Behavioral Health Services Logic

Authorization Types

Identification and classification of behavioral health services begins with authorization and diagnosis codes, since most procedure and revenue codes are used for both behavioral health and non-behavioral health services. The types of behavioral health utilization types administered by WellCare are included in appendix 1.

Specialty Types

Claims may be identified as behavioral health and/or substance abuse services by using the provider type and/or specialty of the rendering or billing provider, regardless of the authorizations obtained for the claim, or the diagnoses included on the claim. Clear examples may include evaluation and management services performed by a psychiatrist, mental hospital claims, etc. Appendix 2 includes a listing of the specialty codes utilized by WellCare. Additional sources could include the provider type and provider specialty assigned for every provider on the Medicaid provider roster.

Authorization Type / Procedure Code Combinations

Appendix 3A, 3B, and 3C contain listings of authorization type and procedure or revenue code combinations that are considered behavioral health services for WellCare.

Appendix 3A consists of behavioral health treatment services. In some cases, such as "Psychiatric diagnostic evaluation" (90791) the service may be considered as a behavioral health service with or without an accompanying diagnosis or authorization type. In others, such as "Emergeny Room" (0450) the classification of the service will depend entirely on the authorization and/or diagnoses.

Appendix 3B contains two short revenue code / procedure code combinations used in coordination to indicate partial hospitalization.

Appendix 3C contains procedure codes are for evaluation and management and would not normally be considered for behavioral health services. However, given the appropriate accompanying authorization type and/or diagnosis they are considered behavioral health services.

Diagnosis Listing

Appendix 2 contains a comprehensive listing of the diagnosis codes considered when identifying behavioral health claims. The listing includes both ICD-9 (All dates prior to 9/30/2015) and ICD-10 (10/1/2016 and forward).

Exclusions

WellCare excludes claims from behavioral health service classification if the provider has the following specialty, or if the place of service listed on the claim is included in the listing below.

Specialty

Pediatrician

Place of service

23 – Emergency room

31 - Skilled nursing facility

33 - Custodial care facility
