company, its successors and assigns and upon the Participant and his heirs and legal representatives.

10.4. Headings. The headings of the Articles and Sections of this Plan are included for purposes of convenience only, and shall not affect the construction or interpretation of any of it provisions.

10.5. Notices. All notices, requests, demands, and other communications under this Plan shall be in writing and shall be deemed to have been duly given on the date of service if served personally on the party to whom notice is to be given, or on the third day after mailing if mailed to the party to whom notice is to be given, by first class mail, registered or certified (return receipt requested), postage prepaid, and properly addressed to the last known address to each party as set forth on the first page thereof. Any party may change its address for purposes of this Section by giving the other parties written notice of the new address in the manner set forth above.

10.6. No Loans. The Plan does not permit any loans to be made to any Participant or Beneficiary.

10.7. Gender Usage. The use of the masculine gender includes the feminine gender for all purposes of this Plan.

10.8. Expenses. Costs of administration of the Plan shall be paid by the Company.

IN WITNESS WHEREOF, the Company has executed this Amended and Restated Deferred Compensation Plan (2018) on July 16, 2018, effective as of the Effective Date.

MOLINA HEALTHCARE, INC.

Title: Chief Executive Officer

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Zubretsky, certify that:

1. I have reviewed the report on Form 10-Q for the period ended June 30, 2018 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and to the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

March 31, 2018

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality managed health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

The Health Plans segment consists of health plans operating in 13 states and the Commonwealth of Puerto Rico. As of March 31, 2018, these health plans served approximately 4.1 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Affordable Care Act Marketplace (Marketplace) members, most of whom receive government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO).

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Such contracts are subject to risk of loss in states that issue requests for proposal (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may not be renewed.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled (ABD); and regions or service areas.

The Molina Medicaid Solutions segment provides support to state government agencies' administration of their Medicaid programs, including business processing, information technology development and administrative services. The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

Presentation and Reclassification

We have reclassified certain amounts in the 2017 consolidated statement of cash flows to conform to the 2018 presentation, relating to the presentation of restricted cash and cash equivalents. The reclassification is a result of our adoption of Accounting Standards Update (ASU) 2016-18, *Restricted Cash* effective January 1, 2018. See Note 2, "Significant Accounting Policies," for further information, including the amount reclassified.

We have combined certain line items in the accompanying consolidated balance sheets. For all periods presented, we have combined the presentation of:

- Income taxes refundable with "Prepaid expenses and other current assets;"
- Income taxes payable with "Accounts payable and accrued liabilities;"
- Goodwill, and intangible assets, net to a single line; and
- Deferred contract costs with "Other assets."

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities (VIEs) in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such VIEs are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the three

months ended March 31, 2018 are not necessarily indicative of the results for the entire year ending December 31, 2018.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2017. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in our December 31, 2017 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2017 audited consolidated financial statements.

2. Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that are both readily convertible into known amounts of cash and have a maturity of three months or less on the date of purchase. The following table provides a reconciliation of cash, cash equivalents, and restricted cash and cash equivalents reported within the accompanying consolidated balance sheets that sum to the total of the same such amounts presented in the accompanying consolidated statements of cash flows. The restricted cash and cash equivalents presented below are included in non-current "Restricted investments" in the accompanying consolidated balance sheets.

	Three Months Ended March 31,	
	2018	2017
	(In millions)	
Cash and cash equivalents	$ 3,729	$ 3,198
Restricted cash and cash equivalents	95	95
Total cash, cash equivalents, and restricted cash and cash equivalents presented in the statements of cash flows	$ 3,824	$ 3,293

Revenue Recognition

We adopted ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)* effective January 1, 2018, using the modified retrospective approach. The insurance contracts of our Health Plans segment, which segment constitutes the vast majority of our operations, are excluded from the scope of Topic 606 because the recognition of revenue under these contracts is dictated by other accounting standards governing insurance contracts. The cumulative effect of initially applying the guidance, relating entirely to our Molina Medicaid Solutions segment contracts, resulted in an immaterial impact to beginning retained earnings, as presented in the accompanying consolidated statement of stockholders' equity. Topic 606 was only applied to service contracts that were not completed as of December 31, 2017. Refer to "Molina Medicaid Solutions segment" and "Other segment" below for further information.

Health Plans segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services, and premiums collected in advance are deferred. Certain components of premium revenue are subject to accounting estimates and fall into two broad categories discussed in further detail below: 1) "Contractual Provisions That May Adjust or Limit Revenue or Profit;" and 2) "Quality Incentives." Liabilities recorded for such provisions are included in "Amounts due government agencies" in the accompanying consolidated balance sheets.

1) Contractual Provisions That May Adjust or Limit Revenue or Profit:

Medicaid

- *Medical Cost Floors (Minimums), and Medical Cost Corridors:* A portion of our premium revenue may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $148 million and $135 million at March 31, 2018 and December 31, 2017, respectively. Approximately $97 million and $96 million of the liability

accrued at March 31, 2018 and December 31, 2017, respectively, relates to our participation in Medicaid Expansion programs.

- *Retroactive Premium Adjustments:* State Medicaid programs periodically adjust premium rates on a retroactive basis. In these cases, we must adjust our premium revenue in the period in which we learn of the adjustment, rather than in the months of service to which the retroactive adjustment applies.

Medicare

- *Minimum MLR:* Federal regulations have established a minimum annual medical loss ratio (Minimum MLR) of 85% for Medicare. The medical loss ratio represents medical costs as a percentage of premium revenue. Federal regulations define what constitutes medical costs and premium revenue. If the Minimum MLR is not met, we may be required to pay rebates to the federal government. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of income.

Marketplace

- *Risk adjustment:* Under this program, our health plans' composite risk scores are compared with the overall average risk score for the relevant state and market pool. Generally, our health plans will make a risk transfer payment into the pool if their composite risk scores are below the average risk score, and will receive a risk transfer payment from the pool if their composite risk scores are above the average risk score. We estimate our ultimate premium based on insurance policy year-to-date experience, and recognize estimated premiums relating to the risk adjustment program as an adjustment to premium revenue in our consolidated statements of income. As of March 31, 2018, and December 31, 2017 the Marketplace risk adjustment payable amounted to $1,129 million and $912 million, respectively.

- *Minimum MLR:* The ACA has established a Minimum MLR of 80% for the Marketplace. If the Minimum MLR is not met, we may be required to pay rebates to our Marketplace policyholders. The Marketplace risk adjustment program is taken into consideration when computing the Minimum MLR. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of income.

2) Quality Incentives:

At many of our health plans, revenue ranging from approximately 1% to 3% of certain health plan premiums is earned only if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the periods presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of March 31, 2018 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of March 31, 2018.

	Three Months Ended March 31,	
	2018	2017
	(Dollars in millions)	
Maximum available quality incentive premium - current period	$ 40	$ 38
Quality incentive premium revenue recognized in current period:		
Earned current period	$ 24	$ 19
Earned prior periods	11	5
Total	$ 35	$ 24
Quality incentive premium revenue recognized as a percentage of total premium revenue	0.8%	0.5%

Molina Medicaid Solutions segment

Molina Medicaid Solutions is under contract with Medicaid agencies in six states and the U.S. Virgin Islands. Our existing contracts have terms that currently extend to 2018 through 2025, before renewal options. As of March 31, 2018, the aggregate amount of service revenue relating to unsatisfied performance obligations amounted to $571 million.

Business process outsourcing services are billed immediately following the end of the month in which such services are performed, with payment received soon thereafter. Payments for the design, development and implementation (DDI) of Medicaid management information systems milestones are received following our performance, and the

customer's acceptance, of the milestone deliverable. However, DDI revenue is deferred until the system 'go-live' date, and is amortized over the initial contract hosting period.

Other segment

Our Pathways behavioral health subsidiary's revenue is variable, and generally invoiced after services are rendered; customer payment follows invoicing. We have concluded that there is no change to revenue recognition under Topic 606 for our Pathways behavioral health subsidiary, and therefore no impact to retained earnings effective January 1, 2018.

The following table presents the opening and closing balances of receivables, deferred contract costs (contract assets), and deferred revenue (contract liabilities) from contracts with customers, by segment.

	March 31, 2018	December 31, 2017
	(In millions)	
Receivables:		
Molina Medicaid Solutions	$ 41	$ 30
Other	46	44
Deferred contract costs (contract assets) – Molina Medicaid Solutions	103	101
Deferred revenue (contract liabilities) – Molina Medicaid Solutions	41	49

Medical Care Costs - Marketplace Cost Share Reduction (CSR) Update

During the first quarter of 2018, we recognized a benefit of approximately $70 million in reduced medical expense related to 2017 dates of service as a result of the federal government's confirmation that the reconciliation of 2017 Marketplace CSR subsidies would be performed on an annual basis. In the fourth quarter of 2017, we had assumed a nine-month reconciliation of this item pending confirmation of the time period to which the 2017 reconciliation would be applied.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which generally differs from the U.S. federal statutory rate primarily because of state taxes, nondeductible expenses such as the Health Insurer Fee (HIF), certain compensation, and other general and administrative expenses. The effective tax rate was not impacted by HIF in 2017 given the 2017 HIF moratorium.

The effective tax rate may be subject to fluctuations during the year, particularly as a result of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The Tax Cuts and Jobs Act (TCJA) was enacted on December 22, 2017. The TCJA, in part, reduced the U.S. federal statutory corporate income tax rate from 35% to 21% effective January 1, 2018. Accounting guidance allows filers one year subsequent to the end of the tax year to finalize the valuation of deferred tax assets and liabilities. At March 31, 2018, we had not completed our accounting for the tax effects resulting from enactment of TCJA with respect to valuation of our deferred tax assets and liabilities. We will continue to make and refine our calculations as additional analysis is completed. In addition, our estimates may also be affected as we gain a more thorough understanding of the tax law based on expected future guidance from the Internal Revenue Service and U.S. Treasury.

Recent Accounting Pronouncements Adopted

Revenue Recognition (Topic 606). See discussion above, in "Revenue Recognition."

Comprehensive Income. In February 2018, the Financial Accounting Standards Board (FASB) issued ASU 2018-02, *Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*, which allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the TCJA. ASU 2018-02 is effective beginning January 1, 2019; we early adopted this ASU effective

January 1, 2018. The effect of applying the guidance resulted in an immaterial impact to beginning retained earnings, as presented in the accompanying consolidated statement of stockholders' equity.

Restricted Cash. In November 2016, the FASB issued ASU 2016-18, *Restricted Cash,* which requires us to include in our consolidated statements of cash flows the balances of cash, cash equivalents, restricted cash and restricted cash equivalents. When these items are presented in more than one line item on the balance sheet, the new guidance requires a reconciliation of the totals in the statement of cash flows to the related captions in the balance sheet. Transfers between cash and cash equivalents and restricted cash and restricted cash equivalents are no longer presented in the statement of cash flows. We adopted ASU 2016-18 on January 1, 2018. We have applied the guidance retrospectively to all periods presented. Such retrospective adoption resulted in a $95 million reclassification of restricted cash and cash equivalents from "Investing activities" to the beginning and ending balances of cash and cash equivalents in our consolidated statements of cash flows for the quarter ended March 31, 2017. There was no impact to our consolidated statements of income, balance sheets, or stockholders' equity. The reconciliation of cash and cash equivalents to cash, cash equivalents and restricted cash and cash equivalents is presented at the beginning of this note.

Recent Accounting Pronouncements Not Yet Adopted

Credit Losses. In June 2016, the FASB issued ASU 2016-13, *Measurement of Credit Losses on Financial Instruments*. Rather than generally recognizing credit losses when it is probable that the loss has been incurred, the revised guidance requires companies to recognize an allowance for credit losses for the difference between the amortized cost basis of a financial instrument and the amount of amortized cost that the company expects to collect over the instrument's contractual life. ASU 2016-13 is effective for us beginning January 1, 2020, and must be adopted as a cumulative effect adjustment to retained earnings; early adoption is permitted. We are evaluating the effect of this guidance.

Leases. In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842),* as modified by ASU 2017-03, *Transition and Open Effective Date Information*. Under ASU 2016-02, an entity will be required to recognize assets and liabilities for the rights and obligations created by leases on the entity's balance sheet for both financing and operating leases. For leases with a term of 12 months or less, an entity may elect to not recognize lease assets and lease liabilities and expense the lease over a straight-line basis for the term of the lease. ASU 2016-02 will require new disclosures that depict the amount, timing, and uncertainty of cash flows pertaining to an entity's leases. ASU 2016-02 is effective for us beginning January 1, 2019, and must be adopted using a modified retrospective approach for annual and interim periods beginning after December 15, 2018. Early adoption is permitted. Under this guidance, we will record assets and liabilities relating primarily to our long-term office leases. We are currently updating the configuration of our lease database management system for the adoption of Topic 842, and we are in the early stages of computing the impact of Topic 842 on our consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of basic and diluted net income per share:

	Three Months Ended March 31,	
	2018	2017
	(In millions, except net income per share)	
Numerator:		
Net income	$ 107	$ 77
Denominator:		
Shares outstanding at the beginning of the period	59	56
Weighted-average number of shares issued:		
1.625% Exchange (1)	1	—
Denominator for basic net income per share	60	56
Effect of dilutive securities:		
Convertible senior notes (1)	1	—
1.125% Warrants (1)	4	—
Denominator for diluted net income per share	65	56
Net income per share: (2)		
Basic	$ 1.79	$ 1.38
Diluted	$ 1.64	$ 1.37

(1) For more information regarding the 1.625% Exchange and the convertible senior notes, refer to Note 7, “Debt.” For more information regarding the 1.125% Warrants, refer to Note 9, “Stockholders' Equity.” The dilutive effect of all potentially dilutive common shares is calculated using the treasury stock method.
(2) Source data for calculations in thousands.

4. Fair Value Measurements

We consider the carrying amounts of cash, cash equivalents and other current assets and current liabilities (not including derivatives and the current portion of long-term debt) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to the three-tier fair value hierarchy. For a description of the methods and assumptions that we use to a) estimate the fair value; and b) determine the classification according to the fair value hierarchy for each financial instrument, see Note 4, “Fair Value Measurements,” in our 2017 Annual Report on Form 10-K.

Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of March 31, 2018, included the price of our common stock, the time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 8, “Derivatives,” the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of income. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such derivative instruments is mitigated.

The net changes in fair value of Level 3 financial instruments were insignificant to our results of operations for the three months ended March 31, 2018.

Our financial instruments measured at fair value on a recurring basis at March 31, 2018, were as follows:

	Total	Quoted Market Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(In millions)		
Corporate debt securities	$ 1,618	$ —	$ 1,618	$ —
U.S. treasury notes	329	329	—	—
Government-sponsored enterprise securities (GSEs)	227	227	—	—
Municipal securities	131	—	131	—
Asset-backed securities	110	—	110	—
Certificate of deposit	27	—	27	—
Other	2	—	2	—
Subtotal - current investments	2,444	556	1,888	—
Corporate debt securities	66	—	66	—
U.S. treasury notes	11	11	—	—
Subtotal - current restricted investments	77	11	66	—
1.125% Call Option derivative asset	585	—	—	585
Total assets	$ 3,106	$ 567	$ 1,954	$ 585
1.125% Conversion Option derivative liability	$ 585	$ —	$ —	$ 585
Total liabilities	$ 585	$ —	$ —	$ 585

Our financial instruments measured at fair value on a recurring basis at December 31, 2017, were as follows:

	Total	Quoted Market Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(In millions)		
Corporate debt securities	$ 1,588	$ —	$ 1,588	$ —
U.S. treasury notes	388	388	—	—
GSEs	253	253	—	—
Municipal securities	141	—	141	—
Asset-backed securities	117	—	117	—
Certificates of deposit	37	—	37	—
Subtotal - current investments	2,524	641	1,883	—
Corporate debt securities	101	—	101	—
U.S. treasury notes	68	68	—	—
Subtotal - current restricted investments	169	68	101	—
1.125% Call Option derivative asset	522	—	—	522
Total assets	$ 3,215	$ 709	$ 1,984	$ 522
1.125% Conversion Option derivative liability	$ 522	$ —	$ —	$ 522
Total liabilities	$ 522	$ —	$ —	$ 522

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted market prices for similar securities in active markets or quoted prices for identical securities in inactive markets. The carrying amount and estimated fair value of the amount due under our Credit Facility is classified as a Level 3 financial instrument, because certain inputs used to determine its fair value are not observable. The carrying amount of the amount due under the Credit Facility approximates its fair value because the Credit Facility's interest rate is a variable rate that approximates rates currently available to us.

	March 31, 2018		December 31, 2017	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	(In millions)			
5.375% Notes	$ 693	$ 694	$ 692	$ 730
1.125% Convertible Notes	502	1,111	496	1,052
4.875% Notes	326	307	325	329
Credit Facility	300	300	300	300
1.625% Convertible Notes	63	90	157	220
	$ 1,884	$ 2,502	$ 1,970	$ 2,631

5. Investments

Available-for-Sale Investments

We consider all of our investments classified as current assets (including restricted investments) to be available-for-sale. Certain of our senior notes, as further discussed in Note 7, "Debt," contain a limitation on the use of proceeds which required us to deposit the net proceeds from their issuance into a segregated deposit account, a current asset reported as "Restricted investments" in the accompanying consolidated balance sheets. Such proceeds, while restricted as to their use and held in a segregated deposit account, are available-for-sale based upon our contractual liquidity requirements.

The following tables summarize our investments as of the dates indicated:

	March 31, 2018			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 1,627	$ —	$ 9	$ 1,618
U.S. treasury notes	330	—	1	329
GSEs	229	—	2	227
Municipal securities	133	—	2	131
Asset backed securities	111	—	1	110
Certificates of deposit	27	—	—	27
Other	2	—	—	2
Subtotal - current investments	2,459	—	15	2,444
Corporate debt securities	66	—	—	66
U.S. treasury notes	11	—	—	11
Subtotal - current restricted investments	77	—	—	77
	$ 2,536	$ —	$ 15	$ 2,521

	December 31, 2017			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 1,591	$ 1	$ 4	$ 1,588
U.S. treasury notes	389	—	1	388
GSEs	255	—	2	253
Municipal securities	142	—	1	141
Asset-backed securities	117	—	—	117
Certificates of deposit	37	—	—	37
Subtotal - current investments	2,531	1	8	2,524
Corporate debt securities	101	—	—	101
U.S. treasury notes	68	—	—	68
Subtotal - current restricted investments	169	—	—	169
	$ 2,700	$ 1	$ 8	$ 2,693

The contractual maturities of our available-for-sale investments as of March 31, 2018 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 1,576	$ 1,573
Due after one year through five years	959	947
Due after five years through ten years	1	1
	$ 2,536	$ 2,521

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the three months ended March 31, 2018 and 2017 were insignificant.

We have determined that unrealized losses at March 31, 2018 and December 31, 2017, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the creditworthiness of the issuers. So long as we maintain the intent and ability to hold these securities to maturity, we are unlikely to experience losses. In the event that we dispose of these securities before maturity, we expect that realized losses, if any, will be insignificant.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of March 31, 2018:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 1,276	$ 7	610	$ 93	$ 2	71
U.S. Treasury notes	364	1	81	—	—	—
GSEs	179	1	67	95	1	47
Municipal securities	85	1	97	38	1	46
Asset backed securities	97	1	60	—	—	—
	$ 2,001	$ 11	915	$ 226	$ 4	164

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of December 31, 2017:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 1,297	$ 3	561	$ 94	$ 1	69
U.S. Treasury Notes	470	1	89	—	—	—
GSEs	173	1	69	95	1	47
Municipal securities	—	—	—	38	1	48
	$ 1,940	$ 5	719	$ 227	$ 3	164

Held-to-Maturity Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by government authorities primarily in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. The use of these funds is limited as required by regulations in the various states in which we operate, or as needed in the event of insolvency of capitated providers. Therefore, such investments are reported as non-current "Restricted investments" in the accompanying consolidated balance sheets. We have the ability to hold these restricted investments until maturity, and as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates.

The contractual maturities of our held-to-maturity restricted investments, which are carried at amortized cost, which approximates fair value, as of March 31, 2018, are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 117	$ 117
Due after one year through five years	3	3
	$ 120	$ 120

6. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated:

	March 31, 2018	December 31, 2017
	(In millions)	
Fee-for-service claims incurred but not paid (IBNP)	$ 1,586	$ 1,717
Pharmacy payable	127	112
Capitation payable	62	67
Other	248	296
	$ 2,023	$ 2,192

"Other" medical claims and benefits payable includes amounts payable to certain providers for which we act as an intermediary on behalf of various government agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. Non-risk provider payables amounted to $146 million and $122 million as of March 31, 2018 and December 31, 2017, respectively.

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts presented for "Components of medical care costs related to: Prior periods" represent the amounts by which our original estimate of medical claims and benefits payable at the beginning of the

period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Three Months Ended March 31,	
	2018	2017
	(Dollars in millions)	
Medical claims and benefits payable, beginning balance	$ 2,192	$ 1,929
Components of medical care costs related to:		
Current period	3,963	4,253
Prior periods	(241)	(142)
Total medical care costs	3,722	4,111
Change in non-risk provider payables	45	(96)
Payments for medical care costs related to:		
Current period	2,498	2,683
Prior periods	1,438	1,335
Total paid	3,936	4,018
Medical claims and benefits payable, ending balance	$ 2,023	$ 1,926
Benefit from prior period as a percentage of:		
Balance at beginning of period	11.0%	7.4%
Premium revenue, trailing twelve months	1.3%	0.8%
Medical care costs, trailing twelve months	1.4%	0.9%

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims deviation and the accrued cost of settling those claims. Because we establish the provision for adverse claims deviation and the accrued cost of settling claims on a consistent basis every quarter, the lower cost recognized in a subsequent period if such a provision proved unnecessary would be offset by the establishment of a similar provision during that subsequent period.

Because the amount of our initial liability is an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate—we only know when the circumstances for any one or more factors are out of the ordinary.

The differences between our original estimates and the amounts ultimately paid out for the most part relate to IBNP. While many related factors working in conjunction with one another serve to determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We believe that the most significant uncertainties surrounding our IBNP estimates at March 31, 2018 are as follows:

- Across all of our health plans, the inventory of unpaid claims increased significantly during the first half of 2017, then decreased in the last half of 2017 and into 2018. Changes in claims inventories impact the timing between date of service and the date of claim payment, increasing the volatility of our liability estimates.
- According to The Centers for Disease Control and Prevention, and confirmed by our own claims experience, the influenza season was much more severe this year than last year in several states in which we operate health plans. Although we have established liabilities for additional expected claims related to influenza, our liability estimates are subject to more than the usual amount of uncertainty.

- At our Florida health plan a new clinical service system was implemented in the first quarter of 2018. This system impacted the reporting of inpatient authorizations used in our development of claims liabilities, which makes our liability estimates subject to more than the usual amount of uncertainty.
- We recently implemented a new process for increased quality review of claims payments in nine of our health plans. While we do not anticipate this new process will impact the percentage of claims paid within the timely turnaround requirements, we believe it will have a minor impact on the timing of some paid claims. For this reason, our liability estimates in the nine health plans are subject to more than the usual amount of uncertainty.

We recognized favorable prior period claims development in the amount of $241 million for the three months ended March 31, 2018. This amount represents our estimate as of March 31, 2018, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2017, was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation was due primarily to the following factors:

- The impact of the provision for adverse claims deviation and the accrued cost of settling claims as discussed above. Because we re-establish the provision for adverse claims deviation and the accrued cost of settling claims on a consistent basis every quarter, the impact of this item on first quarter 2018 results was minimal.
- Across all of our health plans, the inventory of unpaid claims increased significantly during the first half of 2017, then decreased in the last half of 2017. In hindsight, the impact of the changes in claims processing timing reduced our liabilities more than we had anticipated.
- December 2017 data from The Centers for Disease Control and Prevention indicated widespread influenza activity in several states in which we operate health plans. The additional liabilities established in consideration of increased claims related to a more severe influenza season turned out to be conservative.
- In establishing our liability at December 31, 2017, we anticipated an increase in the utilization of medical services by Marketplace members concerned about the future of their healthcare coverage as a result of uncertainties related to high premium increases and issuer exits. This induced demand did not materialize to the degree we expected.

7. Debt

Substantially all of our debt is held at the parent, which is reported in the Other segment. The following table summarizes our outstanding debt obligations and their classification in the accompanying consolidated balance sheets:

	March 31, 2018	December 31, 2017
	(In millions)	
Current portion of long-term debt:		
1.125% Convertible Notes, net of unamortized discount	$ 505	$ 499
1.625% Convertible Notes, net of unamortized discount	63	157
Lease financing obligations	1	1
Debt issuance costs	(3)	(4)
	566	653
Non-current portion of long-term debt:		
5.375% Notes	700	700
4.875% Notes	330	330
Credit Facility	300	300
Debt issuance costs	(12)	(12)
	1,318	1,318
Lease financing obligations	198	198
	$ 2,082	$ 2,169

Interest cost recognized relating to our convertible senior notes for the periods presented was as follows:

	Three Months Ended March 31,	
	2018	2017
	(In millions)	
Contractual interest at coupon rate	$ 2	$ 3
Amortization of the discount	7	8
	$ 9	$ 11

Credit Facility

In January 2017, we entered into an amended unsecured $500 million revolving credit facility (Credit Facility). The Credit Facility has a term of five years and all amounts outstanding will be due and payable on January 31, 2022. As of March 31, 2018, $300 million was outstanding under the Credit Facility, and outstanding letters of credit amounting to $6 million reduced our remaining borrowing capacity under the Credit Facility to $194 million.

Borrowings under our Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee. The Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. As of March 31, 2018, we were in compliance with all financial and non-financial covenants under the Credit Facility and other long-term debt.

Bridge Credit Agreement

In January 2018, we entered into a bridge credit agreement (Bridge Credit Agreement) with several banks. Under the Bridge Credit Agreement, we may borrow up to $550 million to: (i) satisfy conversions of our 1.125% Convertible Notes; (ii) satisfy and/or refinance indebtedness incurred to satisfy conversion of the 1.125% Convertible Notes; (iii) repay or refinance our Credit Facility; and (iv) pay fees and expenses in connection with the foregoing. Subject to the satisfaction of certain conditions, the remaining amount of any borrowing may be used for general corporate purposes.

Borrowings under the Bridge Credit Agreement are reduced by the following:

- Any future debt and/or equity transactions including term loans, but excluding any Credit Facility drawing (excluding transactions with proceeds used for working capital purposes and acquisition financings up to $300 million); and
- On August 20, 2018 (the first put date for the 1.625% Convertible Notes), the Bridge Credit Agreement shall permanently be reduced by the greater of $150 million; and the principal amount of the 1.625% Convertible Notes that are exchanged into equity or otherwise defeased on or prior to that date.

The Bridge Credit Agreement matures on January 1, 2019 and, subject to the satisfaction of certain conditions, we may elect to extend twice the initial maturity date by a period of six months each. The amount available for borrowing under the Bridge Credit Agreement at March 31, 2018, was $550 million.

Borrowings under the Bridge Credit Agreement will bear interest based, at our election, at a base rate or an adjusted LIBOR rate, plus in each case the applicable margin. Our wholly owned subsidiaries that guarantee our obligations under the indenture governing the 4.875% Notes, the 5.375% Notes, and the Credit Facility have jointly and severally guaranteed our obligations under the Bridge Credit Agreement.

The Bridge Credit Agreement contains usual and customary (a) affirmative covenants for credit facilities of this type and substantially similar to those contained in the Credit Facility, (b) negative covenants consistent with those contained in the 4.875% Notes and (c) events of default for credit facilities of this type and substantially similar to those contained in the 4.875% Notes.

4.875% Notes due 2025

We have outstanding $330 million aggregate principal amount of senior notes (4.875% Notes) due June 15, 2025, unless earlier redeemed. Interest on the 4.875% Notes is payable semiannually in arrears on June 15 and December 15. Guarantees under the 4.875% Notes mirror those of the Credit Facility. See Note 13, “Supplemental Condensed Consolidating Financial Information,” for more information on the guarantors. The 4.875% Notes contain customary non-financial covenants and change of control provisions.

The 4.875% Notes contain a limitation on the use of proceeds which required us to deposit the net proceeds from their issuance into a segregated deposit account, a current asset reported as “Restricted investments” in our consolidated balance sheets. These funds may be used by us as follows:

- On or prior to August 20, 2018, to:
  - Redeem, repurchase, repay, tender for, or acquire for value all or any portion of our 1.625% Convertible Notes, defined and discussed further below, or to satisfy the cash portion of any consideration due upon any conversion of the 1.625% Convertible Notes; and/or
  - Pay any interest due on all or any portion of the 4.875% Notes.
- On or after August 20, 2018, to repurchase all or any portion of the 1.625% Convertible Notes that we are obligated to repurchase; and
- Subsequent to August 20, 2018 (or such earlier date in the event that there are no longer any 1.625% Convertible Notes outstanding), in any other manner not otherwise prohibited in the indenture governing the 4.875% Notes.

The investments that constitute the segregated funds are current assets reported as “Restricted investments” in the accompanying consolidated balance sheets. As a result of the 1.625% Exchange described below, approximately $94 million of such investments were transferred to unrestricted current investments in the first quarter of 2018. As of March 31, 2018, the balance of current restricted investments was $77 million.

5.375% Notes due 2022

We have outstanding $700 million aggregate principal amount of senior notes (5.375% Notes) due November 15, 2022, unless earlier redeemed. Interest on the 5.375% Notes is payable semiannually in arrears on May 15 and November 15. Certain of our wholly owned subsidiaries guarantee our obligations under the 5.375% Notes. Such guarantees mirror those of the Credit Facility. See Note 13, “Supplemental Condensed Consolidating Financial Information,” for more information on the guarantors. The 5.375% Notes contain customary non-financial covenants and change in control provisions.

1.125% Cash Convertible Senior Notes due 2020

We have outstanding $550 million aggregate principal amount of 1.125% cash convertible senior notes due January 15, 2020 (1.125% Convertible Notes), unless earlier repurchased or converted. Interest is payable semiannually in arrears on January 15 and July 15.

The 1.125% Convertible Notes are convertible only into cash, and not into shares of our common stock or any other securities. The initial conversion rate for the 1.125% Convertible Notes is 24.5277 shares of our common stock per $1,000 principal amount, or approximately $40.77 per share of our common stock. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Convertible Notes, equal to the settlement amount, determined in the manner set forth in the indenture. We may not redeem the 1.125% Convertible Notes prior to the maturity date.

The stock price trigger for the 1.125% Convertible Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended March 31, 2018; therefore, they are convertible into cash and are reported in current portion of long-term debt as of March 31, 2018.

The 1.125% Convertible Notes contain an embedded cash conversion option (the 1.125% Conversion Option), which was separated from the 1.125% Convertible Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the 1.125% Conversion Option settles or expires. The effective interest rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued is approximately 6%. As of March 31, 2018, the 1.125% Convertible Notes had a remaining amortization period of 1.8 years. The 1.125% Convertible Notes’ if-converted value exceeded their principal amount by approximately $527 million and $406 million as of March 31, 2018 and December 31, 2017, respectively.

1.625% Convertible Senior Notes due 2044

In March 2018, we entered into separate, privately negotiated, synthetic exchange agreements (1.625% Exchange) with certain holders of our outstanding 1.625% convertible senior notes due 2044 (1.625% Convertible Notes). In this transaction, we exchanged $97 million aggregate principal amount and accrued interest for 1.8 million shares of our common stock. We recorded a loss on debt extinguishment, including transaction fees, of $10 million, for the transaction, primarily relating to the inducement premium paid to the bondholders, which is recorded in “Other

expenses (income), net" in the accompanying consolidated statements of income. We did not receive any proceeds from the 1.625% Exchange.

Following the 1.625% Exchange, we have outstanding $64 million aggregate principal amount of the 1.625% Convertible Notes. The initial conversion rate for the 1.625% Convertible Notes is 17.2157 shares of our common stock per $1,000 principal amount, or approximately $58.09 per share of our common stock. Upon conversion, we will pay cash and, if applicable, deliver shares of our common stock to the converting holder in an amount per $1,000 principal amount of 1.625% Notes equal to the settlement amount (as defined in the related indenture).

The stock price trigger for the 1.625% Convertible Notes is $75.51 per share. The 1.625% Convertible Notes did not meet this stock price trigger in the quarter ended March 31, 2018. However, on contractually specified dates beginning in August 2018, holders of the 1.625% Convertible Notes may require us to repurchase some or all of such notes. In addition, beginning May 15, 2018 until August 19, 2018, holders may convert some or all of the 1.625% Convertible Notes. Because of these put and conversion features, the 1.625% Convertible Notes are reported in current portion of long-term debt as of March 31, 2018. As noted above, because the proceeds from the 4.875% Notes are initially restricted to payments upon conversion or redemption of the 1.625% Convertible Notes, such restricted investments are also classified as current in the accompanying consolidated balance sheets.

The expected life of the 1.625% Convertible Notes is approximately four years, beginning on the issuance date and ending on the first date we may redeem the 1.625% Convertible Notes in August 2018. As of March 31, 2018, the 1.625% Convertible Notes had a remaining amortization period of 0.4 years. The effective interest rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued is approximately 5%. The outstanding 1.625% Convertible Notes' if-converted value exceeded their principal amount at March 31, 2018 and December 31, 2017 by approximately $19 million and $50 million, respectively. At March 31, 2018 and December 31, 2017, the equity component of the 1.625% Convertible Notes, including the impact of deferred taxes, was $5 million and $12 million, respectively.

Cross-Default Provisions

The indentures governing the 4.875% Notes, the 5.375% Notes, the 1.125% Convertible Notes and the 1.625% Convertible Notes contain cross-default provisions that are triggered upon default by us or any of our subsidiaries on any indebtedness in excess of the amount specified in the applicable indenture.

8. Derivatives

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the accompanying consolidated balance sheets:

	Balance Sheet Location	March 31, 2018	December 31, 2017
		(In millions)	
Derivative asset:			
1.125% Call Option	Current assets: Derivative asset	$ 585	$ 522
Derivative liability:			
1.125% Conversion Option	Current liabilities: Derivative liability	$ 585	$ 522

Our derivative financial instruments do not qualify for hedge treatment; therefore, the change in fair value of these instruments is recognized immediately in our consolidated statements of income, and reported in "Other expenses (income), net." Gains and losses for our derivative financial instruments are presented individually in the accompanying consolidated statements of cash flows, "Supplemental cash flow information."

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Convertible Notes in 2013, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Convertible Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Convertible Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Convertible Notes), these transactions are intended to offset cash payments in excess of the principal amount of the 1.125% Convertible Notes due upon any conversion of such notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 4, “Fair Value Measurements.”

1.125% Conversion Option. The embedded cash conversion option within the 1.125% Convertible Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Conversion Option, refer to Note 4, “Fair Value Measurements.”

As of March 31, 2018, the 1.125% Call Option and the 1.125% Conversion Option were classified as a current asset and current liability, respectively, because the 1.125% Convertible Notes may be converted within twelve months of March 31, 2018, as described in Note 7, “Debt.”

9. Stockholders' Equity

1.625% Exchange

As described in Note 7, “Debt,” we issued 1.8 million shares of our common stock in connection with the 1.625% Exchange in March 2018.

1.125% Warrants

In connection with the Call Spread Overlay transaction described in Note 8, “Derivatives,” in 2013, we issued 13,490,236 warrants with a strike price of $53.8475 per share. Under certain circumstances, beginning in April 2020, when the price of our common stock exceeds the strike price of the 1.125% Warrants, we will be obligated to issue shares of our common stock subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock exceeds the applicable strike price of the 1.125% Warrants. Refer to Note 3, “Net Income per Share,” for dilution information for the periods presented. We will not receive any additional proceeds if the 1.125% Warrants are exercised.

Share-Based Compensation

In connection with our equity incentive plans and employee stock purchase plan, approximately 127,000 shares of common stock vested or were purchased, net of shares used to settle employees’ income tax obligations, during the three months ended March 31, 2018.

We record share-based compensation as “General and administrative expenses” in the accompanying consolidated statements of income. As of March 31, 2018, there was $53 million of total unrecognized compensation expense related to unvested restricted stock awards (RSAs), performance stock awards (PSAs), and performance stock units (PSUs), which we expect to recognize over a remaining weighted-average period of 3.2 years, 0.9 years and 2.7 years, respectively. This unrecognized compensation cost assumes an estimated forfeiture rate of 9.7% for non-executive employees as of March 31, 2018.

Also as of March 31, 2018, there was $13 million of total unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 2.5 years. No stock options were granted or exercised in the three months ended March 31, 2018.

Activity for RSAs, PSAs and PSUs, for the three months ended March 31, 2018, is summarized below:

	Restricted Stock Awards	Performance Stock Awards	Performance Stock Units	Total	Weighted Average Grant Date Fair Value
Unvested balance, December 31, 2017	401,804	84,762	91,828	578,394	$ 58.35
Granted	321,798	—	188,455	510,253	72.46
Vested	(163,043)	(32,929)	—	(195,972)	55.16
Forfeited	(59,931)	(44,384)	(47,650)	(151,965)	62.99
Unvested balance, March 31, 2018	500,628	7,449	232,633	740,710	67.96

The total fair value of awards granted and vested is presented in the following table:

	Three Months Ended March 31,	
	2018	2017
	(In millions)	
Granted:		
Restricted stock awards	$ 23	$ 17
Performance stock units	14	—
	$ 37	$ 17
Vested:		
Restricted stock awards	$ 12	$ 10
Performance stock awards	3	6
	$ 15	$ 16

10. Restructuring and Separation Costs

Following a management-initiated, broad operational assessment in early 2017, our board of directors approved, and we committed to, a comprehensive restructuring and profitability improvement plan in June 2017 (the 2017 Restructuring Plan). Key activities under this plan to date have included:

- Streamlining of our organizational structure to eliminate redundant layers of management, consolidate regional support services, and other staff reductions to improve efficiency and the speed and quality of decision making;
- Re-design of core operating processes such as provider payment, utilization management, quality monitoring and improvement, and information technology, to achieve more effective and cost-efficient outcomes;
- Remediation of high-cost provider contracts and enhancement of high quality, cost-effective networks;
- Restructuring, including selective exits, of direct delivery operations; and
- Partnering with the lowest-cost, most effective vendors.

Costs Incurred

In our 2017 Annual Report on Form 10-K, we reported that we had incurred substantially all of the costs associated with the 2017 Restructuring Plan in 2017, amounting to $234 million. In the first quarter of 2018, we incurred an additional $25 million in such costs, primarily as a result of our further evaluation of a utilization and care management project terminated because of its inconsistency with the goals of the 2017 Restructuring Plan. As a result, assets relating to this project were written off. In addition, we recorded nominal amounts for one-time termination benefits, and true-ups of consulting fees and contract termination costs recorded in 2017. We expect to complete all activities under the 2017 Restructuring Plan in 2018, with the exception of the settlement of lease termination liabilities. We expect to continue to settle those liabilities through 2025, unless the leases are terminated sooner.

Restructuring and separation costs are reported by the same name in the accompanying consolidated statements of income. The following tables present the major types of such costs by segment. Current and long-lived assets include current and non-current capitalized project costs, and capitalized software determined to be unrecoverable.

	Three Months Ended March 31, 2018				
		Other Restructuring Costs			
	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)				
Health Plans	$ 1	$ (1)	$ —	$ (1)	$ (1)
Other	5	20	1	—	26
	$ 6	$ 19	$ 1	$ (1)	$ 25

No restructuring costs were reported in the first quarter of 2017.

As of March 31, 2018, we had incurred cumulative restructuring costs under the 2017 Restructuring Plan as follows:

			Other Restructuring Costs			
	Separation Costs - Former Executives	One-Time Termination Benefits	Write-offs of Current and Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)					
Health Plans	$ —	$ 34	$ 15	$ —	$ 23	$ 72
Molina Medicaid Solutions	—	—	8	—	—	8
Other	36	39	57	45	2	179
	$ 36	$ 73	$ 80	$ 45	$ 25	$ 259

Reconciliation of Liability

For those restructuring and separation costs that require cash settlement (primarily separation costs, one-time termination benefits, consulting fees and contract termination costs), the following table presents a roll-forward of the accrued liability, which is reported in “Accounts payable and accrued liabilities” in the accompanying consolidated balance sheets. The adjustments are due to true-ups of consulting fees and contract termination costs recorded in 2017.

	Separation Costs - Former Executives	One-Time Termination Benefits	Other Restructuring Costs	Total
	(In millions)			
Accrued as of December 31, 2017	$ 2	$ 11	$ 35	$ 48
Adjustments	—	—	(1)	(1)
Charges	—	6	2	8
Cash payments	(2)	(12)	(9)	(23)
Accrued as of March 31, 2018	$ —	$ 5	$ 27	$ 32

11. Segments

We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment. Our reportable segments are consistent with how we currently manage the business and view the markets we serve.

Gross margin is the appropriate earnings measure for our reportable segments, based on how our chief operating decision maker currently reviews results, assesses performance, and allocates resources.

Gross margin for our Health Plans segment is referred to as “Medical margin,” and for our Molina Medicaid Solutions and Other segments, as “Service margin.” Medical margin represents the amount earned by the Health Plans segment after medical care costs are deducted from premium revenue. The medical care ratio represents medical care costs as a percentage of premium revenue, and is one of the key metrics used to assess the performance of the Health Plans segment. Therefore, the underlying medical margin is the most important measure

of earnings reviewed by the chief operating decision maker. The service margin is equal to service revenue minus cost of service revenue.

The following table presents total revenue by segment. Inter-segment revenue is insignificant for all periods presented.

	Three Months Ended March 31,	
	2018	2017
	(In millions)	
Total revenue:		
Health Plans	$ 4,509	$ 4,771
Molina Medicaid Solutions	51	46
Other	86	87
Consolidated	$ 4,646	$ 4,904

The following table reconciles gross margin by segment to consolidated income before income tax expense:

	Three Months Ended March 31,	
	2018	2017
	(In millions)	
Gross margin:		
Health Plans	$ 601	$ 537
Molina Medicaid Solutions	8	4
Other	6	5
Total gross margin	615	546
Add: other operating revenues (1)	189	125
Less: other operating expenses (2)	(582)	(589)
Operating income	222	82
Other expenses (income), net	43	(49)
Income before income taxes	$ 179	$ 131

(1) Other operating revenues include premium tax revenue, health insurer fees reimbursed, and investment income and other revenue.

(2) Other operating expenses include general and administrative expenses, premium tax expenses, health insurer fees, depreciation and amortization, and restructuring and separation costs.

12. Commitments and Contingencies

Regulatory Capital Requirements and Dividend Restrictions

Our health plans, which are operated by our wholly owned subsidiaries in the states in which our health plans operate, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based on current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $1,777 million at March 31, 2018, and $1,691 million at December 31, 2017. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments (excluding restricted investments) held by the parent company—Molina Healthcare, Inc. Such cash, cash equivalents and investments (excluding restricted investments) amounted to $706 million and $696 million as of March 31, 2018 and December 31, 2017, respectively.

The National Association of Insurance Commissioners (NAIC) adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules which may vary from state to state. All of the states and Commonwealth in which our health plans operate, except California, Florida and New York, have adopted these rules. Such requirements, if adopted by California, Florida and New York, may increase the minimum capital required for those states.

As of March 31, 2018, our health plans had aggregate statutory capital and surplus of approximately $1,904 million compared with the required minimum aggregate statutory capital and surplus of approximately $1,181 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2018. We have the ability, and have committed to provide, additional capital to each of our health plans as necessary to ensure compliance with statutory capital and surplus requirements.

Legal Proceedings

The health care and Medicaid-related business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and reasonably estimable, but the outcome of legal actions is inherently uncertain and our estimates of such losses could change as a result of further developments of these matters. For certain pending matters, accruals have not been established because such matters have not progressed sufficiently through discovery, and/or development of important factual information and legal issues is insufficient to enable us to estimate a range of possible loss, if any. An adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Steamfitters Local 449 Pension Plan v. Molina Healthcare, Inc, et al. On April 27, 2018, the Steamfitters Local 449 Pension Plan filed a class action securities complaint in the Central District Court of California against the Company and its former executive officers, J. Mario Molina, John C. Molina, Terry P. Bayer, and Rick Hopfer, Case 2:18-cv-03579. The complaint purports to seek recovery on behalf of all persons or entities who purchased Molina common stock between October 31, 2014 and August 2, 2017 for alleged violations under Sections 10(b) and 20(a) of the Securities Exchange Act and Rule 10b-5 promulgated thereunder. The plaintiff alleges the defendants misled investors regarding the scalability of the Company's administrative infrastructure during the identified class period. The Company believes it has meritorious defenses to the alleged claims and intends to defend the matter vigorously.

States' Budgets

Nearly all of our premium revenues come from the joint federal and state funding of the Medicaid and CHIP programs. The states and Commonwealth in which we operate our health plans regularly face significant budgetary pressures.

13. Supplemental Condensed Consolidating Financial Information

As discussed in Note 7, "Debt," we have outstanding $700 million aggregate principal amount of 5.375% Notes due November 15, 2022, unless earlier redeemed. The 5.375% Notes were registered in September 2016, and are fully and unconditionally guaranteed by certain of our wholly owned subsidiaries on a joint and several basis, with exceptions considered customary for such guarantees.

For all periods presented, the following condensed consolidating financial statements present Molina Healthcare, Inc. (as "Parent Guarantor"), the subsidiary guarantors (as "Other Guarantors"), the subsidiary non-guarantors (as "Non-Guarantors") and "Eliminations", according to the guarantor structure as assessed as of and for the three months ended March 31, 2018.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (MD&A)

FORWARD-LOOKING STATEMENTS

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated. Those known risks and uncertainties include, but are not limited to, the following:

- *the success of the Company's profit improvement and maintenance initiatives, including the timing and amounts of the benefits realized, and administrative savings achieved;*
- *the numerous political and market-based uncertainties associated with the Affordable Care Act (the "ACA") or "Obamacare;"*
- *the market dynamics surrounding the ACA Marketplaces, including but not limited to uncertainties associated with risk transfer requirements, the potential for disproportionate enrollment of higher acuity members, the discontinuation of premium tax credits, and the adequacy of agreed rates;*
- *subsequent adjustments to reported premium revenue based upon subsequent developments or new information, including changes to estimated amounts payable or receivable related to Marketplace risk adjustment/risk transfer;*
- *effective management of the Company's medical costs;*
- *the Company's ability to predict with a reasonable degree of accuracy utilization rates, including utilization rates associated with seasonal flu patterns or other newly emergent diseases;*
- *significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;*
- *the Company's ability to manage its operations, including maintaining and creating adequate internal systems and controls relating to authorizations, approvals, provider payments, and the overall success of its care management initiatives;*
- *the Company's ability to consummate and realize benefits from acquisitions or divestitures;*
- *the Company's receipt of adequate premium rates to support increasing pharmacy costs, including costs associated with specialty drugs and costs resulting from formulary changes that allow the option of higher-priced non-generic drugs;*
- *the Company's ability to operate profitably in an environment where the trend in premium rate increases lags behind the trend in increasing medical costs;*
- *the interpretation and implementation of federal or state medical cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit sharing arrangements, and risk adjustment provisions and requirements;*
- *the Company's estimates of amounts owed for such cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit-sharing arrangements, and risk adjustment provisions;*
- *the Medicaid expansion cost corridors in California, New Mexico, and Washington, and any other retroactive adjustment to revenue where methodologies and procedures are subject to interpretation or dependent upon information about the health status of participants other than Molina members;*
- *the interpretation and implementation of at-risk premium rules and state contract performance requirements regarding the achievement of certain quality measures, and the Company's ability to recognize revenue amounts associated therewith;*

- *cyber-attacks or other privacy or data security incidents resulting in an inadvertent unauthorized disclosure of protected health information;*
- *the success of the Company's health plan in Puerto Rico, including the resolution of the Puerto Rico debt crisis, payment of all amounts due under the Company's Medicaid contract, the effect of the PROMESA law, the impact of Hurricane Maria and the Company's efforts to better manage the health care costs of its Puerto Rico health plan;*
- *the success and renewal of the Company's duals demonstration programs in California, Illinois, Michigan, Ohio, South Carolina, and Texas;*
- *the accurate estimation of incurred but not reported or paid medical costs across the Company's health plans;*
- *efforts by states to recoup previously paid and recognized premium amounts;*
- *complications, member confusion, or enrollment backlogs related to the annual renewal of Medicaid coverage;*
- *government audits and reviews, or potential investigations, and any fine, sanction, enrollment freeze, monitoring program, or premium recovery that may result therefrom;*
- *changes with respect to the Company's provider contracts and the loss of providers;*
- *approval by state regulators of dividends and distributions by the Company's health plan subsidiaries;*
- *changes in funding under the Company's contracts as a result of regulatory changes, programmatic adjustments, or other reforms;*
- *high dollar claims related to catastrophic illness;*
- *the favorable resolution of litigation, arbitration, or administrative proceedings;*
- *the relatively small number of states in which we operate health plans, including the greater scale and revenues of the Company's California, Ohio, Texas, and Washington health plans;*
- *the availability of adequate financing on acceptable terms to fund and capitalize the Company's expansion and growth, repay the Company's outstanding indebtedness at maturity and meet its liquidity needs, including the interest expense and other costs associated with such financing;*
- *the Company's failure to comply with the financial or other covenants in its credit agreements or the indentures governing its outstanding notes;*
- *the sufficiency of the Company's funds on hand to pay the amounts due upon conversion or maturity of its outstanding notes;*
- *the failure of a state in which we operate to renew its federal Medicaid waiver;*
- *changes generally affecting the managed care or Medicaid management information systems industries;*
- *increases in government surcharges, taxes, and assessments, including but not limited to the deductibility of certain compensation costs;*
- *newly emergent viruses or widespread epidemics, public catastrophes or terrorist attacks, and associated public alarm; and*
- *increasing competition and consolidation in the Medicaid industry;*

Readers should refer to the section entitled "Risk Factors" in each of our Annual Report on Form 10-K for the year ended December 31, 2017, and this Quarterly Report on Form 10-Q, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This Quarterly Report on Form 10-Q and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2017.

ABOUT MOLINA HEALTHCARE

OUR MISSION IS TO PROVIDE QUALITY HEALTHCARE TO PEOPLE RECEIVING GOVERNMENT ASSISTANCE.

Molina Healthcare, Inc. provides quality managed health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

KEY PERFORMANCE INDICATORS

	Three Months Ended March 31,	
	2018	2017
	(Dollar amounts in millions, except per-share amounts)	
Ending total membership	4.1	4.8
Premium revenue	$ 4,323	$ 4,648
Health Plans segment medical margin (1)	$ 601	$ 537
Operating income	$ 222	$ 82
Net income	$ 107	$ 77
Net income per diluted share	$ 1.64	$ 1.37
Diluted weighted average shares outstanding	65.2	56.2
Adjusted net income per diluted share*	$ 1.71	$ 1.47
EBITDA*	$ 246	$ 203
Operating Statistics:		
MCR (2)	86.1%	88.4%
G&A ratio (3)	7.6%	8.9%
Premium tax ratio (2)	2.3%	2.3%
Effective income tax expense rate	40.3%	41.6%
Net profit margin (3)	2.3%	1.6%

(1) Medical margin is equal to premium revenue minus medical care costs.
(2) MCR represents medical care costs as a percentage of premium revenue; premium tax ratio represents premium tax expenses as a percentage of premium revenue plus premium tax revenue.
(3) G&A ratio represents general and administrative expenses as a percentage of total revenue. Net profit margin represents net income as a percentage of total revenue.

Non-GAAP Financial Measures

We use non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance to the performance of other public companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not as substitutes for or superior to, GAAP measures.

See further information regarding non-GAAP measures in the “Supplemental Information” section of this MD&A, including the reconciliations to U.S. GAAP. Non-GAAP financial measures referred to in this report are designated with an asterisk (*).

CONSOLIDATED RESULTS

Three Months Ended March 31, 2018 Compared with Three Months Ended March 31, 2017

Net income for the first quarter of 2018 was $107 million, compared with net income of $77 million for the first quarter of 2017. Net income per diluted share was $1.64 for the first quarter of 2018 compared with $1.37 reported for the first quarter of 2017. Improved performance in the first quarter of 2018 resulted from improved medical and administrative cost efficiency.

Net income for the first quarter of 2018 included a net benefit of $35 million ($0.38 per diluted share) for certain items significant to our financial performance described below. Net income for the first quarter of 2017 included a benefit of $75 million ($0.84 per diluted share) for the receipt of an acquisition termination fee.

Premium revenue decreased approximately 7% when compared with the first quarter of 2017. Lower premium revenue was driven by a decrease in Marketplace membership of over 50%, partially offset by Marketplace premium rate increases. As previously disclosed, we have increased premium rates and reduced our Marketplace presence effective January 1, 2018, as part of our overall program to improve profitability.

Overall, the medical care ratio decreased to 86.1%, from 88.4% in the first quarter of 2017. Excluding the benefit of the 2017 CSR reimbursement, the consolidated medical care ratio was 87.7% in the first quarter of 2018.

- The medical care ratio for the Medicaid and Medicare programs combined decreased to 90.0%, from 91.0% in the first quarter of 2017. Improved performance at the Florida, Illinois, Ohio and South Carolina health plans, partially offset by a decline in performance at the Washington health plan, drove the decrease in the consolidated medical care ratio for Medicaid and Medicare combined. The 2017 CSR reimbursement had no impact on the medical care ratio for the Company's Medicaid and Medicare programs.

- The medical care ratio for the Marketplace operations was 50.6% for the first quarter of 2018. Excluding the impact of the 2017 Marketplace CSR adjustment noted below, the medical care ratio for Marketplace operations decreased to approximately 67%, from 75% in the first quarter of 2017. Improved profitability in Marketplace operations is primarily the result of premium increases implemented effective January 1, 2018.

The general and administrative (G&A) expense ratio decreased to 7.6%, from 8.9% in the first quarter of 2017. Excluding the impact of Marketplace broker commissions and exchange fees in both periods, the G&A ratio decreased to 6.8%, from 7.5% in the first quarter of 2017.This improvement is primarily the result of our efforts to reduce G&A costs under the 2017 Restructuring Plan.

We recognized a benefit of approximately $70 million ($0.83 per diluted share) in reduced medical expense related to 2017 dates of service as a result of the federal government's confirmation that the reconciliation of 2017 Marketplace CSR subsidies would be performed on an annual basis. In the fourth quarter of 2017, we had assumed a nine-month reconciliation of this item pending confirmation of the time period to which the 2017 reconciliation would be applied.

Approximately $25 million ($0.30 per diluted share) of restructuring costs were recognized in the first quarter, primarily relating to the write-off of prepaid and other assets in connection with the continuing re-design of core processes.

Approximately $10 million ($0.15 per diluted share) loss on debt extinguishment was recognized in the first quarter in connection with the issuance of 1.8 million common shares in exchange for $97 million principal amount of our 1.625% Convertible Notes.

The table below summarizes the impact of certain items significant to our financial performance in the periods presented. The individual items presented below increase (decrease) income before income tax expense.

	Three Months Ended March 31,			
	2018		2017	
	Amount	Per Diluted Share [1]	Amount	Per Diluted Share [1]
	(In millions, except per diluted share amounts)			
Reimbursement of Marketplace CSR subsidies, for 2017 dates of service	$ 70	$ 0.83	$ —	$ —
Restructuring costs	(25)	(0.30)	—	—
Loss on debt extinguishment	(10)	(0.15)	—	—
Fee received for terminated acquisition	—	—	75	0.84
	$ 35	$ 0.38	$ 75	$ 0.84

(1) Except for certain items that are not deductible for tax purposes, per diluted share amounts are generally calculated at statutory income tax rates of 22% and 37% for the first quarters of 2018 and 2017, respectively.

TRENDS AND UNCERTAINTIES

MEDICAID CONTRACT RE-PROCUREMENT

The following table illustrates Health Plans segment Medicaid contracts scheduled for re-procurement in the near term. While we have been notified of the Medicaid regulators' intention to re-procure the contracts, the anticipated award dates and effective dates are management's current best estimates; such dates are subject to change. Premium revenue is stated in millions.

State Health Plan	Medicaid Program(s)	Membership as of March 31, 2018	Premium Revenue Three Months Ended March 31, 2018	Anticipated Award Date	Anticipated Effective Date
Puerto Rico	All	316,000	$ 186	Q2 2018	10/1/2018
Texas	ABD, MMP	99,000	479	Q3 2018	1/1/2020
Texas	TANF, CHIP	129,000	77	Q1 2019	1/1/2020
Washington (1)	All in 7 of 9 regions	606,000	444	Q2 2018	1/1/2019

(1) The re-procurement information presented for the Washington health plan includes all Medicaid membership in the following regions: Northeast, Northwest, Central and Southeast, Pierce County, King County, Olympic Peninsula, and West-Central. Five of the seven largest regions' contracts that are awarded will be effective January 1, 2019. The remaining two will be effective on January 1, 2020.

Florida and New Mexico RFP Update. In our Form 10-K Annual Report for 2017, we reported that we were selected by Florida's Medicaid agency to negotiate for a tentative award of a 2019 Medicaid contract in Region 11 of the state. We were selected for no other regions besides Region 11. On April 24, 2018, the state notified us that we were not awarded a contract for Region 11. While we protest the Florida RFP awards, we continue to evaluate our options for 2019 participation in the Florida Marketplace, which business has shown signs of improvement. Also in our Form 10-K for 2017, we reported that we were notified by the New Mexico Medicaid agency that we had not been selected for a tentative award of a 2019 Medicaid contract. We are pursuing a protest of the New Mexico RFP awards. Without a reversal of the RFP awards, our New Mexico health plan will be in run-off. Subject to future developments, we will continue to evaluate our business profile in New Mexico for 2019.

PRESSURES ON MEDICAID FUNDING

Currently, there are a number of different legislative proposals being considered, some of which would involve significantly reduced federal spending on the Medicaid program, and constitute a fundamental change in the federal role in health care. These proposals include elements such as the following:

- Ending the entitlement nature of Medicaid by capping future increases in federal health spending for these programs, and shifting more of the risk for health costs in the future to states and consumers;
- Reversing the ACA's expansion of Medicaid that enables states to cover low-income childless adults;
- Changing Medicaid to a state block grant program, including potentially capping spending on a per-enrollee basis (a "per capita cap");
- Requiring Medicaid beneficiaries to work;
- Limiting the amount of lifetime benefits for Medicaid beneficiaries; and
- Numerous other potential changes and reforms.

ACA AND THE MARKETPLACE

The future of the Affordable Care Act (ACA) and its underlying programs, including the Marketplace, are subject to substantial uncertainty. Effective January 1, 2018, we have:

- Exited the Utah and Wisconsin Marketplaces;
- Reduced the scope of our Washington state participation;
- Increased premiums averaging 58%

- Mitigated our exposure to uncertainties relating to cost share reduction (CSR) funding and reconciliation; and
- Adjusted broker commissions to market rates.

REPORTABLE SEGMENTS

HOW WE ASSESS PERFORMANCE

We derive our revenues primarily from health insurance premiums, and our primary customers are state Medicaid agencies and the federal government.

One of the key metrics used to assess the performance of our most significant segment, the Health Plans segment, is the medical care ratio, ("MCR"). The medical care ratio represents medical care costs as a percentage of premium revenue. Therefore, the underlying gross margin, or the amount earned by the Health Plans segment after medical costs are deducted from premium revenue, is the most important measure of earnings reviewed by management.

Gross margin for our Health Plans segment is referred to as "Medical margin," and for our Molina Medicaid Solutions and Other segments, as "Service margin." The service margin is equal to service revenue minus cost of service revenue. Management's discussion and analysis of the changes in the individual components of medical margin and service margin follows.

SEGMENT SUMMARY

	Three Months Ended March 31,	
	2018	2017
	(In millions)	
Health Plans segment medical margin [1]	$ 601	$ 537
Molina Medicaid Solutions segment service margin [2]	8	4
Other segment service margin [2]	6	5
	$ 615	$ 546
Health Plans segment medical care ratio	86.1%	88.4%

(1) Represents premium revenue minus medical care costs.
(2) Represents service revenue minus cost of service revenue.

HEALTH PLANS

The Health Plans segment consists of health plans operating in 13 states and the Commonwealth of Puerto Rico. As of March 31, 2018, these health plans served approximately 4.1 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Affordable Care Act Marketplace (Marketplace) members, most of whom receive government premium subsidies.

BUSINESS OVERVIEW

Health Plans Membership

The following tables set forth our Health Plans membership as of the dates indicated:

	March 31, 2018	December 31, 2017	March 31, 2017
Ending Membership by Program:			
Temporary Assistance for Needy Families (TANF) and Children's Health Insurance Program (CHIP)	2,435,000	2,457,000	2,548,000
Medicaid Expansion	662,000	668,000	684,000
Aged, Blind or Disabled (ABD)	411,000	412,000	401,000
Total Medicaid	3,508,000	3,537,000	3,633,000
Medicare-Medicaid Plan (MMP) – Integrated [1]	56,000	57,000	55,000
Medicare Special Needs Plans (Medicare)	44,000	44,000	43,000
Total Medicare	100,000	101,000	98,000
Non-Marketplace	3,608,000	3,638,000	3,731,000
Marketplace	453,000	815,000	1,035,000
	4,061,000	4,453,000	4,766,000
Ending Membership by Health Plan:			
California	656,000	746,000	765,000
Florida	414,000	625,000	711,000
Idaho [2]	2,000	—	—
Illinois	151,000	165,000	194,000
Michigan	388,000	398,000	417,000
New Mexico	250,000	253,000	270,000
New York	32,000	32,000	34,000
Ohio	328,000	327,000	351,000
Puerto Rico	316,000	314,000	326,000
South Carolina	117,000	116,000	111,000
Texas	476,000	430,000	493,000
Utah	90,000	152,000	172,000
Washington	779,000	777,000	785,000
Wisconsin	62,000	118,000	137,000
	4,061,000	4,453,000	4,766,000

(1) MMP members receive both Medicaid and Medicare coverage from Molina Healthcare.
(2) Idaho operations commenced January 1, 2018.

Premiums by Program

The amount of the premiums paid to our health plans may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program on a per member per month (PMPM) basis, for the three months ended March 31, 2018. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	PMPM Premiums		
	Low	High	Consolidated
TANF and CHIP	$ 130.00	$ 330.00	$ 190.00
Medicaid Expansion	330.00	500.00	370.00
ABD	440.00	1,530.00	1,010.00
MMP – Integrated	1,320.00	3,200.00	2,140.00
Medicare	600.00	1,380.00	1,190.00
Marketplace	220.00	530.00	310.00

FINANCIAL OVERVIEW

In the first quarter of 2018, premium revenue decreased approximately 7%, or $325 million, when compared with the first quarter of 2017. Member months declined 13%, partially offset by a revenue PMPM increase of 6%. Medical margin increased 12% in the first quarter of 2018 compared with the first quarter of 2017.

Medical care costs as a percent of premium revenue decreased to 86.1% in the first quarter of 2018 from 88.4% in the first quarter of 2017. This improvement reflects improved performance and favorable medical cost trends that were partially offset by a lower mix of Marketplace revenue. On balance, inpatient and physician utilization as well as unit costs improved in the quarter, while pharmacy costs ran higher than expected. This netted to an overall favorable medical cost trend despite the higher pharmacy costs and approximately $18 million of above normal influenza-related expenses.

We have also started to see some of the early benefits from contracting efforts that we undertook last year in Florida, South Carolina and Texas, where we eliminated or renegotiated high cost provider contracts for in-patient, and ancillary services.

FINANCIAL PERFORMANCE BY PROGRAM

The following tables summarize member months, premium revenue, medical care costs, medical care ratio and medical margin by program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

	Three Months Ended March 31, 2018						
	Member Months [1]	Premium Revenue		Medical Care Costs			
		Total	PMPM	Total	PMPM	MCR [2]	Medical Margin
TANF and CHIP	7.4	$ 1,373	$ 185.14	$ 1,272	$ 171.56	92.7%	$ 101
Medicaid Expansion	2.0	752	372.75	641	317.46	85.2	111
ABD	1.2	1,254	1,014.23	1,155	934.55	92.1	99
Total Medicaid	10.6	3,379	316.69	3,068	287.56	90.8	311
MMP	0.2	357	2,137.88	305	1,824.21	85.3	52
Medicare	0.1	157	1,188.97	131	994.81	83.7	26
Total Medicare	0.3	514	1,718.61	436	1,457.75	84.8	78
Non-Marketplace	10.9	3,893	354.94	3,504	319.48	90.0	389
Marketplace	1.4	430	312.87	218	158.40	50.6	212
	12.3	$ 4,323	$ 350.25	$ 3,722	$ 301.55	86.1%	$ 601

	Three Months Ended March 31, 2017						
	Member Months [1]	Premium Revenue		Medical Care Costs		MCR [2]	Medical Margin
		Total	PMPM	Total	PMPM		
TANF and CHIP	7.7	$ 1,402	$ 182.69	$ 1,304	$ 170.02	93.1%	$ 98
Medicaid Expansion	2.0	817	398.70	689	336.51	84.4	128
ABD	1.2	1,196	1,006.84	1,130	951.32	94.5	66
Total Medicaid	10.9	3,415	312.98	3,123	286.35	91.5	292
MMP	0.2	344	2,088.96	307	1,859.41	89.0	37
Medicare	0.1	138	1,068.20	117	902.67	84.5	21
Total Medicare	0.3	482	1,640.63	424	1,439.20	87.7	58
Non-Marketplace	11.2	3,897	347.84	3,547	316.62	91.0	350
Marketplace	2.9	751	262.16	564	196.72	75.0	187
	14.1	$ 4,648	$ 330.39	$ 4,111	$ 292.20	88.4%	$ 537

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) "MCR" represents medical costs as a percentage of premium revenue.

Medicaid

TANF and CHIP. The medical care ratio for TANF and CHIP was 92.7% in the first quarter of 2018, a slight improvement from 93.1% in the first quarter of 2017. However, the current quarter results modestly underperformed our expectations due to high acuity inpatient cases in Washington, and higher behavioral health costs in New Mexico.

Medicaid Expansion. The medical care ratio for Medicaid Expansion was 85.2% in the first quarter of 2018, compared with 84.4% in the first quarter of 2017. This increase was primarily due to the premium reduction we received in California last July. Medicaid Expansion has performed well because rate adequacy has trended favorably, and membership is concentrated in our higher performing health plans, particularly, California, Michigan and Ohio.

ABD. The medical care ratio for ABD was 92.1% in the first quarter of 2018, compared with 94.5% in the first quarter of 2017. The year over year improvement can be attributed to our continued advancement on key, high acuity management fundamentals.

Medicare and MMP

The medical care ratio for the combined Medicare programs decreased to 84.8% in the first quarter of 2018, from 87.7% in the first quarter of 2017. Much of this improvement relates to the recognition of additional MMP at-risk revenue for dates of service in 2016 and 2017, because at-risk revenue is often recognized long after medical services have been provided. The Medicare business also benefited from favorable medical care trends and improved medical management of inpatient utilization for this population. Our Michigan health plan, which serves about 25% of our Medicare membership, has shown particular improvement in the first quarter of 2018. Accurate and complete risk score documentation and effective management of chronic and high acuity conditions are critical to the successful management of this program for the rest of the year.

Marketplace

Lower Marketplace premium revenue was driven by a decrease in membership of over 50%, partially offset by premium rate increases. As previously disclosed, we have increased premium rates and reduced our Marketplace presence effective January 1, 2018, as part of our overall program to improve profitability.

The medical care ratio for the Marketplace program decreased to 50.6% in the first quarter of 2018, from 75.0% in the first quarter of 2017. The lower medical care ratio in 2018 was the result of the premium increases implemented effective January 2018 and the 2017 Marketplace CSR adjustment described in "Consolidated Results" above. Absent the 2017 Marketplace CSR adjustment, the medical care ratio for our Marketplace program would have been approximately 67% in the first quarter of 2018.

FINANCIAL PERFORMANCE BY STATE

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by state health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

Health Plans Segment Financial Data — Non-Marketplace

	Three Months Ended March 31, 2018

MEDICAL CARE COSTS BY TYPE

The following table provides the details of consolidated medical care costs by category for the periods indicated (dollars in millions except PMPM amounts):

	Three Months Ended March 31,					
	2018			2017		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 2,745	$ 222.38	73.8%	$ 3,086	$ 219.32	75.1%
Pharmacy	583	47.25	15.6	616	43.76	15.0
Capitation	312	25.28	8.4	324	23.06	7.9
Other	82	6.64	2.2	85	6.06	2.0
	$ 3,722	$ 301.55	100.0%	$ 4,111	$ 292.20	100.0%

PREMIUM TAXES

The premium tax ratio (premium tax expense as a percentage of premium revenue plus premium tax revenue) was 2.3% in both the first quarter of 2018 and 2017.

HEALTH INSURER FEES (HIF)

Health insurer fees reimbursed amounted to $61 million, and health insurer fees amounted to $75 million, in the first quarter of 2018. Approximately $10 million of revenue related to the reimbursement of Medicaid health insurer fees from New Mexico, New York and Puerto Rico was not recognized in the first quarter of 2018 because as of March 31, 2018 we had not received adequate documentation of the intent to reimburse such fees.

There were no HIF reimbursed or expensed in 2017 due to the HIF moratorium under the Consolidated Appropriations Act of 2016.

MOLINA MEDICAID SOLUTIONS

The Molina Medicaid Solutions segment provides support to state government agencies' administration of their Medicaid programs, including business processing, information technology development and administrative services.

FINANCIAL OVERVIEW

The Molina Medicaid Solutions segment service margin for the three months ended March 31, 2018 and 2017, was insignificant.

OTHER

The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

FINANCIAL OVERVIEW

The Other segment service margin for the three months ended March 31, 2018 and 2017, was insignificant.

OTHER CONSOLIDATED INFORMATION

GENERAL AND ADMINISTRATIVE EXPENSES

The G&A ratio decreased to 7.6% for the first quarter of 2018, compared with 8.9% for the first quarter of 2017. Refer to discussion above, in "Consolidated Results."

DEPRECIATION AND AMORTIZATION

Depreciation and amortization, as a percentage of total revenue, was 0.6% and 0.8% in the first quarter of 2018 and 2017, respectively.

RESTRUCTURING AND SEPARATION COSTS

See Notes to Consolidated Financial Statements, Note 10, “Restructuring and Separation Costs.”

INTEREST EXPENSE

Interest expense was $33 million for the first quarter of 2018, compared with $26 million for the first quarter of 2017. Interest expense includes non-cash interest expense relating primarily to the amortization of the discount on convertible senior notes, which amounted to $7 million and $8 million in the first quarter of 2018 and 2017, respectively. See further discussion in Notes to Consolidated Financial Statements, Note 7, “Debt.”

OTHER EXPENSES (INCOME), NET

In the first quarter of 2018, we recorded other expenses of $10 million due to the loss on debt extinguishment resulting from our 1.625% Exchange. The 1.625% Exchange is described further in Notes to Consolidated Financial Statements, Note 7, “Debt.” In the first quarter of 2017, we received a $75 million fee in connection with a terminated Medicare acquisition transaction.

INCOME TAXES

The provision for income taxes was recorded at an effective rate of 40.3% for the first quarter of 2018, compared with 41.6% for the first quarter of 2017. The effective tax rate for 2018 is lower than 2017 as a result of the reduction in the federal statutory rate from 35% to 21% under the TCJA, combined with higher non-deductible expenses in 2018 primarily related to the non-deductible HIF. The HIF was not applicable in 2017 due to the 2017 HIF moratorium.

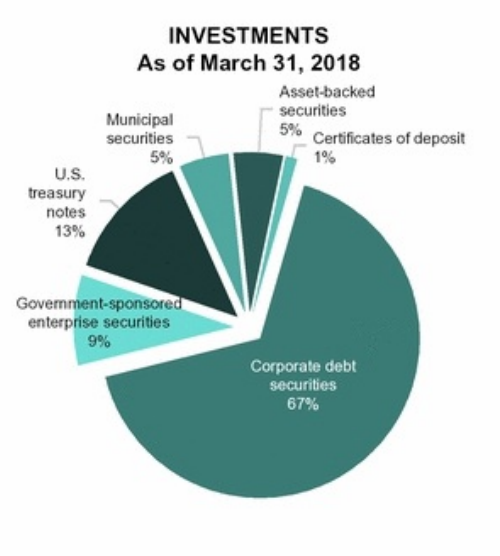
LIQUIDITY AND FINANCIAL CONDITION

INTRODUCTION

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

A majority of the assets held by our Health Plans segment regulated subsidiaries is in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board-approved investment policies that conform to applicable state laws and regulations.

Our investments are classified as current assets, except for our held-to-maturity restricted investments, which are classified as non-current assets, and which are not included in the totals below. Our held-to-maturity restricted investments are invested principally in certificates of deposit and U.S. treasury securities.



Investment income increased to $19 million for the three months ended March 31, 2018, compared with $10 million for the three months ended March 31, 2017, primarily due to the increase in invested assets.

MARKET RISK

Our earnings and financial position are exposed to financial market risk relating to changes in interest rates, and the resulting impact on investment income and interest expense.

Substantially all of our investments and restricted investments are subject to interest rate risk and will decrease in value if market interest rates increase. Assuming a hypothetical and immediate 1% increase in market interest rates at March 31, 2018, the fair value of our fixed income investments would decrease by approximately $21 million. Declines in interest rates over time will reduce our investment income.

For further information on fair value measurements and our investment portfolio, please refer to Notes to Consolidated Financial Statements, Note 4, “Fair Value Measurements,” and Note 5, “Investments.”

Borrowings under our Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. As of March 31, 2018, $300 million was outstanding under the Credit Facility.

LIQUIDITY

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Three Months Ended March 31,		
	2018	2017	Change
	(In millions)		
Net cash provided by operating activities	$ 394	$ 719	$ (325)
Net cash provided by (used in) investing activities	145	(337)	482
Net cash used in financing activities	(5)	(1)	(4)
Net increase in cash, cash equivalents, and restricted cash and cash equivalents	$ 534	$ 381	$ 153

Operating Activities

Net cash provided by operating activities decreased $325 million in the first quarter of 2018, compared with the first quarter of 2017, primarily due to the following:

Prepaid expenses and other current assets, and accounts payable and accrued liabilities. Each of these accounts increased significantly in the first quarter of 2018, primarily due to amounts recorded in connection with the reinstatement of the HIF in 2018; such increase in accounts payable and accrued liabilities was largely offset by the increase in prepaid expenses and other current assets.

Medical claims and benefits payable. In the first quarter of 2018, the change in medical claims and benefits payable decreased cash flows from operations by $160 million, primarily due to a decline in reserves as a result of reduced Marketplace membership in Florida, Utah and Wisconsin.

Amounts due government agencies. While amounts due government agencies increased $172 million in the first quarter of 2018, this increase was less than the increase experienced in the first quarter of 2017, resulting in a year over year decrease of cash flows from operations of $201 million. This decrease was primarily due to a decline in the amounts accrued for Marketplace CSR subsidies year over year.

Investing Activities

Investing activities were a source of cash of $145 million in the first quarter of 2018, and a use of cash of $337 million in the first quarter of 2017, primarily due to reduced purchases of investments and higher proceeds from sales and maturities of investments, in the first quarter of 2018.

Financing Activities

Net cash used in financing activities increased $4 million in the first quarter of 2018 compared with the first quarter of 2017, due to cash paid for financing transaction fees, including the 1.625% Exchange and our Bridge Credit Agreement, in the first quarter of 2018.

FINANCIAL CONDITION

We believe that our cash resources, our borrowing capacity available under our Bridge Credit Agreement and Credit Facility as discussed further below in “Future Sources and Uses of Liquidity—Sources,” and internally generated funds will be sufficient to support operations, regulatory requirements, debt repayment obligations and capital expenditures for at least the next 12 months.

On a consolidated basis, at March 31, 2018, our working capital was $2,191 million, compared with $1,954 million at December 31, 2017. At March 31, 2018, our cash and investments amounted to $6,372 million, compared with $6,000 million at December 31, 2017.

Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments (excluding restricted investments) held by the parent company—Molina Healthcare, Inc. Such cash, cash equivalents and investments (excluding restricted investments) amounted to $706 million and $696 million as of March 31, 2018 and December 31, 2017, respectively.

Debt Ratings. Our 5.375% Notes are rated "BB-" by Standard & Poor's, and "B3" by Moody's Investor Service, Inc. A significant downgrade in our ratings could adversely affect our borrowing capacity and increase our borrowing costs.

Financial Covenants. Our Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. Such ratios, presented below, are computed as defined by the terms of the Credit Facility.

Credit Facility Financial Covenants	Required Per Agreement	As of March 31, 2018
Net leverage ratio	<4.0x	2.7x
Interest coverage ratio	>3.5x	6.9x

In addition, the indentures governing the 4.875% Notes, the 5.375% Notes, the 1.125% Convertible Notes and the 1.625% Convertible Notes contain cross-default provisions that are triggered upon default by us or any of our subsidiaries on any indebtedness in excess of the amount specified in the applicable indenture. As of March 31, 2018, we were in compliance with all covenants under the Credit Facility and the indentures governing our outstanding notes.

FUTURE SOURCES AND USES OF LIQUIDITY

Sources

Our Health Plans segment regulated subsidiaries generate significant cash flows from premium revenue, which we generally receive a short time before we pay for the related health care services. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity.

Dividends from Subsidiaries. When available and as permitted by applicable regulations, cash in excess of the capital needs of our regulated health plans is generally paid in the form of dividends to our unregulated parent company to be used for general corporate purposes. In the first quarter of 2018, we did not receive dividends from our subsidiaries. In the first quarter of 2017, we received $50 million in dividends from our regulated health plan subsidiaries. See further discussion in Notes to Consolidated Financial Statements, Note 12, "Commitments and Contingencies—Regulatory Capital Requirements and Dividend Restrictions."

Borrowing Capacity and Debt Financing. We have available borrowing capacity of $550 million under our Bridge Credit Agreement (which amount is subject to the use of proceeds restrictions set forth in the Bridge Credit Agreement), and $194 million under our Credit Facility. We have adequate cash held in a restricted account available to repay the $64 million principal balance outstanding under our 1.625% Convertible Notes, if noteholders exercise their conversion or put rights in 2018. See further discussion in the Notes to Consolidated Financial Statements, Note 7, "Debt."

2017 Restructuring Plan. As previously disclosed, we estimate that the 2017 Restructuring Plan will reduce annualized run-rate expenses by approximately $300 million to $400 million when completed by the end of 2018. This estimate includes run-rate savings of approximately $10 million relating to actions taken in the first quarter of 2018. We expect the cost savings to reduce both "General and administrative expenses" and "Medical care costs" reported in our consolidated statements of income. The following table illustrates our estimates of run-rate savings associated with the 2017 Restructuring Plan, which have not changed significantly since our estimate at December 31, 2017. Such savings will be offset, through the end of 2018, by the costs referred to below in "*Uses*."

Estimated Savings Expected to be Realized by Reportable Segment	Health Plans	Other	Total
		(In millions)	
General and administrative expenses	$65	$92 to $152	$157 to $217
Medical care costs	$126 to $166	$17	$143 to $183
	$191 to $231	$109 to $169	$300 to $400

Credit Facility. Refer to Notes to Consolidated Financial Statements, Note 7, "Debt," for a detailed discussion of our Credit Facility.

Shelf Registration Statement. We have a shelf registration statement on file with the Securities and Exchange Commission to register an unlimited amount of any combination of debt or equity securities in one or more offerings. Specific information regarding the terms and securities being offered will be provided at the time of an offering. Proceeds from future offerings are expected to be used for general corporate purposes, including, but not limited to, the repayment of debt, investments in or extensions of credit to our subsidiaries and the financing of possible acquisitions or business expansion.

Uses

Regulatory Capital Requirements and Dividend Restrictions. In the first quarter of 2018 and 2017, the parent company contributed capital of $80 million and $106 million, respectively, to our health plans subsidiaries to satisfy statutory net worth requirements. For more information on our regulatory capital requirements and dividend restrictions, refer to Notes to Consolidated Financial Statements, Note 12, “Commitments and Contingencies.”

2017 Restructuring Plan. Refer to Notes to Consolidated Financial Statements, Note 10, “Restructuring and Separation Costs,” for a detailed discussion and update of the 2017 Restructuring Plan, including costs incurred in the first quarter of 2018.

Convertible Senior Notes. Refer to the Notes to Consolidated Financial Statements, Note 7, “Debt,” for a detailed discussion of our Convertible Senior Notes. The principal amounts of both our 1.625% Convertible Notes and our 1.125% Convertible Notes are convertible into cash prior to their respective maturity dates under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger.

The stock price trigger for the 1.625% Notes is $75.51 per share. The 1.625% Convertible Notes did not meet this trigger in the quarter ended March 31, 2018. However, on contractually specified dates beginning in August 2018, holders of the 1.625% Convertible Notes may require us to repurchase some or all of such notes. In addition, beginning May 15, 2018 until August 19, 2018, holders may convert some or all of the 1.625% Convertible Notes. Because of these put and conversion features, the 1.625% Convertible Notes are reported in current portion of long-term debt as of March 31, 2018. As described above, we have adequate cash held in a restricted account available to repay the 1.625% Convertible Notes, if noteholders exercise their conversion or put rights in 2018.

The stock price trigger for the 1.125% Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended March 31, 2018, and are convertible to cash through at least June 30, 2018. Because the 1.125% Convertible Notes may be converted into cash within 12 months, the $550 million carrying amount is reported in current portion of long-term debt as of March 31, 2018. For economic reasons related to the trading market for our 1.125% Convertible Notes, we believe that the amount of the notes that may be converted over the next twelve months, if any, will not be significant. However, if the trading market for our 1.125% Convertible Notes becomes closed or restricted due to market turmoil or other reasons such that the notes cannot be traded, or if the trading price of our 1.125% Notes, which normally trade at a marginal premium to the underlying composite stock-and-interest economic value, no longer includes that marginal premium, holders of our 1.125% Convertible Notes may elect to convert the notes to cash. If conversion requests are received, the settlement of the notes must be paid in cash pursuant to the terms of the relevant indentures. We have sufficient available cash, combined with borrowing capacity available under our Credit Facility and Bridge Credit Agreement, to fund conversions should they occur.

CONTRACTUAL OBLIGATIONS

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2017, was disclosed in our 2017 Annual Report on Form 10-K. Other than the Bridge Credit Agreement we executed in January 2018, and the 1.625% Exchange in March 2018, there were no material changes to this previously filed information outside the ordinary course of business during the three months ended March 31, 2018. Refer to Notes to Consolidated Financial Statements, Note 7, “Debt,” for further information on the transactions noted above.

CRITICAL ACCOUNTING ESTIMATES

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Notes to Consolidated Financial Statements, Note 6, "Medical Claims and Benefits Payable," for a table that presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements. Other than the discussion as noted above, there have been no significant changes during the three months ended March 31, 2018, to our disclosure reported in "Critical Accounting Estimates" in our Annual Report on Form 10-K for the year ended December 31, 2017.

- *Health Plans segment contractual provisions that may adjust or limit revenue or profit*. For a discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Notes to Consolidated Financial Statements, Note 2, "Significant Accounting Policies."

- *Health Plans segment quality incentives*. For a discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Notes to Consolidated Financial Statements, Note 2, "Significant Accounting Policies."

- *Goodwill and intangible assets, net.* There have been no significant changes during the three months ended March 31, 2018, to our disclosure reported in "Critical Accounting Estimates" in our Annual Report on Form 10-K for the year ended December 31, 2017.

SUPPLEMENTAL INFORMATION

FINANCIAL MEASURES THAT SUPPLEMENT U.S. GAAP (NON-GAAP FINANCIAL MEASURES)

We use these non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance to the performance of other public companies in the health care industry.

EBITDA*

We believe that earnings before interest, taxes, depreciation and amortization (EBITDA*) is helpful in assessing our ability to meet the cash demands of our operating units.

	Three Months Ended March 31,	
	2018	2017
	(In millions)	
Net income	$ 107	$ 77
Adjustments:		
Depreciation, and amortization of intangible assets and capitalized software	34	46
Interest expense	33	26
Income tax expense	72	54
EBITDA*	$ 246	$ 203

ADJUSTED NET INCOME* AND ADJUSTED NET INCOME PER SHARE*

We believe that adjusted net income* and adjusted net income per diluted share* are helpful in assessing our financial performance exclusive of the non-cash impact of the amortization of purchased intangibles. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to adjusted net income*.

	Three Months Ended March 31,			
	2018		2017	
	(In millions, except diluted per-share amounts)			
Net income	$ 107	$ 1.64	$ 77	$ 1.37
Adjustment:				
Amortization of intangible assets	5	0.08	9	0.16
Income tax effect [1]	(1)	(0.01)	(3)	(0.06)
Amortization of intangible assets, net of tax effect	4	0.07	6	0.10
Adjusted net income*	$ 111	$ 1.71	$ 83	$ 1.47

(1) Income tax effect of adjustments calculated at the blended federal and state statutory tax rates of 22% and 37% for the first quarters of 2018 and 2017, respectively.

CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our chief executive officer and our chief financial officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control Over Financial Reporting. There has been no change in our internal control over financial reporting during the fiscal quarter ended March 31, 2018 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

LEGAL PROCEEDINGS

For information regarding legal proceedings, see Notes to Consolidated Financial Statements, Note 12, "Commitments and Contingencies."

RISK FACTORS

Certain risks may have a material adverse effect on our business, financial condition, cash flows, results of operations, or stock price, and you should carefully consider them before making an investment decision. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2017. The risk factors described in our 2017 Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, results of operations, or stock price.

UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

ISSUER PURCHASES OF EQUITY SECURITIES

Purchases of common stock made by us, or on our behalf during the quarter ended March 31, 2018, including shares withheld by us to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased [1]	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares Authorized to Be Purchased Under the Plans or Programs
January 1 - January 31	2,705	$ 91.83	—	$ —
February 1 - February 28	17,365	$ 90.63	—	$ —
March 1 - March 31	48,853	$ 72.36	—	$ —
Total	68,923	$ 77.73	—	

(1) During the three months ended March 31, 2018, we withheld 68,923 shares of common stock under our 2011 Equity Incentive Plan to settle employee income tax obligations.

INDEX TO EXHIBITS

Exhibit No.	Title	Method of Filing
3.1	Fourth Amended and Restated Bylaws of Molina Healthcare, Inc.	Filed as Exhibit 3.1 to registrant's Form 8-K filed March 2, 2018.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Zubretsky, certify that:

1. I have reviewed the report on Form 10-Q for the period ended March 31, 2018 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and to the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

Dated: April 30, 2018

Chief Executive Officer, President and Director

EXHIBIT 31.2

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph W. White, certify that:

1. I have reviewed the report on Form 10-Q for the period ended March 31, 2018 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

TABLE OF CONTENTS

FORWARD LOOKING STATEMENTS

This Annual Report on Form 10-K (this "Form 10-K") contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that involve risks and uncertainties. Many of the forward-looking statements are located under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations." Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Forward-looking statements can also be identified by words such as "future," "anticipates," "believes," "estimates," "expects," "intends," "plans," "predicts," "will," "would," "could," "can," "may," and similar terms. Forward-looking statements are not guarantees of future performance and the Company's actual results may differ significantly due to numerous known and unknown risks and uncertainties. Those known risks and uncertainties include, but are not limited to, the risk factors identified in the section of this Form 10-K titled "Risk Factors," as well as the following:

- *the success of our profit improvement and maintenance initiatives, including the timing and amounts of the benefits realized, and administrative savings achieved;*
- *the numerous political and market-based uncertainties associated with the Affordable Care Act (the "ACA") or "Obamacare;"*
- *the market dynamics surrounding the ACA Marketplaces, including but not limited to uncertainties associated with risk transfer requirements, the potential for disproportionate enrollment of higher acuity members, the discontinuation of premium tax credits, the adequacy of agreed rates, and potential disruption associated with market withdrawal from Utah, Wisconsin, or other states;*
- *subsequent adjustments to reported premium revenue based upon subsequent developments or new information, including changes to estimated amounts payable or receivable related to Marketplace risk adjustment/risk transfer, risk corridors, and reinsurance;*
- *effective management of our medical costs;*
- *our ability to predict with a reasonable degree of accuracy utilization rates, including utilization rates associated with seasonal flu patterns or other newly emergent diseases;*
- *significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;*
- *the full reimbursement of the ACA health insurer fee, or HIF;*
- *the success of our efforts to retain existing government contracts, including those in Florida, New Mexico, Puerto Rico, Texas, and Washington, including the success of any protest filings;*
- *our ability to manage our operations, including maintaining and creating adequate internal systems and controls relating to authorizations, approvals, provider payments, and the overall success of our care management initiatives;*
- *our ability to consummate and realize benefits from acquisitions or divestitures;*
- *our receipt of adequate premium rates to support increasing pharmacy costs, including costs associated with specialty drugs and costs resulting from formulary changes that allow the option of higher-priced non-generic drugs;*
- *our ability to operate profitably in an environment where the trend in premium rate increases lags behind the trend in increasing medical costs;*
- *the interpretation and implementation of federal or state medical cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit sharing arrangements, and risk adjustment provisions and requirements;*
- *our estimates of amounts owed for such cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit-sharing arrangements, and risk adjustment provisions;*
- *the Medicaid expansion cost corridors in California, New Mexico, and Washington, and any other retroactive adjustment to revenue where methodologies and procedures are subject to interpretation or dependent upon information about the health status of participants other than Molina members;*
- *the interpretation and implementation of at-risk premium rules and state contract performance requirements regarding the achievement of certain quality measures, and our ability to recognize revenue amounts associated therewith;*
- *cyber-attacks or other privacy or data security incidents resulting in an inadvertent unauthorized disclosure of protected health information;*
- *the success of our health plan in Puerto Rico, including the resolution of the Puerto Rico debt crisis, payment of all amounts due under our Medicaid contract, the effect of the PROMESA law, the impact of Hurricane Maria and our efforts to better manage the health care costs of our Puerto Rico health plan;*

- *the success and renewal of our duals demonstration programs in California, Illinois, Michigan, Ohio, South Carolina, and Texas;*
- *the accurate estimation of incurred but not reported or paid medical costs across our health plans;*
- *efforts by states to recoup previously paid and recognized premium amounts;*
- *complications, member confusion, or enrollment backlogs related to the annual renewal of Medicaid coverage;*
- *government audits and reviews, or potential investigations, and any fine, sanction, enrollment freeze, monitoring program, or premium recovery that may result therefrom;*
- *changes with respect to our provider contracts and the loss of providers;*
- *approval by state regulators of dividends and distributions by our health plan subsidiaries;*
- *changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;*
- *high dollar claims related to catastrophic illness;*
- *the favorable resolution of litigation, arbitration, or administrative proceedings;*
- *the relatively small number of states in which we operate health plans, including the greater scale and revenues of our California, Ohio, Texas, and Washington health plans;*
- *the availability of adequate financing on acceptable terms to fund and capitalize our expansion and growth, repay our outstanding indebtedness at maturity and meet our liquidity needs, including the interest expense and other costs associated with such financing;*
- *our failure to comply with the financial or other covenants in our credit agreement, our bridge credit agreement or the indentures governing our outstanding notes;*
- *the sufficiency of our funds on hand to pay the amounts due upon conversion or maturity of our outstanding notes;*
- *the failure of a state in which we operate to renew its federal Medicaid waiver;*
- *changes generally affecting the managed care or Medicaid management information systems industries;*
- *increases in government surcharges, taxes, and assessments, including but not limited to the deductibility of certain compensation costs;*
- *newly emergent viruses or widespread epidemics, public catastrophes or terrorist attacks, and associated public alarm; and*
- *increasing competition and consolidation in the Medicaid industry*.

Each of the terms "Molina Healthcare,Inc." "Molina Healthcare," "Company," "we," "our," and "us," as used herein, refers collectively to Molina Healthcare, Inc. and its wholly owned subsidiaries, unless otherwise stated. The Company assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law.

ABOUT MOLINA HEALTHCARE

Molina Healthcare, Inc. provides managed health care services under the Medicaid and Medicare programs and through the state insurance marketplaces. Through our health plans operating across the nation and in the Commonwealth of Puerto Rico, we serve approximately 4.5 million members.

2017 was a year of great change for Molina Healthcare. On May 2, 2017, after several disappointing quarters in which we continued to underperform relative to our own internal financial metrics and to the managed care sector as a whole, the board terminated the employment of Dr. J. Mario Molina, our former president and chief executive officer, and John C. Molina, our former chief financial officer. Our former chief accounting officer, Joseph W. White, was promoted to chief financial officer and interim president and chief executive officer, while the board launched a search for a permanent president and chief executive officer. Effective as of November 6, 2017, Joseph M. Zubretsky was named as president and chief executive officer of Molina Healthcare. Over the past ten months, the executive management team has been largely restructured.

2017

(Dollars in millions, except per-share amounts)

Total Revenue	Net Loss per Diluted Share	Adjusted Net Loss Per Share*
$19,883	($9.07)	($8.72)
Net Loss Margin	**EBITDA***	**Ending Membership**
(2.6)%	($329)	4,453,000

Non-generally accepted accounting principles (Non-GAAP) financial measures referred to in this Form 10-K are designated with an asterisk (*). For more information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations (MD&A)—Non-GAAP Financial Measures,” and “MD&A—Supplemental Information.”

OUR MISSION

Our mission is to provide quality healthcare to people receiving government assistance.

OUR BUSINESS STRATEGY

We are building a plan to improve and sustain profitability

Our margin recovery and sustainability plan is designed to:

- Restore margins through operational improvements and managed care fundamentals
- Optimize the revenue base for profitability and future revenue growth
- Enhance balance sheet and capital management discipline

Restore margins through operational improvements and managed care fundamentals

In 2017, we changed leadership, restructured our workforce to better meet the needs of our business, and improved our cost structure. As described further below in “Consolidated Results–Fiscal Year 2017 Financial Summary,” and in the Notes to the Consolidated Financial Statements, Note 15, “Restructuring and Separation Costs,” in 2017 we implemented a comprehensive restructuring and profitability improvement plan that will reduce annualized run-rate expenses by approximately $300 million to $400 million when completed by the end of 2018. As of December 31, 2017, we achieved $235 million of these run-rate reductions on an annualized basis.

We have reconfigured our organization. By reducing the workforce and number of management layers, and increasing management’s span of control, we have achieved significant savings.

We are simplifying our provider networks. We are terminating or renegotiating high-cost providers, narrowing networks in certain geographies, evaluating stop-loss thresholds and carve-outs, implementing value-based

contracting, evaluating ancillary services and pharmacy benefit management pricing and operations, and we have exited direct delivery operations.

We are improving the effectiveness of utilization review and care management. Areas of focus include specialist referrals, pre-authorization, concurrent review, high acuity populations and high utilizers of services, emergency room utilization and behavioral and medical integration.

We are addressing at-risk revenues and risk adjustment. We seek to more effectively engage in state rate setting, improve STAR ratings, increase retention of quality revenue withholds, and focus on coding and documentation to achieve risk scores commensurate with the acuity of our population.

We are improving our claims payment function. The key areas of improvement will include provider experience, payment accuracy and oversight of claims fraud, waste and abuse.

We are evaluating information technology and management. We seek to standardize the administrative platform, streamline operations and procedures, evaluate potential co-sourcing and/or outsource operational components, and consolidate data warehousing and data mining capabilities.

Optimize revenue base for profitability and future revenue growth

We will focus on defending existing revenue.

- In early 2018, we received the disappointing news that we were unsuccessful in defending all of our New Mexico Medicaid business and most of our Florida Medicaid business during state re-procurements.
    - We will lodge the necessary protests and appeals to ensure that we have exhausted every avenue available to us for retaining the managed care contracts currently held by our Florida and New Mexico health plans.
    - In addition, we have taken significant steps to improve our RFP response process to better articulate and present the Molina value proposition. Steps we have taken include marshaling more internal and external resources to support the RFP process, engaging a broader and deeper array of subject matter experts, infusing more local market knowledge into the process, and retaining outside experts in Medicaid procurement to pre-score our proposals and conduct mock reviews.
- We have also experienced some success in the pursuit of new revenue and the defense of existing revenue:
    - In May 2017, our Washington health plan was selected by the Washington State Health Care Authority to negotiate and enter into managed care contracts for the North-Central region of the state's Apple Health Integrated Managed Care Program. The new contract commenced January 1, 2018.
    - In June 2017, Molina Healthcare of Mississippi, Inc. was awarded a Medicaid Coordinated Care Contract for the statewide administration of the Mississippi Coordinated Access Network (MississippiCAN). The operational start date for the program is currently scheduled for October 1, 2018, pending the completion of a readiness review. The initial term of the contract is through June 2020, with options to renew annually for up to two additional years.
    - In August 2017, our Illinois health plan was awarded a statewide Medicaid managed care contract by the Illinois Department of Healthcare and Family Services. This Medicaid contract further integrates behavioral health and physical health by combining the state's three current managed care programs into one program. The contract began January 1, 2018, and will continue for four years with options to renew annually for up to four additional years.

We will consider opportunistic revenue growth opportunities only if specific parameters are met. Such parameters include a positive regulatory environment, manageable competitive forces, network viability, the ability to leverage scale and operations, and a scalable population.

We will continue to identify opportunities for significant performance improvement. The under-performing geographies and lines of business we have identified are under intense review for performance improvement to ensure that every product and geography contributes to the portfolio.

We have taken decisive action with respect to our Affordable Care Act (ACA) Marketplace products. Effective January 1, 2018, we have:

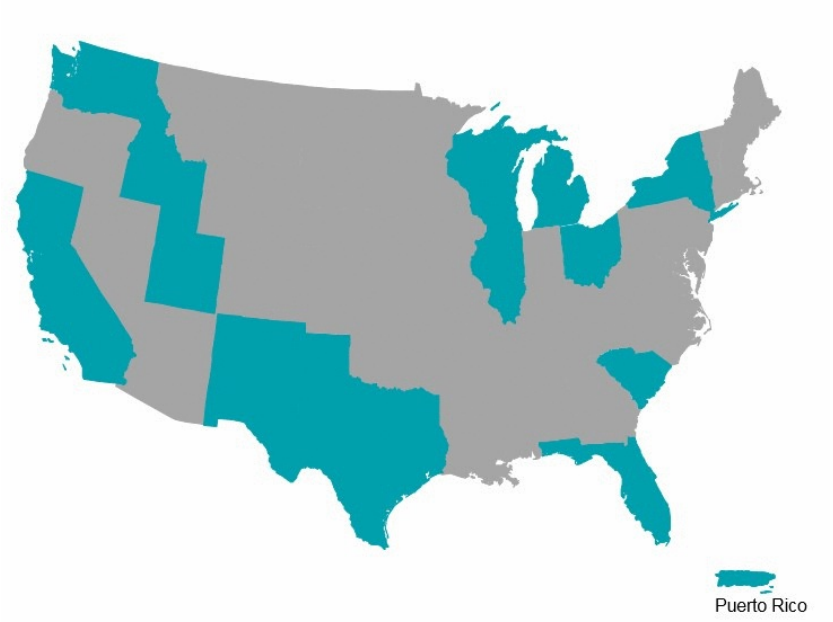
- Exited the Utah and Wisconsin Marketplaces;
- Reduced the scope of our Washington state Marketplace participation;
- Increased premiums averaging 58%; and
- Mitigated our exposure to uncertainties relating to cost sharing reduction (CSR) funding and reconciliation.

Enhance balance sheet and capital management discipline

We are taking steps to improve reserving accuracy, increase tangible net equity, reduce the cost of borrowing, maximize the dividend capacity of our subsidiaries, maximize parent company liquidity and cash flow, deploy excess capital in a balanced manner, and reduce the optionality in our capital structure.

OUR CORE BUSINESS FOOTPRINT TODAY

As of December 31, 2017, our health plan footprint included the five largest Medicaid markets.



OUR SEGMENTS

We manage our operations through three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment. We regularly evaluate the appropriateness of our reportable segments, particularly in light of organizational changes, acquisition and divestiture activity, and changing laws and regulations. Therefore, these reportable segments may change in the future.

Business and financial overviews for our reportable segments are provided in “MD&A—Reportable Segments.”

Refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies” for revenue information by state health plan, and Note 20, “Segment Information,” for segment revenue, profit and total assets information.

COMPETITIVE CONDITIONS AND ENVIRONMENT

We face varying levels of competition. Health care reform proposals may cause organizations to enter or exit the market for government sponsored health programs. However, the licensing requirements and bidding and contracting procedures in some states may present partial barriers to entry into our industry.

We compete for government contracts, renewals of those government contracts, members, and providers. State agencies consider many factors in awarding contracts to health plans. Among such factors are the health plan's provider network, quality scores, medical management, degree of member satisfaction, timeliness of claims payment, and financial resources. Potential members typically choose a health plan based on a specific provider being a part of the network, the quality of care and services available, accessibility of services, and reputation or name recognition of the health plan. We believe factors that providers consider in deciding whether to contract with a health plan include potential member volume, payment methods, timeliness and accuracy of claims payment, and administrative service capabilities.

For further competitor information specific to each of our reportable segments, refer to "MD&A—Reportable Segments."

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (MD&A)

NON-GAAP FINANCIAL MEASURES

We use non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance to the performance of other public companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not as substitutes for or superior to, GAAP measures.

See further information regarding non-GAAP measures in the "Supplemental Information" section of this MD&A, including the reconciliations to U.S. GAAP. Non-GAAP financial measures referred to in this Form 10-K are designated with an asterisk (*).

KEY PERFORMANCE INDICATORS

(Dollars in millions except per-share amounts, membership in millions)

	Year Ended December 31,		
	2017	2016	2015
Ending total membership	4.5	4.2	3.5
Premium revenue	$ 18,854	$ 16,445	$ 13,261
Health Plans segment medical margin (1)	$ 1,781	$ 1,671	$ 1,467
Operating (loss) income	$ (555)	$ 306	$ 387
Net (loss) income	$ (512)	$ 52	$ 143
Net (loss) income per diluted share	$ (9.07)	$ 0.92	$ 2.58
Diluted weighted average shares outstanding	56.5	56.3	55.6
Adjusted net (loss) income per diluted share*	$ (8.72)	$ 1.28	$ 2.78
EBITDA*	$ (329)	$ 467	$ 508
Operating Statistics:			
Medical care ratio (2)	90.6 %	89.8%	88.9%
G&A ratio (3)	8.0 %	7.8%	8.1%
Premium tax ratio (2)	2.3 %	2.8%	2.9%
Effective income tax (benefit) expense rate	(16.4)%	74.8%	55.5%
Net (loss) profit margin (3)	(2.6)%	0.3%	1.0%

(1) Medical margin is equal to premium revenue minus medical costs.
(2) Medical care ratio represents medical care costs as a percentage of premium revenue; premium tax ratio represents premium tax expenses as a percentage of premium revenue plus premium tax revenue.
(3) G&A ratio represents general and administrative expenses as a percentage of total revenue. Net (loss) profit margin represents net (loss) income as a percentage of total revenue.

See discussion of Key Performance Indicators in the “Consolidated Results” and “Reportable Segments” sections of this MD&A.

CONSOLIDATED RESULTS

FISCAL YEAR 2017 FINANCIAL SUMMARY

- Net loss per diluted share was $9.07 in 2017 compared with net income per diluted share of $0.92 in 2016.
- Adjusted net loss per diluted share* was $8.72 in 2017 compared with adjusted net income per diluted share* of $1.28 in 2016.
- The medical care ratio increased to 90.6% in 2017, from 89.8% in 2016.
- The general and administrative ratio increased to 8.0% in 2017, from 7.8% in 2016.
- We recorded a $73 million charge as a result of the federal government’s decision to stop paying cost sharing reduction rebates (CSRs) to health plans beginning in the fourth quarter of 2017. We believe we are legally entitled to those payments, and will pursue all available means to collect them.
- We recorded $47 million in charges for Marketplace changes in estimates, including risk adjustment and CSRs, related to 2016 dates of service that were estimated at December 31, 2016, and finalized during the second quarter of 2017.
- We recognized the $30 million release of the Marketplace-related premium deficiency reserve we had established as of December 31, 2016.

- We incurred non-cash impairment losses of $470 million in 2017. These losses included $269 million, primarily in connection with our Florida, New Mexico, and Illinois health plans. The impairments at Florida and New Mexico were the result of our recent Medicaid contract losses. The Illinois impairment was the result of management's determination, in the course of its annual impairment assessment of the goodwill of the Illinois health plan, that the plan's future cash flow projections were insufficient to produce an estimated fair value in excess of its carrying amount. While we are confident that we can improve profitability in Illinois so that it is a meaningful contributor to our company, the current profit profile of the health plan does not support the purchase prices paid for certain membership years ago.

  Also during 2017, we recorded impairment losses of $28 million for our Molina Medicaid Solutions segment because management determined that Molina Medicaid Solutions will provide fewer future benefits for its support of the Health Plans segment than previously anticipated. In addition, we recorded impairment losses of $173 million for our Other segment, primarily relating to our Pathways business, because management determined that Pathways will not provide future benefits relating to the integration of its operations with the Health Plans segment to the extent previously expected.
- We incurred restructuring and separation costs of $234 million in 2017 as a result of the implementation of our restructuring and profit improvement plan in 2017 (the 2017 Restructuring Plan). As previously disclosed, we estimate that our 2017 Restructuring Plan will reduce annualized run-rate expenses by approximately $300 million to $400 million when completed by the end of 2018. As of December 31, 2017, we achieved $235 million of these run-rate reductions by the elimination of administrative costs (some of which are classified as medical care costs) on an annualized basis. As of December 31, 2017 we had also achieved an undetermined amount of medical care cost savings on an annualized basis through the re-negotiation of various medical provider contracts and the restructuring of our direct delivery operations. We expect to have more visibility into the actual value of these medical care cost savings later in 2018. We incurred substantially all of the costs associated with the 2017 Restructuring Plan in 2017.
- We incurred $14 million in expenses, including transaction fees, relating to our exchange of equity for $141 million face value of our 1.625% convertible senior notes.
- We recognized $75 million of other income for fees we received in connection with the termination of a proposed Medicare acquisition in early 2017.
- We recognized approximately $54 million in additional tax expense during the fourth quarter, due to the revaluation of our deferred tax assets as a result of the Tax Cuts and Jobs Act of 2017.

The following table summarizes significant items affecting 2017 financial results (in millions, except per diluted share amounts).

	Year Ended December 31, 2017	
	Amount	Per Diluted Share [1]
Termination of CSR subsidy payments for the fourth quarter of 2017	$ 73	$ 0.82
Marketplace adjustments related to risk adjustment, CSR subsidies, and other items for 2016 dates of service	47	0.52
Change in Marketplace premium deficiency reserve for 2017 dates of service	(30)	(0.33)
Impairment losses	470	6.01
Restructuring and separation costs	234	2.86
Loss on debt extinguishment	14	0.24
Fee received for terminated Medicare acquisition	(75)	(0.84)
	$ 733	$ 9.28

(1) Amounts shown are before considering revaluation of related deferred tax assets as a result of the *Tax Cuts and Jobs Act of 2017*, as applicable. Except for certain items that are not deductible for tax purposes, per diluted share amounts are generally calculated at a statutory income tax rate of 37%, which is in excess of the effective tax rate recorded in our consolidated statements of operations.

TRENDS AND UNCERTAINTIES

Medicaid Contract Re-Procurement

The following table illustrates Health Plans segment Medicaid contracts scheduled for re-procurement in the near term. While we have been notified of the Medicaid regulators' intention to re-procure the contracts, the anticipated award dates and effective dates are management's current best estimates; such dates are subject to change. Premium revenue is stated in millions.

Health Plan	Medicaid Program(s)	Membership as of December 31, 2017	Premium Revenue Year Ended December 31, 2017	Anticipated Award Date	Anticipated Effective Date
Puerto Rico	All	314,000	$ 732	Q2 2018	10/1/2018
Texas	ABD, MMP	100,000	$ 1,814	Q3 2018	1/1/2020
Washington [1]	All in 7 of 9 regions	574,000	$ 1,861	Q2 2018	1/1/2019

(1) The re-procurement information presented for the Washington health plan includes all Medicaid membership in the following regions: Northeast, Northwest, Central and Southeast, Pierce County, King County, Olympic Peninsula, and West-Central. Five of the seven largest regions' contracts that are awarded will be effective January 1, 2019. The remaining two will be effective on January 1, 2020.

Florida Health Plan. On February 1, 2018, we were selected by the Florida Agency for Health Care Administration (AHCA) to negotiate for the award of a managed care contract in only one region of Florida. That region—Region 11—comprises Miami-Dade and Monroe counties, where we currently serve 59,000 Medicaid members. As of December 31, 2017, we served approximately 360,000 Medicaid members in Florida, which represented approximately $1,486 million premium revenue for the year ended December 31, 2017. This decision does not affect the Florida health plan's current contracts with AHCA, which run through December 31, 2018. We recorded impairment losses in connection with this event. Refer to the Notes to Consolidated Financial Statements, Note 8, "Goodwill and Intangible Assets, Net," for further information regarding all impairment losses recorded in 2017.

New Mexico Health Plan. In January 2018, our New Mexico health plan was notified by the New Mexico Human Services Department (HSD) that the health plan had not been selected for the tentative award of a Medicaid contract effective January 1, 2019. As of December 31, 2017, we served approximately 224,000 Medicaid members in New Mexico, which represented approximately $1,205 million premium revenue for the year ended December 31, 2017. This decision does not affect the New Mexico plan's current contract with HSD which runs through December 31, 2018. We recorded impairment losses in connection with this event.

Illinois Health Plan. In August 2017, our Illinois health plan was awarded a statewide Medicaid managed care contract by the Illinois Department of Healthcare and Family Services. This Medicaid contract further integrates behavioral health and physical health by combining the state's three current managed care programs into one program. The contract began January 1, 2018, and will continue for four years with options to renew annually for up to four additional years.

Washington Health Plan. In May 2017, our Washington health plan was selected by the Washington State Health Care Authority to negotiate and enter into managed care contracts for the North-Central region of the state's Apple Health Integrated Managed Care Program. The new contract commenced January 1, 2018.

Pressures on Medicaid Funding

Currently, there are a number of different legislative proposals being considered, some of which would involve significantly reduced federal spending on the Medicaid program, and constitute a fundamental change in the federal role in health care. These proposals include elements such as the following:

- Ending the entitlement nature of Medicaid by capping future increases in federal health spending for these programs, and shifting more of the risk for health costs in the future to states and consumers;
- Reversing the ACA's expansion of Medicaid that enables states to cover low-income childless adults;
- Changing Medicaid to a state block grant program, including potentially capping spending on a per-enrollee basis (a "per capita cap");

- Requiring Medicaid beneficiaries to work;
- Limiting the amount of lifetime benefits for Medicaid beneficiaries; and
- Numerous other potential changes and reforms.

ACA and the Marketplace

The future of the Affordable Care Act (ACA) and its underlying programs, including the Marketplace, is subject to substantial uncertainty. Effective January 1, 2018, we have:

- Exited the Utah and Wisconsin Marketplaces;
- Reduced the scope of our Washington state Marketplace participation;
- Increased premiums averaging 58%;
- Mitigated our exposure to uncertainties relating to cost sharing reduction (CSR) funding and reconciliation; and
- Adjusted broker commissions to market rates.

As a result of these actions, we estimate that our ACA Marketplace membership will decline to approximately 300,000 members by the end of 2018, from 815,000 members as of December 31, 2017.

REPORTABLE SEGMENTS

HOW WE ASSESS PERFORMANCE

We derive our revenues primarily from health insurance premiums. Our primary customers are state Medicaid agencies and the federal government.

One of the key metrics used to assess the performance of our most significant segment, the Health Plans segment, is the medical care ratio ("MCR"). The medical care ratio represents the amount of medical care costs as a percentage of premium revenue. Therefore, the underlying gross margin, or the amount earned by the Health Plans segment after medical costs are deducted from premium revenue, is the most important measure of earnings reviewed by management.

Gross margin for our Health Plans segment is referred to as "Medical margin," and for our Molina Medicaid Solutions and Other segments, as "Service margin." The service margin is equal to service revenue minus cost of service revenue. Management's discussion and analysis of the changes in the individual components of medical margin and service margin follows.

SEGMENT SUMMARY

	2017	2016	2015
		(In millions)	
Health Plans segment medical margin [1]	$ 1,781	$ 1,671	$ 1,467
Molina Medicaid Solutions segment service margin [2]	16	21	55
Other segment service margin [2]	13	33	5
	$ 1,810	$ 1,725	$ 1,527
Health Plans segment medical care ratio	90.6%	89.8%	88.9%

(1) Represents premium revenue minus medical care costs.
(2) Represents service revenue minus cost of service revenue.

HEALTH PLANS

BUSINESS OVERVIEW

- 97.3% of total revenue in 2017
- 96.9% of total revenue in 2016
- Employees: approximately 5,300

Our Industry

Medicaid. Medicaid was established in 1965 under the U.S. Social Security Act to provide health care and long-term care services and supports to low-income Americans. Although jointly funded by federal and state governments, Medicaid is a state-operated and state-implemented program. Subject to federal laws and regulations, states have significant flexibility to structure their own programs in terms of eligibility, benefits, delivery of services, and provider payments. As a result, there are 56 separate Medicaid programs—one for each U.S. state, each U.S. territory, and the District of Columbia.

The federal government guarantees matching funds to states for qualifying Medicaid expenditures based on each state's federal medical assistance percentage (FMAP). A state's FMAP is calculated annually and varies inversely with average personal income in the state. The average FMAP across all jurisdictions is currently about 59%, and ranges from a federally established FMAP floor of 50% to as high as 75%.

We participate in the following Medicaid programs:

- Temporary Assistance for Needy Families, or TANF - The most common Medicaid program, covers primarily low-income families with children.
- Aged, Blind or Disabled, or ABD - Medicaid ABD programs cover low-income persons with chronic physical disabilities or behavioral health impairments. ABD beneficiaries typically use more services than those served by other Medicaid programs because of their critical health issues.
- Children's Health Insurance Program, or CHIP - A joint federal and state matching program that provides health care coverage to children whose families earn too much to qualify for Medicaid coverage. States have the option of administering CHIP through their Medicaid programs.
- Medicaid Expansion - In states that have elected to participate, Medicaid Expansion provides eligibility to nearly all low-income individuals under age 65 with incomes at or below 138% of the federal poverty line.

Marketplace. The ACA authorized the creation of Marketplace insurance exchanges, allowing individuals and small groups to purchase health insurance that is federally subsidized, effective January 1, 2014. We participate in the Marketplace in California, Florida, Michigan, New Mexico, Ohio, Texas and Washington. As previously announced, we exited the Utah and Wisconsin ACA Marketplaces effective January 1, 2018.

Medicare. Medicare is a federal program that provides eligible persons age 65 and over and some disabled persons with a variety of hospital, medical insurance, and prescription drug benefits. Medicare is funded by Congress, and administered by the Centers for Medicare and Medicaid Services (CMS). Medicare beneficiaries may enroll in a Medicare Advantage plan, under which managed care plans contract with CMS to provide benefits that are comparable to original Medicare. Such benefits are provided in exchange for a fixed per-member per-month (PMPM) premium payment that varies based on the county in which a member resides, the demographics of the member, and the member's health condition. Since 2006, Medicare beneficiaries have had the option of selecting a new prescription drug benefit from an existing Medicare Advantage plan. The drug benefit, available to beneficiaries for a monthly premium, is subject to certain cost sharing depending upon the specific benefit design of the selected plan.

Medicare-Medicaid Plans, or MMPs. Approximately nine million low-income elderly and disabled people are covered under both the Medicare and Medicaid programs. These beneficiaries are more likely than other Medicare beneficiaries to be frail, live with multiple chronic conditions, and have functional and cognitive impairments. Medicare is their primary source of health insurance coverage. Medicaid supplements Medicare by paying for services not covered by Medicare, such as dental care and long-term care services and support, and by helping to cover Medicare's premiums and cost-sharing requirements. Together, these two programs help to shield very low-income Medicare beneficiaries from potentially unaffordable out-of-pocket medical and long-term care costs. To coordinate care for those who qualify to receive both Medicare and Medicaid services (the "dual eligible"), and to

deliver services to these individuals in a more financially efficient manner, some states have undertaken demonstration programs to integrate Medicare and Medicaid services for dual eligible individuals. The health plans participating in such demonstrations are referred to as MMPs. We operate MMPs in six states.

Significant Trends and Developments

Refer to the discussion above, in the "Consolidated Results," and also below, in "Financial Performance by Program" sections of this MD&A.

Competition

The Medicaid managed care industry is subject to ongoing changes as a result of health care reform, business consolidations and new strategic alliances. We compete with national, regional, and local Medicaid service providers, principally on the basis of size, location, quality of provider network, quality of service, and reputation. Our primary competitors in the Medicaid managed care industry include Centene Corporation, WellCare Health Plans, Inc., UnitedHealth Group Incorporated, Anthem, Inc., and Aetna Inc. Competition can vary considerably from state to state.

Regulation

Our health plans are highly regulated by both state and federal government agencies. Regulation of managed care products and health care services varies from jurisdiction to jurisdiction, and changes in applicable laws and rules occur frequently. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Such agencies have become increasingly active in recent years in their review and scrutiny of health insurers and managed care organizations, including those operating in the Medicaid and Medicare programs.

HIPAA. In 1996, Congress enacted the Health Insurance Portability and Accountability Act (HIPAA). All health plans are subject to HIPAA, including ours. HIPAA generally requires health plans to:

- Establish the capability to receive and transmit electronically certain administrative health care transactions, such as claims payments, in a standardized format;
- Afford privacy to patient health information; and
- Protect the privacy of patient health information through physical and electronic security measures.

Health care reform created additional tools for fraud prevention, including increased oversight of providers and suppliers participating or enrolling in Medicaid, CHIP, and Medicare. Those enhancements included mandatory licensure for all providers, and site visits, fingerprinting, and criminal background checks for higher risk providers.

Regulatory Capital Requirements and Dividend Restrictions. Our health plans are subject to stringent minimum capitalization requirements that limit their ability to pay dividends to us. For further information, refer to the Notes to Consolidated Financial Statements, Note 19, "Commitments and Contingencies—Regulatory Capital Requirements and Dividend Restrictions."

Quality

Our long-term success depends, in large part, on the quality of the services we provide. As of December 31, 2017, 11 of our 13 health plans were accredited by the National Committee for Quality Assurance (NCQA), including the Multicultural Health Care Distinction, which is awarded to organizations that meet or exceed its rigorous requirements for multicultural health care.

The table below presents our health plans' NCQA status, as well as their scores as part of the CMS 2017 Star Ratings, which measures the quality of Medicare plans across the country using a 5-star rating system.

We believe that these objective measures of quality are important to state Medicaid agencies, as a growing number of states link reimbursement and patient assignment to quality scores. Additionally, Medicare pays quality bonuses to health plans that achieve high quality.

State	NCQA Health Plan Accreditation	NCQA Multicultural Healthcare Distinction	NCQA Health Insurance Plan Rating 2017-2018 (Medicaid)	Medicare Star Rating 2018
California	Marketplace – Accredited Medicaid – Commendable	Marketplace & Medicaid	3.0 ★★★☆☆	3.0 ★★★☆☆
Florida	Marketplace – Accredited Medicaid – Commendable	Marketplace & Medicaid	3.0 ★★★☆☆	3.0 ★★★☆☆
Illinois	Medicaid – Accredited	Medicaid	3.0 ★★★☆☆	not applicable
Michigan	Marketplace – Accredited Medicaid – Commendable	Marketplace & Medicaid	3.5 ★★★½☆	3.0 ★★★☆☆
New Mexico	Marketplace – Accredited Medicaid – Commendable	Marketplace & Medicaid	3.0 ★★★☆☆	3.0 ★★★☆☆
Ohio	Marketplace – Accredited Medicaid – Accredited	Marketplace & Medicaid	3.5 ★★★½☆	2.5 ★★½☆☆ (Part D Only)
South Carolina	Medicaid – Commendable	Medicaid	3.0 ★★★☆☆	not applicable
Texas	Marketplace – Accredited Medicaid – Commendable	Marketplace & Medicaid	3.5 ★★★½☆	3.0 ★★★☆☆
Utah	Medicaid – Commendable	Medicaid	3.5 ★★★½☆	3.5 ★★★½☆
Washington	Marketplace – Accredited Medicaid – Commendable	Marketplace & Medicaid	3.5 ★★★½☆	3.0 ★★★☆☆
Wisconsin	Medicaid – Commendable	Medicaid	3.5 ★★★½☆	3.5 ★★★½☆

Programs and Services

As of December 31, 2017, the Health Plans segment consisted of health plans operating in 12 states and the Commonwealth of Puerto Rico. These health plans served approximately 4.5 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Affordable Care Act Marketplace (Marketplace) members, most of whom receive government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO).

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. The contracts are subject to risk of loss when a state issues a new request for proposal (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled (ABD); and regions or service areas.

Basis for our Premium Rates

Medicaid. Under our Medicaid contracts, state government agencies pay our health plans fixed PMPM rates that vary by state, line of business and demographics; and we arrange, pay for and manage health care services provided to Medicaid beneficiaries. Therefore, our health plans are at risk for the medical costs associated with their members' health care. The rates we receive are subject to change by each state and, in some instances, provide for adjustments for health risk factors. CMS requires these rates to be actuarially sound. Payments to us under each of our Medicaid contracts are subject to the annual appropriation process in the applicable state.

Medicare. Under Medicare Advantage, managed care plans contract with CMS to provide benefits in exchange for a fixed PMPM premium payment that varies based on the county in which a member resides, and adjusted for demographic and health risk factors. CMS also considers inflation, changes in utilization patterns and average per capita fee-for-service Medicare costs in the calculation of the fixed PMPM premium payment. Amounts payable to us under the Medicare Advantage contracts are subject to annual revision by CMS, and we elect to participate in each Medicare service area or region on an annual basis. Medicare Advantage premiums paid to us are subject to

federal government reviews and audits which can result, and have resulted, in retroactive and prospective premium adjustments. Compared with our Medicaid plans, Medicare Advantage contracts generate higher average PMPM revenues and health care costs.

Marketplace. For our Marketplace plans, we develop premium rates during the spring of each year for policies effective in the following calendar year. Premium rates are based on our estimates of projected member utilization, medical unit costs, member risk acuity, member risk transfer, and administrative costs, with the intent of realizing a target pretax percentage profit margin. Our actuaries certify the actuarial soundness of Marketplace premiums in the rate filings submitted to the various state and federal authorities for approval.

Premiums by Program

The amount of the premiums paid to our health plans may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program on a PMPM basis, for the year ended December 31, 2017. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	PMPM Premiums		
	Low	High	Consolidated
TANF and CHIP	$ 110.00	$ 290.00	$ 180.00
Marketplace	180.00	480.00	270.00
Medicaid Expansion	320.00	510.00	390.00

Membership by Program and Health Plan

The following tables set forth our health plans' membership as of the dates indicated:

	As of December 31,		
	2017	**2016**	**2015**
Ending Membership by Program:			
TANF and CHIP	2,457,000	2,536,000	2,312,000
Marketplace	815,000	526,000	205,000
Medicaid Expansion	668,000	673,000	557,000
ABD	412,000	396,000	366,000
MMP – Integrated	57,000	51,000	51,000
Medicare	44,000	45,000	42,000
	4,453,000	4,227,000	3,533,000
Ending Membership by Health Plan:			
California	746,000	683,000	620,000
Florida [(1)]	625,000	553,000	440,000
Illinois	165,000	195,000	98,000
Michigan	398,000	391,000	328,000
New Mexico [(2)]	253,000	254,000	231,000
New York [(3)]	32,000	35,000	—
Ohio	327,000	332,000	327,000
Puerto Rico	314,000	330,000	348,000
South Carolina	116,000	109,000	99,000
Texas	430,000	337,000	260,000
Utah	152,000	146,000	102,000
Washington	777,000	736,000	582,000
Wisconsin	118,000	126,000	98,000
	4,453,000	4,227,000	3,533,000

(1) On February 1, 2018, we were selected by the Florida Agency for Health Care Administration (AHCA) to negotiate for the award of a managed care contract in only one region of Florida. That region—Region 11—comprises Miami-Dade and Monroe counties, where we currently serve 59,000 Medicaid members. As of December 31, 2017, we served a total of approximately 360,000 Medicaid members in Florida.

(2) In January 2018, our New Mexico health plan was notified by the New Mexico Human Services Department (HSD) that the health plan had not been selected for the tentative award of a Medicaid contract effective January 1, 2019. As of December 31, 2017, we served approximately 224,000 Medicaid members in New Mexico.

(3) The New York health plan was acquired on August 1, 2016.

FINANCIAL OVERVIEW

2017 Compared with 2016

In 2017, a 10% increase in membership, and a 5% increase in revenue PMPM, resulted in increased premium revenue of 15%, or $2.4 billion, when compared with 2016.

The medical care ratio increased to 90.6% in 2017, from 89.8% in 2016. Medical margin (measured in absolute dollars) increased 7% in 2017 over 2016. Our 2017 medical care ratio of 90.6% was burdened by substantial unfavorable out-of-period items, including:

- Approximately $150 million of medical margin deterioration resulting from unfavorable prior period claims development, the related need to replenish margins for adverse development in our liability for medical claims and benefits payable, and increased reserves for premiums we expect to repay to state Medicaid agencies; and
- Approximately $90 million of unfavorable Marketplace items, most notably the lack of CSR reimbursement in the fourth quarter of 2017.

Absent these items, our medical care ratio for 2017 would have been approximately 89.3%.

2016 Compared with 2015

In 2016, a 27% increase in membership, partially offset by a 3% decrease in revenue PMPM, resulted in increased premium revenue of 24%, or $3.2 billion, when compared with 2015.

The medical care ratio increased to 89.8% in 2016, from 88.9% in 2015. The increase in our medical care ratio was driven primarily by Marketplace membership. Medical margin (measured in absolute dollars) increased 14% in 2016 over 2015. The medical care ratio of all of our programs excluding Marketplace decreased by 10 basis points between 2015 and 2016, as decreasing margins in Medicaid Expansion (where we saw a 300 basis point increase in our medical care ratio) were offset by improved margins in other programs. Consolidated medical care costs measured on a PMPM basis decreased approximately 3% in 2016 when compared with 2015.

FINANCIAL PERFORMANCE BY PROGRAM

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

	Year Ended December 31, 2017						
	Member Months [1]	Premium Revenue		Medical Care Costs		MCR [2]	Medical Margin
		Total	PMPM	Total	PMPM		
TANF and CHIP	30.2	$ 5,554	$ 183.75	$ 5,111	$ 169.09	92.0%	$ 443
Medicaid Expansion	8.1	3,150	388.42	2,674	329.73	84.9	476
ABD	4.9	5,135	1,050.41	4,863	994.80	94.7	272

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) "MCR" represents medical costs as a percentage of premium revenue.

2017 TRENDS

Medicaid TANF, CHIP and ABD. TANF represented approximately 40% of our total Medicaid revenue in 2017, with a medical care ratio of 92.0%. Keys to the cost-effective delivery of care to TANF members include:

- Effective utilization controls and care management, particularly with respect to high-risk pregnancies; and
- Reducing unit costs of high-cost providers.

Our ABD program represented approximately 37% of our total Medicaid revenue in 2017, with a medical care ratio of 94.7%. Keys to the cost-effective delivery of care to ABD members include:

- Improved care management and coordination of services for high acuity populations, focusing on the integration of behavioral and physical health services;
- Targeting high risk members for care management intervention and more comprehensive documentation of medical conditions; and
- Improved management of community and other long-term care services for members in this program.

Medicaid Expansion. Medicaid Expansion represented approximately 23% of our total Medicaid revenue in 2017, with a medical care ratio of 84.9%. This program continues to contribute favorably to our overall profitability and was responsible for approximately 40% of our total Medicaid medical margin for 2017. While premiums and margins for Medicaid Expansion have been declining in recent years, the rating environment appears to have stabilized.

Marketplace. The Marketplace 2017 medical care ratio was 88.1%. As noted above, the Marketplace program was burdened in 2017 by a net $90 million unfavorable impact from various Marketplace CSR, risk adjustment and premium deficiency reserve items. In response to profitability challenges, effective January 1, 2018, we exited the Marketplaces entirely in Utah and Wisconsin while also limiting our presence in Washington. Also effective January 1, 2018, we increased Marketplace premium rates by an average of 58%.

2017 Compared with 2016

Medicaid TANF and CHIP. The performance of TANF and CHIP was very consistent between 2017 and 2016, with flat enrollment, a premium revenue increase of approximately 3%; and an increase in the medical care ratio to 92.0% in 2017, from 91.6% in 2016.

Medicaid ABD. ABD enrollment grew approximately 4% in 2017 compared with 2016, while premium revenue grew by approximately 10%. The medical care ratio for our ABD membership deteriorated to 94.7% in 2017, from 91.6% in 2016. The deterioration in medical cost performance was most notable in Michigan, New Mexico and Texas.

Medicaid Expansion. Medicaid Expansion enrollment grew approximately 4% in 2017 compared with 2016, while premium revenue grew by approximately 7%. The medical care ratio for our Medicaid Expansion membership deteriorated to 84.9% in 2017 from 83.8% in 2016. Reduced premium rates in California were the primary driver of declining performance in 2017.

MMP and Medicare. MMP and Medicare enrollment and premium combined grew by approximately 9% in 2017 compared with 2016. The medical care ratio for this membership increased 30 basis points from 2016 to 2017.

Marketplace. Marketplace enrollment increased over 60% in 2017 compared with 2016, while premium revenue increased over 90%. Despite a decrease in the medical care ratio of 360 basis points in 2017 compared with 2016, our Marketplace program still failed to meet expectations in 2017.

2016 Compared with 2015

Medicaid TANF, CHIP and ABD. TANF, CHIP and ABD revenue increased in 2016 when compared with 2015, due to health plan acquisitions in late 2015 and 2016, as well as inclusion of a full year of Puerto Rico operations in 2016 (Puerto Rico began operations effective April 1, 2015). The slight decline in the medical care ratio for these programs on a consolidated basis when comparing 2016 with 2015 is not significant given normal margin fluctuations observed when performance is reviewed at this level of detail.

Medicaid Expansion. Member months increased 33% in 2016, when compared with 2015, as a result of membership growth in all states. Lower premium revenue PMPM more than offset lower medical costs PMPM, leading to an increase in the consolidated medical care ratio for the Medicaid Expansion program. Medicaid Expansion medical care ratios increased in Illinois, Michigan, New Mexico and Ohio.

MMP and Medicare. Membership and revenue increased on a consolidated basis for the MMP and Medicare programs when comparing 2016 with 2015. The medical care ratio for these programs, in the aggregate, decreased due to higher margins for the MMP program.

*Marketplace. O*ur Marketplace program performed poorly in 2016. The medical care ratio of our Marketplace membership increased to 91.7% in 2016, from 73.6% in 2015. This decline in profitability was the result of lower premium revenue PMPM, the recording of a $30 million premium deficiency reserve at December 31, 2016, and higher medical costs PMPM.

The poor performance of our Marketplace program in 2016 was exacerbated by the federal government's failure to pay amounts owed to our health plans under the Marketplace risk corridor program. We believe our health plans are owed approximately $76 million in Marketplace risk corridor payments for 2016 dates of service, but have not recorded any amounts associated with this claim.

FINANCIAL PERFORMANCE BY STATE HEALTH PLAN

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by state health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

Health Plans Segment Financial Data — Core Operations (Medicaid and Medicare Combined)

	Year Ended December 31, 2017						
	Member Months	Premium Revenue		Medical Care Costs		MCR	Medical Margin
		Total	PMPM	Total	PMPM

(1) The New York health plan was acquired on August 1, 2016. Our Puerto Rico health plan began serving members on April 1, 2015.
(2) "Other" medical care costs include primarily medically related administrative costs of the parent company, and direct delivery costs.

MEDICAL CARE COSTS BY TYPE

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. The following table provides the details of consolidated medical care costs by type for the periods indicated (dollars in millions except PMPM amounts):

	Year Ended December 31,								
	2017			2016			2015		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 12,682	$ 229.63	74.3%	$ 10,993	$ 217.84	74.4%	$ 8,572	$ 218.35	72.7%
Pharmacy	2,563	46.40	15.0	2,213	43.84	15.0	1,610	41.01	13.7
Capitation	1,360	24.63	8.0	1,218	24.13	8.2	982	25.02	8.3
Direct delivery	73	1.33	0.4	78	1.55	0.5	128	3.26	1.1
Other	395	7.15	2.3	272	5.39	1.9	502	12.79	4.2
	$ 17,073	$ 309.14	100.0%	$ 14,774	$ 292.75	100.0%	$ 11,794	$ 300.43	100.0%

PREMIUM TAXES

The premium tax ratio (premium tax expense as a percentage of premium revenue plus premium tax revenue) was 2.3% in 2017, 2.8% in 2016, and 2.9% in 2015. The decreases in the premium tax ratio were primarily due to the significant revenue growth at our Florida health plan in 2017 and 2016, which operates in a state with no premium tax, and growth in MMP revenue. The Medicare portion of MMP revenue is not subject to premium tax.

HEALTH INSURER FEES (HIF)

The Consolidated Appropriations Act of 2016 provided for a HIF moratorium in 2017. Therefore, there were no health insurer fees reimbursed, nor health insurer fees incurred, in 2017.

HIF reimbursed, as a percentage of premium revenue, was consistent at 1.8% in 2016 and 2015.

IMPAIRMENT LOSSES

In 2017, we incurred $269 million of impairment losses related to our Health Plans segment, primarily in connection with our Florida, New Mexico, and Illinois health plans. The impairments at Florida and New Mexico were the result of our recent Medicaid contract losses. The Illinois impairment was the result of management's determination, in the course of its annual impairment assessment of the goodwill of the Illinois health plan, that the plan's future cash flow projections were insufficient to produce an estimated fair value in excess of its carrying amount. While we are confident that we can improve profitability in Illinois so that it is a meaningful contributor to our company, the current profit profile of the health plan does not support the purchase prices paid for certain membership years ago.

MOLINA MEDICAID SOLUTIONS

BUSINESS OVERVIEW

- 1.0% of total revenue in 2017
- 1.1% of total revenue in 2016
- Employees: approximately 1,200

Programs and Services

The Molina Medicaid Solutions segment provides support to state government agencies in the administration of their Medicaid programs including business processing, information technology development, and administrative services. Molina Medicaid Solutions is under contract with Medicaid agencies in six states, and the U.S. Virgin Islands. Our existing state Medicaid management information system (MMIS) contracts have terms that currently extend to 2018 through 2025, before renewal options.

Competition and Regulation

Molina Medicaid Solutions competes with large MMIS vendors, such as DXC Technology Company, Conduent, Inc. and CNSI. Molina Medicaid Solutions' contracts with state government customers may include unique and specialized performance requirements. In particular, contracts with state government customers are subject to various procurement regulations, contract provisions, and other requirements relating to their formation, administration, and performance.

FINANCIAL OVERVIEW

2017 Compared with 2016

The year over year change in service margin was insignificant to our consolidated results of operations.

As discussed further in the Notes to Consolidated Financial Statements, Note 8, "Goodwill and Intangible Assets, Net," in 2017 we recorded goodwill impairment losses of $28 million.

2016 Compared with 2015

Service margin declined $34 million in 2016 compared with 2015, primarily due to increased service costs associated with legacy state contracts that were re-procured.

OTHER

BUSINESS OVERVIEW

- 1.7% of total revenue in 2017
- 2.0% of total revenue in 2016
- Employees: Corporate – approximately 7,100; Pathways – approximately 6,000

Programs and Services

The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

We acquired the outstanding ownership interests in Pathways Health and Community Support, LLC (Pathways), formerly known as Providence Human Services, LLC, in late 2015. Substantially all of Pathways' revenue is derived from contracts with state or local government agencies and government intermediaries, the majority of which are negotiated fee-for-service arrangements.

FINANCIAL OVERVIEW

2017 Compared with 2016

Service margin declined $20 million in 2017 compared with 2016, due primarily to reduced revenues as a result of the termination of operations in selected markets, and increased professional labor benefit expenses.

As discussed further in the Notes to Consolidated Financial Statements, Note 8, "Goodwill and Intangible Assets, Net," in 2017 we recorded impairment losses primarily relating to our Pathways subsidiary, of $162 million for goodwill and $11 million for intangible assets.

2016 Compared with 2015

Service margin was $33 million in 2016 and insignificant in 2015. The service margin in 2015 was insignificant because our acquisition of Pathways was not completed until the fourth quarter of 2015.

OTHER CONSOLIDATED INFORMATION

GENERAL AND ADMINISTRATIVE EXPENSES

General and administrative expenses as a percentage of total revenue (the "general and administrative expense ratio") was 8.0% in 2017, 7.8% in 2016, and 8.1% in 2015. Our general and administrative ratio has been relatively constant since the phase-in of the ACA Medicaid Expansion and Marketplace programs beginning in 2014.

DEPRECIATION AND AMORTIZATION

Depreciation and amortization amounted to 0.9%, 1.0% and 0.8% of total revenue for the years ended December 31, 2017, 2016 and 2015, respectively.

RESTRUCTURING AND SEPARATION COSTS

For a comprehensive discussion of our 2017 Restructuring Plan, refer to "Liquidity and Financial Condition—Future Sources and Uses of Liquidity," in this MD&A, and Notes to Consolidated Financial Statements, Note 15, "Restructuring and Separation Costs."

INTEREST EXPENSE

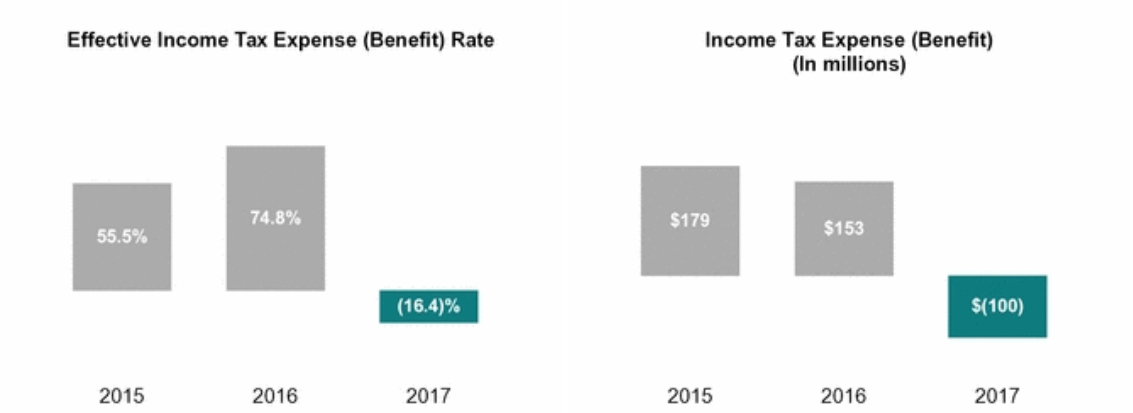
Interest expense increased to $118 million for the year ended December 31, 2017, compared with $101 million for the year ended December 31, 2016. The increase was due primarily to our issuance of $330 million aggregate principal amount of senior notes (the 4.875% Notes) due June 15, 2025, and $300 million borrowed under our

Credit Facility in the third quarter of 2017. For further details regarding debt financing transactions, please refer to the Notes to Consolidated Financial Statements, Note 11, “Debt.”

Interest expense increased to $101 million for the year ended December 31, 2016, compared with $66 million for the year ended December 31, 2015. The increase was due primarily to our issuance of $700 million aggregate principal amount of senior notes (the 5.375% Notes) due November 15, 2022, in the fourth quarter of 2015.

Interest expense includes non-cash interest expense relating to the amortization of the discount on our long-term debt obligations, which amounted to $32 million, $31 million and $30 million for the years ended December 31, 2017, 2016, and 2015, respectively.

INCOME TAXES



The revaluation of deferred tax assets in connection with the *Tax Cuts and Jobs Act of 2017* resulted in $54 million additional income tax expense in the year ended December 31, 2017 ($0.95 per diluted share). In addition, the effective tax benefit for 2017 is less than the statutory tax benefit due to the relatively large amount of reported expenses that are not deductible for tax purposes, primarily relating to goodwill impairment losses and separation costs.

The decrease in income before taxes in 2016 compared with 2015, combined with the relatively large amount of reported expenses that are not deductible for tax purposes, resulted in an effective tax rate in excess of 70% for the full year 2016, compared with 55.5% for 2015.

LIQUIDITY AND FINANCIAL CONDITION

INTRODUCTION

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

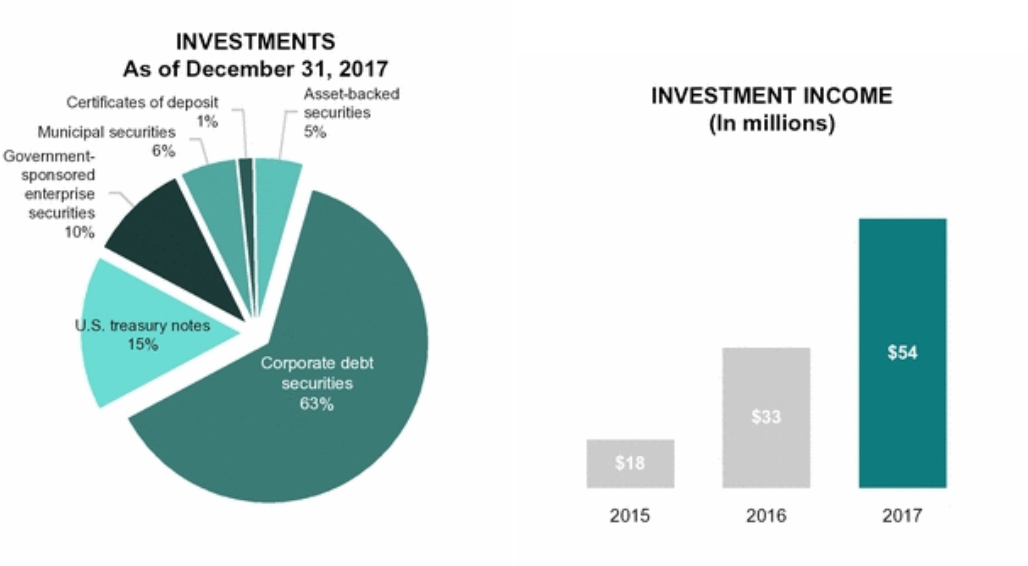
Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue a short time before we pay for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations.

Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of 10 years or

less (excluding variable rate securities, for which interest rates are periodically reset) and that the average maturity be three years or less. Professional portfolio managers operating under documented guidelines manage our investments and a portion of our cash equivalents. Our portfolio managers must obtain our prior approval before selling investments where the loss position of those investments exceeds certain levels.

Our non-current restricted investments are invested principally in certificates of deposit and U.S. treasury securities; we have the ability to hold our non-current restricted investments until maturity. We also maintain certain funds from the issuance of our 4.875% Notes in a segregated deposit account, a current asset reported as “Restricted investments” in the accompanying consolidated balance sheets. Such investments, while restricted as to their use and held in a segregated deposit account, are classified as available-for-sale based upon our contractual liquidity requirements.

All of our unrestricted investments are classified as current assets and are presented in the table below.



Investment income increased in 2017 compared with 2016, and in 2016 compared with 2015, primarily due to the increase in invested assets in each of 2017 and 2016. See further discussion below in “Liquidity.”

MARKET RISK

Our earnings and financial position are exposed to financial market risk relating changes in interest rates, and the resulting impact on investment income and interest expense.

Substantially all of our investments and restricted investments are subject to interest rate risk and will decrease in value if market interest rates increase. Assuming a hypothetical and immediate 1% increase in market interest rates at December 31, 2017, the fair value of our fixed income investments would decrease by approximately $24 million. Declines in interest rates over time will reduce our investment income.

For further information on fair value measurements and our investment portfolio, please refer to the Notes to Consolidated Financial Statements, Note 4, “Fair Value Measurements,” Note 5, “Investments,” and Note 9, “Restricted Investments, Non-current.”

Borrowings under our Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. As of December 31, 2017, $300 million was outstanding under the Credit Facility.

In January 2018, we entered into a bridge credit agreement (Bridge Credit Agreement) with several banks. Under the Bridge Credit Agreement, the banks agreed to lend us up to $550 million to be used to: (i) satisfy conversions of

our 1.125% Convertible Notes; (ii) satisfy and/or refinance indebtedness incurred to satisfy conversion of the 1.125% Convertible Notes; (iii) repay or refinance our Credit Facility; (iv) pay fees and expenses in connection with the foregoing; and, subject to the satisfaction of specified conditions, for general corporate purposes. Borrowings under the Bridge Credit Agreement will bear interest based, at our election, at a base rate or an adjusted LIBOR rate, plus in each case the applicable margin. No amounts are currently outstanding under the Bridge Credit Agreement.

LIQUIDITY

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Year Ended December 31,				
	2017	2016	2015	2016 to 2017 Change	2015 to 2016 Change
	(In millions)				
Net cash provided by operating activities	$ 804	$ 673	$ 1,125	$ 131	$ (452)
Net cash used in investing activities	(1,073)	(202)	(1,420)	(871)	1,218
Net cash provided by financing activities	636	19	1,085	617	(1,066)
Net increase in cash and cash equivalents	$ 367	$ 490	$ 790	$ (123)	$ (300)

Operating Activities

2017 Compared with 2016

Net cash provided by operating activities was $804 million in 2017 compared with $673 million in 2016, an increase of $131 million, due to the following factors:

The combined effect of our 2017 net loss and adjustments to cash provided by operating activities, which included non-cash impairment losses of $470 million and non-cash restructuring charges of $60 million, resulted in a $114 million use of cash.

Receivables and deferred revenue. Cash flows from operations in each year were impacted by the timing of payments we receive from our states. In general, states may delay our premium payments, which we record as a receivable, or they may prepay the following month's premium payment, which we record as deferred revenue. We typically receive capitation payments monthly; however, the states in which we operate may decide to adjust their payment schedules which could positively or negatively impact our reported cash flows from operating activities in any given period. In the current year, the net effect of the timing of premiums received at our California, Florida, Illinois, and Washington health plans positively impacted our cash flows from operating activities in the amount of $325 million.

Amounts due government agencies. While amounts due government agencies increased $340 million in 2017, this increase was less than the increase experienced in 2016, resulting in a decrease to cash flows from operations of $132 million. This decrease was due primarily to a decline in the amounts accrued for Health Plans segment programs that mandate medical cost floors or medical cost corridors, under which a portion of certain Medicaid, Medicare, and Marketplace premiums received by our health plans may be returned if certain minimum amounts are not spent on defined medical care costs. This decrease was partially offset by increased Marketplace risk adjustment accruals.

2016 Compared with 2015

Net cash provided by operating activities was $673 million in 2016, compared with $1,125 million in 2015, a decrease of $452 million. This decrease was due primarily to a $91 million decrease in net income, and the following factors:

Receivables and deferred revenue. Cash flows from operations in each year were impacted by the timing of payments we receive from our states. In general, states may delay our premium payments, which we record as a receivable, or they may prepay the following month's premium payment, which we record as deferred revenue. We typically receive capitation payments monthly; however, the states in which we operate may decide to adjust their payment schedules which could positively or negatively impact our reported cash flows from operating activities in any given period. In the current year, the net effect of the timing of premiums received at our California and Illinois health plans negatively impacted our cash flows from operating activities.

Medical claims and benefits payable. In 2016, the change in medical claims and benefits payable reduced cash flows from operations by $256 million, primarily because membership and related medical costs grew at a higher rate in 2015 than in 2016, resulting in a lower year-over-year change in 2016.

Amounts due government agencies. In 2016, the change in amounts due government agencies, when compared with the change in 2015, increased cash flows from operations by $271 million, due primarily to increased accruals for Marketplace risk adjustments.

Investing Activities

2017 Compared with 2016

Net cash used in investing activities was $1,073 million in 2017, compared with $202 million in 2016, an increase of $871 million. More cash was used in investing activities in 2017 primarily due to $789 million of increased purchases of investments as a result of the 2017 financing transactions described below, and $195 million decreased proceeds from sales and maturities of investments.

2016 Compared with 2015

Net cash used in investing activities was $202 million in 2016, compared with $1,420 million in 2015, a decrease of $1,218 million. Less cash was used in investing activities in 2016 primarily due to $840 million increased proceeds from sales and maturities of investments, and a reduction in cash paid in business combinations of $402 million in 2016, compared with 2015.

Financing Activities

2017 Compared with 2016

Cash provided by financing activities was $636 million in 2017, compared with $19 million in 2016. In 2017, cash inflows included $325 million for the net proceeds from our issuance of 4.875% Notes, and borrowings of $300 million under our Credit Facility, with no comparable activity in 2016.

2016 Compared with 2015

Cash provided by financing activities was $19 million in 2016, compared with $1,085 million in 2015. In 2015, we received net proceeds from our fiscal 2015 offerings of the 5.375% Notes amounting to $689 million, and common stock amounting to $373 million, with no comparable activity in 2016.

FINANCIAL CONDITION

We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

On a consolidated basis, at December 31, 2017, our working capital was $1,954 million compared with $1,418 million at December 31, 2016. At December 31, 2017, our cash and investments amounted to $6,000 million, compared with $4,689 million of cash and investments at December 31, 2016.

Debt Ratings. Our 5.375% Notes and 4.875% Notes are rated “BB-” by Standard & Poor’s, and “B3” by Moody’s Investor Service, Inc. A significant downgrade in our ratings could adversely affect our borrowing capacity and costs.

Financial Covenants. Our Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. Such ratios, presented below, are computed as defined by the terms of the Credit Facility.

Credit Facility Financial Covenants	Required Per Agreement	As of December 31, 2017
Net leverage ratio	<4.0x	3.1x
Interest coverage ratio	>3.5x	6.7x

In addition, the terms of our 4.875% Notes, 5.375% Notes and each of the 1.125% and 1.625% Convertible Notes contain cross-default provisions with the Credit Facility that are triggered upon an event of default under the Credit Facility, and when borrowings under the Credit Facility equal or exceed certain amounts as defined in the related indentures. As of December 31, 2017, we were in compliance with all covenants under the Credit Facility.

FUTURE SOURCES AND USES OF LIQUIDITY

Sources

Parent Cash and Cash Equivalents. Cash, cash equivalents and investments held by the parent company—Molina Healthcare, Inc.—amounted to $696 million as of December 31, 2017.

Dividends from Subsidiaries. When available and as permitted by applicable regulations, cash in excess of the capital needs of our regulated health plans is generally paid in the form of dividends to our unregulated parent company to be used for general corporate purposes. We received $245 million, $100 million, and $125 million in dividends from our regulated health plan subsidiaries in 2017, 2016, and 2015, respectively. We received $41 million, $1 million and $17 million in dividends from our unregulated subsidiaries during 2017, 2016 and 2015, respectively. See further discussion in the Notes to Consolidated Financial Statements, Note 19, "Commitments and Contingencies—Regulatory Capital Requirements and Dividend Restrictions," and Note 22, "Condensed Financial Information of Registrant—Note C - Dividends and Capital Contributions."

Borrowing Capacity and Debt Financing. We have available borrowing capacity of $550 million under our Bridge Credit Agreement (which amount is subject to the use of proceeds restrictions set forth in its terms), and $194 million under our Credit Facility. On June 6, 2017, we completed the private offering of $330 million aggregate principal amount of the 4.875% Notes. As a result of the proceeds from this transaction, we have adequate cash held in a restricted account available to repay the $161 million principal balance outstanding under our 1.625% Convertible Notes, if noteholders exercise their conversion or put rights in 2018. See further discussion in the Notes to Consolidated Financial Statements, Note 11, "Debt," for further information.

2017 Restructuring Plan. As previously disclosed, we estimate that our 2017 Restructuring Plan will reduce annualized run-rate expenses by approximately $300 million to $400 million when completed by the end of 2018. As of December 31, 2017, we achieved $235 million of these run-rate reductions by the elimination of administrative costs (some of which are classified as medical care costs) on an annualized basis. As of December 31, 2017 we had also achieved an undetermined amount of medical care cost savings on an annualized basis through the re-negotiation of various medical provider contracts and the restructuring of our direct delivery operations. We expect to have more visibility into the actual value of these medical care cost savings later in 2018. We incurred substantially all of the costs associated with the 2017 Restructuring Plan in 2017. The following table illustrates our current estimates of run-rate savings associated with the 2017 Restructuring Plan:

Estimated Savings Expected to be Realized by Reportable Segment	Health Plans	Other	Total
		(In millions)	
General and administrative expenses	$65	$92 to $152	$157 to $217
Medical care costs	$126 to $166	$17	$143 to $183
	$191 to $231	$109 to $169	$300 to $400

Shelf Registration Statement. We have a shelf registration statement on file with the Securities and Exchange Commission to register an unlimited amount of any combination of debt or equity securities in one or more offerings. Specific information regarding the terms and securities being offered will be provided at the time of an offering. Proceeds from future offerings are expected to be used for general corporate purposes, including, but not limited to, the repayment of debt, investments in or extensions of credit to our subsidiaries and the financing of possible acquisitions or business expansion.

Uses

Regulatory Capital Requirements. In 2017, 2016, and 2015, we contributed capital of $370 million, $338 million, and $320 million, respectively, to our health plans subsidiaries to satisfy statutory net worth requirements. For a comprehensive discussion of this topic, refer to the Notes to Consolidated Financial Statements, Note 19, "Commitments and Contingencies—Regulatory Capital Requirements and Dividend Restrictions."

Convertible Senior Notes. Refer to the Notes to Consolidated Financial Statements, Note 11, "Debt," for a detailed discussion of our Convertible Senior Notes. Both our 1.625% Convertible Notes and our 1.125% Convertible Notes are convertible into cash prior to their respective maturity dates under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger.

The stock price trigger for the 1.625% Notes is $75.51 per share. The 1.625% Convertible Notes did not meet this trigger in the quarter ended December 31, 2017. However, on contractually specified dates beginning in 2018, holders of the 1.625% Convertible Notes may require us to repurchase some or all of such notes. In addition, beginning May 15, 2018 until August 19, 2018, holders may convert some or all of the 1.625% Convertible Notes. Because of these put and conversion features, the 1.625% Convertible Notes are reported in current portion of long-term debt as of December 31, 2017. As described above, we have adequate cash held in a restricted account available to repay the 1.625% Convertible Notes, if noteholders exercise their conversion or put rights in 2018.

The stock price trigger for the 1.125% Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended December 31, 2017, and are convertible to cash through at least March 31, 2018. Because the 1.125% Convertible Notes may be converted into cash within 12 months, the $550 million carrying amount is reported in current portion of long-term debt as of December 31, 2017. For economic reasons related to the trading market for our 1.125% Convertible Notes, we believe that the amount of the notes that may be converted over the next twelve months, if any, will not be significant. However, if the trading market for our 1.125% Convertible Notes becomes closed or restricted due to market turmoil or other reasons such that the notes cannot be traded, or if the trading price of our 1.125% Notes, which normally trade at a marginal premium to the underlying composite stock-and-interest economic value, no longer includes that marginal premium, holders of our 1.125% Convertible Notes may elect to convert the notes to cash. If conversion requests are received, the settlement of the notes must be paid in cash pursuant to the terms of the relevant indentures. We have sufficient available cash, combined with borrowing capacity available under our Credit Facility and Bridge Credit Agreement, to fund conversions should they occur.

Exchange Offers. We may from time to time seek to retire or purchase material amounts of our outstanding debt through cash purchases and/or exchanges for equity securities, in open market purchases, privately negotiated transactions or otherwise. For example, on December 7, 2017, we announced that on December 6, 2017 we priced a synthetic exchange transaction with a limited number of holders of our 1.625% Convertible Notes pursuant to which we agreed to repurchase from such noteholders an aggregate of $141 million principal amount of our 1.625% Convertible Notes and simultaneously issue to such noteholders an aggregate of 2.6 million shares of our common stock registered under the shelf registration statement described above. Future repurchases or exchanges, if any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions and other factors.

CONTRACTUAL OBLIGATIONS

In the table below, we present our contractual obligations as of December 31, 2017. Some of the amounts included in this table are based on management's estimates and assumptions about these obligations, including their duration, the possibility of renewal, anticipated actions by third parties, and other factors. Because these estimates and assumptions are necessarily subjective, the contractual obligations we will actually pay in future periods may vary from those reflected in the table.

Additionally, we have a variety of other contractual agreements related to acquiring services used in our operations. However, we believe these other agreements do not contain material non-cancelable commitments.

	Total [1]	2018	2019-2020	2021-2022	2023 and after
			(In millions)		
Medical claims and benefits payable	$ 2,192	$ 2,192	$ —	$ —	$ —
Principal amount of debt [2]	2,041	—	550	1,000	491
Amounts due government agencies	1,542	1,542	—	—	—
Lease financing obligations	410	17	37	39	317
Interest on long-term debt	428	73	140	119	96
Operating leases	262	67	109	52	34
Purchase commitments	11	6	5	—	—
	$ 6,886	$ 3,897	$ 841	$ 1,210	$ 938

(1) As of December 31, 2017, we have recorded approximately $13 million of unrecognized tax benefits. The table does not contain this amount because we cannot reasonably estimate when or if such amount may be settled. For further information, refer to Notes to Consolidated Financial Statements, Note 13, "Income Taxes."

(2) Represents the principal amounts due on our 5.375% Notes due 2022, 1.125% Convertible Notes due 2020, 4.875% Notes due 2025, Credit Facility due 2022, and our 1.625% Convertible Notes due 2044. The amounts in the table reflect the 1.625% Convertible Notes' contractual maturity date in 2044; however, on specified dates beginning in 2018, holders of the 1.625% Convertible Notes may convert, or may require us to repurchase some or all of the 1.625% Convertible Notes, as described in the Notes to Consolidated Financial Statements, Note 11, "Debt."

Commitments and Contingencies. We are not a party to off-balance sheet financing arrangements, except for operating leases which are disclosed in the Notes to Consolidated Financial Statements, Note 19, "Commitments and Contingencies."

INFLATION

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

COMPLIANCE COSTS

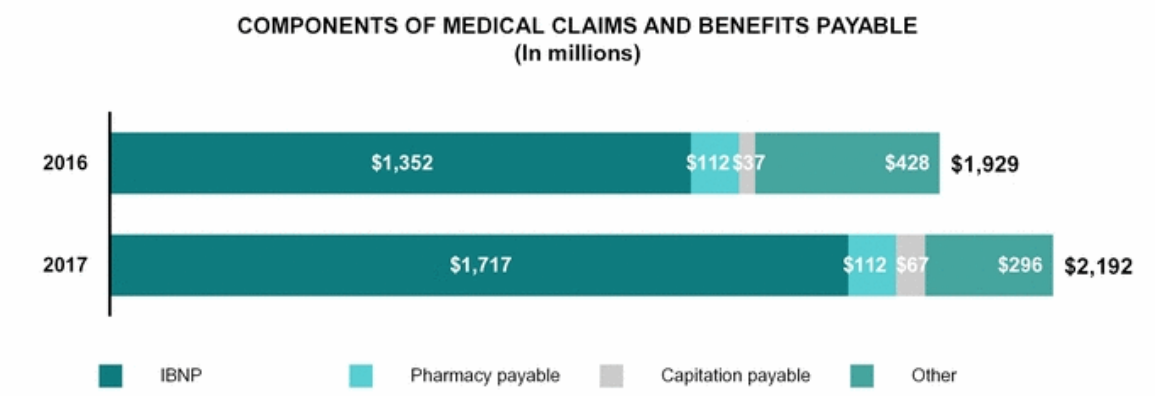
Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

CRITICAL ACCOUNTING ESTIMATES

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable.* See discussion below, and refer to the Notes to Consolidated Financial Statements, Note 10, "Medical Claims and Benefits Payable."
- *Health Plans segment contractual provisions that may adjust or limit revenue or profit.* For a comprehensive discussion of this topic, including amounts recorded in our consolidated financial statements, refer to the Notes to Consolidated Financial Statements, Note 2, "Significant Accounting Policies."
- *Health Plans segment quality incentives.* For a comprehensive discussion of this topic, including amounts recorded in our consolidated financial statements, refer to the Notes to Consolidated Financial Statements, Note 2, "Significant Accounting Policies."
- *Goodwill and intangible assets, net.* See discussion below, and refer to the Notes to Consolidated Financial Statements, Note 8, "Goodwill and Intangible Assets, Net."

MEDICAL CLAIMS AND BENEFITS PAYABLE - HEALTH PLANS SEGMENT



"Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of operations. As of December 31, 2017 and 2016, we recorded non-risk provider payables relating to such intermediary arrangements of approximately $122 million and $225 million, respectively.

The determination of our liability for medical claims and benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for medical claims and benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not yet paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are incurred but not paid (IBNP). Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the graph above, our estimated IBNP liability represented $1,717 million of our total medical claims and benefits payable of $2,192 million as of December 31, 2017.

The factors we consider when estimating our IBNP include, without limitation:

- claims receipt and payment experience (and variations in that experience),
- changes in membership,
- provider billing practices,
- health care service utilization trends,
- cost trends,
- product mix,
- seasonality,
- prior authorization of medical services,

- benefit changes,
- known outbreaks of disease or increased incidence of illness such as influenza,
- provider contract changes,
- changes to Medicaid fee schedules, and
- the incidence of high dollar or catastrophic claims.

Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further provision for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the hypothetical change in our estimate of claims liability as of December 31, 2017 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding December 31, 2017, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in millions.

Increase (Decrease) in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 527
(4)%	351
(2)%	176
2%	(176)
4%	(351)
6%	(527)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the hypothetical change in our estimate of claims liability as of December 31, 2017 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in millions.

(Decrease) Increase in Trended Per Member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (263)
(4)%	(176)
(2)%	(88)
2%	88
4%	176
6%	263

The following per-share amounts are based on a combined federal and state statutory tax rate of 37%, and 56 million diluted shares outstanding for the year ended December 31, 2017. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at December 31, 2017, net income for the year ended December 31, 2017 would increase or decrease by approximately $55 million, or $0.98 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at December 31, 2017, net income for the year ended December 31, 2017 would increase or decrease by approximately $28 million, or $0.49 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $276 million, or $4.90 per diluted share, and $138 million, or $2.45 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, changes in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $55 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse development in our claims payments for which the base actuarial model is not intended to and does not account. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled, changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development.

We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date.

The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, changes in estimates involving trended PMPM costs will almost always be accompanied by changes in estimates involving completion factors, and vice versa. In such circumstances, changes in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Refer to the Notes to Consolidated Financial Statements, Note 10, “Medical Claims and Benefits Payable,” for additional information regarding the specific factors used to determine our changes in estimates of IBNP, as well as a table presenting the components of the change in our medical claims and benefits payable, for all periods presented in the accompanying consolidated financial statements.

GOODWILL AND INTANGIBLE ASSETS, NET

At December 31, 2017, goodwill and intangible assets, net, represented approximately 3% of total assets and 19% of total stockholders’ equity, compared with 10% and 46%, respectively, at December 31, 2016.

In the year ended December 31, 2017, we recorded impairment losses relating to goodwill and intangible assets, net, of $470 million. These losses included $269 million primarily in connection with our Florida, New Mexico, and Illinois health plans. The impairments at Florida and New Mexico were the result of our recent Medicaid contract losses. The Illinois impairment was the result of management’s determination, in the course of its annual impairment assessment of the goodwill of the Illinois health plan, that the plan’s future cash flow projections were insufficient to produce an estimated fair value in excess of its carrying amount. While we are confident that we can improve profitability in Illinois so that it is a meaningful contributor to our company, the current profit profile of the health plan does not support the purchase prices paid for certain membership years ago. Also during 2017, we recorded impairment losses of $28 million for our Molina Medicaid Solutions segment because management determined that Molina Medicaid Solutions will provide fewer future benefits for its support of the Health Plans segment. In addition, we recorded impairment losses of $173 million for our Other segment, primarily relating to our Pathways business, because management determined that Pathways will not provide future benefits relating to the integration of its operations with the Health Plans segment to the extent previously expected.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations. Goodwill is not amortized, but is tested for impairment on an annual basis and more frequently if impairment indicators are present. Such events or circumstances may include experienced or expected operating cash-flow deterioration or losses, significant loss of membership, loss of state funding, loss of state contracts, and other factors.

We conduct our required annual impairment testing of goodwill during the fourth quarter of each year for each of our reporting units that have recorded goodwill. Our reporting units comprise our health plan subsidiaries, and our Molina Medicaid Solutions and Pathways subsidiaries. When testing goodwill for impairment, we may first assess qualitative factors, such as industry and market factors, cost factors, and changes in overall performance, to determine if it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value. If our qualitative assessment indicates that it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value, we perform the quantitative assessment. We may also elect to bypass the qualitative assessment and proceed directly to the quantitative assessment. We believe that the dynamic economic and political environments in which we operate often necessitate the performance of the quantitative test to prove that goodwill is not impaired on an annual basis. As of December 31, 2017, we performed qualitative impairment tests for our Michigan, Washington and Wisconsin health plans; based on these tests, we do not believe that it is more likely than not that the carrying value of these reporting units would exceed their estimated fair values.

As of December 31, 2017, we performed quantitative impairment tests for our Florida, Illinois, New Mexico, New York and South Carolina health plans, and our Molina Medicaid Solutions subsidiary.

We estimated the fair values of our reporting units using the higher of the income approach using discounted cash flows, or the asset liquidation method. For the annual impairment test, the base year in the reporting units’ discounted cash flows is derived from the most recent annual financial budgeting cycle, for which the planning process commences in the fourth quarter of the year. When computing discounted cash flows, we make assumptions about a wide variety of internal and external factors, and consider what the reporting unit’s selling price would be in an orderly transaction between market participants at the measurement date. Significant assumptions include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value beyond the discretely forecasted periods, and discount rates. When determining the discount rate, we consider the overall level of inherent risk of the reporting unit, and the expected rate an outside investor would expect to earn. The asset liquidation method is computed as total assets minus total liabilities, excluding intangible assets and liabilities.

Key assumptions in our cash flow projections, including changes in membership, premium rates, health care and operating cost trends, and contract renewals and the procurement of new contracts, are consistent with those used in our long-range business plan and annual planning process. If these assumptions differ from actual results, the outcome of our goodwill impairment tests could be adversely affected.

Goodwill is impaired if the carrying amount of the reporting unit exceeds its estimated fair value. This excess is recorded as an impairment loss, and adjusted if necessary for the impact of tax deductible goodwill. The loss recognized may not exceed the total goodwill allocated to the reporting unit.

For our South Carolina health plan and our Molina Medicaid Solutions subsidiary, whose goodwill was not impaired as of December 31, 2017, their estimated fair values exceeded their carrying amounts by 46% and 9%, respectively. The Molina Medicaid Solutions' reporting unit recorded a goodwill impairment loss as of September 30, 2017; therefore its estimated fair value did not substantially exceed its carrying amount as of December 31, 2017.

Refer to Notes to Consolidated Financial Statements, Note 8, "Goodwill and Intangible Assets, Net," for further details on the goodwill impairment losses recorded in 2017.

No goodwill impairment charges were recorded in the years ended December 31, 2016, or 2015.

Intangible Assets

Finite-lived, separately-identified intangible assets acquired in business combinations are assets that represent future expected benefits but lack physical substance (such as purchased contract rights and provider contracts). Our intangible assets are subject to impairment tests when events or circumstances indicate that a finite-lived intangible asset's (or asset group's) carrying value may not be recoverable. Consideration is given to a number of potential impairment indicators, including the ability of our health plan subsidiaries to obtain the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that these contracts will continue to be renewed.

Following the identification of any potential impairment indicators, to determine whether an impairment exists, we would compare the carrying amount of a finite-lived intangible asset with the greater of the undiscounted cash flows that are expected to result from the use of the asset or related group of assets, or its value under the asset liquidation method. If it is determined that the carrying amount of the asset is not recoverable, the amount by which the carrying value exceeds the estimated fair value is recorded as an impairment.

Refer to Notes to Consolidated Financial Statements, Note 8, "Goodwill and Intangible Assets, Net," for further details on the intangible impairment losses recorded in 2017.

No significant impairment charges relating to long-lived assets, including intangible assets, were recorded in the years ended December 31, 2016, or 2015.

SUPPLEMENTAL INFORMATION

FINANCIAL MEASURES THAT SUPPLEMENT U.S. GAAP (NON-GAAP FINANCIAL MEASURES)

We use these non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance to the performance of other public companies in the health care industry.

EBITDA*

We believe that EBITDA* is particularly helpful in assessing our ability to meet the cash demands of our operating units. The following table reconciles net (loss) income, which we believe to be the most comparable GAAP measure, to EBITDA*.

	Year Ended December 31,		
	2017	2016	2015
	(In millions)		
Net (loss) income	$ (512)	$ 52	$ 143
Adjustments:			
Depreciation, and amortization of intangible assets and capitalized software	165	161	120
Interest expense	118	101	66
Income tax (benefit) expense	(100)	153	179
EBITDA*	$ (329)	$ 467	$ 508

ADJUSTED NET (LOSS) INCOME* AND ADJUSTED NET (LOSS) INCOME PER SHARE*

We believe that adjusted net (loss) income* and adjusted net (loss) income per diluted share* are very helpful in assessing our financial performance exclusive of the non-cash impact of the amortization of purchased intangibles. The following table reconciles net (loss) income, which we believe to be the most comparable GAAP measure, to adjusted net (loss) income*.

	Year Ended December 31,					
	2017		2016		2015	
	(In millions, except diluted per-share amounts)					
	Amount	Per share	Amount	Per share	Amount	Per share
Net (loss) income	$ (512)	$ (9.07)	$ 52	$ 0.92	$ 143	$ 2.58
Adjustment:						
Amortization of intangible assets	30	0.55	32	0.57	18	0.32
Income tax effect [1]	(11)	(0.20)	(12)	(0.21)	(7)	(0.12)
Amortization of intangible assets, net of tax effect	19	0.35	20	0.36	11	0.20
Adjusted net (loss) income*	$ (493)	$ (8.72)	$ 72	$ 1.28	$ 154	$ 2.78

(1)Income tax effect of adjustments calculated at the blended federal and state statutory tax rate of 37%.

(1) The Centers for Medicare and Medicaid Services (CMS) incorporates the Health Insurer Fee (HIF) in our Medicare and

Marketplace premium rates. We have therefore reclassified such amounts in our consolidated statements of operations to premium revenue, from health insurer fees reimbursed, for all applicable periods presented. The amounts reclassified from health insurer fees reimbursed to premium revenue for years ended December 31, 2016, 2015, and 2014, amounted to $53 million, $20 million and $12 million, respectively.

(2) Service revenue and cost of service revenue include revenue and costs generated by our Pathways subsidiary, which was acquired on November 1, 2015.

(3) Income from discontinued operations is presented net of income tax benefit, which was insignificant in 2017, 2016, 2015 and 2014 and $10, in 2013, respectively.

(4) Source data for calculations in thousands.

(1) Includes long-term debt and lease financing obligations.

STOCK REPURCHASE PROGRAMS

Purchases of common stock made by us, or on our behalf during the quarter ended December 31, 2017, including shares withheld by us to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased [1]	Average Price Paid per Share [1]	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares Authorized to Be Purchased Under the Plans or Programs
October 1 — October 31	163	$ 68.76	—	$ —
November 1 — November 30	—	$ —	—	$ —
December 1 — December 31	12,699	$ 73.83	—	$ —
	12,862	$ 73.77	—	

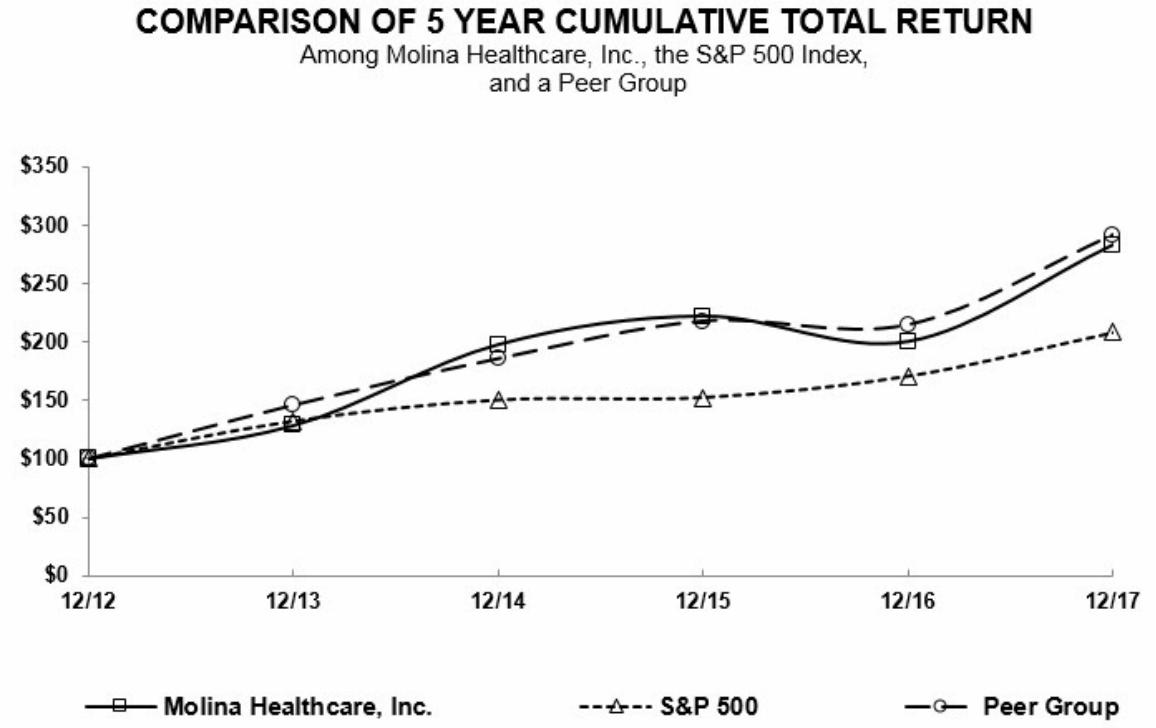
(1) During the quarter ended December 31, 2017, we withheld 12,862 shares of common stock under our 2011 Equity Incentive Plan to settle our employees' income tax obligations.

STOCK PERFORMANCE GRAPH

The following graph and related discussion are being furnished solely to accompany this Annual Report on Form 10-K pursuant to Item 201(e) of Regulation S-K and shall not be deemed to be "soliciting materials" or to be "filed" with the U.S. Securities and Exchange Commission (SEC) (other than as provided in Item 201) nor shall this information be incorporated by reference into any future filing under the Securities Act or the Exchange Act, whether made before or after the date hereof and irrespective of any general incorporation language contained therein, except to the extent that we specifically incorporate it by reference into a filing.

The following line graph compares the percentage change in the cumulative total return on our common stock against the cumulative total return of the Standard & Poor's Corporation Composite 500 Index (S&P 500) and a peer group index for the five-year period from December 31, 2012 to December 31, 2017. The comparison assumes $100 was invested on December 31, 2012, in our common stock and in each of the foregoing indices and

assumes reinvestment of dividends. The stock performance shown on the graph below represents historical stock performance and is not necessarily indicative of future stock price performance.



The peer group index consists of Centene Corporation (CNC), Cigna Corporation (CI), DaVita HealthCare Partners, Inc. (DVA), Humana Inc. (HUM), Magellan Health, Inc. (MGLN), Team Health Holdings, Inc. (TMH), Tenet Healthcare Corporation (THC), Triple-S Management Corporation (GTS), Universal American Corporation (UAM), Universal Health Services, Inc. (UHS) and WellCare Health Plans, Inc. (WCG).

STOCK PRICE RANGE AND DIVIDENDS

Our common stock is listed on the New York Stock Exchange under the trading symbol “MOH.” As of February 23, 2018, there were 34 holders of record of our common stock.

To date we have not paid cash dividends on our common stock. We currently intend to retain any future earnings to fund our projected business operations. However, we intend to periodically evaluate our cash position to determine whether to pay a cash dividend in the future.

Our ability to pay dividends is partially dependent on, among other things, our receipt of cash dividends from our regulated subsidiaries. The ability of our regulated subsidiaries to pay dividends to us is limited by the state departments of insurance in the states in which we operate or may operate, as well as requirements of the government-sponsored health programs in which we participate. Additionally, the indentures governing our outstanding senior notes and the credit agreement governing the revolving credit facility contain various covenants that limit our ability to pay dividends on our common stock.

Any future determination to pay dividends will be at the discretion of our board of directors and will depend upon, among other factors, our results of operations, financial condition, capital requirements and contractual and regulatory restrictions. For more information regarding restrictions on the ability of our regulated subsidiaries to pay dividends to us, please see the Notes to Consolidated Financial Statements, Note 19, “Commitments and Contingencies—Regulatory Capital Requirements and Dividend Restrictions.”

PROPERTIES

As of December 31, 2017, the Health Plans segment leased a total of 71 facilities, the Molina Medicaid Solutions segment leased a total of 13 facilities and the Other segment leased a total of 260 facilities. We own a 186,000 square-foot office building in Troy, Michigan and a 24,000 square-foot mixed use (office and clinic) facility in Pomona, California under our Health Plans segment. We own a 26,700 square foot data center in Albuquerque, New Mexico and 42 properties in Pennsylvania, which are primarily residential housing facilities, under our Other segment. While we believe our current and anticipated facilities will be adequate to meet our operational needs for the foreseeable future, we are continuing to periodically evaluate our employee and operational growth prospects to determine if additional space is required, and where it would be best located.

EMPLOYEES

As of December 31, 2017, we had approximately 20,000 employees. Our employee base is multicultural and reflects the diverse membership we serve.

AVAILABLE INFORMATION

Dr. C. David Molina founded our Company in 1980 as a provider organization serving low-income families in Southern California. We were originally organized in California as a holding company for our initial health plan and reincorporated in Delaware in 2002. Our principal executive offices are located at 200 Oceangate, Suite 100, Long Beach, California 90802, and our telephone number is (562) 435-3666.

You can access our website at *www.molinahealthcare.com* to learn more about our Company. From that site, you can download and print copies of our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, along with amendments to those reports. You can also download our Corporate Governance Guidelines, Board of Directors committee charters, and Code of Business Conduct and Ethics. We make periodic reports and amendments available, free of charge, as soon as reasonably practicable after we file or furnish these reports to the SEC. We will also provide a copy of any of our corporate governance policies published on our website free of charge, upon request. To request a copy of any of these documents, please submit your request to: Molina Healthcare, Inc., 200 Oceangate, Suite 100, Long Beach, California 90802, Attn: Investor Relations. Information on or linked to our website is neither part of nor incorporated by reference into this Form 10-K or any other SEC filings.

RISK FACTORS

You should carefully consider the risks described below and all of the other information set forth in this Form 10-K, including our consolidated financial statements and accompanying notes. These risks and other factors may affect our forward-looking statements, including those we make in this annual report or elsewhere, such as in press releases, presentations to securities analysts or investors, or other communications made by or with the approval of one of our executive officers. The risks described below are not the only risks facing our Company. Additional risks that we are unaware of, or that we currently believe are not material, may also become important factors that adversely affect our business. If any of the following risks actually occurs, our business, financial condition, results of operations, and future prospects could be materially and adversely affected. In that event, among other effects, the trading price of our common stock could decline, and you could lose part or all of your investment.

Risks Related to Our Business

If the responsive bids of our health plans for new or renewed Medicaid contracts are not successful, or if our government contracts are terminated or are not renewed on favorable terms or at all, our premium revenues could be materially reduced and our operating results could be negatively impacted.

We currently derive our premium revenues from 13 state health plans and our health plan in the Commonwealth of Puerto Rico. Measured by ending membership by health plan as of December 31, 2017, our top four health plans were in Washington, California, Florida, and Texas, with an aggregate of 2,578,000 members, or approximately 58% of total membership. If we are unable to continue to operate in any of our existing jurisdictions, or if our current operations in any portion of those jurisdictions are significantly curtailed or terminated entirely, our revenues could decrease materially.

Many of our government contracts for the provision of managed care programs to people receiving government assistance are effective only for a fixed period of time and may be extended for an additional period of time if the contracting entity or its agent elects to do so. When such contracts expire, they may be opened for bidding by competing healthcare providers, and there is no guarantee that the contracts will be renewed or extended. For example, our current Medicaid contract with the Florida Agency for Health Care Administration (“AHCA”) expires on December 31, 2018. As of December 31, 2017, our Florida health plan served approximately 360,000 Medicaid members. On February 1, 2018, AHCA notified our Florida health plan that it was only granted the opportunity to bid on a post-December 31, 2018 managed care contract for a single region in Florida (which consisted of approximately 59,000 Medicaid members as of December 31, 2017), as opposed to the eight regions covered by our existing contract. As yet another example, our New Mexico health plan’s current Medicaid contract with the New Mexico Human Services Department (“HSD”) will also expire on December 31, 2018. On January 8, 2018, HSD notified our New Mexico health plan that it had not been selected to bid on a post December 31, 2018 managed care contract. Our New Mexico health plan served approximately 224,000 Medicaid members as of December 31, 2017. We have filed a protest with regard to HSD’s decision, and as appropriate we will pursue all protest rights and rights of appeal with regard to AHCA’s decision. However, there can be no assurances that any

protest filing in either New Mexico or Florida will be successful, and as a result we may lose the applicable Medicaid membership as of the end of 2018.

In any bidding process, our health plans may face competition from numerous other health plans, many with greater financial resources and greater name recognition than we have. For example, the following three health plans have upcoming requests for proposal, or RFPs:

- The Texas Health and Human Service Commission (HHSC) currently contracts with five STAR+PLUS (ABD) plans: Anthem, Cigna, Centene, United Healthcare and Molina. Our Texas health plan served a total of approximately 430,000 members as of December 31, 2017. The Texas STAR+PLUS RFP was issued on December 4, 2017, proposals are due March 6, 2018, and the new contracts that are awarded will be effective January 1, 2020 through August 31, 2022. If the RFP responsive bid of our Texas health plan is not successful, or if our Texas health plan's contract with HHSC is not renewed, or if it is renewed but coverage is reduced, our revenues would be materially and adversely impacted.
- The Washington State Health Care Authority (HCA) currently contracts with five Apple Health plans: Anthem, Community Health Plan of Washington, Centene, United Healthcare and Molina. Our Washington health plan served a total of approximately 777,000 members as of December 31, 2017. The Washington Fully Integrated Managed Care RFP issued on February 16, 2018, is the third of three re-procurement RFPs for all Medicaid lives in Washington state. Proposals for the third and final RFP are due April 12, 2018, and five of the seven largest regions contracts that are awarded will be effective January 1, 2019. The remaining two will be effective on January 1, 2020. The HCA has indicated that fewer than five MCOs will be awarded re-procurement contracts in three of the seven remaining regions. If the RFP responsive bid of our Washington health plan is not successful, or if our Washington health plan's contract with HCA is not renewed, or if it is renewed but coverage is reduced, our revenues would be materially and adversely impacted.
- The Puerto Rico Health Insurance Administration (ASES) currently contracts with five Government Health plans: First Medical, MMM and its subsidiary PMC, Triple-S, and Molina. Our Puerto Rico health plan had approximately 314,000 members as of December 31, 2017. The Puerto Rico Government Health Plan RFP was issued on February 9, 2018, proposals are due May 25, 2018, and the new contracts that are awarded will be effective October 1, 2018 through June 30, 2021, with a one-year option to June 30, 2022. If the RFP responsive bid of our Puerto Rico health plan is not successful, or if our Puerto Rico health plan's contract with ASES is not renewed, or if it is renewed but coverage is reduced, our revenues would be materially and adversely impacted.

Even if our responsive bids are successful, the bids may be based upon assumptions regarding enrollment, utilization, medical costs, or other factors which could result in the Medicaid contract being less profitable than we had expected or, in extreme cases, could result in a net loss. Furthermore, our government contracts contain certain provisions regarding, among other things, eligibility, enrollment and dis-enrollment processes for covered services, eligible providers, periodic financial and information reporting, quality assurance and timeliness of claims payment, and are subject to cancellation if we fail to perform in accordance with the standards set by regulatory agencies.

If any of our governmental contracts are terminated, not renewed, renewed on less favorable terms, or not renewed on a timely basis, our business and reputation may be adversely impacted, and our financial position, results of operations or cash flows could be materially and adversely affected. In addition, we may be unable to support the carrying amount of goodwill we have recorded for the applicable business, because its fair value estimated future cash flows.

If our attempts to retain our contracts in Florida and/or New Mexico are not successful, of if we lose other contracts that constitute a significant amount of our revenue, we will lose the administrative cost efficiencies that are inherent in a large revenue base. In such circumstances, we may not be able to reduce fixed costs proportionally with our lower revenue, and the financial impact of lost contracts may exceed the net income ascribed to those contracts.

We are currently able to spread the cost of centralized services over a large revenue base. Many of our administrative costs are fixed in nature, and will be incurred at the same level regardless of the size of our revenue base. If our attempts to retain our contracts in Florida and /or New Mexico are not successful, or if we lose other contracts that constitute a significant amount of our revenue, we may not be able to reduce the expense of centralized services in a manner that is proportional to that loss of revenue. In such circumstances, not only will our total dollar margins decline, but our percentage margins, measured as a percentage of revenue, will also decline. This loss of cost efficiency, and the resulting stranded administrative costs, could have a material and adverse impact on our business, cash flows, financial position, or results of operations.

If, in the interests of maintaining or improving longer term profitability, we decide to exit voluntarily certain state contractual arrangements, make changes to our provider networks, or make changes to our administrative infrastructure, we may incur short- to medium-term disruptions to our business that could materially reduce our premium revenues and our net income.

Decisions that we make with regard to retaining or exiting our portfolio of state and Federal contracts, and changes to the manner in which we serve the members attached to those contracts, could generate substantial expenses associated with the run out of existing operations and the restructuring of those of operations that remain. Such expense could include, but would not be limited to, goodwill and intangible asset impairment charges, restructuring costs, additional medical costs incurred due to the inability to leverage long-term relationships with medical providers, and costs incurred to finish the run out of businesses that have ceased to generate revenue.

If we are unable to successfully execute our profit maintenance and improvement initiatives and our restructuring plans, or if we fail to realize the anticipated benefits of those initiatives and plans, our business, cash flows, financial position, or results of operations could be materially and adversely affected.

In August 2017, we announced the implementation of a comprehensive restructuring and profitability improvement plan. The restructuring plan includes the streamlining of our organizational structure, the re-design of certain core operating processes, the remediation of high cost provider contracts, the restructuring of our direct delivery operations, and the review of our vendor base in an attempt to insure that we are partnering with the lowest cost, most effective, vendors. As part of the restructuring plan, we reduced our corporate and health plans workforce by approximately 16%. For the year ended December 31, 2017, we reported restructuring and separation costs of $234 million.

In addition, in the second half of 2017, we launched several profit maintenance and improvement initiatives. We anticipate pursuing additional profit maintenance and improvement initiatives throughout 2018.

Our restructuring plan and profit improvement initiatives create numerous uncertainties, including the effect of the initiatives and plan on our business, operations, revenues, and profitability, potential disruptions to our business as a result of management's attention to the initiatives and plan, uncertainty regarding the potential amount and timing of future cost savings associated with the initiatives and plan, and the potential negative impact of the initiatives and plan on employee morale. The success of the initiatives and plan will depend, in part, on factors that are beyond our control. Accordingly, we can provide no assurance that the goals of the initiatives and plan will be fully achieved. Failure in this regard could have a material and adverse impact on our business, cash flows, financial position, or results of operations.

A failure to accurately estimate incurred but not reported medical care costs may negatively impact our results of operations.

Because of the time lag between when medical services are actually rendered by our providers and when we receive, process, and pay a claim for those medical services, we must continually estimate our medical claims liability at particular points in time, and establish claims reserves related to such estimates. Our estimated reserves for such IBNP medical care costs are based on numerous assumptions. We estimate our medical claims liabilities using actuarial methods based on historical data adjusted for claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our ability to accurately estimate claims for our newer lines of business or populations, is negatively impacted by the more limited experience we have had with those populations.

The IBNP estimation methods we use and the resulting reserves that we establish are reviewed and updated, and adjustments, if deemed necessary, are reflected in the current period. Given the numerous uncertainties inherent in such estimates, our actual claims liabilities for a particular quarter or other period could differ significantly from the amounts estimated and reserved for that quarter or period. Our actual claims liabilities have varied and will continue to vary from our estimates, particularly in times of significant changes in utilization, medical cost trends, and populations and markets served.

If our actual liability for claims payments is higher than estimated, our earnings in any particular quarter or annual period could be negatively affected. Our estimates of IBNP may be inadequate in the future, which would negatively affect our results of operations for the relevant time period. Furthermore, if we are unable to accurately estimate IBNP, our ability to take timely corrective actions may be limited, further exacerbating the extent of the negative impact on our results.

We are subject to retroactive adjustment to our Medicaid premium revenue as a result of retroactive risk adjustment; retroactive changes to contract terms and the resolution of differing interpretations of those terms; the difficulty of estimating performance-based premium; and retroactive adjustments to "blended" premium rates to reflect the actual mix of members captured in those blended rates.

The complexity of some of our Medicaid contract provisions; imprecise language in those contracts, the desire of state Medicaid agencies in some circumstances to retroactively adjust for the acuity of the medical needs of our members; and state delays in processing rate changes can create uncertainty around the amount of revenue we should recognize.

For example, in February 2017, the New Mexico Human Services Department (HSD) notified us that it had disallowed certain medically related administrative expenses and other items in the computation of its Medicaid Expansion risk corridor; this corridor was effective January 1, 2014, through December 31, 2016. As a result of this action, income before taxes at the New Mexico health plan was reduced by $45 million for the year ended December 31, 2016. Of this amount, $29 million related to dates of service prior to 2016.

A current example of exposure to this risk is in California, where the state Medicaid agency is several years behind in its reconciliation and settlement with us of the difference between expenses that it has paid on our behalf to providers of long term services and supports, and the amounts that it has withheld from our premium for those expenses; and has yet to share with us certain premium rates related to July 2017 through December 2017.

Any circumstance such as those described above could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

If we fail to accurately predict and effectively manage our medical care costs, our operating results could be materially and adversely affected.

Our profitability depends to a significant degree on our ability to accurately predict and effectively manage our medical care costs. Historically, our medical care ratio, meaning our medical care costs as a percentage of our premium revenue net of premium tax, has fluctuated substantially, and has varied across our state health plans. Because the premium payments we receive are generally fixed in advance and we operate with a narrow profit margin, relatively small changes in our medical care ratio can create significant changes in our overall financial results. For example, if our overall medical care ratio of 90.6%, for the year ended December 31, 2017 had been one percentage point higher, or 91.6%, our net loss per diluted share for the year ended December 31, 2017 would have been approximately $11.17 rather than our actual net loss per diluted share of $9.07, a difference of $2.10.

Many factors may affect our medical care costs, including:

- the level of utilization of health care services,
- unexpected patterns in the annual flu season,
- increases in hospital costs,
- increased incidences or acuity of high dollar claims related to catastrophic illnesses or medical conditions for which we do not have adequate reinsurance coverage,
- increased maternity costs,
- payment rates that are not actuarially sound,
- changes in state eligibility certification methodologies,
- relatively low levels of hospital and specialty provider competition in certain geographic areas,
- increases in the cost of pharmaceutical products and services,
- changes in health care regulations and practices,
- epidemics,
- new medical technologies, and
- other various external factors.

Many of these factors are beyond our control and could reduce our ability to accurately predict and effectively manage the costs of providing health care services. The inability to forecast and manage our medical care costs or to establish and maintain a satisfactory medical care ratio, either with respect to a particular state health plan or across the consolidated entity, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

If we are unable to collect health insurer fee (HIF) reimbursement from our state partners, our business, cash flows, financial position, or results of operations could be materially and adversely affected.

Because Medicaid is a government funded program, Medicaid health plans must request reimbursement for the HIF from respective state partners to offset the impact of this tax. When states reimburse us for the amount of the HIF,

that reimbursement is itself subject to income tax, the HIF, and applicable state premium taxes. Because the HIF is not deductible for income tax purposes, our net income is reduced by the full amount of the assessment. Based on our previous years' experience, we expect to ultimately recognize revenue sufficient to reimburse us for the full amount of the HIF we will pay (along with related tax effects) in September of 2018. However, we are uncertain as to the timing of such reimbursements. We expect this HIF assessment, related to our Medicaid business, to be approximately $232 million, with an expected tax effect from the reimbursement of the assessment of approximately $63 million. Therefore, the total reimbursement needed as a result of the Medicaid-related HIF is approximately $295 million. The delay or failure of our state partners to reimburse us in full for the HIF and its related tax effects could have a material adverse effect on our business, financial condition, cash flows or results of operations.

An impairment charge with respect to our recorded goodwill, or our finite-lived intangible assets, could have a material impact on our financial results.

As of December 31, 2017, the carrying amounts of goodwill and intangible assets, net, amounted to $186 million, and $69 million, respectively.

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations. Goodwill is not amortized, but is tested for impairment on an annual basis and more frequently if impairment indicators are present. Goodwill is impaired if the carrying amount of the reporting unit exceeds its estimated fair value. This excess is recorded as an impairment loss, and adjusted if necessary for the impact of tax deductible goodwill. The loss recognized may not exceed the total goodwill allocated to the reporting unit.

Finite-lived, separately-identified intangible assets acquired in business combinations are assets that represent future expected benefits but lack physical substance (such as purchased contract rights and provider contracts). Following the identification of any potential impairment indicators, to determine whether an impairment exists, we would compare the carrying amount of a finite-lived intangible asset with the greater of the undiscounted cash flows that are expected to result from the use of the asset or related group of assets, or its value under the asset liquidation method. If it is determined that the carrying amount of the asset is not recoverable, the amount by which the carrying value exceeds the estimated fair value is recorded as an impairment.

Key assumptions in our cash flow projections, including changes in membership, premium rates, health care and operating cost trends, and contract renewals and the procurement of new contracts, are consistent with those used in our long-range business plan and annual planning process. If these assumptions differ from actual results, the outcome of our goodwill impairment tests could be adversely affected.

An event or events could occur that would cause us to revise our estimates and assumptions used in analyzing the value of our goodwill, and intangible assets, net. For example, if the responsive bid of one or more of our health plans is not successful, we will lose our Medicaid contract in the applicable state or states. If such state health plans have recorded goodwill and intangible assets, net, the contract loss would result in a non-cash impairment charge. Additionally, if we are unable to procure new state MMIS contracts, the outcome of our goodwill impairment tests could be adversely affected and result in a non-cash impairment charge. Such a non-cash impairment charge could have a material adverse impact on our financial results.

We incurred non-cash impairment losses of $470 million in 2017. These losses included $269 million, primarily in connection with our Florida, New Mexico, and Illinois health plans. The impairments at Florida and New Mexico were the result of our recent Medicaid contract losses. The Illinois impairment was the result of management's determination, in the course of its annual impairment assessment of the goodwill of the Illinois health plan, that the plan's future cash flow projections were insufficient to produce an estimated fair value in excess of its carrying amount. While we are confident that we can improve profitability in Illinois so that it is a meaningful contributor to our company, the current profit profile of the health plan does not support the purchase prices paid for certain membership years ago.

Also during 2017, we recorded impairment losses of $28 million for our Molina Medicaid Solutions segment because management determined that Molina Medicaid Solutions will provide fewer future benefits for its support of the Health Plans segment than previously anticipated. In addition, we recorded impairment losses of $173 million for our Other segment, primarily relating to our Pathways business, because management determined that Pathways will not provide future benefits relating to the integration of its operations with the Health Plans segment to the extent previously expected.

We operate in an unstable political environment which creates uncertainties with regard to the sources and amounts of our revenues, volatility with regard to the amount of our medical costs, and vulnerability to unforeseen programmatic or regulatory changes.

As a result of the election of President Trump and the GOP control of both houses of Congress, the future of the ACA and its underlying programs are subject to substantial uncertainty, making long-term business planning exceedingly difficult. We are unable to predict with any degree of certainty whether the ACA will be modified or repealed in its entirety, and if it is repealed, what it will be replaced with; nor are we able to predict when any such changes, if enacted, would become effective.

Currently, there are a number of different legislative proposals being considered, some of which would involve significantly reduced federal spending on the Medicaid program, and constitute a fundamental change in the federal role in health care. These proposals include elements such as the following: ending the entitlement nature of Medicaid (and perhaps Medicare as well) by capping future increases in federal health spending for these programs, and shifting much more of the risk for health costs in the future to states and consumers; reversing the ACA's expansion of Medicaid that enables states to cover low-income childless adults; changing Medicaid to a state block grant program, including potentially capping spending on a per-enrollee basis (a "per capita cap"); requiring Medicaid beneficiaries to work; limiting the amount of lifetime benefits for Medicaid beneficiaries; prohibiting the federal government from operating Marketplaces; eliminating the advanced premium tax credits, and cost sharing reductions for low income individuals who purchase their health insurance through the Marketplaces; expanding and encouraging the use of private health savings accounts; providing for insurance plans that offer fewer and less extensive health insurance benefits than under the ACA's essential health benefits package, including broader use of catastrophic coverage plans; establishing and funding high risk pools or reinsurance programs for individuals with chronic or high cost conditions; allowing insurers to sell insurance across state lines; and numerous other potential changes and reforms. Changes to or the repeal of the ACA, or the adoption of new health care regulatory laws, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

A reversal of the Medicaid Expansion would have a negative impact on our revenues.

In the states that have elected to participate, the ACA provided for the expansion of the Medicaid program to offer eligibility to nearly all individuals under age 65 with incomes at or below 138% of the federal poverty line. Since January 1, 2014, our health plans in California, Illinois, Michigan, New Mexico, Ohio, and Washington have participated in the Medicaid Expansion program under the ACA. At December 31, 2017, our membership included approximately 668,000 Medicaid Expansion members, or 15% of our total membership. If the Medicaid Expansion is reversed by repeal of the ACA or otherwise, we could lose this membership, which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Our participation in the Marketplace creates certain risks which could adversely impact our business, financial position, and results of operations.

The ACA authorized the creation of marketplace insurance exchanges (the "Marketplace"), allowing individuals and small groups to purchase federally subsidized health insurance. As of December 31, 2017, we participated in the individual Marketplace in nine states and our Marketplace membership represented 19% of our total membership, or approximately 815,000 members. In an effort to reduce our exposure to the risks related to the Marketplace, we implemented premium increases averaging 58% effective January 1, 2018 and we exited the Marketplace in Utah and Wisconsin. These market exits and price increases have resulted in substantially lower Marketplace membership.

A number of larger commercial insurance plans, including Humana Inc., have discontinued their participation in the Marketplace. The perceived instability and impending changes in the Marketplace could further promote reduced participation among the uninsured. Further, the withdrawal of cost sharing subsidies and/or premium tax credits, the elimination of the individual mandate to purchase health insurance in December 2017, the use of special enrollment periods, or any announcement that some or all of our health plans will be leaving the Marketplace for 2018, could additionally impact Marketplace enrollment. These market and political dynamics may increase the risk that our Marketplace products will be selected by individuals who have a higher risk profile or utilization rate than we anticipated when we established the pricing for our Marketplace products, leading to financial losses.

The Medicare-Medicaid Duals Demonstration Pilot Programs could be discontinued or altered, resulting in a loss of premium revenue.

To coordinate care for those who qualify to receive both Medicare and Medicaid services (the "dual eligibles"), and to deliver services to these individuals in a more financially efficient manner, under the direction of CMS some states implemented demonstration pilot programs to integrate Medicare and Medicaid services for dual eligibles.

The health plans participating in such demonstrations are referred to as Medicare-Medicaid Plans (MMPs). We operate MMPs in six states: California, Illinois, Michigan, Ohio, South Carolina, and Texas. At December 31, 2017, our membership included approximately 57,000 integrated MMP members, representing just over 1% of our total membership. However, the capitation payments paid to us for dual eligibles are significantly higher than the capitation payments for other members, representing 8% of our total premium revenues in 2017. If the states running the MMP pilot programs conclude that the demonstration pilot programs are not delivering better coordinated care and reduced costs, they could decide to discontinue or substantially alter such programs, resulting in a reduction to our premium revenues.

Continuing changes in health care laws, and in the health care industry, make it difficult to develop actuarially sound rates.

Comprehensive changes to the U.S. health care system make it more difficult for us to manage our business, and increase the likelihood that the assumptions we make with respect to our future operations and results will prove to be inaccurate. The continuing pace of change has made it difficult for us to develop actuarially sound rates because we have limited historical information on which to develop these rates. In the absence of significant historical information to develop actuarial rates, we must make certain assumptions. These assumptions may subsequently prove to be inaccurate. For example, rates of utilization could be significantly higher than we projected, or the assumptions of policymakers about the amount of savings that could be achieved through the use of utilization management in managed care could be flawed. Moreover, our lack of actuarial experience for a particular program, region, or population, could cause us to set our reserves at an inadequate level.

Our health plans segment operates with very low profit margins, and small changes in operating performance or slight changes to our accounting estimates will have a disproportionate impact on our reported net income.

A substantial portion of our premium revenue is subject to contract provisions pertaining to medical cost expenditure floors and corridors, administrative cost and profit ceilings, premium stabilization programs, and cost-plus and performance-based reimbursement programs. Many of these contract provisions are complex, or are poorly or ambiguously drafted, and thus are potentially subject to differing interpretations by ourselves and the relevant government agency with whom we contract. If the applicable government agency disagrees with our interpretation or implementation of a particular contract provisions at issue, we could be required to adjust the amount of our obligations under these provisions and/or make a payment or payments to such government agency. Any interpretation of these contract provisions by the applicable governmental agency that varies from our interpretation and implementation of the provision, or that is inconsistent with our revenue recognition accounting treatment, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

In addition, many of our contracts also contain provisions pertaining to at-risk premiums that require us to meet certain quality performance measures to earn all of our contract revenues. If we are unsuccessful in achieving the stated performance measure, we will be unable to recognize the revenue associated with that measure. Any failure of our health plans to satisfy one of these performance measure provisions could have a material adverse effect on our business, financial condition, cash flows or results of operations.

If we are unable to deliver quality care, and maintain good relations with the physicians, hospitals, and other providers with whom we contract, or if we are unable to enter into cost-effective contracts with such providers, our profitability could be adversely affected.

We contract with physicians, hospitals, and other providers as a means to ensure access to health care services for our members, to manage health care costs and utilization, and to better monitor the quality of care being delivered. We compete with other health plans to contract with these providers. We believe providers select plans in which they participate based on criteria including reimbursement rates, timeliness and accuracy of claims payment, potential to deliver new patient volume and/or retain existing patients, effectiveness of resolution of calls and complaints, and other factors. We cannot be sure that we will be able to successfully attract and retain providers to maintain a competitive network in the geographic areas we serve. In addition, in any particular market, providers could refuse to contract with us, demand higher payments, or take other actions which could result in higher health care costs, disruption to provider access for current members, a decline in our growth rate, or difficulty in meeting regulatory or accreditation requirements.

The Medicaid program generally pays doctors and hospitals at levels well below those of Medicare and private insurance. Large numbers of doctors, therefore, do not accept Medicaid patients. In the face of fiscal pressures, some states may reduce rates paid to providers, which may further discourage participation in the Medicaid program.

In some markets, certain providers, particularly hospitals, physician/hospital organizations, and some specialists, may have significant market positions or even monopolies. If these providers refuse to contract with us or utilize their market position to negotiate favorable contracts which are disadvantageous to us, our profitability in those areas could be adversely affected.

Some providers that render services to our members are not contracted with our health plans. In those cases, there is no pre-established understanding between the provider and our health plan about the amount of compensation that is due to the provider. In some states, the amount of compensation is defined by law or regulation, but in most instances it is either not defined or it is established by a standard that is not clearly translatable into dollar terms. In such instances, providers may believe they are underpaid for their services and may either litigate or arbitrate their dispute with our health plan. The uncertainty of the amount to pay to such providers and the possibility of subsequent adjustment of the payment could adversely affect our business, financial condition, cash flows, or results of operations.

The exorbitant cost of specialty drugs and new generic drugs could have a material adverse effect on the level of our medical costs and our results of operations.

Introduction of new high cost specialty drugs and sudden costs spikes for existing drugs increase the risk that the pharmacy cost assumptions used to develop our capitation rates are not adequate to cover the actual pharmacy costs, which jeopardizes the overall actuarial soundness of our rates. Bearing the high costs of new specialty drugs or the high cost inflation of generic drugs without an appropriate rate adjustment or other reimbursement mechanism has an adverse impact on our financial condition and results of operations. For example, Gilead priced a new hepatitis C drug, Sovaldi, at $84,000 per standard course of therapy in 2014. With the advent of Sovaldi in early 2014, the cost of the drug was generally not factored into our 2014 capitation rates which undermined the actuarial soundness of those rates. Further, the relatively high incidence of hepatitis C in Medicaid populations coupled with the exorbitant cost of Sovaldi created a public health and public financing problem across the country. More recently, the FDA approved the first drug to treat patients with spinal muscular atrophy, Spinraza, in December 2016. After this approval, the distributor of Spinraza announced that one dose will have a list price of $125,000, which means the drug will cost between $650,000 and $750,000 to cover the five or six doses required in the first year, and approximately $375,000 annually thereafter, presumably for the life of the patient. The inordinate cost of Spinraza was not contemplated in the development of our 2017 capitation rates. In addition, evolving regulations and state and federal mandates regarding coverage may impact the ability of our health plans to continue to receive existing price discounts on pharmaceutical products for our members. Other factors affecting our pharmaceutical costs include, but are not limited to, geographic variation in utilization of new and existing pharmaceuticals, and changes in discounts. Although we will continue to work with state Medicaid agencies in an effort to ensure that we receive appropriate and actuarially sound reimbursement for all new drug therapies and pharmaceuticals trends, there can be no assurance that we will always be successful.

We rely on the accuracy of eligibility lists provided by state governments. Inaccuracies in those lists would negatively affect our results of operations.

Premium payments to our health plans are based upon eligibility lists produced by state governments. From time to time, states require us to reimburse them for premiums paid to us based on an eligibility list that a state later discovers contains individuals who are not in fact eligible for a government sponsored program or are eligible for a different premium category or a different program. Alternatively, a state could fail to pay us for members for whom we are entitled to payment. Our results of operations would be adversely affected as a result of such reimbursement to the state if we make or have made related payments to providers and are unable to recoup such payments from the providers.

The insolvency of a delegated provider could obligate us to pay its referral claims, which could have a material adverse effect on our business, cash flows, or results of operations.

Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Due to insolvency or other circumstances, such providers may be unable to pay claims they have incurred with third parties in connection with referral services provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so; or we have already paid claims to a delegated provider and such payments cannot be recouped when the

delegated provider becomes insolvent. Liabilities incurred or losses suffered as a result of provider insolvency could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

State and federal budget deficits may result in Medicaid, CHIP, or Medicare funding cuts which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Nearly all of our premium revenues come from the joint federal and state funding of the Medicaid and CHIP programs. The states in which we operate our health plans regularly face significant budgetary pressures. As discussed below, such budgetary pressures are particularly intense in the Commonwealth of Puerto Rico. State budgetary pressures may result in unexpected Medicaid, CHIP, or Medicare rate cuts which could reduce our revenues and profit margins. Moreover, some federal deficit reduction or entitlement reform proposals would fundamentally change the structure and financing of the Medicaid program. A number of these proposals include both tax increases and spending reductions in discretionary programs and mandatory programs, such as Social Security, Medicare, and Medicaid.

We are unable to determine how any future congressional spending cuts will affect Medicare and Medicaid reimbursement. We believe there will continue to be legislative and regulatory proposals at the federal and state levels directed at containing or lowering the cost of health care that, if adopted, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Receipt of inadequate or significantly delayed premiums could negatively affect our business, financial condition, cash flows, or results of operations.

Our premium revenues consist of fixed monthly payments per member, and supplemental payments for other services such as maternity deliveries. These premiums are fixed by contract, and we are obligated during the contract periods to provide health care services as established by the state governments. We use a large portion of our revenues to pay the costs of health care services delivered to our members. If premiums do not increase when expenses related to medical services rise, our medical margins will be compressed, and our earnings will be negatively affected. A state could increase hospital or other provider rates without making a commensurate increase in the rates paid to us, or could lower our rates without making a commensurate reduction in the rates paid to hospitals or other providers. In addition, if the actuarial assumptions made by a state in implementing a rate or benefit change are incorrect or are at variance with the particular utilization patterns of the members of one or more of our health plans, our medical margins could be reduced. Any of these rate adjustments in one or more of the states in which we operate could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Furthermore, a state or commonwealth undergoing a budget crisis may significantly delay the premiums paid to one of our health plans. Any significant delay in the monthly payment of premiums to any of our health plans could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

If a state fails to renew its federal waiver application for mandated Medicaid enrollment into managed care or such application is denied, our membership in that state will likely decrease.

States may only mandate Medicaid enrollment into managed care under federal waivers or demonstrations. Waivers and programs under demonstrations are approved for two- to five-year periods and can be renewed on an ongoing basis if the state applies and the waiver request is approved or renewed by CMS. We have no control over this renewal process. If a state in which we operate a health plan does not renew its mandated program or the federal government denies the state's application for renewal, our business would suffer as a result of a likely decrease in membership.

The Commonwealth of Puerto Rico may fail to pay the premiums of our Puerto Rico health plan, which could negatively impact our business, financial condition, cash flows, or results of operations.

The government of Puerto Rico continues to struggle with major fiscal and liquidity challenges. The extreme financial difficulties faced by the Commonwealth may make it very difficult for ASES, the Puerto Rico Medicaid agency, to pay our Puerto Rico health plan under the terms of the parties' Medicaid contract. As of December 31, 2017, our Puerto Rico health plan served approximately 314,000 members, and had recognized premium revenue of approximately $179 million in the fourth quarter of 2017, or approximately $60 million per month. A default by ASES on its payment obligations under our Medicaid contract, or a determination by ASES to terminate our contract based on insufficient funds available, could result in our having paid, or in our having to pay, provider claims in amounts for which we are not paid reimbursement, and could make it unfeasible for the Puerto Rico health plan to continue to operate. A default by ASES or termination of our Puerto Rico Medicaid contract could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

In February 2018, ASES issued an RFP in connection with a new island-wide re-procurement for Medicaid. In the event we do not participate in the re-procurement, or if the responsive bid of our Puerto Rico health plan is unsuccessful, our current contract with ASES will expire without renewal as of December 31, 2018. Our exit from the Commonwealth may result in disruptions to our business, and cause us to incur stranded overhead costs.

Large-scale medical emergencies in one or more states in which we operate our health plans could significantly increase utilization rates and medical costs.

Large-scale medical emergencies can take many forms and be associated with widespread illness or medical conditions. For example, natural disasters, such as a major earthquake in Los Angeles or Cascadia, or a major hurricane in Florida or South Carolina, could have a significant impact on the health of a large number of our covered members. Other conditions that could impact our members include a virulent influenza season or epidemic, or newly emergent mosquito-borne illnesses, such as the Zika virus, the West Nile virus, or the Chikungunya virus, conditions for which vaccines may not exist, are not effective, or have not been widely administered.

In addition, federal and state law enforcement officials have issued warnings about potential terrorist activity involving biological or other weapons of mass destruction. All of these conditions, and others, could have a significant impact on the health of the population of wide-spread areas. We seek to set our IBNP reserves appropriately to account for anticipatable spikes in utilization, such as for the flu season. However, if one of our health plan states were to experience a large-scale natural disaster, a viral epidemic or pandemic, a significant terrorism attack, or some other large-scale event affecting the health of a large number of our members, our covered medical expenses in that state would rise, which could have a material adverse effect on our business, cash flows, financial condition, or results of operations.

If state regulators do not approve payments of dividends and distributions by our subsidiaries, it may negatively affect our business strategy.

We are a corporate parent holding company and hold most of our assets in, and conduct most of our operations through, our direct subsidiaries. As a holding company, our results of operations depend on the results of operations of our subsidiaries. Moreover, we are dependent on dividends or other intercompany transfers of funds from our subsidiaries to meet our debt service and other obligations. The ability of our subsidiaries to pay dividends or make other payments or advances to us will depend on their operating results and will be subject to applicable laws and restrictions contained in agreements governing the debt of such subsidiaries. In addition, our health plan subsidiaries are subject to laws and regulations that limit the amount of dividends and distributions that they can pay to us without prior approval of, or notification to, state regulators. In California, our health plan may dividend, without notice to or approval of the California Department of Managed Health Care, amounts by which its tangible net equity exceeds 130% of the tangible net equity requirement. Our other health plans must give thirty days' advance notice and the opportunity to disapprove "extraordinary" dividends to the respective state departments of insurance for amounts over the lesser of (a) ten percent of surplus or net worth at the prior year end or (b) the net income for the prior year. The discretion of the state regulators, if any, in approving or disapproving a dividend is not clearly defined. Health plans that declare non-extraordinary dividends must usually provide notice to the regulators ten or fifteen days in advance of the intended distribution date of the non-extraordinary dividend. We received $245 million, $100 million, and $125 million in dividends from our regulated health plan subsidiaries during 2017, 2016 and 2015, respectively. The aggregate additional amounts our health plan subsidiaries could have paid us at December 31, 2017 and 2016, without approval of the regulatory authorities, were approximately $85 million and $201 million, respectively. If the regulators were to deny or significantly restrict our subsidiaries' requests to pay dividends to us, the funds available to our company as a whole would be limited, which could harm our ability to implement our business strategy. For example, we could be hindered in our ability to make debt service payments under our senior notes or revolving credit facility (Credit Facility).

Our use and disclosure of personally identifiable information and other non-public information, including protected health information, is subject to federal and state privacy and security regulations, and our failure to comply with those regulations or to adequately secure the information we hold could result in significant liability or reputational harm.

State and federal laws and regulations including, but not limited to, HIPAA and the Gramm-Leach-Bliley Act, govern the collection, dissemination, use, privacy, confidentiality, security, availability, and integrity of personally identifiable information (PII), including protected health information, or PHI. HIPAA establishes basic national privacy and security standards for protection of PHI by covered entities and business associates, including health plans such as ours. HIPAA requires covered entities like us to develop and maintain policies and procedures for PHI that is used or disclosed, and to adopt administrative, physical, and technical safeguards to protect PHI. HIPAA also implemented the use of standard transaction code sets and standard identifiers that covered entities must use when

submitting or receiving certain electronic health care transactions, including activities associated with the billing and collection of health care claims.

Mandatory penalties for HIPAA violations range from $100 to $50,000 per violation, and up to $1.5 million per violation of the same standard per calendar year. A single breach incident can result in violations of multiple standards, resulting in possible penalties potentially in excess of $1.5 million. If a person knowingly or intentionally obtains or discloses PHI in violation of HIPAA requirements, criminal penalties may also be imposed. HIPAA authorizes state attorneys general to file suit under HIPAA on behalf of state residents. Courts can award damages, costs, and attorneys' fees related to violations of HIPAA in such cases. While HIPAA does not create a private right of action allowing individuals to sue us in civil court for HIPAA violations, its standards have been used as the basis for a duty of care in state civil suits such as those for negligence or recklessness in the misuse or breach of PHI. We have experienced HIPAA breaches in the past, including breaches affecting over 500 individuals.

New health information standards, whether implemented pursuant to HIPAA, congressional action, or otherwise, could have a significant effect on the manner in which we must handle health care related data, and the cost of complying with standards could be significant. If we do not comply with existing or new laws and regulations related to PHI, PII, or non-public information, we could be subject to criminal or civil sanctions. Any security breach involving the misappropriation, loss, or other unauthorized disclosure or use of confidential member information, whether by us or a third party, such as our vendors, could subject us to civil and criminal penalties, divert management's time and energy, and have a material adverse effect on our business, financial condition, cash flows, or results of operations.

We are subject to extensive fraud and abuse laws that may give rise to lawsuits and claims against us, the outcome of which may have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Because we receive payments from federal and state governmental agencies, we are subject to various laws commonly referred to as "fraud and abuse" laws, including federal and state anti-kickback statutes, prohibited referrals, and the federal False Claims Act, which permit agencies and enforcement authorities to institute a suit against us for violations and, in some cases, to seek treble damages, criminal and civil fines, penalties, and assessments. Violations of these laws can also result in exclusion, debarment, temporary or permanent suspension from participation in government health care programs, or the institution of corporate integrity agreements. Liability under such federal and state statutes and regulations may arise if we know, or it is found that we should have known, that information we provide to form the basis for a claim for government payment is false or fraudulent, and some courts have permitted False Claims Act suits to proceed if the claimant was out of compliance with program requirements. Fraud, waste and abuse prohibitions encompass a wide range of operating activities, including kickbacks or other inducements for referral of members or for the coverage of products (such as prescription drugs) by a plan, billing for unnecessary medical services by a provider, upcoding, payments made to excluded providers, improper marketing, and the violation of patient privacy rights. In particular, there has recently been increased scrutiny by the Department of Justice on health plans' risk adjustment practices, particularly in the Medicare program. Companies involved in public health care programs such as Medicaid and Medicare are required to maintain compliance programs to detect and deter fraud, waste and abuse, and are often the subject of fraud, waste and abuse investigations and audits. The regulations and contractual requirements applicable to participants in these public-sector programs are complex and subject to change. The federal government has taken the position that claims presented in violation of the federal anti-kickback statute may be considered a violation of the federal False Claims Act. In addition, under the federal civil monetary penalty statute, the U.S. Department of Health and Human Services (HHS), Office of Inspector General has the authority to impose civil penalties against any person who, among other things, knowingly presents, or causes to be presented, certain false or otherwise improper claims. *Qui tam* actions under federal and state law can be brought by any individual on behalf of the government. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines, or be excluded from the Medicare, Medicaid, or other state or federal health care programs as a result of an investigation arising out of such action. We have been the subject of *qui tam* actions in the past and other *qui tam* actions may be filed against us in the future. If we are subject to liability under a *qui tam* or other actions, our business, financial condition, cash flows, or results of operations could be adversely affected.

Failure to attain profitability in any new start-up operations could negatively affect our results of operations.

Start-up costs associated with a new business can be substantial. For example, to obtain a certificate of authority to operate as a health maintenance organization in most jurisdictions, we must first establish a provider network, have infrastructure and required systems in place, and demonstrate our ability to obtain a state contract and process

claims. Often, we are also required to contribute significant capital to fund mandated net worth requirements, performance bonds or escrows, or contingency guaranties. If we are unsuccessful in obtaining the certificate of authority, winning the bid to provide services, or attracting members in sufficient numbers to cover our costs, the new business would fail. We also could be required by the state or commonwealth to continue to provide services for some period of time without sufficient revenue to cover our ongoing costs or to recover our start-up costs.

Even if we are successful in establishing a profitable health plan in a new jurisdiction, increasing membership, revenues, and medical costs will trigger increased mandated net worth requirements which could substantially exceed the net income generated by the health plan. Rapid growth in an existing jurisdiction will also result in increased net worth requirements. In such circumstances, we may not be able to fund on a timely basis, or at all, the increased net worth requirements with our available cash resources. The expenses associated with starting up a health plan in a new jurisdiction, or expanding a health plan in an existing jurisdiction could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Failure to maintain effective internal controls over financial reporting could have a material adverse effect on our business, operating results, stock price, and result in our inability to maintain compliance with applicable stock exchange listing requirements.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis.

The Sarbanes-Oxley Act of 2002 requires, among other things, that we maintain effective internal control over financial reporting. In particular, we must perform system and process evaluation and testing of our internal controls over financial reporting to allow management to report on, and our independent registered public accounting firm to attest to, our internal controls over financial reporting as required by Section 404 of the Sarbanes-Oxley Act of 2002. Our future testing, or the subsequent testing by our independent registered public accounting firm, may reveal deficiencies in our internal controls over financial reporting that are deemed to be material weaknesses.

We have identified material weaknesses in our internal control over financial reporting in the past, which have subsequently been remediated. If additional material weaknesses in our internal control over financial reporting are discovered or occur in the future, our consolidated financial statements may contain material misstatements and we could be required to restate our financial results.

Our compliance with Section 404 will continue to require that we incur substantial accounting expense and expend significant management time and effort. Moreover, if we are unable to comply with the requirements of Section 404 in a timely manner, or if we or our independent registered public accounting firm identify deficiencies in our internal control over financial reporting that are deemed to be material weaknesses, the market price of our stock could decline and we could be subject to sanctions or investigations by the New York Stock Exchange, SEC, or other regulatory authorities which would require additional financial and management resources.

This Form 10-K reflects management's conclusion regarding the effectiveness of our disclosure controls and procedures and internal control over financial reporting as of December 31, 2017. See “Management and Auditor’s Reports - Management’s Evaluation of Disclosure Controls and Procedures and Management’s Report on Internal Control Over Financial Reporting.”

We are dependent on the leadership of our new chief executive officer and other executive officers and key employees.

In May 2017, our board of directors terminated both our former chief executive officer and our former chief financial officer. On November 6, 2017, following an intensive six month executive search effort, the board hired Mr. Joseph Zubretsky as our new chief executive officer. Mr. Zubretsky, in turn, has hired other senior level executives. Under the leadership and direction of Mr. Zubretsky, our executive team has launched a vigorous turnaround plan, including many profit improvement initiatives. Our turnaround plan and operational improvements are highly dependent on the efforts of Mr. Zubretsky and our other key executive officers and employees. The loss of their leadership, expertise, and experience could negatively impact our operations. Our ability to replace them or any other key employee may be difficult and may take an extended period of time because of the limited number of individuals in the health care industry who have the breadth and depth of skills and experience necessary to operate and lead a business such as ours. Competition to hire from this limited pool is intense, and we may be unable to hire, train, retain, or motivate these personnel. If we are unsuccessful in recruiting, retaining, managing, and motivating such personnel, our business, financial condition, cash flows, or results of operations may be adversely affected.

We face various risks inherent in the government contracting process that could materially and adversely affect our business and profitability, including periodic routine and non-routine reviews, audits, and investigations by government agencies.

We are subject to various risks inherent in the government contracting process. These risks include routine and non-routine governmental reviews, audits, and investigations, and compliance with government reporting requirements. Violation of the laws, regulations, or contract provisions governing our operations, or changes in interpretations of those laws and regulations, could result in the imposition of civil or criminal penalties, the cancellation of our government contracts, the suspension or revocation of our licenses, the exclusion from participation in government sponsored health programs, or the revision and recoupment of past payments made based on audit findings. If we are unable to correct any noted deficiencies, or become subject to material fines or other sanctions, we could suffer a substantial reduction in profitability, and could also lose one or more of our government contracts. In addition, government receivables are subject to government audit and negotiation, and government contracts are vulnerable to disagreements with the government. The final amounts we ultimately receive under government contracts may be different from the amounts we initially recognize in our financial statements.

If we sustain a cyber-attack or suffer privacy or data security breaches that disrupt our information systems or operations, or result in the dissemination of sensitive personal or confidential information, we could suffer increased costs, exposure to significant liability, reputational harm, loss of business, and other serious negative consequences.

As part of our normal operations, we routinely collect, process, store, and transmit large amounts of data, including sensitive personal information as well as proprietary or confidential information relating to our business or third parties. To ensure information security, we have implemented controls to protect the confidentiality, integrity and availability of this data and the systems that store and transmit such data. However, our information technology systems and safety control systems are subject to a growing number of threats from computer programmers, hackers, and other adversaries that may be able to penetrate our network security and misappropriate our confidential information or that of third parties, create system disruptions, or cause damage, security issues, or shutdowns. They also may be able to develop and deploy viruses, worms, and other malicious software programs that attack our systems or otherwise exploit security vulnerabilities. Because the techniques used to circumvent, gain access to, or sabotage security systems can be highly sophisticated and change frequently, they often are not recognized until launched against a target, and may originate from less regulated and remote areas around the world. We may be unable to anticipate these techniques or implement adequate preventive measures, resulting in potential data loss and damage to our systems. Our systems are also subject to compromise from internal threats such as improper action by employees including malicious insiders, vendors, counterparties, and other third parties with otherwise legitimate access to our systems. Our policies, employee training (including phishing prevention training), procedures and technical safeguards may not prevent all improper access to our network or proprietary or confidential information by employees, vendors, counterparties, or other third parties. Our facilities may also be vulnerable to security incidents or security attacks, acts of vandalism or theft, misplaced or lost data, human errors, or other similar events that could negatively affect our systems and our and our members' data.

Moreover, we face the ongoing challenge of managing access controls in a complex environment. The process of enhancing our protective measures can itself create a risk of systems disruptions and security issues. Given the breadth of our operations and increasing sophistication of cyberattacks, a particular incident could occur and persist for an extended period of time before being detected. The extent of a particular cyberattack and the steps that we may need to take to investigate the attack may take a significant amount of time before such an investigation could be completed and full and reliable information about the incident is known. During such time, the extent of any harm or how best to remediate it might not be known, which could further increase the risks, costs, and consequences of a data security incident. In addition, our systems must be routinely updated, patched, and upgraded to protect against known vulnerabilities. The volume of new software vulnerabilities has increased substantially, as has the importance of patches and other remedial measures. In addition to remediating newly identified vulnerabilities, previously identified vulnerabilities must also be updated. We are at risk that cyber attackers exploit these known vulnerabilities before they have been addressed. The complexity of our systems and platforms that we operate, the increased frequency at which vendors are issuing security patches to their products, our need to test patches, and in some instances, coordinate with third-parties before they can be deployed, all could further increase our risks. The increased use of mobile devices and other technologies can heighten these and other risks. Furthermore, certain aspects of the security of various technologies are unpredictable or beyond our control.

The cost to eliminate or address the foregoing security threats and vulnerabilities before or after a cyber-incident could be significant. We may need to expend significant additional resources in the future to continue to protect

against potential security breaches or to address problems caused by such attacks or any breach of our systems. Our remediation efforts may not be successful and could result in interruptions, delays, or cessation of service, and loss of members, vendors, and state contracts. In addition, breaches of our security measures and the unauthorized dissemination of sensitive personal information or proprietary information or confidential information about our members could expose our members to the risk of financial or medical identity theft, or expose us or other third parties to a risk of loss or misuse of this information, result in litigation and potential liability for us (including but not limited to material fines, damages, consent orders, penalties and/or remediation costs, mandatory disclosure to the media and regulators, or enforcement proceedings), damage our reputation, or otherwise have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Any changes to the laws and regulations governing our business, or the interpretation and enforcement of those laws or regulations, could require us to modify our operations and could negatively impact our operating results.

Our business is extensively regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect health plan members and providers rather than managed care organizations. The government agencies administering these laws and regulations have broad latitude in interpreting and applying them. These laws and regulations, along with the terms of our government contracts, regulate how we do business, what services we offer, and how we interact with members and the public. For instance, some states mandate minimum medical expense levels as a percentage of premium revenues. These laws and regulations, and their interpretations, are subject to frequent change. The interpretation of certain contract provisions by our governmental regulators may also change. Changes in existing laws or regulations, or their interpretations, or the enactment of new laws or regulations, could reduce our profitability by imposing additional capital requirements, increasing our liability, increasing our administrative and other costs, increasing mandated benefits, forcing us to restructure our relationships with providers, requiring us to implement additional or different programs and systems, or making it more difficult to predict future results. Changes in the interpretation of our contracts could also reduce our profitability if we have detrimentally relied on a prior interpretation.

Potential divestitures of businesses or product lines may materially adversely affect our business, financial condition, cash flows, or results of operations.

As a part of our business strategy, we continually review our products and business lines across all geographies to identify opportunities for performance improvement. Depending on the particular circumstances, we may determine that a divestiture of one or more businesses or product lines would be the best means to further our plan to improve and sustain profitability and enhance our focus on the execution of our business plan. Divestitures involve risks, including: difficulties in the separation of operations, services, products and personnel; the diversion of management's attention from other business concerns; the disruption of our business; the potential loss of key employees; the retention of uncertain contingent liabilities related to the divested business or product line; and the failure of our efforts to divest any such business or product line on the terms and time frames desired by management, or at all. Furthermore, we may be unsuccessful in finding a replacement for any lost revenue or income previously derived from the divested business or product line. In addition, divestitures may result in significant impairment charges, including those related to goodwill and other intangible assets, all of which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Our encounter data may be inaccurate or incomplete, which could have a material adverse effect on our results of operations, financial condition, cash flows and ability to bid for, and continue to participate in, certain programs.

Our contracts require the submission of complete and correct encounter data. The accurate and timely reporting of encounter data is increasingly important to the success of our programs because more states are using encounter data to determine compliance with performance standards and to set premium rates. We have expended and may continue to expend additional effort and incur significant additional costs to collect or correct inaccurate or incomplete encounter data and have been, and continue to be exposed to, operating sanctions and financial fines and penalties for noncompliance. In some instances, our government clients have established retroactive requirements for the encounter data we must submit. There also may be periods of time in which we are unable to meet existing requirements. In either case, it may be prohibitively expensive or impossible for us to collect or reconstruct this historical data.

We have experienced challenges in obtaining complete and accurate encounter data, due to difficulties with providers and third-party vendors submitting claims in a timely fashion in the proper format, and with state agencies in coordinating such submissions. As states increase their reliance on encounter data, these difficulties could

adversely affect the premium rates we receive and how membership is assigned to us and subject us to financial penalties, which could have a material adverse effect on our results of operations, financial condition, cash flows and our ability to bid for, and continue to participate in, certain programs.

Our business depends on our information and medical management systems, and our inability to effectively integrate, manage, update, and keep secure our information and medical management systems could disrupt our operations.

Our business is dependent on effective and secure information systems that assist us in, among other things, processing provider claims, monitoring utilization and other cost factors, supporting our medical management techniques, and providing data to our regulators. Our members and providers also depend upon our information systems for enrollment, primary care and specialist physician roster access, membership verifications, claims status, and other information. If we experience a reduction in the performance, reliability, or availability of our information and medical management systems, our operations, ability to pay claims, and ability to produce timely and accurate reports could be adversely affected. In addition, if the licensor or vendor of any software which is integral to our operations were to become insolvent or otherwise fail to support the software sufficiently, our operations could be negatively affected.

Our information systems and applications require continual maintenance, upgrading, and enhancement to meet our operational needs. On an ongoing basis, we evaluate the ability of our existing operations to support our current and future business needs and to maintain our compliance requirements. As a result, we periodically consolidate, integrate, upgrade and expand our information systems capabilities as a result of technology initiatives, industry trends and recently enacted regulations, and changes in our system platforms. Our information systems require an ongoing commitment of significant resources to maintain, protect and enhance existing systems and develop new systems to keep pace with continuing changes in information processing technology, evolving systems and regulatory standards and changing customer preferences.

Moreover, our acquisition activity requires transitions to or from, and the integration of, various information systems. If we experience difficulties with the transition to or from information systems or are unable to properly implement, maintain, upgrade or expand our systems, we could suffer from, among other things, operational disruptions, loss of members, difficulty in attracting new members, regulatory problems, and increases in administrative expenses.

Because our corporate headquarters are located in Southern California, our business operations may be significantly disrupted as a result of a major earthquake.

Our corporate headquarters is located in Long Beach, California. In addition, some of our health plans' claims are processed in Long Beach. Southern California is exposed to a statistically greater risk of a major earthquake than most other parts of the United States. If a major earthquake were to strike the Los Angeles area, our corporate functions and claims processing could be significantly impaired for a substantial period of time. If there is a major Southern California earthquake, there can be no assurances that our disaster recovery plan will be successful or that the business operations of all our health plans and our Molina Medicaid Solutions segment, including those that are remote from any such event, would not be substantially impacted.

We face claims related to litigation which could result in substantial monetary damages.

We are subject to a variety of legal actions, including medical malpractice actions, provider disputes, employment related disputes, health care regulatory law-based litigation, breach of contract actions, intellectual property infringement actions, and securities class actions. If we incur liability materially in excess of the amount for which we have insurance coverage, our profitability would suffer. In addition, our providers involved in medical care decisions are exposed to the risk of medical malpractice claims. As an employer of physicians and ancillary medical personnel and as an operator of primary care clinics, our plans are subject to liability for negligent acts, omissions, or injuries occurring at one of our clinics or caused by one of our employees. Given the significant amount of some medical malpractice awards and settlements, the medical malpractice insurance that we maintain may not be sufficient or available at a reasonable cost to protect us from damage awards or other liabilities. Even if any claims brought against us are unsuccessful or without merit, we may have to defend ourselves against such claims. The defense of any such actions may be time-consuming and costly, and may distract our management's attention.

Furthermore, claimants often sue managed care organizations for improper denials of or delays in care, and in some instances improper authorizations of care. Claims of this nature could result in substantial damage awards against us and our providers that could exceed the limits of any applicable medical malpractice insurance coverage. Successful malpractice or tort claims asserted against us, our providers, or our employees could adversely affect our business, financial condition, cash flows, or results of operations.

We cannot predict the outcome of any lawsuit. Some of the liabilities related to litigation that we may incur may not be covered by insurance, the insurers could dispute coverage, or the amount of insurance could be insufficient to cover the damages awarded. In addition, insurance coverage for all or certain types of liability may become unavailable or prohibitively expensive in the future or the deductible on any such insurance coverage could be set at a level which would result in us effectively self-insuring cases against us. The litigation to which we are subject could have a material adverse effect on our business, financial condition, results of operations, and cash flows.

We are subject to competition which negatively impacts our ability to increase penetration in the markets we serve.

We operate in a highly competitive environment and in an industry that is subject to ongoing changes from business consolidations, new strategic alliances, and aggressive marketing practices by other managed care organizations and service providers. Our health plans segment competes for members principally on the basis of size, location and quality of provider network; benefits supplied; quality of service; and reputation. Our Molina Medicaid Solutions segment competes for government contracts principally on the basis of cost, quality of service, expertise, and reputation. A number of these competitive elements are partially dependent upon and can be positively affected by the financial resources available to us. Many other organizations with which we compete, including large commercial plans and other service providers, have substantially greater financial and other resources than we do. For these reasons, we may be unable to grow our business, or may lose business to third parties.

We are subject to risks associated with outsourcing services and functions to third parties.

We contract with third party vendors and service providers who provide services to us and our subsidiaries or to whom we delegate selected functions. Some of these third-parties also have direct access to our systems. Our arrangements with third party vendors and service providers may make our operations vulnerable if those third parties fail to satisfy their obligations to us, including their obligations to maintain and protect the security and confidentiality of our information and data or the information and data relating to our members or customers. We are also at risk of a data security incident involving a vendor or third party, which could result in a breakdown of such third party's data protection processes or cyber-attackers gaining access to our infrastructure through the third party. To the extent that a vendor or third party suffers a data security incident that compromises its operations, we could incur significant costs and possible service interruption, which could have an adverse effect on our business and operations. In addition, we may have disagreements with third party vendors and service providers regarding relative responsibilities for any such failures or incidents under applicable business associate agreements or other applicable outsourcing agreements. Any contractual remedies and/or indemnification obligations we may have for vendor or service provider failures or incidents may not be adequate to fully compensate us for any losses suffered as a result of any vendor's failure to satisfy its obligations to us or under applicable law. Further, we may not be adequately indemnified against all possible losses through the terms and conditions of our contracts with third party vendors and service providers. Our outsourcing arrangements could be adversely impacted by changes in vendors' or service providers' operations or financial condition or other matters outside of our control. If we fail to adequately monitor and regulate the performance of our third party vendors and service providers, we could be subject to additional risk, including significant cybersecurity risk. Violations of, or noncompliance with, laws and/or regulations governing our business or noncompliance with contract terms by third party vendors and service providers could increase our exposure to liability to our members, providers, or other third parties, or sanctions and/or fines from the regulators that oversee our business. In turn, this could increase the costs associated with the operation of our business or have an adverse impact on our business and reputation. Moreover, if these vendor and service provider relationships were terminated for any reason, we may not be able to find alternative partners in a timely manner or on acceptable financial terms, and may incur significant costs and/or disruption to our operations in connection with any such vendor or service provider transition. As a result, we may not be able to meet the full demands of our members or customers and, in turn, our business, financial condition, or results of operations may be harmed. In addition, we may not fully realize the anticipated economic and other benefits from our outsourcing projects or other relationships we enter into with third party vendors and service providers, as a result of regulatory restrictions on outsourcing, unanticipated delays in transitioning our operations to the third party, vendor or service provider noncompliance with contract terms or violations of laws and/or regulations, or otherwise. This could result in substantial costs or other operational or financial problems that could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Our substantial indebtedness could adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry, expose us to interest rate risk to the extent of any variable rate debt, and prevent us from meeting our obligations under our outstanding indebtedness.

We have a significant amount of indebtedness. As of December 31, 2017, our total indebtedness was approximately $2,169 million, including lease financing obligations. As of December 31, 2017, we also had $194 million available for borrowing under our Credit Facility. In addition, as of January 2, 2018, we had $550 million available under our Bridge Credit Agreement, subject to the use of proceeds conditions set forth therein.

Our substantial indebtedness could have significant consequences, including:

- increasing our vulnerability to adverse economic, industry, or competitive developments;
- requiring a substantial portion of our cash flows from operations to be dedicated to the payment of principal and interest on our indebtedness, therefore reducing our ability to use our cash flows to fund operations, make capital expenditures, and pursue future business opportunities;
- exposing us to the risk of increased interest rates to the extent of any future borrowings, including borrowings under our Credit Facility, at variable rates of interest;
- making it more difficult for us to satisfy our obligations with respect to our indebtedness, including our Credit Facility and our outstanding senior notes, and any failure to comply with the obligations of any of our debt instruments, including restrictive covenants and borrowing conditions, could result in an event of default under the indenture governing our outstanding senior notes and the agreements governing such other indebtedness;
- restricting us from making strategic acquisitions or causing us to make non-strategic divestitures;
- limiting our ability to obtain additional financing for working capital, capital expenditures, product and service development, debt service requirements, acquisitions, and general corporate or other purposes; and
- limiting our flexibility in planning for, or reacting to, changes in our business or market conditions and placing us at a competitive disadvantage compared to our competitors who are less highly leveraged and who, therefore, may be able to take advantage of opportunities that our substantial indebtedness may prevent us from exploiting.

The terms of our debt impose, and will impose, restrictions on us that may affect our ability to successfully operate our business and our ability to make payments on our outstanding senior notes.

The indentures governing our outstanding senior notes and the credit agreement governing our Credit Facility contain various covenants that could materially and adversely affect our ability to finance our future operations or capital needs and to engage in other business activities that may be in our best interest. These covenants limit our ability to, among other things:

- incur additional indebtedness or issue certain preferred equity;
- pay dividends on, repurchase, or make distributions in respect of our capital stock, prepay, redeem, or repurchase certain debt or make other restricted payments;
- make certain investments;
- create certain liens;
- sell assets, including capital stock of restricted subsidiaries;
- enter into agreements restricting our restricted subsidiaries' ability to pay dividends to us;
- consolidate, merge, sell, or otherwise dispose of all or substantially all of our assets;
- enter into certain transactions with our affiliates; and
- designate our restricted subsidiaries as unrestricted subsidiaries.

All of these covenants may restrict our ability to pursue our business strategies. Our ability to comply with these covenants may be affected by events beyond our control, such as prevailing economic conditions and changes in regulations, and if such events occur, we cannot be sure that we will be able to comply. A breach of these covenants could result in a default under the indentures for our outstanding senior notes and/or the credit agreement

governing our Credit Facility and the Bridge Credit Agreement including, as a result of cross default provisions and, in the case of our Credit Facility and our Bridge Credit Agreement, permit the lenders to cease making loans to us. If there were an event of default under the indentures governing our outstanding senior notes and/or the credit agreement governing our Credit Facility, holders of such defaulted debt could cause all amounts borrowed under these instruments to be due and payable immediately. Our assets or cash flow may not be sufficient to repay borrowings under our outstanding debt instruments in the event of a default thereunder.

In addition, the restrictive covenants in the credit agreement governing our Credit Facility require us to maintain specified financial ratios and satisfy other financial condition tests. Our ability to meet those financial ratios and tests will depend on our ongoing financial and operating performance, which, in turn, will be subject to economic conditions and to financial, market, and competitive factors, many of which are beyond our control.

If our operating performance declines, we may be required to obtain waivers from the lenders under our Credit Facility, from the holders of our outstanding senior notes or from the holders of other obligations, to avoid defaults thereunder. For example, in February 2017, to avoid default under our Credit Facility as a result of our failure to comply with certain financial covenants therein applicable to the three months ended December 31, 2016, we sought, and obtained, a waiver of such defaults by the required lenders under our Credit Facility.

If we are not able to obtain such waivers, our creditors could exercise their rights upon default, and we could be forced into bankruptcy or liquidation.

We may not have the funds necessary to pay the amounts due upon conversion or required repurchase of our outstanding notes, and our indebtedness may contain limitations on our ability to pay the amounts due upon conversion or required repurchase.

As of December 31, 2017, the aggregate outstanding principal amount of our 1.125% cash convertible senior notes due January 15, 2020 (1.125% Convertible Notes), and our 1.625% convertible senior notes due 2044 (1.625% Convertible Notes) was $550 million and $161 million, respectively. Both our 1.125% Convertible Notes and our 1.625% Convertible Notes are convertible into cash prior to their respective maturity dates under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger. The stock price trigger for the 1.125% Convertible Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended December 31, 2017, and are convertible to cash through at least March 31, 2018. Because the 1.125% Convertible Notes may be converted into cash within 12 months, their carrying amount is reported in current portion of long-term debt as of December 31, 2017. For economic reasons related to the trading market for our 1.125% Convertible Notes, we believe that the amount of the notes that may be converted over the next twelve months, if any, will not be significant. However, if the trading market for our 1.125% Convertible Notes becomes closed or restricted due to market turmoil or other reasons such that the notes cannot be traded, or if the trading price of our 1.125% Convertible Notes, which normally trade at a marginal premium to the underlying composite stock-and-interest economic value, no longer includes that marginal premium, holders of our 1.125% Convertible Notes may elect to convert the notes to cash.

The stock price trigger for the 1.625% Notes is $75.51 per share. The 1.625% Convertible Notes did not meet this stock price trigger in the quarter ended December 31, 2017. However, on contractually specified dates beginning in 2018, holders of the 1.625% Convertible Notes may require us to repurchase some or all of such notes. In addition, beginning May 15, 2018 until August 19, 2018, holders may convert some or all of the 1.625% Convertible Notes. Because of these put and conversion features, the 1.625% Convertible Notes are reported in current portion of long-term debt as of December 31, 2017.

If conversion requests are received, the settlement of the notes must be paid primarily in cash pursuant to the terms of the relevant indentures.

In addition, in the event of a change in control or the termination in trading of our stock, each holder of our 1.125% Convertible Notes and our 1.625% Convertible Notes would have the right to require us to purchase some or all of their notes at a purchase price in cash equal to 100% of the principal amount of the notes, plus any accrued and unpaid interest.

Our ability to comply with the conversion or repurchase obligations under our 1.125% Convertible Notes and our 1.625% Convertible Notes will depend on the extent to which we have cash or financing available to satisfy such obligations and may also be limited by law, by regulatory authority, or by agreements governing our future indebtedness. The indentures for the 1.125% Convertible Notes and the 1.625% Convertible Notes provide that it would be an event of default if we do not make the cash payments due upon conversion or required repurchase of the notes. The occurrence of an event of default under one or both of these indentures may also constitute an event of default under our Credit Facility, our Bridge Credit Agreement and under our other indebtedness we may have

outstanding at such time. Any such default could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

We may not be able to generate sufficient cash to service all of our indebtedness and may be forced to take other actions to satisfy our obligations under our indebtedness, which may not be successful.

Our ability to make scheduled payments on or to refinance our debt obligations depends on our financial condition and operating performance, which is subject to prevailing economic and competitive conditions and to certain financial, business, and other factors beyond our control. We may not be able to maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, and interest on our indebtedness.

If our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to reduce or delay investments and capital expenditures, or to sell assets, seek additional capital, or restructure or refinance our indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and may require us to comply with onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments, including our Credit Facility and Bridge Credit Agreement, and the indentures governing our outstanding senior notes, may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest and principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our credit rating, which would harm our ability to incur additional indebtedness. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations.

A lowering or withdrawal of the ratings assigned to our debt securities by rating agencies may increase our future borrowing costs and reduce our access to capital.

There can be no assurance that any rating assigned by the rating agencies to our debt or our corporate rating will remain for any given period of time or that a rating will not be lowered or withdrawn entirely by a rating agency if, in that rating agency's judgment, future circumstances relating to the basis of the rating, such as adverse changes, so warrant. During 2017, both Moody's and Standard and Poor's downgraded our debt ratings. In February 2018, both Moody's and S&P downgraded our corporate and debt ratings further to BB- and B3, respectively, with modest negative impact on future borrowing cost. A further lowering or withdrawal of the ratings assigned to our debt securities by rating agencies would likely increase our future borrowing costs and reduce our access to capital, which could have a materially adverse impact on our business, financial condition, cash flows, or results of operations.

If federal spending on the Medicaid program is reduced, populations served by Molina Medicaid Solutions could decline and our revenues could be materially reduced.

As noted above, some of the ACA modifications considered involve significantly reduced federal spending on the Medicaid program. Among the proposals being considered include reversing the ACA's expansion of Medicaid, and changing Medicaid to a state block grant program, possibly including a per capita cap. An end to Medicaid Expansion could lower the populations served by Molina Medicaid Solutions. Changing Medicaid to a state block grant program would turn control of the program to states and cap what the federal government spends on Medicaid each year. Fixed state block grants could mean states will cut benefits or force beneficiaries to take on more cost-sharing. If Medicaid Expansion were reversed and the funding of Medicaid capped, the revenues and cash flows of Molina Medicaid Solutions could decrease materially, and as a result our profitability would be negatively impacted.

We may be unable to retain or renew the state government contracts of the Molina Medicaid Solutions segment on terms consistent with our expectations or at all.

Molina Medicaid Solutions currently provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida. If we are unable to continue to operate in any of those six jurisdictions, or if our current operations in any of those jurisdictions are significantly curtailed, the revenues and cash flows of Molina Medicaid Solutions could decrease materially, and as a result our profitability would be negatively impacted.

If the responsive bids to RFPs of Molina Medicaid Solutions are not successful, our revenues could be materially reduced and our operating results could be negatively impacted.

The government contracts of Molina Medicaid Solutions may be subject to periodic competitive bidding. In such process, Molina Medicaid Solutions may face competition as other service providers, some with much greater

financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. Molina Medicaid Solutions also anticipates bidding in other states which have issued RFPs for procurement of a new MMIS. If our responsive bids in other states are not successful, we will be unable to grow in a manner consistent with our projections. In addition, we may be unable to support the carrying amount of goodwill we have recorded for this business, because its fair value estimated future cash flows. Even if our responsive bids are successful, the bids may be based upon assumptions or other factors which could result in the contract being less profitable than we had expected or had been the case prior to competitive re-bidding.

Because of the complexity and duration of the services and systems required to be delivered under the government contracts of Molina Medicaid Solutions, there are substantial risks associated with full performance under the contracts.

The state contracts of Molina Medicaid Solutions typically require significant investment in the early stages that is expected to be recovered through billings over the life of the contracts. These contracts involve the construction of new computer systems and communications networks and the development and deployment of complex technologies. Substantial performance risk exists under each contract. Some or all elements of service delivery under these contracts are dependent upon successful completion of the design, development, construction, and implementation phases. Any increased or unexpected costs or delays in connection with the performance of these contracts, including delays caused by factors outside our control, could make these contracts less profitable or unprofitable, which could have an adverse effect on our business, financial condition, cash flows, or results of operations.

If we fail to comply with our state government contracts or government contracting regulations, our business could be adversely affected.

Molina Medicaid Solutions' contracts with state government customers may include unique and specialized performance requirements. In particular, contracts with state government customers are subject to various procurement regulations, contract provisions, and other requirements relating to their formation, administration, and performance. Any failure to comply with the specific provisions in our customer contracts or any violation of government contracting regulations could result in the imposition of various civil and criminal penalties, which may include termination of the contracts, forfeiture of profits, suspension of payments, imposition of fines, and suspension from future government contracting. Further, any negative publicity related to our state government contracts or any proceedings surrounding them may damage our business by affecting our ability to compete for new contracts. The termination of a state government contract, our suspension from government work, or any negative impact on our ability to compete for new contracts, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Our business may be adversely affected by the transition from traditional fee-for-service to Medicaid managed care.

To reduce expenses, a number of state Medicaid programs are expected to pursue the transition from a fee-for-service focus of their Medicaid programs to a Medicaid managed care focus. A shift in Medicaid payment models from fee-for-service to managed care will require a concomitant shift in the focus of MMIS. In connection with such a transition, MMIS must also make a transition from a system built around claims adjudication to one that performs analytics and can be used to manage Medicaid population health outcomes. If our Molina Medicaid Solutions segment is unable to accomplish this transition, our business, financial condition, cash flows, or results of operations may be adversely affected.

Risks Related to Our Common Stock

Future sales of our common stock or equity-linked securities in the public market could adversely affect the trading price of our common stock and our ability to raise funds in new stock offerings.

We may issue equity securities in the future, or securities that are convertible into or exchangeable for, or that represent the right to receive, shares of our common stock. Sales of a substantial number of shares of our common stock or other equity securities, including sales of shares in connection with any future acquisitions, could be substantially dilutive to our stockholders. These sales may have a harmful effect on prevailing market prices for our common stock and our ability to raise additional capital in the financial markets at a time and price favorable to us. Moreover, to the extent that we issue restricted stock units, stock appreciation rights, options, or warrants to purchase our common stock in the future and those stock appreciation rights, options, or warrants are exercised or as the restricted stock units vest, our stockholders may experience further dilution. Holders of our shares of

common stock have no preemptive rights that entitle holders to purchase a pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our stockholders. Our certificate of incorporation provides that we have authority to issue 150 million shares of common stock and 20 million shares of preferred stock. As of December 31, 2017, approximately 60 million shares of common stock and no shares of preferred or other capital stock were issued and outstanding.

It may be difficult for a third party to acquire us, which could inhibit stockholders from realizing a premium on their stock price.

We are subject to the Delaware anti-takeover laws regulating corporate takeovers. These provisions may prohibit stockholders owning 15% or more of our outstanding voting stock from merging or combining with us. In addition, any change in control of our state health plans would require the approval of the applicable insurance regulator in each state in which we operate.

Our certificate of incorporation and bylaws also contain provisions that could have the effect of delaying, deferring, or preventing a change in control of our company that stockholders may consider favorable or beneficial. These provisions could discourage proxy contests and make it more difficult for our stockholders to elect directors and take other corporate actions. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions include:

- a staggered board of directors, so that it would take three successive annual meetings to replace all directors,
- prohibition of stockholder action by written consent, and
- advance notice requirements for the submission by stockholders of nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting.

In addition, changes of control are often subject to state regulatory notification, and in some cases, prior approval.

Further, our board of directors or a committee thereof has the power, without stockholder approval, to designate the terms of one or more series of preferred stock and issue shares of preferred stock. The ability of our board of directors or a committee thereof to create and issue a new series of preferred stock could impede a merger, takeover or other business combination involving us or discourage a potential acquirer from making a tender offer for our common stock, which, under certain circumstances, could reduce the market price of our common stock.

LEGAL PROCEEDINGS

MANAGEMENT AND AUDITOR’S REPORTS

MANAGEMENT’S EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures, as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), that are designed to provide reasonable assurance that information required to be disclosed by us in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to provide reasonable assurance that information required to be disclosed by us in reports we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of any possible controls and procedures.

Under the supervision and with the participation of our management, including our chief executive officer and our chief financial officer, we carried out an evaluation of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Form 10-K pursuant to Rule 13a-15(b) and Rule 15d-15(b) of the Exchange Act. Based on this evaluation and after consideration of the remediation of the two material weaknesses in our internal control over financial reporting described below, our chief executive officer and our chief financial officer concluded that, our disclosure controls and procedures were effective as of December 31, 2017, at the reasonable assurance level. In addition, management concluded that our consolidated financial statements included in this Annual Report on Form 10-K are fairly stated in all material respects in accordance with U.S. generally accepted accounting principles (GAAP) for each of the periods presented herein.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets, (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors, and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on our financial statements.

Internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements prepared for external purposes in accordance with GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of our internal control over financial reporting to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

After consideration of the remediation of the two material weaknesses described below, management concluded that we maintained effective internal control over financial reporting as of December 31, 2017, based on criteria described in *Internal Control-Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Ernst & Young, LLP, the independent registered public accounting firm who audited our Consolidated Financial Statements included in this Form 10-K, has issued a report on our internal control over financial reporting, which is included herein.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. The Company determined that a material weakness in its internal control over financial reporting existed at December 31, 2016, and an additional material weakness existed at September 30, 2017. The following describes those material weaknesses and their remediation.

Material Weakness as of December 31, 2016

As disclosed in our Annual Report on Form 10-K for the year ended December 31, 2016, our management determined that as of December 31, 2016 a material weakness existed in our internal control over financial reporting relating to the operation of an element of its process for calculating the amount owed to California by its California health plan. More specifically, a Medicaid Expansion contract amendment executed in the fourth quarter of 2016 changed the medical loss ratio corridor formula and such amendment was not initially considered in determining the liability. As a result, we understated net income by $44 million for the year ended December 31, 2016, which is material to our consolidated results for the year ended December 31, 2016. This amount was corrected prior to the issuance of our consolidated financial statements as of and for the year ended December 31, 2016.

Because of this material weakness, management concluded that we did not maintain effective internal control over financial reporting as of December 31, 2016, based on criteria described in *Internal Control - Integrated Framework* (2013) issued by COSO.

We have executed a remediation plan to address this material weakness. The remediation efforts we have implemented included the development of robust protocols to ensure that the control relating to the review of a

contractual amendment affecting the computation of the Medicaid Expansion medical loss ratio corridor for our California health plan will operate as designed.

We have tested the operating effectiveness of the historical control, and new controls subsequent to implementation and, as a result, believe these measures have remediated the material weakness as of December 31, 2016 identified above and strengthened our internal control over financial reporting for the computation of our California Medicaid Expansion medical loss ratio corridor.

Material Weakness as of September 30, 2017

As disclosed in our Quarterly Report on Form 10-Q for the three months ended September 30, 2017, our management determined that as of September 30, 2017, a material weakness existed in our internal control over financial reporting relating to the design and operating effectiveness of our internal control for our interim goodwill impairment tests for our Pathways subsidiary and Molina Medicaid Solutions segment. Specifically, spreadsheet formula errors in our valuation model, and errors made in the calculation of impairment losses recorded, were not detected in our review procedures. As a result, we initially miscalculated the goodwill impairment in the three months ended September 30, 2017. The impairment calculation was corrected prior to the filing of our unaudited consolidated financial statements as of and for the three and nine months ended September 30, 2017.

Because of this material weakness, management concluded that we did not maintain effective internal control over financial reporting as of September 30, 2017, based on criteria described in *Internal Control - Integrated Framework* (2013) issued by COSO.

We have implemented a remediation plan to address this material weakness. The remediation efforts included: enhancement of the design of the controls relating to the computation and rigor of review of the goodwill impairment tests; engagement of additional subject matter experts to support the valuation calculations, key assumptions and review process; and development of new review controls that operate at an appropriate level of precision to prevent or detect potential material errors within the valuation calculations.

We have tested the operating effectiveness of the new controls subsequent to implementation and, as a result, believe these measures have remediated the material weakness as of September 30, 2017, identified above and strengthened our internal control over financial reporting for our interim goodwill impairment tests for our Pathways subsidiary and Molina Medicaid Solutions segment.

Changes in Internal Control over Financial Reporting

Except as described above, management did not identify any change in our internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) during the quarter ended December 31, 2017, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and the Board of Directors of Molina Healthcare, Inc.

Opinion on Internal Control over Financial Reporting

We have audited Molina Healthcare, Inc.'s internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Molina Healthcare, Inc. (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of Molina Healthcare, Inc. as of December 31, 2017 and 2016, the related consolidated statements of operations, comprehensive (loss) income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2017, and the related notes and our report dated March 1, 2018, expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Los Angeles, California
March 1, 2018

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and the Board of Directors of Molina Healthcare, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Molina Healthcare, Inc. (the Company) as of December 31, 2017 and 2016, and the related consolidated statements of operations, comprehensive (loss) income, stockholders' equity and cash flows, for each of the three years in the period ended December 31, 2017, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the consolidated financial position of the Company as of December 31, 2017 and 2016, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated March 1, 2018, expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ ERNST & YOUNG LLP

We have served as the Company's auditor since 2000.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality managed healthcare to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

As of December 31, 2017, the Health Plans segment consisted of health plans operating in 12 states and the Commonwealth of Puerto Rico. These health plans served approximately 4.5 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Affordable Care Act Marketplace (Marketplace) members, most of whom receive government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO).

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. The contracts are subject to risk of loss when a state issues a new request for proposal (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. See below for further information regarding our Florida and New Mexico Medicaid contracts.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled (ABD); and regions or service areas.

The Molina Medicaid Solutions segment provides support to state government agencies in the administration of their Medicaid programs including business processing, information technology development, and administrative services. Molina Medicaid Solutions is under contract with Medicaid agencies in six states, and the U.S. Virgin Islands.

The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

2017 and Recent Developments – Health Plans Segment

Florida Health Plan. On February 1, 2018, we were selected by the Florida Agency for Health Care Administration (AHCA) to negotiate for the award of a managed care contract in only one region of Florida. That region—Region 11—comprises Miami-Dade and Monroe counties, where we currently serve 59,000 Medicaid members. As of December 31, 2017, we served approximately 360,000 Medicaid members in Florida, which represented approximately $1,486 million premium revenue for the year ended December 31, 2017. This decision does not affect the Florida health plan's current contracts with AHCA, which run through December 31, 2018. We recorded impairment charges in connection with this event. Refer to Note 8, "Goodwill and Intangible Assets, Net," for further information.

New Mexico Health Plan. In January 2018, our New Mexico health plan was notified by the New Mexico Human Services Department (HSD) that the health plan had not been selected for the tentative award of a Medicaid contract effective January 1, 2019. As of December 31, 2017, we served approximately 224,000 Medicaid members in New Mexico, which represented approximately $1,205 million premium revenue for the year ended December 31, 2017. This decision does not affect the New Mexico plan's current contract with HSD which runs through December 31, 2018. We recorded impairment charges in connection with this event. Refer to Note 8, "Goodwill and Intangible Assets, Net," for further information.

Illinois Health Plan. In August 2017, our Illinois health plan was awarded a statewide Medicaid managed care contract by the Illinois Department of Healthcare and Family Services. This Medicaid contract further integrates behavioral health and physical health by combining the state's three current managed care programs into one

program. The contract began January 1, 2018, and will continue for four years with options to renew annually for up to four additional years.

Mississippi Health Plan. In June 2017, Molina Healthcare of Mississippi, Inc. was awarded a Medicaid Coordinated Care Contract for the statewide administration of the Mississippi Coordinated Access Network (MississippiCAN). The operational start date for the program is currently scheduled for October 1, 2018, pending the completion of a readiness review. The initial term of the contract is through June 2020, with options to renew annually for up to two additional years.

Washington Health Plan. In May 2017, our Washington health plan was selected by the Washington State Health Care Authority to negotiate and enter into managed care contracts for the North-Central region of the state's Apple Health Integrated Managed Care Program. The new contract commenced January 1, 2018.

Terminated Medicare Acquisition. In August 2016, we entered into agreements with each of Aetna Inc. and Humana Inc. to acquire certain assets related to their Medicare Advantage business. In February 2017, our agreements with each of Aetna and Humana were terminated by the parties pursuant to the terms of the agreements, under which we received an aggregate termination fee of $75 million from Aetna and Humana in the first quarter of 2017. This fee is reported in "Other income, net" in the accompanying consolidated statements of operations.

Impairment Losses

Refer to Note 8, "Goodwill and Intangible Assets, Net," for a discussion of goodwill and intangible assets impaired in 2017.

Consolidation

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. See Note 18, "Variable Interest Entities (VIEs)," for more information regarding these variable interest entities. All significant inter-company balances and transactions have been eliminated in consolidation. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the periods presented have been included; such adjustments consist of normal recurring adjustments.

Presentation and Reclassification

The Centers for Medicare and Medicaid Services (CMS) incorporates the Health Insurer Fee (HIF) in our Medicare and Marketplace premium rates. We have therefore reclassified such amounts in our consolidated statements of operations to premium revenue, from health insurer fees reimbursed, for all applicable periods presented. The amounts reclassified from health insurer fees reimbursed to premium revenue for years ended December 31, 2016, and 2015, amounted to $53 million and $20 million, respectively.

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Principal areas requiring the use of estimates include:

- The determination of medical claims and benefits payable of our Health Plans segment;
- Health plan contractual provisions that may limit revenue recognition based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- Molina Medicaid Solutions segment revenue and cost recognition;
- Settlements under risk or savings sharing programs;
- The assessment of deferred contract costs, deferred revenue, long-lived and intangible assets, and goodwill for impairment;
- The determination of reserves for potential absorption of claims unpaid by insolvent providers;
- The determination of reserves for the outcome of litigation;
- The determination of valuation allowances for deferred tax assets; and

- The determination of unrecognized tax benefits.

2. Significant Accounting Policies

Certain of our significant accounting policies are discussed within the note to which they specifically relate.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that are both readily convertible into known amounts of cash and have a maturity of three months or less on the date of purchase.

Investments

Our investments are principally held in debt securities, which are grouped into two separate categories for accounting and reporting purposes: available-for-sale securities, and held-to-maturity securities. Available-for-sale securities are recorded at fair value and unrealized gains and losses, if any, are recorded in stockholders' equity as other comprehensive income, net of applicable income taxes. Held-to-maturity securities are recorded at amortized cost, which approximates fair value, and unrealized holding gains or losses are not generally recognized. Realized gains and losses and unrealized losses judged to be other than temporary with respect to available-for-sale and held-to-maturity securities are included in the determination of net (loss) income. The cost of securities sold is determined using the specific-identification method.

Our investment policy requires that all of our investments have final maturities of 10 years or less (excluding variable rate securities where interest rates may be periodically reset), and that the average maturity be three years or less. Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. Declines in interest rates over time will reduce our investment income.

In general, our available-for-sale securities are classified as current assets without regard to the securities' contractual maturity dates because they may be readily liquidated. We monitor our investments for other-than-temporary impairment. For comprehensive discussions of the fair value and classification of our current and non-current investments, see Note 4, "Fair Value Measurements," Note 5, "Investments," and Note 9, "Restricted Investments, Non-current."

Long-Lived Assets, including Intangible Assets

Long-lived assets consist primarily of property, equipment, capitalized software (see Note 7, "Property, Equipment, and Capitalized Software, Net"), and intangible assets (see Note 8, "Goodwill and Intangible Assets, Net").

Deferred Contract Costs

Direct costs associated with our Molina Medicaid Solutions contracts, other than software-related costs for which we apply the guidance for internal-use software, are expensed as incurred unless corresponding revenue is deferred. We defer recognition of any contingent revenue until the contingency has been removed. If revenue is deferred, direct costs relating to delivered service elements are deferred as well, and recognized on a straight-line basis over the period of revenue recognition.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Business Combinations

Accounting for acquisitions requires us to recognize separately from goodwill the assets acquired and the liabilities assumed at their acquisition date fair values. Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations. While we use our best estimates and assumptions to accurately value assets acquired and liabilities assumed at the acquisition date, our estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which may be up to one year from the acquisition date, we may record adjustments to the assets acquired and liabilities assumed with the corresponding offset to goodwill. Upon the conclusion of the final determination of the values of assets acquired or

liabilities assumed, or one year after the date of acquisition, whichever comes first, any subsequent adjustments are recorded within our consolidated statements of operations.

Premium Revenue - Health Plans

Premium revenue is generated primarily from our Medicaid, Medicare and Marketplace contracts, including agreements with other managed care organizations for which we operate as a subcontractor. Premium revenue is generally received based on per member per month (PMPM) rates established in advance of the periods covered. These premium revenues are recognized in the month that members are entitled to receive health care services, and premiums collected in advance are deferred. The state Medicaid programs and the federal Medicare program periodically adjust premiums. Additionally, many of our contracts contain provisions that may adjust or limit revenue or profit, as described below. Consequently, we recognize premium revenue as it is earned under such provisions.

The following table summarizes premium revenue for the periods indicated:

	Year Ended December 31,					
	2017		2016		2015	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
	(Dollars in millions)					
California	$ 2,701	14.3%	$ 2,378	14.4%	$ 2,200	16.6%
Florida	2,568	13.6	1,938	11.8	1,199	9.1
Illinois	593	3.1	603	3.7	398	3.0
Michigan	1,596	8.5	1,527	9.3	1,072	8.1
New Mexico	1,368	7.3	1,305	7.9	1,237	9.3
New York	181	1.0	82	0.5	—	—
Ohio	2,216	11.8	1,967	12.0	2,035	15.3
Puerto Rico	732	3.9	726	4.4	567	4.3
South Carolina	445	2.4	378	2.3	348	2.6
Texas	2,813	14.9	2,461	15.0	1,963	14.8
Utah	535	2.8	447	2.7	334	2.5
Washington	2,608	13.8	2,222	13.5	1,605	12.1
Wisconsin	491	2.6	398	2.4	262	2.0
Other	7	—	13	0.1	41	0.3
	$ 18,854	100.0%	$ 16,445	100.0%	$ 13,261	100.0%

Certain components of premium revenue are subject to accounting estimates and fall into the following categories:

Contractual Provisions That May Adjust or Limit Revenue or Profit

Medicaid

Medical Cost Floors (Minimums), and Medical Cost Corridors. A portion of our premium revenue may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $135 million and $272 million at December 31, 2017 and December 31, 2016, respectively, to amounts due government agencies. Approximately $96 million and $244 million of the liability accrued at December 31, 2017 and December 31, 2016, respectively, relates to our participation in Medicaid Expansion programs.

In certain circumstances, the health plans may receive additional premiums if amounts spent on medical care costs exceed a defined maximum threshold. Receivables relating to such provisions were insignificant at December 31, 2017 and December 31, 2016.

Profit Sharing and Profit Ceiling. Our contracts with certain states contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. Liabilities for profits in excess of the amount we are allowed to retain under these provisions were insignificant at December 31, 2017 and December 31, 2016.

Retroactive Premium Adjustments. State Medicaid programs periodically adjust premium rates on a retroactive basis. In these cases, we must adjust our premium revenue in the period in which we learn of the adjustment, rather than in the months of service to which the retroactive adjustment applies.

Medicare

Risk Adjustment: Our Medicare premiums are subject to retroactive increase or decrease based on the health status of our Medicare members (as measured by member risk score). We estimate our members' risk scores and the related amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health status, risk scores and CMS practices. Consolidated balance sheet amounts related to anticipated Medicare risk adjustment premiums and Medicare Part D settlements were insignificant at December 31, 2017 and December 31, 2016.

Minimum MLR: Additionally, federal regulations have established a minimum annual medical loss ratio (Minimum MLR) of 85% for Medicare. The medical loss ratio represents medical costs as a percentage of premium revenue. Federal regulations define what constitutes medical costs and premium revenue. If the Minimum MLR is not met, we may be required to pay rebates to the federal government. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of operations.

Marketplace

Premium Stabilization Programs: The Affordable Care Act (ACA) established Marketplace premium stabilization programs effective January 1, 2014. These programs, commonly referred to as the "3R's," include a permanent risk adjustment program, a transitional reinsurance program, and a temporary risk corridor program. We record receivables or payables related to the 3R programs and the Minimum MLR when the amounts are reasonably estimable as described below, and, for receivables, when collection is reasonably assured. Our receivables (payables) for each of these programs, as of the dates indicated, were as follows:

	December 31, 2017			
	Current Benefit Year	Prior Benefit Years	Total	December 31, 2016
	(In millions)			
Risk adjustment	$ (912)	$ —	$ (912)	$ (522)
Reinsurance	—	10	10	55
Risk corridor	—	—	—	(1)
Minimum MLR	(2)	—	(2)	(1)

- Risk adjustment: Under this permanent program, our health plans' composite risk scores are compared with the overall average risk score for the relevant state and market pool. Generally, our health plans will make a risk transfer payment into the pool if their composite risk scores are below the average risk score, and will receive a risk transfer payment from the pool if their composite risk scores are above the average risk score. We estimate our ultimate premium based on insurance policy year-to-date experience, and recognize estimated premiums relating to the risk adjustment program as an adjustment to premium revenue in our consolidated statements of operations.
- Reinsurance: This program was designed to provide reimbursement to insurers for high cost members and ended December 31, 2016; we expect to settle the outstanding receivable balance in the first quarter of 2018.
- Risk corridor: This program was intended to limit gains and losses of insurers by comparing allowable costs to a target amount as defined by CMS, and ended December 31, 2016; all outstanding payable balances were settled in the third quarter of 2017. We are owed, but have not recorded $128 million in risk corridor payments from CMS related to benefit year 2016 and 2015.

Additionally, the ACA established a Minimum MLR of 80% for the Marketplace. The medical loss ratio represents medical costs as a percentage of premium revenue. Federal regulations define what constitutes medical costs and premium revenue. If the Minimum MLR is not met, we may be required to pay rebates to our Marketplace policyholders. Each of the 3R programs is taken into consideration when computing the Minimum MLR. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of operations.

Quality Incentives

At several of our health plans, revenue ranging from approximately 1% to 3% of certain health plan premiums is earned only if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the periods presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of December 31, 2017 are not known, we have no reason to believe that the adjustments to prior periods noted below are not indicative of the potential future changes in our estimates as of December 31, 2017.

	Year Ended December 31,		
	2017	2016	2015
	(In millions)		
Maximum available quality incentive premium - current period	$ 150	$ 147	$ 118
Amount of quality incentive premium revenue recognized in current period:			
Earned current period	$ 97	$ 104	$ 66
Earned prior periods	10	47	13
Total	$ 107	$ 151	$ 79
Quality incentive premium revenue recognized as a percentage of total premium revenue	0.6%	0.9%	0.6%

Medical Care Costs - Health Plans

Expenses related to medical care services are captured in the following categories:

Fee-for-service expenses. Nearly all hospital services and the majority of our primary care and physician specialist services and LTSS costs are paid on a fee-for-service basis. Under fee-for-service arrangements, we retain the financial responsibility for medical care provided and incur costs based on actual utilization of services. Such expenses are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit manager are included in fee-for-service costs.

Pharmacy expenses. All drug, injectibles, and immunization costs paid through our pharmacy benefit manager are classified as pharmacy expenses. As noted above, drugs and injectibles not paid through our pharmacy benefit manager are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.

Capitation expenses. Many of our primary care physicians and a small number of our specialists and hospitals are paid on a capitated basis. Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated arrangements, we remain liable for the provision of certain health care services. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.

Direct delivery expenses. All costs associated with our direct delivery of medical care are separately identified.

Other medical expenses. All medically related administrative costs, certain provider incentive costs, and other health care expenses are classified as other medical expenses. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, care coordination, disease management, and 24-hour on-call nurses. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2017, 2016, and 2015, medically related administrative costs were $554 million, $488 million, and $398 million, respectively.

The following table provides the details of our consolidated medical care costs for the periods indicated (dollars in millions, except PMPM amounts):

	Year Ended December 31,								
	2017			2016			2015		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$ 12,682	$ 229.63	74.3%	$ 10,993	$ 217.84	74.4%	$ 8,572	$ 218.35	72.7%
Pharmacy	2,563	46.40	15.0	2,213	43.84	15.0	1,610	41.01	13.7
Capitation	1,360	24.63	8.0	1,218	24.13	8.2	982	25.02	8.3
Direct delivery	73	1.33	0.4	78	1.55	0.5	128	3.26	1.1
Other	395	7.15	2.3	272	5.39	1.9	502	12.79	4.2
Total	$ 17,073	$ 309.14	100.0%	$ 14,774	$ 292.75	100.0%	$ 11,794	$ 300.43	100.0%

Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are incurred but not paid (IBNP). Our IBNP claims reserve, as reported in our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. For further information, see Note 10, “Medical Claims and Benefits Payable.”

We report reinsurance premiums as a reduction to premium revenue, while related reinsurance recoveries are reported as a reduction to medical care costs. We limit our risk of catastrophic losses by maintaining high deductible reinsurance coverage. Such reinsurance coverage does not relieve us of our primary obligation to our policyholders. We do not consider this coverage to be material because the cost is not significant and the likelihood that coverage will apply is low.

Taxes Based on Premiums

Health Insurer Fee (HIF). The federal government under the ACA imposes an annual fee, or excise tax, on health insurers for each calendar year. The HIF is based on a company’s share of the industry’s net premiums written during the preceding calendar year, and is non-deductible for income tax purposes. We recognize expense for the HIF over the year on a straight-line basis. Within our Medicaid program, we must secure additional reimbursement from our state partners for this added cost. We recognize the related revenue when we have obtained a contractual commitment or payment from a state to reimburse us for the HIF; such HIF revenue is recognized ratably throughout the year. The Consolidated Appropriations Act of 2016 provided for a HIF moratorium in 2017. Therefore, there were no health insurer fees reimbursed, nor health insurer fees incurred, in 2017.

Premium and Use Tax. Certain of our health plans are assessed a tax based on premium revenue collected. The premium revenues we receive from these states include the premium tax assessment. We have reported these taxes on a gross basis, as premium tax revenue and as premium tax expenses in the consolidated statements of operations.

Premium Deficiency Reserves on Loss Contracts

We assess the profitability of our medical care policies to identify groups of contracts where current operating results or forecasts indicate probable future losses. If anticipated future variable costs exceed anticipated future premiums and investment income, a premium deficiency reserve is recognized. We recorded a premium deficiency reserve to “Medical claims and benefits payable” on our accompanying consolidated balance sheets relating to our Marketplace program of $30 million as of December 31, 2016. No premium deficiency reserves are recorded as of December 31, 2017.

Marketplace Cost Share Reduction (CSR) Update

In the fourth quarter of 2017, the federal government ceased payments of Marketplace CSR subsidies, which resulted in additional medical care costs of approximately $73 million in 2017.

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. Our portfolio managers must obtain our prior approval before selling investments where the loss position of those investments exceeds certain levels. Our investments consist primarily of investment-grade debt securities with a maximum maturity of 10 years and an average duration of three years or less. Restricted investments, non-current are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited because our payors consist principally of the governments of each state in which our health plan subsidiaries operate.

Risks and Uncertainties

Our profitability depends in large part on our ability to accurately predict and effectively manage medical care costs. We continually review our medical costs in light of our underlying claims experience and revised actuarial data. However, several factors could adversely affect medical care costs. These factors, which include changes in health care practices, inflation, new technologies, major epidemics, natural disasters, and malpractice litigation, are beyond our control and may have an adverse effect on our ability to accurately predict and effectively control medical care costs. Costs in excess of those anticipated could have a material adverse effect on our financial condition, results of operations, or cash flows.

We operate health plans primarily as a direct contractor with the states (or Commonwealth), and in Los Angeles County, California, as a subcontractor to another health plan holding a direct contract with the state. We are therefore dependent upon a small number of contracts to support our revenue. The loss of any one of those contracts could have a material adverse effect on our financial position, results of operations, or cash flows. Our ability to arrange for the provision of medical services to our members is dependent upon our ability to develop and maintain adequate provider networks. Our inability to develop or maintain such networks might, in certain circumstances, have a material adverse effect on our financial position, results of operations, or cash flows.

Recent Accounting Pronouncements

Comprehensive Income. In February 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2018-02, *Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*, which allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act of 2017. ASU 2018-02 also requires certain disclosures about stranded tax effects. ASU 2018-02 is effective beginning January 1, 2019; we early adopted this ASU effective January 1, 2018, with no material impact to our financial condition, results of operations or cash flows. We are currently evaluating the required disclosures.

Goodwill Impairment. In January 2017, FASB issued ASU 2017-04, *Simplifying the Test for Goodwill Impairment*, which eliminates the requirement to calculate the implied fair value of goodwill to measure a goodwill impairment loss. Instead, an impairment loss is measured as the excess of the carrying amount of the reporting unit, including goodwill, over the fair value of the reporting unit. ASU 2017-04 is effective beginning January 1, 2020; we early adopted ASU 2017-04 as of June 30, 2017, in connection with the interim assessment of our Pathways subsidiary. See further discussion at Note 8, “Goodwill and Intangible Assets, Net.”

Restricted Cash. In November 2016, the FASB issued ASU 2016-18, *Restricted Cash,* which will require us to include in our consolidated statements of cash flows the balances of cash, cash equivalents, restricted cash and restricted cash equivalents. When these items are presented in more than one line item on the balance sheet, the new guidance requires a reconciliation of the totals in the statement of cash flows to the related captions in the balance sheet. Transfers between cash and cash equivalents and restricted cash and restricted cash equivalents will no longer be presented in the statement of cash flows. ASU 2016-18 is effective beginning January 1, 2018. We are currently evaluating the classification changes that will be required in our presentation of the consolidated statements of cash flows.

Stock Compensation. In March 2016, the FASB issued ASU 2016-09, *Improvements to Employee Share-Based Payment Accounting*, which amends ASC Topic 718, *Compensation – Stock Compensation*. ASU 2016-09 simplifies several aspects of accounting for employee share-based payment transactions, including the accounting for income

taxes, forfeitures, statutory tax and classification in the statement of cash flows. We adopted ASU 2016-09 on January 1, 2017; such adoption did not significantly impact our consolidated financial statements. In addition, the prior period presentation in the statement of cash flows was not adjusted because such adjustments were insignificant.

Leases. In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842),* as modified by ASU 2017-03, *Transition and Open Effective Date Information*. Under ASU 2016-02, an entity will be required to recognize assets and liabilities for the rights and obligations created by leases on the entity's balance sheet for both finance and operating leases. For leases with a term of 12 months or less, an entity can elect to not recognize lease assets and lease liabilities and expense the lease over a straight-line basis for the term of the lease. ASU 2016-02 will require new disclosures that depict the amount, timing, and uncertainty of cash flows pertaining to an entity's leases. ASU 2016-02 is effective beginning January 1, 2019, and must be adopted using a modified retrospective approach for annual and interim periods beginning after December 15, 2018. Under this guidance, we will record assets and liabilities relating primarily to our long-term office leases. We are in the early stages of evaluating the effect to our consolidated financial statements.

Financial Instruments. In January 2016, the FASB issued ASU 2016-01, *Recognition and Measurement of Financial Assets and Financial Liabilities*, which will require public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes. Also, entities will have to assess the realizability of a deferred tax asset related to an available-for-sale debt security in combination with the entity's other deferred tax assets. Effective on January 1, 2018, ASU 2016-01 is applied prospectively with a cumulative-effect adjustment to beginning retained earnings as of the beginning of the first reporting period in which the guidance is adopted. We have determined that there will be no impact to beginning retained earnings; we are in the process of determining the changes to required disclosures.

Revenue Recognition. In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers (Topic 606).* We intend to adopt this standard and the related modifications on January 1, 2018, using the modified retrospective approach. Under this approach, the cumulative effect of initially applying the guidance will be reflected as an adjustment to beginning retained earnings.

We have determined that the insurance contracts of our Health Plans segment, which segment constitutes the vast majority of our operations, are excluded from the scope of Topic 606 because the recognition of revenue under these contracts is dictated by other accounting standards governing insurance contracts.

For our Molina Medicaid Solutions segment, we have determined that revenue for contracts that include design, development and implementation (DDI) of Medicaid management information systems shall be deferred until the system 'go-live' date, and then generally recognized on a straight-line basis over the hosting period. This approach is similar to our historical revenue recognition methodology, with two exceptions. First, revenues contingent upon a state's acceptance of DDI and other services were previously deferred until the contingency was removed. Under Topic 606, we have determined that such revenues are appropriately recognized at the system 'go-live' date as noted above, resulting in a slight acceleration of revenue under Topic 606. Second, contract extensions were previously considered a single unit of account with the original contracts. Under Topic 606, contract extensions are considered to be standalone contracts, so revenues previously deferred over the original contract plus extension periods are now recognized over the original contract period, resulting in slightly accelerated revenue recognition. Cost of service revenue continues to be recognized in a manner consistent with the corresponding revenue recognition. As a result, the cumulative adjustment to retained earnings associated with the adoption of Topic 606 effective January 1, 2018, is insignificant for our Molina Medicaid Solutions segment.

For our Pathways behavioral health and social services provider, which is reported in the Other segment, there is no substantive change to revenue recognition under Topic 606, and therefore no impact to retained earnings effective January 1, 2018.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the Securities and Exchange Commission (SEC) did not have, or are not believed by management to have, a significant impact on our present or future consolidated financial statements.

3. Net (Loss) Income per Share

The following table sets forth the calculation of basic and diluted net (loss) income per share:

	December 31,		
	2017	2016	2015
	(In millions, except net (loss) income per share)		
Numerator:			
Net (loss) income	$ (512)	$ 52	$ 143
Denominator:			
Shares outstanding at the beginning of the period	56	55	49
Weighted-average number of shares issued:			
Common stock offering	—	—	3
Denominator for basic net (loss) income per share	56	55	52
Effect of dilutive securities:			
Share-based compensation	—	—	1
Convertible senior notes [1]	—	—	1
1.125% Warrants [1]	—	1	2
Denominator for diluted net (loss) income per share	56	56	56
Net (loss) income per share: [2]			
Basic	$ (9.07)	$ 0.93	$ 2.75
Diluted	$ (9.07)	$ 0.92	$ 2.58
Potentially dilutive common shares excluded from calculations: [1]			
1.125% Warrants	2	—	—
1.625% Notes	1	—	—

(1) For more information regarding the convertible senior notes, refer to Note 11, “Debt.” For more information regarding the 1.125% Warrants, refer to Note 14, “Stockholders' Equity.” The dilutive effect of all potentially dilutive common shares is calculated using the treasury stock method. Potentially dilutive common shares were not included in the computation of diluted net loss per share for the year ended December 31, 2017, because to do so would have been anti-dilutive.

(2) Source data for calculations in thousands.

4. Fair Value Measurements

We consider the carrying amounts of cash and cash equivalents and other current assets and current liabilities (not including derivatives and the current portion of long-term debt) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs. Level 1 financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs. Level 2 financial instruments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs. Level 3 financial instruments are valued using unobservable inputs that represent management's best estimate of what market participants would use in pricing the financial instrument at the measurement date. Our Level 3 financial instruments include derivative financial instruments.

Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of December 31, 2017, included the price of our common stock, the time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 12, "Derivatives," the 1.125% Call Option asset and the 1.125% Conversion Option liability were designed such that changes in their fair values offset, with minimal impact to the consolidated statements of operations. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

The net changes in fair value of Level 3 financial instruments were insignificant to our results of operations for the years ended December 31, 2017, and 2016.

Our financial instruments measured at fair value on a recurring basis at December 31, 2017, were as follows:

	Total	Level 1	Level 2	Level 3
		(In millions)		
Corporate debt securities	$ 1,588	$ —	$ 1,588	$ —
U.S. treasury notes	388	388	—	—
Government-sponsored enterprise securities (GSEs)	253	253	—	—
Municipal securities	141	—	141	—
Asset-backed securities	117	—	117	—
Certificates of deposit	37	—	37	—
Subtotal - current investments	2,524	641	1,883	—
Corporate debt securities	101	—	101	—
U.S. treasury notes	68	68	—	—
Subtotal - current restricted investments	169	68	101	—
1.125% Call Option derivative asset	522	—	—	522
Total assets measured at fair value on a recurring basis	$ 3,215	$ 709	$ 1,984	$ 522
1.125% Conversion Option derivative liability	$ 522	$ —	$ —	$ 522
Total liabilities measured at fair value on a recurring basis	$ 522	$ —	$ —	$ 522

Our financial instruments measured at fair value on a recurring basis at December 31, 2016, were as follows:

	Total	Level 1	Level 2	Level 3
		(In millions)		
Corporate debt securities	$ 1,179	$ —	$ 1,179	$ —
U.S. treasury notes	84	84	—	—
GSEs	231	231	—	—
Municipal securities	142	—	142	—
Asset-backed securities	69	—	69	—
Certificates of deposit	53	—	53	—
Subtotal - current investments	1,758	315	1,443	—
1.125% Call Option derivative asset	267	—	—	267
Total assets measured at fair value on a recurring basis	$ 2,025	$ 315	$ 1,443	$ 267
1.125% Conversion Option derivative liability	$ 267	$ —	$ —	$ 267
Total liabilities measured at fair value on a recurring basis	$ 267	$ —	$ —	$ 267

There were no current restricted investments as of December 31, 2016.

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted market prices for similar securities in active markets or quoted prices for identical securities in inactive markets. The carrying amount and estimated fair value of the amount due under our Credit Facility is classified as a Level 3 financial instrument, because certain inputs used to determine its fair value are not observable. As of December 31, 2017, the carrying value of the amount due under the Credit Facility approximates it fair value because of the recency of this borrowing during the third quarter of 2017.

	December 31, 2017		December 31, 2016	
	Carrying Value	Fair Value	Carrying Value	Fair Value
		(In millions)		
5.375% Notes	$ 692	$ 730	$ 691	$ 714
1.125% Convertible Notes	496	1,052	471	792
4.875% Notes	325	329	—	—
Credit Facility	300	300	—	—
1.625% Convertible Notes	157	220	284	344
	$ 1,970	$ 2,631	$ 1,446	$ 1,850

5. Investments

We consider all of our investments, and our restricted investments that are classified as current assets, to be available-for-sale. As described further in Note 11, “Debt,” we maintain certain funds from the issuance of our 4.875% Notes in a segregated deposit account, a current asset reported as “Restricted investments” in the accompanying consolidated balance sheets. Such investments, while restricted as to their use and held in a segregated deposit account, are classified as available-for-sale based upon our contractual liquidity requirements.

The following tables summarize our investments as of the dates indicated:

	December 31, 2017			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In millions)		
Corporate debt securities	$ 1,591	$ 1	$ 4	$ 1,588
U.S. Treasury notes	389	—	1	388
GSEs	255	—	2	253
Municipal securities	142	—	1	141
Asset-backed securities	117	—	—	117
Certificates of deposit	37	—	—	37
Subtotal - current investments	2,531	1	8	2,524
Corporate debt securities	101	—	—	101
U.S. treasury notes	68	—	—	68
Subtotal - restricted investments, current	169	—	—	169
	$ 2,700	$ 1	$ 8	$ 2,693

	December 31, 2016			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In millions)		
Corporate debt securities	$ 1,180	$ 1	$ 2	$ 1,179
U.S. treasury notes	84	—	—	84
GSEs	232	—	1	231
Municipal securities	143	—	1	142
Asset-backed securities	69	—	—	69
Certificates of deposit	53	—	—	53
	$ 1,761	$ 1	$ 4	$ 1,758

There were no current restricted investments as of December 31, 2016.

The contractual maturities of our available-for-sale investments as of December 31, 2017 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 1,722	$ 1,721
Due after one year through five years	972	966
Due after five years through ten years	6	6
	$ 2,700	$ 2,693

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the years ended December 31, 2017, 2016 and 2015 were insignificant.

We have determined that unrealized losses at December 31, 2017 and 2016 are temporary in nature, because the change in market value for these securities resulted from fluctuating interest rates, rather than a deterioration of the creditworthiness of the issuers. So long as we maintain the intent and ability to hold these securities to maturity, we are unlikely to experience losses. In the event that we dispose of these securities before maturity, we expect that realized losses, if any, will be insignificant.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of December 31, 2017.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 1,297	$ 3	561	$ 94	$ 1	69
U.S. Treasury notes	470	1	89	—	—	—
GSEs	173	1	69	95	1	47
Municipal securities	—	—	—	38	1	48
	$ 1,940	$ 5	719	$ 227	$ 3	164

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of December 31, 2016.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 542	$ 2	378	$ —	$ —	—
GSEs	198	1	73	—	—	—
Municipal securities	101	1	129	—	—	—
	$ 841	$ 4	580	$ —	$ —	—

6. Receivables

Receivables consist primarily of amounts due from government Medicaid agencies, which may be subject to potential retroactive adjustments. Because all of our receivable amounts are readily determinable and substantially all of our creditors are governmental authorities, our allowance for doubtful accounts is insignificant. Any amounts determined to be uncollectible are charged to expense when such determination is made. The information below is presented by segment.

	December 31,	
	2017	2016
	(In millions)	
California	$ 208	$ 180
Florida	42	97
Illinois	91	134
Michigan	56	60
New Mexico	71	57

Total Health Plans segment	797	887
Molina Medicaid Solutions segment	30	34
Other segment	44	53
	$ 871	$ 974

7. Property, Equipment, and Capitalized Software, Net

Property and equipment are stated at historical cost. Replacements and major improvements are capitalized, and repairs and maintenance are charged to expense as incurred. Furniture and equipment are generally depreciated using the straight-line method over estimated useful lives ranging from three to seven years. Software developed for internal use is capitalized. Software is generally amortized over its estimated useful life of three years. Leasehold improvements are amortized over the term of the lease, or over their useful lives from five to 10 years, whichever is shorter. Buildings are depreciated over their estimated useful lives of 31.5 to 40 years.

The costs associated with certain of our Molina Medicaid Solutions segment equipment and software are capitalized and recorded as deferred contract costs. Such costs are amortized on a straight-line basis over the shorter of the useful life or the contract period, and the amortization is recorded within the heading “Cost of service revenue.”

A summary of property, equipment, and capitalized software is as follows:

	December 31,	
	2017	2016
	(In millions)	
Capitalized software	$ 417	$ 443
Furniture and equipment	289	301
Building and improvements	161	159
Land	16	16
	883	919
Less: accumulated amortization - capitalized software	(308)	(259)
Less: accumulated depreciation and amortization - building and improvements, furniture and equipment	(233)	(206)
	(541)	(465)
Property, equipment, and capitalized software, net	$ 342	$ 454

The following table presents all depreciation and amortization recorded in our consolidated statements of operations, whether the item appears as depreciation and amortization, or as cost of service revenue.

	Year Ended December 31,		
	2017	2016	2015
	(In millions)		
Recorded in depreciation and amortization:			
Amortization of capitalized software	$ 64	$ 62	$ 37
Depreciation of property and equipment	42	45	50
Amortization of intangible assets	31	32	17
	137	139	104
Recorded in cost of service revenue:			
Amortization of capitalized software	28	22	15
Amortization of deferred contract costs	13	21	6
	41	43	21
Other	—	—	1
	$ 178	$ 182	$ 126

8. Goodwill and Intangible Assets, Net

Goodwill

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations. Goodwill is not amortized, but is tested for impairment on an annual basis and more frequently if impairment indicators are present. When testing goodwill for impairment, we may first assess qualitative factors, such as industry and market factors, cost factors, and changes in overall performance, to determine if it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value. If our qualitative assessment indicates that it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value, we perform the quantitative assessment. We may also elect to bypass the qualitative assessment and proceed directly to the quantitative assessment.

We estimated the fair values of our reporting units using the higher of the income approach using discounted cash flows, or the asset liquidation method. For the annual impairment test, the base year in the reporting units' discounted cash flows is derived from the most recent annual financial budgeting cycle, for which the planning process commences in the fourth quarter of the year. When computing discounted cash flows, we make assumptions about a wide variety of internal and external factors, and consider what the reporting unit's selling price would be in an orderly transaction between market participants at the measurement date. Significant assumptions include financial projections of free cash flow (including significant assumptions about operations,

capital requirements and income taxes), long-term growth rates for determining terminal value beyond the discretely forecasted periods, and discount rates. When determining the discount rate, we consider the overall level of inherent risk of the reporting unit, and the expected rate an outside investor would expect to earn. The asset liquidation method is computed as total assets minus total liabilities, excluding intangible assets and liabilities.

We apply the market approach for certain reporting units to reconcile the value of all of our reporting units to our consolidated market value. Under the market approach, we consider publicly traded comparable company information to determine revenue and earnings multiples which are used to estimate our reporting units' fair values.

Goodwill is impaired if the carrying amount of the reporting unit exceeds its estimated fair value. This excess is recorded as an impairment loss, and adjusted if necessary for the impact of tax deductible goodwill. The loss recognized may not exceed the total goodwill allocated to the reporting unit.

The following table presents the changes in the carrying amounts of goodwill for the year ended December 31, 2017. The 2017 goodwill impairment losses are recorded to the segments as indicated in following table, and reported as "Impairment losses" in the accompanying consolidated statements of operations.

	Health Plans	Molina Medicaid Solutions	Other	Total
		(In millions)		
Historical goodwill	$ 445	$ 71	$ 162	$ 678
Accumulated impairment losses at December 31, 2016	(58)	—	—	(58)
Balance, December 31, 2016	387	71	162	620
Impairment losses, year ended December 31, 2017	(244)	(28)	(162)	(434)
Balance, December 31, 2017	$ 143	$ 43	$ —	$ 186
Accumulated impairment losses at December 31, 2017	$ 302	$ 28	$ 162	$ 492

2017 Impairment Analysis

Health Plans Segment

On February 1, 2018, we were selected by the Florida Agency for Health Care Administration (AHCA) to negotiate for the award of a managed care contract in only one region of Florida. That region—Region 11—comprises Miami-Dade and Monroe counties, where we currently serve 59,000 Medicaid members. As of December 31, 2017, we served approximately 360,000 Medicaid members in Florida, which represented approximately $1,486 million premium revenue for the year ended December 31, 2017. Because we expect the Florida health plan to have significantly reduced cash flows following the contract termination currently expected on December 31, 2018, its entire goodwill balance was impaired, amounting to $124 million, in the fourth quarter of 2017.

In January 2018, our New Mexico health plan was notified by the New Mexico Human Services Department (HSD) that the health plan had not been selected for the tentative award of a Medicaid contract effective January 1, 2019. As of December 31, 2017, we served approximately 224,000 Medicaid members in New Mexico, which represented approximately $1,205 million premium revenue for the year ended December 31, 2017. Because we do not expect the New Mexico health plan to have cash flows following the contract termination currently expected on December 31, 2018, its entire goodwill balance was impaired, amounting to $74 million, in the fourth quarter of 2017.

When we conducted the annual impairment evaluation of the goodwill of our Illinois health plan, the plan's future cash flow projections were insufficient to produce an estimated fair value in excess of its carrying amount. This was primarily due to the Illinois health plan's current profit profile, which does not support the purchase prices paid for certain membership acquired years ago. As a result, we recorded a goodwill impairment loss of approximately $45 million in the fourth quarter of 2017. When we conducted the annual impairment evaluation of the goodwill of our New York health plan, the plan's future cash flow projections were insufficient to produce an estimated fair value in excess of its carrying amount. As a result, we recorded goodwill impairment losses amounting to $1 million in the fourth quarter of 2017.

Molina Medicaid Solutions Segment

As described in Note 15, "Restructuring and Separation Costs," in the third quarter of 2017 we wrote off certain costs capitalized at our Molina Medicaid Solutions segment that supported our Health Plans segment provider information management processes. Although the intercompany revenues recorded by Molina Medicaid Solutions under this arrangement were insignificant on a consolidated basis, the termination of such revenue resulted in a

triggering event for an interim goodwill impairment analysis of this reporting unit in the third quarter of 2017. In the Molina Medicaid Solutions' discounted cash flow model, we incorporated significant estimates and assumptions related to future periods, such as intercompany business support opportunities and prospects for new Medicaid management information systems contracts. Because management has determined that Molina Medicaid Solutions will provide fewer future benefits for its support of the Health Plans segment, the test resulted in a fair value less than Molina Medicaid Solutions' carrying amount; therefore, we recorded a goodwill impairment loss for the difference, or $28 million, in the third quarter of 2017.

Other Segment

In the course of developing the 2017 Restructuring Plan in the second quarter of 2017, we determined that future benefits to be derived from our Pathways subsidiary, including the integration of its operations with our Health Plans segment, would be less than previously anticipated. In addition, poorer than expected year-to-date operating results, as well as lower projections of operating results for periods in the near term at our Pathways subsidiary, led us to conclude that a triggering event for an interim impairment analysis had occurred in the second quarter of 2017. Further, in the third quarter of 2017, management determined that Pathways will not provide future benefits relating to the integration of its operations with the Health Plans segment to the extent previously expected. Therefore, we conducted an additional interim impairment analysis.

We estimated Pathways' fair value using discounted cash flows, incorporating significant estimates and assumptions related to future periods. Such estimates included anticipated client census which drives service revenue; the likelihood of future benefits to be derived from Pathways (including integration with our health plans); current prospects relating to the behavioral services labor market which drives cost of service revenue; and anticipated capital expenditures. The tests in each of the quarters ended June 30, 2017, and September 30, 2017, resulted in a fair value less than Pathways' carrying amount; therefore, we recorded impairment losses for the difference. The Pathways goodwill impairment losses amounted to $101 million in the third quarter of 2017, and $59 million in the second quarter of 2017. In the second quarter of 2017, we also recorded a goodwill impairment loss of $2 million for a separate subsidiary in the Other segment.

2016 and 2015 Impairment Analysis

No impairment charges relating to goodwill were recorded in the years ended December 31, 2016, and 2015.

Intangible Assets, Net

Finite-lived, separately-identified intangible assets acquired in business combinations are assets that represent future expected benefits but lack physical substance (such as purchased contract rights and provider contracts). Intangible assets are initially recorded at fair value and are then amortized on a straight-line basis over their expected useful lives, generally between five and 15 years.

Our intangible assets are subject to impairment tests when events or circumstances indicate that a finite-lived intangible asset's (or asset group's) carrying value may not be recoverable. Consideration is given to a number of potential impairment indicators, including the ability of our health plan subsidiaries to obtain the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that these contracts will continue to be renewed.

Following the identification of any potential impairment indicators, to determine whether an impairment exists, we would compare the carrying amount of a finite-lived intangible asset with the greater of the undiscounted cash flows that are expected to result from the use of the asset or related group of assets, or its value under the asset liquidation method. If it is determined that the carrying amount of the asset is not recoverable, the amount by which the carrying value exceeds the estimated fair value is recorded as an impairment.

Based on the balances of our identifiable intangible assets as of December 31, 2017, we estimate that our intangible asset amortization will be $21 million in 2018, $18 million in 2019, $14 million in 2020, $5 million in 2021, and $3 million in 2022. For a presentation of our goodwill and intangible assets by reportable segment, refer to Note 20, "Segment Information."

The following table provides the details of identified intangible assets, by major class, for the periods indicated:

	Cost	Accumulated Amortization	Carrying Amount
		(In millions)	
Intangible assets:			
Contract rights and licenses	$ 201	$ 141	$ 60
Provider networks	20	11	9
Balance at December 31, 2017	$ 221	$ 152	$ 69
Intangible assets:			
Contract rights and licenses	$ 267	$ 148	$ 119
Customer relationships	25	24	1
Provider networks	34	14	20
Balance at December 31, 2016	$ 326	$ 186	$ 140

2017 Impairment Analysis

During 2017, we noted the impairment indicators described above for the Florida health plan, New Mexico health plan, and Pathways.

Health Plans Segment

In the fourth quarter of 2017, prior to the goodwill impairment test noted above, we assessed the Florida health plan's primary definite-lived intangible assets (contract rights and provider networks) for impairment, using undiscounted cash flows expected over the asset's remaining useful life. Such undiscounted cash flows indicated impairment; therefore, the plan's estimated fair value, determined as noted above, indicated that its carrying amount exceeded its fair value. This resulted in impairment losses of $15 million in the fourth quarter of 2017.

In the fourth quarter of 2017, prior to the goodwill impairment test noted above, we assessed the New Mexico health plan's primary definite-lived intangible asset (contract rights) for impairment, using undiscounted cash flows expected over the asset's remaining useful life. Such undiscounted cash flows indicated impairment; therefore, the plan's estimated fair value, determined as noted above, indicated that its carrying amount exceeded its fair value. This resulted in impairment losses of $10 million in the fourth quarter of 2017.

Other Segment

In the second quarter of 2017, prior to the goodwill impairment tests noted above, we assessed Pathways' definite-lived intangible assets (customer relationships and contract licenses) for impairment, using undiscounted cash flows expected over the longest remaining useful life of the assets tested. Such undiscounted cash flows indicated impairment; therefore, Pathways' estimated fair value, determined as noted above, indicated that its carrying amount exceeded its fair value. This resulted in impairment losses of $11 million in the second quarter of 2017.

2016 and 2015 Impairment Analysis

No significant impairment charges relating to long-lived assets, including intangible assets, were recorded in the years ended December 31, 2016, and 2015.

9. Restricted Investments, Non-current

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by government authorities primarily in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. The use of these funds is limited as required by regulation in the various states in which we operate, or as needed in the event of insolvency of capitated providers. Therefore, such investments are reported as non-current "Restricted investments" in the accompanying consolidated balance sheets. We have the ability to hold these restricted investments until maturity, and as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. The following table presents the balances of restricted investments:

	December 31,	
	2017	2016
	(In millions)	
Florida	$ 31	$ 22
New Mexico	43	43
Ohio	12	12
Puerto Rico	10	10
Other	23	23
Total Health Plans segment	$ 119	$ 110

The contractual maturities of our held-to-maturity restricted investments, which are carried at amortized cost, which approximates fair value, as of December 31, 2017 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 115	$ 115
Due after one year through five years	4	4
	$ 119	$ 119

10. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated.

	December 31,		
	2017	2016	2015
	(In millions)		
Fee-for-service claims incurred but not paid (IBNP)	$ 1,717	$ 1,352	$ 1,191
Pharmacy payable	112	112	88
Capitation payable	67	37	140
Other	296	428	266
	$ 2,192	$ 1,929	$ 1,685

“Other” medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various government agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of operations. Non-risk provider payables amounted to $122 million, $225 million and $167 million, as of December 31, 2017, 2016 and 2015, respectively.

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts presented for “Components of medical care costs related to: Prior periods” represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were less (more) than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year Ended December 31,		
	2017	2016	2015
	(In millions)		
Medical claims and benefits payable, beginning balance	$ 1,929	$ 1,685	$ 1,201
Components of medical care costs related to:			
Current period	17,037	14,966	11,935
Prior periods	36	(192)	(141)
Total medical care costs	17,073	14,774	11,794
Change in non-risk provider payables	(106)	58	48
Payments for medical care costs related to:			
Current period	15,130	13,304	10,448
Prior periods	1,574	1,284	910
Total paid	16,704	14,588	11,358
Medical claims and benefits payable, ending balance	$ 2,192	$ 1,929	$ 1,685

Reinsurance recoverables of $16 million, $61 million, and $46 million, as of December 31, 2017, 2016, and 2015, respectively, are included in "Receivables" in the accompanying consolidated balance sheets.

The following tables provide information about incurred and paid claims development as of December 31, 2017, as well as cumulative claims frequency and the total of incurred but not paid claims liabilities. The cumulative claim frequency is measured by claim event, and includes claims covered under capitated arrangements.

	Incurred Claims and Allocated Claims Adjustment Expenses				
Benefit Year	2015 (1)	2016	2017	Total IBNP	Cumulative number of reported claims
			(In millions)		
2015	$ 12,113	$ 11,928	$ 11,939	$ 6	84
2016		15,064	15,093	46	109
2017			17,037	1,665	114
			$ 44,069	$ 1,717	

	Cumulative Paid Claims and Allocated Claims Adjustment Expenses		
Benefit Year	2015 (1)	2016	2017
		(In millions)	
2015	$ 10,615	$ 11,906	$ 11,932
2016		13,403	14,952
2017			15,130
			$ 42,014

The following table represents a reconciliation of claims development to the aggregate carrying amount of the liability for medical claims and benefits payable.

	2017
	(In millions)
Incurred claims and allocated claims adjustment expenses	$ 44,069
Less: cumulative paid clams and allocated claims adjustment expenses	(42,014)
Non-risk provider payables and other	137
Medical claims and benefits payable	$ 2,192

(1) Data presented for this calendar year is required supplementary information, which is unaudited.

That portion of our total medical claims and benefits payable liability that is most subject to variability in the estimate is IBNP. Our IBNP, as included in medical claims and benefits payable, represents our best estimate of the total

amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors.

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Indeed, the amount we paid out during 2017 in satisfaction of our liability for medical claims and benefits payable at December 31, 2016, was in excess of the amount originally accrued. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate—we only know when the circumstances for any one or more factors are out of the ordinary.

The use of a consistent methodology (including a consistent provision for adverse claims development) in estimating our liability for medical claims and benefits payable minimizes the degree to which the overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period.

Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. For example, any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate, to the extent that replenishment of reserves is not equal to the benefit recognized due to the absence of adverse development.

Conversely, in the presence of adverse claims development, the financial impact of recording claims expense in the current period that is related to dates of service in the prior period will be compounded by the need to replenish the provision for adverse development.

As noted above, the amounts ultimately paid out in 2017 for dates of service in 2016 and prior were in excess of the liability we had established for medical and claims and benefits payable at December 31, 2016. In contrast, the amounts we paid out for prior period dates of service in 2016 and 2015 were less than the liabilities we had established at the end of the previous years. In all three years, the differences between our original estimates and the amounts ultimately paid out for the most part related to IBNP. While many related factors working in conjunction with one another serve to determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

2017

We recognized unfavorable prior period claims development in the amount of $36 million for the year ended December 31, 2017. This amount represented the extent to which our initial estimate of medical claims and benefits payable at December 31, 2016, was less than the amount that was ultimately paid out in satisfaction of that liability; but does not include additional amounts expensed to re-establish the margin for adverse development. We believe this underestimation was due primarily to the following:

- Inaccurate adjudication of provider claims at our Florida, Illinois, New Mexico and Puerto Rico health plans that created substantial payment backlogs which we were unable to adequately measure when we estimated our liability at December 31, 2016.

We believe that the most significant uncertainties relating to our estimated IBNP liability at December 31, 2017, are as follows:

- At our Florida health plan, the inventory of unpaid claims increased significantly during the first two quarters of 2017, then dropped in the third quarter and fourth quarters of 2017. Changes in claim inventories impact the timing between dates of service and the dates claims are paid, making our liability estimates subject to more than the usual amount of uncertainty.
- At our Illinois health plan, in 2017 we paid a large number of claims that had previously been denied and were subsequently disputed by providers. We have also established a liability for additional expected claims

resulting from provider disputes. This has created some distortion in the claims payment patterns, making our liability estimates subject to more than the usual amount of uncertainty.

- At our California health plan, adjustments to our inpatient authorization process have improved the timeliness of paying inpatient claims, making our liability estimates subject to more than the usual amount of uncertainty.
- In 2017 we implemented a new process for increased quality review of claims payments in six of our health plans. While we do not anticipate this new process will impact the percentage of claims paid within the timely turnaround requirements, we believe it will have a minor impact on the timing of some paid claims. For this reason, our liability estimates in the six health plans are subject to more than the usual amount of uncertainty.
- At our Puerto Rico health plan, Hurricane Maria had a significant impact on both utilization of services and our ability to process claims payments in Puerto Rico. For these reasons, we believe our liability estimates are subject to more than the usual amount of uncertainty.
- December 2017 data from the Centers for Disease Control and Prevention have indicated widespread influenza activity in several states in which we operate health plans. Although we have established liabilities for additional expected claims related to influenza, our liability estimates are subject to more than the usual amount of uncertainty.

2016

We recognized favorable prior period claims development in the amount of $192 million for the year ended December 31, 2016. This amount represented the extent to which our initial estimate of medical claims and benefits payable at December 31, 2015, was more than the amount that was ultimately paid out in satisfaction of that liability. We believe this overestimation was due primarily to the following:

- A new version of diagnostic codes was required for all claims with dates of service on October 1, 2015, and later. As a result, payment was delayed or denied for a significant number of claims due to provider submission of claims with diagnostic codes that were no longer valid. Once providers were able to submit claims with the correct diagnostic codes, our actual costs were ultimately less than expected.
- At our New Mexico health plan, we overestimated the impact of several pending high-dollar claims, and our actual costs were ultimately less than expected.
- At our Washington health plan, we overpaid certain outpatient facility claims in 2015 when the state converted to a new payment methodology. We did not include an estimate in our December 31, 2015, reserves for this potential recovery.
- At our California health plan, we enrolled approximately 55,000 new Medicaid Expansion members in 2015. For these new members, our actual costs were ultimately less than expected.

2015

We recognized favorable prior period claims development in the amount of $141 million for the year ended December 31, 2015. This amount represented the extent to which our initial estimate of medical claims and benefits payable at December 31, 2014 was more than the amount that was ultimately paid out in satisfaction of that liability. We believe this overestimation was due primarily to the following:

- At our Ohio and California health plans, approximately 61,000 and 100,000 members, respectively, were enrolled in the new Medicaid expansion program during 2014. Also in Ohio, approximately 17,000 members were enrolled in the new MMP program in 2014. Because we lacked sufficient historical claims data, we initially estimated the reserves for these new members based upon a number of factors that included pricing assumptions provided by the state; our expectations regarding pent up demand; our beliefs about the speed at which new members would utilize health care services; and other factors. Our actual costs were ultimately less than expected.

- At our New Mexico health plan, the state implemented a retroactive increase to the provider fee schedules in mid-2014. As a result, many claims that were previously settled were reopened, and subject to, additional payment. Because our reserving methodology is most accurate when claims payment patterns are consistent and predictable, the payment of additional amounts on claims that in some cases had been settled more than six months before added a substantial degree of complexity to our liability estimation process. Due to the difficulties in addressing that added complexity, liabilities recorded as of December 31, 2014 were in excess of amounts ultimately paid.

- At our Washington health plan, we collected amounts in 2015 related to certain claims paid in 2013. Such collections were not anticipated in our reserves as of December 31, 2014.

11. Debt

As of December 31, 2017, contractual maturities of debt for the years ending December 31 were as follows. All amounts represent the principal amounts of the debt instruments outstanding.

	Total	2018	2019	2020	2021	2022	Thereafter
				(In millions)			
5.375% Notes	$ 700	$ —	$ —	$ —	$ —	$ 700	$ —
1.125% Convertible Notes	550	—	—	550	—	—	—
4.875% Notes	330	—	—	—	—	—	330
Credit Facility	300	—	—	—	—	300	—
1.625% Convertible Notes (1)	161	—	—	—	—	—	161
	$ 2,041	$ —	$ —	$ 550	$ —	$ 1,000	$ 491

(1) The 1.625% Convertible Notes have a contractual maturity date in 2044. However, on contractually specified dates beginning in 2018, holders may convert, or may require us to repurchase some or all of the 1.625% Convertible Notes.

Substantially all of our debt is held at the parent, which is reported in the Other segment. The following table summarizes our outstanding debt obligations and their classification in the accompanying consolidated balance sheets (in millions):

	December 31,	
	2017	2016
Current portion of long-term debt:		
1.125% Convertible Notes, net of unamortized discount	$ 499	$ 477
1.625% Convertible Notes, net of unamortized premium and discount	157	—
Lease financing obligations	1	1
Debt issuance costs	(4)	(6)
	653	472
Non-current portion of long-term debt:		
5.375% Notes	700	700
4.875% Notes	330	—
Credit Facility	300	—
1.625% Convertible Notes, net of unamortized premium and discount	—	286
Debt issuance costs	(12)	(11)
	1,318	975
Lease financing obligations	198	198
	$ 2,169	$ 1,645

Interest cost recognized relating to our convertible senior notes for the periods presented was as follows:

	Years Ended December 31,		
	2017	2016	2015
		(In millions)	
Contractual interest at coupon rate	$ 11	$ 11	$ 11
Amortization of the discount	32	30	29
	$ 43	$ 41	$ 40

Bridge Credit Agreement

In January 2018, we entered into a bridge credit agreement (Bridge Credit Agreement) with several banks. Under the Bridge Credit Agreement, the banks agreed to lend us up to $550 million to be used to: (i) satisfy conversions of our 1.125% Convertible Notes; (ii) satisfy and/or refinance indebtedness incurred to satisfy conversion of the 1.125% Convertible Notes; (iii) repay or refinance our Credit Facility; (iv) pay fees and expenses in connection with the foregoing; and, subject to the satisfaction of specified conditions, for general corporate purposes.

Borrowings under the Bridge Credit Agreement are reduced by the following:

- Any future debt and/or equity transactions:
    - Including term loans, but excluding any Credit Facility drawing; and
    - Excluding transactions with proceeds used for working capital purposes and acquisition financings up to $300 million.
- On August 1, 2018 (the put date for the 1.625% Convertible Notes), the Bridge Credit Agreement shall permanently be reduced by the greater of:
    - $150 million; and
    - The principal amount of the 1.625% Convertible Notes that are exchanged into equity prior to that date.

The Bridge Credit Agreement matures on January 1, 2019 and, subject to the satisfaction of certain conditions, we may elect to extend twice the initial maturity date by a period of six months each.

Borrowings under the Bridge Credit Agreement will bear interest based, at our election, at a base rate or an adjusted LIBOR rate, plus in each case the applicable margin. Our wholly owned subsidiaries that guarantee our obligations under the indenture governing the 4.875% Notes, the 5.375% Notes, and the Credit Facility have jointly and severally guaranteed our obligations under the Bridge Credit Agreement.

The Bridge Credit Agreement contains usual and customary (a) affirmative covenants for credit facilities of this type and substantially similar to those contained in the Credit Facility, (b) negative covenants consistent with those contained in the 4.875% Notes and (c) events of default for credit facilities of this type and substantially similar to those contained in the 4.875% Notes.

4.875% Notes due 2025

On June 6, 2017, we completed the private offering of $330 million aggregate principal amount of senior notes (4.875% Notes) due June 15, 2025, unless earlier redeemed. Interest on the 4.875% Notes is payable semiannually in arrears on June 15 and December 15. Certain of our wholly owned subsidiaries guarantee our obligations under the 4.875% Notes; subsidiary guarantors are defined under the Credit Facility, as described below. See Note 23, “Supplemental Condensed Consolidating Financial Information,” for more information on the guarantors. The 4.875% Notes contain customary non-financial covenants and change of control provisions. At December 31, 2017, we were in compliance with all covenants under the 4.875% Notes.

The 4.875% Notes and the guarantees described above are senior unsecured obligations of Molina and the guarantors, respectively, and rank equally in right of payment with all existing and future senior debt, and senior to all existing and future subordinated debt of Molina and the guarantors.

A portion of the proceeds from the issuance of the 4.875% Notes are required to be maintained in a segregated deposit account, which may be used as follows:

- On or prior to August 20, 2018, to:
    - Redeem, repurchase, repay, tender for, or acquire for value all or any portion of our 1.625% Convertible Notes, defined and discussed further below, or to satisfy the cash portion of any consideration due upon any conversion of the 1.625% Convertible Notes; and/or
    - Pay any interest due on all or any portion of the 4.875% Notes.
- On or after August 20, 2018, to repurchase all or any portion of the 1.625% Convertible Notes that we are obligated to repurchase; and
- Subsequent to August 20, 2018 (or such earlier date in the event that there are no longer any 1.625% Convertible Notes outstanding), in any other manner not otherwise prohibited in the indenture governing the 4.875% Notes.

The investments that constitute the segregated funds are current assets reported as “Restricted investments” in the accompanying consolidated balance sheets. As a result of the 1.625% Exchange transaction described below, approximately $157 million of such investments were transferred to unrestricted current investments in the fourth quarter of 2017. As of December 31, 2017, the balance of current restricted investments was $169 million.

5.375% Notes due 2022

We have outstanding $700 million aggregate principal amount of senior notes (5.375% Notes) due November 15, 2022, unless earlier redeemed. Interest on the 5.375% Notes is payable semiannually in arrears on May 15 and November 15. Certain of our wholly owned subsidiaries guarantee our obligations under the 5.375% Notes; subsidiary guarantors are defined under the Credit Facility, as described below. The 5.375% Notes contain customary non-financial covenants and change in control provisions. At December 31, 2017, we were in compliance with all covenants under the 5.375% Notes.

The 5.375% Notes and the guarantees described above are senior unsecured obligations of Molina and the guarantors, respectively, and rank equally in right of payment with all existing and future senior debt, and senior to all existing and future subordinated debt of Molina and the guarantors.

Credit Facility

In January 2017, we entered into an amended unsecured $500 million revolving credit facility (Credit Facility), referred to as the First Amendment. The Credit Facility has a term of five years and all amounts outstanding will be due and payable on January 31, 2022. As of December 31, 2017, $300 million was outstanding under the Credit Facility. Also as of December 31, 2017, outstanding letters of credit amounting to $6 million reduced our remaining borrowing capacity under the Credit Facility to $194 million.

Borrowings under our Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Credit Facility, we are required to pay a quarterly commitment fee. The Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. As of December 31, 2017, we were in compliance with all financial and non-financial covenants under the Credit Facility.

During 2017, we entered into several amendments to the Credit Facility which provided for, or modified the following:

- Automatic and unconditional release of all subsidiaries that were guarantors immediately prior to January 3, 2017, from their obligations as guarantors, other than Molina Information Systems, LLC, d/b/a Molina Medicaid Solutions, Molina Pathways, LLC, and Pathways Health and Community Support LLC;
- The definition of the earnings measure used in the financial covenant computations;
- The definition of specified cash, to permit cash that is either subject to customary escrow arrangements or held in a segregated account to be netted from the Credit Facility’s consolidated net leverage ratio if the use of the cash is limited to the repayment of other indebtedness;
- The definition of consolidated adjusted EBITDA, to permit the add-back of certain restructuring charges and cost savings subject to certain limitations, and the definition of the consolidated interest coverage ratio to include, when calculating such ratio, consolidated interest expense “paid in cash” only; and
- The list of indebtedness exceptions to include the new Bridge Credit Agreement discussed above.

1.125% Cash Convertible Senior Notes due 2020

We have outstanding $550 million aggregate principal amount of 1.125% cash convertible senior notes due January 15, 2020 (1.125% Convertible Notes), unless earlier repurchased or converted. Interest is payable semiannually in arrears on January 15 and July 15. The 1.125% Convertible Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Convertible Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The 1.125% Convertible Notes are convertible only into cash, and not into shares of our common stock or any other securities. The initial conversion rate for the 1.125% Convertible Notes is 24.5277 shares of our common stock per $1,000 principal amount, or approximately $40.77 per share of our common stock. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of

1.125% Convertible Notes, equal to the settlement amount, determined in the manner set forth in the indenture. We may not redeem the 1.125% Convertible Notes prior to the maturity date. Holders may convert their 1.125% Convertible Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;
- during the five business day period immediately after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;
- upon the occurrence of specified corporate events; or
- at any time on or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date.

The stock price trigger for the 1.125% Convertible Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended December 31, 2017; therefore, they are convertible into cash and are reported in current portion of long-term debt as of December 31, 2017.

The 1.125% Convertible Notes contain an embedded cash conversion option (the 1.125% Conversion Option), which was separated from the 1.125% Convertible Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the 1.125% Conversion Option settles or expires. The initial fair value liability of the 1.125% Conversion Option simultaneously reduced the carrying value of the 1.125% Convertible Notes (effectively an original issuance discount). This discount is amortized to the 1.125% Convertible Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Convertible Notes at an effective rate of approximately 6%. As of December 31, 2017, the 1.125% Convertible Notes have a remaining amortization period of 2.0 years. The 1.125% Convertible Notes' if-converted value exceeded their principal amount by approximately $406 million and $182 million as of December 31, 2017 and December 31, 2016, respectively.

1.625% Convertible Senior Notes due 2044

In December 2017, we entered into separate, privately negotiated, synthetic exchange agreements (1.625% Exchange) with certain holders of our outstanding 1.625% convertible senior notes due 2044 (1.625% Convertible Notes). In this transaction, we exchanged $141 million aggregate principal amount and accrued interest for 2.6 million shares of our common stock. We recorded a loss on debt extinguishment, including transaction fees, of $14 million, for the transaction, primarily relating to the inducement premium paid to the bondholders, which is recorded in "Other expenses, net," in the accompanying consolidated statement of operations. We did not receive any proceeds under the 1.625% Exchange.

Following the 1.625% Exchange, we have outstanding $161 million aggregate principal amount of the 1.625% Convertible Notes. Interest is payable semiannually in arrears on February 15 and August 15. In addition, beginning with the semiannual interest period commencing immediately following the interest payment date on August 15, 2018, contingent interest will accrue on the 1.625% Convertible Notes during any semiannual interest period in which certain conditions or events occur, or under certain events of default. For example, additional interest of 0.25% per year will be payable on the 1.625% Notes for any semiannual interest period for which the principal amount of 1.625% Convertible Notes outstanding is less than $100 million.

The 1.625% Convertible Notes are senior unsecured obligations and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.625% Notes; equal in right of payment to any of our unsecured indebtedness that is not subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities of our subsidiaries.

The initial conversion rate for the 1.625% Convertible Notes is 17.2157 shares of our common stock per $1,000 principal amount, or approximately $58.09 per share of our common stock. Upon conversion, we will pay cash and, if applicable, deliver shares of our common stock to the converting holder in an amount per $1,000 principal amount of 1.625% Notes equal to the settlement amount (as defined in the related indenture).

Holders may convert their 1.625% Convertible Notes only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ended on September 30, 2014 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;
- during the five business day period after any five consecutive trading day period (the measurement period) in which the trading price per $1,000 principal amount of 1.625% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day;
- upon the occurrence of specified corporate events;
- if we call any 1.625% Notes for redemption, at any time until the close of business on the business day immediately preceding the redemption date;
- during the period from, and including, May 15, 2018 to the close of business on the business day immediately preceding August 19, 2018; or
- at any time on or after February 15, 2044 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.625% Notes, in integral multiples of $1,000 principal amount, at the option of the holder regardless of the foregoing circumstances.

The stock price trigger for the 1.625% Convertible Notes is $75.51 per share. The 1.625% Convertible Notes did not meet this stock price trigger in the quarter ended December 31, 2017. However, on contractually specified dates beginning in 2018, holders of the 1.625% Convertible Notes may require us to repurchase some or all of such notes. In addition, beginning May 15, 2018 until August 19, 2018, holders may convert some or all of the 1.625% Convertible Notes. Because of these put and conversion features, the 1.625% Convertible Notes are reported in current portion of long-term debt as of December 31, 2017. As noted above, because the proceeds from the 4.875% Notes are initially restricted to payments upon conversion or redemption of the 1.625% Convertible Notes, such restricted investments are also classified as current in the accompanying consolidated balance sheets.

We may not redeem the 1.625% Convertible Notes prior to August 19, 2018. On or after August 19, 2018, we may redeem for cash all or part of the 1.625% Convertible Notes, except for the 1.625% Convertible Notes we are required to repurchase in connection with a fundamental change or on any specified repurchase date. The redemption price for the 1.625% Convertible Notes will equal 100% of the principal amount of the 1.625% Convertible Notes being redeemed, plus accrued and unpaid interest. In addition, holders of the 1.625% Convertible Notes may require us to repurchase some or all of the 1.625% Convertible Notes for cash on August 19, 2018, August 19, 2024, August 19, 2029, August 19, 2034 and August 19, 2039, in each case, at a specified price equal to 100% of the principal amount of the 1.625% Convertible Notes to be repurchased, plus accrued and unpaid interest.

Because the 1.625% Convertible Notes are net share settled and have cash settlement features, we have allocated the principal amount between a liability component and an equity component. The reduced carrying value on the 1.625% Convertible Notes resulted in a debt discount that is amortized back to the 1.625% Convertible Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. The expected life of the debt is approximately four years, beginning on the issuance date and ending on the first date we may redeem the 1.625% Convertible Notes in August 2018. As of December 31, 2017, the 1.625% Convertible Notes have a remaining amortization period of 0.6 years. This has resulted in our recognition of interest expense on the 1.625% Convertible Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 5%. The outstanding 1.625% Convertible Notes' if-converted value exceeded their principal amount at December 31, 2017 by approximately $50 million, and did not exceed their principal amount at December 31, 2016. At December 31, 2017 and 2016, the equity component of the 1.625% Convertible Notes, including the impact of deferred taxes, was $12 million and $23 million, respectively.

Cross-Default Provisions

The terms of our 4.875% Notes, 5.375% Notes and each of the 1.125% and 1.625% Convertible Notes contain cross-default provisions with the Credit Facility that are triggered upon an event of default under the Credit Facility, and when borrowings under the Credit Facility equal or exceed certain amounts as defined in the related indentures.

Lease Financing Obligations

As a result of our continuing involvement in the leasing transactions described below, we are the "accounting owner" of the properties under the leases. The assets are therefore included in our consolidated balance sheets, and are depreciated over their remaining useful lives. The lease financing obligations are amortized over the initial lease terms, such that there will be no gain or loss recorded if the leases are not extended beyond their expiration dates. Payments under the leases adjust the lease financing obligations, and the imputed interest is recorded to interest expense in our consolidated statements of operations. Aggregate interest expense under these leases amounted to $17 million in each of the years ended December 31, 2017, 2016 and 2015. For information regarding the future minimum lease obligations, refer to Note 19, "Commitments and Contingencies."

Molina Center and Ohio Exchange. In 2013, we entered into a sale-leaseback transaction for the Molina Center and our Ohio health plan office building located in Columbus, Ohio, also known as the Ohio Exchange. The sale of these properties did not qualify for sales recognition, because certain lease terms resulted in our continuing involvement with these leased properties. Rent increases 3% per year through the initial term, which expires in 2038. The lease provides for six five-year renewal options, with renewal rent to be the higher of the 3% annual escalator or the then-fair market value.

6th and Pine. Also in 2013, we entered into a construction and lease transaction for two office buildings in Long Beach, California (6th and Pine). Due to our participation in the construction project, we retained continuing involvement in the properties. Rent increases 3.4% per year through the initial term, which expires in 2029. The lease provides for two five-year renewal options, with renewal rent to be determined based on the then-fair market value.

Debt Commitment Letter

In connection with the terminated Medicare acquisition described in Note 1, "Basis of Presentation," we entered into a debt commitment letter with Barclays Bank PLC (Barclays) in August 2016. Under this debt commitment letter, Barclays agreed to lend us up to $400 million, subject to satisfaction of certain conditions, including consummation of the terminated Medicare acquisition. The debt commitment letter automatically terminated in February 2017 upon termination of the Medicare acquisition.

12. Derivatives

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

		December 31,	
	Balance Sheet Location	2017	2016
		(In millions)	
Derivative asset:			
1.125% Call Option	Current assets: Derivative asset	$ 522	$ 267
Derivative liability:			
1.125% Conversion Option	Current liabilities: Derivative liability	$ 522	$ 267

Our derivative financial instruments do not qualify for hedge treatment; therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of operations, and reported in other income, net. Gains and losses from our derivative financial instruments are presented individually in the accompanying consolidated statements of cash flows, "Supplemental cash flow information."

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Convertible Notes in 2013, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Convertible Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Convertible Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Convertible Notes), these transactions are intended to offset cash payments in excess of the principal amount of the 1.125% Convertible Notes due upon any conversion of such notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 4, "Fair Value Measurements."

1.125% Conversion Option. The embedded cash conversion option within the 1.125% Convertible Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Conversion Option, refer to Note 4, "Fair Value Measurements."

As of December 31, 2017, the 1.125% Call Option and the 1.125% Conversion Option were classified as a current asset and current liability, respectively, because the 1.125% Convertible Notes may be converted within twelve months of December 31, 2017, as described in Note 11, "Debt."

13. Income Taxes

The (benefit) provision for income taxes is determined using an estimated annual effective tax rate, which generally differs from the U.S. federal statutory rate primarily because of state taxes, nondeductible expenses such as the HIF, goodwill impairment, certain compensation, and other general and administrative expenses. The effective tax rate was not impacted by the HIF in 2017, given the 2017 HIF moratorium. The effective tax rate may be subject to fluctuations during the year, particularly as a result of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The Tax Cuts and Jobs Act (TCJA) was enacted on December 22, 2017. The TCJA, in part, reduces the U.S. federal corporate tax rate from 35% to 21% effective January 1, 2018. TCJA's change in the federal rate requires that we revalue deferred tax assets and liabilities based on the rates at which they are expected to reverse in the future, which is generally the new 21% federal corporate tax rate plus applicable state tax rate. At December 31, 2017, we have not completed our accounting for the tax effects of enactment of the TCJA; however, we have made a reasonable estimate of the effects on our existing deferred tax balances and we recognized a provisional deferred federal income tax expense of $54 million, which is included as a reduction of income tax benefit for the year ended December 31, 2017. We will continue to make and refine our calculations as additional analysis is completed. In addition, our estimates may also be affected as we gain a more thorough understanding of the tax law based on expected future guidance from the Internal Revenue Service and U.S. Treasury.

The (benefit) provision for income taxes consisted of the following:

	Year Ended December 31,		
	2017	2016	2015
	(In millions)		
Current:			
Federal	$ (9)	$ 134	$ 172
State	3	3	8
Foreign	—	(6)	6
Total current	(6)	131	186
Deferred:			
Federal	(85)	19	(10)
State	(9)	2	4
Foreign	—	1	(1)
Total deferred	(94)	22	(7)
	$ (100)	$ 153	$ 179

In 2017, the income tax benefit of $100 million is net of $54 million in deferred income tax expense as a result of the revaluation of net deferred tax assets in connection with the TCJA.

A reconciliation of the U.S. federal statutory income tax rate to the combined effective income tax rate is as follows:

	Year Ended December 31,		
	2017	2016	2015
Statutory federal tax (benefit) rate	(35.0)%	35.0 %	35.0%
State income provision (benefit), net of federal	(0.7)	1.6	2.4
Nondeductible health insurer fee (HIF)	—	37.0	17.0
Nondeductible compensation	2.8	3.1	0.6
Nondeductible goodwill impairment	6.6	—	—
Revaluation of net deferred tax assets	8.8	—	—
Change in purchase agreement that increased tax basis in assets	—	(2.2)	—
Other	1.1	0.3	0.5
Effective tax (benefit) rate	(16.4)%	74.8 %	55.5%

Our effective tax rate is based on expected (loss) income, statutory tax rates, and tax planning opportunities available to us in the various jurisdictions in which we operate. Significant management estimates and judgments are required in determining our effective tax rate. We are routinely under audit by federal, state, or local authorities regarding the timing and amount of deductions, nexus of income among various tax jurisdictions, and compliance with federal, state, foreign, and local tax laws.

During 2016, and 2015, excess tax benefits from share-based compensation amounted to $2 million and $8 million, respectively. These amounts were recorded as a decrease to income taxes payable and an increase to additional paid-in capital. Effective 2017, excess tax benefits are no longer recorded through additional paid-in capital but rather through the income statement as an income tax benefit pursuant to ASU 2016-09.

Deferred tax assets and liabilities are classified as non-current. Significant components of our deferred tax assets and liabilities as of December 31, 2017 and 2016 were as follows:

	December 31,	
	2017	2016
	(In millions)	
Accrued expenses	$ 15	$ 22
Reserve liabilities	11	28
Other accrued medical costs	16	5
Net operating losses	27	13
Fixed assets and intangibles	23	—
Unrealized losses	2	1
Unearned premiums	19	27
Lease financing obligation	30	38
Deferred compensation	1	6
Tax credit carryover	15	7
Valuation allowance	(41)	(16)
Total deferred income tax assets, net of valuation allowance	118	131
Prepaid expenses	(6)	(9)
Fixed assets and intangibles	—	(104)
Basis in debt	(9)	(23)
Total deferred income tax liabilities	(15)	(136)
Net deferred income tax asset (liability)	$ 103	$ (5)

At December 31, 2017, we had state net operating loss carryforwards of $578 million, which begin expiring in 2018.

At December 31, 2017, we had California research and development and enterprise zone tax credit carryovers of $14 million, which will begin to expire in 2024. In 2017, we generated federal research and development and other tax credit carryovers of $4 million, which will expire in 2038.

We evaluate the need for a valuation allowance taking into consideration the ability to carry back and carry forward tax credits and losses, available tax planning strategies and future income, including reversal of temporary

differences. We have determined that as of December 31, 2017, $41 million of deferred tax assets did not satisfy the recognition criteria due to uncertainty regarding the realization of some of our state net operating loss and credit carryforwards. Therefore, we increased our valuation allowance by $25 million, from $16 million at December 31, 2016, to $41 million as of December 31, 2017.

We recognize tax benefits only if the tax position is more likely than not to be sustained. We are subject to income taxes in the United States, Puerto Rico, and numerous state jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. These reserves are established when we believe that certain positions might be challenged despite our belief that our tax return positions are fully supportable. We adjust these reserves in light of changing facts and circumstances, such as the outcome of tax audits. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate.

The roll forward of our unrecognized tax benefits is as follows:

	Year Ended December 31,		
	2017	2016	2015
	(In millions)		
Gross unrecognized tax benefits at beginning of period	$ (11)	$ (9)	$ (3)
Increases in tax positions for current year	(1)	(1)	(1)
Increases in tax positions for prior years	(4)	(1)	(5)
Decreases in tax positions for prior years	3	—	—
Gross unrecognized tax benefits at end of period	$ (13)	$ (11)	$ (9)

The total amount of unrecognized tax benefits at December 31, 2017, 2016 and 2015 that, if recognized, would affect the effective tax rates is $12 million, $9 million, and $7 million, respectively. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $2 million due to the expiration of statutes of limitation.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. Amounts accrued for the payment of interest and penalties as of December 31, 2017, 2016 and 2015 were insignificant.

We may be subject to federal examination for calendar years 2014 through 2016. We are under examination, or may be subject to examination, in Puerto Rico and certain state and local jurisdictions, with the major state jurisdictions being California, Michigan, and Illinois for the years 2009 through 2016.

14. Stockholders' Equity

1.625% Exchange

As described in Note 11, “Debt,” we issued 2.6 million shares of our common stock in connection with the 1.625% Exchange in December 2017.

1.125% Warrants

In connection with the Call Spread Overlay transaction described in Note 12, “Derivatives,” in 2013, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period (beginning on April 15, 2020) under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock exceeds the applicable strike price of the 1.125% Warrants. Refer to Note 3, “Net (Loss) Income per Share,” for dilution information for the periods presented. We will not receive any additional proceeds if the 1.125% Warrants are exercised.

Share-Based Compensation

At December 31, 2017, we had employee equity incentives outstanding under our 2011 Equity Incentive Plan (2011 Plan). The 2011 Plan provides for the award of restricted shares and units, performance shares and units, stock options and stock bonuses to the company's officers, employees, directors, consultants, advisers, and other service providers. The 2011 Plan provides for the issuance of up to 4.5 million shares of common stock.

In connection with the 2011 Plan and employee stock purchase plan, approximately 857,000 shares of common stock were purchased or vested, net of shares used to settle employees' income tax obligations, during the year ended December 31, 2017.

Except as noted below, we record share-based compensation as "General and administrative expenses" in the accompanying consolidated statements of operations. Total share-based compensation expense was as follows:

	Year Ended December 31,					
	2017		2016		2015	
	(In millions)					
	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount
Restricted stock and performance awards	$ 39	$ 35	$ 20	$ 17	$ 19	$ 13
Employee stock purchase plan and stock options	7	5	6	5	4	3
	$ 46	$ 40	$ 26	$ 22	$ 23	$ 16

Restricted stock awards. Restricted stock awards are granted with a fair value equal to the market price of our common stock on the date of grant, and generally vest in equal annual installments over periods up to four years from the date of grant. We recognize expense for these awards on a straight-line basis. Stock option awards generally have an exercise price equal to the fair market value of our common stock on the date of grant, vest in equal annual installments over periods up to four years from the date of grant, and have a maximum term of ten years from the date of grant.

RSAs, PSAs and PSUs activity for the year ended December 31, 2017 is summarized below:

	Restricted Stock Awards	Performance Stock Awards	Performance Stock Units	Total Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2016	577,244	345,656	—	922,900	$ 58.15
Granted	395,946	—	231,100	627,046	57.34
Vested	(424,556)	(260,894)	(139,272)	(824,722)	57.78
Forfeited	(146,830)	—	—	(146,830)	53.89
Unvested balance as of December 31, 2017	401,804	84,762	91,828	578,394	$ 58.35

As of December 31, 2017, there was $19 million of total unrecognized compensation expense related to unvested restricted stock awards (RSAs), performance stock awards (PSAs) and performance stock units (PSUs), which we expect to recognize over a remaining weighted-average period of 2.2 years, 0.4 years and 1.6 years, respectively. This unrecognized compensation cost assumes an estimated forfeiture rate of 11.8% for non-executive employees as of December 31, 2017, which is based on actual forfeitures over the last 4 years. Also as of December 31, 2017, there was $15 million of total unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 2.8 years.

The total fair value of awards granted and vested is presented in the following table:

	Year Ended December 31,		
	2017	2016	2015
	(In millions)		
Granted:			
Restricted stock awards	$ 20	$ 19	$ 17
Performance stock awards	—	15	11
Performance stock units	16	—	—
	$ 36	$ 34	$ 28
Vested:			
Restricted stock awards	$ 23	$ 22	$ 23
Performance stock awards	15	—	16
Performance stock units	9	—	—
	$ 47	$ 22	$ 39

During the year ended December 31, 2017, the vesting of 133,957 RSAs, 153,574 PSAs and 139,272 PSUs was accelerated in connection with the termination of our former Chief Executive Officer (CEO) and former Chief Financial Officer (CFO) in May 2017. The incremental charge relating to this acceleration, or $23 million, is reported in “Restructuring and separation costs” in the accompanying consolidated statements of operations. This amount is included in the 2017 “Pretax Charges” in the table above. See Note 15, “Restructuring and Separation Costs” for further discussion.

Stock Options. Stock option activity for the year ended December 31, 2017 is summarized below:

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual term
			(In millions)	(Years)
Stock options outstanding as of December 31, 2016	90,000	$ 24.93		
Granted	375,000	67.33		
Exercised	(60,000)	20.88		
Stock options outstanding as of December 31, 2017	405,000	64.79	$ 5	9.5
Stock options exercisable and expected to vest as of December 31, 2017	405,000	64.79	$ 5	9.5
Exercisable as of December 31, 2017	30,000	33.02	$ 1	5.2

The weighted-average grant date fair value per share of stock options awarded in 2017 was $41.43. We estimate the fair value of each stock option award on the grant date using the Black-Scholes option pricing model. To determine the fair value of the stock options awarded in 2017 we applied a risk-free interest rate of 2.3%, expected volatility of 38.4%, dividend yield of 0% and expected life of 8.4 years. No stock options were granted in 2016 and 2015.

The total intrinsic value of options exercised during the years ended December 31, 2017, 2016, and 2015 was $2 million, $1 million, and $6 million, respectively. The following is a summary of information about stock options outstanding and exercisable at December 31, 2017:

	Options Outstanding			Options Exercisable	
	Number Outstanding	Weighted Average Remaining Contractual Life (Years)	Weighted-Average Exercise Price	Number Exercisable	Weighted-Average Exercise Price
Range of Exercise Prices					
$33.02	30,000	5.2	$ 33.02	30,000	$ 33.02
$67.33	375,000	9.9	67.33	—	—
	405,000			30,000	

Employee Stock Purchase Plan. Under our employee stock purchase plan (ESPP), eligible employees may purchase common shares at 85% of the lower of the fair market value of our common stock on either the first or last trading day of each six-month offering period. Each participant is limited to a maximum purchase of $25,000 (as measured by the fair value of the stock acquired) per year through payroll deductions. We estimate the fair value of the stock issued using the Black-Scholes option pricing model. For the years ended December 31, 2017, 2016, and 2015, the inputs to this model were as follows: risk-free interest rates of approximately 0.1% to 1.1%; expected volatilities ranging from approximately 30% to 40%, dividend yields of 0%, and an average expected life of 0.5 years. We issued approximately 351,000, 410,000 and 302,000 shares of our common stock under the ESPP during the years ended December 31, 2017, 2016, and 2015, respectively. The 2011 ESPP provides for the issuance of up to three million shares of common stock.

15. Restructuring and Separation Costs

Following a management-initiated, broad operational assessment in early 2017, designed to improve our profitability and expand our core Medicaid business, in June 2017, we accelerated the implementation of a comprehensive restructuring and profitability improvement plan (the 2017 Restructuring Plan). Under the 2017 Restructuring Plan, we have taken the following actions:

1. We have streamlined our organizational structure, including the elimination of redundant layers of management, the consolidation of regional support services, and other reductions to our workforce, to improve efficiency as well as the speed and quality of our decision-making.

2. We re-designed core operating processes such as provider payment, utilization management, quality monitoring and improvement, and information technology to achieve more effective and cost efficient outcomes.

3. We are remediating high cost provider contracts and building around high quality, cost-effective networks.

4. We restructured our existing direct delivery operations.

5. We reviewed our vendor base to ensure that we are partnering with the lowest-cost, most-effective vendors.

In addition to costs incurred under the 2017 Restructuring Plan, we have recorded costs associated with the separation of our former CEO and former CFO, described in further detail below.

Costs Incurred

2017 Restructuring Plan

Restructuring costs in 2017 consisted primarily of one-time termination benefits, write-offs of long-lived assets (primarily capitalized software, and leasehold improvements and other assets relating to restructured direct delivery operations), consulting fees, and contract termination costs (including office leases and other contracts).

We previously anticipated that we would incur costs under the 2017 Restructuring Plan in 2018. However, we incurred substantially all costs relating to this plan in 2017, or approximately $234 million. Such costs are presented, by type and reportable segment, below. Since the initiation of our 2017 Restructuring Plan in the second quarter of 2017, the range of total estimated costs increased by approximately $50 million due primarily to non-cash write-offs of certain capitalized software in connection with the re-design of core processes. Such write-offs were

not included in our initial total cost estimates, but as our evaluation of core operating processes proceeded in the third quarter, we determined that certain projects were inconsistent with our future operating goals and were therefore written off.

In addition, in the second quarter of 2017, we reported that we expected restructuring costs to relate only to the Health Plans and Other segments. In the third quarter of 2017, however, we wrote off certain costs capitalized at our Molina Medicaid Solutions segment that supported our Health Plans segment provider information management processes. These processes are now subject to re-design under the 2017 Restructuring Plan.

Separation Costs

On May 2, 2017, we terminated the employment of our former CEO and CFO without cause. Under their amended and restated employment agreements, they were each entitled to receive 400% of their base salary, a prorated termination bonus (150% of base salary for the former CEO and 125% of base salary for the former CFO), full vesting of equity compensation, and a cash payment for health and welfare benefits. We recorded separation costs of $36 million primarily related to these former executives under FASB ASC Topic 712, *Nonretirement and Postemployment Benefits*. Of this total, $23 million related to the acceleration of their share-based compensation, as further discussed in Note 14, “Stockholders' Equity.” Employee separation costs were insignificant in 2016 and 2015.

Restructuring and separation costs are reported in “Restructuring and separation costs” in the accompanying consolidated statements of operations. The following tables present the major types of such costs by segment. Long-lived assets include capitalized software, intangible assets and furniture, fixtures and equipment.

	Year Ended December 31, 2017					
			Other Restructuring Costs			
	Separation Costs - Former Executives	One-Time Termination Benefits	Write-offs of Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
	(In millions)					
Health Plans	$ —	$ 33	$ 16	$ —	$ 24	$ 73
Molina Medicaid Solutions	—	—	8	—	—	8
Other	36	34	37	44	2	153
	$ 36	$ 67	$ 61	$ 44	$ 26	$ 234

Reconciliation of Liability

For those restructuring and separation costs that require cash settlement (primarily separation costs not including equity incentives, termination benefits, consulting fees and contract termination costs), the following table presents a roll-forward of the accrued liability, which is reported primarily in “Accounts payable and accrued liabilities” in the accompanying consolidated balance sheets. Certain contract termination cost accruals are non-current, recorded in “Other long-term liabilities.”

	Separation Costs - Former Executives	One-Time Termination Benefits	Other Restructuring Costs	Total
	(In millions)			
Accrued as of December 31, 2016	$ —	$ —	$ —	$ —
Charges	13	66	71	150
Cash payments	(11)	(55)	(36)	(102)
Accrued as of December 31, 2017	$ 2	$ 11	$ 35	$ 48

16. Employee Benefits

We sponsor defined contribution 401(k) plans that cover substantially all full-time salaried and hourly employees of our company and its subsidiaries. Eligible employees are permitted to contribute up to the maximum amount allowed by law. We generally match up to the first 4% of compensation contributed by employees. Expense

recognized in connection with our contributions to the 401(k) plans totaled $43 million, $36 million, and $27 million in the years ended December 31, 2017, 2016, and 2015, respectively.

We also have a nonqualified deferred compensation plan for certain key employees. Under this plan, eligible participants may defer up to 100% of their base salary and 100% of their bonus to provide tax-deferred growth for retirement. The funds deferred are invested in corporate-owned life insurance, under a rabbi trust.

17. Related Party Transactions

As described in Note 15, “Restructuring and Separation Costs,” we terminated the employment of Dr. J. Mario Molina and John C. Molina without cause in May 2017. In addition, Dr. Molina resigned his board directorship in December 2017, and John C. Molina resigned his board directorship on February 23, 2018.

As of December 31, 2017, we held a receivable of $5 million in connection with the termination of the provider and other services agreements with Dr. Molina’s professional corporation in Michigan. Such agreements are described in further detail in Note 18, “Variable Interest Entities (VIEs).”

Our California health plan has entered into a provider agreement with Pacific Healthcare IPA (Pacific), which is 50% owned by the brother-in-law of Dr. Molina and Mr. Molina. Under the terms of this provider agreement, the California health plan pays Pacific for medical care services that Pacific provides to health plan members. For the years ended December 31, 2017 and 2016, the amounts the California health plan paid to Pacific Healthcare were insignificant. For 2015, the California health plan paid Pacific approximately $1 million.

18. Variable Interest Entities (VIEs)

Joseph M. Molina M.D., Professional Corporations

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) constitute medical provider groups originally created to advance our direct delivery business. JMMPC’s primary shareholder is Dr. J. Mario Molina, who was formerly both Molina’s CEO, and a member of our board of directors. When JMMPC was created, we concluded that we were the primary beneficiary of the JMMPC VIE because we had the power to direct the activities (excluding clinical decisions) that most significantly affected JMMPC’s economic performance, and the obligation to absorb losses or right to receive benefits that were potentially significant to the VIE, under the agreements described below. Because we were its primary beneficiary, we consolidated JMMPC as of December 31, 2017 and 2016.

In 2017, we made the strategic decision to restructure our direct delivery business. Effective September 30, 2017, we terminated our relationship with JMMPC in Florida, Michigan, New Mexico, Washington, and Utah. Therefore, the agreements among JMMPC, our wholly owned subsidiary Molina Medical Management, Inc. (MMM), and the Florida, Michigan, New Mexico, Washington and Utah health plans were terminated effective September 30, 2017.

In early January 2018, the agreements among JMMPC, MMM, and our California health plan terminated. In connection with the termination of the agreements in California, MMM entered into an asset purchase agreement with JMMPC, under which MMM sold various clinic and other assets to JMMPC for approximately $2 million. In addition, our California health plan entered into a new provider agreement with JMMPC. Following the termination of the agreements noted above, we will no longer have a) the power to direct the activities that most significantly affect JMMPC’s economic performance, or b) the obligation to absorb losses or right to receive benefits that are potentially significant to JMMPC.

JMMPC’s assets were available to settle only JMMPC’s obligations, and JMMPC’s creditors had no recourse to the general credit of Molina Healthcare, Inc. As of December 31, 2017, JMMPC had total assets of $8 million, and total liabilities of $8 million. As of December 31, 2016, JMMPC had total assets of $18 million, and total liabilities of $18 million. The health plans were parties to primary care services agreements with JMMPC, under which the health plans paid $119 million, $122 million, and $117 million to JMMPC for such services in the years ended December 31, 2017, 2016, and 2015, respectively. These agreements directed our health plans to either fund JMMPC’s operating deficits, or be reimbursed for JMMPC’s operating surpluses, such that JMMPC would derive no profits or losses. MMM was a party to services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services, and medical supplies to JMMPC. In the years ended December 31, 2017, 2016, and 2015, JMMPC paid $50 million, $55 million and $69 million, respectively, to MMM for such services. The

administrative services charged under these agreements were reviewed annually to assure that JMMPC would operate at break-even.

New Markets Tax Credit

In 2011, our New Mexico data center subsidiary entered into a financing transaction with Wells Fargo Community Investment Holdings, LLC (Wells Fargo), its wholly owned subsidiary New Mexico Healthcare Data Center Investment Fund, LLC (Investment Fund), and certain of Wells Fargo's affiliated Community Development Entities (CDEs), in connection with our participation in the federal government's New Markets Tax Credit Program (NMTC). The credit amounts to 39% of the original investment amount and is claimed over a period of seven years (five percent for each of the first three years, and six percent for each of the remaining four years). The investment in the CDE cannot be redeemed before the end of the seven-year period, which ends in the fourth quarter of 2018.

As a result of a series of simultaneous financing transactions, Wells Fargo contributed capital of $6 million to the Investment Fund, and Molina Healthcare, Inc. loaned the principal amount of $16 million to the Investment Fund. The Investment Fund then contributed the proceeds to certain CDEs, which, in turn, loaned the proceeds of $21 million to our New Mexico data center subsidiary. We have determined that the financing arrangement with Investment Fund and CDEs is a VIE, that we are the primary beneficiary of the VIE, and we have included it in our consolidated financial statements.

19. Commitments and Contingencies

Regulatory Capital Requirements and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also enforce capital requirements that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based on current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $1,691 million at December 31, 2017, and $1,492 million at December 31, 2016. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $696 million and $264 million as of December 31, 2017 and 2016, respectively.

The National Association of Insurance Commissioners (NAIC), adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules which may vary from state to state. All of the states in which our health plans operate, except California, Florida and New York, have adopted these rules. Such requirements, if adopted by California, Florida and New York, may increase the minimum capital required for those states.

As of December 31, 2017, our health plans had aggregate statutory capital and surplus of approximately $1,777 million compared with the required minimum aggregate statutory capital and surplus of approximately $1,186 million. All of our health plans were in compliance with the minimum capital requirements at December 31, 2017. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Legal Proceedings

The health care and Medicaid-related business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain

matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

States' Budgets

Nearly all of our premium revenues come from the joint federal and state funding of the Medicaid and CHIP programs. The states in which we operate our health plans regularly face significant budgetary pressures. For example, the government of Puerto Rico continues to struggle with major fiscal and liquidity challenges. The extreme financial difficulties faced by the Commonwealth may make it very difficult for ASES, the Puerto Rico Medicaid agency, to pay our Puerto Rico health plan under the terms of the parties' Medicaid contract. As of December 31, 2017, our Puerto Rico health plan served approximately 314,000 members and recorded premium revenue of approximately $732 million for the year ended December 31, 2017. As of February 23, 2018, the Commonwealth is current with its premium payments.

Operating Leases

We lease administrative and clinic facilities and certain equipment under non-cancelable operating leases expiring at various dates through 2027. Facility lease terms generally range from five to 10 years with one to two renewal options for extended terms. In most cases, we are required to make additional payments under facility operating leases for taxes, insurance and other operating expenses incurred during the lease period. Certain of our leases contain rent escalation clauses or lease incentives, including rent abatements and tenant improvement allowances. Rent escalation clauses and lease incentives are taken into account in determining total rent expense to be recognized during the lease term.

Future minimum lease payments by year and in the aggregate under operating leases and lease financing obligations consist of the following amounts:

	Lease Financing Obligations	Operating Leases	Total
		(In millions)	
2018	$ 17	$ 67	$ 84
2019	18	65	83
2020	19	44	63
2021	19	30	49
2022	20	22	42
Thereafter	317	34	351
	$ 410	$ 262	$ 672

Rental expense related to operating leases amounted to $75 million, $64 million, and $44 million for the years ended December 31, 2017, 2016, and 2015, respectively. The amounts reported in "Lease Financing Obligations" above represent our contractual lease commitments for the properties described in Note 11, "Debt" under the subheading "Lease Financing Obligations."

Professional Liability Insurance

We carry medical professional liability insurance for health care services rendered in the primary care institutions that we manage. In addition, we also carry errors and omissions insurance for all Molina entities.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues

of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

20. Segment Information

We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

Our reportable segments are consistent with how we currently manage our business and view the markets we serve. The Health Plans segment consists of our health plans. Our health plans are operating segments that have been aggregated for reporting purposes because they share similar economic characteristics. The Molina Medicaid Solutions segment provides support to state government agencies in the administration of their Medicaid programs including business processing, information technology development, and administrative services. The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

Gross margin is the appropriate earnings measure for our reportable segments, based on how our chief operating decision maker currently reviews results, assesses performance, and allocates resources.

Gross margin for our Health Plans segment is referred to as “Medical margin,” and for our Molina Medicaid Solutions and Other segments, as “Service margin.” Medical margin represents the amount earned by the Health Plans segment after medical costs are deducted from premium revenue. The medical care ratio represents the amount of medical care costs as a percentage of premium revenue, and is one of the key metrics used to assess the performance of the Health Plans segment. Therefore, the underlying medical margin is the most important measure of earnings reviewed by the chief operating decision maker. The service margin is equal to service revenue minus cost of service revenue.

	Health Plans	Molina Medicaid Solutions	Other	Consolidated
		(In millions)		
2017				
Total revenue	$ 19,352	$ 187	$ 344	$ 19,883
Gross margin [1]	1,781	16	13	1,810
Depreciation and amortization [2]	126	43	9	178
Goodwill, and intangible assets, net	212	43	—	255
Total assets	6,347	219	1,905	8,471
2016				
Total revenue	17,234	195	353	17,782
Gross margin [1]	1,671	21	33	1,725
Depreciation and amortization [2]	122	45	15	182
Goodwill, and intangible assets, net	513	72	175	760
Total assets	5,897	267	1,285	7,449
2015				
Total revenue	13,917	195	66	14,178
Gross margin [1]	1,467	55	5	1,527
Depreciation and amortization [2]	95	25	6	126
Goodwill, and intangible assets, net	393	73	175	641
Total assets	4,707	213	1,656	6,576

(1) In connection with the reclassification of Medicare and Marketplace health insurer fees to premium revenue, from health insurer fees reimbursed, amounts differ from amounts previously reported as follows: the Health Plans segment gross

margin for the years ended December 31, 2016 and 2015 increased $53 million, and $20 million, respectively. The Consolidated gross margin increased by the same amounts.

(2) Depreciation and amortization reported in accompanying consolidated statements of cash flows.

The following table reconciles gross margin by segment to consolidated (loss) income before income tax (benefit) expense:

	Year Ended December 31,		
	2017	2016	2015
	(In millions)		
Gross margin:			
Health Plans	$ 1,781	$ 1,671	$ 1,467
Molina Medicaid Solutions	16	21	55
Other	13	33	5
Total gross margin	1,810	1,725	1,527
Add: other operating revenues (1)	508	798	664
Less: other operating expenses (2)	(2,873)	(2,217)	(1,804)
Operating (loss) income	(555)	306	387
Other expenses, net	57	101	65
(Loss) income before income tax (benefit) expense	$ (612)	$ 205	$ 322

(1) Other operating revenues include premium tax revenue, health insurer fees reimbursed, investment income and other revenue.

(2) Other operating expenses include general and administrative expenses, premium tax expenses, health insurer fees, depreciation and amortization, impairment losses, and restructuring and separation costs.

21. Quarterly Results of Operations (Unaudited)

The following table summarizes quarterly unaudited results of operations for the years ended December 31, 2017 and 2016.

	For The Quarter Ended			
	March 31, 2017	June 30, 2017	Sept. 30, 2017	December 31, 2017
	(In millions, except per-share data)			
Total revenue	$ 4,904	$ 4,999	$ 5,031	$ 4,949
Gross margin	546	254	564	446
Impairment losses	—	72	129	269
Restructuring and separation costs	—	43	118	73
Net income (loss)	77	(230)	(97)	(262)
Net income (loss) per share [1]:				
Basic	$ 1.38	$ (4.10)	$ (1.70)	$ (4.59)
Diluted	$ 1.37	$ (4.10)	$ (1.70)	$ (4.59)

	For The Quarter Ended			
	March 31, 2016	June 30, 2016	Sept. 30, 2016	December 31, 2016
	(In millions, except per-share data)			
Total revenue	$ 4,343	$ 4,359	$ 4,546	$ 4,534
Gross margin [2]	434	466	471	354
Net income (loss)	24	33	42	(47)
Net income (loss) per share [1]:				
Basic	$ 0.44	$ 0.58	$ 0.77	$ (0.85)
Diluted	$ 0.43	$ 0.58	$ 0.76	$ (0.85)

(1) The dilutive effect of all potentially dilutive common shares is calculated using the treasury stock method. Certain potentially dilutive common shares issuable are not included in the computation of diluted net income (loss) per share because to do so would be anti-dilutive.

(2) The Centers for Medicare and Medicaid Services (CMS) incorporates the Health Insurer Fee (HIF) in our Medicare and Marketplace premium rates. We have therefore reclassified such amounts in our consolidated statements of operations to premium revenue, from health insurer fees reimbursed, for all applicable periods presented. As a result, gross margin amounts differ from amounts previously reported as follows: for the quarters ended March 31, June 30, September 30, and December 31, 2016, gross margin increased $14 million, $12 million, $14 million, and $13 million, respectively.

22. Condensed Financial Information of Registrant

The condensed balance sheets as of December 31, 2017 and 2016, and the related condensed statements of operations, comprehensive (loss) income and cash flows for each of the three years in the period ended December 31, 2017 for our parent company Molina Healthcare, Inc. (the Registrant), are presented below.

Condensed Balance Sheets

	December 31,	
	2017	2016

Notes to Condensed Financial Information of Registrant

Note A - Basis of Presentation

The Registrant was incorporated in 2002. Prior to that date, Molina Healthcare of California (formerly known as Molina Medical Centers) operated as a California health plan and as the parent company for three other state health plans. In June 2003, the employees and operations of the corporate entity were transferred from Molina Healthcare of California to the Registrant.

The Registrant's investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries since the date of acquisition. The accompanying condensed financial information of the Registrant should be read in conjunction with the consolidated financial statements and accompanying notes.

Note B - Transactions with Subsidiaries

The Registrant provides certain centralized medical and administrative services to its subsidiaries pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems and human resources services. Fees are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the subsidiaries' ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate. Charges in 2017, 2016, and 2015 for these services amounted to $1,317 million, $1,062 million, and $914 million, respectively, and are included in operating revenue.

The Registrant and its subsidiaries are included in the consolidated federal and state income tax returns filed by the Registrant. Income taxes are allocated to each subsidiary in accordance with an intercompany tax allocation agreement. The agreement allocates income taxes in an amount generally equivalent to the amount which would

be expensed by the subsidiary if it filed a separate tax return. Net operating loss benefits are paid to the subsidiary by the Registrant to the extent such losses are utilized in the consolidated tax returns.

Note C - Dividends and Capital Contributions

When the Registrant receives dividends from its subsidiaries, such amounts are recorded as a reduction to the investments in the respective subsidiaries.

For all periods presented, the Registrant made capital contributions to certain subsidiaries primarily to comply with minimum net worth requirements and to fund business combinations. Such amounts have been recorded as an increase in investment in the respective subsidiaries, net of insignificant returns of capital.

Note D - Related Party Transactions

The Registrant's related party transactions are described in Note 17, "Related Party Transactions."

23. Supplemental Condensed Consolidating Financial Information

As discussed in Note 11, “Debt,” we have outstanding $700 million aggregate principal amount of 5.375% Notes due November 15, 2022, unless earlier redeemed. The 5.375% Notes were registered in September 2016, and are fully and unconditionally guaranteed by certain of our wholly owned subsidiaries on a joint and several basis, with exceptions considered customary for such guarantees.

All guarantors immediately prior to January 3, 2017, other than Molina Information Systems, LLC, d/b/a Molina Medicaid Solutions, Molina Pathways, LLC and Pathways Health and Community Support LLC, were automatically and unconditionally released as guarantors of our amended Credit Facility, the 5.375% Notes, and the 4.875% Notes.

For all periods presented, the following condensed consolidating financial statements present Molina Healthcare, Inc. (as “Parent Guarantor”), the subsidiary guarantors (as “Other Guarantors”), the subsidiary non-guarantors (as “Non-Guarantors”) and “Eliminations,” according to the guarantor structure as assessed as of and for the year ended December 31, 2017.

DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

The following sets forth certain information regarding our executive officers, including the business experience of each executive officer during the past five years:

Name	Age	Position
Joseph M. Zubretsky	61	President and Chief Executive Officer
Joseph W. White	59	Chief Financial Officer
Jeff D. Barlow	55	Chief Legal Officer and Corporate Secretary
Pamela S. Sedmak	56	Executive Vice President, Health Plan Operations
Mark L. Keim	52	Executive Vice President, Strategic Planning, Corporate Development & Transformation
Lisa A. Rubino	60	Senior Vice President, Medicare and Duals Integration

Mr. Zubretsky has served as President and Chief Executive Officer since November 6, 2017. He joins the Company from The Hanover Insurance Group, Inc., where he served as its President and Chief Executive Officer from June 2016 to October 2017. Prior to that, Mr. Zubretsky served almost nine years at Aetna, Inc., where he most recently served as Chief Executive Officer of Healthagen Holdings, a group of healthcare services and information technology companies at Aetna, from January 2015 to October 2015. Prior to that, he served as a Senior Executive Vice President leading Aetna's National Businesses from 2013 to 2014, and served as Aetna's Chief Financial Officer from 2007 to 2013. None of the entities where Mr. Zubretsky was previously employed is a parent, subsidiary or other affiliate of the Company.

Mr. White has served as Chief Financial Officer since May 2, 2017. Prior to that, Mr. White had served as Chief Accounting Officer since 2007. Mr. White also served as our Interim President and Chief Executive Officer from May 2, 2017 to November 6, 2017.

Mr. Barlow has served as Chief Legal Officer and Corporate Secretary since 2010.

Ms. Sedmak has served as Executive Vice President, Health Plan Operations since February 2018. Ms. Sedmak brings more than 25 years of Medicaid managed care leadership experience in operations, strategy, and finance. Most recently, she was a senior adviser at McKinsey & Company, serving clients in the health care services and global corporate finance practice areas. Prior to McKinsey, she served as president and CEO for Aetna Medicaid/Dual Eligibles. Before Aetna, Ms. Sedmak held C-level leadership positions at Blue Cross and Blue Shield of Minnesota, CareSource and General Electric. None of the entities where Ms. Sedmak was previously employed is a parent, subsidiary or other affiliate of the Company.

Mr. Keim has served as Executive Vice President, Strategic Planning, Corporate Development and Transformation since January 2018. Most recently, he served as executive vice president of corporate development and strategy for The Hanover Insurance Group. Prior to The Hanover Insurance Group, Mr. Keim spent six years with Aetna where he led major strategic initiatives. Before Aetna, he was senior vice president of strategy and business development at GE Capital. None of the entities where Mr. Keim was previously employed is a parent, subsidiary or other affiliate of the Company.

Ms. Rubino has served as our Senior Vice President, Medicare & Duals Integration since 2013. From 2012 to 2013, Ms. Rubino served as Senior Vice President of Health Plans, Western Region. From 2007 to 2012, Ms. Rubino served as the President of Molina Healthcare of California.

Each executive officer serves at the pleasure of the board of directors.

The remaining information called for by Item 10 of Form 10-K is incorporated by reference to "Election of Directors," "Corporate Governance and Board of Directors Matters," and "Section 16(a) Beneficial Ownership Reporting Compliance" in our definitive proxy statement for our 2018 Annual Meeting of Stockholders.

EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) The consolidated financial statements and exhibits listed below are filed as part of this Form 10-K.

(1) The financial statements included in Financial Statements and Supplementary Data, above, are filed as part of this annual report.

(2) Financial Statement Schedules

None of the schedules apply, or the information required is included in the Notes to the Consolidated Financial Statements.

(3) Exhibits

Reference is made to the accompanying Index to Exhibits.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the undersigned registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized, on the 1st day of March, 2018.

MOLINA HEALTHCARE, INC.

By: /s/ Joseph M. Zubretsky

Joseph M. Zubretsky
Chief Executive Officer
(Principal Executive Officer)

Pursuant to the requirements of the Securities Exchange Act of 1934, this report has been signed below by the following persons on behalf of the registrant and in the capacities and on the dates indicated.

INDEX TO EXHIBITS

The following exhibits, which are furnished with this Annual Report on Form 10-K (this "Form 10-K") or incorporated herein by reference, are filed as part of this annual report.

The agreements included or incorporated by reference as exhibits to this Form 10-K may contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties were made solely for the benefit of the other parties to the applicable agreement and (i) were not intended to be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate; (ii) may have been qualified in such agreement by disclosures that were made to the other party in connection with the negotiation of the applicable agreement; (iii) may apply contract standards of "materiality" that are different from "materiality" under the applicable securities laws; and (iv) were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement. The Company acknowledges that, notwithstanding the inclusion of the foregoing cautionary statements, it is responsible for considering whether additional specific disclosures of material information regarding material contractual provisions are required to make the statements in this Form 10-K not misleading.

Number	Description	Method of Filing
2.1	Membership Interest Purchase Agreement, dated as of September 3, 2015, by and among The Providence Service Corporation, Ross Innovative Employment Solutions Corp., and Molina Healthcare, Inc.	Filed as Exhibit 2.1 to registrant's Form 8-K filed September 8, 2015.

* Management contract or compensatory plan or arrangement required to be filed (and/or incorporated by reference) as an exhibit to this Annual Report on Form 10-K pursuant to Item 15(b) of Form 10-K.

MOLINA HEALTHCARE, INC.

AMENDED AND RESTATED

DEFERRED COMPENSATION PLAN (2018)

This Deferred Compensation Plan (the "Plan") is amended and restated effective for amounts earned and deferred on or after January 1, 2018 (the "Restatement"), by MOLINA HEALTHCARE, INC., a Delaware corporation (the "Company") with reference to the following:

A. The Company originally established a Deferred Compensation Plan for key employees, effective September 1, 1999 (the "Original Plan"). The Original Plan was amended on March 29, 2001.

B. As a result of the adoption of section 409A of the Internal Revenue Code of 1986 (the "Code"), the Original Plan was frozen effective at midnight on December 31, 2004.

C. This Plan was implemented effective January 1, 2005 to replace the Original Plan with a new plan that complies with the requirements of Code section 409A and the related Treasury Regulations (and other guidance from the Internal Revenue Service) thereunder (collectively, the "409A Requirements") and amended and restated as of October 1. 2013, and subsequently amended November 14, 2013, October 29, 2014 and September 1, 2016.

D. This Plan was established to provide key employees of the Company and its subsidiaries a tax deferred, capital accumulation program. The Plan is intended to provide benefits to a select group of management or highly compensated personnel in order to attract and retain the highest quality executives. The Company does not intend for this to be a qualified plan within the meaning of Sections 401(a) and 501(a) of the Code. This Plan is intended to be an unfunded plan for purposes of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Company contributions and voluntary compensation deferrals shall be held in a "Rabbi Trust," as that term is defined in Revenue Procedure 92-64, 1992-2 C.B. 422.

E. This Plan is hereby amended and restated to incorporate the prior amendments to the Plan, to provide for installment payments from in-service accounts and to modify the minimum death benefit under the Plan.

NOW, THEREFORE, the Company hereby adopts this Plan on the following terms and conditions:

1. Definitions. Whenever used in this Plan, the following words and phrases shall have the meaning set forth below, unless a different meaning is expressly provided or plainly required by the context in which the words or phrases are used:

1.1. Beneficiary means a person designated by a Participant to receive Plan benefits in the event of the Participant's death.

1.2. Board means the Board of Directors of the Company and its successors.

1.3. Change in Control means, a Change in Ownership, a Change in the Effective Control, a Change in Assets or a termination of the Plan and distribution of compensation deferred hereunder within twelve (12) months after any of the foregoing events. For purposes of this Section, "Company" shall include (i) the company for which a Participant is performing services at the time of the Change in Control, (ii) the company liable for the payment of the deferred compensation (or all companies liable if more than one company is liable), or a company that is a majority shareholder of a company identified in (i) or (ii), or any company in a chain of companies in which each company is a majority shareholder of another company in the chain, ending in a company identified in (i) or (ii). The events described in this section will not be considered to occur, with respect to an employee of a participating entity, if a participating entity is sold and the employee of the participating entity continues employment with the Company subsequent to the sale. The events described in this section have the following meanings:

a. Change in Ownership means the acquisition of stock by any one person or persons acting in concert (a "group") of the Company, that when added to the stock of the person or group constitutes more than 50% of the total fair market value or total voting power of the stock of the Company. The acquisition of additional stock by any person or group who are already considered to own more than 50% of the stock of the Company shall not constitute a change in ownership of the Company. An increase in the percentage of stock owned by any person or group, as result of a transaction in which the Company acquires its stock in exchange for property will be treated as an acquisition of stock for purposes of this section.

b. Change in the Effective Control means the occurrence of any of the following events, despite the fact that the Company has not undergone a Change in Ownership as described above:

i. The acquisition by any person or group (or acquisition during the 12-month period ending on the date of the most recent acquisition by such person or persons) of ownership of stock of the Company possessing 35% or more of the total voting power of the stock, except if such acquisition is the result of a change in "record ownership" and not a change in "beneficial ownership;"

ii. The replacement of a majority of the Company's board of directors during any 12-month period by directors whose appointment or election is not endorsed by a majority of the members of the Company's board of directors prior to the date of the appointment or election; or

iii A transaction between the Company and another company resulting in a Change in Control.

iv. Provided that this section shall not apply to the acquisition of additional control of the Company by any person or group, if that person or group is considered to effectively control the Company prior to the acquisition.

c. Change in Assets means the acquisition by any person or group (or acquisition during the 12-month period ending on the date of the most recent acquisition by such person or persons) of assets from the Company, that have a total gross fair market value equal to, or more than, 40% of the total gross fair market value of all the assets of the Company immediately prior to such acquisition or acquisitions. A transfer of assets by the Company will not be treated as a Change in Assets if the assets are transferred to any of the following (determined immediately after the transfer):

i. A shareholder of the Company (as determined, immediately before the asset transfer) in exchange for or with respect to its stock;

ii. An entity, 50% or more of the total value or voting power of which is owned directly or indirectly by the Company;

iii. A person or group that owns, directly or indirectly, 50% or more of the total value or voting power of all the outstanding stock of the Company; or

iv. An entity, at least 50% of the total value or voting power of which is owned, directly or indirectly, by a person described in (iii).

For purposes of this subsection (c), the gross fair market value of assets is the value of the assets of the Company or the value of the assets being disposed of with regard to any liabilities associated with such assets. If assets are transferred to an entity that is controlled by the shareholders of the transferring company immediately after the transfer, there is no Change in Control.

1.4. Company means MOLINA HEALTHCARE, INC., a Delaware corporation.

1.5. Company Stock means shares of stock issued by the Company.

1.6. Disability or Disabled means with respect to a Participant (i) the inability to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than twelve (12) months, or (ii) the receipt of income replacement benefits for a period of not less than three (3) months under an accident and health plan covering employees of the Company, by reason of any medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than twelve (12) months.

1.7. The original Effective Date of this Plan means January 1, 2005. The Effective Date of this Restatement shall mean January 1, 2018.

1.8. Key Employee means an employee of the Company or a Subsidiary, who is (A) a member of a select group of management or highly compensated employees within the meaning of §2520.104-23 of the Department of Labor ERISA Regulations, (B) projected to receive Plan Year Compensation (base pay plus bonus), plus amounts deferred to any 401(k) plan, deferred compensation plan, or cafeteria plan maintained by the Company, of $200,000 or more and (C) designated by the Plan Committee as a Key Employee.

1.9. Participant means (A) a Key Employee who timely files a Written Election pursuant to Section 2.3, below, and (B) a former Employee who, at the time of his Separation from Service, death, or Disability, retains, or whose beneficiary retains, benefits earned under the Plan in accordance with its terms. A Participant is considered an Active Participant in the Plan (even if the Participant no longer satisfies the requirements of Section 1.8(B) but subject to the right of the Company's Chief Executive Officer to no longer designate such employee as a Key Employee) until the Participant separates from service under the terms of this Plan.

1.10. Plan means the Molina Healthcare, Inc. Amended and Restated Deferred Compensation Plan (2018) evidenced by this document and the Trust Agreement previously established in connection herewith.

1.11. Plan Committee means the individuals appointed by the Board from time to time to administer the Plan as provided herein.

1.12. Plan Year means the calendar year.

1.13. Plan Year Compensation means the total taxable income (other than Share Awards) paid to an Active Participant by the Company or a Subsidiary during any Plan Year, or portion thereof in which he is a Participant in this Plan, as reflected on a Key Employee's form W-2.

1.14. Separation from Service. A separation from service with the Company, provided such separation constitutes a "separation from service" under Treasury Regulation Section 1.409A-1(h).

1.15. Share Awards means shares of Company Stock which are awarded to a Participant as an employee by the Company.

1.16. Specified Employee means a "key employee" of the Company, as defined in section 416(i) of the Code without regard to paragraph five (5) thereof.

1.17. Subsidiary means any entity in which the Company owns not less than 80% of the outstanding voting interests.

1.18. Trust Agreement means the grantor trust established in connection with this Plan between the Company as grantor and the Trustee.

1.19. Trustee means Union Bank of California and any successor institutional trustee named to succeed such Trustee under the terms of the Trust Agreement established in connection with this Plan.

1.20. Unforeseeable Financial Emergency means: (i) an illness or accident of the Participant or beneficiary, the Participant's or beneficiary's spouse, or the Participant's or beneficiary's dependent; (ii) the loss of the Participant's or beneficiary's property due to casualty; or (iii) other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the Participant or beneficiary. Determination of whether a Participant has incurred an Unforeseeable Financial Emergency shall be made by the Plan Committee, in accordance with the requirements of Section 409A of the Code and any guidance issued thereunder.

2. Participation.

2.1. Eligibility. An employee of the Company or a Subsidiary is eligible to participate in this Plan upon meeting the criteria for Key Employee specified in Section 1.8. Any Key Employee who was a Participant in the Original Plan and who continued in the employ of the Company on the effective date of the Restatement will continue to be a Participant in this Plan, subject to the right of the Company's Chief Executive Officer to no longer designate such employee as a Key Employee thereafter.

2.2. Entry Date. An employee of the Company or a Subsidiary who met the eligibility requirement specified in Section 2.1 as of the Effective Date of this Plan Restatement is a Participant in the Plan as of the Effective Date. Newly eligible employees of the Company who have met the enrollment requirements under Section 2.3 of the Plan shall commence participation in the Plan within thirty (30) days of their date of hire. An employee of the Company or a Subsidiary who meets the eligibility requirements specified in Section 2.1 but fails to meet the requirements in accordance with Section 2.3 within the period required, shall become a Participant in this Plan on the first day of the next Plan Year following submission of a Written Election form as specified in Section 2.3.

2.3. Written Election by Participant. As a condition to participation in the Plan, each newly eligible Employee shall complete, sign and return to the Plan Committee a Written Election within thirty (30) days after the date the Participant becomes eligible to participate in the Plan. Annual enrollment shall be in December each year for the following Plan Year. Each Participant shall submit a Written Election prior to the first day of the Plan Year in which he or she will be a Participant.

a. Such Written Election shall be made on the form presented to the Participant by the Plan Committee and shall set forth:

i. his election to participate in this Plan under the terms hereof;

ii. the amount of Plan Year Compensation the Participant has determined to defer under the Plan for the Plan Year, pursuant to Section 3.1 below;

iii. the investment vehicles into which the Participant desires to have his Account attributable to deferral of Plan Year Compensation invested, as provided in Section 3.5 below, and the percentage of such Account allocated to each elected investment vehicle;

iv. the date on which his benefit is to be distributed which is the earliest of: (a) the date specified for an In-Service Withdrawal; (b) an Unforeseeable Financial Emergency; (c) the later of (i) when he separates from service with the Company for any reason or (ii) a date subsequent to his termination of employment specified by the Participant;

v. the form in which his benefit is to be distributed upon an In-Service Withdrawal, Separation from Service, Disability or death.

b. A Participant must provide a separate Written Election for each subsequent Plan Year that specifies the percentage of the Plan Year Compensation that Participant has determined to defer for each such Plan Year. Such Written Election is only effective for the Plan Year for which the election is made and if no Written Election to defer Plan Year Compensation is executed in relation to a subsequent Plan Year, no Plan Year Compensation will be deferred for such subsequent Plan Year. Any election of the amount of Plan Year Compensation to defer for a given Plan Year shall be irrevocable on and after the first day of the Plan Year for which the election was made.

c. A Participant may change the investment vehicle(s) in which the Participant desires to have that portion of the Participant's Account attributable to Plan Year Compensation and investment income invested and the percentage of the Participant's Account allocated to each investment vehicle by completing and submitting any form or forms required by the Company. Changes in investment vehicle(s) will be made as of the applicable business day (or as soon as practicable thereafter) following the date that the change is requested.

d. Notwithstanding the foregoing, the Trustee shall, at the direction of the Plan Committee, have the duty and authority to invest the trust assets and funds in accordance with the terms of the Trust Agreement, and all rights associated with the trust assets shall be exercised by the Trustee as designated by the Plan Committee and shall in no event be exercisable by or be settled upon Participants or their Beneficiaries.

e. A Participant may change the date or form of distribution by submitting a new Written Election to the Company, provided that the following conditions are met:

i. That such election may not take effect until at least twelve (12) months after the date on which the election is made;

ii. In the case of an election related to a payment other than a payment on account of death, disability or the occurrence of a financial hardship, such payment must be deferred for a period of not less than five (5) years from the date such payment would have otherwise been made, and

iii. Any election related to a payment at a specified time or pursuant to a fixed schedule may not be made less than twelve (12) months prior to the date of the first scheduled payment.

iv. Such election may be made among the payment options set forth in Section 5.4.

2.4. Duration of Participation. Any Key Employee who has become a Participant at any time shall remain a Participant, even though he is no longer an Active Participant, until his entire benefit under the terms of the Plan has been paid to him (or to his Beneficiary in the event of his death), at which time he ceases to be a Participant.

2.5. Maintenance of Records. The annual Designation of Participants by the Plan Committee shall be maintained in the corporate minute book. The Written Elections by Participants shall be maintained in the corporate records with all other files pertaining to this Plan by the Plan Committee.

3. Contributions and Allocation.

3.1 Participant Contributions. A Participant may elect to defer a portion of (i) up to 75% of Plan Year Compensation constituting base pay and (ii) up to 100% of all other Plan Year Compensation eligible for deferral under this Plan (including bonus pay). For a Participant's initial Plan Year of participation, the minimum deferral percentage for base pay and bonus pay must be 3% for each such component. For succeeding years of participation, a Participant may not defer an amount less than the minimum percentage established from year to year by the Plan Committee. A written election must be submitted, pursuant to the terms of Section 2.3, specifying the percentage of Plan Year Compensation constituting base pay the Participant has chosen to defer. A separate written election must be submitted, pursuant to the terms of Section 2.3, specifying the percentage of all other Plan Year Compensation eligible for deferral under this Plan (including bonus pay) the Participant has chosen to defer. Once a Participant's contributions for a Plan Year reach the Participant's elected percentage, such Participant shall not be allowed to defer additional portions of such Participant's Plan Year Compensation for the remainder of the Plan Year. Any amounts in excess of the Participant's elected percentage inadvertently deferred shall be refunded to the Participant as soon as practicable.

3.2. Company Contributions. The Company may, subject to the sole discretion of its Board of Directors, make contributions for the Participants, reserving the right to discriminate

among the Participants in the amount or percentage of contributions made in any Plan Year.

3.3. Allocation of Participant Contributions. All amounts which a Participant elects to defer under the terms of this Plan shall be allocated to his Account as of the last business day of each month. Each such Participant Deferral Account shall be credited with earnings as provided in Section 3.5 below.

3.4. Allocation of Company Contributions. Any amounts contributed by the Company on behalf of a Participant under Section 3.2 above shall be allocated to the Company Contribution Account of each Participant. Each such Company Contribution Account shall be credited with earnings as provided in Section 3.5 below.

3.5 Credited Earnings. The Account of each Participant (which includes such Participant's Participant Deferral Account established under Section 3.1 and such Participant's Company Contribution Account established under Section 3.2) shall be credited as of each applicable business day with the actual earnings on the investments allocated to the Participant's Account.

3.6. Funding. The assets of the Plan shall be held under the Trust Agreement (a "grantor trust") designated in Section 8. As such, the Plan is intended to be an unfunded plan for purposes of the requirements of ERISA and the Code.

Notwithstanding the provisions under the terms of the Plan that amounts contributed to this Plan, plus earnings thereon, shall be allocated to separate Accounts of Participants, all such amounts credited to such individual Accounts shall remain the general assets of the Company, and as such shall remain subject to the claims of the general creditors of the Company. This Plan and the related Trust Agreement do not create, nor does any employee, Participant or Beneficiary have, any right with respect to any specific assets of the Company or the Plan.

4. Vesting of Accounts. The Participant Deferral Accounts and the Company Contribution Account of each Participant shall be 100% vested in such Participant at all times.

5. Types of Benefits.

5.1. Separation from Service Benefit. A Participant's Separation from Service Benefit is the unpaid balance of his Accounts which equals the total of all contributions made by the Participant and the Company allocated to his Account and all earnings credited to his Account in accordance with the terms of the Plan and the Trust Agreement, less any distributions already paid.

5.2. Disability Benefit. If a Participant becomes Disabled as defined in Section 1.6 above, the Company will pay his Separation from Service Benefit, calculated under Section 5.1, in the applicable form elected by the Participant in his Written Election.

A Participant who believes he has suffered a Disability within the meaning of Section 1.6 shall make application to the Plan Committee, on a form prescribed by the Plan Committee, for a determination of whether he is Disabled under the terms of Section 1.6. The Participant shall make such written application to the Plan Committee on or after the date which is at least five (5) consecutive months following the date he first suffered the impairment under consideration. Any determination by the Plan Committee that a Disability exists under the provisions of Section 1.6 shall be effective only after the date the Disability has existed for six (6) consecutive months. All determinations made by the Plan Committee shall be final, and no Participant shall be considered Disabled for any purpose whatsoever under the provisions of this Plan if determined not to be Disabled by the Plan Committee under the procedures set forth in this Section.

The Plan Committee shall notify each Participant who has made application under this Section 5.2, in writing, of its determination within three (3) months of the date the Plan Committee receives the Participant's application hereunder. The Participant shall cooperate in providing any information to the Plan Committee which it requires in making its determination, including, but not limited to, access to the Participant's medical records, direct contact with his physician, and physical examination by a physician selected by the Company. Any Participant who does not fully cooperate shall be deemed not Disabled by the Plan Committee and so notified.

5.3. Death Benefit.

a. If a Participant dies after a distribution has commenced or if the Company has not purchased a life insurance contract in connection with the Participant's Separation from Service Benefit, the Company will continue the payments of such distribution otherwise due to the Participant to his designated Beneficiary, in the applicable form elected by the Participant in his Written Election.

b. If a Participant dies while still employed by the Company and the Company has purchased a life insurance contract in connection with such Participant's Separation from Service Benefit, the Company will pay the Participant's designated Beneficiary the greatest of: (i) twice the Participant's base salary upon initial eligibility for the Plan; (ii) $500,000; or (iii) if the Participant was a Participant prior to January 1, 2018, the amount specified under the Plan prior to such date, in the applicable form elected by the Participant in his Written Election.

5.4. In-Service Withdrawal. A Participant may designate a year in the future for receipt of an In-Service Withdrawal with respect to the Participant's contribution for a given Plan Year. Such withdrawal may be paid while the Participant remains employed with the Company. Initial designations made with respect to the 2018 Plan Year in accordance with Section 2.3(a)(iv) (as may be subsequently modified under Section 2.3(b)) shall include Credited Earnings attributable to such Participant Contribution. The In-Service Withdrawal will be paid in a lump sum unless the Participant elects to receive substantially equal annual installments from two (2) to five (5) years, commencing no earlier than three (3) years after the Plan Year during which such Participant Contributions are made; provided, however, that a Participant may make a subsequent deferral election with respect to any initial In-Service Withdrawal election made under this Plan subject to the following requirements:

a. the Participant must deliver to the Company a written election not later than twelve (12) months prior to the date the payment is scheduled to be paid;

b. the payments that are subject to the election must be delayed at least five (5) years from the date the payments would have otherwise been made; and

c. the election will not take effect until at least twelve (12) months after the election is made.

5.5. Unforeseeable Financial Emergency Benefit. A Participant may request a portion of his Separation from Service Benefit as an Unforeseeable Financial Emergency Benefit at any time by providing the Plan Committee, to its satisfaction, with a written request, proof of an Unforeseeable Financial Emergency, and proof that all other financial resources have been explored and utilized to: (i) receive a partial or full payout from the Plan and/or (ii) suspend any deferrals required to be made by a Participant. The amount of an Unforeseeable Financial Emergency Benefit shall be limited to the lesser of the amount needed for the financial hardship or such Participant's Separation from Service Benefit. If a Participant receives a distribution as a result of an Unforeseeable Financial Emergency, such Participant may not participate in the Plan during the Plan Year following the year of the hardship distribution.

6. Distributions.

6.1. Form of Benefits. The Company shall pay benefits in the form associated with Type of Benefit elected by the Participant, and, to the extent a Type of Benefit may be distributed in various forms, the Company shall pay benefits in the form elected by the Participant. The forms of benefits associated with the Types of Benefits are the following:

a. Separation from Service Benefit, Disability Benefit, and Death Benefit shall be paid in (i) one lump sum; (ii) 5 yearly installments; (iii) 10 yearly installments; or (iv) 15 yearly installments;

b. In-Service Withdrawal shall be paid as provided in Section 5.4 above; and

c. Unforeseeable Financial Emergency Benefit shall be paid in one lump sum.

6.2. Commencement of Payments. The Company will pay, or begin to pay, the Types of Benefits under this Plan to the Participant in accordance with the following:

a. Separation from Service Benefit, Disability Benefit, and Death Benefit payments shall commence no later than sixty-five (65) days following the date on which the Participant retires, terminates service, becomes disabled, or dies;

b. In-Service Withdrawal payments shall commence on the date designated by the Participant on his Written Election pursuant to Section 2.3, provided that such payments are from Participant Contributions that have been in such Participant's Participant Deferral Account for at least two years;

c. Unforeseeable Financial Emergency Benefit payments shall commence no later than sixty-five (65) days after a request for an Unforeseeable Financial Emergency Benefit is approved by the Plan Committee.

6.3. Domestic Relations Order. In the event the Plan Committee receives a Domestic Relations Order from a potential Alternate Payee, the Plan Committee shall notify the Participant whose benefit is the subject of such order and provide him/her with information concerning the Plan's procedures for administering Qualified Domestic Relations Orders ("QDROs"). Unless and until the order is set aside, the following provisions shall apply:

a. The Plan Committee shall within a reasonable time determine whether the order is a QDRO and shall notify the Participant whose benefit is the subject of the order, of its determination. The Plan Committee may designate a representative to carry out its duties under this provision.

b. Nothing in this Section shall be deemed to allow payment under a QDRO to an Alternate Payee of any benefit which would violate Section 409A of the Code and the regulations thereunder.

c. QDRO definitions. For purposes of Section 6.3 the following definitions and rules shall apply:

i. Alternate Payee means any spouse, former spouse, child or other dependent of a Participant who is recognized by a QDRO as having a right to receive all, or a portion of, the benefits payable under this Plan with respect to the Participant.

ii. Domestic Relations Order means any judgment, decree, or order (including approval of a property settlement agreement) which:

(1) relates to the provision of child support, alimony payments, or marital property rights to a spouse, child, or other dependent of a Participant; and

(2) is made pursuant to a state domestic relations law (including a community property law).

iii. Qualified Domestic Relations Order means any Domestic Relations Order meeting the requirements for a Qualified Domestic Relations

Order under Code section 414(p), which satisfies any additional criteria under policies established by the Plan Committee.

6.4 Limited Cashout. Notwithstanding any Written Election made by the Participant, if, upon the Participant's Separation from Service, such Participant's accrued benefit under the Plan (and any other deferred compensation plan required to be aggregated with this Plan) does not exceed the then-current limit under Section 402(g)(1)(B) of the Code, the Company shall immediately distribute such Participant's accrued benefit under the Plan in a single lump sum payment to the Participant (or the Beneficiary, if the Participant is deceased), provided that such distribution results in a termination and complete liquidation of such Participant's interest under the Plan (and any other deferred compensation plan required to be aggregated by this Plan).

Notwithstanding sections 6.2 and 7.3, distributions to a Specified Employee shall not commence earlier than six (6) months after the date such Specified Employee experiences a Separation from Service (or, if earlier, the date of death of the employee).

7. Amendment, Termination of Plan, Change in Control.

7.1. Amendment. The Company reserves the right to amend the Plan at any time by resolution of the Plan Committee. The Plan Committee will determine the effective date of any such amendment. The amendment may not deprive any Participant or Beneficiary of any portion of a benefit under the terms of this Plan at the time of the amendment.

7.2. Termination of Plan. The Company reserves the right to terminate the Plan under the following circumstances:

a. The Plan Committee may resolve to terminate the Plan provided that:

i. all arrangements of the same type (account balance plans, nonaccount balance plans, separation pay plans or other arrangements) are terminated with respect to all participants;

ii no payments other than those otherwise payable under the terms of the Plan absent a termination of the Plan are made within twelve (12) months of the termination of the arrangement;

iii. all payments are made within twenty-four (24) moths of the termination of the arrangement; and

iv. the Company does not adopt a new arrangement that would be aggregated with any terminated arrangement under the plan aggregation rules at any time for a period of five years following the date of termination of the arrangement.

b. The Plan Committee may terminate the Plan and make payments to the Participants at any time during the twelve (12) months following a change in control of the corporation;

c. A corporate dissolution taxed under Section 331, or with the approval of a bankruptcy court pursuant to 11 U.S.C. §503(b)(l)(A), provided that the amounts deferred under the Plan are included in the Participants' gross incomes by the latest of:

i. the calendar year in which the Plan termination occurs,

ii. the calendar year in which the amount is no longer subject to a substantial risk of forfeiture, or

iii. the first calendar year in which the payment is administratively practicable.

7.3. Change in Control. In the event of a Change in Control, the Company shall, as soon as possible, but in no event later than ten days after the Change in Control, notify the Trustee, and the Trustee or its agent shall immediately calculate the Separation from Service Benefit of each Participant and distribute such amounts to the Participant or Beneficiary in a lump sum within thirty (30) days of the notification. If the Company fails to notify the Trustee as specified in this section, the Trustee may act upon notification of the "Change of Control" obtained in an alternate manner. The Trustee shall incur no liability to any person for any action taken pursuant to such notification and in conformity with the terms of the Plan.

8. Benefits Not Funded. Participants and Beneficiaries have the status of unsecured creditors of the Company, and the Plan constitutes a mere promise by the Company to make benefit payments in the future. A Participant's or Beneficiary's interest in the Plan is an unsecured claim against the general assets of the Company, and neither the Participant nor a Beneficiary has any right against the account until the Plan has distributed the benefit. All amounts credited to an account are the general assets of the Company and may be disposed of or used by the Company in such manner as it determines.

Notwithstanding the first paragraph of this Section 8, the Company will make deposits to a trust pursuant to a Trust Agreement, a copy of which is attached, as provided above. Such Trust Agreement created by the Company is intended to be a grantor trust, and any assets held by such trust to assist the Company in meeting its obligations under the Plan will conform to the terms of the model trust, as described in Revenue Procedure 92-64, 1992-2 C.B. 422, promulgated by the Internal Revenue Service. The Company will make a transfer of cash to the trust annually in the amount necessary to pay the deferred compensation required.

It is the intention of the parties that this Plan and the accompanying Trust Agreement shall constitute an unfunded arrangement maintained for the purpose of providing deferred compensation for a select group of management or highly compensated employees for purposes of Title I of ERISA.

9. Administration.

9.1. Plan Committee. The Plan shall be administered by the Plan Committee. The Plan Committee shall have full authority and power to administer and construe the Plan, subject to applicable requirements of law. Without limiting the generality of the foregoing, the Plan Committee shall have the powers indicated in the foregoing Sections of the Plan and the following additional powers and duties:

a. To make and enforce such rules and regulations as it deems necessary or proper for the administration of the Plan;

b. To interpret the Plan and to decide all questions concerning the Plan;

c. To determine the amount and the recipient of any payments to be made under the Plan;

d. To designate and value any investments deemed held in the Accounts; and

e. To make all other determinations and to take all other steps necessary or advisable for the administration of the Plan.

All decisions made by the Plan Committee pursuant to the provisions of the Plan shall be made in its sole discretion and shall be final; conclusive, and binding upon all parties.

9.2. Delegation of Duties. The Plan Committee may delegate such of its duties and may engage such experts and other persons as it deems appropriate in connection with administering the Plan. The Plan Committee shall be fully protected in any action taken, in good faith, in reliance upon any opinions or reports furnished them by any such experts or other persons.

9.3. Indemnification of Committee. The Company agrees to indemnify and to defend to the fullest extent permitted by law any person serving as a member of the Plan Committee, and each employee of the Company or any of its affiliates appointed by the Plan Committee to carry out duties under this Plan, against all liabilities, damages, costs and expenses (including attorneys' fees and amounts paid in settlement of any claims approved by the Company) occasioned by any act or omission to act in connection with the Plan, if such act or omission is in good faith.

9.4. Liability. To the extent permitted by law, neither the Plan Committee nor any other person shall incur any liability for any acts or for any failure to act except for liability arising out of such person's own willful misconduct or willful breach of the Plan.

9.5. Claims Review Procedure.

a. A claim for benefits may be filed, in writing, with the Plan Committee. A written disposition of a claim shall be furnished to the claimant within a reasonable time after the claim for benefits is filed. In the event a claim for benefits is denied, the Plan Committee shall provide the claimant with the reasons for denial.

b. A claimant whose claim for benefits was denied may file for a review of such denial, with the Plan Committee, no later than 60 days after he has received written notification of the denial.

c. The Plan Committee shall give a request for review a full and fair review. If the claim for benefits is denied upon completion of a full and fair review, notice of such denial shall be provided to the claimant within 60 days after the Plan Committee's receipt of such written claim for review. This 60-day period may be extended in the event of special circumstances. Such special circumstances shall be communicated to the claimant in writing within the 60-day period. If there is an extension, a decision shall be made as soon as possible, but not later than 120 days after receipt by the Plan Committee of such claim for review.

d. If benefits are provided or administered by an insurance company, insurance service, or other similar organization which is subject to regulation under the insurance laws of a state, the claims procedure relating to these benefits may provide for review. If so, that company, service, or organization will be the entity to which claims are addressed.

10. General Provisions

10.1. Designation of Beneficiary. Each Participant shall designate, in writing, prior to the date he first becomes a Participant in the Plan, one or more beneficiaries to receive his benefit under the provisions of Section 5.3. The Participant shall file the written designation with the Plan Committee. The Participant may revoke a previous beneficiary designation by filing a new written beneficiary designation with the Plan Committee.

In any event, if a Participant or Beneficiary who has designated another Beneficiary is divorced, all beneficiary designations executed prior to the effective date of the dissolution of marriage (or other decree or order entered under applicable state law) are automatically revoked under the terms of this Section 10.1. In such event, the Participant or Beneficiary may designate one or more Beneficiaries in accordance with the terms of this Section 10.1. If none is made following the effective date of the dissolution of the marriage, the individual's benefit shall pass under the laws of intestate succession and the terms of the next following paragraph.

If a Participant fails to file a valid designation of beneficiary with the Plan Committee under the provisions of this Section 10.1, or if a designated Beneficiary fails to survive to receive any or all payments due hereunder, then the death benefit payable under this Plan shall be payable to the Participant's (or the Beneficiary's) spouse; if no spouse survives, then to the Participant's (or Beneficiary's) children, with equal shares among living children and with the living descendants of a deceased child receiving equal portions of

the deceased child's share; in the absence of spouse or descendants, to the Participant's (or Beneficiary's) parents; and in the absence of spouse, descendants or parents, to the Participant's (or Beneficiary's) brothers and sisters, with the living descendants of a deceased brother and those of a deceased sister receiving equal portions of the deceased brother's or sister's share; in the absence of any of the persons named herein, to the Participant's (or Beneficiary's) estate.

For purposes of this Section 10.1, the term "descendant" means all persons who are descended from the person referred to either by birth to or legal adoption by such person, and "child" or "children" includes adopted children.

10.2. Benefits Not Assignable. The rights of each Participant are not subject in any manner to anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment, or garnishment by creditors of the Participant or any Beneficiary. Neither the Participant nor Beneficiary may assign, transfer or pledge the benefits under this Plan. Any attempt to assign, transfer or pledge a Participant's benefits under this Plan is void.

10.3. Benefit. This Plan constitutes an agreement between the Company and each of the Participants which is binding upon and inures to the Company, its successors and assigns and upon the Participant and his heirs and legal representatives.

10.4. Headings. The headings of the Articles and Sections of this Plan are included for purposes of convenience only, and shall not affect the construction or interpretation of any of it provisions.

10.5. Notices. All notices, requests, demands, and other communications under this Plan shall be in writing and shall be deemed to have been duly given on the date of service if served personally on the party to whom notice is to be given, or on the third day after mailing if mailed to the party to whom notice is to be given, by first class mail, registered or certified (return receipt requested), postage prepaid, and properly addressed to the last known address to each party as set forth on the first page thereof. Any party may change its address for purposes of this Section by giving the other parties written notice of the new address in the manner set forth above.

10.6. No Loans. The Plan does not permit any loans to be made to any Participant or Beneficiary.

10.7. Gender Usage. The use of the masculine gender includes the feminine gender for all purposes of this Plan.

10.8. Expenses. Costs of administration of the Plan shall be paid by the Company.

IN WITNESS WHEREOF, the Company has executed this Amended and Restated Deferred Compensation Plan (2018) on November 7, 2017, effective as of the Effective Date.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Zubretsky, certify that:

1. I have reviewed the report on Form 10-K for the period ended December 31, 2017 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and to the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph W. White, certify that:

1. I have reviewed this annual report on Form 10-K for the period ended December 31, 2017 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

September 30, 2017

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality managed health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

The Health Plans segment consists of health plans operating in 12 states and the Commonwealth of Puerto Rico. As of September 30, 2017, these health plans served approximately 4.5 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Affordable Care Act Marketplace (Marketplace) members, most of whom receive government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO).

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new request for proposal (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled (ABD); and regions or service areas.

The Molina Medicaid Solutions segment provides support to state government agencies in the administration of their Medicaid programs, including business processing, information technology development and administrative services.

The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

Recent Developments — Health Plans Segment

Illinois Health Plan. In August 2017, Molina Healthcare of Illinois, Inc. was awarded a statewide Medicaid managed care contract by the Illinois Department of Healthcare and Family Services. This Medicaid contract further integrates behavioral health and physical health by combining the State's three current managed care programs into one program. The contract begins January 1, 2018, for four years with options to renew annually for up to four additional years.

Mississippi Health Plan. In June 2017, Molina Healthcare of Mississippi, Inc. was awarded a Medicaid Coordinated Care Contract for the statewide administration of the Mississippi Coordinated Access Network (MississippiCAN). The operational start date for the program is currently scheduled for October 1, 2018, pending the completion of a readiness review. The initial term of the contract is through June 2020, with options to renew annually for up to two additional years.

Washington Health Plan. In May 2017, Molina Healthcare of Washington, Inc. was selected by the Washington State Health Care Authority to negotiate and enter into managed care contracts for the North Central region of the state's Apple Health Integrated Managed Care Program. The start date for the new contract is scheduled for January 1, 2018.

Terminated Medicare Acquisition. In August 2016, we entered into agreements with each of Aetna Inc. and Humana Inc. to acquire certain assets related to their Medicare Advantage business. The transaction was subject to closing

conditions including the completion of the proposed acquisition of Humana by Aetna (the Aetna-Humana Merger). In January 2017, the U.S. District Court for the District of Columbia granted the request for relief made by the U.S. Department of Justice in its civil antitrust lawsuit against Aetna and Humana, to prohibit the Aetna-Humana Merger. In February 2017, our agreements with each of Aetna and Humana were terminated by the parties pursuant to the terms of the agreements. Under the termination agreements, we received an aggregate termination fee of $75 million from Aetna and Humana in the first quarter of 2017, which is reported in "Other income, net" in the accompanying consolidated statements of operations.

New York Health Plan. In August 2016, we closed on our acquisition of the outstanding equity interests of Today's Options of New York, Inc., which now operates as Molina Healthcare of New York, Inc. The purchase price allocation was completed, and the final purchase price adjustments were recorded, in the first quarter of 2017. Such adjustments were insignificant, and the final cash purchase price was $38 million.

Impairment Losses

Molina Medicaid Solutions segment. In the third quarter of 2017, we recorded a non-cash goodwill impairment loss of $28 million. See Note 10, "Impairment Losses."

Other segment. In the third quarter of 2017, we recorded a non-cash goodwill impairment loss of $101 million for our Pathways subsidiary. In the second quarter of 2017, we recorded non-cash goodwill and intangible assets impairment losses of $72 million, primarily for our Pathways subsidiary. See Note 10, "Impairment Losses."

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities (VIEs) in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such VIEs are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2017.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2016. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2016 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2016 audited consolidated financial statements.

2. Significant Accounting Policies

Certain of our significant accounting policies are discussed within the note to which they specifically relate.

Revenue Recognition – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services, and premiums collected in advance are deferred. Certain components of premium revenue are subject to accounting estimates and fall into two broad categories discussed in further detail below: 1) "Contractual Provisions That May Adjust or Limit Revenue or Profit;" and 2) "Quality Incentives."

Contractual Provisions That May Adjust or Limit Revenue or Profit

Medicaid

Medical Cost Floors (Minimums), and Medical Cost Corridors: A portion of our premium revenue may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $119 million and $272 million at September 30, 2017 and December 31, 2016, respectively, to "Amounts due government agencies." Approximately $82 million and $244 million of the liability accrued at September 30, 2017 and December 31, 2016, respectively, relates to our participation in Medicaid Expansion programs.

In certain circumstances, our health plans may receive additional premiums if amounts spent on medical care costs exceed a defined maximum threshold. Receivables relating to such provisions were insignificant at September 30, 2017 and December 31, 2016.

Profit Sharing and Profit Ceiling: Our contracts with certain states contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. Liabilities for profits in excess of the amount we are allowed to retain under these provisions were insignificant at September 30, 2017 and December 31, 2016.

Retroactive Premium Adjustments: State Medicaid programs periodically adjust premium rates on a retroactive basis. In these cases, we must adjust our premium revenue in the period in which we learn of the adjustment, rather than in the months of service to which the retroactive adjustment applies.

Medicare

Risk Adjustment: Our Medicare premiums are subject to retroactive increase or decrease based on the health status of our Medicare members (measured as a member risk score). We estimate our members' risk scores and the related amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health status, risk scores and the Centers for Medicare & Medicaid Services (CMS) practices. Consolidated balance sheet amounts related to anticipated Medicare risk adjustment premiums and Medicare Part D settlements were insignificant at September 30, 2017 and December 31, 2016.

Minimum MLR: Additionally, federal regulations have established a minimum annual medical loss ratio (Minimum MLR) of 85% for Medicare. The medical loss ratio represents medical costs as a percentage of premium revenue. Federal regulations define what constitutes medical costs and premium revenue. If the Minimum MLR is not met, we may be required to pay rebates to the federal government. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of operations.

Marketplace

Premium Stabilization Programs: The Affordable Care Act (ACA) established Marketplace premium stabilization programs effective January 1, 2014. These programs, commonly referred to as the "3R's," include a permanent risk adjustment program, a transitional reinsurance program, and a temporary risk corridor program. We record receivables or payables related to the 3R programs and the Minimum MLR when the amounts are reasonably estimable as described below, and, for receivables, when collection is reasonably assured. Our receivables (payables) for each of these programs, as of the dates indicated, were as follows:

	September 30, 2017			December 31, 2016
	Current Benefit Year	Prior Benefit Years	Total	
	(In millions)			
Risk adjustment	$ (655)	$ —	$ (655)	$ (522)
Reinsurance	—	10	10	55
Risk corridor	—	—	—	(1)
Minimum MLR	(27)	—	(27)	(1)

- Risk adjustment: Under this permanent program, our health plans' composite risk scores are compared with the overall average risk score for the relevant state and market pool. Generally, our health plans will make a risk transfer payment into the pool if their composite risk scores are below the average risk score, and will receive a risk transfer payment from the pool if their composite risk scores are above the average risk score. We estimate our ultimate premium based on insurance policy year-to-date experience, and recognize estimated premiums relating to the risk adjustment program as an adjustment to premium revenue in our consolidated statements of operations.

- Reinsurance: This program was designed to provide reimbursement to insurers for high cost members and ended December 31, 2016; we expect to settle the outstanding receivable balance in 2017.

- Risk corridor: This program was intended to limit gains and losses of insurers by comparing allowable costs to a target amount as defined by CMS, and ended December 31, 2016; all outstanding balances were settled as of September 30, 2017.

Additionally, the ACA established a Minimum MLR of 80% for the Marketplace. The medical loss ratio represents medical costs as a percentage of premium revenue. Federal regulations define what constitutes medical costs and premium revenue. If the Minimum MLR is not met, we may be required to pay rebates to our Marketplace policyholders. Each of the 3R programs is taken into consideration when computing the Minimum MLR. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of operations.

Quality Incentives

At several of our health plans, revenue ranging from approximately 1% to 3% of certain health plan premiums is earned only if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the periods presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of September 30, 2017 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of September 30, 2017.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
	(Dollars in millions)			
Maximum available quality incentive premium - current period	$ 36	$ 33	$ 113	$ 114
Quality incentive premium revenue recognized in current period:				
Earned current period	$ 24	$ 26	$ 72	$ 80
Earned prior periods	3	—	9	54
Total	$ 27	$ 26	$ 81	134
Quality incentive premium revenue recognized as a percentage of total premium revenue	0.6%	0.6%	0.6%	1.1%

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which generally differs from the U.S. federal statutory rate primarily because of state taxes, nondeductible expenses such as the Health Insurer Fee (HIF), goodwill impairment, certain compensation, and other general and administrative expenses. The effective tax rate was not impacted by HIF in 2017 given the 2017 HIF moratorium.

The effective tax rate may be subject to fluctuations during the year, particularly as a result of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

Premium Deficiency Reserves on Loss Contracts

We assess the profitability of our medical care policies to identify groups of contracts where current operating results or forecasts indicate probable future losses. If anticipated future variable costs exceed anticipated future premiums and investment income, a premium deficiency reserve is recognized. We assume a full-year CSR reconciliation (see further information below) in the premium deficiency reserve calculation for the Marketplace program. We recorded a premium deficiency reserve to “Medical claims and benefits payable” on our accompanying consolidated balance sheets relating to our Marketplace program of $30 million as of December 31, 2016, which increased to $100 million as of June 30, 2017, and then decreased to $70 million as of September 30, 2017. If a nine-month CSR reconciliation had been included in the computation rather than a full year, the premium deficiency reserve would have increased by $55 million, to $125 million as of September 30, 2017. The theoretical $55 million increase to the premium deficiency reserve is less than the potential fourth quarter 2017 impact described below, or $85 million, because such adjustment only recognizes the potential CSR impact to the extent it would have created a deficiency in premiums at September 30, 2017.

Marketplace Cost Share Reduction (CSR) Update

Our third quarter results do not include any potential impact from the October 12, 2017, direction to Centers for Medicare and Medicaid Services (CMS) from Acting Department of Health and Human Services Secretary Hargan to cease payment of Marketplace CSR subsidies. At September 30, 2017, we had a total of approximately $220 million in excess CSR subsidies, recorded as a payable to CMS. This payable represents the extent to which payments received by us from CMS exceeded our estimate of the actual cost of member subsidies incurred by us through September 30, 2017.

We expect to incur approximately $85 million in unreimbursed expense associated with the cessation of CSR subsidies in the fourth quarter of 2017. It has been the practice of CMS to perform a reconciliation on an annual basis of CSR subsidies paid to all health plans against the actual costs incurred by the health plans. Were such a reconciliation to be performed for the full calendar year of 2017—consistent with past practice—we would be able to offset nearly all of the $85 million expense incurred in the fourth quarter against the excess amounts received prior to September 30, 2017. However, should CMS transition to a nine month reconciliation period ending September 30, 2017—the last month for which CSR subsidies have been paid—the absence of CSR subsidy reimbursement would reduce income before income tax expense by approximately $85 million in the fourth quarter of 2017.

Recent Accounting Pronouncements

Goodwill Impairment. In January 2017, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2017-04, *Simplifying the Test for Goodwill Impairment*, which eliminates the requirement to calculate the implied fair value of goodwill to measure a goodwill impairment loss. Instead, an impairment loss is measured as the excess of the carrying amount of the reporting unit, including goodwill, over the fair value of the reporting unit. ASU 2017-04 is effective beginning January 1, 2020; we early adopted ASU 2017-04 as of June 30, 2017, in connection with the interim assessment of our Pathways subsidiary. See further discussion at Note 10, “Impairment Losses.”

Restricted Cash. In November 2016, the FASB issued ASU 2016-18, *Restricted Cash,* which will require us to include in our consolidated statements of cash flows the balances of cash, cash equivalents, restricted cash and restricted cash equivalents. When these items are presented in more than one line item on the balance sheet, the new guidance requires a reconciliation of the totals in the statement of cash flows to the related captions in the balance sheet. Transfers between cash and cash equivalents and restricted cash and restricted cash equivalents will no longer be presented in the statement of cash flows. ASU 2016-18 is effective beginning January 1, 2018; early adoption is permitted. We are currently evaluating the changes that will be required in our consolidated statements of cash flows.

Stock Compensation. In March 2016, the FASB issued ASU 2016-09, *Improvements to Employee Share-Based Payment Accounting*, which amends ASC Topic 718, *Compensation – Stock Compensation*. ASU 2016-09 simplifies several aspects of accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures, statutory tax and classification in the statement of cash flows. We adopted ASU 2016-09 in the first quarter of 2017; such adoption did not significantly impact our consolidated financial statements. In addition, the prior period presentation in the statement of cash flows was not adjusted because such adjustments were insignificant.

Leases. In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842),* as modified by ASU 2017-03, *Transition and Open Effective Date Information*. Under ASU 2016-02, an entity will be required to recognize assets and liabilities for the rights and obligations created by leases on the entity’s balance sheet for both finance and operating leases. For leases with a term of 12 months or less, an entity can elect to not recognize lease assets and lease liabilities and expense the lease over a straight-line basis for the term of the lease. ASU 2016-02 will require new disclosures that depict the amount, timing, and uncertainty of cash flows pertaining to an entity’s leases. ASU 2016-02 is effective for us beginning January 1, 2019, and must be adopted using a modified retrospective approach for annual and interim periods beginning after December 15, 2018. Early adoption is permitted. Under this guidance, we will record assets and liabilities relating primarily to our long-term office leases. We are evaluating the effect to our consolidated financial statements.

Revenue Recognition. In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers (Topic 606).* We intend to adopt this standard and the related modifications on January 1, 2018, using the modified retrospective approach. Under this approach, the cumulative effect of initially applying the guidance will be reflected as an adjustment to beginning retained earnings.

We have determined that the insurance contracts of our Health Plans segment, which segment constitutes the vast majority of our operations, are excluded from the scope of Topic 606 because the recognition of revenue under these contracts is dictated by other accounting standards governing insurance contracts.

For our Molina Medicaid Solutions segment, we have reevaluated our earlier assessment and determined that revenue for contracts that include design, development and implementation of Medicaid managed care systems shall be deferred until the system 'go-live' date, and then generally recognized on a straight-line basis over the hosting period. This approach is consistent with the FASB/IASB Joint Transition Resource Group for Revenue Recognition view for entities that provide software as a service solution, and similar to our historical revenue recognition methodology. We are continuing to evaluate the existence of customers' rights with regard to renewal options and whether such rights may constitute separate performance obligations. We expect that cost of service revenue will generally be recognized in a manner consistent with the corresponding revenue recognition.

We believe the cumulative adjustment to retained earnings associated with the adoption of Topic 606 effective January 1, 2018, will be insignificant for both our Molina Medicaid Solutions and Other segments.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the Securities and Exchange Commission (SEC) did not have, or are not believed by management to have, a significant impact on our present or future consolidated financial statements.

3. Net (Loss) Income per Share

The following table sets forth the calculation of basic and diluted net (loss) income per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
	(In millions, except net income per share)			
Numerator:				
Net (loss) income	$ (97)	$ 42	$ (250)	$ 99
Denominator:				
Denominator for basic net (loss) income per share	57	56	56	55
Effect of dilutive securities:				
1.125% Warrants [1]	—	—	—	1
Denominator for diluted net (loss) income per share	57	56	56	56
Net (loss) income per share: [2]				
Basic	$ (1.70)	$ 0.77	$ (4.44)	$ 1.79
Diluted	$ (1.70)	$ 0.76	$ (4.44)	$ 1.77
Potentially dilutive common shares excluded from calculations:				
1.125% Warrants [1]	2	—	2	—
1.625% Notes [1]	1	—	—	—

(1) For more information regarding the 1.125% Warrants, refer to Note 9, "Stockholders' Equity." For more information regarding the 1.625% Notes, refer to Note 7, "Debt." The dilutive effect of all potentially dilutive common shares is calculated using the treasury stock method. Potentially dilutive common shares were not included in the computation of diluted net loss per share in the three and nine months ended September 30, 2017, because to do so would have been anti-dilutive.
(2) Source data for calculations in thousands.

4. Fair Value Measurements

We consider the carrying amounts of cash, cash equivalents and other current assets and current liabilities (not including derivatives and the current portion of long-term debt) to approximate their fair values because of the

relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to the three-tier fair value hierarchy. For a description of the methods and assumptions that we use to a) estimate the fair value; and b) determine the classification according to the fair value hierarchy for each financial instrument, see Note 5, "Fair Value Measurements," in our 2016 Annual Report on Form 10-K.

Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of September 30, 2017, included the price of our common stock, the time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 8, "Derivatives," the 1.125% Call Option asset and the 1.125% Conversion Option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of operations. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

The net changes in fair value of Level 3 financial instruments were insignificant to our results of operations for the nine months ended September 30, 2017.

Our financial instruments measured at fair value on a recurring basis at September 30, 2017, were as follows:

	Total	Quoted Market Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(In millions)		
Corporate debt securities	$ 1,162	$ —	$ 1,162	$ —
Government-sponsored enterprise securities (GSEs)	220	220	—	—
Municipal securities	131	—	131	—
Asset-backed securities	125	—	125	—
U.S. treasury notes	121	121	—	—
Certificates of deposit	28	—	28	—
Subtotal - current investments	1,787	341	1,446	—
Corporate debt securities	229	—	229	—
U.S. treasury notes	97	97	—	—
Subtotal - current restricted investments	326	97	229	—
1.125% Call Option derivative asset	425	—	—	425
Total assets	$ 2,538	$ 438	$ 1,675	$ 425
1.125% Conversion Option derivative liability	$ 425	$ —	$ —	$ 425
Total liabilities	$ 425	$ —	$ —	$ 425

Our financial instruments measured at fair value on a recurring basis at December 31, 2016, were as follows:

	Total	Quoted Market Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(In millions)		
Corporate debt securities	$ 1,179	$ —	$ 1,179	$ —
GSEs	231	231	—	—
Municipal securities	142	—	142	—
Asset-backed securities	69	—	69	—
U.S. treasury notes	84	84	—	—
Certificates of deposit	53	—	53	—
Subtotal - current investments	1,758	315	1,443	—
1.125% Call Option derivative asset	267	—	—	267
Total assets	$ 2,025	$ 315	$ 1,443	$ 267
1.125% Conversion Option derivative liability	$ 267	$ —	$ —	$ 267
Total liabilities	$ 267	$ —	$ —	$ 267

There were no current restricted investments as of December 31, 2016.

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted market prices for similar securities in active markets or quoted prices for identical securities in inactive markets. The carrying amount and estimated fair value of the amount due under our Credit Facility is classified as a Level 3 financial instrument, because certain inputs used to determine its fair value are not observable. As of September 30, 2017, the carrying value of the amount due under the Credit Facility approximates it fair value because of the recency of this borrowing during the third quarter of 2017.

	September 30, 2017		December 31, 2016	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	(In millions)			
5.375% Notes	$ 692	$ 726	$ 691	$ 714
1.125% Convertible Notes	489	927	471	792
4.875% Notes	325	324	—	—
Credit Facility	300	300	—	—
1.625% Convertible Notes	292	373	284	344
	$ 2,098	$ 2,650	$ 1,446	$ 1,850

5. Investments

Available-for-Sale Investments

We consider all of our investments classified as current assets (including restricted investments) to be available-for-sale. Certain of our senior notes, as further discussed in Note 7, “Debt,” contain a limitation on the use of proceeds which required us to deposit the net proceeds from their issuance into a segregated deposit account, a current asset reported as “Restricted investments” in the accompanying consolidated balance sheets. Such proceeds, while restricted as to their use and held in a segregated deposit account, are available-for-sale based upon our contractual liquidity requirements.

The following tables summarize our investments as of the dates indicated:

	September 30, 2017			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 1,162	$ 1	$ 1	$ 1,162
GSEs	221	—	1	220
Municipal securities	132	—	1	131
Asset-backed securities	125	—	—	125
U.S. treasury notes	121	—	—	121
Certificates of deposit	28	—	—	28
Subtotal - current investments	1,789	1	3	1,787
Corporate debt securities	229	—	—	229
U.S. treasury notes	97	—	—	97
Subtotal - current restricted investments	326	—	—	326
	$ 2,115	$ 1	$ 3	$ 2,113

	December 31, 2016			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 1,180	$ 1	$ 2	$ 1,179
GSEs	232	—	1	231
Municipal securities	143	—	1	142
Asset-backed securities	69	—	—	69
U.S. treasury notes	84	—	—	84
Certificates of deposit	53	—	—	53
	$ 1,761	$ 1	$ 4	$ 1,758

There were no current restricted investments as of December 31, 2016.

The contractual maturities of our available-for-sale investments as of September 30, 2017 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 1,154	$ 1,153
Due after one year through five years	944	943
Due after five years through ten years	17	17
	$ 2,115	$ 2,113

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the three and nine months ended September 30, 2017 and 2016 were insignificant.

We have determined that unrealized losses at September 30, 2017 and December 31, 2016, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the creditworthiness of the issuers. So long as we maintain the intent and ability to hold these securities to maturity, we are unlikely to experience losses. In the event that we dispose of these securities before maturity, we expect that realized losses, if any, will be insignificant.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of September 30, 2017:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 783	$ 1	314	$ —	$ —	—
GSEs	—	—	—	58	1	20
Municipal securities	97	1	116	—	—	—
	$ 880	$ 2	430	$ 58	$ 1	20

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a continuous loss position for 12 months or more as of December 31, 2016:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 542	$ 2	378	$ —	$ —	—
GSEs	198	1	73	—	—	—
Municipal securities	101	1	129	—	—	—
	$ 841	$ 4	580	$ —	$ —	—

Held-to-Maturity Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by government authorities primarily in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. The use of these funds is limited as required by regulation in the various states in which we operate, or as needed in the event of insolvency of capitated providers. Therefore, such investments are reported as non-current “Restricted investments” in the accompanying consolidated balance sheets. We have the ability to hold these restricted investments until maturity, and as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates.

The contractual maturities of our held-to-maturity restricted investments, which are carried at amortized cost, which approximates fair value, as of September 30, 2017 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 100	$ 100
Due after one year through five years	17	17
	$ 117	$ 117

6. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated:

	September 30, 2017	December 31, 2016
	(In millions)	
Fee-for-service claims incurred but not paid (IBNP)	$ 1,681	$ 1,352
Pharmacy payable	125	112
Capitation payable	57	37
Other	615	428
	$ 2,478	$ 1,929

"Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various government agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of operations. Non-risk provider payables amounted to $403 million and $225 million as of September 30, 2017 and December 31, 2016, respectively.

Reinsurance recoverables of $16 million and $72 million as of September 30, 2017 and 2016, respectively, are included in "Receivables" in the accompanying consolidated balance sheets.

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts presented for "Components of medical care costs related to: Prior periods" represent the amounts by which our original estimate of medical claims and benefits payable at the beginning of the period were less (more) than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Nine Months Ended September 30,	
	2017	2016
	(Dollars in millions)	
Medical claims and benefits payable, beginning balance	$ 1,929	$ 1,685
Components of medical care costs related to:		
Current period	12,813	11,120
Prior periods	9	(190)
Total medical care costs	12,822	10,930
Change in non-risk provider payables	172	70
Payments for medical care costs related to:		
Current period	10,944	9,536
Prior periods	1,501	1,278
Total paid	12,445	10,814
Medical claims and benefits payable, ending balance	$ 2,478	$ 1,871
Benefit from prior period as a percentage of:		
Balance at beginning of period	(0.5)%	11.3%
Premium revenue, trailing twelve months	— %	1.2%
Medical care costs, trailing twelve months	(0.1)%	1.3%

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims deviation and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate—we only know when the circumstances for any one or more factors are out of the ordinary.

The differences between our original estimates and the amounts ultimately paid out (or now expected to be ultimately paid out) for the most part related to IBNP. While many related factors working in conjunction with one another serve to determine the accuracy of our estimates, we are seldom able to quantify the impact that any single

factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

Prior period development of our estimate as of December 31, 2016, through September 30, 2017, was unfavorable by $9 million, which is substantially less than the favorable prior period development of $190 million we recognized for the same period in the prior year. Further, the unfavorable development through September 30, 2017, was less than the 8% to 10% favorable development we typically expect.

We believe that the most significant uncertainties surrounding our IBNP estimates at September 30, 2017 are as follows:

- At our Florida health plan, the inventory of unpaid claims increased significantly during the first two quarters of 2017, and then dropped in the third quarter. For this reason, the timing between the dates of service and the dates claims are paid will be impacted, making our liability estimates subject to more than the usual amount of uncertainty.
- At our Illinois health plan, in 2017 we paid a large number of claims that had previously been denied and were subsequently disputed by providers. We have also established a liability for additional expected claims resulting from provider disputes. This has created some distortion in the claims payment patterns, making our liability estimates subject to more than the usual amount of uncertainty.
- At our California health plan, we adjusted our inpatient authorization process. As a result, due to the expected increase in authorized inpatient stays, our liability estimates are subject to more than the usual amount of uncertainty.
- At our Illinois and New York health plans, we implemented a new process for increased quality review of claims payments. While we do not anticipate this new process will impact the percentage of claims paid within the timely turnaround requirements, we believe it will have a minor impact on the timing of some paid claims. For this reason, our liability estimates in these two health plans are subject to more than the usual amount of uncertainty.
- At our Puerto Rico health plan, Hurricane Maria had a significant impact on both utilization of services and our ability to process claims payments in Puerto Rico. For these reasons, we believe our liability estimates are subject to more than the usual amount of uncertainty.

7. Debt

Substantially all of our debt is held at the parent, which is reported in the Other segment. The following table summarizes our outstanding debt obligations and their classification in the accompanying consolidated balance sheets (in millions):

	September 30, 2017	December 31, 2016
Current portion of long-term debt:		
1.125% Convertible Notes, net of unamortized discount	$ 494	$ 477
1.625% Convertible Notes, net of unamortized premium and discount	293	—
Lease financing obligations	1	1

4.875% Notes due 2025

On June 6, 2017, we completed the private offering of $330 million aggregate principal amount of senior notes (4.875% Notes) due June 15, 2025, unless earlier redeemed. Interest on the 4.875% Notes is payable semiannually in arrears on June 15 and December 15. According to their terms, the guarantees under the 4.875% Notes mirror those of the Credit Facility, defined and described below. See Note 16, “Supplemental Condensed Consolidating Financial Information,” for more information on the guarantors. The 4.875% Notes contain customary non-financial covenants and change of control provisions.

The 4.875% Notes contain a limitation on the use of proceeds which required us to deposit the net proceeds from their issuance into a segregated deposit account, a current asset reported as “Restricted investments” in our consolidated balance sheets. These funds may be used by us as follows:

- On or prior to August 20, 2018, to:
  - Redeem, repurchase, repay, tender for, or acquire for value all or any portion of our 1.625% Convertible Notes, defined and discussed further below, or to satisfy the cash portion of any consideration due upon any conversion of the 1.625% Convertible Notes; and/or
  - Pay any interest due on all or any portion of the 4.875% Notes.
- On or after August 20, 2018, to repurchase all or any portion of the 1.625% Convertible Notes that we are obligated to repurchase; and
- Subsequent to August 20, 2018 (or such earlier date in the event that there are no longer any 1.625% Convertible Notes outstanding), in any other manner not otherwise prohibited in the indenture governing the 4.875% Notes.

5.375% Notes due 2022

We have outstanding $700 million aggregate principal amount of senior notes (5.375% Notes) due November 15, 2022, unless earlier redeemed. According to their terms, the guarantees under the 5.375% Notes mirror those of the Credit Facility, defined and described below. See Note 16, “Supplemental Condensed Consolidating Financial Information,” for more information on the guarantors.

Credit Facility

In January 2017, we entered into an amended unsecured $500 million revolving credit facility (Credit Facility), referred to as the First Amendment. The Credit Facility has a term of five years and all amounts outstanding will be due and payable on January 31, 2022. As of September 30, 2017, $300 million was outstanding under the Credit Facility, and we were in compliance with all financial and non-financial covenants under the Credit Facility. Also as of September 30, 2017, outstanding letters of credit amounting to $6 million reduced our remaining borrowing capacity under the Credit Facility to $194 million.

In addition to increasing amounts available to borrow under the Credit Facility and extending its term, the First Amendment provided that all guarantors immediately prior to January 3, 2017, other than Molina Information Systems, LLC, d/b/a Molina Medicaid Solutions, Molina Pathways, LLC, and Pathways Health and Community Support LLC, were automatically and unconditionally released from their obligations as guarantors of the Credit Facility and the 5.375% Notes.

The Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. In February 2017, we entered into a second amendment to the Credit Facility (the Second Amendment) which modified the Credit Facility's definition of the earnings measure used in the financial covenant computations to a) allow us to receive credit for risk corridor payments owed to, but not received or accrued by us during 2016; and b) account for the difference between the amount of actual risk transfer payments made or accrued by us during 2016, and the amount of risk transfer payments that would have been due under the federal government's proposed 2018 risk adjustment payment transfer formula.

In May 2017, we entered into a third amendment to the Credit Facility (the Third Amendment) which modified the Credit Facility's definition of specified cash, to permit cash that is either subject to customary escrow arrangements or held in a segregated account to be netted from the Credit Facility's consolidated net leverage ratio if the use of the cash is limited to the repayment of other indebtedness. The Third Amendment also adds a carve-out to the Credit Facility's negative pledge covenant to allow for the escrow arrangements and segregated accounts.

In August 2017, we entered into a fourth amendment to the Credit Facility (the Fourth Amendment). The Fourth Amendment modified the definition of consolidated adjusted EBITDA to permit the add-back of certain restructuring charges and cost savings subject to certain limitations, and modified the definition of the consolidated interest coverage ratio to include, when calculating such ratio, consolidated interest expense "paid in cash" only.

Convertible Senior Notes

We have outstanding $550 million aggregate principal amount of 1.125% cash convertible senior notes due January 15, 2020 (1.125% Convertible Notes), unless earlier repurchased or converted. We also have outstanding $302 million aggregate principal amount of 1.625% convertible senior notes due August 14, 2044 (1.625% Convertible Notes), unless earlier repurchased, redeemed, or converted. The 1.125% Convertible Notes are convertible entirely into cash, and the 1.625% Convertible Notes are convertible partially into cash, each prior to their respective maturity dates under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger.

The stock price trigger for the 1.125% Convertible Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended September 30, 2017; therefore, they are convertible into cash and are reported in current portion of long-term debt as of September 30, 2017.

The stock price trigger for the 1.625% Convertible Notes is $75.51 per share. The 1.625% Convertible Notes did not meet this stock price trigger in the quarter ended September 30, 2017. However, on contractually specified dates beginning in 2018, holders of the 1.625% Convertible Notes may require us to repurchase some or all of such notes. In addition, beginning May 15, 2018 until August 19, 2018, holders may convert some or all of the 1.625% Convertible Notes. Because of these put and conversion features, the 1.625% Convertible Notes are reported in current portion of long-term debt as of September 30, 2017. As noted above, because the proceeds from the 4.875% Notes are initially restricted to payments upon conversion or redemption of the 1.625% Convertible Notes, such restricted investments are also classified as current in the accompanying consolidated balance sheets.

Cross-Default Provisions

The terms of our 4.875% Notes, 5.375% Notes and each of the 1.125% and 1.625% Convertible Notes contain cross-default provisions with the Credit Facility that are triggered upon an event of default under the Credit Facility, and when borrowings under the Credit Facility equal or exceed certain amounts as defined in the related indentures.

Debt Commitment Letter

In connection with the terminated Medicare Acquisition, we entered into a debt commitment letter with Barclays Bank PLC (Barclays) in August 2016. Under this debt commitment letter, Barclays agreed to lend us up to $400 million, subject to satisfaction of certain conditions, including consummation of the terminated Medicare Acquisition. The debt commitment letter automatically terminated in February 2017 as a result of the termination of this transaction. The costs associated with the debt commitment letter and its termination were reimbursed as described in Note 1, "Basis of Presentation–*Health Plans Segment Recent Developments*."

8. Derivatives

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the accompanying consolidated balance sheets:

	Balance Sheet Location	September 30, 2017	December 31, 2016
		(In millions)	
Derivative asset:			
1.125% Call Option	Current assets: Derivative asset	$ 425	$ 267
Derivative liability:			
1.125% Conversion Option	Current liabilities: Derivative liability	$ 425	$ 267

Our derivative financial instruments do not qualify for hedge treatment; therefore, the change in fair value of these instruments is recognized immediately in our consolidated statements of operations, and reported in "Other income, net." Gains and losses for our derivative financial instruments are presented individually in the accompanying consolidated statements of cash flows, "Supplemental cash flow information."

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Convertible Notes in 2013, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Convertible Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Convertible Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Convertible Notes), these transactions are intended to offset cash payments in excess of the principal amount of the 1.125% Convertible Notes due upon any conversion of such notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 4, "Fair Value Measurements."

1.125% Conversion Option. The embedded cash conversion option within the 1.125% Convertible Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Conversion Option, refer to Note 4, "Fair Value Measurements."

As of September 30, 2017, the 1.125% Call Option and the 1.125% Conversion Option were classified as a current asset and current liability, respectively, because the 1.125% Convertible Notes may be converted within twelve months of September 30, 2017, as described in Note 7, "Debt."

9. Stockholders' Equity

Stockholders' equity decreased $220 million during the nine months ended September 30, 2017 compared with stockholders' equity at December 31, 2016. The decrease was due primarily to the net loss of $250 million, partially offset by $29 million related to employee stock transactions in the nine months ended September 30, 2017.

1.125% Warrants

In connection with the Call Spread Overlay transaction described in Note 8, "Derivatives," in 2013, we issued 13,490,236 warrants with a strike price of $53.8475 per share. Under certain circumstances, beginning in April 2020, when the price of our common stock exceeds the strike price of the 1.125% Warrants, we will be obligated to issue shares of our common stock subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock exceeds the applicable strike price of the 1.125% Warrants. Refer to Note 3, "Net (Loss) Income per Share," for dilution information for the periods presented. We will not receive any additional proceeds if the 1.125% Warrants are exercised.

Stock Incentive Plans

In connection with our equity incentive plans and employee stock purchase plan, approximately 702,000 shares of common stock vested or were purchased, net of shares used to settle employees' income tax obligations, during the nine months ended September 30, 2017.

Except as noted below, we record share-based compensation as "General and administrative expenses" in the accompanying consolidated statements of operations. Restricted stock awards (RSAs), performance stock awards (PSAs) and performance stock units (PSUs) activity for the nine months ended September 30, 2017 is summarized below:

	Restricted Stock Awards	Performance Stock Awards	Performance Stock Units	Total	Weighted Average Grant Date Fair Value
Unvested balance, December 31, 2016	577,244	345,656	—	922,900	$ 58.15
Granted	386,273	—	231,100	617,373	57.16
Vested	(391,680)	(260,894)	(139,272)	(791,846)	57.78
Forfeited	(69,346)	—	—	(69,346)	54.37
Unvested balance, September 30, 2017	502,491	84,762	91,828	679,081	57.61

The total fair value of RSAs granted during the nine months ended September 30, 2017 and 2016 was $19 million and $18 million, respectively. The total fair value of RSAs which vested during the nine months ended September 30, 2017 and 2016 was $21 million and $22 million, respectively.

No PSAs were granted during the nine months ended September 30, 2017. The total fair value of PSAs granted during the nine months ended September 30, 2016 was $15 million. The total fair value of PSAs which vested during the nine months ended September 30, 2017 was $15 million. No PSAs vested during the nine months ended September 30, 2016.

The total fair value of PSUs granted during the nine months ended September 30, 2017 was $16 million. The total fair value of PSUs which vested during the nine months ended September 30, 2017 was $9 million. There were no PSUs granted or vested in 2016.

During the nine months ended September 30, 2017, the vesting of 133,957 RSAs, 153,574 PSAs and 139,272 PSUs was accelerated in connection with the termination of our former Chief Executive Officer (CEO) and former Chief Financial Officer (CFO) in May 2017. Share-based compensation expense of $38 million was recorded during the nine months ended September 30, 2017, of which $23 million was recorded to "Restructuring and separation costs" in the accompanying consolidated statements of operations. See Note 11, "Restructuring and Separation Costs" for further discussion. We recorded share-based compensation expense of $24 million in the nine months ended September 30, 2016.

As of September 30, 2017, there was $27 million of total unrecognized compensation expense related to unvested RSAs, PSAs, and PSUs, which we expect to recognize over a remaining weighted-average period of 2.2 years and 1.9 years, respectively. This unrecognized compensation cost assumes an estimated forfeiture rate of 4.5% for non-executive employees as of September 30, 2017.

10. Impairment Losses

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations. Goodwill is not amortized, but is subject to an annual impairment test. We are required to test at least annually for impairment, or more frequently if adverse events or changes in circumstances indicate that the asset may be impaired. When testing goodwill for impairment, we may first assess qualitative factors, such as industry and market factors, cost factors, and changes in overall performance, to determine if it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value. If our qualitative assessment indicates that goodwill impairment is more likely than not, we perform additional quantitative analysis. We may also elect to skip the qualitative testing and proceed directly to the quantitative testing.

An impairment loss is measured as the excess of the carrying amount of the reporting unit, including goodwill, over the fair value of the reporting unit. We estimate the fair values of our reporting units using discounted cash flows. We apply our weighted average cost of capital (WACC) as the best estimate to discount future estimated cash flows to present value. The WACC is based on externally available data considering market participants' cost of equity and debt, and capital structure. In addition, we apply a terminal growth rate that corresponds to the reporting unit's long-term growth prospects.

In the discounted cash flow analyses, we must make assumptions about a wide variety of internal and external factors, and consider the price that would be received to sell the reporting unit as a whole in an orderly transaction between market participants at the measurement date. Significant assumptions include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value beyond the discretely forecasted periods, and discount rates.

Molina Medicaid Solutions Segment

As described in Note 11, "Restructuring and Separation Costs," in the third quarter of 2017 we wrote off certain costs capitalized at our Molina Medicaid Solutions segment that supported our Health Plans segment provider information management processes to be re-designed. Although the intercompany revenues recorded by Molina Medicaid Solutions under this arrangement were insignificant on a consolidated basis, the termination of such revenue resulted in a triggering event for an interim goodwill impairment analysis of this segment in the third quarter of 2017. In the Molina Medicaid Solutions' discounted cash flow model, we incorporated significant estimates and assumptions related to future periods, such as intercompany business support opportunities and prospects for new Medicaid management information systems contracts. Because management has determined that Molina Medicaid Solutions will provide fewer future benefits for its support of the Health Plans segment, the test resulted in a fair value less than Molina Medicaid Solutions' carrying amount; therefore, we recorded a goodwill impairment loss for the difference, or $28 million, in the third quarter of 2017.

Other Segment

In the course of developing the Restructuring Plan in the second quarter of 2017, we determined that future benefits to be derived from our Pathways subsidiary, including the integration of its operations with our Health Plans segment, would be less than previously anticipated. In addition, poorer than expected year-to-date operating results, as well as lower projections of operating results for periods in the near term at our Pathways subsidiary, led us to conclude that a triggering event for an interim impairment analysis had occurred in the second quarter of 2017.

In the third quarter of 2017, management determined that Pathways will not provide future benefits relating to the integration of its operations with the Health Plans segment to the extent previously expected. Therefore, we conducted an additional interim impairment analysis.

Intangible assets. In the second quarter of 2017, we evaluated Pathways' finite-lived intangible assets (customer relationships and contract licenses) for impairment, using undiscounted cash flows expected over the longest remaining useful life of the assets tested. Because the undiscounted cash flows over the remaining useful life were less than Pathways' carrying amount, the intangible assets were impaired. We recorded an impairment loss for the carrying amount of the intangible assets, or $11 million, in the second quarter of 2017.

Goodwill. As noted above, we estimated Pathways' fair value using discounted cash flows, incorporating significant estimates and assumptions related to future periods. Such estimates included anticipated client census which drives service revenue; the likelihood of future benefits to be derived from Pathways (including integration with our health plans); current prospects relating to the behavioral services labor market which drives cost of service revenue; and anticipated capital expenditures. The tests in each of the three months ended June 30, 2017, and September 30, 2017, resulted in a fair value less than Pathways' carrying amount; therefore, we recorded an

impairment loss for the difference. The Pathways goodwill impairment losses amounted to $101 million in the third quarter of 2017, and $59 million in the second quarter of 2017. In the second quarter of 2017, we also recorded a goodwill impairment loss of $2 million for a separate subsidiary in the Other segment that did not pass its impairment test.

There were no impairments of intangible assets or goodwill during 2016.

The goodwill impairment losses are recorded to the segments as indicated in following table, and reported as “Impairment losses” in the accompanying consolidated statements of operations.

	Health Plans	Molina Medicaid Solutions	Other	Total
		(In millions)		
Historical goodwill	$ 445	$ 71	$ 162	$ 678
Accumulated impairment losses at December 31, 2016	(58)	—	—	(58)
Balance, December 31, 2016	387	71	162	620
Impairment losses, three months ended June 30, 2017	—	—	(61)	(61)
Impairment losses, three months ended September 30, 2017	—	(28)	(101)	(129)
Balance, September 30, 2017	$ 387	$ 43	$ —	$ 430
Accumulated impairment losses at September 30, 2017	$ 58	$ 28	$ 162	$ 248

11. Restructuring and Separation Costs

Following a management-initiated, broad operational assessment in early 2017, designed to improve our profitability and expand our core Medicaid business, in June 2017, we accelerated the implementation of a comprehensive restructuring and profitability improvement plan (the Restructuring Plan). Under the Restructuring Plan, we are taking the following actions:

1. We have streamlined our organizational structure, including the elimination of redundant layers of management, the consolidation of regional support services, and other reductions to our workforce, to improve efficiency as well as the speed and quality of our decision-making.
2. We are re-designing core operating processes such as provider payment, utilization management, quality monitoring and improvement, and information technology to achieve more effective and cost efficient outcomes.
3. We are remediating high cost provider contracts and building around high quality, cost-effective networks.
4. We are restructuring our existing direct delivery operations.
5. We are reviewing our vendor base to ensure that we are partnering with the lowest-cost, most-effective vendors.
6. Throughout this process, we are taking precautions to ensure that our actions do not impede our ability to continue to deliver quality health care, retain existing managed care contracts, and to secure new managed care contracts.

In addition to costs incurred under the Restructuring Plan, we have recorded costs associated with the separation of our former CEO and former CFO, described in further detail below.

Expected Costs

We estimate that total pre-tax costs associated with the restructuring plan will be approximately $70 million to $90 million in the fourth quarter of 2017, with an additional $20 million to $40 million to be incurred in 2018. Since the initiation of our Restructuring Plan in the second quarter of 2017, the range of total estimated costs have increased by approximately $50 million due primarily to non-cash write-offs of certain capitalized software in connection with the re-design of core processes. Such write-offs were not included in our initial total cost estimates, but as our evaluation of core operating processes proceeded in the third quarter, we determined that certain projects were inconsistent with our future operating goals and were therefore written off.

In addition, in the second quarter of 2017, we reported that we expected restructuring costs to relate only to the Health Plans and Other segments. In the third quarter of 2017, however, we wrote off certain costs capitalized at our Molina Medicaid Solutions segment that supported our Health Plans segment provider information management

processes to be re-designed. In addition, we now expect to incur consulting fees in connection with the review of Molina Medicaid Solutions' core operating processes.

The following table illustrates our estimates of the total costs, by segment and major type of cost, that we expect to incur under the Restructuring Plan, and includes costs incurred through September 30, 2017. We expect the Restructuring Plan to be completed by the end of 2018.

Estimated Costs Expected to be Incurred by Reportable Segment	Health Plans	Molina Medicaid Solutions	Other	Total
		(In millions)		
Termination benefits	$30 to $35	—	$30 to $35	$60 to $70
Other restructuring costs	$40 to $45	$10	$110 to $115	$160 to $170
	$70 to $80	$10	$140 to $150	$220 to $240

Costs Incurred

Restructuring Plan

Restructuring costs incurred to date consist primarily of termination benefits, write-offs of capitalized software due to the re-design of our core operating processes, restructuring of our direct delivery operations, and consulting fees.

Separation Costs

On May 2, 2017, we terminated the employment of our former CEO and CFO without cause. Under their amended and restated employment agreements, they were each entitled to receive 400% of their base salary, a prorated termination bonus (150% of base salary for the former CEO and 125% of base salary for the former CFO), full vesting of equity compensation, and a cash payment for health and welfare benefits. We recorded separation costs of $35 million primarily related to these former executives under FASB ASC Topic 712, *Nonretirement and Postemployment Benefits*. Of this total, $23 million related to the acceleration of their share-based compensation, as further discussed in Note 9, "Stockholders' Equity." Employee separation costs were insignificant in 2016.

Restructuring and separation costs are reported in "Restructuring and separation costs" in the accompanying consolidated statements of operations. The following tables present the major types of such costs by segment. Long-lived assets include capitalized software, intangible assets and furniture, fixtures and equipment.

	Three Months Ended September 30, 2017					
			Other Restructuring Costs			
	Separation Costs - Former Executives	One-Time Termination Benefits	Write-offs of Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
			(In millions)			
Health Plans	$ —	$ 27	$ 6	$ —	$ —	$ 33
Molina Medicaid Solutions	—	—	8	—	—	8
Other	—	23	35	16	3	77
	$ —	$ 50	$ 49	$ 16	$ 3	$ 118

	Nine Months Ended September 30, 2017					
			Other Restructuring Costs			
	Separation Costs - Former Executives	One-Time Termination Benefits	Write-offs of Long-lived Assets	Consulting Fees	Contract Termination Costs	Total
			(In millions)			
Health Plans	$ —	$ 27	$ 6	$ —	$ —	$ 33
Molina Medicaid Solutions	—	—	8	—	—	8
Other	35	23	35	24	3	120
	$ 35	$ 50	$ 49	$ 24	$ 3	$ 161

Reconciliation of Liability

For those restructuring and separation costs that require cash settlement (primarily separation costs, termination benefits and consulting fees), the following table presents a roll-forward of the accrued liability, which is reported in "Accounts payable and accrued liabilities" in the accompanying consolidated balance sheets:

	Separation Costs - Former Executives	One-Time Termination Benefits	Other Restructuring Costs	Total
		(In millions)		
Accrued as of December 31, 2016	$ —	$ —	$ —	$ —
Charges	12	50	27	89
Cash payments	(1)	(9)	(14)	(24)
Accrued as of September 30, 2017	$ 11	$ 41	$ 13	$ 65

12. Segment Information

We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment. Our reportable segments are consistent with how we currently manage the business and view the markets we serve.

Gross margin is the appropriate earnings measure for our reportable segments, based on how our chief operating decision maker currently reviews results, assesses performance, and allocates resources.

Gross margin for our Health Plans segment is referred to as "Medical margin," and for our Molina Medicaid Solutions and Other segments, as "Service margin." Medical margin represents the amount earned by the Health Plans segment after medical costs are deducted from premium revenue. The medical care ratio represents medical care costs as a percentage of premium revenue, and is one of the key metrics used to assess the performance of the Health Plans segment. Therefore, the underlying medical margin is the most important measure of earnings reviewed by the chief operating decision maker. The service margin is equal to service revenue minus cost of service revenue.

	Health Plans	Molina Medicaid Solutions	Other	Consolidated
		(In millions)		
Three Months Ended September 30, 2017				
Total revenue [1]	$ 4,899	$ 47	$ 85	$ 5,031
Gross margin	557	5	2	564
Impairment losses	—	(28)	(101)	(129)
Restructuring and separation costs	(33)	(8)	(77)	(118)
Nine Months Ended September 30, 2017				
Total revenue [1]	$ 14,538	$ 140	$ 256	$ 14,934
Gross margin	1,343	13	8	1,364
Impairment losses	—	(28)	(173)	(201)
Restructuring and separation costs	(33)	(8)	(120)	(161)
Three Months Ended September 30, 2016				
Total revenue [1]	$ 4,412	$ 48	$ 86	$ 4,546
Gross margin	443	6	8	457
Impairment losses	—	—	—	—
Restructuring and separation costs	—	—	—	—
Nine Months Ended September 30, 2016				
Total revenue [1]	$ 12,835	$ 146	$ 267	$ 13,248
Gross margin	1,285	17	29	1,331
Impairment losses	—	—	—	—
Restructuring and separation costs	—	—	—	—
Total assets				
September 30, 2017	$ 7,031	$ 233	$ 1,690	$ 8,954
December 31, 2016	5,897	267	1,285	7,449
Goodwill and intangible assets, net				
September 30, 2017	$ 488	$ 43	$ —	$ 531
December 31, 2016	513	72	175	760

(1) Total revenue consists primarily of premium revenue, premium tax revenue and health insurer fee revenue for the Health Plans segment, and service revenue for the Molina Medicaid Solutions and Other segments. Inter-segment revenue is insignificant for all periods presented.

The following table reconciles gross margin by segment to consolidated income before income tax expense:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
	(In millions)			
Gross margin:				
Health Plans	$ 557	$ 443	$ 1,343	$ 1,285

(2) Other operating expenses include general and administrative expenses, premium tax expenses, health insurer fee expenses, depreciation and amortization, impairment losses, and restructuring and separation costs.

13. Commitments and Contingencies

Regulatory Capital Requirements and Dividend Restrictions

Our health plans, which are operated by our wholly owned subsidiaries in the states in which our health plans operate, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based on current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $1,696 million at September 30, 2017, and $1,492 million at December 31, 2016. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments (excluding restricted investments) held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments (excluding restricted investments) amounted to $391 million and $264 million as of September 30, 2017 and December 31, 2016, respectively.

The National Association of Insurance Commissioners (NAIC) adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules which may vary from state to state. All of the states in which our health plans operate, except California, Florida and New York, have adopted these rules. Such requirements, if adopted by California, Florida and New York, may increase the minimum capital required for those states.

As of September 30, 2017, our health plans had aggregate statutory capital and surplus of approximately $1,828 million compared with the required minimum aggregate statutory capital and surplus of approximately $1,113 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2017. We have the ability, and have committed to provide, additional capital to each of our health plans as necessary to ensure compliance with statutory capital and surplus requirements.

Legal Proceedings

The health care and Medicaid-related business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties

associated with violations of these laws and regulations include significant fines, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and reasonably estimable, but the outcome of legal actions is inherently uncertain and our estimates of such losses could change as a result of further developments of these matters. For certain pending matters, accruals have not been established because such matters have not progressed sufficiently through discovery, and/or development of important factual information and legal issues is insufficient to enable us to estimate a range of possible loss, if any. An adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Marketplace Risk Corridor Program. On January 19, 2017, we filed suit against the United States of America in the United States Court of Federal Claims, Case Number 1:55-cv-01000-UNJ, on behalf of our health plans seeking recovery from the federal government of approximately $52 million in Marketplace risk corridor payments for calendar year 2015. Based upon current estimates, we believe our health plans are also owed approximately $76 million in Marketplace risk corridor payments from the federal government for calendar year 2016. We have not recognized revenue, nor have we recorded a receivable, for any amount due from the federal government for unpaid Marketplace risk corridor payments as of September 30, 2017. We have fully recognized all liabilities due to the federal government that we have incurred under the Marketplace risk corridor program, and have paid all amounts due to the federal government as required.

Rodriguez v. Providence Community Corrections. On October 1, 2015, seven individuals, on behalf of themselves and all others similarly situated, filed a complaint in the District Court for the Middle District of Tennessee, Nashville Division, Case No. 3:15-cv-01048 (the Rodriquez Litigation), against Providence Community Corrections, Inc. (now known as Pathways Community Corrections, Inc., or PCC). Rutherford County, Tennessee formerly contracted with PCC for the administration of misdemeanor probation, which involved the collection of court costs and fees from probationers. The complaint alleges, among other things, that PCC illegally assessed fees and surcharges against probationers and made improper threats of arrest and probation revocation if the probationers did not pay such amounts. The plaintiffs in the Rodriguez Litigation seek alleged compensatory, treble, and punitive damages, plus attorneys' fees, for alleged federal and state constitutional violations, as well as alleged violations of the Racketeer Influenced and Corrupt Organization Act. PCC's agreement with Rutherford County terminated effective March 31, 2016. On November 1, 2015, one month after the Rodriguez Litigation commenced, we acquired PCC from The Providence Service Corporation (Providence) pursuant to a membership interest purchase agreement. In September 2016, the parties to the Rodriguez Litigation accepted a mediation proposal for settlement pursuant to which PCC and Rutherford County would pay the plaintiffs $14 million and $3 million, respectively. The parties are in the process of finalizing the settlement agreement. We expect to recover the full amount of the settlement under the indemnification provisions of the membership interest purchase agreement with Providence.

United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al. On or around October 14, 2014, Molina Healthcare of California, Molina Healthcare of California Partner Plan, Inc., Mobile Medical Examination Services, Inc. (MedXM), and other health plan defendants were served with a complaint previously filed under seal in the Central District Court of California by Relator, Anita Silingo, Case No. SACV13-1348-FMO(SHx). The complaint alleges that MedXM improperly modified medical records and otherwise took inappropriate steps to increase members' risk adjustment scores, and that the defendants, including Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc., purportedly turned a "blind eye" to these unlawful practices. On October 22, 2015, the Relator filed a third amended complaint, seeking general and compensatory damages, treble damages, civil penalties, plus interest and attorneys' fees. On July 11, 2016, the District Court dismissed with prejudice the third amended complaint, without leave to amend. On September 23, 2016, the plaintiff filed an appeal with the Ninth Circuit Court of Appeals. The appeal has been fully briefed by the parties and we are awaiting the Court's decision.

States' Budgets

From time to time, the states in which our health plans operate may experience financial difficulties, which could lead to delays in premium payments. Until July 4, 2017, the state of Illinois operated without a budget for its current fiscal year. As of September 30, 2017, our Illinois health plan served approximately 163,000 members, and recognized premium revenue of approximately $447 million in the nine months ended September 30, 2017. As of September 30, 2017, the state of Illinois owed us approximately $220 million for certain March through September 2017 premiums.

On May 3, 2017, Puerto Rico's financial oversight board filed for a form of bankruptcy in the U.S. District Court in Puerto Rico under Title III of PROMESA. The Title III provision allows for a court debt restructuring process similar to U.S. bankruptcy protection. To the extent such bankruptcy results in our failure to receive payment of amounts due under our Medicaid contract with the Commonwealth or the inability of the Commonwealth to extend our Medicaid contract at the end of its current term, such bankruptcy could have a material adverse effect on our business, financial condition, cash flows, or results of operations. As of September 30, 2017, the plan served approximately 306,000 members and recorded premium revenue of approximately $553 million in the nine months ended September 30, 2017. As of October 27, 2017, the Commonwealth was current with its premium payments.

14. Related Party Transactions

Our California health plan has entered into a provider agreement with Pacific Healthcare IPA (Pacific), which is 50% owned by the brother-in-law of Dr. J. Mario Molina and John C. Molina, who are members of our board of directors. Under the terms of this provider agreement, the California health plan pays Pacific for medical care Pacific provides to health plan members. For the three and nine months ended September 30, 2017 and 2016, the amounts paid to Pacific were insignificant.

Refer to Note 15, "Variable Interest Entities (VIEs)," for a discussion of the Joseph M. Molina, M.D. Professional Corporations.

15. Variable Interest Entities (VIEs)

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created to further advance our direct delivery business. Effective September 30, 2017, we terminated our relationship with JMMPC in Florida, Michigan, Washington, and Utah. Therefore, the agreements described below, for all of our health plans other than those in California and New Mexico, were terminated effective September 30, 2017.

JMMPC's primary shareholder is Dr. J. Mario Molina, who is a member of our board of directors. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides primary care medical services through its employed physicians and other medical professionals. JMMPC also provides certain specialty referral services to our California health plan members through a contracted provider network. The health plans had entered into primary care services agreements with JMMPC, under which the health plans paid $29 million and $31 million to JMMPC for health care services provided in the three months ended September 30, 2017 and 2016, respectively, and $89 million and $92 million for the nine months ended September 30, 2017 and 2016, respectively. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, Molina Medical Management, Inc. (MMM), had also entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. For the three months ended September 30, 2017 and 2016, JMMPC paid $12 million and $13 million to MMM for clinic administrative services, respectively. For the nine months ended September 30, 2017 and 2016, JMMPC paid $38 million and $40 million, respectively, to MMM for clinic administrative services.

As of September 30, 2017, we determined that JMMPC is a VIE, and that we are its primary beneficiary. We reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we had the power to direct the activities (excluding clinical decisions) that most significantly affected JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that were potentially significant to the VIE, under the agreements described above. Because we were its primary beneficiary, we consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of September 30, 2017, JMMPC had total assets of $20 million, and total liabilities of $24 million. As of December 31, 2016, JMMPC had total assets of $18 million, and total liabilities of $18 million.

Our maximum exposure to loss as a result of our involvement with JMMPC is generally limited to the amounts needed to fund JMMPC's ongoing payroll, employee benefits and medical care costs associated with JMMPC's specialty referral activities.

16. Supplemental Condensed Consolidating Financial Information

The 5.375% Notes described in Note 7, “Debt,” are fully and unconditionally guaranteed by certain of our 100% owned subsidiaries on a joint and several basis, with certain exceptions considered customary for such guarantees. The 5.375% Notes and the guarantees are effectively subordinated to all of our and our guarantors’ existing and future secured debt to the extent of the assets securing such debt. In addition, the 5.375% Notes and the guarantees are structurally subordinated to all indebtedness and other liabilities and preferred stock, if any, of our subsidiaries that do not guarantee the 5.375% Notes.

As discussed in Note 7, “Debt,” the First Amendment to the Credit Facility provided that all guarantors immediately prior to January 3, 2017, other than Molina Information Systems, LLC, d/b/a Molina Medicaid Solutions, Molina Pathways, LLC, and Pathways Health and Community Support LLC, were automatically and unconditionally released from their obligations as guarantors under the Credit Facility and the 5.375% Notes.

The following condensed consolidating financial statements present Molina Healthcare, Inc. (as parent guarantor), the subsidiary guarantors, the subsidiary non-guarantors and eliminations, according to the guarantor structure as assessed at the most recent balance sheet date, September 30, 2017.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (MD&A)

FORWARD-LOOKING STATEMENTS

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated. Those known risks and uncertainties include, but are not limited to, the following:

- *the success of our previously announced restructuring plan, including the timing and amounts of the benefits realized;*
- *the numerous political and market-based uncertainties associated with the Affordable Care Act (the "ACA") or "Obamacare," including any potential repeal and replacement of the law, amendment of the law, or move to state block grants for Medicaid;*
- *the market dynamics surrounding the ACA Marketplaces, including but not limited to uncertainties associated with risk transfer requirements, the potential for disproportionate enrollment of higher acuity members, the discontinuation of premium tax credits, the adequacy of agreed rates, and potential disruption associated with market withdrawal from Utah, Wisconsin, or other states;*
- *subsequent adjustments to reported premium revenue based upon subsequent developments or new information, including changes to estimated amounts payable or receivable related to Marketplace risk adjustment/risk transfer, risk corridors, and reinsurance;*
- *effective management of our medical costs;*
- *our ability to predict with a reasonable degree of accuracy utilization rates, including utilization rates associated with seasonal flu patterns or other newly emergent diseases;*
- *significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria, including the payment of all amounts due to our Illinois health plan following the resolution of the Illinois budget impasse;*
- *the success of our efforts to retain existing managed care contracts, including those in Florida, New Mexico, Puerto Rico, and Texas, and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states;*
- *any adverse impact resulting from the significant changes to our executive leadership team and the rightsizing of our workforce;*
- *the impact of our decision to exit the Utah and Wisconsin ACA Marketplace markets effective December 31, 2017;*
- *our ability to manage our operations, including maintaining and creating adequate internal systems and controls relating to authorizations, approvals, provider payments, and the overall success of our care management initiatives;*
- *our ability to consummate and realize benefits from acquisitions or divestitures;*
- *our receipt of adequate premium rates to support increasing pharmacy costs, including costs associated with specialty drugs and costs resulting from formulary changes that allow the option of higher-priced non-generic drugs;*

- *our ability to operate profitably in an environment where the trend in premium rate increases lags behind the trend in increasing medical costs;*
- *the interpretation and implementation of federal or state medical cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit sharing arrangements, and risk adjustment provisions;*
- *our estimates of amounts owed for such cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit-sharing arrangements, and risk adjustment provisions;*
- *the Medicaid expansion cost corridors in California, New Mexico, and Washington, and any other retroactive adjustment to revenue where methodologies and procedures are subject to interpretation or dependent upon information about the health status of participants other than Molina members;*
- *the interpretation and implementation of at-risk premium rules and state contract performance requirements regarding the achievement of certain quality measures, and our ability to recognize revenue amounts associated therewith;*
- *cyber-attacks or other privacy or data security incidents resulting in an inadvertent unauthorized disclosure of protected health information;*
- *the success of our health plan in Puerto Rico, including the resolution of the Puerto Rico debt crisis, payment of all amounts due under our Medicaid contract, the effect of the PROMESA law, the impact of Hurricane Maria and our efforts to better manage the health care costs of our Puerto Rico health plan;*
- *the success and renewal of our duals demonstration programs in California, Illinois, Michigan, Ohio, South Carolina, and Texas;*
- *the accurate estimation of incurred but not reported or paid medical costs across our health plans;*
- *efforts by states to recoup previously paid and recognized premium amounts;*
- *complications, member confusion, or enrollment backlogs related to the annual renewal of Medicaid coverage;*
- *government audits and reviews, or potential investigations, and any fine, sanction, enrollment freeze, monitoring program, or premium recovery that may result therefrom, including any potential demand by the state of New Mexico to recover purportedly underpaid premium taxes;*
- *changes with respect to our provider contracts and the loss of providers;*
- *approval by state regulators of dividends and distributions by our health plan subsidiaries;*
- *changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;*
- *high dollar claims related to catastrophic illness;*
- *the favorable resolution of litigation, arbitration, or administrative proceedings;*
- *the relatively small number of states in which we operate health plans;*
- *the availability of adequate financing on acceptable terms to fund and capitalize our expansion and growth, repay our outstanding indebtedness at maturity and meet our liquidity needs, including the interest expense and other costs associated with such financing;*
- *our failure to comply with the financial or other covenants in our credit agreement or the indentures governing our outstanding notes;*
- *the sufficiency of our funds on hand to pay the amounts due upon conversion or maturity of our outstanding notes;*
- *the failure of a state in which we operate to renew its federal Medicaid waiver;*
- *changes generally affecting the managed care or Medicaid management information systems industries;*
- *increases in government surcharges, taxes, and assessments, including but not limited to the deductibility of certain compensation costs;*
- *newly emergent viruses or widespread epidemics, public catastrophes or terrorist attacks, and associated public alarm; and*
- *increasing competition and consolidation in the Medicaid industry;*

Readers should refer to the section entitled “Risk Factors” in each of our Annual Report on Form 10-K for the year ended December 31, 2016, our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2017 and June 30, 2017, and this Quarterly Report on Form 10-Q, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This quarterly report and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management’s Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2016.

ABOUT MOLINA HEALTHCARE

OUR MISSION IS TO PROVIDE QUALITY HEALTHCARE TO PEOPLE RECEIVING GOVERNMENT ASSISTANCE.

Molina Healthcare, Inc. provides quality managed health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

KEY PERFORMANCE INDICATORS

Non-GAAP Financial Measures

We use non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance to the performance of other public companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not as substitutes for or superior to, GAAP measures.

See further information regarding non-GAAP measures in the "Supplemental Information" section of this MD&A, including the reconciliations to U.S. GAAP. Non-GAAP financial measures referred to in this report are designated with an asterisk (*).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
	(Dollar amounts in millions, except per-share amounts)			
Net (loss) income	$ (97)	$ 42	$ (250)	$ 99
Net (loss) income per diluted share	$ (1.70)	$ 0.76	$ (4.44)	$ 1.77
MCR (1)	88.3 %	89.4%	90.5 %	89.5%
G&A ratio (2)	7.6 %	7.6%	8.2 %	7.8%
Premium tax ratio (1)	2.2 %	2.9%	2.3 %	2.7%
Effective tax rate	14.6 %	54.0%	15.5 %	58.0%
Net profit margin (2)	(1.9)%	0.9%	(1.7)%	0.7%
EBITDA*	$ (42)	$ 160	$ (82)	$ 430
Adjusted net (loss) income*	$ (93)	$ 47	$ (235)	$ 114
Adjusted net (loss) income per diluted share*	$ (1.62)	$ 0.85	$ (4.17)	$ 2.03

(1) MCR represents medical care costs as a percentage of premium revenue; premium tax ratio represents premium tax expenses as a percentage of premium revenue plus premium tax revenue.
(2) G&A ratio represents general and administrative expenses as a percentage of total revenue. Net profit margin represents net income as a percentage of total revenue.

CONSOLIDATED RESULTS

Three Months Ended September 30, 2017 Compared with Three Months Ended September 30, 2016

Net loss per diluted share was $1.70 for the third quarter of 2017 compared with net income per diluted share of $0.76 reported for the third quarter of 2016. Adjusted net loss per diluted share* was $1.62 in the third quarter of 2017, compared with adjusted net income per diluted share* of $0.85 in the third quarter of 2016. Loss before income tax benefit for the third quarter of 2017 was $113 million.

- Medical care costs measured as a percentage of premium revenue (the "medical care ratio") declined to 88.3% in the third quarter of 2017 from 89.4% in the third quarter of 2016 and from 94.8% in the second quarter of 2017. Improved medical cost performance in the third quarter of 2017 was the result of:
    - Improved sequential performance at our Illinois, New Mexico, Ohio, Puerto Rico, Texas, and Washington health plans, exclusive of the Marketplace program.
    - Improved performance of our Marketplace program, including a reduction to the premium deficiency reserve of $30 million ($0.33 per diluted share, net of tax). The reserve, which was $100 million at June 30, 2017, decreased to $70 million as of September 30, 2017.
- General and administrative costs, measured as a percentage of total revenue (the "administrative cost ratio"), were 7.6% in the third quarter of 2017, consistent with the third quarter of 2016, and 50 basis points lower than the second quarter of 2017. Excluding Marketplace broker commission and exchange fees, the administrative cost ratio decreased 30 basis points from the third quarter of 2016.

Restructuring costs and the impairment of certain purchased intangible assets increased loss before income tax benefit in the third quarter of 2017 by approximately $247 million. Specifically:

- We recorded $118 million ($1.39 per diluted share, net of tax) of restructuring costs in the third quarter of 2017. Restructuring costs incurred to date consist primarily of termination benefits, write-offs of capitalized software due to the re-design of our core operating processes, restructuring of our direct delivery operations, and consulting fees.
- We recorded $129 million ($1.77 per diluted share, net of tax) in non-cash goodwill impairment losses for our Pathways behavioral health subsidiary and our Molina Medicaid Solutions (MMS) segment. In the third quarter of 2017, management determined that neither business will provide future benefits relating to the integration of their operations with the Health Plans segment to the extent previously expected.

The table below summarizes the impact of certain items significant to our financial performance in the periods presented.

Summary of Significant Items Affecting 2017 Financial Results

	Three Months Ended September 30, 2017		Nine Months Ended September 30, 2017	
	(In millions, except per diluted share amounts)			
	Amount	Per Diluted Share (1)	Amount	Per Diluted Share (1)
Restructuring and separation costs	$ 118	$ 1.39	$ 161	$ 1.92
Impairment losses	129	1.77	201	2.77
Change in Marketplace premium deficiency reserve for 2017 service dates	(30)	(0.33)	40	0.45
Termination fee received for terminated Medicare acquisition	—	—	(75)	(0.84)
	$ 217	$ 2.83	$ 327	$ 4.30

(1) Except for certain items that are not deductible for tax purposes, per diluted share amounts are generally calculated at our statutory income tax rate of 37%, which is in excess of the effective tax rate recorded in our consolidated statements of operations.

Marketplace Cost Share Reduction (CSR) Update

Our third quarter results do not include any potential impact from the October 12, 2017, direction to Centers for Medicare and Medicaid Services (CMS) from Acting Department of Health and Human Services Secretary Hargan to cease payment of Marketplace CSR subsidies. At September 30, 2017, we had a total of approximately $220 million in excess CSR subsidies, recorded as a payable to CMS. This payable represents the extent to which payments received by us from CMS exceeded our estimate of the actual cost of member subsidies incurred by us through September 30, 2017.

We expect to incur approximately $85 million in unreimbursed expense associated with the cessation of CSR subsidies in the fourth quarter of 2017. It has been the practice of CMS to perform a reconciliation on an annual

basis of CSR subsidies paid to all health plans against the actual costs incurred by the health plans. Were such a reconciliation to be performed for the full calendar year of 2017—consistent with past practice—we would be able to offset nearly all of the $85 million expense incurred in the fourth quarter against the excess amounts received prior to September 30, 2017. However, should CMS transition to a nine month reconciliation period ending September 30, 2017—the last month for which CSR subsidies have been paid—the absence of CSR subsidy reimbursement would reduce income before income tax expense by approximately $85 million in the fourth quarter of 2017.

Nine Months ended September 30, 2017 Compared with Nine Months Ended September 30, 2016

Net loss per diluted share was $4.44 in the nine months ended September 30, 2017 compared with net income per diluted share of $1.77 reported for the nine months ended September 30, 2016. Adjusted net loss per diluted share* was $4.17 in the nine months ended September 30, 2017, compared with adjusted net income per diluted share* of $2.03 in the nine months ended September 30, 2016. Loss before income tax benefit for the nine months ended September 30, 2017 was $296 million. Results for the nine months ended September 30, 2017, were affected by the significant items presented in the table, and as further described, above. In total, these adjustments increased pretax loss in the nine months ended September 30, 2017 by $327 million.

RESTRUCTURING AND PROFIT IMPROVEMENT PLAN UPDATE

As previously disclosed, we estimate that our restructuring plan will reduce annualized run-rate expenses by approximately $300 million to $400 million when completed by the end of 2018. We have already achieved $200 million of these run-rate reductions on an annualized basis, which will take full effect no later than January 1, 2018. Our third quarter results include approximately $10 million of these reductions. All savings targets discussed in regards to the restructuring plan represent annualized run-rate savings that we expect to achieve during the year following the indicated implementation date. We expect one-time costs associated with the restructuring plan to exceed the benefits realized in 2017 due to the upfront payment of implementation costs and the delayed benefit of full savings until the beginning of 2018.

TRENDS AND UNCERTAINTIES

ACA and the Marketplace

The future of the Affordable Care Act (ACA) and its underlying programs, including the Marketplace, are subject to substantial uncertainty. We have taken the following steps in regards to our participation in the ACA Marketplace in 2018:

1. As previously announced, we will exit the Utah and Wisconsin ACA Marketplaces effective December 31, 2017.
2. In our remaining Marketplace plans, we are increasing 2018 premiums by 55% to take into account the absence of cost sharing reduction (CSR) subsidies and other risks related to ACA Marketplace uncertainties.
3. We have reduced the scope of our 2018 participation in the state of Washington Marketplace.
4. We continue to monitor the current political and programmatic developments pertaining to the ACA Marketplace.

Medicaid Contract Re-Procurement

The following table illustrates Health Plans segment Medicaid contracts scheduled for re-procurement in the near term. While we have been notified of the Medicaid regulators' intention to re-procure the contracts, the anticipated award dates and effective dates are management's current best estimates; such dates are subject to change. Premium revenue is stated in millions.

State Health Plan	Medicaid Program(s)	Membership as of September 30, 2017	Premium Revenue Nine Months Ended September 30, 2017	Anticipated Award Date	Anticipated Effective Date
Florida	All	355,000	$ 1,105	Q2 2018	1/1/2019
New Mexico	All	225,000	893	Q1 2018	1/1/2019
Texas	ABD	87,000	1,065	Q3 2018	9/1/2019
Texas	CHIP	24,000	31	Q4 2017	9/1/2018

Illinois Health Plan. In August 2017, Molina Healthcare of Illinois, Inc. was awarded a statewide Medicaid managed care contract by the Illinois Department of Healthcare and Family Services. This Medicaid contract further integrates behavioral health and physical health by combining the State's three current managed care programs into one program. The contract begins January 1, 2018, for four years with options to renew annually for up to four additional years.

Washington Health Plan. In May 2017, Molina Healthcare of Washington, Inc. was selected by the Washington State Health Care Authority to negotiate and enter into managed care contracts for the North Central region of the state's Apple Health Integrated Managed Care Program. The start date for the new contract is scheduled for January 1, 2018.

REPORTABLE SEGMENTS

How We Assess Performance

We derive our revenues primarily from health insurance premiums, and our primary customers are state Medicaid agencies and the federal government.

One of the key metrics used to assess the performance of our most significant segment, the Health Plans segment, is the medical care ratio, or MCR. The medical care ratio represents medical care costs as a percentage of premium revenue. Therefore, the underlying gross margin, or the amount earned by the Health Plans segment after medical costs are deducted from premium revenue, is the most important measure of earnings reviewed by management.

Gross margin for our Health Plans segment is referred to as "Medical margin," and for our Molina Medicaid Solutions and Other segments, as "Service margin." The service margin is equal to service revenue minus cost of service revenue. Management's discussion and analysis of the changes in the individual components of gross margin, by reportable segment, is presented in the "Health Plans—Financial Overview," "Molina Medicaid Solutions—Financial Overview," and "Other—Financial Overview" sections of this MD&A.

SEGMENT SUMMARY

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
	(In millions)			
Segment gross margin:				
Health Plans medical margin [1]	$ 557	$ 443	$ 1,343	$ 1,285
Molina Medicaid Solutions service margin [2]	5	6	13	17
Other [2]	2	8	8	29
Total segment gross margin	564	457	1,364	1,331
Other operating revenues [3]	124	222	379	625
Other operating expenses [4]	(769)	(561)	(2,029)	(1,644)
Operating (loss) income	(81)	118	(286)	312
Other expenses, net	32	26	10	76
(Loss) income before income tax expense	(113)	92	(296)	236
Income tax (benefit) expense	(16)	50	(46)	137
Net (loss) income	$ (97)	$ 42	$ (250)	99

(1) Represents premium revenue minus medical care costs.
(2) Represents service revenue minus cost of service revenue.
(3) Other operating revenues include premium tax revenue, health insurer fee revenue, investment income and other revenue.
(4) Other operating expenses include general and administrative expenses, premium tax expenses, health insurer fee expenses, depreciation and amortization, impairment losses, and restructuring and separation costs.

HEALTH PLANS

The Health Plans segment consists of health plans operating in 12 states and the Commonwealth of Puerto Rico. As of September 30, 2017, these health plans served approximately 4.5 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Affordable Care Act Marketplace (Marketplace) members, most of whom receive government premium subsidies.

BUSINESS OVERVIEW

Recent Developments — Health Plans Segment

Refer to Notes to Consolidated Financial Statements, Note 1, “Basis of Presentation.”

Health Plans Membership

The following tables set forth our Health Plans membership as of the dates indicated:

	September 30, 2017	December 31, 2016	September 30, 2016
Ending Membership by Program:			
Temporary Assistance for Needy Families (TANF) and Children's Health Insurance Program (CHIP)	2,451,000	2,536,000	2,529,000
Marketplace	877,000	526,000	568,000
Medicaid Expansion	662,000	673,000	658,000
Aged, Blind or Disabled (ABD)	411,000	396,000	395,000
Medicare-Medicaid Plan (MMP) – Integrated [1]	58,000	51,000	51,000
Medicare Special Needs Plans (Medicare)	44,000	45,000	45,000
	4,503,000	4,227,000	4,246,000
Ending Membership by Health Plan:			
California	751,000	683,000	683,000
Florida	641,000	553,000	563,000
Illinois	163,000	195,000	195,000
Michigan	399,000	391,000	387,000
New Mexico	256,000	254,000	253,000
New York	33,000	35,000	37,000
Ohio	343,000	332,000	339,000
Puerto Rico	306,000	330,000	331,000
South Carolina	113,000	109,000	109,000
Texas	444,000	337,000	352,000
Utah	160,000	146,000	150,000
Washington	770,000	736,000	716,000
Wisconsin	124,000	126,000	131,000
	4,503,000	4,227,000	4,246,000

(1) MMP members receive both Medicaid and Medicare coverage from Molina Healthcare.

Premiums by Program

The amount of the premiums paid to our health plans may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program on a per member per month (PMPM) basis, for the nine months ended September 30, 2017. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	PMPM Premiums		
	Low	High	Consolidated
TANF and CHIP	$ 120.00	$ 310.00	$ 180.00
Marketplace	190.00	470.00	280.00
Medicaid Expansion	320.00	510.00	390.00
ABD	380.00	1,480.00	1,030.00
MMP – Integrated	1,250.00	3,280.00	2,190.00
Medicare	960.00	1,260.00	1,140.00

FINANCIAL OVERVIEW

In the third quarter of 2017, premium revenue increased approximately 14%, or $586 million, when compared with the third quarter of 2016. Member months grew 8% while revenue PMPM increased 6%. Medical care costs as a percent of premium revenue decreased to 88.3% in the third quarter of 2017 from 89.4% in the third quarter of 2016. Medical margin increased 26% in the third quarter of 2017 from the third quarter of 2016.

In the nine months ended September 30, 2017, premium revenue increased approximately 16%, or $1,950 million, when compared with the nine months ended September 30, 2016. Member months grew 11% while revenue PMPM increased 5%. Medical care costs as a percent of premium revenue increased to 90.5% in the nine months ended September 30, 2017 from 89.5% in the nine months ended September 30, 2016. Medical margin increased 5% in the nine months ended September 30, 2017 from the nine months ended September 30, 2016.

FINANCIAL PERFORMANCE BY PROGRAM

The following tables summarize member months, premium revenue, medical care costs, medical care ratio and medical margin by program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

	Three Months Ended September 30, 2017						
	Member Months [1]	Premium Revenue		Medical Care Costs		MCR [2]	Medical Margin
		Total	PMPM	Total	PMPM		
TANF and CHIP	7.5	$ 1,392	$ 185.95	$ 1,242	$ 165.76	89.1%	$ 150
Medicaid Expansion	2.0	773	385.58	667	332.99	86.4	106
ABD	1.2	1,288	1,038.85	1,259	1,016.06	97.8	29

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) "MCR" represents medical costs as a percentage of premium revenue.

Medicaid: TANF/CHIP, Medicaid Expansion and ABD

The medical care ratios of the combined TANF/CHIP, Medicaid Expansion and ABD programs increased to 91.8% in the third quarter of 2017, from 89.8% in the third quarter of 2016. Margin pressures at the California health plan (primarily due to reduced Medicaid Expansion premium rates effective July 1, 2017), the Florida health plan; and the Illinois health plan more than offset improved performance at the Washington health plan.

The medical care ratios of the combined TANF/CHIP, Medicaid Expansion and ABD programs increased to 92.4% in the nine months ended September 30, 2017, from 89.9% in the nine months ended September 30, 2016. For the nine months ended September 30, 2017, margin pressures at the Florida, Illinois, New Mexico and Texas health plans more than offset improved performance at the Washington health plan. Financial results for the Texas health plan in 2016 benefited from the recognition of $44 million of quality revenue related to 2015 and 2014.

MMP and Medicare

The medical care ratio for these programs, in the aggregate, decreased in the third quarter of 2017 when compared with the third quarter of 2016, and also in the nine months ended September 30, 2017, compared with the nine months ended September 30, 2016. Utilization of inpatient and pharmacy services among our Medicare members has been subdued for the first nine months of 2017.

Marketplace

Marketplace member months increased 64% in the nine months ended September 30, 2017, when compared with the nine months ended September 30, 2016, as a result of membership growth primarily in California, Florida and Texas.

The medical care ratio for the Marketplace program decreased to 75.3% in the third quarter of 2017, from 88.1% in the third quarter of 2016. Absent a $30 million reduction to a previously established premium deficiency reserve, the medical care ratio for our Marketplace program would have been approximately 79% in the third quarter of 2017. The medical care ratio of the Marketplace program for the nine months ended September 30, 2017 was 84.1%, and generally consistent with the medical care ratio reported for the same period in 2016.

FINANCIAL PERFORMANCE BY STATE

The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by state health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

(1) The New York health plan was acquired on August 1, 2016.
(2) "Other" medical care costs include primarily medically related administrative costs of the parent company, and direct delivery costs.

MEDICAL CARE COSTS BY TYPE

The following table provides the details of consolidated medical care costs by category for the periods indicated (dollars in millions except PMPM amounts):

	Three Months Ended September 30,					
	2017			2016		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 3,196	$ 234.51	75.8%	$ 2,799	$ 220.29	74.7%
Pharmacy	638	46.85	15.1	567	44.65	15.1
Capitation	342	25.07	8.1	302	23.83	8.1
Direct delivery	18	1.37	0.4	21	1.66	0.5
Other	26	1.88	0.6	59	4.58	1.6
	$ 4,220	$ 309.68	100.0%	$ 3,748	$ 295.01	100.0%

	Nine Months Ended September 30,					
	2017			2016		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 9,630	$ 230.58	75.1%	$ 8,156	$ 215.96	74.6%
Pharmacy	1,904	45.60	14.8	1,621	42.93	14.8
Capitation	1,022	24.47	8.0	901	23.86	8.3
Direct delivery	62	1.50	0.5	55	1.46	0.5
Other	204	4.88	1.6	197	5.20	1.8
	$ 12,822	$ 307.03	100.0%	$ 10,930	$ 289.41	100.0%

PREMIUM TAXES

The premium tax ratio (premium tax expense as a percentage of premium revenue plus premium tax revenue) was 2.2% in the third quarter of 2017 compared with 2.9% in the third quarter of 2016 and 2.3% in the nine months

ended September 30, 2017, compared with 2.7% in the nine months ended September 30, 2016. This decline was primarily due to the temporary suspension of a Michigan HMO use tax effective January 1, 2017, which was partially offset by a higher California premium tax rate effective July 1, 2016, and significant revenue growth at our Florida health plan, which operates in a state with no premium tax.

HEALTH INSURER FEE (HIF) REVENUE AND EXPENSES

The Consolidated Appropriations Act of 2016 provided for a HIF moratorium in 2017. Therefore, there are no HIF revenues or expenses in 2017.

MOLINA MEDICAID SOLUTIONS

The Molina Medicaid Solutions segment provides support to state government agencies in the administration of their Medicaid programs, including business processing, information technology development and administrative services.

FINANCIAL OVERVIEW

The Molina Medicaid Solutions segment service margin for the third quarter of 2017 and 2016, and for the nine months ended September 30, 2017 and 2016, was insignificant.

As discussed further in Notes to Consolidated Financial Statements, Note 10, “Impairment Losses,” we recorded a goodwill impairment charge of $28 million, reported in our consolidated statements of operations as “Impairment losses.”

OTHER

The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

FINANCIAL OVERVIEW

The Other segment service margin for the third quarter of 2017 and 2016, and for the nine months ended September 30, 2017 and 2016, was insignificant.

As discussed further in Notes to Consolidated Financial Statements, Note 10, “Impairment Losses,” in the second quarter of 2017 we recorded impairment losses, primarily relating to our Pathways subsidiary, of $61 million for goodwill and $11 million for intangible assets, or $72 million in the aggregate. In the third quarter of 2017, we recorded a further goodwill impairment loss relating to the Pathways subsidiary, of $101 million.

OTHER CONSOLIDATED INFORMATION

GENERAL AND ADMINISTRATIVE EXPENSES

The G&A ratio was 7.6% for both the third quarter of 2017 and 2016. The G&A ratio increased to 8.2% for the nine months ended September 30, 2017, compared with 7.8% for the nine months ended September 30, 2016. Refer to discussion above, in “Consolidated Results.”

DEPRECIATION AND AMORTIZATION

Depreciation and amortization, as a percentage of total revenue, was 0.7% and 0.8% in the nine months ended September 30, 2017 and 2016, respectively.

IMPAIRMENT LOSSES

See Notes to Consolidated Financial Statements, Note 10, “Impairment Losses.”

RESTRUCTURING AND SEPARATION COSTS

See Notes to Consolidated Financial Statements, Note 11, “Restructuring and Separation Costs.”

INTEREST EXPENSE

Interest expense was $32 million for the third quarter of 2017, compared with $26 million for the third quarter of 2016. Interest expense was $85 million for the nine months ended September 30, 2017, compared with $76 million for the nine months ended September 30, 2016. Interest expense includes non-cash interest expense relating primarily to the amortization of the discount on convertible senior notes, which amounted to $8 million for both the third quarter of 2017 and 2016, and $24 million and $23 million in the nine months ended September 30, 2017 and 2016, respectively. We expect interest expense to continue to increase in future periods as a result of our recent $330 million offering of 4.875% Notes, and borrowings under the Credit Facility. See further discussion in Notes to Consolidated Financial Statements, Note 7, “Debt.”

OTHER INCOME, NET

As described in Notes to Consolidated Financial Statements, Note 1, “Basis of Presentation,” in February 2017, we received an aggregate termination fee of $75 million for the terminated Medicare Acquisition. This amount is reported in “Other income, net” in our consolidated statements of operations.

INCOME TAXES

The (benefit) provision for income taxes was recorded at an effective rate of 14.6% for the third quarter of 2017, compared with 54.0% for the third quarter of 2016, and an effective rate of 15.5% for the nine months ended September 30, 2017 compared with 58.0% for the nine months ended September 30, 2016. The significant change in the effective tax rate was primarily a result of pretax losses in 2017 combined with significant nondeductible expenses (primarily, separation costs and goodwill impairment) and the 2017 HIF moratorium as described above in “Health Plans—Health Insurer Fee (HIF) Revenue and Expenses.”

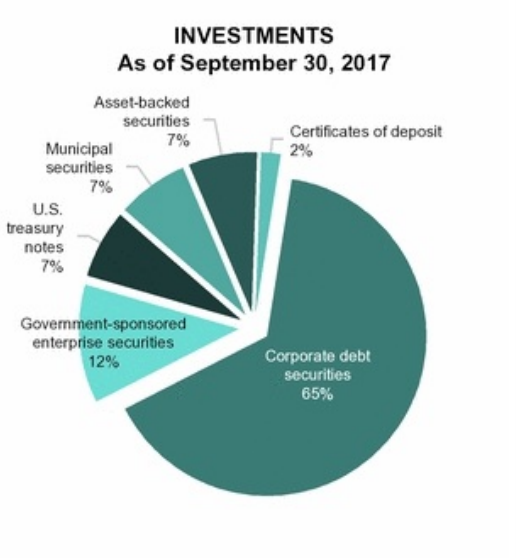
LIQUIDITY AND FINANCIAL CONDITION

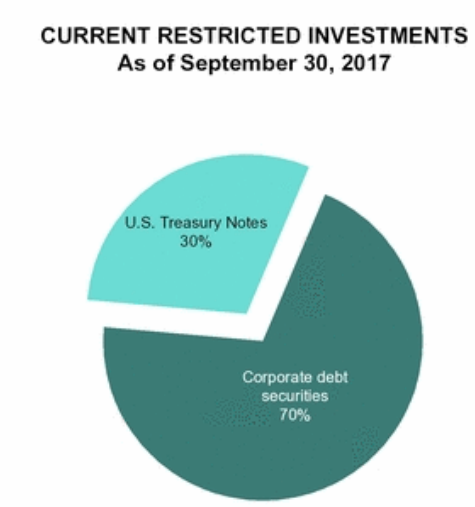
INTRODUCTION

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

A majority of the assets held by our Health Plans segment regulated subsidiaries is in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board-approved investment policies that conform to applicable state laws and regulations.

Our investments are classified as current assets, except for our held-to-maturity restricted investments, which are classified as non-current assets, and which are not included in the totals below. Our held-to-maturity restricted investments are invested principally in certificates of deposit and U.S. treasury securities.





Investment income increased to $37 million for the nine months ended September 30, 2017, compared with $25 million for the nine months ended September 30, 2016, primarily due to the increase in invested assets.

MARKET RISK

Our earnings and financial position are exposed to financial market risk relating to changes in interest rates, and the resulting impact on investment income and interest expense.

Substantially all of our investments and restricted investments are subject to interest rate risk and will decrease in value if market interest rates increase. Assuming a hypothetical and immediate 1% increase in market interest rates at September 30, 2017, the fair value of our fixed income investments would decrease by approximately $25 million. Declines in interest rates over time will reduce our investment income.

For further information on fair value measurements and our investment portfolio, please refer to Notes to Consolidated Financial Statements, Note 4, “Fair Value Measurements,” and Note 5, “Investments.”

Borrowings under our Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. As of September 30, 2017, $300 million was outstanding under the Credit Facility.

LIQUIDITY

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Nine Months Ended September 30,		
	2017	2016	Change
	(In millions)		
Net cash provided by operating activities	$ 957	$ 633	$ 324
Net cash used in investing activities	(474)	(131)	(343)
Net cash provided by financing activities	632	11	621
Net increase in cash and cash equivalents	$ 1,115	$ 513	$ 602

Operating Activities

Cash provided by operating activities increased $324 million in the nine months ended September 30, 2017 compared with the nine months ended September 30, 2016. The change in net (loss) income, partially offset by the effect of adjustments to reconcile net loss to net cash provided by operating activities, reduced cash provided by operating activities by $169 million. This change was more than offset by the aggregate of the following changes:

Medical claims and benefits payable. In 2017, the change in medical claims and benefits payable increased cash flows from operations by $381 million, primarily due to additional accruals relating to increased membership in 2017.

Receivables and deferred revenue. In 2017, the aggregate change in receivables and deferred revenue increased cash flows from operations by $395 million. Cash flows from operations in each period were impacted by the timing of premium revenues receipts. In general, state or federal payors may delay our premium payments, which we record as a receivable, or they may prepay the following month's premium payment, which we record as deferred revenue. We typically receive capitation payments monthly; however, state or federal payors may decide to adjust their payment schedules which could positively or negatively impact our reported cash flows from operating activities in any given period.

Amounts due government agencies. In 2017, the change in amounts due government agencies decreased cash flows from operations by $381 million, primarily due to payments in the third quarter of 2017.

Investing Activities

Net cash used in investing activities increased $343 million in the nine months ended September 30, 2017 compared with the nine months ended September 30, 2016, primarily due to higher purchases of investments, net of sales and maturities, in the current year.

Financing Activities

Net cash provided by financing activities increased $621 million in the nine months ended September 30, 2017 compared with the nine months ended September 30, 2016, due to proceeds received from the 4.875% Notes offering and borrowings under the Credit Facility.

FINANCIAL CONDITION

We believe that our cash resources, combined with borrowing capacity available under our Credit Facility, as discussed further below in "Future Sources and Uses of Liquidity—Sources", and internally generated funds will be sufficient to support costs under the Restructuring Plan, operations, regulatory requirements, and capital expenditures for at least the next 12 months.

On a consolidated basis, at September 30, 2017, our working capital was $1,746 million, compared with $1,418 million at December 31, 2016. At September 30, 2017, our cash and investments amounted to $6,166 million, compared with $4,689 million at December 31, 2016.

Debt Ratings. Our 5.375% Notes are rated "BB" by Standard & Poor's, and "B2" by Moody's Investor Service, Inc. A significant downgrade in our ratings could adversely affect our borrowing capacity and costs.

Financial Covenants. Our Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. Such ratios, presented below, are computed as defined by the terms of the Credit Facility.

Credit Facility Financial Covenants	Required Per Agreement	As of September 30, 2017
Net leverage ratio	<4.0x	2.5x
Interest coverage ratio	>3.5x	8.8x

In addition, the terms of our 4.875% Notes, 5.375% Notes and each of the 1.125% and 1.625% Convertible Notes contain cross-default provisions with the Credit Facility that are triggered upon an event of default under the Credit Facility, and when borrowings under the Credit Facility equal or exceed certain amounts as defined in the related indentures. As of September 30, 2017, we were in compliance with all covenants under the Credit Facility.

FUTURE SOURCES AND USES OF LIQUIDITY

Sources

Our Health Plans segment regulated subsidiaries generate significant cash flows from premium revenue, which we generally receive a short time before we pay for the related health care services. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity.

Dividends from Subsidiaries. When available and as permitted by applicable regulations, cash in excess of the capital needs of our regulated health plans is generally paid in the form of dividends to our unregulated parent company to be used for general corporate purposes. In the nine months ended September 30, 2017 and 2016, we received $100 million and $50 million, respectively, in dividends from our regulated health plan subsidiaries. We received $36 million in dividends from our unregulated subsidiaries in the nine months ended September 30, 2017. See further discussion in Notes to Consolidated Financial Statements, Note 13, “Commitments and Contingencies—Regulatory Capital Requirements and Dividend Restrictions.”

Restructuring Plan. As previously disclosed, we estimate that our restructuring plan will reduce annualized run-rate expenses by approximately $300 million to $400 million when completed by the end of 2018. We have already achieved $200 million of these run-rate reductions on an annualized basis, which will take full effect no later than January 1, 2018. All savings targets discussed in regards to the restructuring plan represent annualized run-rate savings that we expect to achieve during the year following the indicated implementation date. We expect one-time costs associated with the restructuring plan to exceed the benefits realized in 2017 due to the upfront payment of implementation costs and the delayed benefit of full savings until the beginning of 2018. We expect the cost savings to reduce both “General and administrative expenses” and “Medical care costs” reported on our consolidated statements of operations.

The following table illustrates our estimates of run-rate savings associated with the restructuring plan. Such savings will be offset, through the end of 2018, by the costs noted below in “*Uses*.” Following 2018, the savings will be offset by approximately $20 million in run-rate expenses resulting from the implementation of restructuring plan initiatives.

Estimated Savings Expected to be Realized by Reportable Segment	Health Plans	Other	Total
		(In millions)	
General and administrative expenses	$50	$120 to $140	$170 to $190
Medical care costs	$110 to $190	$20	$130 to $210
	$160 to $240	$140 to $160	$300 to $400

Credit Facility. Refer to Notes to Consolidated Financial Statements, Note 7, “Debt,” for a detailed discussion of our Credit Facility. In August 2017, we drew against the Credit Facility in the amount of $300 million.

4.875% Notes. The 4.875% Notes contain a limitation on the use of proceeds which required us to deposit the net proceeds from their issuance into a segregated deposit account, a current asset reported as “Restricted investments” in our consolidated balance sheets. See further discussion in Notes to Consolidated Financial Statements, Note 7, “Debt.”

Shelf Registration Statement. We have a shelf registration statement on file with the Securities and Exchange Commission to register an unlimited amount of any combination of debt or equity securities in one or more offerings. Specific information regarding the terms and securities being offered will be provided at the time of an offering. Proceeds from future offerings are expected to be used for general corporate purposes, including, but not limited to, the repayment of debt, investments in or extensions of credit to our subsidiaries and the financing of possible acquisitions or business expansion.

Uses

Restructuring. We recorded $118 million of restructuring costs in the third quarter of 2017. Restructuring costs incurred to date consist primarily of termination benefits, write-offs of capitalized software due to the re-design of our core operating processes, restructuring of our direct delivery operations, and consulting fees. Under the restructuring plan, and also including separation costs to former executives, we have made cash payments of $24 million in the nine months ended September 30, 2017, and have accrued a liability of $65 million for future payments as of September 30, 2017.

We estimate that total pre-tax costs associated with the restructuring plan will be approximately $70 million to $90 million in the fourth quarter of 2017, with an additional $20 million to $40 million to be incurred in 2018. We currently estimate that a majority of the costs we expect to incur in the fourth quarter of 2017 will be settled in cash. The costs we incur associated with the restructuring plan are reported in “Restructuring and separation costs” in our consolidated statements of operations.

Estimated Costs Expected to be Incurred by Reportable Segment	Health Plans	Molina Medicaid Solutions	Other	Total
		(In millions)		
Termination benefits	$30 to $35	—	$30 to $35	$60 to $70
Other restructuring costs	$40 to $45	$10	$110 to $115	$160 to $170
	$70 to $80	$10	$140 to $150	$220 to $240

Regulatory Capital Requirements and Dividend Restrictions. For more information on our regulatory capital requirements and dividend restrictions, refer to Notes to Consolidated Financial Statements, Note 13, “Commitments and Contingencies.”

States’ Budgets. From time to time, the states in which our health plans operate may experience financial difficulties, which could lead to delays in premium payments. Until July 4, 2017, the state of Illinois operated without a budget for its current fiscal year. As of September 30, 2017, our Illinois health plan served approximately 163,000 members, and recognized premium revenue of approximately $447 million in the nine months ended September 30, 2017. As of October 27, 2017, the state of Illinois owed us approximately $220 million for certain March through September 2017 premiums.

On May 3, 2017, Puerto Rico’s financial oversight board filed for a form of bankruptcy in the U.S. District Court in Puerto Rico under Title III of PROMESA. The Title III provision allows for a court debt restructuring process similar to U.S. bankruptcy protection. To the extent such bankruptcy results in our failure to receive payment of amounts due under our Medicaid contract with the Commonwealth or the inability of the Commonwealth to extend our Medicaid contract at the end of its current term, such bankruptcy could have a material adverse effect on our business, financial condition, cash flows, or results of operations. As of September 30, 2017, the plan served approximately 306,000 members and recorded premium revenue of approximately $553 million in the nine months ended September 30, 2017. As of October 27, 2017, the Commonwealth was current with its premium payments.

Convertible Notes. We have outstanding $550 million aggregate principal amount of 1.125% cash convertible senior notes due January 15, 2020, unless earlier repurchased or converted. We refer to these notes as our 1.125% Convertible Notes. We also have outstanding $302 million aggregate principal amount of 1.625% convertible senior notes due August 14, 2044, unless earlier repurchased, redeemed, or converted. We refer to these notes as our 1.625% Convertible Notes. We refer to the 1.125% Convertible Notes and 1.625% Convertible Notes collectively as the Convertible Notes. The 1.125% Convertible Notes are convertible entirely into cash, and the 1.625% Convertible Notes are convertible partially into cash, each prior to their respective maturity dates under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger.

The stock price trigger for the 1.125% Convertible Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended September 30, 2017; therefore, they are convertible into cash and are reported in current portion of long-term debt as of September 30, 2017.

The stock price trigger for the 1.625% Convertible Notes is $75.51 per share. The 1.625% Convertible Notes did not meet this stock price trigger in the quarter ended September 30, 2017. However, on contractually specified dates beginning in 2018, holders of the 1.625% Convertible Notes may require us to repurchase some or all of such notes. In addition, beginning May 15, 2018 until August 19, 2018, holders may convert some or all of the 1.625% Convertible Notes. Because of these put and conversion features, the 1.625% Convertible Notes are reported in current portion of long-term debt as of September 30, 2017. As noted above, because the proceeds from the 4.875% Notes are initially restricted to payments upon conversion or redemption of the 1.625% Convertible Notes, such restricted investments are also classified as current in the accompanying consolidated balance sheets.

For economic reasons related to the trading market for our Convertible Notes, we believe that the amount of the notes that may be converted over the next twelve months, if any, will not be significant. However, if the trading market for our Convertible Notes becomes closed or restricted due to market turmoil or other reasons such that the notes cannot be traded, or if the trading price of our Convertible Notes, which normally trade at a marginal premium to the underlying composite stock-and-interest economic value, no longer includes that marginal premium, holders of our Convertible Notes may elect to convert the notes to cash.

We currently have sufficient available cash, combined with borrowing capacity available under our Credit Facility, to fund such conversions.

CONTRACTUAL OBLIGATIONS

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2016, was disclosed in our 2016 Annual Report on Form 10-K.

As described further in the Notes to Consolidated Financial Statements, Note 7 “Debt,” on June 6, 2017, we completed the private offering of $330 million aggregate principal amount of senior notes (4.875% Notes) due June 15, 2025. In addition, in the third quarter of 2017, we borrowed $300 million under our Credit Facility.

Other than the transactions described above, there were no material changes to this previously filed information outside the ordinary course of business during the nine months ended September 30, 2017.

CRITICAL ACCOUNTING ESTIMATES

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Notes to Consolidated Financial Statements, Note 6, “Medical Claims and Benefits Payable,” for a table that presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements. Other than the discussion as noted above, there have been no significant changes during the nine months ended September 30, 2017, to our disclosure reported in “Critical Accounting Estimates” in our Annual Report on Form 10-K for the year ended December 31, 2016.

- *Health Plans segment contractual provisions that may adjust or limit revenue or profit*. For a discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies.”

- *Health Plans segment quality incentives*. For a discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies.”

- *Molina Medicaid Solutions segment revenue and cost recognition*. There have been no significant changes during the nine months ended September 30, 2017, to our disclosure reported in “Critical Accounting Estimates” in our Annual Report on Form 10-K for the year ended December 31, 2016.

- *Goodwill and intangible assets, net.* Please refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies,” regarding our adoption of Accounting Standards Update No. 2017-04 as of June 30, 2017, which has simplified the test for goodwill impairment. In the third quarter of 2017, we

recorded impairment charges of $129 million for goodwill, and in the second quarter of 2017, we recorded impairment charges of $61 million for goodwill and $11 million for intangible assets, or $72 million in the aggregate. Such charges are reported in the accompanying consolidated statements of operations as “Impairment losses.” At September 30, 2017, goodwill and intangible assets, net, represented approximately 6% of total assets and 37% of total stockholders’ equity, compared with 10% and 46%, respectively, at December 31, 2016. Refer to Notes to Consolidated Financial Statements, Note 10, “Impairment Losses.”

SUPPLEMENTAL INFORMATION

FINANCIAL MEASURES THAT SUPPLEMENT U.S. GAAP (NON-GAAP FINANCIAL MEASURES)

We use these non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance to the performance of other public companies in the health care industry.

EBITDA*

We believe that earnings before interest, taxes, depreciation and amortization (EBITDA*) is helpful in assessing our ability to meet the cash demands of our operating units.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
	(In millions)			
Net (loss) income	$ (97)	$ 42	$ (250)	$ 99
Adjustments:				
Depreciation, and amortization of intangible assets and capitalized software	39	42	129	118
Interest expense	32	26	85	76
Income tax (benefit) expense	(16)	50	(46)	137
EBITDA*	$ (42)	$ 160	$ (82)	$ 430

ADJUSTED NET (LOSS) INCOME* AND ADJUSTED NET (LOSS) INCOME PER SHARE*

We believe that adjusted net (loss) income* and adjusted net (loss) income per diluted share* are helpful in assessing our financial performance exclusive of the non-cash impact of the amortization of purchased intangibles. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to adjusted net (loss) income*.

	Three Months Ended September 30,				Nine Months Ended September 30,

(1) Income tax effect of adjustments calculated at the blended federal and state statutory tax rate of 37%.

CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our interim chief executive officer and our chief financial officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), were not effective at the reasonable assurance level because of the material weakness in our internal control over financial reporting described below. Notwithstanding the material weakness described below, management has concluded that our consolidated financial statements included in this interim report on Form 10-Q are fairly stated in all material respects in accordance with U.S. generally accepted accounting principles (GAAP) for each of the periods presented herein.

Existence of a Material Weakness in Internal Control as of September 30, 2017

During the quarter ended September 30, 2017, we determined that a material weakness existed in our internal control over financial reporting relating to the design and operating effectiveness of our internal control for our interim goodwill impairment tests for our Pathways subsidiary and Molina Medicaid Solutions segment. Specifically, spreadsheet formula errors in our valuation model, and errors made in the calculation of impairment losses recorded, were not detected in our review procedures. As a result, we initially miscalculated the goodwill impairment in the three and nine months ended September 30, 2017. The impairment calculation was corrected prior to the filing of our unaudited consolidated financial statements as of and for the three and nine months ended September 30, 2017.

Remediation Plan for Material Weakness

We will implement a remediation plan developed to address this material weakness as of September 30, 2017. The remediation efforts we intend to implement include the enhancement of the design of the controls relating to the computation and rigor of review of the goodwill impairment tests. The enhancement of the controls will include the engagement of additional subject matter experts to support the valuation calculations, key assumptions and review process. In addition, we intend to develop new review controls that operate at an appropriate level of precision to prevent or detect potential material errors within the valuation calculations. We believe these measures will remediate the material weakness identified above and will strengthen our internal control over financial reporting for the computation of reporting unit fair value and potential consequent goodwill impairment. We are currently targeting to complete the implementation of the control enhancements during the fourth quarter of 2017. We will test the operating effectiveness of the control enhancements subsequent to implementation. If the remedial measures described above are insufficient to address the material weakness described above, or are not implemented timely, or additional deficiencies arise in the future, material misstatements in our interim or annual financial statements may occur in the future and could have the effects described in "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2016.

Changes in Internal Control Over Financial Reporting: Except as described above, management did not identify any change in our internal control over financial reporting during the fiscal quarter ended September 30, 2017 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

Existence of a Material Weakness in Internal Control as of December 31, 2016

As disclosed in our Annual Report on Form 10-K for the year ended December 31, 2016, our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2016, based on the framework set forth in *Internal Control-Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis.

We determined that a material weakness existed in our internal control over financial reporting relating to the operation of an element of our process for calculating the amount owed to California by our California health plan. More specifically, a Medicaid Expansion contract amendment executed in the fourth quarter of 2016 changed the medical loss ratio corridor formula and such amendment was not initially considered in determining the liability. As a result, we understated net income by $44 million for the year ended December 31, 2016, which was material to our consolidated results for the year ended December 31, 2016. This amount was corrected prior to the issuance of our consolidated financial statements as of and for the year ended December 31, 2016.

Because of this material weakness, management concluded that we did not maintain effective internal control over financial reporting as of December 31, 2016, based on criteria described in *Internal Control - Integrated Framework* (2013) issued by COSO.

Remediation Plan for Material Weakness

We are executing the remediation plan developed to address the material weakness reported as of December 31, 2016. The remediation efforts we have implemented include the development of robust protocols to ensure that the control, relating to the review of a contractual amendment affecting the computation of the Medicaid Expansion medical loss ratio corridor for our California health plan, is operating as designed. We believe these measures will remediate the material weakness identified above and will strengthen our internal control over financial reporting for the computation of our California Medicaid Expansion medical loss ratio corridor. We currently are targeting to complete the implementation of the control enhancements during 2017. We will test the ongoing operating effectiveness of the control enhancements subsequent to implementation, and consider the material weakness remediated after the applicable remedial control enhancements operate effectively for a sufficient period of time. If the remedial measures described above are insufficient to address the material weakness described above, or are not implemented timely, or additional deficiencies arise in the future, material misstatements in our interim or annual financial statements may occur in the future and could have the effects described in “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2016.

LEGAL PROCEEDINGS

For information regarding legal proceedings, see Notes to Consolidated Financial Statements, Note 13, “Commitments and Contingencies.”

RISK FACTORS

Certain risks may have a material adverse effect on our business, financial condition, cash flows, results of operations, or stock price, and you should carefully consider them before making an investment decision. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in “Risk Factors,” in our Annual Report on Form 10-K for the year ended December 31, 2016 and our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2017 and June 30, 2017. The risk factors described in our 2016 Annual Report on Form 10-K and our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2017 and June 30, 2017, are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, cash flows, results of operations, or stock price.

UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

ISSUER PURCHASES OF EQUITY SECURITIES

Purchases of common stock made by us, or on our behalf during the quarter ended September 30, 2017, including shares withheld by us to satisfy our employees’ income tax obligations, are set forth below:

	Total Number of Shares Purchased [1]	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares Authorized to Be Purchased Under the Plans or Programs
July 1 - July 31	665	$ 69.18	—	$ —
August 1 - August 31	285	$ 57.03	—	$ —
September 1 - September 30	—	$ —	—	$ —
Total	950	$ 65.54	—	

(1) During the three months ended September 30, 2017, we withheld 950 shares of common stock under our 2011 Equity Incentive Plan to settle employee income tax obligations.

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph W. White, certify that:

1. I have reviewed the report on Form 10-Q for the period ended September 30, 2017 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. I am responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under my supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under my supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report my conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. I have disclosed, based on my most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Dated: November 5, 2017

CERTIFICATE PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the report of Molina Healthcare, Inc. (the "Company") on Form 10-Q for the period ended September 30, 2017 (the "Report"), I, Joseph W. White, Interim Chief Executive Officer and Chief Financial Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

June 30, 2017

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality managed health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

The Health Plans segment consists of health plans operating in 12 states and the Commonwealth of Puerto Rico, and includes our direct delivery business. As of June 30, 2017, these health plans served approximately 4.7 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Affordable Care Act Marketplace (Marketplace) members, most of whom receive government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in several states in which we operate.

Our health plans' state Medicaid contracts generally have terms of three to four years. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new request for proposal (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled (ABD); and regions or service areas.

The Molina Medicaid Solutions segment provides support to state government agencies in the administration of their Medicaid programs, including business processing, information technology development and administrative services.

The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

Restructuring Plan

We recorded $43 million in restructuring and separation costs in the second quarter of 2017 related primarily to contractually required termination benefits paid to our former chief executive officer (CEO) and chief financial officer (CFO). Also included in these costs are consulting fees incurred for the development and implementation of our corporate restructuring initiatives. See Note 11, "Restructuring and Separation Costs."

Recent Developments — Health Plans Segment

Direct Delivery. On August 2, 2017, we announced plans to restructure our direct delivery operations.

Mississippi Health Plan. In June 2017, Molina Healthcare of Mississippi, Inc. was awarded a Medicaid Coordinated Care Contract for the statewide administration of the Mississippi Coordinated Access Network (MississippiCAN). The contract begins July 1, 2017, for three years with options to renew annually for up to two additional years. The operational start date for the program is currently scheduled for July 1, 2018, pending the completion of a readiness review.

Washington Health Plan. In May 2017, Molina Healthcare of Washington, Inc. was selected by the Washington State Health Care Authority to negotiate and enter into managed care contracts for the North Central region of the state's Apple Health Integrated Managed Care Program. The start date for the new contract is scheduled for January 1, 2018.

Terminated Medicare Acquisition. In August 2016, we entered into agreements with each of Aetna Inc. and Humana Inc. to acquire certain assets related to their Medicare Advantage business. The transaction was subject to closing conditions including the completion of the proposed acquisition of Humana by Aetna (the Aetna-Humana Merger). In January 2017, the U.S. District Court for the District of Columbia granted the request for relief made by the U.S. Department of Justice in its civil antitrust lawsuit against Aetna and Humana, to prohibit the Aetna-Humana Merger. In February 2017, our agreements with each of Aetna and Humana were terminated by the parties pursuant to the terms of the agreements. Under the termination agreements, we received an aggregate termination fee of $75 million from Aetna and Humana in the first quarter of 2017, which is reported in "Other income, net."

New York Health Plan. In August 2016, we closed on our acquisition of the outstanding equity interests of Today's Options of New York, Inc., which now operates as Molina Healthcare of New York, Inc. The purchase price allocation was completed, and the final purchase price adjustments were recorded, in the first quarter of 2017. Such adjustments were insignificant, and the final purchase price was $38 million.

Recent Developments — Other Segment

Pathways subsidiary. In the second quarter of 2017, we recorded non-cash goodwill and intangible assets impairment losses of $72 million, related primarily to our Pathways subsidiary. See Note 10, "Impairment Losses."

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities (VIEs) in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such VIEs are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2017.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2016. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2016 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2016 audited consolidated financial statements.

2. Significant Accounting Policies

Certain of our significant accounting policies are discussed within the note to which they specifically relate.

Revenue Recognition – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services, and premiums collected in advance are deferred. Certain components of premium revenue are subject to accounting estimates and fall into two broad categories discussed in further detail below: 1) "Contractual Provisions That May Adjust or Limit Revenue or Profit;" and 2) "Quality Incentives."

Contractual Provisions That May Adjust or Limit Revenue or Profit

Medicaid

Medical Cost Floors (Minimums), and Medical Cost Corridors: A portion of our premium revenue may be returned if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $136 million and $272 million at June 30, 2017 and December 31, 2016, respectively, to "Amounts due government agencies." Approximately $114 million and $244 million of the liability accrued at June 30, 2017 and December 31, 2016, respectively, relates to our participation in Medicaid Expansion programs.

In certain circumstances, our health plans may receive additional premiums if amounts spent on medical care costs exceed a defined maximum threshold. Receivables relating to such provisions were insignificant at June 30, 2017 and December 31, 2016.

Profit Sharing and Profit Ceiling: Our contracts with certain states contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. Liabilities for profits in excess of the amount we are allowed to retain under these provisions were insignificant at June 30, 2017 and December 31, 2016.

Retroactive Premium Adjustments: State Medicaid programs periodically adjust premium rates on a retroactive basis. In these cases, we must adjust our premium revenue in the period in which we learn of the adjustment, rather than in the months of service to which the retroactive adjustment applies.

Medicare

Risk Adjustment: Our Medicare premiums are subject to retroactive increase or decrease based on the health status of our Medicare members (measured as a member risk score). We estimate our members' risk scores and the related amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health status, risk scores and Centers for Medicare & Medicaid Services (CMS) practices. Consolidated balance sheet amounts related to anticipated Medicare risk adjustment premiums and Medicare Part D settlements were insignificant at June 30, 2017 and December 31, 2016.

Minimum MLR: Additionally, federal regulations have established a minimum annual medical loss ratio (Minimum MLR) of 85% for Medicare. The medical loss ratio represents medical costs as a percentage of premium revenue. Federal regulations define what constitutes medical costs and premium revenue. If the Minimum MLR is not met, we may be required to pay rebates to the federal government. We recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of operations.

Marketplace

Premium Stabilization Programs: The Affordable Care Act (ACA) established Marketplace premium stabilization programs effective January 1, 2014. These programs, commonly referred to as the "3R's," include a permanent risk adjustment program, a transitional reinsurance program, and a temporary risk corridor program. We record receivables or payables related to the 3R programs and the Minimum MLR when the amounts are reasonably estimable as described below, and, for receivables, when collection is reasonably assured. Our receivables (payables) for each of these programs, as of the dates indicated, were as follows:

	June 30, 2017			December 31, 2016
	Current Benefit Year	Prior Benefit Years	Total	
	(In millions)			
Risk adjustment	$ (502)	$ (546)	$ (1,048)	$ (522)
Reinsurance	—	57	57	55
Risk corridor	—	(1)	(1)	(1)
Minimum MLR	(3)	(2)	(5)	(1)

- Risk adjustment: Under this permanent program, our health plans' composite risk scores are compared with the overall average risk score for the relevant state and market pool. Generally, our health plans will make a risk transfer payment into the pool if their composite risk scores are below the average risk score, and will receive a risk transfer payment from the pool if their composite risk scores are above the average risk score. We estimate our ultimate premium based on insurance policy year-to-date experience, and recognize estimated premiums relating to the risk adjustment program as an adjustment to premium revenue in our consolidated statements of operations.

- Reinsurance: This program was designed to provide reimbursement to insurers for high cost members and ended December 31, 2016; we expect to settle the outstanding receivable balance in 2017.

- Risk corridor: This program was intended to limit gains and losses of insurers by comparing allowable costs to a target amount as defined by CMS, and ended December 31, 2016; we expect to settle the outstanding payable balance in 2017.

Additionally, the ACA established a Minimum MLR of 80% for the Marketplace. The medical loss ratio represents medical costs as a percentage of premium revenue. Federal regulations define what constitutes medical costs and premium revenue. If the Minimum MLR is not met, we may be required to pay rebates to our Marketplace policyholders. Each of the 3R programs is taken into consideration when computing the Minimum MLR. We

recognize estimated rebates under the Minimum MLR as an adjustment to premium revenue in our consolidated statements of operations.

Quality Incentives

At several of our health plans, revenue ranging from approximately 1% to 3% of certain health plan premiums is earned only if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the periods presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of June 30, 2017 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of June 30, 2017.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
	(Dollars in millions)			
Maximum available quality incentive premium - current period	$ 39	$ 41	$ 77	$ 81
Quality incentive premium revenue recognized in current period:				
Earned current period	$ 29	$ 36	$ 48	$ 54
Earned prior periods	1	49	6	54
Total	$ 30	$ 85	$ 54	108
Quality incentive premium revenue recognized as a percentage of total premium revenue	0.6%	2.1%	0.6%	1.3%

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which generally differs from the U.S. federal statutory rate primarily because of state taxes, nondeductible expenses such as the Health Insurer Fee (HIF), goodwill impairment, certain compensation, and other general and administrative expenses. The effective tax rate was not impacted by HIF in 2017 given the 2017 HIF moratorium.

The effective tax rate may be subject to fluctuations during the year, particularly as a result of the level of pretax earnings, and also as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

Premium Deficiency Reserves on Loss Contracts

We assess the profitability of our medical care policies to identify groups of contracts where current operating results or forecasts indicate probable future losses. If anticipated future variable costs exceed anticipated future premiums and investment income, a premium deficiency reserve is recognized. We recorded a premium deficiency reserve to “Medical claims and benefits payable” on our accompanying consolidated balance sheets relating to our Marketplace program of $30 million as of December 31, 2016, which increased to $100 million as of June 30, 2017.

Recent Accounting Pronouncements

Goodwill Impairment. In January 2017, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2017-04, *Simplifying the Test for Goodwill Impairment*, which eliminates the requirement to calculate the implied fair value of goodwill to measure a goodwill impairment loss. Instead, an impairment loss is measured as the excess of the carrying amount of the reporting unit, including goodwill, over the fair value of the reporting unit. ASU 2017-04 is effective beginning January 1, 2020; we have early adopted ASU 2017-04 as of June 30, 2017, in connection with the assessment of our Pathways subsidiary. See further discussion at Note 10, “Impairment Losses.”

Restricted Cash. In November 2016, the FASB issued ASU 2016-18, *Restricted Cash,* which will require us to include in our consolidated statements of cash flows the balances of cash, cash equivalents, restricted cash and

restricted cash equivalents. When these items are presented in more than one line item on the balance sheet, the new guidance requires a reconciliation of the totals in the statement of cash flows to the related captions in the balance sheet. Transfers between cash and cash equivalents and restricted cash and restricted cash equivalents will no longer be presented in the statement of cash flows. ASU 2016-18 is effective beginning January 1, 2018; early adoption is permitted. We intend to early adopt ASU 2016-18 as of December 31, 2017, and are currently evaluating the effect to our consolidated statements of cash flows.

Stock Compensation. In March 2016, the FASB issued ASU 2016-09, *Improvements to Employee Share-Based Payment Accounting*, which amends ASC Topic 718, *Compensation – Stock Compensation*. ASU 2016-09 simplifies several aspects of accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures, statutory tax and classification in the statement of cash flows. We adopted ASU 2016-09 in the first quarter of 2017; such adoption did not significantly impact our consolidated financial statements. In addition, the prior period presentation in the statement of cash flows was not adjusted because such adjustments were insignificant.

Leases. In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842),* as modified by ASU 2017-03, *Transition and Open Effective Date Information*. Under ASU 2016-02, an entity will be required to recognize assets and liabilities for the rights and obligations created by leases on the entity's balance sheet for both finance and operating leases. For leases with a term of 12 months or less, an entity can elect to not recognize lease assets and lease liabilities and expense the lease over a straight-line basis for the term of the lease. ASU 2016-02 will require new disclosures that depict the amount, timing, and uncertainty of cash flows pertaining to an entity's leases. ASU 2016-02 is effective for us beginning January 1, 2019, and must be adopted using a modified retrospective approach for annual and interim periods beginning after December 15, 2018. Early adoption is permitted. Under this guidance, we will record assets and liabilities relating primarily to our long-term office leases, and are currently evaluating the effect to our consolidated financial statements.

Revenue Recognition. In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers (Topic 606).* We intend to adopt this standard and the related modifications on January 1, 2018, using the modified retrospective approach. Under this approach, the cumulative effect of initially applying the guidance will be reflected as an adjustment to beginning retained earnings.

We have determined that the insurance contracts of our Health Plans segment, which comprises the majority of our operations, are excluded from the scope of ASU 2014-09 because the recognition of revenue under these contracts is dictated by other accounting standards governing insurance contracts.

For our Molina Medicaid Solutions segment, we have determined that certain service revenue and cost of service revenue will no longer be deferred and recognized over the service delivery period. Rather, service revenue will be recognized based on the expected cost plus gross margin method, and cost of service revenue will be recognized as incurred. As of June 30, 2017, we expect the cumulative adjustment for historical periods through June 30, 2017 to increase retained earnings by no more than $50 million. This estimate will be updated in each quarterly and annual report until adoption. We expect the cumulative adjustment, if any, relating to our Other segment to be insignificant.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the Securities and Exchange Commission (SEC) did not have, or are not believed by management to have, a significant impact on our present or future consolidated financial statements.

3. Net (Loss) Income per Share

The following table sets forth the calculation of basic and diluted net (loss) income per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
	(In millions, except net income per share)			
Numerator:				
Net (loss) income	$ (230)	$ 33	$ (153)	$ 57
Denominator:				
Denominator for basic net (loss) income per share	56	55	56	55
Effect of dilutive securities:				
1.125% Warrants (1)	—	—	—	1
Denominator for diluted net (loss) income per share	56	55	56	56
Net (loss) income per share: (2)				
Basic	$ (4.10)	$ 0.58	$ (2.74)	$ 1.02
Diluted	$ (4.10)	$ 0.58	$ (2.74)	$ 1.01
Potentially dilutive common shares excluded from calculations:				
1.125% Warrants (1)	2	—	1	—

(1) For more information regarding the 1.125% Warrants, refer to Note 9, “Stockholders' Equity.” The dilutive effect of all potentially dilutive common shares is calculated using the treasury-stock method. Certain potentially dilutive common shares issuable are not included in the computation of diluted net (loss) income per share because to do so would be anti-dilutive. For the three and six months ended June 30, 2017, the 1.125% Warrants were excluded from diluted shares outstanding because to do so would have been anti-dilutive.

(2) Source data for calculations in thousands.

4. Fair Value Measurements

We consider the carrying amounts of cash and cash equivalents and other current assets and current liabilities (not including derivatives and the current portion of long-term debt) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy defined by GAAP. For a description of the methods and assumptions that we use to a) estimate the fair value; and b) determine the classification according to the fair value hierarchy for each financial instrument, see Note 5, “Fair Value Measurements,” in our 2016 Annual Report on Form 10-K.

Derivative financial instruments include the 1.125% Call Option derivative asset and the 1.125% Conversion Option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of June 30, 2017 included the price of our common stock, the time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 8, “Derivatives,” the 1.125% Call Option asset and the 1.125% Conversion Option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of operations. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

The net changes in fair value of Level 3 financial instruments were insignificant to our results of operations for the six months ended June 30, 2017.

Our financial instruments measured at fair value on a recurring basis at June 30, 2017, were as follows:

	Total	Quoted Market Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(In millions)		
Corporate debt securities	$ 1,386	$ —	$ 1,386	$ —
U.S. treasury notes	263	263	—	—
Government-sponsored enterprise securities (GSEs)	241	241	—	—
Municipal securities	140	—	140	—
Asset-backed securities	128	—	128	—
Certificates of deposit	34	—	34	—
Subtotal - current investments	2,192	504	1,688	—
Corporate debt securities	228	—	228	—
U.S. treasury notes	97	97	—	—
Subtotal - current restricted investments	325	97	228	—
1.125% Call Option derivative asset	440	—	—	440
Total assets	$ 2,957	$ 601	$ 1,916	$ 440
1.125% Conversion Option derivative liability	$ 440	$ —	$ —	$ 440
Total liabilities	$ 440	$ —	$ —	$ 440

Our financial instruments measured at fair value on a recurring basis at December 31, 2016, were as follows:

	Total	Quoted Market Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(In millions)		
Corporate debt securities	$ 1,179	$ —	$ 1,179	$ —
U.S. treasury notes	84	84	—	—
GSEs	231	231	—	—
Municipal securities	142	—	142	—
Asset-backed securities	69	—	69	—
Certificates of deposit	53	—	53	—
Subtotal - current investments	1,758	315	1,443	—
1.125% Call Option derivative asset	267	—	—	267
Total assets	$ 2,025	$ 315	$ 1,443	$ 267
1.125% Conversion Option derivative liability	$ 267	$ —	$ —	$ 267
Total liabilities	$ 267	$ —	$ —	$ 267

There were no current restricted investments as of December 31, 2016.

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our senior notes, which are classified as Level 2 financial instruments, are indicated in the following table.

	June 30, 2017		December 31, 2016	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	(In millions)			
5.375% Notes	$ 692	$ 745	$ 691	$ 714
1.125% Convertible Notes	483	976	471	792
4.875% Notes	325	333	—	—
1.625% Convertible Notes	289	386	284	344
	$ 1,789	$ 2,440	$ 1,446	$ 1,850

5. Investments

Available-for-Sale Investments

We consider all of our investments classified as current assets (including restricted investments) to be available-for-sale. Certain of our senior notes, as further discussed in Note 7, “Debt,” contain a limitation on the use of proceeds which required us to deposit the net proceeds from their issuance into a segregated deposit account, a current asset reported as “Restricted investments” in the accompanying consolidated balance sheets. Such proceeds, while restricted as to their use and held in a segregated deposit account, are available-for-sale based upon our contractual liquidity requirements.

The following tables summarize our investments as of the dates indicated:

	June 30, 2017			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 1,387	$ 1	$ 2	$ 1,386
U.S. treasury notes	263	—	—	263
GSEs	242	—	1	241
Municipal securities	140	—	—	140
Asset-backed securities	128	—	—	128
Certificates of deposit	34	—	—	34
Subtotal - current investments	2,194	1	3	2,192
Corporate debt securities	227	1	—	228
U.S. treasury notes	97	—	—	97
Subtotal - current restricted investments	324	1	—	325
Total	$ 2,518	$ 2	$ 3	$ 2,517

	December 31, 2016			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Corporate debt securities	$ 1,180	$ 1	$ 2	$ 1,179
U.S. treasury notes	84	—	—	84
GSEs	232	—	1	231
Municipal securities	143	—	1	142
Asset-backed securities	69	—	—	69
Certificates of deposit	53	—	—	53
Total - current investments	$ 1,761	$ 1	$ 4	$ 1,758

There were no current restricted investments as of December 31, 2016.

The contractual maturities of our available-for-sale investments as of June 30, 2017 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 1,301	$ 1,301
Due after one year through five years	1,194	1,193
Due after five years through ten years	23	23
Total	$ 2,518	$ 2,517

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Gross realized investment gains and losses for the three and six months ended June 30, 2017 and 2016 were insignificant.

We have determined that unrealized losses at June 30, 2017 and December 31, 2016, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we maintain the intent and ability to hold these securities to maturity, we are unlikely to experience losses. In the event that we dispose of these securities before maturity, we expect that realized losses, if any, will be insignificant.

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of June 30, 2017:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 913	$ 2	418	$ —	$ —	—
GSEs	247	1	101	—	—	—
Total - current investments	$ 1,160	$ 3	519	$ —	$ —	—

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2016:

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions	Estimated Fair Value	Unrealized Losses	Total Number of Positions
	(Dollars in millions)					
Corporate debt securities	$ 542	$ 2	378	$ —	$ —	—
GSEs	198	1	73	—	—	—
Municipal securities	101	1	129	—	—	—
Total - current investments	$ 841	$ 4	580	$ —	$ —	—

Held-to-Maturity Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by government authorities primarily in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. The use of these funds is limited as required by regulation in the various states in which we operate, or as needed in the event of insolvency of capitated providers. Therefore, such investments are reported as non-current “Restricted investments” in the accompanying consolidated balance sheet. We have the ability to hold these restricted investments until maturity, and as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates.

The contractual maturities of our held-to-maturity restricted investments, which are carried at amortized cost, which approximates fair value, as of June 30, 2017 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In millions)	
Due in one year or less	$ 100	$ 100
Due after one year through five years	18	17
	$ 118	$ 117

6. Medical Claims and Benefits Payable

The following table provides the details of our medical claims and benefits payable (including amounts payable for the provision of long-term services and supports, or LTSS) as of the dates indicated.

	June 30, 2017	December 31, 2016
	(In millions)	
Fee-for-service claims incurred but not paid (IBNP)	$ 1,478	$ 1,352
Pharmacy payable	121	112
Capitation payable	45	37
Other	433	428
	$ 2,077	$ 1,929

“Other” medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various government agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of operations. Non-risk provider payables amounted to $111 million and $225 million as of June 30, 2017 and December 31, 2016, respectively.

Reinsurance recoverables of $65 million and $83 million as of June 30, 2017 and 2016, respectively, are included in “Receivables” in the accompanying consolidated balance sheets.

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts presented for “Components of medical care costs related to: Prior periods” represent the amount by which our original estimate of medical claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Six Months Ended June 30,	
	2017	2016
	(Dollars in millions)	
Medical claims and benefits payable, beginning balance	$ 1,929	$ 1,685
Components of medical care costs related to:		
Current period	8,633	7,371
Prior periods	(31)	(189)
Total medical care costs	8,602	7,182
Change in non-risk provider payables	(114)	24
Payments for medical care costs related to:		
Current period	6,883	5,885
Prior periods	1,457	1,240
Total paid	8,340	7,125
Medical claims and benefits payable, ending balance	$ 2,077	$ 1,766
Benefit from prior period as a percentage of:		
Balance at beginning of period	1.6%	11.3%
Premium revenue, trailing twelve months	0.2%	1.3%
Medical care costs, trailing twelve months	0.2%	1.4%

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid would generally be between 8% and 10% less than the IBNP liability recorded at the end of the period as a result of the inclusion in that liability of the provision for adverse claims deviation and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate—we only know when the circumstances for any one or more factors are out of the ordinary.

As indicated in the table above, the amounts ultimately paid out on our medical claims and benefits payable liabilities in fiscal years 2017 and 2016 were less than what we had expected when we had established those liabilities. The differences between our original estimates and the amounts ultimately paid out (or now expected to be ultimately paid out) for the most part related to IBNP. While many related factors working in conjunction with one another serve to determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

While prior period development of our estimate as of December 31, 2016, through June 30, 2017, was favorable by $31 million, that amount is substantially less than the favorable prior period development of $189 million we recognized for the same period in the prior year. Further, favorable development through June 30, 2017, was less than the 8% to 10% we typically expect.

We believe that the most significant uncertainties surrounding our IBNP estimates at June 30, 2017 are as follows:

- In the first half of 2017, our Marketplace enrollment across all health plans increased by over 400,000 members. Due to limited insight into the cost patterns associated with this large number of new Marketplace members, our liability estimates for these members are subject to more than the usual amount of uncertainty.
- At our Florida health plan, claims receipts increased significantly over the last few months due to an increase in the receipt of secondary claims, many of which are not our liability. These claims will either be denied or will have very small paid amounts. For this reason, claims denial rates, amounts paid per claim and other claims indicators will be impacted, making our liability estimates subject to more than the usual amount of uncertainty.

- At our Illinois health plan, we paid a large number of claims in the first half of 2017 that had previously been denied and were subsequently disputed by providers. This has created some distortion in the claims payment patterns, making our liability estimates subject to more than the usual amount of uncertainty.
- At our California health plan, we adjusted our inpatient authorization process. As a result, due to the expected increase in authorized inpatient stays, our liability estimates are subject to more than the usual amount of uncertainty.
- At our New Mexico health plan, a fee schedule reduction for a large provider has created some distortion in the claims payment patterns, making our liability estimates subject to more than the usual amount of uncertainty.

7. Debt

Substantially all of our debt is held at the parent, which is reported in the Other segment. The following table summarizes our outstanding debt obligations and their classification in the accompanying consolidated balance sheets (in millions):

	June 30, 2017	December 31, 2016
Current portion of long-term debt:		
1.125% Convertible Notes, net of unamortized discount	$ 488	$ 477
1.625% Convertible Notes, net of unamortized premium and discount	291	—
Lease financing obligations	1	1
Debt issuance costs	(7)	(6)
	773	472
Non-current portion of long-term debt, reported as "Senior notes":		
5.375% Notes	700	700
4.875% Notes	330	—
1.625% Convertible Notes, net of unamortized premium and discount	—	286
Debt issuance costs	(13)	(11)
	1,017	975
Lease financing obligations	198	198
	$ 1,988	$ 1,645

4.875% Notes due 2025

On June 6, 2017, we completed the private offering of $330 million aggregate principal amount of senior notes (4.875% Notes) due June 15, 2025, unless earlier redeemed. Interest on the 4.875% Notes is payable semiannually in arrears on June 15 and December 15. According to their terms, the guarantees under the 4.875% Notes mirror those of the Credit Facility, defined and described below. See Note 16, "Supplemental Condensed Consolidating Financial Information," for more information on the guarantors. The 4.875% Notes contain customary non-financial covenants and change of control provisions.

The 4.875% Notes contain a limitation on the use of proceeds which required us to deposit the net proceeds from their issuance into a segregated deposit account, a current asset reported as "Restricted investments" in our consolidated balance sheets. These funds may be used by us as follows:

- On or prior to August 20, 2018, to:
  - Redeem, repurchase, repay, tender for, or acquire for value all or any portion of our 1.625% Convertible Notes, defined and discussed further below, or to satisfy the cash portion of any consideration due upon any conversion of the 1.625% Convertible Notes; and/or
  - Pay any interest due on all or any portion of the 4.875% Notes.
- On or after August 20, 2018, to repurchase all or any portion of the 1.625% Convertible Notes that we are obligated to repurchase; and

- Subsequent to August 20, 2018 (or such earlier date in the event that there are no longer any 1.625% Convertible Notes outstanding), in any other manner not otherwise prohibited in the indenture governing the 4.875% Notes.

5.375% Notes due 2022

We have outstanding $700 million aggregate principal amount of senior notes (5.375% Notes) due November 15, 2022, unless earlier redeemed. According to their terms, the guarantees under the 5.375% Notes mirror those of the Credit Facility, defined and described below. See Note 16, “Supplemental Condensed Consolidating Financial Information,” for more information on the guarantors.

Credit Facility

In January 2017, we entered into an amended unsecured $500 million revolving credit facility (Credit Facility), referred to as the First Amendment. As of June 30, 2017, outstanding letters of credit amounting to $6 million reduced our borrowing capacity under the Credit Facility to $494 million. The Credit Facility has a term of five years and all amounts outstanding will be due and payable on January 31, 2022. As of June 30, 2017, no amounts were outstanding under the Credit Facility.

In addition to increasing amounts available to borrow under the Credit Facility and extending its term, the First Amendment provided that all guarantors immediately prior to January 3, 2017, other than Molina Information Systems, LLC, d/b/a Molina Medicaid Solutions, Molina Pathways, LLC, and Pathways Health and Community Support LLC, were automatically and unconditionally released from their obligations as guarantors of the Credit Facility and the 5.375% Notes.

The Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio. In February 2017, we entered into a second amendment to the Credit Facility (the Second Amendment) which modified the Credit Facility’s definition of the earnings measure used in the financial covenant computations to a) allow us to receive credit for risk corridor payments owed to, but not received or accrued by us during 2016; and b) account for the difference between the amount of actual risk transfer payments made or accrued by us during 2016, and the amount of risk transfer payments that would have been due under the federal government’s proposed 2018 risk adjustment payment transfer formula.

In May 2017, we entered into a third amendment to the Credit Facility (the Third Amendment) which modified the Credit Facility’s definition of specified cash, to permit cash that is either subject to customary escrow arrangements or held in a segregated account to be netted from the Credit Facility’s consolidated net leverage ratio if the use of the cash is limited to the repayment of other indebtedness. The Third Amendment also adds a carve-out to the Credit Facility’s negative pledge covenant to allow for the escrow arrangements and segregated accounts. At June 30, 2017, we were in compliance with all financial and non-financial covenants under the Credit Facility.

Convertible Senior Notes

We have outstanding $550 million aggregate principal amount of 1.125% cash convertible senior notes due January 15, 2020, unless earlier repurchased or converted. We refer to these notes as our 1.125% Convertible Notes. We also have outstanding $302 million aggregate principal amount of 1.625% convertible senior notes due August 14, 2044, unless earlier repurchased, redeemed, or converted. We refer to these notes as our 1.625% Convertible Notes. The 1.125% Convertible Notes are convertible entirely to cash, and the 1.625% Convertible Notes are convertible partially to cash, each prior to their respective maturity dates under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger.

The stock price trigger for the 1.125% Convertible Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended June 30, 2017; therefore, they are convertible into cash and are reported in current portion of long-term debt as of June 30, 2017.

The stock price trigger for the 1.625% Convertible Notes is $75.51 per share. The 1.625% Convertible Notes did not meet this stock price trigger in the quarter ended June 30, 2017. On contractually specified dates beginning in 2018, holders of the 1.625% Convertible Notes may require us to repurchase some or all of such notes. In addition, beginning May 15, 2018 until August 19, 2018, holders may convert some or all of the 1.625% Convertible Notes. Because of this conversion feature, the 1.625% Convertible Notes are reported in current portion of long-term debt as of June 30, 2017. As noted above, because the proceeds from the 4.875% Notes are initially restricted to payments upon conversion or redemption of the 1.625% Convertible Notes, such restricted investments are also classified as current in the accompanying consolidated balance sheets.

Cross-Default Provisions

The terms of our 4.875% Notes, 5.375% Notes and each of the 1.125% and 1.625% Convertible Notes contain cross-default provisions with the Credit Facility that are triggered upon an event of default under the Credit Facility, and when borrowings under the Credit Facility equal or exceed certain amounts as defined in the related indentures.

Debt Commitment Letter

In connection with the Terminated Medicare Acquisition, we entered into a debt commitment letter with Barclays Bank PLC (Barclays) in August 2016. Under this debt commitment letter, Barclays agreed to lend us up to $400 million, subject to satisfaction of certain conditions, including consummation of the Terminated Medicare Acquisition. The debt commitment letter automatically terminated in February 2017 as a result of the termination of this transaction. The costs associated with the debt commitment letter and its termination were reimbursed as described in Note 1, "Basis of Presentation–*Health Plans Segment Recent Developments*."

8. Derivatives

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the accompanying consolidated balance sheets:

	Balance Sheet Location	June 30, 2017	December 31, 2016
		(In millions)	
Derivative asset:			
1.125% Call Option	Current assets: Derivative asset	$ 440	$ 267
Derivative liability:			
1.125% Conversion Option	Current liabilities: Derivative liability	$ 440	$ 267

Our derivative financial instruments do not qualify for hedge treatment; therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of operations, and reported in "Other income, net." Gains and losses for our derivative financial instruments are presented individually in the accompanying consolidated statements of cash flows, "Supplemental cash flow information."

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Convertible Notes in 2013, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Convertible Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Convertible Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Convertible Notes), these transactions are intended to offset cash payments in excess of the principal amount of the 1.125% Convertible Notes due upon any conversion of such Notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 4, "Fair Value Measurements."

1.125% Conversion Option. The embedded cash conversion option within the 1.125% Convertible Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Conversion Option, refer to Note 4, "Fair Value Measurements."

As of June 30, 2017, the 1.125% Call Option and the 1.125% Conversion Option were classified as a current asset and current liability, respectively, because the 1.125% Convertible Notes may be converted within 12 months of June 30, 2017, as described in Note 7, "Debt."

9. Stockholders' Equity

Stockholders' equity decreased $128 million during the six months ended June 30, 2017 compared with stockholders' equity at December 31, 2016. The decrease was due primarily to the net loss of $153 million, partially offset by $24 million related to employee stock transactions in the six months ended June 30, 2017, which are described further below.

1.125% Warrants

In connection with the Call Spread Overlay transaction described in Note 8, "Derivatives," in 2013, we issued 13,490,236 warrants with a strike price of $53.8475 per share. Under certain circumstances, beginning in April 2020, when the price of our common stock exceeds the strike price of the 1.125% Warrants, we will be obligated to issue shares of our common stock subject to a share delivery cap. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock exceeds the applicable strike price of the 1.125% Warrants. Refer to Note 3, "Net (Loss) Income per Share," for dilution information for the periods presented. We will not receive any additional proceeds if the 1.125% Warrants are exercised.

Stock Incentive Plans

In connection with our equity incentive plans and employee stock purchase plan, approximately 692,000 shares of common stock vested or were purchased, net of shares used to settle employees' income tax obligations, during the six months ended June 30, 2017.

Restricted stock awards (RSAs), performance stock awards (PSAs) and performance stock units (PSUs) activity for the six months ended June 30, 2017 is summarized below:

	Restricted Stock Awards	Performance Stock Awards	Performance Stock Units	Total	Weighted Average Grant Date Fair Value
Unvested balance, December 31, 2016	577,244	345,656	—	922,900	$ 58.15
Granted	377,076	—	231,100	608,176	56.98
Vested	(380,812)	(260,894)	(139,272)	(780,978)	57.63
Forfeited	(58,643)	—	—	(58,643)	54.48
Unvested balance, June 30, 2017	514,865	84,762	91,828	691,455	57.57

The total fair value of RSAs granted during the six months ended June 30, 2017 and 2016 was $19 million and $17 million, respectively. The total fair value of RSAs which vested during the six months ended June 30, 2017 and 2016 was $20 million and $21 million, respectively.

No PSAs were granted during the six months ended June 30, 2017. The total fair value of PSAs granted during the six months ended June 30, 2016 was $15 million. The total fair value of PSAs which vested during the six months ended June 30, 2017 was $15 million. No PSAs vested during the six months ended June 30, 2016.

The total fair value of PSUs granted during the six months ended June 30, 2017 was $16 million. The total fair value of PSUs which vested during the six months ended June 30, 2017 was $9 million. There were no PSUs granted or vested in 2016.

During the six months ended June 30, 2017, the vesting of 133,957 RSAs, 153,574 PSAs and 139,272 PSUs was accelerated in connection with the termination of our former Chief Executive Officer (CEO) and former Chief Financial Officer (CFO) in May 2017. Share-based compensation expense of $35 million was recorded during the six months ended June 30, 2017, of which $23 million was recorded to "Restructuring and separation costs" in the accompanying consolidated statements of operations. See Note 11, "Restructuring and Separation Costs" for further discussion. Share-based compensation expense of $16 million was recorded to "General and administrative expenses" in the six months ended June 30, 2016.

As of June 30, 2017, there was $32 million of total unrecognized compensation expense related to unvested RSAs, including those with market and performance conditions, and unvested PSUs, which we expect to recognize over a remaining weighted-average period of 2.5 years and 2.1 years, respectively. This unrecognized compensation cost assumes an estimated forfeiture rate of 3.3% for non-executive employees as of June 30, 2017.

10. Impairment Losses

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations. Goodwill is not amortized, but is subject to an annual impairment test. Refer to Note 2, “Significant Accounting Policies,” for a discussion of our adoption of ASU 2017-04, *Simplifying the Test for Goodwill Impairment*. We are required to test at least annually for impairment, or more frequently if adverse events or changes in circumstances indicate that the asset may be impaired. When testing goodwill for impairment, we may first assess qualitative factors, such as industry and market factors, cost factors, and changes in overall performance, to determine if it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value. If our qualitative assessment indicates that goodwill impairment is more likely than not, we perform additional quantitative analysis. We may also elect to skip the qualitative testing and proceed directly to the quantitative testing.

An impairment loss is measured as the excess of the carrying amount of the reporting unit, including goodwill, over the fair value of the reporting unit. We estimate the fair values of our reporting units using discounted cash flows. In the discounted cash flow analyses, we must make assumptions about a wide variety of internal and external factors, and consider the price that would be received to sell the reporting unit as a whole in an orderly transaction between market participants at the measurement date. Significant assumptions include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value beyond the discretely forecasted periods, and discount rates.

In the course of developing our restructuring and profitability improvement plan, discussed further in Note 11, “Restructuring and Separation Costs,” we determined that future benefits to be derived from Pathways, including integration with our health plans, would be less than previously anticipated. In addition, poorer than expected year-to-date operating results and lower projections of operating results for periods in the near term led us to conclude that a triggering event for an interim impairment analysis had occurred in the second quarter of 2017.

Intangible Assets. We first evaluated Pathways’ finite-lived intangible assets (customer relationships and contract licenses) for impairment, using undiscounted cash flows expected over the longest remaining useful life of the assets tested. See below for a description of the estimates and assumptions used in the cash flow model. Because the undiscounted cash flows over the remaining useful life were less than Pathways’ carrying amount, the intangible assets were impaired. We recorded an impairment loss for the carrying amount of the intangible assets, or $11 million, in the second quarter of 2017.

Goodwill. We next tested Pathways’ goodwill for impairment. As described above, we estimated Pathways’ fair value using discounted cash flows, incorporating significant estimates and assumptions related to future periods. Such estimates included anticipated client census which drives service revenue; management’s determination that future benefits to be derived from Pathways (including integration with our health plans) will be less than previously anticipated; current prospects relating to the behavioral services labor market which drives cost of service revenue; and anticipated capital expenditures. In addition, we applied our weighted average cost of capital (WACC) as the best estimate to discount future estimated cash flows to present value. The WACC was based on externally available data considering market participants’ cost of equity and debt, and capital structure. We applied a terminal growth rate that corresponds to Pathways’ long-term growth prospects. The test resulted in a fair value less than Pathways’ carrying amount; therefore, we recorded an impairment loss for the difference, or $59 million, in the second quarter of 2017. In addition to the Pathways impairment loss, we recorded an impairment loss of $2 million for a separate subsidiary’s goodwill that did not pass the impairment test. Both impairment losses were recorded to the Other segment, and reported as “Impairment losses” in the accompanying consolidated statements of operations.

There were no impairments of intangible assets or goodwill during 2016.

The following table presents the balances of goodwill as of June 30, 2017 and December 31, 2016:

	Health Plans	Molina Medicaid Solutions	Other	Total
		(In millions)		
Historical goodwill	$ 445	$ 71	$ 162	$ 678
Accumulated impairment losses at December 31, 2016	(58)	—	—	(58)
Balance, December 31, 2016	387	71	162	620
Impairment losses	—	—	(61)	(61)
Balance, June 30, 2017	$ 387	$ 71	$ 101	$ 559
Accumulated impairment losses at June 30, 2017	$ (58)	$ —	$ (61)	$ (119)

11. Restructuring and Separation Costs

Following a management-initiated, broad operational assessment in early 2017, designed to improve our profitability and expand our core Medicaid business, in June 2017, we accelerated the implementation of a comprehensive restructuring and profitability improvement plan (the Restructuring Plan). Under the Restructuring Plan, we are taking the following actions:

1. We are streamlining our organizational structure, including the elimination of redundant layers of management, the consolidation of regional support services, and other reductions to our workforce, to improve efficiency as well as the speed and quality of our decision-making.

2. We are re-designing core operating processes such as provider payment, utilization management, quality monitoring and improvement, and information technology to achieve more effective and cost efficient outcomes.

3. We are remediating high cost provider contracts and building around high quality, cost-effective networks.

4. We are restructuring our existing direct delivery operations.

5. We are reviewing our vendor base to ensure that we are partnering with the lowest-cost, most-effective vendors.

6. Throughout this process, we are taking precautions to ensure that our actions do not impede our ability to continue to deliver quality health care, retain existing managed care contracts, and to secure new managed care contracts.

In addition to costs incurred under the Restructuring Plan, in the second quarter of 2017 we recorded costs associated with the separation of our former CEO and former CFO, described in further detail below.

All restructuring and separation costs incurred in the six months ended June 30, 2017, are reported in “Restructuring and separation costs” in the accompanying consolidated statements of operations, and are included in the Other segment because they represent corporate costs not allocated to the other reportable segments.

Separation Costs

Separation costs–ongoing benefit arrangements for former executives. We entered into amended and restated employment agreements with our former CEO and former CFO in 2016. On May 2, 2017, their employment was terminated without cause. Under the amended and restated employment agreements, they were each entitled to receive 400% of their base salary, a prorated termination bonus (150% of base salary for the former CEO and 125% of base salary for the former CFO), full vesting of equity compensation, and a cash payment for health and welfare benefits. During the second quarter of 2017, we recorded charges of $35 million for severance primarily related to these former executives. Of this total, $23 million related to the acceleration of their share-based compensation, as further discussed in Note 9, “Stockholders' Equity.” Employee separation costs were insignificant in 2016.

Separation costs–one-time benefit arrangement for workforce reduction. As part of the Restructuring Plan, we are reducing our corporate and health plans workforce by approximately 10%, or 1,500 full-time-equivalent employees. This workforce rightsizing, which represents 7% of the total number of our employees, is expected to be completed by the end of 2017. Affected employees will be offered severance and outplacement assistance. Our board of

directors approved the reduction in our workforce under the Restructuring Plan effective July 27, 2017; as such no amounts were accrued for this termination plan as of June 30, 2017.

Other Restructuring Costs

In the six months ended June 30, 2017, we incurred approximately $8 million in other restructuring costs including primarily consulting fees relating to the operational assessment and restructuring initiatives described above.

The following table summarizes the year-to-date activities related to our Restructuring Plan, the reserve for which is reported in "Accounts payable and accrued liabilities" in the consolidated balance sheets:

	Separation Costs–Former Executives	Other Restructuring Costs	Total
		(In millions)	
Accrued restructuring and separation costs as of December 31, 2016	$ —	$ —	$ —
Costs recognized	35	8	43
Cash payments	(1)	(2)	(3)
Other adjustments–acceleration of share-based compensation	(23)	—	(23)
Accrued restructuring and separation costs as of June 30, 2017	$ 11	$ 6	$ 17

Expected Costs

We estimate that total pre-tax costs associated with the Restructuring Plan will be approximately $130 million to $150 million for the second half of 2017, with an additional $40 million to be incurred in 2018. We expect these costs to relate only to the Health Plans and Other segments. Other restructuring costs will include primarily consulting fees; costs associated with the restructuring of our direct delivery operations including lease terminations and accelerated depreciation and amortization; and restructuring of various corporate business functions.

The following table illustrates our estimates of costs associated with the Restructuring Plan, which we expect to be completed by the end of 2018, by segment and major type of cost:

Estimated Costs Expected to be Incurred by Reportable Segment	Health Plans	Other	Total
		(In millions)	
Separation costs–one-time benefit arrangement for a workforce reduction	$25 to $30	$35 to $40	$60 to $70
Other restructuring costs	$55 to $60	$55 to $60	$110 to $120
	$80 to $90	$90 to $100	$170 to $190

12. Segment Information

We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment. Our reportable segments are consistent with how we currently manage the business and view the markets we serve.

Gross margin is the appropriate earnings measure for our reportable segments, based on how our chief operating decision maker currently reviews results, assesses performance, and allocates resources.

Gross margin for our Health Plans segment is referred to as "Medical margin," and for our Molina Medicaid Solutions and Other segments, as "Service margin." Medical margin represents the amount earned by the Health Plans segment after medical costs are deducted from premium revenue. The medical care ratio represents medical care costs as a percentage of premium revenue, and is one of the key metrics used to assess the performance of the Health Plans segment. Therefore, the underlying medical margin is the most important measure of earnings reviewed by the chief operating decision maker. The service margin is equal to service revenue minus cost of service revenue.

	Health Plans	Molina Medicaid Solutions	Other	Consolidated
		(In millions)		
Three Months Ended June 30, 2017				
Total revenue [1]	$ 4,868	$ 47	$ 84	$ 4,999

Goodwill, and Intangible Assets, Net				
June 30, 2017	498	72	101	671
December 31, 2016	513	72	175	760

(1) Total revenue consists primarily of premium revenue, premium tax revenue and health insurer fee revenue for the Health Plans segment, and service revenue for the Molina Medicaid Solutions and Other segments. Inter-segment revenue is insignificant for all periods presented.

The following table reconciles gross margin by segment to consolidated income before income tax expense:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
	(In millions)			
Gross margin:				
Health Plans	$ 249	$ 435	$ 786	$ 842
Molina Medicaid Solutions	4	5	8	11
Other	1	14	6	21
Total gross margin	254	454	800	874
Add: other operating revenues (1)	130	195	255	403
Less: other operating expenses (2)	(671)	(544)	(1,260)	(1,083)
Operating (loss) income	(287)	105	(205)	194
Other expenses (income), net	27	25	(22)	50
(Loss) income before income taxes	$ (314)	$ 80	$ (183)	$ 144

(1) Other operating revenues include premium tax revenue, health insurer fee revenue, investment income and other revenue.

(2) Other operating expenses include general and administrative expenses, premium tax expenses, health insurer fee expenses, depreciation and amortization, impairment losses, and restructuring and separation costs.

13. Commitments and Contingencies

Regulatory Capital Requirements and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based on current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $1,526 million at June 30, 2017, and $1,492 million at December 31, 2016. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments (excluding restricted investments) held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments (excluding restricted investments) amounted to $165 million and $264 million as of June 30, 2017 and December 31, 2016, respectively.

The National Association of Insurance Commissioners (NAIC) adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules which may vary from state to state. All of the states in which our health plans operate, except California, Florida and New York, have adopted these rules. Such requirements, if adopted by California, Florida and New York, may increase the minimum capital required for those states.

As of June 30, 2017, our health plans had aggregate statutory capital and surplus of approximately $1,662 million compared with the required minimum aggregate statutory capital and surplus of approximately $1,118 million. Primarily as a result of the recognition of Marketplace-related premium deficiency reserves discussed in Note 2, “Significant Accounting Policies,” certain of our health plans did not meet the minimum capital requirements on June 30, 2017. We intend to remedy the deficiencies to the satisfaction of our departments of insurance prior to the filing of the statutory financial statements on August 15, 2017. We have the ability, and have committed to provide, additional capital to each of our health plans as necessary to ensure compliance with statutory capital and surplus requirements.

Legal Proceedings

The health care and Medicaid-related business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Marketplace Risk Corridor Program. On January 19, 2017, we filed suit against the United States of America in the United States Court of Federal Claims, Case Number 1:55-cv-01000-UNJ, on behalf of our health plans seeking recovery from the federal government of approximately $52 million in Marketplace risk corridor payments for calendar year 2015. Based upon current estimates, we believe our health plans are also owed approximately $76 million in Marketplace risk corridor payments from the federal government for calendar year 2016, and a further nominal amount for calendar year 2014. Our lawsuit seeks recovery of all of these unpaid amounts. We have not recognized revenue, nor have we recorded a receivable, for any amount due from the federal government for unpaid Marketplace risk corridor payments as of June 30, 2017. We have fully recognized all liabilities due to the federal government that we have incurred under the Marketplace risk corridor program, and have paid all amounts due to the federal government as required.

Rodriguez v. Providence Community Corrections. On October 1, 2015, seven individuals, on behalf of themselves and all others similarly situated, filed a complaint in the District Court for the Middle District of Tennessee, Nashville Division, Case No. 3:15-cv-01048 (the Rodriquez Litigation), against Providence Community Corrections, Inc. (now known as Pathways Community Corrections, Inc., or PCC). Rutherford County, Tennessee formerly contracted with PCC for the administration of misdemeanor probation, which involved the collection of court costs and fees from probationers. The complaint alleges, among other things, that PCC illegally assessed fees and surcharges against probationers and made improper threats of arrest and probation revocation if the probationers did not pay such amounts. The plaintiffs in the Rodriguez Litigation seek alleged compensatory, treble, and punitive damages, plus attorneys' fees, for alleged federal and state constitutional violations, as well as alleged violations of the Racketeer Influenced and Corrupt Organization Act. PCC's agreement with Rutherford County terminated effective March 31, 2016. On November 1, 2015, one month after the Rodriguez Litigation commenced, we acquired PCC from The Providence Service Corporation (Providence) pursuant to a membership interest purchase agreement. In September 2016, the parties to the Rodriguez Litigation accepted a mediation proposal for settlement pursuant to which PCC and Rutherford County would pay the plaintiffs $14 million and $3 million, respectively. The parties are in the process of finalizing the settlement agreement. We expect to recover the full amount of the settlement under the indemnification provisions of the membership interest purchase agreement with Providence.

United States of America, ex rel., Anita Silingo v. Mobile Medical Examination Services, Inc., et al. On or around October 14, 2014, Molina Healthcare of California, Molina Healthcare of California Partner Plan, Inc., Mobile Medical Examination Services, Inc. (MedXM), and other health plan defendants were served with a Complaint previously filed under seal in the Central District Court of California by Relator, Anita Silingo, Case No. SACV13-1348-FMO(SHx). The Complaint alleges that MedXM improperly modified medical records and otherwise took inappropriate steps to increase members' risk adjustment scores, and that the defendants, including Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc., purportedly turned a "blind eye" to these unlawful practices. On October 22, 2015, the Relator filed a third amended complaint, seeking general and compensatory damages, treble damages, civil penalties, plus interest and attorneys' fees. On July 11, 2016, the District Court dismissed with prejudice the third amended complaint, without leave to amend. On September 23, 2016, the plaintiff filed an appeal with the Ninth Circuit Court of Appeals. The appeal has been fully briefed by the parties and we are awaiting the Court's decision.

States' Budgets

From time to time the states in which our health plans operate may experience financial difficulties, which could lead to delays in premium payments. Until July 4, 2017, the state of Illinois operated without a budget for its current fiscal year. As of June 30, 2017, our Illinois health plan served approximately 163,000 members, and recognized premium revenue of approximately $310 million in the first half of 2017. As of July 28, 2017, the state of Illinois owed us approximately $116 million for certain March, April, May and June 2017 premiums.

On May 3, 2017, Puerto Rico's financial oversight board filed for a form of bankruptcy in the U.S. District Court in Puerto Rico under Title III of PROMESA. The Title III provision allows for a court debt restructuring process similar to U.S. bankruptcy protection. To the extent such bankruptcy results in our failure to receive payment of amounts due under our Medicaid contract with the Commonwealth or the inability of the Commonwealth to extend our Medicaid contract at the end of its current term, such bankruptcy could have a material adverse effect on our business, financial condition, cash flows, or results of operations. As of June 30, 2017, the plan served approximately 322,000 members and recorded premium revenue of approximately $362 million in the first half of 2017. As of July 28, 2017, the Commonwealth was current with its premium payments.

14. Related Party Transactions

Our California health plan has entered into a provider agreement with Pacific Healthcare IPA (Pacific), which is 50% owned by the brother-in-law of Dr. J. Mario Molina and John C. Molina, who are members of our board of directors. Under the terms of this provider agreement, the California health plan pays Pacific for medical care Pacific provides to health plan members. For the three and six months ended June 30, 2017 and 2016, the amounts paid to Pacific were insignificant.

Refer to Note 15, "Variable Interest Entities (VIEs)," for a discussion of the Joseph M. Molina, M.D. Professional Corporations.

15. Variable Interest Entities (VIEs)

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created to further advance our direct delivery business. On August 2, 2017, we announced plans to restructure our direct delivery operations.

JMMPC's primary shareholder is Dr. J. Mario Molina, who is a member of our board of directors. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides primary care medical services through its employed physicians and other medical professionals. JMMPC also provides certain specialty referral services to our California health plan members through a contracted provider network. Substantially all of the individuals served by JMMPC are members of our California, Florida, New Mexico, Utah, and Washington health plans. These health plans had entered into primary care services agreements with JMMPC, under which the health plans paid $29 million and $31 million to JMMPC for health care services provided in the three months ended June 30, 2017 and 2016, respectively. For the six months ended June 30, 2017 and 2016, the health plans paid JMMPC $60 million and $61 million, respectively. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, Molina Medical Management, Inc. (MMM), had also entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC operated at break even, ensuring the availability of quality care and access for our health plan members. The services agreements further provided that the administrative fees charged to JMMPC by MMM were reviewed annually to assure the achievement of this goal. For each of the three months ended June 30, 2017 and 2016, JMMPC paid $13 million to MMM for clinic administrative services. For the six months ended June 30, 2017 and 2016, JMMPC paid $26 million and $27 million, respectively, to MMM for clinic administrative services.

As of June 30, 2017, we determined that JMMPC is a VIE, and that we are its primary beneficiary. We reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we had the power to direct the activities (excluding clinical decisions) that most significantly affected JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that were potentially significant to the VIE, under the agreements described above. Because we were its primary beneficiary, we consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of

Molina Healthcare, Inc. As of June 30, 2017, JMMPC had total assets of $17 million, and total liabilities of $18 million. As of December 31, 2016, JMMPC had total assets of $18 million, and total liabilities of $18 million.

Our maximum exposure to loss as a result of our involvement with JMMPC was generally limited to the amounts needed to fund JMMPC's ongoing payroll, employee benefits and medical care costs associated with JMMPC's specialty referral activities.

16. Supplemental Condensed Consolidating Financial Information

The 5.375% Notes described in Note 7, "Debt," are fully and unconditionally guaranteed by certain of our 100% owned subsidiaries on a joint and several basis, with certain exceptions considered customary for such guarantees. The 5.375% Notes and the guarantees are effectively subordinated to all of our and our guarantors' existing and future secured debt to the extent of the assets securing such debt. In addition, the 5.375% Notes and the guarantees are structurally subordinated to all indebtedness and other liabilities and preferred stock, if any, of our subsidiaries that do not guarantee the 5.375% Notes.

As discussed in Note 7, "Debt," the First Amendment to the Credit Facility provided that all guarantors immediately prior to January 3, 2017, other than Molina Information Systems, LLC, d/b/a Molina Medicaid Solutions, Molina Pathways, LLC, and Pathways Health and Community Support LLC, were automatically and unconditionally released from their obligations as guarantors under the Credit Facility and the 5.375% Notes.

The following condensed consolidating financial statements present Molina Healthcare, Inc. (as parent guarantor), the subsidiary guarantors, the subsidiary non-guarantors and eliminations, according to the guarantor structure as assessed at the most recent balance sheet date, June 30, 2017.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (MD&A)

FORWARD LOOKING STATEMENTS

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated. Those known risks and uncertainties include, but are not limited to, the following:

- *the success of the Restructuring Plan, including the timing of the benefits realized;*
- *the numerous political and market-based uncertainties associated with the Affordable Care Act (the "ACA") or "Obamacare," including any potential repeal and replacement of the law, amendment of the law, or move to state block grants for Medicaid;*
- *the market dynamics surrounding the ACA Marketplaces, including but not limited to uncertainties associated with risk transfer requirements, the potential for disproportionate enrollment of higher acuity members, the withdrawal of cost sharing subsidies and/or premium tax credits, the adequacy of agreed rates, and potential disruption associated with market withdrawal;*
- *subsequent adjustments to reported premium revenue based upon subsequent developments or new information, including changes to estimated amounts payable or receivable related to Marketplace risk adjustment/risk transfer, risk corridors, and reinsurance;*
- *effective management of our medical costs;*
- *our ability to predict with a reasonable degree of accuracy utilization rates, including utilization rates associated with seasonal flu patterns or other newly emergent diseases;*
- *significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria, including the payment of all amounts due to our Illinois health plan following the resolution of the Illinois budget impasse;*
- *the success of our efforts to retain existing government contracts, including those in Florida, Illinois, New Mexico, Puerto Rico, and Texas, and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states;*
- *any adverse impact resulting from the significant changes to our executive leadership team and the rightsizing of our workforce;*
- *the impact of our decision to exit the Utah and Wisconsin ACA Marketplace markets effective December 31, 2017;*
- *our ability to manage our operations, including maintaining and creating adequate internal systems and controls relating to authorizations, approvals, provider payments, and the overall success of our care management initiatives;*
- *our ability to consummate and realize benefits from acquisitions or divestitures;*

- *our receipt of adequate premium rates to support increasing pharmacy costs, including costs associated with specialty drugs and costs resulting from formulary changes that allow the option of higher-priced non-generic drugs;*
- *our ability to operate profitably in an environment where the trend in premium rate increases lags behind the trend in increasing medical costs;*
- *the interpretation and implementation of federal or state medical cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit sharing arrangements, and risk adjustment provisions;*
- *our estimates of amounts owed for such cost expenditure floors, administrative cost and profit ceilings, premium stabilization programs, profit-sharing arrangements, and risk adjustment provisions;*
- *the Medicaid expansion cost corridors in California, New Mexico, and Washington, and any other retroactive adjustment to revenue where methodologies and procedures are subject to interpretation or dependent upon information about the health status of participants other than Molina members;*
- *the interpretation and implementation of at-risk premium rules and state contract performance requirements regarding the achievement of certain quality measures, and our ability to recognize revenue amounts associated therewith;*
- *cyber-attacks or other privacy or data security incidents resulting in an inadvertent unauthorized disclosure of protected health information;*
- *the success of our health plan in Puerto Rico, including the resolution of the Puerto Rico debt crisis, payment of all amounts due under our Medicaid contract, the effect of the PROMESA law, and our efforts to better manage the health care costs of our Puerto Rico health plan;*
- *the success and renewal of our duals demonstration programs in California, Illinois, Michigan, Ohio, South Carolina, and Texas;*
- *the accurate estimation of incurred but not reported or paid medical costs across our health plans;*
- *efforts by states to recoup previously paid and recognized premium amounts;*
- *the continuation and renewal of the government contracts of our health plans, Molina Medicaid Solutions, and Pathways, and the terms under which such contracts are renewed;*
- *complications, member confusion, or enrollment backlogs related to the annual renewal of Medicaid coverage;*
- *government audits and reviews, or potential investigations, and any fine, sanction, enrollment freeze, monitoring program, or premium recovery that may result therefrom, including any potential demand by the state of New Mexico to recover purportedly underpaid premium taxes;*
- *changes with respect to our provider contracts and the loss of providers;*
- *approval by state regulators of dividends and distributions by our health plan subsidiaries;*
- *changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;*
- *high dollar claims related to catastrophic illness;*
- *the favorable resolution of litigation, arbitration, or administrative proceedings;*
- *the relatively small number of states in which we operate health plans;*
- *the availability of adequate financing on acceptable terms to fund and capitalize our expansion and growth, repay our outstanding indebtedness at maturity and meet our liquidity needs, including the interest expense and other costs associated with such financing;*
- *our failure to comply with the financial or other covenants in our credit agreement or the indentures governing our outstanding notes;*
- *the sufficiency of our funds on hand to pay the amounts due upon conversion or maturity of our outstanding notes;*
- *the failure of a state in which we operate to renew its federal Medicaid waiver;*
- *changes generally affecting the managed care or Medicaid management information systems industries;*
- *increases in government surcharges, taxes, and assessments, including but not limited to the deductibility of certain compensation costs;*
- *newly emergent viruses or widespread epidemics, public catastrophes or terrorist attacks, and associated public alarm; and*
- *increasing competition and consolidation in the Medicaid industry;*

Investors should refer to the section entitled “Risk Factors” in each of our Annual Report on Form 10-K for the year ended December 31, 2016, our Quarterly Report on Form 10-Q for the quarter ended March 31, 2017, and this Quarterly Report on Form 10-Q, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2016.

ABOUT MOLINA HEALTHCARE

OUR MISSION IS TO PROVIDE QUALITY HEALTHCARE TO PEOPLE RECEIVING GOVERNMENT ASSISTANCE.

Molina Healthcare, Inc. provides quality managed health care to people receiving government assistance. We offer cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist government agencies in their administration of the Medicaid program. We have three reportable segments. These segments consist of our Health Plans segment, which constitutes the vast majority of our operations; our Molina Medicaid Solutions segment; and our Other segment.

OUR GOAL IS TO ACHIEVE OUR MISSION WHILE IMPROVING THE FINANCIAL STRENGTH OF OUR ORGANIZATION.

KEY PERFORMANCE INDICATORS

Non-GAAP Financial Measures

We use non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance to the performance of other public companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not as substitutes for or superior to, GAAP measures.

See further information regarding non-GAAP measures in the "Supplemental Information" section of this MD&A, including the reconciliations to U.S. GAAP. Non-GAAP financial measures referred to in this report are designated with an asterisk (*).

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
	(Dollar amounts in millions, except per-share amounts)			
Net (loss) income	$ (230)	$ 33	$ (153)	$ 57
Net (loss) income per diluted share	$ (4.10)	$ 0.58	$ (2.74)	$ 1.01
MCR (1)	94.8 %	89.2%	91.6 %	89.5%
G&A ratio (2)	8.1 %	8.1%	8.5 %	7.9%
Premium tax ratio (1)	2.4 %	2.6%	2.3 %	2.6%
Effective tax rate	26.8 %	59.8%	16.0 %	60.7%
Net profit margin (2)	(4.6)%	0.7%	(1.5)%	0.7%
EBITDA*	$ (243)	$ 144	$ (40)	$ 270
Adjusted net (loss) income*	$ (225)	$ 38	$ (142)	$ 67
Adjusted net (loss) income per diluted share*	$ (4.01)	$ 0.67	$ (2.55)	$ 1.18

(1) MCR represents medical care costs as a percentage of premium revenue; premium tax ratio represents premium tax expenses as a percentage of premium revenue plus premium tax revenue.
(2) G&A ratio represents general and administrative expenses as a percentage of total revenue. Net profit margin represents net income as a percentage of total revenue.

CONSOLIDATED RESULTS

Three Months Ended June 30, 2017 Compared with Three Months Ended June 30, 2017

- Net loss per diluted share was $4.10 in the second quarter of 2017 compared with net income per diluted share of $0.58 reported for the second quarter of 2016. Adjusted net loss per diluted share* was $4.01 in the second quarter of 2017, compared with adjusted net income per diluted share of $0.67 in the second quarter of 2016. Loss before income tax benefit for the second quarter of 2017 was $314 million.

- Certain significant items contributed $330 million to the loss before income tax benefit. See further discussion of these items in the table below, in "Health Plans—Financial Performance by Program," and "Other Consolidated Information."

- The medical care ratio increased to 94.8% in the second quarter of 2017 compared to 89.2% in the second quarter of 2016. See further discussion below in "Reportable Segments—Health Plans—Financial Overview."

The following table summarizes the impact of the significant items:

Summary of Significant Items Affecting 2017 Financial Results

	Three Months Ended June 30, 2017		Six Months Ended June 30, 2017	
	(In millions, except per diluted share amounts)			
	Amount	Per Diluted Share (1)	Amount	Per Diluted Share (1)
Impairment losses	$ 72	$ 1.01	$ 72	$ 1.02
Losses at behavioral health subsidiary exclusive of impairment	8	0.09	12	0.14
Medical care costs related to prior year service dates that were in excess of historical expectations	85	0.95	74	0.84
Marketplace adjustments related to risk transfer, cost sharing subsidies, and other items for 2016 service dates	44	0.49	47	0.53
Marketplace premium deficiency reserve for 2017 service dates	78	0.87	70	0.79
Restructuring and separation costs	43	0.68	43	0.68
Termination fee received for Terminated Medicare acquisition	—	—	(75)	(0.84)
	$ 330	$ 4.09	$ 243	$ 3.16

(1) Except for certain items that are not deductible for tax purposes, per diluted share amounts are generally calculated at our statutory income tax rate of 37%, which is in excess of the effective tax rate recorded in our consolidated statements of operations.

Certain significant items increased loss before income tax benefit in the second quarter of 2017 by approximately $330 million. Specifically:

- We recorded $72 million in non-cash impairment losses for goodwill and intangibles, primarily relating to our Pathways subsidiary. In the course of developing our restructuring and profitability improvement plan, we determined that future benefits to be derived from Pathways (including integration with our health plans) will be less than previously anticipated. While such impairment losses have a short-term impact on profitability, there is no impact to our cash flows. Pathways experienced operating losses of $8 million for the quarter ended June 30, 2017 and $12 million for the six months ended June 30, 2017.
- Medical care costs related to 2016 service dates were significantly in excess of what the Company usually experiences for out-of-period claims development, particularly at the Florida, Illinois, New Mexico, and Puerto Rico health plans. In total, we experienced out-of-period claims development that was approximately $85 million higher than expected at December 31, 2016.

- We recorded $44 million for Marketplace changes in estimates, including risk transfer and cost sharing subsidies, related to 2016 service dates. Liabilities for risk transfer payments and cost sharing subsidies that were estimated at December 31, 2016 were finalized during the second quarter of 2017.
- Loss before income tax benefit increased by $78 million as a result of an increase to the premium deficiency reserve established for the Marketplace program. The reserve, which was $22 million at March 31, 2017, increased to $100 million as of June 30, 2017. Based upon revenue and cost trends observed in the second quarter of 2017, we now believe that Marketplace performance in the second half of 2017 will fall substantially short of previous expectations. Marketplace performance has been most disappointing in Florida, Utah, Washington, and Wisconsin.
- We recorded $43 million in restructuring and separation costs in the second quarter of 2017 related primarily to contractually required termination benefits paid to our former chief executive officer and chief financial officer. Also included in these costs are consulting fees incurred for the development and implementation of our corporate restructuring initiatives. See below in “Liquidity and Financial Condition—Future Sources and Uses of Liquidity,” and Notes to Consolidated Financial Statements, Note 11, “Restructuring and Separation Costs,” for further information.

Six Months ended June 30, 2017 Compared with Six Months Ended June 30, 2016

Net loss per diluted share was $2.74 in the first half of 2017 compared with net income per diluted share of $1.01 reported for the first half of 2016. Adjusted net loss per diluted share* was $2.55 in the first half of 2017, compared with adjusted net income per diluted share* of $1.18 in the first half of 2016. Loss before income tax benefit for the first half of 2017 was $153 million. These results were affected by several out-of-period adjustments as presented in the table, and as further described, above. In total, these adjustments increased pretax loss in the first half of 2017 by $243 million.

RESTRUCTURING AND PROFIT IMPROVEMENT PLAN

As a result of our poor operating performance and catalyzed by our change in management, we accelerated the implementation of a comprehensive restructuring and profitability improvement plan (the Restructuring Plan). Under the Restructuring Plan, we are taking the following actions:

1. We are streamlining our organizational structure, including the elimination of redundant layers of management, the consolidation of regional support services, and other reductions to our workforce, to improve efficiency as well as the speed and quality of our decision-making.
2. We are re-designing core operating processes such as provider payment, utilization management, quality monitoring and improvement, and information technology to achieve more effective and cost efficient outcomes.
3. We are remediating high cost provider contracts and building around high quality, cost-effective networks.
4. We are restructuring our existing direct delivery operations.
5. We are reviewing our vendor base to ensure that we are partnering with the lowest-cost, most-effective vendors.
6. Throughout this process, we are taking precautions to ensure that our actions do not impede our ability to continue to deliver quality health care, retain existing managed care contracts, and to secure new managed care contracts.

ACTION PLAN—2018 MARKETPLACE PERFORMANCE

In addition to the Restructuring Plan, we are taking these further steps to improve profitability in 2018:

1. We are exiting the Utah and Wisconsin ACA Marketplaces effective December 31, 2017. For the three months ended June 30, 2017, these two health plans reported a total of $127 million in Marketplace premium revenue (16% of consolidated Marketplace premium revenue), and a combined Marketplace medical care ratio of 128%.
2. In our remaining Marketplace plans, we are increasing 2018 premiums by 55%. The increase takes into account the absence of cost sharing reduction subsidies. Had we assumed that cost sharing reduction subsidies would be funded for 2018, the premium increase would have been 30%.
3. We are also reducing the scope of our 2018 participation in the Washington Marketplace.
4. We continue to closely monitor the current political and programmatic developments pertaining to our 2018 participation in other Marketplace states, and subject to those developments, will withdraw from 2018 participation as may be necessary.

TRENDS AND UNCERTAINTIES

ACA and the Marketplace

The future of the Affordable Care Act (ACA) and its underlying programs, including the Marketplace, are subject to substantial uncertainty. We continue to advocate for federal policies to stabilize the Marketplace program.

Medicaid Contract Re-Procurement

The following table illustrates Health Plans segment Medicaid contracts scheduled for re-procurement in the near term. While we have been notified of the Medicaid regulators' intention to re-procure the contracts, the anticipated award dates and effective dates are management's current best estimates. Such dates are subject to change and, in some cases, not yet known to us. Premium revenue is stated in millions.

State Health Plan	Medicaid Program(s)	Membership as of June 30, 2017	Premium Revenue Six Months Ended June 30, 2017	Anticipated Award Date	Anticipated Effective Date
Florida	All	359,000	$ 726	Q1 2018	1/1/2019
Illinois	All	159,000	259	Q3 2017	1/1/2018
New Mexico	All	234,000	605	Q1 2018	1/1/2019
Puerto Rico	All	322,000	362	Q1 2018	7/1/2018
Texas	All	191,000	920	Q3 2018	9/1/2019
Texas	CHIP	25,000	21	Q4 2017	9/1/2018

Washington Health Plan. As discussed in Notes to Consolidated Financial Statements, Note 1, "Basis of Presentation," in May 2017, Molina Healthcare of Washington, Inc. was selected by the Washington State Health Care Authority to negotiate and enter into managed care contracts for the North Central region of the state's Apple Health Integrated Managed Care Program. The start date for the new contract is scheduled for January 1, 2018.

REPORTABLE SEGMENTS

How We Assess Performance

We derive our revenues primarily from health insurance premiums, and our primary customers are state Medicaid agencies and the federal government.

One of the key metrics used to assess the performance of our most significant segment, the Health Plans segment, is the medical care ratio, or MCR. The medical care ratio represents medical care costs as a percentage of premium revenue. Therefore, the underlying gross margin, or the amount earned by the Health Plans segment after medical costs are deducted from premium revenue, is the most important measure of earnings reviewed by management.

Gross margin for our Health Plans segment is referred to as "Medical margin," and for our Molina Medicaid Solutions and Other segments, as "Service margin." The service margin is equal to service revenue minus cost of service revenue. Management's discussion and analysis of the changes in the individual components of gross

margin, by reportable segment, is presented in the “Health Plans—Financial Overview,” “Molina Medicaid Solutions—Financial Overview,” and “Other—Financial Overview” sections, respectively, of this MD&A.

SEGMENT SUMMARY

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
	(In millions)			
Segment gross margin:				
Health Plans medical margin [1]	$ 249	$ 435	$ 786	$ 842
Molina Medicaid Solutions service margin [2]	4	5	8	11
Other [2]	1	14	6	21
Total segment gross margin	254	454	800	874
Other operating revenues [3]	130	195	255	403
Other operating expenses [4]	(671)	(544)	(1,260)	(1,083)
Operating (loss) income	(287)	105	(205)	194
Other expenses (income), net	27	25	(22)	50
(Loss) income before income tax expense	(314)	80	(183)	144
Income tax (benefit) expense	(84)	47	(30)	87
Net (loss) income	$ (230)	$ 33	$ (153)	57

(1) Represents premium revenue minus medical care costs.
(2) Represents service revenue minus cost of service revenue.
(3) Other operating revenues include premium tax revenue, health insurer fee revenue, investment income and other revenue.
(4) Other operating expenses include general and administrative expenses, premium tax expenses, health insurer fee expenses, depreciation and amortization, impairment losses, and restructuring and separation costs.

HEALTH PLANS

The Health Plans segment consists of health plans operating in 12 states and the Commonwealth of Puerto Rico, and includes our direct delivery business. As of June 30, 2017, these health plans served approximately 4.7 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. This membership includes Affordable Care Act Marketplace (Marketplace) members, most of whom receive government premium subsidies.

BUSINESS OVERVIEW

Recent Developments — Health Plans Segment

Refer to Notes to Consolidated Financial Statements, Note 1, “Basis of Presentation.”

Health Plans Membership

The following tables set forth our Health Plans membership as of the dates indicated:

	June 30, 2017	December 31, 2016	June 30, 2016
Ending Membership by Program:			
Temporary Assistance for Needy Families (TANF) and Children's Health Insurance Program (CHIP)	2,517,000	2,536,000	2,500,000
Marketplace	949,000	526,000	597,000
Medicaid Expansion	678,000	673,000	654,000
Aged, Blind or Disabled (ABD)	408,000	396,000	387,000
Medicare-Medicaid Plan (MMP) – Integrated [1]	54,000	51,000	51,000
Medicare Special Needs Plans (Medicare)	44,000	45,000	44,000
	4,650,000	4,227,000	4,233,000
Ending Membership by Health Plan:			
California	766,000	683,000	680,000
Florida	672,000	553,000	565,000
Illinois	163,000	195,000	201,000
Michigan	414,000	391,000	393,000
New Mexico	266,000	254,000	251,000
New York [2]	34,000	35,000	—
Ohio	351,000	332,000	341,000
Puerto Rico	322,000	330,000	336,000
South Carolina	112,000	109,000	105,000
Texas	465,000	337,000	367,000
Utah	167,000	146,000	151,000
Washington	788,000	736,000	709,000
Wisconsin	130,000	126,000	134,000
	4,650,000	4,227,000	4,233,000

(1) MMP members receive both Medicaid and Medicare coverage from Molina Healthcare.
(2) The New York health plan was acquired on August 1, 2016.

Premiums by Program

The amount of the premiums paid to our health plans may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans by program on a per member per month (PMPM) basis, for the six months ended June 30, 2017. The "Consolidated" column represents the weighted-average amounts for our total membership by program.

	PMPM Premiums		
	Low	High	Consolidated
TANF and CHIP	$ 120.00	$ 320.00	$ 180.00
Marketplace	180.00	440.00	270.00
Medicaid Expansion	320.00	510.00	390.00
ABD	370.00	1,490.00	1,030.00
MMP – Integrated	1,220.00	3,250.00	2,150.00
Medicare	910.00	1,240.00	1,100.00

FINANCIAL OVERVIEW

In the second quarter of 2017, premium revenue increased approximately 18%, or $711 million, when compared with the second quarter of 2016. Member months grew 11% while revenue PMPM increased 7%. Medical care costs as a percent of premium revenue increased to 94.8% in the second quarter of 2017 from 89.2% in the second quarter of 2016. Medical margin decreased 43% in the second quarter of 2017 from the second quarter of 2016.

In the six months ended June 30, 2017, premium revenue increased approximately 17%, or $1,364 million, when compared with the six months ended June 30, 2016. Member months grew 13% while revenue PMPM increased 4%. Medical care costs as a percent of premium revenue increased to 91.6% in the six months ended June 30, 2017 from 89.5% in the six months ended June 30, 2016. Medical margin decreased 7% in the six months ended June 30, 2017 from the six months ended June 30, 2016.

FINANCIAL PERFORMANCE BY PROGRAM

The following tables summarize member months, premium revenue, medical care costs, medical care ratio and medical margin by program for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

	Three Months Ended June 30, 2017						
	Member Months [1]	Premium Revenue		Medical Care Costs		MCR [2]	Medical Margin
		Total	PMPM	Total	PMPM		
TANF and CHIP	7.6	$ 1,391	$ 182.47	$ 1,315	$ 172.48	94.5%	$ 76

	25.1	$ 8,024	$ 320.17	$ 7,182	$ 286.57	89.5%	$ 842

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) "MCR" represents medical costs as a percentage of premium revenue.

Medicaid: TANF/CHIP, Medicaid Expansion and ABD

The medical care ratios of the combined TANF/CHIP, Medicaid Expansion and ABD programs increased to 93.8% in the second quarter of 2017, from 89.5% in the second quarter of 2016.

As noted above, medical care costs recognized in the second quarter of 2017 for services delivered in 2016 were significantly in excess of what we usually experience for out-of-period claims development. Favorable run-out of our reported in "Medical claims and benefits payable" as of December 31, 2016, was $85 million less than our typical experience, and was reflected in higher medical care costs for the quarter. This development was most notable at our Florida, Illinois, New Mexico, and Puerto Rico health plans. Additionally, those same health plans experienced higher than expected current period medical care costs.

The medical care ratios of the combined TANF/CHIP, Medicaid Expansion and ABD programs increased to 92.7% in the six months ended June 30, 2017, from 89.9% in the six months ended June 30, 2016, primarily due to the reasons noted above for the increased medical care ratio in the second quarter of 2017.

MMP and Medicare

The medical care ratio for these programs, in the aggregate, increased in the second quarter of 2017 when compared with the second quarter of 2016. However, for the six months ended June 30, 2017, compared with the six months ended June 30, 2016, the aggregated medical care ratio for these two programs decreased.

Marketplace

The medical care ratio for the Marketplace program increased to 101.9% in the second quarter of 2017, from 86.4% in the second quarter of 2016.

The medical care ratio for the Marketplace program increased to 88.6% in the six months ended June 30, 2017, from 84.0% in the six months ended June 30, 2016.

In the second quarter of 2017, we recorded an increase to the premium deficiency reserve established for the Marketplace program. The reserve, which was $22 million at March 31, 2017, increased to $100 million as of June 30, 2017. In addition, we recorded $44 million for Marketplace changes in estimates, including risk transfer and cost sharing subsidies, related to 2016 service dates. Liabilities for risk transfer payments and cost sharing subsidies that were estimated at December 31, 2016 were finalized during the second quarter of 2017.

In the first half of 2016, adjustments related to 2015 dates of service reduced Marketplace pretax income by approximately $68 million.

Member months increased 68% in the second quarter of 2017, when compared with the second quarter of 2016, as a result of membership growth primarily in California, Florida and Texas.

FINANCIAL PERFORMANCE BY STATE

The ongoing poor performance at our Florida, Illinois, New Mexico and Puerto Rico health plans in 2017 all contributed to our disappointing financial performance in the second quarter of 2017. The following tables summarize member months, premium revenue, medical care costs, medical care ratio, and medical margin by state health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in millions):

	Three Months Ended June 30, 2017						
	Member Months	Premium Revenue		Medical Care Costs			
		Total	PMPM	Total	PMPM	MCR	Medical Margin
California	2.4	$ 679	$ 294.09	$ 606	$ 262.34	89.2%	$ 73

(1) The New York health plan was acquired on August 1, 2016.
(2) "Other" medical care costs include primarily medically related administrative costs of the parent company, and direct delivery costs.

MEDICAL CARE COSTS BY TYPE

The following table provides the details of consolidated medical care costs by category for the periods indicated (dollars in millions except PMPM amounts):

	Three Months Ended June 30,					
	2017			2016		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 3,348	$ 238.04	74.5%	$ 2,620	$ 206.01	72.9%
Pharmacy	650	46.23	14.5	529	41.59	14.7
Capitation	356	25.29	7.9	304	23.87	8.5
Direct delivery	22	1.54	0.5	18	1.39	0.5
Other	115	8.19	2.6	123	9.68	3.4
	$ 4,491	$ 319.29	100.0%	$ 3,594	$ 282.54	100.0%

	Six Months Ended June 30,					
	2017			2016		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 6,434	$ 228.68	74.8%	$ 5,357	$ 213.77	74.6%
Pharmacy	1,266	45.00	14.7	1,054	42.05	14.7
Capitation	680	24.17	7.9	599	23.87	8.3
Direct delivery	44	1.56	0.5	34	1.36	0.5
Other	178	6.33	2.1	138	5.52	1.9
	$ 8,602	$ 305.74	100.0%	$ 7,182	$ 286.57	100.0%

PREMIUM TAXES

The premium tax ratio (premium tax expense as a percentage of premium revenue plus premium tax revenue) was 2.4% in the second quarter of 2017 compared with 2.6% in the second quarter of 2016 and 2.3% in the six months ended June 30, 2017, compared with 2.6% in the six months ended June 30, 2016. This decline was primarily due to the temporary suspension of a Michigan HMO use tax effective January 1, 2017 which was partially offset by a higher California premium tax rate effective July 1, 2016, and significant revenue growth at our Florida health plan, which operates in a state with no premium tax.

HEALTH INSURER FEE (HIF) REVENUE AND EXPENSES

The Consolidated Appropriations Act of 2016 provided for a HIF moratorium in 2017. Therefore, there are no HIF revenues or expenses in 2017.

MOLINA MEDICAID SOLUTIONS

The Molina Medicaid Solutions segment provides support to state government agencies in the administration of their Medicaid programs, including business processing, information technology development and administrative services.

FINANCIAL OVERVIEW

The Molina Medicaid Solutions segment service margin for the second quarter of 2017 and 2016 and for the six months ended June 30, 2017 and 2016 was insignificant.

OTHER

The Other segment includes primarily our Pathways behavioral health and social services provider, and corporate amounts not allocated to other reportable segments.

Substantially all of Pathways' revenue is derived from contracts with state or local government agencies and government intermediaries, the majority of which are negotiated fee-for-service arrangements. A significant number of these contracts allow the payer to terminate the contract immediately with or without cause.

FINANCIAL OVERVIEW

The Other segment service margin for the second quarter of 2017 and 2016 and for the six months ended June 30, 2017 and 2016 was insignificant.

In the course of developing the Restructuring Plan, as discussed further in Notes to Consolidated Financial Statements, Note 11, "Restructuring and Separation Costs," we determined that future benefits to be derived from Pathways, including integration with our health plans, would be less than previously anticipated. In addition, poorer than expected year-to-date operating results and lower projections of operating results for periods in the near term led us to conclude that a triggering event for an interim impairment analysis had occurred in the second quarter of 2017.

For the Other segment in total, we recorded impairment charges of $61 million for goodwill and $11 million for intangible assets, or $72 million in the aggregate, reported in our consolidated statements of operations as "Impairment losses."

OTHER CONSOLIDATED INFORMATION

GENERAL AND ADMINISTRATIVE EXPENSES

The G&A ratio was 8.1% in both the second quarter of 2017 and 2016. The G&A ratio increased to 8.5% for the six months ended June 30, 2017, compared with 7.9% for the six months ended June 30, 2016. The year to date G&A ratio increased over 2016 primarily due to costs associated with increased Marketplace enrollment in 2017 and the reduction to revenue as a result of the 2017 Health Insurer Fee (HIF) moratorium.

DEPRECIATION AND AMORTIZATION

Depreciation and amortization, as a percentage of total revenue, was 0.8% in the six months ended June 30, 2017 and 2016.

IMPAIRMENT LOSSES

See Notes to Consolidated Financial Statements, Note 10, “Impairment Losses.”

RESTRUCTURING AND SEPARATION COSTS

See Notes to Consolidated Financial Statements, Note 11, “Restructuring and Separation Costs.”

INTEREST EXPENSE

Interest expense was $27 million for the second quarter of 2017, compared with $25 million for the second quarter of 2016. Interest expense increased to $53 million for the six months ended June 30, 2017, from $50 million for the six months ended June 30, 2016. Interest expense includes non-cash interest expense relating primarily to the amortization of the discount on convertible senior notes, which amounted to $8 million and $7 million for second quarter of 2017 and 2016, respectively and $16 million and $15 million the six months ended June 30, 2017 and 2016, respectively. We expect interest expense to continue to increase in future periods as a result of our recent $330 million offering of 4.875% Notes. See further discussion in Notes to Consolidated Financial Statements, Note 7, “Debt.”

OTHER INCOME, NET

As described in Notes to Consolidated Financial Statements, Note 1, “Basis of Presentation,” in February 2017, we received an aggregate termination fee of $75 million for the Terminated Medicare Acquisition. This amount is reported in “Other income, net” in our consolidated statements of operations.

INCOME TAXES

The (benefit) provision for income taxes was recorded at an effective rate of 26.8% for the second quarter of 2017, compared with 59.8% for the second quarter of 2016, and an effective rate of 16.0% for the six months ended June 30, 2017 compared with 60.7% for the six months ended June 30, 2016. The significant change in the effective tax rate was primarily a result of pretax losses in 2017 combined with significant nondeductible expenses (primarily, compensation and goodwill impairment) and the 2017 HIF moratorium as described above in “Health Plans—Health Insurer Fee (HIF) Revenue and Expenses.”

LIQUIDITY AND FINANCIAL CONDITION

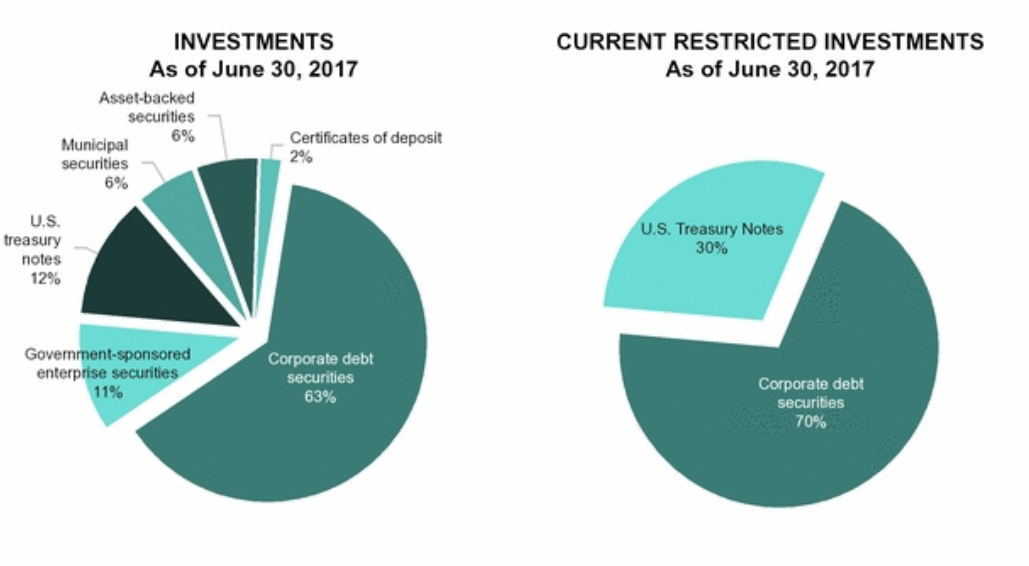
INTRODUCTION

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

A majority of the assets held by our Health Plans segment regulated subsidiaries is in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest

cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board-approved investment policies that conform to applicable state laws and regulations.

Our investments are classified as current assets, except for our held-to-maturity restricted investments, which are classified as non-current assets, and which are not included in the totals below. Our held-to-maturity restricted investments are invested principally in certificates of deposit and U.S. treasury securities.



Investment income increased to $22 million for the six months ended June 30, 2017, compared with $16 million for the six months ended June 30, 2016, primarily due to the increase in invested assets.

MARKET RISK

Our earnings and financial position are exposed to financial market risk relating to changes in interest rates, and the resulting impact on investment income and interest expense.

Substantially all of our investments and restricted investments are subject to interest rate risk and will decrease in value if market interest rates increase. Assuming a hypothetical and immediate 1% increase in market interest rates at June 30, 2017, the fair value of our fixed income investments would decrease by approximately $27 million. Declines in interest rates over time will reduce our investment income.

For further information on fair value measurements and our investment portfolio, please refer to Notes to Consolidated Financial Statements, Note 4, “Fair Value Measurements,” and Note 5, “Investments.”

Borrowings under our Credit Facility bear interest based, at our election, on a base rate or an adjusted London Interbank Offered Rate (LIBOR), plus in each case the applicable margin. As of June 30, 2017, no amounts were outstanding under the Credit Facility.

LIQUIDITY

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Six Months Ended June 30,		
	2017	2016	Change
	(In millions)		
Net cash provided by operating activities	$ 672	$ 278	$ 394
Net cash used in investing activities	(845)	(273)	(572)
Net cash provided by financing activities	333	11	322
Net increase in cash and cash equivalents	$ 160	$ 16	$ 144

Operating Activities

Cash provided by operating activities increased $394 million in the six months ended June 30, 2017 compared with the six months ended June 30, 2016. The change in net (loss) income, plus the effect of adjustments to reconcile net loss to net cash provided by operating activities, reduced cash provided by operating activities by $195 million. This change was more than offset by the aggregate of the following changes:

Receivables and deferred revenue. In 2017, the aggregate change in receivables and deferred revenue increased cash flows from operations by $470 million. Cash flows from operations in each period were impacted by the timing of premium revenues receipts. In general, state or federal payors may delay our premium payments, which we record as a receivable, or they may prepay the following month's premium payment, which we record as deferred revenue. We typically receive capitation payments monthly; however, state or federal payors may decide to adjust their payment schedules which could positively or negatively impact our reported cash flows from operating activities in a any given period. In 2017, the year-over-year effect of the timing of premiums received at our California, Florida, Michigan, Ohio, Texas and Washington health plans positively impacted our cash flows from operating activities.

Amounts due government agencies. In 2017, the change in amounts due government agencies increased cash flows from operations by $133 million, due primarily to additional accruals for ACA Marketplace risk transfer payments.

Accounts payable and accrued liabilities. In 2017, the change in accounts payable and accrued liabilities decreased cash flows from operations by $165 million. In 2016, accounts payable and accrued liabilities increased $147 million, primarily due to the HIF payable at June 30, 2016. As of June 30, 2017, there is no comparable accrual because of the HIF moratorium.

Investing Activities

Net cash used in investing activities increased $572 million in the six months ended June 30, 2017 compared with the six months ended June 30, 2016, primarily due to higher purchases of investments, net of sales and maturities, in the current year.

Financing Activities

Net cash provided by financing activities increased $322 million in the six months ended June 30, 2017 compared with the six months ended June 30, 2016, due to proceeds received from the 4.875% Notes offering.

FINANCIAL CONDITION

We believe that our cash resources, combined with borrowing capacity available under our Credit Facility, as discussed further below in "*Future Sources and Uses of Liquidity — Sources*", and internally generated funds will be sufficient to support costs under the Restructuring Plan, operations, regulatory requirements, and capital expenditures for at least the next 12 months.

On a consolidated basis, at June 30, 2017, our working capital was $1,376 million, compared with $1,418 million at December 31, 2016. At June 30, 2017, our cash and investments amounted to $5,616 million, compared with $4,689 million at December 31, 2016.

Debt Ratings. Our 5.375% Notes are rated "BB" by Standard & Poor's, and "Ba3" by Moody's Investor Service, Inc. A significant downgrade in our ratings could adversely affect our borrowing capacity and costs.

Financial Covenants. Our Credit Facility contains customary non-financial and financial covenants, including a net leverage ratio and an interest coverage ratio, as follows:

Credit Facility Financial Covenants	Required Per Agreement	As of June 30, 2017
Net leverage ratio	<4.0x	3.3x
Interest coverage ratio	>3.5x	4.5x

In addition, the terms of our 4.875% Notes, 5.375% Notes and each of the 1.125% and 1.625% Convertible Notes contain cross-default provisions with the Credit Facility that are triggered upon an event of default under the Credit Facility, and when borrowings under the Credit Facility equal or exceed certain amounts as defined in the related indentures. As of June 30, 2017, we were in compliance with all covenants under the Credit Facility.

FUTURE SOURCES AND USES OF LIQUIDITY

Sources

Our Health Plans segment regulated subsidiaries generate significant cash flows from premium revenue, which we generally receive a short time before we pay for the related health care services. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity.

Dividends from Subsidiaries. When available and as permitted by applicable regulations, cash in excess of the capital needs of our regulated health plans is generally paid in the form of dividends to our unregulated parent company to be used for general corporate purposes. In the six months ended June 30, 2017 and 2016, we received $120 million and $50 million, respectively, in dividends from our regulated health plan subsidiaries. See further discussion in Notes to Consolidated Financial Statements, Note 13, “Commitments and Contingencies—Regulatory Capital Requirements and Dividend Restrictions.”

Restructuring Plan. In total, we estimate that the Restructuring Plan will reduce annualized run-rate expenses by approximately $300 million to $400 million upon its completion in late 2018. $200 million of these run-rate reductions, which are a result of staff reductions, will be in place by December 2017, and therefore will fully contribute to our 2018 results. Since the close of the second quarter, we have already achieved $55 million of our annualized run-rate reduction target as a result of staff reductions taken on July 27th. All savings targets discussed in regards to the Restructuring Plan represent annualized run-rate savings that we expect to achieve during the year following the indicated implementation date. One-time costs associated with the Restructuring Plan are expected to exceed the benefits realized in 2017 due to the upfront payment of implementation costs and the delayed benefit of full savings until the beginning of 2018. We expect the cost savings to reduce both “General and administrative expenses” and “Medical care costs” reported on our consolidated statements of operations.

The following table illustrates our estimates of run-rate savings associated with the Restructuring Plan. Such savings will be offset, through the end of 2018, by the costs noted below in “*Future Sources and Uses of Liquidity—Uses*.” Following 2018, the savings will be offset by approximately $20 million in run-rate expenses resulting from the implementation of Restructuring Plan initiatives.

Estimated Savings Expected to be Realized by Reportable Segment	Health Plans	Other	Total
		(In millions)	
General and administrative expenses	$50	$120 to $140	$170 to $190
Medical care costs	$110 to $190	$20	$130 to $210
	$160 to $240	$140 to $160	$300 to $400

Credit Facility. Refer to Notes to Consolidated Financial Statements, Note 7, “Debt,” for a detailed discussion of our Credit Facility. We intend to borrow approximately $300 million under the Credit Facility in early August 2017.

4.875% Notes. The 4.875% Notes contain a limitation on the use of proceeds which required us to deposit the net proceeds from their issuance into a segregated deposit account, a current asset reported as “Restricted investments” in our consolidated balance sheets. See further discussion in Notes to Consolidated Financial Statements, Note 7, “Debt.”

Shelf Registration Statement. We have a shelf registration statement on file with the Securities and Exchange Commission to register an unlimited amount of any combination of debt or equity securities in one or more

offerings. Specific information regarding the terms and securities being offered will be provided at the time of an offering. Proceeds from future offerings are expected to be used for general corporate purposes, including, but not limited to, the repayment of debt, investments in or extensions of credit to our subsidiaries and the financing of possible acquisitions or business expansion.

Uses

Restructuring. We estimate that total pre-tax costs associated with the Restructuring Plan will be approximately $130 million to $150 million for the second half of 2017, with an additional $40 million to be incurred in 2018. The costs we incur associated with the Restructuring Plan will be reported in "Restructuring and separation costs" in our consolidated statements of operations.

Estimated Costs Expected to be Incurred by Reportable Segment	Health Plans	Other	Total
		(In millions)	
Separation costs–one-time benefit arrangement for a workforce reduction	$25 to $30	$35 to $40	$60 to $70
Other restructuring costs	$55 to $60	$55 to $60	$110 to $120
	$80 to $90	$90 to $100	$170 to $190

Regulatory Capital Requirements and Dividend Restrictions. For more information on our regulatory capital requirements and dividend restrictions, refer to Notes to Consolidated Financial Statements, Note 13, "Commitments and Contingencies."

States' Budgets. From time to time the states in which our health plans operate may experience financial difficulties, which could lead to delays in premium payments. Until July 4, 2017, the state of Illinois operated without a budget for its current fiscal year. As of June 30, 2017, our Illinois health plan served approximately 163,000 members, and recognized premium revenue of approximately $310 million in the first half of 2017. As of July 28, 2017, the state of Illinois owed us approximately $116 million for certain March, April, May and June 2017 premiums.

On May 3, 2017, Puerto Rico's financial oversight board filed for a form of bankruptcy in the U.S. District Court in Puerto Rico under Title III of PROMESA. The Title III provision allows for a court debt restructuring process similar to U.S. bankruptcy protection. To the extent such bankruptcy results in our failure to receive payment of amounts due under our Medicaid contract with the Commonwealth or the inability of the Commonwealth to extend our Medicaid contract at the end of its current term, such bankruptcy could have a material adverse effect on our business, financial condition, cash flows, or results of operations. As of June 30, 2017, the plan served approximately 322,000 members and recorded premium revenue of approximately $362 million in the first half of 2017. As of July 28, 2017, the Commonwealth was current with its premium payments.

Convertible Notes. We have outstanding $550 million aggregate principal amount of 1.125% cash convertible senior notes due January 15, 2020, unless earlier repurchased or converted. We refer to these notes as our 1.125% Convertible Notes. We also have outstanding $302 million aggregate principal amount of 1.625% convertible senior notes due August 14, 2044, unless earlier repurchased, redeemed, or converted. We refer to these notes as our 1.625% Convertible Notes. We refer to the 1.125% Convertible Notes and 1.625% Convertible Notes collectively as the Convertible Notes. The 1.125% Convertible Notes are convertible entirely to cash, and the 1.625% Convertible Notes are convertible partially to cash, each prior to their respective maturity dates under certain circumstances, one of which relates to the closing price of our common stock over a specified period. We refer to this conversion trigger as the stock price trigger.

The stock price trigger for the 1.125% Convertible Notes is $53.00 per share. The 1.125% Convertible Notes met this trigger in the quarter ended June 30, 2017; therefore, they are convertible into cash and are reported in current portion of long-term debt as of June 30, 2017.

The stock price trigger for the 1.625% Convertible Notes is $75.51 per share. The 1.625% Convertible Notes did not meet this stock price trigger in the quarter ended June 30, 2017. On contractually specified dates beginning in 2018, holders of the 1.625% Convertible Notes may require us to repurchase some or all of such notes. In addition, beginning May 15, 2018 until August 19, 2018, holders may convert some or all of the 1.625% Convertible Notes. Because of this conversion feature, the 1.625% Convertible Notes are reported in current portion of long-term debt as of June 30, 2017. As noted above, because the proceeds from the 4.875% Notes are initially restricted to payments upon conversion or redemption of the 1.625% Convertible Notes, such restricted investments are also classified as current in the accompanying consolidated balance sheets.

For economic reasons related to the trading market for our Convertible Notes, we believe that the amount of the notes that may be converted over the next twelve months, if any, will not be significant. However, if the trading market for our Convertible Notes becomes closed or restricted due to market turmoil or other reasons such that the notes cannot be traded, or if the trading price of our Convertible Notes, which normally trade at a marginal premium to the underlying composite stock-and-interest economic value, no longer includes that marginal premium, holders of our Convertible Notes may elect to convert the notes to cash.

We currently have sufficient available cash, combined with borrowing capacity available under our Credit Facility, to fund such conversions.

CONTRACTUAL OBLIGATIONS

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2016, was disclosed in our 2016 Annual Report on Form 10-K. There were no material changes to this previously filed information outside the ordinary course of business during the six months ended June 30, 2017. For additional information regarding our long-term debt, including maturity dates, refer to Notes to Consolidated Financial Statements, Note 7, “Debt.”

CRITICAL ACCOUNTING ESTIMATES

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Notes to Consolidated Financial Statements, Note 6, “Medical Claims and Benefits Payable,” for a table that presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements. Other than the discussion as noted above, there have been no significant changes during the six months ended June 30, 2017, to our disclosure reported in “Critical Accounting Estimates” in our Annual Report on Form 10-K for the year ended December 31, 2016.

- *Health Plans segment contractual provisions that may adjust or limit revenue or profit*. For a discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies.”

- *Health Plans segment quality incentives*. For a discussion of this topic, including amounts recorded in our consolidated financial statements, refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies.”

- *Molina Medicaid Solutions segment revenue and cost recognition*. There have been no significant changes during the six months ended June 30, 2017, to our disclosure reported in “Critical Accounting Estimates” in our Annual Report on Form 10-K for the year ended December 31, 2016.

- *Goodwill and intangible assets, net.* Please refer to Notes to Consolidated Financial Statements, Note 2, “Significant Accounting Policies,” regarding our adoption of Accounting Standards Update No. 2017-04 as of June 30, 2017, which has simplified the test for goodwill impairment. We recorded impairment charges of $61 million for goodwill and $11 million for intangible assets, or $72 million in the aggregate, reported in the accompanying consolidated statements of operations as “Impairment losses.” At June 30, 2017, goodwill and intangible assets, net, represented approximately 8% of total assets and 44% of total stockholders’ equity, compared with 10% and 46%, respectively, at December 31, 2016. Refer to Notes to Consolidated Financial Statements, Note 10, “Impairment Losses.”

SUPPLEMENTAL INFORMATION

FINANCIAL MEASURES THAT SUPPLEMENT U.S. GAAP (NON-GAAP FINANCIAL MEASURES)

We use these non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance to the performance of other public companies in the health care industry.

EBITDA*

We believe that earnings before interest, taxes, depreciation and amortization (EBITDA*) is helpful in assessing our ability to meet the cash demands of our operating units.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
	(In millions)			
Net (loss) income	$ (230)	$ 33	$ (153)	$ 57
Adjustments:				
Depreciation, and amortization of intangible assets and capitalized software	44	39	90	76
Interest expense	27	25	53	50
Income tax (benefit) expense	(84)	47	(30)	87
EBITDA*	$ (243)	$ 144	$ (40)	$ 270

ADJUSTED NET (LOSS) INCOME* AND ADJUSTED NET (LOSS) INCOME PER SHARE*

We believe that adjusted net (loss) income* and adjusted net (loss) income per diluted share* are helpful in assessing our financial performance exclusive of the non-cash impact of the amortization of purchased intangibles. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to adjusted net (loss) income*.

	Three Months Ended June 30,				Six Months Ended June 30,			
	2017		2016		2017		2016	
	(In millions, except diluted per-share amounts)							
Net (loss) income	$ (230)	$ (4.10)	$ 33	$ 0.58	$ (153)	$ (2.74)	$ 57	$ 1.01
Adjustment:								
Amortization of intangible assets	8	0.14	8	0.14	17	0.30	15	0.27
Income tax effect [1]	(3)	(0.05)	(3)	(0.05)	(6)	(0.11)	(5)	(0.10)
Amortization of intangible assets, net of tax effect	5	0.09	5	0.09	11	0.19	10	0.17
Adjusted net (loss) income*	$ (225)	$ (4.01)	$ 38	$ 0.67	$ (142)	$ (2.55)	$ 67	$ 1.18

(1) Income tax effect of adjustments calculated at the blended federal and state statutory tax rate of 37%.

CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our interim chief executive officer and our chief financial officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), were not effective at the reasonable assurance level because of the material weakness in our internal control over financial reporting described below. Notwithstanding the material weakness described below, management has concluded that our consolidated financial statements included in this interim report on Form 10-Q are fairly stated in all material

respects in accordance with U.S. generally accepted accounting principles (GAAP) for each of the periods presented herein.

Existence of a Material Weakness in Internal Control as of December 31, 2016

As disclosed in our Annual Report on Form 10-K for the year ended December 31, 2016, our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2016, based on the framework set forth in *Internal Control-Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis.
