Section 2.6. Notice of Special Meetings. Written notice of a special meeting, stating the place, date and hour of the meeting and the purpose or purposes for which the meeting is called, shall be given not less than ten nor more than sixty days before the date of the meeting to each stockholder entitled to vote at such meeting. If mailed, notice is given when deposited in the United States mail, postage prepaid, directed to the stockholder at his address as it appears on the records of the Corporation. In lieu of holding a special meeting of stockholders at a designated place, the Board of Directors may, in its sole discretion, determine that any special meeting of stockholders may be held solely by means of remote communication in accordance with Section 2.12.

Section 2.7. Quorum; Adjournment. The holders of a majority of the shares issued and outstanding and entitled to vote thereat, present in person or represented by proxy, shall be requisite and shall constitute a quorum at all meetings of the stockholders for the transaction of business except as otherwise provided by statute, by the Certificate of Incorporation or by these Bylaws. If, however, such quorum shall not be present or represented at any meeting of the stockholders, the chairman of the meeting or, in the absence of such person, any officer entitled to preside at or act as secretary of such meeting, or the stockholders entitled to vote thereat, present in person or represented by proxy, shall have the power to adjourn the meeting from time to time, without notice other than announcement at the meeting, of the place, date and hour of the adjourned meeting, until a quorum shall again be present or represented by proxy. At the adjourned meeting at which a quorum shall be present or represented by proxy, the Corporation may transact any business which might have been transacted at the original meeting. If the adjournment is for more than thirty (30) days, or if after the adjournment, a new record date is fixed for the adjourned meeting, a notice of the adjourned meeting shall be given to each stockholder of record entitled to vote at the meeting. Shares of its own stock belonging to the Corporation or to another corporation, if a majority of the shares entitled to vote in the election of directors of such other corporation is held, directly or indirectly, by the Corporation, shall neither be entitled to vote nor be counted for quorum purposes; provided, however, that the foregoing shall not limit the right of the Corporation to vote stock, including, without limitation, its own stock, held by it in a fiduciary capacity.

Section 2.8. Conduct of Business. (a) Only persons who are nominated in accordance with the procedures set forth in Section 2.2 or Section 2.5 shall be eligible to serve as directors and only such business shall be conducted at a meeting of stockholders as shall have been brought before the meeting in accordance with the procedures set forth in Section 2.2 or 2.5. Except as otherwise provided by law, the Chairman of the meeting shall have the power and duty to determine whether a nomination or any business proposed to be brought before the meeting was made, or proposed, as the case may be, in accordance with the procedures set forth in these Bylaws and, if any proposed nomination or business is not in compliance with these Bylaws, to declare that such defective proposal or nomination shall not be presented for stockholder action at the meeting and shall be disregarded. Notwithstanding the foregoing provisions of this Section 2.8, unless otherwise required by law, if the stockholder (or a qualified representative of the stockholder) does not appear at the annual or special meeting of stockholders of the Corporation to present a nomination or proposed business, such nomination shall be disregarded and such proposed business shall not be transacted, notwithstanding that proxies in respect of such vote may have been received by the Corporation.

(b) At every meeting of the stockholders, the President or, in his or her absence, such other person as may be appointed by the Board of Directors, shall act as chairman of the meeting. The Secretary of the corporation or, in his or her absence, such other person as designated by the chairman of the meeting, shall act as secretary of the meeting. The chairman of the meeting shall call the meeting to order, establish the agenda, and conduct the business of the meeting in accordance therewith or, at the chairman's discretion, it may be conducted otherwise in accordance with the wishes of the stockholders in attendance. The date and time of the opening and closing of the polls for each matter upon which the stockholders will vote at the meeting shall be announced at the meeting. The chairman shall also conduct the meeting in an orderly manner,

rule on the precedence of, and procedure on, motions and other procedural matters, and exercise discretion with respect to such procedural matters with fairness and good faith toward all those entitled to take part. Without limiting the foregoing, the chairman of the meeting may (a) restrict attendance at any time to bona fide stockholders of record and their proxies and other persons as invited by the chairman or Board of Directors, (b) restrict use of audio or video recording devices at the meeting, and (c) impose reasonable limits on the amount of time taken up at the meeting on discussion in general or on remarks by any one stockholder. Should any person in attendance become unruly or obstruct the meeting proceedings, the chairman shall have the power to have such person removed from the meeting. Notwithstanding anything in the Bylaws to the contrary, no business shall be conducted at a meeting except in accordance with the procedures set forth in this Section 2.8.

Section 2.9. Voting. When a quorum is present at any meeting, and subject to the provisions of the General Corporation Law of the State of Delaware, the Certificate of Incorporation or by these Bylaws or any other applicable law or the rules of any stock exchange on which the Corporation's shares are listed in respect of the vote that shall be required for a specified action, the vote of the holders of a majority of the shares having voting power, present in person or represented by proxy and entitled to vote on such matter, shall decide any question brought before such meeting, unless the question is one upon which, by express provision of the General Corporation Law of the State of Delaware or of the Certificate of Incorporation or of these Bylaws or of such other applicable law or the rules of any stock exchange on which the Corporation's shares are listed, a different vote is required in which case such express provision shall govern and control the decision of such question. Each stockholder shall have one vote for each share of stock having voting power registered in his name on the books of the Corporation, except as otherwise provided in the Certificate of Incorporation.

Section 2.10. Proxies.

(a) Each stockholder entitled to vote at a meeting of stockholders or to express consent or dissent to corporate action in writing without a meeting may authorize another person or persons to act for him by proxy, but no such proxy shall be voted or acted upon after three years from its date, unless the proxy provides for a longer period.

(b) A stockholder may issue a valid proxy by (i) executing a written authorization therefor identifying the person or persons authorized to act for such stockholder by proxy or (ii) transmitting or authorizing the transmission of a telegram, cablegram or other means of electronic transmission, provided that the telegram, cablegram or other means of electronic transmission either sets forth or is submitted with information from which it can be determined that the telegram, cablegram or other electronic transmission was authorized by the stockholder. A copy, facsimile transmission or other reliable reproduction of a written or electronically-transmitted proxy authorized by this Section 2.10 may be substituted for or used in lieu of the original writing or electronic transmission. Each proxy shall be delivered to the inspectors of election prior to or at the meeting.

Section 2.11. Inspectors. Either the Board of Directors or, in the absence of designation of inspectors by the Board of Directors, the chairman of any meeting of the stockholders may, in its or such person's discretion, appoint one (1) or more inspectors to act at any meeting of the stockholders. Each inspector, before discharging his or her duties, shall take and sign an oath faithfully to execute the duties of inspector with strict impartiality and according to the best of his or her ability. Such inspectors shall perform such duties as shall be specified by the Board of Directors or the chairman of the meeting. Inspectors need not be Stockholders, employees, officers or directors of the Corporation. No director or nominee for the office of director shall be appointed as any such inspector.

Section 2.12. Meetings by Remote Communication. If authorized by the Board of Directors, and subject to such guidelines and procedures as the Board may adopt, stockholders and proxy holders not physically present at a meeting of stockholders may, by means of remote communication, participate in the meeting and be deemed present in person and vote at the meeting, whether such meeting is to be held at a designated place or solely by means of remote communication, provided that (i) the corporation shall implement reasonable measures to verify that each person deemed present and permitted to vote at the meeting by means of remote communication is a stockholder or proxy holder, (ii) the corporation shall implement reasonable measures to provide such stockholders and proxy holders a reasonable opportunity to participate in the meeting and to vote on matters submitted to the stockholders, including an opportunity to read or hear the proceedings of the meeting substantially concurrently with such proceedings, and (iii) if any stockholder or proxy holder votes or takes other action at the meeting by means of remote communication, a record of such vote or other action shall be maintained by the corporation.

ARTICLE III

DIRECTORS

Section 3.1. General Powers. The business and affairs of the Corporation shall be managed by or under the direction of the Board of Directors which may exercise all such powers of the Corporation and do all such acts and things as are not, by the General Corporation Law of the State of Delaware nor by the Certificate of Incorporation nor by these Bylaws, directed or required to be exercised or done by the stockholders.

Section 3.2. Number and Qualifications of Directors.

(a) The number of directors which shall constitute the whole Board of Directors shall be no less than seven and no more than eleven; provided that until changed by resolution of the Board of Directors, the number of directors shall be fixed at eleven. Except as otherwise required by applicable law, the Certificate of Incorporation or Section 3.3 of this Article III, a nominee for director shall be elected by the affirmative vote of a majority of the votes cast with respect to such director, provided that nominees for director shall be elected by the vote of a plurality of the votes cast at any meeting of stockholders for which, as of a date that is ten (10) days

in advance of the date on which the Corporation files its definitive proxy statement with the Securities and Exchange Commission (regardless of whether thereafter revised or supplemented), the number of nominees for director exceeds the number of directors to be elected, as determined by the Secretary of the Corporation. For purposes of this Section 3.2, a majority of the votes cast means that the number of shares voted "for" a director exceeds the number of votes cast "against" that director. The following shall not be votes cast: (a) a share whose ballot is marked as withheld; (b) a share otherwise present at the meeting but for which there is an abstention; and (c) a share otherwise present at the meeting as to which a shareholder gives no authority or direction.

If an incumbent director is not elected due to a failure to receive a majority of the votes cast as described above, and his or her successor is not otherwise elected and qualified, such director shall tender his or her offer to resign to the Secretary of the Corporation promptly following the certification of the election results. Within ninety (90) days after the date of the certification of the election results, (i) the Corporate Governance and Nominating Committee will make a recommendation to the Board of Directors on whether to accept or reject the resignation, or whether other action should be taken and (ii) the Board of Directors will act on such committee's recommendation and publicly disclose its decision and the rationale behind it, provided that any director who tenders his or her offer to resign shall not participate in either the Corporate Governance and Nominating Committee's or Board of Directors' deliberations regarding the offer to resign, and if a quorum of the Corporate Governance and Nominating Committee cannot be met without the presence of the directors who did not receive a majority of the votes cast, then the Board of Directors shall appoint a committee of independent directors to consider the resignation offers and recommend to the Board of Directors whether to accept or reject the resignations, or whether other action should be taken. Directors need not be stockholders.

Section 3.3. Vacancies; Resignation and Removal of Directors.

(a) If the office of any director or directors becomes vacant by reason of death, resignation, retirement, disqualification, removal from office, or otherwise, or a new directorship is created, the Board of Directors shall choose a successor or successors, or a director to fill the newly created directorship, who shall hold office for the unexpired term (in the case of a vacancy) or until the next election of directors (in the case of a new directorship).

(b) Any director of the Corporation may at any time resign by giving written notice to the Board of Directors, the Chairman of the Board, the President or the Secretary of the Corporation. Such resignation shall take effect upon receipt thereof by the Corporation, or such later time specified therein; and, unless otherwise specified therein, the acceptance of such resignation shall not be necessary to make it effective.

(c) Any director may be removed at any time only for cause by an affirmative vote of the holders of sixty-six and two-thirds percent (66-2/3%) of the shares then entitled to vote in the election of directors.

Section 3.4. Place of Meetings. The Board of Directors may hold its meetings inside or outside of the State of Delaware, at the office of the Corporation or at such other places as they

may from time to time determine, or as shall be fixed in the respective notices or waivers of notice of such meetings.

Section 3.5. Compensation of Directors. Directors who are not at the time also a salaried officer or employee of the Corporation or any of its subsidiaries may receive such stated salary for their services and/or such fixed sums and expenses of attendance for attendance at each regular or special meeting of the Board of Directors as may be established by resolution of the Board; provided that nothing herein contained shall be construed to preclude any director from serving the Corporation in any other capacity and receiving compensation therefor. Members of special or standing committees may be allowed like compensation for attending committee meetings. Each director, whether or not a salaried officer or employee of the Corporation or any of its subsidiaries, shall be entitled to receive from the Corporation reimbursement for the reasonable expenses incurred by such person in connection with the performance of such person's duties as a director.

Section 3.6. Regular Meetings. Regular meetings of the Board of Directors shall be held at such times and places as the Board shall from time to time by resolution determine, except that the annual meeting of the Board to elect officers of the Corporation for the ensuing year shall be held within ten (10) days after the annual meeting of stockholders. If any day fixed for a regular meeting shall be a legal holiday under the laws of the place where the meeting is to be held, then the meeting which would otherwise be held on that day shall be held at the same hour on the next succeeding business day.

Section 3.7. Special Meetings. Special meetings of the Board of Directors may be held at any time on the call of the President or at the request in writing of a majority of the directors. Notice of any such meeting, unless waived, shall be given to directors personally, by telephone, by first-class United States mail, postage prepaid or by facsimile or electronic transmission to each director at his or her address as the same appears on the records of the Corporation not later than two days prior to the day on which such meeting is to be held if such notice is delivered personally, by telephone or by facsimile or electronic transmission, and not less than four days prior to the day on which the meeting is to be held if such notice is by first-class United States mail, provided, however, that notice of any such special meeting need not be given to any such member who shall, either before or after such special meeting, submit a signed waiver of such notice or who shall attend such meeting without protesting, prior to or at its commencement, the lack of such notice to such member. . If the Secretary shall fail or refuse to give such notice, then the notice may be given by the President or any one of the directors calling the meeting. Any such meeting may be held at such place as the Board may fix from time to time or as may be specified or fixed in such notice or waiver thereof. Any meeting of the Board of Directors shall be a legal meeting without any notice thereof having been given, if all the directors shall waive notice or be present thereat, and no notice of a meeting shall be required to be given to any director who shall attend such meeting without protesting, prior to or at its commencement, the lack of such notice to such member.. Notice of any adjourned meeting of the Board of Directors need not be given to any director in attendance.

Section 3.8. Action Without Meeting; Use of Communications Equipment.

(a) Any action required or permitted to be taken at any meeting of the Board of Directors or any committee thereof may be taken without a meeting if all members of the Board or of such committee, as the case may be, consent to such action in writing or by electronic transmission and such written consent or electronic transmissions are filed with the minutes of proceedings of the Board of Directors.

(b) Members of the Board of Directors, or any committee designated by the Board, may participate in a meeting of the Board or committee by means of conference telephone or similar communications equipment by means of which all persons participating in the meeting can hear each other, and participation in a meeting pursuant to this section shall constitute presence in person at such meeting.

Section 3.9. Quorum and Manner of Acting.

(a) Except as otherwise provided in these Bylaws, a majority of the total number of directors as at the time specified as provided in the Bylaws shall constitute a quorum at any regular or special meeting of the Board of Directors. Except as otherwise provided by statute, by the Certificate of Incorporation or by these Bylaws, the vote of a majority of the directors present at any meeting at which a quorum is present shall be the act of the Board of Directors. In the absence of a quorum, a majority of the directors present may adjourn the meeting from time to time until a quorum shall be present. .

(b) The Board of Directors may adopt such rules and regulations not inconsistent with the provisions of these Bylaws for the conduct of its meetings and management of the affairs of the Corporation as the Board may deem to be proper. In the absence of the Chairman of the Board, such person designated by the Board shall preside at Board meetings.

ARTICLE IV

EXECUTIVE AND OTHER COMMITTEES

Section 4.1. Executive Committee. The Board of Directors may, by resolution adopted by a majority of the entire Board of Directors, designate annually three (3) or more of the directors to constitute members or alternate members of an Executive Committee, which Executive Committee shall have and may exercise, between the meetings of the Board of Directors, all of the powers and authority of the Board of Directors in the management of the business and affairs of the Corporation, including, without limitation, if such Executive Committee is so empowered and authorized by resolution adopted by a majority of the entire Board of Directors, the power and authority to declare a dividend and to authorize the issuance of stock, and may authorize the seal of the Corporation to be affixed to all papers which may require it, except that such Executive Committee shall not have such power or authority in reference to:

(a) amending the Certificate of Incorporation or these Bylaws;

(b) adopting an agreement of merger or consolidation involving the Corporation;

(c) recommending to the stockholders the sale, lease or exchange of all or substantially all of the property and assets of the Corporation;

(d) recommending to the stockholders a dissolution of the Corporation or a revocation of a dissolution;

(e) taking any action related to the approval or determination of any matter in connection with any business combination;

(f) filling vacancies on the Board of Directors or on any committee of the Board of Directors, including, but not limited to, the Executive Committee; or

(g) amending or repealing any resolution of the Board of Directors which by its terms may be amended or repealed only by the Board of Directors.

The Board of Directors shall have the power at any time to change the membership of the Executive Committee, to fill all vacancies in it and to discharge it, either with or without cause.

Section 4.2. Other Committees. The Board of Directors may, by resolution adopted by a majority of the entire Board of Directors (except to the extent prohibited by law), designate from among the directors one or more other committees, each of which shall have such authority of the Board of Directors as may be specified in the resolution of the Board of Directors designating such committee; provided that no committee shall have the power or authority in reference to the matters described in Section 4.1(a) through 4.1(g) above. A majority of all of the members of such committee may determine its action and fix the time and place of its meetings, unless the Board of Directors shall otherwise provide. The Board of Directors shall have the power at any time to change the membership of, to fill all vacancies in and to discharge any such committee, either with or without cause. The committees shall keep regular minutes of their proceedings and report the same to the Board of Directors when required.

Section 4.3. Procedure; Meeting; Quorum. Regular meetings of the Executive Committee or of any other committee of the Board of Directors, of which no notice shall be necessary, may be held at such times and places as shall be fixed by resolution adopted by a majority of the members thereof. Special meetings of the Executive Committee or any other committee of the Board of Directors shall be called at the request of any member thereof. Notice of each special meeting of the Executive Committee or of any other committee of the Board of Directors shall be delivered personally, by telephone, by first-class United States mail, postage prepaid or by facsimile or electronic transmission to each member thereof not later than one day prior to the day on which such meeting is to be held if such notice is delivered personally, by telephone or by facsimile or electronic transmission and not less than four days prior to the day on which such meeting is to be held if such notice is delivered by first-class United States mail; provided, however, that notice of any such special meeting need not be given to any such member who shall, either before or after

such special meeting, submit a signed waiver of such notice or who shall attend such meeting without protesting, prior to or at its commencement, the lack of such notice to such member. Any special meeting of the Executive Committee or any other committee of the Board of Directors shall be a valid meeting without any notice thereof having been given if all of the members thereof shall waive notice or be present thereat without protesting, prior to or at its commencement, the lack of such notice to such member. Notice of any adjourned meeting of any committee of the Board of Directors need not be given to any director in attendance. Each of the Executive Committee and each other committee of the Board of Directors may adopt such rules and regulations that are not inconsistent with the provisions of law, the Certificate of Incorporation or these Bylaws for the conduct of its meetings as the Executive Committee or each other committee of the Board of Directors, as the case may be, may deem to be proper. A majority of the members of the Executive Committee or of any other committee of the Board of Directors shall constitute a quorum for the transaction of business at any meeting thereof, and the vote of a majority of the members thereof present at any meeting thereof at which such a quorum is present shall be the act of the Executive Committee or such other committee, as the case may be. Each of the Executive Committee and each other committee of the Board of Directors shall keep written minutes of its proceedings and shall report on such proceedings to the Board of Directors.

ARTICLE V

OFFICERS

Section 5.1. Executive Officers. The executive officers of the Corporation shall be a President and Chief Executive Officer, a Chief Financial Officer, a Chief Legal Officer, a Chief Operating Officer, a Treasurer, a Secretary, and such number of executive vice presidents, if any, as the Board of Directors may determine. One person may hold any number of said offices.

Section 5.2. Election, Term of Office and Eligibility. The executive officers of the Corporation shall be elected annually by the Board of Directors, and new or additional officers may be elected at any meeting of the Board. Each officer, except such officers as may be appointed in accordance with the provisions of Section 5.3, shall hold office until the next annual election of officers or until his or her death, resignation or removal. None of the other officers need be members of the Board.

Section 5.3. Subordinate Officers. The Board of Directors may appoint a Controller, such vice presidents, assistant secretaries, assistant treasurers and such other officers, and such agents as the Board may determine, to hold office for such period and with such authority and to perform such duties as the Board may from time to time determine. The Board may, by specific resolution, empower the Chief Executive Officer of the Corporation or the Executive Committee to appoint any such subordinate officers or agents.

Section 5.4. Removal. The President, Chief Executive Officer, Chief Financial Officer, Chief Legal Officer, Chief Operating Officer, Treasurer, Secretary, and any executive vice president may be removed at any time, either with or without cause, but only by the affirmative vote of the majority of the total number of directors as at the time specified by the Bylaws. Any

subordinate officer appointed pursuant to Section 5.3 may be removed at any time, either with or without cause, by the majority vote of the directors present at any meeting of the Board or by any committee or officer empowered to appoint such subordinate officers.

Section 5.5. Chairman of the Board. The Chairman of the Board shall, if present, preside at meetings of the Board of Directors. The Chairman of the Board shall be a member of the Board of Directors.

Section 5.6. The President. The President shall be the chief executive officer of the Corporation. He shall have executive authority to see that all orders and resolutions of the Board of Directors are carried into effect and, subject to the control vested in the Board of Directors by statute, by the Certificate of Incorporation, or by these Bylaws, shall administer and be responsible for the management of the business and affairs of the Corporation. He shall in general perform all duties incident to the office of the president and such other duties as from time to time may be assigned to him by the Board of Directors.

Section 5.7. Other Executive Officers and Executive Vice Presidents. In the event of the absence or disability of the President, the other executive officers of the Corporation, in the order designated, or in the absence of any designation, then in the order of their election, shall perform the duties of the President. The other officers and executive vice presidents of the Corporation shall also perform such other duties as from time to time may be assigned to them by the Board of Directors or by the President of the Corporation.

Section 5.8. The Secretary. The Secretary shall:

(a) Keep the minutes of the meetings of the stockholders and of the Board of Directors;

(b) See that all notices are duly given in accordance with the provisions of these Bylaws or as required by law;

(c) Be custodian of the records and of the seal of the Corporation and see that the seal or a facsimile or equivalent thereof is affixed to or reproduced on all documents, the execution of which on behalf of the Corporation under its seal is duly authorized;

(d) Have charge of the stock record books of the Corporation;

(e) In general, perform all duties incident to the office of Secretary, and such other duties as are provided by these Bylaws and as from time to time are assigned to him by the Board of Directors or by the chief executive officer of the Corporation.

Section 5.9. The Treasurer. The Treasurer shall:

(a) Receive and be responsible for all funds of and securities owned or held by the Corporation and, in connection therewith, among other things: keep or cause to be kept

full and accurate records and accounts for the Corporation; deposit or cause to be deposited to the credit of the Corporation all moneys, funds and securities so received in such bank or other depositary as the Board of Directors or an officer designated by the Board may from time to time establish; and disburse or supervise the disbursement of the funds of the Corporation as may be properly authorized.

(b) Render to the Board of Directors at any meeting thereof, or from time to time whenever the Board of Directors or the chief executive officer of the Corporation may require, financial and other appropriate reports on the condition of the Corporation;

(c) In general, perform all the duties incident to the office of Treasurer and such other duties as from time to time may be assigned to him by the Board of Directors or by the chief executive officer of the Corporation.

Section 5.10. Salaries. The salaries of the officers shall be fixed from time to time by the Board of Directors, and no officer shall be prevented from receiving such salary by reason of the fact that he is also a director of the Corporation.

Section 5.11. Delegation of Duties. In case of the absence of any officer of the Corporation or for any other reason which may seem sufficient to the Board of Directors, the Board of Directors may, for the time being, delegate his powers and duties, or any of them, to any other officer or to any director.

ARTICLE VI

SHARES OF STOCK

Section 6.1. Regulation. Subject to the terms of any contract of the Corporation, the Board of Directors may make such rules and regulations as it may deem expedient concerning the issue, transfer, and registration of certificates for shares of the stock of the Corporation, including the issue of new certificates for lost, stolen or destroyed certificates, and including the appointment of transfer agents and registrars.

Section 6.2. Stock Certificates. The shares of the corporation shall be represented by certificates, provided that the Board of Directors may provide by resolution or resolutions that some or all of any class or series of its stock shall be uncertificated shares; provided, however, that no such resolution shall apply to shares represented by a certificate until such certificate is surrendered to the corporation. Every holder of stock of the corporation represented by certificates, and, upon written request to the corporation's transfer agent or registrar, any holder of uncertificated shares, shall be entitled to have a certificate, in such form as may be prescribed by law and by the Board of Directors, certifying the number and class of shares owned by him in the corporation. Certificates for shares of the stock of the Corporation shall be respectively numbered serially for each class of stock, or series thereof, as they are issued, shall be impressed with the corporate seal or a facsimile thereof, and shall be signed by the President or other executive officer, and by the

Secretary or Treasurer, or an Assistant Secretary or an Assistant Treasurer, provided that such signatures may be facsimiles on any certificate countersigned by a transfer agent other than the Corporation or its employee. Each certificate shall exhibit the name of the Corporation, the class (or series of any class) and number of shares represented thereby, and the name of the holder. Each certificate shall be otherwise in such form as may be prescribed by the Board of Directors.

Section 6.3. Restriction on Transfer of Securities. A restriction on the transfer or registration of transfer of securities of the Corporation may be imposed either by the Certificate of Incorporation or by these Bylaws or by an agreement among any number of security holders or among such holders and the Corporation. No restriction so imposed shall be binding with respect to securities issued prior to the adoption of the restriction unless the holders of the securities are parties to an agreement or voted in favor of the restriction.

A restriction on the transfer of securities of the Corporation is permitted by this Section if it:

(a) Obligates the holder of the restricted securities to offer to the Corporation or to any other holders of securities of the Corporation or to any other person or to any combination of the foregoing a prior opportunity, to be exercised within a reasonable time, to acquire the restricted securities; or

(b) Obligates the Corporation or any holder of securities of the Corporation or any other person or any combination of the foregoing to purchase the securities which are the subject of an agreement respecting the purchase and sale of the restricted securities; or

(c) Requires the Corporation or the holders of any class of securities of the Corporation to consent to any proposed transfer of the restricted securities or to approve the proposed transferee of the restricted securities; or

(d) Prohibits the transfer of the restricted securities to designated persons or classes of persons; and such designation is not manifestly unreasonable; or

(e) Restricts transfer or registration of transfer in any other lawful manner.

Unless noted conspicuously on the security, a restriction, even though permitted by this Section, is ineffective except against a person with actual knowledge of the restriction.

Section 6.4. Transfer of Shares. Except as otherwise established by rules and regulations adopted by the Board of Directors, and subject to applicable law, shares of stock may be transferred on the books of the corporation: (i) in the case of shares represented by a certificate, by the surrender to the corporation or its transfer agent of the certificate representing such shares properly endorsed or accompanied by a written assignment or power of attorney properly executed, and with such proof of authority or authenticity of signature as the corporation or its transfer agent

may reasonably require; and (ii) in the case of uncertificated shares, upon the receipt of proper transfer instructions from the registered owner thereof. Except as may be otherwise required by law, the Certificate of Incorporation or the Bylaws, the corporation shall be entitled to treat the record holder of stock as shown on its books as the owner of such stock for all purposes, including the payment of dividends and the right to vote with respect to such stock, regardless of any transfer, pledge or other disposition of such stock until the shares have been transferred on the books of the corporation in accordance with the requirements of these Bylaws.

Section 6.5. Fixing Date for Determination of Stockholders of Record.

(a) In order that the Corporation may determine the stockholders entitled to notice of or to vote at any meeting of stockholders or any adjournment thereof, the Board of Directors may fix a record date, which record date shall not precede the date upon which the resolution fixing the record date is adopted by the Board of Directors, and which record date shall not be more than sixty (60) nor less than ten (10) days before the date of such meeting. If no record is fixed by the Board of Directors, the record date for determining stockholders entitled to notice of or to vote at a meeting of stockholders shall be at the close of business on the day next preceding the day on which notice is given, or, if notice is waived, at the close of business on the day next preceding the day on which the meeting is held. A determination of stockholders of record entitled to notice of or to vote at a meeting of stockholders shall apply to any adjournment of the meeting; providing, however, that the Board of Directors may fix a new record date for the adjourned meeting.

(b) In order that the Corporation may determine the stockholders entitled to receive payment of any dividend or other distribution or allotment of any rights or the stockholders entitled to exercise any rights in respect of any change, conversion or exchange of stock, or for the purpose of any other lawful action, the Board of Directors may fix a record date, which record date shall not precede the date upon which the resolution fixing the record date is adopted, and which record date shall be not more than sixty days prior to such action. If no record date is fixed, the record date for determining stockholders for any such purpose shall be at the close of business on the day on which the Board of Directors adopts the resolution relating thereto.

Section 6.6. Lost Certificate. Any stockholder claiming that a certificate representing shares of stock has been lost, stolen or destroyed may make an affidavit or affirmation of the fact and, if the Board of Directors so requires, advertise the same in a manner designated by the Board, and give the Corporation a bond of indemnity in form and with security for an amount satisfactory to the Board (or an officer or officers designated by the Board), whereupon a new certificate may be issued of the same tenor and representing the same number, class and/or series of shares as were represented by the certificate alleged to have been lost, stolen or destroyed.

ARTICLE VII

BOOKS AND RECORDS

Section 7.1. Location. The books, accounts and records of the Corporation may be kept at such place or places within or outside the State of Delaware as the Board of Directors may from time to time determine.

Section 7.2. Inspection. The books, accounts, and records of the Corporation shall be open to inspection by any member of the Board of Directors at all times; and open to inspection by the stockholders at such times, and subject to such regulations as the Board of Directors may prescribe, except as otherwise provided by statute.

Section 7.3. Corporate Seal. The corporate seal shall contain two concentric circles between which shall be the name of the Corporation and the word "Delaware" and in the center shall be inscribed the words "Corporate Seal."

ARTICLE VIII

DIVIDENDS AND RESERVES

Section 8.1. Dividends. The Board of Directors of the Corporation, subject to any restrictions contained in the Certificate of Incorporation and other lawful commitments of the Corporation, may declare and pay dividends upon the shares of its capital stock either out of the surplus of the Corporation, as defined in and computed in accordance with the General Corporation Law of the State of Delaware, or in case there shall be no such surplus, out of the net profits of the Corporation for the fiscal year in which the dividend is declared and/or the preceding fiscal year. If the capital of the Corporation, computed in accordance with the General Corporation Law of the State of Delaware, shall have been diminished by depreciation in the value of its property, or by losses, or otherwise, to an amount less than the aggregate amount of the capital represented by the issued and outstanding stock of all classes having a preference upon the distribution of assets, the Board of Directors of the Corporation shall not declare and pay out of such net profits any dividends upon any shares of any classes of its capital stock until the deficiency in the amount of capital represented by the issued and outstanding stock of all classes having a preference upon the distribution of assets shall have been repaired.

Section 8.2. Reserves. The Board of Directors of the Corporation may set apart, out of any of the funds of the Corporation available for dividends, a reserve or reserves for any proper purpose and may abolish any such reserve.

ARTICLE IX

MISCELLANEOUS PROVISIONS

Section 9.1. Fiscal Year. The fiscal year of the Corporation shall end on the 31st day of December of each year.

Section 9.2. Depositories. The Board of Directors or an officer designated by the Board shall appoint banks, trust companies, or other depositories in which shall be deposited from time to time the money or securities of the Corporation.

Section 9.3. Checks, Drafts and Notes. All checks, drafts, or other orders for the payment of money and all notes or other evidences of indebtedness issued in the name of the Corporation shall be signed by such officer or officers or agent or agents as shall from time to time be designated by resolution of the Board of Directors or by an officer appointed by the Board.

Section 9.4. Contracts and Other Instruments. The Board of Directors may authorize any officer or agent to enter into any contract or execute and deliver any instrument in the name and on behalf of the Corporation and such authority may be general or confined to specific instances.

Section 9.5. Notices. In addition to other means of notice permitted herein, whenever under the provisions of the statutes or of the Certificate of Incorporation or of these Bylaws notice is required to be given to any director or stockholder, it shall not be construed to mean personal notice, but such notice may be given in writing, by mail, by depositing the same in a post office or letter box, in a postpaid sealed wrapper, or by delivery to a telegraph company, addressed to such director or stockholder at such address as appears on the records of the Corporation, or, in default of other address, to such director or stockholder at the General Post Office in the City of Dover, Delaware, and such notice shall be deemed to be given at the time when the same shall be thus mailed or delivered to a telegraph company.

Section 9.6. Waivers of Notice. Whenever any notice is required to be given under the provisions of the statutes or of the Certificate of Incorporation or of these Bylaws, a waiver thereof in writing signed by the person or persons entitled to said notice, whether before or after the time stated therein, shall be deemed equivalent to notice. Attendance of a person at a meeting shall constitute a waiver of notice of such meeting, except when the person attends a meeting for the express purpose of objecting, at the beginning of the meeting, to the transaction of any business because the meeting is not lawfully called or convened. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the stockholders, directors or members of a committee of directors need be specified in any written waiver of notice.

Section 9.7. Stock in Other Corporations. Any shares of stock in any other Corporation which may from time to time be held by this Corporation may be represented and voted at any meeting of shareholders of such Corporation by the President or other executive officer, or by any other person or persons thereunto authorized by the Board of Directors, or by any proxy designated by written instrument of appointment executed in the name of this Corporation by its

President or an executive officer. Shares of stock belonging to the Corporation need not stand in the name of the Corporation, but may be held for the benefit of the Corporation in the individual name of the Treasurer or of any other nominee designated for the purpose by the Board of Directors. Certificates for shares so held for the benefit of the Corporation shall be endorsed in blank or have proper stock powers attached so that said certificates are at all times in due form for transfer, and shall be held for safekeeping in such manner as shall be determined from time to time by the Board of Directors.

Section 9.8. Indemnification.

(a) The Corporation shall indemnify any person who was or is a party or is threatened to be made a party to, or is otherwise involved in, any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that such person is or was a director or an officer of the Corporation, against all judgments, fines, amounts paid in settlement and other liability and loss suffered, and all expenses (including, without limitation, attorneys' fees) reasonably incurred thereby in connection with such action, suit or proceeding to the fullest extent permitted by the General Corporation Law of the State of Delaware and any other applicable law as from time to time in effect. Such right of indemnification shall include the right to payment of expenses incurred in defending any proceeding in advance of final disposition of such proceeding upon tendering of any undertaking to repay such expenses required by law as a condition to advancement of such expenses, and shall not be deemed to be exclusive of any rights to which any such director or officer may otherwise be entitled. The foregoing provisions of this Section 9.8(a) shall be deemed to be a contract between the Corporation and each director and officer of the Corporation serving in such capacity at any time while this Section 9.8(a) is in effect, and any repeal or modification thereof shall not affect any right or obligation then existing with respect to any state of facts then or theretofore existing or any action, suit or proceeding theretofore or thereafter brought or threatened based in whole or in part upon any such state of facts. Notwithstanding the first sentence of Section 9.8(a), except as otherwise provided in Section 9.8(c), the Corporation shall be required to indemnify a person in connection with a proceeding (or part thereof) commenced by such person only if the commencement of such proceeding (or part thereof) by the person was authorized in the specific case by the Board of Directors.

(b) The Corporation shall indemnify any person who was or is a party or is threatened to be made a party to, or is otherwise involved in, any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that such person is or was an employee or agent of the Corporation, or is or was serving at the request of the Corporation as a director, officer, employee or agent of another Corporation, partnership, joint venture, trust or other enterprise, against all judgments, fines, amounts paid in settlement and other liability and loss suffered, and all expenses (including, without limitation, attorneys' fees) reasonably incurred thereby in connection with such action, suit or proceeding to the extent permitted by and in the manner set forth in and permitted by the General Corporation Law of the State of Delaware and any other applicable law as from time to time in effect. Such right of indemnification may include the right to payment of expenses incurred in defending any proceeding in advance of final disposition of such proceeding upon tendering of any

undertaking to repay such expenses required by the board of directors as a condition to advancement of such expenses, and shall not be deemed to be exclusive of any other rights to which any such person may otherwise be entitled. Notwithstanding the first sentence of Section 9.8(b), except as otherwise provided in Section 9.8(c), the Corporation shall be required to indemnify a person in connection with a proceeding (or part thereof) commenced by such person only if the commencement of such proceeding (or part thereof) by the person was authorized in the specific case by the Board of Directors.

(c) If a claim under subsection (a) or (b) of this Section is not paid in full by the Corporation within thirty days after a written claim has been received by the Corporation, the claimant may at any time thereafter bring suit against the Corporation to recover the unpaid amount of the claim and, if successful in whole or in part, the claimant shall also be entitled to be paid the expense of prosecuting such claim. It shall be a defense to any action (other than an action brought to enforce a claim for expenses incurred in defending any proceeding in advance of its final disposition where the required undertaking has been tendered to the Corporation) that the claimant has failed to meet a standard of conduct which makes it permissible under Delaware law for the Corporation to indemnify the claimant for the amount claimed, but the burden of proving such defense shall be on the Corporation. Neither the failure of the Corporation (including its Board of Directors, independent legal counsel, or its stockholders) to have made a determination prior to the commencement of such action that indemnification of the claimant is permissible in the circumstances because he has met such standard of conduct, nor an actual determination by the Corporation (including its Board of Directors, independent legal counsel, or its stockholders) that the claimant has not met such standard of conduct, nor the termination of any proceeding by judgment, order, settlement, conviction or upon a plea of nolo contendere or its equivalent, shall be a defense to the action or create a presumption that the claimant has failed to meet the required standard of conduct.

(d) The right to indemnification and the payment of expenses incurred in defending a proceeding in advance of its final disposition conferred in this Section shall not be exclusive of any other right which any person may have or hereafter acquire under any statute, provision of the Certificate of Incorporation, bylaw, agreement, vote of stockholders or disinterested directors or otherwise.

(e) The Corporation may maintain insurance, at its expense, to protect itself and any director, officer, employee or agent of the Corporation or another Corporation, partnership, joint venture, trust or other enterprise against any expense, liability or loss, whether or not the Corporation would have the power to indemnify such person against such expense, liability or loss under Delaware law.

(f) To the extent that any director, officer, employee or agent of the Corporation is by reason of such position, or a position with another entity at the request of the Corporation, a witness in any proceeding, he shall be indemnified against all costs and expenses actually and reasonably incurred by him or on his behalf in connection therewith.

(g) Any amendment, repeal or modification of any provision of this Section by the stockholders or the directors of the Corporation shall not adversely affect any right or protection of a director or officer of the Corporation with respect to any action or omission occurring prior to the time of such amendment, repeal or modification.

Section 9.9. Amendment of Bylaws.

(a) The stockholders, by the affirmative vote of the holders of a majority of the stock issued and outstanding and having voting power may, at any annual or special meeting if notice of such alteration or amendment of the Bylaws is contained in the notice of such meeting, adopt, amend, or repeal these Bylaws, and alterations or amendments of Bylaws made by the stockholders shall not be altered or amended by the Board of Directors.

(b) The Board of Directors, by the affirmative vote of a majority of the whole Board, may adopt, amend, or repeal these Bylaws at any meeting, except as provided in the above paragraph. Bylaws made by the Board of Directors may be altered or repealed by the stockholders.

ARTICLE X

EXCLUSIVE FORUM

Section 10.1. Exclusive Forum. Unless the Corporation consents in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware shall, to the fullest extent permitted by law, be the sole and exclusive forum for (1) any derivative action or proceeding brought on behalf of the Corporation, (2) any action asserting a claim of breach of a fiduciary duty owed by any director, officer, or other employee of the Corporation to the Corporation or the Corporation's stockholders, (3) any action asserting a claim against the Corporation or any director, officer, or other employee of the Corporation arising pursuant to any provision of the Delaware General Corporation Law, or the Corporation's Certificate of Incorporation or Bylaws (as either may be amended from time to time) or (4) any action asserting a claim against the Corporation, or any director, officer, or other employee of the Corporation governed by the internal affairs doctrine.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended June 30, 2014 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
March 31, 2014

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. As of March 31, 2014, these health plans served approximately 2.2 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve a small number of Health Insurance Marketplaces members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in California.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal in 2012, and effective June 2013 the transition obligations associated with that contract terminated. Therefore, beginning in the second quarter of 2013, we classified the operations for our Missouri health plan as discontinued operations for all periods presented in our consolidated financial statements.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2014.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2013. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2013 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2013 audited consolidated financial statements.

Reclassifications

We have reclassified certain amounts in the 2013 consolidated statements of income to conform to the 2014 presentation.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates and fall into two categories:

(1) Contractual provisions with revenue or profit limits:

Health Plan Medical Cost Floors (Minimums), Medical Cost Corridors, and Administrative Cost Ceilings (Maximums): A portion of certain Medicaid premiums received by our California, Florida, Illinois, New Mexico, and Washington health plans may be returned to the state if certain minimum amounts are not spent on defined medical care costs. In some cases, the health

plans may receive additional premiums if amounts spent on medical care costs exceed a defined maximum threshold. Additionally, all of our health plans with Medicare and Health Insurance Marketplaces membership are required to spend certain minimum amounts on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $2.0 million and $1.4 million at March 31, 2014, and December 31, 2013, respectively. In Michigan and Ohio, the state may levy non-monetary sanctions on us if certain minimum amounts are not spent on defined medical care costs, or if administrative costs exceed certain amounts.

Health Plan Profit Sharing and Profit Ceiling: Our contracts with the states of New Mexico, Texas, and Washington contain profit-sharing or profit ceiling provisions under which we refund amounts to the states if our health plans generate profit above a certain specified percentage, in some cases in accordance with a tiered rebate schedule. In some cases, we are limited in the amount of administrative costs that we may deduct in calculating the refund, if any. As a result of profits in excess of the amount we are allowed to fully retain, we recorded a liability of $11.1 million and $2.5 million at March 31, 2014 and December 31, 2013, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to CMS (the Centers for Medicare and Medicaid Services), our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of $33.4 million and $20.8 million for anticipated Medicare risk adjustment premiums at March 31, 2014 and December 31, 2013, respectively.

(2) Quality incentives:

At our Illinois, New Mexico, Ohio, Texas, Washington and Wisconsin health plans, revenue ranging from approximately 1.00% to 5.00% of health plan premiums is earned if certain performance measures are met.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the periods presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of March 31, 2014 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of March 31, 2014.

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Maximum available quality incentive premium - current period	$ 20,164	$ 20,615
Amount of quality incentive premium revenue recognized in current period:		
Earned current period	$ 5,297	$ 14,896
Earned prior periods	(378)	6,712
Total	$ 4,919	21,608
Total premium revenue recognized for state health plans with quality incentive premiums	$ 1,200,619	$ 709,383

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid management information system (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support, and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Cost of service revenue consists primarily of the costs incurred to provide BPO and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs. In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes, nondeductible health insurer fee expenses, nondeductible compensation and other general and administrative expenses. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or the reversal of the recognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $2.0 million and $8.0 million as of March 31, 2014 and December 31, 2013, respectively. The unrecognized tax benefits recorded at December 31, 2013 decreased by $6.0 million during the quarter ending March 31, 2014 as a result of executing a settlement agreement with a state. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $1.8 million and $5.7 million as of March 31, 2014 and December 31, 2013, respectively. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $0.2 million due to the expiration of statute of limitations.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of March 31, 2014 and December 31, 2013, we had accrued $0.07 million and $0.08 million, respectively, for the payment of interest and penalties.

During the three months ended March 31, 2014 and 2013, we recognized tax benefits related to discontinued operations of $0.4 million and $0.2 million, respectively.

New Accounting Standards

Health Insurer Fee. In the first quarter of 2014, we adopted the guidance of the Financial Accounting Standards Board (FASB) related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively, the Affordable Care Act, or ACA). The ACA imposes an annual fee, or excise tax, on health insurers for each calendar year beginning on or after January 1, 2014. The health insurer fee (HIF) is imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year, and is payable on September 30 of each year.

Effective January 1, 2014, we recorded our estimate of the 2014 liability to accounts payable and accrued liabilities, amounting to $88.8 million. We are amortizing this liability on a straight-line basis in 2014, and recorded $22.2 million to health insurer fee expenses in the first quarter of 2014. As enacted, this federal premium-based assessment is non-deductible for income tax purposes.

Income Taxes. In the first quarter of 2014, we adopted the FASB's guidance for the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The new guidance states that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. The adoption of this new guidance did not impact our consolidated financial position, results of operations or cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the Securities and Exchange Commission did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Shares outstanding at the beginning of the period	45,871	46,762
Weighted-average number of shares repurchased	—	(867)
Weighted-average number of shares issued	150	86
Denominator for basic net income per share	46,021	45,981
Dilutive effect of employee restricted stock awards and stock options	597	462
Dilutive effect of 3.75% Notes (1)	902	—
Denominator for diluted net income per share	47,520	46,443
Potentially dilutive amounts excluded from calculations (1),(2):		
Restricted stock awards	192	203
Stock options	45	26
1.125% Warrants	13,490	7,345

(1) Potentially dilutive shares issuable pursuant to our 3.75% Notes (defined in Note 11, "Long-Term Debt") were not included in the computation of diluted net income per share for the three months ended March 31, 2013, because to do so would have been anti-dilutive. Potentially dilutive shares issuable pursuant to our 1.125% Warrants (defined in Note 12, "Derivative Financial Instruments") were not included in the computation of diluted net income per share for the three months ended March 31, 2014 and 2013 because to do so would have been anti-dilutive.

(2) Unvested restricted shares are included in the calculation of diluted net income per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. Options to purchase common shares are included in the calculation of diluted net income per share when their exercise prices are below the average fair value of the common shares for each of the periods presented.

4. Business Combinations

Health Plans Segment

South Carolina. In July 2013, we entered into an agreement with Community Health Solutions of America, Inc. (CHS) to acquire certain assets, including the rights to convert certain of CHS' Medicaid members covered by South Carolina's full-risk Medicaid managed care program. The conversion conditions under the agreement were satisfied by January 1, 2014, and on that date such Medicaid members were converted to the managed care program and enrolled with our South Carolina health plan. In January 2014 we made an interim payment of $38.1 million according to the terms of the agreement, which included indemnification withhold funds transferred to restricted investments amounting to $4.6 million. Such indemnification funds will become unrestricted on the one-year anniversary date of the conversion, or January 1, 2015.

Because the number of Medicaid members we would ultimately convert was unknown as of the acquisition date in 2013, we have recorded a contingent consideration liability for such members we expect to enroll through the final purchase price determination date in the second quarter of 2014. We have also recorded a contingent consideration liability for dual-eligible members we may enroll in our Medicare-Medicaid Plan (MMP) implementation in South Carolina. The contingent consideration liability is remeasured to fair value at each quarter until the contingency is resolved, with fair value adjustments, if any, recorded to operations. As of March 31, 2014, the fair value of the contingent consideration liability amounted to $14.7 million. This amount reflects a reduction from the December 31, 2013 balance for the January 2014 payment noted above, and for the fair value adjustment measured as of March 31, 2014. The fair value adjustment resulted in a decrease to the liability of $2.7 million, with a corresponding gain recorded to operations. On April 17, 2014, we paid $11.6 million, including indemnification withhold funds transferred to restricted investments, in satisfaction of the final purchase price determination relating to the converted Medicaid membership.

New Mexico. In August 2013, our New Mexico health plan acquired the Lovelace Community Health Plan's contract for the state of New Mexico's Medicaid program. In addition to Lovelace's Medicaid members, we also added membership previously

covered under New Mexico's State Coverage Insurance (SCI) program with Lovelace. Effective January 1, 2014, these SCI members were either a) enrolled in New Mexico's Medicaid program, or b) eligible to enroll in New Mexico's Marketplace.

Because the number of SCI members we would ultimately retain was unknown as of the acquisition date in 2013, we have recorded a contingent consideration liability for such members we expect to enroll through the final purchase price determination date in the second quarter of 2014. As of March 31, 2014, the fair value of this contingent consideration liability amounted to $0.5 million. The fair value adjustment resulted in a decrease to the liability of $1.6 million, with a corresponding gain recorded to operations.

5. Stock-Based Compensation

In March 2014, our named executive officers were granted a total of 356,292 restricted shares with service, market, and performance conditions. In the event the vesting conditions are not achieved, the awards will lapse. As of March 31, 2014, we expect the market and performance conditions to be met in full.

Charged to general and administrative expenses, total stock-based compensation expense was as follows:

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Restricted stock and performance awards	$ 4,608	$ 3,848
Employee stock purchase plan and stock options	988	573
	$ 5,596	$ 4,421

As of March 31, 2014, there was $37.8 million of total unrecognized compensation expense related to unvested restricted share awards, including those with performance conditions, which we expect to recognize over a remaining weighted-average period of 2.4 years. Also as of March 31, 2014, there was $0.5 million of total unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 1.8 years.

Restricted and performance stock activity for the three months ended March 31, 2014 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2013	1,299,852	$ 29.03
Granted	628,936	36.46
Vested	(561,407)	27.46
Forfeited	(6,125)	27.36
Unvested balance as of March 31, 2014	1,361,256	33.12

The total fair value of restricted and performance awards granted during the three months ended March 31, 2014 and 2013 was $22.9 million and $19.3 million, respectively. The total fair value of restricted awards, including those with performance and market conditions, vested during the three months ended March 31, 2014 and 2013 was $20.9 million and $13.1 million, respectively.

Stock option activity for the three months ended March 31, 2014 is summarized below:

	Options	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Outstanding as of December 31, 2013	379,221	$ 24.14		
Exercised	(51,750)	25.69		
Outstanding as of March 31, 2014	327,471	23.90	$ 4,475	3.5
Stock options exercisable and expected to vest as of March 31, 2014	327,471	23.90	$ 4,475	3.5
Exercisable as of March 31, 2014	292,471	22.77	$ 4,325	2.9

6. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, other assets, trade accounts payable, medical claims and benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities (excluding contingent consideration liabilities) to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs

Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs

Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit that are classified as current investments in the accompanying consolidated balance sheets. Such investments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs

Derivative financial instruments. Derivative financial instruments include the 1.125% Call Option derivative asset and the embedded cash conversion option derivative liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of March 31, 2014 included our common stock price, time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 12, “Derivative Financial Instruments,” the 1.125% Call Option asset and the embedded cash conversion option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of income. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

Contingent consideration liabilities. Such liabilities primarily relate to our South Carolina health plan acquisition described in Note 4, "Business Combinations," and are recorded in accounts payable and accrued liabilities. We applied discounted cash flow analysis to determine the fair value of the contingent consideration liabilities. Significant unobservable inputs primarily related to the probability weighted present values of the purchase price estimates for the projected membership.

Auction rate securities. Auction rate securities are designated as available-for-sale and are reported at fair value. To estimate the fair value of these securities we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of March 31, 2014.

Our financial instruments measured at fair value on a recurring basis at March 31, 2014, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 451,682	$ —	$ 451,682	$ —
Municipal securities	99,748	—	99,748	—
GSEs	69,326	69,326	—	—
U.S. treasury notes	35,035	35,035	—	—
Certificates of deposit	40,409	—	40,409	—
Auction rate securities	10,928	—	—	10,928
1.125% Call Option derivative asset	196,617	—	—	196,617
Total assets measured at fair value on a recurring basis	$ 903,745	$ 104,361	$ 591,839	$ 207,545
Embedded cash conversion option derivative liability	$ 196,503	$ —	$ —	$ 196,503
Contingent consideration liabilities	15,164	—	—	15,164
Total liabilities measured at fair value on a recurring basis	$ 211,667	$ —	$ —	$ 211,667

Our financial instruments measured at fair value on a recurring basis at December 31, 2013, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 449,772	$ —	$ 449,772	$ —
Municipal securities	113,330	—	113,330	—
GSEs	68,817	68,817	—	—
U.S. treasury notes	37,376	37,376	—	—
Certificates of deposit	33,757	—	33,757	—
Auction rate securities	10,898	—	—	10,898
1.125% Call Option derivative asset	186,351	—	—	186,351
Total assets measured at fair value on a recurring basis	$ 900,301	$ 106,193	$ 596,859	$ 197,249
Embedded cash conversion option derivative liability	$ 186,239	$ —	$ —	$ 186,239
Contingent consideration liabilities	57,548	—	—	57,548
Total liabilities measured at fair value on a recurring basis	$ 243,787	$ —	$ —	$ 243,787

The following table presents activity relating to our assets (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	Change in Level 3 Instruments		
	Auction Rate Securities	Derivatives, Net	Contingent Consideration Liabilities
		(In thousands)	
Balance at December 31, 2013	$ 10,898	$ 112	$ (57,548)
Total gains for the period recognized in:			
General and administrative expenses	—	—	4,265
Other expenses, net	—	2	—
Other comprehensive income	30	—	—
Settlements	—	—	38,119
Balance at March 31, 2014	$ 10,928	$ 114	$ (15,164)

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our long-term debt, as well as the applicable fair value hierarchy tiers, are contained in the tables below. Our convertible senior notes are classified as Level 2 financial instruments. Fair value for these

securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

	March 31, 2014				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
1.125% Notes	$ 421,004	$ 615,313	$ —	$ 615,313	$ —
3.75% Notes	183,549	229,075	—	229,075	—
	$ 604,553	$ 844,388	$ —	$ 844,388	$ —

	December 31, 2013				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
1.125% Notes	$ 416,368	$ 572,627	$ —	$ 572,627	$ —
3.75% Notes	181,872	219,491	—	219,491	—
	$ 598,240	$ 792,118	$ —	$ 792,118	$ —

7. Investments

The following tables summarize our investments as of the dates indicated:

	March 31, 2014			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 451,484	$ 613	$ 415	$ 451,682
Municipal securities	99,775	266	293	99,748
GSEs	69,379	18	71	69,326

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 329,504	$ 329,633
Due one year through five years	366,550	366,567
Due after ten years	11,400	10,928
	$ 707,454	$ 707,128

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Net realized investment gains for the three months ended March 31, 2014 and 2013 were insignificant.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at March 31, 2014 and December 31, 2013, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of March 31, 2014.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More

Auction Rate Securities. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not

been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 17 years to 32 years. Considering the relative insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction rate securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at March 31, 2014. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $70.7 million of these instruments at par value.

For the three months ended March 31, 2014 and 2013, we recorded pretax unrealized gains of $0.03 million and $0.3 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future impairment was other-than-temporary, we would record a charge to earnings as appropriate.

8. Receivables

Receivables consist primarily of amounts due from the various states in which we operate, which may be subject to potential retroactive adjustments. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial.

9. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by state authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. Additionally, in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, we maintain restricted investments as collateral for letters of credit. The following

table presents the balances of restricted investments:

	March 31, 2014	December 31, 2013
	(In thousands)

The contractual maturities of our held-to-maturity restricted investments as of March 31, 2014 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 76,957	$ 76,963
Due one year through five years	5,079	5,083
	$ 82,036	$ 82,046

10. Medical Claims and Benefits Payable

Medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. Non-risk provider payables amounted to $122.7 million and $151.3 million as of March 31, 2014, and December 31, 2013, respectively.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were more than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Three Months Ended March 31,		Year Ended
	2014	2013	December 31, 2013
	(Dollars in thousands)		
Balances at beginning of period	$ 669,787	$ 494,530	$ 494,530
Components of medical care costs related to:			
Current period	1,773,332	1,347,181	5,434,443
Prior periods	(50,904)	(58,427)	(52,779)
Total medical care costs	1,722,428	1,288,754	5,381,664
Change in non-risk provider payables	(28,560)	(7,638)	111,267
Payments for medical care costs related to:			
Current period	1,172,672	948,820	4,932,195
Prior periods	371,442	335,681	385,479
Total paid	1,544,114	1,284,501	5,317,674
Balances at end of period	$ 819,541	$ 491,145	$ 669,787
Benefit from prior period as a percentage of:			
Balance at beginning of period	7.6%	11.8%	10.7%
Premium revenue, trailing twelve months	0.8%	1.0%	0.9%
Medical care costs, trailing twelve months	0.9%	1.1%	1.0%

Assuming that our initial estimate of claims incurred but not paid (IBNP) is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate – we only know when the circumstances for any one or more factors are out of the ordinary.

As indicated above, the amounts ultimately paid out on our liabilities in fiscal years 2014 and 2013 were less than what we had expected when we had established our reserves. For example, for the year ended December 31, 2013, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2012 by 10.7%. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We recognized favorable prior period claims development in the amount of $50.9 million for the three months ended March 31, 2014. This amount represents our estimate as of March 31, 2014, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2013 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2013 was due primarily to the following factors:

- At our Ohio health plan, we entered new regions in the state, and a new product, ABD Kids, in July 2013. Since we did not have enough historical claims data to use the pattern of paid and incurred claims, we initially estimated the reserves for these new members by applying an estimated medical care ratio (MCR). This resulted in an overstatement of our reserve liability as of December 31, 2013.

- At our Michigan health plan, we overestimated the impact of certain unpaid potentially high-dollar claims. In addition, we overestimated the impact of the flu season on the outpatient claims for November and December 2013, which caused an overestimation in our outpatient reserve liability as of December 31, 2013.

We recognized favorable prior period claims development in the amount of $58.4 million for the three months ended March 31, 2013. This amount represents our estimate as of March 31, 2013, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2012 was more than the amount that would ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2012, was due primarily to the following factors:

- At our Texas health plan, we saw a reduction in STAR+PLUS (the state's program for aged and disabled members) membership during mid to late 2012. This caused a reduction in costs per member that we did not fully recognize in our December 31, 2012 reserve estimates.
- At our Washington health plan, prior to July 2012, certain high-cost newborns that were approved for Supplemental Security Income (SSI) coverage by the state were retroactively dis-enrolled from our Healthy Options (TANF) coverage, and the health plan was reimbursed for the claims paid on behalf of these members. Starting July 1, 2012, these newborns, as well as other high-cost disabled members, are now covered by the health plan under the Health Options Blind and Disabled (HOBD) program. At the end of 2012, we did not have enough claims history to accurately estimate the claims liability of the HOBD members, and as a result the liability for these high-cost members was overstated.
- For our New Mexico health plan, we overestimated the impact of certain high-dollar outstanding claim payments as of December 31, 2012.

In estimating our claims liability at March 31, 2014, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- Effective January 1, 2014, we began covering approximately 133,000 members under Medicaid Expansion. These are new members and a new product, so we do not have historical claims data to use for purposes of establishing the reserves. Therefore, we are applying an estimated MCR to establish the estimated incurred claims and the reserves for these members.
- Effective January 1, 2014, we began covering approximately 126,000 new members at our South Carolina health plan. Because this is a new health plan for us, we do not have historical claims data to use for purposes of establishing the reserves. Therefore, we are applying an estimated MCR to establish the estimated incurred claims and the reserves for these members.
- At our Texas health plan, we continue to see a significant number of older claims that are being paid as a result of disputes with providers over the initial paid amounts. We have included an allowance for additional provider-disputed claims in our reserves as of March 31, 2014, but it is often difficult to predict the frequency and amount of such claims.
- At our New Mexico health plan, the state had fallen behind in adding members to our enrollment. As we were developing our March 31, 2014 reserves, we learned of a large number of members that were enrolled to our health plan retroactively. Since we had no claims history for these members, we applied the projected MCR to estimate the claims and reserves for these members. In addition, effective January 1, 2014, the benefits for New Mexico Medicaid members were expanded to include behavioral health benefits. The additional projected claims, and therefore the additional reserves, for behavioral health benefits were substantial.
- At our New Mexico and Washington health plans, we began using an outside vendor to review high-dollar claims. As part of the process, some claims are denied and more information is requested so that a detailed review of the billed amounts can be conducted. This has caused a disruption in the normal flow of claims payments that we have attempted to reflect in our reserves.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2013, and for the three months ended March 31, 2014, the absence of adverse development of the liability for claims and medical benefits

payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both periods, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the replenishment of reserves in the respective periods generally offset the benefit from the prior period.

11. Long-Term Debt

As of March 31, 2014, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2014	2015	2016	2017	2018	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
3.75% Notes	187,000	187,000	—	—	—	—	—
	$ 737,000	$ 187,000	$ —	$ —	$ —	$ —	$ 550,000

1.125% Cash Convertible Senior Notes due 2020. In February 2013, we issued $550.0 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020 (the 1.125% Notes), which were outstanding as of March 31, 2014 and December 31, 2013. Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 of each year, at a rate of 1.125% per annum, and commenced on July 15, 2013. The 1.125% Notes will mature on January 15, 2020 unless repurchased or converted in accordance with their terms prior to such date. The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities.

The initial conversion rate for the 1.125% Notes was 24.5277 shares of our common stock per $1,000 principal amount of 1.125% Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate is subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest.

The 1.125% Notes contain an embedded cash conversion option, which was separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the embedded cash conversion option transaction settles or expires. The initial fair value liability of the embedded cash conversion option simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). This discount is amortized to the 1.125% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued, or approximately 5.9%. As of March 31, 2014, we expect the 1.125% Notes to be outstanding until their January 15, 2020 maturity date, for a remaining amortization period of 5.8 years. The 1.125% Notes' if-converted value did not exceed their principal amount as of March 31, 2014 and December 31, 2013.

3.75% Convertible Senior Notes due 2014. We had $187.0 million of 3.75% Convertible Senior Notes due 2014 (the 3.75% Notes) outstanding as of March 31, 2014 and December 31, 2013. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock.

Because the 3.75% Notes have cash settlement features, we have allocated the proceeds from their issuance between a liability component and an equity component. The reduced carrying value on the 3.75% Notes resulted in a debt discount that is amortized back to the 3.75% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 3.75% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued. The effective interest rate of the 3.75% Notes is 7.5%, principally based on the seven-year U.S. Treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. As of March 31, 2014, we expect the 3.75% Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 6 months. The 3.75% Notes' if-converted value exceeded their principal amount by approximately $37 million, and $11 million as of March 31, 2014, and December 31, 2013, respectively. At March 31, 2014, the equity component of the 3.75% Notes, net of the impact of deferred taxes, was $24.0 million.

The principal amounts, unamortized discount and net carrying amounts of the convertible senior notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
March 31, 2014:			
1.125% Notes	$ 550,000	$ 128,996	$ 421,004
3.75% Notes	187,000	3,451	183,549
	$ 737,000	$ 132,447	$ 604,553
December 31, 2013:			
1.125% Notes	$ 550,000	$ 133,632	$ 416,368
3.75% Notes	187,000	5,128	181,872
	$ 737,000	$ 138,760	$ 598,240

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Interest cost recognized for the period relating to the:		
Contractual interest coupon rate	$ 3,300	$ 2,527
Amortization of the discount	6,314	3,723
Total interest cost recognized	$ 9,614	$ 6,250

Lease Financing Obligations. In 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of two properties, including the Molina Center located in Long Beach, California, and the building that houses our Ohio health plan located in Columbus, Ohio. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated and amortized over their remaining useful lives. The lease financing obligation is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income.

As described and defined in further detail in Note 16, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings then under construction, one of which was completed in June 2013. We have concluded that we are the accounting owner of the construction projects because of our continuing involvement in those projects. We have recorded $34.1 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of March 31, 2014, which represents the total cost, including imputed interest, incurred by the Landlord thus far in the construction projects. As of March 31, 2014, the aggregate amount recorded to lease financing obligations for the construction projects amounted to $34.8 million. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was immaterial for the three months ended March 31, 2014.

12. Derivative Financial Instruments

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

	Balance Sheet Location	March 31, 2014	December 31, 2013
		(In thousands)	
Derivative asset:			
1.125% Call Option	Non-current assets: Derivative asset	$ 196,617	$ 186,351
Derivative liability:			
Embedded cash conversion option	Non-current liabilities: Derivative liability	$ 196,503	$ 186,239

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of income, in other income, net. Gains and losses for each of our derivative financial instruments are presented in the consolidated statements of cash flows.

1.125% Notes Call Spread Overlay. Concurrent with the issuance of the 1.125% Notes in 2013 as described in Note 11, "Long-Term Debt," we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). We refer to these transactions collectively as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by proceeds from the sale of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes.

1.125% Call Option. The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to the cash settlement features until the 1.125% Call Option settles or expires. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 6, "Fair Value Measurements."

Embedded Cash Conversion Option. The embedded cash conversion option within the 1.125% Notes is accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the embedded cash conversion option, refer to Note 6, "Fair Value Measurements."

13. Stockholders' Equity

Stockholders' equity increased $4.8 million during the three months ended March 31, 2014 compared with stockholders' equity at December 31, 2013. The increase was primarily due to net income of $4.5 million.

1.125% Warrants. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants.

Securities Repurchases and Repurchase Program. Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50.0 million in aggregate of our common stock through December 31, 2014. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and other market conditions. As of March 31, 2014, the remaining balance available to repurchase our stock under this program was $47.3 million.

Shelf Registration Statement. In May 2012, we filed an automatic shelf registration statement on Form S-3 with the SEC covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Plans. In connection with our equity incentive plans, we issued approximately 391,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the three months ended March 31, 2014.

14. Segment Information

We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans and also includes our direct delivery business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides MMIS design, development, implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segment is charged to the Health Plans segment.

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Revenue from continuing operations:		
Health Plans segment:		
Premium revenue	$ 1,940,337	$ 1,497,433
Premium tax revenue	51,693	37,000
Health insurer fee revenue	18,696	—
Investment income	1,629	1,516
Other revenue	3,258	4,694
Molina Medicaid Solutions segment:		
Service revenue	53,630	49,756
	$ 2,069,243	$ 1,590,399
Operating income from continuing operations:		
Health Plans segment	$ 14,019	$ 61,520
Molina Medicaid Solutions segment	10,248	6,353
Total operating income from continuing operations	24,267	67,873
Other expenses, net	13,778	12,906
Income from continuing operations before income tax expense	$ 10,489	$ 54,967

15. Commitments and Contingencies

California Health Plan Rate Settlement Agreement. In the fourth quarter of 2013, our California health plan entered into a settlement agreement with the California Department of Health Care Services (DHCS). The agreement settled rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in Medi-Cal (California's Medicaid program). Under the terms of the agreement, a settlement account (the Account) applicable to the California health plan's managed care contracts has been established.

Effective January 1, 2014, the Account was established with an initial balance of zero, and will be settled after December 31, 2017. DHCS will make an interim partial settlement payment to us if it terminates early, without replacement, any of our managed care contracts. The Account will be adjusted annually to reflect a calendar year deficit or surplus, which is determined by comparing the California health plan's pre-tax margin and a target margin established in the settlement agreement. Upon expiration of the settlement agreement, if the Account is in a deficit position, then DHCS will pay the amount of the deficit to us, subject to an alternative minimum payment amount. If the Account is in a surplus position, then no amount is owed to either party. The maximum amount that DHCS would pay to us under the terms of the settlement agreement is $40.0 million.

We estimate and recognize the retrospective adjustments to premium revenue based on our experience to date under the California health plan's managed care contracts. As of March 31, 2014, we recorded a deficit, or receivable, of $5.0 million, net of a valuation discount of $0.3 million, reflecting our estimated retrospective premium adjustment to the Account based on the California health plan's actual pretax margin for the three months ended March 31, 2014.

Legal Proceedings. The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these

estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Washington Health Plan. The Washington Health Care Authority (HCA) has communicated that it believes it has overpaid our Washington health plan with regard to certain claims. The alleged overpayments, which relate to and were incorporated into the capitation rates paid to our Washington health plan, date back to July 1, 2012, the start date of the current contract. On March 25, 2014, HCA alleged that the total "overpayments" related to HCA's delayed enrollment of so-called Washington Community Options Program Entry System (COPES) members were $14.4 million, and demanded payment in that amount. On April 7, 2014, HCA alleged that the total "overpayments" related to certain psychotropic drug claims that had been included in the Request for Proposal (RFP) rate book were $5.8 million, and demanded payment in that amount. HCA has provided us with minimal data by which we might independently validate HCA's allegations. Furthermore, both alleged errors, if they in fact occurred, were unilateral errors committed and caused by HCA for which our Washington health plan had no contemporaneous knowledge and had assumed and bore no contractual risk. We are in the process of responding to HCA's demands for payment, noting that the demands are improper since under Washington law there were in fact no "overpayments" since payment was made consistent with the express terms of the parties' contract. We believe that any actual liability for the alleged overpayment claims is not currently probable or reasonably estimable.

Provider Claims. Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions. Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements upon us that require the retention of net worth in excess of amounts formally required by statute or regulation. Such statues, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $592 million at March 31, 2014, and $608 million at December 31, 2013. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $339.8 million and $365.2 million as of March 31, 2014 and December 31, 2013, respectively.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Illinois, Michigan, New Mexico, Ohio, South Carolina, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of March 31, 2014, our health plans had aggregate statutory capital and surplus of approximately $641 million compared with the required minimum aggregate statutory capital and surplus of approximately $410 million. All of our health plans were in compliance with the minimum capital requirements at March 31, 2014. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

16. Related Party Transactions

In February 2013, we entered into a lease with 6th & Pine Development, LLC (the Landlord) for office space located in Long Beach, California. The lease consists of two office buildings, one of which is under construction.

The principal members of the Landlord are John C. Molina, our chief financial officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, the Landlord has pledged shares of common stock in the Company the Landlord holds as trustee. Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary.

The lease term for the completed building commenced in June 2013, and the lease term for the building under construction is expected to commence in September 2014. The initial lease term for both buildings expires on December 31, 2024, subject to two five-year renewal options. Annual rent for the completed building is approximately $3 million, and initial annual rent for the building under construction is expected to be approximately $4 million. Rent increases 3.75% per year during the initial term. Rent during the extension terms will be the greater of then-current rent or fair market rent.

Refer to Note 17, "Variable Interest Entities," for a discussion of the Joseph M. Molina, M.D. Professional Corporations.

17. Variable Interest Entities

Joseph M. Molina M.D., Professional Corporations. The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's sole shareholder is Dr. J. Mario Molina, our chief executive officer, president, and chairman of the board of directors. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides professional medical services to the general public for routine non-life threatening, outpatient health care needs. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, American Family Care, Inc. (AFC), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will operate at break even, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by AFC are reviewed annually to assure the achievement of this goal.

Our California, Florida, New Mexico and Washington health plans have entered into primary care capitation agreements with JMMPC. These agreements direct our health plans to perform a monthly reconciliation, to either fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, such that JMMPC will derive no profit or loss. Because the AFC services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are generally insignificant.

We have determined that JMMPC is a variable interest entity (VIE), and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of March 31, 2014, JMMPC had total assets of $8.9 million, and total liabilities of $8.6 million. As of December 31, 2013, JMMPC had total assets of $6.9 million and total liabilities of $6.6 million.

Our maximum exposure to loss as a result of our involvement with JMMPC is generally limited to the amounts needed to fund JMMPC's ongoing payroll and employee benefits. We believe that such loss exposure will be immaterial to our consolidated operating results and cash flows for the foreseeable future.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words “anticipate(s),” “believe(s),” “estimate(s),” “expect(s),” “intend(s),” “may,” “plan(s),” “project(s),” “will,” “would,” “could,” “should” and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated. Those known risks and uncertainties include, but are not limited to, the following:

- uncertainties associated with the implementation of the Affordable Care Act, including the full grossed up reimbursement by states of the non-deductible health insurer fee, the expansion of Medicaid eligibility in the states that participate to previously uninsured populations unfamiliar with managed care, the implementation of state insurance marketplaces, the effect of various implementing regulations, and uncertainties regarding the impact of other federal or state health care and insurance reform measures, including the dual eligibles demonstration programs in California, Illinois, Michigan, Ohio, and South Carolina;
- newly FDA-approved drugs such as sovaldi, olysio, and other drugs for hepatitis C or other medical conditions that are exorbitantly priced but not factored into the calculation of our capitated rates for 2014;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations, and our ability to reduce over time the high medical costs commonly associated with new patient populations;
- the accurate estimation of incurred but not paid medical costs across our health plans;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates or retroactive premium rate increases;
- efforts by states to recoup previously paid amounts, including claims by the Washington Health Care Authority (HCA) that it overpaid our Washington health plan for certain claims related to psychotropic drugs and the Washington Community Options Program Entry System (COPES);
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, and our ability to increase our revenues consistent with our expectations;
- the continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- government audits and reviews, and any fine, enrollment freeze, or monitoring program that may result therefrom;
- changes with respect to our provider contracts and the loss of providers;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive, and the interpretation and implementation of medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- the interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable or unfavorable resolution of litigation, arbitration, or administrative proceedings;
- the relatively small number of states in which we operate health plans;
- our management of a portion of College Health Enterprises’ hospital in Long Beach, California;

- the availability of adequate financing on acceptable terms to fund and capitalize our expansion and growth, repay our outstanding indebtedness at maturity and meet our liquidity needs, including the interest expense and other costs associated with such financing;
- the failure of a state in which we operate to renew its federal Medicaid waiver;
- an inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- changes in general economic conditions, including unemployment rates; and
- increasing consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2013, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report, and the audited financial statements and Management's Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2013.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. As of March 31, 2014, these health plans served approximately 2.2 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Additionally, we serve a small number of Health Insurance Marketplaces members, many of whom are eligible for government premium subsidies. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in California.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal in 2012, and effective June 2013 the transition obligations associated with that contract terminated. Therefore, beginning in the second quarter of 2013, we classified the operations for our Missouri health plan as discontinued operations for all periods presented in our consolidated financial statements. The following discussion and analysis, with the exception of cash flow information, is presented in the context of continuing operations unless otherwise identified.

Health Care Reform

We believe that the Affordable Care Act (defined below) will continue to provide us with significant opportunities for membership growth in our existing markets and, potentially, in new markets in the future as follows:

Medicaid Expansion. As of January 1, 2014, in the states that have elected to participate, the Affordable Care Act provides for the expansion of the Medicaid program to provide eligibility to nearly all low-income people under age 65 with incomes at or below 138 percent of the federal poverty line. Among the 11 states where we currently operate our health plans, the states of California, Illinois, Michigan, New Mexico, Ohio, and Washington participate in Medicaid expansion. In the first quarter of 2014, we added approximately 133,000 Medicaid expansion members, or 6% of total membership.

Health Insurance Marketplaces. On October 1, 2013, Health Insurance Marketplaces (Marketplaces) became available for consumers to access and begin the enrollment process for coverage beginning January 1, 2014. Marketplaces allow individuals and small groups to purchase health insurance that is federally subsidized. We participate in Marketplaces in all of the states in which we operate, except Illinois and South Carolina. In the first quarter of 2014, we added approximately 7,700 Marketplaces members, or 0.4% of total membership.

Dual Eligibles. Policymakers at the federal and state levels are increasingly developing initiatives, and the Centers for Medicare and Medicaid Services (CMS) has implemented several demonstrations, designed to improve the coordination of care for dual eligibles and reduce spending under Medicare and Medicaid. These demonstrations include issuing contracts to 15 states to design a program to integrate Medicare and Medicaid services for dual eligibles in the state. We refer to such demonstrations as our Medicare-Medicaid Plan (MMP) implementations. Our Illinois health plan began serving MMP members in March 2014. Our health plans in California, Ohio, Michigan and South Carolina intend to commence their MMP implementations during 2014 and early 2015.

Health Insurer Fee. In the first quarter of 2014, we adopted the guidance of the Financial Accounting Standards Board (FASB) related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively, the Affordable Care Act, or ACA). The ACA imposes an annual fee, or excise tax, on health insurers for each calendar year beginning on or after January 1, 2014. The health insurer fee (HIF) is imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year, and is payable on September 30 of each year.

Effective January 1, 2014, we recorded our estimate of the 2014 liability to accounts payable and accrued liabilities, amounting to $88.8 million. We are amortizing this liability on a straight-line basis in 2014, and recorded $22.2 million to health insurer fee expenses in the first quarter of 2014. As enacted, this federal premium-based assessment is non-deductible for income tax purposes.

For further discussion of the risks and uncertainties relating to the HIF, refer to the subheading below, "Liquidity and Capital Resources—Financial Condition."

Market Updates - Health Plans Segment

Florida. On March 12, 2014, our Florida health plan entered into an agreement with Healthy Palm Beaches, Inc. (HPB) to acquire certain assets relating to HPB's Medicaid business for $8.0 million, subject to adjustment. Our Florida health plan expects to close on this transaction in the second quarter of 2014.

South Carolina. Our South Carolina health plan began serving 126,000 members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014. For further information refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 4, "Business Combinations."

Composition of Revenue and Membership

Health Plans Segment

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new request for proposals (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations such as the aged, blind or disabled; and regions or service areas.

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," is not generally subject to significant accounting estimates. For the three months ended March 31, 2014, we received approximately 97% of our premium revenue as a fixed amount per member per month (PMPM), pursuant to our Medicaid contracts with state agencies, Medicare and other managed care organizations for which we operate as subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the three months ended March 31, 2014, we recognized approximately 3% of our premium revenue in the form of "birth income"—a one-time payment for the delivery of a child—from the Medicaid programs in all of our state health plans except Illinois and New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. The following table sets forth the ranges of premiums paid to our state health plans in the three months ended March 31, 2014, by program.

	Ending	PMPM Premiums		
	Membership	Low	High	Consolidated
Temporary Assistance for Needy Families (TANF)	1,575,300	$ 110.00	$ 320.00	$ 170.00
Aged, Blind or Disabled (ABD)	309,900	380.00	1,240.00	750.00
Medicaid Expansion	133,000	530.00	630.00	570.00
Children's Health Insurance Program (CHIP)	83,700	90.00	130.00	120.00
Medicare Special Needs Plans (Medicare)	41,400	530.00	1,340.00	1,240.00
Health Insurance Marketplaces (Marketplaces)	7,700	320.00	670.00	410.00

The following tables set forth our Health Plans segment membership as of the dates indicated:

	March 31, 2014	December 31, 2013	March 31, 2013
Health Plans Segment Ending Membership by Health Plan:			
California	418,000	368,000	332,000
Florida	91,000	89,000	75,000
Illinois	5,000	4,000	—
Michigan	218,000	213,000	217,000
New Mexico	183,000	168,000	91,000
Ohio	260,000	255,000	242,000
South Carolina (1)	126,000	—	—
Texas	246,000	252,000	274,000
Utah	80,000	86,000	87,000
Washington	434,000	403,000	416,000
Wisconsin	90,000	93,000	86,000
	2,151,000	1,931,000	1,820,000
Health Plans Segment Ending Membership by Program:			
TANF	1,575,300	1,503,800	1,402,000
ABD	309,900	288,600	269,300
Medicaid Expansion (2)	133,000	—	—
CHIP	83,700	99,200	114,400
Medicare	41,400	39,400	34,300
Marketplaces (3)	7,700	—	—
	2,151,000	1,931,000	1,820,000

(1) Our South Carolina health plan began serving members under the state of South Carolina's new full-risk Medicaid managed care program effective January 1, 2014.

(2) Medicaid Expansion membership phased in effective January 1, 2014.

(3) Marketplaces became available for consumers to access coverage beginning January 1, 2014.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following categories:

- *Fee-for-service expenses:* Under fee-for-service arrangements, we retain the financial responsibility for medical care provided and incur costs based on actual utilization of services. Such expenses are recorded in the period in which the related services are dispensed. Nearly all hospital services and the majority of our primary care and physician specialist services are paid on a fee-for-service basis.

- *Capitation expenses:* Under capitation arrangements, we pay a fixed amount PMPM to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.

- *Pharmacy expenses:* All drug, injectables, and immunization costs paid through our pharmacy benefit manager are classified as pharmacy expenses.

- *Direct delivery expenses:* All costs associated with our operation of primary care clinics are classified as direct delivery expenses.

- *Other medical expenses:* All medically related administrative costs, certain provider incentive costs, reinsurance costs and other health care expenses are classified as other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements in Note 10, "Medical Claims and Benefits Payable," for further information on how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

First Quarter Financial Performance Summary, Continuing Operations

The following table and narrative briefly summarize our financial and operating performance from continuing operations for the three months ended March 31, 2014 and 2013. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio is computed as a percentage of premium revenue, the premium tax ratio is computed as a percentage of premium revenue plus premium tax revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended March 31,	
	2014	2013
	(Dollar amounts in thousands, except per share data)	
Net income per diluted share	$ 0.10	$ 0.65
Premium revenue	$ 1,940,337	$ 1,497,433
Service revenue	$ 53,630	$ 49,756
Operating income	$ 24,267	$ 67,873
Net income	$ 4,834	$ 30,522
Total ending membership	2,151,000	1,820,000
Premium revenue	93.8%	94.2%
Service revenue	2.6	3.1
Premium tax revenue	2.5	2.3
Health insurer fee revenue	0.9	—
Investment income	0.1	0.1
Other revenue	0.1	0.3
Total revenue	100.0%	100.0%
Medical care ratio	88.7%	86.0%
General and administrative expense ratio	9.1%	8.9%
Premium tax ratio	2.6%	2.4%
Operating income	1.2%	4.3%
Net income	0.2%	1.9%
Effective tax rate	53.9%	44.5%

Non-GAAP Financial Measures

We use the following non-GAAP financial measures as supplemental metrics in evaluating our financial performance, making financing and business decisions, and forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in comparing our performance and the performance of other companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not substitutes for or superior to, GAAP measures (GAAP stands for U.S. Generally Accepted Accounting Principles).

The first of these non-GAAP measures is earnings before interest, taxes, depreciation and amortization, or EBITDA. The following table reconciles net income, which we believe to be the most comparable GAAP measure, to EBITDA.

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Net income	$ 4,498	$ 29,915
Adjustments:		
Depreciation, and amortization of intangible assets and capitalized software	25,914	21,799
Interest expense	13,822	13,037
Income tax expense	5,237	24,270
EBITDA	$ 49,471	$ 89,021

The second of these non-GAAP measures is adjusted net income, continuing operations. The following table reconciles net income from continuing operations, which we believe to be the most comparable GAAP measure, to adjusted net income, continuing operations.

	Three Months Ended March 31,			
	2014		2013	
	(In thousands, except diluted per-share amounts)			
Net income, continuing operations	$ 4,834	$ 0.10	$ 30,522	$ 0.65
Adjustments, net of tax:				
Depreciation, and amortization of capitalized software	12,998	0.27	10,679	0.23
Stock-based compensation	4,899	0.10	3,600	0.08
Amortization of convertible senior notes and lease financing obligations	4,205	0.10	2,345	0.05
Amortization of intangible assets	3,329	0.07	3,054	0.07
Change in fair value of derivatives	(1)	—	(75)	—
Adjusted net income, continuing operations	$ 30,264	$ 0.64	$ 50,125	$ 1.08

Analysis of First Quarter 2014 Financial Results - Trends and Developments

At our Investor Day on February 13, 2014, we stated that our first quarter results could be adversely affected by three factors: (A) general and administrative expenses incurred before related revenue is realized; (B) delays in securing agreements for the reimbursement (including reimbursement for tax impacts) of the HIF; and (C) delays in the recognition of quality or at risk performance related revenue.

Results reported for the first quarter of 2014 would have been higher except for:

(A) General and administrative expenses for which no related revenue was recognized reduced first quarter earnings by approximately $20 million, or $0.19 per diluted share (GAAP and adjusted basis). Our full year guidance for 2014 anticipates an administrative expense ratio of 7.5% for the fourth quarter of 2014.

(B) The absence of full reimbursement for the HIF reduced first quarter earnings by approximately $16 million, or $0.15 per diluted share (GAAP and adjusted basis). We had not secured agreements with the states of California, Michigan, New Mexico, Texas, Utah and South Carolina at the close of the first quarter 2014 for the reimbursement (including income tax effect) of the HIF. We remain guardedly optimistic that we will secure such agreements with all of our state partners prior to the close of 2014.

(C) The failure to recognize a portion of the Texas health plan's quality incentive revenue reduced first quarter earnings by approximately $6 million, or $0.06 per diluted share (GAAP and adjusted basis). Changes to the metrics associated with the achievement of that quality incentive revenue make it difficult to recognize revenue as of March 31, 2014. We remain guardedly optimistic that we will be able to recognize most of our quality revenue in Texas prior to the close of 2014.

Results of Operations, Continuing Operations

First Quarter of 2014 Compared with the Fourth Quarter of 2013

Diluted net income per share, continuing operations, increased to $0.10 in the first quarter 2014 from a diluted net loss per share, continuing operations of $0.20 in the fourth quarter of 2013. Adjusted net income per diluted share, continuing operations, similarly increased to $0.64 in the first quarter 2014, from $0.44 in the fourth quarter of 2013. First quarter 2014 financial results improved when compared with fourth quarter 2013 due to:

- An increase in total revenue of 21%; primarily due to our expansion into South Carolina, expanded member benefits in New Mexico and Florida, and substantial membership increases in California; and
- A decrease in the general and administrative expense ratio to 9.1%, from 11.0% in the fourth quarter of 2013; partially offset by
- The impact of that portion of the HIF not reimbursed by our state partners which reduced pretax income in the first quarter 2014 by approximately $16 million.

First Quarter of 2014 Compared with the First Quarter of 2013

Diluted net income per share, continuing operations decreased to $0.10 in the first quarter 2014, from $0.65 in the first quarter 2013. Adjusted net income per diluted share, continuing operations, similarly decreased to $0.64 in the first quarter 2014, from $1.08 in the first quarter 2013. Financial results for the first quarter of 2014 are difficult to compare with the first quarter of 2013 for the following reasons:

- The recognition in the first quarter 2013 of $24 million in revenue related to 2012 and 2011;

- The $16 million of HIF not reimbursed by our state partners in the first quarter 2014;
- The ‘gross up' of HIF revenue that was recognized in the quarter to compensate us for the lack of tax deductibility of the HIF;
- The $6 million of quality revenue not recognized in the first quarter 2014;
- An out of period benefit recorded at the Texas health plan in the first quarter of 2013 that improved that health plan’s financial performance by approximately $13 million over what it would have otherwise reported;
- The impact of lower margins associated with the startup of operations in South Carolina and the provision of new benefits to members in Florida and New Mexico; and
- The impact of a much higher effective tax rate in the first quarter 2014 due to the non-deductibility of the HIF.

Health Plans Segment

Premium Revenue

Premium revenue for the first quarter of 2014 increased 30% over the first quarter of 2013, due to a 19% increase in member months, and a 9% increase in revenue per member per month (PMPM). The 19% increase in member months was primarily due to the addition of Medicaid expansion membership at our health plans in California, New Mexico, Ohio and Washington, and the addition of Medicaid members at our South Carolina health plan, all effective January 1, 2014.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended March 31,					
	2014			2013		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 1,181,061	$ 183.21	68.6%	$ 866,755	$ 160.02	67.3%
Pharmacy	286,628	44.46	16.7	231,838	42.80	18.0
Capitation	169,439	26.28	9.8	140,324	25.91	10.9
Direct delivery	22,021	3.42	1.3	8,684	1.60	0.7
Other	62,509	9.71	3.6	40,314	7.44	3.1
Total	$ 1,721,658	$ 267.08	100.0%	$ 1,287,915	$ 237.77	100.0%

Our consolidated medical care ratio increased to 88.7% in the first quarter of 2014, from 86.0% in the first quarter of 2013.

Individual Health Plan Analysis

California. Medical margin improved at the California health plan $12.3 million, or approximately 40%, in the first quarter of 2014, when compared with the first quarter of 2013. Higher enrollment and higher PMPM premium—particularly as a result of the 47,000 members added due to Medicaid expansion—and a $5.0 million benefit from the rate settlement agreement with the California Department of Health Care Services (DHCS), were mainly responsible for the improved financial performance. The increase in medical margin at the California health plan was even more notable given the recognition of approximately $18 million in revenue in the first quarter of 2013 (without related medical expense offset) that related to 2012 and 2011.

Florida. Medical margin improved at the Florida health plan by $2.9 million because the higher dollar margins associated with the enrollment of long-term care members beginning in December 2013. Premiums for long-term care members are typically set at a higher medical care ratio than for our traditional membership, but the much larger premiums associated with long-term members often generate higher dollar margins despite lower percentage margins.

Illinois. The medical care ratio for the Illinois health plan was 95.5% in the first quarter of 2014. The Illinois health plan served its first member effective September 2013.

Michigan. Financial performance improved at the Michigan health plan in the first quarter of 2014, when compared with the first quarter of 2013, primarily due to an improved bed day management program and lower seasonal flu experience thus far in 2014. The medical care ratio of the Michigan health plan decreased to 78.0% in the first quarter of 2014, from 88.1% in the first quarter of 2013.

New Mexico. Medical margin improved at the New Mexico health plan in the first quarter of 2014, when compared with the first quarter of 2013, primarily due to increased revenues associated with the addition of approximately 91,000 Medicaid

members and the inclusion of additional member benefits into premium rates. The increased membership in 2014 includes the addition of approximately 30,000 Medicaid expansion members in the first quarter of 2014, and approximately 60,000 new members in 2013 relating to a business combination effective August 1, 2013. The medical care ratio of the New Mexico health plan increased to 87.3% in the first quarter of 2014, from 85.9% in the first quarter of 2013. The higher medical care ratio was primarily the result of the addition of Medicaid expansion members and the addition of Medicaid behavioral health and long-term care services effective January 1, 2014.

Ohio. Financial performance worsened slightly at the Ohio health plan in the first quarter of 2014, when compared with the first quarter of 2013, due to growth in ABD membership, which typically carries a higher medical care ratio. The medical care ratio of the Ohio health plan increased to 85.3% for the first quarter of 2014, from 84.6% for the first quarter of 2013.

South Carolina. The medical care ratio for the South Carolina health plan was 94.0% in the first quarter of 2014. The South Carolina health plan served its first members effective January 2014. Our experience has been that members transitioning from Medicaid fee-for-service into managed care (as is the case with our South Carolina membership) experience higher medical care costs during the initial months of their enrollment.

Texas. Financial performance worsened at the Texas health plan in the first quarter of 2014, when compared with the first quarter of 2013, due to a decrease in quality based revenue, increased profit rebates payable to the state of Texas, and the absence in 2014 of the substantial ($13.5 million) favorable prior period claims development that improved reported financial performance in the first quarter of 2013. The medical care ratio of the Texas health plan increased to 91.5% in the first quarter of 2014, from 80.9% in the first quarter of 2013.

Utah. Financial performance improved at the Utah health plan in the first quarter of 2014, when compared with the first quarter of 2013, due to improved performance in both the Medicaid and the Medicare lines of business. The medical care ratio of the Utah health plan decreased to 85.4% in the first quarter of 2014, from 86.8% in the first quarter of 2013.

Washington. Financial performance worsened at the Washington health plan in the first quarter of 2014, when compared with the first quarter of 2013, primarily due to a 7% decrease in premium rates effective January 2014. The medical care ratio of the Washington health plan increased to 92.2% in the first quarter of 2014, from 87.6% in the first quarter of 2013. The Washington health plan added approximately 49,000 Medicaid expansion members in the first quarter of 2014.

Wisconsin. Financial performance improved at the Wisconsin health plan in the first quarter of 2014, when compared with the first quarter of 2013. The medical care ratio of the Wisconsin health plan decreased to 74.8% in the first quarter of 2014, from 87.2% in the first quarter of 2013.

Health Insurer Fee Revenue and Expenses

Refer to "Liquidity and Capital Resources—Financial Condition" below, for a comprehensive discussion of the HIF.

Premium Tax Expense

Premium tax expense was 2.6% of premium revenue plus premium tax revenue in the three months ended March 31, 2014, compared with 2.4% in the three months ended March 31, 2013.

Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended March 31, 2014						
	Member Months (1)	Premium Revenue		Medical Care Costs		MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM		
California	1,254	$ 277,642	$ 221.42	$ 237,344	$ 189.28	85.5%	$ 40,298
Florida	270	105,166	389.67	93,461	346.30	88.9	11,705
Illinois (3)	14	15,171	1,078.41	14,494	1,030.28	95.5	677
Michigan	648	173,496	267.58	135,320	208.70	78.0	38,176
New Mexico	549	225,068	410.00	196,409	357.79	87.3	28,659
Ohio	772	278,295	360.62	237,328	307.53	85.3	40,967
South Carolina	394	96,020	243.41	90,262	228.82	94.0	5,758
Texas	749	320,096	427.27	292,958	391.05	91.5	27,138
Utah	246	78,654	319.96	67,200	273.37	85.4	11,454
Washington	1,276	323,461	253.48	298,107	233.61	92.2	25,354
Wisconsin	274	38,528	140.67	28,809	105.19	74.8	9,719
Other (4)	—	8,740	—	29,966	—	—	(21,226)
	6,446	$ 1,940,337	$ 301.00	$ 1,721,658	$ 267.08	88.7%	$ 218,679

	Three Months Ended March 31, 2013						
	Member Months (1)	Premium Revenue		Medical Care Costs		MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM		
California	1,001	$ 187,788	$ 187.55	$ 159,763	$ 159.56	85.1%	$ 28,025
Florida	223	58,164	260.13	49,404	220.95	84.9	8,760
Michigan	652	166,557	255.52	146,748	225.13	88.1	19,809
New Mexico	274	84,000	306.97	72,149	263.66	85.9	11,851
Ohio	726	268,808	370.44	227,454	313.45	84.6	41,354
Texas	832	329,451	395.96	266,449	320.24	80.9	63,002
Utah	259	74,956	289.59	65,029	251.24	86.8	9,927
Washington	1,250	298,286	238.70	261,397	209.18	87.6	36,889
Wisconsin	200	27,124	135.53	23,664	118.24	87.2	3,460
Other (3)(4)	—	2,299	—	15,858	—	—	(13,559)
	5,417	$ 1,497,433	$ 276.45	$ 1,287,915	$ 237.77	86.0%	$ 209,518

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) The MCR represents medical costs as a percentage of premium revenue.
(3) The Illinois health plan's results prior to October 1, 2013, were insignificant and reported in "Other."
(4) "Other" medical care costs include primarily medically related administrative costs at the parent company, and direct delivery costs.

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	March 31, 2014	December 31, 2013
	(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 592,403	$ 424,173
Pharmacy payable	51,743	45,037
Capitation payable	23,583	20,267
Other	151,812	180,310
	$ 819,541	$ 669,787

The following table provides detailed medical claims data for the periods presented:

	Three Months Ended March 31,		Year Ended December 31,
	2014	2013	2013
	(Dollars in thousands, except per-member amounts)		
Days in claims payable, fee for service	46	38	43
Number of claims in inventory at end of period	287,300	135,400	145,800
Billed charges of claims in inventory at end of period	$ 517,300	$ 236,700	$ 276,500
Claims in inventory per member at end of period	0.13	0.07	0.08
Billed charges of claims in inventory per member at end of period	$ 240.49	$ 130.05	$ 143.19
Number of claims received during the period	5,986,000	5,271,000	21,317,500
Billed charges of claims received during the period	$ 6,354,000	$ 5,170,700	$ 21,414,600

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Service revenue before amortization	$ 54,359	$ 50,485
Amortization recorded as reduction of service revenue	(729)	(729)
Service revenue	53,630	49,756
Cost of service revenue	40,657	39,770
General and administrative costs	1,750	2,351
Amortization of customer relationship intangibles recorded as amortization	975	1,282
Operating income	$ 10,248	$ 6,353

Operating income for our Molina Medicaid Solutions segment increased $3.9 million for the three months ended March 31, 2014, compared with the same prior year period. The increase in operating income was primarily the result of increased revenues due to Medicaid Expansion membership.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses increased to 9.1% of total revenue for the three months ended March 31, 2014, compared with 8.9% of total revenue for the three months ended March 31, 2013, and declined from 11.0% in the fourth quarter of 2013. The year-over-year increase was primarily due to higher costs incurred as a result of continuing costs in connection with significant membership growth in 2014. General and administrative expense incurred during the three months ended March 31, 2014, for which no related revenue was recognized, amounted to approximately $20 million.

Depreciation and Amortization

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Three Months Ended March 31,			
	2014		2013	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 16,136	0.8%	$ 12,445	0.8%
Amortization of intangible assets, continuing operations	4,555	0.2	4,118	0.3
Depreciation and amortization, continuing operations	20,691	1.0	16,563	1.1
Depreciation and amortization, discontinued operations	—	—	2	—
Amortization recorded as reduction of service revenue	729	—	729	0.1
Amortization recorded as cost of service revenue	11,574	0.6	4,505	0.2
Depreciation and amortization reported in the consolidated statements of cash flows	$ 32,994	1.6%	$ 21,799	1.4%

Interest Expense

Interest expense increased to $13.8 million for the three months ended March 31, 2014, from $13.0 million for the three months ended March 31, 2013, primarily due to lease financing transactions in the second quarter of 2013. Interest expense includes non-cash interest expense relating to the amortization of the discount on our long-term debt obligations, which amounted to $6.7 million and $3.7 million for the three months ended March 31, 2014, and 2013, respectively.

Income Taxes

The provision for income taxes in continuing operations is recorded at an effective rate of 53.9% for the three months ended March 31, 2014, compared with 44.5% for the three months ended March 31, 2013. The disparity between rates in the first quarters of 2014 and 2013 is primarily due to the nondeductible HIF in 2014.

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of March 31, 2014, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income was $1.6 million for the three months ended March 31, 2014, compared with $1.5 million for the three months ended March 31, 2013. Our annualized portfolio yield for the three months ended March 31, 2014 and 2013 was 0.4%.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Liquidity

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Three Months Ended March 31,		
	2014	2013	Change
	(In thousands)		
Net cash provided by operating activities	$ 210,897	$ 20,104	$ 190,793
Net cash used in investing activities	(27,491)	(21,200)	(6,291)
Net cash (used in) provided by financing activities	(35,932)	374,837	(410,769)
Net increase in cash and cash equivalents	$ 147,474	$ 373,741	$ (226,267)

Operating Activities. Cash provided by operating activities increased $190.8 million, primarily due to the change in medical claims and benefits payable, which increased $153.1 million in connection with our membership growth in the first quarter of 2014 as described above.

Investing Activities. Cash used in investing activities increased $6.3 million, primarily due to increased Health Plans segment statutory deposit requirements resulting from membership growth in the first quarter of 2014, which is reflected in the increase in restricted investments.

Financing Activities. Cash used in financing activities for the first quarter of 2014 related primarily to the settlement of $38.1 million of contingent consideration liabilities for our 2013 South Carolina health plan acquisition. Financing activities generated net cash of $374.8 million in the first quarter of 2013, primarily due to the 1.125% Notes and related financing transactions, with no comparable activity in the first quarter of 2014.

Financial Condition

On a consolidated basis, at March 31, 2014, we had working capital of $725.3 million compared with $745.7 million at December 31, 2013. At March 31, 2014, and December 31, 2013, we had cash and investments, including restricted investments, of $1,872.5 million, and $1,712.9 million, respectively. We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Health Insurer Fee. One notable provision of the ACA is an excise tax or annual fee that applies to most health plans, including commercial health plans and Medicaid managed care plans like Molina Healthcare. While characterized as a "fee" in the text of the ACA, the intent of Congress was to impose a broad-based health insurance industry excise tax, with the understanding that the tax could be passed on to consumers, most likely through higher commercial insurance premiums.

However, because Medicaid is a government–funded program, Medicaid health plans have no alternative but to look to their respective state partners for payment to offset the impact of this tax. We continue to work with our state partners to obtain reimbursement for the full economic impact of the excise tax. Currently, we project that the HIF payable by September 30, 2014 will be $88.8 million. Because this amount is not deductible for income tax purposes, our net income will be reduced by the full amount of the assessment.

When states reimburse us for the amount of the HIF, that reimbursement will itself be subject to income tax, the HIF, and applicable state premium taxes. If our estimate of the $88.8 million HIF liability in 2014 is correct, and if our estimate of the amount allocable to Medicaid of approximately $81 million is correct, states will need to pay us an incremental amount of approximately $134 million in revenue during 2014 to account for the HIF and the absence of its tax deductibility. On a percentage basis, we anticipate that states will need to increase our Medicaid premium rates by approximately 1.4% to reimburse us for the HIF we will owe (based upon our estimated pro-rata share of total industry revenue in 2013). In addition,

we estimate that states will need to increase our Medicaid premium rates by a further 0.9% to make us whole for the lack of tax deductibility of the HIF, representing an estimated overall premium rate increase of approximately 2.3%.

As of May 1, 2014, we have contractual commitments from the states of Florida, Illinois, Ohio, Washington and Wisconsin to reimburse us by way of a lump sum payment for the full economic impact of the HIF in their respective states. While all of our remaining states have acknowledged the actuarial requirement that they reimburse us for the HIF, and its related income tax effects, no state other than those indicated above have contractually committed to do so.

Furthermore, states which have acknowledged the requirement to include the impact of the tax in our premium payments may argue that current premium rates will remain actuarially sound even if no adjustment is made to those rates. We continue to work with state officials to address the issue of fully grossed up reimbursement. If we are unable to obtain either premium increases or direct reimbursements to offset the impact of the tax on a fully grossed up basis, our business, financial condition, cash flows or results of operations could be materially adversely affected.

Regulatory Capital and Dividend Restrictions

For information on our regulatory capital requirements and dividend restrictions, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 15, "Commitments and Contingencies."

Future Sources and Uses of Liquidity

For information on our debt instruments, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Long-Term Debt."

For information on our shelf registration statement and our securities repurchase program, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 13, "Stockholders' Equity."

Contractual Obligations

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2013, was disclosed in our 2013 Annual Report on Form 10-K. There were no material changes to this previously filed information outside the ordinary course of business during the three months ended March 31, 2014. For further discussion and maturities of our long-term debt, refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 11, "Long-Term Debt."

Critical Accounting Estimates

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures; actual results could differ from these estimates. Our critical accounting estimates relate to:

- *Health Plans segment medical claims and benefits payable*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 10, "Medical Claims and Benefits Payable," for a table which presents the components of the change in medical claims and benefits payable, and for additional information regarding the factors used to determine our changes in estimates for all periods presented in the accompanying consolidated financial statements.
- *Health Plans segment contractual provisions with revenue or profit limits*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the first quarter of 2014 in connection with such contractual provisions.
- *Health Plans segment quality incentives*. Refer to Item 1 of this Form 10-Q, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," for a discussion of amounts recorded in the first quarter of 2014 in connection with such quality incentives.
- *Molina Medicaid Solutions segment revenue and cost recognition*.

There have been no significant changes during the three months ended March 31, 2014, to the items that we disclosed as our critical accounting estimates in our discussion and analysis of financial condition and results of operations in our Annual Report on Form 10-K for the year ended December 31, 2013.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently.

Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC, a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended March 31, 2014 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse

determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 1A. Risk Factors

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in Part I, Item 1A – Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2013. The risk factors described herein and in our 2013 Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition, cash flows, or results of operations.

There have been no material changes to the risk factors disclosed in our 2013 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Share repurchase activity during the three months ended March 31, 2014 was as follows:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (b)
January 1 – January 31	3,762	$ 34.75	—	$ 47,338,505
February 1 – February 28	42,890	$ 36.12	—	$ 47,338,505
March 1 – March 31	174,800	$ 37.68	—	$ 47,338,505
Total	221,452	$ 37.33	—	

(a) During the three months ended March 31, 2014, we withheld 221,452 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

(b) Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50.0 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. This repurchase program extends through December 31, 2014.

Item 3. Defaults Upon Senior Securities

None.

Item 5. Other Information

None.

Item 6. Exhibits

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended March 31, 2014 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

TABLE OF CONTENTS

This Annual Report on Form 10-K ("Form 10-K") contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, that involve risks and uncertainties. Many of the forward-looking statements are located under the headings "Business," and "Management's Discussion and Analysis of Financial Condition and Results of Operations." Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Forward-looking statements can also be identified by words such as "future," "anticipates," "believes," "estimates," "expects," "intends," "plans," "predicts," "will," "would," "could," "can," "may," and similar terms. Forward-looking statements are not guarantees of future performance and the Company's actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, those discussed in Part I, Item 1A of this Form 10-K under the heading "Risk Factors," which are incorporated herein by reference. Each of the terms "Company," "Molina Healthcare," "we," "our," and "us," as used herein refers collectively to Molina Healthcare, Inc. and its wholly owned subsidiaries, unless otherwise stated. The Company assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law.

PART I

Item 1: Business

OVERVIEW

Molina Healthcare provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program.

As of December 31, 2013, our health plans served approximately 1.9 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. Dr. C. David Molina founded our company in 1980 as a provider organization serving the Medicaid population in Southern California. Today, we remain a provider-focused company led by his son, Dr. J. Mario Molina.

Significant Accomplishments in 2013

Our mission is to provide quality health services to financially vulnerable families and individuals covered by government programs. Our goal is to achieve this mission while improving our financial strength. Our significant operational, financial and strategic accomplishments supporting this goal during 2013 included:

- Expanding existing markets by acquiring a Medicaid contract in New Mexico, adding approximately 80,000 new members to our Health Plans segment.
- Entering new strategic markets by acquiring the rights to convert certain Medicaid enrollees covered by South Carolina’s new full-risk Medicaid managed care program effective January 1, 2014. On that date, we added approximately 137,000 members to our Health Plans segment.
- Funding future growth by entering into new debt (and related hedge transactions), and lease financing transactions which in aggregate generated net cash of approximately $482 million, after debt repayment and stock repurchases.
- Building our infrastructure to support our 2014 growth initiatives associated with the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively, the Affordable Care Act, or ACA).

Our Structure

We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment. We derive our revenues primarily from health insurance premiums and service revenues. Refer to Part II, Item 7 of this Form 10-K, Management’s Discussion and Analysis of Financial Condition and Results of Operations, and Part II, Item 8 of this Form 10-K, Notes to Consolidated Financial Statements in Notes 2, "Significant Accounting Policies," and Note 21, "Segment Information," regarding revenue, profit and total asset information for each of our business segments, and revenue information by state health plan.

The Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in California. Our Health Plans segment operates in a highly regulated environment, with stringent minimum capitalization requirements that limit the ability of our health plan subsidiaries to pay dividends to us.

Our Molina Medicaid Solutions segment provides design, development, implementation (DDI), and business process outsourcing (BPO) solutions to state governments for their Medicaid management information systems (MMIS). MMIS is a core tool used to support the administration of state Medicaid and other health care entitlement programs. Molina Medicaid Solutions currently holds MMIS contracts with the states of Idaho, Louisiana, Maine, New Jersey, and West Virginia, the U.S. Virgin Islands, and a contract to provide pharmacy rebate administration services for the Florida Medicaid program. We added the Molina Medicaid Solutions segment to our business in 2010 to expand our product offerings to include support of state Medicaid agency administrative needs, reduce the variability in our earnings resulting from fluctuations in medical care costs, improve our operating profit margin percentages, and improve our cash flow by adding a business for which there are no restrictions on dividend payments.

Health Care Reform

The Affordable Care Act has changed, and will continue to make broad-based changes to, the U.S. health care system that could significantly affect the U.S. economy, and we expect will continue to significantly impact our business operations and financial results, including our medical care ratios. The ACA presents us with new business opportunities, but also with new financial and regulatory challenges.

Key components of the legislation will continue to be phased in over the next several years, with the most significant changes having occurred at the start of this year, including the implementation of the Medicaid expansion (in electing states), the Health Insurance Marketplaces, Medicare minimum medical loss ratios (MLRs), and new industry-wide fees, assessments, and taxes. We have dedicated material resources and have incurred material expenses in implementing and complying with the ACA, and we will continue to do so. As a result of the novelty and extremely broad scale of all of the programmatic changes effected by the ACA, many of the business and market impacts of the ACA will not be known for several years. Further, given the inherent difficulty of foreseeing how individuals will respond to the choices afforded to them by the ACA, we cannot predict the full effect the ACA will have on us.

Our Strategic Growth Initiatives

Our mission to provide quality health services to financially vulnerable families and individuals covered by government programs is the core philosophy that drives our strategic growth and growth-related initiatives to:

Expand Within Existing Markets

- New Mexico Health Plan - In August 2013, our New Mexico health plan closed on its acquisition of the Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program. As a result of this transaction, Lovelace's Medicaid members became our Medicaid members and now receive their Medicaid managed services and benefits from our New Mexico health plan. We expect the final purchase price for the acquisition, to be determined by the second quarter of 2014, to amount to approximately $ 53 million. As of December 31, 2013, our membership increased by approximately 80,000 members as a result of this transaction.

- Dual Eligibles - Nine million low-income elderly and disabled people in the United States are covered under both the Medicare and Medicaid programs. These beneficiaries, often called "dual eligibles" or simply "duals," are more likely than other Medicare beneficiaries to be frail, live with multiple chronic conditions, and have functional and cognitive impairments. Medicare is their primary source of health insurance coverage, as it is for millions of elderly and under-65 disabled beneficiaries. Medicaid supplements Medicare by paying for services not covered by Medicare, such as dental care and long-term care services and support, and by helping to cover Medicare's premiums and cost-sharing requirements. Together, these two programs help to shield very low-income Medicare beneficiaries from potentially unaffordable out-of-pocket medical and long-term care costs.

  Policymakers at the federal and state levels are increasingly developing initiatives, and the Centers for Medicare and Medicaid Services (CMS) has implemented several demonstrations, designed to improve the coordination of care for dual eligibles and reduce spending under Medicare and Medicaid. These demonstrations include issuing contracts to 15 states to design a program to integrate Medicare and Medicaid services for dual eligibles in the state. We refer to such demonstrations as our Medicare-Medicaid Plan (MMP) implementations. Our health plans in California, Illinois, Ohio, Michigan and South Carolina intend to commence their MMP implementations during 2014.

- Medicaid Expansion - As of January 1, 2014, in the states that elect to participate, the ACA provides for the expansion of the Medicaid program to provide eligibility to nearly all low-income people under age 65 with incomes at or below 138 percent of the federal poverty line. As a result, millions of low-income adults without children who previously could not qualify for coverage, as well as many low-income parents and, in some instances, children covered through Children's Health Insurance Program (CHIP), are now eligible for Medicaid. Among the 11 states where we currently operate our health plans, the states of California, Illinois, Michigan, New Mexico, Ohio, and Washington have indicated that they intend to participate in the Medicaid expansion; and the states of Florida, South Carolina, Texas, Utah, and Wisconsin have indicated that they do not intend to participate in the expansion. In those states that

participate in the expansion, our Medicaid membership is likely to grow appreciably. We believe there are significant opportunities to increase our revenues through Medicaid expansion.

- Health Insurance Marketplaces - On October 1, 2013, Health Insurance Marketplaces became available for consumers to access and begin the enrollment process for coverage beginning January 1, 2014. Health Insurance Marketplaces allow individuals and small groups to purchase health insurance that is federally subsidized. We intend to participate in Health Insurance Marketplaces in all of the states in which we operate, except Illinois and South Carolina. We participate in the Health Insurance Marketplace primarily to continue to serve members whose income may fluctuate above the eligibility threshold for Medicaid, which is 138% of the federal poverty line. By retaining that member in the Health Insurance Marketplace, if the member's income subsequently declines, we will continuously serve that member in all instances.

- Direct Delivery - Growth and aging of the U.S. population foreshadows an increasing shortage of physicians over the next 15 years. Health care reform is expected to worsen this shortage. We believe the shortage will be felt most acutely among already under-served populations, such as the financially vulnerable families and individuals we serve. While we have no plans to become an organization that fully integrates primary care delivery with our health plans, by leveraging our direct delivery capability on a selective basis we can improve access for our plan members in areas that are most under-served by primary care providers. For instance, in the fourth quarter of 2013, we entered into a 10-year agreement with College Health Enterprises (CHE) to perform certain medical and administrative management services for CHE's hospital in Long Beach, California. Under the agreement, we will assume financial benefit and risk for a number of acute care beds at the hospital. We believe that this arrangement will improve hospital access for our members in the Long Beach, California area, and will also enhance our overall direct delivery strategy. As with any new start-up activity, we may incur losses while we modify various business operations during the initial months of the management services agreement.

Enter New Strategic Markets

We plan to continue to enter new markets through both acquisitions and by building our own start-up operations. We intend to focus our expansion in markets with competitive provider communities, supportive regulatory environments, significant size, and, where practicable, mandated Medicaid managed care enrollment. For instance, in July 2013 we entered into an agreement with Community Health Solutions of America, Inc. (CHS) to acquire the rights to convert certain of CHS' Medicaid members to be covered by South Carolina's full-risk Medicaid managed care program. On January 1, 2014, approximately 137,000 members who were covered under this program became members of our South Carolina health plan under this acquisition. We expect the final purchase price for the acquisition, to be determined by the second quarter of 2014, to amount to approximately $ 63 million.

Deliver Administrative Value to Medicaid Agencies

As Medicaid expenditures increase, we believe that an increasing number of states' and other Medicaid agencies will demand comprehensive solutions that improve both quality and cost-effectiveness. We intend to use our MMIS solution to provide state Medicaid agencies with a flexible and robust solution to their administrative needs. We believe that our MMIS platform, together with our extensive experience in health care management and health plan operations, enables us to offer state and other Medicaid agencies a comprehensive suite of Medicaid-related solutions that meets their needs for quality and for the cost-effective operation of their Medicaid programs. For example, Molina Medicaid Solutions of West Virginia secured a partnership with the U.S. Virgin Islands (USVI) in 2012, under which USVI's Medicaid claims are processed using West Virginia's certified MMIS. On August 1, 2013 the system went live, marking the first MMIS for a U.S. territory, and the first to be shared between two government agencies on a single business processing platform.

Leverage Operational Efficiencies

We intend to leverage the operational efficiencies created by our centralized administrative infrastructure and flexible information systems to earn higher margins on future revenues. We believe our administrative infrastructure has significant expansion capacity, allowing us to integrate new members from expansion within existing markets and enter new markets at lower incremental cost. For example, in preparation for the growth initiatives described above, we augmented our infrastructure. Such preparations have included increased hiring during 2013 to support expansion of product development and pricing, network customization, and marketing; technology enhancements relating to premium billing and collections; and upgraded care management tools and telecommunications.

OUR INDUSTRY

Medicaid

Medicaid was established in 1965 under the U.S. Social Security Act to provide health care and long-term care services and support to low-income Americans. Although jointly funded by federal and state governments, Medicaid is a state-operated and state-implemented program. Subject to federal laws and regulations, states have significant flexibility to structure their own programs in terms of eligibility, benefits, delivery of services, and provider payments. As a result, there are 56 separate Medicaid programs - one for each U.S. state, each U.S. territory, and the District of Columbia.

The federal government guarantees matching funds to states for qualifying Medicaid expenditures based on each state's federal medical assistance percentage (FMAP). A state's FMAP is calculated annually and varies inversely with average personal income in the state. The average FMAP across all states is currently about 57%, and ranges from a federally established FMAP floor of 50% to as high as 74%.

The most common state-administered Medicaid program is the Temporary Assistance for Needy Families program (TANF), which covers primarily low-income mothers and children. Another common state-administered Medicaid program is for aged, blind or disabled (ABD) Medicaid beneficiaries, which covers low-income persons with chronic physical disabilities or behavioral health impairments. ABD beneficiaries represent a growing portion of all Medicaid recipients, and typically use more services because of their critical health issues. Additionally, CHIP is a joint federal and state matching program that provides health care coverage to children whose families earn too much to qualify for Medicaid coverage. States have the option of administering CHIP through their Medicaid programs. As of December 31, 2013, approximately 76% of our members were TANF beneficiaries, 15% were ABD beneficiaries, 7% were CHIP beneficiaries, and 2% were Medicare beneficiaries.

Every state Medicaid program must balance many potentially competing demands, including the need for quality care, adequate provider access, and cost-effectiveness. To improve quality and provide more uniform and cost-effective care, many states have implemented Medicaid managed care programs. These programs seek to improve access to coordinated health care services, including preventive care, and to control health care costs. Under Medicaid managed care programs, a health plan receives capitation payments from the state. The health plan, in turn, arranges for the provision of health care services by contracting with a network of medical providers. The health plan implements care management and care coordination programs that seek to improve both care access and care quality, while controlling costs more effectively.

While many states have embraced Medicaid managed care programs, others continue to operate traditional fee-for-service programs to serve all or part of their Medicaid populations. Under fee-for-service Medicaid programs, health care services are made available to beneficiaries as they seek that care, without the benefit of a coordinated effort to maintain and improve their health. As a consequence, treatment is often postponed until medical conditions become more severe, leading to higher costs and more unfavorable outcomes. Additionally, providers paid on a fee-for-service basis are compensated based upon services they perform, rather than health outcomes, and therefore lack incentives to coordinate preventive care, monitor utilization, and control costs.

Medicare

Medicare is a federal program that provides eligible persons age 65 and over and some disabled persons a variety of hospital, medical insurance, and prescription drug benefits. Medicare is funded by Congress, and administered by CMS. Medicare beneficiaries may enroll in a Medicare Advantage plan, under which managed care plans contract with CMS to provide benefits that are comparable to original Medicare. Such benefits are provided in exchange for a fixed per-member per-month (PMPM) premium payment that varies based on the county in which a member resides, the demographics of the member, and the member's health condition.

Since 2006, Medicare beneficiaries have had the option of selecting a new prescription drug benefit from an existing Medicare Advantage plan. The drug benefit, available to beneficiaries for a monthly premium, is subject to certain cost sharing depending upon the specific benefit design of the selected plan.

Medicaid Management Information Systems

Because Medicaid is a state-administered program, every state must have mechanisms, policies, and procedures in place to perform a large number of crucial functions, including the determination of eligibility and the reimbursement of medical providers for services provided. This requirement exists regardless of whether a state has adopted a fee-for-service or a managed care delivery model. MMIS are used by states to support these administrative activities. The federal government typically reimburses the states for 90% of the costs incurred in the design, development, and implementation of an MMIS and for 75% of the costs incurred in operating an MMIS. Although a small number of states build and operate their own MMIS, a far more typical practice is for states to sub-contract the design, development, implementation, and operation of their MMIS to private parties. Through our Molina Medicaid Solutions segment, we actively participate in this market.

Competition

The Medicaid managed care industry is fragmented, and the competitive landscape is subject to ongoing changes as a result of Health care reform, business consolidations and new strategic alliances. We compete with a large number of national, regional, and local Medicaid service providers, principally on the basis of size, location, and quality of provider network, quality of service, and reputation. Competition can vary considerably from state to state. Below is a general description of our principal competitors for state contracts, members, and providers:

- Multi-Product Managed Care Organizations - National and regional managed care organizations that have Medicaid members in addition to numerous commercial health plan and Medicare members.
- Medicaid HMOs - National and regional managed care organizations that focus principally on providing health care services to Medicaid beneficiaries, many of which operate in only one city or state.
- Prepaid Health Plans - Health plans that provide less comprehensive services on an at-risk basis or that provide benefit packages on a non-risk basis.
- Primary Care Case Management Programs - Programs established by the states through contracts with primary care providers to provide primary care services to Medicaid beneficiaries, as well as to provide limited oversight of other services.

We will continue to face varying levels of competition. Health care reform proposals may cause organizations to enter or exit the market for government sponsored health programs. However, the licensing requirements and bidding and contracting procedures in some states may present partial barriers to entry into our industry.

We compete for government contracts, renewals of those government contracts, members, and providers. State agencies consider many factors in awarding contracts to health plans. Among such factors are the health plan’s provider network, medical management, degree of member satisfaction, timeliness of claims payment, and financial resources. Potential members typically choose a health plan based on a specific provider being a part of the network, the quality of care and services available, accessibility of services, and reputation or name recognition of the health plan. We believe factors that providers consider in deciding whether to contract with a health plan include potential member volume, payment methods, timeliness and accuracy of claims payment, and administrative service capabilities.

Molina Medicaid Solutions competes with large MMIS vendors, such as HP Enterprise Services (formerly known as EDS), ACS (owned by Xerox Corporation), Computer Services Corporation, and CNSI.

BUSINESS OPERATIONS

Our Strengths

From a strategic perspective, we believe our two business segments allow us to participate in an expanding sector of the economy and continue our mission to provide quality health services to financially vulnerable families and individuals covered by government programs. Our approach to our business is based on the following strengths:

Comprehensive Medicaid Services. We offer a complete suite of Medicaid services, ranging from quality care, disease management, cost management, and direct delivery of health care services, to state-level MMIS administration through our Molina Medicaid Solutions segment. We have the ability to draw upon our experience and expertise in each of these areas to enhance the quality of the services we offer in the others. We also believe that we may have opportunities to market to state Medicaid agencies various cost containment and quality practices used by our health plans, such as care management and care coordination, for incorporation into their own fee-for-service Medicaid programs.

Flexible Service Delivery Systems. Our health plan care delivery systems are diverse and readily adaptable to different markets and changing conditions. We arrange health care services with a variety of providers, including independent physicians and medical groups, hospitals, ancillary providers, and our own clinics. Our systems support multiple types of contract models. Our provider networks are well-suited, based on medical specialty, member proximity, and cultural sensitivity, to provide services to our members. We believe that our Molina Medicaid Solutions platform, which is based on commercial off-the-shelf technology, has the flexibility to meet a wide variety of state Medicaid administrative needs in a timely and cost-effective manner.

Proven Expansion and Acquisition Capability. We have successfully replicated the business model of our Health Plans segment through the acquisition of health plans, the start-up development of new operations, and the transition of members from other health plans. The initial acquisitions of our New Mexico, South Carolina and Wisconsin health plans have demonstrated our ability to expand into new states. The establishment of our health plans in Florida, Illinois, Ohio, Texas and Utah reflects our ability to replicate our business model on a start-up basis in new states, while significant contract acquisitions in California, Michigan, New Mexico and Washington have demonstrated our ability to expand our operations within states in which we were already operating.

Administrative Efficiency. Operationally, our two business segments share a common systems platform, which allows for economies of scale and common experience in meeting the needs of state Medicaid programs. We have centralized and standardized various functions and practices to increase administrative efficiency. The steps we have taken include centralizing claims processing and information services onto a single platform and standardization of medical management programs, pharmacy benefits management contracts, and health education programs. In addition, we have designed our administrative and operational infrastructure to be scalable for cost-effective expansion into new and existing markets.

Recognition for Quality of Care. The National Committee for Quality Assurance, or NCQA, has accredited eight of our 11 Medicaid managed care plans. We believe that these objective measures of the quality of the services that we provide will become increasingly important to state Medicaid agencies.

Experience and Expertise. Since the founding of our company in 1980 to serve the Medicaid population in Southern California through a small network of primary care clinics, we have increased our membership to 1.9 million members as of December 31, 2013, expanded our Health Plans segment to 11 states, and added our Molina Medicaid Solutions segment. Our experience over more than 30 years has allowed us to develop strong relationships with the constituents we serve, establish significant expertise as a government contractor, and develop sophisticated disease management, care coordination and health education programs that address the particular health care needs of our members. We also benefit from a thorough understanding of the cultural and linguistic needs of Medicaid populations.

Pricing

Medicaid. Under our Medicaid contracts, state government agencies pay our health plans fixed PMPM rates that vary by state, line of business and demographics; and we arrange, pay for and manage health care services provided to Medicaid beneficiaries. Therefore, our health plans are at risk for the medical costs associated with their members' health care. The rates we receive are subject to change by each state and, in some instances, provide for adjustments for health risk factors. CMS requires these rates to be actuarially sound. Payments to us under each of our Medicaid contracts are subject to the annual appropriation process in the applicable state.

Medicare. Under Medicare Advantage, managed care plans contract with CMS to provide benefits in exchange for a fixed PMPM premium payment that varies based on the county in which a member resides, and is adjusted for demographic and health risk factors. CMS also considers inflation, changes in utilization patterns and average per capita fee-for-service Medicare costs in the calculation of the fixed PMPM premium payment. Our Medicare Advantage contracts also provide a risk-sharing arrangement with CMS to limit our exposure to unfavorable expenses or benefit from favorable expenses.

Amounts payable to us under the Medicare Advantage contracts are subject to annual revision by CMS, and we elect to participate in each Medicare service area or region on an annual basis. Medicare Advantage premiums paid to us are subject to federal government reviews and audits which can result, and have resulted, in retroactive and prospective premium adjustments. Compared with our Medicaid plans, Medicare Advantage contracts generate higher average PMPM revenues and health care costs.

Medical Management

Our experience in medical management extends back to our roots as a provider organization. Primary care physicians are the focal point of the delivery of health care to our members, providing routine and preventive care, coordinating referrals to specialists, and assessing the need for hospital care. This model has proved to be an effective method for coordinating medical care for our members. The underlying challenge we face is to coordinate health care so that our members receive timely and appropriate care from the right provider at the appropriate cost. In support of this goal, and to ensure medical management consistency among our various state health plans, we continuously refine and upgrade our medical management efforts at both the corporate and subsidiary levels.

We seek to ensure quality care for our members on a cost-effective basis through the use of certain key medical management and cost control tools. These tools include utilization management, case and health management, and provider network and contract management.

Utilization Management. We continuously review utilization patterns with the intent to optimize quality of care and ensure that only appropriate services are rendered in the most cost-effective manner. Utilization management, along with our other tools of medical management and cost control, is supported by a centralized corporate medical informatics function which utilizes third-party software and data warehousing tools to convert data into actionable information. We use predictive modeling that supports a proactive case and health management approach both for us and our affiliated physicians.

Case and Health Management. We seek to encourage quality, cost-effective care through a variety of case and health management programs, including disease management programs, educational programs, and pharmacy management programs.

Disease Management Programs. We develop specialized disease management programs that address the particular health care needs of our members. *"motherhood matters!*℠" is a comprehensive program designed to improve pregnancy outcomes and enhance member satisfaction. *"breathe with ease!*" is a multi-disciplinary disease management program that provides health education resources and case management services to assist physicians caring for asthmatic members between the ages of three and 15. *"Healthy Living with Diabetes*" is a diabetes disease management program. *"Heart Healthy Living"* is a cardiovascular disease management program for members who have suffered from congestive heart failure, angina, heart attack, or high blood pressure.

Educational Programs. Educational programs are an important aspect of our approach to health care delivery. These programs are designed to increase awareness of various diseases, conditions, and methods of prevention in a manner that supports our providers while meeting the unique needs of our members. For example, we provide our members with information to guide them through various episodes of care. This information, which is available in several languages, is designed to educate members on the use of primary care physicians, emergency rooms, and nurse call centers.

Pharmacy Management Programs. Our pharmacy management programs focus on physician education regarding appropriate medication utilization and encouraging the use of generic medications. Our pharmacists and medical directors work with our pharmacy benefits manager to maintain a formulary that promotes both improved patient care and generic drug use. We employ full-time pharmacists and pharmacy technicians who work with physicians to educate them on the uses of specific drugs, the implementation of best practices, and the importance of cost-effective care.

Provider Network and Contract Management. The quality, depth, and scope of our provider network are essential if we are to ensure quality, cost-effective care for our members. In partnering with quality, cost-effective providers, we utilize clinical and financial information derived by our medical informatics function, as well as the experience we have gained in serving Medicaid members, to gain insight into the needs of both our members and our providers. As we grow in size, we seek to strengthen our ties with high-quality, cost-effective providers by offering them greater patient volume.

Provider Networks

We arrange health care services for our members through contracts with providers that include independent physicians and groups, hospitals, ancillary providers, and our own clinics. Our network of providers includes primary care physicians, specialists and hospitals. Our strategy is to contract with providers in those geographic areas and medical specialties necessary to meet the needs of our members. We also strive to ensure that our providers have the appropriate cultural and linguistic experience and skills.

Physicians. We contract with both primary care physicians and specialists, many of whom are organized into medical groups or independent practice associations (IPAs). Primary care physicians provide office-based primary care services. Primary care physicians may be paid under capitation or fee-for-service contracts and may receive additional compensation by providing certain preventive services. Our specialists care for patients for a specific episode or condition, usually upon referral from a primary care physician, and are usually compensated on a fee-for-service basis. When we contract with groups of physicians on a capitated basis, we monitor their solvency.

Hospitals. We generally contract with hospitals that have significant experience dealing with the medical needs of the Medicaid population. We reimburse hospitals under a variety of payment methods, including fee-for-service, per diems, diagnostic-related groups (DRGs) capitation, and case rates.

Direct Delivery. The clinics we operate are located in neighborhoods where our members live, and provide us a first-hand opportunity to understand the special needs of our members. The clinics we operate, and the clinics and hospital services we manage, assist us in developing and implementing community education, disease management, and other programs. Direct clinic management experience also enables us to better understand the needs of our contracted providers.

Reinsurance

Our health plans currently have reinsurance agreements with an unaffiliated insurer to cover certain claims. We enter into these contracts to reduce the risk of catastrophic losses which in turn reduce our capital and surplus requirements. We frequently evaluate reinsurance opportunities and review our reinsurance and risk management strategies on a regular basis.

Management Information Systems

All of our health plan information technology systems operate on a single platform. This approach avoids the costs associated with maintaining multiple systems, improves productivity, and enables medical directors to compare costs, identify trends, and exchange best practices among our plans. Our single platform also facilitates our compliance with current and future regulatory requirements.

The software we use is based on client-server technology and is scalable. We believe the software is flexible, easy to use, and allows us to accommodate anticipated enrollment growth and new contracts. The open architecture of the system gives us the ability to transfer data from other systems without the need to write a significant amount of computer code, thereby facilitating the integration of new plans and acquisitions.

We have designed our corporate website with a focus on ease of use and visual appeal. Our website has a secure ePortal which allows providers, members, and trading partners to access individualized data. The ePortal allows the following self-services:

- Provider Self Services - Providers have the ability to access information regarding their members and claims. Key functionalities include "Check Member Eligibility," "View Claim," and "View/Submit Authorizations."

- Member Self Services - Members can access information regarding their personal data, and can perform the following key functionalities: "View Benefits," "Request New ID Card," "Print Temporary ID Card," and "Request Change of Address/PCP."

- File Exchange Services - Various trading partners, such as service partners, providers, vendors, management companies, and individual IPAs, are able to exchange data files (such as those that may be required by federal health care privacy regulations, or any other proprietary format) with us using the file exchange functionality.

Best Practices. We continuously seek to promote best practices. Our approach to quality is broad, encompassing traditional medical management and the improvement of our internal operations. We have staff assigned full-time to the development and implementation of a uniform, efficient, and quality-based medical care delivery model for our health plans. These employees coordinate and implement company-wide programs and strategic initiatives such as preparation of the Healthcare Effectiveness Data and Information Set (HEDIS), and accreditation by the NCQA. We use measures established by the NCQA in credentialing the physicians in our network. We routinely use peer review to assess the quality of care rendered by providers.

Claims Processing. All of our health plans operate on a single managed care platform for claims processing (the QNXT system).

Centralized Management Services. We provide certain centralized medical and administrative services to our health plans pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems, and human resources services. Fees for such services are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the health plan’s ability to comply with minimum capital and other restrictive financial requirements of the states in which they operate.

Compliance. Our health plans have established high standards of ethical conduct. Our compliance programs are modeled after the compliance guidance statements published by the Office of the Inspector General of the U.S. Department of Health and Human Services (HHS). Our uniform approach to compliance makes it easier for our health plans to share information and practices and reduces the potential for compliance errors and any associated liability.

Disaster Recovery. We have established a disaster recovery and business resumption plan, with back-up operating sites, to be deployed in the case of a major disruptive event.

CONTRACTING AND REGULATORY COMPLIANCE

Government Contracts

Medicaid. In all the states in which we operate health plans, we enter into a contract with the state's Medicaid agency to offer managed care benefits to Medicaid-eligible individuals. Some states award contracts to any applicant demonstrating that it meets the state's requirements, while other states engage in a competitive bidding process. In all cases, we must demonstrate to the satisfaction of the state Medicaid program that we are able to meet the state's operational and financial requirements. These requirements are in addition to those required for a license and are targeted to the specific needs of the Medicaid population; for example:

- We must measure provider access and availability in terms of the time needed to reach the doctor's office using public transportation;
- Our quality improvement programs must emphasize member education and outreach and include measures designed to promote utilization of preventive services;
- We must have linkages with schools, city or county health departments, and other community-based providers of health care, to demonstrate our ability to coordinate all of the sources from which our members may receive care;
- We must be able to meet the needs of the disabled and others with special needs;
- Our providers and member service representatives must be able to communicate with members who do not speak English or who are deaf; and
- Our member handbook, newsletters, and other communications must be written at the prescribed reading level, and must be available in languages other than English.

To operate a health plan in a given state, we must apply for and obtain a certificate of authority or license from that state. We are regulated by the state agency with responsibility for the oversight of HMOs which, in most cases, is the state department of insurance. In California, however, the agency with responsibility for the oversight of HMOs is the Department of Managed Health Care. Licensing requirements are the same for us as they are for health plans serving commercial or Medicare members. For example, we must demonstrate that:

- Our provider network is adequate;
- Our quality and utilization management processes comply with state requirements;
- We have adequate procedures in place for responding to member and provider complaints and grievances;
- We can meet requirements for the timely processing of provider claims:
- We can collect and analyze the information needed to manage our quality improvement activities;
- We have the financial resources necessary to pay our anticipated medical care expenses and the infrastructure needed to account for our costs;
- We have the systems required to process enrollment information, to report on care and services provided, and to process claims for payment in a timely fashion; and
- We have the financial resources needed to protect the state, our providers, and our members against the insolvency of one of our health plans.

Our state contracts determine the type and scope of health care services that we arrange for our members. Generally, our contracts require us to arrange for preventive care, office visits, inpatient and outpatient hospital and medical services, and pharmacy benefits. The contracts also detail the requirements for operating in the Medicaid sector, including provisions relating to: eligibility; enrollment and dis-enrollment processes; covered benefits; eligible providers; subcontractors; record-keeping and record retention; periodic financial and informational reporting; quality assurance; marketing; financial standards; timeliness of claims payments; health education, wellness and prevention programs; safeguarding of member information; fraud and abuse detection and reporting; grievance procedures; and organization and administrative systems. A health plan's compliance with these requirements is subject to monitoring by state regulators. A health plan is subject to periodic comprehensive quality assurance evaluation by a third-party reviewing organization and generally by the insurance department of the jurisdiction that licenses the health plan.

The contractual relationship with the state is generally for a period of three to four years and is renewable on an annual or biennial basis at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause upon 30 days to nine months' prior written notice.

Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in obtaining the renewal of their contracts in each state prior to the actual expiration of their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals (RFP), subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, in early 2012 our Missouri health plan was notified that it was not awarded a new contract under that state's RFP, and therefore its contract expired on June 30, 2012.

Medicare. Under annually renewable contracts with CMS, our state health plans offer Medicare Advantage special needs plans which include a mandatory Part D prescription drug benefit. Molina Medicare Options Plus, our trade name for these plans, serves beneficiaries who are dually eligible for both Medicare and Medicaid, such as low-income seniors and people with disabilities. We believe offering these Medicare plans is consistent with our historical mission of serving low-income and medically under-served families and individuals. We employ sales personnel, and engage independent brokers, agents and consults to enroll new Molina Medicare Options Plus members. None of our health plans operates a Medicare Advantage private fee-for-service plan.

Total enrollment in our Medicare Advantage plans as of December 31, 2013 was approximately 39,000 members. For the year ended December 31, 2013, Medicare premium revenues in the aggregate represented approximately 9% of our total premium revenues.

Federal regulations place prohibitions and limitations on certain sales and marketing activities of Medicare Advantage plans. Among other things, Medicare Advantage plans are not permitted to make unsolicited outbound calls to potential members or engage in other forms of unsolicited contact, establish appointments without documented consent from potential members, or conduct sales events in certain provider-based settings. Additionally, there are certain restrictions on agent and broker compensation.

Molina Medicaid Solutions. We continually monitor the status of various states' legacy MMIS capabilities and contracts to determine whether Molina Medicaid Solutions' value proposition and core strengths will address a state's MMIS goals. Once an RFP with a Medicaid agency is won, our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we deliver extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the initial terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. The terms of our other Molina Medicaid Solutions contracts - which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) - are shorter in duration than our Idaho and Maine contracts.

The federal government typically reimburses the states for 90% of the costs incurred in the design, development, and implementation of an MMIS and for 75% of the costs incurred in operating a certified MMIS. Federal certification increases the share of the claims processing costs the federal government will pay for monthly operations. With an uncertified system, the federal government contributes approximately 50% of claims processing costs, with the state paying the other half. With a certified system, the federal government pays 75% of costs, reducing the state's share.

Regulatory Compliance

Our health plans are highly regulated by both state and federal government agencies. Regulation of managed care products and health care services varies from jurisdiction to jurisdiction, and changes in applicable laws and rules occur frequently. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Such agencies have become increasingly active in recent years in their review and scrutiny of health insurers and managed care organizations, including those operating in the Medicaid and Medicare programs.

Health Care Federal Excise Tax. One notable provision of the ACA is an excise tax or annual fee that applies to most health plans, including commercial health plans and Medicaid managed care plans like Molina Healthcare. While characterized as a "fee" in the text of the ACA, the intent of Congress was to impose a broad-based health insurance industry excise tax, with the understanding that the tax could be passed on to consumers, most likely through higher commercial insurance premiums.

However, because Medicaid is a government funded program, Medicaid health plans have no alternative but to look to their respective state partners for payment to offset the impact of this tax. In Medicaid, capitation rates paid to managed care plans are required to be developed using principles of actuarial soundness. Actuarial soundness requires that the full costs of doing business, including the costs of both federal and state taxes, be considered and factored into the applicable payment to the health plan. Thus, for Medicaid managed care plans like Molina Healthcare, the excise tax should be included in the plans' capitated rates. However, because of the novelty of this new tax, states have been slow to factor the tax into the premiums paid to us. Moreover, because the tax will be based on a health plan's market share as applied to a total excise tax base of $8 billion in 2014 (and rising substantially thereafter), there is uncertainty regarding the precise amount of the tax that will be assessed on us.

For further discussion of the risks and uncertainties relating to this excise tax, refer to Part II, Item 7 of this Form 10-K, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the subheading "Liquidity and Capital Resources -- Financial Condition."

States' Risk-Based Capital Requirements. Our health plans are required to file quarterly and annual reports of their operating results with the appropriate state regulatory agencies. These reports are accessible for public viewing. Each health plan undergoes periodic examinations and reviews by the state in which it operates. The health plans generally must obtain approval from the state before declaring dividends in excess of certain thresholds. Each health plan must maintain its net worth at an amount determined by statute or regulation. The minimum statutory net worth requirements differ by state, and are generally based on statutory minimum risk-based capital (RBC) requirements. The RBC requirements are based on guidelines established by the National Association of Insurance Commissioners (NAIC) and are administered by the states. All of our state health plans are subject to RBC requirements, except California and Florida. Any acquisition of another plan's members or its state contracts must also be approved by the state, and our ability to invest in certain financial securities may be prescribed by statute. For further information regarding RBC requirements, refer to Part II, Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 20, "Commitments and Contingencies."

In addition, we are also regulated by each state's department of health services or the equivalent agency charged with oversight of Medicaid and CHIP. These agencies typically require demonstration of the same capabilities mentioned above and perform periodic audits of performance, usually annually.

HIPAA. In 1996, Congress enacted the Health Insurance Portability and Accountability Act (HIPAA). All health plans are subject to HIPAA, including ours. HIPAA generally requires health plans to:

- Establish the capability to receive and transmit electronically certain administrative health care transactions, like claims payments, in a standardized format;
- Afford privacy to patient health information; and
- Protect the privacy of patient health information through physical and electronic security measures.

Health care reform created additional tools for fraud prevention, including increased oversight of providers and suppliers participating or enrolling in Medicaid, CHIP, and Medicare. Those enhancements included mandatory licensure for all providers, and site visits, fingerprinting, and criminal background checks for higher risk providers.

The Health Information Technology for Economic and Clinical Health Act (HITECH Act), a part of the American Recovery and Reinvestment Act of 2009, or ARRA, modified certain provisions of HIPAA by, among other things, extending the privacy and security provisions to business associates, mandating new regulations around electronic medical records, expanding enforcement mechanisms, allowing the state Attorneys General to bring enforcement actions, and increasing penalties for violations. HHS, as required by the HITECH Act, has issued interim final rules that set forth the breach notification obligations applicable to covered entities and their business associates, or the HHS Breach Notification Rule. The various requirements of the HITECH Act and the HHS Breach Notification Rule have different compliance dates, some of which have passed and some of which will occur in the future. With respect to those requirements whose compliance dates have passed, we believe that we are in compliance with these provisions. With respect to those requirements whose compliance dates are in the future, we are reviewing our current practices and identifying those which may be impacted by upcoming regulations. It is our intention to implement these new requirements on or before the applicable compliance dates.

Fraud and Abuse Laws. Our operations are subject to various state and federal health care laws commonly referred to as "fraud and abuse" laws. Fraud and abuse prohibitions encompass a wide range of activities, including kickbacks for referral of members, billing for unnecessary medical services, improper marketing, and violations of patient privacy rights. These fraud and abuse laws include the federal False Claims Act which prohibits the knowing filing of a false claim or the knowing use of false statements to obtain payment from the federal government. Many states have false claim act statutes that closely resemble the federal False Claims Act. If an entity is determined to have violated the federal False Claims Act, it must pay three times the actual damages sustained by the government, plus mandatory civil penalties up to fifty thousand dollars for each separate false claim. Suits filed under the Federal False Claims Act, known as *"qui tam"* actions, can be brought by any individual on behalf of the government and such individuals (known as "relators" or, more commonly, as "whistleblowers") may share in any amounts paid by the entity to the government in fines or settlement. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines or be excluded from the Medicaid, Medicare or other state or Federal health care programs as a result of an investigation arising out of such action. In addition, the Deficit Reduction Act of 2005 (DRA), encourages states to enact state-versions of the federal False Claims Act that establish liability to the state for false and fraudulent Medicaid claims and that provide for, among other things, claims to be filed by *qui tam* relators.

Companies involved in public health care programs such as Medicaid are often the subject of fraud and abuse investigations. The regulations and contractual requirements applicable to participants in these public sector programs are complex and subject to change. Violations of certain fraud and abuse laws applicable to us could result in civil monetary penalties, criminal fines and imprisonment, and/or exclusion from participation in Medicaid, Medicare, other federal health care programs and federally funded state health programs.

Federal and state governments have made investigating and prosecuting health care fraud and abuse a priority. Although we believe that our compliance efforts are adequate, we will continue to devote significant resources to support our compliance efforts.

OTHER INFORMATION

Intellectual Property

We have registered and maintain various service marks, trademarks and trade names that we use in our businesses, including marks and names incorporating the "Molina" or "Molina Healthcare" phrase, and from time to time we apply for additional registrations of such marks. We utilize these and other marks and names in connection with the marketing and identification of products and services. We believe such marks and names are valuable and material to our marketing efforts.

Employees

As of December 31, 2013, we had approximately 8,200 employees. Our employee base is multicultural and reflects the diverse Medicaid and Medicare membership we serve. We believe we have good relations with our employees. None of our employees is represented by a union.

Available Information

Our principal executive offices are located at 200 Oceangate, Suite 100, Long Beach, California 90802, and our telephone number is (562) 435-3666.

You can access our website at *www.molinahealthcare.com* to learn more about our Company. From that site, you can download and print copies of our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, along with amendments to those reports. You can also download our Corporate Governance Guidelines, Board of Directors committee charters, and Code of Business Conduct and Ethics from our website. We make periodic reports and amendments available, free of charge, as soon as reasonably practicable after we file or furnish these reports to the SEC. We will also provide a copy of any of our corporate governance policies published on our website free of charge, upon request. To request a copy of any of these documents, please submit your request to: Molina Healthcare, Inc., 200 Oceangate, Suite 100, Long Beach, California 90802, Attn: Investor Relations. Information on or linked to our website is neither part of nor incorporated by reference into this Annual Report on Form 10-K or any other SEC filings.

Executive Officers of the Registrant

The following sets forth certain information regarding our executive officers, including the business experience of each executive officer during the past five years:

Name	Age	Position
J. Mario Molina	5 5	President and Chief Executive Officer
John C. Molina, J.D.	49	Chief Financial Officer
Terry P. Bayer	63	Chief Operating Officer
Joseph W. White	5 5	Chief Accounting Officer
Jeff D. Barlow	5 1	Chief Legal Officer and Corporate Secretary

Dr. Molina has served as President and Chief Executive Officer since succeeding his father and company founder, Dr. C. David Molina, in 1996. He has also served as Chairman of the Board of Directors since 1996. Dr. Molina is the brother of John C. Molina.

Mr. Molina has served as Chief Financial Officer since 1995. He also has served as a member of the Board of Directors since 1994. Mr. Molina is the brother of Dr. J. Mario Molina.

Ms. Bayer has served as Chief Operating Officer since 2005.

Mr. White has served as Chief Accounting Officer since 2007.

Mr. Barlow has served as Chief Legal Officer and Corporate Secretary since 2010. From 2004 to 2010, Mr. Barlow served as Vice President, Assistant Secretary, and Assistant General Counsel of Molina Healthcare.

Item 1A: Risk Factors

RISK FACTORS

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

This Annual Report on Form 10-K and the documents we incorporate by reference in this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Other than statements of historical fact, all statements that we include in this report and in the documents we incorporate by reference may be deemed to be forward-looking statements for purposes of the Securities Act and the Exchange Act. Such forward-looking statements may be identified by words such as "anticipates," "believes," "could," "estimates," "expects," "guidance," "intends," "may," "outlook," "plans," "projects," "seeks," "will," or similar words or expressions.

Investing in our securities involves a high degree of risk. Before making an investment decision, you should carefully read and consider the following risk factors, as well as the other information we include or incorporate by reference in this report and the information in the other reports we file with the U.S. Securities Exchange Commission, or SEC. Such risk factors should be considered not only with regard to the information contained in this annual report, but also with regard to the information and statements in the other periodic or current reports we file with the SEC, as well as our press releases, presentations to securities analysts or investors, or other communications made by or with the approval of one of our executive officers. No assurance can be given that we will actually achieve the results contemplated or disclosed in our forward-looking statements. Such statements may turn out to be wrong due to the inherent uncertainties associated with future events. Accordingly, you should not place undue reliance on our forward-looking statements, which reflect management's analyses, judgments, beliefs, or expectations only as of the date they are made.

If any of the events described in the following risk factors actually occur, our business, results of operations, financial condition, cash flows, or prospects could be materially adversely affected. The risks and uncertainties described below are those that we currently believe may materially affect us. Additional risks and uncertainties not currently known to us or that we currently deem immaterial may also affect our business and operations. As such, you should not consider this list to be a complete statement of all potential risks or uncertainties. Except to the extent otherwise required by federal securities laws, we do not undertake to address or update forward-looking statements in future filings or communications regarding our business or operating results, and do not undertake to address how any of these factors may have caused results to differ from discussions or information contained in previous filings or communications.

Risks Related to Our Health Plans Segment

Numerous risks associated with the Affordable Care Act and its implementation could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

In March 2010, President Obama signed both the Patient Protection and Affordable Care Act and the Health Care and Education Affordability Reconciliation Act (collectively, the Affordable Care Act, or ACA). The ACA enacts comprehensive changes to the United States health care system, elements of which will be phased in at various stages over the next several years. However, the most significant changes effected by the ACA were implemented as of January 1, 2014. There are a multitude of risks associated with the scope of change in the health care system represented by the ACA, including, but not limited to, the following:

- *Risks associated with the health care federal excise tax* . One notable provision of the ACA is an excise tax or annual fee that applies to most health plans, including commercial health plans and Medicaid managed care plans like Molina Healthcare. While characterized as a "fee" in the text of the ACA, the intent of Congress was to impose a broad-based health insurance industry excise tax, with the understanding that the tax could be passed on to consumers, most likely through higher commercial insurance premiums. However, because Medicaid is a government funded program, Medicaid health plans have no alternative but to look to their respective state partners for payment to offset the impact of this tax. In Medicaid, capitation rates paid to managed care plans are required to be developed using principles of actuarial soundness. Actuarial soundness requires that the full costs of doing business, including the costs of both federal and state taxes, be considered and factored into the applicable payment to the health plan. Thus, for Medicaid managed care plans like Molina Healthcare, the excise tax should be included in the plans' capitated rates. However, because of the novelty of this new tax, states have been slow to factor the tax into the premiums paid to us. Moreover, because the tax will be based on a health plan's market share as applied to a total excise tax base of $8 billion in 2014 (and rising substantially thereafter), there is uncertainty regarding the precise amount of the tax that will be assessed on us. While we and others in the health plan industry are working with Congress to delay and/or repeal the tax on Medicaid plans, we are also working with our state partners to obtain reimbursement for the full economic impact of the excise tax. However, state budget constraints, inaccurate actuarial calculations, political opposition to the ACA, inadequate federal oversight of actuarial soundness, and market competition, could result in a failure to receive

reimbursement for the full economic impact of the tax. Currently, we project that the excise tax assessed on us in August 2014 will be approximately $85 million. Because this amount is not deductible for income tax purposes, our net income will be reduced by the full amount of the assessment. For example, based on our total net income for fiscal years 2013 and 2012 of approximately $53 million and $10 million, respectively, the excise tax could exceed the entire amount of our earnings. Our efforts at obtaining relief from the tax are complicated by the fact that any amounts paid to us by the states in reimbursement of the excise tax must include a gross up for the absence of tax deductibility of the excise tax and applicable state premium taxes; and the amount paid for the gross up will itself be subject to the excise tax, its related non-deductibility and applicable state premium taxes. In other words, when states reimburse us for the amount of the excise tax, that reimbursement will itself be subject to income tax, the excise tax, and applicable state premium taxes. If our estimate of an $85 million excise tax liability in 2014 is correct, and if our estimate of the amount allocable to Medicaid of $79 million is correct, states will need to pay us an incremental amount of approximately $128 million in revenue during 2014 to account for the excise tax and the absence of its tax deductibility. On a percentage basis, we anticipate that states will need to increase our Medicaid premium rates by approximately 1.4% to reimburse us for the excise tax we will owe (based upon our estimated pro rata share of total industry revenue in 2013). In addition, we estimate that states will need to increase our Medicaid premium rates by a further 0.9% to make us whole for the lack of tax deductibility of the excise tax, representing an estimated overall premium rate increase of approximately 2.3%. As of February 26, 2014, we have contractual commitments from the states of Washington and Wisconsin to reimburse us by way of a lump sum payment for the full economic impact of the excise tax in their respective states. While all of our remaining states have acknowledged the actuarial requirement that they reimburse us for the federal excise tax, and its related income tax effects, no state other than Washington and Wisconsin has contractually committed to do so. Furthermore, states which have acknowledged the requirement to include the impact of the tax in our premium payments may argue that current premium rates will remain actuarially sound even if no adjustment is made to those rates. The tax is required to be paid in full by September 30, 2014. We are continuing to work with our states to address the issue of fully grossed up reimbursement. If we are unable to obtain either premium increases or direct reimbursements to offset the impact of the tax on a fully grossed up basis, our business, financial condition, cash flows or results of operations could be materially adversely affected.

- *Risks associated with the duals expansion*. Nine million low-income elderly and disabled people are covered under both the Medicare and Medicaid programs. These beneficiaries, often called “dual eligibles,” are more likely than other Medicare beneficiaries to be frail, live with multiple chronic conditions, and have functional and cognitive impairments. Medicare is their primary source of health insurance coverage, as it is for the nearly 50 million elderly and under-65 disabled beneficiaries in 2012. Medicaid supplements Medicare by paying for services not covered by Medicare, such as dental care and long-term care services and support, and by helping to cover Medicare’s premiums and cost-sharing requirements. Together, these two programs help to shield very low-income Medicare beneficiaries from potentially unaffordable out-of-pocket medical and long-term care costs. Policymakers at the federal and state level are increasingly developing initiatives for dual eligibles, both to improve the coordination of their care, and to reduce spending. The Centers for Medicare and Medicaid Services (CMS) has implemented several demonstration projects designed to improve the coordination of care for dual eligibles and to reduce Medicare and Medicaid spending. These demonstrations include issuing contracts to 15 states to design a program to integrate Medicare and Medicaid services for dual eligibles in the relevant state. Our health plans in California, Illinois, Ohio, Michigan, South Carolina and Texas intend to take part in the duals demonstrations in those states. Our California health plan intends to serve duals in Riverside, San Bernardino, and San Diego counties beginning in April 2014, and in Los Angeles County no sooner than July 2014. Our Illinois health plan will begin serving duals in March 2014. Our Ohio health plan will serve duals in three regions in Ohio, beginning with the Southwest region in June 2014, and the Central and Central West regions in July 2014. Our Michigan health plan will serve duals in Wayne and Macomb counties beginning in October 2014. Our South Carolina health plan will serve duals starting in July 2014. Finally, our Texas health plan is expected to begin serving duals in January 2015.

  There are numerous risks associated with the initial implementation of a new program, with a health plan’s expansion into a new service area, and with the provision of medical services to a new population which has not previously been in managed care. One such risk is the development of actuarially sound rates. Because there is limited historical information on which to develop rates, certain assumptions are required to be made which may subsequently prove to have been inaccurate. Rates of utilization could be significantly higher than had been projected, or the assumptions of policymakers about the amount of savings that could be achieved through the use of utilization management in managed care could be flawed. Moreover, because of our lack of actuarial experience for that program, region, or population, our reserve levels may be set at an inadequate level. For instance, these problems arose at our Texas health plan in the second quarter of 2012, leading to extremely elevated medical care costs and substantial losses at the health plan. All of these risks are presented in the implementation of the duals demonstration programs. In the event these risks materialize at one or more of our health plans, the negative results of the health plan or plans could adversely affect our business, financial condition, cash flows, or results of operations.

- *Risks associated with the Medicaid expansion* . Among other things, as of January 1, 2014, in the states that elect to participate, the ACA provides for the expansion of the Medicaid program to provide eligibility to nearly all low-income people under age 65 with incomes at or below 138 percent of the federal poverty line. As a result, millions of low-income adults without children who previously could not qualify for coverage, as well as many low-income parents and, in some instances, children covered through CHIP, are now eligible for Medicaid. As of December 31, 2013, among the states where we currently operate our health plans, the states of California, Illinois, Michigan, New Mexico, Ohio, and Washington have indicated that they intend to participate in the Medicaid expansion; and the states of Florida, South Carolina, Texas, Utah, and Wisconsin have indicated that they do not intend to participate in the expansion. In those states that participate in the expansion, our Medicaid membership is likely to grow appreciably. The new enrollees in our health plans will represent a population that is different from the population of Medicaid enrollees we have historically managed. In addition, such enrollees may be unfamiliar with managed care, and may have substantial pent-up demand for medical services that could result in greater than anticipated rates of utilization. All of the risk factors described above with regard to the duals demonstration programs apply equally to Medicaid expansion.

- *Risks associated with health insurance marketplaces* . Under the ACA, online health insurance marketplaces are organized on a state-by-state basis, although in many instances a state insurance marketplace is operated by the federal government. In the insurance marketplace, individuals and groups can purchase health insurance that is federally subsidized up to 400% of the applicable federal poverty level. We will be participating as a qualified health plan, or QHP, in the insurance marketplaces in nine of the 11 states in which we currently operate our health plans (with Illinois and South Carolina being the sole exceptions). Our principal focus in participating in the marketplace is to capture the “churn” in membership that may result from a Medicaid member’s income rising above the 138% level of the federal poverty line. By retaining that member in our marketplace plan or QHP, if the member’s income subsequently declines, we will continuously serve that same member in all instances and not “lose” the member to another health plan. All of the risk factors described above with regard to the duals demonstration programs apply equally to our participation in the insurance marketplaces.

- *Risk associated with implementing regulations* . There are many parts of the ACA that require further guidance in the form of regulations. Due to the breadth and complexity of the ACA, the lack of implementing regulations and interpretive guidance, and the phased nature of the ACA’s implementation, the overall impact of the ACA on our business and on the health industry in general over the coming years is difficult to predict and not yet fully known, and implementing regulations could contain provisions that have a material adverse effect on our business, financial condition, cash flows, or results of operations.

The exorbitant cost of the recently FDA-approved drug, Sovaldi, could have a material adverse effect on the level of our medical costs and our results of operations.

On December 6, 2013, the Food and Drug Administration, or FDA, approved for the treatment of hepatitis C the Gilead drug, Sovaldi (generic name, sofosbuvir). Because Sovaldi was approved for use after 2014 rates had already been calculated, the cost of claims for the treatment of hepatitis C using Sovaldi were not factored into the calculation of actuarially sound rates. Since Gilead has priced a standard twelve-week course of treatment with Sovaldi at approximately $84,000, the omission of that cost in our 2014 rates is a significant issue.

This issue is made worse by the relatively high incidence of hepatitis C, particularly in the Medicaid population. According to the CDC, hepatitis C is the most common chronic blood borne infection in the United States, with an estimated 3.2 million persons chronically infected. However, the actual incidence of hepatitis C may be significantly higher because of inadequate screening for the disease. In June 2013, the U.S. Public Health Services Task Force (USPSTF) released a new recommendation for hepatitis C screening. As a result, a number of individuals who were not previously aware that they had hepatitis C will likely learn of their infection, and seek treatment. Moreover, many of the newly insured under the Affordable Care Act Medicaid expansion have not received any health care treatment in the past because they lacked health insurance or were unable to pay for treatment. Finally, anecdotal data suggests that a number of medical providers have delayed initiating any alternative treatment regimen for their hepatitis C patients because they knew Sovaldi would soon become available. Thus, for all of these reasons, there is likely a significant pent-up demand for hepatitis C treatment using Sovaldi, and the number of Medicaid beneficiaries seeking such treatment could be substantial.

Molina is actively seeking guidance from state Medicaid agencies clarifying that it will not be expected to pay for the costs associated with Sovaldi coverage, or, in the event it is required to do so, that Molina will receive appropriate and actuarially sound reimbursement. In the event Molina is required to bear such costs without an appropriate rate adjustment or other reimbursement mechanism, our business, financial condition, cash flows, or results of operations could be adversely affected.

Our profitability depends on our ability to accurately predict and effectively manage our medical care costs.

Our profitability depends to a significant degree on our ability to accurately predict and effectively manage our medical care costs. Historically, our medical care cost ratio, meaning our medical care costs as a percentage of our premium revenue net of premium tax, has fluctuated substantially, and has also varied across our state health plans. Because the premium payments we receive are generally fixed in advance and we operate with a narrow profit margin, relatively small changes in our medical care cost ratio can create significant changes in our overall financial results. For example, if our overall medical care ratio, continuing operations, for the year ended December 31, 2013 of 87.1% had been one percentage point higher, or 88.1%, our net income from continuing operations for the year ended December 31, 2013 would have been approximately $0.12 per diluted share rather than our actual income from continuing operations of $0.96 per diluted share, a decrease of approximately 87%.

Factors that may affect our medical care costs include the level of utilization of health care services, unexpected patterns in the annual flu season, increases in hospital costs, an increased incidence or acuity of high dollar claims related to catastrophic illnesses or medical conditions such as hemophilia for which we do not have adequate reinsurance coverage, increased maternity costs, payment rates that are not actuarially sound, changes in state eligibility certification methodologies, relatively low levels of hospital and specialty provider competition in certain geographic areas, increases in the cost of pharmaceutical products and services, changes in health care regulations and practices, epidemics, new medical technologies, and other various external factors. Many of these factors are beyond our control and could reduce our ability to accurately predict and effectively manage the costs of providing health care services. The inability to forecast and manage our medical care costs or to establish and maintain a satisfactory medical care cost ratio, either with respect to a particular state health plan or across the consolidated entity, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

State and federal budget deficits may result in Medicaid, CHIP, or Medicare funding cuts which could reduce our revenues and profit margins.

Nearly all of our premium revenues come from the joint federal and state funding of the Medicaid and CHIP programs. Due to high unemployment levels, Medicaid enrollment levels and Medicaid costs remain elevated at the same time that state budgets are suffering from significant fiscal strain. Because Medicaid is one of the largest expenditures in every state budget, and one of the fastest-growing, it is a prime target for cost-containment efforts. All of the states in which we currently operate our health plans are currently facing significant budgetary pressures. These budgetary pressures may result in unexpected Medicaid, CHIP, or Medicare rate cuts which could reduce our revenues and profit margins. Moreover, some federal deficit reduction proposals would fundamentally change the structure and financing of the Medicaid program. Recently, various proposals have been advanced to reduce annual federal deficits and to slow the increase in the national debt. A number of these proposals include both tax increases and spending reductions in discretionary programs and mandatory programs, such as Social Security, Medicare, and Medicaid.

In addition, potential reductions in Medicare and Medicaid spending have been included in discussions in Congress regarding deficit reduction measures. The Budget Control Act of 2011 provides that Medicare payments may be reduced by no more than 2%. We are unable to determine how any future Congressional spending cuts will affect Medicare and Medicaid reimbursement. There likely will continue to be legislative and regulatory proposals at the federal and state levels directed at containing or lowering the cost of health care that, if adopted, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

A failure to accurately estimate incurred but not reported medical care costs may negatively impact our results of operations.

Because of the time lag between when medical services are actually rendered by our providers and when we receive, process, and pay a claim for those medical services, we must continually estimate our medical claims liability at particular points in time, and establish claims reserves related to such estimates. Our estimated reserves for such “incurred but not paid” (IBNP) medical care costs are based on numerous assumptions. We estimate our medical claims liabilities using actuarial methods based on historical data adjusted for claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our ability to accurately estimate claims for our newer lines of business or populations, such as with respect to duals, Medicaid expansion members, or aged, blind or disabled Medicaid members, is impacted by the more limited experience we have had with those populations. With regard to the new previously uninsured Medicaid members we began to enroll commencing January 1, 2014 due to the Medicaid expansion under the ACA, certain new members may be disproportionately costly due to high utilization in their first several months of Medicaid membership as a result of their previously having been uninsured and therefore not seeking, or deferring, medical treatment.

The IBNP estimation methods we use and the resulting reserves that we establish are reviewed and updated, and adjustments, if deemed necessary, are reflected in the current period. Given the numerous uncertainties inherent in such estimates, our actual claims liabilities for a particular quarter or other period could differ significantly from the amounts estimated and reserved for that quarter or period. Our actual claims liabilities have varied and will continue to vary from our estimates, particularly in times of significant changes in utilization, medical cost trends, and populations and markets served.

If our actual liability for claims payments is higher than estimated, our earnings per share in any particular quarter or annual period could be negatively affected. Our estimates of IBNP may be inadequate in the future, which would negatively affect our results of operations for the relevant time period. Furthermore, if we are unable to accurately estimate IBNP, our ability to take timely corrective actions may be limited, further exacerbating the extent of the negative impact on our results.

An increased incidence of flu in one or more of the states in which we operate a health plan could significantly increase utilization rates and medical costs.

Our results during 2009 were significantly impacted by the widespread incidence of the H1N1 flu in the states in which we operated our health plans. We seek to set our IBNP reserves appropriately to account for seasonal spikes in the incidence of the flu. However, if the actual utilization rates of our members are higher than we had anticipated, our results in the relevant periods could be materially and adversely affected.

If the responsive bids of our health plans for new or renewed Medicaid contracts are not successful, or if our government contracts are terminated or are not renewed, our premium revenues could be materially reduced and our operating results could be negatively impacted.

Our government contracts may be subject to periodic competitive bidding. In such process, our health plans may face competition as other plans, many with greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. In the event the responsive bid of one or more of our health plans is not successful, we will lose our Medicaid contract in the applicable state or states, and our premium revenues could be materially reduced as a result. Alternatively, even if our responsive bids are successful, the bids may be based upon assumptions regarding enrollment, utilization, medical costs, or other factors which could result in the Medicaid contract being less profitable than we had expected.

In addition, all of our contracts may be terminated for cause if we breach a material provision of the contract or violate relevant laws or regulations. Our contracts with the states are also subject to cancellation by the state in the event of the unavailability of state or federal funding. In some jurisdictions, such cancellation may be immediate and in other jurisdictions a notice period is required. Further, most of our contracts are terminable without cause.

Our government contracts generally run for periods of one to four years, and may be successively extended by amendment for additional periods if the relevant state agency so elects. Our current contracts expire on various dates over the next several years. Although our health plans have generally been successful in obtaining the renewal and/or extension of their state contracts, there can be no guarantee that any of our state government contracts will be renewed or extended, as shown by the loss of our Missouri contract in 2012 in connection with an unsuccessful RFP bid. If we are unable to renew, successfully re-bid, or compete for any of our government contracts, or if any of our contracts are terminated or renewed on less favorable terms, our business, financial condition, cash flows, or results of operations could be adversely affected.

States may not adequately compensate us for the value of drug rebates that were previously earned by us but that are now collectible by the states.

ACA includes certain provisions that change the way drug rebates are handled for drug claims filled by Medicaid managed care plans. Retroactive to March 23, 2010, state Medicaid programs are now required to collect federal rebates on all Medicaid-covered outpatient drugs dispensed or administered to Medicaid managed care enrollees (excluding certain drugs that are already discounted), and pharmaceutical manufacturers are required to pay specified rebates directly to the state Medicaid programs for those claims. This has impacted the level of rebates received by managed care plans from the manufacturers for Medicaid managed care enrollees. Many manufacturers have renegotiated or discontinued their rebate contracts with Medicaid managed care plans and pharmacy benefits managers to offset these new rebates paid directly to state Medicaid programs. As a result, the drug rebate amounts paid to managed care plans like ours continue to remain at levels that are much lower than prior to ACA implementation. There are provisions in the ACA that require rates paid to Medicaid managed care plans to be actuarially sound in regard to drug rebates. Although we will be pursuing rate increases with state agencies to make us whole for the rebate amounts lost, there can be no assurances that the premium increases we may receive, if any, will be adequate to offset the amount of the lost rebates. If such premium increases prove to be inadequate, our business, financial condition, cash flows, or results of operations could be adversely affected.

We derive our premium revenues from a relatively small number of state health plans.

We currently derive our premium revenues from 11 state health plans. If we are unable to continue to operate in any of those 11 states, or if our current operations in any portion of the states we are in are significantly curtailed, our revenues could decrease materially. Our reliance on operations in a limited number of states could cause our revenue and profitability to change suddenly and unexpectedly, depending on an abrupt loss of membership, significant rate reductions, a loss of a material contract, legislative actions, changes in Medicaid eligibility methodologies, catastrophic claims, an epidemic, an unexpected increase in utilization, general economic conditions, and similar factors in those states. Our inability to continue to operate in any of the states in which we currently operate, or a significant change in the nature of our existing operations, could adversely affect our business, financial condition, cash flows, or results of operations.

There are performance risks and other risks associated with certain provisions in the state Medicaid contracts of several of our health plans.

The state contracts of our New Mexico, Ohio, Texas, and Wisconsin health plans contain provisions pertaining to at-risk premiums that require us to meet certain quality performance measures to earn all of our contract revenues in those states. In the event we are unsuccessful in achieving the stated performance measure, the health plan will be unable to recognize the revenue associated with that measure. Any failure of our health plans to satisfy one of these performance measure provisions could have a material adverse effect on our business, financial condition, cash flows or results of operations. In addition, the state contracts of our California, Florida, New Mexico, Texas, and Washington health plans, and our contract with CMS, contain provisions pertaining to medical cost floors, administrative cost and profit ceilings, and profit-sharing arrangements. These provisions are subject to interpretation and application by our health plans. In the event the applicable state government agency disagrees with our health plan's interpretation or application of the sometimes complicated contract provisions at issue, the health plan could be required to adjust the amount of its obligations under these provisions and/or make a payment or payments to the state. Any interpretation or application of these provisions at variance with our health plan's interpretation or inconsistent with our revenue recognition accounting treatment could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Failure to attain profitability in any new start-up operations could negatively affect our results of operations.

Start-up costs associated with a new business can be substantial. For example, to obtain a certificate of authority to operate as a health maintenance organization in most jurisdictions, we must first establish a provider network, have infrastructure and required systems in place, and demonstrate our ability to obtain a state contract and process claims. Often, we are also required to contribute significant capital to fund mandated net worth requirements, performance bonds or escrows, or contingency guaranties. If we are unsuccessful in obtaining the certificate of authority, winning the bid to provide services, or attracting members in sufficient numbers to cover our costs, any new business of ours would fail. We also could be required by the state to continue to provide services for some period of time without sufficient revenue to cover our ongoing costs or to recover our significant start-up costs.

Even if we are successful in establishing a profitable health plan in a new state, increasing membership, revenues, and medical costs will trigger increased mandated net worth requirements which could substantially exceed the net income generated by the health plan. Rapid growth in an existing state will also result in increased net worth requirements. In such circumstances, we may not be able to fund on a timely basis or at all the increased net worth requirements with our available cash resources. The expenses associated with starting up a health plan in a new state or expanding a health plan in an existing state could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Receipt of inadequate or significantly delayed premiums could negatively affect our business, financial condition, cash flows, or results of operations.

Our premium revenues consist of fixed monthly payments per member, and supplemental payments for other services such as maternity deliveries. These premiums are fixed by contract, and we are obligated during the contract periods to provide health care services as established by the state governments. We use a large portion of our revenues to pay the costs of health care services delivered to our members. If premiums do not increase when expenses related to medical services rise, our medical margins will be compressed, and our earnings will be negatively affected. A state could increase hospital or other provider rates without making a commensurate increase in the rates paid to us, or could lower our rates without making a commensurate reduction in the rates paid to hospitals or other providers. In addition, if the actuarial assumptions made by a state in implementing a rate or benefit change are incorrect or are at variance with the particular utilization patterns of the members of one of our health plans, our medical margins could be reduced. Any of these rate adjustments in one or more of the states in which we operate could have a material adverse effect our business, financial condition, cash flows, or results of operations.

Furthermore, a state undergoing a budget crisis may significantly delay the premiums paid to one of our health plans. For instance, during 2010, due to a prolonged budget impasse, some of the monthly premium payments made by the state of California to our California health plan were several months late. Any significant delay in the monthly payment of premiums to

any of our health plans could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

If we are required to return any alleged overpayments to the Washington Health Care Authority, our results of operations may be adversely affected.

The Washington Health Care Authority (HCA) has communicated to our Washington health plan that it believes it has erroneously overpaid the plan with regard to certain claims, including claims for psychotropic drugs, and claims for health plan members under the Washington Community Options Program Entry System (COPES). HCA claims the alleged overpayments date back to the July 1, 2012 start date of the current contract. Because of the unilateral errors underlying the overpayments, HCA has indicated an intent to seek recoupment of the allegedly overpaid amounts. In the event that, as a result of this unilateral and unsubstantiated error by HCA, our Washington health plan is required to disgorge to HCA rate amounts that had been previously paid to it, our results of operations in the quarter such disgorgement occurred would be adversely affected.

Reductions in Medicare payments could reduce our earnings potential for our Medicare Advantage plans and our duals demonstration programs.

The Sequestration Transparency Act of 2012 included a 2% reduction of payments from CMS to our Medicare Advantage plans beginning April 1, 2013. Medicare Advantage plans will continue to be affected until Congress lifts the sequestration mandated under the Sequestration Transparency Act of 2012. The impact of sequestration cuts on our Medicare Advantage revenues is partially mitigated by reductions in provider reimbursements paid to those providers with rates indexed to the Medicare fee-for-service reimbursement rates. Such reduction in our Medicare payments may have an adverse effect on our earnings potential for our Medicare Advantage plans and our duals demonstration programs. In addition, reductions to provider reimbursement rates associated with sequestration may adversely impact our relations with the impacted providers.

Difficulties in executing our acquisition strategy could adversely affect our business.

The acquisitions of other health plans and the assignment and assumption of Medicaid contract rights of other health plans have accounted for a significant amount of our growth over the last several years. Although we cannot predict with certainty our rate of growth as the result of acquisitions, we believe that additional acquisitions of all sizes will be important to our future growth strategy. Many of the other potential purchasers of these assets-particularly operators of large commercial health plans-have significantly greater financial resources than we do. Also, many of the sellers may insist on selling assets that we do not want, such as commercial lines of business, or may insist on transferring their liabilities to us as part of the sale of their companies or assets. Even if we identify suitable targets, we may be unable to complete acquisitions on terms favorable to us, or at all, or obtain the necessary financing for these acquisitions. For these reasons, among others, we cannot provide assurance that we will be able to complete favorable acquisitions, especially in light of the volatility in the capital markets over the past several years, or that we will not complete acquisitions that turn out to be unfavorable. Further, to the extent we complete an acquisition, we may be unable to realize the anticipated benefits from such acquisition because of operational factors or difficulty in integrating the acquisition with our existing business. This may include problems involving the integration of:

- additional employees who are not familiar with our operations or our corporate culture,
- new provider networks which may operate on terms different from our existing networks,
- additional members who may decide to transfer to other health care providers or health plans,
- disparate information, claims processing, and record-keeping systems,
- internal controls and accounting policies, including those which require the exercise of judgment and complex estimation processes, such as estimates of claims incurred but not reported, accounting for goodwill, intangible assets, stock-based compensation, and income tax matters, and
- new regulatory schemes, relationships, practices, and compliance requirements.

Also, we are generally required to obtain regulatory approval from one or more state agencies when making acquisitions of health plans. In the case of an acquisition of a business located in a state in which we do not already operate, we would be required to obtain the necessary licenses to operate in that state. In addition, although we may already operate in a state in which we acquire a new business, we would be required to obtain regulatory approval if, as a result of the acquisition, we will operate in an area of that state in which we did not operate previously. Furthermore, we may be required to renegotiate contracts with the network providers of the acquired business. We may be unable to obtain the necessary governmental approvals, comply with these regulatory requirements or renegotiate the necessary provider contracts in a timely manner, if at all.

In addition, we may be unable to successfully identify, consummate and integrate future acquisitions, including integrating the acquired businesses on our information technology platform, or to implement our operations strategy in order to operate acquired businesses profitably. Furthermore, we may incur significant transaction expenses in connection with a potential acquisition which may or may not be consummated. These expenses could impact our selling, general and administrative expense ratio.

For all of the above reasons, we may not be able to consummate our proposed acquisitions as announced from time to time to sustain our pattern of growth or to realize benefits from completed acquisitions.

We face periodic routine and non-routine reviews, audits, and investigations by government agencies, and these reviews and audits could have adverse findings, which could negatively impact our business.

We are subject to various routine and non-routine governmental reviews, audits, and investigations. Violation of the laws, regulations, or contract provisions governing our operations, or changes in interpretations of those laws and regulations, could result in the imposition of civil or criminal penalties, the cancellation of our contracts to provide managed care services, the suspension or revocation of our licenses, the exclusion from participation in government sponsored health programs, or the revision and recoupment of past payments made based on audit findings. If we are unable to correct any noted deficiencies, or become subject to material fines or other sanctions, we could suffer a substantial reduction in profitability, and could also lose one or more of our government contracts and as a result lose significant numbers of members and amounts of revenue. In addition, government receivables are subject to government audit and negotiation, and government contracts are vulnerable to disagreements with the government. The final amounts we ultimately receive under government contracts may be different from the amounts we initially recognize in our financial statements.

We rely on the accuracy of eligibility lists provided by state governments. Inaccuracies in those lists would negatively affect our results of operations.

Premium payments to our health plan segment are based upon eligibility lists produced by state governments. From time to time, states require us to reimburse them for premiums paid to us based on an eligibility list that a state later discovers contains individuals who are not in fact eligible for a government sponsored program or are eligible for a different premium category or a different program. Alternatively, a state could fail to pay us for members for whom we are entitled to payment. Our results of operations would be adversely affected as a result of such reimbursement to the state if we make or have made related payments to providers and are unable to recoup such payments from the providers.

We are subject to extensive fraud and abuse laws which may give rise to lawsuits and claims against us, the outcome of which may have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Because we receive payments from federal and state governmental agencies, we are subject to various laws commonly referred to as “fraud and abuse” laws, including the federal False Claims Act, which permit agencies and enforcement authorities to institute suit against us for violations and, in some cases, to seek treble damages, penalties, and assessments. Liability under such federal and state statutes and regulations may arise if we know, or it is found that we should have known, that information we provide to form the basis for a claim for government payment is false or fraudulent, and some courts have permitted False Claims Act suits to proceed if the claimant was out of compliance with program requirements. *Qui tam* actions under federal and state law can be brought by any individual on behalf of the government. *Qui tam* actions have increased significantly in recent years, causing greater numbers of health care companies to have to defend a false claim action, pay fines, or be excluded from the Medicare, Medicaid, or other state or federal health care programs as a result of an investigation arising out of such action. Many states, including states where we currently operate, have enacted parallel legislation. In the event we are subject to liability under a *qui tam* action, our business, financial condition, cash flows, or results of operations could be adversely affected.

Our business could be adversely impacted by adoption of the new ICD-10 standardized coding set for diagnoses.

The U.S. Department of Health and Human Services, or HHS, has released rules pursuant to the Health Insurance Portability and Accountability Act, or HIPAA, which mandate the use of standard formats in electronic health care transactions. HHS also has published rules requiring the use of standardized code sets and unique identifiers for providers. Originally, the federal government required that health care organizations, including health insurers, upgrade to updated and expanded standardized code sets used for documenting health conditions by October 2013. These new standardized code sets, known as ICD-10, will require substantial investments from health care organizations, including us. However, CMS has now postponed implementation of ICD-10 to October 1, 2014. Use of the ICD-10 code sets will require significant administrative changes and may result in errors and otherwise negatively impact our service levels. In addition, we may experience complications related to supporting customers that are not fully compliant with the revised requirements as of the applicable compliance date. Furthermore, if physicians fail to provide appropriate codes for services provided as a result of the new coding set, we may not be reimbursed, or adequately reimbursed, for such services.

If we are unable to deliver quality care, maintain good relations with the physicians, hospitals, and other providers with whom we contract, or if we are unable to enter into cost-effective contracts with such providers, our profitability could be adversely affected.

We contract with physicians, hospitals, and other providers as a means to ensure access to health care services for our members, to manage health care costs and utilization, and to better monitor the quality of care being delivered. We compete with other health plans to contract with these providers. We believe providers select plans in which they participate based on criteria including reimbursement rates, timeliness and accuracy of claims payment, potential to deliver new patient volume and/or retain existing patients, effectiveness of resolution of calls and complaints, and other factors. We cannot be sure that we will be able to successfully attract and retain providers to maintain a competitive network in the geographic areas we serve. In addition, in any particular market, providers could refuse to contract with us, demand higher payments, or take other actions which could result in higher health care costs, disruption to provider access for current members, a decline in our growth rate, or difficulty in meeting regulatory or accreditation requirements.

The Medicaid program generally pays doctors and hospitals at levels well below those of Medicare and private insurance. Large numbers of doctors, therefore, do not accept Medicaid patients. In the face of fiscal pressures, some states may reduce rates paid to providers, which may further discourage participation in the Medicaid program.

In some markets, certain providers, particularly hospitals, physician/hospital organizations, and some specialists, may have significant market positions or even monopolies. If these providers refuse to contract with us or utilize their market position to negotiate favorable contracts which are disadvantageous to us, our profitability in those areas could be adversely affected.

Some providers that render services to our members are not contracted with our health plans. In those cases, there is no pre-established understanding between the provider and our health plan about the amount of compensation that is due to the provider. In some states, the amount of compensation is defined by law or regulation, but in most instances it is either not defined or it is established by a standard that is not clearly translatable into dollar terms. In such instances, providers may believe they are underpaid for their services and may either litigate or arbitrate their dispute with our health plan. The uncertainty of the amount to pay and the possibility of subsequent adjustment of the payment could adversely affect our business, financial condition, results of operations, and cash flows.

The insolvency of a delegated provider could obligate us to pay its referral claims, which could have an adverse effect on our business, cash flows, or results of operations.

Circumstances may arise where providers to whom we have delegated risk, due to insolvency or other circumstances, are unable to pay claims they have incurred with third parties in connection with referral services provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states' laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so or we have already paid claims to a delegated provider and payments cannot be recouped when the delegated provider becomes insolvent. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability. In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These funds are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. However, there can be no assurances that these precautionary steps will fully protect us against the insolvency of a delegated provider. Liabilities incurred or losses suffered as a result of provider insolvency could have an adverse effect on our business, financial condition, cash flows, or results of operations.

Regulatory actions and negative publicity regarding Medicaid managed care and Medicare Advantage may lead to programmatic changes and intensified regulatory scrutiny and regulatory burdens.

Several of our health care competitors have recently been involved in governmental investigations and regulatory actions which have resulted in significant volatility in the price of their stock. In addition, there has been negative publicity and proposed programmatic changes regarding Medicare Advantage private fee-for-service plans, a part of the Medicare Advantage program in which we do not participate. These actions and the resulting negative publicity could become associated with or imputed to us, regardless of our actual regulatory compliance or programmatic participation. Such an association, as well as any perception of a recurring pattern of abuse among the health plan participants in government programs and the diminished reputation of the managed care sector as a whole, could result in public distrust, political pressure for changes in the programs in which we do not participate, intensified scrutiny by regulators, additional regulatory requirements and burdens, increased stock volatility due to speculative trading, and heightened barriers to new managed care markets and contracts, all of which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

If a state fails to renew its federal waiver application for mandated Medicaid enrollment into managed care or such application is denied, our membership in that state will likely decrease.

States may only mandate Medicaid enrollment into managed care under federal waivers or demonstrations. Waivers and programs under demonstrations are approved for two- to five-year periods and can be renewed on an ongoing basis if the state applies and the waiver request is approved or renewed by CMS. We have no control over this renewal process. If a state does not renew its mandated program or the federal government denies the state's application for renewal, our business would suffer as a result of a likely decrease in membership.

If state regulators do not approve payments of dividends and distributions by our subsidiaries, it may negatively affect our business strategy.

We are a corporate parent holding company and hold most of our assets at, and conduct most of our operations through, direct subsidiaries. As a holding company, our results of operations depend on the results of operations of our subsidiaries. Moreover, we are dependent on dividends or other intercompany transfers of funds from our subsidiaries to meet our debt service and other obligations. The ability of our subsidiaries to pay dividends or make other payments or advances to us will depend on their operating results and will be subject to applicable laws and restrictions contained in agreements governing the debt of such subsidiaries. In addition, our health plan subsidiaries are subject to laws and regulations that limit the amount of dividends and distributions that they can pay to us without prior approval of, or notification to, state regulators. In California, our health plan may dividend, without notice to or approval of the California Department of Managed Health Care, amounts by which its tangible net equity exceeds 130% of the tangible net equity requirement. Our other health plans must give thirty days' advance notice and the opportunity to disapprove "extraordinary" dividends to the respective state departments of insurance for amounts over the lesser of (a) ten percent of surplus or net worth at the prior year end or (b) the net income for the prior year. The discretion of the state regulators, if any, in approving or disapproving a dividend is not clearly defined. Health plans that declare non-extraordinary dividends must usually provide notice to the regulators ten or fifteen days in advance of the intended distribution date of the non-extraordinary dividend. For the years ended December 31, 2013, 2012 and 2011, we received dividends from our health plan subsidiaries amounting to $ 24.4 million, $101.8 million and $86.3 million, respectively. The aggregate additional amounts our health plan subsidiaries could have paid us at December 31, 2013, 2012 and 2011, without approval of the regulatory authorities, were approximately $54 million, $24 million, and $18 million, respectively. If the regulators were to deny or significantly restrict our subsidiaries' requests to pay dividends to us, the funds available to our company as a whole would be limited, which could harm our ability to implement our business strategy. For example, we could be hindered in our ability to make debt service payments under our convertible senior notes, including the notes offered hereby, or any credit facility.

Unforeseen changes in pharmaceutical regulations or market conditions may impact our revenues and adversely affect our results of operations.

A significant category of our health care costs relate to pharmaceutical products and services. Evolving regulations and state and federal mandates regarding coverage may impact the ability of our health plans to continue to receive existing price discounts on pharmaceutical products for our members. Other factors affecting our pharmaceutical costs include, but are not limited to, the price of pharmaceuticals, geographic variation in utilization of new and existing pharmaceuticals, and changes in discounts. The unpredictable nature of these factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations.

A security breach or unauthorized disclosure of sensitive or confidential member information could have an adverse effect on our business.

As part of our normal operations, we collect, process, and retain confidential member information. We are subject to various federal and state laws and rules regarding the use and disclosure of confidential member information, including HIPAA and the Gramm-Leach-Bliley Act. The Health Information Technology for Economic and Clinical Health Act, or HITECH, provisions of the American Recovery and Reinvestment Act of 2009, further expand the coverage of HIPAA by, among other things, extending the privacy and security provisions, mandating new regulations around electronic medical records, expanding enforcement mechanisms, allowing the state Attorneys General to bring enforcement actions, increasing penalties for violations, and requiring public disclosure of improper disclosures of the health information of more than 500 individuals.

Under HITECH, civil penalties for HIPAA violations by covered entities and business associates are increased up to an amount of $1.5 million per calendar year for HIPAA violations. In addition, imposition of these penalties is now more likely because HITECH strengthens enforcement. For example, HHS conducts periodic audits to confirm compliance. Investigations of violations that indicate willful neglect, for which penalties are now mandatory, are statutorily required. In addition, state attorneys general are authorized to bring civil actions seeking either injunctions or damages in response to violations of HIPAA privacy and security regulations that threaten the privacy of state residents. In addition, HITECH requires us to notify affected individuals, HHS, and in some cases the media when unsecured protected health information is subject to a security breach.

HITECH also contains a number of provisions that provide incentives for providers and states to initiate certain programs related to health care and health care technology, such as electronic health records. While some HITECH provisions may not apply to us directly, states wishing to apply for grants under HITECH, or otherwise participating in such programs, may impose new health care technology requirements on us through our contracts with state Medicaid agencies. We are unable to predict what such requirements may entail or what their effect on our business may be.

On January 25, 2013, HHS, as required by HITECH, issued the Final Omnibus Rules that provide final modifications for the implementation of HITECH. The various requirements of HITECH have different compliance dates, some of which have passed and some of which will occur in the future. We will continue to assess our compliance obligations as regulations under HITECH are promulgated and more guidance becomes available from HHS and other federal agencies. The new HITECH privacy and security requirements, however, may require substantial operational and systems changes, employee education and resources and there is no guarantee that we will be able to implement them adequately or prior to their effective date. Given HIPAA's complexity and the new regulations, which may be subject to changing and perhaps conflicting interpretation, our ongoing ability to comply with all of the HIPAA requirements is uncertain, which may expose us to the criminal and increased civil penalties provided under HITECH and may require us to incur significant costs in order to seek to comply with its requirements.

While we currently expend significant resources and have implemented solutions, processes and procedures to protect against cyber-attacks and security breaches, we may need to expend additional significant resources in the future to continue to protect against potential security breaches or to address problems caused by such attacks or any breach of our systems. Because the techniques used to circumvent security systems can be highly sophisticated and change frequently, often are not recognized until launched against a target, and may originate from less regulated and remote areas around the world, we may be unable to proactively address these techniques or to implement adequate preventive measures.

Despite the security measures we have in place to ensure compliance with applicable laws and rules, our facilities and systems, and those of our third-party service providers, may be vulnerable to security breaches, acts of vandalism, acts of malicious insiders, computer viruses, misplaced or lost data, programming and/or human errors, or other similar events. Any security breach involving the misappropriation, loss or other unauthorized disclosure or use of confidential member information, whether by us or a third party, could subject us to civil and criminal penalties, divert management's time and energy and have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Risks Related to the Operation of Our Molina Medicaid Solutions Segment

We may be unable to retain or renew the state government contracts of the Molina Medicaid Solutions segment on terms consistent with our expectations or at all.

Molina Medicaid Solutions currently has management contracts in only six states. If we are unable to continue to operate in any of those six states, or if our current operations in any of those six states are significantly curtailed, the revenues and cash flows of Molina Medicaid Solutions could decrease materially, and as a result our profitability would be negatively impacted.

If the responsive bids to RFPs of Molina Medicaid Solutions are not successful, our revenues could be materially reduced and our operating results could be negatively impacted.

The government contracts of Molina Medicaid Solutions may be subject to periodic competitive bidding. In such process, Molina Medicaid Solutions may face competition as other service providers, some with much greater financial resources and greater name recognition, attempt to enter our markets through the competitive bidding process. For instance, in 2012, the government contract of Molina Medicaid Solutions in Louisiana was subject to competitive bidding, and we were unsuccessful in being awarded a new contract. Molina Medicaid Solutions also anticipates bidding in other states which have issued RFPs for procurement of a new MMIS. In the event our responsive bids in other states are not successful, we will be unable to grow in a manner consistent with our projections. Even if our responsive bids are successful, the bids may be based upon assumptions or other factors which could result in the contract being less profitable than we had expected or had been the case prior to competitive re-bidding.

Because of the complexity and duration of the services and systems required to be delivered under the government contracts of Molina Medicaid Solutions, there are substantial risks associated with full performance under the contracts.

The state contracts of Molina Medicaid Solutions typically require significant investment in the early stages that is expected to be recovered through billings over the life of the contracts. These contracts involve the construction of new computer systems and communications networks and the development and deployment of complex technologies. Substantial performance risk exists under each contract. Some or all elements of service delivery under these contracts are dependent upon successful completion of the design, development, construction, and implementation phases. Any increased or unexpected costs or delays in connection with the performance of these contracts, including delays caused by factors outside our control, could make these

contracts less profitable or unprofitable, which could have an adverse effect on our business, financial condition, cash flows, or results of operations.

If we fail to comply with our state government contracts or government contracting regulations, our business could be adversely affected.

Molina Medicaid Solutions' contracts with state government customers may include unique and specialized performance requirements. In particular, contracts with state government customers are subject to various procurement regulations, contract provisions, and other requirements relating to their formation, administration, and performance. Any failure to comply with the specific provisions in our customer contracts or any violation of government contracting regulations could result in the imposition of various civil and criminal penalties, which may include termination of the contracts, forfeiture of profits, suspension of payments, imposition of fines, and suspension from future government contracting. Further, any negative publicity related to our state government contracts or any proceedings surrounding them may damage our business by affecting our ability to compete for new contracts. The termination of a state government contract, our suspension from government work, or any negative impact on our ability to compete for new contracts, could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

System security risks and systems integration issues that disrupt our internal operations or information technology services provided to customers could adversely affect our financial results and damage our reputation.

Computer programmers and hackers may be able to penetrate our network security and misappropriate our confidential information or that of third parties, create system disruptions, or cause shutdowns. Computer programmers and hackers also may be able to develop and deploy viruses, worms, and other malicious software programs that attack our products or otherwise exploit any security vulnerabilities of our products. In addition, sophisticated hardware and operating system software and applications that we produce or procure from third parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the system. The costs to us to eliminate or alleviate security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and the efforts to address these problems could result in interruptions, delays, cessation of service, and loss of existing or potential government customers.

Molina Medicaid Solutions routinely processes, stores, and transmits large amounts of data for our clients, including sensitive and personally identifiable information. Breaches of our security measures could expose us, our customers, or the individuals affected to a risk of loss or misuse of this information, resulting in litigation and potential liability for us and damage to our brand and reputation. Accordingly, we could lose existing or potential government customers for outsourcing services or other information technology solutions or incur significant expenses in connection with our customers' system failures or any actual or perceived security vulnerabilities in our products. In addition, the cost and operational consequences of implementing further data protection measures could be significant.

Portions of our information technology infrastructure also may experience interruptions, delays, or cessations of service or produce errors in connection with systems integration or migration work that takes place from time to time. We may not be successful in implementing new systems and transitioning data, which could cause business disruptions and be more expensive, time consuming, disruptive, and resource-intensive. Such disruptions could adversely impact our ability to fulfill orders and interrupt other processes. Delayed sales, lower margins, or lost government customers resulting from these disruptions could adversely affect our financial results, reputation, and stock price.

In the course of providing services to customers, Molina Medicaid Solutions may inadvertently infringe on the intellectual property rights of others and be exposed to claims for damages.

The solutions we provide to our state government customers may inadvertently infringe on the intellectual property rights of third parties resulting in claims for damages against us. The expense and time of defending against these claims may have a material and adverse impact on our profitability. Additionally, the publicity we may receive as a result of infringing intellectual property rights may damage our reputation and adversely impact our ability to develop new MMIS business or retain existing MMIS business.

Inherent in the government contracting process are various risks which may materially and adversely affect our business and profitability.

We are subject to the risks inherent in the government contracting process. These risks include government audits of billable contract costs and reimbursable expenses and compliance with government reporting requirements. In the event we are found to be out of compliance with government contracting requirements, our reputation may be adversely impacted and our relationship with the government agencies we work with may be damaged, resulting in a material and adverse effect on our profitability.

Our performance on contracts, including those on which we have partnered with third parties, may be adversely affected if we or the third parties fail to deliver on commitments.

In some instances, our contracts require that we partner with other parties, including software and hardware vendors, to provide the complex solutions required by our state government customers. Our ability to deliver the solutions and provide the services required by our customers is dependent on our and our partners' ability to meet our customers' delivery schedules. If we or our partners fail to deliver services or products on time, our ability to complete the contract may be adversely affected, which may have a material and adverse impact on our revenues and profitability.

Risks Related to our General Business Operations

Ineffective management of our growth may negatively affect our business, financial condition, or results of operations.

We expect to continue to grow our membership and to expand into other markets through acquisitions and other opportunities. Continued rapid growth could place a significant strain on our management and on our other resources. Our ability to manage our growth may depend on our ability to strengthen our management team and attract, train, and retain skilled employees, and our ability to implement and improve operational, financial, and management information systems on a timely basis. If we are unable to manage our growth effectively, our business, financial condition, cash flows, or results of operations could be materially and adversely affected. In addition, due to the initial substantial costs related to acquisitions, rapid growth could adversely affect our short-term profitability and liquidity.

Any changes to the laws and regulations governing our business, or the interpretation and enforcement of those laws or regulations, could cause us to modify our operations and could negatively impact our operating results.

Our business is extensively regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect health plan members and providers rather than managed care organizations. The government agencies administering these laws and regulations have broad latitude in interpreting and applying them. These laws and regulations, along with the terms of our government contracts, regulate how we do business, what services we offer, and how we interact with members and the public. For instance, some states mandate minimum medical expense levels as a percentage of premium revenues. These laws and regulations, and their interpretations, are subject to frequent change. The interpretation of certain contract provisions by our governmental regulators may also change. Changes in existing laws or regulations, or their interpretations, or the enactment of new laws or regulations, could reduce our profitability by imposing additional capital requirements, increasing our liability, increasing our administrative and other costs, increasing mandated benefits, forcing us to restructure our relationships with providers, or requiring us to implement additional or different programs and systems. Changes in the interpretation of our contracts could also reduce our profitability if we have detrimentally relied on a prior interpretation.

Our business depends on our information and medical management systems, and our inability to effectively integrate, manage, and keep secure our information and medical management systems could disrupt our operations.

Our business is dependent on effective and secure information systems that assist us in, among other things, processing provider claims, monitoring utilization and other cost factors, supporting our medical management techniques, and providing data to our regulators. Our providers also depend upon our information systems for membership verifications, claims status, and other information. If we experience a reduction in the performance, reliability, or availability of our information and medical management systems, our operations, ability to pay claims, and ability to produce timely and accurate reports could be adversely affected. In addition, if the licensor or vendor of any software which is integral to our operations were to become insolvent or otherwise fail to support the software sufficiently, our operations could be negatively affected.

Our information systems and applications require continual maintenance, upgrading, and enhancement to meet our operational needs. Moreover, our acquisition activity requires transitions to or from, and the integration of, various information systems. If we experience difficulties with the transition to or from information systems or are unable to properly implement, maintain, upgrade or expand our system, we could suffer from, among other things, operational disruptions, loss of members, difficulty in attracting new members, regulatory problems, and increases in administrative expenses.

Our business requires the secure transmission of confidential information over public networks. Advances in computer capabilities, new discoveries in the field of cryptography, or other events or developments could result in compromises or breaches of our security systems and member data stored in our information systems. Anyone who circumvents our security measures could misappropriate our confidential information or cause interruptions in services or operations. The internet is a public network, and data is sent over this network from many sources. In the past, computer viruses or software programs that disable or impair computers have been distributed and have rapidly spread over the internet. Computer viruses could be introduced into our systems, or those of our providers or regulators, which could disrupt our operations, or make our systems inaccessible to our members, providers, or regulators. We may be required to expend significant capital and other resources to

protect against the threat of security breaches or to alleviate problems caused by breaches. Because of the confidential health information we store and transmit, security breaches could expose us to a risk of regulatory action, litigation, possible liability, and loss. Our security measures may be inadequate to prevent security breaches, and our business operations would be negatively impacted by cancellation of contracts and loss of members if security breaches are not prevented.

Because our corporate headquarters are located in Southern California, our business operations may be significantly disrupted as a result of a major earthquake.

Our corporate headquarters is located in Long Beach, California. In addition, the claims of our health plans are also processed in Long Beach. Southern California is exposed to a statistically greater risk of a major earthquake than most other parts of the United States. If a major earthquake were to strike the Los Angeles area, our corporate functions and claims processing could be significantly impaired for a substantial period of time. Although we have established a disaster recovery and business resumption plan with back-up operating sites to be deployed in the case of such a major disruptive event, there can be no assurances that the disaster recovery plan will be successful or that the business operations of all our health plans, including those that are remote from any such event, would not be substantially impacted by a major Southern California earthquake.

We face claims related to litigation which could result in substantial monetary damages.

We are subject to a variety of legal actions, including medical malpractice actions, provider disputes, employment related disputes, and breach of contract actions. In the event we incur liability materially in excess of the amount for which we have insurance coverage, our profitability would suffer. In addition, our providers involved in medical care decisions are exposed to the risk of medical malpractice claims. As an employer of physicians and ancillary medical personnel and as an operator of primary care clinics, our plans are subject to liability for negligent acts, omissions, or injuries occurring at one of our clinics or caused by one of our employees. We maintain medical malpractice insurance for our clinics in an amount which we believe to be reasonable in light of our experience to date. However, given the significant amount of some medical malpractice awards and settlements, this insurance may not be sufficient or available at a reasonable cost to protect us from damage awards or other liabilities. Even if any claims brought against us are unsuccessful or without merit, we may have to defend ourselves against such claims. The defense of any such actions may be time-consuming and costly, and may distract our management's attention. As a result, we may incur significant expenses and may be unable to effectively operate our business.

Furthermore, claimants often sue managed care organizations for improper denials of or delays in care, and in some instances improper authorizations of care. Claims of this nature could result in substantial damage awards against us and our providers that could exceed the limits of any applicable medical malpractice insurance coverage. Successful malpractice or tort claims asserted against us, our providers, or our employees could adversely affect our business, financial condition, cash flows, or results of operations.

We cannot predict the outcome of any lawsuit with certainty. While we currently have insurance coverage for some of the potential liabilities relating to litigation, other such liabilities may not be covered by insurance, the insurers could dispute coverage, or the amount of insurance could be insufficient to cover the damages awarded. In addition, insurance coverage for all or certain types of liability may become unavailable or prohibitively expensive in the future or the deductible on any such insurance coverage could be set at a level which would result in us effectively self-insuring cases against us.

Although we establish reserves for litigation as we believe appropriate, we cannot assure you that our recorded reserves will be adequate to cover such costs. Therefore, the litigation to which we are subject could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and could prompt us to change our operating procedures.

We are subject to competition which negatively impacts our ability to increase penetration in the markets we serve.

We operate in a highly competitive environment and in an industry that is subject to ongoing changes from business consolidations, new strategic alliances, and aggressive marketing practices by other managed care organizations. We compete for members principally on the basis of size, location, and quality of provider network, benefits supplied, quality of service, and reputation. A number of these competitive elements are partially dependent upon and can be positively affected by the financial resources available to a health plan. Many other organizations with which we compete, including large commercial plans, have substantially greater financial and other resources than we do. For these reasons, we may be unable to grow our membership, or may lose members to other health plans.

Failure to maintain effective internal controls over financial reporting could have a material adverse effect on our business, operating results, and stock price.

The Sarbanes-Oxley Act of 2002 requires, among other things, that we maintain effective internal control over financial reporting. In particular, we must perform system and process evaluation and testing of our internal controls over financial reporting to allow management to report on, and our independent registered public accounting firm to attest to, our internal controls over financial reporting as required by Section 404 of the Sarbanes-Oxley Act of 2002. Our future testing, or the subsequent testing by our independent registered public accounting firm, may reveal deficiencies in our internal controls over financial reporting that are deemed to be material weaknesses. Our compliance with Section 404 will continue to require that we incur substantial accounting expense and expend significant management time and effort. Moreover, if we are not able to continue to comply with the requirements of Section 404 in a timely manner, or if we or our independent registered public accounting firm identifies deficiencies in our internal control over financial reporting that are deemed to be material weaknesses, the market price of our stock could decline and we could be subject to sanctions or investigations by the NYSE, SEC, or other regulatory authorities which would require additional financial and management resources.

Changes in accounting may affect our results of operations.

U.S. generally accepted accounting principles (GAAP) and related implementation guidelines and interpretations can be highly complex and involve subjective judgments. Changes in these rules or their interpretation, or the adoption of new pronouncements could significantly affect our stated results of operations.

The value of our investments is influenced by varying economic and market conditions, and a decrease in value could have an adverse effect on our results of operations, liquidity, and financial condition.

Our investments consist solely of investment-grade debt securities. The unrestricted portion of this portfolio is designated as available-for-sale. Our non-current restricted investments are designated as held-to-maturity. Available-for-sale investments are carried at fair value, and the unrealized gains or losses are included in accumulated other comprehensive income or loss as a separate component of stockholders' equity, unless the decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such securities until their full cost can be recovered. For our available-for-sale investments and held-to-maturity investments, if a decline in value is deemed to be other-than-temporary and we do not have the intent and ability to hold such security until its full cost can be recovered, the security is deemed to be other-than-temporarily impaired and it is written down to fair value and the loss is recorded as an expense.

In accordance with applicable accounting standards, we review our investment securities to determine if declines in fair value below cost are other-than-temporary. This review is subjective and requires a high degree of judgment. We conduct this review on a quarterly basis, using both quantitative and qualitative factors, to determine whether a decline in value is other-than-temporary. Such factors considered include the length of time and the extent to which market value has been less than cost, the financial condition and near term prospects of the issuer, recommendations of investment advisors, and forecasts of economic, market or industry trends. This review process also entails an evaluation of our ability and intent to hold individual securities until they mature or full cost can be recovered.

The current economic environment and recent volatility of the securities markets increase the difficulty of assessing investment impairment and the same influences tend to increase the risk of potential impairment of these assets. Over time, the economic and market environment may provide additional insight regarding the fair value of certain securities, which could change our judgment regarding impairment. This could result in realized losses relating to other-than-temporary declines to be recorded as an expense. Given the current market conditions and the significant judgments involved, there is continuing risk that declines in fair value may occur and material other-than-temporary impairments may result in realized losses in future periods which could have a material adverse effect on our business, financial condition, cash flows, or results of operations.

Unanticipated changes in our tax rates or exposure to additional income tax liabilities could affect our profitability.

We are subject to income taxes in the United States. Our effective tax rate could be adversely affected by changes in the mix of earnings in states with different statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in U.S. tax laws and regulations, and changes in our interpretations of tax laws, including pending tax law changes, such as the health care federal excise tax discussed above. In addition, we are subject to the routine examination of our income tax returns by the Internal Revenue Service and other local and state tax authorities. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our estimated income tax liabilities. Adverse outcomes from tax examinations could have a material adverse effect on our provision for income taxes, estimated income tax liabilities, or results of operations.

We are dependent on our executive officers and other key employees.

Our operations are highly dependent on the efforts of our executive officers. The loss of their leadership, knowledge, and experience could negatively impact our operations. Replacing many of our executive officers might be difficult or take an extended period of time because a limited number of individuals in the managed care industry have the breadth and depth of skills and experience necessary to operate and expand successfully a business such as ours. Our success is also dependent on our ability to hire and retain qualified management, technical, and medical personnel. It is critical that we recruit, manage, enable, and retain talent to successfully execute our strategic objections which requires aligned policies, a positive work environment, and a robust succession and talent development process. Further, particularly in light of the changing healthcare environment, we must focus on building employee capabilities to help ensure that we can meet upcoming challenges and opportunities. If we are unsuccessful in recruiting, retaining, managing, and enabling such personnel and are unable to meet upcoming challenges and opportunities, our operations could be negatively impacted.

We are subject to risks associated with outsourcing services and functions to third parties.

We contract with independent third party vendors and service providers who provide services to us and our subsidiaries or to whom we delegate selected functions. Our arrangements with third party vendors and service providers may make our operations vulnerable if those third parties fail to satisfy their obligations to us, including their obligations to maintain and protect the security and confidentiality of our information and data. In addition, we may have disagreements with third party vendors and service providers regarding relative responsibilities for any such failures under applicable business associate agreements or other applicable outsourcing agreements. Further, we may not be adequately indemnified against all possible losses through the terms and conditions of our contracts with third party vendors and service providers. Our outsourcing arrangements could be adversely impacted by changes in vendors' or service providers' operations or financial condition or other matters outside of our control. If we fail to adequately monitor and regulate the performance of our third party vendors and service providers, we could be subject to additional risk. Violations of, or noncompliance with, laws and/or regulations governing our business or noncompliance with contract terms by third party vendors and service providers could increase our exposure to liability to our members, providers, or other third parties, or sanctions and/or fines from the regulators that oversee our business. In turn, this could increase the costs associated with the operation of our business or have an adverse impact on our business and reputation. Moreover, if these vendor and service provider relationships were terminated for any reason, we may not be able to find alternative partners in a timely manner or on acceptable financial terms, and may incur significant costs in connection with any such vendor or service provider transition. As a result, we may not be able to meet the full demands of our customers and, in turn, our business, financial condition, or results of operations may be harmed. In addition, we may not fully realize the anticipated economic and other benefits from our outsourcing projects or other relationships we enter into with third party vendors and service providers, as a result of regulatory restrictions on outsourcing, unanticipated delays in transitioning our operations to the third party, vendor or service provider noncompliance with contract terms or violations of laws and/or regulations, or otherwise. This could result in substantial costs or other operational or financial problems that could adversely impact our business, financial condition, cash flows, or results of operations.

An impairment charge with respect to our recorded goodwill, or our finite-lived intangible assets, could have a material impact on our financial results.

As of December 31, 2013, the balance of goodwill was $230.7 million. As of December 31, 2013, the balance of intangible assets, net, was $98.9 million. Intangible assets are amortized generally on a straight-line basis over their estimated useful lives.

Goodwill represents the amount of the purchase price in excess of the fair values assigned to the underlying identifiable net assets of acquired businesses. Goodwill is not amortized, but is subject to an annual impairment test. Tests are performed more frequently if events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Our intangible assets are subject to impairment tests when events or circumstances indicate that a finite-lived intangible asset's (or asset group's) carrying value may not be recoverable.

The determination of the value of goodwill, and intangible assets, net, requires us to make estimates and assumptions about estimated asset lives, future business trends, and growth. Such evaluation is significantly impacted by estimates and assumptions of future revenues, costs and expenses, and other factors. If an event or events occur that would cause us to revise our estimates and assumptions used in analyzing the value of our goodwill, and intangible assets, net, such revision could result in a non-cash impairment charge that could have a material impact on our financial results.

We are subject to the risks of the owning and leasing of real property.

We are a tenant under numerous leases in multiple states, including a 25-year lease of an approximately 460,000 square foot office building housing our principal executive offices in Long Beach, California. We also own a 150,000 square-foot office building in Troy, Michigan, a 26,000 square-foot data center in Albuquerque, New Mexico, and a community clinic in Pomona, California. Accordingly, we are subject to all of the risks generally associated with leasing and owning real estate, which include, but are not limited to: the possibility of environmental contamination, the costs associated with fixing any environmental problems and the risk of damages resulting from such contamination; adverse changes in the value of the property due to interest rate changes, changes in the neighborhood in which the property is located, or other factors; ongoing maintenance expenses and costs of improvements; the possible need for structural improvements in order to comply with changes in zoning, seismic, disability act, or other requirements; inability to renew or enter into leases for space not utilized by us on commercially acceptable terms or at all; and possible disputes with neighboring owners or other individuals and entities.

Risks Related to Our Common Stock

Delaware law and our charter documents may impede or discourage a takeover, which could cause the market price of our common stock to decline.

We are a Delaware corporation, and the anti-takeover provisions of Delaware law impose various impediments to the ability of a third party to acquire control of us, even if a change in control would be beneficial to our existing stockholders. In addition, our board of directors or a committee thereof has the power, without stockholder approval, to designate the terms of one or more series of preferred stock and issue shares of preferred stock. The ability of our board of directors or a committee thereof to create and issue a new series of preferred stock and certain provisions of Delaware law and our certificate of incorporation and bylaws could impede a merger, takeover or other business combination involving us or discourage a potential acquirer from making a tender offer for our common stock, which, under certain circumstances, could reduce the market price of our common stock and the value of your notes.

Volatility of our stock price could adversely affect stockholders.

Since our initial public offering in July 2003, the sales price of our common stock has ranged from a low of $10.75 to a high of $40.90. A number of factors could continue to influence the market price of our common stock, including:

- the implementation of the ACA and duals demonstration programs,
- state and federal budget pressures,
- changes in expectations as to our future financial performance or changes in financial estimates, if any, of public market analysts,
- announcements relating to our business or the business of our competitors,
- changes in government payment levels,
- adverse publicity regarding health maintenance organizations and other managed care organizations,
- government action regarding member eligibility,
- changes in state mandatory programs,
- conditions generally affecting the managed care industry or our provider networks,
- the success of our operating or acquisition strategy,
- the operating and stock price performance of other comparable companies in the health care industry,
- the termination of our Medicaid or CHIP contracts with state or county agencies, or subcontracts with other Medicaid managed care organizations that contract with such state or county agencies,
- regulatory or legislative change,
- general economic conditions, including unemployment rates, inflation, and interest rates, and

- the other factors set forth under "Risk factors" in this Annual Report on Form 10-K.

Our common stock may not trade at the same levels as the stock of other health care companies or the market in general. Also, if the trading market for our common stock does not continue to develop, securities analysts may not maintain or initiate research coverage of us and our common stock, and this could depress the market for our common stock.

Members of the Molina family own a significant amount of our capital stock, decreasing the influence of other stockholders on stockholder decisions.

Members of the Molina family, either directly or as trustees or beneficiaries of Molina family trusts, in the aggregate owned or were entitled to receive upon certain events approximately 36% of our capital stock as of December 31, 2013. Our president and chief executive officer, as well as our chief financial officer, are members of the Molina family, and they are also on our board of directors. Because of the amount of their shareholdings, Molina family members, if they were to act as a group with the trustees of their family trusts, have the ability to significantly influence all matters submitted to stockholders for approval, including the election of directors, amendments to our charter, and any merger, consolidation, or sale of our company. A significant concentration of share ownership can also adversely affect the trading price for our common stock because investors often discount the value of stock in companies that have controlling stockholders. Furthermore, the concentration of share ownership in the Molina family could delay or prevent a merger or consolidation, takeover, or other business combination that could be favorable to our stockholders. Finally, the interests and objectives of the Molina family may be different from those of our company or our other stockholders, and they may vote their common stock in a manner that is contrary to the vote of our other stockholders.

Future sales of our common stock or equity-linked securities in the public market could adversely affect the trading price of our common stock and our ability to raise funds in new stock offerings.

We may issue equity securities in the future, or securities that are convertible into or exchangeable for, or that represent the right to receive, shares of our common stock. Sales of a substantial number of shares of our common stock or other equity securities, including sales of shares in connection with any future acquisitions, could be substantially dilutive to our stockholders. These sales may have a harmful effect on prevailing market prices for our common stock and our ability to raise additional capital in the financial markets at a time and price favorable to us. Moreover, to the extent that we issue restricted stock units, stock appreciation rights, options, or warrants to purchase our common stock in the future and those stock appreciation rights, options, or warrants are exercised or as the restricted stock units vest, our stockholders may experience further dilution. Holders of our shares of common stock have no preemptive rights that entitle holders to purchase a pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our stockholders. Our certificate of incorporation provides that we have authority to issue 150,000,000 shares of common stock and 20,000,000 shares of preferred stock. As of December 31, 2013, approximately 45,871,000 shares of common stock and no shares of preferred or other capital stock were issued and outstanding.

It may be difficult for a third party to acquire us, which could inhibit stockholders from realizing a premium on their stock price.

We are subject to the Delaware anti-takeover laws regulating corporate takeovers. These provisions may prohibit stockholders owning 15% or more of our outstanding voting stock from merging or combining with us. In addition, any change in control of our state health plans would require the approval of the applicable insurance regulator in each state in which we operate.

Our certificate of incorporation and bylaws also contain provisions that could have the effect of delaying, deferring, or preventing a change in control of our company that stockholders may consider favorable or beneficial. These provisions could discourage proxy contests and make it more difficult for our stockholders to elect directors and take other corporate actions. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions include:

- a staggered board of directors, so that it would take three successive annual meetings to replace all directors,
- prohibition of stockholder action by written consent, and
- advance notice requirements for the submission by stockholders of nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting.

In addition, changes of control are often subject to state regulatory notification, and in some cases, prior approval.

Item 1B: Unresolved Staff Comments

None.

Item 2: Properties

The Health Plans segment leases a total of 66 facilities and the Molina Medicaid Solutions segment leases a total of 13 facilities. We own a 150,000 square-foot office building in Troy, Michigan, a 26,000 square-foot data center in Albuquerque, New Mexico, and a 24,000 square-foot mixed use (office and clinic) facility in Pomona, California under our Health Plans segment. While we believe our current and anticipated facilities will be adequate to meet our operational needs for the foreseeable future, we are continuing to periodically evaluate our employee and operations growth prospects to determine if additional space is required, and where it would be best located.

Item 3: Legal Proceedings

Refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 20, "Commitments and Contingencies," for a discussion of legal proceedings.

Item 4: Mine Safety Disclosures

None.

PART II

Item 5: Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is listed on the New York Stock Exchange under the trading symbol "MOH." As of February 20, 2014, there were approximately 125 holders of record of our common stock. The high and low intra-day sales prices of our common stock for specified periods are set forth below:

Date Range	High	Low
2013		
First Quarter	$ 33.85	$ 25.70
Second Quarter	$ 38.74	$ 30.26
Third Quarter	$ 40.90	$ 33.31
Fourth Quarter	$ 37.39	$ 31.10
2012		
First Quarter	$ 36.83	$ 22.25
Second Quarter	$ 35.37	$ 17.63
Third Quarter	$ 27.73	$ 21.62
Fourth Quarter	$ 29.82	$ 21.74

Dividends

To date we have not paid cash dividends on our common stock. We currently intend to retain any future earnings to fund our projected business growth. However, we intend to periodically evaluate our cash position to determine whether to pay a cash dividend in the future.

Our ability to pay dividends is partially dependent on, among other things, our receipt of cash dividends from our regulated subsidiaries. The ability of our regulated subsidiaries to pay dividends to us is limited by the state departments of insurance in the states in which we operate or may operate, as well as requirements of the government-sponsored health programs in which we participate. Any future determination to pay dividends will be at the discretion of our Board and will depend upon, among other factors, our results of operations, financial condition, capital requirements and contractual and regulatory restrictions. For more information regarding restrictions on the ability of our regulated subsidiaries to pay dividends to us, please see Item 7 of this Form 10-K, Management's Discussion and Analysis of Financial Condition and Results of Operations, in "Liquidity and Capital Resources," under the subheading "Regulatory Capital and Dividend Restrictions."

Unregistered Issuances of Equity Securities

None.

Stock Repurchase Programs

Securities Repurchases and Repurchase Programs. Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and market conditions. As indicated in the table below, we repurchased 85,086 shares of our common stock for an average price of $31.28 under this program in November 2013. This newly authorized repurchase program extends through December 31, 2014, and replaces in its entirety the $75 million repurchase program adopted by the board of directors on February 13, 2013.

Common Stock Repurchase in Connection with Offering of 1.125% Cash Convertible Senior Notes Due 2020. We used a portion of the net proceeds in this offering to repurchase $50 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. On February 12, 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Purchases of common stock made by or on behalf of the Company during the quarter ended December 31, 2013, including shares withheld by the Company to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (1)	Average Price Paid per Share (1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs
October 1 — October 31	1,690	$ 36.27	—	$ 50,000,000
November 1 — November 30	1,857	$ 31.61	85,086	$ 47,338,505
December 1 — December 31	25,078	$ 34.68	—	$ 47,338,505
Total	28,625	$ 34.58	85,086	

(1) During the quarter we withheld 28,625 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

STOCK PERFORMANCE GRAPH

The following graph and related discussion are being furnished solely to accompany this Annual Report on Form 10-K pursuant to Item 201(e) of Regulation S-K and shall not be deemed to be "soliciting materials" or to be "filed" with the SEC (other than as provided in Item 201) nor shall this information be incorporated by reference into any future filing under the Securities Act or the Exchange Act, whether made before or after the date hereof and irrespective of any general incorporation language contained therein, except to the extent that the Company specifically incorporates it by reference into a filing.

The following line graph compares the percentage change in the cumulative total return on our common stock against the cumulative total return of the Standard & Poor's Corporation Composite 500 Index (S&P 500) and a peer group index for the five-year period from December 31, 2008 to December 31, 2013. The comparison assumes $100 was invested on December 31, 2008, in the Company's common stock and in each of the foregoing indices and assumes reinvestment of dividends. The stock performance shown on the graph below represents historical stock performance and is not necessarily indicative of future stock price performance.

The peer group index consists of Centene Corporation (CNC), Community Health Systems, Inc. (CYH), Coventry Health Care, Inc. (CVH), Health Management Associates, Inc. (HMA), Health Net, Inc. (HNT), Laboratory Corporation of America Holdings (LH), Lifepoint Hospitals, Inc. (LPNT), Magellan Health Services, Inc. (MGLN), Select Medical Holdings Corporation (SEM), Team Health Holdings, Inc. (TMH), Triple-S Management Corporation (GTS), Universal American Corporation (UAM), and WellCare Health Plans, Inc. (WCG).

Item 6. Selected Financial Data

SELECTED FINANCIAL DATA

We derived the following selected consolidated financial data (other than the data under the caption "Operating Statistics, Continuing Operations") for the five years ended December 31, 2013 from our audited consolidated financial statements. You should read the data in conjunction with our consolidated financial statements, related notes and other financial information included herein. All dollar amounts are presented in thousands, except per-share data. The data under the caption "Operating Statistics, Continuing Operations" has not been audited.

	Year Ended December 31,				
	2013	2012	2011	2010 (2)	2009

(1) As previously reported, on February 17, 2012 the Division of Purchasing of the Missouri Office of Administration notified our Missouri health plan that it was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, the Missouri health plan's existing contract with the state expired without renewal on June 30, 2012. In connection with this notification, the Missouri heath plan recorded a non-cash impairment charge of $64.6 million in the fourth quarter of 2011. Effective in 2013, upon the termination of the transition obligations associated with that contract and abandonment of our equity interest in the Missouri health plan, we have recast the results relating to the Missouri health plan as discontinued operations for all periods presented.

(2) Service revenue and cost of service revenue represent revenue and costs generated by our Molina Medicaid Solutions segment. Because we acquired this business on May 1, 2010, results for the year ended December 31, 2010 include eight months of results for this segment.

(3) Income (loss) from discontinued operations is presented net of income tax (benefit) expense of $(9,912), $(1,238), $922, $4,011, and $5,319, respectively.

(4) Medical care ratio represents medical care costs as a percentage of premium revenue. The medical care ratio is a key operating indicator used to measure our performance in delivering efficient and cost effective health care services. Changes in the medical care ratio from period to period result from changes in Medicaid funding by the states, utilization of medical services, our ability to effectively manage costs, contract changes, and changes in accounting estimates related to incurred but not paid claims. See Item 7 in this Form 10-K, "Management's Discussion and Analysis of Financial Condition and Results of Operations," for further discussion.

(5) General and administrative expense ratio represents such expenses as a percentage of total revenue.

(6) Premium tax ratio represents such expenses as a percentage of premium revenue plus premium tax revenue.

(7) Number of members at end of period.

(8) Includes convertible senior notes, lease financing obligations, and other long-term debt.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition and results of operations should be read in conjunction with Items 6 and 8 of this Form 10-K, Selected Financial Data, and Financial Statements and Supplementary Data, respectively. This discussion contains forward-looking statements that involve known and unknown risks and uncertainties, including those set forth in Part I, Item 1A of this Form 10-K, Risk Factors.

Discontinued Operations. We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal on June 30, 2012. Effective June 30, 2013, the transition obligations associated with that contract terminated. Therefore, we have reclassified the results relating to the Missouri health plan to discontinued operations for all periods presented. These results are presented in a single line item, net of taxes, in the consolidated statements of income. Additionally, we abandoned our equity interests in the Missouri health plan during the second quarter of 2013, resulting in the recognition of a tax benefit of $9.5 million, which is also included in discontinued operations in the consolidated statements of income. The Missouri health plan's premium revenues amounted to $0.2 million, $114.4 million and $229.6 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. As of December 31, 2013, these health plans served approximately 1.9 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in California.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

Fiscal Year 2013 Financial Highlights

- Net income from continuing operations increased to $44.8 million in 2013, from $12.9 million in 2012 as a result of higher medical margin (measured as the excess of premium revenue over medical care costs). Higher medical margin was partially offset by increased administrative expenses related to our preparations for significant membership growth expected in 2014.
- Premium revenue in 2013 increased 11% over 2012, due to a 6% increase in enrollment (on a member-month basis), and a 5% increase in revenue per member per month (PMPM).
- Excluding our Illinois health plan, which was not operational until 2013, eight of our nine health plans reported higher medical margins in 2013 than in 2012. The consolidated medical margin increased by approximately 45% year over year. Our consolidated medical care ratio (measured as medical care costs as a percentage of premium revenue) decreased to 87.1% in 2013, from 90.0% in 2012.
- General and administrative expenses increased to 10.1% of revenue in 2013, from 8.8% in 2012. Increased administrative expenses related to anticipated membership growth represented approximately 2% of premium revenue, or $135 million during 2013.
- We entered into new debt (and related hedge transactions), and lease financing transactions which in aggregate generated net cash of approximately $482 million, after debt repayment and stock repurchases.

Health Care Reform

The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively, the Affordable Care Act, or ACA) has changed, and will continue to make broad-based changes to, the U.S. health care system which could significantly affect the U.S. economy, and we expect will continue to significantly impact our business operations and financial results, including our medical care ratios. We believe that the ACA presents us with new business opportunities as described below, but also with new financial and regulatory challenges as described further below in "Liquidity and Capital Resources," under the subheading "Financial Condition."

Dual Eligibles. Policymakers at the federal and state levels are increasingly developing initiatives, and the Centers for Medicare and Medicaid Services (CMS) has implemented several demonstrations designed, to improve the coordination of care for dual eligibles and reduce spending under Medicare and Medicaid. These demonstrations include issuing contracts to 15 states to design a program to integrate Medicare and Medicaid services for dual eligibles in the state. We refer to such demonstrations as our Medicare-Medicaid Plan (MMP) implementations. Our health plans in California, Illinois, Michigan, Ohio and South Carolina intend to commence their MMP implementations during 2014.

Medicaid Expansion. The ACA also provides for expanded Medicaid coverage which became effective in January 2014, but remains subject to implementation at the state level. As of December 31, 2013, among the 11 states where we currently operate our health plans, the states of California, Illinois, Michigan, New Mexico, Ohio, and Washington have indicated that they intend to participate in the Medicaid expansion; and the states of Florida, South Carolina, Texas, Utah, and Wisconsin have indicated that they do not intend to participate in the expansion. We believe there are significant opportunities to increase our revenues through Medicaid expansion.

Health Insurance Marketplaces. Health Insurance Marketplaces became available for consumers to access coverage beginning January 1, 2014. In some instances, Health Insurance Marketplaces allow individuals and small groups to purchase health insurance that is federally subsidized. We intend to participate in Health Insurance Marketplaces in all of the states in which we operate, except Illinois and South Carolina. We participate in the Health Insurance Marketplace primarily to serve our members who have lost Medicaid eligibility.

Market Updates

For a discussion of the market updates for the Health Plans and Molina Medicaid Solutions segments, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 1, "Basis of Presentation" under the subheadings "Market Updates - Health Plans Segment," and "Market Updates - Molina Medicaid Solutions Segment."

Composition of Revenue and Membership

Health Plans Segment

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new request for proposals (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits such as pharmacy services, behavioral health services, or long-term care services; populations such as the aged, blind or disabled (ABD); and regions or service areas.

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 2 "Significant Accounting Policies," is not generally subject to significant accounting estimates. For the year ended December 31, 2013, we received approximately 97% of our premium revenue as a fixed amount per member per month (PMPM), pursuant to our contracts with state Medicaid agencies, Medicare and other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the year ended December 31, 2013, we recognized approximately 3% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children's Health Insurance Program (CHIP) members are generally among our lowest, with rates as low as approximately $90 PMPM in Washington. Premium revenues for Medicaid members are generally higher. Among the TANF, Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $100 in California to $270 in Ohio. Among our ABD membership, PMPM premiums range from approximately $400 in Utah to $1,400 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, long-term care, behavioral health and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums in the aggregate, at approximately $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	As of December 31,		
	2013	2012	2011
Total Membership by Health Plan (1)(2):			
California	368,000	336,000	355,000
Florida	89,000	73,000	69,000
Illinois	4,000	—	—
Michigan	213,000	220,000	222,000
New Mexico	168,000	91,000	88,000
Ohio	255,000	244,000	248,000
Texas	252,000	282,000	155,000
Utah	86,000	87,000	84,000
Washington	403,000	418,000	355,000
Wisconsin	93,000	46,000	42,000
	1,931,000	1,797,000	1,618,000
Membership for our Medicare Advantage Plans (2):			
California	8,800	7,700	6,900
Florida	600	900	800
Michigan	10,400	9,700	8,200
New Mexico	900	900	800
Ohio	500	300	200
Texas	2,800	1,500	700
Utah	8,300	8,200	8,400
Washington	7,100	6,500	5,000
	39,400	35,700	31,000
Membership for our Aged, Blind or Disabled Population (2):			
California	46,700	44,700	31,500
Florida	14,700	10,300	10,400
Illinois	4,000	—	—
Michigan	45,300	41,900	37,500
New Mexico	11,300	5,700	5,600
Ohio	32,000	28,200	29,100
Texas	90,200	95,900	63,700
Utah	9,700	9,000	8,500
Washington	33,000	30,000	4,800
Wisconsin	1,700	1,700	1,700
	288,600	267,400	192,800

(1) The state of South Carolina's new full-risk Medicaid managed care program became effective January 1, 2014. On that date, our South Carolina health plan added approximately 137,000 members.

(2) Membership reported for our Medicare Advantage Plans, and for our Aged, Blind or Disabled Population is included in Total Membership by Health Plan.

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid management information system (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. When providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. For further information regarding revenue recognition for the Molina Medicaid Solutions segment, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following categories:

- *Fee-for-service:* Nearly all hospital services and the majority of our primary care and physician specialist services are paid on a fee-for-service basis. Under all fee-for-service arrangements, we retain the financial responsibility for medical care provided. Expenses related to fee-for-service contracts are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit manager are included in fee-for-service costs.

- *Capitation:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation contracts, we typically pay a fixed PMPM payment to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated contracts, we remain liable for the provision of certain health care services. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.

- *Pharmacy:* Pharmacy costs include all drug, injectibles, and immunization costs paid through our pharmacy benefit manager. As noted above, drugs and injectibles not paid through our pharmacy benefit manager are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.

- *Direct delivery:* Costs associated with our operation and/or management of primary care clinics and hospital services in California, Florida, New Mexico, Virginia, and Washington.

- *Other:* Other medical care costs include medically related administrative costs, certain provider incentive costs, reinsurance cost, and other health care expense. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, disease management, and 24-hour on-call nurses. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2013, 2012, and 2011, medically related administrative costs were $153.0 million, $125.2 million, and $99.3 million, respectively.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Estimates" below, and Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 11, "Medical Claims and Benefits Payable," for further information on how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide BPO and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

2013 Financial Performance Summary, Continuing Operations

The following table briefly summarizes our financial and operating performance from continuing operations for the years ended December 31, 2013, 2012, and 2011. All ratios, with the exception of the medical care ratio and the premium tax ratio, are computed as a percentage of total revenue. The medical care ratio is computed as a percentage of premium revenue, and the premium tax ratio is computed as a percentage of premium revenue plus premium tax revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Year Ended December 31,		
	2013	2012	2011
	(Dollar amounts in thousands, except per-share data)		
Net income per diluted share	$ 0.96	$ 0.27	$ 1.67
Adjusted net income per diluted share	$ 3.13	$ 1.72	$ 2.93
Premium revenue	$ 6,179,170	$ 5,544,121	$ 4,211,493
Service revenue	$ 204,535	$ 187,710	$ 160,447
Operating income	$ 136,560	$ 41,093	$ 135,821

Net income	0.7%	0.2%	1.7%
Effective tax rate	44.8%	45.0%	35.7%

Non-GAAP Financial Measures

We use the following non-GAAP financial measures as supplemental metrics in evaluating our financial performance, our financing and business decisions, and in forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in evaluating our performance and the performance of other companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not substitutes for or superior to, GAAP measures (GAAP stands for Generally Accepted Accounting Principles).

The first of these non-GAAP measures is earnings before interest, taxes, depreciation and amortization (EBITDA). The following table reconciles net income, which we believe to be the most comparable GAAP measure, to EBITDA.

	Year Ended December 31,		
	2013	2012	2011
	(In thousands)		
Net income	$ 52,929	$ 9,790	$ 20,818
Adjustments:			
Depreciation and amortization reported in the consolidated statements of cash flows	93,866	78,764	74,383
Interest expense	52,071	16,769	15,519
Income tax expense	26,404	9,275	43,836
EBITDA	$ 225,270	$ 114,598	$ 154,556

The second of these non-GAAP measures is adjusted net income per diluted share, continuing operations. The following table reconciles net income per diluted share, which we believe to be the most comparable GAAP measure, to adjusted net income per diluted share.

	Year Ended December 31,		
	2013	2012	2011
Net income per diluted share, continuing operations	$ 0.96	$ 0.27	$ 1.67
Adjustments, net of tax:			
Depreciation, and amortization of capitalized software	0.98	0.75	0.64
Stock-based compensation	0.52	0.31	0.23
Amortization of convertible senior notes and lease financing obligations	0.31	0.08	0.07
Amortization of intangible assets	0.28	0.29	0.32
Change in fair value of derivatives	0.08	0.02	—
Adjusted net income per diluted share, continuing operations	$ 3.13	$ 1.72	$ 2.93

Results of Operations, Continuing Operations

Year Ended December 31, 2013 Compared with the Year Ended December 31, 2012

Health Plans Segment

Premium Revenue

Premium revenue in 2013 increased 11% over 2012, due to a 6% increase in member months, and a 5% increase in revenue PMPM. Medicare premium revenue was approximately $526 million in the year ended December 31, 2013, compared with approximately $468 million in the year ended December 31, 2012. The shift in member mix to populations generating higher premium revenue PMPM and expanded benefits observed in 2012, was less pronounced in 2013.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Year Ended December 31,					
	2013			2012		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 3,611,529	$ 160.43	67.1%	$ 3,423,751	$ 161.67	68.6%
Pharmacy	935,204	41.54	17.4	835,830	39.47	16.7
Capitation	603,938	26.83	11.2	552,136	26.07	11.1
Direct delivery	48,288	2.14	0.9	33,920	1.60	0.7
Other	181,165	8.05	3.4	145,551	6.87	2.9
	$ 5,380,124	$ 238.99	100.0%	$ 4,991,188	$ 235.68	100.0%

Excluding our Illinois health plan, which was not operational until 2013, eight of our nine health plans reported higher medical margins in 2013 than in 2012. The consolidated medical margin increased by approximately 45% year over year. Our consolidated medical care ratio (measured as medical care costs as a percentage of premium revenue) decreased to 87.1% in 2013, from 90.0% in 2012.

Individual Health Plan Analysis

Financial performance improved at the California health plan in 2013, when compared with 2012, primarily due to the receipt of premium rate increases for both TANF and ABD membership; and lower inpatient facility costs for the TANF membership. Approximately $32 million of premium revenue received and recognized in 2013 related to 2012 and earlier years. The medical care ratio at the California health plan decreased to 88.9% in 2013 from 91.1% in 2012.

The medical care ratio of the Florida health plan increased to 87.3% in 2013, from 85.3% in 2012 due to higher fee-for-service costs that more than offset lower pharmacy costs.

The medical care ratio for the Illinois health plan was 96.9% in 2013. The Illinois health plan served its first member effective September 2013.

Financial performance improved at the Michigan health plan in 2013, when compared with 2012. The medical care ratio of the Michigan health plan decreased to 84.4% in 2013, from 88.3% in 2012, primarily due to lower fee-for-service and pharmacy costs for both the ABD and the TANF membership.

Financial performance improved at the New Mexico health plan in 2013, when compared with 2012. The medical care ratio of the New Mexico health plan decreased to 86.1% in 2013, from 87.0% in 2012, primarily as a result of higher Medicaid premium rates PMPM effective January 1, 2013, and stable medical costs PMPM. The New Mexico health plan added approximately 80,000 new members in 2013, as a result of its acquisition of Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program effective August 1, 2013.

Financial performance improved at the Ohio health plan in 2013, when compared with 2012. The medical care ratio of the Ohio health plan decreased to 84.2% in 2013, from 88.6% in 2012, primarily due to lower fee-for-service and pharmacy costs for both the ABD and the TANF membership. Financial performance deteriorated in the second half of 2013 due to both premium decreases, and increases to fee schedules effective July 1, 2013, that combined to reduce medical margin approximately 3% for

the second half of 2013. We also experienced an additional 1.5% decrease in premium rates in Ohio effective July 1, 2013, due to a re-basing of revenue risk adjusters.

Financial performance improved at the Texas health plan in 2013, when compared with 2012. The medical care ratio of the Texas health plan decreased to 86.4% in 2013, from 93.7% in 2012, primarily due to rate increases received on September 1, 2013 and 2012, respectively.

Financial performance deteriorated at the Utah health plan in 2013, when compared with 2012. Reductions to the medical portion of the Medicaid premium, and the addition of the pharmacy benefit to our Medicaid premium, both effective January 1, 2013, more than offset stable medical costs. The medical care ratio of the Utah health plan increased to 83.4% in 2013, from 82.3% in 2012.

The medical care ratio of the Washington health plan increased to 88.0% in 2013, compared with 86.8% in 2012, due to the addition of ABD members effective July 1, 2012 and lower TANF premium rates. The higher premium revenue PMPM associated with the ABD membership, however, offset the increased medical care ratio, so that medical margin increased to $140.2 million in 2013, from $129.0 million in 2012.

Financial performance improved at the Wisconsin health plan in 2013, when compared with 2012. The medical care ratio of the Wisconsin health plan decreased to 79.7% in 2013, compared with 96.2% in 2012, due to both higher revenue PMPM and lower fee-for-service physician, specialty and outpatient costs PMPM. Additionally, the health plan gained approximately 50,000 members in the first half of 2013 due to another health plan's recent exit from the market.

Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Year Ended December 31, 2013						
	Member Months(2)	Premium Revenue (1)		Medical Care Costs (1)		MCR (3)	Medical Margin
		Total	PMPM	Total	PMPM		
California	4,233	$ 749,755	$ 177.10	$ 666,592	$ 157.46	88.9%	$ 83,163
Florida	973	264,998	272.23	231,261	237.57	87.3	33,737

Other (4) (5)	—	8,745	—	53,415	—	—	(44,670)
	21,179	$ 5,544,121	$ 261.79	$ 4,991,188	$ 235.68	90.0%	$ 552,933

(1) Premium revenue for the Missouri health plan was $0.2 million and $114.4 million for the years ended December 31, 2013 and 2012, respectively. Medical care costs for the Missouri health plan were $1.5 million and $105.6 million for the years ended December 31, 2013 and 2012, respectively. These amounts are excluded from the tables above.

(2) A member month is defined as the aggregate of each month's ending membership for the period presented.

(3) "MCR" represents medical costs as a percentage of premium revenue.

(4) The results of the Illinois health plan, until it became operational in 2013, were insignificant and reported in "Other."

(5) "Other" medical care costs include primarily medically related administrative costs of the parent company, and direct delivery costs.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Year Ended December 31,	
	2013	2012
	(In thousands)	
Service revenue before amortization	$ 207,449	$ 189,281
Amortization recorded as reduction of service revenue	(2,914)	(1,571)
Service revenue	204,535	187,710
Cost of service revenue	161,494	141,208
General and administrative costs	5,285	17,648
Amortization of customer relationship intangibles	5,127	5,127
Operating income	$ 32,629	$ 23,727

Operating income for our Molina Medicaid Solutions segment improved $8.9 million for the year ended December 31, 2013, compared with 2012. The increase in operating income was primarily the result of additional sales in existing markets, and the favorable resolution of certain contingencies related to the Maine contract.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses increased to 10.1% of revenue in 2013, from 8.8% in 2012, primarily due to higher costs incurred as we prepared for significant membership growth anticipated in 2014. Increased administrative expenses related to anticipated membership growth represented approximately 2% of premium revenue, or $135 million during 2013.

Premium Tax Expense

Premium tax expense was consistent year over year.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and amortization" in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service revenue;" and
- Amortization of capitalized software is recorded within the heading "Cost of service revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Year Ended December 31,			
	2013		2012	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 54,837	0.8%	$ 42,938	0.7%
Amortization of intangible assets, continuing operations	17,906	0.3	20,176	0.3
Depreciation and amortization, continuing operations	72,743	1.1	63,114	1.0
Depreciation and amortization, discontinued operations	2	—	590	—
Amortization recorded as reduction of service revenue	2,914	—	1,571	—
Amortization of capitalized software recorded as cost of service revenue	18,207	0.3	13,489	0.2
	$ 93,866	1.4%	$ 78,764	1.2%

Interest Expense

Interest expense was $52.1 million for the year ended December 31, 2013, compared with $16.8 million for the year ended December 31, 2012. Interest expense includes non-cash interest expense relating to the amortization of the discount on our long-term debt obligations, which amounted to $22.8 million and $5.9 million for the years ended December 31, 2013 and 2012, respectively. The increase in interest expense for the year ended December 31, 2013, was primarily due to our issuance of $550.0 million aggregate principal amount 1.125% cash convertible senior notes due 2020 (the 1.125% Notes) in the first quarter of 2013. Interest expense in 2013 also included the immediate recognition of approximately $6 million in debt issuance costs associated with this transaction. The remaining fees associated with that issuance, amounting to approximately $12 million, are being amortized over the life of the 1.125% Notes.

For the year ended December 31, 2013, interest expense also includes amounts relating to lease financing transactions executed in the second quarter of 2013. As described in further detail Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 12 "Long-Term Debt," lease payments under these transactions adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income.

Other Expenses, Net

Other expenses, net increased to $3.3 million for the year ended December 31, 2013, from $0.9 million for the year ended December 31, 2012. Other expenses, net include primarily gains or losses associated with changes in the fair value of our derivative financial instruments. In the second quarter of 2013 we recorded a one-time non-cash charge of $3.9 million related to the change in fair value of warrants issued in connection with the 1.125% Notes. We settled the interest rate swap in the second quarter of 2013, which resulted in a gain of $0.4 million, partially offsetting the $3.9 million charge described above. Other expenses (income) was $0.9 million for the year ended December 31, 2012, primarily due to the change in fair value of the interest rate swap.

Income Taxes

The provision for income taxes in continuing operations is recorded at an effective rate of 44.8% for the year ended December 31, 2013, compared with 45.0% for the year ended December 31, 2012.

Results of Operations, Continuing Operations

Year Ended December 31, 2012 Compared with the Year Ended December 31, 2011

Premium Revenue

We earned premium revenues of $5.5 billion, up 32% in the year ended December 31, 2012, compared with the year ended December 31, 2011, primarily due to a shift in member mix to populations generating higher premium revenue PMPM, benefit expansions, and an increase in membership. Medicare premium revenue was $468 million for the year ended December 31, 2012, compared with $388 million for the year ended December 31, 2011.

Growth in our ABD membership led to higher premium revenue PMPM in 2012. ABD membership, as a percent of total membership, increased approximately 25% year over year. Premium revenue PMPM also increased in the year ended December 31, 2012, as a result of the inclusion of revenue from pharmacy benefit for our Ohio health plan effective October 1, 2011, and as a result of the inclusion of revenue from inpatient facility and pharmacy benefits across all of our Texas health plan membership effective March 1, 2012.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Year Ended December 31,					
	2012			2011		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 3,423,751	$ 161.67	68.6%	$ 2,587,380	$ 136.72	70.6%
Pharmacy	835,830	39.47	16.7	418,019	22.09	11.4
Capitation	552,136	26.07	11.1	505,892	26.73	13.8
Direct delivery	33,920	1.60	0.7	29,683	1.57	0.8
Other	145,551	6.87	2.9	123,187	6.51	3.4
	$ 4,991,188	$ 235.68	100.0%	$ 3,664,161	$ 193.62	100.0%

The medical care ratio increased to 90.0% for the year ended December 31, 2012, compared with 87.0% for the year ended December 31, 2011.

Individual Health Plan Analysis

The medical care ratio of the California health plan increased to 91.1% for the year ended December 31, 2012, from 86.9% for the year ended December 31, 2011. As noted above, margins on newly transitioned ABD members were considerably less than those experienced by the Company overall.

The medical care ratio of the Florida health plan decreased to 85.3% for the year ended December 31, 2012, from 91.9% for the year ended December 31, 2011, due to a premium rate increase effective September 1, 2011, the re-contracting of portions of the health plan's specialty care network, lower inpatient utilization and lower pharmacy costs.

The medical care ratio of the Michigan health plan increased to 88.3% for the year ended December 31, 2012, from 86.3% for the year ended December 31, 2011. The deterioration in the Michigan plan's medical care ratio was the result of higher pharmacy and fee for service costs. We received a blended rate increase in Michigan of approximately 2%, effective October 1, 2012.

The medical care ratio of the New Mexico health plan increased to 87.0% for the year ended December 31, 2012, from 84.4% for the year ended December 31, 2011, primarily as a result of lower premiums and higher inpatient facility costs. The New Mexico health plan received a premium rate reduction of approximately 2.5% effective July 1, 2011.

The medical care ratio of the Ohio health plan increased to 88.6% for the year ended December 31, 2012, from 84.1% for the year ended December 31, 2011. The increase in the Ohio health plan's medical care ratio was partially the result of a 2% rate reduction effective January 1, 2012, together with the assumption of the lower margin pharmacy benefit effective October 1, 2011.

The medical care ratio of the Texas health plan decreased to 93.7% for the year ended December 31, 2012, from 95.1% for the year ended December 31, 2011. Membership and premium revenue increased significantly at the Texas health plan in 2012 as a result of the transition of large numbers of ABD, TANF and CHIP members from fee-for-service reimbursement into managed care effective March 1, 2012. Also on that date inpatient facility and pharmacy benefits that had previously been reimbursed through fee for service for managed care members were transitioned into managed care contracts; further increasing premium revenue and related medical costs.

The medical care ratio of the Utah health plan increased to 82.3% for the year ended December 31, 2012, from 78.1% for the year ended December 31, 2011. The Utah health plan received a premium rate reduction of approximately 2% effective July 1, 2012.

The medical care ratio of the Washington health plan increased to 86.8% for the year ended December 31, 2012 from 85.4% for the year ended December 31, 2011. The higher premium revenue PMPM associated with the ABD membership, however, offset the increased medical care ratio so that income from operations was consistent between 2012 and 2011.

The medical care ratio of the Wisconsin health plan increased to 96.2% for the year ended December 31, 2012 from 92.5% for the year ended December 31, 2011, primarily due to increases in inpatient costs. The plan has implemented provider contracting initiatives and new utilization management techniques as a part of its efforts to improve profitability.

Health Plans Segment Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Year Ended December 31, 2012						
	Member Months(2)	Premium Revenue (1)		Medical Care Costs (1)		MCR (3)	Medical Margin
		Total	PMPM	Total	PMPM		
California	4,177	$ 665,600	$ 159.36	$ 606,494	$ 145.20	91.1%	$ 59,106
Florida	850	228,832	269.36	195,226	229.80	85.3	33,606

Texas	1,616	402,178	248.99	382,390	236.74	95.1	19,788
Utah	972	287,290	295.51	224,513	230.94	78.1	62,777
Washington	4,171	808,458	193.85	690,513	165.57	85.4	117,945
Wisconsin	488	69,552	142.47	64,346	131.81	92.5	5,206
Other(4)	—	8,115	—	39,556	—	—	(31,441)
	18,925	$ 4,211,493	$ 222.54	$ 3,664,161	$ 193.62	87.0%	$ 547,332

(1) Premium revenue for the Missouri health plan was $114.4 million and $229.6 million for the years ended December 31, 2012 and 2011, respectively. Medical care costs for the Missouri health plan were $105.6 million and $195.8 million for the years ended December 31, 2012 and 2011, respectively. These amounts are excluded from the tables above.

(2) A member month is defined as the aggregate of each month's ending membership for the period presented.

(3) "MCR" represents medical costs as a percentage of premium revenue.

(4) "Other" medical care costs include primarily medically related administrative costs of the parent company, and direct delivery costs.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Year Ended December 31,	
	2012	2011
	(In thousands)	
Service revenue before amortization	$ 189,281	$ 167,269
Amortization recorded as reduction of service revenue	(1,571)	(6,822)
Service revenue	187,710	160,447
Cost of service revenue	141,208	143,987
General and administrative costs	17,648	9,270
Amortization of customer relationship intangibles	5,127	5,127
Operating income	$ 23,727	$ 2,063

Operating income for our Molina Medicaid Solutions segment increased $21.7 million for the year ended December 31, 2012, compared with the same prior year period. This improvement was primarily the result of stabilization of our newest contracts in Idaho and Maine.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses increased to 8.8% of total revenue for the year ended December 31, 2012, compared with 8.7% for the year ended December 31, 2011.

Premium Tax Expense

The premium tax ratio decreased to 2.8% for the year ended December 31, 2012, compared with 3.5% for December 31, 2011. The decrease in 2012 was primarily due to the reduction of premium taxes at the Michigan and California health plans effective

in 2012, and the growth in revenue at our Texas health plan, which is subject to a lower premium tax rate (measured as a percentage of premium revenue plus premium tax revenue) than our consolidated average.

Depreciation and Amortization

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Year Ended December 31,			
	2012		2011	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 42,938	0.7%	$ 30,803	0.7%
Amortization of intangible assets, continuing operations	20,176	0.3	17,450	0.4
Depreciation and amortization, continuing operations	63,114	1.0	48,253	1.1
Depreciation and amortization, discontinued operations	590	—	2,437	—
Amortization recorded as reduction of service revenue	1,571	—	6,822	0.1
Amortization of capitalized software recorded as cost of service revenue	13,489	0.2	16,871	0.4
	$ 78,764	1.2%	$ 74,383	1.6%

Interest Expense

Interest expense was $16.8 million for the year ended December 31, 2012, compared with $15.5 million for the year ended December 31, 2011. Interest expense includes non-cash interest expense relating to our convertible senior notes, which amounted to $5.9 million and $5.5 million for the years ended December 31, 2012 and 2011, respectively.

Other Expenses, Net

Other expenses, net includes primarily gains or losses associated with changes in the fair value of our derivative financial instruments. Other expenses, net was $0.9 million for the year ended December 31, 2012, primarily due to the change in fair value of the interest rate swap.

Income Taxes

Income tax expense was recorded at an effective rate of 45.0% for the year ended December 31, 2012, compared with 35.7% for the year ended December 31, 2011. The effective rate for the year ended December 31, 2012 is higher than our statutory rate primarily due to nondeductible expenses primarily relating to compensation and changes in the fair value of contingent consideration.

Acquisitions

For details relating to business combinations, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 4, "Business Combinations."

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue a short time before we pay for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner

consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of December 31, 2013, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income increased to $6.9 million for the year ended December 31, 2013, compared with $5.1 million for the year ended December 31, 2012, primarily due to the increase in invested assets. Our annualized portfolio yields for the years ended December 31, 2013, 2012, and 2011 were 0.4%, 0.5%, and 0.6%, respectively.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use. See further discussion in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, Note 20, "Commitments and Contingencies," under the subheading "Regulatory Capital and Dividend Restrictions."

Liquidity

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Year Ended December 31,		
	2013	2012	Change
	(In thousands)		
Net cash provided by operating activities	$ 190,083	$ 347,784	$ (157,701)
Net cash used in investing activities	(543,311)	(93,584)	(449,727)
Net cash provided by financing activities	493,353	47,743	445,610
Net increase in cash and cash equivalents	$ 140,125	$ 301,943	$ (161,818)

	Year Ended December 31,		
	2012	2011	Change
	(In thousands)		
Net cash provided by operating activities	$ 347,784	$ 225,395	$ 122,389
Net cash used in investing activities	(93,584)	(236,927)	143,343
Net cash provided by financing activities	47,743	49,473	(1,730)
Net increase in cash and cash equivalents	$ 301,943	$ 37,941	$ 264,002

Operating Activities. Cash provided by operating activities was $190.1 million in 2013 compared with $347.8 million in 2012, a decrease of $157.7 million. In 2013, deferred revenue was a use of cash from operations amounting to $19.6 million, compared with a source of cash amounting to $90.9 million in 2012. This was primarily due to an advance premium payment received by our Washington health plan in December 2012, with no comparable advance premium receipts in December 2013. In addition to the change in deferred revenue, cash provided by operating activities decreased due to the increase in receivables, primarily as a result of increased premium revenues in 2013. The aggregate increase in receivables was partially offset by increases in amounts payable to certain providers on behalf of various state agencies under which we assume no financial risk.

In 2012, cash provided by operating activities was $347.8 million compared with $225.4 million for 2011, an increase of $122.4 million. In 2012, deferred revenue was a source of cash from operations amounting to $90.9 million, compared with a use of cash amounting to $8.2 million in 2011. This was primarily due to an advance premium payment received by our Washington health plan in December 2012, with no comparable advance premium receipts in December 2011.

Investing Activities. Cash used in investing activities increased significantly to $543.3 million in 2013, compared with $93.6 million in 2012. This $449.7 million increase was primarily due to greater purchases of investments in 2013, a result of the cash generated in financing activities, described below. In addition to increased purchases of investments, we paid $61.5 million in connection with business combinations in 2013, with no comparable activity in 2012.

In 2012, cash used in investing activities was $93.6 million compared with $236.9 million in 2011, a decrease of $143.3 million. This decrease was primarily due to the change in cash paid in business combinations resulting from our fourth quarter 2011 acquisition of the Molina Center amounting to $81.0 million, with no comparable activity in 2012.

Financing Activities. Cash provided by financing activities was $493.4 million in 2013 compared with $47.7 million in 2012, an increase of $445.6 million. The increase in cash provided by financing activities was primarily due to 2013 activity including $538.0 million in proceeds we received from our offering of 1.125% Notes, $158.7 million received from sale-leaseback transactions, and $75.1 million from the sale of warrants, partially offset by $149.3 million paid for the purchased call option relating to 1.125% Notes, $52.7 million paid for repurchases of our common stock, $47.5 million used to repay our term loan, and $40.0 million used to repay our credit facility. Our credit facility was terminated in early 2013 when the balance was repaid.

In 2012, cash provided by financing activities was $47.7 million compared with $49.5 million in 2011, a decrease of nearly $1.8 million. Cash provided from net borrowings under our credit facility in 2012 amounting to $40.0 million was consistent with cash provided from the $48.6 million term loan in 2011 used to finance the acquisition of the Molina Center.

Financial Condition

On a consolidated basis, at December 31, 2013, we had working capital of $745.7 million compared with $521.1 million at December 31, 2012. At December 31, 2013, we had cash and investments of $1,712.9 million, compared with $1,196.1 million of cash and investments at December 31, 2012.

We expect our $187.0 million aggregate principal amount 3.75% convertible senior notes due 2014 (the 3.75% Notes) to be outstanding until their October 1, 2014 maturity date; we intend to repay the $187.0 million principal amount due on that date from available cash at the parent company. Additionally, we anticipate that we will pay the remaining balance due for our recent New Mexico and South Carolina acquisitions in the second quarter of 2014 from available cash at the parent company. We expect this amount to be approximately $20 million, which represents our $57.5 million contingent consideration liability as of December 31, 2013, less approximately $38 million paid to one of the sellers in January 2014.

We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Health Care Federal Excise Tax. One notable provision of the ACA is an excise tax or annual fee that applies to most health plans, including commercial health plans and Medicaid managed care plans like Molina Healthcare. While characterized as a “fee” in the text of the ACA, the intent of Congress was to impose a broad-based health insurance industry excise tax, with the understanding that the tax could be passed on to consumers, most likely through higher commercial insurance premiums.

However, because Medicaid is a government funded program, Medicaid health plans have no alternative but to look to their respective state partners for payment to offset the impact of this tax. In Medicaid, capitation rates paid to managed care plans are required to be developed using principles of actuarial soundness. Actuarial soundness requires that the full costs of doing business, including the costs of both federal and state taxes, be considered and factored into the applicable payment to the health plan. Thus, for Medicaid managed care plans like Molina Healthcare, the excise tax should be included in the plans’ capitated rates. However, because of the novelty of this new tax, states have been slow to factor the tax into the premiums paid to us. Moreover, because the tax will be based on a health plan’s market share as applied to a total excise tax base of $8 billion in 2014 (and rising substantially thereafter), there is uncertainty regarding the precise amount of the tax that will be assessed on us.

While we and others in the health plan industry are working with Congress to delay and/or repeal the tax on Medicaid plans, we are also working with our state partners to obtain reimbursement for the full economic impact of the excise tax. However, state budget constraints, inaccurate actuarial calculations, political opposition to the ACA, inadequate federal oversight of actuarial soundness, and market competition, could result in a failure to receive reimbursement for the full economic impact of the tax.

Currently, we project that the excise tax assessed on us in August 2014 will be approximately $85 million. Because this amount is not deductible for income tax purposes, our net income will be reduced by the full amount of the assessment. For example, based on our total net income for fiscal years 2013 and 2012 of approximately $53 million and $10 million, respectively, the excise tax could exceed the entire amount of our earnings.

Our efforts at obtaining relief from the tax are complicated by the fact that any amounts paid to us by the states in reimbursement of the excise tax must include a gross up for the absence of tax deductibility of the excise tax and applicable state premium taxes; and the amount paid for the gross up will itself be subject to the excise tax, its related non-deductibility and applicable state premium taxes. In other words, when states reimburse us for the amount of the excise tax, that reimbursement will itself be subject to income tax, the excise tax, and applicable state premium taxes. If our estimate of an $85 million excise tax liability in 2014 is correct, and if our estimate of the amount allocable to Medicaid of $79 million is correct,

states will need to pay us an incremental amount of approximately $128 million in revenue during 2014 to account for the excise tax and the absence of its tax deductibility. On a percentage basis, we anticipate that states will need to increase our Medicaid premium rates by approximately 1.4% to reimburse us for the excise tax we will owe (based upon our estimated pro rata share of total industry revenue in 2013). In addition, we estimate that states will need to increase our Medicaid premium rates by a further 0.9% to make us whole for the lack of tax deductibility of the excise tax, representing an estimated overall premium rate increase of approximately 2.3%.

As of February 26, 2014, we have contractual commitments from the states of Washington and Wisconsin to reimburse us by way of a lump sum payment for the full economic impact of the excise tax in their respective states. While all of our remaining states have acknowledged the actuarial requirement that they reimburse us for the federal excise tax, and its related income tax effects, no state other than Washington and Wisconsin has contractually committed to do so. Furthermore, states which have acknowledged the requirement to include the impact of the tax in our premium payments may argue that current premium rates will remain actuarially sound even if no adjustment is made to those rates. The tax is required to be paid in full by September 30, 2014. We are continuing to work with our states to address the issue of fully grossed up reimbursement. If we are unable to obtain either premium increases or direct reimbursements to offset the impact of the tax on a fully grossed up basis, our business, financial condition, cash flows or results of operations could be materially adversely affected.

Regulatory Capital and Dividend Restrictions

For a comprehensive discussion of our regulatory capital requirements and dividend restrictions, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 20 "Commitments and Contingencies."

Future Sources and Uses of Liquidity

For a comprehensive discussion of our debt instruments, including our convertible senior notes transaction in the first quarter of 2013, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 12 "Long-Term Debt."

For a discussion of our shelf registration statement and our securities repurchase programs, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 15, "Stockholders' Equity."

Critical Accounting Estimates

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting estimates relate to:

- The determination of medical claims and benefits payable for our Health Plans segment (see discussion below).
- Health Plans segment contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract. For a comprehensive discussion of this topic, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."
- Health Plans segment quality incentives that allow us to recognize incremental revenue if certain quality standards are met. For a comprehensive discussion of this topic, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."
- The recognition of revenue and costs associated with our Molina Medicaid Solutions segment. For a comprehensive discussion of this topic, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies."

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	December 31,		
	2013	2012	2011
	(In thousands)		
Fee-for-service claims incurred but not paid (IBNP)	$ 424,173	$ 377,614	$ 301,020
Pharmacy payable	45,037	38,992	26,178
Capitation payable	20,267	49,066	53,532
Other (1)	180,310	28,858	21,746
	$ 669,787	$ 494,530	$ 402,476

(1) "Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. As of December 31, 2013, we recorded non-risk provider payables relating to such intermediary arrangements of approximately $151.3 million.

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are incurred but not paid (IBNP). Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $424.2 million of our total medical claims and benefits payable of $669.8 million as of December 31, 2013. Excluding amounts that we anticipate paying on behalf of certain capitated providers in Ohio (which we will subsequently withhold from those provider's monthly capitation payments), our IBNP liability at December 31, 2013, was $413.8 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of December 31, 2013 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding December 31, 2013, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

Increase (Decrease) in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 155,752
(4)%	103,834
(2)%	51,917
2%	(51,917)
4%	(103,834)
6%	(155,752)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of December 31, 2013 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (80,787)
(4)%	(53,858)
(2)%	(26,929)
2%	26,929
4%	53,858
6%	80,787

The following per-share amounts are based on a combined federal and state statutory tax rate of 37%, and 46.9 million diluted shares outstanding for the year ended December 31, 2013. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at December 31, 2013, net income for the year ended December 31, 2013 would increase or decrease by approximately $16.4 million, or $0.35 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at December 31, 2013, net income for the year ended December 31, 2013 would increase or decrease by approximately $8.5 million, or $0.18 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $81.8 million, or $1.74 per diluted share, and $42.4 million, or $0.91 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $16.4 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states

in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development.

We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date.

The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 11, "Medical Claims and Benefits Payable," for additional information regarding the factors used to determine our changes in estimates of IBNP for all periods presented in the accompanying consolidated financial statements.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts displayed for “Components of medical care costs related to: Prior periods” represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year ended December 31,		
	2013	2012	2011
	(Dollars in thousands, except per-member amounts)		
Balances at beginning of period	$ 494,530	$ 402,476	$ 354,356
Components of medical care costs related to:			
Current period	5,434,443	5,136,055	3,911,803

Number of claims received during the period	21,317,500	20,842,400	17,207,500
Billed charges of claims received during the period	$ 21,414,600	$ 19,429,300	$ 14,306,500

Commitments and Contingencies

We are not an obligor to or guarantor of any indebtedness of any other party, except for our obligation to pay benefits under policies in-force relating to an insurance subsidiary we sold in the first quarter of 2012 in the event such benefits are not paid by the reinsurer or current owner. This transaction is more fully described in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 20, "Commitments and Contingencies."

We are not a party to off-balance sheet financing arrangements, except for operating leases which are disclosed in Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 20 ,"Commitments and Contingencies."

Contractual Obligations

In the table below, we present our contractual obligations as of December 31, 2013. Some of the amounts we have included in this table are based on management's estimates and assumptions about these obligations, including their duration, the possibility of renewal, anticipated actions by third parties, and other factors. Because these estimates and assumptions are necessarily subjective, the contractual obligations we will actually pay in future periods may vary from those reflected in the table. Amounts are in thousands.

	Total	2014	2015-2016	2017-2018	2019 and Beyond
Principal amount of convertible senior notes (1)	$ 737,000	$ 187,000	$ —	$ —	$ 550,000
Medical claims and benefits payable	669,787	669,787	—	—	—
Lease financing obligations	392,021	11,065	23,136	24,545	333,275
Operating leases	109,038	29,117	39,086	27,266	13,569
Lease financing obligations - related party	84,974	3,330	14,018	15,088	52,538
Contingent consideration liability (2)	57,548	57,548	—	—	—
Interest on long-term debt	42,642	11,447	12,375	12,375	6,445
Purchase commitments	27,522	21,548	5,974	—	—
Total contractual obligations	$ 2,120,532	$ 990,842	$ 94,589	$ 79,274	$ 955,827

(1) Represents the principal amounts due on our 1.125% Cash Convertible Senior Notes due 2020 and our 3.75% Convertible Senior Notes due 2014.

(2) Represents the estimate of contingent consideration due to the sellers in connection with two business combinations completed in 2013, of which $38.1 million was paid in January 2014. The remaining balance is payable in 2014. For further information, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 4, "Business Combinations."

As of December 31, 2013, we have recorded approximately $8.0 million of unrecognized tax benefits. The above table does not contain this amount because we cannot reasonably estimate when or if such amount may be settled. For further information, refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 14, "Income Taxes."

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Quantitative and Qualitative Disclosures About Market Risk

Refer to Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 2, "Significant Accounting Policies," Note 5, "Fair Value Measurements," and Note 6, "Investments."

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Item 8. Financial Statements and Supplementary Data

INDEX TO FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited the accompanying consolidated balance sheets of Molina Healthcare, Inc. (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2013. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Molina Healthcare, Inc. at December 31, 2013 and 2012, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Molina Healthcare, Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated February 26, 2014 expressed an unqualified opinion thereon.

MOLINA HEALTHCARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals, and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment.

Our Health Plans segment consists of health plans in 11 states, and includes our direct delivery business. As of December 31, 2013, these health plans served approximately 1.9 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization (HMO). Our direct delivery business consists primarily of the operation of primary care clinics in California.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new request for proposals (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, West Virginia, and the U.S. Virgin Islands, and drug rebate administration services in Florida.

Market Updates - Health Plans Segment

California. In the fourth quarter of 2013, our California health plan entered into a settlement agreement with the California Department of Health Care Services. The agreement settled rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in California's Medicaid program. See Note 20, "Commitments and Contingencies," for further information.

Florida. In the fourth quarter of 2013, our Florida health plan and the Florida Agency for Health Care Administration (AHCA), agreed to a settlement under which we have been awarded contracts to serve three regions under the Florida Statewide Medicaid Managed Care Managed Medical Assistance Invitation to Negotiate. The contracts are expected to commence in the second half of 2014. During 2014 we will also cease to serve members in three separate regions. As a result of these changes, we expect to experience a moderate increase in membership at our Florida health plan in 2014.

Also in the fourth quarter of 2013, we began to serve approximately 3,000 members under the Florida's Statewide Medicaid Managed Care Long-Term Care Program. This program includes long-term care benefits, including institutional and home and community-based services.

New Mexico. On August 1, 2013 our New Mexico health plan closed on its acquisition of the Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program, under which Lovelace's Medicaid members became Molina Healthcare Medicaid members. See Note 4, "Business Combinations," for further information.

In the first quarter of 2013, we announced that our New Mexico health plan was selected by the New Mexico Human Services Department (HSD) to participate in the new Centennial Care program, which replaced and consolidated the state's legacy Medicaid programs effective January 1, 2014. In addition to continuing to provide physical and acute health care services, under the new program our New Mexico health plan expanded its services to provide behavioral health and long-term care services. The selection of our New Mexico health plan was made by HSD pursuant to its RFP issued in August 2012.

South Carolina. In the third quarter of 2013, we entered into an agreement with Community Health Solutions of America, Inc. (CHS) to acquire certain assets, including the rights to convert certain of CHS' Medicaid members covered by South Carolina's full-risk Medicaid managed care program. See Note 4, "Business Combinations," for further information.

Market Updates - Molina Medicaid Solutions Segment

Maine. In the fourth quarter of 2013, Molina Medicaid Solutions of Maine entered into an agreement which, among other things, extended our MMIS contract with the state of Maine through August 2020.

U.S. Virgin Islands and West Virginia. In 2012, Molina Medicaid Solutions of West Virginia secured a partnership with the United States Virgin Islands (USVI). The partnership involves processing the USVI's Medicaid claims using West Virginia's certified Medicaid management information system. On August 1, 2013 the system went live, marking the first Medicaid management information system (MMIS) for a U.S. Territory, and the first to be shared between two government agencies on a single business processing platform.

Louisiana. In 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intended to award the contract for a replacement MMIS to a different vendor, CNSI. However, in March 2013, the state of Louisiana cancelled its contract award to CNSI. CNSI is currently challenging the contract cancellation. The state has informed us that we will continue to perform under our current contract until a successor is named. At such time as a new RFP may be issued, we intend to respond to the state's RFP. For the year ended December 31, 2013, our revenue under the Louisiana MMIS contract was $40.5 million, or 19.8% of total service revenue. So long as our Louisiana MMIS contract continues, we expect to recognize $40 million of service revenue annually under this contract.

Consolidation

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries, and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. See Note 19, "Variable Interest Entities," for more information regarding these variable interest entities. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the periods presented have been included; such adjustments consist of normal recurring adjustments. All significant inter-company balances and transactions have been eliminated in consolidation. Financial information related to subsidiaries acquired during any year is included only for periods subsequent to their acquisition.

Presentation and Reclassifications

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal on June 30, 2012. Effective June 30, 2013, the transition obligations associated with that contract terminated. Therefore, we have reclassified the results relating to the Missouri health plan to discontinued operations for all periods presented. These results are presented in a single line item, net of taxes, in the consolidated statements of income. Additionally, we abandoned our equity interests in the Missouri health plan during the second quarter of 2013, resulting in the recognition of a tax benefit of $9.5 million, which is also included in discontinued operations in the consolidated statements of income. The Missouri health plan's premium revenues amounted to $0.2 million, $114.4 million and $229.6 million for the years ended December 31, 2013, 2012 and 2011, respectively.

We have reclassified certain amounts in the 2012 consolidated balance sheet, and 2012 and 2011 statements of income and cash flows to conform to the 2013 presentation, including the presentation of premium tax revenue as a separate line item in the consolidated statements of income.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Principal areas requiring the use of estimates include:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The determination of medical claims and benefits payable of our Health Plans segment;
- The valuation of certain investments;
- Settlements under risk or savings sharing programs;
- The assessment of deferred contract costs, deferred revenue, long-lived and intangible assets, and goodwill for impairment;
- The determination of professional and general liability claims, and reserves for potential absorption of claims unpaid by insolvent providers;
- The determination of reserves for the outcome of litigation;
- The determination of valuation allowances for deferred tax assets; and

- The determination of unrecognized tax benefits.

2. Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that are both readily convertible into known amounts of cash and have a maturity of three months or less on the date of purchase.

Investments

Our investments are principally held in debt securities, which are grouped into two separate categories for accounting and reporting purposes: available-for-sale securities, and held-to-maturity securities. Available-for-sale securities are recorded at fair value and unrealized gains and losses, if any, are recorded in stockholders' equity as other comprehensive income, net of applicable income taxes. Held-to-maturity securities are recorded at amortized cost, which approximates fair value, and unrealized holding gains or losses are not generally recognized. Realized gains and losses and unrealized losses judged to be other than temporary with respect to available-for-sale and held-to-maturity securities are included in the determination of net income. The cost of securities sold is determined using the specific-identification method, on an amortized cost basis.

Our investment policy requires that all of our investments have final maturities of five years or less (excluding auction rate and variable rate securities where interest rates may be periodically reset), and that the average maturity be two years or less. Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. Declines in interest rates over time will reduce our investment income.

In general, our available-for-sale securities are classified as current assets without regard to the securities' contractual maturity dates because they may be readily liquidated. Our auction rate securities are classified as non-current assets. For comprehensive discussions of the fair value and classification of our current and non-current investments, including auction rate securities, see Note 5, "Fair Value Measurements," Note 6, "Investments," and Note 10, "Restricted Investments."

Receivables

Receivables are readily determinable, our creditors are primarily state governments, and our allowance for doubtful accounts is immaterial. Any amounts determined to be uncollectible are charged to expense when such determination is made. See Note 7, "Receivables."

Property, Equipment, and Capitalized Software

Property and equipment are stated at historical cost. Replacements and major improvements are capitalized, and repairs and maintenance are charged to expense as incurred. Furniture and equipment are generally depreciated using the straight-line method over estimated useful lives ranging from three to seven years. Software developed for internal use is capitalized. Software is generally amortized over its estimated useful life of three years. Leasehold improvements are amortized over the term of the lease, or over their useful lives from five to 10 years, whichever is shorter. Buildings are depreciated over their estimated useful lives of 31.5 to 40 years. See Note 8, "Property, Equipment, and Capitalized Software."

As discussed below, the costs associated with certain of our Molina Medicaid Solutions segment equipment and software are capitalized and recorded as deferred contract costs. Such costs are amortized on a straight-line basis over the shorter of the useful life or the contract period.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is all recorded in "Depreciation and Amortization" in the consolidated statements of income. Depreciation and amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of income as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service revenue;" and
- Amortization of capitalized software is recorded within the heading "Cost of service revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of income, regardless of whether the item appears as depreciation and amortization, a reduction of revenue, or as cost of service revenue.

	Year Ended December 31,		
	2013	2012	2011
	(In thousands)		
Depreciation, and amortization of capitalized software, continuing operations	$ 54,837	$ 42,938	$ 30,803
Amortization of intangible assets, continuing operations	17,906	20,176	17,450
Depreciation and amortization, continuing operations	72,743	63,114	48,253
Depreciation and amortization, discontinued operations	2	590	2,437
Amortization recorded as reduction of service revenue	2,914	1,571	6,822
Amortization of capitalized software recorded as cost of service revenue	18,207	13,489	16,871
Total	$ 93,866	$ 78,764	$ 74,383

Long-Lived Assets, including Intangible Assets

Long-lived assets comprise primarily property, equipment, capitalized software and intangible assets. Finite-lived, separately-identifiable intangible assets are acquired in business combinations and are assets that represent future expected benefits but lack physical substance (such as purchased contract rights and provider contracts). Intangible assets are initially recorded at their fair values and are then amortized on a straight-line basis over their expected useful lives, generally between one and 15 years.

Identifiable intangible assets associated with Molina Medicaid Solutions are classified as either contract backlog or customer relationships as follows:

- The contract backlog intangible asset comprises all contractual cash flows anticipated to be received during the remaining contracted period for each specific contract relating to work that was performed prior to acquisition. Because each acquired contract constitutes a single revenue stream, amortization of the contract backlog intangible is recorded to contra-service revenue so that amortization is matched to any revenues associated with contract performance that occurred prior to the acquisition date. The contract backlog intangible asset is amortized on a straight-line basis for each specific contract over periods generally ranging from one to six years. The contract backlog intangible assets will be fully amortized in 2015.

- The customer relationship intangible asset comprises all contractual cash flows that are anticipated to be received during the option periods of each specific contract as well as anticipated renewals of those contracts. The customer relationship intangible is amortized on a straight-line basis for each specific contract over periods generally ranging from four to nine years.

Our intangible assets are subject to impairment tests when events or circumstances indicate that a finite-lived intangible asset's (or asset group's) carrying value may not be recoverable. Consideration is given to a number of potential impairment indicators. For example, our health plan subsidiaries have generally been successful in obtaining the renewal by amendment of their contracts in each state prior to the actual expiration of their contracts. However, there can be no assurance that these contracts will continue to be renewed as in the case of our Missouri health plan, described below.

Following the identification of any potential impairment indicators, to determine whether an impairment exists, we would compare the carrying amount of a finite-lived intangible asset with the undiscounted cash flows that are expected to result from the use of the asset or related group of assets. If it is determined that the carrying amount of the asset is not recoverable, the amount by which the carrying value exceeds the estimated fair value is recorded as an impairment.

On February 17, 2012, we received notification that our Missouri Health plan's contract with the state of Missouri would expire without renewal on June 30, 2012. As a result, we recorded a total non-cash impairment charge of $64.6 million in the fourth quarter of 2011, of which $6.1 million related to finite-lived intangible assets, and $58.5 million related to goodwill, discussed below. The impairment charge comprised substantially all intangible assets relating to contract rights and licenses, and provider networks recorded at the time of our acquisition of the Missouri health plan in 2007. The non-cash impairment charge is included in the discontinued operations line item, net of tax, in the statement of income. No significant impairment charges relating to long-lived assets, including intangible assets, were recorded in the years ended December 31, 2013, and 2012.

Goodwill

Goodwill represents the amount of the purchase price in excess of the fair values assigned to the underlying identifiable net assets of acquired businesses. Goodwill is not amortized, but is subject to an annual impairment test. Tests are performed more frequently if events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount.

To determine whether goodwill is impaired, we measure the fair values of our reporting units and compare them to the carrying values of the respective units, including goodwill. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared to the carrying amount of goodwill to determine whether goodwill is impaired.

We estimate the fair values of our reporting units using discounted cash flows. To determine fair values, we must make assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value, and discount rates.

In connection with our Missouri health plan as described above, we recorded a non-cash impairment charge of $58.5 million in the fourth quarter of 2011, which is included in the discontinued operations line item, net of taxes, in the statement of income. The impairment charge comprised all of the goodwill recorded at the time of our acquisition of the Missouri health plan in 2007, and was not tax deductible. No impairment charges relating to goodwill were recorded in the years ended December 31, 2013, and 2012.

Restricted Investments

Restricted investments, which consist of certificates of deposit and treasury securities, are designated as held-to-maturity and are carried at amortized cost, which approximates market value. The use of these funds is limited to specific purposes as required by each state, or as protection against the insolvency of capitated providers. We have the ability to hold our restricted investments until maturity and, as a result, we would not expect the value of these investments to decline significantly due to a sudden change in market interest rates. See Note 10, “Restricted Investments.”

Other Assets

Other assets primarily includes deferred financing costs associated with our convertible senior notes and lease financing obligations, and certain investments held in connection with our employee deferred compensation program. The deferred financing costs are being amortized on a straight-line basis over the terms of the convertible senior notes and lease financing obligations.

Delegated Provider Insolvency

Circumstances may arise where providers to whom we have delegated risk are unable to pay claims they have incurred with third parties in connection with referral services (including hospital inpatient services) provided to our members. The inability of delegated providers to pay referral claims presents us with both immediate financial risk and potential disruption to member care. Depending on states’ laws, we may be held liable for such unpaid referral claims even though the delegated provider has contractually assumed such risk. Additionally, competitive pressures may force us to pay such claims even when we have no legal obligation to do so. To reduce the risk that delegated providers are unable to pay referral claims, we monitor the operational and financial performance of such providers. We also maintain contingency plans that include transferring members to other providers in response to potential network instability.

In certain instances, we have required providers to place funds on deposit with us as protection against their potential insolvency. These reserves are frequently in the form of segregated funds received from the provider and held by us or placed in a third-party financial institution. These funds may be used to pay claims that are the financial responsibility of the provider in the event the provider is unable to meet these obligations. Additionally, we have recorded liabilities for estimated losses arising from provider instability or insolvency in excess of provider funds on deposit with us. Such liabilities were not material at December 31, 2013 and 2012.

Premium Revenue

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. For the year ended December 31, 2013, we received approximately 97% of our premium revenue as a fixed amount per member per month (PMPM), pursuant to our contracts with state Medicaid agencies, Medicare and other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

The following table summarizes premium revenue from continuing operations for the periods indicated:

	Year Ended December 31,					
	2013		2012		2011	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
	(Dollars in thousands)					
California	$ 749,755	12.1%	$ 665,600	12.0%	$ 567,677	13.5%
Florida	264,998	4.3	228,832	4.1	203,904	4.8
Illinois	8,121	0.1	—	—	—	—
Michigan	676,000	11.0	646,551	11.7	623,394	14.8
New Mexico	446,758	7.2	321,853	5.8	328,706	7.8
Ohio	1,098,795	17.8	1,095,137	19.7	912,219	21.7
Texas	1,291,001	20.9	1,233,621	22.2	402,178	9.5
Utah	310,895	5.0	298,392	5.4	287,290	6.8
Washington	1,168,405	18.9	974,712	17.6	808,458	19.2
Wisconsin	143,465	2.3	70,678	1.3	69,552	1.7
Direct delivery	20,977	0.4	8,745	0.2	8,115	0.2
	$ 6,179,170	100%	$ 5,544,121	100%	$ 4,211,493	100%

For the year ended December 31, 2013, we recognized approximately 3% of our premium revenue in the form of "birth income" — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

(1) Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract.

These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates) our revenue earned for those periods will also change. In all of these instances our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn would lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income.

Health Plan Medical Cost Floors (Minimums), and Administrative Cost and Profit Ceilings (Maximums): A portion of certain premiums received by our California, Florida, Illinois, New Mexico, and Washington health plans may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profits exceed certain amounts. In Ohio, the state may levy sanctions on us if certain minimum amounts are not spent on defined medical care costs. In the aggregate, we recorded a liability under the terms of such contract provisions of $1.4 million and $0.3 million at December 31, 2013, and December 31, 2012, respectively.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain

specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of $2.5 million and $3.2 million pursuant to our profit-sharing agreement with the state of Texas at December 31, 2013 and December 31, 2012, respectively.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of $20.8 million and $0.3 million for anticipated Medicare risk adjustment premiums at December 31, 2013 and December 31, 2012, respectively.

(2) Quality incentives that allow us to recognize incremental revenue if certain quality standards are met.

At our New Mexico, Ohio, Texas and Wisconsin health plans, incremental revenue ranging from 0.75% to 5.00% of health plan premiums is earned if certain performance measures are met. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of December 31, 2013 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of December 31, 2013.

	Year Ended December 31, 2013				
	Maximum Available Quality Incentive Premium – Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Premium Revenue Recognized
	(In thousands)				
New Mexico	$ 3,113	$ 2,618	$ 154	$ 2,772	$ 446,758
Ohio	12,093	3,465	606	4,071	1,098,795
Texas	43,688	37,053	5,995	43,048	1,291,001
Wisconsin	4,417	2,667	2,301	4,968	143,465
	$ 63,311	$ 45,803	$ 9,056	$ 54,859	$ 2,980,019

	Year Ended December 31, 2012				
	Maximum Available Quality Incentive Premium – Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Premium Revenue Recognized
	(In thousands)

	$ 14,188	$ 10,463	$ 3,879	$ 14,342	$ 1,712,655

Medical Care Costs

Expenses related to medical care services are captured in the following categories:

- *Fee-for-service:* Nearly all hospital services and the majority of our primary care and physician specialist services are paid on a fee-for-service basis. Under all fee-for-service arrangements, we retain the financial responsibility for medical care provided. Expenses related to fee-for-service contracts are recorded in the period in which the related services are dispensed. The costs of drugs administered in a physician or hospital setting that are not billed through our pharmacy benefit manager are included in fee-for-service costs.
- *Capitation:* Many of our primary care physicians and a small portion of our specialists and hospitals are paid on a capitated basis. Under capitation contracts, we typically pay a fixed PMPM payment to the provider without regard to the frequency, extent, or nature of the medical services actually furnished. Under capitated contracts, we remain liable for the provision of certain health care services. Capitation payments are fixed in advance of the periods covered and are not subject to significant accounting estimates. These payments are expensed in the period the providers are obligated to provide services. The financial risk for pharmacy services for a small portion of our membership is delegated to capitated providers.
- *Pharmacy:* Pharmacy costs include all drug, injectibles, and immunization costs paid through our pharmacy benefit manager. As noted above, drugs and injectibles not paid through our pharmacy benefit manager are included in fee-for-service costs, except in those limited instances where we capitate drug and injectible costs.
- *Direct delivery:* Costs associated with our operation and/or management of primary care clinics and hospital services in California, Florida, New Mexico, Virginia, and Washington.
- *Other:* Other medical care costs include medically related administrative costs, certain provider incentive costs, reinsurance cost, and other health care expense. Medically related administrative costs include, for example, expenses relating to health education, quality assurance, case management, disease management, and 24-hour on-call nurses. Salary and benefit costs are a substantial portion of these expenses. For the years ended December 31, 2013, 2012, and 2011, medically related administrative costs were $153.0 million, $125.2 million, and $99.3 million, respectively.

The following table provides the details of our consolidated medical care costs from continuing operations for the periods indicated (dollars in thousands, except PMPM amounts):

	Year Ended December 31,								
	2013			2012			2011		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee-for-service	$ 3,611,529	$ 160.43	67.1%	$ 3,423,751	$ 161.67	68.6%	$ 2,587,380	$ 136.72	70.6%
Pharmacy	935,204	41.54	17.4	835,830	39.47	16.7	418,019	22.09	11.4
Capitation	603,938	26.83	11.2	552,136	26.07	11.1	505,892	26.73	13.8
Direct delivery	48,288	2.14	0.9	33,920	1.60	0.7	29,683	1.57	0.8
Other	181,165	8.05	3.4	145,551	6.87	2.9	123,187	6.51	3.4
Total	$ 5,380,124	$ 238.99	100.0%	$ 4,991,188	$ 235.68	100.0%	$ 3,664,161	$ 193.62	100.0%

The Missouri health plan's medical care costs, which are not included in the table above, amounted to $1.5 million, $105.6 million, and $195.8 million for the years ended December 31, 2013, 2012, and 2011, respectively.

Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are incurred but not paid (IBNP). Our IBNP claims reserve, as reported in our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. For further information, see Note 11, "Medical Claims and Benefits Payable."

We report reinsurance premiums as medical care costs, while related reinsurance recoveries are reported as deductions from medical care costs. We limit our risk of catastrophic losses by maintaining high deductible reinsurance coverage. We do not consider this coverage to be material because the cost is not significant and the likelihood that coverage will apply is low.

Taxes Based on Premiums

Certain of our health plans are assessed a tax based on premium revenue collected. The premium revenues we receive from these states include the premium tax assessment. We have reported these taxes on a gross basis, as premium tax revenue and as premium tax expense in the consolidated statements of income. Prior to 2013, premium tax revenue was included in premium revenue. The presentation change affected only premium revenue amounts previously reported, by reducing premium revenue for the amount now included in premium tax revenue. There is no effect on income from continuing operations, net income, or per-share amounts. This change was made to more clearly present the portion of premium revenue paid to us as a result of a related premium tax, and therefore not available to the general operations of our health plans. All prior periods presented have been adjusted to conform to this presentation.

Premium Deficiency Reserves on Loss Contracts

We assess the profitability of our contracts for providing medical care services to our members and identify those contracts where current operating results or forecasts indicate probable future losses. Anticipated future premiums are compared to anticipated medical care costs, including the cost of processing claims. If the anticipated future costs exceed the premiums, a loss contract accrual is recognized. No such accrual was recorded as of December 31, 2013, or 2012.

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI), of a MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we deliver extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. Following the completion of DDI, we generally receive a flat monthly payment for BPO services.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element, and are therefore multiple-element service arrangements.

Additionally, we evaluate each required deliverable under our multiple-element service arrangements to determine whether it qualifies as a separate unit of accounting. Such evaluation is generally based on whether the deliverable has standalone value to the customer. If the deliverable has standalone value, the arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of

fair value for the undelivered elements in the contracts. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. Therefore, absent any contingencies as discussed in the following paragraph, or contract extensions, we would recognize all revenue associated with those contracts over the initial contract period. When a contract is extended, we generally consider the extension to be a continuation of the single unit of accounting; therefore, the deferred revenue as of the extension date is recognized prospectively over the new remaining term of the contract. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances, we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts, for example. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs;
- Employee costs incurred in performing transaction services;
- Vendor costs incurred in performing transaction services;
- Costs incurred in performing required monitoring of and reporting on contract performance;
- Costs incurred in maintaining and processing member and provider eligibility; and
- Costs incurred in communicating with members and providers.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes and nondeductible compensation and other general and administrative expenses. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers. For further discussion and disclosure, see Note 14, "Income Taxes."

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Funds Prime Series — Institutional Class, and the PFM Funds Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC (PFM), a Virginia business trust registered as an open-end management investment fund. As of December 31, 2013, and 2012, our investments with PFM amounted to approximately $374 million and $428 million, respectively. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our health plan subsidiaries operate.

Risks and Uncertainties

Our profitability depends in large part on our ability to accurately predict and effectively manage medical care costs. We continually review our medical costs in light of our underlying claims experience and revised actuarial data. However, several factors could adversely affect medical care costs. These factors, which include changes in health care practices, inflation, new technologies, major epidemics, natural disasters, and malpractice litigation, are beyond our control and may have an adverse effect on our ability to accurately predict and effectively control medical care costs. Costs in excess of those anticipated could have a material adverse effect on our financial condition, results of operations, or cash flows.

We operate health plans in 11 states, primarily as a direct contractor with the states, and in Los Angeles County, California, as a subcontractor to another health plan holding a direct contract with the state. We are therefore dependent upon a small number of contracts to support our revenue. The loss of any one of those contracts could have a material adverse effect on our financial position, results of operations, or cash flows. Our ability to arrange for the provision of medical services to our members is dependent upon our ability to develop and maintain adequate provider networks. Our inability to develop or maintain such networks might, in certain circumstances, have a material adverse effect on our financial position, results of operations, or cash flows.

Recent Accounting Pronouncements

Health Care Federal Excise Tax. In July 2011, the Financial Accounting Standards Board (FASB) issued guidance related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (ACA). The ACA imposes an annual fee, or excise tax, on health insurers for each calendar year beginning on or after January 1, 2014. The excise tax will be imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year.

The new guidance specifies that the liability for the excise tax should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the excise tax is payable, with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the excise tax over the calendar year that it is payable. The new guidance is effective for annual reporting periods beginning after December 31, 2013, when the excise tax initially becomes effective. As enacted, this health care federal excise tax is non-deductible for income tax purposes, and is anticipated to be significant. It is yet undetermined how this excise tax will be factored into the calculation of our premium rates, if at all. Accordingly, adoption of this guidance and the enactment of this excise tax as currently written is expected to have a material impact on our financial position, results of operations, and cash flows in future periods. We estimate that our portion of the excise tax in 2014 will be approximately $85 million.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants (AICPA), and the Securities and Exchange Commission (SEC), did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	December 31,		
	2013	2012	2011
	(In thousands)		
Shares outstanding at the beginning of the period	46,762	45,815	45,463
Weighted-average number of shares repurchased	(1,445)	(2)	(160)
Weighted-average number of shares issued	400	567	453
Denominator for basic net income per share	45,717	46,380	45,756
Dilutive effect of employee stock options and stock grants (1)	643	619	669
Dilutive effect of convertible senior notes (2)	502	—	—
Denominator for diluted net income per share	46,862	46,999	46,425

(1) Unvested restricted shares are included in the calculation of diluted net income per share when their grant date fair values are below the average fair value of our common shares for each of the periods presented. Options to purchase common shares are included in the calculation of diluted net income per share when their exercise prices are below the average fair value of our common shares for each of the periods presented. For the years ended December 31, 2013, 2012, and 2011 there were approximately 51,000, 87,000 and 137,000 anti-dilutive weighted options, respectively. For the years ended December 31, 2013 and 2011 anti-dilutive restricted shares were insignificant. For the year ended December 31, 2012 there were approximately 304,000 anti-dilutive restricted shares.

(2) Potentially dilutive shares issuable pursuant to our 1.125% Warrants (defined in Note 12, "Long-Term Debt") were not included in the computation of diluted net income per share for the year ended December 31, 2013, because to do so would have been anti-dilutive. Potentially dilutive shares issuable pursuant to our 3.75% Notes (defined in Note 12, "Long-Term Debt") were not included in the computation of diluted net income per share for the years ended December 31, 2012, and 2011 because to do so would have been anti-dilutive.

4. Business Combinations

Health Plans Segment

South Carolina. On July 26, 2013, we entered into an agreement with Community Health Solutions of America, Inc. (CHS) to acquire certain assets, including the rights to convert certain of CHS' Medicaid members covered by South Carolina's full-risk Medicaid managed care program, consistent with our stated strategy to enter new markets. The conversion of such members was contingent on our successful receipt of an HMO license from the South Carolina Department of Insurance, the award to Molina Healthcare of a full-risk Medicaid managed care contract by the South Carolina Department of Health and Human Services, and the state's conversion to a full-risk Medicaid managed care program. Each of these three conditions was satisfied by January 2014, and on January 1, 2014 approximately 137,000 members were converted to the managed care program and enrolled with our South Carolina health plan. We expect the final purchase price for the acquisition to amount to approximately $63 million, of which $7.5 million was paid in the third quarter of 2013, and $38.1 million was paid in January 2014.

Because the number of members we will ultimately convert to the Medicaid managed care program was unknown as of the acquisition date, we recorded an initial contingent consideration liability on the acquisition date amounting to $57.5 million. As of December 31, 2013, we expected the remaining purchase price payable to range from approximately $46 million to $59 million, although the theoretical maximum amount of the payment would be based on the total number of Medicaid members in the state of South Carolina. As of December 31, 2013, we recorded the fair value of the liability amounting to $55.4 million, which represents the remaining purchase price associated with the CHS membership we currently expect to enroll through the purchase price determination date. The final determination date for substantially the entire purchase price will occur in the second quarter of 2014. We will continue to remeasure the contingent consideration liability to fair value at each quarter until the contingency is resolved with adjustments, if any, recorded to operations. The fair value adjustment we recorded from the

date of acquisition to December 31, 2013, was a decrease to the liability of $2.1 million, resulting in a gain recorded to operations.

In connection with this transaction, we recorded goodwill, which relates to future economic benefits arising from expected synergies achieved in the transaction. Such synergies include use of our existing infrastructure to support our health plan operations in South Carolina. We also recorded intangible assets, for which accumulated amortization was immaterial as of December 31, 2013. We expect to record amortization of $1.9 million per year in the years 2014 through 2018. The goodwill and intangible assets amounts are indicated in the table below.

New Mexico. Consistent with our stated strategy to expand within existing markets, on August 1, 2013 our New Mexico health plan closed on its acquisition of the Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program, under which Lovelace's Medicaid members became Molina Healthcare Medicaid members. As part of this acquisition, we also added membership covered under New Mexico's State Coverage Insurance (SCI) program with Lovelace in 2013. Effective January 1, 2014, members in the SCI program were a) enrolled in the Centennial Care program as Medicaid members, or b) eligible to enroll in New Mexico's health insurance marketplace. We expect the final purchase price for the acquisition to amount to approximately $53 million, of which $51.0 million was paid in 2013. As of December 31, 2013, the New Mexico health plan's membership increased by approximately 80,000 members as a result of this transaction.

Because the number of SCI members we will ultimately retain was unknown as of the acquisition date, we recorded an initial contingent consideration liability on the acquisition date amounting to $6.0 million, which was immediately reduced to $2.5 million when we made the acquisition date initial payment. As of December 31, 2013, the fair value of the liability was $2.2 million, which represents the remaining purchase price associated with the SCI program membership we currently expect to enroll, as of the final determination date of the purchase price in the second quarter of 2014. We will continue to remeasure the contingent consideration liability to fair value at each quarter until the contingency is resolved with adjustments, if any, recorded to operations. We believe the contingent consideration liability may decrease further as we learn more about how many SCI members we will retain, but is unlikely to increase. The fair value adjustment we recorded from the date of acquisition to December 31, 2013, was a decrease to the liability of $0.3 million, resulting in a gain recorded to operations.

In connection with this transaction, we recorded goodwill, which relates to future economic benefits arising from expected synergies achieved in the transaction. Such synergies include use of our existing infrastructure to support the added membership. We also recorded intangible assets, for which accumulated amortization was immaterial as of December 31, 2013. We expect to record amortization of $1.8 million per year in the years 2014 through 2018. The goodwill and intangible assets amounts are indicated in the table below.

Florida. In the second quarter of 2013, our Florida health plan acquired assets relating to the Statewide Medicaid Managed Care Long-Term Care Program from Neighborly Care Network, Inc. The final purchase price for this acquisition was $3.3 million. Accumulated amortization as of December 31, 2013, and future amortization for this acquisition are immaterial.

The following table presents assets acquired and the weighted average useful life for the major asset categories for the business combinations in 2013:

	Fair Value of Assets Acquired - Health Plans Segment				
	Weighted average useful life	**South Carolina**	**New Mexico**	**Florida**	**Total**
	(Years)	*(In thousands)*			
Membership conversion rights	12.0	$ 21,800	$ —	$ —	$ 21,800
Contract rights	10.6	—	18,300	—	18,300
Other finite-lived intangibles	7.7	1,060	—	990	2,050
Goodwill	Indefinite	42,140	35,178	2,332	79,650
		$ 65,000	$ 53,478	$ 3,322	$ 121,800

Acquisition costs relating to these transactions were immaterial individually and in the aggregate. The amounts recorded as goodwill represent intangible assets that do not qualify for separate recognition as identifiable intangible assets. The entire amounts recorded as goodwill are deductible for income tax purposes. Goodwill is not amortized, but is subject to an annual impairment test.

Molina Center. In late 2011, we acquired a 460,000 square foot office building located in Long Beach, California. The building (referred to as the Molina Center), consists of two conjoined fourteen-story office towers on approximately five acres of land. For the last several years we have leased approximately 155,000 square feet of the Molina Center for use as our corporate headquarters and also for use by our California health plan subsidiary. The final purchase price was approximately $81 million, which amount was paid with a combination of cash on hand and bank financing under a term loan agreement. We acquired this business primarily to facilitate space needs for the projected future growth of the Company. In the second quarter of 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of the Molina Center. Due to our continuing involvement with the leased property, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the property. See Note 12, "Long-Term Debt."

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, other current assets, a derivative asset, trade accounts payable, medical claims and benefits payable, long-term debt, a derivative liability, contingent consideration, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs. Our Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs. Our Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit that are classified as current investments in the accompanying consolidated balance sheets. Such investments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs. Our Level 3 financial instruments recorded at fair value consist of derivative financial instruments relating to our 1.125% Notes, including the 1.125% Call Option asset, and the embedded cash conversion option liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of December 31, 2013 included our common stock price, time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 12, “Long-Term Debt,” and Note 13, “Derivative Financial Instruments,” the 1.125% Call Option asset and the embedded cash conversion option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of income. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

Level 3 financial instruments also include contingent consideration liabilities, primarily relating to the acquisition in South Carolina as described in Note 4, "Business Combinations," and recorded to accounts payable and accrued liabilities in our consolidated balance sheets. We applied discounted cash flow analysis to determine the fair value of the contingent consideration liabilities. Significant unobservable inputs primarily related to the probability weighted present values of the purchase price estimates for the projected membership. As of December 31, 2013, we have estimated that such South Carolina acquisition membership could range from approximately 120,000 to 140,000 members, as updated to reflect the successful conversion of membership to our health plan effective January 1, 2014.

Finally, Level 3 financial instruments include non-current auction rate securities that are designated as available-for-sale, and are reported at fair value. To estimate the fair value of these securities we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of December 31, 2013.

Our financial instruments measured at fair value on a recurring basis at December 31, 2013, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 449,772	$ —	$ 449,772	$ —
GSEs	68,817	68,817	—	—
Municipal securities	113,330	—	113,330	—
U.S. treasury notes	37,376	37,376	—	—
Certificates of deposit	33,757	—	33,757	—
Auction rate securities	10,898	—	—	10,898
1.125% Call Option derivative asset	186,351	—	—	186,351
Total assets measured at fair value on a recurring basis	$ 900,301	$ 106,193	$ 596,859	$ 197,249
Embedded cash conversion option derivative liability	$ 186,239	$ —	$ —	$ 186,239
Contingent consideration liabilities	57,548	—	—	57,548
Total liabilities measured at fair value on a recurring basis	$ 243,787	$ —	$ —	$ 243,787

Our financial instruments measured at fair value on a recurring basis at December 31, 2012, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 191,008	$ —	$ 191,008	$ —
GSEs	29,525	29,525	—	—
Municipal securities	75,848	—	75,848	—
U.S. treasury notes	35,740	35,740	—	—
Certificates of deposit	10,724	—	10,724	—
Auction rate securities	13,419	—	—	13,419
Total assets measured at fair value on a recurring basis	$ 356,264	$ 65,265	$ 277,580	$ 13,419
Interest rate swap derivative liability	$ 1,307	$ —	$ 1,307	$ —

The following tables present activity relating to our assets (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	Changes in Level 3 Instruments		
	Auction Rate Securities	Derivatives, Net	Contingent Consideration Liabilities
Balance at December 31, 2011	$ 16,134	$ —	$ —
Net unrealized gains included in other comprehensive income	1,635	—	—
Auction rate securities settlements	(4,350)	—	—
Balance at December 31, 2012	13,419	—	—
Net unrealized gains included in other comprehensive income	729	—	—
Net unrealized losses included in other expenses	—	(3,810)	—
Derivative issuance	—	(75,074)	—
Auction rate securities settlements	(3,250)	—	—
Derivative re-designation	—	78,996	—
Acquisitions	—	—	(57,548)
Balance at December 31, 2013	$ 10,898	$ 112	$ (57,548)
The amount of total unrealized gains for the period included in other comprehensive income attributable to the change in accumulated other comprehensive losses relating to assets still held at December 31, 2013	$ 541	$ —	$ —
The amount of total unrealized gains for the period included in other comprehensive income attributable to the change in accumulated other comprehensive losses relating to assets still held at December 31, 2012	$ 1,059	$ —	$ —

Fair Value Measurements - Disclosure Only

The carrying amounts and estimated fair values of our long-term debt, as well as the applicable fair value hierarchy tier, are contained in the tables below. Our convertible senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. The credit facility was repaid and terminated in February 2013, and the term loan was repaid in June 2013.

	December 31, 2013				
	Carrying Amount	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
1.125% Notes	$ 416,368	$ 572,627	$ —	$ 572,627	$ —
3.75% Notes	181,872	219,491	—	219,491	—
	$ 598,240	$ 792,118	$ —	$ 792,118	$ —

	December 31, 2012				
	Carrying Amount	Total Fair Value	Level 1	Level 2	Level 3
	(In thousands)				
3.75% Notes	$ 175,468	$ 208,460	$ —	$ 208,460	$ —
Term loan	47,471	47,471	—	—	47,471
Credit facility	40,000	40,000	—	—	40,000
	$ 262,939	$ 295,931	$ —	$ 208,460	$ 87,471

6. Investments

The following tables summarize our investments as of the dates indicated:

	December 31, 2013			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 450,162	$ 442	$ 832	$ 449,772
GSEs	68,898	6	87	68,817
Municipal securities	114,126	119	915	113,330
U.S. treasury notes	37,360	44	28	37,376
Certificates of deposit	33,756	2	1	33,757
Subtotal - current investments	704,302	613	1,863	703,052
Auction rate securities	11,400	—	502	10,898
	$ 715,702	$ 613	$ 2,365	$ 713,950

	December 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	$ 190,545	$ 528	$ 65	$ 191,008
GSEs	29,481	45	1	29,525
Municipal securities	75,909	185	246	75,848
U.S. treasury notes	35,700	42	2	35,740
Certificates of deposit	10,715	9	—	10,724
Subtotal - current investments	342,350	809	314	342,845

	$ 357,000	$ 809	$ 1,545	$ 356,264

The contractual maturities of our investments as of December 31, 2013 are summarized below:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 350,488	$ 350,605
Due one year through five years	353,814	352,447
Due after ten years	11,400	10,898
	$ 715,702	$ 713,950

Gross realized gains and losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Net realized investment gains for the year ended December 31, 2013, 2012, and 2011 were $0.3 million, $0.3 million, and $0.4 million, respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at December 31, 2013, and 2012, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to

experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2013.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More

Auction Rate Securities. Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 17 years to 32 years. Considering the relative insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction rate securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at December 31, 2013. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $70.7 million of these instruments at par value.

For the year ended December 31, 2013 and 2012, we recorded pretax unrealized gains of $0.7 million and $1.6 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future impairment was other-than-temporary, we would record a charge to earnings as appropriate.

7. Receivables

Health Plans segment receivables consist primarily of amounts due from the various states in which we operate. Such receivables are subject to potential retroactive adjustments. Because all of our receivable amounts are readily determinable and our creditors are in almost all instances state governments, our allowance for doubtful accounts is immaterial. Accounts receivable increased as of December 31, 2013, primarily due to certain intermediary arrangements with state agencies entered into in the third quarter of 2013. For further information on these arrangements, refer to Note 11, "Medical Claims and Benefits Payable."

	December 31,

8. Property, Equipment, and Capitalized Software

A summary of property, equipment, and capitalized software is as follows:

	December 31,	
	2013	2012
	(In thousands)	
Land	$ 15,764	$ 15,764
Building and improvements	165,670	124,163
Furniture and equipment	131,478	97,865
Capitalized software	187,105	154,708
	500,017	392,500
Less: accumulated depreciation and amortization on building and improvements, furniture and equipment	(103,918)	(84,156)
Less: accumulated amortization for capitalized software	(104,016)	(86,901)
	(207,934)	(171,057)
Property, equipment, and capitalized software, net	$ 292,083	$ 221,443

Depreciation recognized for building and improvements, and furniture and equipment was $26.6 million, $20.5 million, and $17.5 million for the years ended December 31, 2013, 2012 and 2011, respectively. Amortization of capitalized software was $46.4 million, $36.2 million, and $30.2 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Molina Center. As described in Note 4, "Business Combinations," we acquired the Molina Center in December 2011. Subsequently, in June 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of the

Molina Center. Due to our continuing involvement with the leased property, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the property. See Note 12, "Long-Term Debt."

Future minimum rental income on noncancelable leases from third party tenants of the Molina Center is now considered to be sublease rental income, and continues to be reported in rental income in our consolidated statements of income. The future minimum rental income is as follows:

	(In thousands)
2014	$ 4,192
2015	4,110
2016	3,542
2017	3,742
2018	3,581
Thereafter	2,832
Total minimum future rentals	$ 21,999

9. Goodwill and Intangible Assets

Other intangible assets are amortized over their useful lives ranging from one to 15 years. The weighted average amortization period for contract rights and licenses is approximately 10 years, for customer relationships is approximately five years, for backlog is approximately three years, and for provider networks is approximately 10 years. Based on the balances of our identifiable intangible assets as of December 31, 2013, we estimate that our intangible asset amortization will be $20.4 million in 2014, $14.7 million in 2015, $12.7 million in 2016, $12.4 million in 2017, and $12.1 million in 2018. The following table provides the details of identified intangible assets, by major class, for the periods indicated. For a description of our goodwill and intangible assets by reportable segment, refer to Note 21, “Segment Information.”

	Cost	Accumulated Amortization	Net Balance
		(In thousands)	
Intangible assets:			
Contract rights and licenses	$ 176,428	$ 92,789	$ 83,639
Customer relationships	24,550	18,801	5,749
Contract backlog	23,600	19,624	3,976
Provider networks	13,370	7,863	5,507
Balance at December 31, 2013	$ 237,948	$ 139,077	$ 98,871
Intangible assets:			
Contract rights and licenses	$ 135,932	$ 81,376	$ 54,556
Customer relationships	24,550	12,513	12,037
Contract backlog	23,600	17,870	5,730
Provider networks	11,990	6,602	5,388
Balance at December 31, 2012	$ 196,072	$ 118,361	$ 77,711

The following table presents the balances of goodwill as of December 31, 2013 and 2012:

	December 31, 2012	Acquisitions	December 31, 2013
		(In thousands)	
Goodwill, gross	$ 209,618	$ 79,650	$ 289,268
Accumulated impairment losses	(58,530)	—	(58,530)
Goodwill, net	$ 151,088	$ 79,650	$ 230,738

The change in the carrying amount in 2013 was due to the acquisitions described in Note 4, "Business Combinations."

10. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by state authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. Additionally, in connection with the Molina Medicaid Solutions contracts with the states of Maine and Idaho, we maintain restricted investments as collateral for letters of credit. The following table presents the balances of restricted investments:

	December 31,	
	2013	2012
	(In thousands)	
California	$ 373	$ 373
Florida	9,242	5,738
Illinois	310	310
Michigan	1,014	1,014
New Mexico	24,622	15,915
Ohio	9,080	9,082

Washington	151	151
Other	1,196	4,889
Total Health Plans segment	52,789	44,101
Molina Medicaid Solutions segment	10,304	—
	$ 63,093	$ 44,101

The contractual maturities of our held-to-maturity restricted investments as of December 31, 2013 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 58,542	$ 58,543
Due one year through five years	4,551	4,555
	$ 63,093	$ 63,098

11. Medical Claims and Benefits Payable

As of December 31, 2013, medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of income. As of December 31, 2013, we recorded non-risk provider payables relating to such intermediary arrangements of $151.3 million.

The following table presents the components of the change in our medical claims and benefits payable from continuing and discontinued operations combined for the periods indicated. The amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported.

	Year Ended December 31,		
	2013	2012	2011
	(Dollars in thousands)		
Balances at beginning of period	$ 494,530	$ 402,476	$ 354,356
Components of medical care costs related to:			
Current period	5,434,443	5,136,055	3,911,803
Prior periods	(52,779)	(39,295)	(51,809)
Total medical care costs	5,381,664	5,096,760	3,859,994
Change in non-risk provider payables	111,267	(7,004)	20,630
Payments for medical care costs related to:			
Current period	4,932,195	4,689,395	3,564,030
Prior periods	385,479	308,307	268,474
Total paid	5,317,674	4,997,702	3,832,504
Balances at end of period	$ 669,787	$ 494,530	$ 402,476
Benefit from prior period as a percentage of:			
Balance at beginning of period	10.7%	9.8%	14.6%
Premium revenue	0.9%	0.7%	1.2%
Medical care costs	1.0%	0.8%	1.3%

Assuming that our initial estimate of claims incurred but not paid (IBNP) is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate - we only know when the circumstances for any one or more factors are out of the ordinary.

As indicated above, the amounts ultimately paid out on our liabilities in fiscal years 2013, 2012, and 2011 were less than what we had expected when we had established our reserves. For example, during the years ended December 31, 2013, 2012 and 2011, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2012, 2011 and 2010, by 10.7%, 9.8% and 14.6%, respectively. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We recognized favorable prior period claims development in the amount of $52.8 million for the year ended December 31, 2013. This amount represents our estimate as of December 31, 2013, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2012 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2012 was due primarily to the following factors:

- At our Washington health plan certain high-cost newborns, as well as other high-cost disabled members, were covered by the health plan effective July 1, 2012. At the end of 2012, we had limited claims history with which to estimate the claims liability of these members, and overstated the liability for such members.
- At our New Mexico health plan, we overestimated the impact of certain high-dollar outstanding claim payments as of December 31, 2012.
- At our Ohio health plan, we overestimated the impact of several potential high-dollar claims relating to our aged, blind or disabled (ABD) members.

We recognized favorable prior period claims development in the amount of $39.3 million for the year ended December 31, 2012. This amount represents our estimate as of December 31, 2012, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2011 was more than the amount that would ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2011 was due primarily to the following factors:

- At our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.

- At our Texas health plan, we overestimated the cost of new members in STAR+PLUS (the name of our ABD program in Texas), in the Dallas region.

- In early 2011, the state of Michigan was delayed in the enrollment of newborns in managed care plans; the delay was resolved by mid-2011. This caused a large number of claims with older dates of service to be paid during late 2011, resulting in an artificial increase in lag time for claims payment at our Michigan health plan. We adjusted reserves downward for this issue at December 31, 2011, but the adjustment did not capture all of the claims overestimation.

- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Missouri health plan, as a result of the costs associated with an unusually large number of premature infants during the fourth quarter of 2011.

We recognized favorable prior period claims development in the amount of $51.8 million for the year ended December 31, 2011. This amount represents our estimate as of December 31, 2011, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2010 was more than the amount that would ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2010 was due primarily to the following factors:

- At our Ohio health plan, we overestimated the impact of a buildup in claims inventory.

- At our California health plan, we overestimated the impact of the settlement of disputed provider claims.

- At our New Mexico health plan, we underestimated the impact of a reduction in the outpatient facility fee schedule.

In estimating our claims liability at December 31, 2013, we adjusted our base calculation to take account of the numerous factors that we believe will likely change our final claims liability amount. We believe that the most significant among those factors are:

- At our Texas health plan, we have noted an unusually large number of claims dated older than 12 months. This has caused distortion in the claims lag pattern that we use to estimate incurred claims.

- At our Michigan health plan, there were a large number of claim recoveries recorded in June 2013 due to overpayments that resulted from a system configuration issue. These recoveries impacted the completion factors used to estimate incurred claims. While we attempted to remove this distortion from the claims data to develop a more accurate reserve estimate, this type of correction in claims data added a degree of uncertainty for the Michigan reserves as of December 31, 2013.

- The state of Florida changed their inpatient Medicaid payment methodology effective July 1, 2013. The majority of our Florida health plan's provider contracts were also changed accordingly. These changes were intended to be cost neutral, but may have an impact on our specific mix of claims and providers. Also, a new Florida long-term care product became effective on December 1, 2013. This product covers some members who are institutionalized and others who could become institutionalized and would incur very high costs. This added a degree of uncertainty to the reserve estimate as of December 31, 2013.

- Our Ohio health plan added approximately 25,000 Temporary Assistance for Needy Families (TANF) program members from new regions effective July 1, 2013. Also effective July 1, 2013, the health plan began covering blind and disabled children under a new product. These two new groups of members added a degree of uncertainty to the reserve estimate as of December 31, 2013.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held as part of the liability at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2013, 2012 and 2011, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In these years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because replenishment of reserves in the respective periods generally offset the benefit from the prior period.

12. Long-Term Debt

As of December 31, 2013, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2014	2015	2016	2017	2018	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
3.75% Notes	187,000	187,000	—	—	—	—	—
	$ 737,000	$ 187,000	$ —	$ —	$ —	$ —	$ 550,000

1.125% Cash Convertible Senior Notes due 2020

In February 2013, we issued $550.0 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020 (the 1.125% Notes). This transaction included the initial issuance of $450.0 million on February 11, 2013, plus the exercise of the full amount of the $100.0 million over-allotment option on February 13, 2013. The aggregate net proceeds of the 1.125% Notes were $463.7 million, after payment of the net cost of the Call Spread Overlay described below and in Note 13, "Derivative Financial Instruments," and deferred issuance costs. Additionally, we used $50.0 million of the net proceeds to purchase shares of our common stock (see Note 15, "Stockholders' Equity"), and $40.0 million to repay the principal owed under our Credit Facility.

Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 of each year, at a rate of 1.125% per annum, and commenced on July 15, 2013. The 1.125% Notes will mature on January 15, 2020 unless repurchased or converted in accordance with their terms prior to such date.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. Holders may convert their 1.125% Notes solely into cash at their option at any time prior to the close of business on the business day immediately preceding July 15, 2019 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period immediately after any five consecutive trading day period in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.125% Notes solely into cash at any time, regardless of the foregoing circumstances. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture.

The initial conversion rate will be 24.5277 shares of our common stock per $1,000 principal amount of 1.125% Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate will be subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest. In addition, following certain corporate events that occur prior to the maturity date, we will pay a cash make-whole premium by increasing the conversion rate for a holder who elects to convert its 1.125% Notes in connection with such a corporate event in certain circumstances. We may not redeem the 1.125% Notes prior to the maturity date, and no sinking fund is provided for the 1.125% Notes.

If we undergo a fundamental change (as defined in the indenture to the 1.125% Notes), holders may require us to repurchase for cash all or part of their 1.125% Notes at a repurchase price equal to 100% of the principal amount of the 1.125% Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the fundamental change repurchase date. The indenture provides for customary events of default, including cross acceleration to certain other indebtedness of ours, and our significant subsidiaries.

The 1.125% Notes are senior unsecured obligations, and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries.

The 1.125% Notes contain an embedded cash conversion option. We have determined that the embedded cash conversion option is a derivative financial instrument, required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the embedded cash

conversion option transaction settles or expires. The initial fair value of the embedded cash conversion option liability was $149.3 million, which simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). For further discussion of the derivative financial instruments relating to the 1.125% Notes, refer to Note 13, "Derivative Financial Instruments."

As noted above, the reduced carrying value on the 1.125% Notes resulted in a debt discount that is amortized to the 1.125% Notes' principal amount through the recognition of interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued. The effective interest rate of the 1.125% Notes is approximately 5.9%, which was imputed based on the amortization of the debt discount over the remaining term of the 1.125% Notes. As of December 31, 2013, we expect the 1.125% Notes to be outstanding until their January 15, 2020 maturity date, for a remaining amortization period of 6.0 years. The 1.125% Notes' if-converted value did not exceed their principal amount as of December 31, 2013.

In connection with the issuance of the 1.125% Notes, we paid approximately $16.9 million in transaction costs. Such costs have been allocated to the 1.125% Notes, the 1.125% Call Option (defined below) and the 1.125% Warrants (defined below) according to their relative fair values. The amount allocated to the 1.125% Notes, or $12.0 million, was capitalized and will be amortized over the term of the 1.125% Notes. The aggregate amount allocated to the 1.125% Call Option and 1.125% Warrants, or $4.9 million, was recorded to interest expense in the first quarter of 2013.

1.125% Notes Call Spread Overlay

Concurrent with the issuance of the 1.125% Notes, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). These transactions are collectively referred to as the Call Spread Overlay. Under the Call Spread Overlay, the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes. We used $149.3 million of the proceeds from the settlement of the 1.125% Notes to pay for the 1.125% Call Option, and simultaneously received $75.1 million for the sale of the 1.125% Warrants, for a net cash outlay of $74.2 million for the Call Spread Overlay. The 1.125% Call Option is a derivative financial instrument. Until April 22, 2013, the 1.125% Warrants were classified as derivative financial instruments; refer to Note 13, "Derivative Financial Instruments" for further discussion.

Aside from the initial payment of a premium to the Counterparties of $149.3 million, for the 1.125% Call Option, we will not be required to make any cash payments to the Counterparties under the 1.125% Call Option, and will be entitled to receive from the Counterparties an amount of cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the 1.125% Call Options during the relevant valuation period. The strike price under the 1.125% Call Option is initially equal to the conversion price of the 1.125% Notes. Additionally, if the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances.

3.75% Convertible Senior Notes due 2014

We had $187.0 million of 3.75% Convertible Senior Notes due 2014 (the 3.75% Notes) outstanding as of December 31, 2013. The 3.75% Notes rank equally in right of payment with our existing and future senior indebtedness. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances. Prior to July 2014, holders may convert their 3.75% Notes only under the following circumstances:

- During any fiscal quarter after our fiscal quarter ending December 31, 2007, if the closing sale price per share of our common stock, for each of at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, is greater than or equal to 120% of the conversion price per share of our common stock;

- During the five business day period immediately following any five consecutive trading day period in which the trading price per one thousand dollar principal amount of the 3.75% Notes for each trading day of such period was less than 98% of the product of the closing price per share of our common stock on such day and the conversion rate in effect on such day; or
- Upon the occurrence of specified corporate transactions or other specified events.

On or after July 1, 2014, holders may convert their 3.75% Notes at any time prior to the close of business on the scheduled trading day immediately preceding the stated maturity date regardless of whether any of the foregoing conditions is satisfied.

We will deliver cash and shares of our common stock, if any, upon conversion of each $1,000 principal amount of 3.75% Notes, as follows:

- An amount in cash (the "principal return") equal to the sum of, for each of the 20 Volume-Weighted Average Price (VWAP) trading days during the conversion period, the lesser of the daily conversion value for such VWAP trading day and fifty dollars (representing 1/20th of one thousand dollars); and
- A number of shares based upon, for each of the 20 VWAP trading days during the conversion period, any excess of the daily conversion value above fifty dollars.

The proceeds from the issuance of the 3.75% Notes have been allocated between a liability component and an equity component. The reduced carrying value on the 3.75% Notes resulted in a debt discount that is amortized back to the 3.75% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 3.75% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued. The effective interest rate of the 3.75% Notes is 7.5%, principally based on the seven-year U.S. Treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. As of December 31, 2013, we expect the 3.75% Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 9 months; we intend to repay the $187.0 million principal amount due on that date from available cash at the parent company. As of December 31, 2013, the 3.75% Notes' if-converted value exceeded their principal amount by approximately $11.1 million. The 3.75% Notes' if-converted value did not exceed their principal amount as of December 31, 2012. At December 31, 2013, the equity component of the 3.75% Notes, net of the impact of deferred taxes, was $24.0 million.

The principal amounts, unamortized discount and net carrying amounts of the convertible senior notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
December 31, 2013:			
1.125% Notes	$ 550,000	$ 133,632	$ 416,368
3.75% Notes	187,000	5,128	181,872
	$ 737,000	$ 138,760	$ 598,240
December 31, 2012:			
3.75% Notes	$ 187,000	$ 11,532	$ 175,468

	Years Ended December 31,		
	2013	2012	2011
		(In thousands)	
Interest cost recognized for the period relating to the:			
Contractual interest coupon rate	$ 12,427	$ 7,012	$ 7,012
Amortization of the discount	22,103	5,942	5,512
Total interest cost recognized	$ 34,530	$ 12,954	$ 12,524

Lease Financing Obligations

In June 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of two properties, including the Molina Center located in Long Beach, California, and the building that houses our Ohio health plan located in Columbus, Ohio. We sold the two properties for $158.7 million in the aggregate. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. The carrying values of these properties, including the related intangible assets, amounted to $76.8 million in the aggregate as of December 31, 2013. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated and amortized over their remaining useful lives. The sales price was recorded as a lease financing obligation, which is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. As of December 31, 2013, the aggregate lease financing obligation for these properties amounted to $159.4 million. Rent will increase 3% per year through the initial term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Associated transaction costs, amounting to $3.5 million, have been deferred and will be amortized over the initial lease term. For information regarding the future minimum rental income, refer to Note 8, "Property, Equipment, and Capitalized Software." For information regarding the future minimum lease obligation, refer to Note 20, “Commitments and Contingencies.”

As described and defined in further detail in Note 18, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings then under construction, one of which was completed in June 2013. We have concluded that we are the accounting owner of the construction projects because of our continuing involvement in those projects. Therefore, we have recorded $26.6 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of December 31, 2013, which represents the total cost, including imputed interest, incurred by the Landlord for the completed office building, and thus far for the construction project still in process. As of December 31, 2013, the aggregate amount recorded to lease financing obligations for the construction projects amounted to $27.2 million. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income. Interest expense for the year ended December 31, 2013 was $1.3 million. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was immaterial for the year ended December 31, 2013. For information regarding the future minimum lease obligation, refer to Note 20, “Commitments and Contingencies.”

Term Loan

In December 2011, we entered into a term loan agreement with various lenders and East West Bank to borrow $48.6 million to finance a portion of the purchase price for the Molina Center, located in Long Beach, California. In June 2013, we repaid the principal balance outstanding under the term loan on that date with proceeds we received in the sale-leaseback transaction described above.

Credit Facility

In February 2013, we used $40.0 million of the net proceeds from the offering of the 1.125% Notes to repay all of the outstanding indebtedness under our $170 million revolving Credit Facility, with various lenders and U.S. Bank National Association, as Line of Credit Issuer, Swing Line Lender, and Administrative Agent. As of December 31, 2012, there was $40.0 million outstanding under the Credit Facility.

We terminated the Credit Facility in connection with the issuance of the 1.125% Notes. Two letters of credit in the aggregate principal amount of $10.3 million that reduced the amount available for borrowing under the Credit Facility as of December 31, 2012, were transferred to direct issue letters of credit with another financial institution. Such direct issue letters of credit are collateralized by restricted investments.

13. Derivative Financial Instruments

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

	Balance Sheet Location	December 31, 2013	December 31, 2012
		(In thousands)	
Derivative asset:			
1.125% Call Option	Non-current assets: Derivative asset	$ 186,351	$ —
Derivative liability:			
Embedded cash conversion option	Non-current liabilities: Derivative liability	$ 186,239	$ —
Interest rate swap	Non-current liabilities: Derivative liability	—	1,307
		$ 186,239	$ 1,307

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of income, in other expense. The following table summarizes the gains (losses) recorded in the periods presented. There were no gains or losses for the year ended December 31, 2011.

	Year Ended December 31, 2013	Year Ended December 31, 2012
Derivative gains (losses):		
1.125% Call Option	$ 37,020	$ —
Embedded cash conversion option	(36,908)	—
1.125% Warrants	(3,923)	—
Interest rate swap	433	(1,307)
	$ (3,378)	$ (1,307)

1.125% Notes Call Spread Overlay

As described in Note 12, "Long-Term Debt," we entered into a Call Spread Overlay, whereby the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes.

The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to the cash settlement features until the 1.125% Call Option settles or expires. The 1.125% Call Option is measured and reported at fair value on a recurring basis, within Level 3 of the fair value hierarchy. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 5, “Fair Value Measurements.”

Until April 22, 2013, the 1.125% Warrants were recorded as a derivative liability that required mark-to-market accounting treatment due to certain terms in the 1.125% Warrants that prevented such instruments being considered to be indexed in our common stock. Effective April 22, 2013, we entered into amended and restated warrant confirmations with the Counterparties to clarify these terms, such that 1.125% Warrants are no longer considered to be derivative instruments, and were re-designated as additional paid-in capital. In 2013, we recorded a loss for the change in fair value of the 1.125% Warrants from February 15, 2013 to April 22, 2013.

Embedded Cash Conversion Option

The embedded cash conversion option within the 1.125% Notes is required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of income until the cash conversion option settles or expires. For further discussion of the inputs used to determine the fair value of the embedded cash conversion option, refer to Note 5, “Fair Value Measurements.”

Interest Rate Swap

In May 2012, we entered into a $42.5 million notional amount interest rate swap agreement, (Swap Agreement), with an effective date of March 1, 2013. The Swap Agreement was intended to reduce our exposure to fluctuations in the contractual variable interest rates under our term loan agreement that was repaid in June 2013. The Swap Agreement was measured and reported at fair value on a recurring basis, within Level 2 of the fair value hierarchy. In June 2013, we settled the interest rate swap for $0.9 million.

14. Income Taxes

The provision for income taxes for continuing operations consisted of the following:

	Year Ended December 31,		
	2013	2012	2011
	(In thousands)		
Current:			
Federal	$ 66,883	$ 23,019	$ 24,435
State	581	1,254	1,587
Total current	67,464	24,273	26,022
Deferred:			
Federal	(25,498)	(9,205)	16,905
State	(5,650)	(4,555)	(13)
Total deferred	(31,148)	(13,760)	16,892
Total provision for income taxes	$ 36,316	$ 10,513	$ 42,914

A reconciliation of the U.S. federal statutory income tax rate to the combined effective income tax rate for continuing operations is as follows:

	Year Ended December 31,		
	2013	2012	2011
Statutory federal tax rate	35.0 %	35.0 %	35.0 %
State income taxes, net of federal benefit	(0.5)	(9.2)	0.9
Change in unrecognized tax benefits	(3.7)	0.7	(0.3)
Nondeductible compensation	9.6	6.2	—
Nondeductible lobbying	1.6	4.2	0.6
Purchase accounting adjustment	—	—	(0.8)
Nondeductible fair value of 1.125% Warrants	2.4	—	—
Change in fair value of contingent consideration liabilities	(0.3)	4.8	—
Other	0.7	3.3	0.3
Effective tax rate	44.8 %	45.0 %	35.7 %

Our effective tax rate is based on expected income, statutory tax rates, and tax planning opportunities available to us in the various jurisdictions in which we operate. Significant management estimates and judgments are required in determining our effective tax rate. We are routinely under audit by federal, state, or local authorities regarding the timing and amount of deductions, nexus of income among various tax jurisdictions, and compliance with federal, state, and local tax laws.

During 2013, 2012, and 2011 excess tax benefits from shared-based compensation were $1.6 million, $3.1 million, and $0.9 million respectively. These amounts were recorded as a decrease to income taxes payable and an increase to additional paid-in capital.

Deferred tax assets and liabilities are classified as current or non-current according to the classification of the related asset or liability. Significant components of our deferred tax assets and liabilities as of December 31, 2013 and 2012 were as follows:

	December 31,	
	2013	2012
	(In thousands)	
Accrued expenses	$ 19,545	$ 15,381
Reserve liabilities	1,712	2,936
State taxes	(1,323)	(606)
Other accrued medical costs	2,540	2,518
Net operating losses	27	27
Unrealized losses (gains)	380	(283)
Unearned premiums	10,543	15,675
Prepaid expenses	(5,354)	(4,390)
Basis in debt	(2,162)	—
Deferred compensation	2,087	1,611
Other, net	(928)	176
Valuation allowance	(511)	(602)
Deferred tax asset, net of valuation allowance — current	26,556	32,443
Reserve liabilities	1,909	2,013
State tax credit carryover	7,027	4,149
Net operating losses	2,326	3,341
Unrealized losses	286	563
Depreciation and amortization	(40,433)	(44,198)
Deferred compensation	3,404	3,323
Lease financing obligation	27,543	—
Debt basis	466	(5,410)
Other, net	(24)	702
Valuation allowance	(3,084)	(2,383)
Deferred tax liability, net of valuation allowance — long term	(580)	(37,900)
Net deferred income tax asset (liability)	$ 25,976	$ (5,457)

At December 31, 2013, we had federal and state net operating loss carryforwards of $0.2 million and $57.2 million, respectively. The federal net operating loss begins expiring in 2018, and state net operating losses begin expiring in 2015. The utilization of the net operating losses is subject to certain limitations under federal law.

At December 31, 2013, we had California enterprise zone tax credit carryovers of $10.8 million which expire in 2024.

We evaluate the need for a valuation allowance taking into consideration the ability to carry back and carry forward tax credits and losses, available tax planning strategies and future income, including reversal of temporary differences. We have determined that as of December 31, 2013, $3.6 million of deferred tax assets did not satisfy the recognition criteria due to uncertainty regarding the realization of some of our state tax operating loss carryforwards. We increased our valuation allowance $0.6 million from $3.0 million at December 31, 2012 to $3.6 million as of December 31, 2013.

We recognize tax benefits only if the tax position is more likely than not to be sustained. We are subject to income taxes in the U.S. and numerous state jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. These reserves are established when we believe that certain positions might be challenged despite our belief that our tax return positions are fully supportable. We adjust these reserves in light of changing facts and circumstances, such as the outcome of tax audits. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate.

The roll-forward of our unrecognized tax benefits is as follows:

	Year Ended December 31,		
	2013	2012	2011
	(In thousands)		
Gross unrecognized tax benefits at beginning of period	$ (10,622)	$ (10,712)	$ (10,962)
Increases in tax positions for prior years	—	(441)	(137)
Decreases in tax positions for prior years	3,615	320	—
Increases in tax positions for current year	(2,084)	—	—
Decreases in tax positions for current year	886	—	—
Lapse in statute of limitations	175	211	387
Gross unrecognized tax benefits at end of period	$ (8,030)	$ (10,622)	$ (10,712)

The total amount of unrecognized tax benefits at December 31, 2013, 2012 and 2011 that, if recognized, would affect the effective tax rates is $5.7 million, $7.4 million and $7.4 million, respectively. Approximately $5.9 million of the unrecognized tax benefits recorded at December 31, 2013 relates to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $6.2 million due the resolution to the state refund claim as well as the normal expiration of statutes of limitation.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of December 31, 2013, December 31, 2012, and December 31, 2011, we had accrued $79,000, $56,000, and $65,000, respectively, for the payment of interest and penalties.

We are under examination, or may be subject to examination, by the Internal Revenue Service (IRS) for calendar years 2010 through 2013. We are under examination, or may be subject to examination, in certain state and local jurisdictions, with the major jurisdictions being California, Utah, and Michigan, for the years 2004 through 2013.

15. Stockholders' Equity

Stockholders' equity increased $110.6 million during the year ended December 31, 2013. The increase was primarily due to the $79.0 million re-designation of the 1.125% Warrants as additional paid-in capital, net income of $52.9 million, and $32.0 million related to employee stock transactions, partially offset by $52.7 million in repurchases of our common stock, as described in further detail below.

Common Shares Authorized. On May 1, 2013, our stockholders approved an amendment to our certificate of incorporation to increase the number of authorized shares of our common stock from 80,000,000 to 150,000,000.

1.125% Warrants. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. The 1.125% Warrants will generally begin to expire in the 160 trading day measurement following April 15, 2020.

We will not receive any additional proceeds if the 1.125% Warrants are exercised. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants. As described in Note 13, "Derivative Financial Instruments," we re-designated the 1.125% Warrants as additional paid-in capital during the second quarter of 2013, resulting in an increase to stockholders' equity.

Securities Repurchases and Repurchase Program. In connection with the issuance and settlement of the 1.125% Notes, we used a portion of the net proceeds from the offering to repurchase $50 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. In February 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares

repurchased depends on a variety of factors including price, corporate and regulatory requirements and other market conditions. Under this program, we purchased 85,086 shares of our common stock for $2.7 million (average cost of $31.28 per share) during November 2013. This newly authorized repurchase program extends through December 31, 2014, and replaces in its entirety, the $75 million repurchase program adopted by the board of directors in February 2013.

In December 2012, we purchased 110,988 shares of our common stock from certain Molina family trusts for an aggregate purchase price of $3.0 million. This purchase transaction was approved by our board of directors. The shares were purchased at a price of $27.03, representing the closing price per share of our common stock on December 26, 2012. See Note 18, "Related Party Transactions."

In October 2011, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or our 3.75% Notes (see Note 12, "Long-Term Debt"). The repurchase program expired in October 2012. No securities were purchased under this program in 2012.

Shelf Registration Statement. In May 2012, we filed an automatic shelf registration statement on Form S-3 with the SEC covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Plans. In connection with the stock plans described in Note 17, "Share-Based Compensation," we issued approximately 820,000, and 1,057,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the years ended December 31, 2013 and 2012, respectively. For the years ended December 31, 2013 and 2012, stock plan activity resulted in increases to additional paid-in capital of $32.0 million and $19.5 million, respectively.

16. Employee Benefits

We sponsor a defined contribution 401(k) plan that covers substantially all full-time salaried and hourly employees of our company and its subsidiaries. Eligible employees are permitted to contribute up to the maximum amount allowed by law. We match up to the first 4% of compensation contributed by employees. Expense recognized in connection with our contributions to the 401(k) plan totaled $12.8 million, $10.7 million and $8.5 million in the years ended December 31, 2013, 2012, and 2011, respectively.

We also have a nonqualified deferred compensation plan for certain key employees. Under this plan, eligible participants may defer up to 100% of their base salary and 100% of their bonus to provide tax-deferred growth for retirement. The funds deferred are invested in corporate-owned life insurance, under a rabbi trust.

17. Share-Based Compensation

At December 31, 2013, we had employee equity incentives outstanding under two plans: (1) the 2011 Equity Incentive Plan (2011 Plan); and (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded).

The 2011 Plan provides for the award of stock options, restricted shares and units, performance shares and units, and stock bonuses to the company's officers, employees, directors, consultants, advisors, and other service providers. The 2011 Plan allows for the issuance of 4.5 million shares of common stock.

In March 2013, our named executive officers were granted restricted stock awards with performance conditions as follows: our chief executive officer was awarded 186,858 shares, our chief financial officer was awarded 93,429 shares, our chief operating officer was awarded 62,286 shares, our chief accounting officer was awarded 28,029 shares, and our general counsel was awarded 21,800 shares. These awards were apportioned into four equal increments, and will vest in accordance with the following four measures: (i) 1/4th will vest in equal 1/3rd increments over three years on March 1, 2014, March 1, 2015, and March 1, 2016; (ii) 1/4th will vest upon our achievement of three-year Total Stockholder Return (TSR) as determined by Institutional Shareholder Services Inc. (ISS) calculations for the three-year period ending December 31, 2013 equal to or greater than the 50th percentile within our ISS peer group; (iii) 1/4th shall vest upon our achievement of total revenue in any of the 2013, 2014, or 2015 fiscal years equal to or greater than $12 billion, and (iv) 1/4th shall vest upon our achievement of the three-year earnings before interest, taxes, depreciation and amortization (EBITDA) margin percentage for the three-year period ending December 31, 2013 equal to or greater than 2.5%. In the event the vesting conditions are not achieved, the awards shall lapse. As of December 31, 2013 the TSR- and EBITDA-related performance measures were achieved.

Restricted share awards are granted with a fair value equal to the market price of our common stock on the date of grant, and generally vest in equal annual installments over periods up to four years from the date of grant. Stock option awards have an exercise price equal to the fair market value of our common stock on the date of grant, generally vest in equal annual installments over periods up to four years from the date of grant, and have a maximum term of ten years from the date of grant.

Under our employee stock purchase plan (ESPP), eligible employees may purchase common shares at 85% of the lower of the fair market value of our common stock on either the first or last trading day of each six-month offering period. Each participant is limited to a maximum purchase of $25,000 (as measured by the fair value of the stock acquired) per year through payroll deductions. We estimate the fair value of the stock issued using the Black-Scholes option pricing model. For the years ended December 31, 2013, 2012, 2011, the inputs to this model were as follows: risk-free interest rates ranging from approximately 0.1% to 0.2%; expected volatilities ranging from approximately 30% to 50%, dividend yields of 0%, and an average expected life of 0.8 years. We issued approximately 299,600, 277,400 and 201,700 shares of our common stock under the ESPP during the years ended December 31, 2013, 2012, and 2011, respectively. In 2011, stockholders approved our 2011 ESPP, which superseded the 2002 Employee Stock Purchase Plan. The 2011 ESPP allows for the issuance of three million shares of common stock.

The following table illustrates the components of our share-based compensation expense that are reported in general and administrative expenses in the consolidated statements of income:

	Year Ended December 31,					
	2013		2012		2011	
	(In thousands)					
	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount	Pretax Charges	Net-of-Tax Amount
Restricted stock and performance awards	$ 26,116	$ 22,489	$ 18,106	$ 12,943	$ 15,914	$ 9,946
Employee stock purchase plan and stock options	2,578	2,012	1,912	1,613	1,138	712
	$ 28,694	$ 24,501	$ 20,018	$ 14,556	$ 17,052	$ 10,658

As of December 31, 2013, there was $20.1 million of total unrecognized compensation expense related to unvested restricted share awards, including those with performance conditions, which we expect to recognize over a remaining weighted-average period of 1.8 years. This unrecognized compensation cost assumes an estimated forfeiture rate of 6.1% as of December 31, 2013. Also as of December 31, 2013, there was $0.6 million of unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 2.0 years.

Restricted and performance stock activity for the year ended December 31, 2013 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2012	986,577	$ 23.74
Granted - restricted stock	587,706	32.15
Granted - performance stock	456,174	30.80
Vested - restricted stock	(669,075)	25.45
Forfeited	(61,530)	26.20
Unvested balance as of December 31, 2013	1,299,852	29.03

The total fair value of restricted and performance awards granted during the year ended December 31, 2013, 2012, and 2011 was $33.3 million, $16.2 million, and $18.4 million, respectively. The total fair value of restricted awards, including those with performance conditions, vested during the year ended December 31, 2013, 2012, and 2011 was $22.3 million, $25.4 million, and $12.2 million, respectively.

The weighted-average grant date fair value per share of the performance awards with vesting conditions based on TSR, as described above, was $28.24. We estimated the fair value on the grant date using a Monte Carlo Simulation to project TSR over the performance period using correlations and volatilities of the ISS peer group. Additional inputs included a risk-free interest rate of 0.14%, dividend yield of 0%, and an expected life of 0.83 years.

The total fair value of restricted stock units granted during the year ended December 31, 2012 was $0.3 million with a weighted average grant date fair value of $35.01. These restricted stock units vested during 2013. No restricted stock units were granted in 2013 and 2011 and there were no outstanding restricted stock units as of December 31, 2013.

Stock option activity for the year ended December 31, 2013 is summarized below:

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Stock options outstanding as of December 31, 2012	414,061	$ 22.39		
Granted	45,000	33.02		
Exercised	(79,540)	20.09		
Forfeited	(300)	17.63		
Stock options outstanding as of December 31, 2013	379,221	24.14	$ 4,024	3.4
Stock options exercisable and expected to vest as of December 31, 2013	379,221	24.14	$ 4,024	3.4
Exercisable as of December 31, 2013	324,221	22.58	$ 3,947	2.5

The weighted-average grant date fair value per share of stock options awarded to the new members of our board of directors during 2013 was $14.67. The weighted-average grant date fair value per share of the stock option awarded to the director appointed during 2012 was $13.97. We estimate the fair value of each stock option award on the grant date using the Black-Scholes option pricing model. To determine the fair value of these stock options we applied risk-free interest rates of 1.1% to 1.4%, expected volatilities of 41.3% to 43.0%, dividend yields of 0%, and expected lives of 6 years to 7 years. No stock options were granted in 2011. The following is a summary of information about stock options outstanding and exercisable at December 31, 2013:

	Options Outstanding			Options Exercisable	
Range of Exercise Prices	Number Outstanding	Weighted-Average Remaining Contractual Life (Years)	Weighted-Average Exercise Price	Number Exercisable	Weighted-Average Exercise Price
$16.89 – $19.11	78,671	2.0	$ 19.05	78,671	$ 19.05
$20.88	147,000	3.2	20.88	147,000	20.88
$22.86 – $34.82	153,550	4.4	29.87	98,550	27.93
	379,221			324,221	

18. Related Party Transactions

Leased Office Buildings

In February 2013, the Parent (as defined in Note 23, "Condensed Financial Information of Registrant,") entered into a lease (the "Lease") with 6th & Pine Development, LLC (the "Landlord") for office space located in Long Beach, California. The Lease consists of two office buildings, one of which is under construction. The first building which comprises approximately 90,000 square feet of office and storage space (Building A) was completed in June 2013; immediately following its completion, we occupied Building A and commenced lease payments. The second building (Building B) is expected to comprise approximately 120,000 square feet of office space.

The term of the Lease with respect to Building A commenced in June 2013, and the term of the Lease with respect to Building B is expected to commence in November 2014. The initial term of the Lease with respect to both buildings expires on December 31, 2024, subject to two options to extend the term for a period of five years each. Initial annual rent for Building A is approximately $2.6 million and initial annual rent for Building B is expected to be approximately $4.0 million. Rent will increase 3.75% per year through the initial term. Rent during the extension terms will be the greater of then-current rent or fair market rent. For information regarding the lease financing obligation, refer to Note 12, "Long-Term Debt."

The principal members of the Landlord are John C. Molina, our Chief Financial Officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, the Landlord has pledged shares of common stock in the Parent he holds as trustee. Dr. J. Mario Molina, our Chief Executive Officer and Chairman of the Board of Directors, holds a partial interest in such shares as trust beneficiary.

Stock Repurchase

In December 2012, the Parent purchased 110,988 shares of our common stock from certain Molina family trusts for an aggregate purchase price of $3.0 million. This purchase transaction was approved by our board of directors. The shares were purchased at a price of $27.03, representing the closing price per share of our common stock on December 26, 2012. The shares were purchased from the Janet M. Watt Separate Property Trust dated 10/22/2007, (Separate Property Trust), and the Watt Family Trust dated 10/11/1996 (Family Trust). Janet M. Watt is the sister, and her husband Lawrence B. Watt is the brother-in-law, of Dr. J. Mario Molina and John Molina. Ms. Watt is the sole trustee of the Separate Property Trust, and a co-trustee with Lawrence B. Watt of the Family Trust.

19. Variable Interest Entities

Joseph M. Molina M.D., Professional Corporations

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's sole shareholder is Dr. J. Mario Molina, our Chairman of the Board, President and Chief Executive Officer. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides professional medical services to the general public for routine non-life threatening, outpatient health care needs. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, American Family Care, Inc. (AFC), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will not operate at a loss, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by AFC are reviewed annually to assure the achievement of this goal.

Our California, Florida, New Mexico and Washington health plans have entered into primary care capitation agreements with JMMPC. These agreements also direct our health plans to fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, based on a monthly reconciliation. Because the AFC services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are insignificant.

We have determined that JMMPC is a variable interest entity (VIE), and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of December 31, 2013, JMMPC had total assets of $6.9 million, and total liabilities of $6.6 million. As of December 31, 2012, JMMPC had total assets of $1.4 million, and total liabilities of $1.1 million.

Our maximum exposure to loss as a result of our involvement with JMMPC is generally limited to the amounts needed to fund JMMPC's ongoing payroll and employee benefits. We believe that such loss exposure will be immaterial to our consolidated operating results and cash flows for the foreseeable future. We provided an initial cash infusion of $0.3 million to JMMPC in the first quarter of 2012 to fund its start-up operations. During 2013 our health plans did not receive any amounts from JMMPC under the terms of the affiliation agreement. During 2012 our health plans received $0.2 million from JMMPC under the terms of the affiliation agreement.

New Markets Tax Credit

During the fourth quarter of 2011, our New Mexico data center subsidiary entered into a financing transaction with Wells Fargo Community Investment Holdings, LLC (Wells Fargo), its wholly owned subsidiary New Mexico Healthcare Data Center Investment Fund, LLC (Investment Fund), and certain of Wells Fargo's affiliated Community Development Entities (CDEs), in connection with our participation in the federal government's New Markets Tax Credit Program (NMTC). The NMTC was established by Congress in 2000 to facilitate new or increased investments in businesses and real estate projects in low-income communities. The NMTC attracts investment capital to low-income communities by permitting investors to receive a tax credit against their federal income tax return in exchange for equity investments in specialized financial institutions, called CDEs, which provide financing to qualified active businesses operating in low-income communities. The credit amounts to 39% of the original investment amount and is claimed over a period of seven years (five percent for each of the first three years, and six percent for each of the remaining four years). The investment in the CDE cannot be redeemed before the end of the seven-year period.

In the fourth quarter of 2011, as a result of a series of simultaneous financing transactions, Wells Fargo contributed capital of $5.9 million to the Investment Fund, and Molina Healthcare, Inc. loaned the principal amount of $ 15.5 million to the Investment Fund. The Investment Fund then contributed the proceeds to certain CDEs, which, in turn, loaned the proceeds of $20.9 million to our New Mexico data center subsidiary. Wells Fargo will be entitled to claim the NMTC while we effectively received net loan proceeds equal to Wells Fargo's contribution to the Investment Fund, or approximately $5.9 million. Additionally, financing costs incurred in structuring the arrangement amounting to $1.2 million were deferred and will be recognized as expense over the term of the loans. This transaction also includes a put/call feature that becomes enforceable at the end of the seven-year compliance period. Wells Fargo may exercise its put option or we can exercise the call, both of which will serve to transfer the debt obligation to us. Incremental costs to maintain the structure during the compliance period will be recognized as incurred.

We have determined that the financing arrangement with Investment Fund and CDEs is a VIE, and that we are the primary beneficiary of the VIE. We reached this conclusion based on the following:

- The ongoing activities of the VIE-collecting and remitting interest and fees and NMTC compliance-were all considered in the initial design and are not expected to significantly affect economic performance throughout the life of the VIE;
- Contractual arrangements obligate us to comply with NMTC rules and regulations and provide various other guarantees to Investment Fund and CDEs;
- Wells Fargo lacks a material interest in the underling economics of the project; and
- We are obligated to absorb losses of the VIE.

Because we are the primary beneficiary of the VIE, we have included it in our consolidated financial statements. Wells Fargo's contribution of $5.9 million is included in cash at December 31, 2013 and December 31, 2012 and the offsetting Wells Fargo's interest in the financing arrangement is included in other liabilities in the accompanying consolidated balance sheets.

As described above, this transaction also includes a put/call provision whereby we may be obligated or entitled to repurchase Wells Fargo's interest in the Investment Fund. The value attributed to the put/call is nominal. The NMTC is subject to 100% recapture for a period of seven years as provided in the Internal Revenue Code and applicable U.S. Treasury regulations. We are required to be in compliance with various regulations and contractual provisions that apply to the NMTC arrangement. Non-compliance with applicable requirements could result in Wells Fargo's projected tax benefits not being realized and, therefore, require us to indemnify Wells Fargo for any loss or recapture of NMTCs related to the financing until such time as the recapture provisions have expired under the applicable statute of limitations. We do not anticipate any credit recaptures will be required in connection with this arrangement.

20. Commitments and Contingencies

Certain Leasing Transactions

As described in Note 12, "Long-Term Debt," we entered into certain leasing transactions that have been classified as lease financing obligations. For the transaction entered into in June 2013, the initial lease term is 25 years, with five five-year renewal options. For the transaction relating to the construction project completed in June 2013, the initial lease term is 11.5 years, with two five-year renewal options.

Operating Leases

We lease administrative and clinic facilities and certain equipment under non-cancelable operating leases expiring at various dates through 2023. Facility lease terms generally range from five to ten years with one to two renewal options for extended terms. In most cases, we are required to make additional payments under facility operating leases for taxes, insurance and other operating expenses incurred during the lease period. Certain of our leases contain rent escalation clauses or lease incentives, including rent abatements and tenant improvement allowances. Rent escalation clauses and lease incentives are taken into account in determining total rent expense to be recognized during the lease term.

Future minimum lease payments by year and in the aggregate under all operating leases and lease financing obligations consist of the following approximate amounts:

	Lease Financing Obligations	Lease Financing Obligations - Related Party	Operating Leases	Total
		(In thousands)		
2014	$ 11,065	$ 3,330	$ 29,117	$ 43,512
2015	11,397	6,880	23,196	41,473
2016	11,739	7,138	15,890	34,767
2017	12,091	7,405	14,434	33,930
2018	12,454	7,683	12,832	32,969
Thereafter	333,275	52,538	13,569	399,382
Total minimum lease payments	$ 392,021	$ 84,974	$ 109,038	$ 586,033

Rental expense related to operating leases amounted to $24.5 million, $20.5 million, and $23.1 million for the years ended December 31, 2013, 2012, and 2011, respectively. The amounts reported in "Lease Financing Obligations," and "Lease Financing Obligations - Related Party," above represent our contractual lease commitments for the properties described in Note 12, "Long-Term Debt" under the subheading "Lease Financing Obligations." Payments under these leases adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of income.

Employment Agreements

In 2002 we entered into employment agreements with our Chief Executive Officer and Chief Financial Officer, which were amended and restated in 2009. These employment agreements had initial terms of one to three years and are subject to automatic one-year extensions thereafter. Should the executives be terminated without cause or resign for good reason before a change of control, as defined, we will pay one year's base salary and termination bonus, as defined, in addition to full vesting of stock-based awards, and a cash payment for health and welfare benefits.

In 2013 we entered into employment agreements with our Chief Operating Officer, Chief Accounting Officer, and Chief Legal Officer. These agreements continue until terminated by us, or the executive resigns. If the executive's employment is terminated by us without cause or the executive resigns for good reason, the executive will be entitled to receive one year's base salary and termination bonus, as defined, full vesting of all time-based equity compensation, and a cash payment for health and welfare benefits.

Payment of the executives' severance benefits is contingent upon the executive's signing a release agreement waiving claims against us. If the executives are terminated for cause, no further payments are due under the contracts.

Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently

uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial condition, cash flows, or results of operations.

Washington Health Plan

The Washington Health Care Authority (HCA) has communicated that it believes it has erroneously overpaid our Washington health plan with regard to certain claims. The alleged overpayments, which were incorporated into the capitation rates paid to our Washington health plan, date back to the July 1, 2012 start date of the current contract. However, HCA has provided us with minimal data by which we might independently validate such allegations. Furthermore, the alleged errors, if they in fact occurred, were unilateral errors by HCA for which our Washington health plan had assumed and bore no contractual risk. We believe that any actual liability for the alleged overpayment claims is not currently probable or reasonably estimable.

California Health Plan Rate Settlement Agreement

In the fourth quarter of 2013, our California health plan entered into a settlement agreement with the California Department of Health Care Services (DHCS). The agreement settled rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in Medi-Cal (California's Medicaid program).

Under the terms of the settlement agreement, DHCS has agreed to extend each of the California health plan's existing Medi-Cal managed care contracts for an additional five years, including its contracts in San Diego, San Bernardino, Riverside, and Sacramento counties. In addition, effective January 1, 2014, the settlement established a settlement account applicable to the California health plan's Medi-Cal, Seniors and Persons with Disabilities (SPD), and the dual eligibles pilot programs. The settlement account was established with an initial balance of zero, and will be adjusted annually to reflect a calendar year deficit or surplus. A deficit or surplus will result to the extent the health plan's pre-tax margin is below or above 3.25%, subject to further adjustment as specified in the settlement agreement. Such settlement amount shall be based on 75% of the health plan's revenue in 2014; and 50% of the health plan's revenue in each subsequent year of the settlement agreement. Cash settlement will occur after December 31, 2017. DHCS will make an interim partial settlement payment to us if it terminates early, without replacement, any of our Medi-Cal managed care contracts. Upon expiration of the settlement agreement, if the settlement account is in a deficit position, then DHCS will pay the amount of the deficit to us, subject to an alternative minimum payment amount. The alternative minimum amount is calculated as follows: (i) $40 million, minus (ii) any partial settlement payments previously made to our California health plan by DHCS, minus (iii) 50% of the pre-tax income on our Medi-Cal, SPD, and dual eligibles pilot program business in excess of a 2.0% pre-tax margin for each calendar from 2014 through 2017. If the settlement account is in a surplus position, then no amount is owed to either party. The maximum amount that DHCS would pay to us under the terms of the settlement agreement is $40 million.

The settlement agreement did not impact our consolidated financial condition, cash flows, or results of operations for the year ending December 31, 2013.

Professional Liability Insurance

We carry medical professional liability insurance for health care services rendered through our primary care clinics. We also carry claims-made managed care errors and omissions professional liability insurance for our health plan operations.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Regulators in some states may also attempt to enforce capital requirements upon us that require the retention of net worth in

excess of amounts formally required by statute or regulation. Such statutes, regulations and informal capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was approximately $608 million at December 31, 2013, and $550 million at December 31, 2012. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $365.2 million and $46.9 million as of December 31, 2013, and 2012, respectively.

The National Association of Insurance Commissioners (NAIC), adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC), rules. All of our state health plans have adopted these rules, which may vary from state to state, except California and Florida. California and Florida have not adopted NAIC risk-based capital requirements for HMOs, and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of December 31, 2013, our health plans had aggregate statutory capital and surplus of approximately $662 million compared with the legally required minimum aggregate statutory capital and surplus of approximately $389 million. As described in Note 2, "Significant Accounting Policies," under the subheading "Recent Accounting Pronouncements," we anticipate that the health care federal excise tax on health insurers will result in the recording of a liability of approximately $85 million spread across our all of our health plans. The liability for that excise tax, when recorded effective January 1, 2014, will reduce our aggregate statutory capital and surplus by the same amount. All of our health plans were in compliance with the minimum capital requirements at December 31, 2013. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Receivable/Liability for Ceded Life and Annuity Contracts

Prior to February 2012, we reported a 100% ceded reinsurance arrangement for life insurance policies written and held by our then wholly owned insurance subsidiary, Molina Healthcare Insurance Company, by recording a non-current receivable from the reinsurer with a corresponding non-current liability for ceded life and annuity contracts. In February 2012, we sold Molina Healthcare Insurance Company and recorded a gain of $1.7 million to general and administrative expenses in 2012 upon closing of the transaction.

Molina Healthcare Insurance Company is now named Catamaran Insurance of Ohio (Catamaran). In the event that both the reinsurer and Catamaran are unable to pay benefits on policies that were in-force as of the sale date, we remain ultimately liable for payment of such benefits. Because we no longer own Catamaran, we no longer have access to its financial records; therefore, the maximum amount of potential future payments is not determinable. We believe the possibility of our having to pay such benefits is remote, and no provision for the payment of such benefits is included in our consolidated financial statements.

21. Segment Information

We report our financial performance based on two reportable segments: the Health Plans segment and the Molina Medicaid Solutions segment. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans and also includes our direct delivery business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides MMIS design, development and implementation; business process outsourcing solutions; hosting services; and information technology support services to Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, “Significant Accounting Policies.” The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

	Year Ended December 31,		
	2013	2012	2011
	(In thousands)		
Revenue from continuing operations:			
Health Plans segment:			
Premium revenue	$ 6,179,170	$ 5,544,121	$ 4,211,493
Premium tax revenue	172,017	158,991	154,589
Investment income	6,890	5,075	5,446
Rental income and other revenue	26,322	18,312	8,288
Molina Medicaid Solutions segment:			
Service revenue	204,535	187,710	160,447
	$ 6,588,934	$ 5,914,209	$ 4,540,263
Depreciation and amortization reported in the consolidated statements of cash flows:			
Health Plans segment	$ 67,446	$ 58,577	$ 45,734
Molina Medicaid Solutions segment	26,420	20,187	28,649
	$ 93,866	$ 78,764	$ 74,383
Operating income from continuing operations:			
Health Plans segment	$ 103,931	$ 17,366	$ 133,758
Molina Medicaid Solutions segment	32,629	23,727	2,063
Total operating income from continuing operations	136,560	41,093	135,821
Interest expense	52,071	16,769	15,519
Other expenses	3,343	945	—
Income from continuing operations before income taxes	$ 81,146	$ 23,379	$ 120,302

	As of December 31,		
	2013	2012	2011
	(In thousands)		
Goodwill and intangible assets, net:			
Health Plans segment	$ 248,562	$ 139,710	$ 159,963
Molina Medicaid Solutions segment	81,047	89,089	95,787
	$ 329,609	$ 228,799	$ 255,750
Total assets:			
Health Plans segment	$ 2,809,439	$ 1,702,212	$ 1,429,283
Molina Medicaid Solutions segment	193,498	232,610	222,863
	$ 3,002,937	$ 1,934,822	$ 1,652,146

Goodwill and intangible assets increased in the Health Plans segment due to the acquisitions described in Note 4, "Business Combinations."

22. Quarterly Results of Operations (Unaudited)

The following table summarizes quarterly unaudited results of operations for the years ended December 31, 2013 and 2012. We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal on June 30, 2012. Effective June 30, 2013 the transition obligations associated with that contract terminated. Therefore, we have reclassified the results relating to the Missouri health plan to discontinued operations for all periods presented.

	For The Quarter Ended			
	March 31, 2013(1)	June 30, 2013(3)	September 30, 2013	December 31, 2013
	(In thousands, except per-share data)			
Premium revenue (2)	$ 1,497,433	$ 1,501,729	$ 1,584,656	$ 1,595,352
Service revenue	49,756	49,672	51,100	54,007
Operating income (loss), Health Plans segment	61,520	40,151	16,929	(14,669)
Operating income, Molina Medicaid Solutions segment	6,353	6,295	7,997	11,984
Income (loss) from continuing operations	$ 30,522	$ 15,796	$ 7,553	$ (9,041)
(Loss) income from discontinued operations	(607)	8,775	16	(85)
Net income (loss)	$ 29,915	$ 24,571	$ 7,569	$ (9,126)
Net income (loss) per share (4):				
Basic	$ 0.65	$ 0.54	$ 0.17	$ (0.20)
Diluted	$ 0.64	$ 0.53	$ 0.16	$ (0.20)

	For The Quarter Ended			
	March 31, 2012(1)	June 30, 2012	September 30, 2012	December 31, 2012
	(In thousands, except per-share data)			
Premium revenue (2)	$ 1,225,363	$ 1,392,774	$ 1,448,600	$ 1,477,384
Service revenue	42,205	41,724	48,422	55,359
Operating income (loss), Health Plans segment	27,903	(56,072)	(5,788)	51,323
Operating income, Molina Medicaid Solutions segment	8,409	6,642	8,156	520
Income (loss) from continuing operations	$ 19,894	$ (33,057)	$ (165)	$ 26,194
(Loss) income from discontinued operations	(1,805)	(4,249)	3,529	(551)
Net income (loss)	$ 18,089	$ (37,306)	$ 3,364	$ 25,643
Net income (loss) per share (4):				
Basic	$ 0.39	$ (0.80)	$ 0.07	$ 0.55
Diluted	$ 0.39	$ (0.80)	$ 0.07	$ 0.54

(1) In connection with the reclassification of Missouri health plan results to discontinued operations, amounts differ from amounts previously reported in our Quarterly Reports on Form 10-Q as follows: premium revenue for the quarters ended March 31, 2013 and 2012 decreased $0.2 million and $56.6 million, respectively; operating income, Health Plans segment, for the quarters ended March 31, 2013 and 2012 decreased $0.8 million and $2.9 million, respectively.

(2) Prior to the third quarter of 2013, premium tax revenue was included in premium revenue. The presentation change reduced premium revenue for the amount now reported as premium tax revenue. In connection with this presentation change, amounts differ from the amounts previously reported in our Quarterly Reports on Form 10-Q as follows: premium revenue reported for the quarter ended March 31, 2013 and 2012 decreased $37.0 million and $43.4 million, respectively; premium revenue reported for the quarter ended June 30, 2013 and 2012 decreased $46.9 million and $39.6 million, respectively.

(3) We abandoned our equity interests in the Missouri health plan during the second quarter of 2013, resulting in the recognition of a tax benefit of $9.5 million, which is included in (loss) income from discontinued operations.

(4) Potentially dilutive shares issuable pursuant to our 1.125% Warrants were not included in the computation of diluted net income per share for all quarters in 2013, because to do so would have been anti-dilutive. Potentially dilutive shares issuable pursuant to our 3.75% Notes were not included in the computation of diluted net income per share for the quarters ended March 31, 2013, June 30, 2013, and all quarters in 2012, because to do so would have been anti-dilutive.

23. Condensed Financial Information of Registrant

Following are our parent company only condensed balance sheets as of December 31, 2013 and 2012, and our condensed statements of income, condensed statements of comprehensive income and condensed statements of cash flows for each of the three years in the period ended December 31, 2013.

Notes to Condensed Financial Information of Registrant

Note A - Basis of Presentation

Molina Healthcare, Inc. (the Registrant, or the Parent), was incorporated on July 24, 2002. Prior to that date, Molina Healthcare of California (formerly known as Molina Medical Centers) operated as a California health plan and as the parent company for Molina Healthcare of Utah, Inc. Molina Healthcare of Michigan, Inc. and Molina Healthcare of Washington, Inc. In June 2003, the employees and operations of the corporate entity were transferred from Molina Healthcare of California to the Registrant.

The Registrant's investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries since the date of acquisition. The accompanying condensed financial information of the Registrant should be read in conjunction with the consolidated financial statements and accompanying notes.

Note B - Transactions with Subsidiaries

The Registrant provides certain centralized medical and administrative services to its subsidiaries pursuant to administrative services agreements, including medical affairs and quality management, health education, credentialing, management, financial, legal, information systems and human resources services. Fees are based on the fair market value of services rendered and are recorded as operating revenue. Payment is subordinated to the subsidiaries' ability to comply with minimum capital and

other restrictive financial requirements of the states in which they operate. Charges in 2013, 2012, and 2011 for these services amounted to $592.1 million, $406.4 million, and $307.9 million, respectively, which are included in operating revenue.

During 2013, the Registrant used a portion of the proceeds from the sale of the Molina Center, described in Note 12, "Long-Term Debt," to repay the remaining principal balance of the related term loan, on behalf of a subsidiary of the Registrant.

The Registrant and its subsidiaries are included in the consolidated federal and state income tax returns filed by the Registrant. Income taxes are allocated to each subsidiary in accordance with an intercompany tax allocation agreement. The agreement allocates income taxes in an amount generally equivalent to the amount which would be expensed by the subsidiary if it filed a separate tax return. Net operating loss benefits are paid to the subsidiary by the Registrant to the extent such losses are utilized in the consolidated tax returns.

Note C - Dividends, Capital Contributions and Surplus Note

During 2013, 2012, and 2011, the Registrant received dividends from its subsidiaries. Such amounts have been recorded as a reduction to the investments in the respective subsidiaries. In addition, in 2011 a subsidiary of the Registrant repaid a surplus note in favor of the Registrant amounting to $9.7 million, including accrued interest. Such amount was a reduction of due from affiliates and prepaid and other current assets.

During 2013, 2012, and 2011, the Registrant made capital contributions to certain subsidiaries primarily to comply with minimum net worth requirements and to fund contract acquisitions. Such amounts have been recorded as an increase in investment in the respective subsidiaries, net of insignificant returns of capital.

Note D - Related Party Transactions

The Registrant's related party transactions are described in Note 18, "Related Party Transactions."

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures: Our management is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934 (the "Exchange Act"). Our internal control over financial reporting is designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements. We maintain controls and procedures designed to ensure that we are able to collect the information we are required to disclose in the reports we file with the Securities and Exchange Commission, and to process, summarize and disclose this information within the time periods specified in the rules of the Securities and Exchange Commission.

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has conducted an evaluation of the design and operation of our "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e)) under the Exchange Act. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective as of the end of the period covered by this report to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management's Report on Internal Control over Financial Reporting: Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States. However, all internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and reporting.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2013. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework* (1992 framework).

Based on our assessment, management believes that the Company maintained effective internal control over financial reporting as of December 31, 2013, based on those criteria.

Ernst & Young, LLP, the independent registered public accounting firm who audited the Company's Consolidated Financial Statements included in this Form 10-K, has issued a report on the Company's internal control over financial reporting, which is included herein.

Changes in Internal Control over Financial Reporting. There were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) during the quarter ended December 31, 2013, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
of Molina Healthcare, Inc.

We have audited Molina Healthcare, Inc.'s (the "Company's") internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Molina Healthcare, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Molina Healthcare, Inc. as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2013 and our report dated February 26, 2014 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

Los Angeles, California
February 26, 2014

PART III

Item 10. Directors, Executive Officers, and Corporate Governance

Pursuant to General Instruction G(3) to Form 10-K and Instruction 3 to Item 401(b) of Regulation S-K, information regarding our executive officers is provided in Item 1 of Part I of this Annual Report on Form 10-K under the caption "Executive Officers of the Registrant," and will also appear in our definitive proxy statement for our 2014 Annual Meeting of Stockholders. The remaining information required by Items 401, 405, 406 and 407(c)(3), (d)(4) and (d)(5) of Regulation S-K will be included under the headings "Election of Directors," "Corporate Governance," and "Section 16(a) Beneficial Ownership Reporting Compliance" in our definitive proxy statement for our 2014 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Item 11. Executive Compensation

The information required by Items 402, 407(e)(4), and (e)(5) of Regulation S-K will be included under the headings "Executive Compensation" and "Compensation Committee Interlocks and Insider Participation" in our definitive proxy statement for our 2014 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Securities Authorized for Issuance Under Equity Compensation Plans (as of December 31, 2013)

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)		Weighted Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) (c)	
Equity compensation plans approved by security holders	379,221	(1)	$ 24.14	5,308,237	(2)

(1) Options to purchase shares of our common stock issued under the 2002 Equity Incentive Plan. Further grants under the 2002 Equity Incentive Plan have been suspended.

(2) Includes shares remaining available to issue under the 2011 Equity Incentive Plan, and the 2011 Employee Stock Purchase Plan.

The remaining information required by Item 403 of Regulation S-K will be included under the heading "Security Ownership of Certain Beneficial Owners and Management" in our definitive proxy statement for our 2014 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by Items 404 and 407(a) of Regulation S-K will be included under the headings "Related Party Transactions" and "Corporate Governance" in our definitive proxy statement for our 2014 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

Additionally, refer to Part II, Item 8 of this Form 10-K, Notes to Consolidated Financial Statements, in Note 18, "Related Party Transactions," and Note 19, "Variable Interest Entities," under the subheading "Joseph M. Molina M.D., Professional Corporations."

Item 14. Principal Accountant Fees and Services

The information required by Item 9(e) of Schedule 14A will be included under the heading "Independent Registered Public Accounting Firm" in our definitive proxy statement for our 2014 Annual Meeting of Stockholders, and such required information is incorporated herein by reference.

PART IV

Item 15. ***Exhibits and Financial Statement Schedules***

(a) The consolidated financial statements and exhibits listed below are filed as part of this report.

(1) The financial statements included in Item 8 of this Form 10-K, Financial Statements and Supplementary Data, above are filed as part of this annual report.

(2) Financial Statement Schedules

None of the schedules apply, or the information required is included in the Notes to the Consolidated Financial Statements.

(3) Exhibits

Reference is made to the accompanying Index to Exhibits.

INDEX TO EXHIBITS

The following exhibits, which are furnished with this annual report or incorporated herein by reference, are filed as part of this annual report.

The agreements included or incorporated by reference as exhibits to this Annual Report on Form 10-K contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties were made solely for the benefit of the other parties to the applicable agreement and (i) were not intended to be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate; (ii) may have been qualified in such agreement by disclosures that were made to the other party in connection with the negotiation of the applicable agreement; (iii) may apply contract standards of "materiality" that are different from "materiality" under the applicable securities laws; and (iv) were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement. The Company acknowledges that, notwithstanding the inclusion of the foregoing cautionary statements, it is responsible for considering whether additional specific disclosures of material information regarding material contractual provisions are required to make the statements in this Annual Report on Form 10-K not misleading.

EXHIBIT 10.5

MOLINA HEALTHCARE, INC.

AMENDED AND RESTATED

DEFERRED COMPENSATION PLAN

(2013)

This Deferred Compensation Plan (the "Plan") is amended and restated effective October 1, 2013 (the "Restatement"), by MOLINA HEALTHCARE, INC., a Delaware corporation (the "Company") with reference to the following:

A. The Company originally established a Deferred Compensation Plan for key employees, effective September 1, 1999 (the "Original Plan"). The Original Plan was amended on March 29, 2001.

B. As a result of the adoption of section 409A of the Internal Revenue Code of 1986 (the "Code"), the Original Plan was frozen effective at midnight on December 31, 2004.

C. This Plan was implemented effective January 1, 2005 to replace the Original Plan with a new plan that complies with the requirements of Code section 409A and the related Treasury Regulations (and other guidance from the Internal Revenue Service) thereunder (collectively, the "409A Requirements").

D. This Plan was established to provide key employees of the Company and its subsidiaries a tax deferred, capital accumulation program. The Plan is intended to provide benefits to a select group of management or highly compensated personnel in order to attract and retain the highest quality executives. The Company does not intend for this to be a qualified plan within the meaning of sections 401(a) and 501(a) of the Code.

E. This Plan is hereby amended and restated to ensure compliance with the 409A Requirements.

F. This Plan is intended to be an unfunded plan for purposes of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Company contributions and voluntary compensation deferrals shall be held in a "Rabbi Trust," as that term is defined in Revenue Procedure 92-64, 1992-2 C.B. 422.

NOW, THEREFORE, the Company hereby adopts this Plan on the following terms and conditions:

1. Definitions. Whenever used in this Plan, the following words and phrases shall have the meaning set forth below, unless a different meaning is expressly provided or plainly required by the context in which the words or phrases are used:

1.1. Beneficiary means a person designated by a Participant to receive Plan benefits in the event of the Participant's death.

1.2. Board means the Board of Directors of the Company and its successors.

1.3. Change in Control means, a Change in Ownership, a Change in the Effective Control, a Change in Assets or a termination of the Plan and distribution of compensation deferred hereunder within twelve (12) months after any of the foregoing events. For purposes of this Section, "Company" shall include (i) the company for which a Participant is performing services at the time of the Change in Control, (ii) the company liable for the payment of the deferred compensation (or all companies liable if more than one company is liable), or a company that is a majority shareholder of a company identified in (i) or (ii), or any company in a chain of companies in which each company is a majority shareholder of another company in the chain, ending in a company identified in (i) or (ii). The events described in this section will not be considered to occur, with respect to an employee of a participating entity, if a participating entity is sold and the employee of the participating entity continues employment with the Employer subsequent to the sale. The events described in this section have the following meanings:

a. Change in Ownership means the acquisition of stock by any one person or persons acting in concert (a "group") of the Company, that when added to the stock of the person or group constitutes more than 50% of the total fair market value or total voting power of the stock of the Company. The acquisition of additional stock by any person or group who are already considered to own more than 50% of the stock of the Company shall not constitute a change in ownership of the Company. An increase in the percentage of stock owned by any person or group, as result of a transaction in which the Company acquires its stock in exchange for property will be treated as an acquisition of stock for purposes of this section.

b. Change in the Effective Control means the occurrence of any of the following events, despite the fact that the Company has not undergone a Change in Ownership as described above:

i. The acquisition by any person or group (or acquisition during the 12-month period ending on the date of the most recent acquisition by such person or persons) of ownership of stock of the Company possessing 35% or more of the total voting power of the stock, except if such acquisition is the result of a change in "record ownership" and not a change in "beneficial ownership;"

ii. The replacement of a majority of the Company's board of directors during any 12-month period by directors whose appointment or election is not endorsed by a majority of the members of the

Company's board of directors prior to the date of the appointment or election; or

iii. A transaction between the Company and another company resulting in a Change in Control. Provided that this section shall not apply to the acquisition of additional control of the Company by any person or group, if that person or group is considered to effectively control the Company prior to the acquisition.

iv. Provided that this section shall not apply to the acquisition of additional control of the Company by any person or group, if that person or group is considered to effectively control the Company prior to the acquisition.

c. Change in Assets means the acquisition by any person or group (or acquisition during the 12-month period ending on the date of the most recent acquisition by such person or persons) of assets from the Company, that have a total gross fair market value equal to, or more than, 40% of the total gross fair market value of all the assets of the Company immediately prior to such acquisition or acquisitions. A transfer of assets by the Company will not be treated as a Change in Assets if the assets are transferred to any of the following (determined immediately after the transfer):

i. A shareholder of the Company (as determined, immediately before the asset transfer) in exchange for or with respect to its stock;

ii. An entity, 50% or more of the total value or voting power of which is owned directly or indirectly by the Company;

iii. A person or group that owns, directly or indirectly, 50% or more of the total value or voting power of all the outstanding stock of the Company; or

iv. An entity, at least 50% of the total value or voting power of which is owned, directly or indirectly, by a person described in (iii).

For purposes of this subsection (c), the gross fair market value of assets is the value of the assets of the Company or the value of the assets being disposed of with regard to any liabilities associated with such assets. If assets are transferred to an entity that is controlled by the shareholders of the transferring company immediately after the transfer, there is no Change in Control.

1.4. Company means MOLINA HEALTHCARE, INC., a Delaware corporation.

1.5. Company Stock means shares of stock issued by the Company.

1.6. Disability means with respect to a Participant (i) the inability to engage in any substantial gainful activity by reason of any medically determinable physical or

mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than twelve (12) months, or (ii) the receipt of income replacement benefits for a period of not less than three (3) months under an accident and health plan covering employees of the Company, by reason of any medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than twelve (12) months.

1.7. The original Effective Date of this Plan means January 1, 2005. The Effective Date of this Restatement shall mean October 1, 2013.

1.8. Key Employee means an employee of the Company or a Subsidiary, who is (A) a member of a select group of management or highly compensated employees within the meaning of §2520.104-23 of the Department of Labor ERISA Regulations, (B) projected to receive Plan Year Compensation (base pay plus bonus), including amounts deferred to any 401(k) Plan, Deferred Compensation Plan, or Cafeteria Plan maintained by the Company, of $125,000 or more and (C) designated by the Plan Committee as a Key Employee.

1.9. Participant means (A) a Key Employee who timely files a Written Election pursuant to Section 2.3, below, and (B) a former Employee who, at the time of his termination from employment, retirement, death, or occurrence of Disability, retains, or whose beneficiary retains, benefits earned under the Plan in accordance with its terms. A Participant is considered an Active Participant in the Plan until the earlier of the following: (A) the Participant separates from service under the terms of this Plan; or (B) the Participant is no longer a Key Employee.

1.10. Plan means the Molina Healthcare, Inc. Amended and Restated Deferred Compensation Plan (2013) evidenced by this document and the Trust Agreement previously established in connection herewith.

1.11. Plan Committee means the individuals appointed by the Board from time to time to administer the Plan as provided herein.

1.12. Plan Year means the calendar year.

1.13. Plan Year Compensation means the total taxable income (other than Share Awards) paid to an Active Participant by the Company or a Subsidiary during any Plan Year, or portion thereof in which he is a Participant in this Plan, as reflected on a Key Employee's form W-2.

1.14. Separation from Service. A separation from service with the Company, provided such separation constitutes a separation from service under Treasury Regulation Section 1.409A-1(h).

1.15. Share Awards means shares of Company Stock which are awarded to a Participant as an employee by the Company.

1.16. Specified Employee means a "key employee" of the Company, as defined in section 416(i) of the Code without regard to paragraph five (5) thereof.

1.17. Subsidiary means any entity in which the Company owns not less than 80% of the outstanding voting interests.

1.18. Trust Agreement means the grantor trust established in connection with this Plan between the Company as grantor and the Trustee.

1.19. Trustee means Union Bank of California and any successor institutional trustee named to succeed such Trustee under the terms of the Trust Agreement established in connection with this Plan.

1.20. Unforeseeable Financial Emergency means: (i) an illness or accident of the Participant or beneficiary, the Participant's or beneficiary's spouse, or the Participant's or beneficiary's dependent; (ii) the loss of the Participant's or beneficiary's property due to casualty; or (iii) other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the Participant or beneficiary. Determination of whether a Participant has incurred an Unforeseeable Financial Emergency shall be made by the Plan Committee, in accordance with the requirements of Section 409A of the Code and any guidance issued thereunder.

2. Participation.

2.1. Eligibility. An employee of the Company or a Subsidiary is eligible to participate in this Plan upon meeting the criteria for Key Employee specified in Section 1.7. Any Key Employee who was a Participant in the Original Plan and who continued in the employ of the Company on the Effective Date will continue to be a Participant in this Plan, subject to the right of the Company's Chief Executive to no longer designate such employee as a Key Employee thereafter.

2.2. Entry Date. An employee of the Company or a Subsidiary who met the eligibility requirement specified in Section 2.1 as of the Effective Date of this Plan Restatement is a Participant in the Plan as of the Effective Date. Newly eligible employees of the Company who have met the enrollment requirements under Section 2.3 of the Plan shall commence participation in the Plan within thirty (30) days of their date of hire. An employee of the Company or a Subsidiary who meets the eligibility requirements specified in Section 2.1 but fails to meet the requirements in accordance with Section 2.3 within the period required, shall become a Participant in this Plan on the first day of the next Plan year following submission of a Written Election form as specified in Section 2.3.

2.3. Written Election by Participant. As a condition to participation in the Plan, each newly eligible Employee shall complete, sign and return to the Plan Committee a Written Election within thirty (30) days after the date the Participant becomes eligible to participate in the Plan. Annual enrollment shall be in December each year for the following Plan Year. Each Participant shall submit a Written Election prior to the first day of the Plan Year in which he or she will be a Participant.

a. Such Written Election shall be made on the form presented to the Participant by the Plan Committee and shall set forth:

v. his election to participate in this Plan under the terms hereof;

vi. the amount of Plan Year Compensation the Participant has determined to defer under the Plan for the Plan Year, pursuant to Section 3.1 below;

vii. the investment vehicles into which the Participant desires to have his Account attributable to deferral of Plan Year Compensation invested, as provided in Section 3.5 below, and the percentage of such Account allocated to each elected investment vehicle;

viii. the date on which his benefit is to be distributed which is the earliest of: (a) the date specified for an In-Service Withdrawal; (b) an Unforeseeable Financial Emergency; (c) the later of (i) when he separates from service with the Company for any reason or (ii) a date subsequent to his termination of employment specified by the Participant;

ix. the form in which his benefit is to be distributed upon separation from service or retirement.

b. A Participant's most recently submitted Written Election shall remain in effect for subsequent Plan Years until the Participant changes it in accordance with the following:

v. A Participant may change the amount of Plan Year Compensation he/she will defer under the Plan for future Plan Years by submitting a new Written Election to the Company. Such new election must be submitted to the Company on or before the seventh (7th) day immediately preceding the Plan Year for which the new election is to be effective. Any election of the amount of Plan Year Compensation to defer for a given Plan Year shall be irrevocable on and after the first day of the Plan Year for which the election was made.

vi. A Participant may change the investment vehicle(s) in which he desires to have that portion of his Account attributable to Plan Year

Compensation and investment income invested and the percentage of his Account allocated to each investment vehicle by completing and submitting any form or forms required by the Company. Changes in investment vehicle(s) will be made as of the last business day of each month. The Participant must submit the completed form or forms with the requested changes to the Trustee on or before the twenty-fifth (25th) day of the current month (or the last business day immediately preceding the twenty-fifth of the month) for the changes to be made by the last business day of the current month. Changes requested on forms submitted after the twenty-fifth (25th) day of the current month will be made on the last business day of the following month.

vii. Notwithstanding the foregoing, the Trustee shall, at the direction of the Plan Committee, have the duty and authority to invest the trust assets and funds in accordance with the terms of the Trust Agreement, and all rights associated with the trust assets shall be exercised by the Trustee as designated by the Plan Committee and shall in no event be exercisable by or be settled upon Participants or their Beneficiaries.

viii. A Participant may change the date or form of distribution by submitting a new Written Election to the Company, provided that the following conditions are met:

(1) That such election may not take effect until at least twelve (12) months after the date on which the election is made;

(2) In the case of an election related to a payment other than a payment on account of death, disability or the occurrence of an financial hardship, such payment must be deferred for a period of not less than five (5) years from the date such payment would have otherwise been made, and

(3) Any election related to a payment at a specified time or pursuant to a fixed schedule may not be made less than twelve (12) months prior to the date of the first scheduled payment.

2.4. Duration of Participation. Any Key Employee who has become a Participant at any time shall remain a Participant, even though he is no longer an Active Participant, until his entire benefit under the terms of the Plan has been paid to him (or to his Beneficiary in the event of his death), at which time he ceases to be a Participant.

2.5. Maintenance of Records. The annual Designation of Participants by the Plan Committee shall be maintained in the corporate minute book. The Written Elections by Participants shall be maintained in the corporate records with all other files pertaining to this Plan by the Plan Committee.

3. Contributions and Allocation.

3.1. Participant Contributions. A Participant may elect to defer a portion, up to 100%, of his Plan Year Compensation. For a Participant's initial Plan Year of participation, the minimum deferral for base pay and bonus pay, combined, must be at least $5,000. For succeeding years of participation, a Participant may not defer an amount less than the minimum established from year to year by the Plan Committee. A written election must be submitted, pursuant to the terms of Section 2.3, specifying the dollar amount or percentage of Plan Year Compensation the Participant has chosen to defer. A separate written election must be submitted, pursuant to the terms of Section 2.3, specifying the dollar amount or percentage of bonus pay the employee has chosen to defer. Once a Participant's contributions for a Plan Year reach his elected dollar amount or percentage, such Participant shall not be allowed to defer additional portions of his Plan Year Compensation for the remainder of the Plan Year. Any amounts in excess of his elected dollar amount or percentage inadvertently deferred shall be refunded to the Participant as soon as practicable.

3.2. Company Contributions. The Company may, subject to the sole discretion of its Board of Directors, make contributions for the Participants, reserving the right to discriminate among the Participants in the amount or percentage of contributions made in any Plan Year.

3.3. Allocation of Participant Contributions. All amounts which a Participant elects to defer under the terms of this Plan shall be allocated to his Account as of the last business day of each month. Each such Participant Deferral Account shall be credited with earnings as provided in Section 3.5 below.

3.4. Allocation of Company Contributions. Any amounts contributed by the Company on behalf of a Participant under Section 3.2 above shall be allocated to the Company Contribution Account of each Participant. Each such Company Contribution Account shall be credited with earnings as provided in Section 3.5 below.

3.5. Credited Earnings. The Account of each Participant (which includes his Participant Deferral Account established under Section 3.1 and his Company Contribution Account established under Section 3.2) shall be credited as of the last business day of each month with the actual monthly earnings on the investments allocated to his Account.

3.6. Funding. The assets of the Plan shall be held under the Trust Agreement (a "grantor trust") designated in Article I above. As such, the Plan is intended to be an unfunded plan for purposes of the requirements of ERISA and the Code.

Notwithstanding the provisions under the terms of the Plan that amounts contributed to this Plan, plus earnings thereon, shall be allocated to separate Accounts of Participants, all such amounts credited to such individual Accounts shall remain the general assets of the Employer, and as such shall remain subject to the claims of the general creditors of the Company. This Plan and the related

Trust Agreement do not create, nor does any Employee, Participant or Beneficiary have, any right with respect to any specific assets of the Company or the Plan.

4. Vesting of Accounts. The Participant Deferral Accounts and the Company Contribution Account of each Participant shall be 100% vested in such Participant at all times.

5. Types of Benefits.

5.1. Separation from Service Benefit. A Participant's Separation for Service Benefit is the unpaid balance of his Accounts which equals the total of all contributions made by the Participant and the Company allocated to his Account and all earnings credited to his Account in accordance with the terms of the Plan and the Trust Agreement, less any distributions already paid.

5.2. Disability Benefit. If a Participant becomes Disabled as defined in Section 1.5 above, the Company will pay his Retirement Benefit, calculated under Section 5.1, in the applicable form elected by the Participant in his Written Election.

A Participant who believes he has suffered a Disability within the meaning of Section 1.5 shall make application to the Plan Committee, on a form prescribed by the Plan Committee, for a determination of whether he is Disabled under the terms of Section 1.5. The Participant shall make such written application to the Plan Committee on or after the date which is at least five (5) consecutive months following the date he first suffered the impairment under consideration. Any determination by the Plan Committee that a Disability exists under the provisions of Section 1.5 shall be effective only after the date the Disability has existed for six (6) consecutive months. All determinations made by the Plan Committee shall be final, and no Participant shall be considered Disabled for any purpose whatsoever under the provisions of this Plan if determined not to be Disabled by the Plan Committee under the procedures set forth in this Section.

The Plan Committee shall notify each Participant who has made application under this Section 5.2, in writing, of its determination within three (3) months of the date the Plan Committee receives the Participant's application hereunder. The Participant shall cooperate in providing any information to the Plan Committee which it requires in making its determination, including, but not limited to, access to the Participant's medical records, direct contact with his physician, and physical examination by a physician selected by the Company. Any Participant who does not fully cooperate shall be deemed not Disabled by the Plan Committee and so notified.

5.3. Death Benefit.

(1) If a Participant dies after a distribution has commenced or if the Company has not purchased a life insurance contract in connection with the Participant's Retirement Benefit, the Company will continue the payments of such distribution otherwise due to the Participant to his designated Beneficiary, in the applicable form elected by the Participant in his Written Election.

(2) If a Participant dies while still employed by the Company and the Company has purchased a life insurance contract in connection with such Participant's Retirement Benefit, the Company will pay the Participant's designated Beneficiary the greater of his Retirement Benefit as determined under Section 5.1 above or his Projected Retirement Benefit (as defined below), in the applicable form elected by the Participant in his Written Election. "Projected Retirement Benefit" means the amount determined by projecting the average of the Participant's contributions for all years of participation hereunder, at an earnings rate periodically set by the Plan Committee, to retirement at age 60.

5.4. In-Service Withdrawal. A Participant may designate a date in the future for receipt of an In-Service Withdrawal with respect to the Participant's contribution for a given Plan Year. Such withdrawal may be paid while the Participant remains employed with the Company, but shall be paid without Credited Earnings attributable to such Participant Contribution (which Credited Earnings shall be distributed upon termination of employment or retirement) in four (4) equal yearly installments commencing no earlier three (3) years after such Participant's commencement of participation in the Plan; provided, however, that a Participant may elect to defer commencement of an In-Service Withdrawal subject to the following requirements:

i. the Participant must deliver to the Company of a written election not later than twelve (12) months prior to the date the payment is scheduled to be paid;

ii. the payments that are subject to the election must be delayed at least five (5) years from the date the payments would have otherwise been made; and

iii. the election will not take effect until at least twelve (12) months after the election is made.

5.5. Unforeseeable Financial Emergency Benefit. A Participant may request a portion of his Retirement Benefit as an Unforeseeable Financial Emergency Benefit at any time by providing the Plan Committee, to its satisfaction, with a written request, proof of an Unforeseeable Financial Emergency, and proof that all other financial resources have been explored and utilized to: (i) receive a partial or full payout from the Plan and/or (ii) suspend any deferrals required to be made by a Participant. The amount of a Unforeseeable Financial Emergency Benefit shall be limited to the lesser of the amount needed for the financial hardship or such Participant's Retirement Benefit. If a Participant receives a distribution as a result of an Unforeseeable Financial Emergency, such Participant may not participate in the Plan during the Plan Year following the year of the hardship distribution.

6. Distributions.

6.1. Form of Benefits. The Company shall pay benefits in the form associated with Type of Benefit elected by the Participant, and, to the extent a Type of Benefit may be distributed in various forms, the Company shall pay benefits in the form elected by the Participant. The forms of benefits associated with the Types of Benefits are the following:

a. Separation from Service Benefit, Disability Benefit, and Death Benefit shall be paid in (i) one lump sum; (ii) 5 yearly installments; (iii) 10 yearly installments; or (iv) 15 yearly installments;

b. In-Service Withdrawal shall be paid as provided in Section 5.5 above; and

c. Unforeseeable Financial Emergency Benefit shall be paid in one lump sum.

6.2. Commencement of Payments. The Company will pay, or begin to pay, the Types of Benefits under this Plan to the Participant in accordance with the following:

b. Separation from Service Benefit, Disability Benefit, and Death Benefit payments shall commence no later than 65 days following the date on which the Participant retires, terminates service, becomes disabled, or dies;

c. In-Service Withdrawal payments shall commence on the date designated by the Participant on his Written Election pursuant to Section 2.3, provided that such payments are from Participant Contributions that have been in such Participant's Deferral Account for at least two years;

d. Unforeseeable Financial Emergency Benefit payments shall commence no later than sixty-five (65) days after a request for a Unforeseeable Financial Emergency Benefit is approved by the Plan Committee.

6.3. Domestic Relations Order. In the event the Plan Committee receives a Domestic Relations Order from a potential Alternate Payee, the Plan Committee shall notify the Participant whose benefit is the subject of such order and provide him/her with information concerning the Plan's procedures for administering Qualified Domestic Relations Orders ("QDROs"). Unless and until the order is set aside, the following provisions shall apply:

b. The Plan Committee shall within a reasonable time determine whether the order is a QDRO and shall notify the Participant whose benefit is the subject of the order, of its determination. The Plan Committee may designate a representative to carry out its duties under this provision.

c. Nothing in this Section shall be deemed to allow payment under a QDRO to an Alternate Payee of any benefit which would violate Section 409A of the Code and the regulations thereunder.

d. QDRO definitions. For purposes of Section 6.3 the following definitions and rules shall apply:

i. Alternate Payee means any spouse, former spouse, child or other dependent of a Participant who is recognized by a QDRO as having a right to receive all, or a portion of, the benefits payable under this Plan with respect to the Participant.

ii. Domestic Relations Order means any judgment, decree, or order (including approval of a property settlement agreement) which:

(4) relates to the provision of child support, alimony payments, or marital property rights to a spouse, child, or other dependent of a Participant; and

(5) is made pursuant to a state domestic relations law (including a community property law).

iii. Qualified Domestic Relations Order means any Domestic Relations Order meeting the requirements for a Qualified Domestic Relations Order under Code section 414(p), which satisfies any additional criteria under policies established by the Plan Committee.

Notwithstanding sections 6.2 and 7.3, distributions to a Specified Employee shall not commence earlier than six (6) months after the date such Specified Employee experiences a separation from service (or, if earlier, the date of death of the employee).

7. Amendment, Termination of Plan, Change in Control.

7.1. Amendment. The Company reserves the right to amend the Plan at any time by resolution of the Plan Committee. The Plan Committee will determine the effective date of any such amendment. The amendment may not deprive any Participant or Beneficiary of any portion of a benefit under the terms of this Plan at the time of the amendment.

7.2. Termination of Plan. The Company reserves the right to terminate the Plan under the following circumstances:

e. The Plan Committee may resolve to terminate the Plan provided that:

i. all arrangements of the same type (account balance plans, nonaccount balance plans, separation pay plans or other arrangements) are terminated with respect to all participants;

ii. no payments other than those otherwise payable under the terms of the plan absent a termination of the plan are made within twelve (12) months of the termination of the arrangement;

iii. all payments are made within twenty-four (24) moths of the termination of the arrangement; and

iv. the Company does not adopt a new arrangement that would be aggregated with any terminated arrangement under the plan aggregation rules at any time for a period of five years following the date of termination of the arrangement.

f. The Plan Committee may terminate the Plan and make payments to the participants at any time during the twelve (12) months following a change in control of the corporation;

g. A corporate dissolution taxed under section 331, or with the approval of a bankruptcy court pursuant to 11 U.S.C. §503(b)(1)(A), provided that the amounts deferred under the plan are included in the participants' gross incomes by the latest of:

i. the calendar year in which the plan termination occurs,

ii. the calendar year in which the amount is no longer subject to a substantial risk of forfeiture, or

iii. the first calendar year in which the payment is administratively practicable.

7.3. Change in Control. In the event of a Change in Control, the Company shall, as soon as possible, but in no event later than ten days after the Change in Control, notify the Trustee, and the Trustee or its agent shall immediately calculate the Retirement Benefit of each Participant and distribute such amounts to the Participant or Beneficiary in a lump sum within thirty (30) days of the notification. If the Company fails to notify the Trustee as specified in this section, the Trustee may act upon notification of the "Change of Control" obtained in an alternate manner. The Trustee shall incur no liability to any person for any action taken pursuant to such notification and in conformity with the terms of the Plan.

8. Benefits Not Funded. Participants and Beneficiaries have the status of unsecured creditors of the Company, and the Plan constitutes a mere promise by the Company to make benefit payments in the future. A Participant's or Beneficiary's interest in the Plan is an unsecured claim against the general assets of the Company, and neither the Participant nor a Beneficiary has any right against the account until the Plan has distributed the benefit. All amounts credited to an account are the general assets of the Company and may be disposed of or used by the Company in such manner as it determines.

Notwithstanding the first paragraph of this Section 8, the Company will make deposits to a trust pursuant to a Trust Agreement, a copy of which is attached, as provided above. Such Trust Agreement created by the Company is intended to be a grantor trust, and any assets held by such

trust to assist the Company in meeting its obligations under the Plan will conform to the terms of the model trust, as described in Revenue Procedure 92-64, 1992-2 C.B. 422, promulgated by the Internal Revenue Service. The Company will make a transfer of cash to the trust annually in the amount necessary to pay the deferred compensation required.

It is the intention of the parties that this Plan and the accompanying Trust Agreement shall constitute an unfunded arrangement maintained for the purpose of providing deferred compensation for a select group of management or highly compensated employees for purposes of Title I of ERISA.

9. Administration.

9.1. Plan Committee. The Plan shall be administered by the Plan Committee. The Plan Committee shall have full authority and power to administer and construe the Plan, subject to applicable requirements of law. Without limiting the generality of the foregoing, the Plan Committee shall have the powers indicated in the foregoing Sections of the Plan and the following additional powers and duties:

a. To make and enforce such rules and regulations as it deems necessary or proper for the administration of the Plan;

b. To interpret the Plan and to decide all questions concerning the Plan;

c. To determine the amount and the recipient of any payments to be made under the Plan;

d. To designate and value any investments deemed held in the Accounts; and

e. To make all other determinations and to take all other steps necessary or advisable for the administration of the Plan.

All decisions made by the Plan Committee pursuant to the provisions of the Plan shall be made in its sole discretion and shall be final, conclusive, and binding upon all parties.

9.2. Delegation of Duties. The Plan Committee may delegate such of its duties and may engage such experts and other persons as it deems appropriate in connection with administering the Plan. The Plan Committee shall be fully protected in any action taken, in good faith, in reliance upon any opinions or reports furnished them by any such experts or other persons.

9.3. Indemnification of Committee. The Company agrees to indemnify and to defend to the fullest extent permitted by law any person serving as a member of the Plan Committee, and each employee of the Company or any of its affiliates appointed by the Plan Committee to carry out duties under this Plan, against all liabilities, damages, costs and expenses (including attorneys' fees and amounts paid in settlement of any claims approved by the Company) occasioned by any act or omission to act in connection with the Plan, if such act or omission is in good faith.

9.4. Liability. To the extent permitted by law, neither the Plan Committee nor any other person shall incur any liability for any acts or for any failure to act except for liability arising out of such person's own willful misconduct or willful breach of the Plan.

9.5. Claims Review Procedure.

a. A claim for benefits may be filed, in writing, with the Plan Committee. A written disposition of a claim shall be furnished to the claimant within a reasonable time after the claim for benefits is filed. In the event a claim for benefits is denied, the Plan Committee shall provide the claimant with the reasons for denial.

b. A claimant whose claim for benefits was denied may file for a review of such denial, with the Plan Committee, no later than 60 days after he has received written notification of the denial.

c. The Plan Committee shall give a request for review a full and fair review. If the claim for benefits is denied upon completion of a full and fair review, notice of such denial shall be provided to the claimant within 60 days after the Plan Committee's receipt of such written claim for review. This 60-day period may be extended in the event of special circumstances. Such special circumstances shall be communicated to the claimant in writing within the 60-day period. If there is an extension, a decision shall be made as soon as possible, but not later than 120 days after receipt by the Plan Committee of such claim for review.

d. If benefits are provided or administered by an insurance company, insurance service, or other similar organization which is subject to regulation under the insurance laws of a state, the claims procedure relating to these benefits may provide for review. If so, that company, service, or organization will be the entity to which claims are addressed.

10. General Provisions

10.1. Designation of Beneficiary. Each Participant shall designate, in writing, prior to the date he first becomes a Participant in the Plan, one or more beneficiaries to receive his benefit under the provisions of Section 5.4. The Participant shall file the written designation with the Plan Committee. The Participant may revoke a previous beneficiary designation by filing a new written beneficiary designation with the Plan Committee.

In any event, if a Participant or Beneficiary who has designated another Beneficiary is divorced, all beneficiary designations executed prior to the effective date of the dissolution of marriage (or other decree or order entered under applicable state law) are automatically revoked under the terms of this Section 10.1. In such event, the Participant or Beneficiary may designate one or more Beneficiaries in accordance with the terms of this Section 9.1. If none is made following

the effective date of the dissolution of the marriage, the individual's benefit shall pass under the laws of intestate succession and the terms of the next following paragraph.

If a Participant fails to file a valid designation of beneficiary with the Plan Committee under the provisions of this Section 10.1, or if a designated Beneficiary fails to survive to receive any or all payments due hereunder, then the death benefit payable under this Plan shall be payable to the Participant's (or the Beneficiary's) spouse; if no spouse survives, then to the Participant's (or Beneficiary's) children, with equal shares among living children and with the living descendants of a deceased child receiving equal portions of the deceased child's share; in the absence of spouse or descendants, to the Participant's (or Beneficiary's) parents; and in the absence of spouse, descendants or parents, to the Participant's (or Beneficiary's) brothers and sisters, with the living descendants of a deceased brother and those of a deceased sister receiving equal portions of the deceased brother's or sister's share; in the absence of any of the persons name herein, to the Participant's (or Beneficiary's) estate.

For purposes of this Section 10.1, the term "descendant" means all persons who are descended from the person referred to either by birth to or legal adoption by such person, and "child" or "children" includes adopted children.

10.2. Benefits Not Assignable. The rights of each Participant are not subject in any manner to anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment, or garnishment by creditors of the Participant or any Beneficiary. Neither the Participant nor Beneficiary may assign, transfer or pledge the benefits under this Plan. Any attempt to assign, transfer or pledge a Participant's benefits under this Plan is void.

10.3. Benefit. This Plan constitutes an agreement between the Company and each of the Participants which is binding upon and inures to the Company, its successors and assigns and upon the Participant and his heirs and legal representatives.

10.4. Headings. The headings of the Articles and Sections of this Plan are included for purposes of convenience only, and shall not affect the construction or interpretation of any of it provisions.

10.5. Notices. All notices, requests, demands, and other communications under this Plan shall be in writing and shall be deemed to have been duly given on the date of service if served personally on the party to whom notice is to be given, or on the third day after mailing if mailed to the party to whom notice is to be given, by first class mail, registered or certified (return receipt requested), postage prepaid, and properly addressed to the last known address to each party as set forth on the first page thereof. Any party may change its address for purposes of this Section by giving the other parties written notice of the new address in the manner set forth above.

10.6. No Loans. The Plan does not permit any loans to be made to any Participant or Beneficiary.

10.7. Gender Usage. The use of the masculine gender includes the feminine gender for all purposes of this Plan.

10.8. Expenses. Costs of administration of the Plan shall be paid by the Company.

IN WITNESS WHEREOF, the Company has executed this Amended and Restated Deferred Compensation Plan (2013) on October 3, 2013, effective as of the Effective Date.

EXHIBIT 10.6

AMENDMENT NO. 1
to the
MOLINA HEALTHCARE, INC.
AMENDED AND RESTATED
DEFERRED COMPENSATION PLAN (2013)

WHEREAS, Molina Healthcare, Inc. (the "Company") adopted the Molina Healthcare, Inc. Amended and Restated Deferred Compensation Plan (2013) (the "Plan"), effective October 1, 2013; and

WHEREAS, Treasury Regulation Section 1.409A-3(j)(4)(v) permits a plan to accelerate distribution of small account balances under the Plan in accordance with the requirements set forth therein; and

WHEREAS, the Company desires to amend the Plan to include a provision providing for distribution of small account balances upon a participant's separation from service; and

WHEREAS, the Company desires to amend the Plan to revise the eligibility provisions thereof; and

WHEREAS, Section 7.1 of the Plan provides that the Company has the right to amend the Plan;

NOW, THEREFORE, pursuant to resolutions adopted by the Company, the Plan is amended as follows:

1. Effective January 1, 2014, Section 1.8 of the Plan is amended and restated in its entirety to read as follows:

"1.8. Key Employee means an employee of the Company or a Subsidiary, who is (A) a member of a select group of management or highly compensated employees within the meaning of §2520.104-23 of the Department of Labor ERISA Regulations, (B) projected to receive Plan Year Compensation (including base pay and bonus), plus amounts deferred to any 401(k) plan, deferred compensation plan, or cafeteria plan maintained by the Company, of $200,000 or more and (C) designated by the Plan Committee as a Key Employee."

2. Effective January 1, 2014, Section 1.9 of the Plan is amended and restated in its entirety to read as follows:

"1.9. Participant means (A) a Key Employee who timely files a Written Election pursuant to Section 2.3, below, and (B) a former Employee who, at the time of his termination from employment, retirement, death, or occurrence of Disability, retains, or whose beneficiary retains, benefits earned under the Plan in accordance with its terms. A Participant is considered an Active Participant in the Plan (even if the Participant no longer satisfies the requirements of Section 1.8

(B), but subject to the right of the Company's Chief Executive Officer to no longer designate such employee as a Key Employee) until the Participant separates from service under the terms of this Plan."

3. Effective January 1, 2014, Section 2.1 of the Plan is amended and restated in its entirety to read as follows:

"2.1. Eligibility. An employee of the Company or a Subsidiary is eligible to participate in this Plan upon meeting the criteria for Key Employee specified in Section 1.8. Any Key Employee who was a Participant in the Original Plan and who continued in the employ of the Company on the Effective Date will continue to be a Participant in this Plan, subject to the right of the Company's Chief Executive Officer to no longer designate such employee as a Key Employee thereafter."

4. Effective as of the date of execution of this Amendment, the Plan is amended to add a new section, Section 6.4., to provide for the distribution of small account balances from the Plan:

"6.4. Limited Cashout. Notwithstanding any Written Election made by the Participant, if, upon a Participant's Separation from Service, such Participant's accrued benefit under the Plan (and any other deferred compensation plan required to be aggregated with this Plan) does not exceed the then-current limit under Section 402(g)(1)(B) of the Code, the Company shall immediately distribute such Participant's accrued benefit under the Plan in a single lump sum payment to the Participant (or the Beneficiary, if the Participant is deceased), provided that such distribution results in a termination and complete liquidation of such Participant's interest under the Plan (and any other deferred compensation plan required to be aggregated with this Plan)."

Executed on November 14, 2013.

HEALTHCARE, INC.

Molina Healthcare, Inc. 2011 Equity Incentive Plan

1. ESTABLISHMENT, PURPOSE AND TERM OF PLAN.

1.1 **Establishment.** The Molina Healthcare, Inc. 2011 Equity Incentive Plan (the *"**Plan**"*) is hereby established effective as of April 27, 2011, the date of its approval by the stockholders of the Company (the *"**Effective Date**"*).

1.2 **Purpose.** The purpose of the Plan is to advance the interests of the Participating Company Group and its stockholders by providing an incentive to attract, retain and reward persons performing services for the Participating Company Group and by motivating such persons to contribute to the growth and profitability of the Participating Company Group. The Plan seeks to achieve this purpose by providing for Awards in the form of Options, Stock Appreciation Rights, Restricted Stock Purchase Rights, Restricted Stock Bonuses, Restricted Stock Units, Performance Shares, Performance Units, Cash-Based Awards and Other Stock-Based Awards.

1.3 **Term of Plan.** The Plan shall continue in effect until its termination by the Committee; provided, however, that all Awards shall be granted, if at all, within ten (10) years from the Effective Date.

2. DEFINITIONS AND CONSTRUCTION.

2.1 **Definitions.** Whenever used herein, the following terms shall have their respective meanings set forth below:

(a) *"**Affiliate**"* means (i) a parent entity, other than a Parent Corporation, that directly, or indirectly through one or more intermediary entities, controls the Company or (ii) a subsidiary entity, other than a Subsidiary Corporation, that is controlled by the Company directly or indirectly through one or more intermediary entities. For this purpose, the terms "parent," "subsidiary," "control" and "controlled by" shall have the meanings assigned such terms for the purposes of registration of securities on Form S-8 under the Securities Act.

(b) *"**Award**"* means any Option, Stock Appreciation Right, Restricted Stock Purchase Right, Restricted Stock Bonus, Restricted Stock Unit, Performance Share, Performance Unit, Cash-Based Award or Other Stock-Based Award granted under the Plan.

(c) *"**Award Agreement**"* means a written or electronic agreement between the Company and a Participant setting forth the terms, conditions and restrictions applicable to an Award.

(d) *"**Board**"* means the Board of Directors of the Company.

(e) *"**Cash-Based Award**"* means an Award denominated in cash and granted pursuant to Section 11.

(f) *"**Cause**"* means, unless such term or an equivalent term is otherwise defined by the applicable Award Agreement or other written agreement between a Participant and a Participating Company applicable to an Award, any of the following: (i) the Participant's theft, dishonesty, willful misconduct, breach of fiduciary duty for personal profit, or falsification of any Participating Company documents or records; (ii) the Participant's material failure to abide by a Participating Company's code of conduct or other policies (including, without limitation, policies relating to confidentiality and reasonable workplace conduct); (iii) the Participant's unauthorized use, misappropriation, destruction or diversion of any tangible or intangible asset or corporate opportunity of a Participating Company (including, without limitation, the Participant's improper use or disclosure of a Participating Company's confidential or proprietary information); (iv) any intentional act by the Participant which has a material detrimental effect on a Participating Company's reputation or business; (v) the Participant's repeated failure or inability to perform any reasonable assigned duties after written notice from a Participating Company of, and a reasonable opportunity to cure, such failure or inability; (vi) any material breach by the Participant of any employment, service, non-disclosure, non-competition, non-solicitation or other similar agreement between the Participant and a Participating Company, which breach is not cured pursuant to the terms of such agreement; or (vii) the Participant's conviction (including any plea of guilty or *nolo contendere*) of any criminal act involving fraud, dishonesty, misappropriation or moral turpitude, or which impairs the Participant's ability to perform his or her duties with a Participating Company.

(g) *"**Change in Control**"* means, unless such term or an equivalent term is otherwise defined by the applicable Award Agreement or other written agreement between the Participant and a Participating Company applicable to an Award, the occurrence of any of the following:

(i) any "person" (as such term is used in Sections 13(d) and 14(d) of the Exchange Act) becomes the "beneficial owner" (as such term is defined in Rule 13d-3 under the Exchange Act), directly or indirectly, of securities of the Company representing more than fifty percent (50%) of the total Fair Market Value or total combined voting power of the Company's then-outstanding securities entitled to vote generally in the election of Directors; provided, however, that a Change in Control shall not be deemed to have occurred if such degree of beneficial ownership results from any of the following: (A) an acquisition by any person who on the Effective Date is the beneficial owner of more than fifty percent (50%) of such voting power, (B) any acquisition directly from the Company, including, without limitation, pursuant to or in connection with a public offering of securities, (C) any acquisition by the Company, (D) any acquisition by a trustee or other fiduciary under an employee benefit plan of a Participating Company or (E) any acquisition by an entity owned directly or indirectly by the stockholders of the Company in substantially the same proportions as their ownership of the voting securities of the Company; or

(ii) an Ownership Change Event or series of related Ownership Change Events (collectively, a *"**Transaction**"*) in which the stockholders of the Company immediately before the Transaction do not retain immediately after the Transaction direct or indirect beneficial ownership of more than fifty percent (50%) of the total combined voting power of the outstanding securities entitled to vote generally in the election of Directors or, in the case of an Ownership

Change Event described in Section 2.1(cc)(iii), the entity to which the assets of the Company were transferred (the *"**Transferee**"*), as the case may be; or

(iii) approval by the stockholders of a plan of complete liquidation or dissolution of the Company;

provided, however, that a Change in Control shall be deemed not to include a transaction described in subsections (i) or (ii) of this Section 2.1(g) in which a majority of the members of the board of directors of the continuing, surviving or successor entity, or parent thereof, immediately after such transaction is comprised of Incumbent Directors.

For purposes of the preceding sentence, indirect beneficial ownership shall include, without limitation, an interest resulting from ownership of the voting securities of one or more corporations or other business entities which own the Company or the Transferee, as the case may be, either directly or through one or more subsidiary corporations or other business entities. The Committee shall determine whether multiple sales or exchanges of the voting securities of the Company or multiple Ownership Change Events are related, and its determination shall be final, binding and conclusive.

(h) *"**Code**"* means the Internal Revenue Code of 1986, as amended, and any applicable regulations or administrative guidelines promulgated thereunder.

(i) *"**Committee**"* means the Compensation Committee and such other committee or subcommittee of the Board, if any, duly appointed to administer the Plan and having such powers in each instance as shall be specified by the Board. If, at any time, there is no committee of the Board then authorized or properly constituted to administer the Plan, the Board shall exercise all of the powers of the Committee granted herein, and, in any event, the Board may in its discretion exercise any or all of such powers.

(j) *"**Company**"* means Molina Healthcare, Inc., a Delaware corporation, or any successor corporation thereto.

(k) *"**Consultant**"* means a person engaged to provide consulting or advisory services (other than as an Employee or a member of the Board) to a Participating Company, provided that the identity of such person, the nature of such services or the entity to which such services are provided would not preclude the Company from offering or selling securities to such person pursuant to the Plan in reliance on registration on Form S-8 under the Securities Act.

(l) "***Covered Employee***" means, at any time the Plan is subject to Section 162(m), any Employee who is or may reasonably be expected to become a "covered employee" as defined in Section 162(m), or any successor statute, and who is designated, either as an individual Employee or a member of a class of Employees, by the Committee no later than the earlier of (i) the date that is ninety (90) days after the beginning of the Performance Period, or (ii) the date on which twenty-five percent (25%) of the Performance Period has elapsed, as a "Covered Employee" under this Plan for such applicable Performance Period.

(m) *"**Director**"* means a member of the Board.

(n) *"**Disability**"* means the permanent and total disability of the Participant, within the meaning of Section 22(e)(3) of the Code.

(o) *"**Dividend Equivalent Right**"* means the right of a Participant, granted at the discretion of the Committee or as otherwise provided by the Plan, to receive a credit for the account of such Participant in an amount equal to the cash dividends paid on one share of Stock for each share of Stock represented by an Award held by such Participant.

(p) *"**Employee**"* means any person treated as an employee (including an Officer or a member of the Board who is also treated as an employee) in the records of a Participating Company and, with respect to any Incentive Stock Option granted to such person, who is an employee for purposes of Section 422 of the Code; provided, however, that neither service as a member of the Board nor payment of a director's fee shall be sufficient to constitute employment for purposes of the Plan. The Company shall determine in good faith and in the exercise of its discretion whether an individual has become or has ceased to be an Employee and the effective date of such individual's employment or termination of employment, as the case may be. For purposes of an individual's rights, if any, under the terms of the Plan as of the time of the Company's determination of whether or not the individual is an Employee, all such determinations by the Company shall be final, binding and conclusive as to such rights, if any, notwithstanding that the Company or any court of law or governmental agency subsequently makes a contrary determination as to such individual's status as an Employee.

(q) *"**Exchange Act**"* means the Securities Exchange Act of 1934, as amended.

(r) *"**Fair Market Value**"* means, as of any date, the value of a share of Stock or other property as determined by the Committee, in its discretion, or by the Company, in its discretion, if such determination is expressly allocated to the Company herein, subject to the following:

(i) Except as otherwise determined by the Committee, if, on such date, the Stock is listed or quoted on a national or regional securities exchange or quotation system, the Fair Market Value of a share of Stock shall be the closing price of a share of Stock as quoted on the national or regional securities exchange or quotation system constituting the primary market for the Stock, as reported in *The Wall Street Journal* or such other source as the Company deems reliable. If the relevant date does not fall on a day on which the Stock has traded on such securities exchange or quotation system, the date on which the Fair Market Value shall be established shall be the last day on which the Stock was so traded or quoted prior to the relevant date, or such other appropriate day as shall be determined by the Committee, in its discretion.

(ii) Notwithstanding the foregoing, the Committee may, in its discretion, determine the Fair Market Value of a share of Stock on the basis of the opening, closing, or average of the high and low sale prices of a share of Stock on such date or the preceding trading day, the actual sale price of a share of Stock received by a Participant, any other reasonable basis using actual transactions in the Stock as reported on a national or regional securities exchange or quotation system, or on any other basis consistent with the requirements of Section 409A. The Committee

may vary its method of determination of the Fair Market Value as provided in this Section for different purposes under the Plan to the extent consistent with the requirements of Section 409A.

(iii) If, on such date, the Stock is not listed or quoted on a national or regional securities exchange or quotation system, the Fair Market Value of a share of Stock shall be as determined by the Committee in good faith without regard to any restriction other than a restriction which, by its terms, will never lapse, and in a manner consistent with the requirements of Section 409A.

(s) *"**Full Value Award**"* means any Award settled in Stock, other than (i) an Option, (ii) a Stock Appreciation Right, or (iii) a Restricted Stock Purchase Right or an Other Stock-Based Award under which the Company will receive monetary consideration equal to the Fair Market Value (determined on the effective date of grant) of the shares subject to such Award.

(t) *"**Incentive Stock Option**"* means an Option intended to be (as set forth in the Award Agreement) and which qualifies as an incentive stock option within the meaning of Section 422(b) of the Code.

(u) *"**Incumbent Director**"* means a director who either (i) is a member of the Board as of the Effective Date or (ii) is elected, or nominated for election, to the Board with the affirmative votes of at least a majority of the Incumbent Directors at the time of such election or nomination (but excluding a director who was elected or nominated in connection with an actual or threatened proxy contest relating to the election of directors of the Company).

(v) *"**Insider**"* means an Officer, Director or any other person whose transactions in Stock are subject to Section 16 of the Exchange Act.

(w) *"**Net Exercise**"* means a procedure pursuant to which (i) the Company will reduce the number of shares otherwise issuable to a Participant upon the exercise of an Option by the largest whole number of shares having a Fair Market Value that does not exceed the aggregate exercise price for the shares with respect to which the Option is exercised, and (ii) the Participant shall pay to the Company in cash the remaining balance of such aggregate exercise price not satisfied by such reduction in the number of whole shares to be issued.

(x) *"**Nonemployee Director**"* means a Director who is not an Employee.

(y) *"**Nonstatutory Stock Option**"* means an Option not intended to be (as set forth in the Award Agreement) or which does not qualify as an incentive stock option within the meaning of Section 422(b) of the Code.

(z) *"**Officer**"* means any person designated by the Board as an officer of the Company.

(aa) *"**Option**"* means an Incentive Stock Option or a Nonstatutory Stock Option granted pursuant to the Plan.

(bb) *"**Other Stock-Based Award**"* means an Award denominated in shares of Stock and granted pursuant to Section 11.

(cc) *"**Ownership Change Event**"* means the occurrence of any of the following with respect to the Company: (i) the direct or indirect sale or exchange in a single or series of related transactions by the stockholders of the Company of securities of the Company representing more than fifty percent (50%) of the total combined voting power of the Company's then-outstanding securities entitled to vote generally in the election of Directors; (ii) a merger or consolidation in which the Company is a party; or (iii) the sale, exchange, or transfer of all or substantially all of the assets of the Company (other than a sale, exchange or transfer to one or more subsidiaries of the Company).

(dd) *"**Parent Corporation**"* means any present or future "parent corporation" of the Company, as defined in Section 424(e) of the Code.

(ee) *"**Participant**"* means any eligible person who has been granted one or more Awards.

(ff) *"**Participating Company**"* means the Company or any Parent Corporation, Subsidiary Corporation or Affiliate.

(gg) *"**Participating Company Group**"* means, at any point in time, the Company and all other entities collectively which are then Participating Companies.

(hh) *"**Performance Award**"* means an Award of Performance Shares or Performance Units.

(ii) *"**Performance Award Formula**"* means, for any Performance Award, a formula or table established by the Committee pursuant to Section 10.3 which provides the basis for computing the value of a Performance Award at one or more levels of attainment of applicable Performance Goal(s) measured as of the end of the applicable Performance Period.

(jj) "***Performance-Based Compensation***" means compensation under an Award that satisfies the requirements of Section 162(m) for certain performance-based compensation paid to Covered Employees.

(kk) *"**Performance Goal**"* means a performance goal established by the Committee pursuant to Section 10.3.

(ll) *"**Performance Period**"* means a period established by the Committee pursuant to Section 10.3 at the end of which one or more Performance Goals are to be measured.

(mm) *"**Performance Share**"* means a right granted to a Participant pursuant to Section 10 to receive a payment equal to the value of a Performance Share, as determined by the Committee, based upon attainment of applicable Performance Goal(s).

(nn) *"**Performance Unit**"* means a right granted to a Participant pursuant to Section 10 to receive a payment equal to the value of a Performance Unit, as determined by the Committee, based upon attainment of applicable Performance Goal(s).

(oo) *"**Restricted Stock Award**"* means an Award of a Restricted Stock Bonus or a Restricted Stock Purchase Right.

(pp) *"**Restricted Stock Bonus**"* means Stock granted to a Participant pursuant to Section 8.

(qq) *"**Restricted Stock Purchase Right**"* means a right to purchase Stock granted to a Participant pursuant to Section 8.

(rr) *"**Restricted Stock Unit**"* means a right granted to a Participant pursuant to Section 9 to receive on a future date or event a share of Stock or cash in lieu thereof, as determined by the Committee.

(ss) *"**Rule 16b-3**"* means Rule 16b-3 under the Exchange Act, as amended from time to time, or any successor rule or regulation.

(tt) *"**SAR**"* or *"**Stock Appreciation Right**"* means a right granted to a Participant pursuant to Section 7 to receive payment, for each share of Stock subject to such Award, of an amount equal to the excess, if any, of the Fair Market Value of a share of Stock on the date of exercise of the Award over the exercise price thereof.

(uu) *"**Section 162(m)**"* means Section 162(m) of the Code.

(vv) *"**Section 409A**"* means Section 409A of the Code.

(ww) *"**Section 409A Deferred Compensation**"* means compensation provided pursuant to an Award that constitutes nonqualified deferred compensation within the meaning of Section 409A.

(xx) *"**Securities Act**"* means the Securities Act of 1933, as amended.

(yy) *"**Service**"* means a Participant's employment or service with the Participating Company Group, whether as an Employee, a Director or a Consultant. Unless otherwise provided by the Committee, a Participant's Service shall not be deemed to have terminated merely because of a change in the capacity in which the Participant renders such Service or a change in the Participating Company for which the Participant renders such Service, provided that there is no interruption or termination of the Participant's Service. Furthermore, a Participant's Service shall not be deemed to have been interrupted or terminated if the Participant takes any military leave, sick leave, or other bona fide leave of absence approved by the Company. However, unless otherwise provided by the Committee, if any such leave taken by a Participant exceeds ninety (90) days, then on the ninety-first (91st) day following the commencement of such leave the Participant's Service shall be deemed to have terminated, unless the Participant's right to return to Service is guaranteed by statute or contract. Notwithstanding the foregoing, unless otherwise designated by

the Company or required by law, an unpaid leave of absence shall not be treated as Service for purposes of determining vesting under the Participant's Award Agreement. A Participant's Service shall be deemed to have terminated either upon an actual termination of Service or upon the business entity for which the Participant performs Service ceasing to be a Participating Company. Subject to the foregoing, the Company, in its discretion, shall determine whether the Participant's Service has terminated and the effective date of such termination.

(zz) *"**Stock**"* means the common stock of the Company, as adjusted from time to time in accordance with Section 4.2.

(aaa) *"**Subsidiary Corporation**"* means any present or future "subsidiary corporation" of the Company, as defined in Section 424(f) of the Code.

(bbb) *"**Ten Percent Owner**"* means a Participant who, at the time an Option is granted to the Participant, owns stock possessing more than ten percent (10%) of the total combined voting power of all classes of stock of a Participating Company (other than an Affiliate) within the meaning of Section 422(b)(6) of the Code.

(ccc) *"**Trading Compliance Policy**"* means the written policy of the Company pertaining to the purchase, sale, transfer or other disposition of the Company's equity securities by Directors, Officers, Employees or other service providers who may possess material, nonpublic information regarding the Company or its securities.

(ddd) *"**Vesting Conditions**"* mean those conditions established in accordance with the Plan prior to the satisfaction of which shares subject to an Award remain subject to forfeiture or a repurchase option in favor of the Company exercisable for the Participant's monetary purchase price, if any, for such shares upon the Participant's termination of Service.

2.2 **Construction.** Captions and titles contained herein are for convenience only and shall not affect the meaning or interpretation of any provision of the Plan. Except when otherwise indicated by the context, the singular shall include the plural and the plural shall include the singular. Use of the term "or" is not intended to be exclusive, unless the context clearly requires otherwise.

3. ADMINISTRATION.

3.1 **Administration by the Committee.** The Plan shall be administered by the Committee. All questions of interpretation of the Plan, of any Award Agreement or of any other form of agreement or other document employed by the Company in the administration of the Plan or of any Award shall be determined by the Committee, and such determinations shall be final, binding and conclusive upon all persons having an interest in the Plan or such Award, unless fraudulent or made in bad faith. Any and all actions, decisions and determinations taken or made by the Committee in the exercise of its discretion pursuant to the Plan or Award Agreement or other agreement thereunder (other than determining questions of interpretation pursuant to the preceding sentence) shall be final, binding and conclusive upon all persons having an interest therein. All expenses incurred in the administration of the Plan shall be paid by the Company.

3.2 **Authority of Officers.** Any Officer shall have the authority to act on behalf of the Company with respect to any matter, right, obligation, determination or election which is the responsibility of or which is allocated to the Company herein, provided the Officer has apparent authority with respect to such matter, right, obligation, determination or election. To the extent permitted by applicable law, the Committee may, in its discretion, delegate to a committee comprised of one or more Officers the authority to grant one or more Awards, without further approval of the Committee, to any Employee, other than a person who, at the time of such grant, is an Insider or a Covered Employee, and to exercise such other powers under the Plan as the Committee may determine; provided, however, that (a) the Committee shall fix the maximum number of shares subject to Awards that may be granted by such Officers, (b) each such Award shall be subject to the terms and conditions of the appropriate standard form of Award Agreement approved by the Board or the Committee and shall conform to the provisions of the Plan, and (c) each such Award shall conform to such other limits and guidelines as may be established from time to time by the Committee.

3.3 **Administration with Respect to Insiders.** With respect to participation by Insiders in the Plan, at any time that any class of equity security of the Company is registered pursuant to Section 12 of the Exchange Act, the Plan shall be administered in compliance with the requirements, if any, of Rule 16b-3.

3.4 **Committee Complying with Section 162(m).** If the Company is a "publicly held corporation" within the meaning of Section 162(m), the Board may establish a Committee of "outside directors" within the meaning of Section 162 (m) to approve the grant of any Award intended to result in the payment of Performance-Based Compensation.

3.5 **Powers of the Committee.** In addition to any other powers set forth in the Plan and subject to the provisions of the Plan, the Committee shall have the full and final power and authority, in its discretion:

(a) to determine the persons to whom, and the time or times at which, Awards shall be granted and the number of shares of Stock, units or monetary value to be subject to each Award;

(b) to determine the type of Award granted;

(c) to determine the Fair Market Value of shares of Stock or other property;

(d) to determine the terms, conditions and restrictions applicable to each Award (which need not be identical) and any shares acquired pursuant thereto, including, without limitation, (i) the exercise or purchase price of shares pursuant to any Award, (ii) the method of payment for shares purchased pursuant to any Award, (iii) the method for satisfaction of any tax withholding obligation arising in connection with any Award, including by the withholding or delivery of shares of Stock, (iv) the timing, terms and conditions of the exercisability or vesting of any Award or any shares acquired pursuant thereto, (v) the Performance Measures, Performance Period, Performance Award Formula and Performance Goals applicable to any Award and the extent to which such Performance Goals have been attained, (vi) the time of the expiration of any Award, (vii) the effect of the Participant's termination of Service on any of the foregoing, and (viii) all other terms,

conditions and restrictions applicable to any Award or shares acquired pursuant thereto not inconsistent with the terms of the Plan;

(e) to determine whether an Award will be settled in shares of Stock, cash, other property, or in any combination thereof;

(f) to approve one or more forms of Award Agreement;

(g) to amend, modify, extend, cancel or renew any Award or to waive any restrictions or conditions applicable to any Award or any shares acquired pursuant thereto;

(h) to accelerate, continue, extend or defer the exercisability or vesting of any Award or any shares acquired pursuant thereto, including with respect to the period following a Participant's termination of Service;

(i) to prescribe, amend or rescind rules, guidelines and policies relating to the Plan, or to adopt sub-plans or supplements to, or alternative versions of, the Plan, including, without limitation, as the Committee deems necessary or desirable to comply with the laws or regulations of or to accommodate the tax policy, accounting principles or custom of, foreign jurisdictions whose citizens may be granted Awards; and

(j) to correct any defect, supply any omission or reconcile any inconsistency in the Plan or any Award Agreement and to make all other determinations and take such other actions with respect to the Plan or any Award as the Committee may deem advisable to the extent not inconsistent with the provisions of the Plan or applicable law.

3.6 **Option or SAR Repricing.** Without the affirmative vote of holders of a majority of the shares of Stock cast in person or by proxy at a meeting of the stockholders of the Company at which a quorum representing a majority of all outstanding shares of Stock is present or represented by proxy, the Committee shall not approve a program providing for either (a) the cancellation of outstanding Options or SARs having exercise prices per share greater than the then Fair Market Value of a share of Stock (*"**Underwater Awards**"*) and the grant in substitution therefore of new Options or SARs having a lower exercise price, Full Value Awards or payments in cash, or (b) the amendment of outstanding Underwater Awards to reduce the exercise price thereof. This Section shall not apply to adjustments pursuant to the assumption of or substitution for an Option or SAR in a manner that would comply with Section 424(a) or Section 409A of the Code or to an adjustment pursuant to Section 4.2.

3.7 **Indemnification.** In addition to such other rights of indemnification as they may have as members of the Board or the Committee or as officers or employees of the Participating Company Group, members of the Board or the Committee and any officers or employees of the Participating Company Group to whom authority to act for the Board, the Committee or the Company is delegated shall be indemnified by the Company against all reasonable expenses, including attorneys' fees, actually and necessarily incurred in connection with the defense of any action, suit or proceeding, or in connection with any appeal therein, to which they or any of them may be a party by reason of any action taken or failure to act under or in connection with the Plan, or any right granted hereunder, and against all amounts paid by them in settlement thereof (provided such

settlement is approved by independent legal counsel selected by the Company) or paid by them in satisfaction of a judgment in any such action, suit or proceeding, except in relation to matters as to which it shall be adjudged in such action, suit or proceeding that such person is liable for gross negligence, bad faith or intentional misconduct in duties; provided, however, that within sixty (60) days after the institution of such action, suit or proceeding, such person shall offer to the Company, in writing, the opportunity at its own expense to handle and defend the same.

4. SHARES SUBJECT TO PLAN.

4.1 **Maximum Number of Shares Issuable.** Subject to adjustment as provided in Section 4.2, the maximum aggregate number of shares of Stock that may be issued under the Plan shall be four million five hundred thousand (4,500,000) and shall consist of authorized but unissued shares of Stock, and the shares of Stock underlying any Awards which are reacquired by the Company, forfeited, or cancelled, satisfied without the issuance of Stock, or otherwise terminated (other than by exercise) without the issuance of Stock, or any combination thereof.

4.2 **Adjustments for Changes in Capital Structure.** Subject to any required action by the stockholders of the Company and the requirements of Sections 409A and 424 of the Code to the extent applicable, in the event of any change in the Stock effected without receipt of consideration by the Company, whether through merger, consolidation, reorganization, reincorporation, recapitalization, reclassification, stock dividend, stock split, reverse stock split, split-up, split-off, spin-off, combination of shares, exchange of shares, or similar change in the capital structure of the Company, or in the event of payment of a dividend or distribution to the stockholders of the Company in a form other than Stock (excepting regular, periodic cash dividends) that has a material effect on the Fair Market Value of shares of Stock, appropriate and proportionate adjustments shall be made in the number and kind of shares subject to the Plan and to any outstanding Awards, in the Award limits set forth in Section 5.3 and in the exercise or purchase price per share under any outstanding Award in order to prevent dilution or enlargement of Participants' rights under the Plan. For purposes of the foregoing, conversion of any convertible securities of the Company shall not be treated as "effected without receipt of consideration by the Company." If a majority of the shares which are of the same class as the shares that are subject to outstanding Awards are exchanged for, converted into, or otherwise become (whether or not pursuant to an Ownership Change Event) shares of another corporation (the *"**New Shares**"*), the Committee may unilaterally amend the outstanding Awards to provide that such Awards are for New Shares. In the event of any such amendment, the number of shares subject to, and the exercise or purchase price per share of, the outstanding Awards shall be adjusted in a fair and equitable manner as determined by the Committee, in its discretion. Any fractional share resulting from an adjustment pursuant to this Section shall be rounded down to the nearest whole number, and in no event may the exercise or purchase price under any Award be decreased to an amount less than the par value, if any, of the stock subject to such Award. The Committee in its discretion, may also make such adjustments in the terms of any Award to reflect, or related to, such changes in the capital structure of the Company or distributions as it deems appropriate, including modification of Performance Goals, Performance Award Formulas and Performance Periods. The adjustments determined by the Committee pursuant to this Section shall be final, binding and conclusive.

4.3 **Assumption or Substitution of Awards.** The Committee may, without affecting the number of shares of Stock available pursuant to Section 4.1, authorize the issuance or assumption

of benefits under this Plan in connection with any merger, consolidation, acquisition of property or stock, or reorganization upon such terms and conditions as it may deem appropriate, subject to compliance with Section 409A and any other applicable provisions of the Code.

5. ELIGIBILITY, PARTICIPATION AND AWARD LIMITATIONS

5.1 **Persons Eligible for Awards.** Awards may be granted only to Employees, Consultants and Directors.

5.2 **Participation in the Plan.** Awards are granted solely at the discretion of the Committee. Eligible persons may be granted more than one Award. However, eligibility in accordance with this Section shall not entitle any person to be granted an Award, or, having been granted an Award, to be granted an additional Award.

5.3 **Award Limitations.**

(a) ***Incentive Stock Option Limitations.***

(i) **Maximum Number of Shares Issuable Pursuant to Incentive Stock Options.** Subject to adjustment as provided in Section 4.2, the maximum aggregate number of shares of Stock that may be issued under the Plan pursuant to the exercise of Incentive Stock Options shall not exceed four million five hundred thousand (4,500,000). The maximum aggregate number of shares of Stock that may be issued under the Plan pursuant to all Awards other than Incentive Stock Options shall be the number of shares determined in accordance with Section 4.1.

(ii) **Persons Eligible.** An Incentive Stock Option may be granted only to a person who, on the effective date of grant, is an Employee of the Company, a Parent Corporation or a Subsidiary Corporation (each being an *"**ISO-Qualifying Corporation**"*). Any person who is not an Employee of an ISO-Qualifying Corporation on the effective date of the grant of an Option to such person may be granted only a Nonstatutory Stock Option.

(iii) **Fair Market Value Limitation.** To the extent that options designated as Incentive Stock Options (granted under all stock option plans of the Participating Company Group, including the Plan) become exercisable by a Participant for the first time during any calendar year for stock having a Fair Market Value greater than One Hundred Thousand Dollars ($100,000), the portion of such options which exceeds such amount shall be treated as Nonstatutory Stock Options. For purposes of this Section, options designated as Incentive Stock Options shall be taken into account in the order in which they were granted, and the Fair Market Value of stock shall be determined as of the time the option with respect to such stock is granted. If the Code is amended to provide for a limitation different from that set forth in this Section, such different limitation shall be deemed incorporated herein effective as of the date and with respect to such Options as required or permitted by such amendment to the Code. If an Option is treated as an Incentive Stock Option in part and as a Nonstatutory Stock Option in part by reason of the limitation set forth in this Section, the Participant may designate which portion of such Option the Participant is exercising. In the absence of such designation, the Participant shall be deemed to have exercised the Incentive Stock Option portion of the Option first. Upon exercise, shares issued pursuant to each such portion shall be separately identified.

(b) ***Section 162(m) Award Limits.*** Subject to adjustment as provided in Section 4.2, no Employee shall be granted within any fiscal year of the Company one or more Awards intended to qualify for treatment as Performance-Based Compensation which in the aggregate are for more than seven hundred and fifty thousand (750,000) shares.

6. STOCK OPTIONS.

Options shall be evidenced by Award Agreements specifying the number of shares of Stock covered thereby, in such form as the Committee shall from time to time establish. Award Agreements evidencing Options may incorporate all or any of the terms of the Plan by reference and shall comply with and be subject to the following terms and conditions:

6.1 **Exercise Price.** The exercise price for each Option shall be established in the discretion of the Committee; provided, however, that (a) the exercise price per share shall be not less than the Fair Market Value of a share of Stock on the effective date of grant of the Option and (b) no Incentive Stock Option granted to a Ten Percent Owner shall have an exercise price per share less than one hundred ten percent (110%) of the Fair Market Value of a share of Stock on the effective date of grant of the Option. Notwithstanding the foregoing, an Option (whether an Incentive Stock Option or a Nonstatutory Stock Option) may be granted with an exercise price lower than the minimum exercise price set forth above if such Option is granted pursuant to an assumption or substitution for another option in a manner that would qualify under the provisions of Section 409A or 424(a) of the Code.

6.2 **Exercisability and Term of Options.** Options shall be exercisable at such time or times, or upon such event or events, and subject to such terms, conditions, performance criteria and restrictions as shall be determined by the Committee and set forth in the Award Agreement evidencing such Option; provided, however, that (a) no Option shall be exercisable after the expiration of ten (10) years after the effective date of grant of such Option, (b) no Incentive Stock Option granted to a Ten Percent Owner shall be exercisable after the expiration of five (5) years after the effective date of grant of such Option and (c) no Option granted to an Employee who is a non-exempt employee for purposes of the Fair Labor Standards Act of 1938, as amended, shall be first exercisable until at least six (6) months following the date of grant of such Option (except in the event of such Employee's death, disability or retirement, upon a Change in Control, or as otherwise permitted by the Worker Economic Opportunity Act). Subject to the foregoing, unless otherwise specified by the Committee in the grant of an Option, each Option shall terminate ten (10) years after the effective date of grant of the Option, unless earlier terminated in accordance with its provisions.

6.3 **Payment of Exercise Price.**

(a) ***Forms of Consideration Authorized.*** Except as otherwise provided below, payment of the exercise price for the number of shares of Stock being purchased pursuant to any Option shall be made (i) in cash, by check or in cash equivalent, (ii) by tender to the Company, or attestation to the ownership, of shares of Stock owned by the Participant having a Fair Market Value not less than the exercise price (a *"**Stock Tender Exercise**"*), (iii) by delivery of a properly executed notice of exercise together with irrevocable instructions to a broker providing for the assignment

to the Company of the proceeds of a sale or loan with respect to some or all of the shares being acquired upon the exercise of the Option (including, without limitation, through an exercise complying with the provisions of Regulation T as promulgated from time to time by the Board of Governors of the Federal Reserve System) (a *"**Cashless Exercise**"*), (iv) by delivery of a properly executed notice electing a Net Exercise, (v) by such other consideration as may be approved by the Committee from time to time to the extent permitted by applicable law, or (vi) by any combination thereof. The Committee may at any time or from time to time grant Options which do not permit all of the foregoing forms of consideration to be used in payment of the exercise price or which otherwise restrict one or more forms of consideration.

(b) ***Limitations on Forms of Consideration.***

(i) **Stock Tender Exercise.** Notwithstanding the foregoing, a Stock Tender Exercise shall not be permitted if it would constitute a violation of the provisions of any law, regulation or agreement restricting the redemption of the Company's stock. If required by the Company, an Option may not be exercised by tender to the Company, or attestation to the ownership, of shares of Stock unless such shares either have been owned by the Participant for a period of time required by the Company (and not used for another option exercise by attestation during such period) or were not acquired, directly or indirectly, from the Company.

(ii) **Cashless Exercise.** The Company reserves, at any and all times, the right, in the Company's sole and absolute discretion, to establish, decline to approve or terminate any program or procedures for the exercise of Options by means of a Cashless Exercise, including with respect to one or more Participants specified by the Company notwithstanding that such program or procedures may be available to other Participants.

6.4 **Effect of Termination of Service.**

(a) ***Option Exercisability.*** Subject to earlier termination of the Option as otherwise provided herein and unless otherwise provided by the Committee, an Option shall terminate immediately upon the Participant's termination of Service to the extent that it is then unvested and shall be exercisable after the Participant's termination of Service to the extent it is then vested only during the applicable time period determined in accordance with this Section and thereafter shall terminate.

(i) **Disability.** If the Participant's Service terminates because of the Disability of the Participant, the Option, to the extent unexercised and exercisable for vested shares on the date on which the Participant's Service terminated, may be exercised by the Participant (or the Participant's guardian or legal representative) at any time prior to the expiration of twelve (12) months after the date on which the Participant's Service terminated, but in any event no later than the date of expiration of the Option's term as set forth in the Award Agreement evidencing such Option (the *"**Option Expiration Date**"*).

(ii) **Death.** If the Participant's Service terminates because of the death of the Participant, then (A) the Option, to the extent unexercised and exercisable for vested shares on the date on which the Participant's Service terminated, may be exercised by the Participant's legal representative or other person who acquired the right to exercise the Option by reason of the

Participant's death at any time prior to the expiration of twelve (12) months after the date on which the Participant's Service terminated, but in any event no later than the Option Expiration Date, and (B) solely for the purposes of determining the number of vested shares subject to the Option as of the date on which the Participant's Service terminated, the Participant shall be credited with an additional twelve (12) months of Service. The Participant's Service shall be deemed to have terminated on account of death if the Participant dies within three (3) months after the Participant's termination of Service; provided, however, that the Participant shall not be credited with additional months of Service if the Participant dies after the Participant's Service has otherwise terminated.

(iii) **Termination for Cause.** Notwithstanding any other provision of the Plan to the contrary, if the Participant's Service is terminated for Cause or if, following the Participant's termination of Service and during any period in which the Option otherwise would remain exercisable, the Participant engages in any act that would constitute Cause, the Option shall terminate in its entirety and cease to be exercisable immediately upon such termination of Service or act.

(iv) **Other Termination of Service.** If the Participant's Service terminates for any reason, except Disability, death or Cause, the Option, to the extent unexercised and exercisable for vested shares on the date on which the Participant's Service terminated, may be exercised by the Participant at any time prior to the expiration of three (3) months after the date on which the Participant's Service terminated, but in any event no later than the Option Expiration Date.

(b) ***Extension if Exercise Prevented by Law.*** Notwithstanding the foregoing, other than termination of Service for Cause, if the exercise of an Option within the applicable time periods set forth in Section 6.4(a) is prevented by the provisions of Section 14 below, the Option shall remain exercisable until the later of (i) thirty (30) days after the date such exercise first would no longer be prevented by such provisions or (ii) the end of the applicable time period under Section 6.4 (a), but in any event no later than the Option Expiration Date.

6.5 **Transferability of Options.** During the lifetime of the Participant, an Option shall be exercisable only by the Participant or the Participant's guardian or legal representative. An Option shall not be subject in any manner to anticipation, alienation, sale, exchange, transfer, assignment, pledge, encumbrance, or garnishment by creditors of the Participant or the Participant's beneficiary, except transfer by will or by the laws of descent and distribution. Notwithstanding the foregoing, to the extent permitted by the Committee, in its discretion, and set forth in the Award Agreement evidencing such Option, an Option shall be assignable or transferable subject to the applicable limitations, if any, described in the General Instructions to Form S-8 under the Securities Act or, in the case of an Incentive Stock Option, only as permitted by applicable regulations under Section 421 of the Code in a manner that does not disqualify such Option as an Incentive Stock Option.

7. STOCK APPRECIATION RIGHTS.

Stock Appreciation Rights shall be evidenced by Award Agreements specifying the number of shares of Stock subject to the Award, in such form as the Committee shall from time to time

establish. Award Agreements evidencing SARs may incorporate all or any of the terms of the Plan by reference and shall comply with and be subject to the following terms and conditions:

7.1 **Types of SARs Authorized.** SARs may be granted in tandem with all or any portion of a related Option (a *"**Tandem SAR**"*) or may be granted independently of any Option (a *"**Freestanding SAR**"*). A Tandem SAR may only be granted concurrently with the grant of the related Option.

7.2 **Exercise Price.** The exercise price for each SAR shall be established in the discretion of the Committee; provided, however, that (a) the exercise price per share subject to a Tandem SAR shall be the exercise price per share under the related Option and (b) the exercise price per share subject to a Freestanding SAR shall be not less than the Fair Market Value of a share of Stock on the effective date of grant of the SAR. Notwithstanding the foregoing, a an SAR may be granted with an exercise price lower than the minimum exercise price set forth above if such SAR is granted pursuant to an assumption or substitution for another stock appreciation right in a manner that would qualify under the provisions of Section 409A of the Code.

7.3 **Exercisability and Term of SARs.**

(a) ***Tandem SARs.*** Tandem SARs shall be exercisable only at the time and to the extent, and only to the extent, that the related Option is exercisable, subject to such provisions as the Committee may specify where the Tandem SAR is granted with respect to less than the full number of shares of Stock subject to the related Option. The Committee may, in its discretion, provide in any Award Agreement evidencing a Tandem SAR that such SAR may not be exercised without the advance approval of the Company and, if such approval is not given, then the Option shall nevertheless remain exercisable in accordance with its terms. A Tandem SAR shall terminate and cease to be exercisable no later than the date on which the related Option expires or is terminated or canceled. Upon the exercise of a Tandem SAR with respect to some or all of the shares subject to such SAR, the related Option shall be canceled automatically as to the number of shares with respect to which the Tandem SAR was exercised. Upon the exercise of an Option related to a Tandem SAR as to some or all of the shares subject to such Option, the related Tandem SAR shall be canceled automatically as to the number of shares with respect to which the related Option was exercised.

(b) ***Freestanding SARs.*** Freestanding SARs shall be exercisable at such time or times, or upon such event or events, and subject to such terms, conditions, performance criteria and restrictions as shall be determined by the Committee and set forth in the Award Agreement evidencing such SAR; provided, however, that (i) no Freestanding SAR shall be exercisable after the expiration of ten (10) years after the effective date of grant of such SAR and (b) no Freestanding SAR granted to an Employee who is a non-exempt employee for purposes of the Fair Labor Standards Act of 1938, as amended, shall be first exercisable until at least six (6) months following the date of grant of such SAR (except in the event of such Employee's death, disability or retirement, upon a Change in Control, or as otherwise permitted by the Worker Economic Opportunity Act). Subject to the foregoing, unless otherwise specified by the Committee in the grant of a Freestanding SAR, each Freestanding SAR shall terminate ten (10) years after the effective date of grant of the SAR, unless earlier terminated in accordance with its provisions.

7.4 **Exercise of SARs.** Upon the exercise (or deemed exercise pursuant to Section 7.5) of an SAR, the Participant (or the Participant's legal representative or other person who acquired the right to exercise the SAR by reason of the Participant's death) shall be entitled to receive payment of an amount for each share with respect to which the SAR is exercised equal to the excess, if any, of the Fair Market Value of a share of Stock on the date of exercise of the SAR over the exercise price. Payment of such amount shall be made (a) in the case of a Tandem SAR, solely in shares of Stock in a lump sum upon the date of exercise of the SAR and (b) in the case of a Freestanding SAR, in cash, shares of Stock, or any combination thereof as determined by the Committee, in a lump sum upon the date of exercise of the SAR. When payment is to be made in shares of Stock, the number of shares to be issued shall be determined on the basis of the Fair Market Value of a share of Stock on the date of exercise of the SAR. For purposes of Section 7, an SAR shall be deemed exercised on the date on which the Company receives notice of exercise from the Participant or as otherwise provided in Section 7.5.

7.5 **Deemed Exercise of SARs.** If, on the date on which an SAR would otherwise terminate or expire, the SAR by its terms remains exercisable immediately prior to such termination or expiration and, if so exercised, would result in a payment to the holder of such SAR, then any portion of such SAR which has not previously been exercised shall automatically be deemed to be exercised as of such date with respect to such portion.

7.6 **Effect of Termination of Service.** Subject to earlier termination of the SAR as otherwise provided herein and unless otherwise provided by the Committee, an SAR shall be exercisable after a Participant's termination of Service only to the extent and during the applicable time period determined in accordance with Section 6.4 (treating the SAR as if it were an Option) and thereafter shall terminate.

7.7 **Transferability of SARs.** During the lifetime of the Participant, an SAR shall be exercisable only by the Participant or the Participant's guardian or legal representative. An SAR shall not be subject in any manner to anticipation, alienation, sale, exchange, transfer, assignment, pledge, encumbrance, or garnishment by creditors of the Participant or the Participant's beneficiary, except transfer by will or by the laws of descent and distribution. Notwithstanding the foregoing, to the extent permitted by the Committee, in its discretion, and set forth in the Award Agreement evidencing such Award, a Tandem SAR related to a Nonstatutory Stock Option or a Freestanding SAR shall be assignable or transferable subject to the applicable limitations, if any, described in the General Instructions to Form S-8 under the Securities Act.

8. RESTRICTED STOCK AWARDS.

Restricted Stock Awards shall be evidenced by Award Agreements specifying whether the Award is a Restricted Stock Bonus or a Restricted Stock Purchase Right and the number of shares of Stock subject to the Award, in such form as the Committee shall from time to time establish. Award Agreements evidencing Restricted Stock Awards may incorporate all or any of the terms of the Plan by reference and shall comply with and be subject to the following terms and conditions:

8.1 **Types of Restricted Stock Awards Authorized.** Restricted Stock Awards may be granted in the form of either a Restricted Stock Bonus or a Restricted Stock Purchase Right. Restricted Stock Awards may be granted upon such conditions as the Committee shall determine,

including, without limitation, upon the attainment of one or more Performance Goals described in Section 10.4. If either the grant of or satisfaction of Vesting Conditions applicable to a Restricted Stock Award is to be contingent upon the attainment of one or more Performance Goals, the Committee shall follow procedures substantially equivalent to those set forth in Sections 10.3 through 10.5(a).

8.2 **Purchase Price.** The purchase price for shares of Stock issuable under each Restricted Stock Purchase Right shall be established by the Committee in its discretion. No monetary payment (other than applicable tax withholding) shall be required as a condition of receiving shares of Stock pursuant to a Restricted Stock Bonus, the consideration for which shall be services actually rendered to a Participating Company or for its benefit. Notwithstanding the foregoing, if required by applicable state corporate law, the Participant shall furnish consideration in the form of cash or past services rendered to a Participating Company or for its benefit having a value not less than the par value of the shares of Stock subject to a Restricted Stock Award.

8.3 **Purchase Period.** A Restricted Stock Purchase Right shall be exercisable within a period established by the Committee, which shall in no event exceed thirty (30) days from the effective date of the grant of the Restricted Stock Purchase Right.

8.4 **Payment of Purchase Price.** Except as otherwise provided below, payment of the purchase price for the number of shares of Stock being purchased pursuant to any Restricted Stock Purchase Right shall be made (a) in cash, by check or in cash equivalent, (b) by such other consideration as may be approved by the Committee from time to time to the extent permitted by applicable law, or (c) by any combination thereof.

8.5 **Vesting and Restrictions on Transfer.** Shares issued pursuant to any Restricted Stock Award shall be made subject to Vesting Conditions based upon the satisfaction of such Service requirements, conditions, restrictions or performance criteria, including, without limitation, Performance Goals as described in Section 10.4, as shall be established by the Committee and set forth in the Award Agreement evidencing such Award; provided that, with respect to all Restricted Stock Awards other than those made to any Nonemployee Director, (i) the Vesting Conditions for non-performance based Restricted Stock Awards shall provide that the vesting period be at least three years, over which period vesting may be pro-rata in the manner specified in the Award Agreement and (ii) the Vesting Conditions for performance-based Restricted Stock Awards shall provide that the vesting period be at least one year.

During any period in which shares acquired pursuant to a Restricted Stock Award remain subject to Vesting Conditions, such shares may not be sold, exchanged, transferred, pledged, assigned or otherwise disposed of other than pursuant to an Ownership Change Event or as provided in Section 8.8. The Committee, in its discretion, may provide in any Award Agreement evidencing a Restricted Stock Award that, if the satisfaction of Vesting Conditions with respect to any shares subject to such Restricted Stock Award would otherwise occur on a day on which the sale of such shares would violate the provisions of the Trading Compliance Policy, then satisfaction of the Vesting Conditions automatically shall be determined on the next trading day on which the sale of such shares would not violate the Trading Compliance Policy. Upon request by the Company, each Participant shall execute any agreement evidencing such transfer restrictions prior to the receipt of shares of Stock hereunder and shall promptly present to the Company any and all certificates

representing shares of Stock acquired hereunder for the placement on such certificates of appropriate legends evidencing any such transfer restrictions.

8.6 **Voting Rights; Dividends and Distributions.** Except as provided in this Section, Section 8.5 and any Award Agreement, during any period in which shares acquired pursuant to a Restricted Stock Award remain subject to Vesting Conditions, the Participant shall have all of the rights of a stockholder of the Company holding shares of Stock, including the right to vote such shares and to receive all dividends and other distributions paid with respect to such shares; provided, however, that if so determined by the Committee and provided by the Award Agreement, such dividends and distributions shall be subject to the same Vesting Conditions as the shares subject to the Restricted Stock Award with respect to which such dividends or distributions were paid, and otherwise shall be paid no later than the end of the calendar year in which such dividends or distributions are paid to stockholders (or, if later, the 15th day of the third month following the date such dividends or distributions are paid to stockholders). In the event of a dividend or distribution paid in shares of Stock or other property or any other adjustment made upon a change in the capital structure of the Company as described in Section 4.2, any and all new, substituted or additional securities or other property (other than regular, periodic cash dividends) to which the Participant is entitled by reason of the Participant's Restricted Stock Award shall be immediately subject to the same Vesting Conditions as the shares subject to the Restricted Stock Award with respect to which such dividends or distributions were paid or adjustments were made.

8.7 **Effect of Termination of Service.** Unless otherwise provided by the Committee in the Award Agreement evidencing a Restricted Stock Award, if a Participant's Service terminates for any reason, whether voluntary or involuntary (including the Participant's death or disability), then (a) the Company shall have the option to repurchase for the purchase price paid by the Participant any shares acquired by the Participant pursuant to a Restricted Stock Purchase Right which remain subject to Vesting Conditions as of the date of the Participant's termination of Service and (b) the Participant shall forfeit to the Company any shares acquired by the Participant pursuant to a Restricted Stock Bonus which remain subject to Vesting Conditions as of the date of the Participant's termination of Service. The Company shall have the right to assign at any time any repurchase right it may have, whether or not such right is then exercisable, to one or more persons as may be selected by the Company.

8.8 **Nontransferability of Restricted Stock Award Rights.** Rights to acquire shares of Stock pursuant to a Restricted Stock Award shall not be subject in any manner to anticipation, alienation, sale, exchange, transfer, assignment, pledge, encumbrance or garnishment by creditors of the Participant or the Participant's beneficiary, except transfer by will or the laws of descent and distribution. All rights with respect to a Restricted Stock Award granted to a Participant hereunder shall be exercisable during his or her lifetime only by such Participant or the Participant's guardian or legal representative.

9. **RESTRICTED STOCK UNIT AWARDS.**

Restricted Stock Unit Awards shall be evidenced by Award Agreements specifying the number of Restricted Stock Units subject to the Award, in such form as the Committee shall from time to time establish. Award Agreements evidencing Restricted Stock Units may incorporate all

or any of the terms of the Plan by reference and shall comply with and be subject to the following terms and conditions:

9.1 **Grant of Restricted Stock Unit Awards.** Restricted Stock Unit Awards may be granted upon such conditions as the Committee shall determine, including, without limitation, upon the attainment of one or more Performance Goals described in Section 10.4. If either the grant of a Restricted Stock Unit Award or the Vesting Conditions with respect to such Award is to be contingent upon the attainment of one or more Performance Goals, the Committee shall follow procedures substantially equivalent to those set forth in Sections 10.3 through 10.5(a).

9.2 **Purchase Price.** No monetary payment (other than applicable tax withholding, if any) shall be required as a condition of receiving a Restricted Stock Unit Award, the consideration for which shall be services actually rendered to a Participating Company or for its benefit. Notwithstanding the foregoing, if required by applicable state corporate law, the Participant shall furnish consideration in the form of cash or past services rendered to a Participating Company or for its benefit having a value not less than the par value of the shares of Stock issued upon settlement of the Restricted Stock Unit Award.

9.3 **Vesting.** Restricted Stock Unit Awards may (but need not) be made subject to Vesting Conditions based upon the satisfaction of such Service requirements, conditions, restrictions or performance criteria, including, without limitation, Performance Goals as described in Section 10.4, as shall be established by the Committee and set forth in the Award Agreement evidencing such Award. The Committee, in its discretion, may provide in any Award Agreement evidencing a Restricted Stock Unit Award that, if the satisfaction of Vesting Conditions with respect to any shares subject to the Award would otherwise occur on a day on which the sale of such shares would violate the provisions of the Trading Compliance Policy, then the satisfaction of the Vesting Conditions automatically shall be determined on the first to occur of (a) the next trading day on which the sale of such shares would not violate the Trading Compliance Policy or (b) the later of (i) last day of the calendar year in which the original vesting date occurred or (ii) the last day of the Company's taxable year in which the original vesting date occurred.

9.4 **Voting Rights, Dividend Equivalent Rights and Distributions.** Participants shall have no voting rights with respect to shares of Stock represented by Restricted Stock Units until the date of the issuance of such shares (as evidenced by the appropriate entry on the books of the Company or of a duly authorized transfer agent of the Company). However, the Committee, in its discretion, may provide in the Award Agreement evidencing any Restricted Stock Unit Award that the Participant shall be entitled to Dividend Equivalent Rights with respect to the payment of cash dividends on Stock during the period beginning on the date such Award is granted and ending, with respect to each share subject to the Award, on the earlier of the date the Award is settled or the date on which it is terminated. Such Dividend Equivalent Rights, if any, shall be paid by crediting the Participant with additional whole Restricted Stock Units as of the date of payment of such cash dividends on Stock. The number of additional Restricted Stock Units (rounded to the nearest whole number) to be so credited shall be determined by dividing (a) the amount of cash dividends paid on such date with respect to the number of shares of Stock represented by the Restricted Stock Units previously credited to the Participant by (b) the Fair Market Value per share of Stock on such date. Such additional Restricted Stock Units shall be subject to the same terms and conditions and shall be settled in the same manner and at the same time as the Restricted Stock Units originally subject

to the Restricted Stock Unit Award. In the event of a dividend or distribution paid in shares of Stock or other property or any other adjustment made upon a change in the capital structure of the Company as described in Section 4.2, appropriate adjustments shall be made in the Participant's Restricted Stock Unit Award so that it represents the right to receive upon settlement any and all new, substituted or additional securities or other property (other than regular, periodic cash dividends) to which the Participant would be entitled by reason of the shares of Stock issuable upon settlement of the Award, and all such new, substituted or additional securities or other property shall be immediately subject to the same Vesting Conditions as are applicable to the Award.

9.5 **Effect of Termination of Service.** Unless otherwise provided by the Committee and set forth in the Award Agreement evidencing a Restricted Stock Unit Award, if a Participant's Service terminates for any reason, whether voluntary or involuntary (including the Participant's death or disability), then the Participant shall forfeit to the Company any Restricted Stock Units pursuant to the Award which remain subject to Vesting Conditions as of the date of the Participant's termination of Service.

9.6 **Settlement of Restricted Stock Unit Awards.** The Company shall issue to a Participant on the date on which Restricted Stock Units subject to the Participant's Restricted Stock Unit Award vest or on such other date determined by the Committee, in its discretion, and set forth in the Award Agreement one (1) share of Stock (and/or any other new, substituted or additional securities or other property pursuant to an adjustment described in Section 9.4) for each Restricted Stock Unit then becoming vested or otherwise to be settled on such date, subject to the withholding of applicable taxes, if any. If permitted by the Committee, the Participant may elect, consistent with the requirements of Section 409A, to defer receipt of all or any portion of the shares of Stock or other property otherwise issuable to the Participant pursuant to this Section, and such deferred issuance date(s) and amount(s) elected by the Participant shall be set forth in the Award Agreement. Notwithstanding the foregoing, the Committee, in its discretion, may provide for settlement of any Restricted Stock Unit Award by payment to the Participant in cash of an amount equal to the Fair Market Value on the payment date of the shares of Stock or other property otherwise issuable to the Participant pursuant to this Section.

9.7 **Nontransferability of Restricted Stock Unit Awards.** The right to receive shares pursuant to a Restricted Stock Unit Award shall not be subject in any manner to anticipation, alienation, sale, exchange, transfer, assignment, pledge, encumbrance, or garnishment by creditors of the Participant or the Participant's beneficiary, except transfer by will or by the laws of descent and distribution. All rights with respect to a Restricted Stock Unit Award granted to a Participant hereunder shall be exercisable during his or her lifetime only by such Participant or the Participant's guardian or legal representative.

10. **PERFORMANCE AWARDS.**

Performance Awards shall be evidenced by Award Agreements in such form as the Committee shall from time to time establish. Award Agreements evidencing Performance Awards may incorporate all or any of the terms of the Plan by reference and shall comply with and be subject to the following terms and conditions:

10.1 **Types of Performance Awards Authorized.** Performance Awards may be granted in the form of either Performance Shares or Performance Units. Each Award Agreement evidencing a Performance Award shall specify the number of Performance Shares or Performance Units subject thereto, the Performance Award Formula, the Performance Goal(s) and Performance Period applicable to the Award, and the other terms, conditions and restrictions of the Award.

10.2 **Initial Value of Performance Shares and Performance Units.** Unless otherwise provided by the Committee in granting a Performance Award, each Performance Share shall have an initial monetary value equal to the Fair Market Value of one (1) share of Stock, subject to adjustment as provided in Section 4.2, on the effective date of grant of the Performance Share, and each Performance Unit shall have an initial monetary value established by the Committee at the time of grant. The final value payable to the Participant in settlement of a Performance Award determined on the basis of the applicable Performance Award Formula will depend on the extent to which Performance Goals established by the Committee are attained within the applicable Performance Period established by the Committee.

10.3 **Establishment of Performance Period, Performance Goals and Performance Award Formula.** In granting each Performance Award, the Committee shall establish in writing the applicable Performance Period, Performance Award Formula and one or more Performance Goals which, when measured at the end of the Performance Period, shall determine on the basis of the Performance Award Formula the final value of the Performance Award to be paid to the Participant. Unless otherwise permitted in compliance with the requirements under Section 162(m) with respect to each Performance Award intended to result in the payment of Performance-Based Compensation, the Committee shall establish the Performance Goal(s) and Performance Award Formula applicable to each Performance Award no later than the earlier of (a) the date ninety (90) days after the commencement of the applicable Performance Period or (b) the date on which 25% of the Performance Period has elapsed, and, in any event, at a time when the outcome of the Performance Goals remains substantially uncertain. Once established, the Performance Goals and Performance Award Formula applicable to a Covered Employee shall not be changed during the Performance Period. The Company shall notify each Participant granted a Performance Award of the terms of such Award, including the Performance Period, Performance Goal(s) and Performance Award Formula.

10.4 **Measurement of Performance Goals.** Performance Goals shall be established by the Committee on the basis of targets to be attained (*"**Performance Targets**"*) with respect to one or more measures of business or financial performance (each, a *"**Performance Measure**"*), subject to the following:

(a) ***Performance Measures.*** Performance Measures shall be calculated in accordance with the Company's financial statements, or, if such terms are not used in the Company's financial statements, they shall be calculated in accordance with generally accepted accounting principles, a method used generally in the Company's industry, or in accordance with a methodology established by the Committee prior to the grant of the Performance Award. Performance Measures shall be calculated with respect to the Company and each Subsidiary Corporation consolidated therewith for financial reporting purposes or such division or other business unit as may be selected by the Committee. Unless otherwise determined by the Committee prior to the grant of the Performance Award, the Performance Measures applicable to the Performance Award shall be

calculated prior to the accrual of expense for any Performance Award for the same Performance Period and excluding the effect (whether positive or negative) on the Performance Measures of any change in accounting standards or any extraordinary, unusual or nonrecurring item, as determined by the Committee, occurring after the establishment of the Performance Goals applicable to the Performance Award. Each such adjustment, if any, shall be made solely for the purpose of providing a consistent basis from period to period for the calculation of Performance Measures in order to prevent the dilution or enlargement of the Participant's rights with respect to a Performance Award. Performance Measures may be one or more of the following, as determined by the Committee:

(i) revenue;

(ii) sales;

(iii) expenses;

(iv) operating income;

(v) gross margin;

(vi) operating margin;

(vii) earnings before any one or more of: stock-based compensation expense, interest, taxes, depreciation and amortization;

(viii) pre-tax profit;

(ix) net operating income;

(x) net income;

(xi) economic value added;

(xii) free cash flow;

(xiii) operating cash flow;

(xiv) balance of cash, cash equivalents and marketable securities;

(xv) stock price;

(xvi) earnings per share;

(xvii) return on stockholder equity;

(xviii) return on capital;

(xix) return on assets;

(xx) return on investment;

(xxi) total stockholder return;

(xxii) employee satisfaction;

(xxiii) employee retention;

(xxiv) market share;

(xxv) customer satisfaction;

(xxvi) product development;

(xxvii) research and development expenses;

(xxviii) completion of an identified special project; and

(xxix) completion of a joint venture or other corporate transaction.

(b) ***Performance Targets.*** Performance Targets may include a minimum, maximum, target level and intermediate levels of performance, with the final value of a Performance Award determined under the applicable Performance Award Formula by the level attained during the applicable Performance Period. A Performance Target may be stated as an absolute value, a growth or reduction in a value, or as a value determined relative to an index, budget or other standard selected by the Committee.

10.5 **Settlement of Performance Awards.**

(a) ***Determination of Final Value.*** As soon as practicable following the completion of the Performance Period applicable to a Performance Award, the Committee shall certify in writing the extent to which the applicable Performance Goals have been attained and the resulting final value of the Award earned by the Participant and to be paid upon its settlement in accordance with the applicable Performance Award Formula.

(b) ***Discretionary Adjustment of Award Formula.*** In its discretion, the Committee may, either at the time it grants a Performance Award or at any time thereafter, provide for the positive or negative adjustment of the Performance Award Formula applicable to a Performance Award granted to any Participant who is not a Covered Employee to reflect such Participant's individual performance in his or her position with the Company or such other factors as the Committee may determine. If permitted under a Covered Employee's Award Agreement, the Committee shall have the discretion, on the basis of such criteria as may be established by the Committee, to reduce some or all of the value of the Performance Award that would otherwise be paid to the Covered Employee upon its settlement notwithstanding the attainment of any Performance Goal and the resulting value of the Performance Award determined in accordance with the Performance Award Formula. No such reduction may result in an increase in the amount payable

upon settlement of another Participant's Performance Award that is intended to result in Performance-Based Compensation.

(c) ***Effect of Leaves of Absence.*** Unless otherwise required by law or a Participant's Award Agreement, payment of the final value, if any, of a Performance Award held by a Participant who has taken in excess of thirty (30) days in unpaid leaves of absence during a Performance Period shall be prorated on the basis of the number of days of the Participant's Service during the Performance Period during which the Participant was not on an unpaid leave of absence.

(d) ***Notice to Participants.*** As soon as practicable following the Committee's determination and certification in accordance with Sections 10.5(a) and (b), the Company shall notify each Participant of the determination of the Committee.

(e) ***Payment in Settlement of Performance Awards.*** As soon as practicable following the Committee's determination and certification in accordance with Sections 10.5(a) and (b), but in any event within the Short-Term Deferral Period described in Section 15.1 (except as otherwise provided below or consistent with the requirements of Section 409A), payment shall be made to each eligible Participant (or such Participant's legal representative or other person who acquired the right to receive such payment by reason of the Participant's death) of the final value of the Participant's Performance Award. Payment of such amount shall be made in cash, shares of Stock, or a combination thereof as determined by the Committee. Unless otherwise provided in the Award Agreement evidencing a Performance Award, payment shall be made in a lump sum. If permitted by the Committee, the Participant may elect, consistent with the requirements of Section 409A, to defer receipt of all or any portion of the payment to be made to the Participant pursuant to this Section, and such deferred payment date(s) elected by the Participant shall be set forth in the Award Agreement. If any payment is to be made on a deferred basis, the Committee may, but shall not be obligated to, provide for the payment during the deferral period of Dividend Equivalent Rights or interest.

(f) ***Provisions Applicable to Payment in Shares.*** If payment is to be made in shares of Stock, the number of such shares shall be determined by dividing the final value of the Performance Award by the Fair Market Value of a share of Stock determined by the method specified in the Award Agreement. Shares of Stock issued in payment of any Performance Award may be fully vested and freely transferable shares or may be shares of Stock subject to Vesting Conditions as provided in Section 8.5. Any shares subject to Vesting Conditions shall be evidenced by an appropriate Award Agreement and shall be subject to the provisions of Sections 8.5 through 8.8 above.

10.6 **Voting Rights; Dividend Equivalent Rights and Distributions.** Participants shall have no voting rights with respect to shares of Stock represented by Performance Share Awards until the date of the issuance of such shares, if any (as evidenced by the appropriate entry on the books of the Company or of a duly authorized transfer agent of the Company). However, the Committee, in its discretion, may provide in the Award Agreement evidencing any Performance Share Award that the Participant shall be entitled to Dividend Equivalent Rights with respect to the payment of cash dividends on Stock during the period beginning on the date the Award is granted and ending, with respect to each share subject to the Award, on the earlier of the date on which the Performance Shares are settled or the date on which they are forfeited. Such Dividend Equivalent

Rights, if any, shall be credited to the Participant in the form of additional whole Performance Shares as of the date of payment of such cash dividends on Stock. The number of additional Performance Shares (rounded to the nearest whole number) to be so credited shall be determined by dividing (a) the amount of cash dividends paid on the dividend payment date with respect to the number of shares of Stock represented by the Performance Shares previously credited to the Participant by (b) the Fair Market Value per share of Stock on such date. Dividend Equivalent Rights may be paid currently or may be accumulated and paid to the extent that Performance Shares become nonforfeitable, as determined by the Committee. Settlement of Dividend Equivalent Rights may be made in cash, shares of Stock, or a combination thereof as determined by the Committee, and may be paid on the same basis as settlement of the related Performance Share as provided in Section 10.5. Dividend Equivalent Rights shall not be paid with respect to Performance Units. In the event of a dividend or distribution paid in shares of Stock or other property or any other adjustment made upon a change in the capital structure of the Company as described in Section 4.2, appropriate adjustments shall be made in the Participant's Performance Share Award so that it represents the right to receive upon settlement any and all new, substituted or additional securities or other property (other than regular, periodic cash dividends) to which the Participant would be entitled by reason of the shares of Stock issuable upon settlement of the Performance Share Award, and all such new, substituted or additional securities or other property shall be immediately subject to the same Performance Goals as are applicable to the Award.

10.7 **Effect of Termination of Service.** Unless otherwise provided by the Committee and set forth in the Award Agreement evidencing a Performance Award, the effect of a Participant's termination of Service on the Performance Award shall be as follows:

(a) ***Death or Disability.*** If the Participant's Service terminates because of the death or Disability of the Participant before the completion of the Performance Period applicable to the Performance Award, the final value of the Participant's Performance Award shall be determined by the extent to which the applicable Performance Goals have been attained with respect to the entire Performance Period and shall be prorated based on the number of months of the Participant's Service during the Performance Period. Payment shall be made following the end of the Performance Period in any manner permitted by Section 10.5.

(b) ***Other Termination of Service.*** If the Participant's Service terminates for any reason except death or Disability before the completion of the Performance Period applicable to the Performance Award, such Award shall be forfeited in its entirety; provided, however, that in the event of an involuntary termination of the Participant's Service, the Committee, in its discretion, may waive the automatic forfeiture of all or any portion of any such Award and determine the final value of the Performance Award in the manner provided by Section 10.7(a). Payment of any amount pursuant to this Section shall be made following the end of the Performance Period in any manner permitted by Section 10.5.

10.8 **Nontransferability of Performance Awards.** Prior to settlement in accordance with the provisions of the Plan, no Performance Award shall be subject in any manner to anticipation, alienation, sale, exchange, transfer, assignment, pledge, encumbrance, or garnishment by creditors of the Participant or the Participant's beneficiary, except transfer by will or by the laws of descent and distribution. All rights with respect to a Performance Award granted to a Participant hereunder

shall be exercisable during his or her lifetime only by such Participant or the Participant's guardian or legal representative.

11. CASH-BASED AWARDS AND OTHER STOCK-BASED AWARDS

Cash-Based Awards and Other Stock-Based Awards shall be evidenced by Award Agreements in such form as the Committee shall from time to time establish. Award Agreements evidencing Cash-Based Awards and Other Stock-Based Awards may incorporate all or any of the terms of the Plan by reference and shall comply with and be subject to the following terms and conditions:

11.1 **Grant of Cash-Based Awards**. Subject to the provisions of the Plan, the Committee, at any time and from time to time, may grant Cash-Based Awards to Participants in such amounts and upon such terms and conditions, including the achievement of performance criteria, as the Committee may determine.

11.2 **Grant of Other Stock-Based Awards**. The Committee may grant other types of equity-based or equity-related Awards not otherwise described by the terms of this Plan (including the grant or offer for sale of unrestricted securities, stock-equivalent units, stock appreciation units, securities or debentures convertible into common stock or other forms determined by the Committee) in such amounts and subject to such terms and conditions as the Committee shall determine. Other Stock-Based Awards may be made available as a form of payment in the settlement of other Awards or as payment in lieu of compensation to which a Participant is otherwise entitled. Other Stock-Based Awards may involve the transfer of actual shares of Stock to Participants, or payment in cash or otherwise of amounts based on the value of Stock and may include, without limitation, Awards designed to comply with or take advantage of the applicable local laws of jurisdictions other than the United States.

11.3 **Value of Cash-Based and Other Stock-Based Awards**. Each Cash-Based Award shall specify a monetary payment amount or payment range as determined by the Committee. Each Other Stock-Based Award shall be expressed in terms of shares of Stock or units based on such shares of Stock, as determined by the Committee. The Committee may require the satisfaction of such Service requirements, conditions, restrictions or performance criteria, including, without limitation, Performance Goals as described in Section 10.4, as shall be established by the Committee and set forth in the Award Agreement evidencing such Award. If the Committee exercises its discretion to establish performance criteria, the final value of Cash-Based Awards or Other Stock-Based Awards that will be paid to the Participant will depend on the extent to which the performance criteria are met. The establishment of performance criteria with respect to the grant or vesting of any Cash-Based Award or Other Stock-Based Award intended to result in Performance-Based Compensation shall follow procedures substantially equivalent to those applicable to Performance Awards set forth in Section 10.

11.4 **Payment or Settlement of Cash-Based Awards and Other Stock-Based Awards**. Payment or settlement, if any, with respect to a Cash-Based Award or an Other Stock-Based Award shall be made in accordance with the terms of the Award, in cash, shares of Stock or other securities or any combination thereof as the Committee determines. The determination and certification of the final value with respect to any Cash-Based Award or Other Stock-Based Award intended to

result in Performance-Based Compensation shall comply with the requirements applicable to Performance Awards set forth in Section 10. To the extent applicable, payment or settlement with respect to each Cash-Based Award and Other Stock-Based Award shall be made in compliance with the requirements of Section 409A.

11.5 **Voting Rights; Dividend Equivalent Rights and Distributions.** Participants shall have no voting rights with respect to shares of Stock represented by Other Stock-Based Awards until the date of the issuance of such shares of Stock (as evidenced by the appropriate entry on the books of the Company or of a duly authorized transfer agent of the Company), if any, in settlement of such Award. However, the Committee, in its discretion, may provide in the Award Agreement evidencing any Other Stock-Based Award that the Participant shall be entitled to Dividend Equivalent Rights with respect to the payment of cash dividends on Stock during the period beginning on the date such Award is granted and ending, with respect to each share subject to the Award, on the earlier of the date the Award is settled or the date on which it is terminated. Such Dividend Equivalent Rights, if any, shall be paid in accordance with the provisions set forth in Section 9.4. Dividend Equivalent Rights shall not be granted with respect to Cash-Based Awards. In the event of a dividend or distribution paid in shares of Stock or other property or any other adjustment made upon a change in the capital structure of the Company as described in Section 4.2, appropriate adjustments shall be made in the Participant's Other Stock-Based Award so that it represents the right to receive upon settlement any and all new, substituted or additional securities or other property (other than regular, periodic cash dividends) to which the Participant would be entitled by reason of the shares of Stock issuable upon settlement of such Award, and all such new, substituted or additional securities or other property shall be immediately subject to the same Vesting Conditions and performance criteria, if any, as are applicable to the Award.

11.6 **Effect of Termination of Service**. Each Award Agreement evidencing a Cash-Based Award or Other Stock-Based Award shall set forth the extent to which the Participant shall have the right to retain such Award following termination of the Participant's Service. Such provisions shall be determined in the discretion of the Committee, need not be uniform among all Cash-Based Awards or Other Stock-Based Awards, and may reflect distinctions based on the reasons for termination, subject to the requirements of Section 409A, if applicable.

11.7 **Nontransferability of Cash-Based Awards and Other Stock-Based Awards.** Prior to the payment or settlement of a Cash-Based Award or Other Stock-Based Award, the Award shall not be subject in any manner to anticipation, alienation, sale, exchange, transfer, assignment, pledge, encumbrance, or garnishment by creditors of the Participant or the Participant's beneficiary, except transfer by will or by the laws of descent and distribution. The Committee may impose such additional restrictions on any shares of Stock issued in settlement of Cash-Based Awards and Other Stock-Based Awards as it may deem advisable, including, without limitation, minimum holding period requirements, restrictions under applicable federal securities laws, under the requirements of any stock exchange or market upon which such shares of Stock are then listed and/or traded, or under any state securities laws or foreign law applicable to such shares of Stock.

12. STANDARD FORMS OF AWARD AGREEMENT.

12.1 **Award Agreements.** Each Award shall comply with and be subject to the terms and conditions set forth in the appropriate form of Award Agreement approved by the Committee and

as amended from time to time. No Award or purported Award shall be a valid and binding obligation of the Company unless evidenced by a fully executed Award Agreement, which execution may be evidenced by electronic means. Any Award Agreement may consist of an appropriate form of Notice of Grant and a form of Agreement incorporated therein by reference, or such other form or forms, including electronic media, as the Committee may approve from time to time.

12.2 **Authority to Vary Terms** The Committee shall have the authority from time to time to vary the terms of any standard form of Award Agreement either in connection with the grant or amendment of an individual Award or in connection with the authorization of a new standard form or forms; provided, however, that the terms and conditions of any such new, revised or amended standard form or forms of Award Agreement are not inconsistent with the terms of the Plan.

13. CHANGE IN CONTROL.

13.1 **Effect of Change in Control on Awards.** Subject to the requirements and limitations of Section 409A, if applicable, the Committee may provide for any one or more of the following:

(a) ***Accelerated Vesting.*** In its discretion, the Committee may provide in the grant of any Award or at any other time may take such action as it deems appropriate to provide for acceleration of the exercisability, vesting and/or settlement in connection with a Change in Control of each or any outstanding Award or portion thereof and shares acquired pursuant thereto upon such conditions, including termination of the Participant's Service prior to, upon, or following such Change in Control, and to such extent as the Committee shall determine.

(b) ***Assumption, Continuation or Substitution.*** In the event of a Change in Control, the surviving, continuing, successor, or purchasing corporation or other business entity or parent thereof, as the case may be (the *"**Acquiror**"*), may, without the consent of any Participant, either assume or continue the Company's rights and obligations under each or any Award or portion thereof outstanding immediately prior to the Change in Control or substitute for each or any such outstanding Award or portion thereof a substantially equivalent award with respect to the Acquiror's stock, as applicable. For purposes of this Section, if so determined by the Committee in its discretion, an Award denominated in shares of Stock shall be deemed assumed if, following the Change in Control, the Award confers the right to receive, subject to the terms and conditions of the Plan and the applicable Award Agreement, for each share of Stock subject to the Award immediately prior to the Change in Control, the consideration (whether stock, cash, other securities or property or a combination thereof) to which a holder of a share of Stock on the effective date of the Change in Control was entitled (and if holders were offered a choice of consideration, the type of consideration chosen by the holders of a majority of the outstanding shares of Stock); provided, however, that if such consideration is not solely common stock of the Acquiror, the Committee may, with the consent of the Acquiror, provide for the consideration to be received upon the exercise or settlement of the Award, for each share of Stock subject to the Award, to consist solely of common stock of the Acquiror equal in Fair Market Value to the per share consideration received by holders of Stock pursuant to the Change in Control. Any Award or portion thereof which is neither assumed or continued by the Acquiror in connection with the Change in Control nor exercised or settled as of the time of consummation of the Change in Control shall terminate and cease to be outstanding effective as of the time of consummation of the Change in Control.

(c) ***Cash-Out of Outstanding Stock-Based Awards.*** The Committee may, in its discretion and without the consent of any Participant, determine that, upon the occurrence of a Change in Control, each or any Award denominated in shares of Stock or portion thereof outstanding immediately prior to the Change in Control and not previously exercised or settled shall be canceled in exchange for a payment with respect to each vested share (and each unvested share, if so determined by the Committee) of Stock subject to such canceled Award in (i) cash, (ii) stock of the Company or of a corporation or other business entity a party to the Change in Control, or (iii) other property which, in any such case, shall be in an amount having a Fair Market Value equal to the Fair Market Value of the consideration to be paid per share of Stock in the Change in Control, reduced (but not below zero) by the exercise or purchase price per share, if any, under such Award. In the event such determination is made by the Committee, an Award having an exercise or purchase price per share equal to or greater than the Fair Market Value of the consideration to be paid per share of Stock in the Change in Control may be canceled without payment of consideration to the holder thereof. Payment pursuant to this Section (reduced by applicable withholding taxes, if any) shall be made to Participants in respect of the vested portions of their canceled Awards as soon as practicable following the date of the Change in Control and in respect of the unvested portions of their canceled Awards in accordance with the vesting schedules applicable to such Awards.

13.2 **Federal Excise Tax Under Section 4999 of the Code.**

(a) ***Excess Parachute Payment.*** In the event that any acceleration of vesting pursuant to an Award and any other payment or benefit received or to be received by a Participant would subject the Participant to any excise tax pursuant to Section 4999 of the Code due to the characterization of such acceleration of vesting, payment or benefit as an "excess parachute payment" under Section 280G of the Code, the Participant may elect to reduce the amount of any acceleration of vesting called for under the Award in order to avoid such characterization.

(b) ***Determination by Independent Accountants.*** To aid the Participant in making any election called for under Section 13.2(a), no later than the date of the occurrence of any event that might reasonably be anticipated to result in an "excess parachute payment" to the Participant as described in Section 13.2(a), the Company shall request a determination in writing by independent public accountants selected by the Company (the *"**Accountants**"*). As soon as practicable thereafter, the Accountants shall determine and report to the Company and the Participant the amount of such acceleration of vesting, payments and benefits which would produce the greatest after-tax benefit to the Participant. For the purposes of such determination, the Accountants may rely on reasonable, good faith interpretations concerning the application of Sections 280G and 4999 of the Code. The Company and the Participant shall furnish to the Accountants such information and documents as the Accountants may reasonably request in order to make their required determination. The Company shall bear all fees and expenses the Accountants charge in connection with their services contemplated by this Section.

14. **COMPLIANCE WITH SECURITIES LAW.**

The grant of Awards and the issuance of shares of Stock pursuant to any Award shall be subject to compliance with all applicable requirements of federal, state and foreign law with respect to such securities and the requirements of any stock exchange or market system upon which the Stock may then be listed. In addition, no Award may be exercised or shares issued pursuant to an

Award unless (a) a registration statement under the Securities Act shall at the time of such exercise or issuance be in effect with respect to the shares issuable pursuant to the Award, or (b) in the opinion of legal counsel to the Company, the shares issuable pursuant to the Award may be issued in accordance with the terms of an applicable exemption from the registration requirements of the Securities Act. The inability of the Company to obtain from any regulatory body having jurisdiction the authority, if any, deemed by the Company's legal counsel to be necessary to the lawful issuance and sale of any shares hereunder shall relieve the Company of any liability in respect of the failure to issue or sell such shares as to which such requisite authority shall not have been obtained. As a condition to issuance of any Stock, the Company may require the Participant to satisfy any qualifications that may be necessary or appropriate, to evidence compliance with any applicable law or regulation and to make any representation or warranty with respect thereto as may be requested by the Company.

15. **COMPLIANCE WITH SECTION 409A.**

15.1 **Awards Subject to Section 409A.** The Company intends that Awards granted pursuant to the Plan shall either be exempt from or comply with Section 409A, and the Plan shall be so construed. The provisions of this Section 15 shall apply to any Award or portion thereof that constitutes or provides for payment of Section 409A Deferred Compensation. Such Awards may include, without limitation:

(a) A Nonstatutory Stock Option or SAR that includes any feature for the deferral of compensation other than the deferral of recognition of income until the later of (i) the exercise or disposition of the Award or (ii) the time the stock acquired pursuant to the exercise of the Award first becomes substantially vested.

(b) Any Restricted Stock Unit Award, Performance Award, Cash-Based Award or Other Stock-Based Award that either (i) provides by its terms for settlement of all or any portion of the Award at a time or upon an event that will or may occur later than the end of the Short-Term Deferral Period (as defined below) or (ii) permits the Participant granted the Award to elect one or more dates or events upon which the Award will be settled after the end of the Short-Term Deferral Period.

Subject to the provisions of Section 409A, the term "***Short-Term Deferral Period***" means the 2½ month period ending on the later of (i) the 15th day of the third month following the end of the Participant's taxable year in which the right to payment under the applicable portion of the Award is no longer subject to a substantial risk of forfeiture or (ii) the 15th day of the third month following the end of the Company's taxable year in which the right to payment under the applicable portion of the Award is no longer subject to a substantial risk of forfeiture. For this purpose, the term "substantial risk of forfeiture" shall have the meaning provided by Section 409A.

15.2 **Deferral and/or Distribution Elections.** Except as otherwise permitted or required by Section 409A, the following rules shall apply to any compensation deferral and/or payment elections (each, an "***Election***") that may be permitted or required by the Committee pursuant to an Award providing Section 409A Deferred Compensation:

(a) Elections must be in writing and specify the amount of the payment in settlement of an Award being deferred, as well as the time and form of payment as permitted by this Plan.

(b) Elections shall be made by the end of the Participant's taxable year prior to the year in which services commence for which an Award may be granted to such Participant.

(c) Elections shall continue in effect until a written revocation or change in Election is received by the Company, except that a written revocation or change in Election must be received by the Company prior to the last day for making the Election determined in accordance with paragraph (b) above or as permitted by Section 15.3.

15.3 **Subsequent Elections.** Except as otherwise permitted or required by Section 409A, any Award providing Section 409A Deferred Compensation which permits a subsequent Election to delay the payment or change the form of payment in settlement of such Award shall comply with the following requirements:

(a) No subsequent Election may take effect until at least twelve (12) months after the date on which the subsequent Election is made.

(b) Each subsequent Election related to a payment in settlement of an Award not described in Section 15.4(a)(ii), 15.4(a)(iii) or 15.4(a)(vi) must result in a delay of the payment for a period of not less than five (5) years from the date on which such payment would otherwise have been made.

(c) No subsequent Election related to a payment pursuant to Section 15.4(a)(iv) shall be made less than twelve (12) months before the date on which such payment would otherwise have been made.

(d) Subsequent Elections shall continue in effect until a written revocation or change in the subsequent Election is received by the Company, except that a written revocation or change in a subsequent Election must be received by the Company prior to the last day for making the subsequent Election determined in accordance the preceding paragraphs of this Section 15.3.

15.4 **Payment of Section 409A Deferred Compensation.**

(a) ***Permissible Payments.*** Except as otherwise permitted or required by Section 409A, an Award providing Section 409A Deferred Compensation must provide for payment in settlement of the Award only upon one or more of the following:

(i) The Participant's "separation from service" (as such term is defined by Section 409A);

(ii) The Participant's becoming "disabled" (as such term is defined by Section 409A);

(iii) The Participant's death;

(iv) A time or fixed schedule that is either (i) specified by the Committee upon the grant of an Award and set forth in the Award Agreement evidencing such Award or (ii) specified by the Participant in an Election complying with the requirements of Section 15.2 or 15.3, as applicable;

(v) A change in the ownership or effective control or the Company or in the ownership of a substantial portion of the assets of the Company determined in accordance with Section 409A; or

(vi) The occurrence of an "unforeseeable emergency" (as such term is defined by Section 409A).

(b) ***Installment Payments.*** It is the intent of this Plan that any right of a Participant to receive installment payments (within the meaning of Section 409A) shall, for all purposes of Section 409A, be treated as a right to a series of separate payments.

(c) ***Required Delay in Payment to Specified Employee Pursuant to Separation from Service.*** Notwithstanding any provision of the Plan or an Award Agreement to the contrary, except as otherwise permitted by Section 409A, no payment pursuant to Section 15.4(a)(i) in settlement of an Award providing for Section 409A Deferred Compensation may be made to a Participant who is a "specified employee" (as such term is defined by Section 409A) as of the date of the Participant's separation from service before the date (the "***Delayed Payment Date***") that is six (6) months after the date of such Participant's separation from service, or, if earlier, the date of the Participant's death. All such amounts that would, but for this paragraph, become payable prior to the Delayed Payment Date shall be accumulated and paid on the Delayed Payment Date.

(d) ***Payment Upon Disability.*** All distributions payable by reason of a Participant becoming disabled shall be paid in a lump sum or in periodic installments as established by the Participant's Election. If the Participant has made no Election with respect to distributions upon becoming disabled, all such distributions shall be paid in a lump sum upon the determination that the Participant has become disabled.

(e) ***Payment Upon Death.*** If a Participant dies before complete distribution of amounts payable upon settlement of an Award subject to Section 409A, such undistributed amounts shall be distributed to his or her beneficiary under the distribution method for death established by the Participant's Election upon receipt by the Committee of satisfactory notice and confirmation of the Participant's death. If the Participant has made no Election with respect to distributions upon death, all such distributions shall be paid in a lump sum upon receipt by the Committee of satisfactory notice and confirmation of the Participant's death.

(f) ***Payment Upon Change in Control.*** Notwithstanding any provision of the Plan or an Award Agreement to the contrary, to the extent that any amount constituting Section 409A Deferred Compensation would become payable under this Plan by reason of a Change in Control, such amount shall become payable only if the event constituting a Change in Control would also constitute a change in ownership or effective control of the Company or a change in the ownership of a substantial portion of the assets of the Company within the meaning of Section 409A. Any

Award which constitutes Section 409A Deferred Compensation and which would vest and otherwise become payable upon a Change in Control as a result of the failure of the Acquiror to assume, continue or substitute for such Award in accordance with Section 13.1(b) shall vest to the extent provided by such Award but shall be converted automatically at the effective time of such Change in Control into a right to receive, in cash on the date or dates such award would have been settled in accordance with its then existing settlement schedule (or as required by Section 15.4(c)), an amount or amounts equal in the aggregate to the intrinsic value of the Award at the time of the Change in Control.

(g) ***Payment Upon Unforeseeable Emergency.*** The Committee shall have the authority to provide in the Award Agreement evidencing any Award providing for Section 409A Deferred Compensation for payment in settlement of all or a portion of such Award in the event that a Participant establishes, to the satisfaction of the Committee, the occurrence of an unforeseeable emergency. In such event, the amount(s) distributed with respect to such unforeseeable emergency cannot exceed the amounts reasonably necessary to satisfy the emergency need plus amounts necessary to pay taxes reasonably anticipated as a result of such distribution(s), after taking into account the extent to which such emergency need is or may be relieved through reimbursement or compensation by insurance or otherwise, by liquidation of the Participant's assets (to the extent the liquidation of such assets would not itself cause severe financial hardship) or by cessation of deferrals under the Award. All distributions with respect to an unforeseeable emergency shall be made in a lump sum upon the Committee's determination that an unforeseeable emergency has occurred. The Committee's decision with respect to whether an unforeseeable emergency has occurred and the manner in which, if at all, the payment in settlement of an Award shall be altered or modified, shall be final, conclusive, and not subject to approval or appeal.

(h) ***Prohibition of Acceleration of Payments.*** Notwithstanding any provision of the Plan or an Award Agreement to the contrary, this Plan does not permit the acceleration of the time or schedule of any payment under an Award providing Section 409A Deferred Compensation, except as permitted by Section 409A.

(i) ***No Representation Regarding Section 409A Compliance.*** Notwithstanding any other provision of the Plan, the Company makes no representation that Awards shall be exempt from or comply with Section 409A. No Participating Company shall be liable for any tax, penalty or interest imposed on a Participant by Section 409A.

16. **TAX WITHHOLDING.**

16.1 **Tax Withholding in General.** The Company shall have the right to deduct from any and all payments made under the Plan, or to require the Participant, through payroll withholding, cash payment or otherwise, to make adequate provision for, the federal, state, local and foreign taxes (including social insurance), if any, required by law to be withheld by any Participating Company with respect to an Award or the shares acquired pursuant thereto. The Company shall have no obligation to deliver shares of Stock, to release shares of Stock from an escrow established pursuant to an Award Agreement, or to make any payment in cash under the Plan until the Participating Company Group's tax withholding obligations have been satisfied by the Participant.

16.2 **Withholding in or Directed Sale of Shares.** The Company shall have the right, but not the obligation, to deduct from the shares of Stock issuable to a Participant upon the exercise or settlement of an Award, or to accept from the Participant the tender of, a number of whole shares of Stock having a Fair Market Value, as determined by the Company, equal to all or any part of the tax withholding obligations of any Participating Company. The Fair Market Value of any shares of Stock withheld or tendered to satisfy any such tax withholding obligations shall not exceed the amount determined by the applicable minimum statutory withholding rates. The Company may require a Participant to direct a broker, upon the vesting, exercise or settlement of an Award, to sell a portion of the shares subject to the Award determined by the Company in its discretion to be sufficient to cover the tax withholding obligations of any Participating Company and to remit an amount equal to such tax withholding obligations to the Company in cash.

17. AMENDMENT, SUSPENSION OR TERMINATION OF PLAN.

The Committee may amend, suspend or terminate the Plan at any time. However, without the approval of the Company's stockholders, there shall be (a) no increase in the maximum aggregate number of shares of Stock that may be issued under the Plan (except by operation of the provisions of Section 4.2), (b) no change in the class of persons eligible to receive Incentive Stock Options, and (c) no other amendment of the Plan that would require approval of the Company's stockholders under any applicable law, regulation or rule, including the rules of any stock exchange or quotation system upon which the Stock may then be listed or quoted. No amendment, suspension or termination of the Plan shall affect any then outstanding Award unless expressly provided by the Committee. Except as provided by the next sentence, no amendment, suspension or termination of the Plan may adversely affect any then outstanding Award without the consent of the Participant. Notwithstanding any other provision of the Plan to the contrary, the Committee may, in its sole and absolute discretion and without the consent of any Participant, amend the Plan or any Award Agreement, to take effect retroactively or otherwise, as it deems necessary or advisable for the purpose of conforming the Plan or such Award Agreement to any present or future law, regulation or rule applicable to the Plan, including, but not limited to, Section 409A.

18. MISCELLANEOUS PROVISIONS.

18.1 **Repurchase Rights.** Shares issued under the Plan may be subject to one or more repurchase options, or other conditions and restrictions as determined by the Committee in its discretion at the time the Award is granted. The Company shall have the right to assign at any time any repurchase right it may have, whether or not such right is then exercisable, to one or more persons as may be selected by the Company. Upon request by the Company, each Participant shall execute any agreement evidencing such transfer restrictions prior to the receipt of shares of Stock hereunder and shall promptly present to the Company any and all certificates representing shares of Stock acquired hereunder for the placement on such certificates of appropriate legends evidencing any such transfer restrictions.

18.2 **Forfeiture Events.**

(a) The Committee may specify in an Award Agreement that the Participant's rights, payments, and benefits with respect to an Award shall be subject to reduction, cancellation, forfeiture, or recoupment upon the occurrence of specified events, in addition to any otherwise

applicable vesting or performance conditions of an Award. Such events may include, but shall not be limited to, termination of Service for Cause or any act by a Participant, whether before or after termination of Service, that would constitute Cause for termination of Service.

(b) If the Company is required to prepare an accounting restatement due to the material noncompliance of the Company, as a result of misconduct, with any financial reporting requirement under the securities laws, any Participant who knowingly or through gross negligence engaged in the misconduct, or who knowingly or through gross negligence failed to prevent the misconduct, and any Participant who is one of the individuals subject to automatic forfeiture under Section 304 of the Sarbanes-Oxley Act of 2002, shall reimburse the Company for (i) the amount of any payment in settlement of an Award received by such Participant during the twelve-(12-) month period following the first public issuance or filing with the United States Securities and Exchange Commission (whichever first occurred) of the financial document embodying such financial reporting requirement, and (ii) any profits realized by such Participant from the sale of securities of the Company during such twelve-(12-) month period.

18.3 **Provision of Information.** Each Participant shall be given access to information concerning the Company equivalent to that information generally made available to the Company's common stockholders.

18.4 **Rights as Employee, Consultant or Director.** No person, even though eligible pursuant to Section 5, shall have a right to be selected as a Participant, or, having been so selected, to be selected again as a Participant. Nothing in the Plan or any Award granted under the Plan shall confer on any Participant a right to remain an Employee, Consultant or Director or interfere with or limit in any way any right of a Participating Company to terminate the Participant's Service at any time. To the extent that an Employee of a Participating Company other than the Company receives an Award under the Plan, that Award shall in no event be understood or interpreted to mean that the Company is the Employee's employer or that the Employee has an employment relationship with the Company.

18.5 **Rights as a Stockholder.** A Participant shall have no rights as a stockholder with respect to any shares covered by an Award until the date of the issuance of such shares (as evidenced by the appropriate entry on the books of the Company or of a duly authorized transfer agent of the Company). No adjustment shall be made for dividends, distributions or other rights for which the record date is prior to the date such shares are issued, except as provided in Section 4.2 or another provision of the Plan.

18.6 **Delivery of Title to Shares.** Subject to any governing rules or regulations, the Company shall issue or cause to be issued the shares of Stock acquired pursuant to an Award and shall deliver such shares to or for the benefit of the Participant by means of one or more of the following: (a) by delivering to the Participant evidence of book entry shares of Stock credited to the account of the Participant, (b) by depositing such shares of Stock for the benefit of the Participant with any broker with which the Participant has an account relationship, or (c) by delivering such shares of Stock to the Participant in certificate form.

18.7 **Fractional Shares.** The Company shall not be required to issue fractional shares upon the exercise or settlement of any Award.

18.8 **Retirement and Welfare Plans**. Neither Awards made under this Plan nor shares of Stock or cash paid pursuant to such Awards may be included as "compensation" for purposes of computing the benefits payable to any Participant under any Participating Company's retirement plans (both qualified and non-qualified) or welfare benefit plans unless such other plan expressly provides that such compensation shall be taken into account in computing a Participant's benefit.

18.9 **Beneficiary Designation.** Subject to local laws and procedures, each Participant may file with the Company a written designation of a beneficiary who is to receive any benefit under the Plan to which the Participant is entitled in the event of such Participant's death before he or she receives any or all of such benefit. Each designation will revoke all prior designations by the same Participant, shall be in a form prescribed by the Company, and will be effective only when filed by the Participant in writing with the Company during the Participant's lifetime. If a married Participant designates a beneficiary other than the Participant's spouse, the effectiveness of such designation may be subject to the consent of the Participant's spouse. If a Participant dies without an effective designation of a beneficiary who is living at the time of the Participant's death, the Company will pay any remaining unpaid benefits to the Participant's legal representative.

18.10 **Severability**. If any one or more of the provisions (or any part thereof) of this Plan shall be held invalid, illegal or unenforceable in any respect, such provision shall be modified so as to make it valid, legal and enforceable, and the validity, legality and enforceability of the remaining provisions (or any part thereof) of the Plan shall not in any way be affected or impaired thereby.

18.11 **No Constraint on Corporate Action.** Nothing in this Plan shall be construed to: (a) limit, impair, or otherwise affect the Company's or another Participating Company's right or power to make adjustments, reclassifications, reorganizations, or changes of its capital or business structure, or to merge or consolidate, or dissolve, liquidate, sell, or transfer all or any part of its business or assets; or (b) limit the right or power of the Company or another Participating Company to take any action which such entity deems to be necessary or appropriate.

18.12 **Unfunded Obligation.** Participants shall have the status of general unsecured creditors of the Company. Any amounts payable to Participants pursuant to the Plan shall be considered unfunded and unsecured obligations for all purposes, including, without limitation, Title I of the Employee Retirement Income Security Act of 1974. No Participating Company shall be required to segregate any monies from its general funds, or to create any trusts, or establish any special accounts with respect to such obligations. The Company shall retain at all times beneficial ownership of any investments, including trust investments, which the Company may make to fulfill its payment obligations hereunder. Any investments or the creation or maintenance of any trust or any Participant account shall not create or constitute a trust or fiduciary relationship between the Committee or any Participating Company and a Participant, or otherwise create any vested or beneficial interest in any Participant or the Participant's creditors in any assets of any Participating Company. The Participants shall have no claim against any Participating Company for any changes in the value of any assets which may be invested or reinvested by the Company with respect to the Plan.

18.13 **Choice of Law.** Except to the extent governed by applicable federal law, the validity, interpretation, construction and performance of the Plan and each Award Agreement shall be governed by the laws of the State of California, without regard to its conflict of law rules

IN WITNESS WHEREOF, the undersigned Secretary of the Company certifies that the foregoing sets forth the Molina Healthcare, Inc. 2011 Equity Incentive Plan as duly adopted by the Board.

/s/ Jeff D. Barlow
Corporate Secretary

EXHIBIT 10.9

MOLINA HEALTHCARE, INC.

2011 EMPLOYEE STOCK PURCHASE PLAN

1. Establishment of Plan. Molina Healthcare, Inc., a Delaware corporation (the "Company"), proposes to grant options to purchase shares of the Company's common stock, $0.001 par value per share (the "Common Stock"), to eligible employees of the Company and its Participating Affiliates (as defined below) pursuant to this 2011 Employee Stock Purchase Plan (this "Plan"). For purposes of this Plan, "Parent Corporation" and "Subsidiary Corporation" shall have the same meanings as "parent corporation" and "subsidiary corporation" in Sections 424(e) and 424(f), respectively, of the Internal Revenue Code of 1986, as amended (the "Code"). "Participating Affiliates" are Parent Corporations or Subsidiary Corporations that the Board of Directors of the Company (the "Board") designates from time to time as corporations that shall participate in this Plan. Affiliates may be designated as Participating Affiliates either before or after this Plan is approved by the Company's stockholders as provided in Section 22. The Company intends this Plan to qualify as an "employee stock purchase plan" under Section 423 of the Code (including any amendments to or replacements of such Section), and this Plan shall be so construed. Any term not expressly defined in this Plan but defined for purposes of Section 423 of the Code shall have the same definition herein. A total of three million five hundred thousand (3,500,000) shares of the Common Stock are reserved for issuance under this Plan.

2. Purpose. The purpose of this Plan is to provide eligible employees of the Company and Participating Affiliates with a convenient means of acquiring an equity interest in the Company through payroll deductions, to enhance such employees' sense of participation in the affairs of the Company and Participating Affiliates, and to provide an incentive for continued employment.

3. Administration

(a) This Plan shall be administered by the Compensation Committee of the Board (the "Committee"). Subject to the provisions of this Plan and the limitations of Section 423 of the Code or any successor provision in the Code, all questions of interpretation or application of this Plan shall be determined by the Committee in its sole discretion and its decisions shall be final and binding upon all participants. Members of the Committee shall receive no compensation for their services in connection with the administration of this Plan, other than standard fees as established from time to time by the Board for services rendered by Board members serving on Board committees. All expenses incurred in connection with the administration of this Plan shall be paid by the Company.

(b) The Committee may, from time to time, consistent with this Plan and the requirements of Section 423 of the Code, establish, change or terminate such rules, guidelines,

policies, procedures, limitations, or adjustments as deemed advisable by the Company, in its sole discretion, for the proper administration of this Plan, including, without limitation: (a) a minimum payroll deduction amount required for participation in an Offering Period, (b) a limitation on the frequency or number of changes permitted in the rate of payroll deduction during an Offering Period, (c) a payroll deduction greater or less than the amount designated by a participant in order to adjust for the Company's delay or mistake in processing an Enrollment Form or in otherwise effecting a participant's election under this Plan or as advisable to comply with the requirements of Section 423 of the Code, (d) determination of the date and manner by which the Fair Market Value of the Common Stock is determined for purposes of administration of this Plan, (e) delegate responsibility for Plan operation, management and administration, subject to the Committee's oversight and control, on such terms as the Committee may establish, and (f) delegate to other persons the responsibility for performing appropriate functions as necessary, desirable or appropriate to further the purposes of this Plan.

4. Eligibility. Any individual employed by the Company or the Participating Affiliates on the "Offering Date" of an "Offering Period" (each as defined in Section 5 below) is eligible to participate in such Offering Period except the following:

(a) employees who are customarily employed for less than (20) hours per week; and

(b) employees who, together with any other person whose stock would be attributed to such employee pursuant to Section 424(d) of the Code, own stock or hold options to purchase stock possessing five percent (5%) or more of the total combined voting power or value of all classes of stock of the Company or any of its Participating Affiliates or who, as a result of being granted an option under this Plan with respect to such Offering Period, would own stock or hold options to purchase stock possessing five percent (5%) or more of the total combined power or value of all classes of stock of the Company or any of its Participating Affiliates; and

(c) individuals who provide services to the Company or any of its Participating Affiliates as independent contractors who are reclassified as common law employees for any reason except for federal income and employment tax purposes.

5. Offering Periods. The offering periods of this Plan (each, an "Offering Period") shall be of six (6) months duration commencing on January 1 and July 1 of the Company's fiscal year. The first day of each Offering Period is referred to as the "Offering Date." The last day of each Offering Period is referred to as the "Purchase Date." The Committee shall have the power to change the Offering Dates or Purchase Dates and the duration of Offering Periods without stockholder approval if such change is announced prior to the start of the relevant Offering Period, or prior to such other time period as specified by the Committee; provided, however, that no Offering Period may have a duration exceeding twenty-seven (27) months. If the first or last day of an Offering Period is not a day on which the New York Stock Exchange is open for trading, the Company shall specify the trading day that will be deemed the first or last day, as the case may be, of the Offering Period.

6. Participation in this Plan. An employee may participate during an Offering Period on the first Offering Date after such employee satisfies the eligibility requirements set forth in Section 4 above and delivers an appropriate enrollment form (the "Enrollment Form") to the Company prior to such Offering Date, or such other time period as specified by the Committee. Notwithstanding the foregoing, the Committee may set a later time for filing the Enrollment Form authorizing payroll deductions for all eligible employees with respect to a given Offering Period. An eligible employee who does not timely deliver an Enrollment Form to the Company after becoming eligible to participate in such Offering Period shall not participate in that Offering Period or any subsequent Offering Period until filing an Enrollment Form with the Company prior to the applicable Offering Date, or such other time period as specified by the Committee. Once an employee becomes a participant in an Offering Period, such employee will automatically participate in the Offering Period commencing immediately following the last day of the prior Offering Period unless the employee withdraws or is deemed to withdraw from this Plan or terminates further participation in the Offering Period as set forth in Section 11 below. A participant who has not otherwise withdrawn from this Plan under Section 11 is not required to file any additional Enrollment Form in order to continue participation in this Plan. However a participant may deliver a new Enrollment Form for a subsequent Offering Period in accordance with applicable rules and procedures if the participant wishes to change any of the elections contained in the participant's then effective Enrollment Form.

7. Grant of Option on Enrollment. Enrollment by an eligible employee in an Offering Period under this Plan will constitute the grant (as of the Offering Date for such Offering Period) by the Company to such employee of an option to purchase on the Purchase Date up to that number of shares of Common Stock of the Company determined by dividing (a) the amount accumulated in such employee's payroll deduction account during such Offering Period by (b) the Per Share Purchase Price as determined pursuant to Section 8 below (but in no event less than the par value of a share of Company's Common Stock), provided, however, that the number of shares of the Company's Common Stock subject to any option granted pursuant to this Plan shall not exceed the maximum number of shares which may be purchased pursuant to Section 10 below with respect to the applicable Purchase Date. The Fair Market Value of a share of the Company's Common Stock shall be determined as provided in Section 8 below.

8. Purchase Price. The purchase price per share ("Per Share Purchase Price") at which a share of Common Stock will be sold in any Offering Period shall be eighty-five percent (85%) of the lesser of:

(a) The Fair Market Value on the Offering Date; or

(b) The Fair Market Value on the Purchase Date.

For purposes of this Plan, the term "Fair Market Value" of the Common Stock on any given date means (i) the last reported closing price for a share of Stock on the New York Stock Exchange or, (ii) in the absence of reported sales on the New York Stock Exchange on a given date, the closing price of the New York Stock Exchange on the last date on which

a sale occurred prior to such date; or (iii) if the stock is no longer publicly traded on the New York Stock Exchange, the Committee in good faith shall determine Fair Market Value; provided that, if the date for which the Fair Market Value is determined is the first day when trading prices for the Stock are reported on the New York Stock Exchange, the Fair Market Value shall be the public offering price set forth on the cover page for the final prospectus relating to the Company's Initial Public Offering.

9. Payment of Purchase Price; Changes in Payroll Deductions; Issuance of Shares .

(a) The purchase price of the shares shall be accumulated by regular payroll deductions made during each Offering Period. The deductions are made as a percentage of the participant's Compensation in one percent (1%) increments not less than one percent (1%) (except as a result of an election pursuant to Section 9(c) to stop payroll deductions during an Offering Period), nor greater than fifteen percent (15%) or such lower limit set by the Committee. "Compensation" shall mean all W-2 cash compensation, including base salary, wages, commissions, overtime, shift premiums and bonuses, provided, however, that for purposes of determining a participant's compensation, any election by such participant to reduce his or her regular cash remuneration under Sections 125 or 401(k) of the Code shall be treated as if the participant did not make such election. Notwithstanding the foregoing, Compensation shall not include reimbursements of expenses, allowances, long-term disability, workers' compensation or any amount deemed received without the actual transfer of cash or any amounts directly or indirectly paid pursuant to this Plan or any other stock purchase or stock option plan, or any other compensation not included above. Payroll deductions shall commence on the first payday of the Offering Period and shall continue to the end of the Offering Period unless sooner altered or terminated as provided in this Plan.

(b) A participant may increase or decrease the rate of payroll deductions during an Offering Period by providing to the Company a new Enrollment Form, in which case the new rate shall become effective for the next payroll period commencing after the Company's receipt of the Enrollment Form and shall continue for the remainder of the Offering Period unless changed as described below. Such change in the rate of payroll deductions may be made at any time during an Offering Period, but not more than one (1) increase and one (1) decrease in the rate of payroll deductions may be made during any Offering Period. A participant may increase or decrease the rate of payroll deductions for any subsequent Offering Period by filing with the Company a new Enrollment Form prior to the beginning of such Offering Period, or prior to such other time period as specified by the Committee. Any changes to the rate of payroll deductions during an Offering Period which are received by the Company after the commencement of the enrollment period for a new Offering Period will be made by the Company at its discretion, only to the extent such changes are administratively possible.

(c) A participant may reduce his or her payroll deduction percentage to zero during an Offering Period by providing to the Company a revised Enrollment Form. Such reduction shall be effective beginning with the next payroll period after the Company's receipt of the request and no further payroll deductions will be made for the duration of the Offering Period. Payroll deductions credited to the participant's account prior to the effective date of

the request shall be used to purchase shares of Common Stock in accordance with Section (e) below. Notwithstanding Section 9(b), a participant may not resume making payroll deductions during the Offering Period in which he or she reduced his or her payroll deductions to zero. Any reduction to a participant's payroll deduction percentage to zero during an Offering Period which is received by the Company after the commencement of the enrollment period for a new Offering Period will be made by the Company at its discretion, only to the extent such changes are administratively possible.

(d) All payroll deductions made for a participant are credited to his or her account under this Plan and are deposited with the general funds of the Company. No interest accrues on the payroll deductions. All payroll deductions received or held by the Company may be used by the Company for any corporate purpose, and the Company shall not be obligated to segregate such payroll deductions.

(e) On each Purchase Date, so long as this Plan remains in effect and provided that the participant has not submitted a revised Enrollment Form withdrawing from this Plan before such Purchase Date in accordance with Section 11, the Company shall apply the funds then in the participant's account (or, if applicable, the lump sum cash payment received from the participant) to the purchase of whole shares of Common Stock reserved under the option granted to such participant with respect to the Offering Period to the extent that such option is exercisable on the Purchase Date. The Per Share Purchase Price shall be as specified in Section 8. Any cash remaining in such participant's account on a Purchase Date which is less than the amount necessary to purchase a full share of Common Stock of the Company shall be carried forward, without interest, into the next Offering Period. If this Plan has been oversubscribed, all funds not used to purchase shares on the Purchase Date shall be returned to the participant, without interest. No Common Stock shall be purchased on a Purchase Date on behalf of any employee whose participation in this Plan has terminated prior to such Purchase Date.

(f) As promptly as practicable after the Purchase Date, the Company shall issue shares for the participant's benefit representing the shares purchased upon exercise of his or her option, subject to compliance with Section 24 below.

(g) During a participant's lifetime, his or her option to purchase shares hereunder is exercisable only by him or her. The participant will have no interest or voting right in shares covered by his or her option until such option has been exercised.

1. Limitations on Shares to be Purchased.

(a) No participant shall be entitled to purchase Common Stock under this Plan at a rate which, when aggregated with his or her rights to purchase stock under all other employee stock purchase plans of the Company or any Parent Corporation or Subsidiary Corporation, exceeds $25,000 in Fair Market Value, determined as of the Offering Date (or such other limit as may be imposed by the Code) for each calendar year in which the employee participates in this Plan. The Company shall automatically suspend the payroll deductions of any participant as necessary to enforce such limit; provided that when the Company

automatically resumes such payroll deductions, the Company must apply the rate in effect immediately prior to such suspension.

(b) No participant shall be entitled to purchase more than the Maximum Share Amount (as defined below) on any single Purchase Date. Prior to the commencement of any Offering Period or before such time period as specified by the Committee, the Committee may, in its sole discretion, set a maximum number of shares which may be purchased by any employee at any single Purchase Date (the "Maximum Share Amount"). Until otherwise determined by the Committee, there shall be no Maximum Share Amount. If a new Maximum Share Amount is set, then all participants must be notified of such Maximum Share Amount before commencing the next Offering Period. The Maximum Share Amount shall continue to apply with respect to all succeeding Purchase Dates and Offering Periods unless revised by the Committee as set forth above.

(c) If the number of shares to be purchased on a Purchase Date by all employees participating in this Plan exceeds the number of shares then available for issuance under this Plan, then the Company will make a pro rata allocation of the remaining shares in as uniform a manner as shall be reasonably practicable and as the Committee shall determine to be equitable.

(d) Any payroll deductions accumulated in a participant's account which are not used to purchase stock due to the limitations in this Section 10 shall be returned to the participant as soon as practicable after the end of the applicable Offering Period, without interest, provided that, any amount remaining in such participant's account which is less than the amount necessary to purchase a full share of Common Stock of the Company shall be carried forward, without interest, into the next Offering Period or Offering Period.

2. Withdrawal.

(a) Each participant may withdraw from an Offering Period under this Plan by signing and delivering to the Company a revised Enrollment Form indicating such participant's intention to withdraw. Such withdrawal may be elected at any time prior to the end of an Offering Period, or such other time period as specified by the Committee.

(b) Upon withdrawal from this Plan, the accumulated payroll deductions shall be returned to the withdrawn participant, without interest, and his or her interest in this Plan shall terminate. If a participant voluntarily elects to withdraw from this Plan, he or she may not resume his or her participation in this Plan during the same Offering Period, but he or she may participate in any Offering Period under this Plan commencing after such withdrawal by filing a new authorization for payroll deductions in the same manner as set forth in Section 6 above for initial participation in this Plan.

3. Termination of Employment. Termination of a participant's employment for any reason, including retirement, death or the failure of a participant to remain an eligible employee of the Company or of a Participating Affiliate, immediately terminates his or her participation in this Plan. In such event, the payroll deductions credited to the participant's account will

be returned to him or her or, in the case of his or her death, to his or her legal representative, without interest. For purposes of this Section 12, an employee will not be deemed to have terminated employment or failed to remain in the continuous employ of the Company or of a Participating Affiliate in the case of sick leave, military leave, or any other leave of absence approved by the Board; provided that such leave is for a period of not more than ninety (90) days or reemployment upon the expiration of such leave is guaranteed by contract or statute.

4. Return of Payroll Deductions. If a participant's interest in this Plan is terminated by withdrawal, termination of employment or otherwise, or if this Plan is terminated by the Board, the Company shall deliver to the participant all payroll deductions credited to such participant's account. No interest shall accrue on the payroll deductions of a participant in this Plan.

5. Capital Changes. Subject to any required action by the stockholders of the Company, the number of shares of Common Stock covered by each option under this Plan which has not yet been exercised and the number of shares of Common Stock which have been authorized for issuance under this Plan but have not yet been placed under option (collectively, the " Reserves"), as well as the price per share of Common Stock covered by each option under this Plan which has not yet been exercised, shall be proportionately adjusted for any increase or decrease in the number of issued and outstanding shares of Common Stock resulting from a stock split or the payment of a stock dividend (but only on the Common Stock) or any other increase or decrease in the number of issued and outstanding shares of Common Stock effected without receipt of any consideration by the Company; provided, however, that conversion of any convertible securities of the Company shall not be deemed to have been "effected without receipt of consideration". Notwithstanding the foregoing, any fractional shares resulting from an adjustment pursuant to this Section 14 shall be rounded down to the nearest whole number, and in no event may the Per Share Purchase Price be decreased to an amount less than the par value, if any, of the Common Stock. Such adjustment shall be made by the Committee, whose determination shall be final, binding and conclusive.

In the event of the proposed dissolution or liquidation of the Company, the Offering Period will terminate immediately prior to the consummation of such proposed action, unless otherwise provided by the Committee. The Committee may, in its sole discretion in such instances, declare that this Plan shall terminate as of a date fixed by the Committee and either give each participant the right to purchase shares under this Plan prior to such termination or return all accumulated payroll deductions to each participant, without interest. In the event of (i) a merger or consolidation in which the Company is not the surviving corporation (other than a merger or consolidation with a wholly-owned subsidiary, a reincorporation of the Company in a different jurisdiction, or other transaction in which there is no substantial change in the stockholders of the Company or their relative stock holdings, provided that the options under this Plan are assumed, converted or replaced by the successor corporation, which assumption will be binding on all participants), (ii) a merger in which the Company is the surviving corporation but after which the stockholders of the Company immediately prior to such merger (other than any stockholder that merges, or which owns or controls another corporation that merges, with the Company in such merger) cease to own

their shares or other equity interest in the Company, (iii) the sale of all or substantially all of the assets of the Company or (iv) the acquisition, sale, or transfer of more than 50% of the outstanding shares of the Company by tender offer or similar transaction, (each a "Sale Event") the Company shall apply the funds contributed under this Plan to the purchase of shares of Common Stock pursuant to the provisions of Section 9 immediately prior to the effective date of such Sale Event. Notwithstanding the foregoing, the surviving, continuing, successor or purchasing corporation or parent corporation thereof (the " Acquiring Corporation"), may elect to assume the Company's rights and obligations under this Plan and, in that event, there shall be no purchase before the end of the Offering Period in which the Sale Event occurs.

The Committee may, if it so determines in its sole discretion, also make provision for adjusting the share reserve set forth in Section 1, as well as the price per share of Common Stock covered by each outstanding option, solely in the event that the Company effects one or more reorganizations, recapitalizations, rights offerings or other increases or reductions of shares of its outstanding Common Stock, or in the event of the Company being consolidated with or merged into any other corporation.

6. Withholding. The participant shall make adequate provision for the foreign, federal, state and local tax withholding obligations of the Company or any of its Participating Affiliates, if any, which arise in connection with participation in this Plan. The Company and its Participating Affiliates shall, to the extent permitted by law, have the right to deduct any such taxes from any payment of any kind otherwise due to the participant.

7. Nonassignability. Neither payroll deductions credited to a participant's account nor any rights with regard to the exercise of an option or to receive shares under this Plan may be assigned, transferred, pledged or otherwise disposed of in any way (other than by will, the laws of descent and distribution or as provided in Section 23 below) by the participant. Any such attempt at assignment, transfer, pledge or other disposition shall be void and without effect.

8. Reports. Individual accounts will be maintained for each participant in this Plan. Each participant shall receive as soon as practicable after the end of each Offering Period a report of his or her account setting forth the total payroll deductions accumulated, the number of shares purchased, the per share price thereof and the remaining cash balance, if any, carried forward to the next Offering Period.

9. Notice of Disqualifying Disposition. Each participant shall notify the Company in writing if the participant disposes of any of the shares purchased in any Offering Period pursuant to this Plan if such disposition occurs within two (2) years from the Offering Date or within one (1) year from the Purchase Date on which such shares were purchased (the " Notice Period"). The Company may, at any time during the Notice Period, place a legend or legends on any certificate representing shares acquired pursuant to this Plan requesting the Company's transfer agent to notify the Company of any transfer of the shares. The obligation of the participant to provide such notice shall continue notwithstanding the placement of any such legend on the certificates.

10. No Rights as Stockholder or to Continued Employment. A participant shall have no rights as a stockholder by virtue of participation in this Plan until the date of the issuance of a certificate for the shares purchased pursuant to the exercise of the participant's purchase right (as evidenced by the appropriate entry on the books of the Company or of a duly authorized transfer agent of the Company). No adjustment shall be made for dividends, distributions or other rights for which the record date is prior to the date such certificate is issued, except as provided in Section 14. Neither this Plan nor the grant of any option hereunder shall confer any right on any employee to remain in the employ of the Company or any Participating Affiliate, or restrict the right of the Company or any Participating Affiliate to terminate such employee's employment at any time.

11. Equal Rights and Privileges. All eligible employees shall have equal rights and privileges with respect to this Plan so that this Plan qualifies as an "employee stock purchase plan" within the meaning of Section 423 or any successor provision of the Code and the related regulations. Any provision of this Plan which is inconsistent with Section 423 or any successor provision of the Code shall, without further act or amendment by the Company, the Committee or the Board, be reformed to comply with the requirements of Section 423. This Section 20 shall take precedence over all other provisions in this Plan.

12. Notices. All notices or other communications by a participant to the Company under or in connection with this Plan shall be deemed to have been duly given when received in the form specified by the Company at the location, or by the person, designated by the Company for the receipt thereof.

13. Term; Stockholder Approval. This Plan was adopted by the Board of Directors of the Company on March 18, 2011, effective as of July 1, 2011 (the "Effective Date"), and shall apply to any purchase right granted, or stock transferred pursuant to any purchase right granted, on or after the Effective Date. This Plan shall continue until the earlier to occur of (a) termination of this Plan by the Board (which termination may be effected by the Board at any time), (b) issuance of all of the shares of Common Stock reserved for issuance under this Plan, or (c) April 27, 2021.

14. Designation of Beneficiary

(a) A participant may file a written designation of a beneficiary who is to receive any shares and cash, if any, from the participant's account under this Plan in the event of such participant's death subsequent to the end of any Offering Period but prior to delivery to him of such shares and cash. In addition, a participant may file a written designation of a beneficiary who is to receive any cash from the participant's account under this Plan in the event of such participant's death prior to a Purchase Date.

(b) Such designation of beneficiary may be changed by the participant at any time by written notice. In the event of the death of a participant and in the absence of a beneficiary validly designated under this Plan who is living at the time of such participant's death, the Company shall deliver such shares or cash to the executor or administrator of the estate of the participant, or if no such executor or administrator has been appointed (to the

knowledge of the Company), the Company, in its discretion, may deliver such shares or cash to the spouse or to any one or more dependents or relatives of the participant, or if no spouse, dependent or relative is known to the Company, then to such other person as the Company may designate.

15. Conditions Upon Issuance of Shares; Limitation on Sale of Shares . Shares shall not be issued with respect to an option unless the exercise of such option and the issuance and delivery of such shares pursuant thereto shall comply with all applicable provisions of law, domestic or foreign, including, without limitation, the Securities Act of 1933, as amended, the Securities Exchange Act of 1934, as amended, the rules and regulations promulgated thereunder, and the requirements of any stock exchange or automated quotation system upon which the shares may then be listed, and shall be further subject to the approval of counsel for the Company with respect to such compliance.

16. Applicable Law. This Plan shall be governed by the substantive laws (excluding the conflict of laws rules) of the State of California.

17. Amendment or Termination of this Plan. The Board may at any time amend, terminate or extend the term of this Plan, except that (i) any such termination cannot affect options previously granted under this Plan unless the Board determines that the termination of this Plan immediately following any Purchase Date is in the best interests of the Company and its stockholders, (ii) any amendment may not adversely affect the previously granted purchase right of any participant unless permitted by this Plan or as may be necessary to qualify this Plan as an employee stock purchase plan pursuant to Section 423 of the Code or to obtain qualification or registration of the Common Stock under applicable federal, state or foreign securities laws, and (iii) any amendment must be approved by the stockholders of the Company in accordance with Section 2 above within twelve (12) months of the adoption of such amendment (or earlier if required by Section 22) if such amendment would:

(a) increase the number of shares that may be issued under this Plan;

(b) change the designation of the employees (or class of employees) eligible for participation in this Plan; or

(c) any other action taken by the Board that, by its terms, is contingent on stockholder approval.

Notwithstanding the foregoing, the Board may make such amendments to this Plan as the Board determines to be advisable, if the continuation of this Plan or any Offering Period would result in financial accounting treatment for this Plan that is different from the financial accounting treatment in effect on the Effective Date.

SECTION 302 CERTIFICATION

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed this annual report on Form 10-K for the fiscal year ended December 31, 2013, of Molina Healthcare, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

EXHIBIT 31.2

SECTION 302 CERTIFICATION

I, John C. Molina, certify that:

1. I have reviewed this annual report on Form 10-K for the fiscal year ended December 31, 2013, of Molina Healthcare, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
September 30, 2013

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Illinois, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of September 30, 2013, these health plans served approximately 1.9 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of primary care community clinics in California, Florida, New Mexico, and Washington.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new request for proposals (RFP) open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

Market Updates - Health Plans Segment

California Health Plan Tentative Rate Settlement Agreement. In the third quarter of 2013, our California health plan reached a tentative settlement agreement with the California Department of Health Care Services (DHCS), conditioned on final government approvals. The tentative settlement agreement settles rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in California's Medicaid program, or Medi-Cal.

Under the terms of the tentative settlement agreement, DHCS has agreed to extend each of the California health plan's existing Medi-Cal managed care contracts for an additional five years, including its contracts in San Diego, San Bernardino, Riverside, and Sacramento counties. In addition, effective January 1, 2014, the settlement establishes a settlement account applicable to the California health plan's Medi-Cal, Seniors and Persons with Disabilities, and the dual eligibles pilot programs. The settlement account will be established with an initial balance of zero, and will be adjusted annually to reflect a calendar year deficit or surplus. A deficit or surplus will result to the extent the plan's pre-tax margin is below or above a specified percentage, subject to further adjustment as specified in the settlement agreement. Cash settlement will occur after December 31, 2017. DHCS will make an interim partial settlement payment to us if it terminates early, without replacement, any of our Medi-Cal managed care contracts. Upon expiration of the settlement agreement, if the settlement account is in a deficit position, then DHCS will pay the amount of the deficit to us, subject to an alternative minimum payment amount. If the settlement account is in a surplus position, then no amount is owed to either party. The maximum amount that DHCS would pay to us under the terms of the settlement agreement is limited. See Note 18, "Subsequent Events," for further information.

We do not expect the tentative settlement agreement to impact our consolidated financial condition, cash flows, or results of operations for the year ending December 31, 2013.

Florida. On October 23, 2013, our Florida health plan and the Florida Agency for Health Care Administration (AHCA), agreed to a settlement under which our health plan will be awarded three contracts under the Florida Statewide Medicaid Managed Care Managed Medical Assistance Invitation to Negotiate. The three contracts are expected to commence in the second or third quarter of 2014.

On February 14, 2013, we announced that AHCA awarded our Florida health plan contracts in three regions under the Statewide Medicaid Managed Care Long-Term Care Program. As a result of the awards, we will now enter into a comprehensive pre-contracting assessment, with the program currently scheduled to commence on December 1, 2013. Under the program, we will provide long-term care benefits, including institutional and home and community-based services.

New Mexico. On August 1, 2013, our New Mexico health plan closed on its acquisition of the Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program, under which Lovelace's Medicaid members became Molina Healthcare Medicaid members and now receive their Medicaid managed services and benefits from our New Mexico health plan. Additionally, in the coming months we expect to add membership currently covered under New Mexico's State Coverage Insurance (SCI) program with Lovelace. See Note 4, "Business Combinations," for further information.

On February 11, 2013, we announced that our New Mexico health plan was selected by the New Mexico Human Services Department (HSD) to participate in the new Centennial Care program. In addition to continuing to provide physical and acute health care services, under the new program our New Mexico health plan will expand its services to provide behavioral health and long-term care services. The selection of our New Mexico health plan was made by HSD pursuant to its RFP issued in August 2012. The operational start date for the program is currently scheduled for January 2014.

South Carolina. On July 26, 2013, we entered into an agreement with Community Health Solutions of America, Inc. (CHS) to acquire certain assets, including the rights to convert certain of CHS' Medicaid members who will be covered by South Carolina's full-risk Medicaid managed care program. See Note 4, "Business Combinations," for further information.

Market Updates - Molina Medicaid Solutions Segment

U.S. Virgin Islands and West Virginia. In 2012, Molina Medicaid Solutions of West Virginia secured a historic partnership with the United States Virgin Islands (USVI). The partnership involves processing the USVI's Medicaid claims using West Virginia's certified Medicaid management information system. On August 1, 2013 the system went live, marking the first MMIS for a U.S. Territory, and the first to be shared between two government agencies on a single business processing platform.

Louisiana. In 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intended to award the contract for a replacement MMIS to a different vendor, CNSI. However, in March 2013, the state of Louisiana cancelled its contract award to CNSI. CNSI is currently challenging the contract cancellation. The state has informed us that we will continue to perform under our current contract until a successor is named. At such time as a new RFP may be issued, we intend to respond to the state's RFP. For the nine months ended September 30, 2013, our revenue under the Louisiana MMIS contract was approximately $31.1 million, or 20.7% of total service revenue. So long as our Louisiana MMIS contract continues, we expect to recognize approximately $40.0 million of service revenue annually under this contract.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2013.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2012. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2012 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2012 audited consolidated financial statements.

Presentation and Reclassifications

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal on June 30, 2012. Effective June 30, 2013 the transition obligations associated with that contract terminated. Therefore, we have reclassified the results relating to the Missouri health plan to discontinued operations for all periods presented. These results are presented in a single line item, net of taxes, in the unaudited consolidated statements of operations. Additionally, we abandoned our equity interests in the Missouri health plan during the second quarter of 2013, resulting in the recognition of a tax benefit of

approximately $9.5 million, which is also included in discontinued operations in the unaudited consolidated statements of operations. The Missouri health plan's revenues amounted to $0.2 million and $113.8 million for the nine months ended September 30, 2013 and 2012, respectively.

We have reclassified certain amounts in the 2012 consolidated balance sheet, and statements of operations and cash flows to conform to the 2013 presentation, including the presentation of premium tax receipts as a separate line item in the consolidated statements of operations.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

(1) Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract: These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates), our revenue earned for those periods will also change. In all of these instances, our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn would lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of approximately $0.8 million and $0.3 million at September 30, 2013 and December 31, 2012, respectively.

Florida Health Plan Medical Cost Floor (Minimum): A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs (in all counties except Broward). A similar minimum expenditure is required for total health care costs in Broward county only. At both September 30, 2013 and December 31, 2012, we had not recorded any liability under the terms of these contract provisions.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): Our contract with the state of New Mexico directs that a portion of premiums received may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit, as defined in the contract, exceed certain amounts. At both September 30, 2013 and December 31, 2012, we had not recorded any liability under the terms of these contract provisions.

Ohio Health Plan Medical Cost Floors (Minimums): Sanctions may be levied by the state if certain minimum amounts are not spent on defined medical care costs. These sanctions include the requirements to file a corrective action plan as well as an enrollment freeze.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $2.2 million and $3.2 million pursuant to our profit-sharing agreement with the state of Texas at September 30, 2013 and December 31, 2012, respectively.

Washington Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our Washington health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At

September 30, 2013, we recorded a liability under the terms of these contract provisions of approximately $0.3 million. At December 31, 2012, we had not recorded any liability under the terms of this contract provision.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services (CMS), our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $18.4 million and $0.3 million as of September 30, 2013 and December 31, 2012, respectively for anticipated Medicare risk adjustment premiums.

(2) Quality incentives that allow us to recognize incremental revenue if certain quality standards are met: These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, incremental revenue of up to 3.25% of total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of September 30, 2013 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of September 30,

2013.

	Three Months Ended September 30, 2013

Taxes Based on Premiums

Certain of our health plans are assessed a tax based on premium revenue collected. The premium revenues we receive from these states include the premium tax assessment. We have reported these taxes on a gross basis, included in premium tax

receipts (within revenue), and premium tax expense (within expenses), in the consolidated statements of operations. Prior to the third quarter of 2013, premium tax receipts were included in premium revenue. The presentation change affected only premium revenue amounts previously reported, by reducing premium revenue for the amount now included in premium tax receipts. There is no effect on income from continuing operations, net income, or per-share amounts. This change was made to more clearly present the portion of premium revenue not available in the general operations of our health plans. All prior periods presented have been adjusted to conform to this presentation.

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid management information system (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. While providing BPO services (which include claims payment and eligibility processing), we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements.

Additionally, we evaluate each required deliverable under our multiple-element service arrangements to determine whether it qualifies as a separate unit of accounting. Such evaluation is generally based on whether the deliverable has standalone value to the customer. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and

- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In

those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software-related costs and other costs. With respect to software-related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs;
- Employee costs incurred in performing transaction services;
- Vendor costs incurred in performing transaction services;
- Costs incurred in performing required monitoring of and reporting on contract performance;
- Costs incurred in maintaining and processing member and provider eligibility; and
- Costs incurred in communicating with members and providers.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes and non-deductible compensation under a provision of the Affordable Care Act that limits deductions claimed by health insurers on compensation earned after December 31, 2009 that is paid after December 31, 2012. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $12.5 million and $10.6 million as of September 30, 2013 and December 31, 2012, respectively. Approximately $10.5 million and $8.4 million of the unrecognized tax benefits recorded at September 30, 2013 and December 31, 2012, respectively, relate to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $8.6 million and $7.4 million as of September 30, 2013 and December 31, 2012, respectively. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $10.7 million due to the expiration of statute of limitations and the resolution to the state refund claim described above.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of September 30, 2013 and December 31, 2012, we had accrued $67,000 and $56,000, respectively, for the payment of interest and penalties.

Recent Accounting Pronouncements

Income Taxes. In July 2013, the Financial Accounting Standards Board (FASB) issued guidance for the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The

new guidance states that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. To the extent one of these items is not available at the reporting date; the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The new guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013, with early adoption permitted. The new guidance should be applied prospectively to all unrecognized tax benefits that exist at the effective date, with retrospective application permitted. We do not expect the adoption of this new guidance to have a material impact on our consolidated financial position, results of operations or cash flows.

Reclassifications Out of Accumulated Other Comprehensive Income. In February 2013, the FASB issued guidance for the reporting of amounts reclassified out of accumulated other comprehensive income. The new guidance requires entities to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. generally accepted accounting principles (GAAP) to be reclassified in its entirety to net income. The new guidance does not change the current requirements for reporting net income or other comprehensive income in financial statements and is effective prospectively for reporting periods beginning after December 15, 2012. The adoption of this new guidance in 2013 did not impact our consolidated financial position, results of operations or cash flows.

Balance Sheet Offsetting. In December 2011, the FASB issued guidance for new disclosure requirements related to the nature of an entity's rights of set-off and related arrangements associated with its financial instruments and derivative instruments. The new guidance is effective for annual reporting periods, and interim periods within those years, beginning on or after January 1, 2013. The adoption of this new guidance in 2013 did not impact our consolidated financial position, results of operations or cash flows.

Federal Premium-Based Assessment. In July 2011, the FASB issued guidance related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (ACA). The ACA imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. The fee will be imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year.

The new guidance specifies that the liability for the fee should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. The new guidance is effective for annual reporting periods beginning after December 31, 2013, when the fee initially becomes effective. As enacted, this federal premium-based assessment is non-deductible for income tax purposes, and is anticipated to be significant. It is yet undetermined how this premium-based assessment will be factored into the calculation of our premium rates, if at all. Accordingly, adoption of this guidance and the enactment of this assessment as currently written is expected to have a material impact on our financial position, results of operations, and cash flows in future periods. We estimate that the fee in 2014 will be approximately $100.0 million.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants (AICPA), and the Securities and Exchange Commission (SEC) did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
	(In thousands)			
Shares outstanding at the beginning of the period	45,683	46,527	46,762	45,815
Weighted-average number of shares repurchased	—	—	(1,375)	—
Weighted-average number of shares issued	16	19	321	486
Denominator for basic net income (loss) per share	45,699	46,546	45,708	46,301
Dilutive effect of employee stock options and stock grants (1)	453	334	532	—
Dilutive effect of convertible senior notes	910	—	527	—
Denominator for diluted net income (loss) per share (2)	47,062	46,880	46,767	46,301

(1) Unvested restricted shares are included in the calculation of diluted net income per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. Options to purchase common shares are included in the calculation of diluted net income per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three and nine months ended September 30, 2013 there were no anti-dilutive weighted restricted shares. For the three and nine months ended September 30, 2013 there were approximately 60,000 and 48,600 anti-dilutive weighted options, respectively. For the three months ended September 30, 2012, there were approximately 370,000 anti-dilutive weighted restricted shares and 125,000 anti-dilutive weighted options. Potentially dilutive unvested restricted shares and stock options were not included in the computation of diluted loss per share for the nine months ended September 30, 2012, because to do so would have been anti-dilutive.

(2) Potentially dilutive shares issuable pursuant to our 1.125% Warrants (defined in Note 11, "Long-Term Debt") were not included in the computation of diluted income per share for the three and nine month period ended September 30, 2013, because to do so would have been anti-dilutive. Potentially dilutive shares issuable pursuant to our 3.75% Notes (defined in Note 11, "Long-Term Debt") were not included in the computation of diluted loss per share for the three and nine month period ended September 30, 2012, because to do so would have been anti-dilutive.

4. Business Combinations

Health Plans Segment

South Carolina. On July 26, 2013, we entered into an agreement with Community Health Solutions of America, Inc. (CHS) to acquire certain assets, including the rights to convert certain of CHS' Medicaid members who will be covered by South Carolina's full-risk Medicaid managed care program, consistent with our stated strategy to enter new markets. The conversion of such members is contingent on our successful receipt of an HMO license from the South Carolina Department of Insurance, the award to Molina Healthcare of a full-risk Medicaid managed care contract by the South Carolina Department of Health and Human Services, and the state's conversion to a full-risk Medicaid managed care program. Each of these three conditions is expected to be satisfied by January 2014. In connection with the agreement, we paid CHS $7.5 million on the closing date. We currently expect to convert approximately 130,000 members under the agreement, for a total estimated discounted purchase price of $65.0 million. The final purchase price will be settled when the member conversion has been completed.

Because the number of members we will ultimately convert was unknown as of the July 26, 2013 acquisition date, $57.5 million of the purchase price represents contingent consideration for the number of members we expect to enroll in our health plan as a result of the conversion. The contingent consideration liability will be remeasured to fair value at each quarter until the contingency is resolved, with adjustments, if any, recorded to operations. The undiscounted amount we could be required to pay under this contingent consideration arrangement ranges from $7.5 million (which we paid on the closing date) to approximately $70 million. We expect most of the contingent consideration liability to be settled in the second quarter of 2014.

We recorded $42.1 million in goodwill, which relates to future economic benefits arising from expected synergies achieved in the transaction. Such synergies include use of our existing infrastructure to support our health plan operations in South Carolina. We also recorded $22.9 million in intangible assets, as indicated in the table below. Accumulated amortization was immaterial as of September 30, 2013. We expect to record amortization of approximately $1.9 million per year in the years 2014 through 2018.

New Mexico. Consistent with our stated strategy to expand within existing markets, on August 1, 2013, our New Mexico health plan closed on its acquisition of the Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program, under which Lovelace's Medicaid members became Molina Healthcare Medicaid members and now receive their Medicaid managed services and benefits from our New Mexico health plan. As part of this acquisition, we also expect to add membership currently covered under New Mexico's State Coverage Insurance (SCI) program with Lovelace in the near future. Effective January 1, 2014, members in this program will ultimately be a) enrolled in the Centennial Care program as Medicaid members, or b) eligible to enroll in New Mexico's health insurance marketplace. All members transferred from Lovelace will be able to continue with Molina Healthcare as the state transitions to the Centennial Care program. We expect the final purchase price for the acquisition to amount to approximately $53.5 million, of which $47.2 million was paid on the closing date. As of September 30, 2013, the New Mexico health plan's membership increased by approximately 80,000 members as a result of this transaction.

Because the number of SCI members we will ultimately retain was unknown as of the August 1, 2013 acquisition date, $2.4 million of contingent consideration was recorded for this SCI membership as of September 30, 2013. We believe the contingent consideration amount may decrease as we learn more about how many SCI members we will retain, but is unlikely to increase. The contingent consideration liability will be remeasured to fair value at each quarter until the contingency is resolved, with adjustments, if any, recorded to operations. We expect that the contingency will be settled in the second quarter of 2014.

We recorded $35.2 million in goodwill, which relates to future economic benefits arising from expected synergies achieved in the transaction. Such synergies include use of our existing infrastructure to support the added membership. We also recorded $18.3 million in intangible assets, as indicated in the table below. Accumulated amortization was immaterial as of September 30, 2013. We expect to record amortization of approximately $1.8 million per year in the years 2014 through 2018.

Florida. On June 30, 2013, our Florida health plan acquired assets relating to the Statewide Medicaid Managed Care Long-Term Care Program from Neighborly Care Network, Inc. The final purchase price for this acquisition was $3.3 million. Accumulated amortization as September 30, 2013, and future amortization for this acquisition are immaterial.

The following table presents assets acquired and the weighted average useful life for the major asset categories for the business combinations in 2013:

	Fair Value of Assets Acquired - Health Plans Segment				
	Weighted average useful life	**South Carolina**	**New Mexico**	**Florida**	**Total**
	(Years)	*(In thousands)*			
Membership conversion rights	12.0	$ 21,800	$ —	$ —	$ 21,800
Contract rights	10.6	—	18,300	—	18,300
Other finite-lived intangibles	7.7	1,060	—	990	2,050
Goodwill	—	42,140	35,223	2,332	79,695
		$ 65,000	$ 53,523	$ 3,322	$ 121,845

Acquisition costs relating to these transactions were immaterial individually and in the aggregate. The amounts recorded as goodwill represent intangible assets that do not qualify for separate recognition as identifiable intangible assets. The entire amounts recorded as goodwill are deductible for income tax purposes. Goodwill is not amortized, but is subject to an annual impairment test.

5. Stock-Based Compensation

At September 30, 2013, we had employee equity incentives outstanding under two plans: (1) the 2011 Equity Incentive Plan; and (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded).

In March 2013, our named executive officers were granted restricted stock awards with performance conditions as follows: our chief executive officer was awarded 186,858 shares, our chief financial officer was awarded 93,429 shares, our chief operating officer was awarded 62,286 shares, our chief accounting officer was awarded 28,029 shares, and our general counsel was awarded 21,800 shares. These awards were apportioned into four equal increments, and will vest in accordance with the following four measures: (i) 1/4th will vest in equal 1/3rd increments over three years on March 1, 2014, March 1,

2015, and March 1, 2016; (ii) 1/4th will vest upon our achievement of three-year Total Stockholder Return (TSR) as determined by Institutional Shareholder Services Inc. (ISS) calculations for the three-year period ending December 31, 2013 equal to or greater than the 50th percentile within our ISS peer group; (iii) 1/4th shall vest upon our achievement of total revenue in any of the 2013, 2014, or 2015 fiscal years equal to or greater than $12 billion; and (iv) 1/4th shall vest upon our achievement of the three-year earnings before interest, taxes, depreciation and amortization (EBITDA) margin percentage for the three-year period ending December 31, 2013 equal to or greater than 2.5%. In the event the vesting conditions are not achieved, the awards shall lapse. As of September 30, 2013, such performance goals have not yet been met, but we do expect the awards to vest in full.

Charged to general and administrative expenses, total stock-based compensation expense was as follows for the three and nine month periods ended September 30, 2013 and 2012:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
	(In thousands)			
Restricted stock and performance awards	$ 7,634	$ 5,093	$ 18,593	$ 13,943
Employee stock purchase plan and stock options	870	543	2,061	1,505
	$ 8,504	$ 5,636	$ 20,654	$ 15,448

As of September 30, 2013, there was $28.0 million of total unrecognized compensation expense related to unvested restricted share awards, including those with performance conditions, which we expect to recognize over a remaining weighted-average period of 1.7 years. Also as of September 30, 2013, there was $0.6 million of total unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 2.3 years.

Restricted and performance stock activity for the nine months ended September 30, 2013 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2012	986,577	$ 23.74
Granted - restricted stock	587,706	32.15
Granted - performance stock	456,174	30.80
Vested	(581,329)	24.72
Forfeited	(31,500)	25.55
Unvested balance as of September 30, 2013	1,417,628	29.06

The total fair value of restricted and performance awards granted during the nine months ended September 30, 2013 and 2012 was $33.3 million and $23.0 million, respectively. The total fair value of restricted awards, including those with performance conditions, vested during the nine months ended September 30, 2013 and 2012 was $19.3 million and $24.3 million, respectively.

The weighted-average grant date fair value per share of the performance awards with vesting conditions based on TSR, as described above, was $28.24. We estimated the fair value on the grant date using a Monte Carlo Simulation to project TSR over the performance period using correlations and volatilities of the ISS peer group. Additional inputs included a risk-free interest rate of 0.14%, dividend yield of 0%, and an expected life of 0.83 years.

Stock option activity for the nine months ended September 30, 2013 is summarized below:

	Options	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Outstanding as of December 31, 2012	414,061	$ 22.39		
Granted	45,000	33.02		
Exercised	(70,000)	20.11		
Forfeited	(300)	17.63		
Outstanding as of September 30, 2013	388,761	24.04	$ 4,495	3.6
Stock options exercisable and expected to vest as of September 30, 2013	388,761	24.04	$ 4,495	3.6
Exercisable as of September 30, 2013	333,761	22.50	$ 4,371	2.7

The weighted-average grant date fair value per share of stock options awarded to the new members of our board of directors during the nine months ended September 30, 2013 was $14.67. The weighted-average grant date fair value per share of the stock option awarded to the director appointed during 2012 was $13.97. We estimate the fair value of each stock option award on the grant date using the Black-Scholes option pricing model. To determine the fair values of these stock options we applied risk-free interest rates of 1.1% to 1.4%, expected volatilities of 41.3% to 43.0%, dividend yields of 0%, and expected lives of 6 years to 7 years.

6. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, a derivative asset, trade accounts payable, medical claims and benefits payable, long-term debt, a derivative liability, contingent consideration, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

Level 1 — Observable Inputs

Our Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

Level 2 — Directly or Indirectly Observable Inputs

Our Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit that are classified as current investments in the accompanying consolidated balance sheets. Such investments are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.

Level 3 — Unobservable Inputs

Our Level 3 financial instruments recorded at fair value include non-current auction rate securities that are designated as available-for-sale, and are reported at fair value of $11.7 million (par value of $12.4 million) as of September 30, 2013. To estimate the fair value of these securities we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants including global financial institutions, hedge funds, private equity funds, mutual funds, corporations and other institutional investors. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from two other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of September 30, 2013.

Level 3 financial instruments also include derivative financial instruments comprising the 1.125% Call Option asset, and the embedded cash conversion option liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of September 30, 2013 included our common stock price, time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 11, “Long-Term Debt,” and Note 12, “Derivative Financial Instruments,” the 1.125% Call Option asset and the embedded cash conversion option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of operations. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

Additionally, Level 3 financial instruments include contingent consideration liabilities of $59.9 million, primarily relating to the acquisition in South Carolina as described in Note 4, "Business Combinations," and recorded to accounts payable and accrued liabilities in our consolidated balance sheets. We applied discounted cash flow analysis to determine the fair value of the contingent consideration liabilities. Significant unobservable inputs primarily related to the probability weighted present values of the purchase price estimates for the membership that could convert in the South Carolina acquisition. Such membership could range from zero to approximately 170,000 members, with a weighted average of approximately 130,000 members.

Our financial instruments measured at fair value on a recurring basis at September 30, 2013, were as follows:

	Total	Level 1	Level 2	Level 3
	(In thousands)			
Corporate debt securities	$ 467,060	$ —	$ 467,060	$ —
GSEs	74,951	74,951	—	—
Municipal securities	107,844	—	107,844	—
U.S. treasury notes	42,207	42,207	—	—
Certificates of deposit	43,089	—	43,089	—
Auction rate securities	11,674	—	—	11,674
1.125% Call Option derivative asset	191,663	—	—	191,663
Total assets measured at fair value on a recurring basis	$ 938,488	$ 117,158	$ 617,993	$ 203,337
Embedded cash conversion option derivative liability	$ 191,556	$ —	$ —	$ 191,556
Contingent consideration liabilities	59,947	—	—	59,947
Total liabilities measured at fair value on a recurring basis	$ 251,503	$ —	$ —	$ 251,503

Our financial instruments measured at fair value on a recurring basis at December 31, 2012, were as follows:

	Total	Level 1	Level 2	Level 3
	(In thousands)			
Corporate debt securities	$ 191,008	$ —	$ 191,008	$ —
GSEs	29,525	29,525	—	—

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our long-term debt, as well as the applicable fair value hierarchy tiers, are contained in the tables below. Our convertible senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. As described in greater detail Note 11, "Long-Term Debt," we recorded lease financing obligations in connection with sale-leaseback transactions executed in the first half of 2013. The lease financing obligations are classified as Level 3 financial instruments because certain inputs used to determine their fair value are unobservable, such as our incremental borrowing rate. Fair value for these obligations was determined using discounted cash flow analysis with an estimated incremental borrowing rate for debt with similar terms. The credit facility was repaid and terminated effective February 15, 2013, and the term loan was repaid in June 2013.

	September 30, 2013				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
			(In thousands)		
1.125% Notes	$ 411,659	$ 596,899	$ —	$ 596,899	$ —

7. Investments

The following tables summarize our investments as of the dates indicated:

	September 30, 2013			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Corporate debt securities	$ 467,785	$ 306	$ 1,031	$ 467,060
GSEs	75,022	18	89	74,951
Municipal securities	108,647	109	912	107,844
U.S. treasury notes	42,159	67	19	42,207
Certificates of deposit	43,087	3	1	43,089
Subtotal - current investments	736,700	503	2,052	735,151
Auction rate securities	12,400	—	726	11,674
	$ 749,100	$ 503	$ 2,778	$ 746,825

	December 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Corporate debt securities	$ 190,545	$ 528	$ 65	$ 191,008
GSEs	29,481	45	1	29,525
Municipal securities	75,909	185	246	75,848
U.S. treasury notes	35,700	42	2	35,740
Certificates of deposit	10,715	9	—	10,724
Subtotal - current investments	342,350	809	314	342,845
Auction rate securities	14,650	—	1,231	13,419
	$ 357,000	$ 809	$ 1,545	$ 356,264

The contractual maturities of our investments as of September 30, 2013 are summarized below:

	Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 406,330	$ 406,342
Due one year through five years	330,370	328,809
Due after ten years	12,400	11,674
	$ 749,100	$ 746,825

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Net realized investment gains for the three months ended September 30, 2013 and 2012 were $27,000 and $12,000, respectively. Net realized investment gains for the nine months ended September 30, 2013 and 2012 were $169,000 and $250,000, respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at September 30, 2013 and December 31, 2012, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of September 30, 2013.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(Dollars in thousands)					
Corporate debt securities	$ 254,351	$ 991	99	$ 5,580	$ 40	5
Municipal securities	60,428	736	68	12,424	176	29
GSEs	24,271	89	15	—	—	—
U.S. treasury notes	12,487	19	11	—	—	—
Certificates of deposit	415	1	2	—	—	—
Auction rate securities	—	—	—	11,674	726	17
	$ 351,952	$ 1,836	195	$ 29,678	$ 942	51

The following table segregates those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of December 31, 2012.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(Dollars in thousands)

Municipal securities	35,223	246	43	—	—	—
GSEs	5,004	1	1	—	—	—
U.S. treasury notes	4,511	2	5	—	—	—
Auction rate securities	—	—	—	13,419	1,231	21
	$ 89,195	$ 314	72	$ 13,419	$ 1,231	21

Auction Rate Securities

Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not been available since early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 17 years to 33 years. Considering the relative insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction rate securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at September 30, 2013. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $69.7 million of these instruments at par value.

For the nine months ended September 30, 2013 and 2012, we recorded pretax unrealized gains of $0.5 million and $1.4 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

8. Receivables

Receivables consist primarily of amounts due from the various states in which we operate. Accounts receivable increased as of September 30, 2013, primarily due to certain intermediary arrangements with state agencies entered into in the third quarter of 2013. For further information on these arrangements, refer to Note 10, "Medical Claims and Benefits Payable."

	September 30, 2013	December 31, 2012

	$ 293,967	$ 149,682

9. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by state authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. Additionally, in connection with the Molina Medicaid Solutions segment contracts with the states of Maine and Idaho, we maintain restricted investments as collateral for letters of credit. The following table presents the balances of restricted investments:

	September 30, 2013	December 31, 2012
	(In thousands)	
California	$ 373	$ 373
Florida	8,840	5,738

Total Health Plans segment	54,924	44,101
Molina Medicaid Solutions segment	10,301	—
	$ 65,225	$ 44,101

The contractual maturities of our held-to-maturity restricted investments as of September 30, 2013 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 59,633	$ 59,636
Due one year through five years	5,592	5,596
	$ 65,225	$ 65,232

10. Medical Claims and Benefits Payable

As of September 30, 2013, medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of operations. As of September 30, 2013, we recorded provider payables of approximately $64.1 million, and $69.7 million accounts receivable for new intermediary arrangements that began in the third quarter of 2013.

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts displayed for "Components of medical care costs related to: Prior periods" represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported. The following table shows the components of the change in medical claims and benefits payable from continuing and discontinued operations for the periods indicated:

	Nine Months Ended September 30, 2013	Three Months Ended September 30, 2013	Year Ended December 31, 2012
		(Dollars in thousands)	
Balances at beginning of period	$ 494,530	$ 465,487	$ 402,476
Components of medical care costs related to:			
Current period	4,021,461	1,415,670	5,136,055
Prior periods	(54,040)	(32,575)	(39,295)
Total medical care costs	3,967,421	1,383,095	5,096,760
Payments for medical care costs related to:			
Current period	3,410,689	851,025	4,649,363
Prior periods	418,556	364,851	355,343
Total paid	3,829,245	1,215,876	5,004,706
Balances at end of period	$ 632,706	$ 632,706	$ 494,530
Benefit from prior period as a percentage of:			
Balance at beginning of period	10.9%	7.0%	9.8%
Premium revenue, trailing twelve months	0.9%	0.5%	0.7%
Medical care costs, trailing twelve months	1.0%	0.6%	0.8%

Assuming that our initial estimate of claims incurred but not paid (IBNP) is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate - we only know when the circumstances for any one or more factors are out of the ordinary.

As indicated above, the amounts ultimately paid out on our liabilities in fiscal years 2013 and 2012 were less than what we had expected when we had established our reserves. For example, for the year ended December 31, 2012, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2011 by 9.8%. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We recognized favorable prior period claims development in the amount of $54.0 million for the nine months ended September 30, 2013. This amount represents our estimate, as of September 30, 2013, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2012 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2012 was due primarily to the following factors:

- At our Washington health plan prior to July 2012, certain high-cost newborns that were approved for supplemental security income (SSI) coverage by the state were retroactively dis-enrolled from our Healthy Options (TANF) coverage, and the health plan was reimbursed for the claims paid on behalf of these members. Starting July 1, 2012, these newborns, as well as other high-cost disabled members, are now covered by the health plan under the Healthy Options Blind and Disabled (HOBD) program. At the end of 2012, we had limited claims history with which to estimate the claims liability of the HOBD members, and as a result the liability for these high-cost members was overstated.
- At our New Mexico health plan, we overestimated the impact of certain high-dollar outstanding claim payments as of December 31, 2012.
- At our Ohio health plan, we overestimated the impact of several potential high-dollar claims relating to our aged, blind or disabled (ABD) members.

We recognized favorable prior period claims development in the amount of $32.6 million for the three months ended September 30, 2013. This amount represents our estimate as of September 30, 2013, of the extent to which our initial estimate of medical claims and benefits payable at June 30, 2013 was more than the amount that will ultimately be paid out in satisfaction of that liability. This amount of favorable development was considerably less than we typically experience, and was significant enough to have a materially unfavorable impact upon our third quarter financial performance. We believe the overestimation of our claims liability at June 30, 2013 was due primarily to the following factors:

- At our Ohio health plan, we overestimated the impact of several potential high-dollar claims relating to critically ill members.
- At our Michigan health plan, we underestimated the impact of future claims overpayment recoveries when establishing reserves at June 30, 2013.
- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Texas health plan as a result of the costs associated with an unusually large number of older claims. This anomaly was caused primarily by the payment of claims that were delayed as a result of hospital provider disputes that have been resolved. The underestimation of the liability at our Texas health plan was responsible for the relatively small amount of prior period development noted above.

We recognized favorable prior period claims development in the amount of $37.7 million and $39.3 million for the nine months ended September 30, 2012, and the year ended December 31, 2012, respectively. This was primarily caused by the overestimation of our liability claims and medical benefits at December 31, 2011, as a result of the following factors:

- At our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- At our Texas health plan, we overestimated the cost of new members in STAR+PLUS, in the Dallas region.
- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Missouri health plan, as a result of the costs associated with an unusually large number of premature infants during the fourth quarter of 2011.

In estimating our claims liability at September 30, 2013, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- At our Texas health plan, we have noted an unusually large number of older claims dated older than 12 months. This has caused some distortion in the claims lag pattern that we use to estimate the incurred claims.
- At our Michigan health plan, there were a large number of claim recoveries recorded in June 2013 due to overpayments that resulted from a system configuration issue. These recoveries impacted the completion factors used to estimate incurred claims. While we attempted to remove this distortion from the claims data to develop a more accurate reserve estimate, this type of correction in claims data adds a degree of uncertainty for the Michigan reserves as of September 30, 2013.
- Our New Mexico health plan acquired approximately 80,000 new members in August 2013 from another health plan. This acquisition roughly doubled the size of the membership in a single month. For the September 30, 2013 reserve calculation, we have assumed that these new members will incur costs at about the same rate as the New Mexico members that were previously enrolled. With only two months of paid claims for these new members, it is too soon to know whether that assumption is correct or not.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2012, and for the nine months ended September 30, 2013, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material

impact on our consolidated results of operations because the replenishment of reserves in the respective periods generally offset the benefit from the prior period.

11. Long-Term Debt

As of September 30, 2013, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2013	2014	2015	2016	2017	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
3.75% Notes	187,000	—	187,000	—	—	—	—
	$ 737,000	$ —	$ 187,000	$ —	$ —	$ —	$ 550,000

1.125% Cash Convertible Senior Notes due 2020

On February 15, 2013, we settled the issuance of $550.0 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020 (the 1.125% Notes). This transaction included the initial issuance of $450.0 million on February 11, 2013, plus the exercise of the full amount of the $100.0 million over-allotment option on February 13, 2013. The aggregate net proceeds of the 1.125% Notes were $458.9 million, after payment of the net cost of the Call Spread Overlay described below and in Note 12, “Derivative Financial Instruments,” and transaction costs. Additionally, we used $50.0 million of the net proceeds to purchase shares of our common stock (see Note 13, “Stockholders' Equity”), and $40.0 million to repay the principal owed under our Credit Facility.

Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 of each year, at a rate of 1.125% per annum, and commenced on July 15, 2013. The 1.125% Notes will mature on January 15, 2020 unless repurchased or converted in accordance with their terms prior to such date.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. Holders may convert their 1.125% Notes solely into cash at their option at any time prior to the close of business on the business day immediately preceding July 15, 2019 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period immediately after any five consecutive trading day period in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.125% Notes solely into cash at any time, regardless of the foregoing circumstances. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture.

The initial conversion rate will be 24.5277 shares of our common stock per $1,000 principal amount of 1.125% Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate will be subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest. In addition, following certain corporate events that occur prior to the maturity date, we will pay a cash make-whole premium by increasing the conversion rate for a holder who elects to convert its 1.125% Notes in connection with such a corporate event in certain circumstances. We may not redeem the 1.125% Notes prior to the maturity date, and no sinking fund is provided for the 1.125% Notes.

If we undergo a fundamental change (as defined in the indenture to the 1.125% Notes), holders may require us to repurchase for cash all or part of their 1.125% Notes at a repurchase price equal to 100% of the principal amount of the 1.125% Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the fundamental change repurchase date. The indenture provides for customary events of default, including cross acceleration to certain other indebtedness of ours, and our significant subsidiaries.

The 1.125% Notes are senior unsecured obligations, and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries.

The 1.125% Notes contain an embedded cash conversion option. We have determined that the embedded cash conversion option is a derivative financial instrument, required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the embedded cash conversion option transaction settles or expires. The initial fair value liability of the embedded cash conversion option was $149.3 million, which simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). For further discussion of the derivative financial instruments relating to the 1.125% Notes, refer to Note 12, "Derivative Financial Instruments."

As noted above, the reduced carrying value on the 1.125% Notes resulted in a debt discount that is amortized to the 1.125% Notes' principal amount through the recognition of interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued. The effective interest rate of the 1.125% Notes is 5.9%, which is imputed based on the amortization of the fair value of the embedded cash conversion option over the remaining term of the 1.125% Notes. As of September 30, 2013, we expect the 1.125% Notes to be outstanding until their January 15, 2020 maturity date, for a remaining amortization period of 6.3 years. The 1.125% Notes' if-converted value did not exceed their principal amount as of September 30, 2013.

Also in connection with the settlement of the 1.125% Notes, we paid approximately $16.9 million in transaction costs. Such costs have been allocated to the 1.125% Notes, the 1.125% Call Option (defined below) and the 1.125% Warrants (defined below) according to their relative fair values. The amount allocated to the 1.125% Notes, or $12.0 million, was capitalized and will be amortized over the term of the 1.125% Notes. The aggregate amount allocated to the 1.125% Call Option and 1.125% Warrants, or $4.9 million, was recorded to interest expense in the quarter ended March 31, 2013.

1.125% Notes Call Spread Overlay

Concurrent with the issuance of the 1.125% Notes, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). These transactions represent a Call Spread Overlay, whereby the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes. We used $149.3 million of the proceeds from the settlement of the 1.125% Notes to pay for the 1.125% Call Option, and simultaneously received $75.1 million for the sale of the 1.125% Warrants, for a net cash outlay of $74.2 million for the Call Spread Overlay. The 1.125% Call Option is a derivative financial instrument. Until April 22, 2013, the 1.125% Warrants were classified as derivative financial instruments; refer to Note 12, "Derivative Financial Instruments" for further discussion.

Aside from the initial payment of a premium to the Counterparties of $149.3 million for the 1.125% Call Option, we will not be required to make any cash payments to the Counterparties under the 1.125% Call Option, and will be entitled to receive from the Counterparties an amount of cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the 1.125% Call Options during the relevant valuation period. The strike price under the 1.125% Call Option is initially equal to the conversion price of the 1.125% Notes. Additionally, if the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances.

3.75% Convertible Senior Notes due 2014

We had $187.0 million of 3.75% Convertible Senior Notes due 2014 (the 3.75% Notes) outstanding as of September 30, 2013 and December 31, 2012. The 3.75% Notes rank equally in right of payment with our existing and future senior indebtedness. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Because the 3.75% Notes have cash settlement features, we have allocated the proceeds from their issuance between a liability component and an equity component. The reduced carrying value on the 3.75% Notes resulted in a debt discount that is amortized back to the 3.75% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 3.75% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms had been issued. The effective interest rate of the 3.75% Notes is 7.5%, principally based on the seven-year U.S. Treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. As of September 30, 2013, we expect the 3.75% Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 12 months. As of September 30, 2013, the 3.75% Notes' if-converted value exceeded their principal amount by approximately $30 million. The 3.75% Notes' if-converted value did not exceed their principal amount as of December 31, 2012. At September 30, 2013, the equity component of the 3.75% Notes, net of the impact of deferred taxes, was $24.0 million.

The principal amounts, unamortized discount and net carrying amounts of the convertible senior notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
September 30, 2013:			
1.125% Notes	$ 550,000	$ 138,341	$ 411,659
3.75% Notes	187,000	6,775	180,225
	$ 737,000	$ 145,116	$ 591,884
December 31, 2012:			
3.75% Notes	$ 187,000	$ 11,532	$ 175,468

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
		(In thousands)		
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate	$ 3,300	$ 1,753	$ 9,127	$ 5,259
Amortization of the discount	6,059	1,499	15,747	4,414
Total interest cost recognized	$ 9,359	$ 3,252	$ 24,874	$ 9,673

Lease Financing Obligations

On June 12, 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of two properties, including the Molina Center located in Long Beach, California, and the building that houses our Ohio health plan located in Columbus, Ohio. We sold the two properties for $158.6 million in the aggregate. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. The carrying values of these properties, including the related intangible assets, amounted to $78.3 million in the aggregate as of September 30, 2013. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated and amortized over their remaining useful lives. The sales price of $158.6 million was recorded as a lease financing obligation, which is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of operations. Transaction costs associated with this transaction, amounting to $3.5 million, have been deferred and will be amortized over the initial lease term. Future minimum rental income on noncancelable leases from third party tenants of these properties, as reported in our December 31, 2012 Form 10-K, is now considered to be sublease rental income, and continues to be reported in rental income in our consolidated statements of operations. The future minimum rental income previously reported as of December 31, 2012 is consistent with our expected sublease rental income as of September 30, 2013. For information regarding the future minimum lease obligation, refer to Note 15, “Commitments and Contingencies.”

As described and defined in further detail in Note 16, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings then under construction. We have concluded that we are the accounting owner of the construction projects because of our continuing involvement in those projects. Therefore, we have recorded $18.9 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of September 30, 2013, which represents the total cost, including imputed interest, incurred by the Landlord thus far in the

construction projects. As of September 30, 2013, the aggregate amount recorded to lease financing obligations for the construction projects amounted to $19.2 million. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of operations. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was immaterial for the nine months ended September 30, 2013. For information regarding the future minimum lease obligation, refer to Note 15, "Commitments and Contingencies."

Term Loan

In December 2011, our wholly owned subsidiary, Molina Center LLC, entered into a term loan agreement with various lenders and East West Bank to borrow $48.6 million to finance a portion of the purchase price for the Molina Center, located in Long Beach, California. On June 13, 2013, we repaid the principal balance outstanding under the term loan on that date with proceeds we received in the sale-leaseback transaction described above.

Credit Facility

On February 15, 2013, we used $40.0 million of the net proceeds from the offering of the 1.125% Notes to repay all of the outstanding indebtedness under our $170 million revolving Credit Facility, with various lenders and U.S. Bank National Association, as Line of Credit Issuer, Swing Line Lender, and Administrative Agent. As of December 31, 2012, there was $40.0 million outstanding under the Credit Facility.

We terminated the Credit Facility in connection with the closing of the offering and sale of the 1.125% Notes. Two letters of credit in the aggregate principal amount of $10.3 million that reduced the amount available for borrowing under the Credit Facility as of December 31, 2012, were transferred to direct issue letters of credit with another financial institution. Such direct issue letters of credit are collateralized by restricted investments.

12. Derivative Financial Instruments

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

	Balance Sheet Location	September 30, 2013
		(In thousands)
Derivative asset:		
1.125% Call Option	Non-current assets: Derivative asset	$ 191,663
Derivative liability:		
Embedded cash conversion option	Non-current liabilities: Derivative liability	$ 191,556

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of operations, in other expense. The following table summarizes the gains (losses) recorded in the periods presented:

	Three Months Ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
	(In thousands)			
Derivative gains (losses):				
1.125% Call Option	$ (15,460)	$ —	$ 42,332	$ —
Embedded cash conversion option	15,461	—	(42,225)	—
1.125% Warrants	—	—	(3,923)	—
Interest rate swap	—	(184)	433	(1,270)
	$ 1	$ (184)	$ (3,383)	$ (1,270)

1.125% Notes Call Spread Overlay

As described in Note 11, "Long-Term Debt," we entered into a Call Spread Overlay, whereby the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the debentures was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes.

The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to the cash settlement features until the 1.125% Call Option settles or expires. The 1.125% Call Option is measured and reported at fair value on a recurring basis, within Level 3 of the fair value hierarchy. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 6, “Fair Value Measurements.”

Until April 22, 2013, the 1.125% Warrants were recorded as a derivative liability that required mark-to-market accounting treatment due to certain terms in the 1.125% Warrants that prevented such instruments being considered to be indexed in our common stock. Effective April 22, 2013, we entered into amended and restated warrant confirmations with the Counterparties to clarify these terms, such that 1.125% Warrants are no longer considered to be derivative instruments, and have been recorded to additional paid-in capital. In the second quarter of 2013, we recorded a loss of $3.9 million for the change in fair value of the 1.125% Warrants from February 15, 2013 to April 22, 2013.

Embedded Cash Conversion Option

The embedded cash conversion option within the 1.125% Notes is required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the cash conversion option settles or expires. The initial fair value liability of the embedded cash conversion option was $149.3 million, which simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). The embedded cash conversion option is measured and reported at fair value on a recurring basis, within Level 3 of the fair value hierarchy. For further discussion of the inputs used to determine the fair value of the embedded cash conversion option, refer to Note 6, “Fair Value Measurements.”

Interest Rate Swap

In May 2012, we entered into a $42.5 million notional amount interest rate swap agreement, with an effective date of March 1, 2013. On June 14, 2013, we settled the interest rate swap for $0.9 million.

13. Stockholders’ Equity

Stockholders' equity increased $110.5 million during the nine months ended September 30, 2013. The increase was primarily due to the $79.0 million reclassification of the 1.125% Warrants to additional paid-in capital, net income of $62.1 million, and $19.1 million related to employee stock transactions, partially offset by $50.0 million in repurchases of our common stock, as described in further detail below.

Common Shares Authorized. On May 1, 2013, our stockholders approved an amendment to our certificate of incorporation to increase the number of authorized shares of our common stock from 80,000,000 to 150,000,000.

1.125% Warrants. As described in Note 12, "Derivative Financial Instruments," we reclassified the 1.125% Warrants to additional paid-in capital during the second quarter of 2013, resulting in a $79.0 million increase to stockholders' equity. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants.

Securities Repurchases and Repurchase Program. In connection with the issuance and settlement of the 1.125% Notes, we used a portion of the net proceeds from the offering to repurchase $50 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. On February 12, 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and other market conditions. This newly authorized repurchase program extends through December 31, 2014, and replaces in its entirety, the $75 million repurchase program adopted by the board of directors on February 13, 2013.

Shelf Registration Statement. In May 2012, we filed an automatic shelf registration statement on Form S-3 with the SEC covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Plans. In connection with the plans described in Note 5, "Stock-Based Compensation," we issued approximately 620,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the nine months ended September 30, 2013.

14. Segment Reporting

We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans and also includes our direct delivery business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides design, development, implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
	(In thousands)

Molina Medicaid Solutions	176,342	232,610
	$ 2,925,066	$ 1,934,822

Goodwill and intangible assets increased in the Health Plans segment due to acquisitions that occurred in the third quarter of 2013. See Note 4, "Business Combinations," for further information.

15. Commitments and Contingencies

Sale-Leaseback Transactions

As described in Note 11, "Long-Term Debt," we entered into sale-leaseback transactions that have been classified as lease financing obligations. For the transaction entered into in June 2013, the initial lease term is 25 years, with five five-year renewal options. For the transaction relating to the construction project completed in June 2013, the initial lease term is 11.5 years, with two five-year renewal options. We expect future minimum lease payments under these leases, for the three months ended December 31, 2013, to be $3.3 million. Future minimum lease payments due under these leases beginning January 1, 2014 are as follows:

	(In thousands)
2014	$ 14,395
2015	18,277
2016	18,877
2017	19,496
2018	20,137
Thereafter	385,813
Total minimum lease payments	$ 476,995

Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance, interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Such state laws and regulations also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $601.1 million at September 30, 2013, and $549.7 million at December 31, 2012. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $472.1 million and $46.9 million as of September 30, 2013 and December 31, 2012, respectively.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Illinois, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of September 30, 2013, our health plans had aggregate statutory capital and surplus of approximately $637.0 million compared with the required minimum aggregate statutory capital and surplus of approximately $362.2 million. All of our health plans were in compliance with the minimum capital requirements at September 30, 2013. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

16. Related Party Transactions

Leased Office Buildings

On February 27, 2013, we entered into a lease (the Lease) with 6th & Pine Development, LLC (the Landlord) for office space located in Long Beach, California. The Lease consists of two office buildings, one of which is under construction. The building which comprises approximately 90,000 square feet of office and storage space (Building A) was completed in June 2013; immediately following its completion, we occupied Building A and commenced lease payments. The second building (Building B) is expected to comprise approximately 120,000 square feet of office space.

The term of the Lease with respect to Building A commenced on June 6, 2013, and the term of the Lease with respect to Building B is expected to commence on November 1, 2014. The initial term of the Lease with respect to both buildings expires on December 31, 2024, subject to two options to extend the term for a period of five years each. Initial annual rent for Building A is approximately $2.6 million, and initial annual rent for Building B is expected to be approximately $4.0 million. Rent will increase 3.75% per year through the initial term. Rent during the extension terms will be the greater of then-current rent or fair market rent.

The principal members of the Landlord are John C. Molina, our chief financial officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, the Landlord has pledged shares of common stock in the Company he holds as trustee. Dr. J. Mario Molina, our chief executive officer and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary.

Medical Services

We have an equity investment in a medical service provider that provides certain vision services to our members; we account for this investment under the equity method of accounting. For the three months ended September 30, 2013 and 2012, we paid $8.2 million and $7.0 million, respectively, for medical service fees to this provider. For the nine months ended September 30, 2013 and 2012, we paid $24.6 million and $20.6 million, respectively, for medical service fees to this provider.

17. Variable Interest Entities

Joseph M. Molina M.D., Professional Corporations

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's sole shareholder is Dr. J. Mario Molina, our Chairman of the Board, President and Chief Executive Officer. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides outpatient professional medical services to the general public for routine non-life threatening, outpatient health care needs. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, American Family Care, Inc. (AFC), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will not operate at a loss, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by AFC are reviewed annually to assure the achievement of this goal.

Our California, Florida, New Mexico and Washington health plans have entered into primary care capitation agreements with JMMPC. These agreements also direct our health plans to fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, based on a monthly reconciliation. Because the AFC services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are insignificant.

We have determined that JMMPC is a variable interest entity, or VIE, and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of September 30, 2013, JMMPC had total assets of $5.6 million, comprising primarily cash and equivalents, and total liabilities of $5.3 million, comprising primarily accrued payroll and employee benefits.

Our maximum exposure to loss as a result of our involvement with JMMPC is limited to the amounts needed to fund JMMPC's ongoing payroll and employee benefits. We believe that such loss exposure will be immaterial to our consolidated operating results and cash flows for the foreseeable future. We provided an initial cash infusion of $0.3 million to JMMPC in the first quarter of 2012 to fund its start-up operations.

New Markets Tax Credit

During the fourth quarter of 2011, our New Mexico data center subsidiary entered into a financing transaction with Wells Fargo Community Investment Holdings, LLC, or Wells Fargo, its wholly owned subsidiary New Mexico Healthcare Data Center Investment Fund, LLC, or Investment Fund, and certain of Wells Fargo's affiliated Community Development Entities, or CDEs, in connection with our participation in the federal government's New Markets Tax Credit Program, or NMTC. The NMTC was established by Congress in 2000 to facilitate new or increased investments in businesses and real estate projects in low-income communities. The NMTC attracts investment capital to low-income communities by permitting investors to receive a tax credit against their federal income tax return in exchange for equity investments in specialized financial institutions, called CDEs, which provide financing to qualified active businesses operating in low-income communities. The credit amounts to 39% of the original investment amount and is claimed over a period of seven years (five percent for each of the first three years, and six percent for each of the remaining four years). The investment in the CDE cannot be redeemed before the end of the seven-year period.

In the fourth quarter of 2011, as a result of a series of simultaneous financing transactions, Wells Fargo contributed capital of $5.9 million to the Investment Fund, and Molina Healthcare, Inc. loaned the principal amount of $15.5 million to the Investment Fund. The Investment Fund then contributed the proceeds to certain CDEs, which, in turn, loaned the proceeds of $20.9 million to our New Mexico data center subsidiary. Wells Fargo will be entitled to claim the NMTC while we effectively received net loan proceeds equal to Wells Fargo's contribution to the Investment Fund, or approximately $5.9 million.

Additionally, financing costs incurred in structuring the arrangement amounting to $1.2 million were deferred and will be recognized as expense over the term of the loans. This transaction also includes a put/call feature that becomes enforceable at the end of the seven-year compliance period. Wells Fargo may exercise its put option or we can exercise the call, both of which will serve to transfer the debt obligation to us. Incremental costs to maintain the structure during the compliance period will be recognized as incurred.

We have determined that the financing arrangement with Investment Fund and CDEs is a VIE, and that we are the primary beneficiary of the VIE. We reached this conclusion based on the following:

- The ongoing activities of the VIE-collecting and remitting interest and fees and NMTC compliance-were all considered in the initial design and are not expected to significantly affect economic performance throughout the life of the VIE;
- Contractual arrangements obligate us to comply with NMTC rules and regulations and provide various other guarantees to Investment Fund and CDEs;
- Wells Fargo lacks a material interest in the underling economics of the project; and
- We are obligated to absorb losses of the VIE.

Because we are the primary beneficiary of the VIE, we have included it in our consolidated financial statements. Wells Fargo's contribution of $5.9 million is included in cash at December 31, 2012 and the offsetting Wells Fargo's interest in the financing arrangement is included in other liabilities in the accompanying consolidated balance sheets.

As described above, this transaction also includes a put/call provision whereby we may be obligated or entitled to repurchase Wells Fargo's interest in the Investment Fund. The value attributed to the put/call is nominal. The NMTC is subject to 100% recapture for a period of seven years as provided in the Internal Revenue Code and applicable U.S. Treasury regulations. We are required to be in compliance with various regulations and contractual provisions that apply to the NMTC arrangement. Non-compliance with applicable requirements could result in Wells Fargo's projected tax benefits not being realized and, therefore, require us to indemnify Wells Fargo for any loss or recapture of NMTCs related to the financing until such time as the recapture provisions have expired under the applicable statute of limitations. We do not anticipate any credit recaptures will be required in connection with this arrangement.

18. Subsequent Events

California Health Plan Rate Settlement Agreement

On October 30, 2013, we finalized the California health plan tentative rate settlement agreement, as described in Note 1, "Basis of Presentation." In connection with this agreement, a deficit or surplus will result to the extent the plan’s pre-tax margin is below or above 3.25%, subject to further adjustment as specified in the settlement agreement. Such settlement amount shall be based on 75% of the plan’s revenue in 2014; and 50% of the plan’s revenue in each subsequent year of the settlement agreement. The maximum amount that DHCS would pay to us under the terms of the settlement agreement is $40 million. Additionally, DHCS agreed to enter into a Medi-Cal managed care contract with the California health plan for the Imperial County with an original term of five years and extension through October 31, 2023. The foregoing description of the settlement agreement is qualified in its entirety by reference to the Settlement Agreement which is filed as Exhibit 10.1 to this report and is incorporated herein by reference.

Hospital Management Service Agreement

On October 9, 2013, we entered into a 10-year agreement with College Health Enterprises (CHE) to perform certain medical and administrative management services for CHE's hospital in Long Beach, California. Under the agreement, we will assume financial benefit and risk for a number of acute care beds at the hospital. We believe that this arrangement will improve hospital access for our members in the Long Beach, California area, and will also enhance our overall direct delivery strategy. As with any new start up activity, we may incur losses while we modify various business operations during the initial months of the management services agreement.

Item 2. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words "anticipate(s)," "believe(s)," "estimate(s)," "expect(s)," "intend(s)," "may," "plan(s)," "project(s)," "will," "would," "could," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated. Those risks and uncertainties include, but are not limited to, the following:

- those identified and discussed in our periodic reports and filings with the SEC;
- uncertainties associated with the implementation of the Affordable Care Act, including the impact of, and state rate development associated with, the health insurance industry excise tax, the expansion of Medicaid eligibility in participating states to previously uninsured populations unfamiliar with managed care, the implementation of insurance exchanges or marketplaces and related technical problems, the effect of various implementing regulations, and uncertainties regarding the impact of other federal or state health care and insurance reform measures, including the duals demonstration programs in California, Illinois, and Ohio;
- the success of our medical cost containment initiatives in Texas;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations and our accruals for incurred but not reported medical costs;
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, and our ability to increase our revenues consistent with our expectations;
- accurate estimation of incurred but not reported medical costs across our health plans;
- risks associated with the continued growth in new Medicaid and Medicare enrollees, and the development of actuarially sound rates with respect to such new enrollees, including duals;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates;
- continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- government audits and reviews, and any enrollment freeze or monitoring program that may result therefrom;
- changes with respect to our provider contracts and the loss of providers;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive, and the interpretation and implementation of medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation, arbitration, or administrative proceedings;
- our management of a portion of CHE's hospital in Long Beach, California;
- the relatively small number of states in which we operate health plans;
- the availability of adequate financing to fund and capitalize our expansion and growth activities and to meet our liquidity needs, including the interest expense and other costs associated with such financing;

- a state's failure to renew its federal Medicaid waiver;
- inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- changes in general economic conditions, including unemployment rates; and
- increasing consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2012, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management’s Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2012.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Illinois, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of September 30, 2013, these health plans served approximately 1.9 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of primary care community clinics in California, Florida, New Mexico, and Washington.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

Third Quarter 2013 Financial Highlights

- Net income for continuing operations for the third quarter of 2013 increased when compared with the third quarter of 2012 as a result of higher medical margins. Those medical margins were partially offset by increased administrative expense related to the Company's preparations for significant membership growth expected in 2014.

- Premium revenue for the third quarter of 2013 increased 9% over the third quarter of 2012, due to a 5% increase in enrollment, and a 4% increase in revenue per member per month (PMPM). The 5% enrollment increase was primarily due to the acquisition of a contract covering approximately 80,000 members in New Mexico effective August 1, 2013.

- Our consolidated medical care ratio decreased to 87.3% in the third quarter of 2013, from 91.1% in the third quarter of 2012. The decline in the consolidated medical care ratio was the result of improved operating results at most of our health plans. Medical care ratios decreased in eight of our nine health plans, while medical margin (measured as the excess of premium revenue over medical care costs) increased in the same eight of nine health plans.

- General and administrative expenses increased to 10.4% of revenue in the third quarter of 2013, from 8.2% in the third quarter of 2012, primarily due to higher costs incurred as a result of our preparations for significant membership growth in 2014 in connection with the Affordable Care Act. Increased administrative expense related to anticipated membership growth in 2014 represented approximately 1.8% of premium revenue, or $30 million, during the third quarter of 2013.

Health Care Reform

We believe that the Affordable Care Act will provide us with significant opportunities for membership growth in our existing markets and, potentially, in new markets in the future as follows:

Health Insurance Marketplaces. On September 13, 2013, we announced that nine of our state health plan subsidiaries have been selected by the relevant state and federal regulatory agencies overseeing the non-group health insurance marketplaces for individuals to offer certified Qualified Health Plans. We are participating in the federally facilitated marketplaces in Florida, Ohio, Texas, Utah and Wisconsin, and in the state-federal partnership marketplaces in New Mexico and Michigan. In California and Washington, Molina Healthcare has been selected to participate in each of those two states' state-run marketplaces.

Dual Eligibles. The Centers for Medicare and Medicaid Services (CMS) has implemented several demonstrations designed to improve the coordination of care for dual eligible beneficiaries who are enrolled in both Medicare and Medicaid. We refer to such demonstrations as our Medicare-Medicaid Plan (MMP) implementations, which are scheduled to commence as follows:

- California - San Diego, Riverside and San Bernardino counties commence April 1, 2014
- Illinois - 15 counties in the Central Region commence February 1, 2014
- Ohio - 13 counties in Southwest, Central and West Central Regions commence March 1, 2014

Medicaid Expansion. The Affordable Care Act also provides for expanded Medicaid coverage effective in January 2014, which remains subject to implementation at the state level. We believe that we will likely add expansion membership in 2014. In preparation for such expansion membership growth, and for our participation in the health insurance marketplaces and MMP described above, we have augmented our infrastructure. Such preparations have included increased hiring in the nine months ended September 30, 2013, to support expansion of product development and pricing, network customization, and marketing; technology enhancements relating to premium billing and collections; and upgraded care management tools and telecommunications.

Market Updates - Health Plans Segment

California Health Plan Rate Settlement Agreement. On October 30, 2013, our California health plan finalized and entered into a settlement agreement with the California Department of Health Care Services (DHCS). The settlement agreement settles rate disputes initiated by our California health plan dating back to 2003 with respect to its participation in California's Medicaid program, or Medi-Cal.

Under the terms of the settlement agreement, DHCS has agreed to extend each of the California health plan's existing Medi-Cal managed care contracts for an additional five years, including its contracts in San Diego, San Bernardino, Riverside, and Sacramento counties. In addition, effective January 1, 2014, the settlement establishes a settlement account applicable to the California health plan's Medi-Cal, Seniors and Persons with Disabilities (SPD), and the dual eligibles pilot programs. The settlement account will be established with an initial balance of zero, and will be adjusted annually to reflect a calendar year deficit or surplus. A deficit or surplus will result to the extent the plan's pre-tax margin is below or above 3.25%, subject to further adjustment as specified in the settlement agreement. Such settlement amount shall be based on 75% of the plan's revenue in 2014; and 50% of the plan's revenue in each subsequent year of the settlement agreement. Cash settlement will occur after December 31, 2017. DHCS will make an interim partial settlement payment to us if it terminates early, without replacement, any of our Medi-Cal managed care contracts. Upon expiration of the settlement agreement, if the settlement account is in a deficit position, then DHCS will pay the amount of the deficit to us, subject to an alternative minimum payment amount. The alternative minimum amount is calculated as follows: (i) $40 million, minus (ii) any partial settlement payments previously made to our California health plan by DHCS, minus (iii) 50% of the pre-tax income on our Medi-Cal, SPD, and dual eligibles pilot program business in excess of a 2.0% pre-tax margin for each calendar from 2014 through 2017. If the settlement account is in a surplus position, then no amount is owed to either party. The maximum amount that DHCS would pay to us under the terms of the settlement agreement is $40 million. DHCS agreed to enter into a Medi-Cal managed care contract with the California health plan for the Imperial County with an original term of five years and extension through October 31, 2023. The foregoing description of the settlement agreement is qualified in its entirety by reference to the Settlement Agreement which is filed as Exhibit 10.1 to this report and is incorporated herein by reference.

We do not expect the settlement agreement to impact our consolidated financial condition, cash flows, or results of operations for the year ending December 31, 2013.

Hospital Management Services Agreement. On October 9, 2013, we entered into a 10-year agreement with College Health Enterprises (CHE) to perform certain medical and administrative management services for CHE's hospital in Long Beach, California. Under the agreement, we will assume financial benefit and risk for a number of acute care beds at the hospital. We believe that this arrangement will improve hospital access for our members in the Long Beach, California area, and will also enhance our overall direct delivery strategy. As with any new start up activity, we may incur losses while we modify various business operations during the initial months of the management services agreement.

Florida. On October 23, 2013, our Florida health plan and the Florida Agency for Health Care Administration (AHCA), agreed to a settlement under which our health plan will be awarded three contracts under the Florida Statewide Medicaid Managed Care Managed Medical Assistance Invitation to Negotiate. The three contracts are expected to commence in the second or third quarter of 2014.

On February 14, 2013, we announced that AHCA awarded our Florida health plan contracts in three regions under the Statewide Medicaid Managed Care Long-Term Care program. As a result of the awards, we will now enter into a comprehensive pre-contracting assessment, with the program currently scheduled to commence on December 1, 2013. Under the program, we will provide long-term care benefits, including institutional and home and community-based services.

New Mexico. Consistent with our stated strategy to expand within existing markets, on August 1, 2013, our New Mexico health plan closed on its acquisition of the Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program, under which Lovelace's Medicaid members became Molina Healthcare Medicaid members and now receive their

Medicaid managed services and benefits from our New Mexico health plan. As part of this acquisition, we also expect to add membership currently covered under New Mexico's State Coverage Insurance (SCI) program with Lovelace in the near future. Effective January 1, 2014, members in this program will ultimately be a) enrolled in the Centennial Care program as Medicaid members, or b) eligible to enroll in New Mexico's health insurance marketplace. All members transferred from Lovelace will be able to continue with Molina Healthcare as the state transitions to the Centennial Care program. We expect the final purchase price for the acquisition to amount to approximately $53.5 million, of which $47.2 million was paid on the closing date. As of September 30, 2013, the New Mexico health plan's membership increased by approximately 80,000 members as a result of this transaction.

On February 11, 2013, we announced that our New Mexico health plan was selected by the New Mexico Human Services Department, or HSD, to participate in the new Centennial Care program. In addition to continuing to provide physical and acute health care services, under the new program our New Mexico health plan will expand its services to provide behavioral health and long-term care services. The selection of our New Mexico health plan was made by HSD pursuant to its request for proposals issued in August 2012. The operational start date for the program is currently scheduled for January 2014.

South Carolina. On July 26, 2013, we entered into an agreement with Community Health Solutions of America, Inc. (CHS) to acquire certain assets, including the rights to convert certain of CHS' Medicaid members who will be covered by South Carolina's full-risk Medicaid managed care program, consistent with our stated strategy to enter new markets. The conversion of such members will be contingent on our successful receipt of an HMO license from South Carolina Department of Insurance, the award to Molina Healthcare of a full-risk Medicaid managed care contract by the South Carolina Department of Health and Human Services, and the state's conversion to a full-risk Medicaid managed care program. Each of these three conditions is expected to be satisfied by January 2014. In connection with the agreement, we paid CHS $7.5 million on the closing date. We currently expect to convert approximately 130,000 members under the agreement, for a total estimated discounted purchase price of $65.0 million. The final purchase price will be settled when the member conversion has been completed.

Washington. The Washington Health Care Authority (HCA) has communicated to our Washington health plan that it believes it has erroneously overpaid the plan with regard to certain claims, including claims for psychotropic drugs, and claims for health plan members under the Washington Community Options Program Entry System (COPES). The alleged overpayments date back to the July 1, 2012 start date of the current contract. Because of the unilateral errors underlying the overpayments, HCA has indicated an intent to seek recoupment of the allegedly overpaid amounts. Our Washington health plan is seeking additional information from HCA regarding the factual and legal bases for any potential retroactive rate recoupment. In the event our Washington health plan is required to disgorge to HCA, in the fourth quarter of 2013, rate amounts that had been previously paid to it, our results of operations in the fourth quarter of 2013 may be adversely affected.

Market Updates - Molina Medicaid Solutions Segment

U.S. Virgin Islands and West Virginia. In 2012, Molina Medicaid Solutions of West Virginia secured a historic partnership with the United States Virgin Islands (USVI). The partnership involves processing the USVI's Medicaid claims using West Virginia's certified Medicaid management information system (MMIS). On August 1, 2013 the system went live, marking the first MMIS for a U.S. Territory, and the first to be shared between two government agencies on a single business processing platform.

Louisiana. In 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intended to award the contract for a replacement MMIS to a different vendor, CNSI. However, in March 2013, the state of Louisiana cancelled its contract award to CNSI. CNSI is currently challenging the contract cancellation. The state has informed us that we will continue to perform under our current contract until a successor is named. At such time as a new RFP may be issued, we intend to respond to the state's RFP. For the nine months ended September 30, 2013, our revenue under the Louisiana MMIS contract was approximately $31.1 million, or 20.7% of total service revenue. So long as our Louisiana MMIS contract continues, we expect to recognize approximately $40 million of service revenue annually under this contract.

Discontinued Operations

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal on June 30, 2012. Effective June 30, 2013 the transition obligations associated with that contract terminated. Therefore, we have reclassified the results relating to the Missouri health plan to discontinued operations for all periods presented. These results are presented in a single line item, net of taxes, in the unaudited consolidated statements of operations. Additionally, we abandoned all of our equity interests in the Missouri health plan during the second quarter of 2013, resulting in the recognition of a tax benefit of approximately $9.5 million, which is also included in discontinued operations in the unaudited consolidated

statements of operations. The Missouri health plan's revenues amounted to $0.2 million and $113.8 million for the nine months ended September 30, 2013 and 2012, respectively.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts typically contain renewal options exercisable by the state Medicaid agency, and allow either the state or the health plan to terminate the contract with or without cause. Our health plan subsidiaries have generally been successful in retaining their contracts, but such contracts are subject to risk of loss when a state issues a new request for proposals, or RFP, open to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal.

In addition to contract renewal, our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas.

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in “Critical Accounting Policies” below, is not generally subject to significant accounting estimates. For the nine months ended September 30, 2013, we received approximately 96% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with the CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the nine months ended September 30, 2013, we recognized approximately 4% of our premium revenue in the form of “birth income” — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children’s Health Insurance Program, or CHIP, members are generally among our lowest, with rates as low as approximately $80 PMPM in Michigan. Premium revenues for Medicaid members are generally higher. Among the TANF Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $100 in California to $270 in Ohio. Among our ABD membership, PMPM premiums range from approximately $400 in Utah to $1,400 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, inpatient, behavioral health and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums in the aggregate, at approximately $1,200 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	September 30, 2013	June 30, 2013	December 31, 2012	September 30, 2012
Total Ending Membership by Health Plan:				
California	363,000	355,000	336,000	346,000
Florida	84,000	81,000	73,000	71,000
Michigan	213,000	215,000	220,000	219,000
New Mexico	172,000	92,000	91,000	90,000
Ohio	261,000	240,000	244,000	272,000
Texas	258,000	266,000	282,000	291,000
Utah	87,000	87,000	87,000	85,000
Washington	409,000	413,000	418,000	411,000
Wisconsin	95,000	98,000	46,000	41,000
Total	1,942,000	1,847,000	1,797,000	1,826,000
Total Ending Membership for our Medicare Advantage Plans:				
California	8,600	8,100	7,700	7,300
Florida	600	600	900	900
Michigan	10,000	9,500	9,700	9,300
New Mexico	900	900	900	900
Ohio	400	400	300	200
Texas	2,500	2,300	1,500	1,100
Utah	8,200	7,800	8,200	8,300
Washington	6,900	6,600	6,500	6,100
Total	38,100	36,200	35,700	34,100
Total Ending Membership for our Aged, Blind or Disabled Population:				
California	46,300	45,400	44,700	44,100
Florida	12,200	11,200	10,300	10,300
Michigan	45,400	45,000	41,900	40,700
New Mexico	11,400	6,000	5,700	5,600
Ohio	33,000	28,000	28,200	29,000
Texas	90,800	92,000	95,900	101,300
Utah	9,500	9,400	9,000	8,900
Washington	33,000	31,700	30,000	23,400
Wisconsin	1,700	1,600	1,700	1,600
Total	283,300	270,300	267,400	264,900

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses

related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service* — Expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.
- *Capitation* — Expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- *Pharmacy* — Expenses for all drug, injectable, and immunization costs paid through our pharmacy benefit manager.
- *Other* — Expenses for medically related administrative costs of approximately $107.0 million, and $94.6 million, for the nine months ended September 30, 2013 and 2012, respectively, as well as certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Policies" below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

Third Quarter Financial Performance Summary, Continuing Operations

The following table and narrative briefly summarize our financial and operating performance for continuing operations for the three and nine months ended September 30, 2013 and 2012. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio is computed as a percentage of premium revenue, the premium tax ratio is computed as a percentage of premium revenue plus premium tax receipts because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
	(Dollar amounts in thousands, except per share data)			
Net income (loss) per diluted share	$ 0.16	$ (0.01)	$ 1.15	$ (0.29)
Premium revenue	$ 1,584,656	$ 1,448,600	$ 4,583,818	$ 4,066,737
Service revenue	$ 51,100	$ 48,422	$ 150,528	$ 132,351
Operating income (loss)	$ 24,926	$ 2,368	$ 139,245	$ (10,750)
Net income (loss)	$ 7,553	$ (165)	$ 53,871	$ (13,328)
Total ending membership	1,942,000	1,826,000	1,942,000	1,826,000
Premium revenue	93.9%	94.1 %	93.9%	93.8 %
Premium tax receipts	2.6%	2.4 %	2.6%	2.8 %
Service revenue	3.0%	3.1 %	3.1%	3.0 %
Investment income	0.2%	0.1 %	0.1%	0.1 %
Rental and other income	0.3%	0.3 %	0.3%	0.3 %
Total revenue	100.0%	100.0 %	100.0%	100.0 %
Medical care ratio	87.3%	91.1 %	86.5%	91.4 %
General and administrative expense ratio	10.4%	8.2 %	9.8%	8.4 %
Premium tax ratio	2.7%	2.5 %	2.7%	2.9 %
Operating income (loss)	1.5%	0.2 %	2.9%	(0.2)%
Net income (loss)	0.4%	— %	1.1%	(0.3)%
Effective tax rate	33.9%	(92.3)%	44.8%	(45.5)%

Non-GAAP Financial Measures

We use the following non-GAAP[1] financial measures as supplemental metrics in evaluating our financial performance, our financing and business decisions, and in forecasting and planning for future periods. For these reasons, management believes such measures are useful supplemental measures to investors in evaluating our performance and the performance of other companies in the health care industry. These non-GAAP financial measures should be considered as supplements to, and not substitutes for or superior to, GAAP measures.

The first of these non-GAAP measures is earnings before interest, taxes, depreciation and amortization, or EBITDA. The following table reconciles net income (loss), which we believe to be the most comparable GAAP measure, to EBITDA.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
	(In thousands)			
Net income (loss)	$ 7,569	$ 3,364	$ 62,055	$ (15,853)
Adjustments:				
Depreciation and amortization reported in the consolidated statements of cash flows	24,128	20,279	68,035	58,289
Interest expense	13,532	4,315	38,236	12,421
Income tax expense (benefit)	3,962	(492)	33,745	(15,228)
EBITDA	$ 49,191	$ 27,466	$ 202,071	$ 39,629

The second of these non-GAAP measures is adjusted net income per diluted share, continuing operations. The following table reconciles net income (loss) per diluted share, which we believe to be the most comparable GAAP measure, to adjusted net income per diluted share, continuing operations.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
	(In thousands)			
Net income (loss) per diluted share, continuing operations	$ 0.16	$ (0.01)	$ 1.15	$ (0.29)
Adjustments, net of tax:				
Depreciation and amortization of capitalized software	0.25	0.20	0.71	0.56
Stock-based compensation	0.15	0.09	0.36	0.24
Amortization of intangible assets	0.07	0.07	0.20	0.22
Amortization of convertible senior notes and lease financing obligations	0.08	0.02	0.21	0.06
Change in fair value of derivatives	—	—	0.08	0.02
Adjusted net income per diluted share, continuing operations	$ 0.71	$ 0.37	$ 2.71	$ 0.81

[1]GAAP stands for Generally Accepted Accounting Principles.

Results of Operations, Continuing Operations

Three Months Ended September 30, 2013 Compared with the Three Months Ended September 30, 2012

Health Plans Segment

Premium Revenue

Premium revenue for the third quarter of 2013 increased 9% over the third quarter of 2012, due to a 5% increase in enrollment, and a 4% increase in revenue per member per month (PMPM). The 5% enrollment increase was primarily due to the acquisition of a contract covering approximately 80,000 members in New Mexico effective August 1, 2013.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended September 30,					
	2013			2012		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 928,165	$ 161.39	67.1%	$ 913,137	$ 166.88	69.2%
Pharmacy	237,073	41.22	17.1	219,823	40.17	16.7
Capitation	162,554	28.27	11.8	142,724	26.08	10.8
Other	55,421	9.64	4.0	44,307	8.10	3.3
Total	$ 1,383,213	$ 240.52	100.0%	$ 1,319,991	$ 241.23	100.0%

Our consolidated medical care ratio decreased to 87.3% in the third quarter of 2013, from 91.1% in the third quarter of 2012. The decline in the consolidated medical care ratio was the result of improved operating results at all but one of our health plans. Medical care ratios decreased in eight of our nine health plans, while medical margin (measured as the excess of premium revenue over medical care costs) increased in the same eight of nine health plans. Medical margin improvements were most pronounced at the California, Michigan and New Mexico health plans.

Individual Health Plan Analysis

The medical care ratio at the California health plan decreased to 90.5% in the third quarter of 2013 from 96.1% in the third quarter of 2012. The lower medical care ratio was primarily the result of premium rate increases received in the first quarter of 2013.

The medical care ratio of the Florida health plan increased to 88.8% in the third quarter of 2013, from 84.0% in the third quarter of 2012 due to inpatient unit cost increases.

The medical care ratio of the Michigan health plan decreased to 82.1% in the third quarter of 2013, from 89.9% in the third quarter of 2012, primarily due to a reduction in inpatient costs.

The medical care ratio of the New Mexico health plan decreased to 85.6% in the third quarter of 2013, from 91.2% in the third quarter of 2012, primarily as a result of higher Medicaid premium rates PMPM effective January 1, 2013, and lower fee-for-service claims costs. The New Mexico health plan gained approximately 80,000 new members in the third quarter of 2013, as a result of its acquisition of Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program effective August 1, 2013.

The medical care ratio of the Ohio health plan decreased to 87.3% for the third quarter of 2013, from 89.7% for the third quarter of 2012, due to lower pharmacy and inpatient fee-for-service expense; partially offset by a combination of premium decreases and increases to fee schedules effective July 1, 2013 that combined to reduce medical margin for the third quarter by approximately 2% of premium revenue. We also experienced an additional 1.5% decrease in premium rates in Ohio effective July 1, 2013, due to a re-basing of risk adjusters.

The medical care ratio of the Texas health plan was 89.6% in the third quarter of 2013 compared with 91.9% in the third quarter of 2012 (which included the reversal of a premium deficiency reserve (PDR) of $10 million established in the second quarter of 2012). We received a blended rate increase in Texas of approximately 6%, or $6 million per month, effective September 1, 2013. In the third quarter of 2012, we received a blended rate increase of 4%, or $4.5 million per month, effective September 1, 2012; and implemented various medical cost containment initiatives in the second half of 2012.

The medical care ratio of the Utah health plan decreased to 78.7% in the third quarter of 2013, from 85.2% in the third quarter of 2012 due to both higher revenue PMPM and lower fee-for-service medical expenses PMPM.

The medical care ratio of the Washington health plan decreased to 86.3% in the third quarter of 2013, from 88.0% in the third quarter of 2012 due to higher premium revenue PMPM which was only partially offset by increased fee-for-service medical expenses PMPM.

The medical care ratio of the Wisconsin health plan decreased to 69.8% in the third quarter of 2013, from 93.5% in the third quarter of 2012 due to both higher revenue PMPM and lower fee-for-service physician expenses PMPM. Additionally, the health plan gained approximately 50,000 members in the first half of 2013 due to another health plan's recent exit from the market.

Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and medical margin by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended September 30, 2013						
	Member Months (1)	Premium Revenue		Medical Care Costs		MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM		
California	1,076	$ 184,235	$ 171.16	$ 166,774	$ 154.93	90.5%	$ 17,461
Florida	251	67,688	269.58	60,127	239.46	88.8	7,561

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) "MCR" represents medical costs as a percentage of premium revenue.
(3) "Other" medical care costs include primarily medically related administrative costs at the parent company, and direct delivery costs.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended September 30,	
	2013	2012
	(In thousands)	
Service revenue before amortization	$ 51,829	$ 48,958
Amortization recorded as reduction of service revenue	(729)	(536)
Service revenue	51,100	48,422
Cost of service revenue	40,113	37,004
General and administrative costs	1,708	1,980
Amortization of customer relationship intangibles recorded as amortization	1,282	1,282
Operating income	$ 7,997	$ 8,156

Operating income for our Molina Medicaid Solutions segment decreased $0.2 million for the three months ended September 30, 2013, compared with the same prior year period. The decrease in operating income was primarily the result of a change in the mix of transactions processed from fee-for-service claims to managed care encounters (processing fees are lower for encounters than for fee-for-service claims) and changes to state contract revenues implemented during 2012.

Results of Operations, Continuing Operations

Nine Months Ended September 30, 2013 Compared with the Nine Months Ended September 30, 2012

Health Plans Segment

Premium Revenue

Premium revenue for the nine months ended September 30, 2013 increased 13% over the nine months ended September 30, 2012, due to both higher enrollment and higher premium revenue PMPM. Medicare premium revenue was $396.7 million for the nine months ended September 30, 2013 compared with $346.6 million for the nine months ended September 30, 2012.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Nine Months Ended September 30,					
	2013			2012		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 2,674,785	$ 160.14	67.5%	$ 2,566,161	$ 162.76	69.1%
Pharmacy	691,903	41.42	17.4	606,004	38.44	16.3
Capitation	441,287	26.42	11.1	412,692	26.17	11.1
Other	157,859	9.45	4.0	130,598	8.28	3.5
Total	$ 3,965,834	$ 237.43	100.0%	$ 3,715,455	$ 235.65	100.0%

Our medical care ratio decreased to 86.5% in the nine months ended September 30, 2013, from 91.4% in the nine months ended September 30, 2012, primarily due to improved financial performance at our Texas health plan. The decline in the consolidated medical care ratio was the result of improved operating results at most of our health plans. Medical care ratios decreased in seven of our nine health plans, while medical margin (measured as the excess of premium revenue over medical care costs) increased in all nine health plans. Medical margin improvements were most pronounced at the Texas health plan.

Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Nine Months Ended September 30, 2013						
	Member Months (1)	Premium Revenue		Medical Care Costs		MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM		
California	3,132	$ 552,950	$ 176.54	$ 497,314	$ 158.78	89.9%	$ 55,636

Washington	3,352	684,466	204.22	592,398	176.75	86.5	92,068
Wisconsin	374	52,209	139.46	54,861	146.54	105.1	(2,652)
Other (3)	—	6,613	—	37,763	—	—	(31,150)
	15,767	$ 4,066,737	$ 257.93	$ 3,715,455	$ 235.65	91.4%	$ 351,282

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) "MCR" represents medical costs as a percentage of premium revenue.
(3) "Other" medical care costs include primarily medically related administrative costs at the parent company, and direct delivery costs.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Nine Months Ended September 30,	
	2013	2012
	(In thousands)	
Service revenue before amortization	$ 152,714	$ 133,193
Amortization recorded as reduction of service revenue	(2,186)	(842)
Service revenue	150,528	132,351
Cost of service revenue	119,188	98,111
General and administrative costs	6,849	7,187
Amortization of customer relationship intangibles recorded as amortization	3,846	3,846
Operating income	$ 20,645	$ 23,207

Operating income for our Molina Medicaid Solutions segment decreased $2.6 million for the nine months ended September 30, 2013, compared with the same prior year period. The decrease in operating income was primarily the result of a change in the mix of transactions processed from fee-for-service claims to managed care encounters (processing fees are lower for encounters than for fee-for-service claims) and changes to state contract revenues implemented during 2012.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses increased to 10.4% of total revenue for the three months ended September 30, 2013, compared with 8.2% of total revenue for the three months ended September 30, 2012. General and administrative expenses increased to 9.8% of total revenue for the nine months ended September 30, 2013, compared with 8.4% of total revenue for the nine months ended September 30, 2012. The increased ratio of general and administrative expenses to total revenue for both the three months and nine months ended September 30, 2013, was primarily due to higher costs incurred as a result of our preparations for significant membership growth in 2014.

Premium Tax Expense

Premium tax expense was 2.7% of premium revenue in the three months ended September 30, 2013, compared with 2.5% in the three months ended September 30, 2012, and 2.7% of premium revenue in the nine months ended September 30, 2013, compared with 2.9% in the nine months ended September 30, 2012.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is recorded in “Depreciation and amortization” in the consolidated statements of operations. Amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of operations as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading “Depreciation and amortization;”
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of “Service revenue;” and
- Amortization of capitalized software is recorded within the heading “Cost of service revenue.”

The following table presents all depreciation and amortization recorded in our consolidated statements of operations, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Three Months Ended September 30,			
	2013		2012	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 14,237	0.8%	$ 11,352	0.7%
Amortization of intangible assets, continuing operations	4,634	0.3	4,506	0.3
Depreciation and amortization, continuing operations	18,871	1.1	15,858	1.0
Depreciation and amortization, discontinued operations	—	—	176	—
Amortization recorded as reduction of service revenue	729	—	536	0.1
Amortization of capitalized software recorded as cost of service revenue	4,528	0.3	3,709	0.2
Depreciation and amortization reported in the consolidated statements of cash flows	$ 24,128	1.4%	$ 20,279	1.3%

	Nine Months Ended September 30,			
	2013		2012	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation, and amortization of capitalized software, continuing operations	$ 39,578	0.8%	$ 31,321	0.7%
Amortization of intangible assets, continuing operations	12,871	0.3	15,595	0.4
Depreciation and amortization, continuing operations	52,449	1.1	46,916	1.1
Depreciation and amortization, discontinued operations	2	—	530	—
Amortization recorded as reduction of service revenue	2,186	—	842	—
Amortization of capitalized software recorded as cost of service revenue	13,398	0.3	10,001	0.2
Depreciation and amortization reported in the consolidated statements of cash flows	$ 68,035	1.4%	$ 58,289	1.3%

Interest Expense

Interest expense increased to $13.5 million for the three months ended September 30, 2013, from $4.3 million for the three months ended September 30, 2012, and increased to $38.2 million for the nine months ended September 30, 2013, from $12.4 million for the nine months ended September 30, 2012 primarily due to the issuance of the 1.125% Notes in February 2013. Interest expense includes amortization of the discount on our convertible senior notes, which amounted to $6.1 million and $1.5 million for the three months ended September 30, 2013, and 2012, respectively, and $15.7 million and $4.4 million for the nine months ended September 30, 2013, and 2012, respectively. Interest expense in the nine months ended September 30, 2013, also includes the immediate recognition of approximately $6 million of interest expense relating to debt issuance costs. The remainder of the fees associated with that issuance, amounting to approximately $12 million, are being expensed over the life of the 1.125% Notes.

As described in further detail below, in "Future Sources and Uses of Liquidity – *Lease Financing Obligations*," lease payments under the sale-leaseback transactions adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of operations.

Other Expense

Other expense increased to $3.3 million for the nine months ended September 30, 2013, from $1.3 million for the nine months ended September 30, 2012, and was insignificant for the three months ended September 30, 2013 and 2012. Other expense includes primarily gains or losses associated with changes in the fair value of our derivative financial instruments. For the nine months ended September 30, 2012, we recorded a $1.3 million charge for the fair value of an interest rate swap derivative liability. In the second quarter of 2013 we recorded a one-time non-cash charge of $3.9 million related to warrants issued in conjunction with our convertible senior notes offering in February 2013. We settled the interest rate swap in the

second quarter of 2013, which resulted in a gain of approximately $0.4 million, partially offsetting the $3.9 million charge described above.

Income Taxes

The provision for income taxes in continuing operations is recorded at an effective rate of 33.9% for the three months ended September 30, 2013, compared with 92.3% for the three months ended September 30, 2012. The provision for income taxes in continuing operations is recorded at an effective rate of 44.8% for the nine months ended September 30, 2013, compared with 45.5% for the nine months ended September 30, 2012. The disparity between rates in the third quarters of 2013 and 2012 is primarily due to significant differences in pretax income during the applicable periods and the greater proportional impact of non-deductible expenses on lower income before taxes in 2012.

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of September 30, 2013, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income was $4.9 million for the nine months ended September 30, 2013, compared with $3.9 million for the nine months ended September 30, 2012. Our annualized portfolio yield for the nine months ended September 30, 2013 was 0.4% compared with 0.5% for the nine months ended September 30, 2012.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Liquidity

A condensed schedule of cash flows to facilitate our discussion of liquidity follows:

	Nine Months Ended September 30,		
	2013	2012	Change
	(In thousands)		
Net cash provided by operating activities	$ 111,744	$ 264,024	$ (152,280)
Net cash used in investing activities	(541,416)	(90,794)	(450,622)
Net cash provided by financing activities	490,458	48,423	442,035
Net increase in cash and cash equivalents	$ 60,786	$ 221,653	$ (160,867)

Operating Activities. The decrease in cash provided by operating activities was primarily due to the changes in receivables and deferred revenue, partially offset by increased net income. Cash flows from operations in each year were impacted by the timing of payments we receive from our states. States may pay the following month's premium payment in advance, which we record as deferred revenue, or they may delay our premium payment, which we record as a receivable. We typically receive capitation payments monthly, however the states in which we operate may decide to adjust their payment schedules which could positively or negatively impact our reported cash flows from operating activities in any given period. In such situations, however, the acceleration or delay in payment is usually only a few days in duration, meaning that the change in cash flows in any given period is usually reversed in the next. The change in receivables and deferred revenue resulted in a use of operating cash amounting to $161.7 million in the aggregate in the nine months ended September 30, 2013, compared with a source of operating cash of $103.3 million in the aggregate in the same period in 2012. Net income increased $77.9 million year over year.

Investing Activities. The increase in cash used in investing activities was primarily due to $393.5 million increased purchases of investments in 2013, a result of increased cash generated in financing activities, described below. Additionally, we paid $57.7 million in connection with business acquisitions in the third quarter of 2013.

Financing Activities. The increase in cash provided by financing activities was primarily due to 2013 activity including $538.0 million in proceeds we received from our offering of 1.125% Notes, $158.7 million received from sale-leaseback transactions, and $75.1 million from the sale of warrants, partially offset by $149.3 million paid for the purchased call option relating to Notes, $50.0 million paid for repurchases of our common stock, $47.5 million used to repay our term loan, and $40.0 million used to repay our Credit Facility.

Financial Condition

On a consolidated basis, at September 30, 2013, we had working capital of $920.8 million compared with $521.1 million at December 31, 2012. At September 30, 2013, and December 31, 2012, we had cash and investments, including restricted investments, of $1,668.6 million, and $1,196.1 million, respectively. We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

In July 2011, the Financial Accounting Standards Board (FASB) issued guidance related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (ACA). The ACA imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. The fee will be imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year.

The new guidance specifies that the liability for the fee should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. The new guidance is effective for annual reporting periods beginning after December 31, 2013, when the fee initially becomes effective. As enacted, this federal premium-based assessment is non-deductible for income tax purposes, and is anticipated to be significant. It is yet undetermined how this premium-based assessment will be factored into the calculation of our premium rates, if at all. Accordingly, adoption of this guidance and the enactment of this assessment as currently written is expected to have a material impact on our financial position, results of operations, and cash flows in future periods. We estimate that the fee in 2014 will be approximately $100.0 million.

Regulatory Capital and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Such state laws and regulations also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $601.1 million at September 30, 2013, and $549.7 million at December 31, 2012. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $472.1 million and $46.9 million as of September 30, 2013, and December 31, 2012, respectively. We anticipate that we will pay the remaining balances due for our recent New Mexico and South Carolina acquisitions (approximately $64 million in total) from available cash at the parent company.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Illinois, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of September 30, 2013, our health plans had aggregate statutory capital and surplus of approximately $637.0 million compared with the required minimum aggregate statutory capital and surplus of approximately $362.2 million. As noted above, we anticipate that the ACA annual fee on health insurers will result in the recording of a liability of approximately $100 million spread across our all of our health plans. The liability for that fee, when recorded effective January, 2014, will reduce our aggregate statutory capital and surplus by the same amount. All of our health plans were in compliance with the minimum capital requirements at September 30, 2013. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

Future Sources and Uses of Liquidity

As of September 30, 2013, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2013	2014	2015	2016	2017	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
3.75% Notes	187,000	—	187,000	—	—	—	—
	$ 737,000	$ —	$ 187,000	$ —	$ —	$ —	$ 550,000

1.125% Cash Convertible Senior Notes due 2020

On February 15, 2013, we settled the issuance of $550.0 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020 (the 1.125% Notes). This transaction included the initial issuance of $450.0 million on February 11, 2013, plus the exercise of the full amount of the $100.0 million over-allotment option on February 13, 2013. The aggregate net proceeds of the 1.125% Notes were $458.9 million, after payment of the net cost of the Call Spread Overlay described below and transaction costs. Additionally, we used $50.0 million of the net proceeds to purchase shares of our common stock, and $40.0 million to repay the principal owed under our Credit Facility.

Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 of each year, at a rate of 1.125% per annum, and commenced on July 15, 2013. The 1.125% Notes will mature on January 15, 2020 unless repurchased or converted in accordance with their terms prior to such date.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. Holders may convert their 1.125% Notes solely into cash at their option at any time prior to the close of business on the business day immediately preceding July 15, 2019 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period immediately after any five consecutive trading day period in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.125% Notes solely into cash at any time, regardless of the foregoing circumstances. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture.

The initial conversion rate will be 24.5277 shares of our common stock per $1,000 principal amount of 1.125% Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate will be subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest. In addition, following certain corporate events that occur prior to the maturity date, we will pay a cash make-whole premium by increasing the conversion rate for a holder who elects to convert its 1.125% Notes in connection with such a corporate event in certain circumstances. We may not redeem the 1.125% Notes prior to the maturity date, and no sinking fund is provided for the 1.125% Notes.

If we undergo a fundamental change (as defined in the indenture to the 1.125% Notes), holders may require us to repurchase for cash all or part of their 1.125% Notes at a repurchase price equal to 100% of the principal amount of the 1.125% Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the fundamental change repurchase date. The indenture provides for customary events of default, including cross acceleration to certain other indebtedness of ours, and our significant subsidiaries.

The 1.125% Notes are senior unsecured obligations, and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries.

The 1.125% Notes contain an embedded cash conversion option. We have determined that the embedded cash conversion option is a derivative financial instrument, required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the embedded cash conversion option transaction settles or expires. The initial fair value liability of the embedded cash conversion option was $149.3 million, which simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount).

As noted above, the reduced carrying value on the 1.125% Notes resulted in a debt discount that is amortized to the 1.125% Notes' principal amount through the recognition of interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued. The effective interest rate of the 1.125% Notes is 5.9%, which is imputed based on the amortization of the fair value of the embedded cash conversion option over the remaining term of the 1.125% Notes. As of September 30, 2013, we expect the 1.125% Notes to be outstanding until their January 15, 2020 maturity date, for a remaining amortization period of 6.3 years.

Also in connection with the settlement of the 1.125% Notes, we paid approximately $16.9 million in transaction costs. Such costs have been allocated to the 1.125% Notes, the 1.125% Call Option (defined below) and the 1.125% Warrants (defined below) according to their relative fair values. The amount allocated to the 1.125% Notes, or $12.0 million, was capitalized and will be amortized over the term of the 1.125% Notes. The aggregate amount allocated to the 1.125% Call Option and 1.125% Warrants, or $4.9 million, was recorded to interest expense in the quarter ended March 31, 2013.

1.125% Notes Call Spread Overlay

Concurrent with the issuance of the 1.125% Notes, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). These transactions represent a Call Spread Overlay, whereby the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes. We used $149.3 million of the proceeds from the settlement of the 1.125% Notes to pay for the 1.125% Call Option, and simultaneously received $75.1 million for the sale of the 1.125% Warrants, for a net cash outlay of $74.2 million for the Call Spread Overlay. The 1.125% Call Option is a derivative financial instrument.

Until April 22, 2013, the 1.125% Warrants were recorded as a derivative liability that required mark-to-market accounting treatment due to certain terms in the 1.125% Warrants that prevented such instruments being considered to be indexed in our common stock. Effective April 22, 2013, we entered into amended and restated warrant confirmations with the Counterparties to clarify these terms, such that 1.125% Warrants are no longer considered to be derivative instruments, and have been recorded to additional paid-in capital.

Aside from the initial payment of a premium to the Counterparties of $149.3 million for the 1.125% Call Option, we will not be required to make any cash payments to the Counterparties under the 1.125% Call Option, and will be entitled to receive from the Counterparties an amount of cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the 1.125% Call Options during the relevant valuation period. The strike price under the 1.125% Call Option is initially equal to the conversion price of the 1.125% Notes. Additionally, if the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. We will not receive any additional

proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances.

3.75% Convertible Senior Notes due 2014

We had $187.0 million of 3.75% Convertible Senior Notes due 2014 (the 3.75% Notes) outstanding as of September 30, 2013 and December 31, 2012. The 3.75% Notes rank equally in right of payment with our existing and future senior indebtedness. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Lease Financing Obligations

On June 12, 2013, we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of two properties, including the Molina Center located in Long Beach, California, and the building that houses our Ohio health plan located in Columbus, Ohio. We sold the two properties for $158.6 million in the aggregate. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. The carrying values of these properties, including the related intangible assets, amounted to $78.3 million in the aggregate as of September 30, 2013. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated and amortized over their remaining useful lives. The sales price of $158.6 million was recorded as a lease financing obligation, which is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of operations. Transaction costs associated with this transaction, amounting to $3.5 million, have been deferred and will be amortized over the initial lease term.

We entered into a lease for office space in February 2013 consisting of two office buildings then under construction. We have concluded that we are the accounting owner of the construction projects because of our continuing involvement in those projects. Therefore, we have recorded $18.9 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of September 30, 2013, which represents the total cost, including imputed interest, incurred by the landlord thus far in the construction projects. As of September 30, 2013, the aggregate amounts recorded to property, equipment and capitalized software, net, for both Building A and B are recorded as a lease financing obligation of $19.2 million. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of operations. In addition to the capitalization of the costs incurred by the landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was immaterial for the nine months ended September 30, 2013.

Term Loan

In December 2011, our wholly owned subsidiary, Molina Center LLC, entered into a term loan agreement with various lenders and East West Bank to borrow $48.6 million to finance a portion of the purchase price for the Molina Center, located in Long Beach, California. On June 13, 2013, we repaid the principal balance outstanding under the term loan on that date, with proceeds we received in the sale-leaseback transaction described above.

Credit Facility

On February 15, 2013, we used $40.0 million of the net proceeds from the offering of the 1.125% Notes to repay all of the outstanding indebtedness under our $170 million revolving Credit Facility, with various lenders and U.S. Bank National Association, as Line of Credit Issuer, Swing Line Lender, and Administrative Agent. As of December 31, 2012, there was $40.0 million outstanding under the Credit Facility.

We terminated the Credit Facility in connection with the closing of the offering and sale of the 1.125% Notes. Two letters of credit in the aggregate principal amount of $10.3 million that reduced the amount available for borrowing under the Credit Facility as of December 31, 2012, were transferred to direct issue letters of credit with another financial institution. Such direct issue letters of credit are collateralized by restricted investments.

Shelf Registration Statement

In the second quarter of 2012, we filed an automatic shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the registration, issuance, and sale of an indeterminate amount of our securities, including

common stock, preferred stock, senior or subordinated debt securities, or warrants. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Securities Repurchase Program

Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchase under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and other market conditions. This newly authorized repurchase program extends through December 31, 2014, and replaces in its entirety, the $75 million repurchase program adopted by the board of directors on February 13, 2013.

Contractual Obligations

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2012, was disclosed in our 2012 Annual Report on Form 10-K. Other than the transactions relating to our February 2013 offering of the 1.125% Notes, the sale-leaseback transactions and our third quarter acquisitions discussed above, there were no material changes to this previously filed information outside the ordinary course of business during the nine months ended September 30, 2013. For further discussion and maturities of our long-term debt, see Note 11 of the accompanying Notes to the Consolidated Financial Statements.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The recognition of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and
- The determination of medical claims and benefits payable.

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

(1) Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract: These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates), our revenue earned for those periods will also change. In all of these instances, our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn would lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of approximately $0.8 million and $0.3 million at September 30, 2013, and December 31, 2012, respectively.

Florida Health Plan Medical Cost Floor (Minimum): A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs (in all counties except

Broward). A similar minimum expenditure is required for total health care costs in Broward county only. At both September 30, 2013, and December 31, 2012, we had not recorded any liability under the terms of these contract provisions.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): Our contract with the state of New Mexico directs that a portion of premiums received may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit, as defined in the contract, exceed certain amounts. At both September 30, 2013, and December 31, 2012, we had not recorded any liability under the terms of these contract provisions.

Ohio Health Plan Medical Cost Floors (Minimums): Sanctions may be levied by the state if certain minimum amounts are not spent on defined medical care costs. These sanctions include the requirements to file a corrective action plan as well as an enrollment freeze.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $2.2 million and $3.2 million pursuant to our profit-sharing agreement with the state of Texas at September 30, 2013, and December 31, 2012, respectively.

Washington Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our Washington health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At September 30, 2013, we recorded a liability under the terms of these contract provisions of approximately $0.3 million. At December 31, 2012, we had not recorded any liability under the terms of this contract provision.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' health care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $18.4 million and $0.3 million as of September 30, 2013 and December 31, 2012, respectively for anticipated Medicare risk adjustment premiums.

(2) Quality incentives that allow us to recognize incremental revenue if certain quality standards are met: These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, incremental revenue of up to 3.25% of total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of September 30, 2013 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of September 30, 2013.

	Three Months Ended September 30, 2013

Taxes Based on Premiums

Certain of our health plans are assessed a tax based on premium revenue collected. The premium revenues we receive from these states include the premium tax assessment. We have reported these taxes on a gross basis, included in premium tax receipts (within revenue), and premium tax expense (within expenses), in the consolidated statements of operations. Prior to the third quarter of 2013, premium tax receipts were included in premium revenue. The presentation change affected only premium revenue amounts previously reported, by reducing premium revenue for the amount now included in premium tax receipts. There is no effect on income from continuing operations, net income, or per-share amounts. This change was made to more clearly present the portion of premium revenue not available in the general operations of our health plans. All prior periods presented have been adjusted to conform to this presentation.

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid Management Information System (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. While providing BPO services (which include claims payment and eligibility processing), we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements.

Additionally, we evaluate each required deliverable under our multiple-element service arrangements to determine whether it qualifies as a separate unit of accounting. Such evaluation is generally based on whether the deliverable has standalone value to the customer. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software-related costs and other costs. With respect to software-related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs;
- Employee costs incurred in performing transaction services;
- Vendor costs incurred in performing transaction services;
- Costs incurred in performing required monitoring of and reporting on contract performance;
- Costs incurred in maintaining and processing member and provider eligibility; and
- Costs incurred in communicating with members and providers.

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets.

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	September 30, 2013	December 31, 2012	September 30, 2012
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 393,318	$ 377,614	$ 414,725
Capitation payable	77,051	49,066	55,314
Pharmacy	45,451	38,992	42,681
Other [1]	116,886	28,858	23,743
	$ 632,706	$ 494,530	$ 536,463

(1) "Other" medical claims and benefits payable include amounts payable to certain providers for which we act as an intermediary on behalf of various state agencies without assuming financial risk. Such receipts and payments do not impact our consolidated statements of operations. As of September 30, 2013, we recorded provider payables of approximately $64.1 million for new intermediary arrangements that began in the third quarter of 2013.

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various

medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $393.3 million of our total medical claims and benefits payable of $632.7 million at September 30, 2013. Excluding amounts that we anticipate paying on behalf of capitated providers in Ohio (which we will subsequently withhold from those providers' monthly capitation payments), our IBNP liability at September 30, 2013, was $384.6 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of September 30, 2013 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding September 30, 2013, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

Increase (Decrease) in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 145,282
(4)%	96,854
(2)%	48,427
2%	(48,427)
4%	(96,854)
6%	(145,282)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of September 30, 2013 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (134,294)
(4)%	(89,529)
(2)%	(44,765)
2%	44,765
4%	89,529
6%	134,294

The following per-share amounts are based on a combined federal and state statutory tax rate of 37%, and 46.8 million diluted shares outstanding for the nine months ended September 30, 2013. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at September 30, 2013, net income for the nine months ended September 30, 2013 would increase or decrease by approximately $15.3 million, or $0.33 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at September 30, 2013, net income for the nine months ended September 30, 2013 would increase or decrease by approximately $14.1 million, or $0.30 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $76.3 million, or $1.63 per diluted share, and $70.5 million, or $1.51 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $15.3 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that our initial estimate of IBNP is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom

able to assign specific values to the reasons for a change in estimate - we only know when the circumstances for any one or more factors are out of the ordinary.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2013 and 2012 were less than what we had expected when we had established our reserves. For example, for the year ended December 31, 2012, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2011 by 9.8%. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We recognized favorable prior period claims development in the amount of $54.0 million for the nine months ended September 30, 2013. This amount represents our estimate as of September 30, 2013 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2012 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2012 was due primarily to the following factors:

- At our Washington health plan prior to July 2012, certain high-cost newborns that were approved for supplemental security income (SSI) coverage by the state were retroactively dis-enrolled from our Healthy Options (TANF) coverage, and the health plan was reimbursed for the claims paid on behalf of these members. Starting July 1, 2012, these newborns, as well as other high-cost disabled members, are now covered by the health plan under the Healthy Options Blind and Disabled (HOBD) program. At the end of 2012, we had limited claims history with which to estimate the claims liability of the HOBD members, and as a result the liability for these high-cost members was overstated.
- At our New Mexico health plan, we overestimated the impact of certain high-dollar outstanding claim payments as of December 31, 2012.
- At our Ohio health plan, we overestimated the impact of several potential high-dollar claims relating to our aged, blind or disabled (ABD) members.

We recognized favorable prior period claims development in the amount of $32.6 million for the three months ended September 30, 2013. This amount represents our estimate as of September 30, 2013 of the extent to which our initial estimate of medical claims and benefits payable at June 30, 2013 was more than the amount that will ultimately be paid out in satisfaction of that liability. This amount of favorable development was considerably less than we typically experience, and was significant enough to have a materially unfavorable impact upon our third quarter financial performance. We believe the overestimation of our claims liability at June 30, 2013 was due primarily to the following factors:

- At our Ohio health plan, we overestimated the impact of several potential high-dollar claims relating to critically ill members.
- At our Michigan health plan, we underestimated the impact of future claims overpayment recoveries when establishing reserves at June 30, 2013.
- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Texas health plan as a result of the costs associated with an unusually large number of older claims. This anomaly was caused primarily by the payment of claims that were delayed as a result of hospital provider disputes that have been resolved. The underestimation of the liability at our Texas health plan was responsible for the relatively small amount of prior period development noted above.

We recognized favorable prior period claims development in the amount of $37.7 million and $39.3 million for the nine months ended September 30, 2012, and the year ended December 31, 2012, respectively. This was primarily caused by the overestimation of our liability claims and medical benefits at December 31, 2011, as a result of the following factors:

- At our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- At our Texas health plan, we overestimated the cost of new members in STAR+PLUS, in the Dallas region.

- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Missouri health plan, as a result of the costs associated with an unusually large number of premature infants during the fourth quarter of 2011.

In estimating our claims liability at September 30, 2013, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- At our Texas health plan, we have noted an unusually large number of older claims dated older than 12 months. This has caused some distortion in the claims lag pattern that we use to estimate the incurred claims.
- At our Michigan health plan, there were a large number of claim recoveries recorded in June 2013 due to overpayments that resulted from a system configuration issue. These recoveries impacted the completion factors used to estimate incurred claims. While we attempted to remove this distortion from the claims data to develop a more accurate reserve estimate, this type of correction in claims data adds a degree of uncertainty for the Michigan reserves as of September 30, 2013.
- Our New Mexico health plan acquired approximately 80,000 new members in August 2013 from another health plan. This acquisition roughly doubled the size of the membership in a single month. For the September 30, 2013 reserve calculation, we have assumed that these new members will incur costs at about the same rate as the New Mexico members that were previously enrolled. With only two months of paid claims for these new members, it is too soon to know whether that assumption is correct or not.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2012 and for the nine months ended September 30, 2013, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the replenishment of reserves in the respective periods generally offset the benefit from the prior period.

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts displayed for “Components of medical care costs related to: Prior periods” represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported. The following table shows the components of the change in medical claims and benefits payable from continuing and discontinued operations for the periods indicated:

	Nine Months Ended September 30,		Three Months Ended September 30,		Year Ended December 31, 2012
	2013	2012	2013	2012	
	(Dollars in thousands, except per-member amounts)				
Balances at beginning of period	$ 494,530	$ 402,476	$ 465,487	$ 525,538	$ 402,476
Components of medical care costs related to:					
Current period	4,021,461	3,860,825	1,415,670	1,361,539	5,136,055
Prior periods	(54,040)	(37,689)	(32,575)	(46,968)	(39,295)
Total medical care costs	3,967,421	3,823,136	1,383,095	1,314,571	5,096,760
Payments for medical care costs related to:					
Current period	3,410,689	3,332,896	851,025	875,236	4,649,363
Prior periods	418,556	356,253	364,851	428,410	355,343
Total paid	3,829,245	3,689,149	1,215,876	1,303,646	5,004,706
Balances at end of period	$ 632,706	$ 536,463	$ 632,706	$ 536,463	$ 494,530
Benefit from prior period as a percentage of:					
Balance at beginning of period	10.9%	9.0%	7.0%	8.9%	9.8%
Premium revenue, trailing twelve months	0.9%	0.7%	0.5%	0.8%	0.7%
Medical care costs, trailing twelve months	1.0%	0.8%	0.6%	1.0%	0.8%
Claims Data:					
Days in claims payable, fee for service	41	45	41	45	40
Number of members at end of period	1,942,000	1,826,000	1,942,000	1,826,000	1,797,000
Number of claims in inventory at end of period	137,100	163,600	137,100	163,600	122,700
Billed charges of claims in inventory at end of period	$ 257,600	$ 304,600	$ 257,600	$ 304,600	$ 255,200
Claims in inventory per member at end of period	0.07	0.09	0.07	0.09	0.07
Billed charges of claims in inventory per member at end of period	$ 132.65	$ 166.81	$ 132.65	$ 166.81	$ 142.01
Number of claims received during the period	15,751,500	15,455,000	5,227,000	5,079,200	20,842,400
Billed charges of claims received during the period	$ 15,848,900	$ 14,339,700	$ 5,371,100	$ 4,951,000	$ 19,429,300

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC, a Virginia business trust registered as an open-end

management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended September 30, 2013 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. ***Legal Proceedings***

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 1A. ***Risk Factors***

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, the following risk factor was identified by the Company during the third quarter of 2013, and is a supplement to, and should be read together with, the risk factors discussed in Part I, Item 1A - Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2012, and in Part II, Item 1A - Risk Factors, in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2013. The risk factors described herein, in our 2012 Annual Report on Form 10-K, and in our third quarter report on Form 10-Q are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition, cash flows, or results of operations.

If we are required to return any alleged overpayments to the Washington Healthcare Authority, our results of operations may be adversely affected.

The Washington Health Care Authority (HCA) has communicated to our Washington health plan that it believes it has erroneously overpaid the plan with regard to certain claims, including claims for psychotropic drugs, and claims for health plan members under the Washington Community Options Program Entry System (COPES). The alleged overpayments date back to the July 1, 2012 start date of the current contract. Because of the unilateral errors underlying the overpayments, HCA has indicated an intent to seek recoupment of the allegedly overpaid amounts. Our Washington health plan is seeking additional

information from HCA regarding the factual and legal bases for any potential retroactive rate recoupment. In the event our Washington health plan is required to disgorge to HCA, in the fourth quarter of 2013, rate amounts that had been previously paid to it, our results of operations in the fourth quarter of 2013 may be adversely affected.

Item 2. ***Unregistered Sales of Equity Securities and Use of Proceeds***

Issuer Purchases of Equity Securities

Common Stock Repurchase in Connection with Offering of 1.125% Cash Convertible Senior Notes Due 2020. We used a portion of the net proceeds in this offering to repurchase $50.0 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. On February 12, 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Securities Repurchase Program. Effective as of September 30, 2013, our board of directors authorized the repurchase of up to $50 million in aggregate of our common stock. Stock repurchases under this program may be made through open-market and/or privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements and other market conditions. This newly authorized repurchase program extends through December 31, 2014, and replaces in its entirety, the $75 million repurchase program adopted by the board of directors on February 13, 2013.

Purchases of common stock made by or on our behalf during the quarter ended September 30, 2013, including shares withheld by us to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
July 1 - July 31	815	$ 37.89	—	$ 50,000,000
August 1 - August 31	1,969	$ 37.45	—	$ 50,000,000
September 1 - September 30	25,171	$ 34.94	—	$ 50,000,000
Total	27,955	$ 35.76	—	

(a) During the three months ended September 30, 2013, we withheld 27,955 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

SETTLEMENT AGREEMENT

This Settlement Agreement ("Agreement" or "Settlement Agreement") is made by and between the Department of Health Care Services ("DHCS," or the "Department") and Molina Healthcare of California and Molina Healthcare of California Partner Plan, Inc. (collectively known as "Molina"). DHCS and Molina shall be referred to collectively herein as the "Parties."

WHEREAS, the Parties have entered into contracts pursuant to which Molina provides services for DHCS under the State of California's Medi-Cal program, in exchange for reimbursement by DHCS at rates that are established pursuant to the terms of said contracts and under state and federal law; and

WHEREAS, Molina filed Notices of Dispute with respect to certain rate years in connection with the rates established and paid to it by DHCS, and the parties remain in litigation with respect to these matters; and

WHEREAS, the Parties desire to resolve the pending Notices of Dispute and litigation related thereto; and

WHEREAS, DHCS agreed to contract with Molina for the Imperial County Health Plan contract and has agreed to expedite to the extent possible any DHCS or Department of Managed Health Care regulatory filings with the intent to begin enrollment by November 1, 2013; and

WHEREAS, the Parties desire to agree upon other mechanisms for enhancing the efficiency of the Medi-Cal program while ensuring compliance with DHCS and federal requirements regarding such programs;

NOW THEREFORE, in consideration of the foregoing facts and premises, and the mutual covenants and agreements contained herein, the Parties hereby agree as follows:

Section 1. MEDI-CAL CONTRACTS

(a) DHCS agrees to extend the terms of all existing Medi-Cal managed care contracts between it and Molina, defined below, for an additional five years, such that said contracts shall expire on the following schedule:

- Contract number 07-65851 (primary) and Contract number 07-65852 (secondary): Extension through December 31, 2019, for Sacramento County
- Contract number 06-55498 (primary) and Contract number 06-55503 (secondary): Extension through March 31, 2020, for Riverside and San Bernardino Counties

- Contract number 09-86161 (primary) and Contract number 09-86162 (secondary): Extension through June 30, 2020, for San Diego County

- Contract number 13-90285 (primary) and Contract number 13-90286 (secondary): Original Contract Period of five years and Extension through October 31, 2023, for Imperial County.

(b) The Department shall not be prohibited from terminating said contracts pursuant to the provisions of Exhibit E, Attachment 2, Section 14.A of Molina's Two-Plan Contracts and Exhibit E, Attachment 2, Section 13.A. of Molina's Geographic Managed Care Contracts. For purposes of this Agreement, any termination of the aforementioned contracts pursuant to a final, appeal-exhausted court order that the contract extensions set forth in this Section 1 are not enforceable, shall not result in an obligation for the Department to pay Molina a Partial Settlement payment as set forth in Attachment A if: (i) Molina enters into a new contract with the Department subsequent to the court order for the same lines of business and geographic areas and containing substantially similar terms other than the end date of the contract, and (ii) the Department expressly determines, in writing, that such a new, replacement, or future contract shall be subject to the terms or provisions of this Settlement Agreement.

(c) If the Department enters into a new, replacement, or future contract with Molina, other than the contracts set forth in Section 1.a of this Settlement Agreement (including any Medi-Cal expansions in geographic areas covered by any of those contracts), such a new, replacement, or future contract shall not be subject to the terms of Section 3 and/or 4 of this Settlement Agreement unless the Department expressly agrees, in writing, that such a new, replacement, or future contract shall be subject to the terms of Section 3 and/or 4 of this Settlement Agreement.

Section 2. SETTLEMENT ACCOUNT AGREEMENT

The Parties agree to enter into and be bound by the terms of the Settlement Account Agreement set forth in Attachment "A," which is incorporated by reference as if its terms were fully set forth herein. Any amounts payable by the Department pursuant to the terms of the Settlement Account Agreement shall be due to Molina ninety (90) days following Molina's transmittal to the Department of its final calculation of the amount payable (the "Payment Due Date"). If the Department does not pay Molina by the Payment Due Date, such non-payment shall constitute a severable breach of this Agreement such that (a) interest shall begin to accrue on the 90th calendar day following the Payment Due Date at six percent (6%) per annum and (b) notwithstanding this severable breach of the Payment Due Date, all provisions of this Agreement shall remain in full force and effect in accordance with their terms. This settlement payment is intended to pertain to and resolve the rate years and disputes covered by this Agreement as set forth in Section 5, herein.

Section 3. ADMINISTRATIVE CONTRACT MODIFICATIONS

(a) Administrative Tolerance Ranges: DHCS agrees to work with Molina in good faith to identify and implement specific operational efficiencies and, to the extent necessary, revise any contract between Molina and DHCS to reflect such operational efficiencies. The operational efficiencies may include, but not be limited to (i) the consolidation of multiple audits regularly conducted by, or on behalf of, DHCS in connection with the administration of the Medi-Cal program; (ii) methods to streamline new member mailings to achieve a reduction in mailing and material costs; and (iii) establishment of "administrative tolerance ranges" (e.g., 95 – 98%) as constituting administratively acceptable performance standards. DHCS and Molina will discuss in good faith the metrics for which 100 percent performance standards currently exist, detailed in Attachment B, to determine which, if not all, shall be subject to a determined "administrative tolerance range".

(b) Administrative Audits: DHCS agrees to define the types, purpose, and frequency of regular audits in connection with the administration of the Medi-Cal program that DHCS performs, has control over, or that are conducted on its behalf through an Inter-Agency Agreement, with the intent of limiting and consolidating duplicative and potentially burdensome plan audits and to ensure greater efficiencies for the audits that are conducted. These audits include audits performed by DHCS as well as some performed by the Department of Managed Health Care. For purposes of effectuating its obligations under this Section 3(b), DHCS agrees to create a matrix (the "Audit Matrix") in which it will identify specific, required regular Medi-Cal program audits that it performs, has control over, or that are conducted on its behalf through an Inter-Agency Agreement (such as MCR, Administration, Quality, and Financial), and will set forth a specific scheduled timetable for such regular audits. Additionally, DHCS will exercise due diligence and make good-faith reasonable efforts to coordinate the scheduling of audits with audits conducted by entities outside of DHCS' control. DHCS and Molina recognize that the audit requirements related to the duals integration project have not yet been established and are subject to federal approval and federal oversight. DHCS agrees to include the regular audits required for the duals integration project into the Audit Matrix described in this section, and to comply with the other obligations under this Section 3(b) relating to audits to the extent allowable under the duals program.

Nothing in this Agreement shall preclude DHCS from conducting a special audit of Molina in the event that significantly adverse clinical, financial, or quality indicators warrant intervention, and Molina has failed to correct the adverse situation in a timely manner.

(c) Encounter Data Submission: DHCS and Molina agree on the importance of timely and accurate reporting of encounter data, while at the same time recognize the complexities of acquiring such data. As such, DHCS and Molina will work together in good faith to develop and agree upon an "administrative tolerance range"

for submitted encounter data (less than the 100 percent currently required), to develop a mutually agreeable level of encounter submission measurement, and to adjust any penalty provisions accordingly. The encounter "administrative tolerance range" will be structured similarly to that for the performance standards described in Section 3(b) above.

(d) The Parties agree that, to the extent the Department enters into an administrative contract modification with another contracting plan, whether by contract, settlement agreement, or otherwise, Molina shall, at its option, be entitled to adopt such modifications in lieu of or in addition to the terms set forth in this Section 3.

Section 4. LIMITATION ON RETROACTIVE RATE REDUCTIONS

DHCS hereby represents that the process it follows for developing capitated rates for Managed Care Organizations participating in Medi-Cal's Two-Plan and Geographic Managed Care models is attached hereto as Attachment "C". The Department acknowledges and agrees that Molina was not involved in the creation of Attachment C and Molina does not acknowledge its accuracy or compliance with DHCS' legal and contractual obligations. DHCS agrees that any rate reductions related to (a) imposition of copayment policies, (b) elimination of covered benefits and/or services, and/or (c) future DHCS initiated provider rate reductions, shall occur prospectively only, and following CMS approval. For any rate calculation, whether retroactive or prospective, Molina reserves the right to challenge such rates or rate changes, except as otherwise set forth in Section 5 of this Settlement Agreement. The Parties further agree that nothing in this Agreement affects the obligations of the Department to calculate and pay actuarially sound rates to Molina and, other than as set forth herein, nothing in the Agreement expands or reduces DHCS' authority to implement retroactive or prospective rate reductions. The Parties further agree that, notwithstanding this Section 4, the Department shall implement retroactive rate adjustments as required by federal law, regulation, or policy and subject to the right of Molina to challenge the implementation of such rates or rate changes. The Parties further agree that, to the extent the Department agrees to any limitation on retroactive rate adjustments with another contracting plan, whether by contract, settlement agreement, or otherwise, Molina shall, at its option, be entitled to the same limitations in lieu of, or in addition to, the terms set forth in this Section 4. The parties also agree that the Duals Demonstration Project (also known as the Cal MediConnect Project) is excluded from this Section 4 of the Agreement.

Section 5. DISMISSAL OF CLAIMS

In consideration of the terms agreed to herein by the Department, Molina hereby agrees that, within thirty days following execution by the Department of this Agreement, Molina shall request and secure dismissal of the following pending actions:

- 2006-07: DHCS Office of Admin. Hearings and Appeals Case No. MC8-0707-125-DC; and
- 2007-08: DHCS Office of Admin. Hearings and Appeals Case No. MC9-1008-480-CS; and

- 2008-09: DHCS Office of Admin. Hearings and Appeals Case No. MC10-0709-063-FL; and

- 2010-11: DHCS Office of Admin. Hearings and Appeals Case Nos. MC11-0111-583-VH and MC11-0411-774-RW.

Notwithstanding the foregoing, (1) Molina's dismissal of the 2007-08 rate dispute, DHCS Office of Administrative Hearings and Appeals, Case No. MC9-1008-480-CS and 2008-09 rate dispute, DHCS Office of Administrative Hearings and Appeals, Case No. MC10-0709-063-FL, does not affect Molina's right to participate in any rate increases that the Department may issue to contracting plans should the Department not prevail in the provider litigation pertinent to the provider rate reductions; (2) Molina does not release and hereby expressly preserves any claims it has relating to rates established for the Seniors and Persons with Disabilities ("SPD") populations for rate years June 2011- December 2013 and including DHCS Office of Administrative Hearings and Appeals, Case Nos. MC13-0613-866-MO, MC14-0713-109-MO, and any other appeals that have not yet been assigned a case number; and (3) Molina does not release and hereby expressly preserves any claims it has relating to rates established for the Healthy Families populations for Phase 1 rate years January 1, 2013-March 31, 2013, Phase 2 rate years April 1, 2013-July 31, 2013, Phase 3 rate years August 1, 2013-June 30, 2014, including DHCS Office of Administrative Hearings and Appeals, Case No. MC13-0313-587-MO and any other appeals that have not yet been assigned a case number.

In consideration of the terms agreed to herein by the Molina, the Department agrees to, and within thirty days after execution of this Agreement by both Parties, shall dismiss its appeal in the 2003-04 rate dispute, Third District Court of Appeal Case No. C068724. The Parties agree to request that the Superior Court replace the judgment in Sacramento County Superior Court Case No. 34-2008-80000132 with a stipulated judgment agreed to by the parties, attached hereto as Attachment D. In exchange for the aforementioned dismissal and the other consideration set forth herein, Molina agrees that it shall not seek to enforce, or take any action to enforce the stipulated judgment in Attachment D in Sacramento County Superior Court Case No. 34-2008-80000132, provided that the Department complies with its obligations in this Agreement. Molina further agrees that, upon receipt of any payments made by the Department pursuant to the Settlement Account Agreement, as required by this Settlement Agreement during its term, Molina will promptly file with the court a Partial Satisfaction of Judgment and/or a Full Satisfaction of Judgment, as appropriate.

Section 6. LEGAL FEES AND COSTS

Each of the Parties waives any right to costs relating to any pending Notices of Dispute and related litigation dismissed pursuant to Section 5 above, and agrees that it shall bear its own attorney fees related thereto.

Section 7. AUTHORITY TO ENTER INTO AGREEMENT; ENFORCEABILITY

DHCS and Molina hereby warrant and represent to each other that they have full power and authority to enter into this Agreement, and comply with the obligations set forth herein, including but not limited to the Settlement Account Agreement and the extensions of the contracts as set forth in Section 1 (the "Medi-Cal Contracts") and no other action on the part of either party is necessary to enter into this Agreement, the Settlement Account Agreement, or the Contract Extensions as set forth in Section 1.a. This Agreement, the Settlement Account Agreement, and the Contract Extensions as set forth in 1.a, each constitute a binding obligation on each party, enforceable in accordance with the terms of each, and with the terms of this Settlement Agreement.

Section 8. NO ADMISSION

Nothing herein shall be construed as an admission by any party hereto of any liability of any kind to the other party. DHCS and Molina acknowledge that this Agreement is simply intended to resolve pending disputes, as set forth herein, without admitting any liability.

Section 9. ENTIRE AGREEMENT

This Agreement (including the Settlement Account Agreement incorporated by reference) contains the entire understanding of the Parties, and the Parties agree that there are no representations, covenants or undertakings other than those set forth herein. DHCS and Molina each acknowledge that no other party or any agent or attorney of any other party has made any promise, representation, or warranty whatsoever, express or implied, not contained herein, concerning the subject matter hereof, to induce them to execute this Agreement, and they acknowledge that they have not executed this Agreement in reliance on any such promise, representation, or warranty not specifically contained herein.

Section 10. SUCCESSORS AND ASSIGNS

This Agreement and the covenants and conditions herein contained shall apply to, be binding upon, and inure to the benefit of the respective heirs, administrators, executors, legal representatives, assigns, successors, and agents of the Parties hereto.

Section 11. SEVERABILITY

Other than as set forth in this Section 11, the provisions of this Agreement are severable, and should any provision hereof be held unenforceable for any reason, the balance of the provisions hereof shall remain in full force and effect. The Parties shall be obligated to seek to preserve the enforceability of the provisions of this Agreement, including without limitation initiating legal action if necessary. However, in the event that the Department's obligations under Section 1 or Section 2 of this Agreement are found by a court of competent jurisdiction to be unenforceable and/or invalid, in whole or in part, following exhaustion of any appeals, then the Department shall be obligated to pay to Molina a settlement payment as set forth in Attachment A. The termination of any of the contracts set forth in Section 1.a of this Agreement or any of the contract extensions identified in Section 1.a of this Agreement, for any reason, including but not limited to, a final, appeal-exhausted court order, shall result in an obligation for the Department to pay Molina a Partial

Settlement payment as set forth in Attachment A unless, upon the termination of any of the aforementioned contracts: (i) Molina enters into a new contract with the Department, subsequent to the court order or termination, for the same lines of business and containing substantially similar terms other than the end date of the contract, and (ii) the Department expressly determines, in writing, that such a new, replacement, or future contract shall be subject to the terms or provisions of this Settlement Agreement.

Such payment shall be made to Molina within ninety (90) days following the effective date of any judgment triggering this payment obligation. In the event that DHCS does not make the payment by the date it is due, such non-payment shall constitute a severable breach of this Agreement such that (a) interest shall begin to accrue on the 90th calendar day following the date such payment is due at a rate of six percent (6%) per annum and (b) notwithstanding this severable breach, all provisions of this Agreement shall remain in full force and effect in accordance with their terms.

Section 12. CONSTRUCTION

This Agreement shall in all respects be interpreted, enforced and governed by and under the laws of the State of California. This Agreement has been, and shall be deemed to have been, jointly prepared by the Parties hereto, and any uncertainty or ambiguity found to exist herein shall be interpreted under the rules of interpretation of contracts as if each of the Parties participated equally in its preparation.

Section 13. COUNTERPARTS

This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Photographic and/or facsimile copies of such signed counterparts may be used in lieu of originals for any purposes.

Section 14. ENFORCEMENT

The Parties agree that any action relating to disputes, claims or controversies between them regarding the validity, enforcement, interpretation or breach of this Agreement shall be commenced in, and the Parties hereby stipulate to the jurisdiction only of, the Superior Court for the County of Sacramento.

Section 15. END OF ENTIRE SETTLEMENT AGREEMENT TERM AND TERMINATION OF COURT JURISDICTION

In addition to the right of the Department to terminate the contracts described in Section 1.a of this Settlement Agreement, under the terms set forth in Section 1, the parties agree that this entire Settlement Agreement, and all of its obligations (except for DHCS's obligation to pay Molina if payment has not yet occurred), shall fully terminate upon the earlier of the following:

(a) The arrival of December 31, 2018;

(b) The termination of all of the contracts between DHCS and Molina; whether initiated by DHCS, and/or Molina, mutually or otherwise; and/or by way of a final, appeal-exhausted court order; and/or any other circumstance.

The parties further agree that, other than as stated below, upon the occurrence of any event set forth in sub-paragraphs a. or b. in this section, above, no court will retain any jurisdiction over this Settlement Agreement, and the parties will not seek to either extend or enforce any court's jurisdiction over this Settlement Agreement beyond the time at which any of the events in sub-paragraphs a. or b. of this section have occurred. Moreover, once any of the events in subparagraphs a. and b. of this section have occurred, any new contracts between the Department and Molina, executed after any of the events in subparagraphs a. and b. of this section have occurred, shall not in any way be governed by the terms of this Settlement Agreement unless expressly agreed to in writing by the Department and Molina. Notwithstanding the foregoing, following a termination of this Settlement Agreement pursuant to this Section 15, the jurisdiction of Superior Court for the County of Sacramento as set forth in Section 14 shall remain in full force and effect for any actions, disputes, claims or controversies regarding the validity, enforcement, interpretation or breach of this Settlement Agreement to the extent they relate to any period of time in which this Settlement Agreement was in effect.

Section 16. AMENDMENT

This Agreement may be modified or amended only by a written instrument executed by all of the Parties hereto.

Section 17. PAYMENTS

The Department is obligated to make payments pursuant to this Agreement (including the Settlement Account Agreement incorporated by reference) subject to the appropriation of funds for that purpose by the State of California pursuant to normal recurring budget appropriation processes.

Section 18. PREVENTING AND RESOLVING RATE DISPUTES

The Parties agree that the current administrative and litigation processes for resolving disputes relating to rate setting is costly, burdensome, and time consuming. In order to minimize disputes and avoid litigation regarding the rate setting process to the extent possible, the Parties agree that it is in their mutual best interest to discuss options to avoid and resolve these issues. Accordingly, the Parties agree that they shall cooperate in good faith to resolve the issues described in this section.

IN WITNESS WHEREOF, the parties hereto have executed this agreement on the below stated date(s).

ATTACHMENT A
SETTLEMENT ACCOUNT AGREEMENT

This Settlement Account Agreement is made a part of and incorporated into the Settlement Agreement (the "Settlement Agreement") to which it is attached. The purpose of this Settlement Account Agreement is to describe the precise manner in which the Settlement Account will operate during the term of the Settlement Agreement, and to set forth other terms and conditions of the Settlement Account. Unless otherwise defined in this Settlement Account Agreement, capitalized terms shall have the meanings set forth in the Settlement Agreement.

Explanation of Settlement Account Methodology

1. The methodology for the Settlement Account shall be based on Molina's following lines of business: direct Medi-Cal contracts (including those covering Seniors and Persons with Disabilities), Healthy Families, Dual Eligibles (both Medi-Cal and Medicare portions), and any Medi-Cal expansion populations.

2. The "Settlement Account Balance" will be established on January 1, 2014, with an initial balance of zero dollars due to Molina. This balance will be adjusted annually to reflect the calendar year settlement account "surplus" earned or "deficit" incurred by the Department. A surplus results when the Settlement Percentage is positive as described in Paragraph 6, below. A deficit results when the Settlement Percentage is negative as described in Paragraph 7, below.

3. For purposes of this Settlement Account Agreement, Profit is defined as: Premiums Earned (excluding premiums to pay for the Gross Premiums Insurance Tax, Health Insurer Fee, and any other similar assessment, hereinafter collectively referred to as the "Assessment Exclusions"), less the sum of: (i) annual medical costs incurred, and (ii) general and administrative expenses. All calculated amounts shall relate to the lines of business described above in Paragraph 1. Annual medical costs incurred includes claims for services provided and paid during the specific calendar year as well as claims for services provided during the applicable calendar year and paid by June 30 of the following calendar year (the "Run-Out Period"). In the event of the early termination of a contract, the Run-Out Period shall be the six-month period following the effective date of the termination of that contract. The calculation of Profit shall not include any other income or expenses, including but not limited to investment income or expenses. Premiums Earned shall include only those premiums paid to Molina for the months of service within the Settlement Account Agreement Term (as defined in Paragraph 9 below) and shall not include any premiums paid for months of service outside the Settlement Account Agreement Term. Because the Health Insurer Fee is non-deductible for federal and State tax purposes, it is assumed that premiums will be grossed-up by the amount of the fee to

cover tax costs. If the premium is not grossed-up to cover tax costs, the Actual Profitability Margin, as defined in Paragraph 4, below, will be adjusted accordingly.

4. The Target Profitability Margin to be utilized for purposes of calculating the surplus or deficit for a calendar year shall be three and a quarter percent (3.25%). The Actual Profitability Margin is calculated for a calendar year by taking the Profit as defined in Paragraph 3 above, divided by the total Premiums Earned.

5. The Settlement Percentage for a calendar year during the Settlement Account Agreement Term (as defined in Paragraph 9 below) shall be calculated by subtracting the Target Profitability Margin from the Actual Profitability Margin each as defined in Paragraph 4. For example, if the Actual Profitability Margin for a calendar year calculated in accordance with Paragraph 4 is 4.25 percent, then the Settlement Percentage is a positive 1 percent (4.25 percent – 3.25 percent), creating a surplus. And for example, if the Actual Profitability Margin for a calendar year calculated in accordance with Paragraph 4 is 2.25 percent, then the Settlement Percentage is a negative 1.0 percent (2.25 percent – 3.25 percent), creating a deficit.

6. If the Settlement Percentage is positive, then the Department earns a settlement surplus for that calendar year in an amount equal to fifty percent (50%) of the Settlement Percentage multiplied by the Premiums Earned for the same calendar year. For calendar year 2014 only, the amount of the Department's Settlement Percentage is seventy-five (75%) percent rather than fifty percent (50%).

7. If the Settlement Percentage is negative for any calendar year, then the Department incurs a deficit for that calendar year in an amount equal to fifty percent (50%) of the Settlement Percentage multiplied by the Premiums Earned for the same calendar year. For calendar year 2014 only, the amount of the Department's Settlement Percentage is seventy-five (75%) percent rather than fifty percent (50%).

8. The Settlement Account Balance calculation shall be performed by Molina and submitted to the Department within thirty (30) days after the end of the applicable Run-Out Period. The Department shall have sixty (60) days (the "Certification Period") to certify this calculation submitted by Molina. Once this calculation has been agreed to by the parties, that dollar amount shall be added (if positive) or subtracted (if negative) to/from the Settlement Account Balance. If there is any change in the Premiums Earned by Molina for a calendar year, the Settlement Percentage, settlement account balance, and Alternative Minimum Amount calculations shall be revised based on the final Premiums Earned attributable to that calendar year. Additionally, if Molina and the Department determine that they are unable to agree to the Settlement Account Balance calculation submitted by Molina by the end of the Certification Period, then the parties shall promptly refer the matter to an independent certified public accounting firm of nationally recognized standing as mutually agreed upon by Molina and the Department (the "Disputes Auditor") for determination of the Settlement Account Balance calculation, which determination shall be final and binding on each of Molina and the Department. Each of Molina and the Department agree that they will require the Disputes Auditor to render its determination of the Settlement Account Balance calculation within thirty (30) days after the matter is referred to

the Disputes Auditor. The fees and costs incurred for the Disputes Auditor shall be split evenly between Molina and the Department.

Terms and Conditions

9. The term of this Settlement Account Agreement is four calendar years, commencing on January 1, 2014 (" Settlement Account Agreement Term").

10. At the conclusion of the Settlement Account Agreement Term and the applicable Run-Out Period, the Settlement Account Balance shall be reconciled and settled within one hundred eighty (180) calendar days. In the event the Settlement Account Balance is in a deficit position, the Department shall remit to Molina the greater of: (i) the amount of the Settlement Account Balance, or (ii) the Alternative Minimum Amount payable under Paragraph 13. In no event shall the amount payable by the Department to Molina exceed Forty Million Dollars ($40,000,000). In the event the Settlement Account Balance is in a surplus position, then neither party shall be obligated to pay the other any monies except for the Alternative Minimum Amount payable to Molina under Paragraph 13 below and any previously paid Partial Settlement Payment.

11. If the Department terminates any of Molina's contracts for the lines of business described in Paragraph 1 prior to expiration of the Settlement Account Agreement Term or if any of the contract extensions identified in Section 1.a of the Settlement Agreement are otherwise determined to be invalid as described in Section 11 of the Settlement Agreement, then a Partial Settlement of the Settlement Account Balance shall occur as described in Paragraph 12 below. In the event Molina elects to terminate a contract for the lines of business described in Paragraph 1, Molina shall not be entitled to receive a Partial Settlement Payment with regard to such terminated contract.

12. In the event a contract identified in Section 1.a of the Settlement Agreement is terminated by the Department or otherwise determined to be invalid as described in Paragraph 11 above, the Department will make a Partial Settlement Payment to Molina. The Partial Settlement Payment will be calculated as described in this Paragraph 12. Molina shall calculate the percentage of Premiums Earned the terminated contract(s) provided for all lines of business as specified in Paragraph 1 of this Attachment A. This calculation shall be based on the last full calendar year the terminated contract was in effect. Molina shall also calculate the then-applicable Alternative Minimum Amount payable (as described in Paragraph 13 below) based on all calendar years of the Settlement Account Agreement completed prior to contract termination. The Department shall, within ninety (90) days of receiving the required calculations from Molina, make a Partial Settlement Payment to Molina equal to the percentage of Premium Earned provided by the terminated contract(s) multiplied by the Alternative Minimum Amount payable as calculated in Paragraph 13 below.

13. At the conclusion of the Settlement Account Agreement Term, the Settlement Account Balance will be reconciled and settled within one hundred eighty (180) calendar days. The amount

payable by the Department to Molina shall not be less than an Alternative Minimum Amount. The Alternative Minimum Amount shall be calculated as follows. The Alternative Minimum Amount shall be equal to Forty Million Dollars ($40,000,000), less the Alternative Minimum Credits earned up to the date of the calculation. "Alternative Minimum Credits" shall include the sum of: (i) any Partial Settlement Payments previously made pursuant to Paragraph 12, plus (ii) for each calendar year where Molina's Actual Profitability Margin was above two percent (2%), the percentage difference between Molina's Actual Profitability Margin for that calendar year and two percent (2%), multiplied by 50 percent (50%), and multiplied by the Premiums Earned, for the applicable calendar year. In no event shall the Settlement Account Percentage be negative for the purposes of this Paragraph.

14. Cash settlement of the Settlement Agreement will take place within one hundred eighty (180) days after the conclusion of the Settlement Account Agreement Term.

15. A Settlement Account Balance calculation made in accordance with Paragraph 8 shall be recalculated in the event of a change in Premiums Earned which change the value of a cash settlement after the cash settlement has occurred. The difference between the original cash settlement and the recalculated cash settlement shall result in a payment from the Department to Molina, or from Molina to the Department, and shall be due no later than ninety (90) days after payment of revised Premiums Earned is made. Interest shall be assessed on any payment required by this Paragraph at the same rate as is assessed on any revised Premiums Earned that triggered payment pursuant to this Paragraph. Interest shall accrue from the date the original cash settlement is paid.

16. Section 17 of the Settlement Agreement applies to all payments made by the Department under this Settlement Account Agreement.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO
RULES 13a-14(a)/15d-14(a)
UNDER THE SECURITIES EXCHANGE
ACT OF 1934, AS AMENDED

I, Joseph M. Molina, M.D., certify that:

1. I have reviewed the report on Form 10-Q for the period ended September 30, 2013 of Molina Healthcare, Inc.;

2. Based on my knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report;

3. Based on my knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in the report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), and internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended), for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period for which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in the report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the report based on such evaluation; and

(d) Disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and to the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MOLINA HEALTHCARE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
June 30, 2013

1. Basis of Presentation

Organization and Operations

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of June 30, 2013, these health plans served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of primary care community clinics in California, Florida, New Mexico, and Washington.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts are renewable at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in retaining their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan, Alliance for Community Health, L.L.C., was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, the Missouri health plan's prior contract with the state expired without renewal on June 30, 2012 subject to certain transition obligations. On April 5, 2013, the Missouri health plan assigned its affiliate, Molina Healthcare of Illinois, Inc., substantially all of its assets and liabilities. Additionally, the Missouri health plan surrendered its certificate of authority as a health maintenance organization. The Missouri health plan's revenues amounted to $0.2 million and $113.8 million for the six months ended June 30, 2013 and 2012, respectively.

Until the second quarter of 2013, we reported the results of the Missouri health plan in continuing operations because of our continuing significant involvement in the payment of medical claims incurred on or prior to June 30, 2012, for that entity. On May 13, 2013, we abandoned our equity interests in the Missouri health plan to an unrelated entity, and assigned the Missouri health plan's surviving rights, duties and obligations (which we believe to be insignificant) to Molina Healthcare of Illinois, Inc. Effective June 30, 2013, the transition obligations associated with the Missouri health plan's contract with the state terminated. As a result of these activities, we commenced reporting the Missouri health plan as a discontinued operation as of June 30, 2013. In connection with the abandonment of our equity interests in the Missouri health plan to an unrelated entity, we recognized a $9.5 million tax benefit for the tax deduction associated with the basis of such equity interests, which is included in discontinued operations in our consolidated statement of operations. Additionally, we recognized a pretax loss of $0.5 million for the write off of the Missouri health plan's remaining assets in the second quarter of 2013.

Our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas. For example, our Texas health plan added significant membership effective March 1, 2012, in service areas we had not previously served (the Hidalgo and El Paso service areas); and among populations we had not previously served within existing service areas, such as the Temporary Assistance for Needy Families, or TANF, population in the Dallas service area. Additionally, the health benefits provided to our TANF and ABD members in Texas under our contracts with the state were expanded to include inpatient facility and pharmacy services effective March 1, 2012.

On July 3, 2013, we announced that our New Mexico health plan has entered into a definitive agreement to assume Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program. Lovelace Community Health Plan currently participates in the New Mexico Medicaid Salud! State Coverage Insurance Program and arranges for healthcare services for approximately 84,000 New Mexicans. Our New Mexico health plan serves over 92,000 Medicaid members across the state. Subject to satisfaction of customary closing conditions, we anticipate completing the transaction on August 1, 2013; the total payment to Lovelace Community Health Plan will be based on the membership transferred as of that date.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intended to award the contract for a replacement Medicaid Management Information System (MMIS) to a different vendor, CNSI. However, in March 2013, the state of Louisiana cancelled its contract award to CNSI. CNSI is currently challenging the contract cancellation. The state has informed us that we will continue to perform under our current contract until a successor is named. At such time as a new RFP may be issued, we intend to respond to the state's RFP. For the six months ended June 30, 2013, our revenue under the Louisiana MMIS contract was approximately $20.2 million, or 20.3% of total service revenue. So long as our Louisiana MMIS contract continues, we expect to recognize approximately $40 million of service revenue annually under this contract.

Consolidation and Interim Financial Information

The consolidated financial statements include the accounts of Molina Healthcare, Inc., its subsidiaries and variable interest entities in which Molina Healthcare, Inc. is considered to be the primary beneficiary. Such variable interest entities are insignificant to our consolidated financial position and results of operations. In the opinion of management, all adjustments considered necessary for a fair presentation of the results as of the date and for the interim periods presented have been included; such adjustments consist of normal recurring adjustments. All significant intercompany balances and transactions have been eliminated. The consolidated results of operations for the current interim period are not necessarily indicative of the results for the entire year ending December 31, 2013.

The unaudited consolidated interim financial statements have been prepared under the assumption that users of the interim financial data have either read or have access to our audited consolidated financial statements for the fiscal year ended December 31, 2012. Accordingly, certain disclosures that would substantially duplicate the disclosures contained in the December 31, 2012 audited consolidated financial statements have been omitted. These unaudited consolidated interim financial statements should be read in conjunction with our December 31, 2012 audited consolidated financial statements.

Reclassifications

We have reclassified certain amounts in the 2012 consolidated balance sheet, and statements of operations and cash flows to conform to the 2013 presentation.

2. Significant Accounting Policies

Revenue Recognition

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

(1) Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract: These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change

from the amounts previously reported (due to changes in estimates), our revenue earned for those periods will also change. In all of these instances, our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn would lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of approximately $0.7 million and $0.3 million at June 30, 2013, and December 31, 2012, respectively.

Florida Health Plan Medical Cost Floor (Minimum): A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs (in all counties except Broward). A similar minimum expenditure is required for total health care costs in Broward county only. At both June 30, 2013, and December 31, 2012, we had not recorded any liability under the terms of these contract provisions.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): Our contract with the state of New Mexico directs that a portion of premiums received may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit, as defined in the contract, exceed certain amounts. At both June 30, 2013, and December 31, 2012, we had not recorded any liability under the terms of these contract provisions.

Ohio Health Plan Medical Cost Floors (Minimums): Sanctions may be levied by the state if certain minimum amounts are not spent on defined medical care costs. These sanctions include the requirements to file a corrective action plan as well as an enrollment freeze.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $3.9 million and $3.2 million pursuant to our profit-sharing agreement with the state of Texas at June 30, 2013, and December 31, 2012, respectively.

Washington Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our Washington health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At June 30, 2013, and December 31, 2012, we had not recorded any liability under the terms of this contract provision.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to the Centers for Medicare and Medicaid Services, or CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $7.1 million and $0.3 million as of June 30, 2013 and December 31, 2012, respectively for anticipated Medicare risk adjustment premiums.

(2) Quality incentives that allow us to recognize incremental revenue if certain quality standards are met: These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, incremental revenue of up to 3.25% of total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of June 30, 2013 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of June 30, 2013.

	Three Months Ended June 30, 2013				
	Maximum Available Quality Incentive Premium - Current Year	Amount of Current Year Quality Incentive Premium Revenue Recognized	Amount of Quality Incentive Premium Revenue Recognized from Prior Year	Total Quality Incentive Premium Revenue Recognized	Total Revenue Recognized

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid Management Information System (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. While providing BPO services (which include claims payment and eligibility processing), we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements.

Additionally, we evaluate each required deliverable under our multiple-element service arrangements to determine whether it qualifies as a separate unit of accounting. Such evaluation is generally based on whether the deliverable has standalone value to the customer. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable

evidence of fair value for the undelivered elements in the contracts. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software-related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs;
- Employee costs incurred in performing transaction services ;
- Vendor costs incurred in performing transaction services;
- Costs incurred in performing required monitoring of and reporting on contract performance ;
- Costs incurred in maintaining and processing member and provider eligibility ; and
- Costs incurred in communicating with members and providers .

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets .

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally greater than the U.S. federal statutory rate primarily because of state taxes and non-deductible compensation under a provision of the Affordable Care Act that limits deductions claimed by health insurers on compensation earned after December 31, 2009 that is paid after December 31, 2012. The effective tax rate may be subject to fluctuations during the year as new information is obtained. Such information may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pretax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences

between the financial reporting basis and the tax basis of our assets and liabilities, along with net operating loss and tax credit carryovers.

The total amount of unrecognized tax benefits was $10.6 million as of June 30, 2013 and December 31, 2012. Approximately $8.4 million of the unrecognized tax benefits recorded at June 30, 2013 and December 31, 2012, relate to a tax position claimed on a state refund claim that will not result in a cash payment for income taxes if our claim is denied. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was $7.4 million as of June 30, 2013 and December 31, 2012. We expect that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities may decrease by as much as $8.6 million due to the expiration of statute of limitations and the resolution to the state refund claim described above.

Our continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits in income tax expense. As of June 30, 2013, and December 31, 2012, we had accrued $75,000 and $56,000, respectively, for the payment of interest and penalties.

Recent Accounting Pronouncements

Reclassifications Out of Accumulated Other Comprehensive Income . In February 2013, the Financial Accounting Standards Board (FASB) issued guidance for the reporting of amounts reclassified out of accumulated other comprehensive income. The new guidance requires entities to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. generally accepted accounting principles (GAAP) to be reclassified in its entirety to net income. The new guidance does not change the current requirements for reporting net income or other comprehensive income in financial statements and is effective prospectively for reporting periods beginning after December 15, 2012. The adoption of this new guidance in 2013 did not impact our financial position, results of operations or cash flows.

Balance Sheet Offsetting. In December 2011, the FASB issued guidance for new disclosure requirements related to the nature of an entity's rights of set-off and related arrangements associated with its financial instruments and derivative instruments. The new guidance is effective for annual reporting periods, and interim periods within those years, beginning on or after January 1, 2013. The adoption of this new guidance in 2013 did not impact our financial position, results of operations or cash flows.

Federal Premium-Based Assessment. In July 2011, the FASB issued guidance related to accounting for the fees to be paid by health insurers to the federal government under the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (ACA). The ACA imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. The fee will be imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year.

The new guidance specifies that the liability for the fee should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. The new guidance is effective for annual reporting periods beginning after December 31, 2013, when the fee initially becomes effective. As enacted, this federal premium-based assessment is non-deductible for income tax purposes, and is anticipated to be significant. It is yet undetermined how this premium-based assessment will be factored into the calculation of our premium rates, if at all. Accordingly, adoption of this guidance and the enactment of this assessment as currently written will have a material impact on our financial position, results of operations, or cash flows in future periods. We are currently evaluating the impact of the fee to our financial position, results of operations and cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants (AICPA), and the Securities and Exchange Commission (SEC) did not have, or are not believed by management to have, a material impact on our present or future consolidated financial statements.

3. Net Income per Share

The following table sets forth the calculation of the denominators used to compute basic and diluted net income per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
	(In thousands)			
Shares outstanding at the beginning of the period	45,415	46,347	46,762	45,815
Weighted-average number of shares repurchased	—	—	(1,248)	—
Weighted-average number of shares issued	31	8	198	361
Denominator for basic net income per share	45,446	46,355	45,712	46,176
Dilutive effect of employee stock options and stock grants (1)	378	—	488	—
Dilutive effect of convertible senior notes	683	—	306	—
Denominator for diluted net income per share (2)	46,507	46,355	46,506	46,176

(1) Unvested restricted shares are included in the calculation of diluted income per share when their grant date fair values are below the average fair value of the common shares for each of the periods presented. Options to purchase common shares are included in the calculation of diluted income per share when their exercise prices are below the average fair value of the common shares for each of the periods presented. For the three and six months ended June 30, 2013 there were no anti-dilutive weighted restricted shares. For the three and six months ended June 30, 2013 there were approximately 60,000 and 42,800 anti-dilutive weighted options, respectively. Potentially dilutive unvested restricted shares and stock options were not included in the computation of diluted loss per share for the three and six months ended June 30, 2012, because to do so would have been anti-dilutive.

(2) Potentially dilutive shares issuable pursuant to our 1.125% Warrants (defined in Note 10, "Long-Term Debt") were not included in the computation of diluted income per share for the three and six month period ended June 30, 2013, because to do so would have been anti-dilutive. Potentially dilutive shares issuable pursuant to our 3.75% Notes (defined in Note 10, "Long-Term Debt") were not included in the computation of diluted loss per share for the three and six month period ended June 30, 2012, because to do so would have been anti-dilutive.

4. Stock-Based Compensation

At June 30, 2013, we had employee equity incentives outstanding under two plans: (1) the 2011 Equity Incentive Plan; and (2) the 2002 Equity Incentive Plan (from which equity incentives are no longer awarded).

In March 2013, our named executive officers were granted restricted stock awards with performance conditions as follows: our chief executive officer was awarded 186,858 shares, our chief financial officer was awarded 93,429 shares, our chief operating officer was awarded 62,286 shares, our chief accounting officer was awarded 28,029 shares, and our general counsel was awarded 21,800 shares. These awards were apportioned into four equal increments, and will vest in accordance with the following four measures: (i) 1/4th will vest in equal 1/3rd increments over three years on March 1, 2014, March 1, 2015, and March 1, 2016; (ii) 1/4th will vest upon our achievement of three-year Total Stockholder Return as determined by Institutional Shareholder Services Inc. (ISS) calculations for the three-year period ending December 31, 2013 equal to or greater than the 50th percentile within our ISS peer group; (iii) 1/4th shall vest upon our achievement of total revenue in any of the 2013, 2014, or 2015 fiscal years equal to or greater than $12 billion; and (iv) 1/4th shall vest upon our achievement of the three-year earnings before interest, taxes, depreciation and amortization (EBITDA) margin percentage for the three-year period ending December 31, 2013 equal to or greater than 2.5%. In the event the vesting conditions are not achieved, the awards shall lapse. As of June 30, 2013, such performance goals have not yet been met, but we do expect the awards to vest in full.

Charged to general and administrative expenses, total stock-based compensation expense was as follows for the three month and six month periods ended June 30, 2013 and 2012:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
	(In thousands)			
Restricted stock and performance awards	$ 7,111	$ 4,452	$ 10,959	$ 8,850
Employee stock purchase plan and stock options	618	694	1,191	962
	$ 7,729	$ 5,146	$ 12,150	$ 9,812

As of June 30, 2013, there was $35.2 million of total unrecognized compensation expense related to unvested restricted share awards, which we expect to recognize over a remaining weighted-average period of 1.9 years. Also as of June 30, 2013,

there was $0.7 million of total unrecognized compensation expense related to unvested stock options, which we expect to recognize over a weighted-average period of 2.5 years.

Restricted stock activity for the six months ended June 30, 2013 is summarized below:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance as of December 31, 2012	986,577	$ 23.74
Granted	1,038,880	31.53
Vested	(495,221)	23.64
Forfeited	(21,751)	26.63
Unvested balance as of June 30, 2013	1,508,485	29.10

The total fair value of restricted stock and stock unit awards, including those with performance conditions, granted during the six months ended June 30, 2013 and 2012 was $33.1 million and $22.4 million, respectively. The total fair value of restricted stock and stock unit awards vested during the six months ended June 30, 2013 and 2012 was $16.2 million and $23.6 million, respectively.

Stock option activity for the six months ended June 30, 2013 is summarized below:

	Options	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual term
			(In thousands)	(Years)
Outstanding as of December 31, 2012	414,061	$ 22.39		
Granted	45,000	33.02		
Exercised	(54,500)	17.93		
Forfeited	(300)	17.63		
Outstanding as of June 30, 2013	404,261	24.18	$ 5,255	3.8
Stock options exercisable and expected to vest as of June 30, 2013	404,261	24.18	$ 5,255	3.8
Exercisable as of June 30, 2013	349,261	22.74	$ 5,045	2.9

The weighted-average grant date fair value per share of stock options awarded to the new members of our board of directors during the six months ended June 30, 2013 was $14.67. The weighted-average grant date fair value per share of the stock option awarded to the director appointed during 2012 was $13.97. To determine the fair values of these stock options we applied risk-free interest rates of 1.1% to 1.4%, expected volatilities of 41.3% to 43.0%, dividend yields of 0%, and expected lives of 6 years to 7 years.

5. Fair Value Measurements

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, a derivative asset, trade accounts payable, medical claims and benefits payable, long-term debt, a derivative liability, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair values because of the relatively short period of time between the origination of these instruments and their expected realization or payment. For our financial instruments measured at fair value on a recurring basis, we prioritize the inputs used in measuring fair value according to a three-tier fair value hierarchy as follows:

- *Level 1 — Observable inputs such as quoted prices in active markets:* Our Level 1 financial instruments recorded at fair value consist of investments including government-sponsored enterprise securities (GSEs) and U.S. treasury notes that are classified as current investments in the accompanying consolidated balance sheets. These financial instruments are actively traded and therefore the fair value for these securities is based on quoted market prices on one or more securities exchanges.

- *Level 2 — Inputs other than quoted prices in active markets that are either directly or indirectly observable:* Our Level 2 financial instruments recorded at fair value consist of investments including corporate debt securities, municipal securities, and certificates of deposit that are classified as current investments in the accompanying consolidated balance sheets. Our investments classified as Level 2 are traded frequently though not necessarily daily. Fair value for these investments is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets.
- *Level 3 — Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions:* Our Level 3 financial instruments recorded at fair value include non-current auction rate securities that are designated as available-for-sale, and are reported at fair value of $12.5 million (par value of $13.4 million) as of June 30, 2013. To estimate the fair value of these securities we use valuation data from our primary pricing source, a third party who provides a marketplace for illiquid assets with over 10,000 participants including global financial institutions, hedge funds, private equity funds, mutual funds, corporations and other institutional investors. This valuation data is based on a range of prices that represent indicative bids from potential buyers. To validate the reasonableness of the data, we compare these valuations to data from two other third-party pricing sources, which also provide a range of prices representing indicative bids from potential buyers. We have concluded that these estimates, given the lack of market available pricing, provide a reasonable basis for determining the fair value of the auction rate securities as of June 30, 2013.

  Additionally, Level 3 financial instruments include derivative financial instruments comprising the 1.125% Call Option asset, and the embedded cash conversion option liability. These derivatives are not actively traded and are valued based on an option pricing model that uses observable and unobservable market data for inputs. Significant market data inputs used to determine fair value as of June 30, 2013 included our common stock price, time to maturity of the derivative instruments, the risk-free interest rate, and the implied volatility of our common stock. As described further in Note 10, “Long-Term Debt,” and Note 11, “Derivative Financial Instruments,” the 1.125% Call Option asset and the embedded cash conversion option liability were designed such that changes in their fair values would offset, with minimal impact to the consolidated statements of operations. Therefore, the sensitivity of changes in the unobservable inputs to the option pricing model for such instruments is mitigated.

Our financial instruments measured at fair value on a recurring basis at June 30, 2013, were as follows:

	Total	Level 1	Level 2	Level 3
	(In thousands)			
Corporate debt securities	$ 463,723	$ —	$ 463,723	$ —
GSEs	84,101	84,101	—	—
Municipal securities	105,936	—	105,936	—
U.S. treasury notes	26,495	26,495	—	—
Certificates of deposit	38,289	—	38,289	—
Auction rate securities	12,527	—	—	12,527
1.125% Call Option derivative asset	207,123	—	—	207,123
Total assets measured at fair value on a recurring basis	$ 938,194	$ 110,596	$ 607,948	$ 219,650
Embedded cash conversion option derivative liability	$ 207,017	$ —	$ —	$ 207,017

Our financial instruments measured at fair value on a recurring basis at December 31, 2012, were as follows:

	Total	Level 1	Level 2	Level 3
		(In thousands)		
Corporate debt securities	$ 191,008	$ —	$ 191,008	$ —
GSEs	29,525	29,525	—	—
Municipal securities	75,848	—	75,848	—
U.S. treasury notes	35,740	35,740	—	—
Certificates of deposit	10,724	—	10,724	—
Auction rate securities	13,419	—	—	13,419
Total assets measured at fair value on a recurring basis	$ 356,264	$ 65,265	$ 277,580	$ 13,419
Interest rate swap derivative liability	$ 1,307	$ —	$ 1,307	$ —

The following tables present activity relating to our assets (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	Changes in Level 3 Instruments for the Six Months Ended June 30, 2013		
	Total	Auction Rate Securities	Derivatives, Net
		(In thousands)	
Balance at December 31, 2012	$ 13,419	$ 13,419	$ —
Net unrealized gains included in other comprehensive income	358	358	—
Net unrealized gains (losses) included in other expense	(3,817)	—	(3,817)
Issuances	(75,074)	—	(75,074)
Settlements and derivative redesignation	77,747	(1,250)	78,997
Balance at June 30, 2013	$ 12,633	$ 12,527	$ 106
The amount of total unrealized gains for the period included in other comprehensive income attributable to the change in accumulated other comprehensive losses relating to assets still held at June 30, 2013	$ 290	$ 290	$ —

	Changes in Level 3 Instruments for the Year Ended December 31, 2012		
	Total	Auction Rate Securities	Derivatives, Net
		(In thousands)	
Balance at December 31, 2011	$ 16,134	$ 16,134	$ —

Fair Value Measurements – Disclosure Only

The carrying amounts and estimated fair values of our long-term debt, as well as the applicable fair value hierarchy tiers, are contained in the tables below. Our convertible senior notes are classified as Level 2 financial instruments. Fair value for these securities is determined using a market approach based on quoted prices for similar securities in active markets or quoted prices for identical securities in inactive markets. As described in greater detail Note 10, "Long-Term Debt," we recorded lease financing obligations in connection with sale-leaseback transactions executed in the first half of 2013. The lease financing obligations are classified as Level 3 financial instruments because certain inputs used to determine their fair value are unobservable. At June 30, 2013, the carrying amount of the lease financing obligations approximate their fair value because of the short period of time between the origination of the obligations in 2013, and June 30, 2013. The credit facility was repaid and terminated effective February 15, 2013, and the term loan was repaid on June 13, 2013.

	June 30, 2013				
	Carrying Value	Total Fair Value	Level 1	Level 2	Level 3
			(In thousands)		
1.125% Notes	$ 407,215	$ 608,416	$ —	$ 608,416	$ —

6. Investments

The following tables summarize our investments as of the dates indicated:

	June 30, 2013			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Corporate debt securities	$ 465,943	$ 215	$ 2,436	$ 463,722
GSEs	84,310	9	218	84,101
Municipal securities	106,933	103	1,100	105,936
U.S. treasury notes	26,557	11	72	26,496
Certificates of deposit	38,291	3	5	38,289
Subtotal - current investments	722,034	341	3,831	718,544
Auction rate securities	13,400	—	873	12,527
	$ 735,434	$ 341	$ 4,704	$ 731,071

	December 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
		(In thousands)		
Corporate debt securities	$ 190,545	$ 528	$ 65	$ 191,008
GSEs	29,481	45	1	29,525
Municipal securities	75,909	185	246	75,848
U.S. treasury notes	35,700	42	2	35,740
Certificates of deposit	10,715	9	—	10,724
Subtotal - current investments	342,350	809	314	342,845
Auction rate securities	14,650	—	1,231	13,419
	$ 357,000	$ 809	$ 1,545	$ 356,264

The contractual maturities of our investments as of June 30, 2013 are summarized below:

	Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 348,784	$ 348,700
Due one year through five years	373,250	369,844
Due after ten years	13,400	12,527
	$ 735,434	$ 731,071

Gross realized gains and gross realized losses from sales of available-for-sale securities are calculated under the specific identification method and are included in investment income. Net realized investment gains for the three months ended June 30, 2013, and 2012 were $48,000 and $174,000, respectively. Net realized investment gains for the six months ended June 30, 2013, and 2012 were $142,000 and $238,000, respectively.

We monitor our investments for other-than-temporary impairment. For investments other than our auction rate securities, discussed below, we have determined that unrealized gains and losses at June 30, 2013, and December 31, 2012, are temporary in nature, because the change in market value for these securities has resulted from fluctuating interest rates, rather than a deterioration of the credit worthiness of the issuers. So long as we hold these securities to maturity, we are unlikely to experience gains or losses. In the event that we dispose of these securities before maturity, we expect that realized gains or losses, if any, will be immaterial.

The following tables segregate those available-for-sale investments that have been in a continuous loss position for less than 12 months, and those that have been in a loss position for 12 months or more as of June 30, 2013.

	In a Continuous Loss Position for Less than 12 Months			In a Continuous Loss Position for 12 Months or More		
	Estimated Fair Value	Unrealized Losses	Total Number of Securities	Estimated Fair Value	Unrealized Losses	Total Number of Securities
	(Dollars in thousands)					
Corporate debt securities	$ 349,918	$ 2,436	158	$ —	$ —	—
Municipal securities	82,592	1,100	100	—	—	—
GSEs	70,453	218	27	—	—	—
U.S. treasury notes	20,720	72	17	—	—	—
Certificates of deposit	4,743	5	19	—	—	—

Auction rate securities	—	—	—	13,419	1,231	21
	$ 89,195	$ 314	72	$ 13,419	$ 1,231	21

Auction Rate Securities

Due to events in the credit markets, the auction rate securities held by us experienced failed auctions beginning in the first quarter of 2008, and such auctions have not resumed. Therefore, quoted prices in active markets have not been available since

early 2008. Our investments in auction rate securities are collateralized by student loan portfolios guaranteed by the U.S. government, and the range of maturities for such securities is from 18 years to 34 years. Considering the relative insignificance of these securities when compared with our liquid assets and other sources of liquidity, we have no current intention of selling these securities nor do we expect to be required to sell these securities before a recovery in their cost basis. For this reason, and because the decline in the fair value of the auction securities was not due to the credit quality of the issuers, we do not consider the auction rate securities to be other-than-temporarily impaired at June 30, 2013. At the time of the first failed auctions during first quarter 2008, we held a total of $82.1 million in auction rate securities at par value; since that time, we have settled $68.7 million of these instruments at par value.

For the six months ended June 30, 2013, and 2012, we recorded pretax unrealized gains of $0.4 million and $1.0 million, respectively, to accumulated other comprehensive income for the changes in their fair value. Any future fluctuation in fair value related to these instruments that we deem to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If we determine that any future valuation adjustment was other-than-temporary, we would record a charge to earnings as appropriate.

7. Receivables

Receivables consist primarily of amounts due from the various states in which we operate. Accounts receivable were as follows:

	June 30, 2013	December 31, 2012
	(In thousands)	
Health Plans segment:		
California	$ 94,479	$ 28,553
Florida	1,277	953
Michigan	11,087	12,873
New Mexico	11,720	9,059
Ohio	37,103	40,980
Texas	4,647	7,459
Utah	4,507	3,359
Washington	15,292	17,587
Wisconsin	16,332	4,098
Other	852	2,177
Total Health Plans segment	197,296	127,098
Molina Medicaid Solutions segment	16,480	22,584
	$ 213,776	$ 149,682

8. Restricted Investments

Pursuant to the regulations governing our Health Plans segment subsidiaries, we maintain statutory deposits and deposits required by state authorities in certificates of deposit and U.S. treasury securities. We also maintain restricted investments as protection against the insolvency of certain capitated providers. Additionally, in connection with the Molina Medicaid Solutions segment contracts with the states of Maine and Idaho, we maintain restricted investments as collateral for letters of credit. The

following table presents the balances of restricted investments:

	June 30, 2013	December 31, 2012
	(In thousands)	
California	$ 373	$ 373
Florida	8,492	5,738
Michigan	1,014	1,014
New Mexico	15,917	15,915
Ohio	9,081	9,082
Texas	3,500	3,503
Utah	3,314	3,126
Washington	151	151
Other	4,792	5,199
Total Health Plans segment	46,634	44,101
Molina Medicaid Solutions segment	10,301	—
	$ 56,935	$ 44,101

The contractual maturities of our held-to-maturity restricted investments as of June 30, 2013 are summarized below.

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due in one year or less	$ 52,694	$ 52,697
Due one year through five years	4,241	4,238
	$ 56,935	$ 56,935

9. Medical Claims and Benefits Payable

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts displayed for “Components of medical care costs related to: Prior periods” represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported. The following table shows the components of the change in medical claims and benefits payable from continuing and discontinued operations as of the periods indicated:

	Six Months Ended June 30, 2013	Three Months Ended June 30, 2013	Year Ended Dec. 31, 2012
		(Dollars in thousands)	
Balances at beginning of period	$ 494,530	$ 491,145	$ 402,476
Components of medical care costs related to:			
Current period	2,647,083	1,345,592	5,136,055
Prior periods	(62,757)	(50,020)	(39,295)
Total medical care costs	2,584,326	1,295,572	5,096,760
Payments for medical care costs related to:			
Current period	2,206,474	940,186	4,649,363
Prior periods	406,895	381,044	355,343
Total paid	2,613,369	1,321,230	5,004,706
Balances at end of period	$ 465,487	$ 465,487	$ 494,530
Benefit from prior period as a percentage of:			
Balance at beginning of period	12.7%	10.2%	9.8%
Premium revenue, trailing twelve months	1.0%	0.8%	0.7%
Medical care costs, trailing twelve months	1.2%	1.0%	0.8%

Assuming that our initial estimate of claims incurred but not paid (IBNP) is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate - we only know when the circumstances for any one or more factors are out of the ordinary.

As indicated above, the amounts ultimately paid out on our liabilities in fiscal years 2013 and 2012 were less than what we had expected when we had established our reserves. For example, for the year ended December 31, 2012, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2011 by 9.8%. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We recognized favorable prior period claims development in the amount of $62.8 million for the six months ended June 30, 2013. This amount represents our estimate, as of June 30, 2013, of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2012 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2012 was due primarily to the following factors:

- At our Texas health plan, STAR+PLUS (the state's program for ABD members) membership declined during mid– to late– 2012. This caused a reduction in costs per member that we did not fully recognize in our December 31, 2012 reserve estimates.
- At our Washington health plan, prior to July 2012, certain high-cost newborns that were approved for supplemental security income (SSI) coverage by the state were retroactively dis-enrolled from our Healthy Options (TANF) coverage, and the health plan was reimbursed for the claims paid on behalf of these members. Starting July 1, 2012, these newborns, as well as other high-cost disabled members, are now covered by the health plan under the Healthy Options Blind and Disabled (HOBD) program. At the end of 2012, we had limited claims history with which to estimate the claims liability of the HOBD members, and as a result the liability for these high-cost members was overstated.
- For our New Mexico health plan, we overestimated the impact of certain high-dollar outstanding claim payments as of December 31, 2012.

We recognized favorable prior period claims development in the amount of $50.0 million for the three months ended June 30, 2013. This amount represents our estimate as of June 30, 2013, of the extent to which our initial estimate of medical claims and benefits payable at March 31, 2013 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at March 31, 2013 was due primarily to the following factors:

- At our Washington health plan, we had limited claims history with which to estimate the incurred claims for members enrolled in the HOBD program. Because claims on this group of members were being paid at a rate faster than expected, the reserves for unpaid claims were overstated.
- At our Ohio and New Mexico health plans, we overestimated the impact of several potential high-dollar claims on critically ill members.

We recognized favorable prior period claims development in the amount of $36.4 million and $39.3 million for the six months ended June 30, 2012, and the year ended December 31, 2012, respectively. This was primarily caused by the overestimation of our liability claims and medical benefits at December 31, 2011, as a result of the following factors:

- At our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- At our Texas health plan, we overestimated the cost of new members in STAR+PLUS, in the Dallas region.
- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Missouri health plan, as a result of the costs associated with an unusually large number of premature infants during the fourth quarter of 2011.

In estimating our claims liability at June 30, 2013, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- In our Texas health plan, we have noted an unusually large number of claims with incurred dates older than 10 months. This has caused some distortion in the claims lag pattern that we use to estimate the incurred claims.
- Our Wisconsin health plan is experiencing significant membership increases, and approximately doubled in size during the first four months of 2013. This new membership is transitioning to our health plan from a terminated health plan. We enrolled approximately 50,000 new members in February, March and April 2013. We have computed a separate reserve analysis for these members and have noted that paid claims thus far are less than what we would expect for newly transitioned members. It has been our experience that when members move to new health plans, there is a delay in the submission of claims for payment. Therefore, we have increased the reserves for this membership, in anticipation of higher claims costs eventually being reported for these members.
- In our Michigan health plan, there were a large number of claim recoveries recorded in June 2013 due to overpayments that resulted from a system configuration issue. These recoveries impacted the completion factors used to estimate incurred claims. While we have attempted to remove this distortion from the claims data to develop a more accurate reserve estimate, this type of correction in claims data adds a degree of uncertainty for the Michigan reserves as of June 30, 2013.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2012, and for the six months ended June 30, 2013, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the replenishment of reserves in the respective periods generally offset the benefit from the prior period.

10. Long-Term Debt

As of June 30, 2013, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2013	2014	2015	2016	2017	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
3.75% Notes	187,000	—	187,000	—	—	—	—
	$ 737,000	$ —	$ 187,000	$ —	$ —	$ —	$ 550,000

1.125% Cash Convertible Senior Notes due 2020

On February 15, 2013, we settled the issuance of $550.0 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020 (the 1.125% Notes). This transaction included the initial issuance of $450.0 million on February 11, 2013, plus the exercise of the full amount of the $100.0 million over-allotment option on February 13, 2013. The aggregate net proceeds of the 1.125% Notes were $458.9 million, after payment of the net cost of the Call Spread Overlay described below and in Note 11, "Derivative Financial Instruments," and transaction costs. Additionally, we used $50.0 million of the net proceeds to purchase shares of our common stock (see Note 12, "Stockholders' Equity"), and $40.0 million to repay the principal owed under our Credit Facility.

Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 of each year, at a rate of 1.125% per annum commencing on July 15, 2013. The 1.125% Notes will mature on January 15, 2020 unless repurchased or converted in accordance with their terms prior to such date.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. Holders may convert their 1.125% Notes solely into cash at their option at any time prior to the close of business on the business day immediately preceding July 15, 2019 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period immediately after any five consecutive trading day period in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.125% Notes solely into cash at any time, regardless of the foregoing circumstances. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture.

The initial conversion rate will be 24.5277 shares of our common stock per $1,000 principal amount of 1.125% Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate will be subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest. In addition, following certain corporate events that occur prior to the maturity date, we will pay a cash make-whole premium by increasing the conversion rate for a holder who elects to convert its 1.125% Notes in connection with such a corporate event in certain circumstances. We may not redeem the 1.125% Notes prior to the maturity date, and no sinking fund is provided for the 1.125% Notes.

If we undergo a fundamental change (as defined in the indenture to the 1.125% Notes), holders may require us to repurchase for cash all or part of their 1.125% Notes at a repurchase price equal to 100% of the principal amount of the 1.125% Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the fundamental change repurchase date. The indenture provides for customary events of default, including cross acceleration to certain other indebtedness of ours, and our significant subsidiaries.

The 1.125% Notes are senior unsecured obligations, and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries.

The 1.125% Notes contain an embedded cash conversion option. We have determined that the embedded cash conversion option is a derivative financial instrument, required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the embedded cash conversion option transaction settles or expires. The initial fair value liability of the embedded cash conversion option was $149.3 million, which simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance

discount). For further discussion of the derivative financial instruments relating to the 1.125% Notes, refer to Note 11, "Derivative Financial Instruments."

As noted above, the reduced carrying value on the 1.125% Notes resulted in a debt discount that is amortized to the 1.125% Notes' principal amount through the recognition of interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued. The effective interest rate of the 1.125% Notes is 5.9%, which is imputed based on the amortization of the fair value of the embedded cash conversion option over the remaining term of the 1.125% Notes. As of June 30, 2013, we expect the 1.125% Notes to be outstanding until their January 15, 2020 maturity date, for a remaining amortization period of 6.5 years. The 1.125% Notes' if-converted value did not exceed their principal amount as of June 30, 2013.

Also in connection with the settlement of the 1.125% Notes, we paid approximately $16.9 million in transaction costs. Such costs have been allocated to the 1.125% Notes, the 1.125% Call Option (defined below) and the 1.125% Warrants (defined below) according to their relative fair values. The amount allocated to the 1.125% Notes, or $12.0 million, was capitalized and will be amortized over the term of the 1.125% Notes. The aggregate amount allocated to the 1.125% Call Option and 1.125% Warrants, or $4.9 million, was recorded to interest expense in the quarter ended March 31, 2013.

1.125% Notes Call Spread Overlay

Concurrent with the issuance of the 1.125% Notes, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). These transactions represent a Call Spread Overlay, whereby the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes. We used $149.3 million of the proceeds from the settlement of the 1.125% Notes to pay for the 1.125% Call Option, and simultaneously received $75.1 million for the sale of the 1.125% Warrants, for a net cash outlay of $74.2 million for the Call Spread Overlay. The 1.125% Call Option is a derivative financial instrument. Until April 22, 2013, the 1.125% Warrants were classified as derivative financial instruments; refer to Note 11, "Derivative Financial Instruments" for further discussion.

Aside from the initial payment of a premium to the Counterparties of $149.3 million for the 1.125% Call Option, we will not be required to make any cash payments to the Counterparties under the 1.125% Call Option, and will be entitled to receive from the Counterparties an amount of cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the 1.125% Call Options during the relevant valuation period. The strike price under the 1.125% Call Option is initially equal to the conversion price of the 1.125% Notes. Additionally, if the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances.

3.75% Convertible Senior Notes due 2014

We had $187.0 million of 3.75% Convertible Senior Notes due 2014 (the 3.75% Notes) outstanding as of June 30, 2013 and December 31, 2012, respectively. The 3.75% Notes rank equally in right of payment with our existing and future senior indebtedness. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Because the 3.75% Notes have cash settlement features, we have allocated the proceeds from their issuance between a liability component and an equity component. The reduced carrying value on the 3.75% Notes resulted in a debt discount that is amortized back to the 3.75% Notes' principal amount through the recognition of non-cash interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 3.75% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms had been issued. The effective interest rate

of the 3.75% Notes is 7.5%, principally based on the seven-year U.S. Treasury note rate as of the October 2007 issuance date, plus an appropriate credit spread. As of June 30, 2013, we expect the 3.75% Notes to be outstanding until their October 1, 2014 maturity date, for a remaining amortization period of 15 months. As of June 30, 2013, the 3.75% Notes' if-converted value exceeded their principal amount by approximately $46 million. The 3.75% Notes' if-converted value did not exceed their principal amount as of December 31, 2012. At June 30, 2013, the equity component of the 3.75% Notes, net of the impact of deferred taxes, was $24.0 million.

The principal amounts, unamortized discount and net carrying amounts of the 1.125% Notes and 3.75% Notes were as follows:

	Principal Balance	Unamortized Discount	Net Carrying Amount
		(In thousands)	
June 30, 2013:			
1.125% Notes	$ 550,000	$ 142,785	$ 407,215
3.75% Notes	187,000	8,390	178,610
	$ 737,000	$ 151,175	$ 585,825
December 31, 2012:			
3.75% Notes	$ 187,000	$ 11,532	$ 175,468

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
		(In thousands)		
Interest cost recognized for the period relating to the:				
Contractual interest coupon rate	$ 3,300	$ 1,753	$ 5,827	$ 3,506
Amortization of the discount	5,965	1,472	9,688	2,915
Total interest cost recognized	$ 9,265	$ 3,225	$ 15,515	$ 6,421

Lease Financing Obligations

On June 12, 2013 we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of two properties, including the Molina Center located in Long Beach, California, and the building that houses our Ohio health plan located in Columbus, Ohio. We sold the two properties for $158.6 million in the aggregate. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. The carrying values of these properties, including the related intangible assets, amounted to $78.8 million in the aggregate as of June 30, 2013. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated and amortized over their remaining useful lives. The sales price of $158.6 million was recorded as a lease financing obligation, which is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of operations. Transaction costs associated with this transaction, amounting to $3.5 million, have been deferred and will be amortized over the initial lease term. Future minimum rental income on noncancelable leases from third party tenants of these properties, as reported in our December 31, 2012 Form 10-K, is now considered to be sublease rental income, and continues to be reported in rental income in our consolidated statements of operations. The future minimum rental income previously reported as of December 31, 2012 is consistent with our expected sublease rental income as of June 30, 2013. For information regarding the future minimum lease obligation, refer to Note 14, “Commitments and Contingencies.”

As described and defined in further detail in Note 15, "Related Party Transactions," we entered into a lease for office space in February 2013 consisting of two office buildings then under construction. We have concluded that we are the accounting owner of the construction projects because of our continuing involvement in those projects. Therefore, we have recorded $17.0 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of June 30, 2013, which represents the total cost, including imputed interest, incurred by the Landlord thus far in the construction projects. As of June 30, 2013, the aggregate amounts recorded to property, equipment and capitalized software, net, for both Building A and B are also recorded as a corresponding lease financing obligation of $17.0 million. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of operations. In addition to the capitalization of the costs incurred by the Landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land

and our incremental borrowing rate, and was immaterial for the six months ended June 30, 2013. For information regarding the future minimum lease obligation, refer to Note 14, “Commitments and Contingencies.”

Term Loan

In December 2011, our wholly owned subsidiary, Molina Center LLC, entered into a term loan agreement with various lenders and East West Bank to borrow $48.6 million to finance a portion of the purchase price for the Molina Center, located in Long Beach, California. On June 13, 2013, we repaid the principal balance outstanding under the term loan on that date with proceeds we received in the sale-leaseback transaction described above.

Credit Facility

On February 15, 2013, we used approximately $40.0 million of the net proceeds from the offering of the 1.125% Notes to repay all of the outstanding indebtedness under our $170 million revolving Credit Facility, with various lenders and U.S. Bank National Association, as Line of Credit Issuer, Swing Line Lender, and Administrative Agent. As of December 31, 2012, there was $40.0 million outstanding under the Credit Facility.

We terminated the Credit Facility in connection with the closing of the offering and sale of the 1.125% Notes. Two letters of credit in the aggregate principal amount of $10.3 million that reduced the amount available for borrowing under the Credit Facility as of December 31, 2012, were transferred to direct issue letters of credit with another financial institution. Such direct issue letters of credit are collateralized by restricted investments.

11. Derivative Financial Instruments

The following table summarizes the fair values and the presentation of our derivative financial instruments (defined and discussed individually below) in the consolidated balance sheets:

	Balance Sheet Location	June 30, 2013
		(In thousands)
Derivative asset:		
1.125% Call Option	Non-current assets: Derivative asset	$ 207,123
Derivative liability:		
Embedded cash conversion option	Non-current liabilities: Derivative liability	$ 207,017

Our derivative financial instruments do not qualify for hedge treatment, therefore the change in fair value of these instruments is recognized immediately in our consolidated statements of operations, in other expense. The following table summarizes the gains (losses) recorded in the periods presented:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
	(In thousands)			
Derivative gains (losses):				
1.125% Call Option	$ 59,738	$ —	$ 57,792	$ —
Embedded cash conversion option	(59,708)	—	(57,686)	—
1.125% Warrants	(3,923)	—	(3,923)	—
Interest rate swap	390	(1,086)	433	(1,086)
	$ (3,503)	$ (1,086)	$ (3,384)	$ (1,086)

1.125% Notes Call Spread Overlay

As described in Note 10, "Long-Term Debt," we entered into a Call Spread Overlay, whereby the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the debentures was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes.

The 1.125% Call Option, which is indexed to our common stock, is a derivative asset that requires mark-to-market accounting treatment due to the cash settlement features until the 1.125% Call Option settles or expires. The 1.125% Call Option is measured and reported at fair value on a recurring basis, within Level 3 of the fair value hierarchy. For further discussion of the inputs used to determine the fair value of the 1.125% Call Option, refer to Note 5, "Fair Value Measurements."

Until April 22, 2013, the 1.125% Warrants were recorded as a derivative liability that required mark-to-market accounting treatment due to certain terms in the 1.125% Warrants that prevented such instruments being considered to be indexed in our common stock. Effective April 22, 2013, we entered into amended and restated warrant confirmations with the Counterparties to clarify these terms, such that 1.125% Warrants are no longer considered to be derivative instruments, and have been recorded to additional paid-in capital. For the six months ended June 30, 2013, we recorded a loss of $3.9 million for the change in fair value of the 1.125% Warrants from February 15, 2013 to April 22, 2013.

Embedded Cash Conversion Option

The embedded cash conversion option within the 1.125% Notes is required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the cash conversion option settles or expires. The initial fair value liability of the embedded cash conversion option was $149.3 million, which simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount). The embedded cash conversion option is measured and reported at fair value on a recurring basis, within Level 3 of the fair value hierarchy. For further discussion of the inputs used to determine the fair value of the embedded cash conversion option, refer to Note 5, "Fair Value Measurements."

Interest Rate Swap

In May 2012, we entered into a $42.5 million notional amount interest rate swap agreement, with an effective date of March 1, 2013. On June 14, 2013, we settled the interest rate swap for $0.9 million.

12. Stockholders' Equity

Stockholders' equity increased $94.1 million during the six months ended June 30, 2013. The increase was primarily due to the $79.0 million reclassification of the 1.125% Warrants to additional paid-in capital, net income of $54.5 million, and $11.3 million related to employee stock transactions, partially offset by $50.0 million in repurchases of our common stock, as described in further detail below.

Common Shares Authorized. On May 1, 2013, our stockholders approved an amendment to our certificate of incorporation to increase the number of authorized shares of our common stock from 80,000,000 to 150,000,000.

1.125% Warrants. As described in Note 11, "Derivative Financial Instruments," we reclassified the 1.125% Warrants to additional paid-in capital during the second quarter of 2013, resulting in a $79.0 million increase to stockholders' equity. If the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances. The 1.125% Warrants could separately have a dilutive effect to the extent that the market value per share of our common stock (as measured under the terms of the warrant transactions) exceeds the applicable strike price of the 1.125% Warrants.

Securities Repurchases and Repurchase Program. In connection with the issuance and settlement of the 1.125% Notes, we used a portion of the net proceeds from the offering to repurchase $50 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. On February 12, 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Effective as of February 13, 2013, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or the 3.75% Notes, in addition to the $50 million repurchase discussed above. The repurchase program extends through December 31, 2014.

Shelf Registration Statement. In May 2012, we filed an automatic shelf registration statement on Form S-3 with the SEC covering the issuance of an indeterminate number of our securities, including common stock, warrants, or debt securities. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Stock Plans. In connection with the plans described in Note 4, "Stock-Based Compensation," we issued approximately 546,000 shares of common stock, net of shares used to settle employees' income tax obligations, for the six months ended June 30, 2013.

13. Segment Reporting

We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions. Our reportable segments are consistent with how we manage the business and view the markets we serve. Our Health Plans segment consists of our state health plans and also includes our direct delivery business. Our state health plans represent operating segments that have been aggregated for reporting purposes because they share similar economic characteristics.

Our Molina Medicaid Solutions segment provides design, development, implementation; business process outsourcing solutions; hosting services; and information technology support services to state Medicaid agencies.

We rely on an internal management reporting process that provides segment information to the operating income level for purposes of making financial decisions and allocating resources. The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies." The cost of services shared between the Health Plans and Molina Medicaid Solutions segments is charged to the Health Plans segment.

	$ 2,579,916	$ 1,934,822

14. Commitments and Contingencies

Sale-Leaseback Transactions

As described in Note 10, "Long-Term Debt," we entered into sale-leaseback transactions that have been classified as lease financing obligations. For the sale-leaseback transaction entered into in June 2013, the initial lease term is 25 years, with five five-year renewal options. For the sale-leaseback transaction relating to the construction project completed in June 2013, the initial lease term is 11.5 years, with two five-year renewal options. We expect minimum lease payments under these leases, for the six months ended December 31, 2013, to be $6.6 million. Future minimum lease payments due under these leases beginning January 1, 2014 are as follows:

	(In thousands)
2014	$ 14,395
2015	18,277
2016	18,877
2017	19,496
2018	20,137
Thereafter	385,813
Total minimum lease payments	$ 476,995

Legal Proceedings

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Provider Claims

Many of our medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations have led certain medical providers to pursue us for additional compensation. The claims made by providers in such circumstances often involve issues of contract compliance,

interpretation, payment methodology, and intent. These claims often extend to services provided by the providers over a number of years.

Various providers have contacted us seeking additional compensation for claims that we believe to have been settled. These matters, when finally concluded and determined, will not, in our opinion, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows.

Regulatory Capital and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Such state laws and regulations also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $607.5 million at June 30, 2013, and $549.7 million at December 31, 2012. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $527.8 million and $46.9 million as of June 30, 2013, and December 31, 2012, respectively.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of June 30, 2013, our health plans had aggregate statutory capital and surplus of approximately $627.7 million compared with the required minimum aggregate statutory capital and surplus of approximately $363.2 million. All of our health plans were in compliance with the minimum capital requirements at June 30, 2013. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

As described in Note 2, "Significant Accounting Policies," the ACA imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. The fee will be imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year. If the fee assessment is enacted as written, our minimum capitalization requirements will increase significantly on January 1, 2014; we are currently evaluating the impact of the fee assessment to our financial position, results of operations and cash flows.

15. Related Party Transactions

Leased Office Buildings

On February 27, 2013, we entered into a lease (the Lease) with 6th & Pine Development, LLC (the Landlord) for office space located in Long Beach, California. The Lease consists of two office buildings, one of which is under construction. The building which comprises approximately 90,000 square feet of office and storage space (Building A) was completed in June 2013; immediately following its completion, we occupied Building A and commenced lease payments. The second building (Building B) is expected to comprise approximately 120,000 square feet of office space.

The term of the Lease with respect to Building A commenced on June 6, 2013, and the term of the Lease with respect to Building B is expected to commence on November 1, 2014. The initial term of the Lease with respect to both buildings expires on December 31, 2024, subject to two options to extend the term for a period of five years each. Initial annual rent for Building A is approximately $2.6 million, and initial annual rent for Building B is expected to be approximately $4.0 million. Rent will increase 3.75% per year through the initial term. Rent during the extension terms will be the greater of then-current rent or fair market rent.

The principal members of the Landlord are John C. Molina, our chief financial officer and a director of the Company, and his wife. In addition, in connection with the development of the buildings being leased, the Landlord has pledged shares of common stock in the Company he holds as trustee. Dr. J. Mario Molina, our chief executive officer and chairman of the board of directors, holds a partial interest in such shares as trust beneficiary.

Medical Services

We have an equity investment in a medical service provider that provides certain vision services to our members; we account for this investment under the equity method of accounting. For the three months ended June 30, 2013 and 2012, we paid $8.7 million and $7.0 million, respectively, for medical service fees to this provider. For the six months ended June 30, 2013 and 2012, we paid $16.4 million, and $13.6 million, respectively, for medical service fees to this provider.

16. Variable Interest Entities

Joseph M. Molina M.D., Professional Corporations

The Joseph M. Molina, M.D. Professional Corporations (JMMPC) were created in 2012 to further advance our direct delivery business. JMMPC's sole shareholder is Dr. J. Mario Molina, our Chairman of the Board, President and Chief Executive Officer. Dr. Molina is paid no salary and receives no dividends in connection with his work for, or ownership of, JMMPC. JMMPC provides outpatient professional medical services to the general public for routine non-life threatening, outpatient health care needs. Substantially all of the individuals served by JMMPC are members of our health plans. JMMPC does not have agreements to provide professional medical services with any other entities.

Our wholly owned subsidiary, American Family Care, Inc. (AFC), has entered into services agreements with JMMPC to provide clinic facilities, clinic administrative support staff, patient scheduling services and medical supplies to JMMPC. The services agreements were designed such that JMMPC will not operate at a loss, ensuring the availability of quality care and access for our health plan members. The services agreements provide that the administrative fees charged to JMMPC by AFC are reviewed annually to assure the achievement of this goal.

Our California, Florida, New Mexico and Washington health plans have entered into primary care capitation agreements with JMMPC. These agreements also direct our health plans to fund JMMPC's operating deficits, or receive JMMPC's operating surpluses, based on a monthly reconciliation. Because the AFC services agreements described above mitigate the likelihood of significant operating deficits or surpluses, such monthly reconciliation amounts are insignificant.

We have determined that JMMPC is a variable interest entity, or VIE, and that we are its primary beneficiary. We have reached this conclusion under the power and benefits criterion model according to GAAP. Specifically, we have the power to direct the activities that most significantly affect JMMPC's economic performance, and the obligation to absorb losses or right to receive benefits that are potentially significant to the VIE, under the agreements described above. Because we are its primary beneficiary, we have consolidated JMMPC. JMMPC's assets may be used to settle only JMMPC's obligations, and JMMPC's creditors have no recourse to the general credit of Molina Healthcare, Inc. As of June 30, 2013, JMMPC had total assets of $1.4 million, comprising primarily cash and equivalents, and total liabilities of $1.1 million, comprising primarily accrued payroll and employee benefits.

Our maximum exposure to loss as a result of our involvement with JMMPC is equal to the amounts needed to fund JMMPC's ongoing payroll and employee benefits. We believe that such loss exposure will be immaterial to our consolidated operating results and cash flows for the foreseeable future. We provided an initial cash infusion of $0.3 million to JMMPC in the first quarter of 2012 to fund its start-up operations.

New Markets Tax Credit

During the fourth quarter of 2011, our New Mexico data center subsidiary entered into a financing transaction with Wells Fargo Community Investment Holdings, LLC, or Wells Fargo, its wholly owned subsidiary New Mexico Healthcare Data Center Investment Fund, LLC, or Investment Fund, and certain of Wells Fargo's affiliated Community Development Entities, or CDEs, in connection with our participation in the federal government's New Markets Tax Credit Program, or NMTC. The NMTC was established by Congress in 2000 to facilitate new or increased investments in businesses and real estate projects in low-income communities. The NMTC attracts investment capital to low-income communities by permitting investors to receive a tax credit against their federal income tax return in exchange for equity investments in specialized financial institutions, called CDEs, which provide financing to qualified active businesses operating in low-income communities. The credit amounts to 39% of the original investment amount and is claimed over a period of seven years (five percent for each of the first three years, and six percent for each of the remaining four years). The investment in the CDE cannot be redeemed before the end of the seven-year period.

In the fourth quarter of 2011, as a result of a series of simultaneous financing transactions, Wells Fargo contributed capital of $5.9 million to the Investment Fund, and Molina Healthcare, Inc. loaned the principal amount of $15.5 million to the Investment Fund. The Investment Fund then contributed the proceeds to certain CDEs, which, in turn, loaned the proceeds of $20.9 million to our New Mexico data center subsidiary. Wells Fargo will be entitled to claim the NMTC while we effectively received net loan proceeds equal to Wells Fargo's contribution to the Investment Fund, or approximately $5.9 million.

Additionally, financing costs incurred in structuring the arrangement amounting to $1.2 million were deferred and will be recognized as expense over the term of the loans. This transaction also includes a put/call feature that becomes enforceable at the end of the seven-year compliance period. Wells Fargo may exercise its put option or we can exercise the call, both of which will serve to transfer the debt obligation to us. Incremental costs to maintain the structure during the compliance period will be recognized as incurred.

We have determined that the financing arrangement with Investment Fund and CDEs is a VIE, and that we are the primary beneficiary of the VIE. We reached this conclusion based on the following:

- The ongoing activities of the VIE-collecting and remitting interest and fees and NMTC compliance-were all considered in the initial design and are not expected to significantly affect economic performance throughout the life of the VIE;
- Contractual arrangements obligate us to comply with NMTC rules and regulations and provide various other guarantees to Investment Fund and CDEs;
- Wells Fargo lacks a material interest in the underling economics of the project; and
- We are obligated to absorb losses of the VIE.

Because we are the primary beneficiary of the VIE, we have included it in our consolidated financial statements. Wells Fargo's contribution of $5.9 million is included in cash at December 31, 2012 and the offsetting Wells Fargo's interest in the financing arrangement is included in other liabilities in the accompanying consolidated balance sheets.

As described above, this transaction also includes a put/call provision whereby we may be obligated or entitled to repurchase Wells Fargo's interest in the Investment Fund. The value attributed to the put/call is nominal. The NMTC is subject to 100% recapture for a period of seven years as provided in the Internal Revenue Code and applicable U.S. Treasury regulations. We are required to be in compliance with various regulations and contractual provisions that apply to the NMTC arrangement. Non-compliance with applicable requirements could result in Wells Fargo's projected tax benefits not being realized and, therefore, require us to indemnify Wells Fargo for any loss or recapture of NMTCs related to the financing until such time as the recapture provisions have expired under the applicable statute of limitations. We do not anticipate any credit recaptures will be required in connection with this arrangement.

Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations.*

Forward Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements regarding our business, financial condition, and results of operations within the meaning of Section 27A of the Securities Act of 1933, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, or Securities Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. All statements, other than statements of historical facts, included in this quarterly report may be deemed to be forward-looking statements for purposes of the Securities Act and the Securities Exchange Act. Without limiting the foregoing, we use the words “anticipate(s),” “believe(s),” “estimate(s),” “expect(s),” “intend(s),” “may,” “plan(s),” “project(s),” “will,” “would,” “could,” “should” and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We cannot guarantee that we will actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and, accordingly, you should not place undue reliance on our forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from the forward-looking statements that we make. You should read these factors and the other cautionary statements as being applicable to all related forward-looking statements wherever they appear in this quarterly report. We caution you that we do not undertake any obligation to update forward-looking statements made by us. Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected, estimated, expected, or contemplated as a result of, but not limited to, risk factors related to the following:

- uncertainties associated with the implementation of the Affordable Care Act, including the impact of the health insurance industry excise tax, the expansion of Medicaid eligibility in participating states to previously uninsured populations unfamiliar with managed care, the implementation of state insurance exchanges currently expected to become operational by October 1, 2013, the effect of various implementing regulations, and uncertainties regarding the impact of other federal or state health care and insurance reform measures, including the duals demonstration programs in California, Ohio, Michigan, and Texas;
- the success of our medical cost containment initiatives in Texas, and other risks associated with the expansion of our Texas health plan's service areas in 2012;
- significant budget pressures on state governments and their potential inability to maintain current rates, to implement expected rate increases, or to maintain existing benefit packages or membership eligibility thresholds or criteria;
- management of our medical costs, including seasonal flu patterns and rates of utilization that are consistent with our expectations and our accruals for incurred but not reported medical costs;
- the success of our efforts to retain existing government contracts and to obtain new government contracts in connection with state requests for proposals (RFPs) in both existing and new states, and our ability to increase our revenues consistent with our expectations;
- accurate estimation of incurred but not reported medical costs across our health plans;
- risks associated with the continued growth in new Medicaid and Medicare enrollees, and the development of actuarially sound rates with respect to such new enrollees, including duals;
- retroactive adjustments to premium revenue or accounting estimates which require adjustment based upon subsequent developments, including Medicaid pharmaceutical rebates;
- continuation and renewal of the government contracts of both our health plans and Molina Medicaid Solutions and the terms under which such contracts are renewed;
- government audits and reviews, and any enrollment freeze or monitoring program that may result therefrom;
- changes with respect to our provider contracts and the loss of providers;
- the establishment of a federal or state medical cost expenditure floor as a percentage of the premiums we receive, and the interpretation and implementation of medical cost expenditure floors, administrative cost and profit ceilings, and profit sharing arrangements;
- interpretation and implementation of at-risk premium rules regarding the achievement of certain quality measures;
- approval by state regulators of dividends and distributions by our health plan subsidiaries;
- changes in funding under our contracts as a result of regulatory changes, programmatic adjustments, or other reforms;
- high dollar claims related to catastrophic illness;
- the favorable resolution of litigation, arbitration, or administrative proceedings, including our pending litigation against the state of California related to rates paid to our California plan in earlier years that were not actuarially sound;
- restrictions and covenants in any future credit facility;
- the relatively small number of states in which we operate health plans;
- the availability of adequate financing to fund and capitalize our expansion and growth activities and to meet our liquidity needs, including the interest expense and other costs associated with such financing;

- a state's failure to renew its federal Medicaid waiver;
- inadvertent unauthorized disclosure of protected health information;
- changes generally affecting the managed care or Medicaid management information systems industries;
- increases in government surcharges, taxes, and assessments;
- changes in general economic conditions, including unemployment rates; and
- increasing consolidation in the Medicaid industry.

Investors should refer to Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2012, for a discussion of certain risk factors that could materially affect our business, financial condition, cash flows, or results of operations. Given these risks and uncertainties, we can give no assurance that any results or events projected or contemplated by our forward-looking statements will in fact occur.

This document and the following discussion of our financial condition and results of operations should be read in conjunction with the accompanying consolidated financial statements and the notes to those statements appearing elsewhere in this report and the audited financial statements and Management’s Discussion and Analysis appearing in our Annual Report on Form 10-K for the year ended December 31, 2012.

Overview

Molina Healthcare, Inc. provides quality and cost-effective Medicaid-related solutions to meet the health care needs of low-income families and individuals and to assist state agencies in their administration of the Medicaid program. We report our financial performance based on two reportable segments: Health Plans and Molina Medicaid Solutions.

Our Health Plans segment comprises health plans in California, Florida, Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin, and includes our direct delivery business. As of June 30, 2013, these health plans served approximately 1.8 million members eligible for Medicaid, Medicare, and other government-sponsored health care programs for low-income families and individuals. The health plans are operated by our respective wholly owned subsidiaries in those states, each of which is licensed as a health maintenance organization, or HMO. Our direct delivery business consists of primary care community clinics in California, Florida, New Mexico, and Washington.

Our health plans' state Medicaid contracts generally have terms of three to four years with annual adjustments to premium rates. These contracts are renewable at the discretion of the state. In general, either the state Medicaid agency or the health plan may terminate the state contract with or without cause. Most of these contracts contain renewal options that are exercisable by the state. Our health plan subsidiaries have generally been successful in retaining their contracts. Our state contracts are generally at greatest risk of loss when a state issues a new request for proposals, or RFP, subject to competitive bidding by other health plans. If one of our health plans is not a successful responsive bidder to a state RFP, its contract may be subject to non-renewal. For instance, on February 17, 2012, the Division of Purchasing of the Missouri Office of Administration notified us that our Missouri health plan, Alliance for Community Health, L.L.C., was not awarded a contract under the Missouri HealthNet Managed Care Request for Proposal; therefore, the Missouri health plan's prior contract with the state expired without renewal on June 30, 2012 subject to certain transition obligations. On April 5, 2013, the Missouri health plan assigned its affiliate, Molina Healthcare of Illinois, Inc., substantially all of its assets and liabilities. Additionally, the Missouri health plan surrendered its certificate of authority as a health maintenance organization. The Missouri health plan's revenues amounted to $0.2 million and $113.8 million for the six months ended June 30, 2013 and 2012, respectively.

Until the second quarter of 2013, we reported the results of the Missouri health plan in continuing operations because of our continuing significant involvement in the payment of medical claims incurred on or prior to June 30, 2012, for that entity. On May 13, 2013, we abandoned our equity interests in the Missouri health plan to an unrelated entity, and assigned the Missouri health plan's surviving rights, duties and obligations (which we believe to be insignificant) to Molina Healthcare of Illinois, Inc. Effective June 30, 2013, the transition obligations associated with the Missouri health plan's contract with the state terminated. As a result of these activities, we commenced reporting the Missouri health plan as a discontinued operation as of June 30, 2013. In connection with the abandonment of our equity interests in the Missouri health plan to an unrelated entity, we recognized a $9.5 million tax benefit for the tax deduction associated with the basis of such equity interests, which is included in discontinued operations in our consolidated statement of operations. Additionally, we recognized a pretax loss of $0.5 million for the write off of the Missouri health plan's remaining assets in the second quarter of 2013.

Our state Medicaid contracts may be periodically amended to include or exclude certain health benefits (such as pharmacy services, behavioral health services, or long-term care services); populations (such as the aged, blind or disabled, or ABD); and regions or service areas. For example, our Texas health plan added significant membership effective March 1, 2012, in service areas we had not previously served (the Hidalgo and El Paso service areas); and among populations we had not previously served within existing service areas, such as the Temporary Assistance for Needy Families, or TANF, population in the Dallas service area. Additionally, the health benefits provided to our TANF and ABD members in Texas under our contracts with the state were expanded to include inpatient facility and pharmacy services effective March 1, 2012.

On July 3, 2013, we announced that our New Mexico health plan has entered into a definitive agreement to assume Lovelace Community Health Plan's contract for the New Mexico Medicaid Salud! Program. Lovelace Community Health Plan currently participates in the New Mexico Medicaid Salud! State Coverage Insurance Program and arranges for healthcare services for approximately 84,000 New Mexicans. Our New Mexico health plan serves over 92,000 Medicaid members across the state. Subject to satisfaction of customary closing conditions, we anticipate completing the transaction on August 1, 2013; the total payment to Lovelace Community Health Plan will be based on the membership transferred as of that date.

On February 14, 2013, we announced that the Florida Agency for Health Care Administration awarded our Florida health plan contracts in three regions under the Statewide Medicaid Managed Care Long-Term Care program. As a result of the awards, we will now enter into a comprehensive pre-contracting assessment, with the program currently scheduled to commence on December 1, 2013. Under the program, we will provide long-term care benefits, including institutional and home and community-based services.

On February 11, 2013, we announced that our New Mexico health plan was selected by the New Mexico Human Services Department, or HSD, to participate in the new Centennial Care program. In addition to continuing to provide physical and acute health care services, under the new program our New Mexico health plan will expand its services to provide behavioral health and long-term care services. The selection of our New Mexico health plan was made by HSD pursuant to its request for proposals issued in August 2012. The operational start date for the program is currently scheduled for January 2014.

Our Molina Medicaid Solutions segment provides business processing and information technology development and administrative services to Medicaid agencies in Idaho, Louisiana, Maine, New Jersey, and West Virginia, and drug rebate administration services in Florida.

On June 9, 2011, Molina Medicaid Solutions received notice from the state of Louisiana that the state intended to award the contract for a replacement Medicaid Management Information System (MMIS) to a different vendor, CNSI. However, in March 2013, the state of Louisiana cancelled its contract award to CNSI. CNSI is currently challenging the contract cancellation. The state has informed us that we will continue to perform under our current contract until a successor is named. At such time as a new RFP may be issued, we intend to respond to the state's RFP. For the six months ended June 30, 2013, our revenue under the Louisiana MMIS contract was approximately $20.2 million, or 20.3% of total service revenue. So long as our Louisiana MMIS contract continues, we expect to recognize approximately $40 million of service revenue annually under this contract.

Composition of Revenue and Membership

Health Plans Segment

Our Health Plans segment derives its revenue, in the form of premiums, chiefly from Medicaid contracts with the states in which our health plans operate. Premium revenue is fixed in advance of the periods covered and, except as described in “Critical Accounting Policies” below, is not generally subject to significant accounting estimates. For the six months ended June 30, 2013, we received approximately 96% of our premium revenue as a fixed amount per member per month, or PMPM, pursuant to our Medicaid contracts with state agencies, our Medicare contracts with the Centers for Medicare and Medicaid Services, or CMS, and our contracts with other managed care organizations for which we operate as a subcontractor. These premium revenues are recognized in the month that members are entitled to receive health care services. The state Medicaid programs and the federal Medicare program periodically adjust premium rates.

For the six months ended June 30, 2013, we recognized approximately 4% of our premium revenue in the form of “birth income” — a one-time payment for the delivery of a child — from the Medicaid programs in all of our state health plans except New Mexico. Such payments are recognized as revenue in the month the birth occurs.

The amount of the premiums paid to us may vary substantially between states and among various government programs. PMPM premiums for the Children’s Health Insurance Program, or CHIP, members are generally among our lowest, with rates as low as approximately $80 PMPM in Michigan. Premium revenues for Medicaid members are generally higher. Among the TANF Medicaid population — the Medicaid group that includes mostly mothers and children — PMPM premiums range between approximately $100 in California to $260 in Ohio. Among our ABD membership, PMPM premiums range from approximately $400 in Utah to $1,400 in Ohio. Contributing to the variability in Medicaid rates among the states is the practice of some states to exclude certain benefits from the managed care contract (most often pharmacy, inpatient, behavioral health and catastrophic case benefits) and retain responsibility for those benefits at the state level. Medicare membership generates the highest PMPM premiums in the aggregate, at approximately $1,100 PMPM.

The following table sets forth the approximate total number of members by state health plan as of the dates indicated:

	June 30, 2013	March 31, 2013	December 31, 2012	June 30, 2012
Total Ending Membership by Health Plan:				
California	355,000	332,000	336,000	350,000
Florida	81,000	75,000	73,000	70,000
Michigan	215,000	217,000	220,000	220,000
New Mexico	92,000	91,000	91,000	89,000
Ohio	240,000	242,000	244,000	260,000
Texas	266,000	274,000	282,000	301,000
Utah	87,000	87,000	87,000	86,000
Washington	413,000	416,000	418,000	356,000
Wisconsin	98,000	86,000	46,000	42,000
Total	1,847,000	1,820,000	1,797,000	1,774,000
Total Ending Membership for our Medicare Advantage Plans:				
California	8,100	7,700	7,700	7,000
Florida	600	600	900	900
Michigan	9,500	9,200	9,700	8,900
New Mexico	900	900	900	900
Ohio	400	300	300	200
Texas	2,300	1,900	1,500	800
Utah	7,800	7,600	8,200	8,300
Washington	6,600	6,100	6,500	5,700
Total	36,200	34,300	35,700	32,700
Total Ending Membership for our Aged, Blind or Disabled Population:				
California	45,400	44,600	44,700	41,100
Florida	11,200	10,400	10,300	10,400
Michigan	45,000	44,000	41,900	40,000
New Mexico	6,000	5,800	5,700	5,600
Ohio	28,000	28,200	28,200	29,600
Texas	92,000	94,200	95,900	111,000
Utah	9,400	9,200	9,000	8,800
Washington	31,700	31,300	30,000	4,400
Wisconsin	1,600	1,600	1,700	1,700
Total	270,300	269,300	267,400	252,600

Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation, or DDI, of a Medicaid Management Information System, or MMIS. An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing, or BPO arrangement. While providing BPO services (which include claims payment and eligibility processing) we also provide the state with other services including both hosting and support and maintenance. Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting, we recognize revenue associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered.

Composition of Expenses

Health Plans Segment

Operating expenses for the Health Plans segment include expenses related to the provision of medical care services, G&A expenses, and premium tax expenses. Our results of operations are impacted by our ability to effectively manage expenses related to medical care services and to accurately estimate medical costs incurred. Expenses related to medical care services are captured in the following four categories:

- *Fee-for-service* — Expenses paid for specific encounters or episodes of care according to a fee schedule or other basis established by the state or by contract with the provider.
- *Capitation* — Expenses for PMPM payments to the provider without regard to the frequency, extent, or nature of the medical services actually furnished.
- *Pharmacy* — Expenses for all drug, injectible, and immunization costs paid through our pharmacy benefit manager.
- *Other* — Expenses for medically related administrative costs of approximately $68.4 million, and $62.6 million, for the six months ended June 30, 2013 and 2012, respectively, as well as certain provider incentive costs, reinsurance, costs to operate our medical clinics, and other medical expenses.

Our medical care costs include amounts that have been paid by us through the reporting date as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. See "Critical Accounting Policies" below for a comprehensive discussion of how we estimate such liabilities.

Molina Medicaid Solutions Segment

Cost of service revenue consists primarily of the costs incurred to provide business process outsourcing and technology outsourcing services under our MMIS contracts. General and administrative costs consist primarily of indirect administrative costs and business development costs.

In some circumstances we may defer recognition of incremental direct costs (such as direct labor, hardware, and software) associated with a contract if revenue recognition is also deferred. Such deferred contract costs are amortized on a straight-line basis over the remaining original contract term, consistent with the revenue recognition period.

Second Quarter Financial Performance Summary, Continuing Operations

The following table and narrative briefly summarize our financial and operating performance for continuing operations for the three and six months ended June 30, 2013 and 2012. All ratios, with the exception of the medical care ratio and the premium tax ratio, are shown as a percentage of total revenue. The medical care ratio is computed as a percentage of premium revenue, net of premium tax and the premium tax ratio is computed as a percentage of premium revenue because there are direct relationships between premium revenue earned, and the cost of health care and premium taxes.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
	(Dollar amounts in thousands, except per share data)

Reconciliation of Non-GAAP to GAAP Financial Measures

We have included presentations of earnings before interest, taxes, depreciation and amortization (EBITDA) below. EBITDA is a non-GAAP financial measure and is reconciled to net income, which we believe to be the most comparable GAAP measure (GAAP stands for U.S. generally accepted accounting principles).

EBITDA is not prepared in conformity with GAAP because it excludes depreciation and amortization, as well as interest expense and income tax expense. This non-GAAP financial measure should not be considered as an alternative to the GAAP measures of net income, operating income, operating margin, or cash provided by operating activities; nor should EBITDA be considered in isolation from these GAAP measures of operating performance. Management uses EBITDA as a supplemental metric in evaluating our financial performance, in evaluating financing and business development decisions, and in forecasting and analyzing future periods. For these reasons, management believes that EBITDA is a useful supplemental measure to investors in evaluating our performance and the performance of other companies in our industry.

	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
	(In thousands)			
Net income (loss)	$ 24,571	$ (37,306)	$ 54,486	$ (19,217)
Add back:

Income tax expense (benefit)	5,513	(25,769)	29,783	(14,736)
EBITDA	$ 63,859	$ (39,596)	$ 152,880	$ 12,163

Second Quarter 2013 Overview

For the second quarter of 2013, net income rose to $24.6 million, or $0.53 per diluted share, compared with a net loss of $37.3 million, or $0.80 per diluted share, for the second quarter of 2012. Net income per diluted share from continuing operations was $0.34 for the second quarter of 2013, versus a net loss of $0.71 per diluted share from continuing operations for the second quarter of 2012.

Premium revenue for the second quarter of 2013 increased 8% over the second quarter of 2012, primarily due to membership growth in Washington and Wisconsin and rate increases in Texas and Washington in the second half of 2012.

Our consolidated medical care ratio decreased to 86.2% in the second quarter of 2013, from 94.5% in the second quarter of 2012. The decline in the consolidated medical care ratio was the result of dramatically improved operating results in Texas combined with improved performance at most of our other health plans. Medical care ratios decreased in seven of our nine health plans; while medical margin (measured as the excess of premium revenue net of premium tax, over medical costs) increased in eight out of nine health plans.

General and administrative expenses increased to 10.1% of revenue in the second quarter of 2013, from 8.5% in the second quarter of 2012, primarily due to higher costs incurred as a result of our preparations for significant membership growth in 2014, and a litigation charge of $3.5 million related to the final settlement of a provider dispute.

Second quarter 2013 results include a one-time non-cash charge of $3.9 million related to warrants issued in conjunction with our convertible senior notes offering in February 2013. As originally issued, certain terms in the warrant agreements required that they be recorded as a derivative liability requiring mark-to-market accounting treatment. The warrants were reclassified to equity during the second quarter and there will be no further mark-to-market adjustments.

We previously reported that our Medicaid managed care contract with the state of Missouri expired without renewal on June 30, 2012. Effective June 30, 2013 the transition obligations associated with that contract terminated. Therefore, we have reclassified the results relating to the Missouri health plan to discontinued operations for all periods presented. These results are presented in a single line item, net of taxes, in the unaudited consolidated statements of operations. Additionally, we abandoned all of our equity interests in the Missouri health plan during the second quarter of 2013, resulting in the recognition of a tax benefit of approximately $9.5 million, which is also included in discontinued operations in the unaudited consolidated statements of operations.

Results of Operations, Continuing Operations

Three Months Ended June 30, 2013 Compared with the Three Months Ended June 30, 2012

Health Plans Segment

Premium Revenue

Premium revenue for the second quarter of 2013 increased 8% over the second quarter of 2012, primarily due to membership growth in Washington and Wisconsin, and rate increases in Texas and Washington in the second half of 2012. Medicare premium revenue was $131.5 million for the second quarter of 2013 compared with $120.8 million for the second quarter of 2012.

Growth in our ABD membership in Washington and California led to higher premium revenue PMPM in 2013. ABD membership, as a percent of total membership, has increased approximately 3% year over year. Premium revenue PMPM also increased in the second quarter of 2013 as a result of the inclusion of revenue for pharmacy benefits for the Utah health plan effective January 1, 2013.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Three Months Ended June 30,					
	2013			2012		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 879,865	$ 158.96	68.0%	$ 925,039	$ 174.04	70.2%
Pharmacy	222,992	40.29	17.2	212,944	40.06	16.2
Capitation	138,409	25.00	10.7	136,376	25.66	10.3
Other	53,440	9.66	4.1	43,238	8.14	3.3
Total	$ 1,294,706	$ 233.91	100.0%	$ 1,317,597	$ 247.90	100.0%

Medical care costs decreased in the second quarter of 2013 primarily due to significantly lower medical care costs at our Texas health plan. Our consolidated medical care ratio decreased to 86.2% in the second quarter of 2013, from 94.5% in the second quarter of 2012. Higher margins at the Texas health plan, along with stable inpatient utilization and lower pharmacy unit costs across the Company, were the primary causes of the lower medical care ratio in the second quarter of 2013.

Individual Health Plan Analysis

The medical care ratio at the California health plan increased to 94.4% in the second quarter of 2013 from 90.5% in the second quarter of 2012. The higher medical care ratio was primarily the result of higher Medicare inpatient fee-for-service costs.

The medical care ratio of the Florida health plan decreased to 84.0% in the second quarter of 2013, from 84.5% in the second quarter of 2012 due to inpatient utilization reductions and lower pharmacy costs.

The medical care ratio of the Michigan health plan decreased to 84.7% in the second quarter of 2013, from 87.1% in the second quarter of 2012, primarily due to a reduction in inpatient costs.

The medical care ratio of the New Mexico health plan decreased to 80.8% in the second quarter of 2013, from 84.3% in the second quarter of 2012, primarily as a result of higher Medicaid premium rates PMPM effective January 1, 2013, and lower fee-for-service claims costs.

The medical care ratio of the Ohio health plan decreased to 79.8% for the second quarter of 2013, from 89.5% for the second quarter of 2012, due to reductions in inpatient, pharmacy and professional costs as well as a 4% premium rate increase effective January 1, 2013.

The medical care ratio of the Texas health plan was 86.5% in the second quarter of 2013 compared with 111.5% in the second quarter of 2012 (which included a premium deficiency reserve (PDR) of $10 million). We received a blended rate increase in Texas of approximately 4%, or $4.5 million per month, effective September 1, 2012; and implemented various medical cost containment initiatives in the second half of 2012.

The medical care ratio of the Utah health plan decreased to 79.6% in the second quarter of 2013, from 82.5% in the second quarter of 2012 primarily due to a lower fee-for-service claim costs.

The medical care ratio of the Washington health plan increased to 88.0% in the second quarter of 2013, from 85.5% in the second quarter of 2012 primarily due to the addition of ABD members effective July 1, 2012. The higher premium revenue PMPM associated with the ABD membership, however, offset the increased medical care ratio, so that the excess of premium revenue over medical care costs increased to $36.0 million for the second quarter of 2013, compared with $29.6 million for the second quarter of 2012.

The medical care ratio of the Wisconsin health plan decreased to 82.6% in the second quarter of 2013, from 121.1% in the second quarter of 2012. A $3.0 million PDR was recorded in the second quarter of 2012. Absent the PDR, the medical care ratio would have been 105.2% in the second quarter of 2012. The health plan has successfully implemented several cost saving initiatives including improvements in provider contracts, in-sourcing the management of behavioral health services and enhanced utilization management activities. The health plan received a 3% premium rate increase effective January 1, 2013. Additionally, the health plan gained approximately 50,000 members in February, March and April due to another health plan's recent exit from the market. We are closely monitoring the utilization patterns and loss reserves for these new members.

Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Three Months Ended June 30, 2013						
	Member Months (1)	Premium Revenue		Medical Care Costs		Premium Tax Expense	MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM			
California	1,055	$ 191,059	$ 181.19	$ 170,777	$ 161.96	$ 10,132	94.4%	$ 10,150
Florida	238	61,838	260.61	51,915	218.80	1	84.0	9,922

	5,535	$ 1,548,612	$ 279.77	$ 1,294,706	$ 233.91	$ 46,883	86.2%	$ 207,023

	Three Months Ended June 30, 2012						
	Member Months (1)	Premium Revenue		Medical Care Costs		Premium Tax Expense	MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM			
California	1,056	$ 167,644	$ 158.77	$ 149,239	$ 141.34	$ 2,683	90.5%	$ 15,722
Florida	210	57,303	273.00	48,442	230.79	(21)	84.5	8,882
Michigan	662	162,758	245.89	141,682	214.04	31	87.1	21,045
New Mexico	266	82,706	310.94	67,836	255.03	2,257	84.3	12,613
Ohio	762	297,069	389.85	245,284	321.89	23,011	89.5	28,774
Texas	907	359,486	396.63	393,237	433.87	6,670	111.5	(40,421)
Utah	259	76,911	297.00	63,419	244.90	—	82.5	13,492
Washington	1,068	207,376	194.14	174,045	162.93	3,701	85.5	29,630
Wisconsin	125	18,788	150.12	22,758	181.84	—	121.1	(3,970)
Other (3)	—	2,362	—	11,655	—	22	—	(9,315)
	5,315	$ 1,432,403	$ 269.53	$ 1,317,597	$ 247.90	$ 38,354	94.5%	$ 76,452

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.

(2) The MCR represents medical costs as a percentage of premium revenues, where premium revenue is reduced by premium tax expense.
(3) "Other" medical care costs also include medically related administrative costs at the parent company.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Three Months Ended June 30,	
	2013	2012
	(In thousands)	
Service revenue before amortization	$ 50,400	$ 41,877
Amortization recorded as reduction of service revenue	(728)	(153)
Service revenue	49,672	41,724
Cost of service revenue	39,305	30,613
General and administrative costs	2,790	3,187
Amortization of customer relationship intangibles recorded as amortization	1,282	1,282
Operating income	$ 6,295	$ 6,642

Operating income for our Molina Medicaid Solutions segment decreased $0.3 million for the three months ended June 30, 2013, compared with the same prior year period. The decrease in operating income was primarily the result of a change in the mix of transactions processed from fee-for-service claims to managed care encounters (processing fees are lower for encounters than for fee-for-service claims) and changes to state contract revenues implemented during 2012.

Results of Operations, Continuing Operations

Six Months Ended June 30, 2013 Compared with the Six Months Ended June 30, 2012

Health Plans Segment

Premium Revenue

Premium revenue for the six months ended June 30, 2013 increased 14% over the six months ended June 30, 2012, due to both higher enrollment and higher premium revenue PMPM. Medicare premium revenue was $249.9 million for the six months ended June 30, 2013 compared with $230.5 million for the six months ended June 30, 2012.

Growth in our ABD membership in Washington and California led to higher premium revenue PMPM in 2013. ABD membership, as a percent of total membership, has increased approximately 3% year over year. Premium revenue PMPM also increased in the six months ended June 30, 2013 as a result of the inclusion of revenue for pharmacy benefits for the Utah health plan effective January 1, 2013, and as a result of the inclusion of revenue for inpatient facility and pharmacy benefits across all of the Texas health plan's membership effective March 1, 2012.

Medical Care Costs

The following table provides the details of consolidated medical care costs for the periods indicated (dollars in thousands except PMPM amounts):

	Six Months Ended June 30,					
	2013			2012		
	Amount	PMPM	% of Total	Amount	PMPM	% of Total
Fee for service	$ 1,746,620	$ 159.48	67.6%	$ 1,653,024	$ 160.57	69.0%
Pharmacy	454,830	41.53	17.6	386,181	37.51	16.1
Capitation	278,733	25.45	10.8	269,968	26.22	11.3
Other	102,438	9.35	4.0	86,291	8.38	3.6
Total	$ 2,582,621	$ 235.81	100.0%	$ 2,395,464	$ 232.68	100.0%

Our medical care ratio decreased in the six months ended June 30, 2013, when compared with the six months ended June 30, 2012, primarily due to improved financial performance at our Texas health plan.

Operating Data

The following table summarizes member months, premium revenue, medical care costs, medical care ratio, and premium taxes by health plan for the periods indicated (PMPM amounts are in whole dollars; member months and other dollar amounts are in thousands):

	Six Months Ended June 30, 2013							
	Member Months (1)	Premium Revenue		Medical Care Costs		Premium Tax Expense	MCR (2)	Medical Margin
		Total	PMPM	Total	PMPM

Washington	2,135	422,986	198.11	355,470	166.49	7,517	85.6	59,999
Wisconsin	250	35,930	143.54	39,644	158.31	—	110.3	(3,714)
Other (3)	—	4,497	—	24,300	—	33	—	(19,836)
	10,295	$ 2,701,196	$ 262.38	$ 2,395,464	$ 232.68	$ 80,540	91.4%	$ 225,192

(1) A member month is defined as the aggregate of each month's ending membership for the period presented.
(2) The MCR represents medical costs as a percentage of premium revenues, where premium revenue is reduced by premium tax expense.
(3) "Other" medical care costs also include medically related administrative costs at the parent company.

Molina Medicaid Solutions Segment

Performance of the Molina Medicaid Solutions segment was as follows:

	Six Months Ended June 30,	
	2013	2012
	(In thousands)	
Service revenue before amortization	$ 100,885	$ 84,235
Amortization recorded as reduction of service revenue	(1,457)	(306)
Service revenue	99,428	83,929
Cost of service revenue	79,075	61,107
General and administrative costs	5,141	5,207
Amortization of customer relationship intangibles recorded as amortization	2,564	2,564
Operating income	$ 12,648	$ 15,051

Operating income for our Molina Medicaid Solutions segment decreased $2.4 million for the six months ended June 30, 2013, compared with the same prior year period. The decrease in operating income was primarily the result of a change in the mix of transactions processed from fee-for-service claims to managed care encounters (processing fees are lower for encounters than for fee-for-service claims) and changes to state contract revenues implemented during 2012.

Consolidated Expenses

General and Administrative Expenses

General and administrative expenses increased to 10.1% of total revenue for the three months ended June 30, 2013, compared with 8.5% of total revenue for the three months ended June 30, 2012. General and administrative expenses increased to 9.5% of total revenue for the six months ended June 30, 2013, compared with 8.6% of total revenue for the six months ended June 30, 2012. The increased ratio of general and administrative expenses to total revenue for both the three months and six months ended June 30, 2013, was primarily due to higher costs incurred as a result of our preparations for significant membership growth in 2014.

Premium Tax Expense

Premium tax expense was 3.0% of premium revenue in the three months ended June 30, 2013, compared with 2.7% in the three months ended June 30, 2012, and 2.7% of premium revenue in the six months ended June 30, 2013, compared with 3.0% in the six months ended June 30, 2012. The year-to-date decrease in 2013 was primarily due to the reduction of premium taxes at the Michigan and California health plans effective in 2012.

Depreciation and Amortization

Depreciation and amortization related to our Health Plans segment is recorded in "Depreciation and amortization" in the consolidated statements of operations. Amortization related to our Molina Medicaid Solutions segment is recorded within three different headings in the consolidated statements of operations as follows:

- Amortization of purchased intangibles relating to customer relationships is reported as amortization within the heading "Depreciation and amortization;"
- Amortization of purchased intangibles relating to contract backlog is recorded as a reduction of "Service revenue;" and
- Amortization of capitalized software is recorded within the heading "Cost of service revenue."

The following table presents all depreciation and amortization recorded in our consolidated statements of operations, regardless of whether the item appears as depreciation and amortization, a reduction of service revenue, or as cost of service revenue.

	Three Months Ended June 30,			
	2013		2012	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation and amortization of capitalized software, continuing operations	$ 12,896	0.8%	$ 10,674	0.7%
Amortization of intangible assets, continuing operations	4,119	0.3	5,536	0.4
Depreciation and amortization, continuing operations	17,015	1.1	16,210	1.1
Depreciation and amortization, discontinued operations	—	—	177	—
Amortization recorded as reduction of service revenue	728	—	153	—
Amortization of capitalized software recorded as cost of service revenue	4,365	0.3	3,131	0.2
	$ 22,108	1.4%	$ 19,671	1.3%

	Six Months Ended June 30,			
	2013		2012	
	Amount	% of Total Revenue	Amount	% of Total Revenue
	(Dollar amounts in thousands)			
Depreciation and amortization of capitalized software, continuing operations	$ 25,341	0.8%	$ 19,969	0.7%
Amortization of intangible assets, continuing operations	8,237	0.3	11,089	0.4
Depreciation and amortization, continuing operations	33,578	1.1	31,058	1.1
Depreciation and amortization, discontinued operations	2	—	354	—
Amortization recorded as reduction of service revenue	1,457	—	306	—
Amortization of capitalized software recorded as cost of service revenue	8,870	0.3	6,292	0.2
	$ 43,907	1.4%	$ 38,010	1.3%

Interest Expense

Interest expense increased to $11.7 million for the three months ended June 30, 2013, from $3.8 million for the three months ended June 30, 2012, and increased to $24.7 million for the six months ended June 30, 2013, from $8.1 million for the six months ended June 30, 2012 primarily due to the issuance of the 1.125% Notes in February 2013. Interest expense includes amortization of the discount on our convertible senior notes, which amounted to $6.0 million and $1.5 million for the three months ended June 30, 2013, and 2012, respectively, and $9.7 million and $2.9 million for the six months ended June 30, 2013, and 2012, respectively. Interest expense in the first half of 2013 also includes the immediate recognition of approximately $6 million of interest expense relating to debt issuance costs. The remainder of the fees associated with that issuance, amounting to approximately $12 million, are being expensed over the life of the 1.125% Notes.

As described in further detail below, in "Future Sources and Uses of Liquidity – *Lease Financing Obligations*," lease payments under the sale-leaseback transactions adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of operations.

Other Expense

Other expense increased to $3.5 million for the three months ended June 30, 2013, from $1.1 million for the three months ended June 30, 2012, with a comparable increase for the six months ended June 30, 2013, over the same period in 2012. Other expense includes primarily gains or losses associated with changes in the fair value of our derivative financial instruments. In the second quarter of 2013 we recorded a one-time non-cash charge of $3.9 million related to warrants issued in conjunction with our convertible senior notes offering in February 2013, as described above in "Second Quarter 2013 Overview." For the three months and six months ended June 30, 2012, we recorded a $1.1 million charge for the fair value of

an interest rate swap derivative liability. We settled the interest rate swap in the second quarter of 2013, which resulted in a gain of approximately $0.4 million, which partially offset the $3.9 million charge described above.

Income Taxes

The provision for income taxes in continuing operations is recorded at an effective rate of 49.5% for the three months ended June 30, 2013 compared with 39.1% for the three months ended June 30, 2012, and 46.3% for the six months ended June 30, 2013 compared with 41.0% for the six months ended June 30, 2012. The increase is primarily due to an increase in non-deductible compensation, and the non-deductibility of the $3.9 million charge related to the warrants, as described above.

Liquidity and Capital Resources

Introduction

We manage our cash, investments, and capital structure to meet the short- and long-term obligations of our business while maintaining liquidity and financial flexibility. We forecast, analyze, and monitor our cash flows to enable prudent investment management and financing within the confines of our financial strategy.

Our regulated subsidiaries generate significant cash flows from premium revenue. Such cash flows are our primary source of liquidity. Thus, any future decline in our profitability may have a negative impact on our liquidity. We generally receive premium revenue in advance of the payment of claims for the related health care services. A majority of the assets held by our regulated subsidiaries are in the form of cash, cash equivalents, and investments. After considering expected cash flows from operating activities, we generally invest cash of regulated subsidiaries that exceeds our expected short-term obligations in longer term, investment-grade, and marketable debt securities to improve our overall investment return. These investments are made pursuant to board approved investment policies which conform to applicable state laws and regulations. Our investment policies are designed to provide liquidity, preserve capital, and maximize total return on invested assets, all in a manner consistent with state requirements that prescribe the types of instruments in which our subsidiaries may invest. These investment policies require that our investments have final maturities of five years or less (excluding auction rate securities and variable rate securities, for which interest rates are periodically reset) and that the average maturity be two years or less. Professional portfolio managers operating under documented guidelines manage our investments. As of June 30, 2013, a substantial portion of our cash was invested in a portfolio of highly liquid money market securities, and our investments consisted solely of investment-grade debt securities. All of our investments are classified as current assets, except for our restricted investments, and our investments in auction rate securities, which are classified as non-current assets. Our restricted investments are invested principally in certificates of deposit and U.S. treasury securities.

Investment income was $3.1 million for the six months ended June 30, 2013, compared with $2.7 million for the six months ended June 30, 2012. Our annualized portfolio yield for the six months ended June 30, 2013 was 0.4% compared with 0.5% for the six months ended June 30, 2012.

Investments and restricted investments are subject to interest rate risk and will decrease in value if market rates increase. We have the ability to hold our restricted investments until maturity. Declines in interest rates over time will reduce our investment income.

Cash in excess of the capital needs of our regulated health plans is generally paid to our non-regulated parent company in the form of dividends, when and as permitted by applicable regulations, for general corporate use.

Liquidity

Cash used in operating activities for the six months ended June 30, 2013 was $111.7 million compared with $236.0 million provided by operating activities for the six months ended June 30, 2012, a change of $347.7 million. The decrease in cash from operating activities was primarily due to the changes in deferred revenue and medical claims and benefits payable, partially offset by the change in accounts receivable. Deferred revenue and medical claims and benefits payable were a use of operating cash amounting to $124.9 million in the aggregate in the six months ended June 30, 2013, compared with a source of operating cash of $248.5 million in the aggregate in the same period in 2012. Accounts receivable was a use of operating cash amounting to $64.1 million in the six months ended June 30, 2013, compared with a source of operating cash of $6.9 million in the same period in 2012.

Cash used in investing activities for the six months ended June 30, 2013 was $431.8 million compared with $61.3 million for the six months ended June 30, 2012, an increase of $370.5 million. This increase was primarily due to increased purchases of investments in 2013, a result of increased cash generated in financing activities, described below.

Cash provided by financing activities for the six months ended June 30, 2013 was $490.5 million compared with $58.6 million for the six months ended June 30, 2012, an increase of $431.9 million. The significant increase was primarily due to $538.0 million in proceeds we received from our offering of 1.125% Notes, $158.7 million received from sale-leaseback transactions, and $75.1 million from the sale of warrants, partially offset by $149.3 million paid for the purchased call option relating to the 1.125% Notes, $50.0 million paid for repurchases of our common stock, $47.5 million used to repay our term loan, and $40.0 million used to repay our Credit Facility.

Financial Condition

On a consolidated basis, at June 30, 2013, we had working capital of $1,037.6 million compared with $521.1 million at December 31, 2012. At June 30, 2013, and December 31, 2012, we had cash and investments, including restricted investments, of $1,530.7 million, and $1,196.1 million, respectively. We believe that our cash resources and internally generated funds will be sufficient to support our operations, regulatory requirements, and capital expenditures for at least the next 12 months.

Regulatory Capital and Dividend Restrictions

Our health plans, which are operated by our respective wholly owned subsidiaries in those states, are subject to state laws and regulations that, among other things, require the maintenance of minimum levels of statutory capital, as defined by each state. Such state laws and regulations also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. The net assets in these subsidiaries (after intercompany eliminations) which may not be transferable to us in the form of loans, advances, or cash dividends was $607.5 million at June 30, 2013, and $549.7 million at December 31, 2012. Because of the statutory restrictions that inhibit the ability of our health plans to transfer net assets to us, the amount of retained earnings readily available to pay dividends to our stockholders is generally limited to cash, cash equivalents and investments held by the parent company – Molina Healthcare, Inc. Such cash, cash equivalents and investments amounted to $527.8 million and $46.9 million as of June 30, 2013, and December 31, 2012, respectively.

The National Association of Insurance Commissioners, or NAIC, adopted rules effective December 31, 1998, which, if implemented by the states, set minimum capitalization requirements for insurance companies, HMOs, and other entities bearing risk for health care coverage. The requirements take the form of risk-based capital (RBC) rules. Michigan, New Mexico, Ohio, Texas, Utah, Washington, and Wisconsin have adopted these rules, which may vary from state to state. California and Florida have not adopted NAIC risk-based capital requirements for HMOs and have not formally given notice of their intention to do so. Such requirements, if adopted by California and Florida, may increase the minimum capital required for those states.

As of June 30, 2013, our health plans had aggregate statutory capital and surplus of approximately $627.7 million compared with the required minimum aggregate statutory capital and surplus of approximately $363.2 million. All of our health plans were in compliance with the minimum capital requirements at June 30, 2013. We have the ability and commitment to provide additional capital to each of our health plans when necessary to ensure that statutory capital and surplus continue to meet regulatory requirements.

As described in Note 2 to the accompanying Notes to the Consolidated Financial Statements, the ACA imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. The fee will be imposed beginning in 2014 based on a company's share of the industry's net premiums written during the preceding calendar year. If the fee assessment is enacted as written, our minimum capitalization requirements will increase significantly on January 1, 2014; we are currently evaluating the impact of the fee assessment to our financial position, results of operations and cash flows.

Future Sources and Uses of Liquidity

As of June 30, 2013, maturities of long-term debt for the years ending December 31 are as follows (in thousands):

	Total	2013	2014	2015	2016	2017	Thereafter
1.125% Notes	$ 550,000	$ —	$ —	$ —	$ —	$ —	$ 550,000
3.75% Notes	187,000	—	187,000	—	—	—	—
	$ 737,000	$ —	$ 187,000	$ —	$ —	$ —	$ 550,000

1.125% Cash Convertible Senior Notes due 2020

On February 15, 2013, we settled the issuance of $550.0 million aggregate principal amount of 1.125% Cash Convertible Senior Notes due 2020 (the 1.125% Notes). This transaction included the initial issuance of $450.0 million on February 11, 2013, plus the exercise of the full amount of the $100.0 million over-allotment option on February 13, 2013. The aggregate net

proceeds of the 1.125% Notes were $458.9 million, after payment of the net cost of the Call Spread Overlay described below and transaction costs. Additionally, we used $50.0 million of the net proceeds to purchase shares of our common stock, and $40.0 million to repay the principal owed under our Credit Facility.

Interest on the 1.125% Notes is payable semiannually in arrears on January 15 and July 15 of each year, at a rate of 1.125% per annum commencing on July 15, 2013. The 1.125% Notes will mature on January 15, 2020 unless repurchased or converted in accordance with their terms prior to such date.

The 1.125% Notes are convertible only into cash, and not into shares of our common stock or any other securities. Holders may convert their 1.125% Notes solely into cash at their option at any time prior to the close of business on the business day immediately preceding July 15, 2019 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on June 30, 2013 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period immediately after any five consecutive trading day period in which the trading price per $1,000 principal amount of 1.125% Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after July 15, 2019 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their 1.125% Notes solely into cash at any time, regardless of the foregoing circumstances. Upon conversion, in lieu of receiving shares of our common stock, a holder will receive an amount in cash, per $1,000 principal amount of 1.125% Notes, equal to the settlement amount, determined in the manner set forth in the indenture.

The initial conversion rate will be 24.5277 shares of our common stock per $1,000 principal amount of 1.125% Notes (equivalent to an initial conversion price of approximately $40.77 per share of common stock). The conversion rate will be subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest. In addition, following certain corporate events that occur prior to the maturity date, we will pay a cash make-whole premium by increasing the conversion rate for a holder who elects to convert its 1.125% Notes in connection with such a corporate event in certain circumstances. We may not redeem the 1.125% Notes prior to the maturity date, and no sinking fund is provided for the 1.125% Notes.

If we undergo a fundamental change (as defined in the indenture to the 1.125% Notes), holders may require us to repurchase for cash all or part of their 1.125% Notes at a repurchase price equal to 100% of the principal amount of the 1.125% Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the fundamental change repurchase date. The indenture provides for customary events of default, including cross acceleration to certain other indebtedness of ours, and our significant subsidiaries.

The 1.125% Notes are senior unsecured obligations, and rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 1.125% Notes; equal in right of payment to any of our unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries.

The 1.125% Notes contain an embedded cash conversion option. We have determined that the embedded cash conversion option is a derivative financial instrument, required to be separated from the 1.125% Notes and accounted for separately as a derivative liability, with changes in fair value reported in our consolidated statements of operations until the embedded cash conversion option transaction settles or expires. The initial fair value liability of the embedded cash conversion option was $149.3 million, which simultaneously reduced the carrying value of the 1.125% Notes (effectively an original issuance discount).

As noted above, the reduced carrying value on the 1.125% Notes resulted in a debt discount that is amortized to the 1.125% Notes' principal amount through the recognition of interest expense over the expected life of the debt. This has resulted in our recognition of interest expense on the 1.125% Notes at an effective rate approximating what we would have incurred had nonconvertible debt with otherwise similar terms been issued. The effective interest rate of the 1.125% Notes is 5.9%, which is imputed based on the amortization of the fair value of the embedded cash conversion option over the remaining term of the 1.125% Notes. As of June 30, 2013, we expect the 1.125% Notes to be outstanding until their January 15, 2020 maturity date, for a remaining amortization period of 6.5 years.

Also in connection with the settlement of the 1.125% Notes, we paid approximately $16.9 million in transaction costs. Such costs have been allocated to the 1.125% Notes, the 1.125% Call Option (defined below) and the 1.125% Warrants (defined below) according to their relative fair values. The amount allocated to the 1.125% Notes, or $12.0 million, was

capitalized and will be amortized over the term of the 1.125% Notes. The aggregate amount allocated to the 1.125% Call Option and 1.125% Warrants, or $4.9 million, was recorded to interest expense in the quarter ended March 31, 2013.

1.125% Notes Call Spread Overlay

Concurrent with the issuance of the 1.125% Notes, we entered into privately negotiated hedge transactions (collectively, the 1.125% Call Option) and warrant transactions (collectively, the 1.125% Warrants), with certain of the initial purchasers of the 1.125% Notes (the Counterparties). These transactions represent a Call Spread Overlay, whereby the cost of the 1.125% Call Option we purchased to cover the cash outlay upon conversion of the 1.125% Notes was reduced by the sales price of the 1.125% Warrants. Assuming full performance by the Counterparties (and 1.125% Warrants strike prices in excess of the conversion price of the 1.125% Notes), these transactions are intended to offset cash payments due upon any conversion of the 1.125% Notes. We used $149.3 million of the proceeds from the settlement of the 1.125% Notes to pay for the 1.125% Call Option, and simultaneously received $75.1 million for the sale of the 1.125% Warrants, for a net cash outlay of $74.2 million for the Call Spread Overlay. The 1.125% Call Option is a derivative financial instrument.

Aside from the initial payment of a premium to the Counterparties of $149.3 million for the 1.125% Call Option, we will not be required to make any cash payments to the Counterparties under the 1.125% Call Option, and will be entitled to receive from the Counterparties an amount of cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the 1.125% Call Options during the relevant valuation period. The strike price under the 1.125% Call Option is initially equal to the conversion price of the 1.125% Notes. Additionally, if the market value per share of our common stock exceeds the strike price of the 1.125% Warrants on any trading day during the 160 trading day measurement period under the 1.125% Warrants, we will be obligated to issue to the Counterparties a number of shares equal in value to the product of the amount by which such market value exceeds such strike price and 1/160th of the aggregate number of shares of our common stock underlying the 1.125% Warrants, subject to a share delivery cap. We will not receive any additional proceeds if the 1.125% Warrants are exercised. Pursuant to the 1.125% Warrants, we issued 13,490,236 warrants with a strike price of $53.8475 per share. The number of warrants and the strike price are subject to adjustment under certain circumstances.

3.75% Convertible Senior Notes due 2014

We had $187.0 million of 3.75% Convertible Senior Notes due 2014 (the 3.75% Notes) outstanding as of June 30, 2013 and December 31, 2012, respectively. The 3.75% Notes rank equally in right of payment with our existing and future senior indebtedness. The 3.75% Notes are convertible into cash and, under certain circumstances, shares of our common stock. The initial conversion rate is 31.9601 shares of our common stock per one thousand dollar principal amount of the 3.75% Notes. This represents an initial conversion price of approximately $31.29 per share of our common stock. In addition, if certain corporate transactions that constitute a change of control occur prior to maturity, we will increase the conversion rate in certain circumstances.

Lease Financing Obligations

On June 12, 2013, we entered into a sale-leaseback transaction for the sale and contemporaneous leaseback of two properties, including the Molina Center located in Long Beach, California, and the building that houses our Ohio health plan located in Columbus, Ohio. We sold the two properties for $158.6 million in the aggregate. Due to our continuing involvement with these leased properties, the sale did not qualify for sale-leaseback accounting treatment and we remain the "accounting owner" of the properties. The carrying values of these properties, including the related intangible assets, amounted to $78.8 million in the aggregate as of June 30, 2013. These assets continue to be included in our consolidated balance sheets, and also continue to be depreciated and amortized over their remaining useful lives. The sales price of $158.6 million was recorded as a lease financing obligation, which is amortized over the 25-year lease term such that there will be no gain or loss recorded if the lease is not extended at the end of its term. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of operations. Transaction costs associated with this transaction, amounting to $3.5 million, have been deferred and will be amortized over the initial lease term.

We entered into a lease for office space in February 2013 consisting of two office buildings then under construction. We have concluded that we are the accounting owner of the construction projects because of our continuing involvement in those projects. Therefore, we have recorded $17.0 million to property, equipment and capitalized software, net, in the accompanying consolidated balance sheet as of June 30, 2013, which represents the total cost, including imputed interest, incurred by the landlord thus far in the construction projects. As of June 30, 2013, the aggregate amounts recorded to property, equipment and capitalized software, net, for both Building A and B are also recorded as a corresponding lease financing obligation of $17.0 million. Payments under the lease adjust the lease financing obligation, and the imputed interest is recorded to interest expense in our consolidated statements of operations. In addition to the capitalization of the costs incurred by the landlord, we impute and record rent expense relating to the ground leases for the property sites. Such rent expense is computed based on the fair value of the land and our incremental borrowing rate, and was immaterial for the six months ended June 30, 2013.

Term Loan

In December 2011, our wholly owned subsidiary, Molina Center LLC, entered into a term loan agreement with various lenders and East West Bank to borrow $48.6 million to finance a portion of the purchase price for the Molina Center, located in Long Beach, California. On June 13, 2013, we repaid the principal balance outstanding under the term loan on that date, with proceeds we received in the sale-leaseback transaction described above.

Credit Facility

On February 15, 2013, we used approximately $40.0 million of the net proceeds from the offering of the 1.125% Notes to repay all of the outstanding indebtedness under our $170 million revolving Credit Facility, with various lenders and U.S. Bank National Association, as Line of Credit Issuer, Swing Line Lender, and Administrative Agent. As of December 31, 2012, there was $40.0 million outstanding under the Credit Facility.

We terminated the Credit Facility in connection with the closing of the offering and sale of the 1.125% Notes. Two letters of credit in the aggregate principal amount of $10.3 million that reduced the amount available for borrowing under the Credit Facility as of December 31, 2012, were transferred to direct issue letters of credit with another financial institution. Such direct issue letters of credit are collateralized by restricted investments.

Shelf Registration Statement

In the second quarter of 2012, we filed a shelf registration statement on Form S-3 with the Securities and Exchange Commission covering the registration, issuance, and sale of an indeterminate amount of our securities, including common stock, preferred stock, senior or subordinated debt securities, or warrants. We may publicly offer securities from time to time at prices and terms to be determined at the time of the offering.

Securities Repurchase Program

Effective as of February 13, 2013, our board of directors authorized the repurchase of $75 million in the aggregate of either our common stock or our 3.75% Notes, in addition to the $50 million of our common stock that we repurchased on February 12, 2013. The repurchase program extends through December 31, 2014.

Contractual Obligations

A summary of future obligations under our various contractual obligations and commitments as of December 31, 2012, was disclosed in our 2012 Annual Report on Form 10-K. Other than the transactions relating to our February 2013 offering of the 1.125% Notes, and the sale-leaseback transactions discussed above, there were no material changes to this previously filed information outside the ordinary course of business during the three months ended June 30, 2013. For further discussion and maturities of our long-term debt, see Note 10 of Notes to the Consolidated Financial Statements.

Critical Accounting Policies

When we prepare our consolidated financial statements, we use estimates and assumptions that may affect reported amounts and disclosures. Actual results could differ from these estimates. Our most significant accounting policies relate to:

- Health plan contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract;
- Health plan quality incentives that allow us to recognize incremental revenue if certain quality standards are met;
- The recognition of revenue and costs associated with contracts held by our Molina Medicaid Solutions segment; and
- The determination of medical claims and benefits payable.

Premium Revenue – Health Plans Segment

Premium revenue is fixed in advance of the periods covered and, except as described below, is not generally subject to significant accounting estimates. Premium revenues are recognized in the month that members are entitled to receive health care services.

Certain components of premium revenue are subject to accounting estimates. The components of premium revenue subject to estimation fall into two categories:

(1) Contractual provisions that may limit revenue based upon the costs incurred or the profits realized under a specific contract: These are contractual provisions that require the health plan to return premiums to the extent that certain thresholds are not met. In some instances premiums are returned when medical costs fall below a certain percentage of gross premiums; or when administrative costs or profits exceed a certain percentage of gross premiums. In other instances, premiums are partially determined by the acuity of care provided to members (risk adjustment). To the extent that our expenses and profits change from the amounts previously reported (due to changes in estimates), our revenue earned for those periods will also change. In all of these instances, our revenue is only subject to estimate due to the fact that the thresholds themselves contain elements (expense or profit) that are subject to estimate. While we have adequate experience and data to make sound estimates of our expenses or profits, changes to those estimates may be necessary, which in turn would lead to changes in our estimates of revenue. In general, a change in estimate relating to expense or profit would offset any related change in estimate to premium, resulting in no or small impact to net income. The following contractual provisions fall into this category:

California Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our California health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. We recorded a liability under the terms of these contract provisions of approximately $0.7 million and $0.3 million at June 30, 2013, and December 31, 2012, respectively.

Florida Health Plan Medical Cost Floor (Minimum): A portion of premiums received by our Florida health plan may be returned to the state if certain minimum amounts are not spent on defined behavioral health care costs (in all counties except Broward). A similar minimum expenditure is required for total health care costs in Broward county only. At both June 30, 2013, and December 31, 2012, we had not recorded any liability under the terms of these contract provisions.

New Mexico Health Plan Medical Cost Floors (Minimums) and Administrative Cost and Profit Ceilings (Maximums): Our contract with the state of New Mexico directs that a portion of premiums received may be returned to the state if certain minimum amounts are not spent on defined medical care costs, or if administrative costs or profit, as defined in the contract, exceed certain amounts. At both June 30, 2013, and December 31, 2012, we had not recorded any liability under the terms of these contract provisions.

Ohio Health Plan Medical Cost Floors (Minimums): Sanctions may be levied by the state if certain minimum amounts are not spent on defined medical care costs. These sanctions include the requirements to file a corrective action plan as well as an enrollment freeze.

Texas Health Plan Profit Sharing: Under our contract with the state of Texas, there is a profit-sharing agreement under which we pay a rebate to the state of Texas if our Texas health plan generates pretax income, as defined in the contract, above a certain specified percentage, as determined in accordance with a tiered rebate schedule. We are limited in the amount of administrative costs that we may deduct in calculating the rebate, if any. As a result of profits in excess of the amount we are allowed to fully retain, we had accrued an aggregate liability of approximately $3.9 million and $3.2 million pursuant to our profit-sharing agreement with the state of Texas at June 30, 2013, and December 31, 2012, respectively.

Washington Health Plan Medical Cost Floors (Minimums): A portion of certain premiums received by our Washington health plan may be returned to the state if certain minimum amounts are not spent on defined medical care costs. At June 30, 2013, and December 31, 2012, we had not recorded any liability under the terms of this contract provision.

Medicare Revenue Risk Adjustment: Based on member encounter data that we submit to CMS, our Medicare premiums are subject to retroactive adjustment for both member risk scores and member pharmacy cost experience for up to two years after the original year of service. This adjustment takes into account the acuity of each member's medical needs relative to what was anticipated when premiums were originally set for that member. In the event that a member requires less acute medical care than was anticipated by the original premium amount, CMS may recover premium from us. In the event that a member requires more acute medical care than was anticipated by the original premium amount, CMS may pay us additional retroactive premium. A similar retroactive reconciliation is undertaken by CMS for our Medicare members' pharmacy utilization. We estimate the amount of Medicare revenue that will ultimately be realized for the periods presented based on our knowledge of our members' heath care utilization patterns and CMS practices. Based on our knowledge of member health care utilization patterns and expenses we have recorded a net receivable of approximately $7.1 million and $0.3 million as of June 30, 2013 and December 31, 2012, respectively for anticipated Medicare risk adjustment premiums.

(2) Quality incentives that allow us to recognize incremental revenue if certain quality standards are met: These are contract provisions that allow us to earn additional premium revenue in certain states if we achieve certain quality-of-care or administrative measures. We estimate the amount of revenue that will ultimately be realized for the periods presented based on our experience and expertise in meeting the quality and administrative measures as well as our ongoing and current monitoring of our progress in meeting those measures. The amount of the revenue that we will realize under these contractual provisions is determinable based upon that experience. The following contractual provisions fall into this category:

New Mexico Health Plan Quality Incentive Premiums: Under our contract with the state of New Mexico, incremental revenue of up to 0.75% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care and administrative measures dictated by the state.

Ohio Health Plan Quality Incentive Premiums: Under our contract with the state of Ohio, incremental revenue of up to 1% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

Texas Health Plan Quality Incentive Premiums: Effective March 1, 2012, under our contract with the state of Texas, incremental revenue of up to 5% of our total premium is earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures established by the state.

Wisconsin Health Plan Quality Incentive Premiums: Under our contract with the state of Wisconsin, incremental revenue of up to 3.25% of total premium may be earned if certain performance measures are met. These performance measures are generally linked to various quality-of-care measures dictated by the state.

The following table quantifies the quality incentive premium revenue recognized for the periods presented, including the amounts earned in the period presented and prior periods. Although the reasonably possible effects of a change in estimate related to quality incentive premium revenue as of June 30, 2013 are not known, we have no reason to believe that the adjustments to prior years noted below are not indicative of the potential future changes in our estimates as of June 30, 2013.

	Three Months Ended June 30, 2013

Service Revenue and Cost of Service Revenue — Molina Medicaid Solutions Segment

The payments received by our Molina Medicaid Solutions segment under its state contracts are based on the performance of multiple services. The first of these is the design, development and implementation (DDI) of a Medicaid Management Information System (MMIS). An additional service, following completion of DDI, is the operation of the MMIS under a business process outsourcing (BPO) arrangement. While providing BPO services (which include claims payment and eligibility processing), we also provide the state with other services including both hosting and support and maintenance. Our Molina Medicaid Solutions contracts may extend over a number of years, particularly in circumstances where we are delivering extensive and complex DDI services, such as the initial design, development and implementation of a complete MMIS. For example, the terms of our most recently implemented Molina Medicaid Solutions contracts (in Idaho and Maine) were each seven years in total, consisting of two years allocated for the delivery of DDI services, followed by five years for the performance of BPO services. We receive progress payments from the state during the performance of DDI services based upon the attainment of predetermined milestones. We receive a flat monthly payment for BPO services under our Idaho and Maine contracts. The terms of our other Molina Medicaid Solutions contracts – which primarily involve the delivery of BPO services with only minimal DDI activity (consisting of system enhancements) – are shorter in duration than our Idaho and Maine contracts.

We have evaluated our Molina Medicaid Solutions contracts to determine if such arrangements include a software element. Based on this evaluation, we have concluded that these arrangements do not include a software element. As such, we have concluded that our Molina Medicaid Solutions contracts are multiple-element service arrangements.

Additionally, we evaluate each required deliverable under our multiple-element service arrangements to determine whether it qualifies as a separate unit of accounting. Such evaluation is generally based on whether the deliverable has standalone value to the customer. The arrangement's consideration that is fixed or determinable is then allocated to each separate unit of accounting based on the relative selling price of each deliverable. In general, the consideration allocated to each unit of accounting is recognized as the related goods or services are delivered, limited to the consideration that is not contingent.

We have concluded that the various service elements in our Molina Medicaid Solutions contracts represent a single unit of accounting due to the fact that DDI, which is the only service performed in advance of the other services (all other services are performed over an identical period), does not have standalone value because our DDI services are not sold separately by any vendor and the customer could not resell our DDI services. Further, we have no objective and reliable evidence of fair value for any of the individual elements in these contracts, and at no point in the contract will we have objective and reliable evidence of fair value for the undelivered elements in the contracts. We lack objective and reliable evidence of the fair value of the individual elements of our Molina Medicaid Solutions contracts for the following reasons:

- Each contract calls for the provision of its own specific set of services. While all contracts support the system of record for state MMIS, the actual services we provide vary significantly between contracts; and
- The nature of the MMIS installed varies significantly between our older contracts (proprietary mainframe systems) and our new contracts (commercial off-the-shelf technology solutions).

Because we have determined the services provided under our Molina Medicaid Solutions contracts represent a single unit of accounting and because we are unable to determine a pattern of performance of services during the contract period, we recognize all revenue (both the DDI and BPO elements) associated with such contracts on a straight-line basis over the period during which BPO, hosting, and support and maintenance services are delivered. As noted above, the period of performance of BPO services under our Idaho and Maine contracts is five years. Therefore, absent any contingencies as discussed in the following paragraph, we would recognize all revenue associated with those contracts over a period of five years. In cases where there is no DDI element associated with our contracts, BPO revenue is recognized on a monthly basis as specified in the applicable contract or contract extension.

Provisions specific to each contract may, however, lead us to modify this general principle. In those circumstances, the right of the state to refuse acceptance of services, as well as the related obligation to compensate us, may require us to delay recognition of all or part of our revenue until that contingency (the right of the state to refuse acceptance) has been removed. In those circumstances we defer recognition of any contingent revenue (whether DDI, BPO services, hosting, and support and maintenance services) until the contingency has been removed. These types of contingency features are present in our Maine and Idaho contracts. In those states, we deferred recognition of revenue until the contingencies were removed.

Costs associated with our Molina Medicaid Solutions contracts include software-related costs and other costs. With respect to software related costs, we apply the guidance for internal-use software and capitalize external direct costs of materials and services consumed in developing or obtaining the software, and payroll and payroll-related costs associated with employees who are directly associated with and who devote time to the computer software project. With respect to all other direct costs, such costs are expensed as incurred, unless corresponding revenue is being deferred. If revenue is being deferred, direct costs relating to delivered service elements are deferred as well and are recognized on a straight-line basis over the period of revenue recognition, in a manner consistent with our recognition of revenue that has been deferred. Such direct costs can include:

- Transaction processing costs
- Employee costs incurred in performing transaction services
- Vendor costs incurred in performing transaction services
- Costs incurred in performing required monitoring of and reporting on contract performance
- Costs incurred in maintaining and processing member and provider eligibility
- Costs incurred in communicating with members and providers

The recoverability of deferred contract costs associated with a particular contract is analyzed on a periodic basis using the undiscounted estimated cash flows of the whole contract over its remaining contract term. If such undiscounted cash flows are insufficient to recover the long-lived assets and deferred contract costs, the deferred contract costs are written down by the amount of the cash flow deficiency. If a cash flow deficiency remains after reducing the balance of the deferred contract costs to zero, any remaining long-lived assets are evaluated for impairment. Any such impairment recognized would equal the amount by which the carrying value of the long-lived assets exceeds the fair value of those assets .

Medical Claims and Benefits Payable — Health Plans Segment

The following table provides the details of our medical claims and benefits payable as of the dates indicated:

	June 30, 2013	December 31, 2012	June 30, 2012
		(In thousands)	
Fee-for-service claims incurred but not paid (IBNP)	$ 360,153	$ 377,614	$ 378,782
Capitation payable	47,474	49,066	79,739
Pharmacy	37,241	38,992	34,848
Other	20,619	28,858	32,169
	$ 465,487	$ 494,530	$ 525,538

The determination of our liability for claims and medical benefits payable is particularly important to the determination of our financial position and results of operations in any given period. Such determination of our liability requires the application of a significant degree of judgment by our management.

As a result, the determination of our liability for claims and medical benefits payable is subject to an inherent degree of uncertainty. Our medical care costs include amounts that have been paid by us through the reporting date, as well as estimated liabilities for medical care costs incurred but not paid by us as of the reporting date. Such medical care cost liabilities include, among other items, unpaid fee-for-service claims, capitation payments owed providers, unpaid pharmacy invoices, and various medically related administrative costs that have been incurred but not paid. We use judgment to determine the appropriate assumptions for determining the required estimates.

The most important element in estimating our medical care costs is our estimate for fee-for-service claims which have been incurred but not paid by us. These fee-for-service costs that have been incurred but have not been paid at the reporting date are collectively referred to as medical costs that are "Incurred But Not Paid," or IBNP. Our IBNP, as reported on our balance sheet, represents our best estimate of the total amount of claims we will ultimately pay with respect to claims that we have incurred as of the balance sheet date. We estimate our IBNP monthly using actuarial methods based on a number of factors. As indicated in the table above, our estimated IBNP liability represented $360.2 million of our total medical claims and benefits payable of $465.5 million as of June 30, 2013. Excluding amounts that we anticipate paying on behalf of a capitated provider in Ohio (which we will subsequently withhold from that provider's monthly capitation payment), our IBNP liability at June 30, 2013, was $354.0 million.

The factors we consider when estimating our IBNP include, without limitation, claims receipt and payment experience (and variations in that experience), changes in membership, provider billing practices, health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, known outbreaks of disease or increased incidence of illness such as influenza, provider contract changes, changes to Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. Our assessment of these factors is then translated into an estimate of our IBNP liability at the relevant measuring point through the calculation of a base estimate of IBNP, a further reserve for adverse claims development, and an estimate of the administrative costs of settling all claims incurred through the reporting date. The base estimate of IBNP is derived through application of claims payment completion factors and trended PMPM cost estimates.

For the fifth month of service prior to the reporting date and earlier, we estimate our outstanding claims liability based on actual claims paid, adjusted for estimated completion factors. Completion factors seek to measure the cumulative percentage of claims expense that will have been paid for a given month of service as of the reporting date, based on historical payment patterns.

The following table reflects the change in our estimate of claims liability as of June 30, 2013 that would have resulted had we changed our completion factors for the fifth through the twelfth months preceding June 30, 2013, by the percentages indicated. A reduction in the completion factor results in an increase in medical claims liabilities. Dollar amounts are in thousands.

Increase (Decrease) in Estimated Completion Factors	Increase (Decrease) in Medical Claims and Benefits Payable
(6)%	$ 154,224
(4)%	102,816
(2)%	51,408
2%	(51,408)
4%	(102,816)
6%	(154,224)

For the four months of service immediately prior to the reporting date, actual claims paid are not a reliable measure of our ultimate liability, given the inherent delay between the patient/physician encounter and the actual submission of a claim for payment. For these months of service, we estimate our claims liability based on trended PMPM cost estimates. These estimates are designed to reflect recent trends in payments and expense, utilization patterns, authorized services, and other relevant factors. The following table reflects the change in our estimate of claims liability as of June 30, 2013 that would have resulted had we altered our trend factors by the percentages indicated. An increase in the PMPM costs results in an increase in medical

claims liabilities. Dollar amounts are in thousands.

(Decrease) Increase in Trended Per member Per Month Cost Estimates	(Decrease) Increase in Medical Claims and Benefits Payable
(6)%	$ (77,698)
(4)%	(51,799)
(2)%	(25,899)
2%	25,899
4%	51,799
6%	77,698

The following per-share amounts are based on a combined federal and state statutory tax rate of 37%, and 46.5 million diluted shares outstanding for the six months ended June 30, 2013. Assuming a hypothetical 1% change in completion factors from those used in our calculation of IBNP at June 30, 2013, net income for the six months ended June 30, 2013 would increase or decrease by approximately $16.2 million, or $0.35 per diluted share. Assuming a hypothetical 1% change in PMPM cost estimates from those used in our calculation of IBNP at June 30, 2013, net income for the six months ended June 30, 2013 would increase or decrease by approximately $8.2 million, or $0.18 per diluted share. The corresponding figures for a 5% change in completion factors and PMPM cost estimates would be $81.0 million, or $1.74 per diluted share, and $40.8 million, or $0.88 per diluted share, respectively.

It is important to note that any change in the estimate of either completion factors or trended PMPM costs would usually be accompanied by a change in the estimate of the other component, and that a change in one component would almost always compound rather than offset the resulting distortion to net income. When completion factors are *overestimated*, trended PMPM costs tend to be *underestimated*. Both circumstances will create an overstatement of net income. Likewise, when completion factors are *underestimated*, trended PMPM costs tend to be *overestimated*, creating an understatement of net income. In other words, errors in estimates involving both completion factors and trended PMPM costs will usually act to drive estimates of claims liabilities and medical care costs in the same direction. If completion factors were overestimated by 1%, resulting in an overstatement of net income by approximately $16.2 million, it is likely that trended PMPM costs would be underestimated, resulting in an additional overstatement of net income.

After we have established our base IBNP reserve through the application of completion factors and trended PMPM cost estimates, we then compute an additional liability, once again using actuarial techniques, to account for adverse developments in our claims payments which the base actuarial model is not intended to and does not account for. We refer to this additional liability as the provision for adverse claims development. The provision for adverse claims development is a component of our overall determination of the adequacy of our IBNP. It is intended to capture the potential inadequacy of our IBNP estimate as a result of our inability to adequately assess the impact of factors such as changes in the speed of claims receipt and payment, the relative magnitude or severity of claims, known outbreaks of disease such as influenza, our entry into new geographical markets, our provision of services to new populations such as the aged, blind or disabled (ABD), changes to state-controlled fee schedules upon which a large proportion of our provider payments are based, modifications and upgrades to our claims processing systems and practices, and increasing medical costs. Because of the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states, we make an overall assessment of IBNP after considering the base actuarial model reserves and the provision for adverse claims development. We also include in our IBNP liability an estimate of the administrative costs of settling all claims incurred through the reporting date. The development of IBNP is a continuous process that we monitor and refine on a monthly basis as additional claims payment information becomes available. As additional information becomes known to us, we adjust our actuarial model accordingly to establish IBNP.

On a monthly basis, we review and update our estimated IBNP and the methods used to determine that liability. Any adjustments, if appropriate, are reflected in the period known. While we believe our current estimates are adequate, we have in the past been required to increase significantly our claims reserves for periods previously reported, and may be required to do so again in the future. Any significant increases to prior period claims reserves would materially decrease reported earnings for the period in which the adjustment is made.

In our judgment, the estimates for completion factors will likely prove to be more accurate than trended PMPM cost estimates because estimated completion factors are subject to fewer variables in their determination. Specifically, completion factors are developed over long periods of time, and are most likely to be affected by changes in claims receipt and payment experience and by provider billing practices. Trended PMPM cost estimates, while affected by the same factors, will also be influenced by health care service utilization trends, cost trends, product mix, seasonality, prior authorization of medical services, benefit changes, outbreaks of disease or increased incidence of illness, provider contract changes, changes to

Medicaid fee schedules, and the incidence of high dollar or catastrophic claims. As discussed above, however, errors in estimates involving trended PMPM costs will almost always be accompanied by errors in estimates involving completion factors, and vice versa. In such circumstances, errors in estimation involving both completion factors and trended PMPM costs will act to drive estimates of claims liabilities (and therefore medical care costs) in the same direction.

Assuming that our initial estimate of claims incurred but not paid (IBNP) is accurate, we believe that amounts ultimately paid out would generally be between 8% and 10% less than the liability recorded at the end of the period as a result of the inclusion in that liability of the allowance for adverse claims development and the accrued cost of settling those claims. Because the amount of our initial liability is merely an estimate (and therefore not perfectly accurate), we will always experience variability in that estimate as new information becomes available with the passage of time. Therefore, there can be no assurance that amounts ultimately paid out will fall within the range of 8% to 10% lower than the liability that was initially recorded. Furthermore, because our initial estimate of IBNP is derived from many factors, some of which are qualitative in nature rather than quantitative, we are seldom able to assign specific values to the reasons for a change in estimate - we only know when the circumstances for any one or more factors are out of the ordinary.

As shown in greater detail in the table below, the amounts ultimately paid out on our liabilities in fiscal years 2013 and 2012 were less than what we had expected when we had established our reserves. For example, for the year ended December 31, 2012, the amounts ultimately paid out were less than the amount of the reserves we had established as of December 31, 2011 by 9.8%. While many related factors working in conjunction with one another determine the accuracy of our estimates, we are seldom able to quantify the impact that any single factor has on a change in estimate. In addition, given the variability inherent in the reserving process, we will only be able to identify specific factors if they represent a significant departure from expectations. As a result, we do not expect to be able to fully quantify the impact of individual factors on changes in estimates.

We recognized favorable prior period claims development in the amount of $62.8 million for the six months ended June 30, 2013. This amount represents our estimate as of June 30, 2013 of the extent to which our initial estimate of medical claims and benefits payable at December 31, 2012 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at December 31, 2012 was due primarily to the following factors:

- At our Texas health plan, STAR+PLUS (the state's program for ABD members) membership declined during mid– to late– 2012. This caused a reduction in costs per member that we did not fully recognize in our December 31, 2012 reserve estimates.
- At our Washington health plan, prior to July 2012, certain high-cost newborns that were approved for supplemental security income (SSI) coverage by the state were retroactively dis-enrolled from our Healthy Options (TANF) coverage, and the health plan was reimbursed for the claims paid on behalf of these members. Starting July 1, 2012, these newborns, as well as other high-cost disabled members, are now covered by the health plan under the Healthy Options Blind and Disabled (HOBD) program. At the end of 2012, we had limited claims history with which to estimate the claims liability of the HOBD members, and as a result the liability for these high-cost members was overstated.
- For our New Mexico health plan, we overestimated the impact of certain high-dollar outstanding claim payments as of December 31, 2012.

We recognized favorable prior period claims development in the amount of $50.0 million for the three months ended June 30, 2013. This amount represents our estimate as of June 30, 2013 of the extent to which our initial estimate of medical claims and benefits payable at March 31, 2013 was more than the amount that will ultimately be paid out in satisfaction of that liability. We believe the overestimation of our claims liability at March 31, 2013 was due primarily to the following factors:

- At our Washington health plan, we had limited claims history with which to estimate the incurred claims for members enrolled in the HOBD program. Because claims on this group of members were being paid at a rate faster than expected, the reserves for unpaid claims were overstated.
- At our Ohio and New Mexico health plans, we overestimated the impact of several potential high-dollar claims on critically ill members.

We recognized favorable prior period claims development in the amount of $36.4 million and $39.3 million for the six months ended June 30, 2012, and the year ended December 31, 2012, respectively. This was primarily caused by the overestimation of our liability claims and medical benefits at December 31, 2011, as a result of the following factors:

- At our Washington health plan, we underestimated the amount of recoveries we would collect for certain high-cost newborn claims, resulting in an overestimation of reserves at year end.
- At our Texas health plan, we overestimated the cost of new members in STAR+PLUS, in the Dallas region.
- The overestimation of our liability for medical claims and benefits payable was partially offset by an underestimation of that liability at our Missouri health plan, as a result of the costs associated with an unusually large number of premature infants during the fourth quarter of 2011.

In estimating our claims liability at June 30, 2013, we adjusted our base calculation to take account of the following factors which we believe are reasonably likely to change our final claims liability amount:

- In our Texas health plan, we have noted an unusually large number of claims with incurred dates older than 10 months. This has caused some distortion in the claims lag pattern that we use to estimate the incurred claims.
- Our Wisconsin health plan is experiencing significant membership increases, and approximately doubled in size during the first four months of 2013. This new membership is transitioning to our health plan from a terminated health plan. We enrolled approximately 50,000 new members in February, March and April 2013. We have computed a separate reserve analysis for these members and have noted that paid claims thus far are less than what we would expect for newly transitioned members. It has been our experience that when members move to new health plans, there is a delay in the submission of claims for payment. Therefore, we have increased the reserves for this membership, in anticipation of higher claims costs eventually being reported for these members.
- In our Michigan health plan, there were a large number of claim recoveries recorded in June 2013 due to overpayments that resulted from a system configuration issue. These recoveries impacted the completion factors used to estimate incurred claims. While we have attempted to remove this distortion from the claims data to develop a more accurate reserve estimate, this type of correction in claims data adds a degree of uncertainty for the Michigan reserves as of June 30, 2013.

The use of a consistent methodology in estimating our liability for claims and medical benefits payable minimizes the degree to which the under- or overestimation of that liability at the close of one period may affect consolidated results of operations in subsequent periods. In particular, the use of a consistent methodology should result in the replenishment of reserves during any given period in a manner that generally offsets the benefit of favorable prior period development in that period. Facts and circumstances unique to the estimation process at any single date, however, may still lead to a material impact on consolidated results of operations in subsequent periods. Any absence of adverse claims development (as well as the expensing through general and administrative expense of the costs to settle claims held at the start of the period) will lead to the recognition of a benefit from prior period claims development in the period subsequent to the date of the original estimate. In 2012 and for the six months ended June 30, 2013, the absence of adverse development of the liability for claims and medical benefits payable at the close of the previous period resulted in the recognition of substantial favorable prior period development. In both years, however, the recognition of a benefit from prior period claims development did not have a material impact on our consolidated results of operations because the replenishment of reserves in the respective periods generally offset the benefit from the prior period.

The following table presents the components of the change in our medical claims and benefits payable for the periods indicated. The amounts displayed for “Components of medical care costs related to: Prior periods” represent the amount by which our original estimate of claims and benefits payable at the beginning of the period were (more) or less than the actual amount of the liability based on information (principally the payment of claims) developed since that liability was first reported. The following table shows the components of the change in medical claims and benefits payable from continuing and discontinued operations as of the periods indicated:

	Six Months Ended June 30,		Three Months Ended June 30,		Year Ended
	2013	2012	2013	2012	December 31, 2012
	(Dollars in thousands, except per-member amounts)

Compliance Costs

Our health plans are regulated by both state and federal government agencies. Regulation of managed care products and health care services is an evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws and rules occur frequently. Compliance with such laws and rules may lead to additional costs related to the implementation of additional systems, procedures and programs that we have not yet identified.

Inflation

We use various strategies to mitigate the negative effects of health care cost inflation. Specifically, our health plans try to control medical and hospital costs through contracts with independent providers of health care services. Through these contracted providers, our health plans emphasize preventive health care and appropriate use of specialty and hospital services. There can be no assurance, however, that our strategies to mitigate health care cost inflation will be successful. Competitive pressures, new health care and pharmaceutical product introductions, demands from health care providers and customers, applicable regulations, or other factors may affect our ability to control health care costs.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments, receivables, and restricted investments. We invest a substantial portion of our cash in the PFM Fund Prime Series — Institutional Class, and the PFM Fund Government Series. These funds represent a portfolio of highly liquid money market securities that are managed by PFM Asset Management LLC, a Virginia business trust registered as an open-end management investment fund. Our investments and a portion of our cash equivalents are managed by professional portfolio managers operating under documented investment guidelines. No investment that is in a loss position can be sold by our managers without our prior approval. Our investments consist solely of investment grade debt securities with a maximum

maturity of five years and an average duration of two years or less. Restricted investments are invested principally in certificates of deposit and U.S. treasury securities. Concentration of credit risk with respect to accounts receivable is limited due to payors consisting principally of the governments of each state in which our Health Plans segment and our Molina Medicaid Solutions segment operate.

Item 4. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures: Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has concluded, based upon its evaluation as of the end of the period covered by this report, that the Company's *"disclosure controls and procedures"* (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the *"Exchange Act"*)) are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting: There has been no change in our internal control over financial reporting during the fiscal quarter ended June 30, 2013 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. ***Legal Proceedings***

The health care and business process outsourcing industries are subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Penalties associated with violations of these laws and regulations include significant fines and penalties, exclusion from participating in publicly funded programs, and the repayment of previously billed and collected revenues.

We are involved in legal actions in the ordinary course of business, some of which seek monetary damages, including claims for punitive damages, which are not covered by insurance. We have accrued liabilities for certain matters for which we deem the loss to be both probable and estimable. Although we believe that our estimates of such losses are reasonable, these estimates could change as a result of further developments of these matters. The outcome of legal actions is inherently uncertain and such pending matters for which accruals have not been established have not progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to estimate a range of possible loss, if any. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these pending matters could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 1A. ***Risk Factors***

Certain risk factors may have a material adverse effect on our business, financial condition, cash flows, or results of operations, and you should carefully consider them. In addition to the other information set forth in this report, the following risk factors were identified by the Company during the second quarter of 2013, and is a supplement to, and should be read together with, the risk factors discussed in Part I, Item 1A - Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2012. The risk factors described herein and in our 2012 Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition, cash flows, or results of operations.

Reductions in Medicare payments could reduce our earnings potential for our Medicare Advantage plans.

The American Taxpayer Relief Act (ATRA) of 2012, known as the "fiscal cliff" deal, delayed the sequestration mandated under the Sequestration Transparency Act of 2012 until March 1, 2013. Although Medicaid is exempt from cuts under ATRA, ATRA triggered automatic across-the-board budget cuts (known as "sequestration"), which included a 2% reduction of payments from the Centers for Medicare and Medicaid Services to our Medicare Advantage plans beginning April 1, 2013. Medicare Advantage plans will continue to be affected until Congress lifts the sequestration mandated under the Sequestration Transparency Act of 2012. The impact of sequestration cuts on our Medicare Advantage revenues is partially mitigated by reductions in provider reimbursements paid to those providers with rates indexed to the Medicare fee-for-service reimbursement rates. Such reduction in our Medicare payments may have an adverse effect on our earnings potential for our Medicare Advantage plans and our duals demonstration programs. In addition, reductions to provider reimbursement rates associated with sequestration may adversely impact our relations with the impacted providers.

Item 2. ***Unregistered Sales of Equity Securities and Use of Proceeds***

Issuer Purchases of Equity Securities

Common Stock Repurchase in Connection with Offering of 1.125% Cash Convertible Senior Notes Due 2020. We used a portion of the net proceeds in this offering to repurchase $50.0 million of our common stock in negotiated transactions with institutional investors in the offering, concurrently with the pricing of the offering. On February 12, 2013, we repurchased a total of 1,624,959 shares at $30.77 per share, which was our closing stock price on that date.

Securities Repurchase Program. Effective as of February 13, 2013, our board of directors authorized the repurchase of $75 million in aggregate of either our common stock or the 3.75% Notes, in addition to the $50.0 million common stock repurchase discussed above. The repurchase program extends through December 31, 2014.

Purchases of common stock made by or on our behalf during the quarter ended June 30, 2013, including shares withheld by us to satisfy our employees' income tax obligations, are set forth below:

	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
April 1 - April 30	590	$ 30.76	—	$ 75,000,000
May 1 - May 31	541	$ 33.15	—	$ 75,000,000
June 1 - June 30	26,550	$ 37.26	—	$ 75,000,000
Total	27,681	$ 37.04	—	

(a) During the three months ended June 30, 2013, we withheld 27,681 shares of common stock under our 2002 Equity Incentive Plan and 2011 Equity Incentive Plan to settle our employees' income tax obligations.

CERTIFICATE OF AMENDMENT
TO THE
CERTIFICATE OF INCORPORATION
OF
MOLINA HEALTHCARE, INC.

Molina Healthcare, Inc., a corporation organized and existing under the General Corporation Law of the State of Delaware (the " Corporation"), DOES HEREBY CERTIFY as follows:

1. The Corporation hereby amends and restates Article IV, Section A of its Certificate of Incorporation (the " Certificate of Incorporation") to read in its entirety as follows:

"A. The total number of shares of all classes of capital stock which the Corporation shall have the authority to issue is 170,000,000, consisting of (a) 150,000,000 shares of Common Stock, par value $0.001 per share ("Common Stock"), and (b) 20,000,000 shares of Preferred Stock, par value $0.001 per share ("Preferred Stock")."

2. The foregoing amendment of the Certificate of Incorporation has been duly approved by the Board of Directors of the Corporation in accordance with Sections 141 and 242 of the General Corporation Law of the State of Delaware.

3. The foregoing amendment of the Certificate of Incorporation has been duly approved by the stockholders of the Corporation in accordance with Sections 228 and 242 of the General Corporation Law of the State of Delaware.

4. The foregoing amendment of the Certificate of Incorporation was duly adopted in accordance with Section 242 of the General Corporation Law of the State of Delaware.

*****

IN WITNESS WHEREOF, this Certificate of Amendment has been executed on behalf of the Corporation by its Chief Executive Officer on this 2nd day of May, 2013.

Molina Healthcare, Inc.

AGREEMENT OF PURCHASE AND SALE

THIS AGREEMENT OF PURCHASE AND SALE (" Agreement") dated as of June 12, 2013 (the "Effective Date"), is by and among MOLINA HEALTHCARE, INC., a Delaware corporation ("Molina Healthcare"), Molina Center, LLC, a Delaware limited liability company ("Molina Center", together with Molina Healthcare individually or collectively, as the case may be, " Seller"), and AG NET LEASE ACQUISITION CORP., a Delaware corporation ("Buyer").

WITNESSETH:

WHEREAS, Seller is the owner of those certain Properties defined herein; and

WHEREAS, Seller desires to sell to Buyer, and Buyer desires to purchase from Seller, the Properties on the terms and conditions set forth in this Agreement;

NOW, THEREFORE, in consideration of the mutual promises hereinafter set forth and of other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto hereby agree as follows.

ARTICLE 1
CERTAIN DEFINITIONS

"Act of Bankruptcy" means with respect to any Person (a) the appointment of, or the taking of possession by, a receiver, custodian, trustee or liquidator of such Person or a substantial part of its property, (b) the admission by such Person of its inability to pay its debts as they become due, (c) the making of a general assignment for the benefit of such Person's creditors, (d) the commencement by or against such Person of a voluntary or involuntary proceeding under the Bankruptcy Code or any federal or state insolvency laws or laws for the composition of indebtedness or for the reorganization of debtors, (e) the adjudication of such Person as a bankrupt or insolvent or (f) the taking of any action for the purpose of effecting any of the foregoing.

"Advisor" is defined in Section 8.1.

"Agreement" is defined in the introductory paragraph of this Agreement.

"Apportioned Items" is defined in Section 11.4.

"Appurtenances" means, collectively, the Columbus Appurtenances and the Long Beach Appurtenances.

"Bankruptcy Law" means the United States Bankruptcy Code, 11 U.S.C.A. §§ 101 et seq. or any federal or state insolvency laws or laws for the reorganization of debtors.

"Bill of Sale" is defined in Section 4.1(b).

"Broker" is defined in Section 8.1.

"Business Day" means any day other than a Saturday, Sunday or a day on which commercial banks in New York, New York, are required to be closed.

"Buyer" is defined in the introductory paragraph of this Agreement.

"Buyer Indemnified Parties" is defined in Section 5.6.

"Buyer Objection Notice" is defined in Section 5.4.

"Buyer Transaction Documents" is defined in Section 6.1(b).

"Buyer's Closing Deliveries" is defined in Section 11.3(b).

"Buyer's Default" means the failure of Buyer to (a) perform any of its obligations under this Agreement or (b) otherwise consummate the Transaction notwithstanding that all of the conditions to its obligation to close have been satisfied.

"Buyer's Transaction Costs" is defined in Section 8.2(a).

"Casualty" means any loss of or damage to or destruction of all or any portion of the Property.

"Certificates of Occupancy" is defined in Section 5.1(m).

"Closing" means the consummation of the purchase and sale contemplated hereunder.

"Closing Date" is defined in Section 11.2.

"Code" means United States Internal Revenue Code of 1986, as amended.

"Columbus Appurtenances" is defined in Section 2.1(a)(iii).

"Columbus Fixtures" is defined in Exhibit B-1

"Columbus Improvements" is defined in Section 2.1(a)(ii).

"Columbus Intangible Property" means the Plans, Permits and Warranties related to the Columbus Real Property, the Columbus Improvements, the Columbus Appurtenances, and/or the items listed in clauses (a) and (b) of the definition of Columbus Property Other Assets (but not any Columbus Property Excluded Items).

"Columbus Property" is defined in Section 2.1(a).

"Columbus Property Excluded Items" is defined in Exhibit B-1.

"Columbus Property Equipment" is defined in Exhibit B-1.

"Columbus Property Other Assets" is defined in Exhibit B-1.

"Columbus Real Property" is defined in Section 2.1(a)(i).

"Condemnation" means (a) any taking or damaging of all or any portion of either of the Properties (i) in or by condemnation or other eminent domain proceedings pursuant to any Legal Requirement, or (ii) by reason of any agreement with any condemnor in settlement of or under threat of any such condemnation or other eminent domain proceeding, or (b) any temporary requisition or confiscation of the use or occupancy of all or any portion of either of the Properties by any Governmental Authority, whether pursuant to an agreement with such governmental authority in settlement of or under threat of any such requisition or confiscation.

"Contracts" means utility contracts, service contracts and other agreements entered into by Seller and used in the ownership, use or operation of either of the Properties.

"Custodian" means any receiver, trustee, assignee, liquidator or similar official under any Bankruptcy Law.

"Deed" is defined in Section 4.1(a).

"Deposit" is defined in Section 2.2(b)(i).

"Due Diligence Period" is defined in Section 3.1.

"Effective Date" is defined in the introductory paragraph of this Agreement.

"Environmental Law" means any applicable federal, state or local law, statute, ordinance, rule, regulation, license, permit, authorization, approval, consent, court order, judgment, decree, injunction, code, requirement or agreement with any Governmental Authority (a) relating to pollution (or the cleanup thereof), or the protection of air, water vapor, surface water, groundwater, drinking water supply, land (including land surface or subsurface), plant, aquatic and animal life from injury caused by a Hazardous Substance or (b) concerning exposure to, or the use, containment, storage, recycling, reclamation, reuse, treatment, generation, discharge, transportation, processing, handling, labeling, production, disposal or remediation of any Hazardous Substance or Hazardous Condition. The term Environmental Law includes, without limitation, the Comprehensive Environmental Response Compensation and Liability Act (CERCLA), the Clean Air Act, the Clean Water Act, the Solid Waste Disposal Act, the Toxic Substance Control Act, the Federal Insecticide, Fungicide and Rodenticide Act, the Occupational Safety and Health Act, the National Environmental Policy Act and the Hazardous Materials Transportation Act, each as amended and hereafter in effect and any similar state or local law.

"Environmental Reports" is defined in Section 5.1(n).

"Equipment" means, collectively, the Columbus Property Equipment and the Long Beach Property Equipment.

"Exchange Act" is defined in Section 12.11.

"Existing Insurance Policies" is defined in Section 5.1(v).

"Existing Mortgage" is defined in Section 5.1(r).

"Financial Statements" is defined in Section 5.1(w).

"Fixtures" means, collectively, the Columbus Fixtures and the Long Beach Fixtures.

"GAAP" means U.S. generally accepted accounting principles consistently applied.

"Governmental Authority" means any federal, state or local government, authority, agency or regulatory body.

"Hazardous Condition" means any condition that would support any claim or liability under any Environmental Law, including the presence of USTs at the Columbus Real Property or the Long Beach Real Property in violation of Environmental Law

"Hazardous Substance" means (a) any substance, material, product, derivative, compound, mineral, chemical, gas or mixture thereof, that is toxic, harmful or hazardous to the environment or public health or safety or (b) any substance supporting a claim under any Environmental Law, whether or not defined as hazardous as such under any Environmental Law. Hazardous Substances include, without limitation, medical waste, industrial waste, petroleum or petroleum-derived substances or waste, radon, radioactive materials, asbestos, asbestos-containing materials, urea-formaldehyde foam insulation, lead, toxic mold or other toxic microbial contamination, and polychlorinated biphenyls.

"Immaterial Casualty" means any Casualty that is not a Material Casualty.

"Immaterial Condemnation" means any Condemnation that is not a Material Condemnation.

"Improvements" means, collectively, the Columbus Improvements and the Long Beach Improvements.

"Indemnified Party" is defined in Section 8.1.

"Intangible Property" means, collectively, the Long Beach Intangible Property and the Columbus Intangible Property.

"Knowledge of Seller" is defined in Section 5.3.

"Leases" is defined in Section 5.1(h).

"Legal Requirements" means the requirements of all present and future laws, including all permit and licensing requirements and all covenants, restrictions and conditions, including all easement agreements, now or hereafter of record which may be applicable to the Properties,

including without limitation the Americans With Disabilities Act, 42 U.S.C.A. §§ 1201 et seq., and all zoning, subdivision, building and Environmental Laws.

"Letter of Intent" means that certain Letter of Intent dated January 18, 2013 between Buyer and Seller.

"Long Beach Appurtenances" is defined in Section 2.1(b)(iii).

"Long Beach Fixtures" is defined in Exhibit B-2.

"Long Beach Improvements" is defined in Section 2.1(b)(ii).

"Loan Beach Intangible Property" means the Plans, Permits and Warranties related to the Long Beach Real Property, the Long Beach Improvements, the Long Beach Appurtenances, and/or the items listed in clauses (a) and (b) of the definition of Long Beach Property Other Assets (but not any Long Beach Property Excluded Items).

"Long Beach Property" is defined in Section 2.1(b).

"Long Beach Property Excluded Items" is defined in Exhibit B-2.

"Long Beach Property Equipment" is defined in Exhibit B-2.

"Long Beach Property Other Assets" is defined in Exhibit B-2.

"Long Beach Real Property" is defined in Section 2.1(b)(i).

"Material Casualty" means a Casualty (a) in which a material portion of either of the Properties is destroyed or damaged prior to the Closing and the cost to repair or restore any loss or damage caused thereby is estimated to be greater than ten percent (10%) of the Purchase Price; or (b) that will result in a material loss of access to either of the Properties, in either case, as determined by Buyer in its reasonable discretion.

"Material Condemnation" means a Condemnation (a) that will result in a loss of material access to either of the Properties; or (b) that involves more than ten percent (10%) of the rentable area of either of the Properties.

"Memorandum of Lease Agreement (Columbus)" means a memorandum of lease in the form of Exhibit K.

"Memorandum of Lease Agreement (Long Beach)" means a memorandum of lease in the form of Exhibit J.

"Molina Center" is defined in the introductory paragraph of this Agreement.

"Molina Healthcare" is defined in the introductory paragraph of this Agreement.

"Notice Sublease" means the following Subleases: State Lands Commission; Department of Industrial Relations; Pacific Maritime Association; California Coastal Commission; Department of General Services; Crowell, Weedon & Co.; J. Perez & Associates, Inc.; Bruce A. Dybens, AP; High Rise Goodies Restaurant; Lisa Brandon, CFLS; MVP Energy, LLC; Rose, Klein & Marias; Perona, Langer, Beck; Dr. Michael Trainotti; Lynn E. Moyer; Esq.; Michael W. Binning; Arthritis National Research; APB Car Wash & Detail.

"Outside Date" is defined in Section 11.2.

"Parking Easement" means a permanent parking easement for the benefit of Seller with respect to any Parking Facilities not owned by Seller or any of its affiliates.

"Parking Facilities" means any and all on-site, satellite or off-site parking facilities utilized by Tenant or its employees, agents, invitees or contractors in connection with the use and operation of any Real Property.

"Permits" is defined in Section 5.1(j).

"Permitted Encumbrances" means, collectively, (a) Permitted Exceptions and (b) all Legal Requirements now or hereafter in effect relating to the Properties.

"Permitted Exceptions" is defined in Section 4.2.

"Person" means an individual, partnership, limited liability company, joint venture, corporation, trust, unincorporated association, any other entity or any government or any department or agency thereof, whether acting in an individual, fiduciary or other capacity.

"Plans" is defined in Section 5.1(k).

"Property" and "Properties" are defined in Section 2.1.

"Proprietary Information" means any written, oral, documentary or other information (including reports, tests, and studies) relating to the Transaction which is received by one party from the other party (or from third parties through the other party's authorization) and is not publicly available, including, without limitation, (a) information relating to the ownership, condition, operation and/or financial performance of either of the Properties, (b) the fact that discussions or negotiations are taking place between the parties with respect the Transaction, and (c) information relating to the terms and conditions on which each of Buyer and Seller is willing to enter into the Transaction and the terms on which Buyer is able to obtain financing with respect to the Transaction. Information shall not be deemed Proprietary Information if such information: (i) is already known to the receiving party without obligation of confidentiality, from a source other than the other party; (ii) is or hereafter becomes publicly known by the receiving party through no wrongful act, fault or negligence of the receiving party; or (iii) is independently developed by the receiving party.

"Purchase Price" is defined in Section 2.2(a).

"Real Property" means, collectively, the Columbus Real Property and the Long Beach Real Property.

"Reimbursable Transaction Costs" is defined in Section 8.2(f).

"Representation Objection Notice" is defined in Section 5.5.

"Securities Act" is defined in Section 12.11.

"Seller" is defined in the introductory paragraph of this Agreement.

"Seller Change Notice" is defined in Section 5.4.

"Seller Indemnified Parties" is defined in Section 6.3.

"Seller Transaction Documents" is defined in Section 5.1(b).

"Seller's Closing Deliveries" is defined in Section 11.3(a).

"Seller's Default" means the failure of Seller to (i) perform any of its obligations under this Agreement or (ii) otherwise consummate the Transaction notwithstanding that all of the conditions to its obligation to close have been satisfied.

"SLB Lease Agreement" means that certain Lease Agreement in the form of Exhibit I.

"SNDA Sublease" means a Sublease listed on Schedule 1(b).

"Specially Designated National or Blocked Person" means a Person (i) designated by the Office of Foreign Assets Control at the U.S. Department of the Treasury, or other U.S. governmental entity, and appearing on the List of Specially Designated Nationals and Blocked Persons (http://www.ustreas.gov/offices/enforcement/ofac/sdn/ index.shtml), which List may be updated from time to time; or (ii) with whom Buyer or its affiliates are prohibited from engaging in transactions by any trade embargo, economic sanction or other prohibition of United States law, regulation, or Executive Order of the President of the United States.

"Sublease(s)" means, individually or collectively, one of more of the Leases listed in Exhibit L

"Sublease SNDA" means a Subordination, Non-Disturbance and Attornment Agreement in the form of Exhibit M.

"Tenant" means the Molina Healthcare.

"Termination Notice" is defined in Section 10.3(c).

"Third Party Consents" is defined in Section 5.1(g).

"Third Party Reports" is defined in Section 3.1.

"Title Commitments" is defined in Section 3.1.

"Title Company" means Fidelity National Title Insurance Company.

"Title Policies" is defined in Section 4.2.

"Transaction" means the transactions contemplated in this Agreement.

"USTs" is defined in Section 5.1(n).

"Warranties" is defined in Section 5.1(l).

ARTICLE 2

PURCHASE AND SALE OF PROPERTY

Section 2.1 Sale. Seller hereby agrees to sell and convey to Buyer, and Buyer hereby agrees to purchase and acquire from Seller, subject to the terms and conditions set forth herein, the following (individually and collectively, as the context may require, the "Property" or "Properties"):

(a) The "Columbus Property," which means:

(i) the real property located in Columbus, Ohio particularly described in Exhibit A-1 (the "Columbus Real Property");

(ii) the buildings and all other structures and improvements situated on, or affixed or appurtenant to the Columbus Real Property, including any Parking Facilities owned by Seller, in each case except to the extent owned by tenants or licensees at the Columbus Real Property (collectively, the "Columbus Improvements");

(iii) all tenements, hereditaments, easements, rights-of-way, rights, privileges appurtenant to the Columbus Real Property, including (A) easements over other lands granted by any easement agreement benefiting the Columbus Real Property, including any Parking Easement, and (B) Seller's right, title and interest in and to any streets, ways, alleys, vaults, gores or strips of land adjoining the Columbus Real Property (collectively, the "Columbus Appurtenances"); and

(iv) all Columbus Property Other Assets.

(b) The "Long Beach Property," which means:

(i) the real property located in Long Beach, CA particularly described in Exhibit A-2 (the "Long Beach Real Property");

(ii) the buildings and all other structures and improvements situated on, or affixed or appurtenant to the Long Beach Real Property, including any Parking Facilities owned by Seller, in each case except to the extent owned by tenants or licensees at the Long Beach Real Property (collectively, the "Long Beach Improvements");

(iii) all tenements, hereditaments, easements, rights-of-way, rights, privileges appurtenant to the Long Beach Real Property, including (A) easements over other lands granted by any easement agreement benefiting the Long Beach Real Property, including any Parking Easement, and (B) Seller's right, title and interest in and to any streets, ways, alleys, vaults, gores or strips of land adjoining the Long Beach Real Property (collectively, the "Long Beach Appurtenances"); and

(iv) all Long Beach Property Other Assets.

Section 2.2 Purchase Price.

(a) The purchase price of the Properties is One Hundred Fifty Eight Million Six Hundred Twenty Five Thousand Five Hundred Sixty Six and No/100 Dollars ($158,625,566.00) (the " Purchase Price"), which amount is the sum of One Hundred Thirty Four Million Six Hundred Twenty Five Thousand Five Hundred Sixty-Six and No/100 Dollars ($134,625,566.00) for the purchase of the Long Beach Property and Twenty-Four Million and No/100 Dollars ($24,000,000.00) for the purchase of the Columbus Property.

(b) The Purchase Price shall be paid as follows:

(i) Within two (2) Business Days after the Effective Date, Buyer shall deposit in escrow with the Title Company cash in the amount of Three Million Five Hundred Thousand and No/100 Dollars ($3,500,000.00) (the " Deposit"), provided, however, that if the Closing Date occurs within two (2) Business Days of the Effective Date, the Deposit will be delivered prior to the Closing. The Deposit shall be held in an interest-bearing account and all interest or other income earned from the Deposit shall accrue to the benefit of Buyer. At the Closing, the Deposit shall be paid to Seller and credited against the Purchase Price. Except as otherwise provided in this Agreement, the Deposit shall not be refundable to Buyer.

(ii) IF THE SALE OF THE PROPERTIES IS NOT CONSUMMATED DUE TO THE FAILURE OF ANY CONDITION PRECEDENT AND NO BUYER'S DEFAULT HAS OCCURRED, THEN THE TITLE COMPANY SHALL RETURN THE DEPOSIT TO BUYER. IF THE SALE OF THE PROPERTIES IS NOT CONSUMMATED DUE TO A SELLER'S DEFAULT, THEN, AS BUYER'S SOLE AND EXCLUSIVE REMEDY, BUYER MAY EITHER: (1) TERMINATE THIS AGREEMENT AND RECEIVE A REFUND OF THE DEPOSIT, IN WHICH EVENT NEITHER PARTY SHALL HAVE ANY FURTHER RIGHTS OR OBLIGATIONS HEREUNDER, AND SELLER SHALL REIMBURSE BUYER FOR ALL OF BUYER'S REIMBURSABLE TRANSACTION COSTS OR (2) ENFORCE SPECIFIC PERFORMANCE OF THIS AGREEMENT.

(iii) THE PARTIES HAVE AGREED THAT, IF THE SALE OF THE PROPERTIES IS NOT CONSUMMATED DUE TO A BUYER'S DEFAULT, SELLER'S ACTUAL DAMAGES WOULD BE EXTREMELY DIFFICULT, IF NOT IMPOSSIBLE, TO DETERMINE. AFTER NEGOTIATION, THE PARTIES HAVE AGREED THAT, CONSIDERING ALL THE CIRCUMSTANCES EXISTING ON THE DATE OF THIS AGREEMENT, THE AMOUNT OF THE DEPOSIT IS A FAIR AND REASONABLE ESTIMATE OF THE DAMAGES THAT SELLER WOULD INCUR IN THE EVENT OF A BUYER'S DEFAULT.IN THE EVENT OF A BUYER'S DEFAULT, SELLER MAY TERMINATE THIS AGREEMENT, AND THE DEPOSIT SHALL BE FORFEITED TO AND DELIVERED TO SELLER AS LIQUIDATED DAMAGES AND AS THE SOLE AND EXCLUSIVE REMEDY AVAILABLE TO SELLER FOR SUCH BUYER'S DEFAULT. THE PARTIES HERETO HEREBY ACKNOWLEDGE THAT IT IS IMPOSSIBLE TO MORE PRECISELY ESTIMATE THE SPECIFIC DAMAGE THAT MIGHT BE SUFFERED BY SELLER, AND THE PARTIES HERETO EXPRESSLY ACKNOWLEDGE AND INTEND THAT THIS PROVISION SHALL BE A PROVISION FOR THE RETENTION OF EARNEST

MONEY PURSUANT TO THE APPLICABLE PROVISIONS OF THE LAWS OF THE STATE OF NEW YORK AND ANY OTHER LOCAL LAW AND NOT AS A PENALTYBY PLACING ITS INITIALS BELOW, EACH PARTY SPECIFICALLY CONFIRMS THE ACCURACY OF THE STATEMENTS MADE ABOVE AND THE FACT THAT EACH PARTY WAS REPRESENTED BY COUNSEL WHO EXPLAINED, AT THE TIME THIS AGREEMENT WAS MADE, THE CONSEQUENCES OF THIS LIQUIDATED DAMAGES PROVISION.

(iv) SECTIONS 2.2(b)(ii), 2.2(b)(iii), AND 2.2(b)(iv) SHALL SURVIVE TERMINATION OF THIS AGREEMENT. NOTHING CONTAINED IN SECTION 2.2(b)(ii) OR SECTION 2.2(b)(iii) IS INTENDED TO LIMIT (A) BUYER'S LIABILITY TO SELLER FOR DAMAGES OR INJUNCTIVE RELIEF FOR BREACH OF BUYER'S INDEMNITY OBLIGATIONS UNDER THIS AGREEMENT (INCLUDING WITHOUT LIMITATION UNDER SECTION 6.3), OR FOR ATTORNEY FEES AND COSTS AS DESCRIBED IN SECTION 12.17, OR (B) THE PARTIES' RIGHTS PURSUANT TO ANY OTHER PROVISION OF THIS AGREEMENT THAT EXPRESSLY SURVIVES THE TERMINATION OF THIS AGREEMENT.

(v) WITHOUT LIMITING ANYTHING CONTAINED IN SECTION 12.10, THE PAYMENT OF LIQUIDATED DAMAGES UNDER THIS AGREEMENT IS NOT INTENDED AS A FORFEITURE OR PENALTY WITHIN THE MEANING OF CALIFORNIA CIVIL CODE §3275 OR §3369 BUT IS INTENDED TO CONSTITUTE LIQUIDATED DAMAGES TO SELLER WITHIN THE MEANING OF CALIFORNIA CIVIL CODE §§1671, 1676, AND 1677.

INITIALS: SELLER _____ BUYER _____

(vi) The balance of the Purchase Price shall be paid to Seller in immediately available funds via wire transfer at the Closing.

ARTICLE 3

BUYER'S DUE DILIGENCE

Section 3.1 Due Diligence. Prior to the Effective Date, Buyer completed its due diligence investigation of the Properties and its credit analysis and underwriting of Seller and Tenant (such period being referred to herein as the " Due Diligence Period"). During the Due Diligence Period, Buyer conducted a physical inspection of the Properties and obtained the following, each in form and substance satisfactory to Buyer, with respect to each of the Properties (collectively, the " Third Party Reports"): (i) an engineering/property condition report, including a roof report; (ii) an environmental assessment report(s); (iii) a title report and commitment for title insurance from the Title Company, copies of which are attached hereto as Exhibit O (the "Title Commitments"), together with copies of all underlying documents; (iv) a current "as built" ALTA survey; (v) an MAI appraisal; (vi) a seismic report, if such Property is located in Seismic Design Category D, E or F as designated in the International Building Code; (vii) a property zoning report; and (viii) an Americans with Disabilities Act survey.

ARTICLE 4

TITLE

Section 4.1 Transfer of Title. At the Closing, Seller shall convey to Buyer:

(a) the Real Property, Improvements, Fixtures and Appurtenances by good and sufficient Deeds in the form of Exhibit D-1 and Exhibit D-2, respectively (each, individually, a "Deed"); and

(b) the Equipment and Intangible Property by good and sufficient Bills of Sale in the form of Exhibit E-1 and Exhibit E-2, respectively (each, individually, a "Bill of Sale").

Section 4.2 Evidence of Title. Buyer acknowledges that Title Company has issued the Title Commitments to Buyer, committing the Title Company to issue a standard Owner's American Land Title Association Policy of Title Insurance regarding each Real Property (collectively, the "Title Policies"), in the amount of the Purchase Price allocated to such Real Property, showing title to the applicable Real Property, Improvements, and Appurtenances vested in Buyer and subject only to certain exceptions listed therein. As used herein, the "Permitted Exceptions" means, collectively, the following:

(a) interests of tenants and licensees in possession;

(b) non-delinquent liens for local real estate taxes and assessments;

(c) the exceptions set forth in the Title Commitment regarding such Real Property, Improvements and Appurtenances; and

(d) any other instrument delivered at the Closing pursuant to the terms hereof and recorded against title to any of the Real Property pursuant to the terms of such instrument or this Agreement.

Notwithstanding the foregoing, but without limiting anything contained in Section 10.1, Buyer acknowledges and agrees that in no event shall issuance or delivery of the Title Policies be a covenant of Seller hereunder.

ARTICLE 5

SELLER'S REPRESENTATIONS AND WARRANTIES

Section 5.1 Representations and Warranties of Seller. Seller represents and warrants to Buyer that as of the Effective Date and as of the Closing Date:

(e) Molina Healthcare is a Delaware corporation, duly organized, validly existing and in good standing under the laws of the State of Delaware, and is duly qualified to do business and is in good standing in the State of Ohio. Molina Center is a Delaware corporation,

duly organized, validly existing and in good standing under the laws of the State of Delaware, and is duly qualified to do business and is in good standing in the State of California. Seller's principal place of business is 300 Oceangate, Suite 950, Long Beach, CA 90802.

(f) Seller has full power, authority and legal right to: (i) sell the Properties to Buyer; (ii) execute and deliver this Agreement, the Deeds, the Bills of Sale and such other instruments, documents and agreements as may be necessary or appropriate to effect the Transaction (collectively, the "Seller Transaction Documents"); and (iii) perform and observe the terms and conditions of each of the documents described above.

(g) This Agreement and, at the Closing, all other Seller Transaction Documents (i) are each duly authorized, executed and delivered by Seller, (ii) are each a legal, valid and binding obligation of Seller enforceable against Seller in accordance with its terms except as enforceability may be limited by applicable bankruptcy, insolvency, reorganization, moratorium or similar laws affecting the enforcement of creditors' rights generally and by general equitable principles, (iii) do not violate any of Seller's charter documents and (iv) do not conflict with or result in the breach of any judgment, decree, writ, injunction, order or award of any arbitrator, court or Governmental Authority binding upon Seller, or result in the breach of any term or provision of, or constitute a default, or result in the acceleration of any obligation under any loan agreement, indenture, financing agreement, or any other agreement or instrument of any kind to which Seller is a party or to which Seller or either of the Properties is subject.

(h) Seller is not a foreign corporation, foreign partnership, foreign trust and/or foreign estate (as those terms are defined in the Code and in the accompanying regulations). Molina Healthcare's U.S. employer identification number is 13-4204626. Molina Center's U.S. employer identification number is 27-4034065.

(i) Neither Seller nor any of Seller's officers or directors is a Specially Designated National or Blocked Person.

(j) Seller has not commenced a voluntary case under Bankruptcy Law nor has there been commenced against Seller an involuntary case under Bankruptcy Law, nor has Seller consented to the appointment of a Custodian of it or for all or any substantial part of its property, nor has a court of competent jurisdiction entered an order or decree under any applicable Bankruptcy Law that is for relief against Seller or appoints a Custodian for Seller or for all or any substantial part of Seller's property.

(k) Except for the approvals and consents listed in Schedule 5.1(g) (the "Third Party Consents"), no authorizations, consents or approvals of or filings with any Governmental Authority or any other Person is required in order for Seller to execute and deliver this Agreement and to perform its obligations hereunder. Seller has obtained, or will have obtained prior to the Closing, all Third Party Consents.

(l) The list of leases (including amendments, extensions and supplements, as applicable) in Schedule 5.1(h) (collectively, the "Leases") is a complete list of all of the leases

encumbering the Properties (other than, at Closing, the SLB Lease Agreement). Seller has provided Buyer with a true and complete copy of each Lease. Each Lease is in full force and effect and is a legal, valid, binding and enforceable obligation of each of the parties thereto except as enforceability may be limited by applicable bankruptcy, insolvency, reorganization, moratorium or similar laws affecting the enforcement of creditors' rights generally and by general equitable principles. Except as described in Schedule 5.1(h), no Lease has been amended, modified or supplemented and no provision of any Lease has been waived. To the Knowledge of Seller, except as described in Schedule 5.1(h), no event has occurred which with the giving of notice or the passage of time, or both, would constitute a material default under any of the Leases. Seller has received no written notice of default from any Person alleging any default under any Lease on the part of the Seller. Except as described in Schedule 5.1(h), or otherwise disclosed to Buyer in writing, to the Knowledge of Seller, (i) no tenant of either of the Properties nor any other Person has any purchase option regarding either of the Properties, (ii) no tenant under any Lease has any right to terminate such Lease as a result of the Transaction, and (iii) no tenant under any Lease has any right of first refusal, right of first offer or similar right to purchase any of the Properties or any portion thereof as a result of the Transaction. Except as described in Schedule 5.1(h), or otherwise disclosed to Buyer in writing, there are no brokerage, leasing or other commissions payable by Seller with respect to the Leases. Except as described in Schedule 5.1(h), or otherwise disclosed to Buyer in writing, no party other than Seller, the tenants under the Leases, and licensees under license agreements previously disclosed to Buyer, is entitled to possession or use of the Property or any portion thereof.

(m) The list of Contracts (including amendments, extensions and supplements, as applicable) in Schedule 5.1(i) is a complete list of all of the Contracts affecting each of the Properties to which Seller is a party. Seller has provided Buyer with a true and complete copy of each Contract and each Contract is in full force and effect and is a legal, valid, binding and enforceable obligation of each of the parties thereto except as enforceability may be limited by applicable bankruptcy, insolvency, reorganization, moratorium or similar laws affecting the enforcement of creditors' rights generally and by general equitable principles. Except as described in Schedule 5.1(i), none of the Contracts has been amended, modified or supplemented and no provision of any of the Contracts has been waived.

(n) The list of permits, licenses and approvals (including amendments, extensions and supplements, as applicable) in Schedule 5.1(j) is a complete list of all permits, licenses, and approvals mandated or necessary to own and operate the Properties (collectively, the "Permits"). Seller has provided Buyer with a true and complete copy of each Permit. Except as set forth in Schedule 5.1(j), to the Knowledge of Seller, each Permit (i) has been properly issued and is fully paid for; (ii) is in full force and effect and no suspension, cancellation or amendment of any of such Permit is pending or threatened; and (iii) is transferable and will not be revoked, invalidated, violated or otherwise adversely affected by the Transaction.

(o) The list of plans and drawings in Schedule 5.1(k) is a complete list of all building plans and drawings with respect to the Improvements in the possession of Seller (the "Plans"). Seller has provided to Buyer correct and complete copies of the Plans.

(p) The list of warranties and guaranties in Schedule 5.1(l) is a complete list of all warranties and guaranties with respect to the Improvements in the possession of Seller (the "Warranties"). Seller has provided to Buyer correct and complete copies of the Warranties.

(q) The certificates of occupancy listed on Schedule 5.1(m) are true and complete copies of all of the certificates of occupancy required for the occupancy and operation of the Improvements by Seller (the "Certificates of Occupancy"). To the Knowledge of Seller, the Certificates of Occupancy have been properly issued. All fees payable in connection therewith have been paid in full. No applications are pending to amend any such Certificates of Occupancy.

(r) To the Knowledge of Seller, Seller is and has been in compliance with all applicable Environmental Laws, and Seller has not received any written notice, report or information regarding (i) any past violations of any applicable Environmental Laws that have not been corrected or (ii) any required corrective, investigatory or remedial obligations, arising under any applicable Environmental Law that have not been completed, in each case to the satisfaction of the applicable Governmental Authority. Seller has delivered to Buyer complete, unedited and unredacted copies of all environmental reports in Seller's possession relating to the Property (collectively, the "Environmental Reports"). Except as set forth on Schedule 5.1(n), there are no underground storage tanks ("USTs") located on or under either of the Properties. To the Knowledge of Seller, the UST under the Long Beach Real Property only contains, and has only contained, water and certain water treatment chemicals in compliance with Environmental Laws given the intended uses of such water.

(s) Pursuant to California Health and Safety Code section 25359.7, Seller hereby gives notice to Buyer, and Buyer hereby acknowledges receipt of such notice from Seller, that Seller does not know of or have reasonable cause to believe that a release of Hazardous Substances has come to be located on or beneath either of the Properties. Buyer also hereby acknowledges receipt of the disclosure reports listed on Schedule 5.1(o) and, without limitation, all Seller's representations and warranties contained in this Section 5.1 are deemed qualified by the contents thereof.

(t) Seller has received no written notice that either of the Properties is not in compliance with all applicable Legal Requirements (except where such non-compliance has been corrected).

(u) There are no actions, suits, proceedings or governmental investigations pending or, to the Knowledge of Seller, threatened against Seller or either of the Properties: (i) that could reasonably be expected to result in any adverse change in Seller's business or financial condition; (ii) that could reasonably be expected to adversely affect the current use or operation of either of the Properties or (iii) that could reasonably be expected to adversely affect Seller's ability to perform its obligations under this Agreement.

(v) Except for the indebtedness set forth in Schedule 5.1(r) (the "Existing Mortgage"), which will be repaid as of the Closing, none of the Properties is pledged to secure any indebtedness of Seller or any other Person.

(w) Seller has not granted any unrecorded deeds, mortgages, land contracts, options to purchase, agreements or other instruments adversely affecting title to either of the Properties, and none of Seller or any agent, officer, employee or principal thereof has created any unrecorded lien, encumbrance, transfer of interest, or constructive trust in either of the Properties (provided that in no event shall any of the foregoing in this Section 5.1(s) be deemed to include any of the Leases or other matters disclosed on Schedule 5.1(h), or any other matter disclosed to Buyer in writing).

(x) All real property taxes and assessments due with respect to each of the Properties have been paid in full and there are no tax appeals, tax certiorari proceedings, tax reduction proceedings, tax protests or special assessment proceedings pending with respect to either of the Properties.

(y) There are no Condemnation, zoning or other land-use proceedings, either pending or, to the Knowledge of Seller, threatened, which could reasonably be expected to materially and adversely affect: (i) vehicular access to either of the Properties; (ii) access by either of the Properties to sewer or utility hook-ups; (iii) the current use and operation of either of the Properties or (iv) the value of either of the Properties.

(z) Schedule 5.1(v) contains a list of the existing insurance policies maintained by Seller with respect to the Properties (the "Existing Insurance Policies"). Seller has not received any written notice or demand from any of the insurers of all or any portion of either of the Properties (or insurers of any activities conducted thereon) to correct or change any physical condition on such Property or any practice of Seller (except where such correction or change has been made). Each of the Existing Insurance Policies is in full force and effect, and Seller is in compliance with the requirements of each of the Existing Insurance Policies.

(aa) Schedule 5.1(w) sets forth the financial statements of Molina Healthcare previously provided to Buyer (the "Financial Statements"). The Financial Statements are true and correct in all material respects, have been prepared in accordance with GAAP throughout the periods indicated therein and fairly present the financial condition of Molina Healthcare for the periods indicated therein, subject to customary year-end adjustments with respect to the unaudited financial statements. From December 31, 2012, to the Effective Date, there has been no material adverse change in the assets, liabilities, condition (financial or otherwise) or business of Molina Healthcare from that set forth or reflected in the above-mentioned financial statements other than changes in the ordinary course of business.

(bb) Seller has not made written application to any Governmental Authority for any expansion or further development of either of the Properties and Seller has not received written notice that any expansion or further development of either of the Properties is subject to any restrictions or conditions except as may be in documents recorded against title to either Real Property or set forth in the applicable zoning law requirements or other Legal Requirements.

(cc) Seller has not received written notice (i) from any Governmental Authority of any pending or threatened judicial or administrative action specifically applicable to either

Property or (ii) of any action pending or threatened by land owners adjacent to either of the Properties or other Persons, that in either case of (i) or (ii) would result in a change in the condition of either of the Properties or any part thereof or in any way prevent or limit the construction and/or operation of the Improvements or any part thereof.

(dd) No labor has been performed or materials fabricated or furnished with respect to either of the Properties that could result in a materialman's or mechanic's lien filed against such Property, except as shall have been fully paid or released and except in the ordinary course of tenant improvement work at either of the Properties.

Section 5.2 Survival; Limitation of Liability; Disclosures. All representations and warranties of Seller contained in this Agreement shall survive only for a period of twelve (12) months after the date of Closing. Any disclosure made on any Schedule hereto with respect to any provision of Section 5.1 will be deemed disclosed on all other Schedules relating to all other provisions of Section 5.1 to the extent that it is reasonably apparent from such disclosure that such disclosure also qualifies or applies to such other provisions.

Section 5.3 Knowledge of Seller. Buyer expressly understands and agrees that the phrase to the "Knowledge of Seller" as used in Section 5.1 means a matter that any of the following officers of Seller: John C. Molina, CFO, and Joseph W. White, CAO (a) is actually aware of, (b) received written notice of, or (c) would be expected to discover or otherwise become aware of in the course of conducting reasonable investigation.

Section 5.4 Seller Change Notice. Seller may give written notice to Buyer if, due to any change in circumstance occurring after the date of this Agreement or Seller obtaining any knowledge not possessed on the Effective Date, any representation or warranty of Seller becomes untrue or incorrect prior to Closing (a " Seller Change Notice"). In the event Seller delivers a Seller Change Notice to Buyer, Buyer may, within five (5) Business Days after Buyer's receipt of the Seller Change Notice, either (a) waive any such matter or circumstance which is the subject of such Seller Change Notice or (b) deliver written notice to Seller of Buyer's objection to such matter (a " Buyer Objection Notice"). If Buyer fails to deliver to Seller either such written waiver or a Buyer Objection Notice within said five (5) Business Days, Buyer shall be deemed to have waived any such matter or circumstance in its entirety. If Buyer delivers to Seller a Buyer Objection Notice, Seller shall have the right, but not the obligation, to cure or remedy such matter or circumstance to Buyer's satisfaction, in Buyer's reasonable discretion, within five (5) Business Days after Seller's receipt of the Buyer Objection Notice. If Seller fails to cure or remedy such matter within said five (5) Business Days, Buyer may, within two (2) Business Days after the expiration of said five (5) Business Day cure period, either waive in writing any such matter or circumstance which is the subject of such Seller Change Notice or deliver written notice to Seller of Buyer's election to terminate this Agreement. If Buyer fails to deliver either such written waiver or such written notice of termination to Seller within said two (2) Business Days, Buyer shall be deemed to have waived its right terminate this Agreement pursuant to this Section 5.4. In the event Buyer delivers written notice of election to terminate this Agreement, all obligations of Buyer and Seller hereunder (except the provisions of this Agreement that expressly survive termination of this Agreement) shall terminate and be

of no further force or effect. If necessary, the Closing Date shall be automatically extended for the period of time needed to implement the provisions of this Section and allow for an orderly closing thereafter if this Agreement is not terminated. If Buyer does not exercise such right to terminate this Agreement and the Closing occurs, then at the Closing the Buyer shall be deemed to have accepted the modified representation and warranty of Seller as set forth in the Seller Change Notice. Notwithstanding the foregoing, the parties agree that any lease or other agreement or encumbrance entered into by Seller and approved by Buyer as described in Section 9.1 shall not be deemed a breach of any representation or warranty of Seller under this Agreement, require any Seller Change Notice, or give rise to any right by Buyer to object to same in a Buyer Objection Notice.

Section 5.5 Buyer's Knowledge of Inaccurate Representations and Warranties. In the event that, prior to the Closing, Buyer obtains knowledge that any representation or warranty of Seller set forth in Section 5.1 is inaccurate, then Buyer may notify Seller in writing of such inaccuracy (a "Representation Objection Notice"). If Buyer delivers a Representation Objection Notice, Seller shall have the right, but not the obligation, to cure or remedy such matter or circumstance to Buyer's satisfaction, in Buyer's sole and absolute discretion, within ten (10) Business Days after Seller's receipt of the Representation Objection Notice. If Seller fails to cure or remedy such matter within said ten (10) Business Days, Buyer may, within two (2) Business Days after the expiration of said ten (10) Business Day cure period, either waive any such matter or circumstance which is the subject of such Representation Objection Notice or deliver written notice to Seller of Buyer's election to terminate this Agreement. If Buyer fails to deliver either such written waiver or such written notice of termination to Seller within said two (2) Business Days, Buyer shall be deemed to have waived any objection to such representation or warranty inaccuracy in its entirety. In the event Buyer delivers written notice of election to terminate this Agreement, then (a) all obligations of Buyer hereunder (except the provisions in this Agreement that expressly survive termination of this Agreement) shall terminate and be of no further force or effect and (b) if such inaccuracy resulted from a change in circumstance occurring after the date of this Agreement through no act or omission by Seller, including without limitation Seller obtaining any knowledge not possessed on the date of this Agreement, then Seller shall not be deemed in default of this Agreement and all obligations of Seller hereunder (except the provisions in this Agreement that expressly survive termination of this Agreement) shall terminate and be of no further force or effect. If necessary, the Closing Date shall be automatically extended for the period of time needed to implement the provisions of this Section and allow for an orderly closing thereafter if this Agreement is not terminated. If, in either such event, Buyer does not exercise such right to terminate this Agreement and the Closing occurs, then at the Closing Buyer shall be deemed to have waived all rights and remedies on account of any representation or warranty of Seller to the extent, but only the extent, that Buyer had knowledge prior to the Closing that such representation or warranty was not true. Notwithstanding the foregoing, the parties agree that any lease or other agreement or encumbrance entered into by Seller and approved by Buyer as described in Section 9.1 shall not be deemed a breach of any representation or warranty of Seller under this Agreement, or give rise to any right of Buyer to deliver a Representation Objection Notice.

Section 5.6 Indemnification. Subject to Section 5.4 and 5.5 of this Agreement, from and after the Closing, Seller shall jointly and severally indemnify, defend and hold harmless (a) Buyer, (b) any director, member, manager, officer, shareholder, general partner, limited partner, employee or agent of Buyer (or any legal representative, heir, estate, successor or assign of any thereof), (c) any predecessor or successor partnership, corporation, limited liability company (or other entity) of Buyer, or any of its general partners, members or shareholders and (d) any other affiliates of Buyer (collectively, the " Buyer Indemnified Parties"), from and against any and all liabilities, losses, damages, costs, expenses (including without limitation reasonable attorneys' fees and expenses), causes of action, suits, claims, demands or judgments of any nature in each case caused by or arising from, the fact that any representation or warranty made by Seller herein was materially untrue when made, or any breach by Seller of any representation or warranty set forth herein. This Section 5.6 shall survive the Closing, but shall be of no further force or effect from and after the expiration of the twelve (12) month period following the date of the Closing with respect to any representation or warranty by Seller regarding which Buyer has not previously asserted to Seller, in writing, a breach by Seller (and, in such event, such representation or warranty shall thereafter survive only with respect to such asserted breach).

Section 5.7 "As Is" Purchase; Release. EXCEPT AS OTHERWISE PROVIDED IN THIS AGREEMENT, AND WITHOUT LIMITING ANYTHING CONTAINED IN THE SLB LEASE AGREEMENT, (a) BUYER HAS AGREED TO ACCEPT THE PROPERTY ON THE CLOSING DATE ON AN "AS IS" BASIS. SELLER AND BUYER AGREE THAT THE PROPERTY WILL BE SOLD "AS IS, WHERE IS, WITH ALL FAULTS" WITH NO RIGHT OF SET-OFF OR REDUCTION IN THE PURCHASE PRICE, AND, EXCEPT AS SET FORTH IN SECTION 5.1 OF THIS AGREEMENT, SUCH SALE WILL BE WITHOUT REPRESENTATION OR WARRANTY OF ANY KIND, EXPRESS OR IMPLIED (INCLUDING, WITHOUT LIMITATION, WARRANTY OF INCOME POTENTIAL, OPERATING EXPENSES, USES, MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE), AND SELLER DISCLAIMS AND RENOUNCES ANY SUCH REPRESENTATION OR WARRANTY.Except as provided in this Article 5, effective from and after the Closing, Buyer hereby waives, releases, acquits, and forever discharges Seller, and Seller's agents, directors, officers, and employees to the maximum extent permitted by law, of and from any and all claims, actions, causes of action, demands, rights, liabilities, damages, losses, costs, expenses, or compensation whatsoever, direct or indirect, known or unknown, foreseen or unforeseen, that it now has or that may arise in the future because of or in any way growing out of or connected with this Agreement and the Properties (including without limitation the condition of the Property), except matters arising from Seller's fraud or intentional misrepresentation With respect to the claims released in this Section 5.7, Buyer expressly waives any rights or benefits available to it under the provisions of Section 1542 of the California Civil Code, which provides as follows:

> "A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known

by him or her must have materially affected his or her settlement with the debtor."

Buyer acknowledges that its attorney at law has explained to it the meaning and effect of this statute. Buyer understands fully the statutory language of California Civil Code Section 1542, and, with this understanding, Buyer nevertheless elects to, and does, assume all risk for claims released under this Agreement whether arising before or after this Agreement and whether now known or unknown, and Buyer specifically waives any rights it may have under California Civil Code Section 1542 and any successive sections or statutes of a similar nature. Buyer fully understands that if the facts with respect to which this Agreement is executed are later found to be other than or different from the facts now believed by it to be true, it expressly accepts and

assumes the risk of that possible difference in facts and agrees that this Agreement shall be and remain effective notwithstanding that difference in facts.

The provisions of this Section 5.7 shall survive the Closing and termination of this Agreement.

_____ _____

Buyer's Initials Seller's Initials

ARTICLE 6

BUYER'S REPRESENTATIONS AND WARRANTIES

Section 6.1 Representations and Warranties of Buyer. Buyer represents and warrants to Seller that as of the Effective Date and as of the Closing Date:

(a) Buyer is a Delaware corporation, duly organized, validly existing and in good standing under the laws of the State of Delaware, and is duly qualified to do business and is in good standing in the State of Ohio and in the State of California. Buyer's principal place of business is 245 Park Avenue, 26th Floor, New York, NY 10167-0094.

(b) Buyer has full power, authority and legal right to: (i) buy the Properties from Seller; (ii) execute and deliver this Agreement, the Bills of Sale and such other instruments, documents and agreements as may be necessary or appropriate to effect the Transaction (collectively, the "Buyer Transaction Documents"); and (iii) perform and observe the terms and conditions of each of the documents described above.

(c) This Agreement and, at the Closing, all other Buyer Transaction Documents (i) are each duly authorized, executed and delivered by Buyer, (ii) are each a legal, valid and binding obligation of Buyer enforceable against Buyer in accordance with its terms except as enforceability may be limited by applicable bankruptcy, insolvency, reorganization, moratorium or similar laws affecting the enforcement of creditors' rights generally and by general equitable principles, (iii) do not violate any of Buyer's charter documents and (iv) do not conflict with or result in the breach of any judgment, decree, writ, injunction, order or award of any arbitrator, court or Governmental Authority binding upon Buyer, or result in the breach of any term or provision of, or constitute a default, or result in the acceleration of any obligation under any loan agreement, indenture, financing agreement, or any other agreement or instrument of any kind to which Buyer is a party.

(d) Neither Buyer nor any of Buyer's officers or directors is a Specially Designated National or Blocked Person.

(e) Buyer has not commenced a voluntary case under Bankruptcy Law nor has there been commenced against Buyer an involuntary case under Bankruptcy Law, nor has Buyer consented to the appointment of a Custodian of it or for all or any substantial part of its property, nor has a court of competent jurisdiction entered an order or decree under any applicable Bankruptcy

Law that is for relief against Buyer or appoints a Custodian for Buyer or for all or any substantial part of Buyer's property.

(f) No authorizations, consents or approvals of or filings with any Governmental Authority or any other Person is required in order for Buyer to execute and deliver this Agreement and to perform its obligations hereunder.

(g) There are no actions, suits, proceedings or governmental investigations pending or, to Buyer's knowledge, threatened against or affecting Buyer: (i) that could reasonably be expected to result in any adverse change in Buyer's business or financial condition; or (ii) that could reasonably be expected to adversely affect Buyer's ability to perform its obligations under this Agreement.

Section 6.2 Survival; Limitation of Liability. All representations and warranties of Buyer contained in this Agreement shall survive only for a period of twelve (12) months after the date of Closing.

Section 6.3 Indemnification. From and after the Closing, Buyer shall indemnify, defend and hold harmless (a) Seller, (b) any director, member, manager, officer, shareholder, general partner, limited partner, employee or agent of Seller (or any legal representative, heir, estate, successor or assign of any thereof), (c) any predecessor or successor partnership, corporation, limited liability company (or other entity) of Seller, or any of its general partners, members or shareholders and (d) any other affiliates of Seller (collectively, the "Seller Indemnified Parties"), from and against any and all liabilities, losses, damages, costs, expenses (including without limitation reasonable attorneys' fees and expenses), causes of action, suits, claims, demands or judgments of any nature in each case caused by or arising from, the fact that any representation or warranty made by Buyer herein was materially untrue when made, or any breach by Buyer of any representation or warranty set forth herein. This Section 6.3 shall survive the Closing but shall be of no further force or effect from and after the expiration of the twelve (12) month period following the date of the Closing with respect to any representation or warranty by Buyer regarding which Seller has not previously asserted to Buyer, in writing, a breach by Buyer (and, in such event, such representation or warranty shall thereafter survive only with respect to such asserted breach)

ARTICLE 7

RISK OF LOSS AND INSURANCE PROCEEDS

Section 7.1 Casualty. Seller shall give Buyer timely notice of any Casualty affecting any portion of either of the Properties prior to Closing. In the event of a Material Casualty prior to Closing, Buyer may, by written notice to Seller delivered not later than ten (10) Business Days after receipt of Seller's notice of such Casualty, either (a) terminate this Agreement or (b) confirm Buyer's intention to consummate the Transaction in accordance with the terms of this Agreement. If Buyer elects to terminate this Agreement or fails to deliver such written notice within such ten (10) Business Day period, then this Agreement shall terminate

at the end of such ten (10) Business Day period in accordance with Section 10.3(c). In the event, prior to Closing, of an Immaterial Casualty or a Material Casualty with respect to which Buyer elects to proceed to consummate the Transaction, then Closing shall occur as scheduled and provisions of the SLB Lease Agreement relating to casualty shall apply. The provisions of this Section 7.1 shall survive the Closing.

Section 7.2 Condemnation.

Seller shall give Buyer notice of any proceeding involving a Condemnation affecting any portion of either of the Properties prior to Closing. In the event of a proceeding involving a Material Condemnation prior to Closing, Buyer may, by written notice to Seller, delivered not later than ten (10) Business Days after receipt of Seller's notice of such Material Condemnation, either (a) terminate this Agreement or (b) confirm Buyer's intention to consummate the Transaction in accordance with the terms of this Agreement. If Buyer elects to terminate this Agreement or fails to deliver to such written notice within such ten (10) Business Day period, then this Agreement shall terminate at the end of such ten (10) Business Day period in accordance with Section 10.3(c). In the event, prior to Closing, of a proceeding involving an Immaterial Condemnation or a Material Condemnation with respect to which Buyer elects to proceed to consummate the Transaction, then Closing shall occur as scheduled and provisions of the SLB Lease Agreement relating to condemnation shall apply. The provisions of this Section 7.2 shall survive the Closing.

Section 7.3 New York General Obligations Law. This Article is an express agreement to the contrary of Section 5-1311 of the New York General Obligations Law.

ARTICLE 8

BROKERS AND EXPENSES

Section 8.1 Brokers. Each of the parties hereto represents and warrants to the other party that except for Western Reserve Partners LLC, whose address is 200 Public Square, Suite 3750, Cleveland, Ohio 44114 (the " Advisor"), whose advisory fee shall be paid by Seller upon the Closing pursuant to a separate agreement, and McKinney Advisory Group whose address is 12250 El Camino Real, Suite 220, San Diego, California 92130 (the " Broker"), whose commission shall be paid by Seller upon the Closing pursuant to a separate agreement, no commercial real estate broker or finder, or advisor, was instrumental in arranging or bringing about the Transaction and that there are no claims or rights for commercial real estate brokerage commissions, finder's fees or advisory fees in connection with the Transaction. If any Person brings a claim for a commercial real estate brokerage commission, finder's fees or advisory fees based upon any contact, dealings or communication with Buyer or Seller, then the party through whom such Person makes his claim shall defend the other party (the " Indemnified Party") from such claim, and shall indemnify the Indemnified Party and hold the Indemnified Party harmless from any and all costs, damages, claims, liabilities or expenses (including, without limitation, reasonable attorneys' fees and disbursements) incurred by the Indemnified Party in defending against the claim. The provisions of this Section 8.1 shall survive the Closing or, if the purchase and sale is not consummated, any termination of this Agreement.

Section 8.2 Expenses.

(a) Unless Buyer terminates this Agreement due to a Seller's Default, Buyer will be responsible for all of Buyer's fees and expenses related to the Transaction, which shall include but not be limited to the cost of the Third Party Reports and any additional third party reports required by Buyer's mortgage lender, Buyer's accounting fees and expenses and Buyer's legal fees and expenses (including Lender's legal fees and expenses) (collectively, "Buyer's Transaction Costs").

(b) Seller will jointly and severally in all cases be responsible for Sellers' legal and accounting fees and expenses.

(c) Buyer will be responsible for the payment of all transfer taxes, recording fees (with respect to both the Deeds and the Buyer's deed of trust, mortgage, and related documents) and Buyer's title insurance premiums.

(d) Buyer and Seller will each be responsible for one-half of all escrow fees.

(e) All other transaction costs and expenses shall be allocated at the Closing in accordance with respective local custom.

(f) In the event that Buyer terminates this Agreement due to a Seller's Default, Seller shall jointly and severally be responsible for paying directly or reimbursing all Buyer's out-of-pocket Transaction Costs that are reasonable and customary, incurred to third parties, and evidenced by written invoices or similar documentation (the " Reimbursable Transaction Costs").

(g) The provisions of this Section 8.2 shall survive the Closing, or, if the sale is not consummated, the termination of this Agreement.

ARTICLE 9

COVENANTS OF SELLER

Section 9.1 Buyer's Approval of Agreements Affecting the Properties. Between the Effective Date and the Closing Date, Seller shall not enter into or suffer to exist any new lease, license, contract, easement, covenant, condition, restriction, lien, security interest or other agreement or encumbrance affecting either of the Properties (other than the Permitted Encumbrances and any actions of third parties under any existing agreements encumbering or affecting any of the Properties where Seller does not have a consent or approval right regarding such actions), or amend, modify, terminate, or waive any provision of, any of the foregoing, without first obtaining Buyer's approval, which approval may be withheld in Buyer's reasonable discretion. Seller shall submit an actual copy of such new lease, license, contract, easement, covenant, condition, restriction, lien, security interest or other agreement, encumbrance, amendment, modification, termination or waiver at the time that Seller seeks Buyer's approval. If Buyer fails to give Seller notice of its approval or disapproval of any such proposed action

within five (5) Business Days after Seller notifies Buyer of Seller's desire to take such action, then Buyer shall be deemed to have withheld its approval. Notwithstanding the foregoing, Seller hereby grants its written approval to all of the matters described on Schedule 9.1.

Section 9.2 Material Adverse Changes. Seller shall promptly notify Buyer of any material adverse change with respect to the condition of either of the Properties, or the financial or operating condition of Seller or of any event or circumstance that makes any representation or warranty of Seller under this Agreement untrue in any material respect. Buyer shall promptly notify Seller of any event or circumstance that makes any representation or warranty of Buyer under this Agreement untrue in any material respect.

ARTICLE 10

CONDITIONS TO CLOSING

Section 10.1 Conditions to Buyer's Obligation to Close. The obligation of Buyer to acquire the Properties on the Closing Date shall be subject to the satisfaction or written waiver by Buyer of the following conditions precedent on and as of the Closing Date:

(a) Representations and Warranties of Seller. The representations and warranties of Seller set forth in Section 5.1 (subject to Section 5.4 and Section 5.5) shall be true, complete and correct in all material respects on and as of the Effective Date and on and as of the Closing Date.

(b) Seller's Performance. Seller shall have performed all covenants and obligations required by this Agreement to be performed or delivered by it on or before the Closing Date.

(c) Seller's Closing Deliveries. Seller shall have delivered to the Title Company all of Seller's Closing Deliveries.

(d) Title Policies. The Title Company shall be unconditionally obligated and prepared, subject only to payment of the applicable premium and other related charges and the recording, as applicable, of all conveyance documents and the release of the Existing Mortgage, to issue each of the Title Policies to Buyer, subject only to the Permitted Exceptions.

(e) No Bankruptcy. No Act of Bankruptcy on the part of Seller shall have occurred and remain outstanding as of the Closing Date.

(f) Repayment of Indebtedness. Seller shall have caused to be delivered to the Title Company a payoff demand letter from the holder of the Existing Mortgage and the liens with respect thereto shall be released at Closing.

(g) Consents. All Third Party Consents shall have been obtained pursuant to documentation reasonably satisfactory to Buyer and the Title Company.

(h) Material Adverse Change. There shall have been no material adverse change in the physical condition of either of the Properties or the financial or operating condition of Seller or Tenant from the Effective Date.

(i) Outside Date. The Closing shall occur on or before the Outside Date.

(j) Sublease SNDAs. Each subtenant under an SNDA Sublease shall have delivered an original Sublease SNDA, duly executed by such subtenant and notarized.

Section 10.2 Conditions to Seller's Obligation to Close. The obligation of Seller to convey and transfer to Buyer each of the Properties on the Closing Date is subject to the satisfaction or written waiver by Seller of the following conditions precedent on and as of the Closing Date:

(a) Representations and Warranties of Buyer. The representations and warranties of Buyer set forth in Section 6.1 shall be true, complete and correct in all material respects on and as of the Effective Date and on and as of the Closing Date.

(b) Buyer's Performance. Buyer shall have performed all covenants and obligations required by this Agreement to be performed or delivered by it on or before the Closing Date, including, without limitation, delivery of the Purchase Price.

(c) Buyer's Closing Deliveries. Buyer shall have delivered to the Title Company all of Buyer's Closing Deliveries.

(d) No Bankruptcy. No Act of Bankruptcy on the part of Buyer shall have occurred and remain outstanding as of the Closing Date.

(e) Outside Date. The Closing shall occur on or before the Outside Date.

Section 10.3 Failure to Satisfy Conditions.

(a) Buyer's Obligations to Close. Without limiting Section 2.2(b), if any of the conditions to Buyer's obligation to close set forth in Section 10.1 is not satisfied on and as of the Closing Date, Buyer shall have the right to either: (i) terminate this Agreement or (ii) consummate the purchase of the Properties with no change in the Purchase Price.

(b) Seller's Obligations to Close. Without limiting Section 2.2(b), if any of the conditions to Seller's obligation to close set forth in Section 10.2 is not satisfied on and as of the Closing Date, Seller shall have the right to: (i) terminate this Agreement or (ii) consummate the sale of the Properties with no change in the Purchase Price.

(c) Termination. In the event that either party wishes to terminate this Agreement pursuant to this Section 10.3, such party shall deliver to the other party and to the Title Company on the Closing Date written notice of such party's intention to terminate this Agreement (a "Termination Notice"). Upon the delivery of a Termination Notice pursuant to this Section 10.3

(c), subject to the provisions of Sections 2.2(b) and provisions hereof that expressly survive termination, this Agreement shall terminate automatically, the Deposit shall be returned to Buyer, and neither party shall have any further rights or obligations hereunder.

ARTICLE 11

CLOSING AND ESCROW

Section 11.1 Escrow Instructions. Upon execution of this Agreement, the parties hereto shall deposit an executed counterpart of this Agreement with the Title Company, and this instrument shall serve as the instructions to the Title Company as the escrow holder for consummation of the Transaction contemplated hereby. Seller and Buyer agree to execute such reasonable additional and supplementary escrow instructions as may be appropriate to enable the Title Company to comply with the terms of this Agreement; provided, however, that in the event of any conflict between the provisions of this Agreement and any supplementary escrow instructions, the terms of this Agreement shall control.

Section 11.2 Closing. The Closing hereunder shall be held and delivery of all items to be made at the Closing under the terms of this Agreement shall be made at the Title Company (at the address for Title Company set forth in Section 12.1), on such date and at such time as Buyer and Seller may mutually agree upon in writing (the " Closing Date"); provided that Buyer and Seller shall use reasonable efforts to set the Closing Date no later than June 12, 2013, but in no event shall the Closing occur later than June 28, 2013 (the "Outside Date"). The Closing shall occur and the transfer of Buyer's funds shall be initiated at or before 12:00 p.m. noon New York time on the Closing Date.

Section 11.3 Deposit of Documents.

(a) At or before the Closing, Seller shall deposit into escrow the following items (collectively, the " Seller's Closing Deliveries"):

(i) one (1) original Deed for each of the Properties, duly executed by Seller and notarized;

(ii) two (2) original counterparts of the Bill of Sale for each of the Properties, duly executed by Seller;

(iii) two (2) original counterparts of the SLB Lease Agreement, duly executed by Seller and notarized;

(iv) an affidavit in the form attached hereto as Exhibit F, duly executed by Seller, and a California FTB form 593-C Real Estate Withholding Certificate, completed and duly executed by Seller;

(v) an owner's affidavit in the form attached hereto as Exhibit G, duly executed by Seller;

(vi) a tenant waiver letter in the form attached hereto as Exhibit H, duly executed by Tenant;

(vii) one (1) original counterpart of the Memorandum Lease Agreement (Columbus) and one (1) original counterpart of the Memorandum Lease Agreement (Long Beach) each duly executed by Tenant and notarized; and

(viii) one (1) original counterpart of a Sublease SNDA with respect to each SNDA Sublease, duly executed by Seller and notarized.

(ix) one (1) duly Notice of Subordination, substantially in the form of Exhibit N, with respect to each Notice Sublease, duly executed by Seller.

(b) At or before the Closing, Buyer shall deposit into escrow the following items (collectively, the " Buyer's Closing Deliveries"):

(i) funds necessary to pay the Purchase Price (net of the Deposit and any other offsets agreed to by Buyer and Seller);

(ii) two (2) original counterparts of the Bill of Sale for each of the Properties, duly executed by Buyer;

(iii) two (2) duly original counterparts of the SLB Lease Agreement, duly executed by Buyer and notarized;

(iv) one (1) original counterpart of the Memorandum Lease Agreement (Columbus) and one (1) original counterpart of the Memorandum Lease Agreement (Long Beach), each duly executed by Buyer and notarized; and

(v) one (1) original counterpart of a Sublease SNDA with respect to each SNDA Sublease, duly executed by Buyer and notarized.

(vi) one (1) Notice of Subordination, substantially in the form of Exhibit N, with respect to each Notice Sublease, duly executed by Buyer.

(c) At or before the Closing, Buyer and Seller shall each deposit such other instruments as are reasonably required by the Title Company or otherwise required to close the escrow and consummate the purchase and sale of the Properties in accordance with the terms hereof. Notwithstanding the foregoing, Buyer acknowledges that the failure of any subtenant to execute and deliver a Sublease SNDA shall not be deemed nor constitute a Seller Default. Buyer and Seller hereby designate Title Company as the "Reporting Person" for the Transaction pursuant to Section 6045(e) of the Code and the regulations promulgated thereunder.

Section 11.4 Pro-rations. The parties acknowledge that, pursuant to the SLB Lease Agreement, from and after the Closing, Tenant will be responsible for the payment of all real property taxes, assessments, insurance premiums, utility charges and all other similar items

customarily apportioned in sales of real property in the jurisdiction in which each of the Properties is located (the " Apportioned Items"). In consideration of the foregoing, no provision shall be made at Closing with respect to the apportionment of any Apportioned Item. The provisions of this Section 11.4 shall survive the Closing.

Section 11.5 Indemnification.

(a) From and after the Closing, Seller jointly and severally agrees to indemnify, defend and hold the Buyer Indemnified Parties harmless from any liability, claim, loss, expense or damage suffered or asserted by any Person against such Buyer Indemnified Parties that arises from any act or omission of Seller or its agents, employees or contractors (i) occurring before or as of the Closing in connection with Sellers' ownership or operation of the Properties, or (ii) in connection with the sale of the Properties to Buyer.

(b) From and after the Closing, Buyer agrees to indemnify, defend and hold the Seller Indemnified Parties harmless from any liability, claim, loss, expense or damage suffered or asserted by any Person against Seller Indemnified Parties that arises from any act or omission of Buyer or its agents, employees or contractors (i) occurring after the Closing in connection with the Buyer's ownership or operation of the Properties or (ii) in connection with the sale of the Properties to Buyer.

(c) From and after the Closing, Seller jointly and severally agrees to indemnify, defend and hold the Buyer Indemnified Parties harmless from any liability, claim, loss, expense or damage asserted by any Person, arising out of or with respect to the Subleases or the actions or omissions of the sublandlords or subtenants thereunder, or of any director, member, manager, officer, shareholder, general partner, limited partner, employee, agent or invitee of any of the foregoing, whether arising prior to, on or after the Closing, except for any liability, claim, loss, expense or damage caused by the gross negligence or willful misconduct of any Buyer Indemnified Party, any breach of the SLB Lease Agreement by any Buyer Indemnified Party, or breach of any agreement between any Buyer Indemnified Party and any subtenant.

(d) The indemnifications set forth in this Section 11.5 shall survive the Closing.

ARTICLE 12

MISCELLANEOUS

Section 12.1 Notices. Any notices required or permitted to be given hereunder shall be given in writing and shall be delivered (a) in person, (b) by certified mail, postage prepaid, return receipt requested, (c) by a commercial overnight courier that guarantees next day delivery and provides a receipt or (d) by facsimile or telecopy, and such notices shall be addressed as follows:

To Buyer:	AG Net Lease Acquisition Corp. c/o Angelo, Gordon & Co., L.P. 245 Park Avenue, 26th Floor New York, NY 10167-0094 Phone No.: (212) 883-4157 Fax No.: (212) 883-4141 Attn: Gordon J. Whiting
With a copy to:	AG Net Lease Acquisition Corp. c/o Angelo, Gordon & Co., L.P. 245 Park Avenue, 26th Floor New York, NY 10167-0094 Phone No.: (212) 692-2296 Fax No.: (212) 867-6448 Attn: Joseph R. Wekselblatt
With a copy to:	Sheppard Mullin Richter & Hampton LLP 1300 I Street, NW 11th Floor East Washington, D.C. 20005 Phone No.: (202) 469-4943 Fax No.: (202) 312-9411 Attn: Michele E. Williams, Esquire

With a copy to:	Sidley Austin LLP 555 West 5th Street 40th Floor Los Angeles, CA 90013 Phone No: (213) 896-6048 Fax No.: (213) 896-6600 Attn.: Edward C. Prokop, Esq.

To Title Company: Fidelity National Title Insurance Company
485 Lexington Avenue, 18th Floor,
New York, NY 10017
Phone No: 212-471-3816
Fax No.: (212) 481-1325
Attn: Andrea Kremen, Esq.

or to such other address as either party may from time to time specify in writing to the other party. Any notice shall be deemed delivered when actually delivered, or at such time as delivery is refused by the party to which notice has been sent.

Section 12.2 Entire Agreement. This Agreement, together with the SLB Lease Agreement, and the Schedules and Exhibits attached hereto and thereto, contain all representations, warranties and covenants made by Buyer and Seller and constitute the entire understanding between the parties hereto with respect to the subject matter hereof. Any prior correspondence, memoranda or agreements with respect to the Transaction, including, without limitation, the Letter of Intent, are replaced in total by this Agreement together with the Schedules and Exhibits hereto. The language in all parts of this Agreement will be construed as a whole in accordance with its fair meaning and without regard to California Civil Code §1654 or similar statutes.

Section 12.3 Entry and Indemnity. In connection with any entry by Buyer, or its agents, employees or contractors onto either of the Properties, Buyer shall give Seller reasonable advance notice of such entry and shall conduct such entry and any inspections in connection therewith so as to minimize, to the greatest extent possible, interference with Seller's business and the business of Seller's tenants, and otherwise in a manner reasonably acceptable to Seller. Without limiting the foregoing, prior to any entry to perform any on-site testing, Buyer shall give Seller two (2) Business Days' notice thereof, which notice shall include the identity of the company or persons who will perform such testing and the proposed scope of the testing. In the event that Buyer proposes to perform any destructive or invasive testing, Seller may approve or disapprove, in Seller's sole and absolute discretion, the proposed destructive or invasive testing within three (3) Business Days after receipt of such notice. Seller shall be deemed to have disapproved any such destructive or invasive testing if Seller does not respond within such three (3) Business Day period. If Buyer or its agents, employees or contractors take any sample from either of the Properties in connection with any such approved testing, at Seller's request, Buyer shall provide to Seller a portion of such sample being tested to allow Seller, if it so chooses, to perform its own testing. Seller or its representative may be present to observe any testing or other inspection performed on either of the Properties. Buyer shall maintain or cause to be maintained, and shall ensure that its contractors maintain, public liability and property damage insurance in amounts and in form and substance adequate, in Seller's reasonable judgment, to insure against the insurable liabilities of Buyer and its agents, employees or contractors, arising out of any entry on or inspections of either of the Properties pursuant to the provisions hereof. Buyer shall indemnify and hold Seller harmless from and against any

actual costs, damages (exclusive of consequential and punitive damages), liabilities, losses, expenses, liens or claims (including, without limitation, reasonable attorneys' fees) arising out of or relating to any entry on either of the Properties by Buyer, its agents, employees or contractors in the course of performing the inspections, testings or inquiries provided for in this Agreement. The foregoing indemnity shall survive the Closing, or, if the sale is not consummated, beyond the termination of this Agreement.

Section 12.4 Time. Time is of the essence in the performance of each of the parties' respective obligations contained herein.

Section 12.5 Further Assurances. The parties hereto hereby agree to take such additional actions and to execute and deliver such additional documents as shall be necessary to consummate the Transaction. The provisions of this Section shall survive the Closing.

Section 12.6 Jury Trial Waiver. The parties hereby agree to waive any right to trial by jury with respect to any action or proceeding brought by either party or any other Person relating to (a) this Agreement and/or any understandings or prior dealings between the parties hereto or (b) either of the Properties or any part thereof. The parties hereby acknowledge and agree that this Agreement constitutes a written consent to waiver of trial by jury pursuant to any applicable state statutes. The provisions of this Section shall survive any termination of this Agreement and the Closing.

Section 12.7 No Merger. The obligations contained herein shall not merge with the transfer of title to either of the Properties. The provisions of this Section shall survive the Closing.

Section 12.8 Assignment. Seller shall have no right to assign any of its interest in this Agreement. Buyer's rights and obligations hereunder shall not be assignable without the prior written consent of Seller, in its sole discretion. Notwithstanding the foregoing, Buyer shall have the right to assign its rights and obligations hereunder to any of its Affiliates without the prior written consent of Seller. Subject to the foregoing, this Agreement shall inure to the benefit of and be binding upon the parties hereto and their respective successors and assigns. As used in this Section 12.8, "Affiliates" shall mean an entity controlled by, under common control with, or controlling, Buyer. The provisions of this Section shall survive any termination of this Agreement and the Closing.

Section 12.9 Counterparts and Facsimile. This Agreement may be executed in two or more counterparts, each of which shall be deemed an original, but all of which taken together shall constitute one and the same instrument. The parties contemplate that they may be executing counterparts of this Agreement transmitted by facsimile or electronic transmission and agree and intend that a signature by facsimile or electronic transmission shall bind the party so signing with the same effect as though the signature were an original signature.

Section 12.10 Governing Law; Consent to Jurisdiction.

(a) Each of Seller and Buyer hereby agree that the State of New York has a substantial relationship to the parties and to the Transaction and in all respects (including, without limiting the generality of the foregoing, matters of construction, validity and performance) this Agreement and the obligations arising hereunder shall be governed by, and construed in accordance with, the laws of the State of New York applicable to contracts made and performed therein (without regard to its conflict of laws principles) pursuant to Section 5-1401 of the New York General Obligations Law, and all applicable law of the United States of America. To the fullest extent permitted by law, each of Seller and Buyer hereby unconditionally and irrevocably waives any claim to assert that the law of any other jurisdiction governs this Agreement.

(b) Any legal suit, action or proceeding against either party arising out of or relating to this Agreement shall be instituted in any federal or state court sitting in the Borough of Manhattan, State of New York, pursuant to Section 5-1402 of the New York General Obligations Law, and each of Seller and Buyer waives any objection which it may now or hereafter have to the laying of venue of any such suit, action or proceeding in the Borough of Manhattan, State of New York, and each party hereby expressly and irrevocably submits to the jurisdiction of any such court in any suit, action or proceeding.

(c) The provisions of this Section shall survive any termination of this Agreement and the Closing.

Section 12.11 Confidentiality.

Prior to the Closing, subject to the terms of this Section, Buyer and Seller shall each maintain as confidential any and all Proprietary Information obtained in connection with the Transaction and, accordingly, each party agrees not to disclose all or any portion of such Proprietary Information to any third party for any reason. Each item of Proprietary Information shall be used by the recipient thereof solely for the purpose of evaluating and determining such recipient's interest in consummating the Transaction. Each party agrees that it will not make copies of, or permit any other Person to make copies of, the Proprietary Information for any reason. Each party agrees that it will not retain any item of Proprietary Information after the use thereof is no longer required, and that it will either destroy or return to the other party all written materials constituting Proprietary Information, except to the extent that such destruction is prohibited by law, rule or regulation. Notwithstanding the foregoing, neither party will be required to destroy or return any Proprietary Information that may be stored electronically in such party's information technology system, whether in the form of an e-mail, saved file or otherwise. Notwithstanding anything to the contrary contained herein, each party shall be permitted to disclose any or all of the Proprietary Information: (i) to those principals, employees, representatives, lenders, consultants, counsel, accountants and other professional advisors of such party who have a legitimate need to review or know such Proprietary Information and who have, prior to disclosure, agreed in writing to be bound by the terms of confidentiality set forth herein, (ii) any government or self-regulatory agency whose supervision or oversight such party or any of its affiliates may be subject to the extent required by applicable law, any Governmental Authority or a court of competent jurisdiction, in each case to the extent reasonably necessary to comply with any legal or regulatory requirements to which such party or its affiliates may be subject (or in connection with any enforcement action regarding this

Agreement or the Transaction), and (iii) without limiting the generality of the immediately foregoing subsection, in any filings made by Seller or its affiliates with the Securities and Exchange Commission pursuant to the Securities Act of 1933, as amended (the "Securities Act"), the Securities Exchange Act of 1934, as amended (the " Exchange Act"), and/or as may be made available to any investors or prospective investors in Seller or any of its affiliates in conformance with the Securities Act, Exchange Act, and/or the rules, regulations, and orders issued with respect thereto. Except for publicly available filings referenced in clause (iii) of the immediately preceding sentence, upon disclosing Proprietary Information to any Person to the extent permitted hereunder, Buyer or Seller, as applicable, shall advise such Person of the confidential nature thereof, and shall take all reasonable precautions to prevent the unauthorized disclosure of such information by such Person. In addition, except any press release or public announcement regarding the Transaction required to be issued by Seller pursuant to the Securities Act, the Exchange Act, and/or the rules, regulations, and orders issued with respect thereto, at or prior to the Closing, neither party shall issue any press release or other public announcement regarding the Transaction without first obtaining the other party's written approval with respect to the release or announcement and the content thereof. After the Closing, Buyer and Seller shall be permitted to make such disclosures regarding the Properties and the Transaction (which may include the use of each of Seller's and Buyer's name and company logo) as are similar or consistent with Buyer's and Seller's respective general public disclosure policy, including disclosures made by each of Seller and Buyer and its affiliates to their investors, lenders and analysts. This provision shall survive any termination of this Agreement, and shall be subject to the letter agreement attached as Schedule 12.11 (with the parties acknowledging that this Agreement is a "related agreement" as referenced in such letter agreement)

Section 12.12 Maintenance. Between the Effective Date and the Closing, Seller shall manage and maintain each of the Properties in the ordinary course and in the same manner and condition as before the making of this Agreement, as if Seller were retaining such Property. Seller shall make such repairs and replacements to and of each of the Properties as shall be necessary for Seller to comply this Section 12.12. Through the Closing Date, Seller shall maintain or cause to be maintained, at Seller's sole cost and expense, the Existing Insurance Policies.

Section 12.13 Interpretation of Agreement. The article, section and other headings of this Agreement are for convenience of reference only and shall not be construed to affect the meaning of any provision contained herein. Where the context so requires, the use of the singular shall include the plural and vice versa and the use of the masculine shall include the feminine and the neuter. The provisions of this Section shall survive any termination of this Agreement and the Closing.

Section 12.14 General Rules of Construction. The parties acknowledge that this Agreement has been freely negotiated by both parties, that each party has had the opportunity to review and revise this Agreement, that each party has had the opportunity to consult with counsel with regard to this Agreement, and that the normal rule of construction to the effect that any ambiguities are to be resolved against the drafting party will not be employed in the

interpretation of this Agreement or any amendments or exhibits to this Agreement. The provisions of this Section shall survive any termination of this Agreement and the Closing.

Section 12.15 Limited Liability. Any claim based on or in respect of any liability of Seller under this Agreement shall be enforced only against Seller and its assets, properties and funds, and not against the assets, properties or funds of any of its trustees, officers, directors or shareholders, the general partners, officers, directors or shareholders thereof, or any employees or agents of Seller. Any claim based on or in respect of any liability of Buyer under this Agreement shall be enforced only against Buyer and its assets, properties and funds, and not against the assets, properties or funds of any of its trustees, officers, directors or shareholders, the general partners, officers, directors or shareholders thereof, or any employees or agents of Buyer. The provisions of this Section shall survive any termination of this Agreement and the Closing.

Section 12.16 Amendments. This Agreement may be amended or modified only by a written instrument signed by both Buyer and Seller. The provisions of this Section shall survive any termination of this Agreement and the Closing.

Section 12.17 Attorneys' Fees. In the event that a party hereto prevails against the other party in any action to enforce the obligations of such other party under this Agreement, the prevailing party shall be reimbursed by the other for all reasonable out-of-pocket costs and expenses incurred thereby with respect to such action (including reasonable attorneys' fees). The provisions of this Section shall survive any termination of this Agreement and the Closing.

Section 12.18 Third Party Beneficiaries. Seller and Buyer agree that there are no third party beneficiaries of this Agreement. Without limiting the foregoing, neither Broker nor Advisor is a third party beneficiary of this Agreement. The provisions of this Section shall survive any termination of this Agreement and the Closing.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the respective dates written below.

EXHIBIT A-1

Columbus Real Property

PARCEL 1:

Situated in the City of Columbus, County of Franklin and State of Ohio, lying in Quarter Township 2, Township 2, Range 17, United States Military Lands:

And known as being a part of the 13.727 acre tract, and all of the 0.875 acre tract conveyed to 17 Land Realty Corp. by deeds of record in O.R. 14066 B11 and O.R. 25716 J11, respectively, records of the Recorder's Office, Franklin County, Ohio, and being more particularly described as follows:

Beginning at a railroad spike set at the intersection of the Southerly right-of-way line of Interstate 270 (FRA-270-18.32N) and centerline of Cooper Road (60 feet in width). Said railroad spike being the Northeasterly corner of said 0.875 acre tract;

Thence South 26 deg. 55' 00" East, a distance of 241.79 feet, along said centerline of Cooper Road and Easterly line of said 0.875 acre tract, to a railroad spike set at the Southeasterly corner of said 0.875 acre tract;

Thence North 78 deg. 47' 04" West, a distance of 38.14 feet, along the Southerly line of said 0.875 acre tract, to an iron pin set in the Westerly right-of-way line of said Cooper Road;

Thence South 26 deg. 55' 00" East, a distance of 295.14 feet, along said Westerly right-of-way line of Cooper Road and along the Easterly line of said 13.727 acre tract, to an iron pin set at the point of curvature in the Northerly right-of-way line of Corporate Exchange Drive (60 feet in width) of record in Plat Book 60, Page 22 and 23;

Thence the following four (4) courses and distances along said Northerly right-of-way line of Corporate Exchange Drive and Southerly line of said 13.727 acre tract;

1. Thence along arc of said curve to the right having a radius of 35.00 feet, a central angle of 90 deg. 00' 00", and a chord bearing South 18 deg. 05' 00" West, a chord distance of 49.50 feet to the point of tangency;

2. Thence South 63 deg. 05' 00" West, a distance of 35.00 feet, to an iron pin found at the point of curvature;

3. Thence along arc of said curve to the right having a radius of 270.00 feet, a central angle of 28 deg. 56' 27", and a chord bearing South 77 deg. 33' 14" West, a chord distance of 134.94 feet, to an iron pin set at the point of tangency;

4. Thence North 87 deg. 58' 33" West, a distance of 788.06 feet, to an railroad spike set;

Thence North 02 deg. 01' 27" East, a distance of 318.00 feet across said 13.727 acre tract to a railroad spike set in a Southerly line of the 5.103 acre tract conveyed to Corporate Exchange Buildings IV and V Limited Partnership by deed of record in O.R. 24554 B04;

Thence South 87 deg. 58' 33" East, a distance of 15.00 feet along said Southerly line of the 5.103 acre tract to a railroad spike set at a Southeasterly corner of said 5.103 acre tract;

Thence the following three (3) courses and distances along the Easterly lines to said 5.103 acre tract;

1. Thence North 02 deg. 01’ 27” East, a distance of 185.00 feet, to a P.K. nail found;

2. Thence South 87 deg. 58’ 33” East, a distance of 57.50 feet, to a railroad spike set;

3. Thence North 02 deg. 01’ 27” East, a distance of 167.21 feet, to an iron pin set in aforesaid Southerly right-of-way line of Interstate 270 at a Northeasterly corner of said 5.103 acre tract;

Thence South 78 deg. 46’ 49” East, a distance of 677.06 feet, along said Southerly right-of-way line of Interstate 270 and partly along the Northerly line of said 13.727 acre tract and partly along the Northerly line aforesaid 0.875 acre tract, to the point of beginning.

Containing 11.814 acres, more or less, of which 0.167 acres lies within the Cooper Road right-of-way.

The bearings in the above description are based on the bearing of South 87 deg. 58’ 33” East, for the centerline of Corporate Exchange Drive, as shown on the dedication Plat for Corporate Exchange Drive, of record in Deed Book 60, Page 22 and 23, records of the Recorder’s Office, Franklin County, Ohio.

PARCEL 2:

Situated in the City of Columbus, County of Franklin and State of Ohio, lying in Quarter Township 2, Township 2, Range 17, United States Military Lands:

And known as being a part of the 4.500 and 13.727 acre tracts conveyed to 17 Land Realty Corp. by deed of record in O.R. 14066 B11, Records of the Recorder’s Office, Franklin County, Ohio, and being more particularly described as follows:

Beginning for reference at a PK nail found at the centerline intersection of Presidential Gateway (60 feet in width) as established by the Plat of record in Plat Book 83, Page 80 and Corporate Exchange Drive (60 feet in width) as established by the Plat of record in Plat Book 60, Page 22;

Thence North 87 deg. 58’ 33” West, a distance of 329.18 feet along the centerline of Corporate Exchange Drive to a point;

Thence North 02 deg. 01’ 27” East, a distance of 30.00 feet, to a railroad spike set on the Northerly right-of-way line of Corporate Exchange Drive and the Southerly line of said 13.727 acre tract and being the point of true beginning;

Thence the following three (3) courses and distances along the said Northerly right-of-way line of Corporate Exchange Drive and the Southerly line of said 13.727 and 4.500 acre tracts;

1. Thence North 87 deg. 58’ 33” West, a distance of 94.38 feet to an iron pin set at a point of curvature;

2. Thence along the arc of said curve to the right, having a radius of 420.00 feet, a central angle of 27 deg. 22’ 54”, a chord bearing North 74 deg. 17’ 06” West, and a chord distance of 198.81 feet to an iron pin found at the point of tangency;

3. Thence North 60 deg. 35’ 39” West, a distance of 28.10 feet to an iron pin set at a Southeasterly corner of a 5.103 acre tract conveyed to Corporate Exchange Buildings IV and V Limited Partnership by deed of record in O.R. 24554 B04;

Thence the following two (2) courses and distance along the Easterly and Southerly lines of said 5.103 acre tracts;

1. Thence North 02 deg. 01’ 27” East, a distance of 258.02 feet to a railroad spike set;

2. Thence South 87 deg. 58’ 33” East, a distance of 312.50 feet to a railroad spike set;

Thence South 02 deg. 01’ 27” West, a distance of 318.00 feet across said 13.727 acre tract to the point of true beginning, containing 2.183 acres, more or less, subject to all easements, restrictions and rights-of-way of record.

GENERAL WARRANTY DEED

Molina Healthcare, Inc., a Delaware corporation (at times the "Grantor"), for Ten Dollars ($10.00) and other valuable consideration paid, grants with general warranty covenants (as defined in Section 5302.06 of the Ohio Revised Code) to AGNL Clinic, L.P., a Delaware limited partnership (at times the "Grantee"), the tax mailing address for which is c/o Angelo, Gordon & Co., L.P., 245 Park Avenue, 26th Floor, New York, NY 10167-0094, the following real property:

Legal Description

PARCEL 1:

Situated in the City of Columbus, County of Franklin and State of Ohio, lying in Quarter Township 2, Township 2, Range 17, United States Military Lands:

And known as being part of the 13.727 acre tract, and all of the 0.875 acre tract conveyed to 17 Land Realty Corp. by deeds of record in O.R. 14066B11 and O.R. 25716J11, respectively, records of the Recorder's Office, Franklin County, Ohio, and being more particularly described as follows:

Beginning at a railroad spike set at the intersection of the Southerly right-of-way line of Interstate 270 (FRA-270-18.32N) and centerline of Cooper Road (60 feet in width). Said railroad spike being the Northeasterly corner of said 0.875 acre tract;

Thence South 26 deg. 55' 00" East, a distance of 241.79 feet, along said centerline of Cooper Road and Easterly line of said 0.875 acre tract, to a railroad spike set at the Southeasterly corner of said 0.875 acre tract;

Thence North 78 deg. 47' 04" West, a distance of 38.14 feet, along the Southerly line of said 0.875 acre tract, to an iron pin set in the Westerly right-of-way line of said Cooper Road;

Thence South 26 deg. 55’ 00” East, a distance of 295.14 feet, along said Westerly right-of-way line of Cooper Road and along the Easterly line of said 13.727 acre tract, to an iron pin set at the point of curvature in the Northerly right-of-way line of Corporate Exchange Drive (60 feet in width) of record in Plat Book 60, Page 22 and 23;

Thence the following four (4) courses and distances along said Northerly right-of-way line of Corporate Exchange Drive and Southerly line of said 13.727 acre tract;

1. Thence along arc of said curve to the right having a radius of 35.00 feet, a central angle of 90 deg. 00’ 00”, and a chord bearing South 18 deg. 05’ 00” West, a chord distance of 49.50 feet to the point of tangency;

2. Thence South 63 deg. 05’ 00” West, a distance of 35.00 feet, to an iron pin found at the point of curvature;

3. Thence along arc of said curve to the right having a radius of 270.00 feet, a central angle of 28 deg. 56’ 27”, and a chord bearing South 77 deg. 33’ 14” West, a chord distance of 134.94 feet, to an iron pin set at the point of tangency;

4. Thence North 87 deg. 58’ 33” West, a distance of 788.06 feet, to an railroad spike set;

Thence North 02 deg. 01’ 27” East, a distance of 318.00 feet across said 13.727 acre tract to a railroad spike set in a Southerly line of the 5.103 acre tract conveyed to Corporate Exchange Buildings IV and V Limited Partnership by deed of record in O.R. 24554 B04;

Thence South 87 deg. 58’ 33” East, a distance of 15.00 feet along said Southerly line of the 5.103 acre tract to a railroad spike set at a Southeasterly corner of said 5.103 acre tract;

Thence the following three (3) courses and distances along the Easterly lines to said 5.103 acre tract;

1. Thence North 02 deg. 01’ 27” East, a distance of 185.00 feet, to a P.K. nail found;

2. Thence South 87 deg. 58’ 33” East, a distance of 57.50 feet, to a railroad spike set;

3. Thence North 02 deg. 01’ 27” East, a distance of 167.21 feet, to an iron pin set in aforesaid Southerly right-of-way line of Interstate 270 at a Northeasterly corner of said 5.103 acre tract;

Thence South 78 deg. 46’ 49” East, a distance of 677.06 feet, along said Southerly right-of-way line of Interstate 270 and partly along the Northerly line of said 13.727 acre tract and partly along the Northerly Line aforesaid 0.875 acre tract, to the point of beginning.

Containing 11.814 acres, more or less, of which 0.167 acres lies within the Cooper Road right-of-way.

Exhibit D-2

The bearings in the above description are based on the bearing of South 87 deg. 58’ 33” East, for the centerline of Corporate Exchange Drive, as shown on the dedication Plat for Corporate Exchange Drive, of record in Deed Book 60, Page 22 and 23, records of the Recorder’s Office, Franklin County, Ohio.

PARCEL 2:

Situated in the City of Columbus, County of Franklin and State of Ohio, lying in Quarter Township 2, Township 2, Range 17, United States Military Lands:

And known as being a part of the 4.500 and 13.727 acre tracts conveyed to 17 Land Realty Corp. by deed of record in O.R. 14066 B11, Records of the Recorder’s Office, Franklin County, Ohio, and being more particularly described as follows:

Beginning for reference at a PK nail found at the centerline intersection of Presidential Gateway (60 feet in width) as established by the Plat of record in Plat Book 83, Page 80 and Corporate Exchange Drive (60 feet in width) as established by the Plat of record in Plat Book 60, Page 22;

Thence North 87 deg. 58’ 33” West, a distance of 329.18 feet along the centerline of Corporate Exchange Drive to a point;

Thence North 02 deg. 01’ 27” East, a distance of 30.00 feet, to a railroad spike set on the Northerly right-of-way line of Corporate Exchange Drive and the Southerly line of said 13.727 acre tract and being the point of true beginning;

Thence the following three (3) courses and distances along the said Northerly right-of-way line of Corporate Exchange Drive and the Southerly line of said 13.727 and 4.500 acre tracts;

1. Thence North 87 deg. 58’ 33” West, a distance of 94.38 feet to an iron pin set at a point of curvature;

2. Thence along the arc of said curve to the right, having a radius of 420.00 feet, a central angle of 27 deg. 22’ 54”, a chord bearing North 74 deg. 17’ 06” West, and a chord distance of 198.81 feet to an iron pin found at the point of tangency;

3. Thence North 60 deg. 35’ 39” West, a distance of 28.10 feet to an iron pin set at a Southeasterly corner of a 5.103 acre tract conveyed to Corporate Exchange Buildings IV and V Limited Partnership by deed of record in O.R. 24554 B04;

Thence the following two (2) courses and distance along the Easterly and Southerly lines of said 5.103 acre tracts;

1. Thence North 02 deg. 01’ 27” East, a distance of 258.02 feet to a railroad spike set;

2. Thence South 87 deg. 58’ 33” East, a distance of 312.50 feet to a railroad spike set;

Thence South 02 deg. 01’ 27” West, a distance of 318.00 feet across said 13.727 acre tract to the point of true beginning, containing 2.183 acres; more or less, subject to all easements, restrictions and rights-of-way of record.

Subject to (1) zoning ordinances, (2) real estate taxes and assessments, not yet due and payable, (3) easements, restrictions, covenants, reservations and conditions of record which do not adversely affect the use or value thereof.

Parcel Nos.: 600-122680 and 600-215203

Property Address: 3000 Corporate Exchange Drive, Columbus, Ohio.

Prior instrument reference AFN 201212200196229, Franklin County Records.

BILL OF SALE AND ASSIGNMENT

MOLINA HEALTHCARE, INC.,

a Delaware corporation,

to

AGNL CLINIC, L.P.,

a Delaware limited partnership

KNOW ALL MEN BY THESE PRESENTS, that Molina Healthcare, Inc., a Delaware corporation (" Seller"), for and in consideration of Ten Dollars ($10.00) and other good and valuable consideration, to it in hand paid by AGNL Clinic, L.P., a Delaware limited partnership ("Purchaser"), at or before the sealing and delivery of these presents, the receipt and sufficiency of which is hereby acknowledged, has granted, bargained, sold, transferred and delivered, and by these presents does grant, assign, bargain, sell, transfer and deliver unto Purchaser the following (the "Personal Property"):

all machinery and equipment listed and described on Exhibit B attached hereto and made a part hereof owned by Seller and located on property (the "Property") situate in the City of Columbus, Franklin County, Ohio as described on Exhibit A attached hereto and made a part hereof;

all certificates of occupancy of Seller, and all licenses, permits, and approvals, if any, which are mandated or necessary to own and operate the Property.

any warranties or guaranties in the possession of Seller and given by any contractor, manufacturer or materialmen in connection with the construction, maintenance, repair or renovation of the Property;

all plans and drawings with respect to the Property in the possession of Seller.

TO HAVE AND TO HOLD the Personal Property unto Purchaser, its successors and assigns, to and for its own proper use and benefit forever.

This Bill of Sale shall be governed by the laws of the State of Ohio.

This Bill of Sale and the provisions contained herein shall be binding upon and inure to the benefit of Seller and Purchaser and their respective successors, legal representatives and assigns.

This Bill of Sale may be executed in counterparts, each of which shall be deemed an original, but all of which, together, shall constitute one and the same instrument.

LEGAL DESCRIPTION

- PARCEL 1:

Situated in the City of Columbus, County of Franklin and State of Ohio, lying in Quarter Township 2, Township 2, Range 17, United States Military Lands:

And known as being a part of the 13.727 acre tract, and all of the 0.875 acre tract conveyed to 17 Land Realty Corp. by deeds of record in O.R. 14066 B11 and O.R. 25716 J11, respectively, records of the Recorder's Office, Franklin County, Ohio, and being more particularly described as follows:

Beginning at a railroad spike set at the intersection of the Southerly right-of-way line of Interstate 270 (FRA-270-18.32N) and centerline of Cooper Road (60 feet in width). Said railroad spike being the Northeasterly corner of said 0.875 acre tract;

Thence South 26 deg. 55' 00" East, a distance of 241.79 feet, along said centerline of Cooper Road and Easterly line of said 0.875 acre tract, to a railroad spike set at the Southeasterly corner of said 0.875 acre tract;

Thence North 78 deg. 47' 04" West, a distance of 38.14 feet, along the Southerly line of said 0.875 acre tract, to an iron pin set in the Westerly right-of-way line of said Cooper Road;

Thence South 26 deg. 55' 00" East, a distance of 295.14 feet, along said Westerly right-of-way line of Cooper Road and along the Easterly line of said 13.727 acre tract, to an iron pin set at the point of curvature in the Northerly right-of-way line of Corporate Exchange Drive (60 feet in width) of record in Plat Book 60, Page 22 and 23;

Thence the following four (4) courses and distances along said Northerly right-of-way line of Corporate Exchange Drive and Southerly line of said 13.727 acre tract;

1. Thence along arc of said curve to the right having a radius of 35.00 feet, a central angle of 90 deg. 00' 00", and a chord bearing South 18 deg. 05' 00" West, a chord distance of 49.50 feet to the point of tangency;

2. Thence South 63 deg. 05' 00" West, a distance of 35.00 feet, to an iron pin found at the point of curvature;

3. Thence along arc of said curve to the right having a radius of 270.00 feet, a central angle of 28 deg. 56' 27", and a chord bearing South 77 deg. 33' 14" West, a chord distance of 134.94 feet, to an iron pin set at the point of tangency;

4. Thence North 87 deg. 58' 33" West, a distance of 788.06 feet, to an railroad spike set;

Thence North 02 deg. 01' 27" East, a distance of 318.00 feet across said 13.727 acre tract to a railroad spike set in a Southerly line of the 5.103 acre tract conveyed to Corporate Exchange Buildings IV and V Limited Partnership by deed of record in O.R. 24554 B04;

Thence South 87 deg. 58' 33" East, a distance of 15.00 feet along said Southerly line of the 5.103 acre tract to a railroad spike set at a Southeasterly corner of said 5.103 acre tract;

Thence the following three (3) courses and distances along the Easterly lines to said 5.103 acre tract;

1. Thence North 02 deg. 01’ 27” East, a distance of 185.00 feet, to a P.K. nail found;

2. Thence South 87 deg. 58’ 33” East, a distance of 57.50 feet, to a railroad spike set;

3. Thence North 02 deg. 01’ 27” East, a distance of 167.21 feet, to an iron pin set in aforesaid Southerly right-of-way line of Interstate 270 at a Northeasterly corner of said 5.103 acre tract;

Thence South 78 deg. 46’ 49” East, a distance of 677.06 feet, along said Southerly right-of-way line of Interstate 270 and partly along the Northerly line of said 13.727 acre tract and partly along the Northerly line aforesaid 0.875 acre tract, to the point of beginning.

Containing 11.814 acres, more or less, of which 0.167 acres lies within the Cooper Road right-of-way.

The bearings in the above description are based on the bearing of South 87 deg. 58’ 33” East, for the centerline of Corporate Exchange Drive, as shown on the dedication Plat for Corporate Exchange Drive, of record in Deed Book 60, Page 22 and 23, records of the Recorder’s Office, Franklin County, Ohio.

PARCEL 2:

Situated in the City of Columbus, County of Franklin and State of Ohio, lying in Quarter Township 2, Township 2, Range 17, United States Military Lands:

And known as being a part of the 4.500 and 13.727 acre tracts conveyed to 17 Land Realty Corp. by deed of record in O.R. 14066 B11, Records of the Recorder’s Office, Franklin County, Ohio, and being more particularly described as follows:

Beginning for reference at a PK nail found at the centerline intersection of Presidential Gateway (60 feet in width) as established by the Plat of record in Plat Book 83, Page 80 and Corporate Exchange Drive (60 feet in width) as established by the Plat of record in Plat Book 60, Page 22;

Thence North 87 deg. 58’ 33” West, a distance of 329.18 feet along the centerline of Corporate Exchange Drive to a point;

Thence North 02 deg. 01’ 27” East, a distance of 30.00 feet, to a railroad spike set on the Northerly right-of-way line of Corporate Exchange Drive and the Southerly line of said 13.727 acre tract and being the point of true beginning;

Thence the following three (3) courses and distances along the said Northerly right-of-way line of Corporate Exchange Drive and the Southerly line of said 13.727 and 4.500 acre tracts;

1. Thence North 87 deg. 58’ 33” West, a distance of 94.38 feet to an iron pin set at a point of curvature;

2. Thence along the arc of said curve to the right, having a radius of 420.00 feet, a central angle of 27 deg. 22’ 54”, a chord bearing North 74 deg. 17’ 06” West, and a chord distance of 198.81 feet to an iron pin found at the point of tangency;

3. Thence North 60 deg. 35’ 39” West, a distance of 28.10 feet to an iron pin set at a Southeasterly corner of a 5.103 acre tract conveyed to Corporate Exchange Buildings IV and V Limited Partnership by deed of record in O.R. 24554 B04;

Thence the following two (2) courses and distance along the Easterly and Southerly lines of said 5.103 acre tracts;

1. Thence North 02 deg. 01’ 27” East, a distance of 258.02 feet to a railroad spike set;

2. Thence South 87 deg. 58’ 33” East, a distance of 312.50 feet to a railroad spike set;

Thence South 02 deg. 01’ 27” West, a distance of 318.00 feet across said 13.727 acre tract to the point of true beginning, containing 2.183 acres, more or less, subject to all easements, restrictions and rights-of-way of record.

Exhibit E-1

Exhibit B

Machinery and Equipment

The term "Columbus Property Other Assets" means (a) all "fixtures", as defined by Section 9- 102(a)(41) of the Uniform Commercial Code as adopted by the State of New York, owned by Seller and that are now or hereafter affixed or attached to or installed in the Columbus Real Property or the Columbus Improvements (the "Columbus Fixtures"), (b) all of the following, if and to the extent affixed to the Columbus Real Property or the Columbus Improvements and owned by Seller (even if not constituting Fixtures) (collectively, the "Columbus Property Equipment"): built-in fittings and built-in major appliances, including all electrical, anti-pollution, heating, lighting (including hanging fluorescent lighting), incinerating, power, air cooling, air conditioning, humidification, sprinkling, plumbing, lifting, fire prevention, fire extinguishing and ventilating systems, devices and machinery and all engines, pipes, pumps, tanks (including exchange tanks and fuel storage tanks), motors, conduits, ducts, steam circulation coils, blowers, steam lines, compressors, oil burners, boilers, doors, windows, loading platforms, lavatory facilities, stairwells, fencing (including cyclone fencing), passenger and freight elevators, overhead cranes and garage units, and (c) all Columbus Intangible Property; provided, however, notwithstanding the foregoing, Columbus Property Other Assets expressly excludes each and all of the following items (collectively, the "Columbus Property Excluded Items"):

1. all personal property located at the Columbus Real Property or the Columbus Improvements including, without limitation, all computers and other information technology devices, but excluding all items described in clause (b) of the definition of Columbus Property Other Assets; and
2. those other items (regardless of whether such items constitute Fixtures) described on Exhibit B-1 hereof.

Form of FIRPTA Affidavit

FIRPTA CERTIFICATE

CERTIFICATE OF NON-FOREIGN STATUS

Section 1445 of the Internal Revenue Code provides that a transferee of a U.S. real property interest must withhold tax if the transferor is a foreign person. For U.S. tax purposes (including Section 1445 of the Internal Revenue Code), the owner of a disregarded entity (which has legal title to a U.S. real property interest under local law) will be the seller of the property and not the disregarded entity. To inform AGNL CLINIC, L.P., a Delaware limited partnership ("Buyer"), that withholding of tax is not required upon the disposition of a U.S. real property interest by _____, a _____ (" Seller"), the undersigned hereby certifies the following on behalf of Seller:

1. Seller is not a foreign corporation, foreign partnership, foreign trust, or foreign estate (as those terms are defined in the Internal Revenue Code and Income Tax Regulations).

2. Seller is not a disregarded entity as defined in Section 1.1445-2(b)(2)(iii) of the Income Tax Regulations.

3. Seller's U.S. employer identification number is _____.

4. Seller's office address is:

Seller understands that this certification may be disclosed to the Internal Revenue Service by Buyer and that any false statement contained herein could be punished by fine, imprisonment, or both.

Under penalties of perjury, the undersigned declares that he/she has examined this certification and to the best of his knowledge and belief it is true, correct and complete, and he/she further declares that he/she has the authority to sign this document on behalf of Seller.

Executed as of the ___ day of ____, 20__.

My Commission expires: _____

Exhibit F

EXHIBIT G-1

Form of Long Beach Owner's Affidavit

OWNER'S DECLARATION
(200-300 Oceangate, Long Beach, CA)

The undersigned hereby declares as follows:

Article I. Declarant is the _____ of Molina Center, LLC ("Owner"), which is the owner or lessee, as the case may be, of certain premises located at 200-300 Oceangate, Long Beach, California, further described as follows: See Commitment No. 997-23021588-A-TC1 for full legal description (the "Land").

Article II. To the knowledge of Declarant, during the period of six months immediately preceding the date of this declaration no work has been done, no surveys or architectural or engineering plans have been prepared, and no materials have been furnished in connection with the erection, equipment, repair, protection or removal of any building or other structure on the Land or in connection with the improvement of the Land in any manner whatsoever other than work done by tenants and licensees with regard to their leased or licensed space.

Article III. To the knowledge of Declarant, Owner has not previously conveyed the Land; is not a debtor in bankruptcy (and if a partnership, the general partner thereof is not a debtor in bankruptcy); and has not received notice of any pending court action affecting the title to the Land.

Article IV. To the knowledge of Declarant, except as shown in the above-referenced Commitment, there are no unpaid or unsatisfied mortgages, deeds of trust, Uniform Commercial Code financing statements, claims of lien, special assessments, or taxes that constitute a lien against the Land or that affect the Land but have not been recorded in the public records.

Article V. The Land is currently in use as an office building; Owner occupy/occupies the Land; and the following are all of the leases or other occupancy rights affecting the land: See Exhibit A.

Article VI. To the knowledge of Declarant, there are no other persons or entities that are currently asserting an ownership interest in the Land, nor are there unrecorded easements, claims of easement, or boundary disputes that currently affect the Land.

Article VII. To the knowledge of Declarant, there are no outstanding options to purchase or rights of first refusal affecting the Land other than the right of first offer in favor of Molina Healthcare, Inc., which right is being waived in connection with this transaction.

This declaration is made with the intention that Fidelity National Title Insurance Company (the "Company") and its policy issuing agents will rely upon it in issuing their title insurance policies and endorsements. Owner, by the undersigned Declarant, agrees to indemnify the Company against loss or damage (including reasonable attorneys' fees, expenses, and costs) incurred by the Company as a result of any untrue statement made herein.

I declare under penalty of perjury that the foregoing is true and correct and that this declaration was executed on June __, 2013 at _____.

Form of Columbus Owner's Affidavit

AFFIDAVIT AS TO TITLE

TO REAL ESTATE

STATE OF _____)
) SS.
COUNTY OF _____)

_____ ("Affiant"), being first duly sworn, deposes, states and agrees as follows:

Article I. Affiant is the _____ of Molina Healthcare, Inc. (the "Corporation") and is authorized to execute this Affidavit for and on behalf of said corporation.

Article II. The corporation is in good standing in the State of Delaware.

Article III To the knowledge of Affiant, the corporation has marketable title in fee simple to that referenced Property more fully described in Commitment for Title Insurance No. 4257983 dated February 15, 2013, and its possession thereof has been peaceable and undisturbed and the title to said Property has never been disputed or questioned to Affiant's knowledge, nor does Affiant know of any facts by reason of which the title to, or possession of, said Property might be disputed or questioned (the "Property").

Article IV That the corporation is not insolvent or bankrupt and there has been (i) no assignment made for the benefit of its creditors; (ii) no appointment of a receiver for its assets or properties; (iii) no bankruptcy, reorganization or liquidation proceeding instituted by or against it; and (iv) no dissolution proceedings therefor.

Article V That the corporation is not a "foreign person" as defined in the Foreign Investment Property Tax Act, Internal Revenue Code Section 1445; that the address for tax purposes is: _____, and the Federal Taxpayer Identification Number is _____.

Article VI That Affiant is at least eighteen (18) years of age and is not under any legal disability.

Article VII That, to the knowledge of Affiant, there are no unrecorded deeds, mortgages, leases, easements, contracts of sale and/or equities and/or agreements of any kind not fully disclosed of record or unrecorded given by or known to Affiant affecting the title to or use of the Property and that there are no leases, licensees or parties in possession or entitled to possession other than the Corporation and the parties listed on Exhibit A attached hereto.

Article VIII That, to the best of Affiant's knowledge, there are no violations of any covenants, conditions or restrictions of record affecting the Property and that there are no disputes with any adjoining property owners as to either the location of Property lines or the encroachments of any improvements.

Article IXThat, to the knowledge of Affiant, all utility charges (e.g. gas, electric, water bills) against the property have been or will be paid by Affiant.

Article XThat, to the knowledge of Affiant, no construction, labor, repairs, alterations or improvements made, ordered or contracted to be made on or to the Property, nor material ordered therefor, within the last ninety (90) days which has not been paid for in full; nor are there any fixtures attached to the Property which have not been paid for in full, for which the right to file a mechanic's or materialmen's lien might exist, nor has any unsatisfied claim for lien or claim for payment been made for labor or material furnished to the Property, except: as may exist in connection with work performed by tenants or licensees in their applicable space.

Article XIThat, to the knowledge of Affiant, there are no outstanding assessments against the Property nor has any notice been received as to pending assessments, except: _____.

Article XIIThat the foregoing statements are made for the benefit of and to induce Fidelity National Title Insurance Company to issue its owner's/loan policies of title insurance.

In the event that any of the representations made herein prove to be incorrect, for any reason, and a claim is made by third party with respect to these matters, the Corporation agrees to indemnify and hold harmless said Title Insurance Company from all claims and damages, including litigation costs and reasonable attorney fees arising as the result of such claim. All representations herein are made to the best of the knowledge of the parties signing hereto.

Further Affiant Sayeth Naught.

Form of Tenant Waiver Letter

[TENANT NAME]
[Tenant address]

_____, 20___

AGNL _____, L.L.C.
c/o Angelo, Gordon & Co., L.P.
245 Park Avenue
26th Floor
New York, NY 10167-0094
Attn: Gordon J. Whiting

Re: Lease Agreement, dated as of _____ __, 20___, between AGNL _____, L.L.C., a Delaware limited liability company ("Landlord"), and _____., a _____ ("Tenant") (the "Lease")

Ladies and Gentlemen:

Reference is made to that certain $_____ loan (the "Loan") made by _____ ("Lender") to _____ ("Landlord"), which Loan is secured by, inter alia, a certain [Mortgage] of even date herewith (the "Mortgage") encumbering certain property located at _____ (the "Property"), which Property is leased to _____ ("Tenant") pursuant to the above-referenced Lease.

In consideration of **[the execution and delivery of the Lease by Landlord] [the sum of ten dollars ($10.00)] [latter to be used in lease assumption or loan closed later situations]** and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Tenant hereby covenants and agrees with Landlord that, in the event Tenant or any Affiliate (as hereinafter defined) of Tenant purchases the interest of Lender in the Loan, Tenant or such Affiliate will not exercise any of the remedies provided to Lender under the Mortgage or any of the other documents evidencing or securing the Loan if and so long as an Event of Default (as defined in the Lease) exists and is continuing under the Lease.

[If Tenant is a corporation] [For the purposes hereof, the term "Affiliate" shall mean, with respect to a corporation, (i) any officer or director thereof and any person, trust, corporation, partnership, venture or other entity who or which is, directly or indirectly, the beneficial owner of more than 50% of any class of shares or other equity security of such corporation, or (ii) any person, trust, corporation, partnership, venture or other entity which, directly or indirectly controls or is controlled by or under common control with such corporation, or (iii) any general partner, general partner of a general partner, partnership with a common general partner, or co-venturer of or with any person or entity described in (i) or (ii) above, or (iv) if any general partner or co-venturer is a corporation, any person, trust, corporation, partnership, venture or other entity which is an Affiliate as defined above of such corporation, or (v) if any of the foregoing is a natural person, his or her parents, spouse, children, siblings and their children, and spouse's parents, children, siblings and their children.

"Controls", "controlled by" and "under common control with" each refers to the effective power, directly or indirectly, to direct or cause the direction of the management and policies of the person, trust, corporation, partnership, venture or other entity in question, whether by contract or otherwise.]

[If Tenant is not a corporation] Affiliate" of any Person means any Person which (a) controls, (b) is under the control of, or (c) is under common control with such Person (the term "control" as used herein shall be deemed to mean ownership of more than 50% of the outstanding voting stock of a corporation or other majority equity and control interest if such Person is not a corporation and the power to direct or cause the direction of the management or policies of such Person).

Very truly yours,

MEMORANDUM OF LEASE

THIS MEMORANDUM OF LEASE is made as of the ____ day of June, 2013, by and between AGNL CLINIC, L.P., a Delaware limited partnership ("Landlord"), having an address at c/o Angelo, Gordon & Co., L.P., 245 Park Avenue, 26th Floor New York, New York 10167-0094, and MOLINA HEALTHCARE, INC., a Delaware corporation ("Tenant"), with an address at 300 Oceangate Blvd., Suite 950, Long Beach, California 90802.

Lease. Landlord has demised and let to Tenant pursuant to the terms and conditions of a Lease Agreement dated as of June ____, 2013 (the "Lease"), the terms and conditions of said Lease are incorporated herein as though set forth in full, certain real property located in the City of Long Beach, County of Los Angeles, State of California described in Exhibit "A" attached hereto (the "Leased Premises").

Initial Term. Under the terms of the Lease, Tenant may have and hold the Leased Premises, together with the tenements, hereditaments, appurtenances and easements thereunto belonging, at the rental and upon the terms and conditions therein stated, for an initial term (the "Initial Term") of three hundred (300) full calendar months commencing as of June ____, 2013.

Renewal Term. Under the terms of the Lease, provided that if, on or prior to the last day of the Initial Term (the "Expiration Date") the Lease shall not have been terminated pursuant to any provision thereof, then on the Expiration Date and on the fifth, tenth, fifteenth, twentieth and twenty-fifth anniversaries of the Expiration Date (each such date, a "Renewal Date"), the term shall be extended for an additional period of five (5) years (each of the extension periods, a "Renewal Term"), provided that Tenant shall have notified Landlord in writing at least eighteen (18) months prior to the Expiration Date that Tenant has elected to so extend the Lease. Any such extension of the term shall be subject to all of the provisions of the Lease (except that Tenant shall not have the right to any additional Renewal Term).

No Responsibility for Liens. NOTICE IS HEREBY GIVEN THAT LANDLORD SHALL NOT BE LIABLE FOR ANY LABOR, SERVICES, EQUIPMENT OR MATERIALS FURNISHED OR TO BE FURNISHED TO TENANT, OR TO ANYONE HOLDING OR OCCUPYING ANY OF THE LEASED PREMISES THROUGH OR UNDER TENANT, AND THAT NO MECHANICS' OR OTHER LIENS FOR ANY SUCH LABOR, SERVICES OR MATERIALS SHALL ATTACH TO OR AFFECT THE INTEREST OF LANDLORD IN AND TO ANY OF THE LEASED PREMISES. LANDLORD MAY AT ANY TIME POST ANY NOTICES ON ANY OF THE LEASED PREMISES REGARDING SUCH NON-LIABILITY OF LANDLORD.

Purpose and Intention. This Memorandum of Lease is executed for the purpose of recordation in the Official Records of the County of Los Angeles, State of California in order to give notice of all of the terms, provisions and conditions of the Lease and is not intended, and shall not be construed, to define, limit or modify the full text of the Lease. The leasehold estate created and conveyed hereby with respect to the Leased Premises is intended to be one and the same estate as was created with respect to the Leased Premises by the Lease and is further intended to be governed in all respects solely by the Lease and all of the provisions thereof. This Memorandum contains only selected provisions of the Lease.

Counterparts. This Memorandum of Lease may be executed in a number of counterparts and by different parties hereto in separate counterparts each of which, when so executed, shall be deemed to be an original and all of which taken together shall constitute but one and the same agreement.

LEGAL DESCRIPTION

- PARCEL 1:

Situated in the City of Columbus, County of Franklin and State of Ohio, lying in Quarter Township 2, Township 2, Range 17, United States Military Lands:

And known as being a part of the 13.727 acre tract, and all of the 0.875 acre tract conveyed to 17 Land Realty Corp. by deeds of record in O.R. 14066 B11 and O.R. 25716 J11, respectively, records of the Recorder's Office, Franklin County, Ohio, and being more particularly described as follows:

Beginning at a railroad spike set at the intersection of the Southerly right-of-way line of Interstate 270 (FRA-270-18.32N) and centerline of Cooper Road (60 feet in width). Said railroad spike being the Northeasterly corner of said 0.875 acre tract;

Thence South 26 deg. 55' 00" East, a distance of 241.79 feet, along said centerline of Cooper Road and Easterly line of said 0.875 acre tract, to a railroad spike set at the Southeasterly corner of said 0.875 acre tract;

Thence North 78 deg. 47' 04" West, a distance of 38.14 feet, along the Southerly line of said 0.875 acre tract, to an iron pin set in the Westerly right-of-way line of said Cooper Road;

Thence South 26 deg. 55' 00" East, a distance of 295.14 feet, along said Westerly right-of-way line of Cooper Road and along the Easterly line of said 13.727 acre tract, to an iron pin set at the point of curvature in the Northerly right-of-way line of Corporate Exchange Drive (60 feet in width) of record in Plat Book 60, Page 22 and 23;

Thence the following four (4) courses and distances along said Northerly right-of-way line of Corporate Exchange Drive and Southerly line of said 13.727 acre tract;

1. Thence along arc of said curve to the right having a radius of 35.00 feet, a central angle of 90 deg. 00' 00", and a chord bearing South 18 deg. 05' 00" West, a chord distance of 49.50 feet to the point of tangency;

2. Thence South 63 deg. 05' 00" West, a distance of 35.00 feet, to an iron pin found at the point of curvature;

3. Thence along arc of said curve to the right having a radius of 270.00 feet, a central angle of 28 deg. 56' 27", and a chord bearing South 77 deg. 33' 14" West, a chord distance of 134.94 feet, to an iron pin set at the point of tangency;

4. Thence North 87 deg. 58' 33" West, a distance of 788.06 feet, to an railroad spike set;

Thence North 02 deg. 01' 27" East, a distance of 318.00 feet across said 13.727 acre tract to a railroad spike set in a Southerly line of the 5.103 acre tract conveyed to Corporate Exchange Buildings IV and V Limited Partnership by deed of record in O.R. 24554 B04;

Thence South 87 deg. 58' 33" East, a distance of 15.00 feet along said Southerly line of the 5.103 acre tract to a railroad spike set at a Southeasterly corner of said 5.103 acre tract;

Exhibit K

Thence the following three (3) courses and distances along the Easterly lines to said 5.103 acre tract;

1. Thence North 02 deg. 01’ 27” East, a distance of 185.00 feet, to a P.K. nail found;

2. Thence South 87 deg. 58’ 33” East, a distance of 57.50 feet, to a railroad spike set;

3. Thence North 02 deg. 01’ 27” East, a distance of 167.21 feet, to an iron pin set in aforesaid Southerly right-of-way line of Interstate 270 at a Northeasterly corner of said 5.103 acre tract;

Thence South 78 deg. 46’ 49” East, a distance of 677.06 feet, along said Southerly right-of-way line of Interstate 270 and partly along the Northerly line of said 13.727 acre tract and partly along the Northerly line aforesaid 0.875 acre tract, to the point of beginning.

Containing 11.814 acres, more or less, of which 0.167 acres lies within the Cooper Road right-of-way.

The bearings in the above description are based on the bearing of South 87 deg. 58’ 33” East, for the centerline of Corporate Exchange Drive, as shown on the dedication Plat for Corporate Exchange Drive, of record in Deed Book 60, Page 22 and 23, records of the Recorder’s Office, Franklin County, Ohio.

PARCEL 2:

Situated in the City of Columbus, County of Franklin and State of Ohio, lying in Quarter Township 2, Township 2, Range 17, United States Military Lands:

And known as being a part of the 4.500 and 13.727 acre tracts conveyed to 17 Land Realty Corp. by deed of record in O.R. 14066 B11, Records of the Recorder’s Office, Franklin County, Ohio, and being more particularly described as follows:

Beginning for reference at a PK nail found at the centerline intersection of Presidential Gateway (60 feet in width) as established by the Plat of record in Plat Book 83, Page 80 and Corporate Exchange Drive (60 feet in width) as established by the Plat of record in Plat Book 60, Page 22;

Thence North 87 deg. 58’ 33” West, a distance of 329.18 feet along the centerline of Corporate Exchange Drive to a point;

Thence North 02 deg. 01’ 27” East, a distance of 30.00 feet, to a railroad spike set on the Northerly right-of-way line of Corporate Exchange Drive and the Southerly line of said 13.727 acre tract and being the point of true beginning;

Thence the following three (3) courses and distances along the said Northerly right-of-way line of Corporate Exchange Drive and the Southerly line of said 13.727 and 4.500 acre tracts;

1. Thence North 87 deg. 58’ 33” West, a distance of 94.38 feet to an iron pin set at a point of curvature;

2. Thence along the arc of said curve to the right, having a radius of 420.00 feet, a central angle of 27 deg. 22’ 54”, a chord bearing North 74 deg. 17’ 06” West, and a chord distance of 198.81 feet to an iron pin found at the point of tangency;

3. Thence North 60 deg. 35’ 39” West, a distance of 28.10 feet to an iron pin set at a Southeasterly corner of a 5.103 acre tract conveyed to Corporate Exchange Buildings IV and V Limited Partnership by deed of record in O.R. 24554 B04;

Thence the following two (2) courses and distance along the Easterly and Southerly lines of said 5.103 acre tracts;

1. Thence North 02 deg. 01’ 27” East, a distance of 258.02 feet to a railroad spike set;

2. Thence South 87 deg. 58’ 33” East, a distance of 312.50 feet to a railroad spike set;

Thence South 02 deg. 01’ 27” West, a distance of 318.00 feet across said 13.727 acre tract to the point of true beginning, containing 2.183 acres, more or less, subject to all easements, restrictions and rights-of-way of record.

THIS SPACE ABOVE FOR RECORDER'S USE

SUBORDINATION AGREEMENT, ATTORNMENT AND NON-DISTURBANCE AGREEMENT, AND CONSENT TO SUBLEASE

NOTICE: SUBJECT TO THE NON-DISTURBANCE PROVISIONS CONTAINED HEREIN, THIS SUBORDINATION AGREEMENT RESULTS IN YOUR LEASE BECOMING SUBORDINATE TO, SUBJECT TO AND OF LOWER PRIORITY THAN THE GROUND LEASE (DEFINED BELOW)

THIS SUBORDINATION AGREEMENT, ATTORNMENT AND NON-DISTURBANCE AGREEMENT AND CONSENT TO SUBLEASE (this "Agreement") is made as of _____ ____, 2013 (the "Effective Date"), by and among AGNL Clinic, L.P., a Delaware limited partnership ("AGNL"), Molina Healthcare, Inc., a Delaware corporation ("Molina"), Royal Bank of Scotland PLC and RBS Financial Products, Inc. (collectively, "Lender") and Long Beach Publishing Company, Inc., a Delaware corporation (a/k/a Long Beach Press Telegram) ("Sub-Tenant").

RECITALS:

A. Molina Center LLC, a Delaware limited liability company ("Center"), as landlord, and Sub-Tenant, as tenant (or their respective predecessors in interest), entered into a Standard Form Office Lease made and entered into as of October 21, 2005 (as amended by the First Amendment to Lease dated July 20, 2006 and the Second Amendment to Lease dated March 20, 2008,the "Lease"). Pursuant to the Lease, Sub-Tenant leases from Center that certain portion of the Property (defined below) as more particularly described on Exhibit B attached hereto and incorporated herein by this reference (the "Premises"). A copy of the Lease is attached hereto as Exhibit C and incorporated herein by this reference.

B. On the Effective Date, Center sold and conveyed to AGNL the fee simple interest in that certain real property with an address of 200 and 300 Oceangate Blvd., Long Beach,

California 90802, and described on Exhibit A attached hereto and incorporated herein by this reference (which property, together with all improvements now or hereafter located on the property, is defined as the " Property") and Center assigned the Lease to Molina.

C. On the Effective Date, AGNL, as landlord, and Molina, as tenant, entered into a Lease Agreement dated as of the Effective Date (together with any amendments, modifications, replacements or extensions, the " Ground Lease") pursuant to which AGNL leased to Molina all of the Property and improvements located thereon as more fully described in the Ground Lease and Lender made a loan (the "Loan") to AGNL secured by, among other things, that certain Deed of Trust, Assignment of Leases and Rents, Security Agreement and Fixture Filing (the "Security Instrument") encumbering AGNL's interest in the Property.

D. As a condition to completing the sale and purchase of the Property and entering into the Ground Lease, AGNL and Lender have required that Molina and Sub-Tenant acknowledge and agree that (notwithstanding the fact that the Lease was entered into prior to the Ground Lease) unconditionally and at all times the Ground Lease shall be prior and superior in title to the Lease and that Molina and Sub-Tenant specifically and unconditionally subordinate their respective interests in the Lease to the priority in title of the Ground Lease, subject to certain "non-disturbance" protections for Sub-Tenant described herein.

E. Subject to certain "non-disturbance" protections for Sub-Tenant described herein, the effect of the foregoing subordination shall be that the Ground Lease shall be deemed a master lease or superior lease and that the Lease shall be deemed a sublease under the Ground Lease.

F. The parties have agreed to the foregoing and to all of the other agreements and understandings set forth in this Agreement.

NOW, THEREFORE, for valuable consideration and to induce AGNL to enter into the transactions described in the recitals, AGNL, Molina, Lender and Sub-Tenant hereby agree as follows:

Subordination; Consent to Sublease. AGNL, Molina, Lender and Sub-Tenant hereby agree that:

Recitals. The foregoing recitals are incorporated herein by reference as if fully set forth in this Agreement.

Prior Title. Subject to Section 4 of this Agreement, the Ground Lease, and any modifications, renewals or extensions thereof, is and shall unconditionally be and at all times remain prior and superior in title to the Lease. Molina shall be the direct landlord under the Lease and shall continue to be liable and obligated to Sub-Tenant for all of landlord's liabilities and obligations thereunder.

Additional Agreements. It is covenanted and agreed that so long as the Ground Lease is in effect:

No Advance Rents. Sub-Tenant will make no payments or prepayments of rent more than one (1) month in advance of the time when the same become due under the Lease except as may be expressly required of Sub-Tenant under the Lease.

Assignment of Rents. Upon receipt by Sub-Tenant of written notice from AGNL that AGNL has elected to terminate the Ground Lease or that an Event of Default (as defined in the Ground Lease) has occurred, Sub-Tenant will pay directly to AGNL all rents due and payable under the Lease. Sub-Tenant shall comply with such direction to pay and shall not be required to determine whether the Ground Lease has been terminated or whether Molina is in default under the Ground Lease, Molina and AGNL hereby agreeing with Sub-Tenant that Sub-Tenant shall be given credit under the Lease for any such payments as though such payments had been made to Molina.

Assignment and Subletting. Sub-Tenant shall not exercise any of its rights to assign, sublet, license, lease, sublease or otherwise transfer any right of use or occupancy for the Premises which requires the prior consent of Molina under the Lease without obtaining the prior written consent of AGNL in accordance with Section 2.6 hereof (the foregoing requirement for AGNL's consent shall exist independent of and regardless of whether Molina has granted its consent to such assignment, subletting, license, lease, sublease or other transfer).

Alterations and Repairs. Tenant shall not make any alteration (as defined in the Lease) at the Premises which requires the prior consent of Molina under the Lease without obtaining the prior written consent of AGNL in accordance with Section 2.6 hereof.

AGNL Agreement. So long as Molina (or any successor landlord) does not have the right to terminate the Lease by reason of default (after any applicable notice and cure periods) on the part of Sub-Tenant, then, in such event, (a) unless any applicable law requires same, Sub-Tenant shall not be joined as a party defendant in any action or proceeding which may be instituted or taken by AGNL for the purpose of terminating the Ground Lease by reason of any default thereunder, (b) Sub-Tenant shall not be evicted from the Premises nor shall any of Sub-Tenant's rights under the Lease be impaired or otherwise affected in any way by reason of any default under the Ground Lease, and (c) Sub-Tenant's estate under the Lease shall not be terminated or disturbed by reason of any default on the part of Molina under the Ground Lease.

Consents. AGNL covenants and agrees that any consents by AGNL provided for hereunder generally shall be given, deemed given or withheld under the same standard as would be the case for Molina under the Lease, provided that Tenant also delivers to AGNL any notices related to such matters at the same time as delivered to Molina in accordance with the terms of the Lease. Tenant agrees that, if Tenant contends that AGNL improperly withheld its consent to any action or occurrence which requires AGNL's consent hereunder, then Tenant may seek an action for declaratory judgment against AGNL seeking to reverse such decision, or otherwise avail itself of any other remedies against AGNL to the extent available against the landlord under the Lease. The foregoing shall not limit or otherwise affect any and all remedies or claims that Tenant may have against Molina under or pursuant to the Lease.

Attornment. Sub-Tenant agrees for the benefit of AGNL and any transferee, successor or assign of AGNL or lender of AGNL, including, without limitation, Lender, which succeeds to the rights of AGNL, as landlord, pursuant to a foreclosure, deed-in-lieu of foreclosure or other exercise of remedies (hereafter referred to, collectively, as "Prime Landlord") following a termination of the Ground Lease, but subject in each case to Section 4 of this Agreement, as follows:

Payment of Rent. Sub-Tenant shall pay to Prime Landlord all rental payments required to be made by Sub-Tenant pursuant to the terms of the Lease for the duration of the term of the Lease.

Continuation of Performance. Sub-Tenant shall be bound to Prime Landlord in accordance with all of the provisions of the Lease for the balance of the term thereof, and Sub-Tenant hereby attorns to Prime Landlord as its landlord following a termination of the Ground Lease, such attornment to be effective and self-operative without the execution of any further instrument immediately upon Prime Landlord's termination of the Ground Lease and delivery of written notice thereof to Sub-Tenant.

No Offset. Prime Landlord shall not be liable for, nor subject to, any offsets, credits or defenses which Sub-Tenant may have by reason of any act or omission of Molina under the Lease (except to the extent specifically provided in the Lease as of the Effective Date and solely for such offsets, credits or defenses accruing or continuing after Prime Landlord becomes the landlord under the Lease), nor for the return of any sums which Sub-Tenant may have paid to Molina under the Lease as and for security deposits, advance rentals or otherwise, except to the extent that such sums are actually delivered by Molina to Prime Landlord (and provided that the foregoing provisions shall not exempt or discharge Prime Landlord, if Prime Landlord succeeds to the interest of Molina under the Lease, from the performance of the obligations of the "Landlord" under the Lease accruing during and applicable to Prime Landlord's period of ownership).

Subsequent Transfer. If Prime Landlord, by succeeding to the interest of Molina under the Lease, should become obligated to perform the covenants of Molina thereunder, then, upon any further transfer of Prime Landlord's interest by Prime Landlord and assumption thereof in writing by the transferee, all of such obligations (except those assumed by Prime Landlord during and applicable to Prime Landlord's period of ownership) shall terminate as to Prime Landlord.

Non-Disturbance. In the event of a termination of the Ground Lease, or other action to enforce AGNL's remedies under the Ground Lease or any other termination or surrender thereof, including, without limitation, pursuant to Section 365(h) of the U.S. Bankruptcy Code or Lender's exercise of remedies under the Security Instrument, so long as there shall then exist no right of the landlord to exercise remedies pursuant to the Lease by reason of default (beyond any applicable notice and cure period) by Sub-Tenant such that there is a right to terminate the Lease, each of AGNL and Lender agrees for itself and each of its successors and assigns that the leasehold interest of Sub-Tenant under the Lease shall not be disturbed, extinguished or terminated by reason of such termination or exercise of remedies by AGNL or Lender, but rather the Lease shall continue in full force and effect and AGNL or Lender (and any party that shall become a transferee of the Property by reason thereof), as applicable, shall recognize and accept Sub-Tenant as tenant under the Lease subject to and upon the terms and provisions of the Lease except as modified by this Agreement.

If a default (beyond any applicable notice and cure period) exists under the Lease such that there is a right to terminate the Lease at the time of the termination of the Ground Lease or the exercise of any of AGNL's remedies thereunder, then both AGNL and Lender may elect to continue the Lease as provided for in this Agreement or terminate the Lease upon written notice from AGNL and/or Lender to Sub-Tenant.

Miscellaneous.

Heirs, Successors, Assigns and Transferees. The covenants herein shall be binding upon, and inure to the benefit of, the heirs, successors and assigns of the parties hereto including, without limitation, Lender or any other lender of AGNL that becomes landlord under the Ground Lease or the Lease.

Notices. All notices or other communications required or permitted to be given pursuant to the provisions hereof shall be deemed served upon personal delivery or, if delivered by overnight courier such as FedEx or UPS, upon the date of delivery, or, if mailed, upon the first to occur of actual receipt or the expiration of three (3) days after deposit in United States Postal Service, certified mail, postage prepaid and addressed to the address of AGNL, Molina, Lender or Sub-Tenant appearing below:

provided, however, that any party shall have the right to change its address for notice hereunder by the giving of written notice thereof to the other parties in the manner set forth in this Agreement.

Counterparts. This Agreement may be executed in two or more counterparts, each of which shall be deemed an original and all of which together shall constitute and be construed as one and the same instrument.

Remedies Cumulative. All rights of AGNL herein to collect rents on behalf of Molina under the Lease are cumulative and shall be in addition to any and all other rights and remedies provided by law and by other agreements between AGNL and Molina or others.

Paragraph Headings. Paragraph headings in this Agreement are for convenience only and are not to be construed as part of this Agreement or in any way limiting or applying the provisions hereof.

Representations. Each of AGNL, Molina, Lender and Sub-Tenant represents to the other respective parties that it has the power and authority to enter into this Agreement.

Intentionally Omitted.

Governing Law. It is the intention of the parties hereto that this Agreement (and the terms and provisions hereof) shall be construed and enforced in accordance with the laws of the State of California, without regard to any conflict of law principles.

Recordation. At AGNL's option, this Agreement may be recorded in the land records where the Property is located. Any recordation of this Agreement or any memorandum thereof, whether at the request of AGNL, Lender or otherwise, shall not be at Sub-Tenant's expense.

Fee Lender Subordination. AGNL, Molina, Lender and Sub-Tenant agree that the Lease shall be subordinate to the Loan and the Security Instrument and any mortgage or other security instrument hereafter placed upon the Property (which includes the Premises) by AGNL, and to any and all advances made or to be made thereunder, to the interest thereon, and all renewals, replacements and extensions thereof; provided, however, that the foregoing shall not limit Lender's agreements contained herein, including, without limitation, as described in Section 4 hereof.

INCORPORATION. Exhibit A, Exhibit B and Exhibit C are attached hereto and incorporated herein by this reference.

(SIGNATURES FOLLOW)

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the day and year first above-written.

NOTICE: IT IS RECOMMENDED THAT, PRIOR TO THE EXECUTION OF THIS AGREEMENT, THE PARTIES CONSULT WITH THEIR ATTORNEYS WITH RESPECT HERETO.

Form of Notice of Subordination

NOTICE OF SUBORDINATION

THIS NOTICE OF SUBORDINATION (this "Notice") is dated June __, 2013 (the "Effective Date"), by AGNL Clinic, L.P., a Delaware limited partnership ("AGNL") and Molina Healthcare, Inc., a Delaware corporation (" Molina")

1. Molina Center LLC, a Delaware limited liability company ("Center"), as landlord, and _____ ("Sub-Tenant") as tenant (or their respective predecessors in interest), entered into a Lease made and entered into as of _____, 20__ (the "Lease"). Pursuant to the Lease, Sub-Tenant leases from Center that certain portion of the Property (defined below) as more particularly described on Exhibit B attached hereto and incorporated herein by this reference (the " _____ Premises").

2. On the Effective Date, Center, sold and conveyed to AGNL the fee simple interest in that certain real property with an address of 200 and 300 Oceangate Blvd., Suite 950, Long Beach, California 90802, and described on Exhibit A attached hereto and incorporated herein by this reference (which property, together with all improvements now or hereafter located on the property, is defined as the "Property").

3. On the Effective Date, AGNL, as landlord, and Molina, as tenant, entered into a Lease Agreement dated as of the Effective Date (together with any amendments, modifications, replacements or extensions, the " Ground Lease") pursuant to which AGNL leased to Molina all of the Property and improvements located thereon as more fully described in the Ground Lease, Center assigned the Lease to Molina, and Lender made a loan (the "Loan") to AGNL secured by, among other things, that certain Deed of Trust, Assignment of Leases and Rents, Security Agreement and Fixture Filing (the "Security Instrument") encumbering AGNL's interest in the Property.

4. Pursuant to Section 12 or Section 33, as applicable, of the Lease, Sub-Tenant agreed that, at the option of Landlord (as defined in the Lease), all future ground leases would be superior to the Lease. Center, as Landlord under the Lease, hereby exercises such option with regard to the Ground Lease. The effect of the foregoing subordination shall be that the Ground Lease shall be deemed a master lease or superior lease and that the Lease shall be deemed a sublease under the Ground Lease.

OWNER'S POLICY OF TITLE INSURANCE

Issued by

Fidelity National Title Insurance Company

Any notice of claim and any other notice or statement in writing required to be given the Company under this Policy must be given to the Company at the address shown in Section 18 of the Conditions.

COVERED RISKS

SUBJECT TO THE EXCLUSIONS FROM COVERAGE, THE EXCEPTIONS FROM COVERAGE CONTAINED IN SCHEDULE B, AND THE CONDITIONS, FIDELITY NATIONAL TITLE INSURANCE COMPANY, a California corporation (the "Company") insures, as of Date of Policy and, to the extent stated in Covered Risks 9 and 10, after Date of Policy, against loss or damage, not exceeding the Amount of Insurance, sustained or incurred by the Insured by reason of:

1. Title being vested other than as stated in Schedule A.

2. Any defect in or lien or encumbrance on the Title. This Covered Risk includes but is not limited to insurance against loss from

   (a) A defect in the Title caused by

      (i) forgery, fraud, undue influence, duress, incompetency, incapacity, or impersonation;

      (ii) failure of any person or Entity to have authorized a transfer or conveyance;

      (iii) a document affecting Title not properly created, executed, witnessed, sealed, acknowledged, notarized, or delivered;

      (iv) failure to perform those acts necessary to create a document by electronic means authorized by law;

      (v) a document executed under a falsified, expired, or otherwise invalid power of attorney;

(vi) a document not properly filed, recorded, or indexed in the Public Records including failure to perform those acts by electronic means authorized by law; or

(vii) a defective judicial or administrative proceeding.

(b) The lien of real estate taxes or assessments imposed on the Title by a governmental authority due or payable, but unpaid.

(c) Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land. The term "encroachment" includes encroachments of existing improvements located on the Land onto adjoining land, and encroachments onto the Land of existing improvements located on adjoining land.

3. Unmarketable Title.

4. No right of access to and from the Land.

5. The violation or enforcement of any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

(a) the occupancy, use, or enjoyment of the Land;

(b) the character, dimensions, or location of any improvement erected on the Land;

(c) the subdivision of land; or

(d) environmental protection

if a notice, describing any part of the Land, is recorded in the Public Records setting forth the violation or intention to enforce, but only to the extent of the violation or enforcement referred to in that notice.

6. An enforcement action based on the exercise of a governmental police power not covered by Covered Risk 5 if a notice of the enforcement action, describing any part of the Land, is recorded in the Public Records, but only to the extent of the enforcement referred to in that notice.

7. The exercise of the rights of eminent domain if a notice of the exercise, describing any part of the Land, is recorded in the Public Records.

8. Any taking by a governmental body that has occurred and is binding on the rights of a purchaser for value without Knowledge.

9. Title being vested other than as stated Schedule A or being defective

   (a) as a result of the avoidance in whole or in part, or from a court order providing an alternative remedy, of a transfer of all or any part of the title to or any interest in the Land occurring prior to the transaction vesting Title as shown in Schedule A because that prior transfer constituted a fraudulent or preferential transfer under federal bankruptcy, state insolvency, or similar creditors' rights laws; or

   (b) because the instrument of transfer vesting Title as shown in Schedule A constitutes a preferential transfer under federal bankruptcy, state insolvency, or similar creditors' rights laws by reason of the failure of its recording in the Public Records

      (i) to be timely, or

      (ii) to impart notice of its existence to a purchaser for value or to a judgment or lien creditor.

10. Any defect in or lien or encumbrance on the Title or other matter included in Covered Risks 1 through 9 that has been created or attached or has been filed or recorded in the Public Records subsequent to Date of Policy and prior to the recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The Company will also pay the costs, attorneys' fees, and expenses incurred in defense of any matter insured against by this Policy, but only to the extent provided in the Conditions.

IN WITNESS WHEREOF, FIDELITY NATIONAL TITLE INSURANCE COMPANY has caused this policy to be signed and sealed by its duly authorized officers.

Alta Owner's Policy

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

CONDITIONS

1. DEFINITION OF TERMS

The following terms when used in this policy mean:

(a) "Amount of Insurance": The amount stated in Schedule A, as may be increased or decreased by endorsement to this policy, increased by Section 8(b), or decreased by Sections 10 and 11 of these Conditions.

(b) "Date of Policy": The date designated as "Date of Policy" in Schedule A.

(c) "Entity": A corporation, partnership, trust, limited liability company, or other similar legal entity.

(d) "Insured": The Insured named in Schedule A.

(i) The term "Insured" also includes

(A) successors to the Title of the Insured by operation of law as distinguished from purchase, including heirs, devisees, survivors, personal representatives, or next of kin;

(B) successors to an Insured by dissolution, merger, consolidation, distribution, or reorganization;

(C) successors to an Insured by its conversion to another kind of Entity;

(D) a grantee of an Insured under a deed delivered without payment of actual valuable consideration conveying the Title

(1) if the stock, shares, memberships, or other equity interests of the grantee are wholly-owned by the named Insured,

(2) if the grantee wholly owns the named Insured,

(3) if the grantee is wholly-owned by an affiliated Entity of the named Insured, provided the affiliated Entity and the named Insured are both wholly-owned by the same person or Entity, or

(4) if the grantee is a trustee or beneficiary of a trust created by a written instrument established by the Insured named in Schedule A for estate planning purposes.

(ii) With regard to (A), (B), (C), and (D) reserving, however, all rights and defenses as to any successor that the Company would have had against any predecessor Insured.

(e) "Insured Claimant": An Insured claiming loss or damage.

(f) "Knowledge" or "Known": Actual knowledge, not constructive knowledge or notice that may be imputed to an Insured by reason of the Public Records or any other records that impart constructive notice of matters affecting the Title.

(g) "Land": The land described in Schedule A, and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is insured by this policy.

(h) "Mortgage": Mortgage, deed of trust, trust deed, or other security instrument, including one evidenced by electronic means authorized by law.

(i) "Public Records": Records established under state statutes at Date of Policy for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge. With respect to Covered Risk 5(d), "Public Records" shall also include environmental protection liens filed in the records of the clerk of the United States District Court for the district where the Land is located.

(j) "Title": The estate or interest described in Schedule A.

(k) "Unmarketable Title": Title affected by an alleged or apparent matter that would permit a prospective purchaser or lessee of the Title or lender on the Title to be released from the obligation to purchase, lease, or lend if there is a contractual condition requiring the delivery of marketable title.

2. CONTINUATION OF INSURANCE

The coverage of this policy shall continue in force as of Date of Policy in favor of an Insured, but only so long as the Insured retains an estate or interest in the Land, or holds an obligation secured by a purchase money Mortgage given by a purchaser from the Insured, or only so long as the Insured shall have liability by reason of warranties in any transfer or conveyance of the Title. This policy shall not continue in force in favor of any purchaser from the Insured of either (i) an estate or interest in the Land, or (ii) an obligation secured by a purchase money Mortgage given to the Insured.

3. NOTICE OF CLAIM TO BE GIVEN BY INSURED CLAIMANT

The Insured shall notify the Company promptly in writing (i) in case of any litigation as set forth in Section 5(a) of these Conditions, (ii) in case Knowledge shall come to an Insured hereunder of any claim of title or interest that is adverse to the Title, as insured, and that might cause loss or damage for which the Company may be liable by virtue of this policy, or (iii) if the Title, as insured, is rejected as Unmarketable Title. If the Company is prejudiced by the failure of the Insured Claimant to provide prompt notice, the Company's liability to the Insured Claimant under the policy shall be reduced to the extent of the prejudice.

4. PROOF OF LOSS

In the event the Company is unable to determine the amount of loss or damage, the Company may, at its option, require as a condition of payment that the Insured Claimant furnish a signed proof of loss. The proof of loss must describe the defect, lien, encumbrance, or other matter insured against by this policy that constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage.

5. DEFENSE AND PROSECUTION OF ACTIONS

(a) Upon written request by the Insured, and subject to the options contained in Section 7 of these Conditions, the Company, at its own cost and without unreasonable delay, shall provide for the defense of an Insured in litigation in which any third party asserts a claim covered by this policy adverse to the Insured. This obligation is limited to only those stated causes of action alleging matters insured against by this policy. The Company shall have the right to select counsel of its choice (subject to the right of the Insured to object for reasonable cause) to represent the Insured as to those stated causes of action. It shall not be liable for and will not pay the fees of any other counsel. The Company will not pay any fees, costs, or expenses incurred by the Insured in the defense of those causes of action that allege matters not insured against by this policy.

(b) The Company shall have the right, in addition to the options contained in Section 7 of these Conditions, at its own cost, to institute and prosecute any action or proceeding or to do any other act that in its opinion may be necessary or desirable to establish the Title, as insured, or to prevent or reduce loss or damage to the Insured. The Company may take any appropriate action under the terms of this policy, whether or not it shall be liable to the Insured. The exercise of these rights shall not be an admission of liability or waiver of any provision of this policy. If the Company exercises its rights under this subsection, it must do so diligently.

(c) Whenever the Company brings an action or asserts a defense as required or permitted by this policy, the Company may pursue the litigation to a final determination by a court of competent jurisdiction, and it expressly reserves the right, in its sole discretion, to appeal from any adverse judgment or order.

6. DUTY OF INSURED CLAIMANT TO COOPERATE

(a) In all cases where this policy permits or requires the Company to prosecute or provide for the defense of any action or proceeding and any appeals, the Insured shall secure to the Company the right to so prosecute or provide defense in the action or proceeding, including the right to use, at its option, the name of the Insured for this purpose. Whenever requested by the Company, the Insured, at the Company's expense, shall give the Company all reasonable aid (i) in securing evidence, obtaining witnesses, prosecuting or defending the action or proceeding, or effecting settlement, and (ii) in any other lawful act that in the opinion of the Company may be necessary or desirable to establish the Title or any other matter as insured. If the Company is prejudiced by the failure of the Insured to furnish the required cooperation, the Company's obligations to the Insured under the policy shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation, with regard to the matter or matters requiring such cooperation.

(b) The Company may reasonably require the Insured Claimant to submit to examination under oath by any authorized representative of the Company and to produce for examination, inspection, and copying, at such reasonable times and places as may be designated by the authorized representative of the Company, all records, in whatever medium maintained, including books, ledgers, checks, memoranda,

correspondence, reports, e-mails, disks, tapes, and videos whether bearing a date before or after Date of Policy, that reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the Insured Claimant shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect, and copy all of these records in the custody or control of a third party that reasonably pertain to the loss or damage. All information designated as confidential by the Insured Claimant provided to the Company pursuant to this Section shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the Insured Claimant to submit for examination under oath, produce any reasonably requested information, or grant permission to secure reasonably necessary information from third parties as required in this subsection, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this policy as to that claim.

7. OPTIONS TO PAY OR OTHERWISE SETTLE CLAIMS; TERMINATION OF LIABILITY

In case of a claim under this policy, the Company shall have the following additional options:

(a) To Pay or Tender Payment of the Amount of Insurance.

To pay or tender payment of the Amount of Insurance under this policy together with any costs, attorneys' fees, and expenses incurred by the Insured Claimant that were authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay.

Upon the exercise by the Company of this option, all liability and obligations of the Company to the Insured under this policy, other than to make the payment required in this subsection, shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation.

(b) To Pay or Otherwise Settle With Parties Other Than the Insured or With the Insured Claimant.

(i) To pay or otherwise settle with other parties for or in the name of an Insured Claimant any claim insured against under this policy. In addition, the Company will pay any costs, attorneys' fees, and expenses incurred by the Insured Claimant that were authorized by the Company up to the time of payment and that the Company is obligated to pay; or

(ii) To pay or otherwise settle with the Insured Claimant the loss or damage provided for under this policy, together with any costs, attorneys' fees, and expenses incurred by the Insured Claimant that were authorized by the Company up to the time of payment and that the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in subsections (b)(i) or (ii), the Company's obligations to the Insured under this policy for the claimed loss or damage, other than the payments required to be made, shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation.

8. DETERMINATION AND EXTENT OF LIABILITY

This policy is a contract of indemnity against actual monetary loss or damage sustained or incurred by the Insured Claimant who has suffered loss or damage by reason of matters insured against by this policy.

(a) The extent of liability of the Company for loss or damage under this policy shall not exceed the lesser of

(i) the Amount of Insurance; or

(ii) the difference between the value of the Title as insured and the value of the Title subject to the risk insured against by this policy.

(b) If the Company pursues its rights under Section 5 of these Conditions and is unsuccessful in establishing the Title, as insured,

(i) the Amount of Insurance shall be increased by 10%, and

(ii) the Insured Claimant shall have the right to have the loss or damage determined either as of the date the claim was made by the Insured Claimant or as of the date it is settled and paid.

(c) In addition to the extent of liability under (a) and (b), the Company will also pay those costs, attorneys' fees, and expenses incurred in accordance with Sections 5 and 7 of these Conditions.

9. LIMITATION OF LIABILITY

(a) If the Company establishes the Title, or removes the alleged defect, lien or encumbrance, or cures the lack of a right of access to or from the Land, or cures the claim of Unmarketable Title, all as insured, in a reasonably diligent manner by any method, including litigation and the completion of any appeals, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused to the Insured.

(b) In the event of any litigation, including litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals, adverse to the Title, as insured.

(c) The Company shall not be liable for loss or damage to the Insured for liability voluntarily assumed by the Insured in settling any claim or suit without the prior written consent of the Company.

10. REDUCTION OF INSURANCE; REDUCTION OR TERMINATION OF LIABILITY

All payments under this policy, except payments made for costs, attorneys' fees, and expenses, shall reduce the Amount of Insurance by the amount of the payment.

11. LIABILITY NONCUMULATIVE

The Amount of Insurance shall be reduced by any amount the Company pays under any policy insuring a Mortgage to which exception is taken in Schedule B or to which the Insured has agreed, assumed, or taken subject, or which is executed by an Insured after Date of Policy and which is a charge or lien on the Title, and the amount so paid shall be deemed a payment to the Insured under this policy.

12. PAYMENT OF LOSS

When liability and the extent of loss or damage have been definitely fixed in accordance with these Conditions, the payment shall be made within 30 days.

13. RIGHTS OF RECOVERY UPON PAYMENT OR SETTLEMENT

(a) Whenever the Company shall have settled and paid a claim under this policy, it shall be subrogated and entitled to the rights of the Insured Claimant in the Title and all other rights and remedies in respect to the claim that the Insured Claimant has against any person or property, to the extent of the amount of any loss, costs, attorneys' fees, and expenses paid by the Company. If requested by the Company, the Insured Claimant shall execute documents to evidence the transfer to the Company of these rights

and remedies. The Insured Claimant shall permit the Company to sue, compromise, or settle in the name of the Insured Claimant and to use the name of the Insured Claimant in any transaction or litigation involving these rights and remedies.

If a payment on account of a claim does not fully cover the loss of the Insured Claimant, the Company shall defer the exercise of its right to recover until after the Insured Claimant shall have recovered its loss.

(b) The Company's right of subrogation includes the rights of the Insured to indemnities, guaranties, other policies of insurance, or bonds, notwithstanding any terms or conditions contained in those instruments that address subrogation rights.

14. ARBITRATION

Either the Company or the Insured may demand that the claim or controversy shall be submitted to arbitration pursuant to the Title Insurance Arbitration Rules of the American Land Title Association ("Rules"). Except as provided in the Rules, there shall be no joinder or consolidation with claims or controversies of other persons. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the Insured arising out of or relating to this policy, any service in connection with its issuance or the breach of a policy provision, or to any other controversy or claim arising out of the transaction giving rise to this policy. All arbitrable matters when the Amount of Insurance is $2,000,000 or less shall be arbitrated at the option of either the Company or the Insured. All arbitrable matters when the Amount of Insurance is in excess of $2,000,000 shall be arbitrated only when agreed to by both the Company and the Insured. Arbitration pursuant to this policy and under the Rules shall be binding upon the parties. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court of competent jurisdiction.

15. LIABILITY LIMITED TO THIS POLICY; POLICY ENTIRE CONTRACT

(a) This policy together with all endorsements, if any, attached to it by the Company is the entire policy and contract between the Insured and the Company. In interpreting any provision of this policy, this policy shall be construed as a whole.

(b) Any claim of loss or damage that arises out of the status of the Title or by any action asserting such claim shall be restricted to this policy.

(c) Any amendment of or endorsement to this policy must be in writing and authenticated by an authorized person, or expressly incorporated by Schedule A of this policy.

(d) Each endorsement to this policy issued at any time is made a part of this policy and is subject to all of its terms and provisions. Except as the endorsement expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsement, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance.

16. SEVERABILITY

In the event any provision of this policy, in whole or in part, is held invalid or unenforceable under applicable law, the

policy shall be deemed not to include that provision or such part held to be invalid, but all other provisions shall remain in full force and effect.

17. CHOICE OF LAW; FORUM

(a) Choice of Law: The Insured acknowledges the Company has underwritten the risks covered by this policy and determined the premium charged therefor in reliance upon the law affecting interests in real property and applicable to the interpretation, rights, remedies, or enforcement of policies of title insurance of the jurisdiction where the Land is located.

Therefore, the court or an arbitrator shall apply the law of the jurisdiction where the Land is located to determine the validity of claims against the Title that are adverse to the Insured and to interpret and enforce the terms

of this policy. In neither case shall the court or arbitrator apply its conflicts of law principles to determine the applicable law.

(b) Choice of Forum: Any litigation or other proceeding brought by the Insured against the Company must be filed only in a state or federal court within the United States of America or its territories having appropriate jurisdiction.

18. NOTICES, WHERE SENT

Any notice of claim and any other notice or statement in writing required to be given to the Company under this policy must be given to the Company at Fidelity National Title Insurance Company, Attn: Claims Department, Post Office Box 45023, Jacksonville, Florida 32232-5023.

Fidelity National Title Insurance Company

PER THE SURVEYOR THE ABOVE METES AND BOUNDS LEGAL DESCRIPTIONS COVER THE SAME PROPERTY AS THE PROPERTY COVERED BY THE RECORD LEGAL DESCRIPTION. HOWEVER, ARE NOT THE VESTING LEGAL DESCRIPTION. THESE ARE MERELY PROVIDED AS A COURTESY.

THE ABOVE METES AND BOUNDS LEGAL DESCRIPTION IN NOT THE RECORD LEGAL DESCRIPTION AND IS MERELY PROVIDED AS A COURTESY ONLY.NO COVERAGE IS GIVEN AS TO THE ACCURACY THEREOF.

SCHEDULE B

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees, or expenses that arise by reason of:

1. Property taxes, which are a lien not yet due and payable, including any assessments collected with taxes to be levied for the fiscal year 2013-2014.
2. Intentionally Deleted.
3. Intentionally Deleted
4. The lien of supplemental taxes, if any, assessed pursuant to the provisions of Chapter 3.5 (Commencing with Section 75) of the Revenue and Taxation Code of the State of California. None yet due and payable.
5. Water rights, claims or title to water, whether or not disclosed by the public records.
6. Intentionally deleted
7. The Land described herein is included within a project area of the Redevelopment Agency shown below, and that proceedings for the redevelopment of said project have been instituted under the Redevelopment Law (such redevelopment to proceed only after the adoption of the Redevelopment Plan) as disclosed by a document.

   Redevelopment Agency: Redevelopment Agency of the City of Long Beach, California
   Recording Date: October 21, 1969
   Recording No: 3208 of Official Records
8. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted by: Redevelopment Agency of the City of Long Beach
   Granted to: The City of Long Beach
   Purpose: Slope and incidental purposes
   Recording Date: April 22, 1976
   Recording No: as Instrument No. 470, Book D7050, Page 668, of Official Records
   Affects: A portion of Parcel 2

9. Matters contained in that certain document

   Entitled: Grants, Covenants and Restrictions
   Executed by: Redevelopment Agency of The City of Long Beach, California, a public body, corporate and politic and Oceangate Financial Center, Ltd., a California limited partnership
   Recording Date: February 18, 1976
   Recording No: as Instrument No. 488, Book M5256, Page 630, of Official Records

10. Covenants, conditions and restrictions but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, source of income, gender, gender identity, gender expression, medical condition or genetic information, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth in the document

    Entitled: "Resolution No. RA. 13-76"
    Executed by: Redevelopment Agency of The City of Long Beach, California
    Recording Date: May 27, 1976
    Recording No: as Instrument No. 4810, Book D7097, Page 356, of Official Records

    Said covenants, conditions and restrictions provide that a violation thereof shall not defeat the lien of any mortgage or deed of trust made in good faith and for value.

11. 25. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

END OF SCHEDULE B

This is a pro forma policy furnished to or on behalf of the party to be insured. It neither reflects the present status of title, nor is it intended to be a commitment to insured. The inclusion of endorsements as a part of the pro forma policy in no way evidences the willingness of the company to provide any affirmative coverage shown therein. There are requirements which must be met before a final policy can be issued in the same form as the pro forma policy. A commitment to insure setting forth these requirements should be obtained from the Company.

Additional Matters may be added or other amendments may be made to this pro forma policy by reason of any defects, liens or encumbrances that appear for the first time in the Public Records or come to the attention of the Company and are created or attached between the issuance of this pro forma policy and the issuance of a policy of title insurance. The Company shall have no liability because of such addition or amendment.

PRO FORMA ENDORSEMENT
Attached to Policy No. Pro Forma-23021588
Issued By
Fidelity National Title Insurance Company

1. The insurance provided by this endorsement is subject to the exclusions in Section 4 of this endorsement; and the Exclusions from Coverage, the Exceptions from Coverage contained in Schedule B, and the Conditions in the policy.

2. For the purposes of this endorsement only,

   a. "Covenant" means a covenant, condition, limitation or restriction in a document or instrument in effect at Date of Policy.

   b. "Improvement" means a building, structure located on the surface of the Land, road, walkway, driveway, or curb, affixed to the Land at Date of Policy and that by law constitutes real property, but excluding any crops, landscaping, lawn, shrubbery, or trees.

3. The Company insures against loss or damage sustained by the Insured by reason of:

   a. A violation on the Land at Date of Policy of an enforceable Covenant, unless an exception in Schedule B of the policy identifies the violation;

   b. Enforced removal of an Improvement as a result of a violation, at Date of Policy, of a building setback line shown on a plat of subdivision recorded or filed in the Public Records, unless an exception in Schedule B of the policy identifies the violation; or

   c. A notice of a violation, recorded in the Public Records at Date of Policy, of an enforceable Covenant relating to environmental protection describing any part of the Land and referring to that Covenant, but only to the extent of the violation of the Covenant referred to in that notice, unless an exception in Schedule B of the policy identifies the notice of the violation.

4. This endorsement does not insure against loss or damage (and the Company will not pay costs, attorneys' fees, or expenses) resulting from:

   a. any Covenant contained in an instrument creating a lease;

   b. any Covenant relating to obligations of any type to perform maintenance, repair, or remediation on the Land; or

   c. except as provided in Section 3.c., any Covenant relating to environmental protection of any kind or nature, including hazardous or toxic matters, conditions, or substances.

This endorsement is issued as part of the policy. Except as it expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsements, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance. To the extent a provision of the policy or a previous endorsement is inconsistent with an express provision of this endorsement, this endorsement controls. Otherwise, this endorsement is subject to all of the terms and provisions of the policy and of any prior endorsements.

PRO FORMA ENDORSEMENT
Attached to Policy No. Pro Forma-23021588
Issued by
Fidelity National Title Insurance Company

The Company insures against loss or damage sustained by the Insured by reason of the failure of the Land as described in Schedule A to be the same as that identified on the survey made by FJS Land Consulting for Bock & Clark's National Surveyor's Network, dated February 27, 2013, last revised _____, 2013 and designated as Job No. 201300337-002.

This endorsement is issued as part of the policy. Except as it expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsements, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance. To the extent a provision of the policy or a previous endorsement is inconsistent with an express provision of this endorsement, this endorsement controls. Otherwise, this endorsement is subject to all of the terms and provisions of the policy and of any prior endorsements.

PRO FORMA ENDORSEMENT
Attached to Policy No. Pro Forma-23021588
Issued by
Fidelity National Title Insurance Company

The Company insures against loss or damage sustained by the Insured if, at Date of Policy (i) the Land does not abut and have both actual vehicular and pedestrian access to and from W Ocean Boulevard and Seaside Way (the "Street"), (ii) the Street is not physically open and publicly maintained, or (iii) the Insured has no right to use existing curb cuts or entries along that portion of the Street abutting the Land.

This endorsement is issued as part of the policy. Except as it expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsements, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance. To the extent a provision of the policy or a previous endorsement is inconsistent with an express provision of this endorsement, this endorsement controls. Otherwise, this endorsement is subject to all of the terms and provisions of the policy and of any prior endorsements to it.

PRO FORMA ENDORSEMENT
Attached to Policy No. Pro Forma-23021588
Issued by
Fidelity National Title Insurance Company

The Company insures against loss or damage sustained by the Insured by reason of:

1. those portions of the Land identified below not being assessed for real estate taxes under the listed tax identification numbers or those tax identification numbers including any additional land:

   Parcel: Tax Identification Numbers:
   Parcel 2 of Schedule A 7278-003-035

   Parcel 3 of Schedule A 7278-003-036

2. the easements, if any, described in Schedule A being cut off or disturbed by the nonpayment of real estate taxes, Assessments or other charges imposed on the servient estate by a governmental authority.

This endorsement is issued as part of the policy. Except as it expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsements, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance. To the extent a provision of the policy or a previous endorsement is inconsistent with an express provision of this endorsement, this endorsement controls. PRO FORMA ENDORSEMENT
Attached to Policy No. Pro Forma-23021588
Issued by
Fidelity National Title Insurance Company

1. The Company insures against loss or damage sustained by the Insured in the event that, at Date of Policy,

   a. according to applicable zoning ordinances and amendments, the Land is not classified Zone PD-6

   b. the following use or uses are not allowed under that classification:

      Office Building

   c. There shall be no liability under this paragraph 1.b. if the use or uses are not allowed as the result of any lack of compliance with any conditions, restrictions, or requirements contained in the zoning ordinances and amendments, including but not limited to the failure to secure necessary consents or authorizations as a prerequisite to the use or uses. This paragraph 1.c. does not modify or limit the coverage provided in Covered Risk 5.

2. The Company further insures against loss or damage sustained by the Insured by reason of a final decree of a court of competent jurisdiction either prohibiting the use of the Land, with any existing structure, as specified in paragraph 1.b.; or requiring the removal or alteration of the structure, because, at Date of Policy, the zoning ordinances and amendments have been violated with respect to any of the following matters:

   a. Area, width, or depth of the Land as a building site for the structure

   b. Floor space area of the structure

   c. Setback of the structure from the property lines of the Land

   d. Height of the structure, or

   e. Number of parking spaces.

3. There shall be no liability under this endorsement based on:

   a. the invalidity of the zoning ordinances and amendments until after a final decree of a court of competent jurisdiction adjudicating the invalidity, the effect of which is to prohibit the use or uses;

   b. the refusal of any person to purchase, lease or lend money on the Title covered by this policy.

This endorsement is issued as part of the policy. Except as it expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsements, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance. To the extent a provision of the policy or a previous endorsement is inconsistent with an express provision of this endorsement, this endorsement controls. Otherwise, this endorsement is subject to all of the terms and provisions of the policy and of any prior endorsements.

ARBITRATION ENDORSEMENT

Paragraph 14 (Arbitration) of the Conditions and Stipulations of this policy is hereby amended to provide that all arbitrable matters, regardless of the Amount of Insurance provided herein, shall be arbitrated only when agreed to by both the Company and the Insured.

This endorsement is issued as part of the policy. Except as it expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsements, (iii) extend the Date of Policy or (iv) increase the Amount of Insurance. To the extent a provision of the policy or a previous endorsement is inconsistent with an express provision of this endorsement, this endorsement controls. Otherwise, this endorsement is subject to all of the terms and provisions of the policy and of any prior endorsements.

ALTA Endorsement Form 3.1-06 Zoning-Completed Structure

1. The Company insures against loss or damage sustained by the Insured in the event that, at Date of Policy,

   a. according to applicable zoning ordinances and amendments, the Land is not classified Zone C2-Office Commercial in the H-110 Height District 110 with Parcel Two (parking lot) being located in the CPD, Planned Commercial Zoning District;

   b. the following use or uses are not allowed under that classification: General Office Building and parking lot;

   c. There shall be no liability under this paragraph 1.b. if the use or uses are not allowed as the result of any lack of compliance with any conditions, restrictions, or requirements contained in the zoning ordinances and amendments, including but not limited to the failure to secure necessary consents or authorizations as a prerequisite to the use or uses, This paragraph 1.c. does not modify or limit the coverage provided in Covered Risk 5.

2. The Company further insures against loss or damage sustained by the Insured by reason of a final decree of a court of competent jurisdiction either

   prohibiting the use of the Land, with any existing structure, as specified in paragraph 1.b.; or

   requiring the removal or alteration of the structure, because, at Date of Policy, the zoning ordinances and amendments have been violated with respect to any of the following matters:

   a. Area, width, or depth of the Land as a building site for the structure

   b. Floor space area of the structure

   c. Setback of the structure from the property lines of the Land

   d. Height of the structure, or

   e. Number of parking spaces.

3. There shall be no liability under this endorsement based on:

   a. the invalidity of the zoning ordinances and amendments until after a final decree of a court of competent jurisdiction adjudicating the invalidity, the effect of which is to prohibit the use or uses;

   b. the refusal of any person to purchase, lease or lend money on the Title covered by this policy.

End. — ALTA 3.1-06 Zoning – Completed Structure (10/22/09)

This endorsement is issued as part of the policy. Except as it expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsements, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance. To the extent a provision of the policy or a previous endorsement is inconsistent with an express provision of this endorsement, this endorsement controls. Otherwise, this endorsement is subject to all of the terms and provisions of the policy and of any prior endorsements.

ALTA 9.2-06 Covenants, Conditions and Restrictions - Improved Land - Owner's Policy

1. The insurance provided by this endorsement is subject to the exclusions in Section 4 of this endorsement; and the Exclusions from Coverage, the Exceptions from Coverage contained in Schedule B, and the Conditions in the policy.

2. For the purposes of this endorsement only,

   a. "Covenant" means a covenant, condition, limitation or restriction in a document or instrument in effect at Date of Policy.

   b. "Improvement" means a building, structure located on the surface of the Land, road, walkway, driveway, or curb, affixed to the Land at Date of Policy and that by law constitutes real property, but excluding any crops, landscaping, lawn, shrubbery, or trees

3. The Company insures against loss or damage sustained by the Insured by reason of:

   a. A violation on the Land at Date of Policy of an enforceable Covenant, unless an exception in Schedule B of the policy identifies the violation;

   b. Enforced removal of an Improvement as a result of a violation, at Date of Policy, of a building setback line shown on a plat of subdivision recorded or filed in the Public Records, unless an exception in Schedule B of the policy identifies the violation; or

   c. A notice of a violation, recorded in the Public Records at Date of Policy, of an enforceable Covenant relating to environmental protection describing any part of the Land and referring to that Covenant, but only to the extent of the violation of the Covenant referred to in that notice, unless an exception in Schedule B of the policy identifies the notice of the violation.

4. This endorsement does not insure against loss or damage (and the Company will not pay costs, attorneys' fees, or expenses) resulting from:

   a. any Covenant contained in an instrument creating a lease;

   b. any Covenant relating to obligations of any type to perform maintenance, repair, or remediation on the Land; or

   c. except as provided in Section 3.c., any Covenant relating to environmental protection of any kind or nature, including hazardous or toxic matters, conditions, or substances.

This endorsement is issued as part of the policy. Except as it expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsements, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance. ALTA Form 25-06 Same as Survey

The Company hereby insures against loss or damage, which the Insured shall sustain by reason of the failure of the land to be the same as that delineated on the plat of survey made by David J. Kuethe, Registered Surveyor No. 7911 of Bock & Clark's National Surveyors Network, dated February 27, 2012, last revised April 11, 2013, having Job No. 1201300043.

This endorsement is issued as part of the policy. Except as it expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsements, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance. To the extent a provision of the policy or a previous endorsement is inconsistent with an express provision of this endorsement, this endorsement controls. Otherwise, this endorsement is subject to all of the terms and provisions of the policy and of any prior endorsements.

ALTA 35-06 Minerals and Other Subsurface Substances - Buildings

1. The insurance provided by this endorsement is subject to the exclusion in Section 4 of this endorsement; and the Exclusions from Coverage, the Exceptions from Coverage contained in Schedule B, and the Conditions in the policy

2. For purposes of this endorsement only, "Improvement" means a building on the Land at Date of Policy.

3. The Company insures against loss or damage sustained by the insured by reason of the enforced removal or alteration of any Improvement resulting from the future exercise of any right existing at Date of Policy to use the surface of the Land for the extraction or development of minerals or any other subsurface substances excepted from the description of the Land or excepted in Schedule B

4. This endorsement does not insure against loss or damage (and the Company will not pay costs, attorneys' fees, or expenses) resulting from:

   a. contamination, explosion, fire, vibration, fracturing, earthquake or subsidence; [or]

   b. negligence by a person or an Entity exercising a right to extract or develop minerals or other subsurface substances[; or

   c. the exercise of the rights described in NONE.

This endorsement is issued as part of the policy. Except as it expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsements, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance. Dated as of: June 13, 2013

TABLE OF CONTENTS

SCHEDULES

EXHIBITS

This LEASE AGREEMENT (as amended, supplemented or modified, this " Lease"), made as of this 13th day of June, 2013 (the "Effective Date"), between AGNL CLINIC, L.P., a Delaware limited partnership (together with its successors and assigns "Landlord"), with an address at c/o Angelo, Gordon & Co., L.P., 245 Park Avenue, 26th Floor New York, New York 10167-0094, and MOLINA HEALTHCARE, INC., a Delaware corporation (together with its successors and permitted assigns, " Tenant", collectively with Landlord the "Parties" and each individually a "Party") with an address at 300 Oceangate Blvd., Suite 950, Long Beach, CA 90802.

In consideration of the rents and provisions herein stipulated to be paid and performed, Landlord and Tenant hereby covenant and agree as follows:

1. Demise of Premises. Landlord hereby demises and lets to Tenant, and Tenant hereby takes and leases from Landlord, for the term and upon the provisions hereinafter specified, the following described property (collectively and individually, as the context may require, the "Leased Premises"):

(a) The "Columbus Leased Premises," which means:

(i) the real property located in Columbus, Ohio particularly described in Exhibit A-1 (the "Columbus Real Property");

(ii) the buildings and all other structures and improvements situated on, or affixed or appurtenant to the Columbus Real Property, including any Parking Facilities owned by Landlord in each case except to the extent owned by subtenants or licensees at the Columbus Real Property (collectively, the "Columbus Improvements");

(iii) all tenements, hereditaments, easements, rights-of-way, rights, privileges appurtenant to the Columbus Real Property, including (A) easements over other lands granted by any easement agreement benefiting the Columbus Real Property, including any Parking Easement, and (B) Landlord's right, title and interest in and to any streets, ways, alleys, vaults, gores or strips of land adjoining the Columbus Real Property (collectively, the "Columbus Appurtenances"); and

(iv) all Columbus Property Other Assets.

(b) The "Long Beach Leased Premises," which means:

(i) the real property located in Long Beach, CA particularly described in Exhibit A-2 (the " Long Beach Real Property");

(ii) the buildings and all other structures and improvements situated on, or affixed or appurtenant to the Long Beach Real Property, including any Parking Facilities owned by Landlord in each case except to the extent owned by subtenants or licensees at the Long Beach Real Property (collectively, the "Long Beach Improvements");

(iii) all tenements, hereditaments, easements, rights-of-way, rights, privileges appurtenant to the Long Beach Real Property, including (A) easements over other lands granted by any easement agreement benefiting the Long Beach Real Property, including any Parking Easement,

and (B) Landlord's right, title and interest in and to any streets, ways, alleys, vaults, gores or strips of land adjoining the Long Beach Real Property (collectively, the "Long Beach Appurtenances"); and

(iv) all Long Beach Property Other Assets.

2. Certain Definitions.

"AAA" is defined in Exhibit D-1.

"Acquisition Cost" means, with respect to any Leased Premises, the Acquisition Cost specified in Exhibit E for such Leased Premises.

"Action" is defined in Paragraph 35(b)(i).

"Additional Rent" is defined in Paragraph 7(a).

"Affiliate" means in relation to any Person, any other Person directly or indirectly controlling, controlled by, or under common control with, the first Person (and, for purposes of this definition, "controlling", "controlled by" and "under common control with" means the possession directly or indirectly of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise).

"Alterations" means all alterations, changes, additions, improvements, reconstructions, restorations, renewals, repairs, replacements or removals of, and all substitutions or replacements for, any of the Improvements, Fixtures or Equipment, both interior and exterior, structural and non-structural, capital and non-capital, and ordinary and extraordinary.

"Appurtenances" means the Columbus Appurtenances and the Long Beach Appurtenances.

"Asset Transfer" is defined in Paragraph 21(c).

"Assignment" means any assignment of rents and leases by Landlord that encumbers any of the Leased Premises, as the same may be amended, supplemented or modified from time to time.

"Bankruptcy Code" means the United States Bankruptcy Reform Act of 1998, as amended, or any similar law or statute of the United States or any state thereof.

"Basic Rent" is defined in Paragraph 6(a).

"Basic Rent Adjustment Date" is defined in Exhibit D.

"Basic Rent Payment Date" is defined in Exhibit D.

"Business Day" means any day other than a Saturday, Sunday or a day on which commercial banks in New York, New York are required or authorized to be closed.

"Casualty" means any loss of or damage to or destruction of all or any portion of any of the Leased Premises by fire or other casualty event.

"Code" is defined in Paragraph 32.

"Columbus Appraisers" is defined in Exhibit D-1.

"Columbus Appurtenances" is defined in Paragraph 1(a)(iii).

"Columbus FMBR" is defined in Exhibit D-1.

"Columbus Improvements" is defined in Paragraph 1(a)(ii).

"Columbus Leased Premises" is defined in Paragraph 1(a).

"Columbus Property Equipment" is defined in Exhibit B-1.

"Columbus Property Excluded Items" is defined in Exhibit B-1.

"Columbus Property Other Assets" is defined in Exhibit B-1.

"Columbus Real Property" is defined in Paragraph 1(a)(i).

"Commencement Date" is defined in Paragraph 5(a).

"Condemnation" means (a) any taking of all or a portion of any of the Leased Premises (i) in or by condemnation or other eminent domain proceedings pursuant to any Law, (ii) by reason of any agreement with any condemning authority in settlement of or under threat of any such condemnation or other eminent domain proceeding, or (iii) Requisition. A Condemnation shall be considered to have taken place as of the later of the date actual physical possession is taken by the condemning authority, or the date on which the right to compensation and damages accrues under the applicable Law.

"Condemnation Notice" means notice or knowledge of the institution of or any threatened institution of any proceeding for Condemnation.

"Control" is defined in Paragraph 21(d).

"Control Person" is defined in Paragraph 21(d).

"Costs" of a Person directly related to a specified transaction or occurrence means all reasonable third-party out-of-pocket costs and expenses incurred by such Person or associated with such transaction, including without limitation, reasonable attorneys' fees and expenses, reasonable consultants' fees and expenses, reasonable travel costs, court costs, reasonable real estate brokerage fees, title insurance premiums and expenses, recording taxes and fees, and transfer taxes, but excluding (in the case of Costs of Landlord) (i) all costs, expenses, and fees associated with the day-to-day management of the Leased Premises and the Lease, and (ii) all costs, expenses and fees associated with any Note or Loan including, without limitation, any Prepayment Premium (provided,

however, that the foregoing shall not limit any express obligation in this Lease of Tenant to pay a Prepayment Premium).

"CPI" means the Consumer Price Index for All Urban Consumers (CPI-U) for the U.S. City Average for All Items (1982-84=100), published by the Bureau of Labor Statistics of the U.S. Department of Labor. If the CPI is not published for any month during the Term, Landlord, in its reasonable discretion, shall substitute a comparable index published by the Bureau of Labor Statistics of the U.S. Department of Labor. If such an index is not published by the Bureau of Labor Statistics, Landlord, in its reasonable discretion, shall select a comparable index published by a nationally recognized responsible financial periodical.

"Credit Entity" means any Person that has a publicly traded debt rating of "Baa" or better from Moody's or a rating of "BBB" or better from S&P (or, if such Person does not then have publicly traded rated debt, a determination by either of such Rating Agencies that such Person's unsecured senior debt would be so rated by such Rating Agency and will not be on "Negative Credit Watch"), and in the event both such Rating Agencies cease to furnish such ratings, then a comparable rating by any rating agency acceptable to Landlord.

"Default Rate" is defined in Paragraph 7(a)(iii).

"Diesel Tank" is defined in Paragraph 10(l).

"Easement Agreement" means any condition, covenant, restriction, easement, declaration, right of way, license or other agreement listed as a Permitted Encumbrance or as may hereafter affect any of the Leased Premises.

"EBITDA" means, for any Person, Net Income *plus*, to the extent deducted from revenues in determining Net Income, (i) Interest Expense, (ii) expense for income taxes paid or accrued, (iii) depreciation, (iv) amortization, (v) non-cash expenses, charges, or losses and (vi) extraordinary or non-recurring charges or losses realized other than in the ordinary course of business *minus*, to the extent included in Net Income, (1) income tax credits and refunds (to the extent not netted from tax expense), (2) any cash payments made during such period in respect of items described in clause (v) above subsequent to the fiscal quarter in which the relevant non-cash expenses or losses were incurred, (3) extraordinary or non-recurring income or gains realized other than in the ordinary course of business and (4) non-cash income or gains, all calculated for such Person in accordance with GAAP on a consolidated basis.

"EBITDAR" means, for any Person, for the most recent twelve (12) month period where applicable financial information is reasonably available, EBITDA plus, to the extent deducted from revenues in determining Net Income, Rental Expense, calculated in accordance with GAAP on a consolidated basis for such period.

"Effective Date" is defined in the introductory Paragraph.

"Environmental Adverse Condition" means the presence or likely presence of any Hazardous Substances on a property under conditions that indicate an existing release, a past release, or material threat of a release of any Hazardous Substances into structures at any of the Leased Premises or

into or on the ground, ground water, or surface water of the Real Property, or the presence or likely presence of any environmental condition that could adversely affect in a material manner business operations at any of the Leased Premises.

"Environmental Law" means (a) whenever enacted or promulgated, any applicable federal, state, or local law, statute, ordinance, rule, regulation, license, permit, authorization, approval, consent, court order, judgment, decree, injunction, code, requirement or agreement with any governmental entity, (i) relating to pollution (or the cleanup thereof), or the protection of air, water vapor, surface water, groundwater, drinking water supply, land (including land surface or subsurface), plant, aquatic and animal life from injury caused by a Hazardous Substance or (ii) concerning exposure to, or the use, containment, storage, recycling, reclamation, reuse, treatment, generation, discharge, transportation, processing, handling, labeling, production, disposal or remediation of any Hazardous Substance, Hazardous Condition or Hazardous Activity, as now or hereafter in effect, and (b) any common law or equitable doctrine (including, without limitation, injunctive relief and tort doctrines such as negligence, nuisance, trespass and strict liability) that may impose liability or obligations for injuries or damages due to or threatened as a result of the presence of, exposure to, or inadvertent ingestion of, any Hazardous Substance. The term Environmental Law includes, without limitation, the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), the Clean Air Act, the Clean Water Act, the Solid Waste Disposal Act, the Toxic Substance Control Act, the Federal Insecticide, Fungicide and Rodenticide Act, the Occupational Safety and Health Act, the National Environmental Policy Act and the Hazardous Materials Transportation Act, each as amended and hereafter in effect and any similar state or local Law.

"Environmental Violation" means (a) any direct or indirect discharge, disposal, spillage, emission, escape, pumping, pouring, injection, leaching, release, seepage, filtration presence or transporting of any Hazardous Substance at, upon, under, onto or within any of the Leased Premises, or from any of the Leased Premises to the environment, in violation of any Environmental Law or in excess of any reportable quantity established under any Environmental Law or which could result in any liability to any federal, state or local government or any other Person for the costs of any removal or remedial action or natural resources damage or for bodily injury or property damage, (b) any deposit, storage, dumping, placement or use of any Hazardous Substance at, upon, under or within any of the Leased Premises or which extends to any adjoining property in violation of any Environmental Law or in excess of any reportable quantity established under any Environmental Law or which could result in any liability to any federal, state or local government or to any other Person for the costs of any removal or remedial action or natural resources damage or for bodily injury or property damage, (c) the abandonment or discarding at the Leased Premises of any drums, barrels, containers or other receptacles containing any Hazardous Substances in violation of any Environmental Laws, (d) any activity, occurrence or condition which could reasonably be expected to result in any liability, cost or expense under any Environmental Law to Landlord, Tenant or Lender or any other owner or occupier of any of the Leased Premises, or which could reasonably be expected to result in a creation of a lien on any of the Leased Premises under any Environmental Law or (e) any material violation of or noncompliance with any Environmental Law at the Leased Premises.

"Equipment" means, collectively, the Columbus Property Equipment and the Long Beach Property Equipment.

"Escrow Charges" is defined in Paragraph 9(g).

"Escrow Payment" is defined in Paragraph 9(g).

"Event of Default" is defined in Paragraph 22(a).

"Exchange Act" is defined in Paragraph 36(n).

"Excluded Claims" is defined in Paragraph 17(a).

"Exempt Person" means (i) any of the following: any Affiliate of Tenant; any Credit Entity; and any Qualified Transferee, (ii) any of the following, and any successor to any of the following: The Molina Foundation; Joseph M. Molina, M.D., Professional Association - Florida, a Florida professional medical corporation; Joseph M. Molina, M.D., Professional Corporation – Southern California; and Joseph M. Molina, M.D., Professional Corporation – Northern California, and (iii) any Subsidiary of any Credit Entity or any Qualified Transferee that enters into a Sublease, provided that such Credit Entity or Qualified Transferee provides a Guaranty with regard to such Sublease.

"Exempt Sublease" means any Existing Sublease, and any extension or non-material modification thereof.

"Existing Insurance Policies" is defined in Paragraph 16(a).

"Existing Sublease" means any of the existing Subleases listed in Exhibit K attached hereto.

"Expiration Date" is defined in Paragraph 5(a).

"Fair Market Basic Rent" is defined in Exhibit D-1.

"First Full Basic Rent Payment Date" is defined in Exhibit D.

"Fitch" means Fitch Ratings Ltd.

"Force Majeure" is defined in Paragraph 36(p).

"GAAP" is defined in Paragraph 28(a).

"Governmental Authority" means any federal, state or local government, authority, agency or regulatory body.

"Governmental Entity" means the United States of America, and any organization, political subdivision or territory thereof, including without limitation any state, county, locality or municipality therein, and any court, commission, administrative agency, department, regulatory body, instrumentality, authority or other entity (in each case whether federal, state, county, local or municipal) exercising executive, legislative, judicial, regulatory or administrative functions.

"Guarantor" means any person who enters into a Guaranty.

"Guaranty" means any guaranty entered into between Landlord and any assignee of Tenant under this Lease, together with any Replacement Guaranty, if any, in each case, as amended, restated, modified and supplemented from time to time.

"Hazardous Activity" means any activity, process, procedure or undertaking which directly or indirectly: (a) procures, generates or creates any Hazardous Substance; (b) causes or results in (or threatens to cause or result in) the release, seepage, spill, leak, flow, discharge presence or emission of any Hazardous Substance into the environment (including the air, soil, ground water, watercourses or water systems); (c) involves the containment or storage of any Hazardous Substance; or (d) would cause any of the Leased Premises or any portion thereof to become a hazardous waste treatment, recycling, reclamation, processing, storage or disposal facility within the meaning of any Environmental Law.

"Hazardous Condition" means any condition which would support any material claim or liability under any Environmental Law, including the presence of underground storage tanks.

"Hazardous Substance" means (a) any substance, material, product, petroleum, petroleum product, derivative, compound or mixture, mineral (including asbestos), chemical, gas, solid, medical waste, or other pollutant, in each case whether naturally occurring, man-made or the by-product of any process, that is toxic, harmful or hazardous or acutely hazardous to the environment or public health or safety or (b) any substance supporting a claim under any Environmental Law, whether or not defined as hazardous as such under any Environmental Law. Hazardous Substances include, without limitation, any toxic or hazardous waste, pollutant, contaminant, industrial waste, petroleum or petroleum-derived substances or waste, radon, radioactive materials, asbestos, asbestos containing materials, urea formaldehyde foam insulation, lead, mold and other microbial contamination, and polychlorinated biphenyls.

"Immediate Repairs" is defined in Paragraph 12(a).

"Impositions" is defined in Paragraph 9(a).

"Improvements" means the Columbus Improvements and the Long Beach Improvements.

"Indemnitee" means (a) Landlord, (b) Lender, (c) any director, member, officer, general partner, limited partner, shareholder, employee or agent of Landlord or Lender (or any legal representative, heir, estate, successor or assign of any thereof), (d) any predecessor or successor partnership, corporation, limited liability company (or any other entity) of Landlord or Lender, or any of its general partners, members or shareholders, or (e) any affiliate of Landlord or Lender.

"Information" is defined in Paragraph 36(n).

"Initial Term" is defined in Paragraph 5(a).

"Insurance Requirements" means the requirements of all insurance policies required to be maintained in accordance with this Lease.

"Interest Expense" means, for any Person, with reference to any period, the interest expense (including without limitation interest expense under capital lease obligations that is treated as interest in accordance with GAAP) of such Person calculated on a consolidated basis for such period with respect to all outstanding indebtedness of such Person allocable to such period in accordance with GAAP.

"Landlord" is defined in the introductory Paragraph.

"Late Charge" is defined in Paragraph 7(a)(ii).

"Law" means any constitution, statute, rule of law, code, ordinance, order, judgment, decree, injunction, rule, regulation, policy, requirement or administrative or judicial determination, even if unforeseen or extraordinary, of every duly constituted governmental authority, court or agency, now or hereafter enacted or in effect.

"Lease" is defined in the introductory Paragraph.

"Lease Adjusted Funded Debt" means, for any Person (on a consolidated basis) at the time of any determination, without duplication, all obligations, contingent or otherwise, of such Person that, in accordance with GAAP, should be classified upon the balance sheet of such Person as indebtedness, but in any event including the following: (a) all obligations for borrowed money; (b) all obligations arising from installment purchases of property or representing the deferred purchase price of property or services in respect of which such Person is liable, contingently or otherwise, as obligor or otherwise (other than trade payables and other current liabilities incurred in the ordinary course of business); (c) all obligations evidenced by notes, bonds, debentures, acceptances or instruments, or arising out of letters of credit (other than trade letters of credit) or bankers' acceptances issued for such Person's account; (d) all obligations, whether or not assumed, secured by any lien or payable out of the proceeds or production from any property or assets now or hereafter owned or acquired by such Person (but only up to the value of such property or assets); (e) the capitalized portion of lease obligations under any capital lease; (f) all obligations for which such Person is obligated pursuant to any derivative agreements or arrangements; (g) all obligations of such Person upon which interest charges are customarily paid or accrued; (h) all obligations of the types listed in clauses (a) through (g) of this paragraph, for which such Person is obligated pursuant to a Guaranty; and (i) the Basic Rent payable under this Lease for the immediately following twelve (12) month period capitalized at a rate of a multiple of eight (8).

"Leased Premises" is as defined in Paragraph 1.

"Leasehold Mortgage" is defined in Paragraph 34.

"Leasehold Mortgagee" is defined in Paragraph 34.

"Legal Requirements" means the requirements of all present and future Laws applicable during the Term, including all applicable permit and licensing requirements and all covenants, restrictions and conditions, including all Easement Agreements, now or hereafter of record which may be applicable to Tenant or to any of the Leased Premises, or to the use, manner of use, occupancy, possession, operation, maintenance, alteration, repair or restoration of any of the Leased Premises.

"Lender" means any Person which may, on or after the date hereof, make a Loan to Landlord or be the holder of a Note, together with its successors, transferees and assigns.

"Letter of Credit" means an irrevocable, transferable standby letter of credit that provides for automatic renewal sixty (60) days prior to the expiration thereof, in form and substance satisfactory to Landlord, issued by a bank or financial institution acceptable to Landlord (a) that is chartered under the laws of the United States, any state thereof or the District of Columbia, and which is insured by the Federal Deposit Insurance Corporation, (b) whose long-term debt ratings on bank level senior debt obligations are rated at least the second highest category by at least two of Fitch, Moody's (and S&P or any other Rating Agency (which shall mean AA from Fitch, Aa from Moody's and AA from S&P) and (c) that has a short-term deposit rating at the bank level in the highest category from at least two Rating Agencies (which shall mean F1 from Fitch, P-1 from Moody's and A-1 from S&P).

"Loan" means any loan made by one or more Lenders to Landlord, which loan is secured by a Mortgage and an Assignment and evidenced by a Note.

"Long Beach Appraisers" is defined in Exhibit D-1.

"Long Beach Appurtenances" is defined in Paragraph 1(b)(iii).

"Long Beach Equipment" is defined in Exhibit B-2.

"Long Beach FMBR" is defined in Exhibit D-1.

"Long Beach Improvements" is defined in Paragraph 1(b)(ii).

"Long Beach Leased Premises" is defined in Paragraph 1(b).

"Long Beach Property Excluded Items" is defined in Exhibit B-2.

"Long Beach Property Other Assets" is defined in Exhibit B-2.

"Long Beach Real Property" is defined in Paragraph 1(b)(i).

"Losses" is defined in Paragraph 15(a).

"MAI" means Member, Appraisal Institute.

"Moody's" means Moody's Investors Service, Inc.

"Moody's Credit Rating" means the credit rating assigned by Moody's Investors Service to the highest rated publicly issued debt securities of the assignee.

"Mortgage" means any mortgage or deed of trust entered into by Landlord that encumbers any of the Leased Premises, as the same may be amended, supplemented or modified from time to time.

"Net Award" means, with respect to any of the Leased Premises, (a) the entire award payable by reason of a Condemnation, less any sums paid pursuant to a separate claim by Tenant as described in Paragraph 17(b); or (b) the entire proceeds of any insurance policy by reason of a Casualty, in each case, less any expenses incurred by Landlord in collecting such award or proceeds.

"Net Income" means, for any Person, with reference to any period, the net income (or loss) of such Person calculated in accordance with GAAP on a consolidated basis (without duplication) for such period.

"Note" means any promissory note evidencing Landlord's obligation to repay a Loan, as the same may be amended, supplemented or modified.

"Parking Easement" means, with respect to either of the Leased Premises, a permanent parking easement for the benefit of such Leased Premises.

"Parking Facilities" means, with respect to either of the Leased Premises, any and all on-site, satellite or off-site parking facilities to be utilized by Tenant or its employees, agents, invitees or contractors in connection with the use and operation of such Leased Premises.

"Partial Casualty" means any Casualty which does not constitute a Termination Event.

"Partial Condemnation" means any Condemnation which does not constitute a Termination Event.

"Party" and "Parties" are defined in the first paragraph of this Lease.

"Permits" is defined in Paragraph 3(d).

"Permitted Asset Transfer" is defined in Paragraph 21(c).

"Permitted Change of Control" is defined in Paragraph 21(d).

"Permitted Encumbrances" means those covenants, restrictions, reservations, liens, conditions and easements and other encumbrances, other than any Mortgage or Assignment, listed on Exhibit C.

"Permitted Use" is defined in Paragraph 4(a).

"Permitted Violations" is defined in Paragraph 14.

"Person" means an individual, corporation, partnership, joint venture, association, joint-stock company, trust, estate, limited liability company, non-incorporated organization or association, or any other entity, any government authority or any agency or political subdivision thereof.

"Portfolio Rent Adjustment Factor" is defined in Exhibit D-1.

"Preapproved Assignment" is defined in Paragraph 21(b).

"Preapproved Sublease" is defined in Paragraph 21(e).

"Prepayment Premium" means any payment required to be made by Landlord to a Lender under a Note or other document evidencing or securing a Loan (other than payments of principal and/or interest) solely by reason of any prepayment or defeasance by Landlord of any principal due under such Loan, and which may, without limitation, take the form of (a) a "make whole" or yield maintenance clause requiring a prepayment premium or (b) a defeasance payment (such defeasance payment to be an amount equal to the positive difference between (i) the total amount required to defease a Loan and (ii) the outstanding principal balance of the Loan as of the date of such defeasance plus Costs of Landlord and Lender).

"Present Value" of any amount means such amount discounted by a rate per annum which is the lower of (a) the Prime Rate at the time such present value is determined or (b) six percent (6%) per annum .

"Prime Rate" means the interest rate per annum as published, from time to time, in The Wall Street Journal as the "Prime Rate" in its column entitled "Money Rate". The Prime Rate may not be the lowest rate of interest charged by any "large U.S. money center commercial banks" and Landlord makes no representations or warranties to that effect. In the event The Wall Street Journal ceases publication or ceases to publish the "Prime Rate" as described above, the Prime Rate shall be the average per annum discount rate (the "Discount Rate") on ninety-one (91) day bills ("Treasury Bills") issued from time to time by the United States Treasury at its most recent auction, plus three hundred (300) basis points. If no such 91-day Treasury Bills are then being issued, the Discount Rate shall be the discount rate on Treasury Bills then being issued for the period of time closest to ninety-one (91) days.

"Property Action" is defined in Paragraph 10(b).

"Property Condition Report" is defined in Paragraph 12(c).

"Purchase and Sale Agreement" means the Purchase and Sale Agreement dated as of June 12, 2013 between Tenant and Molina Center, LLC, as Seller, and Landlord, as Buyer.

"Qualified Institutional Purchaser" means a bank, savings and loan association, insurance company, investment company, employee benefit plan, or investment advisor registered under the Investment Advisors Act, that has at least Five Billion Dollars ($5,000,000,000) in discretionary assets under management, or a private equity, venture capital or similar buyout fund with at least Five Billion Dollars ($5,000,000,000) of equity capital under management.

"Qualified Transferee" means (a) a Qualified Institutional Purchaser or Strategic Buyer; provided that, on a pro forma basis, after giving effect to the applicable transaction, Tenant together with such Qualified Institutional Purchaser or Strategic Buyer, on a consolidated basis, have (i) a tangible net worth of not less than Two Billion Five Hundred Million Dollars ($2,500,000,000), (ii) a ratio of Lease Adjusted Funded Debt to EBITDAR of not more than 2.5 to 1.0, and (iii) EBITDAR of not less than Four Hundred Fifty Million Dollars ($450,000,000.00); (b) in the case of a Control Person that acquires Control of Tenant by purchasing equity interests in Tenant through the "over-

the-counter market" or through any recognized exchange, a Control Person who delivers to Landlord, upon Landlord's request, after notice from Tenant of such Change of Control, a Letter of Credit equal to twelve (12) months of Basic Rent; or (c) any other Person who delivers to Landlord (or, the case of a sublease, to Tenant) a Letter of Credit equal to eighteen (18) months of Basic Rent.

"Rating Agencies" means, collectively, Fitch, Moody's, and S&P, and any successor of any of them.

"Real Property" means the Columbus Real Property and the Long Beach Real Property.

"Record" is defined in Paragraph 11(b).

"Remaining Obligations" is defined in Paragraph 18(e).

"Remaining Sum" is defined in Paragraph 19(c).

"Renewal Date" is defined in Paragraph 5(a).

"Renewal Term" is defined in Paragraph 5(a).

"Rent" means, collectively, Basic Rent and Additional Rent.

"Rental Expense" means, for any Person, with reference to any period, the aggregate fixed amounts payable by such Person under any operating leases, calculated on a consolidated basis for such period in accordance with GAAP.

"Replacement Guarantor" means the Guarantor under any Replacement Guaranty.

"Replacement Guaranty" is defined in Paragraph 21(c).

"Requesting Party" is defined in Paragraph 25.

"Required Sublease Provisions" is defined in Paragraph 21(e).

"Requisition" means a temporary requisition or confiscation of the use or occupancy of all or a portion of any of the Leased Premises by any governmental authority, civil or military, whether pursuant to an agreement with such governmental authority in settlement of or under threat of any such requisition or confiscation.

"Responding Party" is defined in Paragraph 25.

"Restoration Fund" is defined in Paragraph 19(a).

"Review Criteria" means all of the following with respect to any proposed subtenant or assignee of Tenant's interest in the Lease: (i) creditworthiness, (ii) ownership structure, (iii) management experience, and (iv) operating history, if applicable.

"S&P" means Standard & Poor's Rating Service.

"S&P Credit Rating" means the credit rating assigned by Standard & Poor's Rating Group to the highest rated publicly issued debt securities of the assignee.

"Secured Lender" is defined in Paragraph 31(b).

"Secured Property" is defined in Paragraph 31(b).

"Securities Act" is defined in Paragraph 36(n).

"Security Deposit" is defined in Paragraph 33(a).

"Seller" means Molina Healthcare, Inc., a Delaware corporation, and Molina Center, LLC, a Delaware limited liability company, individually or collectively, as the case may be.

"Senior Credit Facility" means, with respect to any Person, any credit facility with an outstanding and drawn principal balance not less than $500,000,000, where such Person is the borrower, and where such facility is secured by all or substantially all of the assets of such Person.

"Set-Off" is defined in Paragraph 8(a).

"Site Assessment" is defined in Paragraph 10(d).

"Site Reviewers" is defined in Paragraph 10(d).

"SNDA" is defined in Paragraph 31(a).

"Specially Designated National or Blocked Person" is defined in Paragraph 36(m).

"Sponsor" is defined in Paragraph 6(c).

"State" means the State of California or the State of Ohio, as the case may be.

"Strategic Buyer" means a domestic exchange-traded public company doing business in the healthcare industry and/or the insurance industry.

"Sublease" means any sublease of any of the Leased Premises and any modifications, amendments, extensions, supplements, restatements or replacements thereof.

"Sublease SNDA" is defined in Paragraph 21(f).

"Subleasing Threshold" is defined in Paragraph 21(e).

"Subsidiary(ies)" means, as to any Person, any corporation, partnership, limited liability company, association, or other business entity of which such Person directly or indirectly owns more than 50% of the capital stock or other equity interests.

"Tenant" is defined in the introductory Paragraph.

"Term" is defined in Paragraph 5(a).

"Termination Amount" means, with respect to any of the Leased Premises, the sum of (i) the Net Award (if received by Tenant), (ii) any Costs incurred by Landlord in collecting such Net Award (to the extent such Costs have not already been reimbursed), and (iii) any insurance deductible payable in connection such Net Award related to a Casualty.

"Termination Date" is defined in Paragraph 18(d).

"Termination Event" means a Casualty or Condemnation regarding which a Termination Notice may be delivered pursuant to Paragraph 18.

"Termination Notice" is defined in Paragraph 18(a).

"Third Party Purchaser" is defined in Paragraph 21(k).

"UCC" means the Uniform Commercial Code as adopted by the State of New York.

"Warranties" is defined in Paragraph 3(d).

"Water Tank" is defined in Paragraph 10(l).

"Work" is defined in Paragraph 13(b).

3. Title and Condition .

(a) Each of the Leased Premises is demised and let subject to (i) any Mortgage and Assignment in effect from time to time (pursuant to and subject to Paragraph 31), (ii) the rights of any Persons in possession of such Leased Premises as of the date hereof, (iii) the state of title of such Leased Premises as of the date hereof, including any Permitted Encumbrances, (iv) any circumstances or conditions which an accurate survey or physical inspection of such Leased Premises might show, (v) all Legal Requirements, including any existing violation thereof, and (vi) the condition of such Leased Premises as of the date hereof (without representation or warranty by Landlord regarding such condition).

(b) Tenant acknowledges that each of the Leased Premises is in good condition and repair as of the date of executing this Lease and that Tenant has owned the Columbus Leased Premises since December 20, 2012 and the Long Beach Leased Premises since December 8, 2011. SUBJECT TO THE TERMS OF THIS LEASE, LANDLORD LEASES AND WILL LEASE AND TENANT TAKES AND WILL TAKE EACH OF THE LEASED PREMISES IN ITS AS IS CONDITION, WHERE IS AND WITH ALL FAULTS. TENANT ACKNOWLEDGES THAT LANDLORD (WHETHER ACTING AS LANDLORD HEREUNDER OR IN ANY OTHER CAPACITY) HAS NOT MADE AND WILL NOT MAKE, NOR SHALL LANDLORD BE DEEMED TO HAVE MADE, ANY WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, WITH RESPECT TO ANY OF THE LEASED PREMISES, INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OR REPRESENTATION AS TO (i) THE FITNESS, DESIGN OR CONDITION OF SUCH LEASED PREMISES FOR ANY PARTICULAR USE OR PURPOSE,

(ii) THE QUALITY OF THE MATERIAL OR WORKMANSHIP THEREIN, (iii) THE EXISTENCE OF ANY DEFECT, INCLUDING ANY LATENT OR PATENT DEFECT, (iv) LANDLORD'S TITLE THERETO, (v) VALUE, (vi) COMPLIANCE WITH SPECIFICATIONS, (vii) LOCATION, (viii) USE, (ix) CONDITION, (x) MERCHANTABILITY, (xi) QUALITY, (xii) DESCRIPTION, (xiii) DURABILITY (xiv) OPERATION, (xv) THE EXISTENCE OR PRESENCE OF ANY HAZARDOUS SUBSTANCE, OR (xvi) COMPLIANCE OF THE LEASED PREMISES WITH ANY LEGAL REQUIREMENT; AND, WITHOUT LIMITING THE EXPRESS TERMS OF THIS LEASE, ALL RISKS RELATED TO ANY OF THE FOREGOING ARE TO BE BORNE BY TENANT. TENANT ACKNOWLEDGES THAT THE LEASED PREMISES ARE OF ITS SELECTION AND TO ITS SPECIFICATIONS AND THAT THE LEASED PREMISES HAVE BEEN INSPECTED BY TENANT AND ARE SATISFACTORY TO IT.WITHOUT LIMITING THE EXPRESS TERMS OF THIS LEASE, IN THE EVENT OF ANY DEFECT OR DEFICIENCY IN ANY OF THE LEASED PREMISES OF ANY NATURE, LANDLORD SHALL NOT HAVE ANY RESPONSIBILITY OR LIABILITY WITH RESPECT THERETO AND LANDLORD SHALL NOT BE RESPONSIBLE FOR ANY SPECIAL, PUNITIVE, INCIDENTAL OR CONSEQUENTIAL DAMAGES (INCLUDING STRICT LIABILITY IN TORT). THE PROVISIONS OF THIS PARAGRAPH 3(b) HAVE BEEN NEGOTIATED, AND ARE INTENDED TO BE A COMPLETE EXCLUSION AND NEGATION OF ANY WARRANTIES BY LANDLORD, EXPRESS, IMPLIED OR CREATED BY APPLICABLE LAW, WITH RESPECT TO THE CONDITION OF THE LEASED PREMISES.

With respect to the claims released in this Paragraph 3(b), Tenant expressly waives any rights or benefits available to it under the provisions of Section 1542 of the California Civil Code, which provides as follows:

> "A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

Tenant acknowledges that its attorney at law has explained to it the meaning and effect of this statute. Tenant understands fully the statutory language of California Civil Code Section 1542, and, with this understanding, Tenant nevertheless elects to, and does, assume all risk for claims released by it under this Agreement whether arising before or after this Agreement and whether now known or unknown, and Tenant specifically waives any rights it may have under California Civil Code Section 1542 and any successive sections or statutes of a similar nature. Tenant fully understands that if the facts with respect to which this Agreement is executed are

later found to be other than or different from the facts now believed by it to be true, it expressly accepts and assumes the risk of that possible difference in facts and agrees that this Agreement shall be and remain effective notwithstanding that difference in facts.

The provisions of this Paragraph 3(b) shall survive the termination of this Agreement.

_____ _____

Tenant's Initials Landlord's Initials

(c) Tenant acknowledges that Tenant has examined the title to each of the Leased Premises prior to the execution and delivery of this Lease and has found the same to be satisfactory for all of the purposes permitted under this Lease. Tenant represents and warrants to Landlord that, with respect to each of the Leased Premises, except as disclosed in any document recorded against title to either of the Leased Premises, or otherwise disclosed in writing to Landlord, as of the Effective Date (i) Tenant and any subtenants at the Leased Premises have only the leasehold right of possession and use of such Leased Premises, as provided herein, and (ii) neither Tenant nor any agent, officer, employee, principal or affiliate of Tenant has granted or knowingly suffered to exist any unrecorded deeds, mortgages, land contracts, leases, subleases, licenses, options to purchase, agreements or other instruments adversely affecting title to such Leased Premises or any lien, encumbrance, transfer of interest, constructive trust, or other equity in such Leased Premises, and (iii) Tenant has received no notice of any Casualty, Condemnation or pending or threatened special assessments affecting such Leased Premises. The foregoing representations and warranties and the representations and warranties contained in the Purchase and Sale Agreement (subject to the terms thereof) shall survive the date on which this Lease is fully executed.

(d) Landlord hereby assigns to Tenant, without recourse or warranty whatsoever, in conjunction with Landlord, the non-exclusive right to enforce all assignable warranties, guaranties, indemnities, contract rights, causes of action and similar rights (collectively "Warranties") that Landlord may have against any manufacturer, seller, architect, engineer, contractor, builder or other counterparty in respect of any of the Leased Premises, including without limitation in connection with any building plans, specifications or drawings with respect to the Improvements. Such assignment shall remain in effect and be irrevocable until the expiration or earlier termination of this Lease (unless Tenant or its affiliate or designee acquires such Leased Premises, in which instance such assignment shall become permanent and irrevocable with respect to such Leased Premises), whereupon such assignment shall cease and all of the Warranties shall automatically revert to Landlord. In confirmation of such reversion Tenant shall execute and deliver promptly any certificate or other document reasonably required or requested by Landlord. Landlord shall also retain the right to enforce any Warranties upon the occurrence and during the continuance of an Event of Default. Tenant shall use commercially reasonable efforts to enforce the Warranties in accordance with their respective terms, Landlord shall cooperate with Tenant to the extent necessary to permit Tenant to enforce such Warranties prior to the expiration or earlier termination of this Lease. Tenant shall cooperate with Landlord to the extent necessary to permit Landlord to enforce such Warranties after the expiration or earlier termination of this Lease (to the extent not transferred to Tenant). Landlord shall also reasonably cooperate with Tenant in connection with any permits, licenses, and approvals held by Landlord, if any, that are mandated or necessary to operate the

Properties (collectively, the "Permits"), including exercising rights thereunder and pursuing modifications thereof that Tenant determines would be beneficial to its operations at any of the Leased Premises, and pursuing any additional Permit that Tenant determines would be beneficial to its operations at any of the Leased Premises. The foregoing provisions shall survive the expiration or earlier termination of this Lease.

(e) LANDLORD AND TENANT AGREE THAT IT IS THEIR MUTUAL INTENT TO CREATE, AND THAT THIS LEASE CONSTITUTES, A MASTER LEASE WITH RESPECT TO EACH AND EVERY PARCEL OF REAL PROPERTY AND THE IMPROVEMENTS INCLUDED IN ANY AND ALL OF THE LEASED PREMISES (WHEREVER LOCATED), THAT THIS LEASE IS NOT INTENDED AND SHALL NOT BE CONSTRUED TO BE SEPARATE LEASES AND THAT ALL THE TERMS AND CONDITIONS HEREOF SHALL GOVERN THE RIGHTS AND OBLIGATIONS OF LANDLORD AND TENANT WITH RESPECT THERETO.

(f) TENANT, ON BEHALF OF ITSELF AND ANY TRUSTEE OR LEGAL REPRESENTATIVE (UNDER THE FEDERAL BANKRUPTCY CODE OR ANY SIMILAR STATE INSOLVENCY PROCEEDING) EXPRESSLY ACKNOWLEDGES AND AGREES THAT, NOTWITHSTANDING THE PROVISIONS OF PARAGRAPH 18 HEREOF OR ANY OTHER PROVISION IN THIS LEASE TO THE CONTRARY, IT IS THE EXPRESS INTENT OF LANDLORD AND TENANT TO CREATE, AND THAT THIS LEASE CONSTITUTES, A SINGLE LEASE WITH RESPECT TO EACH AND EVERY PARCEL OF LAND, THE IMPROVEMENTS AND OTHER PROPERTY INCLUDED IN EACH OF THE RELATED PREMISES (WHEREVER LOCATED) AND SHALL NOT BE (OR BE DEEMED TO BE) DIVISIBLE OR SEVERABLE INTO SEPARATE LEASES FOR ANY PURPOSE WHATSOEVER, AND TENANT, ON BEHALF OF ITSELF AND ANY SUCH TRUSTEE OR LEGAL REPRESENTATIVE, HEREBY WAIVES ANY RIGHT TO CLAIM OR ASSERT A CONTRARY POSITION IN ANY ACTION OR PROCEEDING; IT BEING FURTHER UNDERSTOOD AND AGREED BY TENANT THAT THE ALLOCATIONS OF ACQUISITION COST AND PERCENTAGE ALLOCATION OF BASIC RENT AS RESPECTIVELY SET FORTH ON EXHIBIT E AND EXHIBIT F HEREOF ARE INCLUDED TO PROVIDE A FORMULA FOR RENT ADJUSTMENT AND LEASE TERMINATION UNDER CERTAIN CIRCUMSTANCES AND AS AN ACCOMMODATION TO TENANT. ANY EVENT OF DEFAULT HEREUNDER IN CONNECTION WITH ANY PORTION OF THE LEASED PREMISES SHALL BE DEEMED TO BE AN EVENT OF DEFAULT WITH RESPECT TO THE ENTIRE LEASED PREMISES. THE FOREGOING AGREEMENTS AND WAIVERS BY TENANT IN THIS PARAGRAPH 3(f) ARE MADE AS A MATERIAL INDUCEMENT TO LANDLORD TO ENTER INTO THE TRANSACTION CONTEMPLATED BY THIS LEASE AND THAT, BUT FOR THE FOREGOING AGREEMENTS AND WAIVERS BY TENANT, LANDLORD WOULD NOT CONSUMMATE THIS LEASE TRANSACTION.

4. Use of Leased Premises; Quiet Enjoyment.

(a) Tenant may occupy and use each of the Leased Premises for general office use (including parking) (the "Permitted Use") and for no other purpose without the prior written consent of Landlord. Tenant shall be responsible for obtaining and maintaining all permits, licenses, certificates of occupancy, or any other items required by any Legal Requirement with respect to

Tenant's use and occupancy of each of the Leased Premises. Without limiting Tenant's express rights under this Lease (including without limitation with respect to Alterations), Tenant shall not use or occupy or permit any of the Leased Premises to be used or occupied, nor do or permit anything to be done in or on any of the Leased Premises, in a manner that (i) violates any Legal Requirement or Permitted Encumbrance, (ii) makes void or voidable or causes any insurer to cancel any insurance required by this Lease, or could be reasonably expected to make it difficult or impossible to obtain any such insurance at commercially reasonable rates, (iii) makes void or voidable, cancels or causes to be cancelled or releases any of the Warranties (except in the ordinary course of business, including obtaining, where applicable, replacement or similar Warranties for those canceled), (iv) causes structural injury to any of the Improvements, (v) diminishes the market value or impairs the usefulness of such Leased Premises, or (vi) constitutes a public or private nuisance or waste. Without limiting any of Tenant's express rights to terminate the Lease set forth herein, if during the Term Tenant's use or occupancy of any of the Leased Premises is no longer permitted by Law or any Legal Requirement, Tenant shall not have the right to terminate this Lease by reason of same.

(b) Subject to the provisions hereof, so long as no Event of Default has occurred and is continuing, Tenant shall quietly hold, occupy and enjoy each of the Leased Premises throughout the Term, without any hindrance, ejection or molestation by Landlord with respect to matters that arise after the date hereof; provided that Landlord or its agents may enter upon and examine any of the Leased Premises at such reasonable times as Landlord may select and upon reasonable notice to Tenant (except in the case of any emergency, in which event no notice shall be required) for the purpose of inspecting such Leased Premises, verifying compliance or non-compliance by Tenant with its obligations hereunder and the existence or non-existence of an Event of Default or event which with the passage of time and/or notice would constitute an Event of Default, showing such Leased Premises to prospective Lenders and purchasers, making any repairs and taking such other action with respect to such Leased Premises as is permitted by any provision hereof. Landlord shall use commercially reasonable efforts to minimize interference with Tenant's operations and business in connection with any entry upon the Leased Premises by Landlord. Tenant shall permit inspection of any of the Leased Premises by any federal, state, county or municipal officer or representative to determine if such Leased Premises or any portion thereof comply with any Legal Requirement.

5. Term.

(a) Subject to the provisions hereof, Tenant shall have and hold the Leased Premises for an initial term (the " Initial Term", and as extended or renewed in accordance with the provisions hereof, including any exercised Renewal Term, the " Term") commencing on the Effective Date (the "Commencement Date") and ending on the last day of the three hundredth (300 th) full calendar month next following the Effective Date (the "Expiration Date"); provided that if, on or prior to the Expiration Date or any other Renewal Date (as hereinafter defined) this Lease shall not have been terminated pursuant to any provision hereof, and no Events of Default are continuing under this Lease, then on the Expiration Date and on the fifth (5 th), tenth (10th), fifteenth (15th), twentieth (20th) and twenty-fifth (25th) anniversaries of the Expiration Date (each such date, a " Renewal Date"), the Term shall be extended for an additional period of five (5) years (each of the extension periods, a " Renewal Term"); provided that Tenant shall have notified Landlord in writing at least eighteen (18) months prior to such Renewal Date that Tenant has elected to so extend this Lease as of such Renewal Date. At Landlord's request at any time after the giving of a notice of renewal,

Tenant shall execute a notice in recordable form confirming such Renewal Date. Any such extension of the Term shall be subject to all of the provisions of this Lease (except that Tenant shall not have the right to any additional Renewal Terms except as otherwise provided herein).

(b) If Tenant does not exercise any of its options pursuant to Paragraph 5(a) to extend the Term for an additional Renewal Term, or if an Event of Default occurs and is continuing, then Landlord shall have the right during the remainder of the Term then in effect and, in any event, Landlord shall have the right during the last eighteen (18) months of the Term, to (i) advertise the availability of any of the Leased Premises for sale or reletting and to erect upon such Leased Premises signs indicating such availability and (ii) show such Leased Premises to prospective purchasers or tenants or their agents at such reasonable times as Landlord may select and upon five (5) Business Days' prior written notice to Tenant. Landlord shall use commercially reasonable efforts to minimize interference with Tenant's operations and business in connection with any entry upon the Leased Premises by Landlord.

6. Basic Rent.

(a) On each Basic Payment Date, Tenant shall pay to Landlord for the Leased Premises basic rent the amounts described in Exhibit D ("Basic Rent"). Each payment of Basic Rent shall be made to Landlord (or one or more other Persons as Landlord may designate) on each Basic Rent Payment Date, without set-off, abatement (except as otherwise provided in this Lease), or deduction, pursuant to subparagraph (b) below.

(b) Each payment of Basic Rent shall be made to Landlord (or one or more other Persons as Landlord may designate) via wire transfer of immediately available funds on each Basic Rent Payment Date pursuant to wire transfer instructions delivered to Tenant from Landlord. Upon Landlord's request following an Event of Default, Tenant shall deliver to Landlord a complete ACH Authorization Agreement – Pre-Arranged Payments substantially in the form of Exhibit H, together with a voided check for account verification, establishing arrangements whereby payments of Rent are transferred by automated clearing house debit initiated by Landlord from an account established by Tenant (and such account not being subject to any control agreement or other lien or encumbrance) at a bank reasonably acceptable to Landlord that is chartered under the laws of the United States, any state thereof or the District of Columbia, and which is insured by the Federal Deposit Insurance Corporation, to such account as Landlord may designate. Following any such Landlord's request to establish an automated clearing house account, Tenant shall continue to pay all Rent by automated clearing house debit until otherwise directed in writing by Landlord.

(c) If, at any time, Tenant and/or Guarantor, if any, is owned directly or indirectly by one or more private equity funds or other financial sponsors which receive a management fee or other comparable distribution (" Sponsor"), Tenant and/or such Guarantor, as the case may be, shall cause each such Sponsor to enter into a Subordination Agreement substantially in the form of Exhibit I, subordinating Sponsor's right to collect its management fee to Landlord's right to collect Basic Rent under this Lease.

(d) The collection or application of any rent or other amounts directly from any subtenant at the Leased Premises by Landlord shall be subject to Paragraph 21(h) and shall not (i) be deemed

a waiver of any term, covenant or condition of this Lease, or (ii) relieve Tenant from its obligation to fully observe and perform the terms, covenants and conditions of this Lease.

7. Additional Rent.

(a) Tenant shall pay and discharge, as additional rent (collectively, "Additional Rent") the following costs and expenses:

(i) except as otherwise specifically provided herein (including without limitation Paragraph 36(q)), all Costs of Landlord not caused by Landlord's gross negligence, willful misconduct or breach of its obligations under this Lease, and which are incurred in connection with (A) the use, non-use, occupancy, possession, operation, condition, design, construction, maintenance, alteration, repair or restoration of any of the Leased Premises, (B) the Landlord's performance of any of Tenant's obligations under this Lease (if and to the extent permitted under the terms of this Lease), (C) any Condemnation proceedings, (D) the adjustment, settlement or compromise of any insurance claims involving or arising from any of the Leased Premises, (E) the prosecution, defense or settlement of any litigation (1) involving or arising from any of the Leased Premises or this Lease or the sale of any of the Leased Premises by Landlord following an Event of Default or (2) brought by any third-party directly against Landlord related to this Lease, any of the Leased Premises or Tenant's use or occupancy thereof, (F) the exercise or enforcement by Landlord of any of its rights under this Lease, (G) any amendment or supplement to or modification or termination of this Lease requested by Tenant or necessitated by any action of Tenant, including without limitation, any default by Tenant in the performance of any of its obligations under this Lease, (H) any act undertaken by Landlord (or its counsel) at the request of Tenant, any act of Landlord performed on behalf of Tenant (pursuant to any express right of Landlord to act on Tenant's behalf under the terms of this Lease), or the reasonable and customary review and monitoring of compliance by Tenant with the terms of this Lease and applicable Law, and (I) all other items expressly required to be paid by Tenant under this Lease;

(ii) subject to Paragraph 2(b) of Exhibit D, if all or any portion of any installment of Basic Rent is due and not paid by the applicable Basic Rent Payment Date, an amount (the "Late Charge") equal to five percent (5%) of the amount of such unpaid installment of Basic Rent or portion thereof to reimburse Landlord for its Costs and inconvenience incurred as a result of Tenant's delinquency; and

(iii) subject to Paragraph 2(b) of Exhibit D, interest, from the date of delinquency, at the rate (the "Default Rate") of five percent (5%) over the Prime Rate per annum on the following sums until paid in full: (A) all overdue installments of Basic Rent from the respective due dates thereof, (B) all overdue amounts of Additional Rent relating to obligations which Landlord shall have paid on behalf of Tenant, from the date reimbursement is due from Tenant (including any applicable notice, cure, and grace periods) under the express terms of this Lease, and (C) all other overdue amounts of Additional Rent, from the date when such amount becomes due (including any applicable notice and grace periods).

(b) Tenant shall pay and discharge any Additional Rent not later than five (5) Business Days after Landlord's demand for payment thereof, in the case of items billed to Landlord, and

within five (5) Business Days after the due date, in the case of items billed directly to Tenant. After the occurrence of an Event of Default, upon request from Landlord, all payments of Rent shall be paid by automated clearing house debit initiated by Landlord pursuant to Paragraph 6(b).

(c) In no event shall amounts payable under Paragraphs 7(a)(i), (ii), and (iii) or elsewhere in this Lease exceed the maximum amount permitted by applicable Law.

(d) Landlord acknowledges that in no event shall "Additional Rent" include, nor shall Landlord have any rights under this Lease, to any charges or other amounts paid by subtenants or others for parking at the Leased Premises.

8. Net Lease: Non-Terminability.

(a) This is an absolute net lease and all Rent shall be paid without notice or demand, except as otherwise expressly set forth herein, and without set-off, counterclaim, recoupment, abatement (except as otherwise set forth herein), suspension, deferment, diminution, deduction, reduction or defense (collectively, a "Set-Off").

(b) Except as otherwise expressly set forth herein (including without limitation Paragraph 36(p)), this Lease and the rights of Landlord and the obligations of Tenant hereunder shall not be affected by any event or for any reason or cause whatsoever foreseen or unforeseen.

(c) The obligations of Tenant hereunder shall be separate and independent covenants and agreements, all Rent shall continue to be payable in all events (or, in lieu thereof, Tenant shall pay amounts equal thereto), and the obligations of Tenant hereunder shall continue unaffected unless the requirement to pay or perform the same shall have been terminated pursuant to an express provision of this Lease. The obligation to pay Rent shall not be affected by any collection of rents by any governmental body pursuant to a tax lien or otherwise. All Rent payable by Tenant hereunder shall constitute "rent" for all purposes (including Section 502(b)(6) of the Federal Bankruptcy Code).

(d) Except as otherwise expressly provided herein, Tenant shall have no right and hereby waives all rights which it may have under any Law to (i) quit, terminate or surrender this Lease or any of the Leased Premises, or (ii) exercise any right of Set-Off of any Rent.

9. Payment of Impositions.

(a) Tenant shall pay and discharge when due the following to the extent they are imposed on, or with respect to, the Leased Premises: all taxes (including real and personal property taxes, franchise taxes (to the extent imposed in lieu of real property taxes), sales taxes, use taxes, commercial activity taxes (to the extent imposed in lieu of rent taxes), gross receipts (to the extent imposed in lieu of rent taxes) and rent taxes); all charges for any Easement Agreement; all assessments and levies; all taxes, fines, penalties and other Costs in connection with noncompliance of any of the Leased Premises with any applicable Law; all permit, inspection and license fees; all rents and charges for water, sewer, utility and communication services relating to any of the Leased Premises; all ground rents and all other public charges, imposed upon or assessed against (i) Tenant, (ii) Tenant's interest in any of the Leased Premises, (iii) any of the Leased Premises, or (iv) Landlord

as a result of or arising in respect of the acquisition, ownership, occupancy, leasing, use, possession or sale of any of the Leased Premises, any activity conducted on any of the Leased Premises, or the Rent (collectively, the "Impositions"); provided, however that nothing herein shall obligate Tenant to pay (A) income, excess profits, gross receipts tax, franchise or other taxes of Landlord (or Lender) which are determined on the basis of Landlord's (or Lender's) net income or net worth (unless such taxes are in lieu of or a substitute for any other tax, assessment or other charge upon or with respect to any of the Leased Premises which, if it were in effect, would be payable by Tenant under the provisions hereof or by the terms of such tax, assessment or other charge, e.g., any real property tax that is recharacterized as a franchise tax) or that is imposed upon Landlord (or Lender) under Code Section 59A, (B) any estate, inheritance, succession, gift or similar tax imposed on Landlord, (C) any tax imposed on Landlord in connection with the sale, transfer or other disposition of either of the Leased Premises or any interest therein, including, but not limited to, any transfer, capital gains, sales, gross receipts, value added, income, stamp, real property gains or withholding taxes, and (D) any interest or penalties or other charges related to the foregoing. For the avoidance of doubt, nothing in this Paragraph 9(a) shall make Tenant responsible for Landlord's Ohio Commercial Activity Tax liability.

(b) Upon expiration of the Term (or any earlier termination of this Lease), all unpaid taxes and assessments shall be apportioned. If the tax bill for the tax year in which the expiration of the Term (or any earlier termination of this Lease) occurs has not been issued, the apportionment of taxes shall be computed based upon the most recent tax bill available. Landlord and Tenant shall pro-rate any tax refund received by Landlord or Tenant for the tax year in which the expiration of the Term (or any earlier termination of this Lease) occurs.

(c) If any Imposition may be paid in installments without penalty, Tenant shall have the option to pay such Imposition in installments and shall only be liable for the payment of such installments as they become due and payable and that occur during the Term of this Lease. If any Imposition may be paid in installments with interest, Tenant shall have the option to pay such Imposition in installments, provided that if such installments extend beyond the Term, Landlord shall have the option to repay all remaining installments coming due following the Term without interest.

(d) Tenant shall prepare and file all tax reports required by governmental authorities which relate to the Impositions. Landlord shall promptly deliver to Tenant any bill, invoice, settlement or notice that Landlord receives with respect to the Impositions. In addition, Landlord agrees to cooperate with Tenant as and when necessary to enable Tenant to receive tax bills, settlements and notices with respect to the Impositions directly from the respective taxing authorities. Tenant shall deliver to Landlord (i) copies of all settlements and notices pertaining to the Impositions which may be issued by any governmental authority within ten (10) days after Tenant's receipt thereof, (ii) receipts for payment of all taxes required to be paid by Tenant hereunder within thirty (30) days after the due date thereof, and (iii) receipts for payment of all other Impositions within ten (10) days after Landlord's request therefor.

(e) Notwithstanding anything to the contrary herein, Tenant shall not be required to pay or cause to be paid any tax, assessment, charge or levy that is not yet past due, or is being contested in good faith by appropriate actions or proceedings, so long as by reason of such nonpayment and

contest no material item or portion of the Leased Premises is in jeopardy of being seized, levied upon or forfeited. Tenant shall be entitled to any refund of any Impositions (including, without limitation, penalties or interest thereon) received by Tenant or Landlord, whether or not such refund was a result of actions or proceedings instituted by Tenant.

(f) Impositions shall include, without limitation, any increase in any of the foregoing taxes, payments or costs based upon construction of improvements on the Leased Premises or "change in ownership" (as defined in the California and Revenue Taxation Code) of the Leased Premises.

(g) During the continuance of an Event of Default, Tenant shall pay to Landlord or Lender such amounts (each an " Escrow Payment") as required by Landlord or Lender so that there shall be in an escrow account an amount sufficient to pay as they become due the Escrow Charges that will accrue over such period of time as Landlord or Lender shall reasonably require. As used herein, "Escrow Charges" means real estate taxes and assessments on or with respect to any of the Leased Premises or payments in lieu thereof and premiums on any insurance required by this Lease, payments due under any Easement Agreement and any reserves for capital improvements, deferred maintenance, repair and/or tenant improvements and leasing commissions. Landlord shall reasonably determine the amount of the Escrow Charges (it being agreed that if required by a Lender, such amount shall equal any corresponding escrow installments required to be paid by Landlord) and the amount of each Escrow Payment. Notwithstanding the immediately preceding sentence (including without limitation any Lender requirements), the Escrow Payments shall not be commingled with other funds of Landlord or other Persons (and shall not exceed twelve (12) months of Escrow Charges at any given time), shall not exceed with respect to any Escrow Charge in any month one twelfth ($1/12^{th}$) of the annual amount of the applicable Escrow Charge, and in no event may Landlord require any Escrow Payment regarding any Escrow Charge if Landlord is holding the aggregate annual amount of such Escrow Charge. No interest thereon shall be due or payable to Tenant. Landlord or Lender, as applicable, shall apply the Escrow Payments to the payment of the Escrow Charges in such order or priority as Landlord or Lender shall determine or as required by Law. Subject to the foregoing, if at any time the Escrow Payments theretofore paid to Landlord or Lender, as applicable, shall be insufficient for the payment of the Escrow Charges, Tenant, within ten (10) days after Landlord's written demand therefor, shall pay the amount of the deficiency to Landlord or Lender, as applicable.

(h) Tenant agrees to notify Landlord immediately of any changes to the amounts, schedules, or instructions for payment of any Impositions and premiums on any insurance held under this Lease of which Tenant has obtained knowledge and authorizes Landlord or Lender to obtain duplicate copies of the bills for Impositions or Escrow Charges directly from the appropriate authority or entity.

(i) To the extent required by NPDES Permit No. CAG994004, Tenant agrees to (i) conduct monthly sampling of the water in the sump pump at the Long Beach Real Property, and (ii) provide the applicable quarterly reporting thereof to the LA Regional Water Quality Control Board.

10. Compliance with Laws and Easement Agreements; Environmental Matters.

(a) Tenant shall, at its expense, comply with and conform to, and cause each of the Leased Premises and any other Person occupying any part of any of the Leased Premises to materially comply with and conform to all Insurance Requirements and all Legal Requirements (including all applicable Environmental Laws); provided, however, that Tenant shall only be required to cause any other Person to comply with Insurance Requirements if and to the extent such Insurance Requirements are reasonably applicable to such Person and its activities or operations at any Leased Premises. Tenant shall not at any time (i) cause, permit, or suffer to occur, any Environmental Violation or any environmental lien whether due to the acts of Tenant or any other party, (ii) permit any subtenant, assignee or other Person occupying any of the Leased Premises under or through Tenant to cause, permit or suffer to occur any Environmental Violation and, at the request of Landlord, Tenant shall promptly remediate or undertake any other appropriate response action to correct any existing Environmental Violation, however immaterial, or (iii) without the prior written consent of Landlord, permit any drilling or exploration for or extraction, removal, or production of any oil, gas or minerals from the surface or the subsurface of the Real Property, regardless of the depth thereof or the method of mining or extraction thereof. Any and all reports prepared for or by Landlord with respect to any of the Leased Premises shall be for the sole benefit of Landlord and no other Person shall have the right to rely on any such reports.

(b) Tenant, at its sole cost and expense, will at all times promptly and faithfully abide by, discharge and perform all of the covenants, conditions and agreements contained in any Easement Agreement on the part of Landlord, Tenant or any subtenant to be kept and performed thereunder; provided, however, that Landlord shall reasonably cooperate with Tenant to enable and assist Tenant in connection therewith. Neither Party will alter, modify, amend or terminate any Easement Agreement, give any consent or approval thereunder, or enter into any new Easement Agreement without, in each case, the prior written consent of the other Party. Tenant agrees to reasonably cooperate with Landlord, at Tenant' sole cost and expense, in connection with (i) the granting of easements, licenses, rights-of-way and other rights and privileges in the nature of Easement Agreements reasonably necessary or desirable for ownership and operation of any of the Leased Premises as herein provided; (ii) the execution of petitions to have any of the Leased Premises annexed to any municipal corporation or utility district; and (iii) the execution of amendments to any covenants and restrictions affecting any of the Leased Premises; provided, however, that in no event shall Landlord undertake any of the actions described in clauses (i), (ii) and (iii) or any other grant, release, dedication, transfer, easement, amendment or government action, or other action or agreement relating to either of the Leased Premises (any of the foregoing, a " Property Action") without the prior written consent of Tenant, which consent Tenant shall not unreasonably withhold, condition or delay; provided, however, that Tenant may condition such consent in part on receiving from Landlord a certificate stating that such Property Action will not materially interfere with Tenant's use and enjoyment of the Leased Premises.

(c) Subject to the provisions of this Paragraph 10(c), so long as no Event of Default has occurred and is continuing, Landlord hereby agrees to reasonably cooperate with the following actions by Tenant, in the name and stead of Landlord and cause Lender to cooperate with, but at Tenant's sole cost and expense: (i) the granting of easements, licenses, rights-of-way and other rights and privileges in the nature of Easement Agreements reasonably necessary or desirable for

the construction, operation, restoration, use, repair, renovation or maintenance of any of the Leased Premises as herein provided; (ii) the execution of petitions to have any of the Leased Premises annexed to any municipal corporation or utility district; (iii) the execution of amendments to any covenants and restrictions affecting any of the Leased Premises; (iv) Tenant's obtaining all necessary government or third-party actions, consents or agreements necessary for the performance and completion of any Alteration; provided, however that in each case Tenant shall have delivered to Landlord a certificate stating that: (A) the Property Action does not impair the value, utility or remaining useful life of such Leased Premises or have an adverse effect on the value of Landlord's interest in such Leased Premises (other than to a de minimis extent, or, with respect to an Alteration, a temporary extent), (B) such Property Action is reasonably necessary in connection with the use, maintenance, alteration, renovation, construction, operation, restoration, repair or improvement of such Leased Premises, (C) Tenant shall remain obligated under this Lease and under any instrument executed by Tenant consenting to the assignment of Landlord's interest in this Lease as security for indebtedness, in each such case in accordance with their terms, and (D) Tenant shall pay any Costs of Landlord under such Property Action. Without limiting the effectiveness of the foregoing, Landlord shall, within thirty (30) days of receipt of the written request of Tenant, and at Tenant's sole cost and expense (including reasonable fees and disbursements of counsel to Landlord and Lender to review such Property Action), review and either approve or disapprove in writing the proposed Property Action, and, if approved, execute and deliver any instruments and take any other action reasonably necessary or appropriate to confirm any such Property Action, to any person permitted under this Paragraph 10 or to implement any such Property Action.

(d) Upon prior written notice from Landlord, Tenant shall permit such persons as Landlord may designate ("Site Reviewers") to visit any of the Leased Premises during normal business hours and in a manner which does not unreasonably interfere with Tenant's operations and perform environmental site investigations and assessments (" Site Assessments") on such Leased Premises in any of the following circumstances: (i) in connection with any sale, financing or refinancing of such Leased Premises; (ii) within the six (6) month period prior to the expiration of the Term; (iii) if required by Lender or the terms of any credit facility to which Landlord is bound; (iv) if an Event of Default exists; (v) if required under any applicable Law; or (vi) at any other time that, in the opinion of Landlord or Lender, a reasonable basis exists to believe that an Environmental Violation or any condition that could reasonably be expected to result in any Environmental Violation exists; provided, however, that Landlord and Lender may only conduct, in the aggregate, one (1) Site Assessment per calendar year, unless Landlord or its Lender has a reasonable basis to believe that a previously undisclosed material Environmental Violation exists. Such Site Assessments may include both above and below the ground testing for Environmental Violations and such other tests as may be necessary, in the opinion of the Site Reviewers, to conduct the Site Assessments including additional Site Assessments that may be required as a result of any limited Phase II environmental report prepared prior to the date hereof or as may be required by Lender or any provider of insurance for such Leased Premises. Tenant shall supply to the Site Reviewers such historical and operational information regarding such Leased Premises as may be reasonably requested by the Site Reviewers to facilitate the Site Assessments, and shall make available for meetings with the Site Reviewers appropriate personnel having knowledge of such matters. The cost of performing and reporting any Site Assessments pursuant to subsections (i) and (iii) of this Paragraph 10(d) shall be paid by Landlord; all other costs relating to Site Assessments shall be paid by Tenant.

(e) If an Environmental Violation occurs or is found to exist and, in Landlord's reasonable judgment, the cost of remediation of, or other response action with respect to, the same is likely to exceed Five Hundred Thousand Dollars ($500,000) , Tenant shall provide to Landlord, within ten (10) days after Landlord's written request therefor, adequate financial assurances, as determined in Landlord's reasonable discretion, that Tenant will effect such remediation in accordance with applicable Environmental Laws, and fulfill Tenant's indemnification obligations that could reasonably be expected to arise as a result of such Environmental Violation. Such financial assurances shall be in an amount equal to or greater than Landlord's reasonable estimate, based upon a Site Assessment performed pursuant to Paragraph 10(d), of the anticipated cost of such remedial action. Tenant shall comply with all reasonable requests of Landlord with respect to an Environmental Violation, including without limitation (i) a request to effectuate a remediation of any Environmental Violation, (ii) a request for Tenant to comply with any Environmental Laws or to comply with any directive from a governmental authority, or (iii) a reasonable request to take any action necessary to protect human health and safety.

(f) Notwithstanding any other provision of this Lease, if an Environmental Violation occurs or is found to exist and the Term would otherwise terminate or expire, then, at the option of Landlord, the Term shall be automatically extended beyond the date of termination or expiration and this Lease shall remain in full force and effect on a month-to-month basis beyond such date until the earlier to occur of (i) the completion of all remedial action in accordance with applicable Environmental Laws or (ii) the date specified in a written notice from Landlord to Tenant terminating this Lease.

(g) If Tenant fails to comply with any requirement of any Environmental Law, Landlord shall have the right (but no obligation) to take any and all actions as Landlord shall deem necessary or advisable in order to comply with such Environmental Law.

(h) Except as provided in Schedule 10(h), Tenant represents and warrants that (i) it is not aware of any Environmental Violation or suspected Environmental Violation at any of the Leased Premises as of the Effective Date and (ii) Tenant has disclosed to Landlord all known or suspected Environmental Violations and the presence of Hazardous Conditions or Hazardous Substances existing on any of the Leased Premises prior to the Effective Date. If Tenant fails to comply with any requirement of any Environmental Law in connection with any Environmental Violation which occurs or is found to exist, Landlord shall have the right (but no obligation) to take any and all actions as Landlord shall deem necessary or advisable in order to cure such Environmental Violation.

(i) Tenant shall notify Landlord on the earlier of (i) three (3) Business Days after obtaining knowledge thereof or (ii) the date on which notice is required to be delivered to any governmental authority under applicable Environmental Law, or contemporaneous with notice being provided to any governmental authority, with respect to (X) any Environmental Violation (or alleged Environmental Violation), (Y) spill or release of any Hazardous Substances that could reasonably be expected to result in a claim or liability under Environmental Law, or (Z) noncompliance with any of the covenants contained in this Paragraph 10, and shall promptly forward to Landlord copies of all orders, reports, notices, permits, applications or other communications relating to any such violation or noncompliance.

(j) Intentionally Omitted.

(k) Tenant shall, from time to time, upon Landlord's reasonable request, provide Landlord with evidence (a duly authorized and executed officer's certificate from Tenant shall be sufficient evidence) satisfactory to Landlord that the Real Property complies with all Legal Requirements or is exempt from compliance with such Legal Requirements.

(l) Except for the water tank more particularly described in Schedule 10(l) (the " Water Tank"), and the above-ground tank containing diesel fuel described in Schedule 10(l) (the " Diesel Tank"), there are no above or underground tanks at either of the Leased Premises as of the date hereof. Tenant represents and warrants that the Water Tank has not been used by Tenant or its Affiliates for any purpose other than to hold water from a domestic water line as a water reservoir for the fire sprinkler system at the Long Beach Leased Premises. Unless otherwise directed by Landlord, and except for the Water Tank and the Diesel Tank, Tenant shall, at its sole cost and expense, close any tanks (above or underground) or remnants thereof at each of the Leased Premises prior to the termination or expiration of the Term. Tenant shall: (i) remove any such tanks, their contents, and associated equipment and piping at each of the Leased Premises in accordance with Environmental Law; (ii) close any such tanks in accordance with Environmental Law; (iii) perform any Site Assessments reasonably necessary to determine whether the prior use of or removal or closure procedures with respect to any such tanks resulted in an Environmental Adverse Condition; (iv) remediate all Environmental Adverse Conditions associated with any such tanks in accordance with this subparagraph; and (v) notify as required all appropriate Governmental Authorities of the closure and removal of any such tanks that are regulated in accordance with Environmental Law. In the event that Landlord notifies Tenant that any or all of the tanks that otherwise are required to be removed pursuant to this Paragraph 10(l) may remain on any of the Leased Premises at the termination or expiration of the Term, Tenant shall take all appropriate actions to ensure that such tanks are in good working order, are emptied of all contents, are in compliance with all Environmental Laws, and do not constitute an Environmental Adverse Condition at the termination or expiration of the Term. Prior to the termination or expiration of the Term, Tenant shall provide Landlord with (x) proof of closure or removal of any such tanks that are required to be closed or removed pursuant to this Paragraph 10(l), (y) copies of all Site Assessments performed in conjunction with the closure or removal of any such tanks, and (z) all documentation of the regulatory status of all tanks at any of the Leased Premises (including without limitation any such documentation regarding the Water Tank and the Diesel Tank, and any other tanks whether or not Landlord has allowed Tenant to leave in place any other tanks at such Leased Premises).

11. Liens; Recording.

(a) Except as contemplated in Paragraph 10, Tenant shall not, directly or indirectly, create or permit to be created or to remain and shall promptly discharge or remove any lien, levy or encumbrance on any of the Leased Premises or on any Rent or any other sums payable by Tenant under this Lease, other than any Mortgage or Assignment, the Permitted Encumbrances and any mortgage, lien, encumbrance or other charge created by or resulting solely from any act or omission of Landlord. NOTICE IS HEREBY GIVEN THAT LANDLORD SHALL NOT BE LIABLE FOR ANY LABOR, SERVICES, EQUIPMENT OR MATERIALS FURNISHED OR TO BE FURNISHED TO TENANT OR TO ANYONE HOLDING OR OCCUPYING ANY OF THE

LEASED PREMISES THROUGH OR UNDER TENANT, AND THAT NO MECHANICS' OR OTHER LIENS FOR ANY SUCH LABOR, SERVICES OR MATERIALS SHALL ATTACH TO OR AFFECT THE INTEREST OF LANDLORD IN AND TO ANY OF THE LEASED PREMISES. LANDLORD MAY AT ANY TIME POST ANY NOTICES ON ANY OF THE LEASED PREMISES REGARDING SUCH NON-LIABILITY OF LANDLORD. Landlord may record, at its election, notices of non-responsibility pursuant to California Civil Code Section 8444 in connection with any work performed by Tenant at the Leased Premises.

(b) At the request of either Party, the other Party shall execute, deliver and record, file or register (collectively, "Record") all such instruments as may be reasonably required or permitted by any present or future Law in order to evidence the respective interests of Landlord and Tenant in the Leased Premises, and shall cause a memorandum of this Lease and a memorandum memorializing any amendment or supplement hereto or thereto, to be Recorded in such manner and in such places as may be required or permitted by any present or future Law in order to protect the validity and priority of this Lease.

12. Maintenance and Repair.

(a) Tenant shall complete the repairs listed on Schedule 12(a) (the "Immediate Repairs") no later than twelve (12) months after the Effective Date. Upon completion of the Immediate Repairs, Tenant shall deliver to Landlord (i) lien waivers reasonably satisfactory to Landlord and (ii) a certificate of Tenant, signed by an officer of Tenant, stating that the Immediate Repairs have been fully completed and comply with the applicable requirements of this Lease and with all Legal Requirements. Landlord hereby agrees that no Letter of Credit or other security shall be required to be delivered by Tenant to Landlord in connection with the Immediate Repairs.

(b) Subject to the completion of the Immediate Repairs, any Alterations permitted hereunder, restorations following any Casualty or Condemnation, and all other rights of Tenant under this Lease, and subject to reasonable wear and tear, Tenant shall at all times maintain each of the Leased Premises in as good repair, appearance and condition as they are on the Effective Date and fit to be used for the Permitted Use in accordance with the practices generally recognized as then acceptable by other office tenants, and (ii) the Equipment, in as good mechanical condition as it was on the later of the date hereof or the date of its installation, except for ordinary wear and tear, and subject to maintenance, repair and replacement of same. Tenant shall take every other action necessary or appropriate for the preservation and safety of each of the Leased Premises and the life safety of any occupants of each of the Leased Premises or their invitees. Tenant shall promptly make all Alterations of every kind and nature, whether foreseen or unforeseen, which may be required to comply with the foregoing requirements of this Paragraph 12(b) or to comply with any Legal Requirement. Landlord shall not be required to make any Alteration, whether foreseen or unforeseen, or to maintain any of the Leased Premises in any way, and Tenant hereby expressly waives any right which may be provided for in any Law now or hereafter in effect to make Alterations at the expense of Landlord or to require Landlord to make Alterations. Any Alteration made by Tenant pursuant to this Paragraph 12 shall be made in conformity with the provisions of Paragraph 13. Tenant hereby agrees and covenants not to commit or permit any of the Leased Premises to suffer waste, and shall take all precautions necessary to prevent waste from occurring at any of the Leased Premises.

(c) Tenant shall provide Landlord with an engineering or property condition report (at Tenant's sole cost and expense and in form and substance satisfactory to Landlord, in Landlord's reasonable discretion) not more than twenty-four (24) months nor less than eighteen (18) months prior to the end of the Initial Term or any Renewal Term (a "Property Condition Report"). If (i) such Property Condition Report lists replacements of the roof or HVAC systems as required or advisable on any of the Leased Premises during the remainder of the Initial Term or any Renewal Term, or (ii) an Alteration or repair to any of the Leased Premises is required by any Legal Requirement during the last eighteen (18) months of the Initial Term or any Renewal Term, then, provided that such Alteration or repair is the result of normal wear and tear and not due to neglect or waste by Tenant, then the cost of such Alteration or repair, as the case may be, will be apportioned between Landlord and Tenant with Tenant's share equal to the cost of such Alteration or repair, as the case may be, multiplied by a fraction, the numerator of which shall be the remainder of the Term from the time such Alteration or repair is made pursuant to subparagraphs (i) or (ii) above, and the denominator of which shall be the anticipated useful life of such Alteration or repair, as the case may be. If such Alteration or repair is required due to neglect or waste by Tenant or the breach of any of Tenant's other obligations under this Lease, Tenant shall bear the full cost of such Alteration or repair, including any reasonable Costs incurred by Landlord to ensure that the Alteration and repair are completed, and such Alteration or repair shall be made in accordance with Paragraphs 12 and 13 of this Lease.

(d) Except as disclosed by a survey or other writing provided to Landlord prior to the Effective Date, if any Improvement, now or hereafter constructed, shall (i) materially encroach upon any setback or any property, street or right-of-way adjoining such Leased Premises, (ii) materially violate any zoning restrictions, including without limitation height or set-back restrictions, or the provisions of any restrictive covenant affecting such Leased Premises, (iii) hinder or obstruct any Easement Agreement to which such Leased Premises is subject or (iv) impair the rights of others in, to or under any of the foregoing, Tenant shall, promptly after receiving written notice or otherwise acquiring actual knowledge thereof, either (A) obtain from all necessary parties waivers or settlements of all claims, liabilities and damages resulting from each such encroachment, violation, hindrance, obstruction or impairment, whether the same shall affect Landlord, Tenant or both, or (B) take such action as shall be necessary to remove all such encroachments, hindrances or obstructions and to end all such violations or impairments, including, if necessary, making Alterations.

(e) Tenant waives and releases any right it may have to make repairs at Landlord's expense or to quit the Leased Premises under Sections 1941, 1942(a) and 1932(1) of the California Civil Code or any other statute now or hereafter in effect which would otherwise afford Tenant the right to make repairs at Landlord's expense or to terminate this Lease because of Landlord's failure to keep the Leased Premises in good order, condition and repair.

13. Alterations and Improvements.

(a) Tenant shall not make (i) any non-structural Alterations to any of the Long Beach Leased Premises that cost more than One Million Dollars ($1,000,000.00) or to any of the Columbus Leased Premises that cost more than Five Hundred Thousand Dollars ($500,000.00), each in the aggregate, in any calendar year or (ii) any structural Alterations to any Leased Premises, without

having first obtained the prior written consent of Landlord (such consent not to be unreasonably withheld, conditioned or delayed); provided, however that the Alterations (x) in progress as of the Effective Date, (y) planned to be completed before the end of the year 2014, or (z) that are tenant improvements under Existing Subleases and described in Schedule 13(a) of this Lease, are not subject to, and do not and shall not count against, the foregoing monetary caps and are hereby approved by Landlord in all respects. Tenant shall not construct upon the Real Property any additional buildings or other structural improvements without having first obtained the prior written consent of Landlord. Landlord shall have the right to require Tenant to remove at the end of the Term any Alterations so long as Landlord gives Tenant written notice of election to require removal within ten (10) days of giving Tenant approval for such Alteration; provided, however, that Landlord shall not have the right to require Tenant to remove any of the following: Alterations required by Law, Alterations generally consistent with office use, and tenant improvements by subtenants under approved Subleases.

(b) If Tenant makes any Alterations pursuant to this Paragraph 13 or as required by Paragraph 12 or Paragraph 17 (such Alterations and actions being hereinafter collectively referred to as " Work") to any of the Leased Premises, then (i) the market value of such Leased Premises shall not be lessened or its usefulness impaired, by the completion of such Work (ii) all such Work shall be performed by Tenant in a good and workmanlike manner, (iii) all such Work shall be expeditiously completed in compliance with all Legal Requirements, (iv) all such Work shall comply with the requirements of all insurance policies required to be maintained by Tenant hereunder, (v) if any such Work involves the replacement of Equipment or parts thereto, all replacement Equipment or parts shall have a value and useful life equal to the greater of (A) the value and useful life on the Effective Date of the Equipment being replaced or (B) the value and useful life of the Equipment being replaced immediately prior to the occurrence of the event which required its replacement (assuming such replaced Equipment was then in the condition required by this Lease), (vi) Tenant shall promptly discharge or remove all liens filed against such Leased Premises arising out of such Work, (vii) Tenant shall procure and pay for all permits and licenses required in connection with any such Work, (viii) the product and results of all such Work shall be the property of Landlord and shall be subject to this Lease, and Tenant shall execute and deliver to Landlord any document reasonably requested by Landlord evidencing the assignment to Landlord of all estate, right, title and interest (other than the leasehold estate created hereby) of Tenant or any other Person thereto or therein, and (ix) if such Alterations will cost in excess of One Million Dollars ($1,000,000.00), Tenant shall comply, to the extent requested by Landlord or required by this Lease, with the provisions of Paragraph 19(a)(i)-(vii) (provided that (x) any "Restoration Fund" shall be funded within ten (10) Business Days after Landlord's approval of such Alterations, in such as amount as Landlord shall reasonably determine, (y) Tenant shall not be required to hire a casualty consultant, and (z) neither Landlord nor Lender shall commingle amounts in any "Restoration Fund" created pursuant to this Paragraph 13(b) with Landlord's or Lender's other funds, and Tenant agrees that such amounts in any such "Restoration Fund" shall not bear interest), whether or not such Work involves restoration of any of the Leased Premises.

14. Permitted Contests.

Notwithstanding any other provision of this Lease, Tenant shall not be required to (a) pay any Imposition , (b) comply with any Legal Requirement, (c) discharge or remove any lien referred

to in Paragraph 11 or Paragraph 13 or (d) take any action with respect to any encroachment, violation, hindrance, obstruction or impairment referred to in Paragraph 12(d) (such non-compliance with the terms hereof being hereinafter referred to collectively as "Permitted Violations") and may dispute or contest the same, so long as at the time of such non-compliance no Event of Default exists and so long as Tenant shall contest, in good faith, the existence, amount or validity thereof, the amount of the damages caused thereby, or the extent of its or Landlord's liability therefor by appropriate proceedings which shall operate during the pendency thereof to prevent or stay (i) the collection of, or other realization upon, the Permitted Violation so contested, (ii) the sale, forfeiture or loss of any of the Leased Premises or any Rent to satisfy or to pay any damages caused by any Permitted Violation, (iii) any interference with the use or occupancy of any of the Leased Premises, (iv) any interference with the payment of any Rent, (v) the cancellation or increase in the rate of any insurance policy or a statement by the carrier that coverage will be denied or (vi) the enforcement or execution of any injunction, order or Legal Requirement with respect to the Permitted Violation. Tenant shall provide Landlord security (by way of example only, in the form of a cash escrow or Letter of Credit) which is satisfactory, in Landlord's reasonable judgment, to assure that such Permitted Violation is corrected, including all Costs, interest and penalties that may be incurred or become due in connection therewith. While any proceedings which comply with the requirements of this Paragraph 14 are pending and the required security is held by Landlord, Landlord shall not have the right to correct any Permitted Violation thereby being contested unless Landlord is required by Law to correct such Permitted Violation and Tenant's contest does not prevent or stay such requirement as to Landlord. Each such contest shall be promptly and diligently prosecuted by Tenant to a final conclusion, except that Tenant, so long as the conditions of this Paragraph 14 are at all times complied with, has the right to attempt to settle or compromise such contest through negotiations. Tenant shall pay any and all losses, judgments, decrees and Costs in connection with any such contest and shall, promptly after the final determination of such contest, fully pay and discharge the amounts which shall be levied, assessed, charged or imposed or be determined to be payable therein or in connection therewith, together with all penalties, fines, interest and Costs thereof or in connection therewith, and perform all acts the performance of which shall be ordered or decreed as a result thereof. No such contest shall subject Landlord to the risk of any civil or criminal liability. Without limiting the foregoing, Tenant shall also have the right to take any action or undertake any proceeding against any applicable collecting authority to (y) seek an abatement or refund of any Impositions or a reduction in the valuation of the Leased Premises, and/or (z) contest the applicability of any Impositions. In any instance where any permitted action or proceeding is being undertaken by Tenant as set forth in this Paragraph 14, Landlord shall cooperate reasonably with Tenant, at no cost or expense to Landlord, and execute any and all documents reasonably required in connection therewith. Tenant shall be entitled to any refund of any amounts received by Tenant or Landlord pursuant to any permitted action or proceeding described in this Paragraph 14.

15. Indemnification.

(a) Tenant shall pay, protect, indemnify, defend, save and hold harmless Landlord, Lender and all other Indemnitees from and against any and all liabilities, losses, damages (including punitive damages), penalties, Costs (including reasonable attorneys' fees and expenses), causes of action, suits, claims, demands or judgments of any nature whatsoever, without regard to the form of action and whether based on strict liability, gross negligence, negligence, or any other theory of

recovery at law or in equity (collectively, "Losses"), in each case proximately caused by events occurring during the Term, and arising from (i) the ownership, leasing, use, non-use, occupancy, operation, management, condition, design, construction, maintenance, repair or restoration of any of the Leased Premises; (ii) any Casualty in any manner arising from any of the Leased Premises, whether or not Indemnitee has or should have knowledge or notice of any defect or condition causing or contributing to said Casualty; (iii) any violation by Tenant of (A) any provision of this Lease (including any representation or warranty), (B) any contract or agreement to which Tenant is a party, (C) any Legal Requirement or (D) any Permitted Encumbrance or any other encumbrance consented to by Tenant; (iv) any default by Landlord of any Loan, to the extent caused by an Event of Default by Tenant under this Lease, or (v) any alleged, threatened or actual Environmental Violation, including (A) liability for response costs and for costs of removal and remedial action incurred by the United States Government, any state or local governmental unit or any other Person, or damages from injury to or destruction or loss of natural resources, including the reasonable costs of assessing such injury, destruction or loss, incurred pursuant to Sections 107 or 113 of CERCLA, or any successor section or act or provision of any similar state or local Law, (B) liability for costs and expenses of abatement, correction or clean-up, fines, damages, response costs or penalties which arise from the provisions of any of the other Environmental Laws and (C) liability for personal injury or property damage arising under any statutory or common-law tort theory, including damages assessed for the maintenance of a public or private nuisance or for carrying on of a dangerous activity; provided that such acts or omissions took place during the term of the Lease; and provided, further, that, notwithstanding the foregoing, Tenant shall have no liability or obligation to any Indemnitee under this Paragraph 15 to the extent of any Loss arising out of any Indemnitee's gross negligence or willful misconduct.

(b) Landlord shall pay, protect, indemnify, defend, save and hold harmless Tenant from and against any and all Losses arising from any default by Landlord under this Lease, the actions of any Site Reviewers at any of the Leased Premises, any Site Assessments, or the gross negligence or willful misconduct of Landlord or any of Landlord's directors, members, officers, general partners, limited partners, shareholders, employees or agents, or any predecessor, successor or affiliate of any of the foregoing.

(c) In case any action or proceeding is brought against any party indemnified under this Paragraph 15, (i) such indemnified party shall notify the indemnitor to resist or defend such action or proceeding, and such indemnified party will cooperate and assist in the defense of such action or proceeding if reasonably requested to do so by the indemnitor and (ii) in the case that Tenant is the indemnitor, Tenant may, except during the continuance of an Event of Default caused by the failure of Tenant to pay to Landlord any amounts due under this Lease (after any applicable notice and cure periods), select and, retain its own counsel and defend such action (it being understood that Landlord may employ counsel of its choice to monitor the defense of any such action, the cost of which shall be paid by Tenant). During the continuance of an Event of Default caused by the failure of Tenant to pay to Landlord any amounts due under this Lease (after any applicable notice and cure periods), Landlord shall have the right to select counsel, and the fees and expenses of such counsel shall be paid by Tenant.

(d) Tenant hereby indemnifies and holds harmless Landlord from and against any claims (including reasonable attorneys' fees) for brokerage fees or commissions arising out of any existing

Subleases at the Leased Premises. Tenant also hereby indemnifies and holds harmless Landlord against any such action brought by any subtenant at the Leased Premises and any claims or damages suffered by Landlord during the Term as a result of any such action brought by any subtenant, unless such claims or damages are the result of Landlord's gross negligence, willful misconduct, breach of this Lease, or breach of any agreement between Landlord and any subtenant.

(e) The obligations of Landlord and Tenant under this Paragraph 15 shall survive any termination, expiration or rejection in bankruptcy of this Lease.

16. Insurance.

(a) Each policy of insurance listed on Schedule 16(a) attached hereto (the "Existing Insurance Policies") is in full force and effect and all premiums due with respect thereto have been paid. There are no claims outstanding or pending under any Existing Insurance Policies.

(b) Tenant shall obtain, pay for and maintain the following insurance on or in connection with each of the Leased Premises:

(i) Insurance against all risk of physical loss or damage to the Improvements and Equipment as provided under "Special Causes of Loss" form coverage, including the perils of hail, windstorm, flood coverage, earthquake and acts of terrorism, in amounts not less than the actual replacement cost of the Improvements and Equipment without deduction for depreciation on agreed amount basis (except at least $5,000,000 limit for earthquake and flood); provided that, if Tenant's insurance company is unable or unwilling to include any or all of such excluded perils, Tenant shall have the option of purchasing coverage against such perils from another insurer on a "Difference in Conditions" form or through a stand-alone policy. Such policies shall contain if Special Causes of Loss form Law and Ordinance – Full Building Value, $10,000,000 Increased Cost of Construction and Demolition and if standalone earthquake policy $1,000,000 Building Law, Increased Cost of Construction and Demolition. Such policies and endorsements shall contain deductibles not more than $100,000 per occurrence except that earthquake coverage may have a deductible not to exceed 5% percent of actual replacement cost of the Improvements and flood coverage may have a deductible not to exceed $100,000. All such deductibles are Tenant's responsibility. Such policies shall name Landlord as a Named Insured, and Lender as mortgagee/loss payee, with respect to such Leased Premises.

(ii) Comprehensive Boiler and Machinery/Equipment Breakdown Insurance on any of the Equipment in such Leased Premises, in an amount not less than the full replacement cost of such Equipment (subject to an aggregate sublimit of $100,000,000) per accident for damage such Equipment (and which may be carried as part of the coverage required under clause (i) above or pursuant to a separate policy or endorsement). If such coverage is provided pursuant to a separate Boiler and Machinery policy or endorsement, Tenant will obtain a Joint Loss Agreement. Either such Boiler and Machinery policy endorsements or the Special Causes of Loss policy required in clause (i) above shall include at least $5,000,000 per incidence for Off-Premises Service Interruption and Expediting Expenses, Ammonia Contamination, and Hazardous Materials Clean-Up Expense and may contain a deductible not to exceed $100,000 (which is Tenant's responsibility). Such policies shall name Landlord and Lender as loss payees, with respect to such Leased Premises.

(iii) Business Income/Extra Expense Insurance at limits sufficient to cover 100% of the period of indemnity not less than eighteen (18) months from time of loss and an extended period of indemnity of not less than one hundred eighty (180) days. Such policies shall name Landlord and Lender as loss payees with respect to any payments under such policies for Rent under the Lease, and shall name Tenant as the loss payee for all other payments thereunder.

(iv) Commercial General Liability Insurance against claims for personal injury, bodily injury, death, accident or property damage occurring on, in or as a result of the use of such Leased Premises, in an amount not less than $1,000,000 per Occurrence/$2,000,000 Annual Aggregate and $2,000,000 Products/Completed Operations Annual Aggregate on a per location basis and on an occurrence basis. Coverage shall also include elevators/escalators (if any), independent contractors, contractual liability and Products/Completed Operations Liability coverage and liability caused by acts of terrorism. Such policies shall name Landlord and Lender as additional insureds with respect to such Leased Premises.

(v) Business Automobile Liability Insurance (including Owned – if any; Non-Owned and Hired Automobile Liability) in an amount of $1,000,000 Combined Single Limit.

(vi) Workers' Compensation insurance in the amount required by applicable Law (or, in lieu of any Workers' Compensation insurance, a program of self-insurance complying with the rules, regulations and requirements of the appropriate governmental agency).

(vii) Employers' Liability insurance covering all persons employed by Tenant in connection with any work done on or about such Leased Premises in the amount of $1,000,000 per accident, $1,000,000 per illness, per employee, and $1,000,000 per illness, in the aggregate (or, in lieu of any Workers' Compensation insurance (which shall contain Employers' Liability insurance), a program of self-insurance complying with the rules, regulations and requirements of the appropriate governmental agency). Landlord reserves the right to have evidence shown that any self-insurance program has been accepted by the appropriate governmental agency.

(viii) Excess/Umbrella Liability in an amount of not less than $25,000,000 on a per location basis that includes Follow Form coverage for Commercial General Liability, Business Automobile Liability and Employers' Liability coverages (provided, however, that if and to the extent Tenant determines, in its reasonable business judgment, that changes to such coverage are advisable given Tenant's current business and operations, Landlord agrees not to unreasonably withhold, condition or delay its consent to such changes).

(ix) During any period in which any Alterations at any Leased Premises are being undertaken by Tenant, and such Alterations are not insured pursuant to the policies and endorsements required in Paragraph 16(b)(i) above, builder's risk insurance or property insurance (either of which may contain commercially reasonable sublimits) covering the total completed value, including all hard costs with respect to any Improvements being constructed, altered or repaired (on a completed value, non-reporting basis), replacement cost of work performed and equipment, supplies and materials furnished in connection with such construction, alteration or repair of Improvements or Equipment, together with such other endorsements as Landlord may reasonably require, and general liability, worker's compensation and automobile liability insurance with respect to the

Improvements being constructed, altered or repaired, all in form and substance reasonably acceptable to Lender, Landlord and Tenant. Such policies shall name Landlord and Lender as Named Insured, Mortgagee, Additional Insured and/or Loss Payees with respect to such Leased Premises, as applicable.

(x) If Tenant handles, stores or utilizes Hazardous Substances (other than pesticides, cleaning supplies, toner for photocopying machines, and other commercially reasonable amounts of substances directly related to the cleaning, operation and/or maintenance of the Leased Premises or Tenant's office equipment (including, without limitation, diesel fuel contained in the Diesel Tank)) in its business operations, pollution legal liability insurance (with limits to be reasonably determined by Landlord and Tenant on a case by case basis). Such pollution legal liability insurance shall name Landlord and Lender as additional insureds with respect to such Leased Premises.

(xi) Such other insurance of the type and amount that is at the time requested customarily carried by prudent owners or tenants with respect to properties similar in character, location, use and occupancy to the respective Leased Premises (or other terms with respect to any insurance required pursuant to this Paragraph 16, including without limitation amounts of coverage, deductibles, form of mortgagee clause) on or in connection with such Leased Premises, all as may be reasonably agreed upon by Landlord, Lender and Tenant.

(c) The insurance required by Paragraph 16(b) shall be written by companies having a Best's rating of A-X or above and are authorized to write insurance policies by the State Insurance Department (or its equivalent) for the states in which each of the Leased Premises is located. The insurance policies (i) shall be for such terms as Landlord may reasonably approve and (ii) shall be in amounts sufficient at all times to satisfy any coinsurance requirements thereof. If said insurance or any part thereof shall expire, be withdrawn, become void, voidable, unreliable or unsafe for any reason, including a breach of any condition thereof by Tenant or the failure or impairment of the capital of any insurer, or if for any other reason whatsoever said insurance shall become reasonably unsatisfactory to Landlord, Tenant shall promptly obtain new or additional insurance reasonably satisfactory to Landlord.

(d) Each insurance policy referred to in clauses (i), (ii), (iii) and (ix) of Paragraph 16(b) shall contain standard non-contributory mortgagee clauses in favor of and acceptable to Lender. Each policy required by any provision of Paragraph 16(b) shall provide that it may not be cancelled, or allowed to lapse until ten (10) days following nonpayment of any premium therefor. Tenant shall use commercially reasonable efforts to cause each insurer issuing a policy required by any provision of Paragraph 16(b) to agree not to cancel such policy without at least ten (10) days' prior notice to Landlord and Lender.

(e) Tenant shall pay as they become due all premiums for the insurance required by Paragraph 16(b), shall renew or replace each policy and deliver to Landlord evidence of the payment of the full premium therefor or installment then due at least ten (10) days prior to the expiration date of such policy, and shall promptly deliver to Landlord all original certificates of insurance evidencing such coverages or, if requested by Landlord or required by Lender, original or certified policies. All certificates of insurance (including liability coverage) provided to Landlord and Lender

shall be on ACORD Form 28 (2003/10) for Property Coverages or ACORD Form 25 Liability Coverages (or its equivalent in the Landlord's sole discretion).

(f) Anything in this Paragraph 16 to the contrary notwithstanding, any insurance that Tenant is required to obtain pursuant to Paragraph 16(b) may be carried under a "blanket" policy or policies covering other properties of Tenant or under an "umbrella" policy or policies covering other liabilities of Tenant, as applicable; provided that, such blanket or umbrella policy or policies otherwise comply with the provisions of this Paragraph 16, and upon request, Tenant shall provide to Landlord a Statement of Values which may be reviewed annually and shall be amended to the extent determined necessary by Landlord based on revised Replacement Cost Valuations. The original or a certified copy of each such blanket or umbrella policy shall promptly be delivered to Landlord.

(g) Tenant shall not carry separate insurance concurrent in form or contributing in the event of a Casualty with that required in this Paragraph 16 unless (i) Landlord and Lender are included therein as Named Insureds, Additional Insureds, Mortgagee and with Loss Payable as provided herein, and (ii) such separate insurance complies with the other provisions of this Paragraph 16. Tenant shall immediately notify Landlord of such separate insurance and shall deliver to Landlord the original policies or certified copies thereof.

(h) Each policy (other than workers' compensation coverage or any other coverage prohibited by law) shall contain a full waiver of subrogation against the Landlord.

(i) The proceeds of any insurance required under Paragraph 16(b) shall be payable as follows: proceeds payable under clauses (iv), (v), (vi), (vii) and (viii) of Paragraph 16(b) and proceeds attributable to the general liability coverage of construction/alterations insurance under clause (ix) of Paragraph 16(b) shall be payable to the Person entitled to receive such proceeds; and proceeds of insurance required under clauses (i) and (ii) of Paragraph 16(b) and proceeds attributable to construction/alterations insurance (other than its general liability coverage provisions) under clause (ix) of Paragraph 16(b) shall be payable to Landlord or Lender and applied as set forth in Paragraph 17 or, if applicable, Paragraph 18. Proceeds of insurance required under clause (iii) of Paragraph 16(b) for the payment of Rent under the Lease (and proceeds from any other business interruption or similar coverage required hereunder for the payment of Rent under the Lease) shall be payable to Landlord and Lender, and all other proceeds of insurance required under clause (iii) of Paragraph 16(b) (and proceeds from any other business interruption or similar coverage required hereunder other than for the payment of Rent under the Lease) shall be payable to Tenant. Notwithstanding the foregoing in this clause (i), the Parties agree that any proceeds of insurance initially paid by any insurer jointly to Landlord and Tenant shall not be a breach of this Lease; provided, however, that upon any such joint payment, Tenant agrees to take all reasonable steps to deliver any such proceeds (or the full right to such proceeds, if payment is made in the form of a settlement check) to Landlord if and to the extent Landlord is entitled to same under the terms of this Lease. Tenant shall apply the Net Award to restoration of such Leased Premises in accordance with the applicable provisions of this Lease unless a Termination Event shall have occurred and Tenant has given a Termination Notice.

17. Casualty and Condemnation.

(a) Tenant shall give Landlord prompt notice of the occurrence of any Casualty at any of the Leased Premises. Landlord, in its discretion and upon notice to Tenant (except that no notice to Tenant shall be required if an Event of Default has occurred and is continuing), may adjust, collect and compromise all claims under any of the insurance policies required by Paragraph 16(b) (except claims (i) payable from comprehensive general public liability insurance, or (ii) in an amount less than One Million Dollars ($1,000,000) ("Excluded Claims") and to execute and deliver on behalf of Tenant all necessary proofs of loss, receipts, vouchers and releases required by the insurers. Provided that no Event of Default has occurred and is continuing, Tenant shall be entitled to participate with Landlord in any adjustment, collection and compromise of the insurance claim payable in connection with a Casualty. Tenant agrees to sign, upon the request of Landlord, all such proofs of loss, receipts, vouchers and releases. Landlord reserves the right to join Tenant in any claim. If Landlord so requests, Tenant shall adjust, collect and compromise any and all such claims, and Landlord shall have the right to join with Tenant therein. Any adjustment, settlement or compromise of any such claim shall be subject to the prior written approval of Landlord, and Landlord shall have the right to prosecute or contest, or to require Tenant to prosecute or contest, any such claim, adjustment, settlement or compromise. Each insurer is hereby authorized and directed to make payment under said policies, including return of unearned premiums, directly to Landlord instead of to Landlord and Tenant jointly, and Tenant hereby appoints Landlord as Tenant's attorney-in-fact to endorse any draft therefor. The rights of Landlord under this Paragraph 17(a) shall be extended to Lender if and to the extent that any Mortgage so provides. Notwithstanding anything to the contrary contained herein, Tenant shall have the exclusive right to adjust, collect and compromise all Excluded Claims and each insurer is hereby authorized and directed to make payments with respect to Excluded Claims solely to Tenant.

(b) Each Party shall provide the other with immediate written notice of its receipt of a Condemnation Notice relating to any of the Leased Premises. Landlord is authorized to collect, settle and compromise, in its discretion (and, if no Event of Default exists, upon notice to Tenant), the amount of any condemnation award. Provided that no Event of Default has occurred and is continuing, Tenant shall be entitled to participate with Landlord in any Condemnation proceeding or negotiations under threat thereof and to contest the Condemnation or the amount of the condemnation award therefor. No agreement with any condemning authority in settlement or under threat of any Condemnation shall be made by Tenant without the written consent of Landlord. Subject to the provisions of this Paragraph 17(b), Tenant hereby irrevocably assigns to Landlord any award or payment to which Tenant is or may be entitled by reason of any Condemnation, whether the same shall be paid or payable for Tenant's leasehold interest hereunder or otherwise; but nothing in this Lease shall impair Tenant's right to any award or payment on account of Tenant's trade fixtures, equipment or other tangible property that is not part of the Equipment, moving expenses, loss of goodwill, or loss of business, if available, to the extent that and so long as (i) Tenant shall have the right to make, and does make, a separate claim therefor against the condemning authority and (ii) such claim does not in any way reduce either the amount of the award otherwise payable to Landlord for the Condemnation of Landlord's interest in such Leased Premises or the amount of the award (if any) otherwise payable for the Condemnation of Tenant's leasehold interest hereunder. The rights of Landlord under this Paragraph 17(b) shall also be extended to Lender if and to the extent that any Mortgage so provides.

(c) If any Partial Casualty (whether or not insured against) shall occur (other than a Requisition) to any of the Leased Premises, this Lease shall continue, notwithstanding such event, and there shall be no abatement or reduction of any Rent. Promptly after such Partial Casualty or Partial Condemnation, Tenant, as required in Paragraphs 12(b) and 13(b), shall commence and diligently continue to restore such Leased Premises as nearly as possible to its value, condition and character immediately prior to such event (assuming such Leased Premises to have been in the condition required by this Lease). Landlord and Lender shall make any Net Award available to Tenant for restoration in accordance with and subject to the provisions of Paragraph 19(a). If a Requisition shall occur, Tenant shall comply with the terms and conditions of Paragraph 17(d). If any Casualty or Condemnation that is not a Partial Casualty or Partial Condemnation or Requisition shall occur, Tenant shall comply with the terms and conditions of Paragraph 18. Upon the expiration of the Term, any portion of the Net Award that shall not have been paid as expressly set forth herein shall be retained by Landlord.

(d) If any Partial Condemnation or Requisition shall occur to any of the Leased Premises, this Lease shall continue, notwithstanding such event, and the Rent due and payable hereunder shall be reduced by a fraction, the numerator of which is the Net Award paid to Landlord or Lender with respect thereto, and the denominator of which is the Acquisition Cost for the applicable Leased Premises set forth on Exhibit E. In the event of a Requisition of any of the Leased Premises, any Net Award payable by reason of such Requisition shall be (i) retained by Landlord, or (ii) paid to Lender to the extent that any Mortgage so provides.

18. Termination Events.

(a) If all or substantially all of any of the Leased Premises shall be taken by a Condemnation, Tenant shall, within thirty (30) days after Tenant receives a Condemnation Notice, give to Landlord written notice of Tenant's election to terminate this Lease with respect to the applicable Leased Premises (a "Termination Notice").

(b) If any portion of either of the Leased Premises shall be subject to a Condemnation that has or will render such Leased Premises inaccessible, unavailable for use, or unsuitable for restoration for continued use and occupancy in Tenant's business, as determined by a certified structural engineer or other suitable third party retained by Tenant and reasonably acceptable to Landlord, or would prevent current use under applicable zoning or use regulations, Tenant shall have the option of (i) restoring such Leased Premises, to the extent practicable, using the Net Award payable in connection with such Condemnation in accordance with the conditions and requirements set forth in this Lease or (ii) delivering to Landlord a Termination Notice with respect to the applicable Leased Premises prior to the earlier of (x) thirty (30) days after Tenant receives the report of such certified structural engineer or other suitable third party, a copy of which report shall be delivered to Landlord with the Termination Notice, and (y) sixty (60) days after Tenant receives the applicable Condemnation Notice. If Tenant elects not to deliver a Termination Notice, then Tenant shall restore such Leased Premises, to the extent practicable, in accordance with Paragraphs 17 and 19.

(c) If a Casualty occurs with respect to any of the Leased Premises which shall be determined by a certified structural engineer retained by Tenant and acceptable to Landlord to be a loss so substantial that restoration or rebuilding for any Permitted Use under Paragraph 4(a) would

either take more than two hundred seventy (270) days or be economically infeasible, Tenant shall have option of (i) restoring, rebuilding or repairing such Leased Premises, using the Net Award payable in connection with such Casualty in accordance with the conditions and requirements of this Lease, or (ii) delivering to Landlord a Termination Notice with respect to the applicable Leased Premises prior to the earlier of (X) thirty (30) days after Tenant receives the report of such certified structural engineer, a copy of which report shall be delivered to Landlord with the Termination Notice, and (Y) sixty (60) days after the date of such Casualty.

(d) A Termination Notice shall contain (i) notice of Tenant's intention to terminate this Lease with respect to the applicable Leased Premises on the Basic Rent Payment Date immediately following the date on which Landlord receives the Net Award (the "Termination Date"), and (ii) a binding and irrevocable commitment of Tenant to pay the Termination Amount on the Termination Date.

(e) If Tenant delivers a Termination Notice to Landlord, this Lease shall terminate on the Termination Date with respect to the applicable Leased Premises. On the Termination Date, (i) Tenant shall pay to Landlord the Termination Amount and all Rent due on or prior to the Termination Date with respect to the applicable Leased Premises (collectively, "Remaining Obligations"), (ii) all other obligations of Tenant under this Lease with respect to the applicable Leased Premises shall terminate except any obligations hereunder that expressly survive termination of the Lease, (iii) Tenant shall immediately vacate and shall have no further right, title or interest in or to such Leased Premises, and (iv) the Net Award shall be retained by Landlord. Notwithstanding anything to the contrary hereinabove contained, if on the Termination Date, Tenant has not satisfied all Remaining Obligations with respect to the applicable Leased Premises, then Landlord may, at its option, extend the Termination Date to a date which is no later than the first Basic Rent Payment Date after the date on which Tenant has satisfied all such Remaining Obligations.

(f) If this Lease terminates with respect to one of the Leased Premises, this Lease shall continue with respect to the other Leased Premises, and Basic Rent shall be reduced proportionately, consistent with the allocations of Basic Rent between the Leased Premises set forth on Exhibit D.

19. Restoration.

(a) If any Net Award with respect to any of the Leased Premises is in excess of One Million Dollars ($1,000,000) (which amount shall be adjusted annually in proportion to increases in the CPI), Landlord (or Lender if required by any Mortgage) shall hold the Net Award in a fund (the "Restoration Fund") and disburse amounts from the Restoration Fund only in accordance with the following conditions:

(i) Tenant shall commence the restoration as soon as reasonably practical and diligently pursue completion of such restoration to completion;

(ii) prior to commencement of restoration, (A) the architects, contracts, contractors, plans and specifications and a detailed budget for the restoration shall have been approved by Landlord, such detailed budget shall reflect that the Restoration Fund is sufficient to cover the costs of restoration, including any additional insurance required as a result of restoration,

and payments of Rent due under this Lease during the period of such restoration (if Landlord reasonably determines that the Restoration Fund is insufficient to cover such costs, Tenant must deposit such required excess amount as directed by Landlord as provided in, and subject to, Paragraph 19(b) below), (B) Landlord and Lender shall be provided by Tenant with mechanics' lien insurance, "owner contractor's protective liability insurance" (if available), builder's risk completed value insurance and acceptable performance and payment bonds which insure satisfactory completion of and payment for the restoration, are in an amount and form and have a surety acceptable to Landlord, and name Landlord and Lender as additional dual obligees, and (C) appropriate notices of commencement of work shall have been filed if required in the appropriate jurisdiction;

(iii) at the time of any disbursement, (A) no Event of Default shall exist, (B) all materials installed and work and labor performed (except to the extent being paid out of the requested disbursement) in connection with the restoration shall have been paid in full, and (C) no mechanics' or materialmen's liens or stop orders or notices of pendency shall have been filed or threatened against such Leased Premises and remain undischarged or, alternatively, the obligations related to the Work shall be fully bonded to the satisfaction of Landlord;

(iv) disbursements shall be made no more frequently than once a month and be in an amount not exceeding the cost of the Work completed since the last disbursement, upon receipt of (A) satisfactory evidence, including architects' certificates, of the stage of completion, the estimated total cost of completion and performance of the Work to date in a good and workmanlike manner in accordance with the contracts, plans and specifications, (B) waivers of liens (any of which may be conditional waivers if and to the extent the Person delivering the waiver has not yet been paid for the applicable work), (C) sworn statements as to completed Work and the cost thereof for which payment is requested from the contractor engaged to complete the Work, (D) a satisfactory bringdown of title insurance, and (E) other evidence of cost and payment so that Landlord and Lender can verify that the amounts disbursed from time to time are represented by Work that is completed, in place and free and clear of mechanics' and materialmen's lien claims;

(v) each request for disbursement shall be accompanied by a certificate of Tenant, signed by a senior executive officer of Tenant, describing the Work for which payment is requested, stating the cost incurred in connection therewith, stating that Tenant has not previously received payment for such Work and, upon completion of the Work, also stating that the Work has been fully completed and complies with the applicable requirements of this Lease and with all Legal Requirements;

(vi) Landlord may retain ten percent (10%) of the Restoration Fund until the Work is fully completed; and

(vii) such other reasonable conditions as Landlord or Lender may impose; including without limitation, if the costs of restoration exceeds One Million Dollars ($1,000,000) for the Long Beach Real Property or Eight Hundred Thousand Dollars ($800,000) for the Columbus Real Property (which amounts shall be adjusted annually in proportion to increases in the CPI) and Landlord so requests, or, if required by Lender, a requirement that Tenant hire a casualty consultant.

(b) Landlord agrees that neither Landlord nor Lender shall commingle any amounts in any Restoration Fund with Landlord's or Lender's other funds, and Tenant acknowledges that such amounts in any Restoration Fund shall not bear interest. Prior to commencement of restoration and at any time during restoration, if the estimated cost of completing the restoration Work free and clear of all liens, as reasonably determined by Landlord or Lender, exceeds the amount of the Net Award available for such restoration, the amount of such excess shall, upon demand by Landlord, be paid by Tenant to Landlord to be added to the Restoration Fund. Any sum so added by Tenant which remains in the Restoration Fund upon completion of restoration shall be refunded to Tenant. For purposes of determining the source of funds with respect to the disposition of funds remaining after the completion of restoration, the Net Award shall be deemed to be disbursed prior to any amount added by Tenant. For the avoidance of doubt, the Parties acknowledge that any obligation of Tenant to perform any Restoration Work hereunder is conditioned on Tenant being entitled to receive, and receiving (or receiving the benefit of), the applicable Net Award to fund the costs of such Restoration Work (subject to the conditions set forth in this Paragraph 19).

(c) If any sum remains in the Restoration Fund after completion of the restoration and any refund to Tenant pursuant to Paragraph 19(b), such sum (the "Remaining Sum") shall be refunded (i) to Tenant, if the applicable Restoration Work was related to a Casualty, and (ii) to Landlord, if the applicable Restoration Work was related to a Condemnation.

(d) Tenant waives and releases all statutory rights and remedies in favor of Tenant in the event of damage or destruction, including without limitation those available under California Civil Code Sections 1932 and 1933(4). Tenant hereby waives any rights and the benefits of Section 1265.130 of the California Code of Civil Procedure or any other statute granting Tenant specific rights in the event of a Condemnation which are inconsistent with the provisions of Paragraphs 17, 18 and 19.

20. Intentionally Omitted.

21. Assignment and Subletting; Prohibition Against Leasehold Financing.

(a) Except as provided in this Paragraph 21, Tenant shall not assign or sublet Tenant's interest in this Lease and any purported assignment or sublease in violation of this Paragraph 21 shall be null and void. Tenant hereby waives and releases its rights under Section 1995.310 of the California Civil Code or under any similar law, statute or ordinance now or hereafter in effect.

(b) Tenant may assign all, but not less than all, of Tenant's interest in this Lease (voluntarily or involuntarily, whether by operation of law or otherwise, including through merger or consolidation) in connection with a Permitted Asset Transfer or a Permitted Change of Control (each, a "Preapproved Assignment"), without the prior written consent of Landlord. Any other assignment of Tenant's interest in this Lease shall be subject to Landlord's prior written consent, which consent shall not be unreasonably withheld, conditioned or delayed. Tenant agrees that it shall deliver to Landlord in connection with any request for assignment information regarding the Review Criteria of the proposed assignee.

(c) For purposes of this Paragraph 21, the term "Permitted Asset Transfer" shall mean the sale, conveyance, transfer or other disposition by Tenant, to any Person, of all or substantially all of Tenant's assets whether in a single transaction or series of transactions (an "Asset Transfer"), in which the following conditions are met: (i) the Asset Transfer is to (A) a wholly-owned Subsidiary of Tenant, (B) a Credit Entity (or an entity whose obligations under the Lease are guaranteed by a Credit Entity pursuant to a guaranty in form and substance reasonably acceptable to Landlord), or (C) a Qualified Transferee (or an entity whose obligations under the Lease are guaranteed by a Qualified Transferee pursuant to a guaranty in form and substance reasonably acceptable to Landlord); and (ii) this Lease is assigned to such Person as a part of such Asset Transfer. In the event of a Permitted Asset Transfer, Tenant shall be relieved of its obligations under this Lease upon the complete assignment and assumption of the Tenant's obligations under this Lease to such Person and any existing Guarantor shall be released from its obligations under its Guaranty upon the delivery to Landlord of a replacement Guaranty in form and substance reasonably acceptable to Landlord (a " Replacement Guaranty"). Any Replacement Guarantor will comply with the financial reporting provisions of Paragraph 28.

(d) For purposes of this Paragraph 21, the term "Permitted Change of Control" shall mean the acquisition, directly or indirectly, by any Person or "group" (within the meaning of Section 13(d) or Section 14(d) of the Securities Exchange Act of 1934, as amended) pursuant to a single transaction or series of related transactions of (i) more than 50% of the voting stock, partnership interests, membership interests or other equitable and/or beneficial interests of Tenant or (ii) the power (whether or not exercised) to elect a majority of the directors of Tenant or voting control of any partnership or limited liability company or other entity acting as its general partner or managing member (including through a merger or consolidation of Tenant with or into any other Person) (in either case described in clause (i) and (ii), "Control"), in which the purchaser of such Control (the " Control Person") is (A) a wholly-owned Subsidiary of Tenant, (B) after taking into account the transaction that resulted in the acquisition of such Control, a Credit Entity, or (C) a Qualified Transferee. None of the following shall be deemed to be a prohibited or restricted assignment for purposes of this Paragraph 21: (x) the sale of stock by persons or parties through the "over-the-counter market" or through any recognized stock exchange, other than by those deemed to be a "control-person" within the meaning of the Securities Exchange Act of 1934A, or (y) any sale or other transfer of less than 50% of the voting stock, partnership interests, membership interests or other equitable and/or beneficial interests of Tenant where the acquiring Person or group does not otherwise satisfy the criteria for "Control" described in clause (ii) of the definition thereof. In the event of a Permitted Change of Control in which the purchaser by such Control is a Credit Entity, upon execution of by such Control Person of a Replacement Guaranty, the existing Guarantor will be released from any existing Guaranty, and such Control Person shall become the Replacement Guarantor hereunder and comply with the financial reporting provisions of Paragraph 28.

(e) Tenant may, upon thirty (30) days prior written notice to Landlord, and without any requirement for consent or approval by Landlord, enter into one or more Subleases with the following: (i) any Person (including without limitation any Governmental Entity) so long as the aggregate amount of rentable square footage at either of the Leased Premises subject to Subleases to Persons other than Exempt Persons does not exceed 40% of the total rentable square footage at such Leased Premises (the " Subleasing Threshold"), and (ii) without limiting anything contained

in clause (i) of this sentence, any Exempt Person (any such Sublease referenced in clause (i) or clause (ii) of this sentence, a "Preapproved Sublease"). For the avoidance of doubt, the Parties hereby agree that (1) the total rentable square footage at the Long Beach Leased Premises is 461,263 rentable square feet and the total rentable square footage at the Columbus Leased Premises is 160,000 rentable square feet, (2) in no event shall any Sublease with any Exempt Person be deemed to require consent or approval of Landlord by reason of the Subleasing Threshold (or otherwise, except as provided below with respect to the terms of such Sublease); (3) any Existing Subleases (other than any Existing Subleases that are with Exempt Persons) will be included in any determination of whether the Subleasing Threshold is (or would be) exceeded (if and to the extent such Existing Subleases are Subleases at the time of determination), and (4) in no event shall the fact that the Subleasing Threshold may be exceeded on the Effective Date with respect to Existing Leases at either Leased Premises be deemed a breach by Tenant hereunder or require any additional consent or approval by Landlord.. Other than Preapproved Subleases, at no time during the Term shall Tenant enter into a Sublease with respect to all or any portion of any of the Leased Premises without the prior written consent of Landlord, which consent shall not be unreasonably withheld, conditioned or delayed, with Landlord agreeing that, without limitation, Landlord shall grant consent to any proposed Sublease with any Person, so long as such Sublease contains the Required Sublease Provisions (if required pursuant to this Paragraph 21), where the Review Criteria for such Person are reasonably determined to meet or exceed the general requirements for such characteristics of tenants or subtenants imposed by landlords of "Class A" office buildings in the market area for the particular Leased Premises that would be subject to such Sublease. Tenant agrees that each Sublease shall provide as follows (collectively, the "Required Sublease Provisions"): (w) the term of the Sublease does not extend beyond the then-current Term minus one day including any extension options of the sublease, (x) the Sublease is subject and subordinate to this Lease and any Mortgage, and the Sublease terminates upon any termination of this Lease, unless Landlord delivers a Sublease SNDA executed by Landlord and Lender (as described in Paragraph 21(f) below) or otherwise agrees not to disturb subtenant upon a termination of the Lease and elects in writing to cause the subtenant to attorn to and recognize Landlord as the lessor under such Sublease, whereupon following any termination of the Lease such Sublease shall continue as a direct lease between the subtenant and Landlord upon all the terms and conditions of such Sublease, (y) the Sublease contains (i) financial reporting requirements materially similar to those described in Paragraph 28 (except for those Subleases demising less than five percent (5%) of the rentable square footage of either Leased Premises, where financial reporting requirements shall be commercially reasonable for the applicable subtenant), (ii) subtenant obligations that are substantially the same (or more favorable to the Tenant as sublandlord) as Tenant's obligations under Paragraph 4(a) (excluding any provisions therein relating to Alterations), and Paragraph 10(a) (excluding (A) any provisions therein relating to Insurance Requirements, and (B) Paragraph 10(a)(iii)), (iii) provisions requiring subtenant to maintain the sublease premises in as good repair, appearance and condition as they are on the effective date of the applicable Sublease, not to commit or permit waste, and to take all precautions reasonably necessary to prevent waste from occurring at the sublease premises, and (iv) other commercially reasonable terms, and (z) the Sublease requires the subtenant to deliver a certification in form substantially similar to that attached to this Lease as Exhibit G; provided, however, that, in no event shall (A) any Required Sublease Provisions be required to be included in any Exempt Sublease, or (B) any Required Sublease Provisions (except as provided in clause (w) of the Required Sublease Provisions) be required in any Sublease with any Governmental Entity; provided, however,

that (1) any Sublease with any Governmental Entity shall provide that such Sublease is subordinate to any Mortgage and the Lease, if such Government Entity's form of lease/sublease so expressly provides, or any applicable regulations so expressly permit, but, without limitation, such Sublease may provide for automatic nondisturbance protection for the subtenant; and (2) if such Sublease is with a state or municipal agency, or any other Governmental Entity that does not have any publicly rated debt, such Sublease shall comply with clause (y)(i) of the Required Sublease Provisions. Without limiting the foregoing, Landlord agrees that it shall not unreasonably withhold, condition or delay its consent to any form of Sublease proposed by Tenant.

(f) If Tenant assigns all of its rights and interest under this Lease, the assignee under such assignment shall expressly assume all the obligations of Tenant hereunder, actual or contingent, arising after the date of such assignment, by a written instrument delivered to Landlord at the time of such assignment. Landlord shall deliver a subordination, non-disturbance and attornment agreement in connection with any Sublease for more than 7,500 rentable square feet, substantially in the form attached hereto as Exhibit L, or, if requested by Tenant, another form reasonably satisfactory to Landlord and Tenant, in each case executed by Landlord and any Lender or other holder of any Mortgage encumbering the applicable Leased Premises (a " Sublease SNDA"), not less than five (5) Business Days after request therefor from Tenant. Except as expressly provided herein, no assignment or Sublease shall affect or reduce any of the obligations of Tenant hereunder or the obligations of any Guarantor under the Guaranty, and all such obligations of Tenant and such Guarantor shall continue in full force and effect as obligations of a principal and not as obligations of a guarantor, as if no assignment or sublease had been made.

(g) Tenant shall, within ten (10) days after the execution and delivery of any assignment or Sublease, deliver a duplicate original copy thereof to Landlord which, in the event of an assignment, shall be in recordable form. With respect to any Preapproved Assignment or any Preapproved Sublease, at least five (5) days prior to the effective date of such assignment or sublease, respectively, Tenant shall provide to Landlord information reasonably required by Landlord to establish that the proposed assignee or subtenant meets the requirements set forth herein regarding a Preapproved Assignment, or Preapproved Sublease, as the case may be.

(h) As security for the performance of its obligations under this Lease, Tenant hereby grants, conveys and assigns to Landlord all right, title and interest of Tenant in and to all Subleases now in existence or hereafter entered into with respect to all or any portion of any of the Leased Premises, any and all extensions, modifications and renewals thereof and all rents, issues and profits therefrom. Landlord hereby grants to Tenant a license to collect and enjoy all rents and other sums of money payable under any Sublease of any of the Leased Premises; provided, however, that during the continuance of an Event of Default Landlord shall have the right at any time upon notice to Tenant and any subtenants to revoke said license and to collect such rents and sums of money and retain the same. Any amounts collected shall be applied to Rent payments next due and owing. Except with respect to Subleases that do not require Landlord's consent hereunder, Tenant shall not consent to, cause, or allow, any modification or amendment of any of the terms, conditions or covenants of any of the Subleases or the termination thereof (other than pursuant to termination rights of subtenants contained therein, or the expiration of any Sublease by its terms), without the prior written consent of Landlord, nor shall Tenant accept any rents more than thirty (30) days in

advance of the due date thereof, nor do anything that constitutes a breach or default under the terms of any Sublease.

(i) Without limiting Landlord's other obligations in this Paragraph 21, following any delivery by Tenant to Landlord of any request for consent to any proposed Sublease or form of Sublease, or any assignment of any of Tenant's interest in this Lease, Landlord agrees that any failure by Landlord to deliver a notice to Tenant, within thirty (30) days after delivery of such request from Tenant to Landlord, either granting Landlord's consent to same, or withholding Landlord's consent to same and stating in reasonable detail the reasons therefor, shall be deemed a consent by Landlord of such proposed Sublease, form of Sublease, or assignment (as the case may be) for all purposes hereunder; provided, however, that such time period shall be extended as reasonably necessary for Landlord to obtain the response from its Lender to such request (if Lender's consent is required with respect thereto under the terms of any applicable loan document) so long as Landlord (i) delivers to such Lender, within five (5) Business Days after Tenant's request, a written request for such Lender's consent, and (ii) uses commercially reasonable efforts to obtain Lender's consent within such thirty (30) day period, and diligently pursues such consent thereafter.

(j) Except as provided in Paragraph 34, Tenant shall not have the power to mortgage, pledge or otherwise encumber its interest under this Lease or any sublease of any of the Leased Premises, and any such mortgage, pledge or encumbrance made in violation of this Paragraph 21(j) and Paragraph 34 shall be void and of no force or effect.
